3012 Williams St.
Denver, Colo.

Hello DICK:

WELL I'm back in circulation again, and I HOPE to stay that way. I was feeling kinda in the dark for a while, as so many of the fellows stopped writing, and consequently I lost interest, but now that the lonnggg promised OUTLINE is done were OFF again like a ROCKET HUH? what say?????

I'm gonna send you a carbon copy as soon as I hear from you. You know I've only one letter from you. And I'll want you to either destroy or return the carbon copy, RETURN if it is still legible. You can type it in what ever form you think best. Also I have a set of blueprints that are waiting to be sent to you. AND now how about a hundred cards like the one enclosed if you can afford to get them printed. I can get them printed here for a dollar a hundred if you can't get them there. I've gotten cards for most all the other members here. So it's up to you, but I'll say that they'll come in awfully handy when you get to working on some part of the outline. That is when writting for information and other material. They have proved invaluable to me.

Now I'm gonna ask how Granville is--- I haven't gotten a letter from his mother as to how he is since Jan. 10th. Of course I appreciate her circumstances, and feel terribly bad about what happened,-- and believe me that comes from the bottom of my heart. So in your next letter, PLEASE let me know the news be it good or bad-- and I hope it's GOOD.

So Adios and more power to you and your
Buddy Granville.

Rockets off----Kirksville on the screen

Henry I. Clark.

Om to Henry Clark
