Winnipeg, Canada

Dear Bill:

Thank you for your most interesting letter of May 26th. The prospect of your visiting Idaho delights me and I do hope we can get together here for some more discussions on flintknapping and your valued advice. I plan to be here, or at the Museum in Pocatello, most of the summer. Have to make a trip to Denver and Arizona about the 1st week in July and will not return until sometime after the 15th. Will drop you a note when I have some firm dates on this.

Thank you so much for discussing my work with Dr. McBurney. Earl says he is a flintknapper and I can think of nothing that would make me happier than to meet and compare notes with him. I do hope that he will come to the States and that we will be able to get together for a session.

Have been doing some more filming on the knapping work and yours' and Dr. Birds suggestions have helped, for we are now getting the coverage we wanted. Swanson had quite a talk with the TV boys and passed some of your ideas on to them and it has really helped. Believe Swanson plans to send the films to you and Junius at a later date to have your comments and suggestions.

Do hope that you and Dr. McBurney will have a chance to come to Idaho this year or that we can arrange some way to spend some time together.

Sincerely,

Don E. Crabtree
