Introduction

A secondary wood products manufacturer receives partially processed raw material from primary mills and either further prepares, processes, or assembles the material into a customer or end-use product. This publication lists most of the secondary wood products manufacturers in Idaho, their products, and their location.

A mail survey was conducted in the spring of 1988 to locate and identify the various secondary wood manufacturers in Idaho. Until this project, no specific secondary wood manufacturers directory existed for Idaho, though Department of Commerce listings included many by virtue of their status as licensed businesses. A follow-up field survey throughout the state helped to identify additional manufacturers and allowed further refinement of the categories of wood products made in Idaho.

A directory of primary wood processors is available from the Idaho Forest, Wildlife and Range Experiment Station (Miscellaneous Pub. No. 12, \$5.00).

Additions and Corrections

This directory is the first listing of Idaho secondary wood products manufacturers. Considerable effort was spent ensuring that all active secondary wood products manufacturers in the state were surveyed; however, we recognize that some firms may have been inadvertently overlooked. Exclusion of any firm is not intentional, and does not reflect a firm's activities.

It is intended that this directory be updated on a regular basis and revised editions be printed. Please notify the author if any corrections, additions, or deletions are in order.

Key to Category Listings

In order to facilitate locating sources for particular products, this section lists the secondary wood products manufacturers in fourteen broad categories. Since some manufacturers produce a variety of wood products, a company may be found in more than one category.

The following descriptions give a brief summary of the types of products manufactured in each category.

Cabinet Shops

Primarily interior cabinets and custom woodworking.

Cutstock and Moulding

Processing of lumber into mouldings or components for doors, windows or toys.

Doors and Windows

Finished products. May or may not do custom work.

Energy Products and Fuels

Primarily wood fuel pellets and other wood fuels. Also, cellulose-based insulation materials.

Furniture

Custom or stock furniture.

Lathing and Survey Stakes

Rough-sawn as well as machined (turned) products.

Log and Western Furniture

Furniture and cabinets made with Idaho species and emphasizing the natural characteristics of the raw material.

Log homes

Custom and kit manufacturers.

Pallets, Boxes and Containers

Industrial pallets, vegetable boxes and bins.

Posts, Poles, and Pressure-treated Lumber

Agricultural fencing and staking material; may be dip- or pressure-treated with preservatives. Also, pressure-treated lumber and poles for a variety of uses.

Resawing and Remanufacturing

Siding, decking and special purpose dimensional lumber.

Specialty Cedar Products

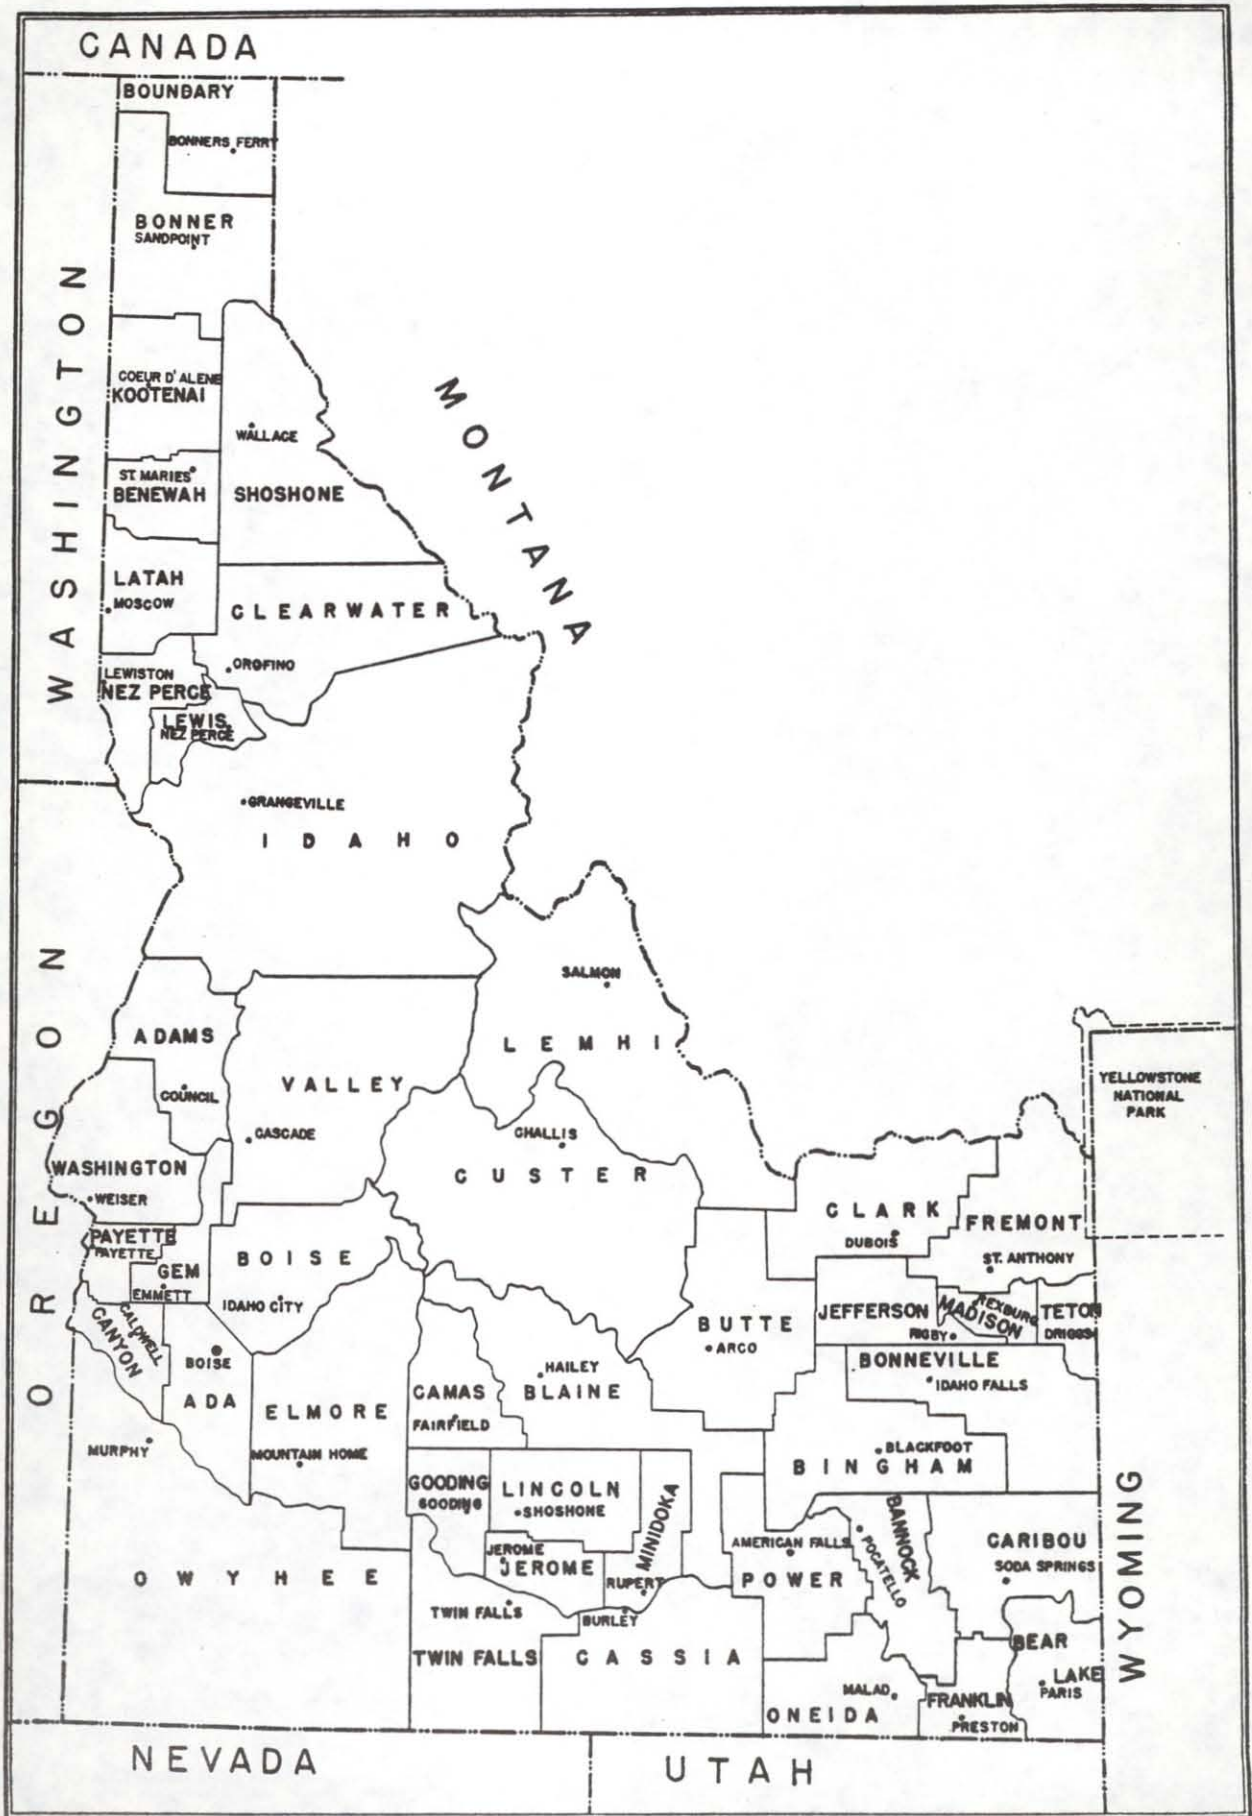

Fencing, shakes, shingles, and specialty products made of western redcedar.

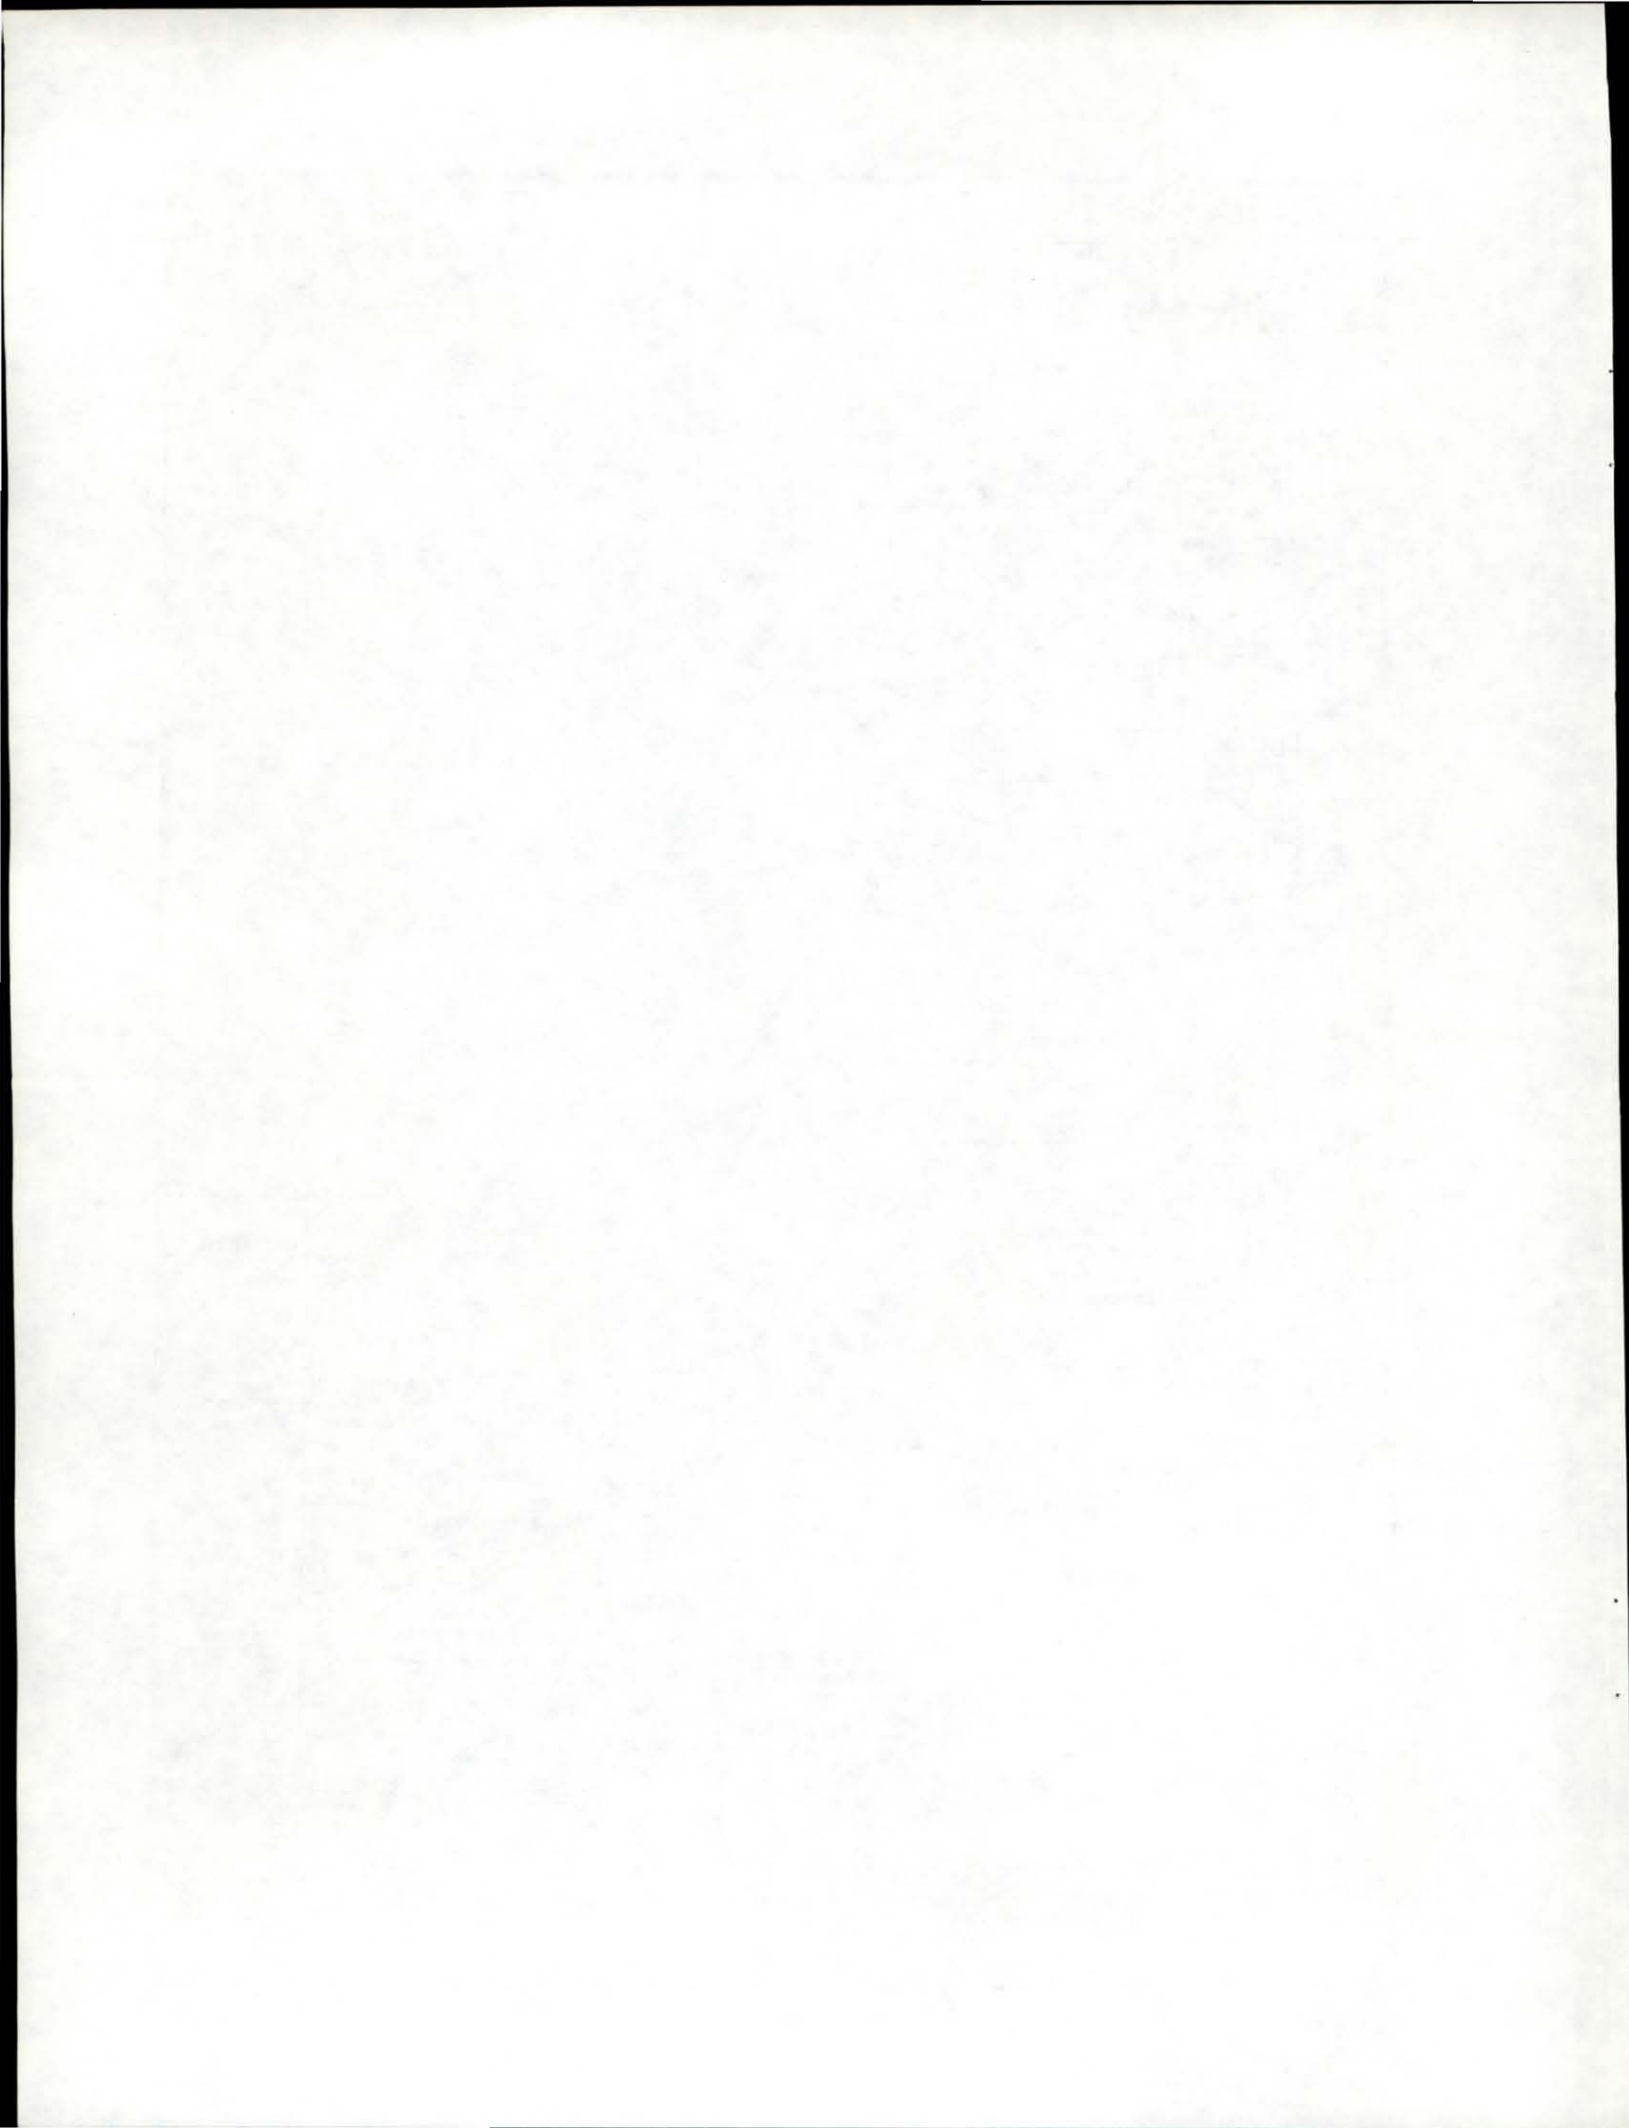

Structural Components and Prefabricated Buildings

As specified for each entry.

Miscellaneous

Toys, signs, and other wood products not found in the categories listed above.
