Dedication

To the eternal memory and incandescent loyalty of those men of the School of Forestry, who, in the service of their country are contributing their utmost toward the day of final victory, we, the Idaho Foresters, sincerely dedicate this twenty-fifth edition of The Idaho Forester. In their ultimate success for a bright future we have placed our confidence; we know they will prove worthy to the task at hand.

Forestry Summer Camp, 1942

By STEELE BARNETT '44 and CHRIS KOCH '44

The Forestry Summer Camp of the University of Idaho is the culminating point of the underclassman's education. Here he has a chance to put into actual practice those theories which he has studied and those which he has formulated while mulling over his profession. Summer camp also is a place to receive and observe those ideas which are to form the basis of his education as an upperclassman. It is here that the forestry student comes into actual contact with the intricacies of the forests as taught by Prof. Wohletz. The camp is conveniently situated on Big Payette Lake near McCall, Idaho, a resort town in the Idaho National Forest.

Unofficially Summer Camp began June 3rd, when all the boys pulled into camp. Everybody pitched in to sweep out the tent frames and with the canvas pulled over them, the camp was soon presentable. After sprucing up a bit, we decided to get our first look at the town of McCall, and we weren't disappointed by what we saw. John Krier and Bob Walkley had been down before, and had more or less paved the way for us by getting acquainted with the local folks. The next day was spent in finishing the work to be done, and "Shepherd" Koch was able to demonstrate his ability as a mason by laying the bricks around the cistern; the other boys cleaned up around the new lodge which really lived up to the tales the seniors had told about it.

June 5th was an eventful day when Prof. Reidesel began handing out the medicine in double doses; before long we were out in the field finding out the advantages and disadvantages of the level and the transit. We found that both have their advantages, especially with girls who came by in boats. The first five weeks went by comparatively fast with McCall getting our special attention every weekend and Prof. Reidesel our attention the rest of the week. Bob Walkley and Fred Greenfield went on a weekend trip to southern Idaho, and were delayed while Fred joined the Marines. They showed up half a week later with tall tales of Portland which we found hard to believe. Just before the surveying final, Steele Barnett and Ajax Weddle took Forest Service radio training and after

three days returned with a lot of knowledge and some extra cash.

Having had surveying previously, several of the boys arrived near the end of the surveying classes, so as to be on time for Dr. Young's class in Forest Communities. About this time the patriotic urge hit camp and several boys left to join the Army. George Layos went to the Army and Bob Walkley left with Jack Payne to fight for the King. They were replaced by Roy Hoelke and Bill "Water-boy" Lang. Thus we started the last five weeks of camp with ten men. After the surveying final, Prof. Reidesel returned to Moscow with Prof. Wohletz, who at the time was worrying about the addition of a new ration book to the family. The following Monday, Dr. Young had Ajax warming up the truck for those field trips we were to take. The first field trip was around the lake to see various stages of plant succession and to get an introduction into things to come. We climbed up cliffs, over windfalls, and even through swamps to get to a certain plant or to study a xerosere or hydrosere. The next several days were spent in the study of range conditions and the methods of setting up experimental plots. The last and best field trip was to the Circle C Ranch near New Meadows. The owner, Raleigh Campbell, allowed us to practice our horsemanship on some of the horses in the corral, and "Speed" Hodder with "Cow Waddie" Evans proceeded to show us how a cowboy rides. We hope the horses appreciated it more than we did. "Jocko" Joslyn showed us how they did it back in Vermont much to the amusement of the ranch hands who had gathered to watch our antics. This ended Forest Communities and we all settled down to catch Wohletz's material.

The vagueness concerning Forest Mensuration was dispersed on the first day of class, and things seemed to go along smoothly, although study hours did interfere somewhat with swimming and siesta time. Our average day consisted of an hour or two of lecture followed by the actual measuring of every aspect of the tree for the remainder of the day. We became familiar with all the instruments used in obtaining these measurements

(Continued on page 12)

Graduating Seniors

LAWRENCE N. ARNESON, *Production*

Kellogg High School, Kellogg, Ida.; Idaho Foresters (1,2,3,4); Idaho Forester (1,2,3,4).
Summer Experience: 1 season, Blister Rust Control, Clearwater Nat'l Forest; 1 season, Research assistant, Blister Rust Control, Bureau of Plant Industry; 1 season, U. of I. Forestry Summer Camp, Idaho Nat'l Forest.

VERNON H. BURLISON, *Range Management*

Doniphan High School, Doniphan, Mo.; Fruita Union High School, Fruita, Colo.; College High Training School, Cape Girardeau, Mo.; Southeast Missouri State Teacher's College, Cape Girardeau, Mo.; Western State Teacher's College, Gunnison, Colo.; Idaho Foresters (3,4); Xi Sigma Pi (3,4); Forester (4); Kappa Delta Pi; Beta Beta Beta; Lambda Delta Lambda; Mortar and Pestle; Epsilon Rho Epsilon; Sigma Delta Pi; Hiking and Outing Club; Art Club; Lambda Tau Fraternity.
Summer Experience: 1 season, C.T.P.A. and U. of I. Experiments, Clearwater Nat'l Forest; several years, ranch hand in Colorado; 1 season, U. of I. Forestry Summer Camp, Idaho Nat'l Forest.

RICHARD J. CAMPANA, *Production*

Everett High School, Everett, Mass.; Lincoln Prep., Boston, Mass.; Mass. University Extension, Cambridge, Mass.; Idaho Forester (1,2,3,4); Idaho Forester (1,3,4), News Editor (4); Newman Club (1,2,3,4), Executive Officer (2,3); Pershing Rifles (1,2,3,4), Executive Officer (2,3,4); Lambda Chi Fraternity.
Summer Experience: 1 season, Blister Rust Control and Lookout, Kaniksu Nat'l Forest; 1 season, Forestry Summer Camp, Idaho Nat'l Forest, and Blister Rust Control, Clearwater Nat'l Forest; 1 season, Forest Guard, White Mountain Nat'l Forest.

FRANCIS H. DILLON, Jr., *Production*

Graduate Students

W. WAYNE LOW

Wayne's home town is Yakima, Wn., but he is now many miles from home. He is enrolled in a Navy V-7 training course at Annapolis. Navy routine does not agree with him, but the navy knows a good man when it sees him. Marriage—oh no—not at this stage of the game. During the semester '42-43, he completed his thesis for an M.S. degree entitled "The Chemistry of Arabo-Galactan." His B.S. (Chem.) was attained at Washington State College in 1940.

GENE F. PAYNE

Gene Payne graduated in range management last year and was a fellow in range management for the fall semester this year. He is also a member of Xi Sigma Pi. Last fall he resigned a junior soil conservationist position to accept the fellowship here. At the present time he is doing range research in a permanent forest service position at the Southwest Forest and Range Experiment Sta., Tucson, Arizona. He married Miss Bolick, sister of a forestry graduate, Eri Bolick '42, and has a 5 months old daughter.

The Idaho Foresters

By JOHN ROBERT STILLINGER '43

At the beginning of the fall semester we had the grand total of 73 students—19 seniors, 16 juniors, 22 sophomores, and 16 freshmen in the School of Forestry. With such a small organization it seemed almost ridiculous to attempt to function as before, with a complete

well over 90% of the school's enrollment becoming members.

A great deal of enthusiasm and spirit was shown at the first meeting. After a general outline of the year's plans was presented, the group was entertained with pictures. Follow-

Left to right—Bulla, Dugger, Cleaveland, Doherty, Grosch, Jasper, Schmitt, Laurent, Stillinger, Weddle, Spencer, Lyngstad, Guernsey, Hazelbaker, Zielinski, Jonas, Haupt, Hungerford, Burlison.

program. To really get some concrete idea of the significance of the low enrollment, compare the enrollment figure of 1942-1943 with those of the last six years.

Year	Number of Students after third week of school
1941-42	114
1940-41	161
1939-40	239
1938-39	316
1937-38	391
1936-37	335

We could very easily have sat back and allowed our organization to go defunct for the duration, as many other campus organizations have done. Yet, with a balance of \$1.95 in our treasury from the previous year's club, we set forth to demonstrate to future Idaho Foresters that we could function and carry on our activities, regardless of the seemingly unsurmountable odds against us.

With a 100% membership as our goal, we were determined to have all the forestry students and faculty members of our organization. The response was very favorable, with

ing our old tradition of challenging the "local miners" to a pigskin riot, the foresters as in the past years proved themselves to be the superior men. Twenty-two hardy foresters attired in their "corked boots", "tin pants", and "wool shirts" waited patiently in a freezing wind and bitter rain to give the "muckers" a chance to display their courage. Well, they displayed something, but it wasn't courage. So once again, as in past years, the Foresters demonstrated that they have the stuff that makes real men.

For the most part this year, our meetings have featured excellent movies and local speakers, and at every meeting we have had refreshments. The seniors started the ball rolling as usual at the second meeting, by presenting a hilarious melodrama satirizing each faculty member. Each member of the class very briefly explained to the group his own summer experience, with the purpose in mind of giving the underclassmen some idea of the wide range of work the forester is apt to encounter. Dr. Chenoweth, head of the Department of Philosophy, and forester at heart,

was the guest speaker at the third meeting. Very cleverly and uniquely he kept the foresters interested as he discussed the very timely question, "The War and Forestry." Three weeks later, Ranger "Charlie" Powell gave the boys some idea of the life and work of a forest ranger. The last meeting before Christmas vacation was the night for the juniors to howl. Steele Barnett presented a most amusing character sketch of "Joe Private", the average "buck private" in Uncle Sam's army. With songs by Don Hyder and a skit by the entire class, the group was well pleased with the talent displayed by the juniors.

The organization had a real problem to solve regarding its financial affairs. The extremely low enrollment meant one of two things: (1) our annual dance had to pay for itself with no financial support from the treasury, or (2) one of our spring functions would have to be eliminated. However, even with such a black picture before us, we set forth with our fingers crossed and our spirits high. Under the capable leadership of Don Hyder, the decoration committee did one of the finest jobs of decorating done on the campus this year. The center of attraction was a realistic simulation of a typical logging town bar. Steele Barnett, Tom Evans, Tom Laurent, and Chris Koch as bartenders kept the crowd refreshed with punch "over the bar." With numerous trees, and a wild life and game display, the green lighting effect cast a very pleasant atmosphere indeed.

On the night of February 6th the Idaho Foresters did more than have a good dance; they demonstrated to the university that they are one of the more active organizations on the campus, by taking the initial step in the solution of an unfortunate social problem. Fifty-two Navy men, stationed at the Naval Radio Training School on the campus, were invited to our dance with the expressed purpose of improving the social relationship between the college students and the Navy men. Dates with college girls were arranged by the foresters, and the service men were admitted at a reduced rate. Although semi-formal, the dance was lacking in programs in order to cooperate with the conservative trend on the campus during the war, and also to encourage the spontaneous mixing of the college students and Navy men.

Under the leadership of Dick Campana, good advertising and a real sales drive were the essential factors in making the dance a

financial success. With so many students leaving school after the end of the first semester and with a general all-university drop in enrollment, the financial success of the dance becomes even more significant. The entire organization is to be thanked for the excellent cooperation in making the Forester's Ball ("Ranger's Dreamland") of 1943 a great success financially and socially. In the face of so many obstacles, the success of this dance surely should be an incentive to future Idaho Foresters to continue to make their annual dance one of the outstanding social events on the campus.

Well into the second semester with the enrollment just below the 40 mark, our spirit and enthusiasm is still high; and we plan definitely to have our spring barbecue, banquet and regular meetings even if only 5 students remain in the school.

Mrs. Mac

To Mrs. Jean MacNaughton, as always in previous years, is due the lion's share of commendations for the maximum of valuable time and tedious labor executed in getting out the Idaho Forester. Notwithstanding her routine stenographic obligations, with much wonder do we marvel at her ability to find time for our prattle. Her recent marriage to one of the clan has caused many throbbing hearts to grow cold—too bad fellows, she's out of circulation.

SENIORS GET JOBS

- L. Arneson—Army Air Corps, Jefferson Barracks, Mo.
- V. Burlison—Extens. Forester of Nev.
- R. Campana—Inf., O.C.S., Ft. Benning, Ga.
- F. Dillon—Inf., O.C.S., Ft. Benning, Ga.

- H. Thomson—Navy, O.C.S., Northwestern Univ.
- E. Zielinski—U. S. Army.

Faculty

By RICHARD J. CAMPANA '43

DEAN JEFFERS

Throughout the year Dean Jeffers has been grinding away, hammer and tongs, at his work which took him as far as Tennessee to a National Church Board of Education Conference on one occasion. During the summer his time was spent at various places to which the exigencies of his position called him. He spent time examining logging operations on both the Coeur d'Alene and Clearwater National Forests, one week of which was spent with officials of the Clearwater Timber Protective Association. The rest of the summer was utilized in working on the University Experimental Forest, and in promoting further development of summer camp. Not only is the Dean a member of the State Cooperative Board of Forestry, but he is a vice president of the American Forestry Association. In connection with the latter job, he has been preparing a paper on "Natural Resources of the Rocky Mountain Region" which will be published in a coming issue of the Journal of Forestry. The Dean took great pleasure in attending the Pacific Logging Conference this winter, and to the delight of his logging class, spent an entire period relating important conclusions reached with respect to the war and the industry. His favorite pastime is to have students to his home for

dinner and beat them at his game of tops.

DR. DETERS

To the outstanding knowledge and wise management practices of Dr. Deters is due the credit of formulating a new reorganization program for the Shattuck Arboretum. Part of his summer was spent in working on the university forest at Moscow mountain for which he is now making a management plan. Although he received most of his university training in the Lake States region, his experience in all types of forestry is wide, and his travels throughout all the forest regions of the country have been extensive. Needless to say, this experience makes him an ideal instructor in silviculture, management, and fire prevention and control.

During the latter part of the summer he spent his vacation journeying back to Minnesota, his home state, where he really left the lakes and ponds empty. "Five fish with the last five casts" is a score to envy especially where one is battling bass and pike. Not satisfied with having fished the streams at home dry, he tarried long enough on the return trip to Idaho to hook a few trout in Yellowstone Park. His one bad habit is that of treating members of Xi Sigma Pi to a hearty dinner on the night before an exam.

Left to right, standing—White, Ehrlich, Wohletz, Young. Seated—Proctor, Deters, Jeffers, Pierson.

DR. EHRLICH

In connection with his field of forest pathology, Dr. Ehrlich occupied much of his summer in continued work on a University project in cooperation with the U. S. Forest Service and the U. S. Bureau of Entomology and Plant Quarantine, concerned with blister rust canker development following experimental inoculation of western white pine reproduction in northern Idaho. Two Idaho forestry students, namely Vincent Yoder '42 and Lee Paine '43, assisted in this work. During the summer Dr. Ehrlich and Charles A. Wellner '33 accompanied Dr. Lee M. Hutchins, the new chief of the U. S. Division of Forest Pathology, and western officials of the division on a tour of the white pine type of northern Idaho.

The last year has seen Dr. Ehrlich engaged in performing a number of professional duties. Last fall he represented the University at the Forest Policy and Practice Conference of the Western Forestry and Conservation association at Portland, Oregon; he also attended meetings of the Council of the Northwest Scientific Association in Spokane, Washington. Among other duties, he has been chairman of the Inland Empire Section of the Society of American Foresters, representative of the School of Forestry on the Graduate Council, and faculty representative on the Academic Council.

In addition to his research work and teaching of forest pathology, he is now teaching wood technology jointly with Professor Wohletz.

DR. YOUNG

Ranging is the chief pastime of Dr. Young during the summer months, and last season was no exception, as he was not in one place for any length of time. Two weeks were spent in supervising research work on the effect of sheep grazing in western white pine reproduction, a project jointly undertaken by the Clearwater Timber Protective Association and the School of Forestry. The customary 10 days were spent journeying around on successive field trips at summer camp. Highlight of these trips was the one to the Circle C where the riding of horses and handling of packs were learned. During his stay at summer camp, Dr. Young kept the table full with fresh brook trout, as he really showed the boys how to pull them in. Accompanied by Assistant Regional Forester Favre, of Region 4, and Supervisor Farrell, of the Idaho National Forest, he

spent 10 days on a range inspection tour. One week of his time was occupied in helping instruct at the Summer Range School at Mountain City, Nevada. In the latter part of the summer, he worked two weeks in his Michels' grass plots on Paradise Ridge.

His ranging is not all business, however, for more than once he returned from a trip with many fish, and this fall he got a 387-pound elk about seven miles from Castle Butte Lookout on the Lolo Trail in the Selway Region. Frequent field trips keep him well informed on current changes in his two fields of game and range.

PROFESSOR WOHLTZ

As faculty administrator and camp director of Forestry Summer Camp, Professor Wohletz really has a herculean task to perform in keeping things rolling smoothly at Payette Lakes. Under his able guidance for two successive summers, summer camp has seen much improvement and several new developments, including the construction of a fine cabin and the installation of a pump as a substitute for the old bucket brigade. Camp routine was interrupted last summer by a few notable events: the minor ones, nothing more than forest fires, and the major one, another woman who came into Mr. Wohletz's life in the way of a cute baby girl. Needless to say, from then on his "handy" gestures in instructing mensuration, biometry, and forest economics have become much more enthusiastic.

During the latter part of the summer he was employed by the Agricultural Adjustment Administration in doing type mapping and surveying in Latah County. In this work he was very interested in learning the method of extensive survey of agricultural lands by means of aerial photography. In fact, after a few weeks' practice he became quite proficient at identifying all types of land and crops from aerial photographs of certain areas.

At the present time he is engaged in the organization and compilation of more recent data to augment the Forest Economics Syllabus.

PROFESSOR PIERSON

Throughout the length and breadth of the State of Idaho, Professor Pierson operates in his extension work. During the past summer he was particularly busy organizing and establishing volunteer community cooperative firefighting units in cooperation with the State Forest Service and various protective

agencies. His work is truly extensive, and many of his latest jobs have been concerned directly with the war effort. Tree planting recommendations for the Farragut Naval Base and Japanese Relocation Camp, respectively in Northern and Southern Idaho, are two of his recent responsibilities. Planting stock of Russian Olive, Black Locust, and Norway Spruce for windbreaks at the Japanese Camp, and camouflage material for coast installations of the Army Engineers Corps will be furnished by the School Nursery, which is under his direction. Of special importance to the war effort are the Black Locust tree nails, a supply of which has been furnished through Mr. Pierson.

Last fall he spent eight days hunting elk in the Selway National Forest but never did get his elk; nevertheless he enjoyed the fresh air and all those things one gets in the woods. He is an enthusiastic angler and is looking forward to a season which bodes no good for the fish.

DR. WHITE

Dr. White spent the first part of the summer here in Moscow, completing research work on arabo-galactan. He has now a series of four complete studies on the structure of the arabo-galactans which were published in the Journal of the American Chemical Society.

About the 1st of August Dr. and Mrs. White left Moscow for the East. Enroute they visited the University of Minnesota, Dow Chemical Company, and the University of Toronto. They spent a couple of weeks at their homes in Ontario. About the 1st of September they returned to Buffalo to attend a meeting of the American Chemical Society and then back to Moscow. On the return trip, they stopped for a visit with Dr. and Mrs. E. R. Martell, formerly on the forestry staff here and now the head of the Forestry Department at Purdue University.

DR. PROCTOR

Major Proctor, instructor in wood courses here last year was recently commissioned and is now at an officer's school in Florida. After leaving the university last spring, he worked for the Forest Products Laboratory at Madison, where he taught prospective inspectors of wood in qualities, defects, and uses of wood for the war effort. Upon completion of his training course, he will be assigned to Wright Field, Dayton, Ohio, where he will be occupied in research in the use of wood in aircraft.

FORESTRY SUMMER CAMP, 1942

(Continued from page 4)

and added some improvisations of our own. Our day usually ended at five and we would get in a short dip before dinner. Grub was served by Mrs. Herman and hashers, with a kitchen crew doing the cleanup. Our evenings were spent in studying or going into McCall if we could get up an iron-clad alibi. Several evenings were spent in cutting firewood and we all became pretty good with the crosscut and the axe. Our mensuration course included a trip to the Brown Tie and Lumber Co. where mill operations and scaling were studied. Considerable time was spent at the log pond; and though we all got pretty wet, we considered ourselves fairly good burlers. Mid-way into the course Prof. Wohletz took pity on us and gave us a day vacation, whereupon five of us lit out for Boise. We had an enjoyable day and night in the Capitol and arrived back in camp late the next evening to find that the fellows who had stayed had been put on standby and were anxiously awaiting fire call. Classes continued the next day but we prayed that they would be interrupted by a fire. However, we had no such luck and spent several days cruising timber and fighting mosquitoes. It was necessary to set up the compass with one hand and fight mosquitoes with the other. This was further facilitated by Wohletz's persistence in starting the compass line from a point in the swamps where the water was only waist deep.

The fire season started with only two weeks to go before the end of summer camp. Our first fire was on French Creek north of McCall. It was our first experience fighting fire as a unit; and all in all we didn't do badly, even though we did have a makeshift cook when Johnny Krier was pressed into service. After several days, the fire was controlled and we returned to camp long enough to take a swim and get in another day of school. Two days later we were called to another fire and spent several days on it. Upon returning from this fire we got in a good night's sleep before being called out once more. This was the Warren Creek Fire and four days were spent on it. During this time Prof. Wohletz had contacted Dean Jeffers and the decision was made to close camp, even though we had one more week to go. We got back to camp on a Friday evening and prepared to disband camp Saturday. By noon the camp was apart and all the boys had departed, some to go to work and some to go home.

Xi Sigma Pi

By VERNON BURLISON '43

Left to right—Petermann, Dr. Ehrlich, Ravenscroft, Spencer, Hyder, Burlison, Dr. Deters, Randall, Slipp, Payne, Dr. Young, Stillinger.

Xi Sigma Pi, national forestry honorary fraternity, has as its aims: to promote a high level of scholarship in forestry education, to work for the upbuilding of the forestry profession, and to further fraternal relations among workers in the field of forestry.

Epsilon Chapter of Xi Sigma Pi was founded at Idaho in 1920, starting with a charter membership of five. That has increased many-fold since; but due to the number of foresters now in the Services, the Chapter membership is not as large this year as in previous years. From the upper classmen each semester new members are chosen on the basis of their scholarship, ability in the field, and personality.

This year's program began at an assembly early in the fall semester when President Dale announced the highest ranking forester from each class during the school year 1941-'42. They were: Ward Smith, senior; Vernon H. Burlison, junior; Gordon E. Joslyn, sophomore; and Harold F. Haupt, freshman. The names of these men were inscribed on the Xi Sigma Pi Honor Roll, which hangs in the hall, third floor, Morrill. At the same time, Paul Easterbrook was announced as the outstanding senior, thereby receiving the Xi Sig-

ma Pi award of Junior membership in the Society of American Foresters, plus one year's subscription to the Journal of Forestry.

On the evening of December 7 at the Big Meadow C.C.C. camp, three initiates prepared for the active members of the group a dinner of unsurpassing quality. The men initiated then were Gene F. Payne, graduate student; Warren R. Randall, senior; and Donald N. Hyder, junior. Another dinner meeting was held at the Deters' residence, February 18, with Dr. Merrill E. Deters acting as host to the group.

Officers of the fraternity this year are: Vernon H. Burlison, Forester; Roger L. Guernsey, Secretary-Fiscal Agent; and Marshall E. Spencer, Ranger.

Field Trips

GAME FIELD TRIP—Lawrence Arneson '43

On a chill November 6 morning, the Game Management class left for a trip to the Cascades. There were fifteen fellows from Idaho including Dr. Young; at Pullman ten more, including Dr. Wing, were loaded aboard the big red wagon. From there we went to Coulee Dam, spending some time to enjoy the scenery; and after traveling all day we arrived at our destination, located in the Sinlaheekin valley of the Cascades some twenty miles south of the Canadian border.

The next morning we were divided into three groups for the purpose of cooking meals. After we had finished breakfast and had made lunches, we left camp and journeyed up-valley to study the range, its forage, deer, and game birds, including Hungarian partridge, Chinese pheasant, blue grouse and ruffed grouse. After a day of observing these phenomena, and partaking of much horseplay and numerous snowball fights, we were willing to go back to camp. Some of the fellows were bloodthirsty, so upon arriving at camp, they collected their weapons and left to go hunting. Some had fair luck and all returned to do justice to a fine steak dinner which had been prepared by the boys in camp. Having finished supper, the fellows settled down to an evening of songs and the usual bull that was flung in every direction. A few of the fellows left during the session to "hit the hay." The more hardy stayed until, by mutual consent, they decided that enough was enough.

The next morning while the stars were shining and it was blacker than ----, we were rudely awakened and told that we had to make breakfast before leaving camp for the day. This day we traveled north to an area in which there were mountain goats. After climbing around on the rocks and hillsides, that were so steep a person would sometimes be "hanging only by his eyelashes," we noted some of the food habits and physical features of the goats. None of us could ever get closer than a hundred feet or so to one. However, everyone seemed to enjoy being a neophyte mountain climber, although none of us were in the best of physical condition. Late in the afternoon we again returned to camp to eat supper and to have a final fling at tossing the proverbial ox. The next day we left our camp and started back to Moscow, arriving there in the evening.

We did learn some about game birds, deer and mountain goats, even if it were so cold that when a fellow yelled a few words in the morning nobody heard what he said until about two o'clock in the afternoon.

FRESHMAN FIELD TRIP—Burt Cleaveland '46

On February 2, 1943, the freshmen foresters went on their first field trip; they journeyed to the school forest in the St. Joe National Forest, and visited the Potlatch mill. The purpose of the trip was to give freshmen who had never been in western timberland an opportunity to see the forests here. They spent the morning and had lunch in the forest; after lunch they journeyed to the saw-mill at Potlatch. At the mill they saw the complete route taken by timber from the mill pond to the finished board. Later in the afternoon Dean Jeffers treated the class to another lunch. Everyone agreed that they should take another field trip in the near future, as this first one was very interesting.

PRIEST LAKE TRIP—Gerald O'Connor '43

It was a cool, crisp, typical autumn afternoon in late October when the junior and senior production majors and the profs piled into the two green School of Forestry Chevy pickups, and headed due north, bound for the Priest lake country located in the Kaniksu National Forest. The trip was to be a three-day study of the special pathological and silvicultural problems of the region.

Base camp was made that evening at the B.R.C. headquarters located on the west central side of Priest Lake. After spending the night in sheeted sleeping bags furnished by the Forest Service, the boys were rudely awakened at exactly 5:30 A. M. Pacific war time by the vice president in charge of fire building, commonly known as "Camp Engineer." Following a typical hearty B.R.C. breakfast, the party was introduced to Mr. Billings, who is the chief silviculturist of the Kaniksu National Forest. A tour of the forest was next on the program, and was conducted by Mr. Billings with the able assistance of Professors Wohletz, Deters, and Ehrlich. The morning hours were spent studying the white pine experimental plots where experiments regarding blister rust and its control were being conducted. A plot showing proper silvicultural cutting methods in this region was

(Continued on page 16)

Foresters' Barbecue

By WARREN RANDALL '43

Shortly after mid-morning, on May 16th, 1942, the frolicking foresters began to assemble at the old Big Meadow Creek C.C.C. camp, to stage their final social fling of the year '42, the 18th Annual Foresters Barbecue. In spite of an overcast and dripping sky, a lusty and lively softball game was soon being played and by noon-time there were many prodigious appetites. The committee on gastronomical gourmetology served barbecued beef, browned potatoes, corn, baked beans, strong coffee, ice cream and cookies in such liberal portions that even the most voracious eaters amongst us were satisfied. Afterward, each class got together to choose its representative for the contests.

The first event of the afternoon was the log-chopping contest in which "Barbell" Guernsey emerged victorious. Several fellows entered the pole climbing contest, but none were able to match "Squire" Town's record of 7 seconds flat to the top of the pole and down. Paul Easterbrook's pacing course was no trouble for Herron, who paced it out correctly to the last chain link; and "Squire" Town set the record by laying down a tobacco barrage slightly farther than his closest rival, George Engler. In the sawing contest the freshmen team of Kalk and Hazelbaker won the laurels; and "Dead-eye" Dillon had no superior when it came to handling his shootin' irons. In the loggers race, and teamed with "Uncle Jim" Girard in the three-legged race, Guernsey won both in a very lively match. Amid mud and spills, Easterbrook nosed out "Bunker" Campana in the sack race which climaxed the day's program.

Spurred on by "Superman" Guernsey, the juniors garnered 36 points to emerge as victors in the interclass competition. The seniors

claimed 31 points and the sophomores and freshmen tied for 3rd place with 16 points each. To the victor belongs the spoils, and to Rod Guernsey, 15.5 points, went the Kelly axe, which was awarded by the manufacturer. "Squire" Town led the seniors with 12.5 points, Walkley, the freshman with 8.5 points. It was with gay songs and plans for the next barbecue that the 18th Annual Forester's Barbecue came to an end.

FIELD TRIPS

(Continued from page 14)

also visited enroute. The afternoon was spent on a modified "Cooks" tour of the major burned areas of the forest, showing destruction created and methods of counteracting, including reforestation.

After another B.R.C. meal, most of the boys were content to sit around and recuperate as best they could. Some of the more typical "Bunyonites" managed to take a little time out to visit the nearby town, and take in the local night spots.

The next day proved more interesting to most of the students, as several old logging operations were visited. The reproduction was given special study, and was contrasted to a current logging operational area which was also visited. Here the forest pathology boys studied various fungi and its effect on recently cut logs.

The high spot of the trip was a visit to a 60-year-old stand of white pine. In this particular stand, nature and man had collaborated to make a perfectly managed forest. Mr. Billings took special pains to point out all the better points of the stand.

The party concluded the visit by eating lunch in an abandoned C.C.C. camp after which the trip home was undertaken. We arrived in Moscow late that evening.

These
Famous
Extinguishers**

ADJUSTABLE NOZZLE

Tried and proven on many a hard fought fire field, Indians have won the high praise of Foresters, Lumbermen, the Army, Navy, outdoorsmen, fire departments. This year by far the greatest lumber total in history will be required to keep supplying the home front and fighting forces. Fire loss is criminal and inexcusable. Indian Fire Pumps are the surest and best way to halt grass and forest fires before they spread. 5 gal. tank carries slung on the back thus enabling operator to move about freely.

Rust Control, Plumas Nat'l Forest, Quincy, Calif.

Crawford, Kenneth J., 2485 2nd St., Baker, Ore.—Woodworking machine operator at Shockley Lumber Co. of Baker. Turning out materials for army truck bodies and engineer's chests. Married Margaret Sturgill of Baker, Ore., on April 13, 1941. No children.

Fore, Orlando, 857 Hayes, Pocatello, Ida.

Goenne, Frederick W., 2614 LeClaire, Daventryport, Iowa—Pl. Sgt., U.S.M.C., Unit No. 380, c/o Postmaster, San Francisco, Calif. Last letter from Fred in December, doesn't say where he is in the South Pacific, but that we know where the Marines are. Very hot there and he'll miss the "White Christmas". Ten bars of soap, a can of tooth powder, and a carton of cigarettes were about the best Christmas presents he has ever had; all that's lacking now is a rat-trap!

Hamm, Harley H., U. S. Forest Service, Salem, Mo.—Jr. Forester, Timber Sales Assistant, in charge of timber sales on Salem Ranger District.

Hays, John F., 2040 Peachtree Rd., Glenn Building, Apt. A-6, Atlanta, Ga.—U. S. Forest Service, Division of Personnel Management.

Jensen, Ralph, Monticello, Utah—District Forest Ranger, Monticello Ranger District. Administration of range, timber, some recreation, and wildlife activities. Member of U.S. D.A. County War Board, County Civilian Defense, and Red Cross for War Fund Drive. Married in 1940 to Hallie Tangren of Provo, Utah. No children.

Larson, Leslie L., M.S.(Chem.E.), Idaho '36; 125 N. Durkee, Appleton, Wis.

Lownik, Edward C., Rt. 1, Box 106, Washougal, Wash.—Working in Crown Willamette Paper Co., Camas, Wash.

McCarthy, Joseph L., M.S.(Chem.E.), Idaho '36; Dept. of Chemistry and Chemical Engineering, Univ. of Washington, Seattle, Wash.—Teaching Thermodynamics, and doing research in the field of pulp mill wastes, lignin, alcohol, and plastics made from wood and lignin. Have been a laboratory hermit up to 12-16 hours per day.

McKeever, Donald B., M.S.(For.), Idaho '38; Weyerhaeuser Timber Co., Tacoma, Wash.—Research Forester. In charge of Forest Management Research Dept., concentrating on research to further the war and victory effort in Douglas Fir, ponderosa pine, and spruce-hemlock regions of Wash., Ore., and Calif.

Bought a home and an acre of ground in Tacoma.

Nelson, Harvey F., 1519 Rhode Island Ave., N.W., Washington, D. C.—Aeronautical Charts Section, Coast Geodetic Survey, Dept. of Commerce. He's a hard man to catch up with, as witnessed by the mail returned from any of a half dozen addresses.

Porter, Donald B., Still no word of, or information about Don since last year.

Quesnel, Clinton, Lemhi, Ida.—District Forest Ranger, Lemhi Ranger District, Salmon Nat'l Forest. Son, Robert, 3 years of age.

Roberts, Earl C., 234 S. 11th St., Salt Lake City, Utah—In the Army but no information as to his whereabouts.

Robertson, Garnet A., c/o A. P. Holt, Room 243, Central Building, Seattle, Wash.

Shaw, William H., Boise, Ida.—Agricultural Aide, Payette Nat'l Forest.

Silverberg, S. B., 1411 Chelmsford St., St. Paul, Minn.—Jr. Pathologist, Firestone Rubber Co.

Smith, Russel E., Soil Conservation Service, Moscow, Ida.—Up and on his feet again after a sojourn in the hospital to get rid of a troublesome appendix.

Tippets, Vaughan E., Ephraim, Utah—District Forest Ranger, Ft. Rock Ranger District, Deschutes Nat'l Forest.

Turner, George T., 215 W. Magnolia, Fort Collins, Colo.—Cpl., U. S. Army, 21st Evacuation Hospital, Needles, Calif.

1937

Anderson, E. William, M.S.(For.), O.S.C. '40; Soil Conservation Service, Pendleton, Ore.

Anell, Arthur B., 736 E. 8th, Moscow, Ida.

Brado, Glenn E., Ketchum, Ida.—District Forest Ranger, Ketchum Ranger District, Sawtooth Nat'l Forest. Usual administrative duties.

Brown, James P., 218 4th St., Hot Springs Nat'l Park, Hot Springs, Ark.

Caporaso, Alessio, 15 Young St., Waterbury, Conn.—Pvt., Co. D. 30th Topog. Engr. Bn., Lancaster, Pa. Entered the service on Dec. 30th, 1942. At present am learning how to fight and survey. Has just earned first honors—expert marksman—smallbore and .30 calibre rifle.

Chohlis, John G., M.S.(A.H.), O.S.C. '39; Soil Conservation Service, White Salmon, Wash.—C.M. 2/C, Navy 8210, c/o Fleet Post-office, San Francisco, Calif. Just had a swell V-mail from Chohlis, "Even in this bailiwick of rain, mud, flies, mosquitoes and torrid sun,

Idaho is represented by a plurality. Frank Kapel and I are arranging a meeting for a good old-fashioned bullfight." Chohlis is now the proud father of John Anthony, whom he hasn't seen. Finds his work in the Seabees fascinating, but responsible, with forestry courses coming in handy all the time.

Decker, Ivan C., Aberdeen Field District, Prairie States Forestry Project, Aberdeen, S. Dak.—Corp., Co. T, 801st S.T.R., Camp Murphy, Fla.

Dierken, Richard H., Box 55, Millwood, Wash.

Douglas, John F., Steamboat Springs, Colo.—Forest Ranger. One son, 3 years of age, (in another year I'm afraid he will whip the old man).

Galbraith, Marlin C., 235 N. 1st E., Logan, Utah—Instructor of Forestry, Utah State Agricultural College, Logan. Teach courses in forest management and finance, forest measurements, wood technology, fire protection, logging, forest products, and forest improvements and recreation.

Gould, Virgil A., Rt. 3, Buhl, Ida.—Also School of Medicine, Univ. of Colo., Boulder, Colo.

Greco, Verne, U. S. Forest Service, Penasco, N. Mex.—Sr. Forest Ranger, and Assistant District Ranger, Rio Pueblo Ranger District, Carson Nat'l Forest, Region 3. Administer timber sales, grazing, fire, recreation and much public contact as this is a Spanish-American community of about 6500 population. Son, Robert James, born at Taos on January 30th, 1943.

Groves, Bruce V., 456 Federal Building, Salt Lake City, Utah—Assistant Forester, Wasatch Nat'l Forest. Supervision of Timber Sales and Insect Control. Expect to be busy this spring training soldiers at Ft. Douglas, Camp Williams, Camp Kearns, and Salt Lake Air Base, for firefighting. One daughter, Judy Ann.

Hagedorn, Chester L., Rt. 1, Buhl, Ida.—RT 2/C, U.S.N.R., N.T.S., Bldg. 6, Room 402, Texas A. and M., College Station, Tex. U. S. Navy.

Hampf, Frederick E., 348 Lanza Ave., Garfield, N. J.—Lieut., 2nd Bn., 1st Regt., F.A. R.T.C., Fort Bragg, N. C. 2nd Lieut. in Field Artillery. Instructor in Field Artillery Replacement Center teaching cannoneer duties, infantry duties, preparing limited service men for army duties. Married Beatrice Kolarcik, home town sweetheart, on Dec. 25, 1942.

Higginson, Leland C., Elbert, Colo.—Pvt.,

Co. B, 30th Engrs., Ft. Belvoir, Va. Wife, Peggy, is in Moscow with her parents.

Johnson, Donald G., 16 Ahrens Ave., Jamestown, N. Y.

Johnson, Robert H., M.S. (Wildlife Conservation), Univ. of Maine, '29; 15 Huntley Terrace, Malden, Mass.

Ladle, Joseph W., Boise Nat'l Forest, Boise, Ida.—Jr. Forester with the U. S. Forest Service. Received my appointment as J.F. on the Boise Nat'l Forest in March, 1942, and have been working on timber sales. Last year was in charge of the Boise Payette timber sale at Idaho City. Cut of nearly 20 million bd. ft. of ponderosa pine and Douglas fir was put out. Son, Robert, now 4 years of age.

March, Maurice W. (Scoop), Box 460, Burley, Ida.—District Grazier (Idaho No. 2), Twin Falls Grazing District. Scoop paid the School one of his rare visits last fall.

Marshall, Marvin M., Pvt., M.M.M., 871st Chem. Co., Air Opns. (H & H), Herbert Smart Airport, Macon, Ga. Married to Rosemary Corrico of Bonne Terre, Mo., in Aug., 1942. His wife is with him at Macon.

Matthews, Fred W., State Fish and Game Dept., St. Anthony, Ida.

Maul, David C., 207 Lampe Building, Huron, S. Dak.—Sgt., 66th Air Base, Luke Field, Phoenix, Ariz.

McKee, Bill E., 4418 N. Stevens, Spokane, Wash.

Nadeau, Leon R., 205 Wooley Apts., Pocatello, Ida.—District Grazier, U. S. Dept. of the Interior Grazing Service, Lost River Grazing District.

Nelson, Talmadge N., 2329 Jackson Ave., Ogden, Utah—Pvt., Co. B, 30th Engrs., Recruit Detach., Ft. Belvoir, Va. Ran into Cy Higginson, a classmate, in his own company and Richard Burr, another Idaho man. After 5 weeks basic training was to work as an aerial photographer there.

Oliver, John P., c/o W. W. Barr, 909 36th Ave., Seattle, Wash.—Lieut., U.S.N.R., Naval Air Station, Pensacola, Fla. Navigator and Instructor at the Naval Air Training School. Married July, 1942, to Marion Johnson of Los Angeles, Calif. "No children yet, I don't work that fast."

Parks, Homer W., Potts Ranger Station, Austin, Nev.—District Forest Ranger, Potts Ranger Station, Toiyabe Nat'l Forest. Range management stressed here to contribute its share of beef, wool, and mutton to aid in the

Ranger, Powell Nat'l Forest. One child, Judith
Ann.

Lucas, William J., 809 E. 4th Ave., Mitchell,
S. Dak.—Lieut., 908th Engr. AF Hq. Com.,
U. S. Army Airdrome, Santa Rosa, Calif.
Camouflage Platoon Lieut. Attended Engr.
O.C.S. at Ft. Belvoir, Va., and received com-
mission Aug. 5, 1942.

MacGregor, Warren S., 441 Hazel St., Tama-
gua, Pa.

Martin, Gerald H., 4031 E. 6th St., Long
Beach, Calif.—Patrolman, police work.

Martin, Jack M., Box 501, Post, Tex.—Work
Unit Leader, 68th Conservation Service, Post,

Tex. One son, Valton Niva, 1 year of age.

Martin, Ronald G., St. Maries, Ida.—Capt.,
No. O-370587, A.P.O. No. 41, c/o Postmaster,
San Francisco, Calif.

Mastin, Richard J., Box 266, Buhl, Ida.—
Teaching school.

Miller, Loren E., 15 Riverside Dr., Saranac
Lake, N. Y.

Molberg, John M., Souris, N. Dak.—Lieut.,
123rd F.A. Bn., A.P.O. No. 33, Ft. Lewis,
Wash. Still Ass't S-2 (Survey Officer). "Silver
bars put on me instead of gold bars a couple
of months ago. Out of 40 officers in this Bn.,
3 of us are foresters." Footloose and fancy free.

Morrow, William J., Bellevue Apts., Grand
Forks, N. Dak.—Capt., Fifth Army Airborne
Training Center, A.P.O. No. 464, c/o Postmas-
ter, New York City, N. Y. Married Dorothy
June Frank in Dec., 1941, in Ga.

Oldson, Harold (Olie), 54 N. Wilson, Pasa-
dena, Calif.—2nd Lieut., Co. D, 2nd C.W.S.,
R.T.C., Camp Sibert, Gadsden, Ala. Training
chemical warfare troops. Met a gal in Texas
who should be Mrs. Oldson on or about May
15th.

N. J.—2nd Lieut., 953rd Engr. Topog. Co.
(Avn.), Douglas, Ariz. Transportation Officer
and one of three officers in Geodetic Platoon.
Obtain ground control for maps. Did a bit of
landscaping around camp using many of the
plants in the Range Plant Handbook.

Pinnock, John H., Lassen County, West-
wood, Calif.—Working in the Shipping Dept.
of the Red River Lumber Co. Have been
working the past year for Grande Ronde Pin
Co., Chester, Calif., and for Red River Lumber
Co. marking timber first and then grading
logs. Just received a 1-A rating in the Army.
Happily married to Thelma S. Robertson on
Jan. 1st, 1942, in Reno, Nevada. She hails
from Plano, Ida. One son, Orville Tex, born
Jan. 19, 1943.

Piper, Frank C., Box 417, Hailey, Ida.—En-
sign, U.S.N.R., Bachelor Officer's Quarters,
Naval Air Tech. Tng. Center, Norman, Okla.
Officer-in-charge of Barracks 65. Look after
280 enlisted seamen when they are not in
Aviation Metalsmith School. Hope to be as-
signed to Photography Interpretation School
sometime this year.

Pitkin, Franklin H., Forest Nursery, School
of Forestry, Moscow, Ida.—Having a hard time
getting help and having a harder time getting
the high school boys to work. Still married,
but no children.

Poulton, Charles E., U. S. Forest Service,

Ranch planning work including range surveys, stock water developments, reseeding new and old range land, deferred and rotational grazing, brush clearing, and getting better management into practice. One child, Robert James, 1 year of age.

FULFILLING A RESPONSIBILITY...

In spite of the many obstacles which have faced all operators since Pearl Harbor, the lumber industry has made an enviable record in meeting the war-time requirements for lumber and lumber products. Such handicaps as depleted stocks, bad weather, manpower shortage, equipment and maintenance difficulties all presented problems for intelligent solution.

THE TIMBERMAN, even prior to our nation's entry into war, geared its editorial policies to those subjects which appeared might hinder production. Hundreds of pages of text have been printed during the past year on subjects which might serve to aid the industry in filling war needs. Dozens of voluntary reader reactions have come to us from the Douglas Fir, Western Pine and the Redwood areas, as well as from numerous heads of governmental lumber procurement departments of the Army, Navy, Maritime Commission, U. S. Engineers and the WPB, indicating the services and facilities of THE TIMBERMAN have been of great value.

For the year ahead, the lumber industry can and will meet the essential war demands. THE TIMBERMAN can and will continue to serve.

To you men who shall shortly undertake the responsibilities in one phase or another of the lumber industry, THE TIMBERMAN extends an invitation to make use of its pages in keeping abreast of current forestry news and its forty-three years of experience in the lumber field for guidance.

THE TIMBERMAN
