INTRODUCTION

This *Directory of Idaho Wood Products Manufacturers* has been prepared to assist in marketing the wide variety of wood products produced in Idaho. It is our intent to list all wood products producers in the state interested in making their products and services available to potential customers. Firms listed range from primary wood-products manufacturers to specialized-niche product producers. Data for this directory were collected during August-October, 1994.

There are two sections to this directory. The first is an alphabetical listing of all of Idaho's wood products manufacturers. This first section also contains summaries of each company's operations, giving background information on products, equipment, and the size and type of each operation. The second section of the directory categorizes each company by the products it manufactures. This format makes it easy to locate the companies that manufacture specific products of interest.

While every effort has been made to identify and contact all of Idaho's wood products manufacturers, some companies may have been inadvertently overlooked. We would appreciate learning of any additions or changes to the material contained in this directory, so that this information may be included in future revisions. Please contact us c/o the Department of Forest Products, University of Idaho, Moscow, Idaho 83844-1132, Phone: (208) 885-6126, Fax: (208) 885-6226.
