

MUTO RT, 1 Box 10 A  
UNIONTOWN, WASH.

①

Dear Don & Evelyn,

Gosh, you're right, its gonna get worse before it gets better. I'm being hounded to do everybody elses work, its a nice gesture on their part but it sure is hard to do my own. Doc 'just confirmed that I will be ~~teaching~~ teaching the lithics class next semester so I will get a much needed raise in \$ as well as some teaching experience.

The Datsun died an expensive death & we spent the last of our savings to get a '72 Ford Pinto, I hope it is trouble free for the next year anyway. it was the cheapest car we could get, and we looked at them all.

Christmas went well here and the snow & temp. kept us informed of the season. The temp. is usually 20 or lower and there is 3ft. of snow on the ground.

hee & I both look forward to getting out of this medieval atmosphere & return to Idaho.

What do you hear from the other folks that we both know? I keep sending letters but it seems that everyone is busy.

Do you remember those Attribute lists that Carl Phagan & Cynthia Irwin-Williams sent to you last summer? if so would it be possible for me to have copies? - send a bill & I'll pay you

Ca. 7.14.1

I'm going to try to get a lithic tech Newsletter out by the end of January. Dick Daugherty said he could find the \$50 for the first mailing & Ruthann has been gathering info from across the country. If you have anything to Announce it will reach about 200 people interested in lithics & it would probably help circulation & perhaps in a year or so a journal of lithic tech. will grow out of it.

Well I've got to write Earl now so untill later -

Guy.
