Craig Mountain Lumber Co.,  
Winchester, Idaho.

Gentlemen:-

We have quotation on brick made at Palouse, Washington, which we figure will represent a cost to us delivered at Winchester, based upon a 18-1/2¢ per hundred freight rate from Palouse to Winchester, of about \$20.00 per thousand, based on our giving them an order for 50,000. We will not require the full 50,000 for boiler setting but according to our estimate will require 26,500. If you will require sufficient brick for other purposes to make up the differential and the above price looks attractive to you, would you like to have us order additional brick for your account?

Yours very truly,

CHAS. C. MOORE & CO. ENGINEERS  
Seattle Office.

Seattle, Wash.

Gentlemen:-

In reply to your letter of the 19th, relative to brick. We have on hand at the present time sufficient brick to fill our requirements for repair work, and as we will not rebuild our furnaces for at least two or three years. We will therefore not be in position to use the additional twenty-four or twenty-five thousand brick.

Yours truly,

HLC
