Dear GuY:

Have been away on a trip to Nevada and Arizona and returned with a V.W. Adventurer Camper. We really love it and now maybe can get out in the hills this summer. Earl doesn't communicate much with me about his plans for the department but did indicate that he wants to have you at pocatello while he is in England. Hope so. What a break. As for the Cromagnon project - if it comes off - Earl plans to have you and Jeff as part of the project and - worse luck - think he wants you to take notes for the writing of results.

Had a letter from Francois and he says "I am flying to the States on March 25th to visit Denver, Tucson and San Francisco. And, if you are all right in Twin Falls, I will come for some days. I could arrive on Sunday April 9th and have to leave for Boston on April 12th or 13th. "

Of course I will tell him to come but thought you might write to him and we could have the meeting at Pullman during that time. We could be together there just as well as here and I could bring materials for us to work with. So hope you will write to him and try to set it up for that time. Would be a break for Evelyn to have him there instead of here. Let me know.

Am very busy catching up on correspondence and trying to re-do the cone paper so this is a short hurried note and will write more later. Get the letter off to Francois.

Your friend,

Don
