Mexico, D.F., December 1st., 1972

MR. DONALD E. CRABTREE
Route 1, Box. 39
Kimberley, Idaho 83341
U.S.A.

Dear Mr. Crabtree,

Professor Lorenzo informed me that probably you will come to México next January or February, because he has invited you, and I hope you will accept. I am still working in Tlapacoya, but the problems with the lithic material persist and I think is an excellent solution to manufacture all those artifacts using the local andesite, rock used by the people that lived there 20,000 years ago, because as you know, how important technology is in these cases as well as typology, and you are the right person to study it.

Expecting that you will accept I wish you and your wife Merry Christmas and a very Happy New Year.

Yours faithfully

Lorena
