May 15, 1972

Dear Guy and Lee:

It was good to receive your letter telling of the happenings at WSU. I do hope Henry will get some medical help for we feel his potential is unlimited and would hate to see him quit WSU. I talked with Earl on the phone this morning and told him of your letter. He thought he had sent you a proposal of the Cro Magnon project and also the NSF reject. Suppose this is why you thought Tixier and Bordes would be here - but that is out the window now. Mrs. Bradley wrote today that she expects Bordes to be here in August or Sept. to visit in Colorado and we are also invited, but that is all I know about it. You know, Francois, he may or may not come - time will tell.

I wish I knew of a suitable job for you this summer. I thought Max might need help but Earl didn't mention it and Pat is trying to get with Cynthia Irwin for the summer so I guess they don't need anyone at ISU. If I hear of anything will sure let you know. Here is some confidential information you may be able to use. Joel Shiner has applied for a two year grant for functional studies and experiments. The salaries for students were \$400.00 a month. Don't know whether he will get it or not, but I gave it my okay. If so, you may be able to talk with Joel on this. Would sure recommend you. Wish we had you back at ISU and if we ever get the films going and some returns maybe will have funds to do some hiring.

Only you would notice the wear on the truncated flakes. They seem to be much like the ones Ruth Ann Knudson had from the early man sites. This is an important observation since it seems everyone is going in for functional studies and analysis. Just received a paper from Sydney where they are doing some functional analysis.

Wish we could have spent more time together at Pullman. They should not have told you to give us so much privacy, for we would have loved to have had you at all the sessions. We did ask everyone to come to the lab, but suppose they were spooked.

We really enjoyed our visit at your beautiful home. You really have a fine location. The school starts on June 11th to July 9th and do hope we have a good session.

We'll keep our fingers crossed for your job hunting and do come and see us in Idaho and we'll break a few rocks.

With best wishes,

Don
