WINNIPEG, CANADA

Mr. & Mrs. Donald Crabtree,
Route 1,
Kimberley, Idaho.

Dear Evelyn and Don:

It seems like a dream that lasted only a short time but we finally did get together with you in Idaho, didn't we. Your hospitality and the fascinating newness of direct knowledge about stone chipping are still fresh in our minds. For both Virginia Gerelus and Les Leonoff I want to say how much we appreciated the chance to visit with you. I am, of course, also speaking for myself.

We are back in the local swing of things and I will be going over my notes of our visit in the next few days. But I wanted once again to let you know how much we enjoyed our visit and how much we learned from it.

Our trip back was uneventful. We stopped at Casper at 8:00 Saturday night, got a motel in town and after going out for dinner went back to relax and watch a little television. The next morning we got away by 10:00 and flew non-stop to Winnipeg under sunny, clear blue skies.

Under separate cover I am sending back to you the notes on the conference at Les Eyzie plus a copy of the thesis I mentioned to you and some other papers that may be of interest. We must certainly keep in closer touch from now on. Perhaps you will be able to visit us in Taos next year. We will be moving in there on September 1st.

With all best wishes as always.

Cordially yours,

Bill

William J. Mayer-Oakes,
Professor and Head.
