Mr. Donald Crabtree,
Route 1,
Kimberly, Idaho.

Dear Don:

I just spoke with Earl Swanson on the phone the other day about the prospects of my coming out to visit in Pocatello some time during the first two weeks of August.

Here is the matter that I would like to take up with you both while I am there. I am planning to construct and work with an experimental stone chipping machine this next year and have a number of ideas, not only about the machine but what to test for. Before I get too far advanced with this, I would like to know what your experience has been there with such a machine and I would also like to have a chance to learn what I can about the work that you have been doing in filming the last few years as well as having a chance to chat with you in detail about ideas that I hope we can test in the next few years.

My question now is, will it be at all convenient if I were to come to Pocatello sometime, let's say, between the 5th and the 15th of August for about three days, during which time I would hope to spend at least a solid day with each of you? I certainly hope that this can be arranged.

Best wishes as always.

Cordially yours,

Bill

William J. Mayer-Oakes,
