Don Crabtree
Kimberly, ID 83341

Dear Don:

Marie-Anne Demuyneck and I will be in Moscow to attend the commencement ceremony. I would like for Marie-Anne to spend some time with you before or after the ceremony to see some of your techniques of lithic manufacture.

Marie-Anne is a doctoral candidate at the University of Leuven, Belgium studying under Dr. P. Vermsersch. The last couple of years she has worked with us in upper Egypt analysing lithics from predynastic sites. At present she is working on sites in Central Texas.

Yours truly,

Lewis E. MacNaughton
Adjunct
Research Archaeologist
