

Dear Don,

Here is the first draft of the Mewhinney business. Its very rough and the hard hammer diagnostics aren't included yet but I think its in the proper vein. I would appreciate it if you and Evelyn could take a blue pencil to this and let me know what it needs, what kind of data has been left out, where it isn't clear, and where I'm too far off base. I want to try to keep it fairly short since I'm going to use it as an appendix to my thesis. Wilmsen would probably publish it if it is polished enough.

Thank you  
for the help -

Guy —

P.S. Mr. & Mrs. Simms said to say hi. They are fine and thinking about you. They will arrange for the stone in late April or May. They are real fine folks.

Ca. 7.4.19.1

Dear Don -

Here is the letter from Barbara, I sent her an 8 page answer & a 3 page bibleo. also refered her to Paul & Susanna since they are all working with Hopewell stuff.

The two technology papers I read & copied - we'll talk about them when I get down next week to take those pictures for you. - - -

I'll call soon

Guy
