INTRODUCTION

This *Directory of Idaho Wood Products Manufacturers* has been prepared to assist in marketing the wide variety of wood products produced in Idaho. For the first time, we have combined both primary and secondary wood products producers. This document, then, serves as a single source of information on Idaho's wood products producers.

There are two sections to this directory. The first is an alphabetical listing of all of Idaho's wood products manufacturers. This first section also contains summaries of each company's operation, giving background information on the size and type of each operation. The second section of the directory categorizes these companies by the products they manufacture. This new format should make it easier to locate the companies that manufacture specific products of interest.

While every effort has been made to identify and contact all of Idaho's wood products manufacturers, some companies may have been inadvertently overlooked. We would appreciate learning of any additions or changes to the material contained in this directory, so that they may be included in future revisions. Please contact us c/o the Department of Forest Products, University of Idaho, Moscow, Idaho 83843.
