Acknowledgments

Most of the chemicals tested were provided by the United States Fish and Wildlife Service from collections at the Hammond Bay Laboratory, Michigan, or at the Galveston Laboratory, Texas. The authors are indebted to the personnel of these laboratories for packing and shipping chemicals and related records to the University of Idaho. The authors appreciate the kind cooperation of the Water Resource Institute, University of Idaho.

The authors thank the following students without whose conscientious and wholehearted support this project could not have been accomplished: Messrs. R. C. Averett, T. G. Bahr, M. B. Conley, E. H. Edmundson, R. H. Ellis, J. T. Heimer, F. E. Hutchins, K. A. Johnson, E. R. Logan, T. W. Meister, M. W. Mosher, G. L. Munther, K. F. Smith, S. S. Sundet, J. P. Wales, D. C. Wilson, Miss C. L. Magnuson, Mrs. S. J. Henden, and Mrs. R. A. Woolrich.

Special thanks are due Messrs. J. M. Shelton, V. C. Applegate, J. H. Howell, T. J. Fergin, C. T. Hiltz all of the United States Fish and Wildlife Service and J. K. Keating, Idaho Department of Fish and Game.

The authors sincerely appreciate the many courtesies extended to them by Mr. and Mrs. J. H. Birdwell, Mr. W. W. Holmstrom, and Representative E. E. Hedlund, St. Maries, Idaho.

Lethal effects of 1888 chemicals upon four species of fish from western North America¹

Craig MacPhee and Richard Ruelle²

Abstract

A piscicide screening program was conducted with 1,888 different chemicals mostly at concentrations of 10 ppm. The times at which fish lost their equilibrium and died are given for 2,552 separate 24-hour assays. The species tested were the northern squawfish (*Ptychocheilus oregonensis*), chinook salmon (*Oncorhynchus tshawytscha*), coho salmon (*Oncorhynchus kisutch*), and steelhead (*Salmo gairdneri*).

Introduction

Knowledge of the lethal effects of organic compounds on fish has increased markedly in the last decade. Our report extends this knowledge by denoting the relative toxicity of a large number of chemicals lethal to four species of freshwater fish from western North America. In particular the object of this report is to give the exposure times at which loss-of-equilibrium and death occurred at selected low concentrations of chemicals.

The data presented in this paper are the by-products of a preliminary screening program for determination of chemicals selectively lethal to squawfish and non-lethal to salmonid fishes. For the most part, test chemicals were organic and were selected from those already determined by Applegate *et al.*, (1957) as being biologically active at low concentrations.

Fish, Facilities, and Procedures

The species of fish tested were northern squawfish (*Ptychocheilus oregonensis*), steelhead (*Salmo gairdneri*), chinook salmon (*Oncorhynchus tshawytscha*), and coho salmon (*Oncorhynchus kisutch*). These fish measured about 5 to 10 cm long.

The salmonids were flown from the Eagle Creek National Fish Hatchery near Portland, Oregon, to Spokane, Washington. Shelton (1965) described techniques used for shipping these live fish by airplane. From Spokane, the fish were trucked to Mission Point near St. Maries, Idaho, where they were stored in a large wooden vat supplied with spring water at temperatures of 12 to 14 C. The salmonids were transported to the campus laboratory as needed.

¹ Operational studies contract with the Columbia River Fishery Development Program, Bureau of Commercial Fisheries, U. S. Fish and Wildlife Service.

² Present address: U. S. Bureau of Sport Fisheries and Wildlife, Yankton, South Dakota.

Squawfish were seined from the St. Maries River or Santa Creek, a tributary stream, and were either stored in a wooden vat on a tributary of the St. Maries River or brought directly to the campus laboratory for immediate use.

A series of insulated, round, stainless steel tubs (61 cm in diameter x 30 cm deep) were used for water baths. These baths were served by a common refrigerated reservoir through which temperature-controlled water was recirculated. Each tub held four 9.5-liter plastic aquaria and each aquarium was aerated by a single stone air-breaker and lined with a disposable polyethylene poultry bag (30 cm x 20 cm x 90 cm deep). The bag was closed at the top to prevent fish from escaping.

Fish were acclimatized at about the temperatures of the assay vessels. The acclimatizing period varied from 3 to 24 hours, but most fish were conditioned at least overnight. The test fish were starved during acclimatization and transferred to the assay vessels about two hours before addition of chemicals. Usually one squawfish and one each of two species of salmonid were placed together in one vessel in 4 liters of water, the load being about five grams of fish per liter of solution. Water temperature was taken several times during each test, only the highest temperature recorded in a 24-hour test period being given in our results.

The times at which a fish lost its equilibrium and died were recorded. For the purpose of this report, equilibrium was defined as lost when a fish was no longer able to remain right-side-up and death was designated when a fish ceased visible movement.

A concentration of 10 ppm of chemical was used for most assays, although other concentrations were occasionally tested. Most chemicals were dissolved in minimal amounts of water or acetone before we added them to assay vessels. Applegate et al., (1957) point out that small quantities of acetone are not harmful to fish and do not bias the results.

For the early tests, water was obtained from five different sources indicated in Table 1. Water from Rochat Creek was finally selected as being the most desirable and was used for most of the assays.

Chemical analyses of the water were made during summer when stream flows were low. The pH was determined with a Hellige color comparator and total hardness with a low-range hardness kit, Hach Model Ha-27-P.

Results

The elapsed times in hours in which an obvious change in the pathological status of fish were noted are given in Table 2. As these chemicals were selected on the basis of their biological activity at extremely small concentrations, almost all the chemicals were lethal to one or more species at a concentration of 10 ppm or less.

Explanation of Table 2

The names of the 1,888 chemicals listed in Table 2 are classified according to the system used by Chemical Abstracts. The trade or common name of some chemicals has been placed in capital letters following the classified name. These are listed alphabetically in Table 3 for cross-reference.

The code numbers in parentheses following the chemical name are those of the company submitting the chemical. The words "no code" are written where a code number was not given.

The numbers under the heading "chemical source" identify the chemical company from which the chemical originated. The names of these companies are listed in alphabetical order in Table 4.

To save space, the column headings under the species name are abbreviated to E for loss-of-equilibrium time, and D for death time. Under E and D a range of hours is given. The lower limit of a range indicates the time that the last observation was made before loss-of-equilibrium or death. The upper limit indicates the time that loss-of-equilibrium or death was noted. An average of the range gives the best approximation of the time that the status of a fish changed.

Observations which were made between zero and nine hours and forty-five minutes are rounded to the nearest half-hour; whereas, those which were made after nine hours and forty-five minutes are rounded to the nearest hour.

The presence of fish which neither died nor lost equilibrium is indicated by a dash. The absence of a dash indicates that a species was not tested.

The numbers under the column heading "water" refer to the water sources listed in Table 1.

Table 1. The chemical properties and identifying numbers of the waters used for fish assays.

Water source	Identifying number	pH	Alkalinity, parts per million	Hardness, parts per million
Rochat Creek	1	7.2	7	0-17

Table 3. An alphabetical list of trade names or common names of compounds which are listed under the heading "chemical" in Table 2.

Name	Report Number	Name	Report Number
Acridine	1469	Dienestrol	1012
Actamar	1351	Dilan, 25% active	1243
AgeRite Alba	951	DN Dry Mix No. 1	1301
Altax	769	Dow General Weed Killer	1281
Amax	380	Dowicide A	1345
Ammonyx DME, 75% active	139	Dowicide 2S	1355
Ammonyx-27	146	Dowicide 2	1354
Ammonyx-781	1542	Dowicide 6	1348
Amprolum	1386	Dowicide 31	1299
Armeen C	669	Duomeen C	1412
Armeen 12	777	Duomeen 12	1414
Aroclor 1242	448	Endrin, Technical 94.5%	1187
Aroclor 1248	449	DL-Ethionine	1381
Aroclor 1254	450	Ethopabate	354
Arquad 12	141	Furaltadone	1241
Arquad 16	144	German Acid	738
Bismate	546	German Acid, distilled fraction	739
Blueberry dust	674	Glycarbylamide	1026
BTC-776	110	Heptachlor, Technical 73%	1035
BTC-824, 50% active	109	Isothan DL-1 75% active in isopropanol	138
Butyl Namate	587	Isothan Q15, 20%	1066
Butonate, Technical	1375	Kelthane W	870
Butonate, 25% Emulsifiable	1374	Khellin	368
Carbarsone	304	Lethane 384	939
Catechol	306	Lindane, 25% active	699
Chloramphenicol	1415	Lindane, 99% BHC	700
Chlordane, Technical AG Grade	1032	Lindane, 100% active	701
Cumate	551	Lindane, 10% water dispersible	702
Cyprex	1006	Lykopon	1617

Thanisol 85	31	Warcocide 1400	145
Thiabendazole	335	Warfarin	678
Thiate A	1486	Zetax	378

Table 4. A list of the companies from which the chemicals used in these assays originated and the identifying numbers of the companies which are referred to in Table 2.

Identify- ing No.	Chemical Source	Identify- ing No.	Chemical Source
1	Agricultural Chemicals Research Laboratory General Chemical Division Allied Chemical & Dye Corporation, P. O. Box 405, Morristown, New Jersey.	21	Field Laboratory, California Spray-Chemical Corporation, P. O. Box 120, Haddonfield, New Jersey.
2	Aldrich Chemical Company, 2369 North 29th St., Milwaukee 10, Wisconsin.	22	Carus Chemical Co., Inc. 1375 Eighth St., La Salle, Illinois.
3	Product Development Dept., Solvay Process Div., Allied Chemical & Dye Corporation, 61 Broadway, New York 6, New York.	23	Central Scientific Co., Chicago, Illinois
4	Allied Chemical & Dye Corporation, National Aniline Division, Buffalo, New York.	24	Chemagro Corporation, 101 Park Ave., New York, New York.
5	Aloe Scientific, 1818 East Madison St., Seattle 22, Washington.	25	Chemicals Procurement Laboratories Inc., 18-17 130th St., College Point 56, New York.
6	New Product Development Dept., American Cyanamid Co., 30 Rockefeller Plaza, New York 20, New York.	26	Research Division, Chipman Chemical Co., Inc., Bound Brook, New Jersey.
7	National Aniline and Chemical Co., Pharmaceutical Division, New York, New York.	27	W. A. Cleary Corporation, New Brunswick, New Jersey.
8	The Market Development Dept., Armour Chemical Division, Armour and Company 1355 West 31st St., Chicago 9, Illinois.	28	Cochroma Chemical Co., Inc., P. O. Box 728, Clarksdale, Mississippi.
9	Ashland Oil & Refining Co., Ashland, Kentucky.	29	The Coleman and Bell Co., Norwood, Ohio.
10	Atlas Chemical Industries, Inc., Chemical Division, Wilmington 99, Delaware.	30	Dept. of Botany & Plant Pathology, Colorado Agricultural & Mechanical College, Fort Collins, Colorado.
11	J. T. Baker Chemical Co., Phillipsburg, New Jersey.	31	Columbian Carbon Company, Subsidiary of Cities Service, Box 975, Princeton, New Jersey.
12	Battelle Memorial Institute, 505 King Ave., Columbus 1, Ohio.	32	Research Laboratory, Columbia-Southern Chemical Corporation, Barberton, Ohio.
13	Ben Venue Laboratories, Inc., 270 Northfield Road, Bedford, Ohio.	33	Division of Industrial Chemistry Commonwealth Scientific & Industrial Research Organization, Box 4331, Melbourne, Victoria, Australia.
14	Benzol Products Co., 239 South St., Newark, New Jersey.	34	W. H. Curtin & Co., Houston, Texas.
15	Bios Laboratories, Inc., 17 West 60th St., New York, 23, New York.	35	Biochemical Research Dept., The Dow Chemical Co., Midland, Michigan.
16	Dajac Laboratories, The Borden Chemical Co., P. O. Box 9522, Philadelphia 24, Pennsylvania.	36	E. I. du Pont de Nemours & Co., P. O. Box 525, Wilmington 99, Delaware.
17	Braun-Knecht-Heimann Co., Laboratory Supplies, San Francisco, California.	37	Eastman Kodak Co., Research Laboratory, 343 State Street, Rochester, New York.
18	E. C. Britton, Research Laboratories	38	Eastman Organic Chemical Dept., Distillation Products Industries, Rochester 3, New York.
19	California Corporation for Biochemical Research, 3625 Medford St., Los Angeles 63, California.	39	Edwal Laboratories, Chicago, Illinois.
20	California Foundation for Biochemical Research, 3408 Fowler St., Los Angeles 63, California	40	Escambia Chemical Corporation, Cottage Row, Wilton, Connecticut.
		41	Ethyl Corporation, 100 Park Ave. Bldg. at 41st St., New York 17, New York.
		42	Fisher Scientific Co., 635 Greenwich, New York 14, New York.

Table 4. - Continued

Identify- ing No.	Chemical Source	Identify- ing No.	Chemical Source
43	Gamma Chemical Corporation, Great Meadows, New Jersey.	64	Matheson, Coleman, and Bell, 2909 Highland Ave., Norwood (Cincinnati 12), Ohio, P. O. Box 85, East Rutherford, New Jersey.
44	The G. Frederick Smith Chemical Co., Columbus, Ohio.	65	Dr. W. T. Sumerford, Director, Pharmaceutical Chemistry, Research Laboratories, Mead Johnson and Co., Evansville 21, Indiana.
45	Research Laboratory, Geigy Agricultural Chemicals, Geigy Chemical Corporation, 62 West Second St., Bayonne, New Jersey.	66	Process Research Dept., Chemical Division, Merck and Company, Inc., Rahway, New Jersey.
46	Southern Chemical Division, The Glidden Company, P. O. Box 389, Jacksonville 1, Florida.	67	Metal and Thermit Corporation, 100 Park Ave., New York 17, New York.
47	Biochemical Development, B. F. Goodrich Chemical Co., Rose Bldg., 2060 East Ninth St., Cleveland 15, Ohio.	68	Miles Chemical Co., Inc., Elkhart, Indiana.
48	W. R. Grace and Co., Research Division, Washington Research Center, Clarksville, Maryland.	69	Minnesota Mining and Manufacturing Co., Central Research Dept., 2301 Hudson Road, St. Paul 19, Minnesota.
49	Dr. G. Grubler & Co., Leipzig, Germany.	70	Development Dept., Organic Chemicals Division, Monsanto Chemical Company, 800 North 12th Blvd., St. Louis, Missouri.
50	Hartman Leddon Co., Inc., 60th & Woodland Ave., Philadelphia, Pennsylvania.	71	The Chemical-Biological Coordination Center, National Research Council, 2101 Constitution Ave., Washington 25, D. C.
51	Hellige, Inc., 3718 Northern Blvd., Long Island City 1, New York.	72	Agricultural Chemicals Development, Naugatuck Chemical, Bethany 15, Conn.
52	Naval Stores Department, Hercules Powder Co., Wilmington 99, Delaware.	73	Niagara Chemical Division, Food Machinery & Chemical Corporation, Middleport, New York.
53	Heyden Chemical Corporation, Garfield, New Jersey.	74	The Norwich Pharmacal Co., Eaton Laboratories Division, Norwich, New York.
54	R. M. Hollingshead Corporation, Camden 2, New Jersey.	75	Microbiological Laboratory, Nuodex Products Co., Inc., Elizabeth, New Jersey.
55	The Hubbard Hall Chemical Co., P. O. Box 790, Waterbury 20, Connecticut.	76	Nutritional Biochemicals Corporation 21010 Miles Ave., Cleveland 28, Ohio.
56	Dr. G. C. Finger, Illinois State Geological Survey Division, Natural Resources Bldg., Urbana, Illinois.	77	Olin Mathieson Chemical Corporation, Product Development Dept., Niagara Falls, New York.
57	James Good Company, Susquehanna Avenue & Martha St., Philadelphia 25, Pennsylvania.	78	Research and Development Laboratories Onyx Oil and Chemical Co., Warren & Morris Streets, Jersey City 2, New Jersey.
58	K & K Laboratiires, Inc., 177-10 93rd Ave., Jamaica 33, New York.	79	Oronite Chemical Co., 3508 Carew Tower, Cincinnati 2, Ohio.
59	Koppers Company, Inc., Chemicals and Dyestuffs Division, Lockhaven, Pennsylvania.	80	Ozark Mahoning Co., 310 West 6th St. Tulsa 19, Oklahoma.
60	The Lilly Research Laboratories, Eli Lilly & Co., Indianapolis 6, Indiana.	81	Research Dept., Ozark-Mahoning Co., Tulsa 1, Oklahoma.
61	L. Light & Co., Ltd., Colnbrook, Bucks England.	82	The New York Quinine and Chemical Works, Inc., Subsidiary of S. B. Penick & Co., 999 West Side Ave., Jersey City 6, New Jersey.
62	Government Contract and Sales, Mallinckrodt Chemical Works, Second and Mallinckrodt Sts., St. Louis 7, Missouri		
63	Mann Research Laboratories, 136 Liberty St., New York 6, New York.
