Dear Bill:

Thanks so much for sending your publications and the Les Eyzies tapes. Have not had time to read all of your work, but am really interested in what I have read. The name of Laurent's book is "Heureuse Prehistoire" Publisher is Pierre Fanlac, Perigeaux. Believe if you send to the University of Bordeaux, you can buy it through them.

Just returned from an interesting trip of the Southwest. Visited with Haury at Tucson for three days, then to the Grasshopper site, where they are finding some fabulous material. Then went to Marie's site near Kersey and was so happy to find Junius Bird there. Marie is finding Scottsbluff and Eden points in association with bison bones - and they had just started the dig. Think this one could be really big.

We really enjoyed having you and the students here and do hope you will do it again soon. Hope you can make the Great Basin Conference in Pocatello in August. Leave the 8th for Glass Butte to do some photographing of mining operations and performing at the quarry and, with any luck, we may have the films for the conference.

Marie and Daugherty are tentatively planning some kind of a conference in Tempe in February regarding lithics, but nothing has jelled yet. Hope it works out and that you will be invited.

Yours very truly,

Don E. Crabtree

P.S. Just got a book from Bordes which I know you will want. "The Old Stone Age" by Francois Bordes, World University Library, McGraw-Hill Book Co., New York, Toronto. In English - price \$2.45. This one is a "must".
