The average rate of cash fare charges by the electric railways of the country is now 7.3 cents, according to the latest compilation. The highest average was reached on November 1, 1921, when the figure was 7.46 cents.

New Plan for Columbia Basin Project

W. E. SOUTHARD
Cut Courtesy Seattle Star

That the State of Washington bond itself for $500,000,000 and develop the Columbia River Basin as a state project, and without aid of the federal government, under a combined gravity-pumping plan, with an auxiliary power feature, is the proposal made by W. E. Southard, an Ephrata lawyer, who has been studying the basin development plans for the past five years.

Southard proposes his state plan of development work on the ground that it is not likely that the federal government will appropriate sufficient funds for the work for at least 30 or 40 years, writes Fielding Lemmon in an interview in the Seattle Star.

"It will take that long to make Congress realize the possibilities that are offered in this undeveloped portion of the state," he said. "If I knew that the federal government would take this matter up right away, I would not make my suggestion or press my plans."

Here Is New Plan Offered

Briefly, Southard's plan is this:

1—Abandonment of the Pend Oreille gravity project that has generally been accepted as the method in which the reclamation work is to be done.

2—Construction of a gigantic dam across the Columbia River, at the head of the Grand Coulee, where the pumps of the pumping project would have started in their operations.

3—Carrying the water, through tunnels, down the coulee, past Dry Falls, where a 400-foot retaining wall would be high enough for distribution throughout most of the section to be reclaimed.

4—Construction of a power unit at the dam at the head of Grand Coulee, the power to be used on the farms that would follow the completion of the project, and also to pump water to such places where the altitude was higher than the water level at the retaining dam.

5—A sales tax levy to raise the initial money for survey work and then the issuance of 30-year 5 per cent bonds for the actual construction work.

Southard has placed his proposition before all the engineers that have been interested in the Columbia Basin project.

Goethals Says He's Interested

General Goethals, who was here on a tour of inspection and investigation of the project more than a year ago, wrote to Southard that "I am deeply interested."

Southard has had expert engineering advice and help in his surveys and research work in determining the feasibility of his proposition.

"The point where the initial dam site is to be built has been proved an excellent dam site," Southard said. "Diamond drillings have shown that the river bed is solid granite and the walls on both sides are said by engineers to be the same.

"The water can be carried along the Grand Coulee to the second dam and the water here can be had at an elevation of approximately 1,450 feet.

"This elevation will mean that almost 85 per cent of the district in the basin area can be reached by canals. The other land can be irrigated through pumping, the power to be furnished by the plant which, under this plan, would be constructed at the base of the dam on the Columbia River.

"Engineers tell me that two and one-half million horsepower can be developed at the foot of the dam," Southard said. "Think what that will mean to the man who comes into the district to settle after the project has been completed. He can heat and light his home and run his farm machinery.

"The income from this source alone will be a powerful factor. Besides the power could be used to pump water to districts that could not be reached by the gravity plan."

Tax Luxuries to Meet Survey

Southard's finance plan is unique. He would levy a sales tax on luxury to raise the $12,000,000 estimated as necessary for a thorough survey of the engineering feasibilities of his project.

Then Southard proposes the issuance of 30-year 5 per cent bonds for the actual construction costs.

Under this plan he would create a sinking fund to meet the delinquent payments of those land settlers who would default payments.

"Statistics show that when farmers have 30 years to pay out a reclamation assessment, 85 per cent of them make their payments promptly and in full within the given time," Southard said. "I would establish the sinking fund to cover the other 15 per cent. The money for this fund would come from the proceeds of the power sales, or from an additional sales tax, if necessary.

"We cannot estimate the value that this project would have to Washington."

Biggest Project in the World

"We would be undertaking the biggest reclamation project in the world, building the biggest dam, irrigating the biggest area, building the biggest power plant—and all within a short distance of three big cities.

"Of the $500,000 construction cost, one-half would be spent in this state for labor alone. It would take ten years to complete the project, which would mean an addition to the state payroll of $25,000,000 a year."

"Southard has interested both labor and capital in his proposition. Both factions have listened with an attentive ear to his outline of the plan and have agreed with him that it is, in the first consideration, the most feasible of the plans, he says.

Mayor Brown's trip to the basin was to investigate this combined gravity-pumping plan, Southard said. The mayor, it is understood, is also interested in a state plan to finance the work.

More Awards Coming?

From a casual remark dropped by Edward W. Box in New York the other day to a friend, it seems that the American Peace Award of $100,000 is apparently only one of a series which he has in mind.

"Mighty interesting, that award of yours," said this friend.

"Yes," replied Mr. Bok; "so are the others."

Bavarian leaders are urging the women to give their hair for the market, to aid the Fatherland to regain a permanent place in the world.

Reckless Drivers Are Mentally Unbalanced

Health Commissioner Advocates Examinations for Automobilists

By Dr. H. M. Read, King County Commissioner of Health

The psychology of reckless automobile driving does not constitute a mental condition to reckless automobile driving only. It can be easily proven that any person who is reckless along any one line of human activity is almost certain to be so to a greater or less degree in all others.

Recklessness means rashness and a reckless person is always more or less heedless and thoughtless and indifferent to the rights and privileges of other people. Whether along line of automobile driving or any other human activity, such a person wants to bend everyone to his comfort; wants the best for himself; wants everyone to get out of his way; is selfish and reckless in everything that he undertakes.

It would be no trouble whatever to substantiate this statement by a very superficial analysis of their condition. If you don't believe it, the next time you meet with one of these fat-heads who thinks it is smart to go racing by other people on country roads regardless of the condition of the road, or racing in street cars, racing on and off passengers in the city, or through crowded traffic, if you know the person, it is dollars to doughnuts that you will find him the same type that will throw his way through crowds, prodding you in the ribs with his elbow, making you get out of his way, bulldozing his family or relatives or other persons in the family giving way to no one unless he is driven in a corner and compelled by force of circumstances to do so. He will go through life running roughshod over everyone, and constitutes what can be described as a cheap bluffer and his reckless automobile driving is only one type of mental weakness.

In addition to this, his mental characteristics make him a bad citizen and an undesirable person to have in any community. His reckless automobile driving is criminal, and he represents the type that should be imprisoned, restrained or confined until there is evidence of reform or change of character. Such a person is not to be trusted at any time or place.

Automobile drivers who do not always observe caution in so dangerous an occupation are not mentally well balanced, and there will never be a reduction of the frightful results in this and other states until everyone who drives an automobile is compelled to take out a license based on physical examination and no license issued to such a person except according to proper tests, eye-sight, hearing and physical conditions. Such a course will protect other people from the results of asinine stupidity and recklessness as is always exhibited on every country road wherever and whenever you go, and it is useless to enumerate the types of recklessness indulged in by this class of individual.—Washington Motorist.

INVESTIGATE HOSIERY FIRM

The Federal Trade Commission has recently developed facts which illustrate the basis for the demand for a "truth-in-fabric" law. A firm of wholesale hosiery dealers in New York City has been ordered to cease advertising "Ladies' Art Silk Hose" in which there is no true silk. Such a practice is not merely an "unfair competition," which the Federal Trade Commission was created to suppress, but is a bare-faced fraud upon the public. The Federal Trade Commission has no power to impose fines or imprisonments. It can merely tell the crooks to cease, whereupon they can change the name of their firm and go ahead until told to cease again. In the meantime the public is bilked. A "truth-in-fabric" law, with teeth in it, would provide a jail sentence for man, who deliberately attempt to defraud—and there would soon be an end of the attempts.—Logan (Utah) Republican.

CRUSADE AGAINST DISHONESTY

That "a forged or altered check is passed every three and a half minutes of every banking day in this country," and that "a robbery occurs every nine minutes—night and day—of every day in the year," was the startling announcement made by Dr. W. B. Forbush, educational director of the National Surety Company, at the recent convention of the Minnesota Bankers' Association. In an effort to check increasing losses, the surety company has organized a "National Honesty Bureau," through which it co-operates with high school authorities in teaching higher standing of personal honesty. The bureau issues a Certificate of Honor, exchangeable for a fidelity bond of $1,000, good for a year, to high school graduates whose honesty is vouched for by the principal of the school. Whether or not it is proper to put a premium on honesty in this way is doubtful; this virtue is part of an ethical code that should be installed into every living being from infancy up, and there is something decidedly weak in our system of instruction if this is not the case.

PEOPLE OWN UTILITIES

Tendency of the time is strongly toward customer ownership of the public utilities, says the Boston News Bureau in an editorial.

This is partly due to defection of capital into tax-empt investments, partly to a quickened appreciation of the advantages of customer ownership and disadvantage of too great dependence on sale of bonds as a means of raising money for enlargement of plant and improvement of service. Last year the customers of the public utilities bought stock in them to the amount of $175,000,000. This year they are expected to buy a third more. Each of the ten thousand large holders of utility bonds a few years ago now has been replaced by about two hundred small holders of utility stocks.

An eminent engineer said a few days ago that the public utility has become a great human institution. The experiment of customer ownership of the public utilities shows that the plan is desirable from every point of view.

The Lyons Chamber of Commerce has appointed a committee on silk worm culture, and according to advices received by the Bankers Trust Company from its French Information Service, an effort is to be made to develop production of raw silk in North Africa and Indo-China. The object is to enable French silk manufacturers to obtain greater supplies of raw material from French sources.

NEW TODAY

FOR SALE—10 acres under ditch near Pasco; $2250, $800 cash, balance easy. Bernard Kasmer, Takwila, Wash.

WANTED—Ford owners to buy and agents to sell Combination Gasoline Gauge and Filler Spout. Enables driver to see at glance amount of gasoline in tank and fill tank without moving cushions. Address 1512 16th Ave. North, Seattle, Wash., for booklet.

North Idaho District Club Winners

Upper—North Idaho champion canning demonstration team, won district contest at Lewiston Fair in September. Left to right: Dorothy Roupe, Lila Moreland and Charlotte Hoffman, all Lewis County Club members.

Lower—Champion Hereford steer and grand champion steer at Lewiston Fair, 1923. Owned, fed and fitted by Ray Thomas, Lewis County (Idaho) club member. Ray expects to exhibit this steer at the Pacific International Livestock Show in Portland, Ore., next month.

Forty-five Junior Extension Club members representing seven of the ten North Idaho counties met at the Lewiston Fair in September with their exhibits and demonstration teams, to compete for North Idaho district honors. These boys and girls were guests of the Lewiston Kiwanis and Lewiston Commerce and lived in Lewis Hall during the week of the fair.

In addition to the awards won in open class in competition with adults, the following club members are district winners in the Junior Extension Department:

POLAND CHINA SWINE

Sow born after March 1, 1923—First, Vivienne McKinley, Cottonwood; second, Neal McKinley, Cottonwood; third, Neal McKinley, Cottonwood; fourth, Wayne Henderson, Nezperce.

Boar born after March 1, 1923—First, Elmer Thorsen, Nezperce; second, Earl McDonald, Fenn; third, Neal McKinley, Cottonwood; fourth, Neal McKinley.

Sow under 2 years—First, Alfred Funke, Cottonwood; second, George Funke, Cottonwood.

DUROC JERSEY SWINE

Sow born after March 1, 1923—First, Homer Sawyer, Palouse; second, Elmer Sawyer, Palouse; third, Marjorie Jones, Palouse.

Boar born after March 1, 1923—First, Elmer Sawyer, Palouse; second, Ronald King, Potlatch; third, Homer Sawyer, Palouse; fourth, Marjorie Jones, Palouse.

Sow under 2 years—First, Marjorie Jones, Palouse.

FAT BARROW—Any Breed

Class A, Single Fat Barrow—First, Vivienne McKinley, Cottonwood; second, Homer Sawyer, Palouse; third, Felix Papineau, Moscow; fourth, Virgil Thompson, Palouse; fifth, Alfred Funke, Cottonwood.

Class B, Pen 4 Fat Barrows—First, Vivienne McKinley; second, Homer Sawyer, Palouse; third, Alfred Funke, Cottonwood; fourth, Felix Papineau, Moscow.

Class C, Pen 3 Fat Barrows—First, Vivienne McKinley, Cottonwood; second, Homer Sawyer, Palouse; third, Alfred Funke, Cottonwood; fourth, Felix Papineau, Moscow.

BABY BEEF

Shorthorn Steer—First, Wayne Henderson, Nezperce; second, Brown Cranier, Grangeville; third, Earl McDonald, Fenn; fourth, Elmer Thorsen, Nezperce.

Hereford Steer—First, Ray Thomas, Nezperce; second, Garfin Ferris, Nezperce; third, Elmer Thorsen, Nezperce; fourth, Elmer Thorsen, Nezperce.

Champion Shorthorn Steer—Bred by Edwin Nelson, Fenn, Idaho. Owned, fed and fitted by Wayne Henderson, Lewis County Club member.

Champion Hereford Steer—Bred by Robert Wright, Nezperce, Idaho. Owned, fed and fitted by Ray Thomas, Lewis County Club member.

Grand Champion Steer, Hereford—Owned by Ray Thomas.

BEEF CATTLE

Junior Heifer, under 1 year—First, Earl McDonald, Fenn; second, Earl McDonald, Fenn; third, Earl McDonald, Fenn.

SHEEP

Best Ewe Lamb—First, Earl McDonald, Fenn; second, Earl McDonald, Fenn; third, Earl McDonald, Fenn.

Best Ram Lamb—First, Earl McDonald, Fenn; second, Earl McDonald, Fenn.

DAIRY CATTLE

Junior Calf, under 1 year—First, Geo. Funke, Cottonwood.

POTATOES

Best Exhibit, 10 Potatoes—First, Donald Herrick, Lapwai.

NORTH IDAHO CHAMPION LIVESTOCK JUDGE

Felix Pasilowski, Latah County Pig Club member, of Moscow, Idaho. Mr. Pasilowski is to be congratulated upon winning the highest individual honor in livestock judging for North Idaho.

COUNTY LIVESTOCK JUDGING TEAMS TO ENTER DISTRICT CONTESTS

Latah County, first, score 1970—Elmer Thorsen, Virgil Thompson and Homer Sawyer.

FIRST YEAR CLOTHING EXHIBIT

Hand Towel—First, Clara Heitzel, Fraser; second, Frances Smylie, Genesee.

Tea Towel—First, Lila Moreland, Nezperce; second, Winnie Jamison, Nezperce; third, Clara Heitzel, Fraser.

Sewing Kit—First, Charlotte Hoffman, Nezperce; second, Mary Smolnicki, Orofino; third, Edith Shaw, Orofino.

Sewing Bag—First, Mary Smolnicki, Orofino.

Bungalow Apron—First, Audrey Plalman, Genesee; second, Wilma English, Genesee.

Kimona Nightgown—First, Winnie Jamison, Nezperce; second, Mary Smolnicki, Orofino; third, Clara Heitzel, Fraser.

Darning—First, Winnie Jamison, Nezperce.

Fudge Apron—First, Esther Moreland, Nezperce; second, Winnie Jamison, Nezperce.

Best General Exhibit—First, Winnie Jamison, Nezperce; second, Mary Smolnicki, Orofino; third, Clara Heitzel, Fraser.

SECOND YEAR CLOTHING EXHIBIT

Best Set Underwear—First, Wilma English, Genesee; second, Audrey Plalman, Genesee.

Napkin—First, Charlotte Hoffman, Nezperce; second, Helen Hoffman, Nezperce.

Hemmed Patch—First, Charlotte Hoffman, Nezperce; second, Frances Smylie, Genesee.

Petticoat—First, Audrey Plalman, Genesee; second, Kathryn Cascholl, Nezperce; third, Wilma English, Genesee.

Best General Exhibit Year's Work—First, Audrey Plalman, Genesee; second, Wilma English, Genesee; third, Kathryn Cascholl, Nezperce.

THIRD YEAR CLOTHING EXHIBIT

Set Underwear—First, Winnie Jamison, Nezperce; second, Esther Moreland, Nezperce.

Best Piece Fancy Work—First, Winnie Jamison, Nezperce; second, Alta Stuart, Greer; third, Mary Stuart, Greer.

SEWING DEMONSTRATION

Latah County, First—Lula Springer, Frances Smylie, and Wilma English.

SPECIAL HOME-MAKING DEMONSTRATION

Latah County, first—Frances Smylie.

JUNIOR CANNING EXHIBIT

Best Six Jars Berries—First, Dorothy Roupe, Nezperce; second, Helen Hoffman, Nezperce.

Best Three Jars Stone Fruit—First, Esther Moreland, Nezperce; second, Vera Harding, Nezperce.

Best Three Jars Vegetables—First, Lila Moreland, Nezperce; second, Winnie Jamison.

Best General Exhibit—First, Lewis County Canning Club.

HOME ECONOMICS DEMONSTRATION CONTESTS

Canning Demonstration—Lewis County first (Charlotte Hoffman, Dorothy Roupe, Lila Moreland); Kootenai County, second (Ruth Pierson, Frances Pierson, Blenda Westerlund); Benewah County, third (Ada Olmstead, Doris Griffith, Louise Boutiller).

Baking Demonstration—Benewah County, first (Dorothy Griffith, Louise Boutiller).

How to Make "Finger Prints" of Leaves

It seems to me that children nowadays have none of the resourcefulness that was usual among the young folks of my day, writes Ernest Thompson Seton in Nature Magazine. When I wanted a baseball, I made it out of cork, lead, yarn, and a cover of cord. The modern boy asks Dad for the money to buy one. So also of the bat, the bob-sleigh, the fish pole, and a hundred other things.

Which is not what I set out to tell you at all, but rather how we made beautiful pictures of leaves, even though we were not artists.

This is a simple art that our grandmother taught us, and one that I wish every child would take up today; for even the little ones seven and eight years old, with reasonable care, can make permanent black portraits of leaves that will rival the finest steel engraving in delicacy, and far outdo them in their absolute truth.

These are the materials of the craft: a thimbleful of unsalted butter or lard, a common candle or else an oil lamp with the chimney off, some sheets of cheap, common, soft paper, and last, a selection of ordinary leaves. If possible, get strawberry, raspberry, and elm, for these have such hard and prominent veins that you will be sure to have wonderful success in one or two tries, and thus get mightily encouraged and help all who see to become interested.

Begin by greasing or buttering a sheet of soft paper, rubbing the grease on evenly so that the paper is faintly oily all over the surface. Now, light your candle or lamp, and, turning your paper greasy side down, hold it low over the light, so that it is just in the top of the flame. Keep the paper moving rapidly round and round, or back and forth, until the greasy side is smoked over evenly and jet black. If you allow the paper to rest one moment, or hold the edge over the name, it will take fire.

The smoking should be done by a grown-up; the little ones should not be trusted with the handling of fire.

When this, your smoke sheet, is ready, lay it down, smoky side up, on top of one or two thicknesses of cloth to make a smooth, soft pad. On the smoke sheet lay the leaf that is to be printed, the under side of the leaf to the paper. Now, on top of the leaf, place a sheet of soft paper. Hold it down tight with one hand, and with the finger tips of the other, rub the upper sheet all over, so as to press the leaf well into the black of the smoke.

Then lift off the top sheet—that is, the pressing sheet—take the leaf by the stalk, and lay it on a sheet of clean, white paper. Lay another clean sheet on this, holding it steady, for neither leaf nor paper must slip. Rub all over the top sheet, so as to press the leaf at all points.

Now, lift the pressing sheet and the leaf, and lo! a perfect portrait of the leaf, life-size, in imperishable carbon ink.

One leaf will make as many prints as you desire.

The chief mistakes you must avoid are putting too much grease on the smoky paper, and letting the leaf slip while printing.

If the black looks uneven, rub it even with the finger tips. Sometimes the sheet will need re-smoking.

If you cannot get a candle or a lamp, a substitute is found in a little torch of fat pine stick, a curl of birch bark, or even a rag of tar paper.

Always label your print with date, place, and name of the plant, if possible. If you do not know the name, some friend will surely tell you.

This is such a delightful combination of outdoor expedition and indoor art that the Woodcraft League allows honors for it. Fifty good prints of different leaves, properly labeled, counts for low honor, one hundred for high honor.

While one naturally puts these in an album as plant pictures—finger prints of the trees—they can also be used for decoration. They may be applied as a border, in a passepartout, on the cover of a book, as lining paper, or for personal touch on the head of notepaper.

What Is Wrong With Mothers?

The trouble with mothers is that they will not let their daughters grow up. Mothers teach their girls to be daughters only—sweet, clinging, helpless—and what the world needs is girls educated to be mothers, with deep insight into the task of marriage and motherhood. This is the scathing indictment which Clara Savage Littledale launches against mothers generally, in Good Housekeeping.

SEEDS IN PARIS

The American people like maples, says the American Tree Association which calls you to join the tree-planting army this fall. The maples have opposite leaves, with deeply recessed edges, with a long winglike appendage, in pairs. These are as characteristic as acorns are of the oaks. The leaves are borne in pairs, one opposite the other.

Return of the Asiatic Expedition

The third Asiatic expedition of the American Museum of Natural History has just returned to Peking after five months in the Mongolian plains. Among the discoveries made of a prehistoric era was one, that dinosaurs—colossal pre-historic reptiles—laid eggs 5 or 6 inches long, and that they had nests like the modern "biddy." The fossil beds found in Mongolia are the largest known to science. The adventurers of science returned with the opinion that they had proved that Mongolia appears to have been the center of dispersion of the most ancient animals traced. Dr. Osborn and Roy Chapman Andrews, the naturalist, consider the spectacular feature of their discoveries to be the 25 fossilized dinosaur eggs, which were found in nests in sedimentary strata, among the skeletons of medium-sized dinosaurs. These are the first dinosaur eggs to be discovered; it had not been know before that dinosaurs laid eggs. These eggs are elliptical, 5 or 6 inches long, their shells, now covered with a buff-colored coating. Their age is estimated at ten million years. Seventy-two skulls and twelve entire skeletons of these creatures were found. The expedition also found many remains of mammals, especially of a giant rhinoceros-like beast. The party traveled in motor cars, carrying supplies by a caravan of 70 camels. Hardships and danger of bandits were encountered all through the desert.

FRANCE INCREASES TRADE

France's trade in the first seven months of 1923 increased, compared to 1922, both in value of imports from and exports to all important countries excepting Germany. The official detailed figures, as received by the Bankers Trust Company from its French information service, disclose that Great Britain led in total value of trade with France, Belgium was second and the United States had third place. French imports from the United States were, however, greater in value than those from any other country excepting Great Britain.

Ford

New Prices

Effective October 2, the Ford Motor Company announces the following reduced prices on all Ford Cars and Trucks:

Runabout - -	$265.00
Touring Car - -	295.00
Coupe - - -	525.00
Four-Door Sedan	685.00
Chassis - - -	230.00
Truck Chassis -	370.00

All Prices F. O. B. Detroit

These are the lowest prices in all Ford history. With the recent changes and refinements that have been made in every body type, Ford Cars now offer new values in motor transportation. Especially is this true of the new Four-door Sedan with its streamline body and many added conveniences.

The Fordson Tractor

The price of the Fordson Tractor has been increased $25.00, making the present price $420.00 F. O. B. Detroit.

You can take advantage of these new prices through the Ford Weekly Purchase Plan

Morscheck Brothers

Some people exploit their own purity by arguing that it is a sin only when found out.

NEW BIG PACKAGE

Relic of Former Days

Traveling from Tacoma, Washington, to St. Paul, an honored relic of Northwest history has just passed through the scene of its early use, to rest in the archives of the Northern Pacific railway. It is an old United States flag, bearing only 36 stars and ragged with age, and it marks a significant period in the development of the northwestern states.

When the financial panic of 1873 had passed, and the work of building a railroad on into the wilderness of the Northwest could be resumed, the Northern Pacific company was not able to afford immediate construction of the bridge planned to span the Missouri river between Mandan and Bismarck, N. D. but the construction of the Missouri division had to go on in spit of the lack of a bridge.

Work was begun on the new division in the dead of winter, 1878, by the transportation of ties, iron and other material across the Missouri river on the ice. A track was laid upon the frozen surface of the river, under the direction of General H. L. Rosser, engineer of construction. For several weeks trains were run from one bank to the other on the ice—a daring innovation in the railway roadbeds.

Used Tobacco in Football

Chewing tobacco while playing football caused the death of Chester Mares, a Cleveland semi-professional player, who died from strangulation while being taken to a hospital at Painesville.

Mares, playing fullback at Willoughby, had just thrown a forward pass when he was knocked off his feet. In falling, a wad of tobacco became lodged in his throat. Efforts of physicians at the field to prevent death failed.

they do not reverence every star and stripe in "Old Glory" then let's "watch our step," put a ban on immigration, and have an America for Americans.

Olive Mulalley.

H. S. Plans Entertainment

It was thought best to substitute some other entertainment feature that we all might permanently profit from, in place of the high school carnival, such as has been given during the past two years by the students of our high school. These carnivals have their place and perhaps we will give one again some time, (when we are in need of funds for our various activities), but this year our energies are to be turned in another direction.

The special feature that has been selected is that given by Thomas Elmore Lucey and embraces a varied program of song, sketch and story. Mr. Lucey is a poet-humorist, actor, song writer, and world traveler who has spent 20 years on the lyceum trail. His work in character portrayal is said to be especially fine. He has made some 5,000 appearances in half the nations of the earth and has given complete satisfacton wherever he has appeared. His memorial program in Marion, Ohio, just after the death of the late President Harding, was attended by thousands. His wanderings both personal and professional have carried him over a zigzag trail that is approximately 600,000 miles in length and he will give us a message gleaned from the multitude of scenes and experiences that surely will be interesting. During the period of the war his time was given to the government and was spent in the entertainment of the soldiers scattered through the camps of our country.

From the Moose Jaw, (Canada), Morning Press comes the following comment on his entertainment: "A literary entertainment was immensely enjoyed at the Majestic last night, when Thos. Elmore Lucey appeared under the auspices of the Loyal Order of Moose, in his various impersonations, songs and stories. Mr. Lucey's versatility was the cause of wonderment, and his quick and complete character changes were exceedingly clever. As an impersonator he is certainly in the front rank. His impersonations of Cardinal Wolsey, Bill Nye and Edgar Allen Poe, vastly different characters, made a tremendous hit. In fact, it can be truly said that Mr. Lucey is a whole show in himself."

Our local highschool students are planning to bring this high class entertainment to Genesee and are now busy developing plans for a sales campaign to put a first-class entertainment within the reach of all. We are hoping for the support of the community and promise that everyone will be more than pleased with the program—and, to sum it up in Mr. Lucey's own words: "With every rose you get a thorn, but ain't the roses sweet?" Thursday, November 1, is the date fixed upon for this entertainment. It is planned to use the proceeds for the various class and school activities.

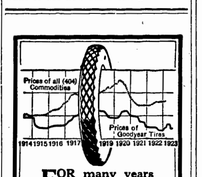
On Father's Trail

With a sentimental leaning toward the days of his own youth, a certain business man sent his son to the college where he himself had been educated.

On arriving at the place of much knowledge the young man began to make a few inquiries. "I should like to see my father's record," said he to the head of the college. "He was here in 1890."

"I shall be very pleased to show you the record," was the reply. "But have you any special reason for consulting it?"

"Well," replied the youth frankly, "when I left home dad told me not to disgrace his record, and I only want to see how far I can go."



FOR many years now, Goodyear Tire prices have been kept consistently lower than the average price level for all commodities, as you see from the above chart. At the same time, Goodyear quality has been consistently bettered. Today, Goodyear Tire prices are lower than in 1914, and Goodyear quality is the highest ever. This is a good time to buy Goodyears.

As Goodyear Service Station Dealers we sell and recommend the new Goodyear Cords with the Invisible All-Weather Tread and back them up with Goodyear Goodyear Service

A Good Physic

When you want a physic that is mild and gentle in effect, easy to take and certain to act, take Chamberlain's Tablets. They are excellent. For sale at Clark's Drug Store.

A "For Sale" ad. will sell your stuff.

A Remarkable Record

Chamberlain's Cough Remedy has a remarkable record. It has been use for colds, croup, and whooping cough for almost half a century and has constantly grown in favor and popularity as its good qualities become better known. It is the standard and main reliance for these diseases in thousands of homes. The facts that it can always be depended upon and is safe and pleasant to take are greatly in its favor when it is wanted for children. For sale at Clark's Drug Store.

THE GENESEE NEWS

VOL. XXXV — GENESEE, LATAH COUNTY, IDAHO, FRIDAY, OCTOBER 26, 1923. — NO. 17

A PLEASING RESUME OF OUR PUBLIC SCHOOL WORK

By Estel Rogers

Although we are living in a prosperous age—in an age when new discoveries and improvements are common—we occasionally hear people say there is nothing left in the world for them to do. Some people even say if they had lived when Columbus did they would have had a chance to give something wonderful to the world.

On Wednesday of last week Principal Winegardner showed us that this idea is wrong. He pointed out to the school some of the improvements of the past, the improvements going on now, and the things to be improved in the future. In the light of his presentation of this situation, there seems to be no room for discouragement for there are great fields of work which have just been entered.

It has been the custom of our high school in the previous years to divide the student body into two equally talented divisions for the purpose of giving literary programs. This year the plan has been changed. Under the new way the seniors and sophomores will work together in putting on programs, while the juniors and freshmen will work together for the same purpose. It is thought that this will cause more competition and as a result will bring more hard work and earnestness into our literary activities.

This coming Friday afternoon the dignified seniors are going to entertain their inferiors by giving them the first program of the school year. We know it will be good because the seniors are putting it on.

Miss Hummel reports that all of the students have finished the first twenty-five drills, that are in our writing books. These drills are to be sent to the Palmer company which will act as judge, and will award the best writers with a small trophy.

Last Saturday, when the football team came home after playing Lewiston's second team, they "brought home the bacon" with them. The team went into the game in earnest which was showed by the way they worked. Soon after the game started Vincent Hasfurther made a touch-down, which caused both teams to work all the harder. For a long time it was "give and take," until Roy Cameron made a toouch-down for our team. Again there followed a period of zig-zag work until the game closed at which time the score stood 6 to 12 in our favor. The Lewiston boys also put up some real work, for they had the ball very close to our line when the game ended.

This Friday afternoon the Lewiston team will meet our boys on the local feld. A good game is expected for Lewiston has a strong team, and we have a great deal of confidence in our own boys.

The campaign for the success of the Thomas Elmore Lucey entertainment, under the auspices of the high school, is well under way. A committee with two members from each class has been appointed to take charge of affairs. It is expected that the entertainment will be very good and if you miss it, you are going to miss one of the best entertainments that Genesee will have this fall, and probably one of the best that we will have during the entire winter. You are sure to get your money's worth, for from all reports Mr. Lucey is a good entertainer, and his audiences have always greatly enjoyed him.

The school needs your support and co-operation. Be a booster and help your school. Don't forget the date—next Thursday night, November 1 — at the opera house.

The history classes of the high school have been reading a new book, lately, which has caused a good deal of thought and discussion. The title of the volume is "The Next War." It was written by Will Irving. Mr. Irving was a war correspondedt during the late World War, and as he spent most of his time where the contest was the hottest, he knows what he is talking about.

In his book he does not tell when the next war will be fought, why it will be fought or where it will happen; but he pictures how it is going to be fought. He points out the change in warfare, the improvements on weapons, and the possibilities of the awfulness of the next conflict. He also states that gas and the aeroplane will be big factors in the next war. Since the war, peace conference after conference has been held, but it still seems as though the nations of the world all believe in "safety first." The European nations are not the only ones preparing on an extensive scale for the United States is not far behind. The United States has recently produced the Lewisite gas, which is one of the most deadly gasses in existence.

Of Interest to Ex-Service Men

Giving scores of disabled war veterans of the Pacific Northwest permanent compensation, a new move on the part of the United States Veteran's Bureau establishing medical rating boards throughout the district for the purpose of awarding permanent partial ratings is proving not only a benefit to the injured ex-service man but will also be a money-saver for the government, according to L. C. Jesseph, northwest district manager of the bureau.

More than 100 disabled veterans have already been given permenent partial disability ratings, meaning permanent compensation from the government and eliminating the need of periodical examinations, he stated. Approximately 2,000 men will be called in for examination before the rating boards finish their work. Boards have been named at Seattle, Tacoma, Spokane, Portland, Walla Walla and Boise.

"Disabled ex-service men receiving notices to report for examination before one of these boards should make it a point to do so at the time designated," said Mr. Jesseph. "This program of awarding permanent compensation to veterans with partial disability ratings is one of the most important and far-reaching moves of the Veterans' Bureau since its formation. It relieves the mind of the injured ex-service men whose disability is of a permanent nature because he will receive a permanent income ranging from $10 to $100 a month. The government administration costs will be lightened because the men will not have to be examined at stated times."

Mr. Jesseph stated that veterans given permanent ratings may have their compensation increased in case their injuries are aggravated but no reductions can be made under the preseht rulings.

May Make Air Flivvers

Henry Ford, who speckled the surface of the earth with flivvers, has ideas that may fill the air with them.

Mr. Ford's theories on the future of the "air lizzies" as heard by Lawrence Sperry, American father of the flying flivver, were reported by Mr. Sperry on his return from a two-thousand-mile trip in his tiny plane, the "Messanger," with a wing spread of only 20 feet.

A month ago Mr. Sperry left Farmindale N. Y. on his trip during which he visited Washington, Dayton, and St. Louis. On the return journey, he had occasion to stop off at Detroit for a couple of gallons of gas and while there was invited to talk to Mr. Ford in his Dearborn domicile.

At the very outset of the conversation, Mr. Sperry said, Mr. Ford was impressed by the fact that a flying flivver could go further on a gallon of gas than an earth flivver.

The city boy, Mr. Ford thought, was quicker to accept a new idea than the country boy, as proved by the country boy's reluctance to give up the plowhorse for the new fangled tractor. So Mr. Ford thought Mr. Sperry should try to tell his plans to city boys first.

The three-cylinder air-cooled motor with which the Sperry flivver is equipped interested Mr. Ford a great deal and he viewed it, Mr. Sperry said from a standpoint of quality production, expressing the belief that in large numbers the engine could be built for $50.

"If he is right and he ought to be," Mr. Sperry said, "the first air flivver could be put on the market for less than $1,000."

Ford May Be Nominee

Henry Ford in all likelihood will get the presidential nomination of the prohibition party, according to Virgil O. Hinshaw, chairman of the prohibition committee, who issued a call from Los Angeles for a national conference at Washington December 12.

"Ford seriously considered our proposal to nominate him in the last presidential election but eventually he decided to support President Wilson," Mr. Hinshaw said. This time, however, he is almost certain to be our choise."

The call issued today by Hinshaw, who has just returned from a trip into Mexico, fixes the Ralleigh hotel, Washington, D. C., as the place of the meeting and adds:

"This conference is called for the two-fold purpose of analyzing and remedying present conditions as to enforcement of the prohibition laws and to arrange the time and place of meeting of the national convention in 1924 to nominate a candidate for president and vice president."

The book brought to our minds forcibly the question, "When will the race in armaments cease, and when will war cease to be?"

OUR NORTH AND SOUTH HIGHWAY BEING KNOCKED

Norton Browne, sign painter, who makes this section of the country about every two or three years states that our north and south highway is being very much abused at Walla Walla and Pendleton, and other places to the south, who are afraid this nationally-known highway will very much interfere with tourist travel through their part of the country.

While the North and South highway has not been in any too good condition during the past few months, there is a reason for it. The road has been under course of construction during the past several months and it should not be expected that it would be in as fine condition as it naturally would be were it finished. Mr. Browne says the road is in excellent condtion with the exception of a very few miles—in comparison to the length of the surveyed road—and that really no one has, or should have, any complaint as to its general condition. He says he drives a Chandler car and loads it with about one ton and that he has no trouble whatsoever making it "on higs."

Governor Moore recently drove over the North and South highway to secure first-hand information about that road and found that much of the criticism concerning it is unjustified. Apfrom Boise to Lewiston is an admirable highway in every particular. Between New Meadows and Round Valley there is 12 miles of old road which awaits the completion of a new bridge to open up the new highway on the other side of the canyon. There is 23 miles in total of unfinished road from Round Valley to Lucille and this made up of several sections separated with finished portions of excellent highway. Accorging to the state highway department $470,000 are necessary to complete these sections of the road.

At various points along the road contractors are working on sections of the highway for which contracts were let last year. At least $200,000 are being spent on these and there are sections already contracted for which are awaiting better labor conditions for construction. The completion of a few culverts will also make this road much better for the next year.

The state highway department has on this road only the two or three engineers who are required for supervision by the federal government which is furnishing 68 per cent of the funds. Temporary clearing of the old road, with $28,000 from the gas tax, is being done at this time. To spend much more than this would be wasteful, since eventually these sections will be built by contract.

Mr. Browne is an exponent of good roads, since he travels 12 months out of every year, and he says that when the North and South Idaho road is completed there will be no more scenic highway in the entire United States —and he is in a position to know whereof he speaks. And he also says that Genesee should secure its share of the tourist travel if we make proper arrangements to take care of those who come our way—and that it can be done at a very small expense.

His plan of a tourist camp and method of handling, will later appear in The News—and you will be surprised at the simplicity of it.

Socialistic Bubble Explodes

With the admission made publicly by the Australian premier that national operation of ships has resulted in bankruptcy, another socialistic bubble is punctured. Government operation of the Australian fleet has paid nothing into the public treasury, but has taken $30,000,000 out of the pockets of the Australian people. Their fleet was taken over during the war under rather favorable conditions, Australian ships operating free from all restrictions imposed on other shipping.

Socialists rejoiced that tonnage was short, markets plentiful, middlemen and selfish interests ditched and only the welfare of the general public was to be considered. The prime minister shows a loss in operation of $14,000,000 in two years, gross cost of the fleet of $70,000,000 shrunken to $23,000,000.

A new shipping board is to take over the fleet at $23,000,000 and a great $11,000,000 dockyard at $2,000,000.

The taxpayer who lost a large sum in the venture, are now asked to supply a further large sum to enable the government to continue in the business.

Socialism promises to improve the condition of the people, results in Australia as elsewhere only impoverish them.

Did you notice the yellow slip on your paper—just what the date is?

WHAT HAPPENED HERE TWENTY YEARS AGO

William Rosenau, who recently purchased a half section of land near Genesee is expected to arrive here soon from Minnesota to remain permanently.

Owing to the refusal of the packers to carry liquor into the Thunder mountain district, they having more than they can attend to in taking in other supplies, the camp is threatened with a "booze" famine.

It is safe to say that nearly $20,000 has been paid to farmers tributary to Genesee in the past two months for baled hay, the greatest part of which is now being stored in town for shipment. The price being paid is a very satisfactory one and the quality of the articles being sold is inferior to that of past seasons.

With the addition of the front and other improvements the Larrabee building presents a fine appearance, in fact is a credit to the street. Extensive improvements are being planned for the interior of the store room yet.

The auction sales held Friday and Saturday at the Ed Peterson and Chris Baldus farms were largely attended and nearly all articles offered for sale brought good prices. At the Peterson sale more than $1300 worth of implements, stock, etc., were disposed of. At the Baldus sale a large crowd was present and all articles found ready buyers. It is a fact worthy of notice that buyers were anxious to secure the cash discount and were there with ready money.

Wm. Gibb and family now occupy the Jamison residence near the Christian church. They expect to reside in town during the winter to give their children the advantages of the city schools.

Progressives Entertained

The Progressive club was very delightfully entertained by Mrs. R. I. Witty and Mrs. F. C. Shork at the home of Mrs. Witty on Thursday of last week. The afternoon was spent with needlework and social converse.

A delicious luncheon was served during the afternoon and a very pleasant time was reported.

The guests were Mrs. A. Springer, Mrs. D. Springer, Mrs. Frank Boorman, Mrs. Geo. Follett, Mrs. F. J. Niemann, Mrs. C. P. Whalen, Mrs. Mahlon Follett, Mrs. Harry Schooler, Mrs. W. E. English and the hostesses, Mrs. R. I. Witty and Mrs. F. C. Shork.

The next meeting will be held at the home of Mrs. H. H. Schooler on Thursday, November 1.

Two Cars Hogs Shipped

Martin Schei on Monday shipped a car of hogs to Spokane, he accompanying the shipment. He estimated the hogs would weigh about 200 pounds each.

The Farmers Union on Tuesday shipped a car of fat hogs to Moscow for which they received $7.60.

Why ship to Spokane when there is a good market close at home? The Hagan & Cushing company advertise they will pay the highest market price—why go further?

Game Protective Meeting

On Friday evening, November 2, there will be a meeting of the Genesee Game Protective association held in the office of W. W. Burr at 7:30.

The object of this meeting will be a discussion of ways and means to combat predatory birds and animals and thereby insure an increase in the game supply of this region.

Stop! Look !Listen!

The difficulty of getting the simplest facts into the heads of some people may be realized when one stops to consider that there are many who don't seem to understand that all accidents between railroad trains and other vehicles invariably take place upon the former's right-of-way.

Cuts Finger Badly

Mrs. Albert Peterson had the misfortune to badly cut the index finger of her right hand while washing dishes Tuesday morning. It was necessary to come to town, when Dr. Ehlen took several stitches to close the wound.

Nearing the End

"I am not going to talk long this evening," said the speaker. "I've been cured of that. The other night I was making a speech when a man entered the hall took his seat right in the front row. I had not been talking an hour when I noticed he was becoming fidgety. Finally he rose and asked:

"'Say, how long you been lecturin' ?"

"'About four years, my friend,' I replied.

"'Well,' he remarked, as he sat down, 'I'll stick around; you must be near through."

Taxes and Public Ownership

Property owned by the federal government is not subject to taxation. If public ownership were adopted in this country and the tax-free exemption continued, there would be enormous losses to public treasuries, quite enough to force a radical revision of public expenditure or a hunt for new sources of income.

During 1921 railways under government operation paid taxes amounting to $275,128,134. Of that sum $37,176,773 went to the United States government and the remainder, $237,951,361, went to the United States and local governments. Public ownership would mean the loss of all that sum to the public treasuries.

There is an increase in taxiation paid by railways. Statistics indicate the total for 1922 will be about $304,000,000. On these properties in 1916 the taxes amounted to $162,474,733. In that year the railways paid taxes of $681 per mile of track, while in 1921 the taxes per mile had been increased to $1223.

These are some of the practical questions involved in any campaign for public ownership of utilities and railroads. They are of interest to the public because the information has a large value to the taxpayers, who will be affected by heavier taxes falling on all property that remains in private ownership.

Americans Own Over 13,000,000 Autos

There is no sign of a let-up in the purchase of motor vehicles, according to the Bureau of Public Roads. During the first six months of 1923 there was a registration of 764,052 motor cars and trucks. This rate of increase is about the same as that which has prevailed since 1916.

The registration in 1916 was 3,512,996 motor cars and trucks. On July 1, this year, the total registration of motor vehicles was 13,002,427. Of this number 11,571,181 were private passenger cars.

The increase in registration of motor vehicles is providing a handsome fund for road improvement. The total revenues obtained from such registration amount to over $167,000,000 annually, and of this $135,000,000 is aplied to public highway construction and maintainance.

Gasoline tax is also getting to be a very important source of revenue for highway improvement. During the first half of the year, gasoline taxes in the sum of $8,670,000 were collected, of which $5,000,000 was applied to public highway work. The revenue from this source will materially increase during the last half of the year, due to the fact that several of the states enacted gasoline taxes early in the year to take effect July 1, or at some later date.

Our Vanishing Forests

Americans are using up their timber supply four or five times as fast as new trees are being grown. Three-fourths of our original soft wood supply has been cut down. So warns Colonel Henry Solon Graves, head of the Yale Forest school.

The senate committee on forestry has been holding sessions in the Western lumbering states devoted to taking testimony of experts of the question of reforestation.

Senator C. L. McNary of Oregon, chairman of the committee, brought out the fact that the federal forestry department alone was capable of dealing with national forestation.

The facts developed show that it is clearly a national problem, the timber supply being a national need and the entire United States being engaged in literally destroying the existing forests.

The states containing the largest acreage of logged-off lands have been impoverised by removal of the forests and are least able to carry on large reforestation projects.

The private owner of timber lands cannot be compelled to replant devastated areas. So there is nothing left but for Uncle Sam to do it.

At the Opera House

The offering at the opera house Saturday night will be "On the High Seas," with Dorothy Dalton and Jack Holt in the stellar roles.

In the absence of necessary advertising matter it is impossible to give particulars, but suffice it to say that when Jack Holt and Dorothy Dalton are at the head it will be one of the very best.

A dandy comedy will also be shown —one that will make you smile all the way home.

Mercury's Trend Downward

The mercury, like the price of wheat, is inclined to "go down" these nights. It reached the low mark of 27 degrees Wednesday night.

Pretty cold to be so close to the "banana belt."

SEMI-LOCAL NEWS CLIPPED FROM EXCHANGES

Street Car Company in Local Hands

In a deal made this week between the Nortz interests and local people, the latter have acquired ownership of the company. Henry Hartung, manager since the organization of the Lewiston-Clarkston Transit company, is now president. The other local men interested are Mark Means, R. S. Erb and E. A. Cox.—Lewiston Tribune.

Believe Dairying Pays

J. N. Dahmen and Alois T. Moser are two more young farmers who have silos and who have just finished filling them with silage for the winter. They have been quite successful in building dairy herds, and are among the Bald Butte farmers who are getting away from the one crop idea.—Colton News-Letter.

Complete Road

The graveling of Main street which is now under way at Ferdinand is expected to be completed this week, thus closing the only gap of unfinished graveled road between Cottonwood and Lewiston via the Web route. There still remains to be constructed about three miles of road on the North and South highway between Cottonwood and Lewiston and this is in the Lapwai district.—Cottonwood Chronicle.

Steamer Taking Out Grain

The steamer, J. N. Teal, Captain John Akin in charge, went into commission Thursday and is now engaged in removing such wheat as has been sold, from the warehouses in Asotin and at Ten Mile. The recent rains have placed the water of the Snake river at a very satisfactory stage, and the captain does not expect to encounter difficulty in navigation any more this fall. Trips will be made to Asotin and up-river points regularly, or at least when sufficient grain has been disposed of to make a boat load. —Asotin Sentinel.

Fined for Leaving Meat

Dr. Datzlaff of Sandpoint, who with his wife, has been in the mountains hunting, came in Wednesday with two nice elk heads, one of them with a kind of a freak set of horns, and also a deer head, but with very little meat, was arrested, plead guilty and was fined $25 for leaving the meat in the woods. The case was heard before Judge Snyder Thursday morning, the party leaving at once for their home. It is thought that the doctor was innocent of any intent to violate the game laws. He did not have sufficient stock to bring out all the meat. —Clearwater Tribune.

King Tut's Skeleton

One of the most unique window displays in the city, probably meant as a warning to Ford drivers who go above 50 miles an hour, is the "King Tut" display in the window of Tim Sullivan's garage. In a beautifully lined coffin reposes a skeleton, represented to be that of King Tut, made up entirely from Ford parts. And it looks like a real skeleton, too, with a headlight used for a skull, with all the bones, including fingers and toes, represented by small parts of a Ford. Those who have stopped to gaze on the "remains," and they are many, express wonder that pieces of steel and iron could be made to resemble so chelosely a human skeleton. The architect was Tim Sullivan, himself.—Star-Mirror.

Hit By Passenger Train

Miss Sadie Douhan, of Kalispell, Montana, who is visiting at the home of her sister, Mrs. J. B. Watson, was hit by the south bound passenger train today noon. The accident happened at the curve just west of the depot. At this point it is impossible to see very far ahead. Miss Douhan was walking on the track in the same direction as the approaching train. She was not seen by the engineer until within a short distance from her on account of the curve. The whistle was blown but Miss Douhan evidently could not clear the track to avoid being hit. The train was brought to a stop so that the last coach was opposite the unfortunate girl. She was put aboard the train and taken to St. Joseph's hospital at Lewiston. At last reports she was under the influence of either, with the doctors trying to determine the extent of her injuries.—Troy News.

Underwent Operation

William Godschalx, who lives with his uncle, Rev. L. C. Godschalx, was operated on at the Evans hospital last week for tonsils and adnoids. The youngster is getting along nicely.

MY LADY'S MONEY

An Episode in the Life of a Young Girl

By Wilkie Collins

(Installment No. 24)

CHAPTER XX

The day of the garden-party arrived. There was no rain, but the air was heavy, and the sky was overcast by lowering clouds.

Some hours before the guests were expected Isabel arrived alone at the farm, bearing the apologies of unfortunate Miss Pink, kept a prisoner in her bedchamber by the asthma. In the confusion produced at the cottage by the preparations for entertaining the company, the one room in which Hardyman could receive Isabel with the certainty of not being interrupted was the smoking-room. To this haven of refuge he led her—still reserved and silent, still not restored to her customary spirits. "If any visitors come before the time," Hardyman said to his servant, "tell them I am engaged at the stables—I must have an hour's quiet talk with you," he continued, turning to Isabel, "or I shall be in too bad a temper to receive my guests with common politeness. The worry of giving this party is not to be told in words. I almost wish I had been content with presenting you to my mother, and had let the rest of my acquaintances go to the devil."

A quiet half hour passed, and the first visitor, a stranger to the servants, appeared at the cottage gate. He was a middle-aged man, and he had no wish to disturb Mr. Hardyman. "I will wait in the grounds," he said, "and trouble nobody." The middle-aged man who expressed himself in these modest terms was Robert Moody.

Five minutes later a carriage drove up to the gate. An elderly lady got out of it, followed by a fat white Scotch terrier that growled at every stranger within his reach. It is needless to introduce Lady Lydiard and Tommie.

Informed that Mr. Hardyman was at the stables, Lady Lydiard gave the servant her card. "Take that to your master, and say I won't detain him five minutes." With these words her ladyship sauntered into the grounds.

Lady Lydiard advanced so as to meet Hardyman at the entrance to the shrubbery. He bowed stiffly, and begged to know why her ladyship had honored him with a visit.

Lady Lydiard replied, without noticing the coldness of her reception: "I have not been very well, Mr. Hardyman, or you would have seen me before this. My only object in presenting myself here is to make my excuses personally for having written of you in terms which expressed a doubt of your honor. I have done you an injustice, and I beg you to forgive me."

Hardyman acknowledged this frank apology as unreservedly as it had been offered to him. "Say no more, Lady Lydiard. And let me hope, now you are here, that you will honor my little party with your presence."

Lady Lydiard gravely stated her reasons for not accepting the invitation.

"I disapprove so strongly of unequal marriages," she said, walking on slowly towards the cottage, "that I cannot, in common consistency, become one of your guests. I shall always feel interested in Isabel Miller's welfare; and I can honestly say I shall be glad if your married life proves that my old-fashioned prejudices are without justification in your case. Accept my thanks for your invitation, and let me hope that my plain speaking has not offended you."

She bowed and looked about her for Tommie before she advanced to the carriage waiting for her at the gate. She had forgotten to look back for the dog when she entered the shrubbery. She now called to him, and blew the whistle at her watch chain. Not a sign of Tommie was to be seen. Hardyman instantly directed the servants to search in the cottage and out of the cottage for the dog. The order was obeyed with all needful activity and intelligence, and entirely without success. For the time being, at any rate, Tommie was lost.

Returning from the garden gate, after taking leave of his visitor, Hardyman received from his servant a handful of letters which had just arrived for him. Walking slowly over the lawn as he opened them, he found nothing but excuses for the absence of guests who had already accepted their invitations. He had just thrust the letters into his pocket, when he heard footsteps behind him, and, looking round, found himself confronted by Moody.

"Hallo! have you come here to lunch?" Hardyman asked, roughly.

"I have come here, sir, with a little gift for Miss Isabel, in honor of her marriage," Moody answered, quietly. "And I ask your permission to put it on the table, so that she may see it when your guests sit down to luncheon."

He opened a jeweler's case as he spoke, containing a plain gold bracelet with an inscription engraved on the inner side: "To Miss Isabel Miller, with the sincere good wishes of Robert Moody."

Plain as it was, the design of the bracelet was unusually beautiful. Hardyman had noticed Moody's agitation on the day when he had met Isabel near her aunt's house, and had drawn his own conclusions from it. His face darkened with a momentary jealousy as he looked at the bracelet. "All right, old fellow!" he said with contemptuous familiarity. "Don't be modest. Wait and give it to her with your own hand."

"No, sir," said Moody. "I would rather leave it, if you please, to speak for itself."

Hardyman understood the delicacy of feeling which dictated those words and, without well knowing why, resented it. He was on the point of speaking, under the influence of this unworthy feeling, when Isabel's voice reached his ears, calling to him from the cottage.

Moody's face contracted with a sudden expression of pain as he, too, recognized the voice. "Don't let me detain you, sir," he said, sadly. "Good morning!"

Hardyman left him without ceremony. Moody, slowly following, entered the tent. All the preparations for the luncheon had been completed; nobody was there. The places to be occupied by the guests were indicated by cards bearing their names. Moody found Isabel's card, and put his bracelet inside the folded napkin on her plate. For a while he stood with his hand on the table, thinking. The temptation to communicate once more with Isabel before he lost her forever was fast getting the better of his powers of resistance. "If I could persuade her to write a word to say she liked my bracelet," he thought, "it would be a comfort when I go back to my solitary life." He tore a leaf out of his pocket-book, and wrote on it: "One line to say you accept my gift and my good wishes. Put it under the cushion of your chair, and I shall find it when the company have left the tent." He slipped the paper into the case which held the bracelet, and instead of leaving the farm as he had intended, turned back to the shelter of the shrubbery.

CHAPTER XXI

Hardyman went on to the cottage. He found Isabel in some agitation. And there by her side, with his tail wagging slowly, and his eye on Hardyman in expectation of a possible kick—there was the lost Tommie!

"Has Lady Lydiard gone?" Isabel asked eagerly.

"Yes," said Hardyman. "Where did you find the dog?"

As events had ordered it, the dog found Isabel—under these circumstances.

"It can't spare a servant till after the party," he answered. "The dog must be tied up at the stables."

Isabel shook her head. Tommy was not accustomed to be tied up. He would make a disturbance, and he would be beaten by the grooms. "I will take care of him," she said. "He won't leave me."

"There's something else to think of besides the dog," Hardyman rejoined, irritably. "Look at these letters!" He pulled them out of his pocket as he spoke. "There are no less than seven men, all calling themselves my friends, who accepted my invitation, and who write to excuse themselves on the very day of the party! Do you know why? They're all afraid of my father; I forget—I tell you he's a cabinet minister as well as a lord. Cowards and cads! They have heard he isn't coming, and they think to curry favor with the great man by stopping away. Come along, Isabel! Let's take their names off the luncheon table. Not a man of them shall ever darken my doors again!"

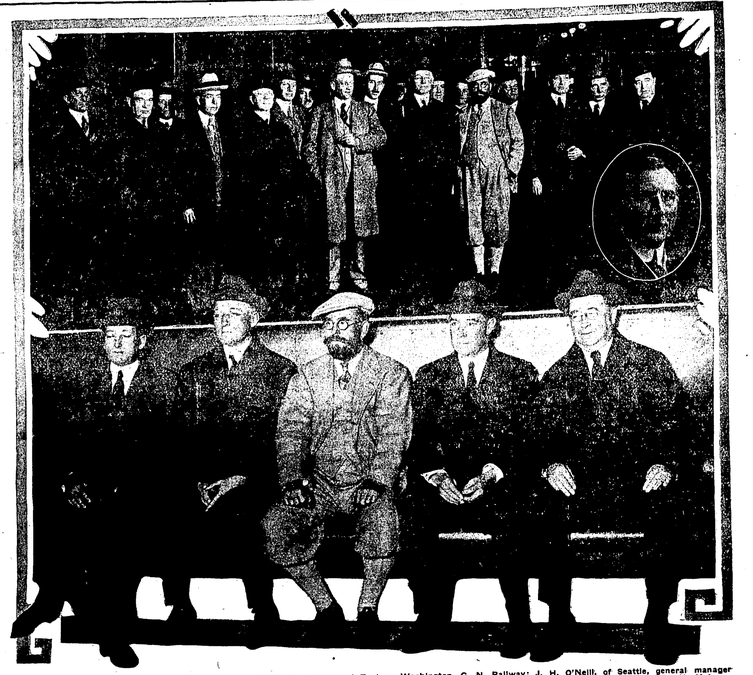
"I am to blame for what has happened," Isabel answered, sadly. "I am estranging you from your friends. There is still time, Alfred, to alter your mind and let me go."

He put his arm round her with rough fondness. "I would sacrifice every friend I have in the world rather than lose you. Come along!"

They left the cottage. At the entrance to the tent Hardyman noticed the dog at Isabel's heels, and vented his ill-temper, as usual with male humanity, on the nearest unoffending creature that he could find. "Be off, you mongrel brute!" he shouted. The tail of Tommy relaxed from its customary tight curve over the small of his back, and the legs of Tommie (with his tail between them) took him at full gallop to the friendly shelter of the cupboard in the smoking room. It was one of those trifling circumstances which women notice seriously. Isabel said nothing; she only thought to herself, "I wish he had shown his temper when I first knew him!"

(To Be Continued)

Railroad Officials Boost Pacific Northwest



Left to right—Charles S. Albert, of Spokane, attorney for Idaho and Eastern Washington, G. N. Railway; J. H. O'Neill, of Seattle, general manager G. N. Railway; F. S. Elliott, of Spokane, general superintendent; T. E. Good, of St. Paul, president St. Paul Union Stock Yards Company; H. N. McLean, of Chicago, of Harris Trust & Savings Bank; Samuel Waldon, of New York, Chase National Bank; W. J. Dean, of St. Paul; Nichols, Dean & Gregg; Willard C. White, general manager Armour & Company, South St. Paul; C. J. Schmidlapp, of Chase National Bank, New York; John H. McMillan, traffic manager G. N. Railway, Seattle; Ralph Budd, president G. N. Railway, of St. Paul; C. O. Jenks, vice-president, Western Carpill Elevator Company, Minneapolis; Walker D. Hines, counsel; Louis W. Hill, chairman board of directors, G. N. Railway, St. Paul; M. J. Costello, Western St. Paul; F. J. Ottis, Northern Malleable Iron Works, St. Paul; Louis W. Hill, chairman of directors, G. N. Railway, of Seattle; W. P. Kenney, vice-president, G. N. Railway, of St. Paul.

Sitting: Left to right—Ralph Budd, president; Walker D. Hines, counsel; Louis W. Hill, chairman of the board; C. O. Jenks, vice-president, and W. P. Kenney, vice-president. Insert—L. C. Gilman, vice-president, Seattle.

Mr. Louis W. Hill, accompanied by a staff of Great Northern officials, have as their guests a number of Eastern bankers, and St. Paul and Minneapolis representative men, are making a tour over the Great Northern line for the purpose of getting first-hand information as to conditions in the Pacific Northwest. It is an opportunity for the East to meet the West, and representative men from both sections to become better acquainted and to know each others' problems better.

The Great Northern Railway spent, during 1923, nearly thirty-one millions of dollars in the improvement of its roadbed, laying of heavier steel, purchase of new locomotives and steel cars and the rebuilding of hundreds of other cars. This trip is in a way one of inspection of the finished improvement work.

Better Health Service

PUBLIC HEALTH IS PUBLIC WEALTH

These Articles Compiled by the Public Health League of Washington

INFECTIONS

While infection is really a technical term its use has become common enough to become pretty generally understood. By infection is meant that a wound, or a break in the skin, has been invaded by bacteria, or germs. Generally the wound or break is plainly evident though sometimes it may be too small to be seen, or, in exceptional cases, areas of the skin do become infected without a previous wound or break.

Infection differs from merely irritating a wound with cold, or heat, or caustic, or dirt and the like, in that it is able to increase and multiply after it has gained entrance to the tissues. A small amount of infection if left alone may cause almost any amount of sickness or even death. With irritating or caustic materials the amount taken in governs the amount of sickness. The amount of dirt, or caustic, or snake-bite poison, does not change its amount after it is taken into the tissues. Its first effect is its worst, and if the system is able to withstand this improvement immediately begins. Infections, in amount so small as to pass unnoticed when first taken up, may multiply until it causes untold injury.

Vary in Severity

Infections vary much in severity, the more severe, such as erysipelas, lockjaw and the like, for some benevolent reason are relatively rare. Possibly it is some humane instinct in the scheme of things. The milder infections such as boils, ringworms, itch, etc., seem to be always with us. Possibly we need little afflictions to keep us humble.

By far the most common of all infections are the pus-forming germs. They cause boils and festering wounds. They are live bacteria which gain entrance to the body tissues and then begin to grow. Pus, or matter, coming from a boil or wound, is not impurities being taken out of the blood, as so often told. It is poisonous stuff that is being manufactured by the infection at the site of the injury and the quicker it is stopped the better. These infections are always germs that get into the body from somewhere else. They always come from other germs the same as potato always comes from another potato.

Watch Common Carriers

Itch is a common parasite which gains entrance to the body, always coming from itch parasites somewhere else. Ringworms on the face, and of the scalp, are the same way. These common infections are always implanted on the body, the first time, from some other person who has the infection. The common carriers of such parasites are combs, hair brushes, towels, shaving implements, hat bands and the like, for ringworms. Paper money, gloves, rags, wood handles, or direct contact from hand to hand, are excellent carriers for the itch. Any wound left open, or touched, by unsterilized material is very apt to become infected with pus-forming germs.

High School Boys Get Practical Farm Knowledge

Pitching hay, harvesting and thrashing grain of all kinds, carrying horses, milking cows, gathering eggs and feeding Shorthorn cattle and other kinds of animals and fowl will be the daily routine for six weeks of 20 Chicago high school boys, who are gaining practical knowledge of agricultural work on the Lake Forest Farm of Thomas E. Wilson, the packer.

The course is under the jurisdiction of the Chicago Board of Education, and Professor F. B. Frost, an agricultural instructor, will supervise the boys' duties during their six weeks' stay at the country place of Mr. Wilson, who has offered the use of his farm for the course.

Allow School Credit

Suitable credits will be given the boys for their work and study.

While the course on the farm means hard drilling at this time of the year, the boys will have sufficient time set aside for them to study the theoretical side of farming. They will be given an opportunity for studying every phase of farm life as well as sufficient time for recreation and study. Mr. Wilson has agreed to give the boys as much time as he can and as he lives at the farm during the summer months, the boys are looking forward to an interesting time.

Superintendent John Dickson, in charge of Edellyn Farms, as Mr. Wilson's country place is known, an authority on farming, livestock breeding and raising, will devote his entire time to the boys. The course includes grain growing and harvesting; gardening, livestock and fowl breeding, as well as soil fertilization and map drawing. The farm is noted for purebred Shorthorn cattle and its many purebred sheep, pigs and practically every kind of fowl that thrives in this part of the country. Grains of every character are grown, so that the boys will have a splendid opportunity of having a complete course of farming under their theory.

The boys are camped on the farm and live in regulation army tents, have their own cook and will enjoy the great outdoor life to the full.

Camp Wilson, the name the boys have given their camp, is conducted in strict military fashion so that each boy is constantly accounted for and is under constant, though not obtrusive, supervision, important as far as the boys are concerned and never seeming to interfere with his personal privileges and freedom. The boys rise at reveille and their day's activities are regulated with military promptness and precision.

Each boy is made to feel his responsibility and independence and Mr. Wilson has placed them on an hourly wage scale for their work on the farm.

Edward Wilson, son of Mr. Wilson, is working along with the boys and plunges into their activities just as enthusiastically as any of them. After working hours, baseball, hayrack rides and other pleasures are indulged in.

"This will be a splendid opportunity for the boys to gain practical knowledge of the course they are taking in our high school," said Professor Frost. "It is something needed very much, for as agriculture is more and more recognized as the basis of our prosperity, it is necessary to do more for the boys who are interested in this work. I feel that these city high school boys have a wonderful opportunity through this experimental journey into the realms of practical farming to accomplish a training they will ever remember and in addition to the health they obtain, it will remain with them as a valuable asset for many years.

"At present the city boy who wants to become a farmer has few opportunities of studying this important science and we are hopeful that this experiment will be productive of much good where needed. The good work begun, we believe, will find expression in a multiplication of similar groups in future years, resulting in the addition of many city chaps to the farms of our nation."

Death of an Old Pioneer

Mrs. Jane Pattison, 95 years of age, possibly the earliest and oldest pioneer of Thurston County, died at Olympia recently at the home of her son, J. R. Pattison. Mrs. Pattison was born in Scotland, moved to New York City at the age of 4 years with her parents; then they moved to the wilds of Illinois, where she was married in 1847. She and her husband outfitted and joined one of the Western wagon trains across the plains and mountains. At The Dalles, Ore., the party built rafts and floated down the Columbia to Portland, arriving there on Christmas Day. They then moved to Puget Sound, where they settled on Chalmbers Prairie, by a lake still known as Pattison Lake, where they lived for a number of years, finally making their home in Olympia.

Carbon bisulphate kills the morning glory weed.

Oh—"Oh, Doctor!"

Harry Leon Wilson

Since Harry Leon Wilson wrote that great succession of laughing-novels, "Bunker Bean", "Ruggles of Red Gap", and "Merton of the Movies", people are expecting him to create a new clever character in American life every year. This year it is Rufus Billop, the sanitarium pest in "Oh, Doctor!" who became the strangest go-getter you ever heard of! And already "the Billop touch", which is a Wilson master touch, has become immortal.

DAIRY

FIND RELATIVE VALUE OF DIFFERENT DAIRY FEEDS

Feed stuffs as a rule are divided into concentrates and roughages, says the dairy department, North Dakota Agricultural College, in discussing the relative value of different dairy feeds. The concentrates are grains and factory by-products, oats, corn, barley oil meal, which contain little crude fiber and are highly digestible. The roughages are bulky material like hay and silage and contain considerable fiber.

Corn is valuable chiefly on account of its carbohydrates; although it contains about 10 per cent of protein, other sources of this material usually are cheaper. It is deficient in mineral matter. It should not be fed alone to the dairy cow as the only concentrate; however, it is an excellent dairy feed in combination with other feeds. Corn and cob meal is valuable in the dairy ration because it supplies bulk and allows more thorough digestion of the grain.

Oats contain one pound of protein to six of carbohydrates, which in itself is a balanced grain ration. No grain is better for milk producing cows or cows about to freshen. It is for supplying the unborn calf with nutrients for growth. It should be ground if it can be done on the farm.

Wheat compares in feeding value with corn, but is little fed because of its price.

Wheat bran is high in protein, ash and carbohydrates, but its market price usually prohibits its use. It has a good effect upon the system, but it is advisable to feed it only to cows before and after freshening, and young growing stock. Middlings are not palatable or easily digestible.

Barley can be used to supplement corn, and should be rolled or preferably ground.

SUITABLE AGE OF DAIRY HEIFER FOR FIRST CALF

The proper age of heifers for first calving is always a fruitful source of discussion among dairymen. One group points to the necessity of proper physical development before the cow begins on its very arduous task of yielding milk through ten months or more of the year. The other side holds that late calving gives the beef qualities in the cow time to develop and encourages a tendency toward coarseness in the dairy animal.

In the terms of ordinary dairying, the question turns on which system, in the long run, makes the most money. Does the production of the mature cow make up for the extra feed put into her during the non-earning period? Does the added year or two of production in early life of the early calver balance the possible loss in vitality and in long-time average production?

An experiment that has been conducted at the Connecticut experiment station throws an interesting light on this question. Ten cows were included in the experiment. Five calved at the average rate of two years and one and four - tenths months. The other five averaged three years and one month at calving time.

In the first lactation period, the late calvers produced at nearly double the rate of the early calvers. During the second lactation period the late calvers made a record of 60 per cent greater than the early calvers. In the third period the early calvers made about the same record as the late calvers.

One interesting point about the results is that it was not until they reached the third lactation period that the early calvers made as good a record as the late calvers made in their first lactation period. The late calvers, after three years and one month at the time of freshening, made 13,128 pounds of milk and 443 pounds of milk and 467 pounds of fat. The early calvers, aged four years, nine and one-half months at the third freshening, averaged 13,652 pounds of milk and 467 pounds of fat.

All the cows in this test were of the same general breeding and all received the same care. The numbers involved are too small and the time covered too short to warrant any positive conclusion. It does seem, however, that late calving has sound ground for being considered good commercial dairy practice.

RAILWAYS EMPLOY OVER 300,000

The electric railways are perhaps one of the biggest employers of labor in this country. Mr. Hoover astonished the people in Washington recently when he said that they employ over 300,000 workers, to whom they pay over $300,000,000 in wages a year.

This group of utilities was hit harder than any of the others during the past five years due to the great increase in operating expense, labor especially, and the inability to get a sufficient increase in fares to offset it.

If you have small patches of the wild morning glory on your farm, carbon bisulphide placed in holes 18 inches deep and three feet apart at the rate of four ounces per hole will kill the weed.

Cougar Screams for All-Washington Team

(1) John Glann, quarterback; (2) Verne Hickey, captain; (3) A. A. Exendine, coach; (4) Hate, half; (5) Peter Kramer, end; (6) Slater, tackle; (7) Wetzel, guard; (8) Hjertoos, tackle.

Coach Exendine of the W. S. C. "Cougars" has mixed up the whole string of men from every corner of the state of Washington in order to find the strongest material for the line-up for the four big games yet remaining on the schedule: University of California at Portland, October 27; homecoming game November 3 at Pullman against University of Oregon; O. A. C. at Tacoma November 17, and University of Washington at Seattle November 24.

"We have a wonderful drop-kicker in Johnny Glann of Wenatchee," said Exendine, reviewing his string. "Captain Verne Hickey of Everett is a fast man, but, like Marvine Hales of Waitsburg and Cliff Marker of Tacoma, was none too strong as a punter at the opening of the season. All three are developing fast in this respect, however, and by the close of the season we will, I feel sure, be strong in the very thing we have felt our weakness in.

"Howard Slater of Deer Park is a good man wherever you put him. I am trying to locate the best man for each position, but I have come to the conclusion that there is a lot of difference between linemen, and as we need more weight in the back field I expect to use Slater there instead of at tackle, his old position.

Colton Boy a Star

"Many of the linemen are showing up very nicely, and except for want of experience our new men of the string play as good a game as those we have been using thus far. Leo Swanda, La Grande, Oregon, tackle; Stanley Bray, Bellingham, full; Philip Brown, Vancouver, guard; Joe Burks, Walla Walla, center; Lanche Crow, Pullman, center; Jack Davis, Spokane, quarter; Rolland Griffith, Vancouver, half; Howard Henderson, Vancouver, guard; Glenn Johnson, Spokane, end; Clifford Marker, Tacoma, full; Milton Martin, Spokane, half; Clarence T. Torgeson, Everett, end; Edwin Ahlskog, Coeur d'Alene, Idaho, guard; Harold Berven, Spokane, tackle.

Frosh Squad Strong

"We have a wonderful Frosh aggregation. They play wonderful ball. In another week or two of practice they will be able to play the Varsity team to a standstill. You see, we have a bunch of natural football players there, with the fighting qualities that make fine players. Material for next year's Varsity? I should say so!

"I anticipate such an improvement in our game now that we have got started on the real games of the season instead of team practice that we will enter each of the four remaining games with a good chance to win."

The full varsity squad follows:

John Glann, Wenatchee, quarter; Marvin Hales, Waitsburg, half; Verne Hickey, (captain), half; William Hjertoos, Tolt, tackle; Cecil Keller, Wenatchee, end; Pete Kramer, Colton, end; William Kramer, Colton, half; Rudolph Mathers, Hillyard, half; Howard Slater, Deer Park, tackle; John Stackhouse, Sunnyside, center; Eric Waldorf, Kennewick, end; Cecil Wetzel, Twisp, guard; John Zaepfel, Snohomish, quarter; Leo Swanda, La Grande, Oregon, tackle; Stanley Bray, Bellingham, full; Philip Brown, Vancouver, guard; Joe Burks, Walla Walla, center; Lanche Crow, Pullman, center; Jack Davis, Spokane, quarter; Rolland Griffith, Vancouver, half; Howard Henderson, Vancouver, guard; Glenn Johnson, Spokane, end; Clifford Marker, Tacoma, full; Milton Martin, Spokane, half; Clarence T. Torgeson, Everett, end; Edwin Ahlskog, Coeur d'Alene, Idaho, guard; Harold Berven, Spokane, tackle.

other week on the field, and that will make another fast man, developing into a good open field man.

"In the first game of the season, against Gonzaga, our fellows were green, and in the first half they did not cover their territory—showed their need of practice for unison in attack.

Fish Must Have Vitamines Just Like Human Beings

WASHINGTON, D. C.—Fish, to become gamey, require vitamines the same as human beings do to have pep.

This fact has just been demonstrated by the U. S. Government Fish Hatchery officials in the course of their 10-year program of experimental work in stocking the glacier-fed lakes of Glacier National Park with the principal species of trout. Up to date 3,000,000 brook, black spotted, rainbow, cut-throat, dolly varden and grayling varieties have been planted in a hundred streams and lakes of the Montana Wonderland.

Nature seemed to have put a well-balanced diet for all except the grayling, to the disappointment of Uncle Sam's fish experts. These did not propagate properly. They got sluggish and kept dying off until the fish dietists discovered there must be something lacking in the natural food of the grayling. Careful study of the situation revealed there was a single item missing from their bill of fare. So the hatchery caterers added to the finny tribe's menu a Latin entree—Gammarus Pulex," which means just fresh water shrimp. These were served in such large orders that they multiplied thousands of times faster than the greedy trout could devour them.

Two seasons of eating this morsel added so many calories to the grayling's diet that they now are giving light-rod anglers the battles of their sporting lives. Graylings are on the rampage. They are seen leaping up the swiftest rapids where no fish ever tried to navigate. This summer they have been taken "on the fly" up the streams as far north as the Belly River country, just south of the Canadian border. And, on the placid Rocky Mountain lakes they are splashing so many "rings" with their acrobatic performances that it looks as if they are churning the waters with a program of "daily dozen" exercises just to work off surplus energy.

A SURPLUS OF MILK IMMINENT

Warning has been sent out by Chas. E. Fisher, manager, to members of the Seattle Milk Shippers association, that there is now a heavy surplus of milk being received in Seattle, and Mr. Fisher warns his associates against a further increase at this time.

"Dry up stripper cows, and weed out all unprofitable or boarder cows," says the warning. "If we do not get relief this way, it will be necessary to put into effect a surplus arrangement to take care of the situation. This is not altogether a local condition of the market, but is general; this market is subject to outside conditions."

Home is not merely a place to hang your hat, but the place where civilization is founded.

Idaho News

The first killing frost of the season hit Twin Falls County on Saturday, October 13.

Clarkston is about to make extensive street improvements, including sidewalks and steps to the beach.

School boards in many parts of Idaho are closing the schools, so that the children can help in the delayed work in the fields of harvesting beets and potatoes.

Rural schools around Nez Perce County are having a membership campaign for Junior Red Cross. Many children are responding heartily, and every school is expected to be "in" before the end of the month.

Lewiston State Normal School has been very active lately electing officers for the different student body organizations. Many are seeking membership in these organizations; indications point to a very satisfactory year for the students.

At a meeting of the board of directors of the Success Mining Company it was decided to go on with the development at the mine, continuing the same methods as have been used up to the present.

The tourist camps of Idaho are losing their flow of visitors, owing to the cold nights, and being unable to pack enough covers for the party to make sleeping comfortable. The weather during the day is beautiful, but automobilists prefer the warm hotels for resting at night.

The new road from the oil tanks to the county infirmary in Wallace is about ready for travel, so says Joe Murphy, district resident engineer. Drags and planers are busy leveling the first surfacing on the new road.

The only battleship that has not been presented with a silver service by the people of the state after which it is named is the "Idaho." Twin Falls is launching a movement to purchase a silver service for the ship, through popular subscription, limited to $1.00.

Claiming that $30,000 has been spent on roads on their side of the bridge, the farmers on the north side of the old Heyburn bridge across Snake River are protesting against the closing of the bridge, which is said to be unsafe for travel and would cost several thousand dollars to put it into shape.

Big game is not so plentiful this year as last year, according to the report brought by William Shaffer and Martin Jensen, when the returned home to Wallace from a five-week's hunting trip around and about Pole Mountain. They attribute the scarcity of the game to the number of hunters who have been out this year in that section.

The Idaho Ladino Clover Seed Growers' Association is disposing of 4,500 pounds of Ladino clover seed, which is highly prized by farmers for its permanent pasture qualities. It is claimed that it will carry 30 to 40 per cent more stock per acre than alfalfa, red closer, alsike clover or white clover, and 80 per cent more than blue grass. A field of four acres in Twin Falls County produced 375 pounds of seed per acre. Last year the seed sold for $2.50 per pound.

THINGS TO KNOW ABOUT ELECTRICITY

The unit of electrical current is the ampere.

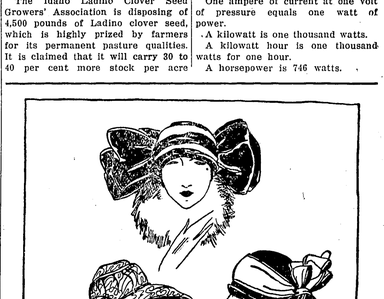
The unit of electrical pressure which causes the current to flow through a conductor is the volt.

One ampere of current at one volt of pressure equals one watt of power.

A kilowatt is one thousand watts.

A kilowatt hour is one thousand watts for one hour.

A horsepower is 746 watts.



SMART CHAPEAUX FROM PARIS SHOPS

French millinery designers are showing partiality to the metallic, brocaded and velvet ribbons, for new fall chapeaux. Three exclusive models, shown in this sketch, are a large picture hat of metallic ribbon faced with cerise velve ribbon, a turban of wide novelty faille ribbon, and a small cloche trimmed with metal-edged velvet ribbon.

FRIDAY, OCTOBER 26, 1923

Legion Auxiliary Meeting

The Ladies auxiliary of the American Legion will meet in the Legion hall on Thursday evening, October 25, at 8 o'clock. All interested are requested to be present.

Pythian Sisters Card Party

The Pythian Sisters will give a card pard in the K. of P. hall on Friday night, November 9. The public is cordially invited to attend. 17-1

Eastern Stars Entertain

The Eastern Stars were very pleasantly entertained at the home of Mrs. Henry Craft last Friday afternoon. The time was spent in games and guessing contests of various kinds. Mrs. F. C. Shork won the honors of the afternoon.

The house was very appropriately decorated for the Hallowe'en season and the favors were also appropriate for the occasion. The guests report a very pleasant time.

Federated Bazaar

The ladies of the Federated church, es will hold a bazaar on Wednesday, November 21, instead of November 2, as advertised last week. Watch the News for particulars. 17-1

When we see a fellow with a good oppinion of himself we wonder if he likes traveling alone.

CHURCH SERVICES

SEVENTH DAY ADVENTIST CHURCH
AVERY ROGERS, S. S. Supt.
Mrs. B. B. CALDWELL, M. V. leader

Sabbath school at 10 o'clock Saturday morning.

Young people's M. V. at 12 o'clock Saturday.

LUTHERAN CHURCH
A. F. WOLFF, Pastor.

English services will be held each Sunday morning at 10:30 o'clock, with the exception of the first Sunday of each month, when German services will be held at the usual hour.

Sunday school at 9:30 a. m.

FEDERATED CHURCHES

Church school at 9:45 a. m.

Church meeting at 11 o'clock.

Rev. E. W. Barrington of Spokane will be the preacher at the Federated church for the next two Sundays.

There will be Christian Endeavor at the usual hour. Everyone is invied to be present.

Ladies Aid to Meet

The ladies aid of the Federated church will meet at the Social house on Wednesday, October 31, at 2 o'clock. Mrs. Fred Perkins and Mrs. Henry Craft are to be hostesses. Everyone is requested to be present.

Yes, we have no real dance Hallowe'en, but we will have a card party in the American Legion hall.

How Better Than Pills

The question has been asked—In what way are Chamberlain's Tablets superior to the ordinary cathartic and liver pills? Our answer is, they are easier and more pleasant to take and their effect is so gentle that one hardly realizes that it is produced by a medicine. Then, they not only move the bowels but improve the appetite and strengthen the digestion. For sale at Clark's Drug Store.

RUBBER GOODS

Water bottles, fresh stock—guaranteed. Something you don't get from the mail-order houses.

DENNISON'S CREPE AND SHELF PAPER

My prices are right. I have spent the past five Sundays in as many neighboring towns, comparing prices, so you will not have to tell me the prices—for I know them.

Patronize your home merchant—if you can do as well. Who helps pay the taxes to keep the high school going, and good ronds? "We do not miss the water until the well goes dry." The high school is an asset to all—not a liability.

GRANT CLARK

Substitutes for Coal

Newspaper dispatches from all parts of the country show increasing use of fuel oil in homes, apartment houses, factories and public buildings, instead of coal.

For several years the public has been subjected to a periodical coal strike with resulting hardships from lack of fuel and unreasonable prices. The public interest in the coal industry has apparently been lost sight of by both the operators and the miners.

The day when lack of coal can cripple a whole nation is drawing to a close. The public is sick and tired of the annual outrage. Electricity, fuel oil and gas are the coming substitutes for coal in the average home and factory.

Public utility plants operated by coal, will use oil or operate their own mines to the great advantage of the public.

Tuesdays Entertained

The Tuesdays were very pleasantly entertained by Mrs. F. H. Thomas and Mrs. Mahlon Follett at the home of Mrs. Mahlon Follett on Tuesday. Pinochle was played at five tables, and Mrs. A. Potsch won the honors of the day. The rooms were decorated with Hallowe'en colors and roses. The invited guests were Mrs. Ray Edwards, Mrs. Jack Barnes, Mrs. T. H. Herman, Mrs. F. J. Niemann, Mrs. A. H. Potsch, Mrs. F. H. Hoorman, Mrs. James Magee, and Mrs. R. S. Sullivan.

Linger Longers Meet

The Linger Longers met at the home of Mrs. James Magee on Wednesday afternoon. The afternoon was spent with needlework and social converse. A delicious luncheon was served by the hostess.

The invited guests were Mrs. A. Haymond, Mrs. Colwell, Mrs. E. A. Keane, Mrs. Fred Morscheck, Mrs. Eli Tyfault, Mrs. Roy Evans, Mrs. Ray Kennedy. The next meeting will be at the home of Mrs. Ben Jain in two weeks.

Hallowe'en Fair

The Ghosts invite the general public to a Hallowe'en fair, to be given at the Aurora school house, Distri t No. 15, on October 26. Supper will be served and a short program given. Also fortune telling and a number of Hallowe'en features. 19-2

Notice

Dr. S. A. Roe, eye, ear, nose and throat specialist of Lewiston, Idaho, desires to announce that he has removed his office from the New Idaho Trust Bldg., over Beach's Store, to the new Breier Bldg., Rooms 315-317, where he will continue his practice as before. 16-2

Parent-Teachers Meeting

A meeting of the Parent-Teachers' association was held at the public school building oMnday evening, which was fairly well attended.

The meeting was not what it should have been—nor what it would have been had the speaker of the evening, Mrs. Sargent, of the University of Idaho, been present. It seems that there was some misunderstanding regarding the bringing of the lady to Genesee and a car was not sent for her until late in the evening. In the meantime she had left Moscow, and when a car finally arrived in Moscow she had gone elsewhere. The audience was very much dissappointed, but a short program was carried out, which was very much enjoyed.

The next meeting will be held on the third Monday night of November, when it is hoped that plans made will be carried to fulfillment.

First-Class Undertaking Service

Town Brightened Up

Norton Browne, sign painter, was in Genesee Tuesday and Wednesday of this week—his third visit to our little town in the past ten years—and brightened up the town a bit by painting several new scigns ,telling the passers-by that certain businesses were conducted within. Mr. Browne is a sign painter of note and either himself or some member of his firm makes the various towns from the Canadian line to the Gulf of Mexico, and even to the islands of the several seas to the south.

On his trip to Genesee this week he renewed a sign on The News office windows that had been placed there during 1910—and which was in a very good state of perservation. In addition to The News sign he emblazoned the windows of F. C. Shork, Follett Bros. Merc. Co., Mrs. Ida Wheeler, Hotel Genesee and the First Bank.

New Circle Organized

Mary V. Stevens, district organizer for the Neighbors of Woodcraft, was in Genesee this week making plans for the organizing of a new circle. There are a number of members living here and the membership will be transferred from Uniontown to Genesee.

The members met at the home of Mrs. A. O. Christenson Thursday afternoon for the purpose of reorganization.

PERSONAL MENTION

Mr. and Mrs. F. S. Casebolt were Moscow visitors Wednesday.

Mrs. Ben Mochel returned home Tuesday from a few days' visit in Spokane.

Mrs. Geo. Boliou and Mrs. Chas. Geltz attended the Pythian Sister's convention at Moscow Monday.

Walter and Victor Casebolt and Jesse Gray were week-end visitors with home folks, from the the U. of I.

Mrs. F. B. Evans, Sylvia Evans and Mrs. Con. Steltz spent the week-end visiting relatives and friends in Spokane.

M. A. Means, state seed commissioner, was a Genesee visitor Monday. He made the News offic. a very pleasant call.

Miss Bernadine Hasfurther came over from the U. of I. and spent the week-end with her parents, Mr. and Mrs. Joe Hasfurther.

Mrs. Arthur Mayer and little daughter returned to their home in Troy Sunday after a visit at the home of her parents, Mr. and Mrs. F. E. Lambert.

Mrs. Con. Craft and Mrs. A. B. Wentworth returned to their homes at Spokane Monday morning after a visit with their sister, Mrs. Henry Craft, and family.

Mr. and Mrs. Peter Steltz of Moscow were visiting relatives and friends in Genesee Monday. Mr. Steltz stated that he and Mrs. Steltz expected to spend the winter on the coast.

Mr. and Mrs. Harold Jackson left Tuesday evening for Dayton and Walla Walla, Washington, for a visit with relatives, after which they will go to Los Angeles, California, where they intend to reside.

Many Attend Football Game

Many Geneseeans attended the football game at Pullman last Friday afternoon, when the University of Idaho met the strong team of Washington State College on the latters lot.

Idaho, for the first time since 1923, took the far-famed "Cougars" into camp to the tune of 14 to nothing, and Idaho feels justly proud over their victory.

The report from Pullman says in part:

On two occosions during the game, in the second and third periods, the Vandals held Coach Exendine's men on Idaho's six-inch line, fighting grimly until they regained the ball. The Cougars outplayed the Idaho team in the second and third periods, but Idaho gained where gains were needed.

Fitzke, Idaho's right half, was the star of the game. His punting was supreme. For eleven kicks he averaged 42 yards and he continually punted the ball out of danger.

For the Washington State College Hales was the star. He made big gains around ends, and worked good defense. Davis and Stivers, for Idaho, and Slater and Hickey for W. S. C. were outstanding players.

Is Marketing Cabbages

Nick Dahmen, leading cabbage grower of this section, is now harvesting and marketing his cabbage crop, the bulk of which he is trucking to Lewiston. Tuesday he hauled out three tons which were quickly disposed of to commission men. At present he has not ascertained what his crop will amount to but finds that the yield per acre was not as heavy as a year ago owing to less favorable conditions. The heads, while being firm and of good quality, are smaller this year. Potatoes, too, he states, did not produce as heavily this season and there are now only about half as many spuds in the country as there were this time a year ago.—Uniontown Journal.

Will Give Card Party

The Boy Scout Drive

A drive is being made this week to raise Pullman's quota for the support of Palouse Council of the Boy Scouts. It should meet with a generous and hearty response from those who have boys, as well as from the parents of the scouts or prospective scouts. The objective of the scout movement is to train boys for citizenship and to direct their youthful energy that they will become good and useful men.

That this objective is being attained cannot be questioned. It is being proved everywhere in many different ways. Officers of the law bear testimony to the fact that very rarely is a Boy Scout placed under arrest. They are not actuated by sentiment, they are stating cold facts. Teachers and parents know by experience that scout training helps to make the boys respectful, courteous, reliable and manly. A generation of better boys means future generations of better men.

Scout Executive Crowe has taken hold of his duties with an energy and efficiency which give promise of a much improved administration of the affairs of the Palouse Council. He wants to handle his work in a businesslike way and to put finances on a sound basis. It is impossible to do this on unpaid pledges. In order to clean up the old bills and map out a definate program of future activities, he must be asured of enough financial support to meet the carefully prepared budget. It is not fair to the executive, to the scoutmasters nor to the boys to expect them to go ahead on the indefinate assurance that the people are back of them and will see them through. Cash or pledges of cash, which will be met promptly, are what count.

By being scouts and contributing liberally we can help to make the scouts happier boys and better men. It is surely worth a real sacrifice to accomplish that result.

WM. GOODYEAR

—Pullman Herald, October 12.

Wants Palouse Farm

Has for trade a dandy Williamette valley 180-acre farm, 125 cultivated; balance tillabie; 6 miles from Corvallis, a college town; 1 mile from electric station; good school and highway; mortgage $7,000; 6%; 9-room plastered house with bath, toilet; barn, silo, other bldgs.; woven wire fencing. Look Out For the Sharks

The newspapers recently carried a pathetic story of an aged couple who invested and lost $35,000 in worthless stocks. It was every cent they had in the world and all of their lifetime savings. Their money was fooled away from them by the glittering promises of an unscrupulous broker who promised to make them millionaires.

It is because the world is full of sharks absolutely without mercy, and full of people who believe that they can get something for nothing, that our poor house and penitentaries are full and many people discouraged and heartbroken.

Don't be fooled into thinking there is an easy road to wealth. Hard work and prudent investment secure the only lasting prosperity. There are reliable investment bankers in every community who are only too glad to give honest advice to those seeking a place to put their money.

Read the ads.—keep posted.

Short On "Beef"

According to a bulletin sent out from W. S. C. the gridiron men of that institution need more "beef" to cope with the husky Vandals of Idaho—which prediction is true, taking into consideration the score piled up by Idaho in the annual scrimmage last Friday, the score being 14-0 in favor of Idaho.

K. of P. Card Party

The Knights of Pythias will hold a card party and a good time at their Castle hall tonight (Friday), beginning at 8 o'clock. You are especially invited to be present. Of course there will be a good time—and you are expected to be there. If you don't attend, we both lose. Come. 17-1

Wool and silk hose, $1.50 to $2.00. House dresses, $1.25 and up, at Cash and Carry Store. 17-1

Don't forget the card party in the Legion hall Wednesday evening, October 31. 16-1

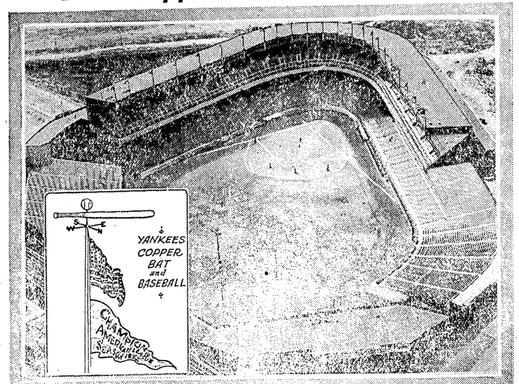
New Air View of Yankee Stadium; Giant Copper Bat for Weather Vane



BASEBALL fans who take in the World's Series have the privilege of watching some of the games from the new Yankee Stadium in New York, the world's largest baseball park, with a seating capacity of 80,000.

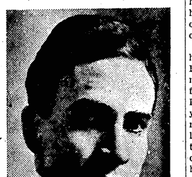
Special airplane photographs were taken a few days ago during one of the few clear periods preceding the great 1923 battle of the diamond and give a unique view of the colossal enclosure. The soft color of the 15 ton copper cornice along the top of the grand stand was plainly visible in the shadow and the unusual flag pole in the foreground was shown bearing, from the American flag with the Yankee pennant beneath, and the words "Chat pions, American League, Season 1922."

This flag pole bears on its topmost point a great copper baseball and just beneath is a tremendous copper baseball bat 8 feet in length, gilded, a fitting insignia of a park which is the home grounds of Babe Ruth, as well as being useful as a weather vane.

Both the cornice and the bat were done in copper because of the permanency of that metal and the fact that both its perfect resistance to the weather and its lightness preclude the possibility of repairs ever having to be made.

Labor Conditions Good

Seattle employers get more returns per dollar expended for wages than employers in any large industrial center in the East. it was decreed by Sherman Rogers, industrial editor of the Outlook who is visiting the Northwest.



Washington Spends Much Money on Highways

Michigan, the center of the automobile manufacturing industry of the United States, spent approximately $40,000,000 on highways in 1922, while Washington spent approximately $20,000,000 on highways the same year. An article in a recent number of the National Tax Association Bulletin shows that the State of Michigan expended approximately $20,000,000 on highways and Michigan local governments expended an equal amount, making a total for the year of $40,000,000.

The revenue raised in this state in 1922 for highway purposes was: one mill public highway levy, $1,186,680; one and one half mill permanent highway levy, $1,779,327; gasoline tax, $1,090,938; motor vehicle licenses, $6,207,957; county road and bridge levies, $2,820,421; district road levies, $4,694,191; Donohoe roads, $980,300; federal aid, $1,839,516; federal provision for roads in national forests, $549,750, total $21,149,540.

About $132,000 should be deducted from this total to cover administration expense of motor vehicle law, leaving in round numbers $21,000,000. Michigan has a population, according to the 1920 census, of 3,668,412. The same census gave Washington a population of 1,356,621. The comparison shows that Washington is spending money on highways far out of proportion to its wealth, productivity and development.—State Federation of Taxpayers' Association.

Would Make History Dull

What is history? "A systematic written account of events, usually connected with a philosophical explanation of their causes," says Webster. Theoretically, it is a complete record of the past, a guide to both achievements and mistakes, from which we can profit in the future.

Now comes Commissioner of Accounts David Hirschfeld of New York City to take issue with a score of recognized American historians because of their interpretations of past events. Assigned by Mayor Hylan to make a study of school histories, Mr. Hirschfield has found after 18 months of study exactly what he announced in December, 1921, that he would find. He set out to discover British propaganda, and he accomplished his purpose.

He would strike from American histories every favorable mention of Britain. Every reference to the human weaknesses of the founding fathers would likewise be ruled out. In other words, the children and youth of the country should under no circumstances be permitted to learn that we have borrowed institutions and developed them to suit our purposes or that imperfections have been noted in our government established and occasionally corrected.

Only a few days ago Dr. J. J. Tigert, commissioner of education of the United States, publicly deplored the tendency of American school histories to give the impression that wars of the United States were never in the wrong in disputes with other lands.

What Commissioner Hirschfield would do in New York, other overzealous patriots are attempting in other cities. They want to make history so dull and drab and so devoid of interesting color and explanatory information that it will cease to make young folks think. They would make history such an exact science that it can be taken like pink pills. And if they succeed, their sterilized histories will do the students just as much good as the average sugar-coated bran pill, and no more.

CANNED PEAS ARE DISASTROUS TO GUESTS

The disaster that befell the 75 women in and near Ronald Station at a Parent-Teachers' convention, held there on October 13, from partaking of food which caused ptomaine poisoning, is a lesson to all who use home canned vegetables. The creamed canned peas were though to be the cause of the sudden illness of most of the guests, as both home canned and commercial canned peas were mixed and served together. Unless vegetables are canned absolutely carefully, danger lurks in every bottle. If there is the least milky appearance about canned vegetables, and should the lid not make a popping noise when punctured, it is dangerous to eat the contents of that bottle. It is said that if such a can of vegetables is heated thoroughly and contents boiled for 20 minutes the poison is made of no effect; but the better way is to burn the stuff, for no living thing may get at it and eat it. The ladies attending the P.-T. A. meeting suffered terribly. Several are very ill, but the doctors hope there will be no fatality among them.

To Warm Mikady's Feet

With the advent of chilly mornings, when one's only desire is to stay in bed, an inducement to get up is a pair of cozy boudoir slippers. Just to be different, a clever girl who likes to make pretty things used narrow baby ribbon to crochet a pair. Ribbon three-fourths of an inch wide, drawn through the tops, was used to hold them on securely.

Northwest News

The county commissioners expect to spend $100,000 in and around Pasco during next year on road work.

State timber was lately sold in Whatcom County by Auditor Sam E. Barrett for more than $10,000.

Last week was Community Fund Week in Seattle. Work was carried over during this week as the quota had not been reached.

To drinking wood alcohol is attributed the dying condition of a man lately found in Seattle. He is 35 years old, but unable to reveal his identity.

Mr. and Mrs. E. B. Jones of Lynden recently observed their fiftieth wedding aniversary. A dinner was served in their honor, and the couple received many gifts.

Dun's International Review for October gives a page describing and illustrating the charm and convenience extended to the tourist at Seattle's public auto camp at Woodland Park.

Puyallup Fair broke all records this year in its number of visitors. It is estimated that at least 190,000 paid admissions to see the exhibits and performances of the best fair ever—anywhere.

There have been some disastrous forest fires during the last two weeks in the state. Large blocks of standing timber have been destroyed in Pierce, Skagit, King and Snohomish counties; the worst blaze was around Kerriston, south of Issaquah.

The state division of game and game fish calls attention to opportunities furnished by this state for profitable fur-farming. Last year trappers received more than $200,000 for pelts taken in this state.

Seattle Advertising Club entertained Walker D. Hines as honor dinner guest on Tuesday, October 16. Mr. Hines was federal rail administrator during government operations. He came to Seattle with Louis W. Hill and Ralp Budd, on a westward inspection trip, with a distinguished party of Eastern and Middle Western capitalists.

Demonstrations of water rescue work, performed by the Red Cross life-saving corps, were lately given by Joseph L. Underhill of San Francisco, at the Y. M. C. A. to the Seattle firemen and police, and at the Elks club pool. Boy Scouts and Camp Fire Girls and guardians also received instruction.

A through stage line will soon be running from Seattle to Vancouver, Wash. Application for permit has been made to the State Department of Public Works by L. V. Norman of Seattle. This will be a great convenience and a pleasant way to travel between the two points.

* * *

Alvin Goodwin, 15, of Wapato, was almost instantly killed when he received, in his abdomen, the full charge of a 16-gauge shotgun. He was returning from duck hunting with a boy friend when his bicycle skidded on a wet pavement, and in trying to save himself the gun was discharged.

Appearing in vaudeville in Seattle at Pantages last week, Dennis Chabot plays a dual role in life. He has one of the largest pheasant farms in America, at Seaside, Ore. He has been instrumental in promoting interest in game hunting in the United States and in trying to make all the states realize the importance of stocking their territory with plenty of game each season.

The bark W. B. Flint of Libby, McNeill & Libby, the last of Seattle's great fleet of cannery sailing vessels to return from the North, went to a berth at the Hanford Street terminal of the Port Commission. The big sailing ship was towed from off Cape Flattery to Seattle by the tug Storm King.

The Department of Commerce at Washington places Washington state first in the Union for output of timber. In 1922 Washington produced 2,317,569,000 feet more than its nearest rival—Louisiana. Washington's mills, in 1922, produced a total of 5,703,569,000 feet. Oregon is 1st of 3d third, Mississippi fourth and California fifth, with 1,707,721,000 feet. The United States showed an increase of 16.5 per cent in 1922, when compared with 1921.

Recently there has been a determined effort in Okanogan and Grant counties to rid the country of Orchard mice, which have been doing a great deal of damage in that section. Success is crowning the effort, says Leo K. Crouch, in charge of rodent control work for the federal biological survey for this state, and they hope to make a thorough cleanup this fall. Loss of $300 worth of choice bulbs, due to moles, is reported by Theo. H. Albert of Centralia, so mole demonstration work will be carried on by the biological survey in Lewis County.

TWO HUNDRED FACTORY GIRLS FORM RIDING CLUB

Horseback riding has been added to the sports indulged in by the girls of the Western Electric works at Chicago. Laura Linke, one of the club's leading spirits, says, "Spark Plug" is her best pal.

THE DIVINING ROD HOAX

Even today we sometimes hear of a person who claims to be able to locate underground water, oil or other valuable minerals by the use of a forked twig called a divining rod.

The operator usually appears to hold the two branches of the fork firmly in his two hands, and the supposition is that when he reaches a place beneath which water, some sought-for mineral, or a buried treasure is supposed to lie, the butt end of the rod will be attracted downwards. Some persons even claim that the twig will mark by twitches the distance of the object below the surface of the earth.

According to Arthur J. Ellis, opinion as to the kind of wood of which this twig consists has varied greatly in different times and places, but peach, willow, hazel, and witch hazel have been the common favorites.

Stories of magical rods are as old as the history of the world, says Nature Magazine in an article based on materinl from the United States Geological Survey. Moses had such a divining rod with which he produced water for his famished nation, but even before his time similar stories have been recorded. Indeed, the divining rod mystery was handed down through the generations until in the Middle Ages it came to play quite an important part in religious discussions and early scientific investigations.

In the writing of Agricola (1533) we find his opinion expressed this way: "The wizards . . . seek for veins with a divining rod shaped like a fork; but its shape makes no difference in the matter—it might be straight or of some other form—for it is not the form of the twig that matters, but the wizard's incantations which it would not become me to repeat, neither do I wish to do so."

Scientists have given a great deal of attention to this subject, and such men as LeBrun and Michael Farraday are numbered among the sincere and honest investigators. The sum of their opinion seems to have been that divining rod exhibitions were a deliberate and clever hoax.

As the principles of electro magnetism and gravity came to be recognized, there appeared numerous scientists in Europe and America who attributed the action of divining rods to electrical currents transmitted from the ground through the body and inducing magnetic attraction between the rod and the ground.

There are on file at the United States Patent Office, Nature Magazine points out, no less than 24 patents for machines of this nature, but none of them seems to have been sufficiently effective to justify their manufacture.

Systematic magnetic observations and a complete magnetic survey of the earth have been carried on under the direction of the Carnegie Institution of Washington without disclosing the existence of any such currents which would give an indication of underground conditions.

WONDERS OF THE PACIFIC NORTHWEST

Powerful advertising is being given the Pacific Northwest just now by three large transcontinental railroads reaching the coast. They are carrying on an advertising campaign using magazines of large national circulation.

This month they go into the tremendous circulation of ten great national magazines with the story of the Pacific Northwest's water power resources.

Perhaps you and most of the people who read the advertisement have no personal interest whatever in hydro-electric power. Then why tell about it?

Merely for this reason: one of the primary purposes of this campaign is to impress upon the national consciousness the fact that out here, in the Pacific Northwest, is a "whale of a country," a country of big resources, a country where big things are happening, a country with a big future. It aims to establish that prestige which is the Pacific Northwest's by every right.

And so this campaign by the Burlington-Northern Pacific-Great Northern Railroads has given a little history, has told about timber wealth, scenic beauties, agricultural strength. Now it tells about water power supremacy. Later on it will speak of mineral wealth, and so on.

And month by month these advertisements will impress upon people who read them, two facts: (1) That the Pacific Northwest is, by the gift of nature, a real American Wonderland; (2) That its colossal resources, swift growth, great enterprise, all combine to make it a Land of Opportunity for men in every line of business and walk of life.

Ten big national magazines, with a combined circulation of approximately 10,00,000 copies, are carrying these forceful appeals. Estimating five readers for each copy, the total number of people reached by this campaign may be conservedly placed at 50,000,000.

The Meat Packer As Dairy Products Distributor

In addressing the World's Dairy Congress, recently held in Washington, D. C., on the meat packer as dairy products distributor, J. H. Weld, manager of the commercial department of Swift and Company, Chicago, said in part:

"The meat packer has become one of the most important distributors of butter and cheese in the United States. The fundamental reason why the packer began handling dairy products lies in the fact that he had developed a selling sales organization for the distribution of meat, which is a highly perishable product. He had refrigerated warehouses and refrigerator cars. The same salesman could sell the products, and they were bought by the same class of retailers.

In distributing dairy products, the packer sells direct to retail dealers. He has assembling plants through the Middle West where butter is manufactured, and direct shipments in refrigerator cars are made by these assembling plants to the packers' own distributing houses in cities all over the country from which sale is made direct to retailers. Small creameries and many large ones necessarily sell through wholesale dealers and jobbers in order to reach the retailer.

The creameries of the packer are scattered about in the farming regions where dairying is not a highly specialized occupation, and where small local creameries could not get enough cream for economical operation. The buttermilk from the creamery is used to fatten poultry. When butter volume is light, volume of poultry handled is heavy, so that the overhead expenses are kept at a minimum. In butter manufacture, the cream is pasteurized and the most approved equipment is used. Special consideration is given to sanitation.

It will be seen from these facts that the packer has performed an important service to dairy producers. He has replaced the co-operated creameries in close proximity to thousands of farmers in regions where dairy production doesn't justify local creameries. He has widened the market by making available his extensive selling organization, which reaches all parts of the country.

In handling cheese, the packer is not a manufacturer. He makes purchases in cheese districts of Wisconsin and New York, and the product is shipped direct in refrigerator cars to branch houses, where it is distributed the same as butter.

This fall's registration of Chinese in the University of Washington numbers 60; last spring 28 Chinese were enrolled in the college. Three of the students are sent to the University by the Chinese government, the American Indemnity Fund; 2 others have received their scholarships from their respective provinces; the remainder are supported by their families.

Jeweled girdles will be worn with formal evening robes this season, according to Cartier. These are composed of diamonds set in platinum, or combined with onyx links.

A fashionable and striking fabric for the fall is inlai, a beautiful silk in two depths, the background a flat sheer crepe, and the raised design a shining silken surface.

TO MAKE A RIBBON FLOWER ARMLET

Silver or colored metal ribbon, half-inch wide with a gathering thread run from edge to edge as in Fig. 1, and drawn up, makes the silken blossoms for the arm band (Fig. 2). One inch of green metal ribbon folded to a point and gathered at the ends makes the leaves, which together with the blossoms, are sewed along the center of three yards of narrow black velvet ribbon.

The uncovered ends of the ribbon are tied in the fashionable small bow and long streamers.

Wars of Future To Be Fought With New Gases

Aeroplanes May Be Used to Disarm Enemy With Sleeping Fumes

Whole armies put to sleep and taken prisoner in gas warfare is by no means an impossibility 25 years hence, Colonel Raymond F. Bacon, chief of the technical division of the Chemical Warfare Service, A. E. F., says in a description of the possibilities of the future art of war made public by the American Chemical Society.

"I can easily imagine," says Colonel Bacon, "the official communique of the Battle of Patagonia a quarter of a century from now, which would read as follows:

Enemy Sleeps

"'Last night at 10 o'clock our aeroplanes sprayed on the enemy's position a new gas, soporific. This gas has the effect of putting a man to sleep for six hours. At 1 A. M. our troops advanced into the sections held by the enemy, disarmed the sleeping enemy, and the whole enemy army facing this sector is now being sent to the rear as prisoners. The number of guns and other equipment captured is enormous. We suffered no casualties. Signed ——, General in Command.'

"I realize that this sounds like a fairy tale rather than a statement made with a serious purpose, but it is not beyond the possibility. In fact, it is in line with the trend of research in this field."

The $2,000,000 spent on the research organization did more toward winning the war, Colonel Bacon asserts, than any other $200,000,000 spent in other ways. One of the greatest lessons of the war has so far gone almost unheeded, according to Colonel Bacon, who continues:

"This lesson was that large scale research can solve almost any problem. We had in Washington a research organization in which were gathered many of the best brains of the country. That research organization was able to solve every problem put up to it by those in command at the military forces. It showed that things which seemed to be impossible to do could be done and done in a rather short time by research where there were adequate resources of brain power and apparatus.

Advocates War Research

"If this government would efficiently spend a few million dollars a year on war research, methods would surely be devised which would make us absolutely safe from attack without the necessity of maintaining such extensive army and navy organizations as a present.

"This is not an idle prophecy. Anyone who will intelligently study what was done by our research organization at American University in new and unsolvable problems will be convinced that the statement above made is really conservative.

"To say the use of gas in warfare must be abolished is almost the same as saying that no progress must be made in the art of warfare toward making it more efficient or more humane. If one reads of the great battles of history, one will find that the victorious general conquered his enemy usually because of the fact that he so chose his position as to have his flank protected by river, mountain range or some naturally strong barrier.

Poultry Breeders Plan To Improve Industry

By JAY TODD, Seattle

The statewide booster campaign has already demonstrated that it will be of immense benefit to the whole state. This boosting campaign will attract many new settlers and enterprises to our state. But the greatest benefit will come from the mental attitude of those already here. The sense of cooperation that has already been founded will grow to volume until we feel such confidence in ourselves and our neighbors and the community as a whole that success surely awaits us. A new movement among the poultry people of the state is certain to have as far-reaching and beneficial results to this particular industry as will accrue to the whole state through this boosting campaign.

The first of these is the movement to bring the producers of our young stock directly under the supervision of poultry specialists engaged by the state. These specialists have demonstrated their ability and willingness to serve the whole industry. The movement referred to crystalized in the formation of the "Washington Accredited Hatcheries and Breeders' Association" in Seattle in September.

This organization was first started at a statewide campaign some time ago, and owing to differences of opinion among poultry producers and hatcherymen it has not been able to effect a permanent organization before. B. C. Yoes of Bellingham was chosen president; E. R. Wells, Prosser, vice-president, and P. S. Dickey, Puyallup, secretary and treasurer. The officers above named, together with Professor Buchanan, poultry specialist, and Jay Todd of Seattle, constitute the board of directors. Many differences of opinion and some matters of vital concern had to be sacrificed by almost everyone present in order to bring harmony and workable and satisfactory agreement as to rules and regulations under which this organization should work. But as the final organization was completed, all interested poultrymen seemed to be unanimous in their opinion that the benefits to be derived from this organization would much more than offset financial cost and the sacrifice of their own pet ideas. It would also compensate for the inconvenience of being under supervision. The greatest direct benefit will be to the purchaser of chicks and hatching eggs, but the hatcheries and breeders will also benefit through a larger volume of business and a much less suspicious attitude on the part of the buyers. The industry generally will be immensely benefited through the cooperative feature and its consequent renewal of confidence among the buyers of chicks and eggs and those who produce them. All buyers of eggs and chicks will now have not only the personal integrity and reputation of the breeders on which to rely, but will have the knowledge that the stock has been carefully inspected and found to be of good breeding and entirely free from disease.

If Washington poultrymen will cooperate with the Accredited Hatcheries and Breeders Association and purchase their chicks from one of its members they will be assured of getting really first-class commercial stock and the added advantage of keeping the money at home. It is estimated that there are from $300,000 to $400,000 going out of the state of Washington annually for chicks and breeding stock, for which we receive in return chicks and eggs of inferior quality to that which may be obtained at home.

Very few weak or poor chicks are turned out by an established hatchery, and one of the chief objects of the Washington Accredited Hatcheries and Breeders Association will be to safeguard the poultrymen's interest and to absolutely keep the standard of baby chick production up to the highest degree.

"THE PLACE IN THE SUN"
Kamloops, British Columbia
Where two transcontinental railway lines meet at Kamloops. British Columbia Fruit Lands, Limited, have some 3,000 acres of irrigated fruit land for sale in blocks of five acres and upwards. It takes 750,000 German marks now to equal a 10-cent postage stamp.

In Texas, at the Waggoner refinery tank farm, two miles from Electra, a large 55,000 barrel of fuel oil was struck by lightning and set on fire.

The Dawson season is closed—the last steamer has departed, carrying 50 passengers who will winter in the South.

An explosion in the Citadel of Warsaw, killing 20 and injuring 250, occurred recently, said to be of communistic origin.

In one of its magistrates' courts the City of New York draws $500,000 from the fines of motorists toward its expenses.

The Daily Telegraph, one of the foremost English Newspapers, comments editorially on the American proposal for a 12-mile limit for the search of ships and the admission of sealed stores, saying: "Our opinion is that it would be well for Britain to enter into the proposed arrangement."

A strange invasion of England by flies has been noticed lately. Clouds of them, in long, dark, floating patches, can be seen coming across the Channel to England.

Akron, Ohio, was threatened to be wiped out through a disastrous fire, but after three hours of heroic work by the firemen the fire was brought under control. The fire caused damage of approximately $100,000.

Probably due to earthquakes along the eastern shore of England, abnormally high tides have caused great property damage. Sandgate Castle, near Folkestone, was partially washed away.

Soaring food prices, accompanied by scarcity of all commodities, are causing great unrest in Berlin; food riots occurring constantly in the densely populated districts of the city.

Long skirts have been designed by fashion experts for women to wear this autumn—at least that is what Viola and other leading London dressmakers are showing. Coats are long and highly embroidered.

Ambassador George Harvey, who sent in his resignation to Washington lately, will leave London for the United States toward the end of the month, as announced at the American Embassy on October 13.

In official estimates, the Italian Government finds that foreign money, now being sent by Italians back to their home land, exceeds one billion lire annually. A lire is equal to about 20 cents.

In the noted Snake Creek fossil quarries of Western Nebraska the Albert Thompson expedition has discovered the skull and jaws of a gigantic camel. The Nebraska quarries have yielded many interesting fossil remains of prehistoric vertebrates.

Cost of living is still terribly high in Germany, and with winter just upon them conditions are deplorable. It is said that two million German children must starve if help is not forthcoming. It will be Russia and Austria over again, with untold misery for the women and children.

At Atwater, Ohio, recently, a horse-drawn bus, filled with children on their way to school, was demolished by the "Clevelander," the fastest train on the Pennsylvania railroad, between Cleveland and New York. The accident occurred at Lambert's Crossing. The engineer saw the vehicle too late to apply the brakes. Eight children were killed and many badly injured.

In Los Angeles bootleggers are imitating the Ice Delivery Company to obtain business. The bootleggers give out cards with the figures 50 printed in large black letters, telling the people that when they want any liquor to hang the card in their windows and their agents will stop and fill the order.

A girl is the proprietor of the bus line of Mason City, Iowa. Her business is thriving to such an extent that the railroads and interurban lines have protested to the Interstate Commerce Commission that she is taking too much of the business away from them. She is a wonderfully feminine personality; manages her boy drivers so that they are devoted to her and her business; fires them if they are guilty of the least insubordination. Dependability is her watchword.

The Shuberts, says Sime Silverman, New York theatrical writer, are sending their "living curtains" to their various traveling attractions, all musical. The "living curtain" carries young women in the nude up on it. In Cincinnati recently one of the girls fell off, breaking only the single strap to her costume.

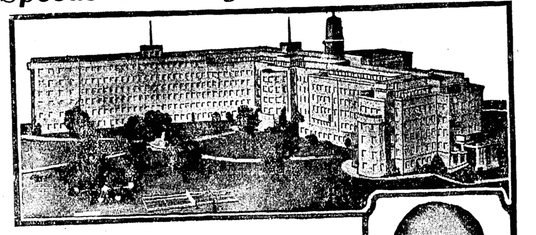
Teusler, Life Work Ruined by Quake, Speeds To Tokyo To Begin Again



At right—Dr. Rudolf B. Teusler, director of St. Luke's Episcopal Hospital, Toyko, which was destroyed by earthquake, wiping out his labors of 23 years. Above—A view of the new St. Luke's, which was under construction and was also obliterated in the Japanese disaster. Dr. Teusler is now speeding across the Pacific to build up again the institution that was destroyed. St. Luke's was a famous throughout the Far East for its work in surgery. Dr. Teusler, who is a cousin of Mrs. Woodrow Wilson, took charge in 1900, and has built the hospital up from a native house with 12 beds to its present size, which will cover an entire block. He refuses to accept any stipend over the $3,000 a year allowed him as a missionary, and has turned over for hospital uses over $150,000 paid him for surgical duties outside the hospital.

Tester Explains Dairyman's Work

Tells What to Expect From Cow Testing Association

"A cow testing association is an organization of several dairy farmers formed for the purpose of increasing the production and profits of their herds." This is what Donald Saunders, tester for the Snohomish Cow Testing Association tells his farmers in Service News.

One of the activities of a cow testing association is to furnish the average dairyman an economical means of obtaining records of production, and costs of production, of each individual cow in the herd. Most dairymen realize that this information is of great value, but find it difficult to keep the records themselves.

By knowing the production of each cow and the approximate amount of feed she has consumed in a year, the dairyman can discard the unprofitable animals, and gradually build up a high producing herd. The average yield of butterfat in a herd can be increased each year by keeping a good sire and saving the heifer calves from the best cows.

In a cow testing association a tester is employed, who spends a day each month with each herd in the association. Arriving on the farm in the afternoon he weighs and samples the milk from each cow at milking time. He furthermore weighs the concentrates given each cow and also the roughage which several receive and then estimates the approximate amount given each cow in the herd. The tester stays on the farm over night and in the morning he again weighs and samples the milk from each cow. The milk is then tested for percentage of butterfat, and from this day's record he computes the milk and fat production nad cost of feed for each cow for the current month. While such records are not as exact as if every milking was weighed, careful studies have shown the result to be within 2 per cent of the actual production of the cow. A herd book, furnished by the United States Department of Agriculture, is left with each dairyman and each month the record of each individual cow is recorded.

A tester is always glad to help a dairyman in the balancing of his rations and by knowing the relative value of the different feeds he is very often able to compound rations of high feed value at less cost.

NEW USE FOR THE ONION

Even the lowly onion may contribute to science's spreading warfare on diabetes. Discovery of "glucokinin," derived from plants and appearing to have the properties of insulin, is described by J. J. Willaman, associate professor of biochemistry in the University of Minnesota, in a statement made public by the American Chemical Society.

Eating What You Save

Prepared by the Extension Service, State College of Washington

Cabbage

Cabbage is found on the market or in the home garden in abundance at this time of the season. It is in fact a vegetable which may be had a greater portion of the winter months. All the three important vitamins are found in cabbage, which makes it one of the most important vegetables for the diet.

Two suggestions might be given in the preparation and cooking of cabbage. In order to clean cabbage easily, soak with the head down in cold salted water to which has been added a few teaspoonfuls of vinegar. This will cause worms or bugs to crawl out. If the cabbage is cooked in a large quantity of water with the kettle uncovered, there will be less odor to annoy the neighbors.

Cabbage, Pineapple and Almond Salad

A delicious salad may be made of cabbage, pineapple and almonds by shaving a small firm head of cabbage very fine and crisp it in ice cold water. Peel and shred fine a small pineapple, or secure the canned pineapple. Blanch and shred ¼ pound of shelled almonds. Mix the ingredients together, and add enough chopped or shredded pimento for color. Serve in lettuce leaves with mayonnaise dressing.

Cabbage a la Flower

Cut the steam from a head of cabbage in eight equal parts down to the core or stalk, but do not cut through. Tie the head of cabbage in a piece of cheese cloth to keep it in shape. Cook the cabbage, uncovered in a large quantity of rapidly boiling salted water. The time depends on the age and size of the head—usually from 25 to 30 minutes. Remove from water and take off string and cloth. Place on a white platter and open it. Turn back the leaves like the petals of a flower. Pour either white sauce or Hollandaise sauce over the cabbage and sprinkle a few tablespoons of grated American cheese over the mixture. Shake some paprika over it and place in the oven a few minutes or until the cheese dissolves, and serve.

A Medium Cream Sauce for Vegetables

A medium cream sauce for creaming vegetables may be made by using two tablespoons of butter (level), two tablespoons flour (level), one cup milk and half teaspoonful salt. Make in double boiler. Heat the butter; when it bubbles add the flour and salt, mixing thoroughly. Add the milk and stir until the mixture is smooth. This may be made in a pan directly over the heat by adding the milk more slowly. The cooked vegetable should be placed in the serving dish and the white sauce poured over it.

It Broke His Fall

Mose Lightfoot, one of the best hod carriers on the job, lost his footing and fell to the street, four stories below.

Mose lit on his head, struck the cement pavement, and went through to the basement.

When the foreman went to the basement, expecting to find Mose cold and stiff, he met Mose coming up the steps.

"Great Scott, man, aren't you killed?" he cried

"No," Mose replied, dusting off his clothes. "I guess dat cement pavement must have broke mah fall."

Proficiency

A city business man was very keen on having proficient clerks in his employ. Before a clerk could enter his office he was required to pass a written examination on his knowledge of the business.

At one examination one of the questions was: "Who formed the first company?"

A certain bright youth was a little puzzled at this, but was not to be floored. He wrote:

"Noah successfully floated a company while the rest of the world was in liquidation.

He passed.

REASONABLE SAVING HELPS US ALL

HORSE SENSE MORE NECESSARY THAN HORSE-POWER

"Horse-power under the hood is not as important as horse-sense behind the steering wheel" is the apt comment of one of our leading daily papers in discussing automobile highway accidents at railroad crossings.

During the four summer months of the past three years the American Railway Association has conducted a nation-wide intensive educational campaign in an effort to drive this idea into the minds of the American motorists, because this lack of horse-sense has been very largely responsible for most of the collisions between automobiles and trains.

Since 1917 the annual increase in registered automobiles has averaged nearly two million so that now there are approximately fourteen million of them using our highways. If we estimate each car is driven by two drivers we then have the varying mentality and experience of twenty eight million drivers to consider when analyzing the automobile accident problem. When we also consider that our highways and streets are much the same as they were before these fourteen million high powered machines were turned loose upon them and operated mainly by persons who have very little conception of the power in their control, it is amazing that the accident record is so low.

With this in mind the record of casualities t omotorists who passed over the six thousand crossings of the Northern Pacific Railway during the past four summer months may be of interest. These casualities totalled sixty and were 20% less than during the summer of 1922, notwithstanding that there were not less than 12% more automobiles in service and nearly a 10% increase in the railway's locomotive mileage.

Carefully perpared automobile accident statistics show that 98% of all highway accidents at railroad crossings that have occurred were primarily caused by lack of necessary precautions by automobile drivers, that 80% of them occurred in the broad daylight, and many of them under ideal weather conditions where warning signs were plainly visible for a considerable distance and where drivers had an unlimited view in all directions, also that in 21% of these accidents the automobile was driven into the side of trains while they were moving over the crossings. No one denies that a railroad crossing is not a potential hazard, but it is not the mere existance of the crossing that makes it dangerous, it is the heedless way in which people use it. Our Creator has endowed us with five senses so that we, when normal, can see, hear, taste, smell and feel. Ordinarily the exercise of but one of these senses is required to avoid an accident at a railroad crossing, namely the one of seeing, which enables us to make timely and intelligently observations. The old familiar slogan, "Stop, Look and Listen" is the best piece of advice ever written. It is the ounce of prevention that will save suffering and sorrow which inevitably must follow a serious railroad crossing accident, and to use it requires only a flash of thought, a mite of care, and but a moment's time.

The greater weight of a train, as compared with an automobile, the greater force that is used to impel it and the greater speed at which trains often move, coupled with the fact that the train must remain on the rails on that narrow strip of ground on which they are laid, make it the obvious duty of the automobile driver to avoid colliding with it. Few persons, I fancy, appreciate to what extent the automobile is handicapped in this matter of weight and power in its contest with the train. A full tonnage freight train is 1640 times heavier than an ordinary loaded touring car and the horse-power developed is 69 times greater.

But the Super Rubbered

A fat actor had to jump from a 12-foot cliff to a piece of ground that was hidden behind scenes, so he gave a browny super a quarter to be there to catch him when he landed.

The time came for the fat actor to leap, and, looking and seeing that the super was on the spot, he sprang carelessly into the void, as if the twelve feet were no more to him than twelve inches.

Down he sailed swiftly through the air, and—crash! he struch the hard floor with terrible impact. For the super stepping back, had failed him.

"Why didn't you catch me?" he moaned when he could speak.

"I wanted to," said the super, "but you didn't bounce."

A Good Thing—Don't Miss It

Send your name and address plainly written together with 5 cents (and this slip) to Chamberlain Medicine Co., Des Moines, Iowa, and receive in return a trial package containing Chamberlain's Cough Remedy for coughs, colds, croup, bronchial, "flu" and whooping coughs, and tickling throat; Chamberlain's Stomach and Liver Tablets for stomach troubles, indigestion, gassy pains that crowd the heart, billousness and constipation; Chamberlain's Salve, needed in every family for burns, scalds, wounds piles, and skin affectations; these valued family medicnes for only 5 cents. Don't miss it.

Special Notice

KINDLY accept this little reminder in the spirit of fairness that prompts us to call your attention to your account or note which is past due. We feel assured it will receive your prompt attention.

MEYER & SON

Be Two Alaskas

A special election to pass on the question of dividing the territory of Alaska, of which the late President Harding suggested the southern portion might well be admitted soon as a state, was called by the Juneau city council for November 6.

The city of Ketchikan asked all cities in southeastern Alaska to have an election on the question that day. Commercial bodies in Ketchikan Wragell, Petersburg, and Juneau, all in southeastern Alaska, have gone on record in favor of division.

If the vote November 6 is in favor of division, advocates of the change propose to hold a convention here November 15 to consider ways and means of presenting the matter to congress.

Early formation of a state of the union from southeastern Alaska was suggested by the late President Harding in Seattle July 27, in the first set speech he made after his return to the states from a tour of the north The speech was delivered to a throng in the stadium at the University of Washington when Mr. Harding was in the grasp of the illness that ended fatally six days later in San Francisco.

Mr. Harding suggested that the terrritory be divided into two parts, and that one of them be forthwith admitted to the union.

"Alaska is destined for ultimate statehood," he said. In a very few years we can well set off the panhandle and a large block of the connecting southeastern part of a state. It would be the greatest single impetus we could give to the right kind of development."

Borah Favors Lower Taxes

Senator Wm. E. Borah, in New York for conferences in connection with pending congressional legislation, issued a statement favoring a drive at the coming session of congress to reduce the nation's tax burden.

"I am very much in favor of tax reduction at this sesison of congress," he said. We can not act too speedily as long as we act with information and intelligence. If the fearful tax burden now being carried can be relieved, as Senator Smoot, who is as well advised as any one, declares to the extent of $500,000,000, let us do so as soon as possible."

"The view expressed by Senator Smoot that the man of small income should be favored, is good news also. But I think we ought not be delayed It is true probably that to attempt a change at this session will open up, as stated, a very Pandora box of troubles. But the Pandora's box of troubles already is open out in the country and congress can afford to take on some troubles in order to relieve the country.

"I hope the new chairman, Senator Smoot, with his usual industry and ability, will urge his program and urge it at this session. If we do not begin an active campaign for reductions, we will likely drift into a program of increasing taxes. There will be plenty of plans to increase the burden. The best way to meet them is by an active program to reduce."

We do all kinds of printing.

Tax-Exempt Bond Menance

A number of industries are becoming worried over the increasing amounts of money that are being withdrawn from productive activity and placed in tax-exempt bonds.

In one year, the number of Americans paying taxes on incomes of $100,000 decreased from 3600 to 2300, not because less money is being made, but because they are withdrawing their funds from taxable undertakings and buying city, county, state and national securities, the income from which pays no taxes.

The existing situation tends to create classes of privileged persons who enjoy incomes free from taxation while withdrawing their money from ordinary uses of industry and commerce.

Not only does industry and the citizen have to pay increased taxes to make up the sums thus lost to the government, but industry has to pay increased rates of interest in order to induce capitol to nvest in properties which are subject to all forms of taxation.

Our late President Harding recommended an amendment to our present laws which would do away with further issues of tax-free public bonds and it is high time action was taken on this matter.

Foreign kings continue to squeeze their name into print every time they abdicate.

60 DAY YEAR 60 DAY SERVICE

NO other tire has the slipless grip of the famous Goodyear All-Weather Tread. Its high, thick, sharp-edged blocks grip hard, hold fast, and hang on. The result is a steady, sure, safe pace in any traffic or in any going, with a car and tire performance perfectly matched for economical efficiency.

As Goodyear Service Station Dealers we sell and recommend the new Goodyear Cords with the bonded All-Weather Tread and back them up with standard Goodyear Service

A Good Physic

When you want a physic that is mild and gentle in effect, easy to take and certain to act, take Chamberlain's Tablets. They are excellent. For sale at Clark's Drug Store.

A "For Sale" ad. will sell your stuff.

A Remarkable Record

Chamberlain's Cough Remedy has a remarkable record. It has been use for colds, croup, and whooping cough for almost half a century and has constantly grown in favor and popularity as its good qualities become better known. It is the standard and main reliance for these diseases in thousands of homes. The facts that it can always be depended upon and is safe and pleasant to take are greatly in its favor when it is wanted for children. For sale at Clark's Drug Store.

VOL. XXXV — GENESEE, LATAH COUNTY, IDAHO, FRIDAY, NOVEMBER 2, 1923. — NO. 18

PUBLIC SCHOOL NOTES—THAT FOOTBALL GAME

By Estel Rogers

We were beaten, wholly outclassed, if making score is to be taken as the measure of football success. But did you notice the way out boys fought gamely to the end, to the very last whistle, and that as the game progressed they seemed to warm to the occasion and to penetrate the Lewiston line for very substantial gains? The score? What matters that? And after all a mere score is the item of least importance in an athletic contest.

It is all well enough to be on the winning side and to satisfy one's vanity by giving a demonstration of superior physical prowess, by piling up a huge score, and by being declared the winner, but it is the spirit of the game and the play that counts most in the end. Suppose that afterward you were interviewed on the event and tell how easy it all was, how "those poor dubs never knew how to play and never will—but just watch our smoke"! You have missed the spirit of the contest and are fast developing a feeling of self-consciousness with yourself or your team as the central popular hero. Perhaps your vest has minus several buttons and the old hat that has long been your inseparable companion suddenly is found to be about three sizes too small.

But how about the team and the members of the team that fought in the face of overwhelming odds, fought gamely to the finish and refused to give up in utter hopelessness? Did they show the "white feather" and slink from the field when the contest was over? No! They showed the stuff men are made of. Outweighed, out-played, smothered in an avalanche of scores, almost swamped, but not broken in spirit. Did you ever watch a Bantam rooster fight a Rhode Island Red, or a Rat Terrier fight an English Fox Hound? Bruised and knocked about, beaten and shaken but game to the core; at times almost squelched, but always fight, fight, fight! Theirs is the spirit that can never be beaten and this quality all the world admires.

Did it ever occur to you just what qualities of leadership, of promptness of decision, of quick adjustment to continually changing conditions and situations, of learning to take and give are called for in an athletic contest? And did it ever occur to you that the business of life and the world calls for the same qualities of "stick-to-itiveness" and "fight" and "never-be-licked" as was so splendidly demonstrated on the local football field last Friday? A quitter is soon pushed to the wall, trampled upon and eliminated, forgotten, but the fighter is the constant center of respect and admiration. Competition in the 20the century is keen and relentless and we must be trained fighters if we would hold our own.

Especially commendable was the playing of Captain George Miller who proved a real puzzle to the Lewiston huskies and a dangerous man with his smashing line bucks. Clarence Doyle is developing nicely, and with his shifty, whirling style of running is proving to be a ground gainer of no mean ability. Lawerence Kraut played a good game in the line and made a hole open for his backfield team mates. Other members of the team showed up well at times but a general lack of experience is evident in the work of the entire team. Only time and games played can remedy this weakness. Our boys may not have won the game but we are proud of the spirit they displayed. They proved themselves worthy sons of Idaho and the slogan of their warriors, "Idaho Fights."

On Wednesday of last week Miss Hummel gave the school some very good information on the institution, history and development of the football game. A good many people will be surprised, as were many of the students, to find that football is not a modern game but had its origin in comparatively ancient times. The game was first played in Europe and later introduced into America. In the year 1609 the first football game was played in America. She then showed how football has developed up to our present day. According to statistics there are thousands of people who play the game every year, and hundreds of thousands who go to see it. It seems that the game is becoming more popular each year.

She also urged the school to support their own team, and to get a real athletic spirit that would help our team "go over the top."

Everyone who heard the Seniors program last Friday agrees that it was very good, for it furnished instruction as well as entertainment.

The program was as follows:
Vocal duet by Alfreida and Sylvia.
Talk by Alfred.
Tattler by Agnes.
Talk by George.
Play—"Who's Boss.
James Smith—Conrad.
Dr. Brown—Fredrick.
Carl Miller—Walter.
Henrietta Smith—Olive.
Mrs. Brown—Eva.
Mary Heath—Sylvia.
Mrs. Jenkers—Katherine.
Dorothy Jenkers—Edith Clark.
Nancy—Hope.
Song—Senior Class.

The description of the Potlatch mill by Alfred Hasfurther was very good. A few weeks ago when the football team went to Potlatch they lookad the mill over, and then decided to tell the rest of us about it. Most of the students were surprised to know just how big the mill is and how it is operated.

George Miller also showed us that he was a "live wire" by his football talk.

On Thursday of last week Rev. Barrington gave the school some very good ideas and instruction. The central theme of his talk was to inspire courage "stick-to-itiveness," and a high aim. He showed us that a good part of life is made up of "if" and unless we muster up courage and overcome obstacles we shall fall far from success.

Everyone who attended the junior party which was held at the farm home of Chas. Kraut last Friday night reports a very good time. Those who went returned with the feeling of an evening well spent.

Both the senior and freshmen classes spent Wednesday evening at a party, which was in keeping with this time of year.

The sophomores are planning to spend next Saturday evening in a general good time at the home of Agnes Sweeney.

On Friday afternoon of this week Mr. Edward Walter Barrington, Ph. D., who has had educational experiences in the United States extending over a period of some forty years, will address the Genesee High school and friends and patrons of the district in the assembly hall at the school house.

Dr. Barrington's experience as an educator have been many and varied and quite naturally an individual who has spent so long a term in close contact with the educational world will have formed some very decided reaction and opinions on the growth and development of affairs pertaining to this work. We all realize that the present public school system is far from being a perfect organization, that it has many shortcomings and serious faults, and that we hear almost every day exclamations of discontent with the product of the school system. It is only by a proper and reflective discussion of some of these problems that the public and the teachers may be brought to a realization of the real needs which we are now facing. Do we as patrons of the district know what some of the educational defects are? Would we like to know what they are so that we might enter into a closer sympathy with affairs pertaining to the education of our children?

The topic of Dr. Barrington's discussoin will be: "What Is The Matter With Our Public School System?" The time will be 2:55 p. m. sharp, Friday, November 2, and the place will be the High School auditorium. All friends and patrons of the school are invited and urged to make it a point to be present. Mark the date on your calendar so that it will not escape your attention. The program will include some musical numbers by students of the high school.

Jersey Good Cream Cow

The Jersey cow is the best all-round animal for farm dairying, in the opinion of J. P. Graves, owner of the Waikiki farm, near Spokane, which is the home of the large Jersey herd. The Jersey cow, Mr. Graves avers, weighs less, perhaps, than any other breed when sold for slaughter purposes, but the saving from milk and butterfat during the lifetime of the animal is far in excess of that loss. Government records show that in testing animals for tuberclosis the Jersey has been found to be the healthiest type. Tests will show the Jersey is the largest producer of butterfat.

New Arrivals

Mr. and Mrs. Frank Allen are the proud parents of a baby daughter, born Tuesday, October 30. Both baby and mother are doing nicely.

Mr. and Mrs. H. C. Halley of Lewiston are the proud parents of a baby daughter, born Sunday October 21. Mother and babe are doing nicely.

SEMI-LOCAL NEWS CLIPPED FROM EXCHANGES

Deary Fire Disastrous

The main business section of the town of Deary lies in a heap of smoldering embers, to which it was reduced by a fire which broke out at about three o'clock last Wednesday morning. Not a vestige of house or shed is left on the west side of Main street between Second and Third avenues except the Latah County State Bank. Being of brick, and the wind blowing from the northeast, this building was not damaged. Property losses will total upward of $70,000.—Latah County Press.

First Frost of Season

The first frost of the season occurred last night and was a white frost killing tomato vines and more tender plants. The alfalfa and clover seemed to survive. The growing season this year has been a month and ten days longer than usual, the frost last year occuring on September 13.—Clarkston Republic.

Lime Crusher Installed

The Orofino Lime and Fertilizer company are busy installing two rock crushers at their plant above the village. A small crusher will be used for chicken grit and a large one for fertilizer crushing. They will be driven by a fifty horse power electric motor and the products will be elevated from them to bins ready for loading. The company is shipping 50 tons of rock per week for use in the paper plant at Oregon City.—Clearwater Tribune.

That Football Game

A fair crowd turned out for the football game Sunday afternoon, and cheered impartially for the school and the alumni. The scoreless tie was a disappointment, but the school team gathered some experience. The casualty list was a trifle large. Victor Schultheis has a broken collar bone, Gilbert Larson a sprained ankle, but both are recovering nicely. Tony Mayer had the nail of one of his big toes torn off, but was able to work next day. Guettinger on the alumni team was still limping Tuesday, and Ed Fallon likewise, but no one was seriously injured. It was a well-fought battle throughout, and some long runs were made.—Colton News-Letter.

Man Is Injured By Own Car

W. S. Cody of Clarkston, was painfully injured Saturday at noon when he attempted to start his car by handcranking the engine while the transmission was in gear. The machnie had been left at the Schwenne-Till garage for some minor adjustments a short time previously and when Mr. Cody and a friend returned to take the car out he overlooked the fact of the set gears and proceeded to crank the engine after stepping inside of the bumper on the front of the car. Unfortunately the engine started with the first turn of the crank and Mr. Cody, on account of being inside of the bumper was unable to get out of the way as the car started forward. He lost his footing and fell, his clothing catching on parts of the machine, and he was dragged about fifteen feet before being freed and then the car ran over his right leg bruising it badly.

As soon as Ben Kane and George Hattrup, employees of the garage, noticed that something was wrong they rushed to stop the car, but because they were some distance away they were unable to do so until after it had run over Mr. Cody, had bumped into other cars in the garage, smashed a guard gate on the freight elevator and was attempting to go through the iron posts around the elevator shaft. They found Mr. Cody lying unconsciou in a pool of blood. His face was cut, scratched and bruised beyond recognition. Dr. Burg was summoned and dressed the injured man's wounds eight stitches being required to close the gashes in his face. After approximately thirty minutes Mr. Cody regained consciousness and later in the day friends removed him to his home in Clarkston, using the same car which had caused the trouble but which was not damaged by the experience.—Uniontown Journal.

Tellin' It To 'Em

"While I am not broke, I am in the hands of a receiver. I have a mouthpiece, but, unlike women, I never use it. Fellows use me to make dates with girls and girls use me to break them. Husbands call up their wives over me and wives call their husbands down over me. I never get to go anywhere yet sometimes I am taken out. I am not a bee but I often buzz. I am the "Bell" of the town and while I never wear jewelry I often get rings. I am the telephone."

WHAT HAPPENED HERE TWENTY YEARS AGO

Fred Miller left this week for Clearwater where he will teach school this winter.

Fred Nagel sent out a car load of hogs and one of cattle to the Seattle market the first of the week.

Mr. and Mrs. Ed Peterson took their departure Wednesday for their new home at Whatcom, Wash.

Friday of last week a car load of telephone poles was received and unloaded at this place to be used in the construction of the new telephone line from Moscow.

The Northern Pacific has changed the name of their office from Vollmer to Troy to correspond with the name of the post office. The change went into effect last Sunday.

Follett Bros. have their heating plant in operation and it works to perfection. Four radiators are distributed throughout the room and supply an abundance of heat.

Ralston Vollmer, Tom Burge, and Ed Vanouck left Friday for the Salmon river section to look after the Genesee Cattle Company's cattle. They took with them a wagon load of supplies.

Henry Flomer has well under way the construction of his new residence in the western part of town. In size it is 28x28, one story, and will cost him in the neighborhood of $1000.

Pat Ryan has been making extensive improvements about his residence Property in the western part of town.

How old is Ann? The problem is: Mary is 24 years old. Mary is twice as old as Ann was when Mary was as old as Ann is now.

Jos. Moersch was in town the latter part of the week with a load of cabbage that was a sight to behold. Instead of putting them in boxes or sacks to carry them in he had an easier method—corded them like wood. They were practically all of one size but a few in the lot weighed as high as 40 pounds.

Frank Greiser has leased his 360 acre farm east of town to Herman Trousan for the coming year and will take up a residence in town. All stock machinery, etc., was included in the lease. As Mr. Trousan is a single man Mr. Greiser reserves the right to reside upon the place and ossupy the buildings and it is possible that he will move out again in the spring.

Wednesday evening in the Congregational parsonage in this city occurred the marriage of Ira Hanson and Miss Anna Tonning, both well known young people of this place. Rev. W. C. Fowler officiated. The wedding was strictly a private one. The bride was handsomely dressed in pearl grey silk. The young people were very successful in keeping the time of their marriage from the general public and the announcement of same was a general surprise. Many friends extend congratulations.

Impeachment Plans Secret

Plans for the impeachment trial of Govenor J. C. Walton of Oklahoma moved forward as a district court grand jury resumed the examination of evidence with a view toward possible criminal action in the courts. Forces of both sides in the impeachment case were completing all pretrial arrangements behind closed doors.

The board of managers from the lower house of the state legislature, which will prosecute Governor Walton before the senate sitting as a court of impeachment, was believed to have outlined its plans to contest a general demurrer to the entire impeachment bill, which council for the executive are expected to file at the opening of the trial. There has been no official indication as to the governor's defense, but in political circles it is believed it will be centered largely on the Ku Klux Klan issue.

More than 150 witnesses are expected to be summoned.

Jersey Calf Club

A boys' and girls' pure bred Jersey calf club, with four members, has been organized in the Palouse community of Latah county. The parents of the club members, accompanied by County Agent O. S. Fletcher, and Professor F. W. Atkeson, head of the dairy department of the University of Idaho, visited Waikiki Farm near Spokane, the first of this week, and purchased four heifer calves and one bull calf for the club. The animals purchased are all from excellent type, high producing ancestors, and should be of much value in giving the Palouse boys and girls experience in handling good dairy stock.

The boys and girls in the club will be given regular and systematic instruction in the care of their animals under the supervision of Mr. Fletcher and H. A. Stone, district club agent.

Don't Be Disappointed

The News is this week sending out a large amount of subscription statements and we do not want you to feel disappointed if your subscription happens to be in arrears and you haven't gotten one of the little reminders, for it is our intention to treat every one who is not paid in advance just alike. We do not intend to be partial in this matter—or in any other.

While many of our subscribers are paid in advance we still have many who are in arrears and it is absolutely necessary that we make collection for same or discontinue the paper. The price of newspaper service to us has been increased and it is therefore necessary to collect for every paper that is sent out.

So please do not feel offended if you do, or do not, get one of the little reminders that your subscription is due. In case you think there is some mistake regarding the bill, please call at the office and we will be glad to talk it over with you and rectify it.

Two dollars here and two dollars there doesn't amount to much, singly, but when you come to count them by the hundreds, it runs into more money than one would think—and we are badly in need of it—so, if you are in arrears, please call and see us.

Many Will Attend Game

That Genesee will be well represented at the Gonzaga-Idaho football game to take place on McLean field at the University of Idaho is forecasted by the fact that many tickets have already been sold and there is little reason to doubt but that Genesee's entire ticket quota (100) will be sold before the opening of the game.

If you are figuring on going to the game, see Attorney Thomas A. Feeney who has a whole handful of tickets that he will be glad to turn over to you at a stipulated price. Get your tickets before you go and save time and trouble.

The U. of I. Pep band was here Saturday just before noon and played several jazzy pieces which are supposed to be a forerunner of the quick action of the U. of I. team. The band was some "peppy" bunch all right and their music was thoroughly enjoyed.

Roberts Gets a Goat

Theadore Roberts is required to lose his "goat" so often in the different characters he portrays on the screen that some considerate members of the cast of "The Man Who Saw Tomorrow," Thomas Meighan's newest picture, which will be shown at the opera house Saturday night, captured a wild goat and presented it to Mr. Roberts. The veteran actor added the goat to his rapidly growing menagerie which now consists of an Airedale dog, three wire-haired terriers, a Siamese sacred cat, two tame seagulls and a flock of pigeons.

"I had a parrot," said Mr. Roberts, who plays the part of an old sea captain in this new picture, "but it had been so well raised that it said 'please' and 'thank yau.' It never once uttered a good, hearty piratical cuss word. I got tired of its politeness and when it started to chew the paper off the living room walls, polly and I parted company."

Heavy Fire Losses

Fires making a total loss of nearly $78,600 in these cities of the Inland Empire occurred during the week of October 22, according to reports. The communities are now feeling the loss of the fire, either financially or otherwise. Probably the largest loss occurred in Deary, October 24, when fire of unknown origin destroyed all buildings on the west side of Main street. The loss in Deary is estimated to be approximately $43,600. It is probable that virtually all of the business men will rebuild and that brick structures will replace those burned.

The most disastrous fire Colfax, Wash., has suffered in years occurred October 27, when a grain, feed and grocery store were destroyed. The buildings and stock were valued at about $35,000, with $13,500 insurance. Two men were severely hurt in attempting to check the flames.

"Fighting Fourth" To Celebrate

A full day of army action is being prepared for the civilians of Spokane and the Inland Empire who will be guests of the Fourth infantry at Fort George Wright, November 7 on its annual organization day. This day is in celebration of the anniversary of the founding of the "Fighting Fourth" in 1811 at the battle of Tippecanoe. The program will begin at 9 a. m. with calisthenics, followed by a mule tug-of-war.

The entire day will be turned over to fun and a good time, and at noon a regular army "chow" will be served from rolling kitchens.

BIGAMIST ROSHON ASKS FORGIVENESS OF WIVES

Hard labor will be the lot of Harry Roshon, self-confessed husband of seven women, for the next three years. Monday before Judge Oswald he entered a plea of guilty to a charge of grand larceny admitting he had swindled Mrs. Anna Schneider of Spokane out of $7000, following his marriage to her in 1920. He was sentenced to serve from three to twenty years in the penitentiary.

Thoughts of his coming prison term dampened somewhat the cheerfulness that had characterized him, and after returning to his cell following sentence his spirits drooped.

During the afternoon he wrote three letters to favorite wives, informing them of his sentence and begging forgiveness of them. But, the forgiveness is already granted for, he says, none of them, except Mrs. Schneider, bear them any grudge. He continues to derive much comfort from reading the Bible.

"I am glad it is over with," he said. "Terror of arrest and thoughts of what I have done have haunted me. It is terrible to be free and yet fearful that any moment your liberty will be taken from you. It is far easier to be in jail with the surety that its doors will open some time, than to be outside never knowing when you will be seized."

Could Count Only Six

Harry's wives number seven, according to his count. He was puzzled for a moment when asked concerning the number of his marriages. "Let me see," he said, and he attempted to recollect who they were. But it was not until he got out a pencil and wrote them down one by one that he could figure the total. "I thought it was six at first," he said, "but I'd forgotten one."

Would Be Favorite With Widows

Roshon is of striking appearance. Tall, within a quarter of an inch of six feet, 49 years old, with a head of wavy hair streaked with gray brushed straight back, a not unhandsome countenance and rather a forceful chin. Smooth shaven and dressed in a neat dark striped suit, in spite of his prison pallor brought on by seven weeks of confinement, he still retains the appearance of a man who would be a favorite with the ladies—middle aged widows, who were his stock in trade.

Quoted Scripture In Courtship

Doubt as to the sincerty of his religious fervor is raised at the jail by the fact that in his courtships he quoted the scriptures to his proposed victims. But whether or not Roshon is sincere he gives the impression that he is.

Does Not Drink, Smoke or Swear

Roshon might make an ideal husband for many women. With him around there would be no cluttering up the house with tobacco, for he doesn't smoke. There would be no late coming home on Saturday night for he doesn't drink and neither does he chew nor swear. His only failing as a husband was that he had a habit of wandering off and not returning after a brief period of wedded bliss.

Not Romantic; He's Carpenter

Roshon's method of accumulating wives was by means of advertisements in matrimonial journals. An introduction was apparently about all he needed, for his impressive, honest appearance, his candid gaze and his forceful manner won them quickly.

There is nothing romatic about him. He is a carpenter, but just the type that would appeal to a middle-aged widow seeking someone to share her declining years.

County Agent Moves Office

The office of the county agricultural agent has been moved from the Eggan block on Fourth street in Moscow to the Carl Smith transfer office in the Masonic Temple on south Main street. County Agent Fletcher asks that all farmers of the county keep this change in mind, and call upon him at the new location when in Moscow.

Ebel-Harpole

Mrs. Sophia Ebel and Claude Harpole were united in marriage at St. Mary's Catholic church on Tuesday morning at 7:30 by Rev. Fr. L. C. Godschalx, pastor of that church. The couple will reside on the ranch owned by Mrs. N. Kries, which place they will farm.

Senior Class Party

The senior class gave a party at the home of Miss Sylvia Evans on Wednesday night. The time was spent with dancing and playing games. A delicious luncheon was served and everyone voted a good time.

Stars Who Stopped California

The entire state is now watching with considerable interest the career of Enoch Bagshaw, head football coach at the University of Washington—the man who did the unexpected by defeating the redoutable Trojans from the University of Southern California. The entire state is wondering what this smiling, powerful fellow has in store for the Golden Bears of California, an undefeated team for three years, whom the Huskies are booked to encounter at Berkeley, November 17.

Coach Bagshaw is starring his state interest honors with two beefy, hard-hitting Sophomores, who constitute the driving power of the Purple and Gold varsity this year. George Wilson, a home boy from Everett, is one of the most valuable cogs in the Bagshaw machine. Wilson played for the Little Giant at Everett and is now receiving further instruction at the university. Wilson is only a Sophomore and is already rated as a candidate for an all-coast position. He is built like a brick wall, sturdy and compact. His 175 pounds feel like a miniature battering ram when an unfortunate end gets in the way. A fearful customer is this George Wilson fellow.

Elmer Tesreau, the Chehalis bear-cat, is doing effective work at full-back. Tesreau looks like the best fullback prospect seen at Washington in many a long year. He weighs 176 pounds, is six feet tall and runs through the line with a slightly swaying motion. Tesreau is one of the fastest men on the squad and would fit in at any post, if called upon. He has played everywhere from center to quarterback and is proud of it. Tesreau has two more years under the Little Giant, and if he doesn't put in a bid for Walter Camp's all-American team, then the dope is all wrong.

Better Health Service

PUBLIC HEALTH IS PUBLIC WEALTH

These Articles Compiled by the Public Health League of Washington

IMPORTANCE OF REST IN CARE OF CONSUMPTIVES

From the earliest times of our history efforts have been directed toward treatment and care of consumption. The old, wise Greek physician, Hippocrates, long before Christ, advised for those "who live in a crowded city, lose flesh and are pale, to go out in the country, rest and drink milk."

Later on all kinds of drugs were used, to no avail, and the frauds and false promises, with which all kinds of quacks have lured the poor and suffering, have been a source of regret and shock to all right-thinking, professional medical men as well as ot laymen.

Keep Out of Doors

Not so many years ago medical men in their efforts to check this dread disease advised out-of-door life, good nourishment and lots of exercise, like walking, running, horseback riding and the like. This advice was rational and correct except for the exercise part, and that was the reason for the failure to cure with such a method.

Only in recent years has the greatest step toward real success in the treatment and care of consumption been made. Just as a tuberculous bone or gland lesion was found to improve and afterward be cured under the influence of the sun rays and by fixation of the part affected, so it was discovered that rest, or practically an immobilization of the whole body, was responsible for a great improvement in the condition of those afflicted with tuberculosis of the lungs, and a number of cures were reported.

In addition to the absolute rest, good nourishment, fresh air and other measures were, of course, part of the treatment.

It was found that in a relatively short time the fever would disappear, the patient would put on weight, feel more comfortable, the amount of sputum would diminish and improve in character, and the case would slowly go toward arrest of the activity of the disease, which is our first aim and desire in the course of the treatment.

Patient Should Rest

For those unfortunate ones who can't afford or who have no opportunity to seek sanatarium treatment, which admittedly is the most desirable form of treatment, the simple measure of rest will prove very beneficial. The patient should be put in a tent, sleeping-porch or a well-lighted and ventilated room, be givan nourishing food, be directed to expectorate in a paper bag to be burned later on, and the patient kept in bed in absolute rest, free from any kind of annoyance or worry.

By this simple method the case can in many instances be carried toward recovery and the source of danger to other members of the household, particularly children, in form of infection and transmission of the disease, be greatly diminished and often entirely eliminated.

Later on, if the circumstances permit, the patient can perhaps do some light work and earn some means to complete hi scure in a proper institution and under medical observation be allowed more and more exercise until full recovery, and thus our great aim, to rebuild a man and again make him a useful member of society, has been accomplished.

WHEN MILADY DINES AND DANCES

Ribbon and fur combine to make this charming evening wrap, wide satin grosgrain ribbon alternating with graduated rows of fur. The wrap from which this sketch was made has a velvet lining decorated with many appliqued floral ribbon motifs.

THE TAXPAYER'S DOLLAR

Under the caption, "Five Hundred Shots at the Taxpayer's Dollar," William P. Helm, Jr., contributes an article to The Budget, in which he propounds the question: "How does the federal government spend its billions?"

Few persons, he says, know even a small part of the story. In the public mind government consists largely of maintaining an army and navy, caring for disabled veterans and paying pensions, meeting the interest on the public debt and providing for the gradual retirement of the principal developing foreign and domestic commerce, conducting our relations with foreign nations, running the country's postoffices and mail service, enforcing the federal laws, operating the merchant marine and a few other outstanding activities constantly brought to public attention through the columns of the daily press.

But, Mr. Helm points out that is not all of government. Indeed, that is but the foundation. Upon that foundation there has been reared a towering superstructure which even yet is growing, despite the admirable work of the bureau of the budget to hold our national expenditures to the minimum.

Government of the United States reaches into every field of private efforts. It is the most colossal and extensive machine that human ingenuity has ever devised.

Mr. Helm started in January, 1922, to compile a list of the activities of the federal government where those activities touched business interests alone. He disregarded the activities of the government relating to art, science, social service, and other subjects not intimately interesting to the average business man of the United States.

The task was completed in nine months. The mere listing of the government's activities of interest to business men alone ran to a length of more than 500,000 words. More than 25,000 separate and distinct functions of government were thus uncovered.

Trade Commission Acts

The Pure Silk Hosiery Company of Massachusetts used the slogan "From Mill to Consumer." It neither owns nor operates any hosiery mills or factory and does not manufacture hosiery sold by it. A complaint has been issued against it by the commission.—Ad Club Bulletin.

BACK TO SOUTH SEAS FOR THE COCOANUT COW

We are still as a nation importers of dairy products.

Millions of pounds of butter have entered our country during the past few months in spite of the fact that we have greatly increased our production of milk, cheese and butter.

We must keep in mind that our population is increasing rapidly, and better still we are learning the value of dairy products as food.

Children are taught to drink milk instead of coffee or tea. Many business men are content with a bowl of half-and-half and hard rolls for their noon luncheon.

The splendid work of our dairy councils, physicians and leaders in human nutrition is bringing results.

Our legislators have gotten on the band wagon and the cocoanut cow is being driven back to her pastures in the South Sea Islands, but even a slight increase in per capita consumption requires hundreds of thousand of cows and millions of pounds of produce, so the demand will continue.—Al Haecker.

Electricity Employs Many

More than half a million laboring men in the United States depend for their existence upon the prosperity of the electric railway industry.

There are 77,000 motormen in this country whose services are paid out of trolley fares, and there are 63,000 conductors whose money comes by this same method ;and there are nearly 150,000 men who work on the tracks, in the car barns and on the line. In addition there are untold thousands of factory workers who make electric railway supplies.

Useless Miles Walked In Your Kitchen

Studies of step saving in household tasks have been given considerable attention by extension workers. House planning specialists have aided women in many States to rearrange their kitchens so as to make them more convenient for doing the housework, especially for preparing and clearing away meals; many labor-saving devices which are also step savers have been demonstrated, and when it has not been possible to purchase commercially made equipment, numerous homemade substitutes have been installed. A report from Grays Harbor County, says: "My remodeled kitchen saves me 20 steps and 5 minutes in the making of gingerbread or cornbread. The new location of my wood boxes saves me 400 steps in getting dinner."

A home maker in Snohomish County wore a pedometer while doing her work, and when the readings on it were checked it was found that she had saved in travel, thru the better arrangement of her kitchen, 5,544 feet in one week, or four and three-eighths miles in a month, and 54 and eight-thirteenth miles in a year. This woman had a much shorter step than the average woman, only 15 inches. In a year's travel about her improved kitchen she would save 236,531 steps otherwise needlessly taken.

DEATH OF FAMOUS WAR HORSE

George Washington, famous war horse, survivor of two campaigns, mount of the late Colonel Paul Wayerman and proud bearer of General Pershing in the first American review in Paris, was shot by an agent of the American Humane Society at West Hartford in August. Though only about 15 years old, the horse, which had been cared for in Troop B Armory since he returned from France, had been suffering considerably from his war experiences and had grown pitiably thin. It was decided that the best course was to end it all.

The horse had an unusual war record. He went to the Mexican border in the summer of 1916 and to France in 1917 with Dr. Waterman. He was one of the few horses to be returned from France by the government. Since then he had been ridden some, but for the most part he had led a quiet existence. When Troop B held its first horse show, in November, 1922, the show was built around George Washington, who, at each performance, was brought in triumphantly to the strains of martial music.—Our Dumb Animals.

NO MACHINE FIRES IN PAST FIVE YEARS

Harvest Problem Has Been Solved by College and Government

E. J. Doneen of Oakesdale, Whitman County, reports that he has had no threshing fires in the past five years. Many threshing machines could have been saved this year from smut explosions if they had been equipped with smut fans, is the verdict of Mr. Doneen.

Five years ago a demonstration was started on the threshing machine belonging to Mr. Doneen, by George L. Zundel, extension specialist in plant disease, and the U. S. Department of Agriculture. The machine was equipped with a smut fan, aspirator and wiring system. When the wiring system was installed the State College made tests which showed that 2,200 volts of static electricity were being grounded.

Mr. Doneen is firmly convinced that fires are unnecessary when machines properly equipped with smut fan, aspirator and wiring system. The aspirator has been improved since it was first put on the separtior, and Mr. Doneen is convinced that it has saved him as high as five cents a bushel by cleaning some of the worst crops that he had harvested.

In explaining the operation of the smut fan Mr. Zundel states that it is placed on the machine back of the cylinder and above the shakers. A canvas pipe carries the smut and the chaff back to the straw pile. The fan by keeping the clouds of black smut from accumulating inside the separator eliminates the chances of an explosion and also frees the smut from the wheat.

The result of the fan alone, when working in wheat that by actual count contained from 13 to 19 per cent smut in the bundle, enables the threshed grain to sell on the market for only a one per cent dockage.

FAVOR PEACE AWARD

The American Bankers' Association at its convention just held at French Lick, in a resolution adopted concerning the cooperation of the association with the American peace award, expressed its belief that the question of our foreign policy ought to be submitted to the people of the United States "without the heat and distortion that is inevitable if this subject is made an issue in a political campaign."

Our idea of a hardboiled customer is an eligible bachelor who has successfully resisted the sales efforts of a hundred attractive women.—The Nation's Business.

MY LADY'S MONEY

An Episode in the Life of a Young Girl

By Wilkie Collins

(Installment No. 25)

They entered the tent.

"I'll read the names," said Hardyman, "and you find the cards and tear them up. Stop! I'll keep the cards. You're just the sort of woman my father likes. He'll be reconciled to me when he sees you, after we are married. If one of those men ever asks him for a place, I'll take care, if it's years hence, to put an obstacle in his way. Here, take my pencil, and make a mark on the cards to remind me; the same mark I set against a horse in my book when I don't like him—a cross enclosed in a circle." He produced his pocket-book. His hands trembled with anger as he gave the pencil to Isabel and laid the book on the table. He had just read the name of the first false friend, and Isabel had found the card, when a servant appeared with a message. "Mrs. Drumblade has arrived, sir, and wishes to see you on a matter of the greatest importance."

Hardyman left the tent, not very willingly. "Wait here," he said to Isabel; "I'll be back directly."

She was standing near her own place at the table. Moody had left one end of the jeweler's case visible above the napkin, to attract her attention. A minute more the bracelet and the note were in her hands. She dropped on her chair, overwhelmed by the conflicting emotions that rose in her at the sight of the bracelet, at the reading of the note. Her head dropped, and the tears filled her eyes. "Are all women as blind as I have been to what is good and noble in the men who love them?" she wondered, sadly. "Better as it is," she thought, with a bitter sigh; "I am not worthy of him."

As she took up the pencil to write her answer to Moody on the back of her dinner card, the servant appeared again at the door of the tent.

"My master wants you at the cottage, miss, immediately."

Isabel rose, putting the bracelet and the note in the silver-mounted leather pocket (a present from Hardyman) which hung at her belt. In the hurry of passing round the table to get out, she never noticed that her dress touched Hardyman's pocket book, placed close to the edge, and threw it down on the grass below. The book fell into one of the heat cracks which Lady Lydiard had noticed as evidence of the neglected condition of the cottage lawn.

"You ought to hear the pleasant news your sister has just brought me," said Hardyman, when Isabel joined him in the parlor. "Mrs. Drumblade has been told, on the best authority, that my mother is not coming to the party."

"There must be some reason, of course, dear Isabel," added Mrs. Drumblade. "Have you any idea of what it can be? I haven't seen my mother myself, and all my inquiries have failed to find it out."

It was not a merry party. The luncheon was attacked by the company with a certain silent ferocity, which the waiters noticed as remarkable, even in their large experience. The men drank deeply, but with wonderfully little effect in raising their spirits. The women, with the exception of amiable Mrs. Drumblade, kept Isabel deliberately out of the conversation that went on among them. General Drumblade, sitting next to her in one of the places of honor, discoursed to Isabel privately on "my brother-in-law Hardyman's infernal temper." A young marquis, on her other side—a mere lad, chosen to make the necessary speech in acknowledgment of his superior rank—rose, in a state of nervous trepidation, to propose Isabel's health as the chosen bride of their host. Pale and trembling, conscious of having forgotten the words which he had learned beforehand, this unhappy young nobleman began, "Ladies and gentlemen, I haven't an idea—" He stopped, put his hand to his head, stared wildly, and sat down again, having contrived to state his own case with masterly brevity and perfect truth in a speech of seven words.

While the dismay in some cases and the amusement in others was still at its height, Hardyman's valet made his appearance, and approaching his master, said, in a whisper, "Could I speak to you, sir, for a moment outside?"

"What the devil do you want?" Hardyman asked, irritably. "Is that a letter in your hand? Give it to me."

The valet was a Frenchman. In other words, he had a sense of what was due to himself. His master had forgotten this. He gave up the letter with a certain dignity of manner, and left the tent. Hardyman opened the letter. He turned pale as he read it, crumpled it in his hand, and threw it down on the table. "By G——d, it's a lie!" he exclaimed furiously.

The guests rose in confusion. Mrs. Drumblade, finding the letter within her reach, coolly possessed herself of it, recognized her mother's handwriting, and read these lines:

"I have only now persuaded your father to let me write to you. For God's sake break off your marriage at any sacrifice. Your father has heard, on unanswerable authority, that Miss Isabel Miller left her situation in Lady Lydiard's house on suspicion of theft."

"No bad news, dear Alfred, I hope?" she said, in her most affectionate manner. Hardyman snatched the letter from her, without answering, and led Isabel out of the tent.

"Read that," he said, when they were alone. "And tell me at once whether it's true or false."

Isabel read the letter. For a moment the shock of the discovery held her speechless. She recovered herself, and returned the letter.

"It is true," she answered.

Hardyman staggered back as if she had shot him.

"True that you are guilty?" he asked.

"No; I am innocent. Everybody who knows me believes in my innocence. It is true that the appearances were against me. They are against me still." Having said this, she waited, quietly and firmly, for his next words.

He passed his hand over his forehead with a sigh of relief. "It's bad enough as it is," he said, speaking quietly on his side. "But the remedy for it is plain enough. Come back to the tent."

She never moved. "Why?" she asked.

"Do you suppose I don't believe in your innocence, too?" he answered. "The one way of setting you right with the world now is for me to make you my wife, in spite of the appearances that point to you. I'm too fond of you, Isabel, to give you up. Come back with me, and I will announce our marriage to my friends."

"You are very kind, Alfred. My duty is plain to me. I will marry you—if you still wish it—when my good name is restored to me—not before."

He laid one hand on her arm, and pointed with the other to the guests in the distance, all leaving the tent on the way to their carriages.

"Your good name will be restored to you," he said, "on the day when I make you my wife. The worse enemy you have cannot associate my name with a suspicion of theft. Remember that, and think a little before you decide. You see those people there. If you don't change your mind by the time they have gotten to the cottage, it's goodbye between us, and goodbye forever. I refuse to wait for you; I refuse to accept a conditional engagement. Wait, and think. They're walking slowly; you have got some minutes more."

He still held her arm, watching the guests as they gradually receded from view. It was not until they had all collected in a group outside the cottage door that he spoke himself, or that he permitted Isabel to speak again.

"Now," he said, "you have had your time to get cool. Will you take my arm and join those people with me, or will you say goodbye forever?"

"Forgive me, Alfred," she began gently. "I cannot consent, in justice to you, to shelter myself behind your name. It is the name of your family, and they have a right to expect that you will not degrade it—"

"I wait a plain answer," he interposed, sternly. "Which is it? Yes or No?"

(To Be Continued)

Windowless Factories

Windowless factories and windowless office buildings are now predicted by Dr. Matt Luckeish, of the Nela Park research laboratories of the General Electric Company.

Dr. Luckeish says that interior lighting has been perfected to a stage where it even surpasses daylight and artificial means of supplying pure air will take the place of windows.

While from an economic standpoint this would cut down building costs, save window and court spaces in buildings and reduce other expenses, it is a question whether it should be done.

Why shut out the sunlight? Why make life more artificial than it is? Why lead a windowless existence? Why build great structures that will be like the caves of the primitive men? Let's work out something for more sunshine.

FAMOUS SHOW TEAM

The great $100,000 show team of Wilson & Co., packers—six Clydesdale geldings, which has won every event in which it has been exhibited in the horse show ring, will be on exhibition at the American Livestock Show at Kansas City in November.

Eating What You Save

Prepared by the Extension Service, State College of Washington

Carrots

No supply of vegetables for the table is complete without the carrot. When we think of vitamins in our diet, the carrot has all three. Iron is an element necessary to body structure and is essential to the growth of all active cells, and in the carrot we find iron.

In requires calcium to help in the development of the bones, and a large number of vegetables are lacking in this requirement, but the carrot is found on the right side because it contains this mineral.

Carrots are not a cure for all ills, but are beneficial for the upbuilding of the body and should be used in the diet more freely. Carrots resemble turnips, beets and paranips in their carbohydrate content and have a large content of sugar.

Because raw carrots are particularly good for the diet, we give the recipes for

Raw Carrot Salad

Scrape and grate enough carrots to make 8 tablespoons or ½ cup for each person to be served. Serve in lettuce leaves with mayonnaise dressing. Grated carrots may be combined in various ways with shredded cabbage, cottage cheese, mixed with peanut butter; also chopped nuts and celery. It may be used as a filler in many different kinds of sandwiches.

Carrot Timbales

2 eggs, 2 tablespoons fat, 1 tablespoon salt, ¼ teaspoon paprika, ½ cup liquid (milk, vegetable or meat stock), 1½ cups grated carrot, ½ cup bread crumbs. A few drops of onion juice. Beat eggs, add seasoning, melted fat and liquids. Combine with other ingredients. Turn into greased cups, set in a pan of hot water and bake until firm.

Carrot Pudding

Use 1 cup of ground carrots (raw), 1 cup of potatoes (raw), 1 cup of raisins, 1 cup of brown sugar, 1 cup flour, ½ cup of suet or butter, 1 teaspoon of soda, ½ teaspoon each of nutmeg, cinnamon and cloves. Reduce potatoes and carrots in meat chopper; steam 3 hours.

PACIFIC COAST HAS LARGEST LUMBER SUPPLY

The largest remaining supply of softwood timber in the United States is in the three states of Washington, Oregon and California, which contain more than half of all the saw timber in the country and more than two-thirds of the nation's entire supply of coniferous woods, according to the U. S. Department of Africulture. Including the coastal forests of southern Alaska, this Pacific Coast region is credited with 1,214 billion board feet, nearly half of which is Douglas fir, followed by Western yellow pine, Western hemlock, the true firs of several species, California redwood, spruce, Western cedar, and sugar pine. The amount of timber in these three states too small for lumber manufacture probably aggregates 400,000,000 cords.

Knock on Wood

A temperance lecturer was violently denouncing the use of all intoxicants before a country town, and where the majority appeared to favor the "wide-open shop." He was frequently interrupted by sarcastic remarks, and finally a huge chunk of wood was thrown at him. Fortunately, however, the aim was bad, and it fell on the platform. The lecturer picked it up and showed it to the audience.

"Good heavens," he exclaimed in mock anxiety, "some one present has lost his head!"—Everybody's.

SELLING SCENERY

The tourist season of 1923 has shown something of the profits that lie in selling scenery and yet the tide of summer travel that surged into the Pacific Northwest this year is only "a drop in the bucket" to what we can expect when the beauties of "America's Summer Playground" are made familiar to the millions who crowd the Atlantic seaboard and the inland states.

Tourists are not only directly profitable because of the money they spend while in our state, but highly productive of future settlers and permanent residents. We need have no compunction about selling our scenery to them. It is one article that cannot be over-advertised and no matter how many people enjoy it there is always just as much left for the next customers.

Recognizing the value of bringing tourists to Washington, both from the standpoint of the profit from their business while here and because of its affect on industrial development, the Seattle Chamber of Commerce has been spending a large share of its publicity fund in advertising for tourists—featuring the attractions of the entire state.

Their advertisements and the campaigns put on by the various railway and steamship lines are bringing people into the state in vast numbers. The value to be derived by any individual community, however, depends upon the special inducements it can offer visitors and the treatment they receive while within its gates. Are we doing all we can to get our share of the 1924 tourist travel?

Capitalizing Barber Shop Talk

All the barbers of Lebanon, Pa., were invited to a smoker recently given by the chamber of commerce. The invitations were extended in the belief that the barbers have a continuous opportunity to give visitors a favorable impression of the city, that many barber shops are forums of public discussion where municipal questions are freely argued, and that the barbers should have a true conception of the city's development with an understanding of the part taken by the chamber of commerce in the general progress. The invitations stated plainly that the smoker was not in any way a scheme to promote the chamber's membership or influence. The barbers got an entirely new viewpoint on their opportunities for service to the city, and have actually made use of these opportunities.—The Nation's Business.

The Meanest Flowers

In a certain congregation in the South there was a lovable old lady who was most devoted to flowers and who maintained a beautiful garden. She was especially fond of sweet peas, and each Sunday in the summer it was her bouquet that adorned the pulpit of her church. Suddenly there was a change in the flowers, a fact which the minister noticed. Accordingly he asked the lady after service why she brought no more sweet peas.

A dread smile came to her face.

"You don't like them," she said, simply. "Last Sunday you pointed right at my sweet peas and said, 'God loves even the meanest flower that blows.' "—Everybody's.

Not Mining

"I think you said, 'Rastus, that you had a brother in the mining business in the West?"

"Yes, suh; dat's right."

"What kind of mining—gold mining, silver mining, copper mining?"

"No, suh, none o' dose; kalsomining."—Everybody's.

Uncle Ab says: I never learned how to do anything but what it came in handy sooner or later.

A Junior Champion Guernsey

CHEHULPIN'S HERMIONE ROSE

Junior Champion Female, Oregon State Fair 1923, owned by D. H. Looney, Jefferson, Oregon.

The most interesting feature of this picture is the man, Ed Hahn, who for 42 years as herdsman, has fitted and shown Mr. Looney's cattle at the Oregon State and other important fairs and shows. This is a record that Mr. Hahn can well be proud of, for during that long period of service his cattle have never gone into the ring in other than the pink of condition. At the A. Y. P. livestock show in Seattle in 1909, Mr. Hahn won the cash prize offered for the best fitted herd of dairy cattle.

Washington News

The annual sale of Christmas seals is being arranged for by the Washington Tuberculosis Association. The seals will be on sale from December 1st to 22nd, inclusive.

Cougars are increasing in numbers along the banks of the Lewis river and are becoming a real menace, slaughtering deer, calves and even full-grown cattle.

A few days ago Thomas G. Keep, Washougal hanker, ran to catch a train and died suddenly, shortly after the train pulled out of the station.

Twenty-five thousand dollars was paid at the Stadium of the University of Washington by the crowd that witnessed the great victory of the "Huskies" against the University of Southern California—the second largest crowd in Washington gridiron history.

The grand jury of Valdez, Alaska, charges that some of the canneries in Alaska are a disgrace to civilization. Drug addicts, vicious practices, poor food and lodgement, binding contracts, make these places a veritable "hell upon earth."

Ezra Meeker's suggestion that the old Naches Pass be surveyed has been heeded and engineers will soon begin work to determine whether it will make a shorter route between Walla Walla and Seattle than the one now generally used.

Sailing from Seattle recently, Morton Breslauer is en route to Shantung province, China, to open a factory for the Howe Company, Inc., of Seattle, large importers and manufacturers of hair nets. Mr. Breslauer has been commissioned to establish a factory in Shantung province.

A Bremerton boy, Allen R. Johnson, 16 years old, died an hour after being injured in a football scrimmage, his neck being broken. The Bremerton High School football team was playing the Puyallup High School eleven on Vickery Field, in Puyallup. Johnson was playing center.

Fort Steilacoom Hospital for the Insane reached the peak figures in its history a few days ago, according to the reports of Director W. J. Hays, of the Department of Business Control; 1501 inmates were numbered, but retained only for a few days, as releases followed the "peak" and the figures were lowered.

Washington State scored second in the figures compiled giving the healthiest states for children in the United States. Oregon had the first place, with a score of 58.6; Washington second with 58.9; Minnesota third with 60.3; California fourth with 64.6; Nebraska fifth with 65.3. The figures show the death rate of infants under one year per thousand.

One of the six motorships ordered by the Royal Mail and the Holland-American Line, especially for the Pacific Coast-European service, the "Drechtdkv," will carry Washington apples to England soon. The "Drechtdky" is a huge motorship, and with the "Loch Katrine" will load bulk wheat, frozen fresh fish, canned salmon, canned fruit and lumber for Great Britain.

Fred Haldeman of Portland, Oregon, has made application to Marvin Chase, supervisor of state hydraulics, to build a reservoir and storage system for the waters of Reilly Creek, a fork of Lewis River in Clarke County. These impounded waters will be for irrigation, power and domestic use. The dam is to be 60 feet long and 17 feet high, to cost in the neighborhood of $1,000.

Aaggie, the world's champion grade cow milk and butter fat producer, still continues in the lead. In the fourth month of her last lactation period she is credited with 127.5 pounds butter from 3,279.3 pounds milk. She is a 7-year-old grade Holstein, owned by Sam W. Barber of Scottsburg, N. Y.

O. M. Plummer, manager of the Pacific International Livestock Show, notifies swine breeders that all exhibition stock must be immunized against hog cholera, to comply with the ruling of the state veterinarian of Oregon. Before hogs are admitted to the grounds they must be inoculated with anti-hog cholera serum and certificate of treatment furnished by attending veterinarian. It will also be necessary to have all hogs dipped or sprayed with some standard disinfectant solution before shipping.

Yakima Dairymen's Association, conducting its own retail business, reports total sales for the month of August at $38,733.40. Of this amount $31,397 was paid to producer members for milk delivered. The balance of $7,336.40 was absorbed in salaries, expenses and a certain amount added to sinking fund. The association has a paid-in capital of $45,000.

Good ventilation in the spud storage bins will help keep the potatoes this winter.

Washington Names

Okanogan, Indian word meaning "rendezvous," was first applied to the district about Lake Okanogan, according to the book on Washington Names, recently published by Prof. Edmond S. Meany of the University of Washington. In this region the Indians of British Columbia and Washington often gathered for the annual potlach and to lay in supplies of fish and game. The name has since been given to the river which flows south from British Columbia to the Columbia river, and to the county through which the river flows, and to its county seat. The name has had many spellings such as Okinacken, Ookenaw, Okinakane, all of which aim at the original Indian sound.

Brewster, in Okanogan county, was named for John Bruster, the original homesteader there. Capt. Alexander Griggs named the place in 1896. When the postoffice was being secured in 1898, D. L. Billeter, the postmaster, sent in the name spelled Brewster instead of Bruster and it was accepted by the postoffice department.

Methow, also in Okanogan county, The tribe of Indians known as Methow formerly living on lands between the Okanogan river and Lake Chelan, now has some survivors on the Colville Reservation.

Oroville, another town in the north central part of Okanogan county, had its beginning in placer mines, for which reason the Spanish word oro, for gold, was selected as the name. In 1892, when establishing a postoffice, the postoffice department asked that "ville" be added to avoid confusion with Oro, another postoffice in the same state.

Omak, near the central part of the county, was named for a lake about eight miles east of the town. It is claimed that the Indian word "Omache" means great medicine, referring to the supposed curative qualities of those waters.

SEARCH FOR AN ELIXIR OF LIFE

Medical science is on a "gland jag," declared Dean Eyelesshymer of the medical college of the University of Illinois, in an address at the commencement exercises of the General Medical College.

Speaking on the "search for an elixir of life," the dean expressed belief that the "search" had about ended, but the average span of human life has been prolonged for about 16 years.

"Much speculation and not a little experimentation have been centered around sex glands," said Dean Eyelesshymer. "But the medical science has not been disillusioned from the inspiration of the hope for eternal youth and life without reward. The best results of the period of investigation show that energy, both muscular and mental, is at the highest tide when the sex glands are most active, and, conversely, that efficiency, both physical and mental, declines as these glands function less.

"Transplantation experiments indicate temporary rejuvenation. But the wave of gland transplantation that is sweeping the country at present, commanding fabulous prices for both material and operation, will soon be placed in the same category as the 'corn whisky jag.'

"The present extension of the span of human life does not give us as long a life as may be scientifically expected. Comparing the organic changes in man and in animal, we should all soon become centenarians."

The oldest man that ever lived, barring Methuselah, was Peter Torton of Temesware, Hungary, who died at the ripe old age of 185, according to the dean. He mentioned 50 others who had lived more than 150 years, five had passed 160 and two exceeded the 170 mark.

IDAHO UNIVERSITY DISTRIBUTES NEW WHEAT

UNIVERSITY OF IDAHO, Moscow: Seed of a new wheat is being distributed to a limited number of Idaho farmers by the Department of Agronomy of the Idaho Agricultural Experiment Station. This wheat variety is name "Mosida," and is a cross between Turkey and Fultz-Mediterranean. The name chosen by Prof. K. Bonnett, agronomist, is a contraction of Moscow-Idaho, the source of the variety.

"Mosida," which was first produced at the Colorado Experiment Station, was brought to Idaho by Prof. G. S. Ray, former agronomist, and grown here for a number of years, the yield being improved and the final selection made.

The new wheat is an awnless hard winter wheat with white chaff. In winter it is hardy and will not head if spring sown. It is a resistant to bunt and about as early as Turkey. This season it produced the highest yield of all the varieties grown at the Sandpoint sub-station, at Sandpoint, and at the Oregon Branch Experiment Station at Mora.

The outstanding characteristics are winter hardiness, awnlessness, early maturity, stiffness of straw, yield and resistance to bunt. If results in the co-operative tests under actual farm conditions, which will be made this winter, justify, the seed will be more widely distributed.

H. E. McNatt, for three and a half years head of the dairying demonstration work of the Washington Experiment Station at Puyallup, resigned Sept. 1. The dairy herd has been placed under the charge of Dr. J. W. Kalkus, who will use it in his experimental work, looking to the extermination of contagious abortion among dairy cows.

SHORT CUTS for the HOUSEWIFE

Five Kinds of Bread Made From One Batch Of Dough

From one batch of bread dough, properly prepared, the housewife can divertify her day's menu, and with very slight difference in treatment, quickly make biscuits, coffee-cake, cinnamon rolls, clover leaf biscuits, or Parker House rolls.

Recipe for Dough

1¼ lbs. (5 cups) well sifted flour (winter patent).
1 cake compressed yeast.
2 level teaspoons sugar.
1½ level teaspoons salt.
1½ cups water.
1½ level teaspoons shortening.

Method—Measure luke warm water and put into mixing bowl. Add crumbled yeast cake, sugar, salt, and mix. Add half the amount of the sifted flour. Mix with a spoon and add the shortening; mix well. Add the remainder of flour and mix thoroughly, keeping sides of bowl clean. Sprinkle board very lightly with flour. Turn dough on board and let stand several minutes. Slightly grease mixing bowl. Knead quickly and lightly until dough is smooth and elastic. Turn dough over in greased bowl until outside is covered with thin coating of shortening. Place covered bowl where dough will be at a uniformly warm temperature (80-82 degrees F.). Allow dough to double in bulk or until blisters or gas sacs appear on top of dough. Punch the dough down in the center. Fold over from the four sides to center and punch. Turn over. Cover with towel. Let dough stand about 45 minutes. Punch as before. Let dough rise 15 minutes. Turn out on lightly floured board.

DINNER BISCUITS

Form dough into balls. Place close together in greased pan and let stand until light, about 25 minutes. Bake for 25 minutes in moderately hot oven (400 degrees F.).

CINNAMON ROLLS

Roll out dough 10 inches wide, one-fourth inch thick. Spread with butter, brown sugar, cinnamon and raisins. Roll dough as for jelly roll, cut in pieces one and one-half inches thick. Place cut surfaces down, in pans, the bottoms of which have been covered one-fourth inch deep with brown sugar and small pieces of butter.

Allow to rise until light, and bake for 25 minutes in moderate oven (375 degrees F.). When taken out of the oven turn upside down on waxed paper and allow to stand one minute before removing pan.

COFFEE CAKE

Weigh 12 ounces of the dough which is about one-fourth of the entire recipe. Place in round greased cake tin. Lightly grease top of dough. Let stand until light, about 30 minutes. Before placing in the oven, cover with raisins and spread with one tablespoon butter creamed with three tablespoons sugar. Bake 35 minutes in moderate oven (375 degrees F.).

PARKER HOUSE ROLLS

Form dough into long rolls; cut as you would a jelly roll, making each piece about a half an inch thick. Form each piece into ball and butter the top of each generously. Allow to stand 10 minutes. Roll out or flatten out with hand. With round handle of a wooden spoon make a deep crease in center of the dough and fold over. Place in greased pan and allow to rise until light or about 25 minutes. Bake 25 minutes in moderately hot oven (400 degrees F.).

CLOVER LEAF BISCUITS

Form the dough into small balls. Grease muffin tins. Place three balls of the dough in each muffin tin. Grease lightly tops of rolls and allow to rise until light. Bake 25 minutes in moderately hot oven (400 degrees F.).—*From Domestic Science Department, Washburn-Crosby Co., Minneapolis, Minn.*

FRENCH MAYOR ADMIRES AMERICAN BUSINESS WOMEN

Copyright, Keystone View Co.

M. EDOUARD HERRIOTT, Mayor of Lyons, France

Certain They Will Be of Aid in Developing Closer Relations Between the Two Countries

M. EDOUARD Herriott, Mayor of Lyons, France, who arrived in this country recently and is making a speaking tour of the principal cities, has registered his admiration for the American business woman in a letter to the American Committee for Devastated France. Mayor Herriott had the opportunity of meeting many American business women when they visited Lyons as Good Will Delegates last summer.

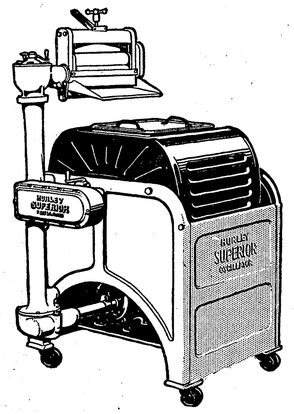
"Through you I am venturing to offer my greetings to all those noble American women," said the letter to the American Committee, "who are carving their own living through their own efforts. I have the greatest admiration for the American woman in business. She is dignified, diligent and friendly. I am certain those women will be of great aid in developing between our two peoples closer material, intellectual and moral relations. They seem to have inspired our French women, who, more and more, are helping and even replacing the men lost. One million five hundred thousand dead in a population of 40,000,000 is an abysmal loss.

"I, myself, have formed a technical high school at Lyons to prepare young girls for filling positions as secretaries and also as engineers. I would gladly welcome Americans there. It would be a glorious example since actions speak louder than words.

"Respectfully,

"HERRIOTT."

$1.00 Only



Does Many Things

1 Makes household duties light
2 Eliminates blue Monday
3 Makes washing a pleasure
4 Last, but not least—

One Dollar

will put the new Hurley Oscillator in your home. Greater value for less money than any oscillating type machine on the market. Made by the reliable Thor people.

All washing machines sold on easy payments.

Subscription price, strictly in advance, $2.00

FRIDAY, NOVEMBER 2, 1923

Federated Ladies Bazaar

The ladies aid of the Federated churches will give a bazaar in the American Legion hall on Wednesday, November 21. Dinner and supper will be served and all kinds of articles will on sale—from the humble pumpkin (which will be found at the country store) to the daintiest articles dear to every woman's heart. There will be home-made candy for sale, the inevitable fish pond, rummage sale, toilet articles, fancy baskets—and at the country store you will be able to buy anything you might want, as well as a good many things you don't want—but they will be for sale, just the same, and you'll be expected to buy them.

You are especially invited to come and bring your big pocketbook, or, if the old "sock" still does duty as a bank, bring it along, and please remove the draw-string from the top.

Jack Frost On the Job

That Jack Frost does not belong to any particular union—much less the I. W. W.—is indicated each and every morning when one goes out and finds that he has painted everything a snowy white—just a little reminder that Old Man Winter is soon to follow with all his adjuncts and paraphernalia—which is just another little reminder that one should look after the coal bin and the woodpile.

If a "flying start" has anything to do with the length of the winter, we will sure have our share before the time comes again to push the lawn mower. The mercury reached the low point of 20 degrees above zero Sunday night.

Cash and Carry Store

Another "cash and carry" store will be in full operation at the Federated ladies aid bazaar, in the Legion hall, on Wednesday, November 21—and you can buy anything from a toothpick to—well, no matter what, they'll have it. 18-

Good Health

If you would enjoy good health, keep your bowels regular. No one can reasonably hope to feel well, when constipated. When needed, take Chamberlain's Tablets. They are mild and gentle. Sold at Clark's Drug Store.

CHURCH SERVICES

SEVENTH DAY ADVENTIST CHURCH
AVERY ROGERS, S. S. Supt.
Mrs. B. B. CALDWELL, M. V. leader

Sabbath school at 10 o'clock Saturday morning.

Young people's M. V. at 12 o'clock Saturday.

LUTHERAN CHURCH
A. P. WOLFF, Pastor.

English services will be held each Sunday morning at 10:30 o'clock, with the exception of the first Sunday of each month, when German services will be held at the usual hour.

Sunday school at 9:30 a. m.

FEDERATED CHURCHES

Church school at 9:45 a. m.
Church meeting at 11 o'clock.
Rev. Edward Walter Barrington, D. D. Ph. D., will preach Sunday morning at the Federated churches. Subject "A Hallowed Spot." He returns to Spokane Monday.

Will Give Bazaar

The Genesee Valley Ladies Aid will have a dinner and bazaar November 15. Various boths will be open and there will be a cake sale. 18-2

Pythian Sisters Card Party

The Pythian Sisters will give a card party at the K. P. hall on Friday, November 9, at 8 o'clock. Admission $50 a couple. Lunch will be served. 18-2

RUBBER GOODS

Water bottles, fresh stock—guaranteed. Something you don't get from the mail-order houses.

DENNISON'S CREPE AND SHELF PAPER

My prices are right. I have spent the past five Sundays in as many neighboring towns, comparing prices, so you will not have to tell me the prices—for I know them.

Patronize your home merchant—if you can do as well. Who helps pay the taxes to keep the high school going, and good roads? "We do not miss the water until the well goes dry." The high school is an asset to all—not a liability.

GRANT CLARK

Y. P. S. C. E. Convention

The annual convention of the Whitman-Latah County Christian Endeavor society, held at Garfield last Saturday and Sunday was well attended and is reported to have been one of the best conventions of its kind held for a long time. The program was both interesting and instructive. Rev. Wayne S. Snoddy of Moscow and Miss Lucell Dyer of Seattle were the principal speakers of the convention.

A splendid banquet was served Saturday evening at which Orland Mayer of Genesee was the toastmaster.

During the business session Miss Wilene Couch of Garfield was elected president for the coming year. The 1924 convention will be held at Moscow.

A good-sized delegation was in attendance from Genesee.

Hallowe'en Windows

Some very pretty and appropriately decorated windows for the Hallowe'en season have been in evidence during the past few days—something that did not fail to remind Young America that the night was near at hand when he might think he would have an excuse for getting out and putting soap and paraffin on windows and doing divers and numerous other things that the grown-ups thought ought not to have been done. However, the amount of real danmage done was negligible and it was undoubtedly done thoughtlessly by the youngsters.

Those having appropriately decorated windows were Mrs. Wheeler, W. W. P. Co., Emmett & Boliou and the W. J. Herman Co.

Progressives Entertained

The Progressives were very delightfully entertained on Tuesday at the home of Mrs. Harry Schooler. The afternoon was spent in doing needlework and having a social time. A delicious luncheon was served by the hostess at 5 o'clock.

The invited guests were Mrs. Amelia Rader, Mrs. Milton Rader and little daughter, Mrs. F. J. Niemann and little son Fritzie, Mrs. T. H. Feeney and little son, Mrs. P. C. Shork, and Mrs. Frank Schooler of Lewiston.

The next meeting has been decided upon as the time for the annual banquet and will be held in two weeks.

Sunday School Class Party

The Sunday school class of Mrs. Geo. Boliou gave a very pleasant party at the home of Mrs. Fred Perkins last Sunday when the members of the class gathered for a good time. The time was spent in playing games and having a general good time. The rooms were appropriately decorated for the Hallowe'en season.

Those present were Frances Smylie, Audrey Pleiman, Harriet Evans, KatherineCasebolt, Harriet Hickman, Emma Lou Sullivan, Inez Mayer, Dorothy Evans, Pearl Perkins, Lorraine Lambert, Leland Emmett, Harley English.

Missionary Society

The missionary society of the Federated churches will meet at the home of their president, Mrs. Perkins, on Wednesday afternoon, November 7. A full attendance of the members is requested as the new study course for the year will be taken up at this meeting.

K. P. Card Party

The card party given by the Knights at their hall last Friday night was not as well attended as the boys had hoped for, but nevertheless those present report a very good time.

Read the want eds. this week.

Children's knit sweaters, $3.25 values, each..... $2.00

Infants' knit sacques, $2.25 values, each $1.50

Infants, knit sacques, 75c values, each 55c

Misses' knit bloomers, black and pink only, 50c values, pair 35c

Children's grey vests, sizes 1½ to 8 years, regular 45c values, each 30c

Please remember that accounts are due on the first of each month. Satisfactory settlement must be made by the 10th, or further credit cannot be extended.

EMMETT & BOLIOU

A Timely Suggestion

This is the season of the year when the prudent and careful housewife replenishes her supply of Chamberlain's Cough Remedy. It is almost certain to be needed before the winter is over and results are much more prompt and satisfactory when it is kept at hand and given as soon as the first indication of a cold appears and before it has become settled in the system. There is no danger in giving it to children as it contains no opium or other harmful drug. Sold at Clark's Drug Store.

First-Class Undertaking Service

The W. J. Herman Company has made arrangements with the Vassar Undertaking company of Lewiston whereby they will handle all cases in that line in a first-class manner at no additional charge for work in this community. PERSONAL MENTION

G. H. Rosenau arrived Saturday from Spokane for a visit with relatives here.

Mrs. Al Mayer returned home Saturday from her visit with home folks in the east.

Mr. and Mrs. Leo. Edwards and Mrs. H. M. Warren were Lewiston visitors on Wednesday.

Fred Dieus left Saturday morning for Garfield to attend the C. E. convention and to visit his grandmother.

Mr. and Mrs. E. W. Potsch left Monday overland for Los Angeles, where they expect to make their home.

Miss Ida Johnson and Miss Esther Clark returned to their school duties at Colton Monday after a visit with home folks.

J. P. Michaelson was a Genesee visitor from Lewiston Monday. J. P.'s many friends here are always glad to see him.

Mr. and Mrs. John Sullivan left Monday morning for Rochester, Minnesota, where Mr. Sullivan went to consult the Mayo Bros.

Mr. and Mrs. F. S. Casebolt returned home Tuesday evening after a few days visit with relatives and friends at Spokane.

Mrs. Ray Edwards and little son left Friday for a visit with Mrs. Edward's mother, Mrs. Eliza Gray, who lives at Moscow.

Jack Barnes returned Wednesday evening from Wilbur, Washington, where he has been making arrangements to move to that place.

Mr. and Mrs. W. M. Herman, Mrs. F. C. Shork, Mrs. G. E. Sampson, and Mrs. Nell Haymond, were Lewiston visitors Thursday of last week.

Mrs. Peter Kries and children left Saturday morning for Kellogg, where they will reside, Mr. Kries having gone ahead with the household goods. E. E. Miller accompanied her.

Means Is Optimistic

M. A. Means, Idaho state commissioner of agriculture, remarked recently while in Lewiston, that the conditions in Idaho were better than a year ago, and that the people were generally optimistic.

"Idaho has harvested a big crop," said Commissioner Means, "and conditions favor another big grain yield. Summer fallow plantings look fine, the larger part of the seeding having been done just after rains, and I have seen some growths six inches high. We must proceed industriously with our problems as we find them. That is the only remedy and the sane way. Our troubles are not so much hard times as geting over the good times of the war period. We must produce more, not less."

Card Party a Success

The card party given by the American Legion Auxilliary proved a success in every way. The evening was spent playing pinochle after which a program was given by George Post and John Hasfurther. Mrs. W. E. English won the ladies honors and L. J. Baker the men's, while Art Potsch and Mrs. Fred Nagel won the consolation prize. A delicious luncheon was served, and a general good time had.

The next meeting of the Auxiliary will be held on Thursday evening, November 8, in the Legion hall, at 8 o'clock.

Gave Party

A Hallowe'en party was given at the home of Dr. F. B. Evans on Tuesday evening by Dorothy and Harriet Evans and Audrey Plieman. The young ladies had as their guests their schoolmates and a few other friends. The evening was spent with dancing and playing games after which a delicious luncheon was served. Everybody reports a good time.

Game Protective Meeting

Don't forget the Genesee Game Protective association meeting to be held Friday evening, November 2, at the office of W. W. Burr.

Law Office Moved

Attorney Thomas A. Feeney, has removed his office to the Smolt building, four doors east of the post office. 14-4

The secret of success is no secret at all. Every failure can tell you all about it.

Pine Grove News

Mr. and Mrs. Sherman Oiler of Silcott spent a few days visiting at the P. G. Miller home.

Mrs. Heimgartner of Clarkston is spending a few days visiting with her sister, Mrs. Roy Sweet.

L. Baker returned from Lewiston where he went for medical treatment. His condition is much improved.

Miss Carrie Mae Hickman and Miss Marguerite Spurbeck spent the weekend with the latter's parents, Mr. and Mrs. C. H. Spurbeck.

The neighbors and friends of Mr. and Mrs. Ernest Sams called on them last Tuesday evening to bid them goodbye. They are moving to Julinetta to make their home.

A Hallowe'en party was given at the Pine Grove school on Saturday night. A short program was given followed by various stunts. A prize was offered to the one who should come dressed in the most comical costume. This was secured by Miss Carrie Mae Hickman. Mrs. Henry Whitted received the prize for telling the most weird story. Light refreshments were served.

A Home Product

There are few people who realize that what may later develop into a well-paying industry, is being started in Genesee, and it should be fostered by Genesee and surrounding territory.

There are few families that do not use salad dressing, and there are also many women who do not readily understand the proper way of making such a delicacy.

Mrs. C. P. Whalen is making and placing on the market a very delicious salad dressing which will be known as "Mrs. Whalen's Always Ready Salad Dressing." It is made right here in Genesee by one whom you all know—and you also know that it is bound to be good.

Just ask any one of the local stores for a bottle of Mrs. Whalen's Salad Dressing and you'll be pleased when you try it.

W. W. P. Repairing Line

The Washington Water Power company has had a crew of men working reinsulating their power line between Lewiston and Moscow for the past two Sundays and the statement is made that when it is completed the service to Genesee users of juice will be greatly benefited. Here's hoping the "off" days will be few and far between.

Some people never consciously commit a wrong. It is always wrong with them.

WINTER Is Almost Here

Are You Ready?

Eavetroughs and all the Fittings

We can furnish a man to put them up, if you want.

Stoves Ready?

We can furnish you repairs for practically any stove made. Genuine Howard, Majestic and Circulator repairs.

Building Paper and Roofing

See that there is no overhead draft in your chicken house.

Cover your screen doors with cheap roofing, old linoleum or building paper—they make good storm doors and save coal.

Plant spring flowering bulbs now.

Dig your dahlias, gladolius, cannas, etc., now.

THE STORE OF SERVICE

Herman's Hardware Shop

Wheat Still Coming In

That there is much wheat still on the farms is indicated by the fact that every day many teams may be seen unloading at the warehouses and elevators. It is a common occurrence to see two wagons, one fastened behind the other, with from four to eight horses hitched to them, bringing in immense loads of sacked grain—and the end is not yet.

No young man is responsible for his parentage, though some of them act as if they were.

Public Sale

There will be a public sale held of the Elmer Tuckness property, on the Collins place, two miles southwest of Genesee, on Tuesday, November 6, when seven mules, eight horses, 65 hogs, and a good lot of farm implements will be placed on sale. There will be a free lunch at noon.

This ticket describes Double Dyed Denim and is on every Oshkosh B'Gosh Overalls. Nos. 101, 201 and 301.

The Double Dyed Denim did not fade.

This competitive test

proved Double Dyed Denim fast-color.

If only every overall wearer might have seen this test made! The superiority of Double Dyed Denim was proven in a most startling manner.

Samples of denim woven at different mills were sewed together. One of these samples was the Double Dyed Denim. The entire strip was soused with dirt and grease Then it was sent to the laundry.

Powerful chemicals were used to take out the dirt and grease. Again and again this process was repeated. Illustrated at the left you see the result.

Some of the pieces were almost white; others a dirty gray; one showed a pale blue. Standing out in striking contrast was the Double Dyed Denim. It came through tough and strong as ever and a wonderful bright blue.

Double Dyed Denim is made only into Oshkosh B'Gosh Overalls. It was originated and is controlled by the Oshkosh Overall Company. Try a pair. That's all we ask. They must make good or we will.

Claims World's Record Production of Ensilage Corn

S. D. Cornell of Grandview, Wash., claims to have grown the world's record production of silage corn on a five and a half acre patch.

One acre of the crop was measured and weighed by County Agent A. E. Lovett, who gives full description of his procedure in arriving at the correct weight of the crop grown on the acre measured, in a recent issue of the Sunnyside Sun, in which he says:

"We have completed figures on the acreage of silage corn grown by S. D. Cornell of Grandview, Wash. The figures have shown that we have weighed 56,985 pounds of silage corn from this acre on wagon. Since obtaining this sum we have had Mr. Cornell gather and weigh 25 pounds of the corn scattered on the ground in the loading. This makes a complete total of 57,010 pounds of silage corn from one acre, equal to 28½ tons plus 10 pounds.

"This acre of corn is part of a field of about 5½ acres; 3½ acres of this field were planted to Eureka Silage Corn and Iowa Silver Mine. Two rows of the silage corn were followed by two rows of the Silver Mine and the acre measured and weighed consisted of 10 rows of each of these varieties. Ten rows of the corn were cut the afternoon of September 26, nine rows were cut the morning of September 27, and one more the morning of September 28. Rows were three feet apart, and we measured the field 720 feet long. This left 11.2 feet on each side of the measured acre and approximately 6 feet on each end clear of corn. Wagon scales used were checked with the John Dower Lumber scales in Grandview, by weighing the same load on both scales; we obtained a variation of less than five pounds. Scales were balanced each time before a wagon was driven on.

"One row of the Eureka Silage corn on this acre was weighed and totaled 4,230 pounds, which would indicate that had the entire acre been planted to this variety and had the corn been cut and weighed promptly, a yield of at least nearly 40 tons might be expected.

"Mr. Cornell came to Washington from New York state in 1911. He moved to this farm in 1916. This field was sagebrush at the time. A crop of turnips was grown on the field in 1916, followed by wheat as a nurse crop for alfalfa. Good crops of alfalfa were obtained each year, and an application of 18 tons of manure was given the winter 1922-23. The field was plowed early in the spring of 1923. Corn was planted May 28 or 29. Thorough cultivation was given the field and three irrigations were applied. Water was applied to every other row only, and rows were alternated each irrigation. At no time did the crop receive a heavy application of water.

"Mr. Cornell does not contemplate saving seed from this silage corn, figuring that he can best afford to purchase the seed in Massachusetts each year.

"In our opinion Mr. Cornell's success in growing his several crops is a result of good tillage, the keeping of dairy cows and hogs and the application of manure to the land. We feel that any of our farmers in this valley have the same opportunity which Mr. Cornell has. The land will produce the crops—good farming is all that is needed."

AVOID MECHANICAL INJURY IN HARVESTING SEED POTATOES

The average seed-potato grower does not fully appreciate the importance of using every means to prevent injury to the tubers from rough handling during the process of harvesting and storing, says the United States Department of Agriculture. Mechanical injuries to a tuber are sources for the entrance of infection which rapidly spreads to other tubers which come in contact with the injured one. This makes a compulsion land which contains many small stones the tubers are almost certain to be more severely injured than when grown in a sandy loam soil. Hand-digging is not always feasible, but it is believed that where small stones abound in the soil it will be desirable to harvest the home seed plot by hand. Much injury will be avoided if the seed stock designed for planting the field plat for the ensuing year is picked directly into crates in which it is allowed to remain throughout the storage period.

Storage conditions necessary to insure vigorous seed at planting time are more easily provided in the North than in the South. In the former region a well-constructed cellar, pit, or cave serves reasonably well. The main thing is to keep the room temperature sufficiently low to retard germination. The ideal seed tuber is one which has not wasted any of its stored-up energy by excessive loss through sprouting. It should be firm with the first sprouts just showing. Such tubers can be depended upon, if suitable conditions prevail, to start quickly when planted and to make a vigorous growth.

The general practice among southern growers of securing seed from the North involves, in the absence of suitable storage conditions, one of two things: Either getting the seed potatoes late in the fall and holding them over in the spring, pits, or cellars, with consequent sprouting before planting, or the risk of having the seed chilled, frozen, or overheated while in transit in midwinter. In the opinion of department authorities, the greatest need of the large southern truck grower at present is that of suitable storage facilities for handling fall shipments of seed potatoes. This would do away with the risks of midwinter shipment and enable them to buy seed in the fall when the price is usually much below that of later shipments.

Undertaker Gets His First

Under Kansas law, in the final settlement of a case in probate court, if there is not enough money to go around, the undertaker is the only one who is paid in full. The doctor, the printer and even the judge himself must probate the remainder. Everybody except the undertaker must lose some or all of his bill. The dead must be buried.—Collier's.

He Took The Movies To Church And The Whole Town Turned Out

Photo Courtesy Success Magazine

THE sign "Standing Room Only" is one that is seldom seen in front of a church. Yet there is a little Congregational Church in Chappaqua, N. Y., that often puts it up. Its pastor, Rev. Dow B. Beene, D.D., went into the moving picture business three years ago and has since that time given with the assistance of his deacons over 300 movie programs. There is no sale of tickets, merely a general understanding that adults put down 25 cents and children 15 cents on entering.

The outcome of this adventure, as told in the October number of Success Magazine, has been that the equipment is all paid for, the church debt is beginning to dwindle, and the people of the town have regarded the church with increasing approval. In fact it has developed a spirit of unity of the people of all denominations and, as an outcome, a Young People's Club has been formed and is taking the lead in the town's social life.

Churches are something that Chappaqua has nothing else but, and Dr. Beene says:

"For another church to justify its existence here it was necessary to do a lot more than pray for our spiritual welfare. So we tried movies. I gave them to entertain, not preach. Highbrow critics say that Harry Leon Wilson is the greatest living master of native American satire. Delighted readers hark back to Mark Twain for comparison to describe the rollicking humor and wit of his books. Hundreds of thousands of playgoers identify Wilson by his great comedy hit, "Merton of the Movies"—and they recall, too, "Bunker Bean." "Oh, Doctor!" will be published by Cosmopolitan Book Corporation.

Rev. Dow B. Beene and little church where movies are paying off debt.

"Oh, Doctor!" by Wilson

"Oh, Doctor," by Harry Leon Wilson, has been published by the Cosmopolitan Book Corporation. Highbrow critics say that Harry Leon Wilson is the greatest living master of native American satire. Delighted readers hark back to Mark Twain for comparison to describe the rollicking humor and wit of his books. Hundreds of thousands of playgoers identify Wilson by his great comedy hit, "Merton of the Movies"—and they recall, too, "Bunker Bean." "Oh, Doctor!" will be published by Cosmopolitan Book Corporation.

Dairy Congress Delegates Honored With Degrees

CAP and gown paid honor to the dairy industry at Syracuse on October 8 when ten of the representatives of foreign governments and three prominent Americans, delegates to the combined World's Dairy Congress and National Dairy Exposition were given honorary degrees by the University of Syracuse.

Following a march across the University campus through an aisle of 6,000 students, delegates and faculty in academic costume assembled in Crouse College auditorium where the collegiate honors were bestowed from the hands of Chancellor Charles Wesley Flint. Henry C. Wallace, secretary of agriculture, representing the department of state, was given the degree of Doctor of Laws. H. E. Van Norman, California, professor of dairy management and author of several texts on dairying and president of the World's Dairy Congress Association, was awarded the same degree, and Frank O. Lowden, ex-governor of Illinois, was made a Doctor of Civil Law.

Among the foreign representatives honored were Dr. Longobardi of the International Institute of Agriculture, Rome, Italy, LL.D., and the Doctor of Science degree was bestowed upon Dr. Masayoshi Sato, contributor to scientific literature, representing Japan; Dr. Ch. Porcher, agricultural writer, France; Sir Arnold Theiler, director of veterinary education and research in the Transvaal, delegate from South Africa; R. Stenhouse-Williams of the National Institute for Research in Dairying, England; S. Orla-Jensen, editor of the Danish Veterinary Journal, Denmark; Dr. Robert Burri, bacteriologist, Switzerland; Dr. C. J. Hastings, medical officer of health for the city of Toronto, Canada; Gerald Leighton, Scottish Board of Health, and author of many publications pertaining to food inspection and preservation, Scotland; and Haakon Isaachsen, of the Royal Agricultural College, author of "The Breeding and Feeding of Livestock," represented Norway.

STATE FAIR WINNERS OF BOYS' AND GIRLS' DAIRY CLUB CONTESTS

Boys' and Girls' Dairy Club members participated in five contests this year at the state fair at Yakima besides showing cattle in the open classes.

The Holstein bull calf, donated by Governor Louis F. Hart to the best judge of Holstein cattle of all boys' and girls' dairy club members, who own Holstein animals, was won by Homer Mouncer of Elma, against Orris Seward, Yakima; Charles Lumpkin, Cowiche; Frances Hanson, Yakima; Gordon Brown, Spokane; Leland Duffield, Yakima; Helen Brown, Spokane; Peter Hendrickson, Chehalis; Warren Brown, Montesano; Chris Verstrate, Yakima; Homer Splawn, Cowiche... Lauris Hanson, Yakima; Arthur White, Cowiche, and Clarence Henderson, Yakima.

The Guernsey bull calf, donated by A. L. Gile of Chinook, Washington, to the best judge of Guernsey cattle of all boys' and girls' club members owning Guernsey animals, was won by Chester Schlein of Mabton against Philip Hitchcock, Sunnyside; Roscoe Angel, Mabton; Robert Bush, Outlook; Cecil Wilkins, Granger, and Charles Heil of Yakima.

The Jersey bull calf, donated by Waikiki Farm of Spokane, to the best judge of Jersey cattle of all boys' and girls' dairy club members owning Jersey animals, was won by Margaret Campbell of Spokane against Marie Tornay, Ellensburg; Clarence Swinth, Chehalis; Roy Brunsen, Ellensburg; Benjamin Ashew, Montesano; Joseph Tornay, Ellensburg; Chrissie Kuester, Milan, and Erling Hanson, Ellensburg.

The winners of the special prizes offered by the Holstein-Friesian Association of America and the Washington State Holstein Breeders Association for the best Holstein animals shown by boys' and girls' club members, were:

First — Leland Duffield, Yakima, with Miss Piebe Homestead Fayne.

Second—Cris Verstrate, with Ida Lyons Aaggie Hartog.

Third — Homer Splawn, Cowiche, with Hazelwood Ormsby Segis Kornbyke Posch.

Fourth — Orris Seward, Yakima, with Lumberlocke Segis Model.

Fifth—Arthur White, Cowiche, with Duchess Vessa Zobo.

The winners of the prizes offered by the State Fair Association for the Boys' and Girls' Dairy Club members raising highest in contests which included judging dairy cattle, testing milk, and showing their records kept on their animals, were:

First—Norman Refling, Snohomish.
Second—Chrissie Kuester, Spokane.
Third—Peter Hendrickson, Chehalis.

Country Women Are Natural Leaders

Grange and Farm Bureaus Grant Equality With Men

If you are looking for women leaders, look to the rural and outlying districts or towns of 2,000 or under in population. You will find them there on the farm or near by, at least in Ohio, says an Ohio woman.

Mrs. W. H. Gibson of Springfield, Ohio, who has been visiting in New York, speaks from a long experience on the state rural community committee of the Y. W. C. A. Work is organized in counties, and since no building headquarters are available, the development of the work is largely dependent upon the executive ability of the local women committee members.

"I believe that their grange and farm bureau experience is the source of their organized strength," she explained. "In state and county farm bureaus women are on an absolute equality with men, holding offices with them. Thus they have learned to work side by side, carrying responsibility. The W. C. T. U. may have had something to do with developing them."

Another interesting comment on farm women, or those living in rural districts, was made by Mrs. Gibson. "Girls leave home soon after they finish school," she continued. "Girls over high school age are scarcely to be found at least in any number. They go away to college or to normal schools. While the majority take up teaching, they usually accept positions in other localities than their own. Yet they must be overlooking business opportunities at their own door.

"Traveling in Ohio among very small towns, it is unusual to find women occupying important positions. The first woman to be elected president of a first national bank lives in a small Ohio town. She has been in the local bank since her early teens. In Morrow County the county treasurer is a woman. She has as neighbors several other women holding public office. In a county seat the court stenographer for 36 years has been a woman.

"In another small town the editor of the paper is a woman who succeeded her father. The general manager of three clothing factories located in three different towns is a woman. Almost without exception these are women with years of local business experience behind them, working their way up."

ABOARD THE "BARLING BOMBER"

When the "Barling Bomber," biggest and mightiest airplane in the world, lifted her 40,000 pounds from the ground at Garden City in the Aero Carnival for the Army Relief Fund on October 21, the spirit of Giovanni Carisi soared aloft in company with the great triplane. For it was under Carisi's hand that the monster aircraft came into being, and, to employ his own phrase, "in the motor of every airplane there palpitates the heart of its constructor."

This condor of the mechanical bird kingdom is "a native-born American," having come from the cradle of the Witeman-Lewis Aircraft Corporation at Hasbrouch Heights, N. J. But there is a big element of the international in her creation, the Foreign Language Information Service points out, conceived and designed by the English engineer Barling, sponsored at great expense by the United States government, it was not until the skill and enthusiasm of the Italian immigrant mechanic Carisi were applied to the task that theory was finally translated into structural fact. It is said that the government and the contracting corporation had both decided after many failures that Barling's plans were too difficult for execution, before the whole job of practical construction was turned over to Carisi, whose success is now recognized by aviators all over the world.

"For me," Carisi remarks, "the airplane has an unexplainable attraction. When I see a machine, to which I have devoted hours and hours of labor and thought, lift itself and fly through the air I am filled with uncontrollable joy. In the motor of every airplane there palpitates the heart of the constructor."

From the gigantic "Barling Bomber," with its 120-foot spread of triplicate wings, its six tons of gasoline fuel, and itsh minimum speed of 90 miles an hour, it is a far cry back to the "big bird" designed by Leonardo da Vinci and his insistence, as early as the year 1500, that flight was scientifically possible in a "heavier-than-air" apparatus. Yet "the first real hero of the air was an Italian," insists Il Corriere d'America, "for it is said that a mechanic who worked for Leonardo da Vinci attempted to fly on the apparatus they had constructed, and lost his life."

AWARDING PERMANENT COMPENSATION TO DISABLED VETERANS

Giving scores of disabled war veterans of the Pacific Northwest permanent pensions, the new move on the part of the United States Veterans' Bureau, establishing medical rating boards throughout the district for the purpose of awarding permanent partial disability ratings, is proving not only a benefit to the injured ex-service man, but will also be a money-saver for the government, according to L. C. Jesseph, Northwest district manager of the bureau.

More than 100 disabled veterans have already been given permanent partial disability ratings, meaning permanent compensation from the government and eliminating the need of periodical physical examinations, he stated. Approximately 2,000 men will be called in for examination before the rating boards finish their work. Boards have been named at Seattle, Tacoma, Spokane, Portland, Walla Walla and Boise.

"Disabled ex-service men receiving notices to report for examination before one of these boards should make it a point to do so at the time designated," said Mr. Jesseph. "This program of awarding permanent compensation in connection with partial disability ratings is one of the most important and far-reaching moves of the Veterans' Bureau since its formation. It relieves the mind of the injured ex-service man whose disability is of a permanent nature, because he will receive a permanent income ranging from $8 to $100 a month. The government administration costs will be lightened because the men will not have to be examined at stated times."

DOCTOR DISCOVERS NEW REMEDY IN DIABETES

Discovery of a new remedy for diabetes in the form of an artificial fat, based on theoretic chemistry and clinical experimentation, was announced recently at a meeting of physicians and nurses at Beth Israel Hospital by Dr. Max Kahn, associate in biological chemistry at the medical school of Columbia University.

The substance, known as intarvin, and developed in the Columbia laboratories, by Prof. Ralph H. McKee, Dr. Kahn reported, been used successfully in the cases of more than two dozen men and women sufferers in New York and Boston.

Intarvin, meaning literally "intermediate fat," is declared to be the first true oleomargarine the world has ever seen. The fat is made from margaric acid, and is essentially glyceryl magarate. A generation ago oleomargarine was made from cottonseed oil and tallow. It was thought to be glyceryl margarate, it was explained, and hence was given the name of oleo-margarine, or fat from margaric acid. However, it was later shown that this conclusion was based on an incorrect analysis and that instead it was essentially a mixture of glyceryl palmatate and glyceryl sterate, and was not a margarate at all. Accordingly, this intarvin is the first real oleomargarine.

"Though diabetes ha sbeen known for more than five centuries, yet," declared Dr. Kahn, "it is surprising that the only remedies which give promise of success—insulin intarvin —were both discovered within a single year."

Dr. Kahn disclosed the details of the development of intarvin in an exhaustive paper entitled "Odd Carbon Fats in the Treatment of Ketosis," read at a meeting called by the medical staff of Beth Israel Hospital, the largest Jewish hospital in the country. Dr. Kahn is director of the department of laboratories and chief of diseases of metabolism at Beth Israel and a member of the American Chemical Society.

WORLD NEWS

William A. Bergman, a young man of 18, of Denver, was killed while hunting ducks near Deer Trail, Colo., when he was struck by a charge from a shotgun when alighting from an automobile.

W. D. Holliday of Magrath threshed a crop of 53 bushels to the acre on 65 acres. It weghed 66 pounds to the bushel, and graded No. 1 Northern. The elevator man at Magrath who handled it states that it is the best wheat ever handled at that point. The record for high yields is now held jointly by Magrath and Raymond for 1923.

A total of 5,900,000 bushels of grain has already been booked for movement through Vancouver to Europe, England and the Orient, according to a statement prepared by the Vancouver Merchants' Exchange. Approximately 2,000,000 bushels' space has been booked for October loading alone.

A dispatch from London states that a number of cattle from the Prince of Wales' ranch were included in a large consignment of Canadian cattle which reached Cariff recently. There appeared to be a keen demand for the consignment, and 150 head were dispatched to Norfolk farmers by special train.

In order to accommodate people from all parts of the country, who are desirous of seeing the big Messrs. Shubert musical revue, "Artists and Models of 1923," at the Shubert Theatre, New York, the Shuberts have placed seats for this attraction on sale ten weeks in advance.

An Echo From the Great World War

Memorial services were held recently in London in memory of Edith Cavell, the heroic English nurse, who was shot in Brussels by the Germans during the war. She was shot, protesting her innocence of espionage, with which crime she was charged, but admitted having helped refugees to escape. Just north of Trafalgar Square, an imposing statue to the nurse was garlanded with wreaths and floral tributes. The Belgian ambassador, members of the embassy and consular staffs attended the memorial services, with thousands of the public participating.

People are learning to pass on to their neighbors better farm and home practices through fairs, competitions and demonstrations.

NEW YORK NEWS LETTER

By Carol Colbourne

New York.—Straws blown by Fashion's wind:—Moire vanity cases have white linings and velvet handles in bracelet effect, with onyx and marcasite ornament.—The newest colors in kid gloves are beige, black and white, embroidered with contrasting colors. Velvet printed in turquoise and silver is one of the new fabrics for evening wear. Skirt lengths for street are eight inches from the ground, for afternoon they are a trifle longer and for evening are ankle length. Imported butterfly pins of rhinestones set in black O—enamel decorate either gowns or hats. Cut steel buckles adorn satin or patent leather slippers and suede oxfords have trimmings of perforated patent leather.

"Yes we have no bananas." Who says New York has not a tropical climate with a dozen banana trees full of nearly ripe fruit in Central Park greenhouses at Fifth Avenue and One Hundred and Sixth Street.

To paraphrase an old title "New Wives for Old" is now not only a possibility but a fact daily realized. One might also say that "society is changing its face." The fact is that with the great recent developments in plastic and cosmetic surgery, New York society women who are not content with the quantity or type of beauty allotted to them are resorting to the surgeon to give them Grecian noses, rosebud mouths, ears that cling closer to the head, beautifully shaped eyebrows and every other detail of facial beauty. Dr. J. W. Amey, of 306 W. 75th St., New York, is one of the pioneers in this craze for new faces. His arduous task is to remedy such irregular effect from an irregular alignment of the eyebrows to that conglomerate facial cataclysm that "only a mother could love". Snub noses, camel noses, broken noses; the double chinned and the chinny, other big-foot, and from it emerge Venuses, Hebes, and Dianas, even the goddesses of the Pantheon to chide a forgetful world.

The male portion of the population, usually hopelessly conservative, and perhaps a little jealous, has fallen into line with unusual complaisance. Soon one may expect the pulchritudinous types of the great illustrators to appear in every drawing room and on every golf links.

"Beauty is an asset and facial malformations are liabilities, that is the explanation of it all," said Dr. Amey in one of his few free moments.

"After all, nothing adds more to the happiness of the average man and woman than the knowledge of a pleasing appearance. It increases self reliance, efficiency, and good temper. Men seem to be quite as insistent as women in this regard. After all; however often we may say it; we do not believe that 'beauty is only skin deep.''.

The latest device for a cigarette holder is a solid silver lotus flower enamelled in Chinese red, gold and green. Other charming trifles from Paris are black moire handkerchief cases and clasp marcasite. The bands accentuate the whiteness of the neck today as in 1830 and match the moire bracelet.

In the center of Union Square in the heart of old New York nestles a little green spot, an acre or so, grudging flower and vegetable garden, which brings to every passer by memories of the old homestead. The trellised entrance is flanked by tall clumps of blue larkspur and golden glows while old fashioned flowers, geraniums, Burbanked zinnias, cornflowers, calendulas and bee balm border every bed. Corn, beans, peas, tomatoes, celery, peppers, parsley, onions and potatoes rub elbows in orderly and amiable fashion, keeping a strangle hold on every encroaching weed. All vegetables are free and the beets are anything but dead. This carefully tended demonstration garden is the pride of the Park Commissioners and its intensive cultivation is a living lesson in Americanization. Hobo and Highbrow alike pause and take a look and no bench is ever empty around this little spot.

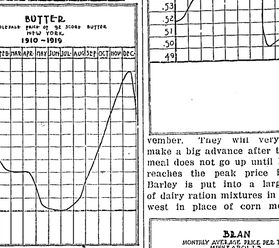
—Mary Agnes Hamilton.

Buy Your Dairy Feed At The Proper Time

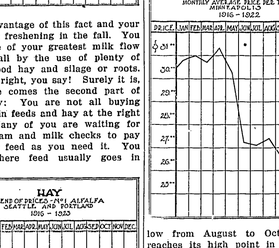
By R. M. Turner, Assistant Director State Extension Service, Washington.

MANY of our farm granaries are not used to their fullest extent or to advantage. You dairymen can make a really substantial saving in all the feed you buy if you get it and feed it at the right time. That's where the granary comes in.

Feeding and buying are two big subjects. The first is illustrated in the chart on the wholesale prices of butter by months. Butter and milk are cheaper from May to August and reach their peak price during October to December. Many of you have taken advantage of this fact and your cows are freshening in the fall. You get some of your greatest milk flow in the fall by the use of plenty of grain, good hay and silage or roots.



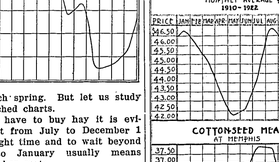
That's right, you say! Surely it is, and here comes the second part of the story: You are not all buying your grain feeds and hay at the right time. Many of you are waiting for your cream and milk checks to pay for your feed as you need it. You know where feed usually goes in the spring. But let us study the price charts.

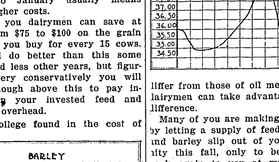


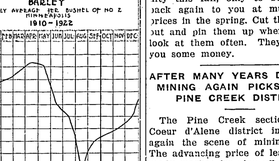
If you have to buy hay it is evident that from July to December 1 is the right time and to wait beyond that time. January usually means much higher costs.

All of you dairymen can save at least from $75 to $100 on the grain and hay you buy for every 15 cows. You will do better than this some years and less other years, but figuring it very conservatively you will make enough above this to pay interest on your invested feed and granary overhead.

The College found in the cost of milk figures in four Western Washington counties that it took about 1,062 pounds of grain, a ton and an eighth of hay, a ton and two-fifths of succulents, and 186 days' pasture to produce 6,000 pounds of milk, which is the yearly production of milk from many of your cows.



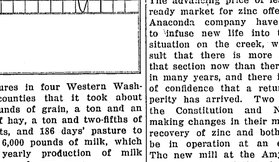




Take an ordinary mixture of grain made up of barley, oats, millrun, and oil meal of 1,062 pounds, which this 6,000-pound cow will consume in a year, and a ton and an eighth of hay. You will grow your own succulents. If this material were bought during the low points in the market rather than the higher points, on the average about $8.28 would be saved on this cow's feed. For 15 cows this would be about $124. But a part of this feed will be consumed during the period of low prices so we will have to cut this down to at least $100 saving.

Again let us examine some of these charts. Bran can usually be bought to advantage from June to October, and during your heavy feeding months of December to April it moves at a higher figure.

Oats should be in every dairy feed, if not too high. Put in your supply during September, October and November. They will very probably make a big advance after that. Corn meal does not go up until March and reaches the peak price in August. Barley is put into a large number of dairy ration mixtures in the Northwest in place of corn meal. It is low from August to October, and reaches its high point in April.



Oil meal hits the low mark in May and June and is highest in August and January. Cottonseed meal is low in September, October and February and March. These low points differ from those of oil meal and you fairymen can take advantage of this difference.

Many of you are making a mistake by letting a supply of feeds like oats and barley slip out of your community this fall, only to be freighted back again to you at much higher prices in the spring. Cut these charts out and pin them up where you can look at them often. They will save you some money.

AFTER MANY YEARS DULLNESS MINING AGAIN PICKS UP IN PINE CREEK DISTRICT.

The Pine Creek section of the Coeur d'Alene district in Idaho is again the scene of mining activity. The advancing price of lead and the ready market for zinc offered by the Anaconda company have combined to infuse new life into the mining situation on the creek, with the result that there is more activity in that section now than there has been in many years, and there is a feeling of confidence that a returning prosperity has arrived. Two companies, the Constitution and Nabob, are making changes in their mills for the recovery of zinc and both expect to be in operation at an early date. The new mill at the Amy-Matchless is nearing completion for which a carload of machinery arrived at Kellogg last week, and is now being transported to the mine. Leasers are shipping from the Highland-Surprise, and it is probable that the output will soon be increased by disposal of the zinc product to the Anaconda. These conditions have naturally given substantial encouragement to development, with the result that Pine Creek is now a very busy section.

Miss Hagers, a University of Washington girl, won premier honors at the horse show held at Everett recently. She rode Jack Tar, owned by Clyde Walton, and received the silver trophy for the best horsewoman.

World's News

At Saginaw, Mich., a passenger train struck an automobile at a grade crossing and killed six persons.

Lloyd George, in his speeches in America, reiterated again and again that Europe is completely exhausted as a result of the great conflict.

A native of England holds the world's motor speed record. Driving a 350-horsepower car, he attained a speed of 126 miles an hour.

Antiquated and unbusinesslike methods, to which the government clings, are losing France between eight and 10 million francs annually, according to a report of the committee on economics.

Public opinion in America and Great Britain has induced the minister of the interior to withdraw his announcement requesting all welfare mission workers in Poland to leave the country by December 1st.

During the last 12 months in the United States, 400,000 new customers have been added to the service mains of the different gas companies in the country.

Dennis Sheedy, a cattleman and mine operator, later a banker in Denver, recently died at his home in Denver. He was 77 years old and was widely known throughout the west.

Dr. Steinmetz, who is considered one of the greatest electrical experts in the world, is seriously ill at his home in Schnectady, N. Y. Overexertion during his journey across the continent and his continuous speeches at various public functions are blamed for his illness.

Ella Cutting, now in his 87th year, residing at Cedar Rapids, Iowa, a retired railway employe, was a member of the famous Eleventh Hussars, of Queen Victoria, from whose ranks were recruited the 600 troops which made the "Charge of the Light Brigade" at the Battle of Balaclava, in the Crimea, fought 69 years ago.

Fifty feet underground, men working on the foundation of the New York Telephone Company, came upon the hulk of an old vessel, about the size of a canal boat. While digging out the hulk, the men found several rare American coins, dating back to 1780. Another find was that of a ram's head, with horns attached, 12 feet below the hulk.

Two battleships, the "Hood" and "Ronlse," two of the largest battleships of the British Navy, with a light cruiser squadron, will sail during next month on a tour of the Empire. They will go south by way of Africa to Singapore, thence to Australia and New Zealand and British Columbia, where they are expected to arrive in June. From there they will proceed to Halifax and Quebec, by the Canada canal, while the light cruisers will visit South America. Several calls will be made at United States ports.

Indicative of a tremendous crop and smooth working facilities for transportation of the harvest, loading and marketing figures for October 9, the Canadian Pacific and other railways say before handled at that point. The record for high yields is now held jointly by Magrath and Raymond for 1923.

Chipawa's sixth power unit will be opened a month ahead of schedule, in December, according to an announcement made by the Hydro Power Commission. With the sixth unit the Chippawa will be equipped to turn out continuously a maximum of about 360,000 horsepower, as compared with the present maximum of from 250,000 to 300,000. The additional power will be needed for Ontario's industries and homes.

Logging operations will be brisk in the North this year, one company, the Northwest Lumber Company, laying plans to cut 30 million feet. They cut 16 million feet this year. This company operates at Edmonton one of the most modern lumber mills in Canada.

A system of education by mail for those who live in remote rural districts out of reach of rural schools, is being prepared by Hon. Perron Baker, minister of education, to go into effect this month. The working plan has already been drawn up to run through the winter to the end of the school year. It is expected that from 20 to 40 lessons will be given in the case of each applicant for the service.

A new clay product factory has been erected in South Vancouver by a company from Seattle. They are producing flower pots, an article which heretofore has been imported from Ontario and Alberta. The plant has a capacity of 80,000 flower pots at one baking. The raw material—clay and a small portion of sand—is obtained from Fort Haney and the Fraser River.

Idaho News

Earl Sande, who rode Zev to victory against the English horse Papyrus, is a Northwest boy. His parents recently moved to Salem, Ore., from Idaho, where Sande was born and raised.

William Weigle, 17, of Wallace, Idaho, was found dead one mile from Sunset. He had gone on a hunting trip, and, failing to return, was sought and found with a bullet hole through the breast and wrist. The accident occurred while the young man was climbing over a fence.

To supply the necessary help and thus save a large crop of beans valued at more than $2,000,000, the high school of Twin Falls, Idaho, closed the middle of October to allow the students to enter the harvest field. Help is also needed to harvest the beet, onion and apple crops, all of which are very heavy this year. Twin Falls is in that section of Southern Idaho that was hard hit during the years of depression but that is now fast recovering.

Suit for $35,000 damages has been filed against the Idaho Power Co. at Boise by Helen Moreland and her infant son, Alfred, for the death of the husband and father, Jessie Moreland, who met his death last July by a down high-powered wire belonging to the power company. The wife asks $20,000 damages for herself and $15,000 for her infant son.

D. W. Munger of Twin Falls is seeking the whereabouts of his 16-year-old son, Milford, who recently disappeared from his home without notifying his parents of his intention to leave, or where he was going. Request is made that any information regarding the boy be sent to the father or to John R. Ault, County Probation Officer.

Two carloads of fine purebred Jersey and Shorthorn cattle have been ordered by the Idaho Live Stock Breeders' Association, mostly to fill orders from stockmen in Ada County.

Idaho has had its first conviction on a felony charge of issuing a fictitious check. It was recorded in the District Court at Twin Falls when the jury returned its verdict of "guilty," finding Glenn France guilty of signing a fictitious name—R. O. Hillbern—to a check for $12.50. An appeal is to be taken to the Supreme Court.

A maddened bull attacked Mrs. John Erickson, the wife of a rancher at Nawpa, trampled upon her, fracturing her leg.

Prof. F. G. Miller, dean of the Department of Forestry, University of Idaho, has recently received an inquiry relative to the correspondence course in Forestry, from a Government official on the Island of Cyprus. This correspondence course in Forestry, so far as has been reported, is the only course of its kind offered by a State University. The letter was written by Constant J. Autoniades, officer in charge of the Paphos forests on the southwest coast of Cyprus. The writer in his letter stated that he had been in correspondence with the United States Department of Forestry and had been recommended to write the University of Idaho as being the only University offering such a course.

EDUCATORS TO HOLD STATE MEETING

In preparation for the annual meeting of the Idaho State Teachers' Association to be held in Pocatello during the Thanksgiving holidays, a committee meeting was held recently. Supt. R. H. Snyder of Idaho Falls, president of the state association, was present. Superintendent Bloom of Blackfoot and Principal Crawford of Idaho Falls high school also attended.

President Snyder estimates the attendance at this year's meeting of Idaho teachers at 1000. Several superintendents of adjacent counties are planning to call special meetings of their teachers at that time and make the state meeting take the place of one of their local gatherings, which will swell the attendance of the state association.

IDAHO SCHOOLS IN FINE CONDITION

School conditions in north Idaho are excellent, according to Miss Elizabeth Russum, state superintendent of public instruction, who has just returned to Boise from a month's inspection trip. Miss Russum visited many of the high schools of the north counties but devoted most of her time to the elementary schools.

"I found all the schools I visited in fine financial condition. Also I found some of the schools closed for the apple picking season. The programs in the elementary schools are up to date and in accord with policies of the state department of education. It is the department's aim to see that pupils get the instruction that is necessary to their advancement. For instance, schools are not permitted to teach high school subjects in part. This only disrupts a pupil's actual high school work when he gets to it, if the more advanced work is attempted it must be thorough and comply with state regulations for high school."

IDAHO LEADER CALLED TO NEW FIELD

To accept a position under the higher salary scale of another state, Miss Amy Kelly has resigned her position as state leader of home demonstration work in Idaho after ten years of service, according to announcement by President A. H. Upham. She will become state leader of home demonstration agents in Kansas. Miss Kelly has been home demonstration work in Idaho developed from its infancy. During the period of the World War she was one of the leaders in the Idaho food conservation program, says the Star-Mirrow.

"Miss Kelly has been offered and has accepted the position of leader of home demonstration work in the Kansas Agricultural College of Manhattan, Kan.," says President Upham's announcement, "and has presented her resignation, effective November 15. The salary that will be paid Miss Kelly in Kansas, approximately one-third more than she has been receiving in Idaho, makes it impossible for this state to retain her services. In presenting her resignation she states that she is leaving Idaho with very great regret."

Regrets Leaving Idaho

In her letter of resignation addressed to Dean E. J. Iddings of the College of Agriculture, who is acting director of extension, Miss Kelly said:

"It is with a very great deal of regret that I leave Idaho and all of the fine associations I have had here. My work has been very pleasant and I have enjoyed fully the association with many of the people I have had in the past ten years. It has been with a great deal of satisfaction that I have seen the work grow from a small department of five to a statewide organization and it is also with much gratification that I have seen the many accomplishments that the extension service has been able to make in the development of agriculture and home economics.

Starts Work in 1913

Miss Kelly's work with women in Idaho dates from 1913 and since that time she has assisted in organizing nutrition, clothing, canning, home management programs of work and under her leadership home economics workers in the extension service have come in contact with thousands of Idaho homes. Miss Kelly has addressed groups of women and conducted demonstrations in nearly every farming section in Idaho. She organized the program for extension work for women when the Smith-Lever act became operative in Idaho in 1914.

While Kelly's many Idaho friends are appreciative of her services and their best wishes go with her to her new field of work in Kansas," said Dean Iddings.

FARMERS VS. LABOR

Translated into food, at the prices the farmer gets, it takes 63½ dozen, or 762 eggs, to pay a plasterer for one day of eight hours' work in New York City. It takes 17½ bushels of corn, or a year's receipts from half an acre, to pay a bricklayer one day. It takes 23 chickens weighing three pounds each to pay a painter for one day's work in New York. It requires 42 pounds of butter, or the output from 14 cows, fed and milked for 24 hours, to pay a plumber $14 a day. To pay a carpenter for one day's work it takes a hog weighing 175 pounds, representing eight months feeding and care.

In the light of those facts what interests have farmers and laborers in common?

"A manicurist is always in attendance to care for the hands of the maidens who work in the de luxe food plant of the Beechnut Packing Company at Canajoharie, New York.

VARIETIES OF APPLES—WHEN THEY ARE BEST

By E. F. Benson,
Manager Department of Immigration and Industry
Northern Pacific Railway

October 31 has been designated as Apple Day for the nation, and the week following this day is to be Apple Week. There is a great deal of valuable information about American apples which most of us do not know. Apple Week will call some of this information to our attention.

Not every housewife, for instance, is able to distinguish between the different varieties of apples or know the seasons during which different varieties should be used.

More than one thousand varieties are grown in the United States. The great commercial orchards of the Northwest produce less than two dozen varieties and efforts are being exerted to reduce this number to about one dozen.

Each Variety Has Own Virtues

Some apples lacking in flavor as dessert apples are very good for baking. This is especially true of the Rome Beauty a good apple for baking from October to February, and Arkansas Black, February to June. Some of the best cooking apples are not especially desirable for eating, and vice versa.

The Gravenstein, a fall apple (September and October), is probably the best apple on earth for sauce and pies but is not considered highly as a dessert apple, and the Delicious, doubtless the most popular dessert apple, is not especially good for cooking. Unless kept in cold storage its season is usually October and November. It is sub-acid and inclined to be sweet. All children are fond of it and many grown-ups think it has no equal.

The Esopus Spitzenberg is probably the highest quality and most generally liked apple in the United States. Its natural season is from Thanksgiving to New Year's. It is generally regarded as unprofitable to the grower as compared to other varieties. It is the only apple we grow commercially which the American Pomological Society rates at 10 flat, (perfection).

The Jonathan precedes the Spitz (September, October and November) and the Winesap follows, December to June inclusive. These varieties are both good eating and cooking, and constitute more than one-half of all the commercial orchard production of the west.

Americans Like Red Apples

All the above are red apples and that seems to be what the public wants, but of all the apples grown the Yellow Newtown Pippin, called in Virginia the Alermarle Pippin, is the apple for use from January to June, inclusive. It is crisp and juicy, equally good for dessert, for baking, for sauce and for pies. It is rated by the American Pomological society as 9 to 10. It is probably the most popular American apple in England and the Orient. The only reason it is not more popular in this country is because it is yellow and not red.

The Baldwin, Rhode Island Greening and Northern Spy, three of the most popular apples of the east, are not successfully grown in the west. The Baldwin spot or bitter pit impairs the keeping quality of the Baldwin and makes it unprofitable. The Rhode Island Greening matures in the fall instead of being a late winter keeper as in New England.

Should Eat Apples In Their Seasons

"An apple a day keeps the doctor away," but if apples are eaten out of season—for instance a Spitz in October, when it's hard as a rock, or a Jonathan in January, when it's mushy and spoiled, we do not do them justice. A better appreciation of varieties and seasons would increase the use of this greatest fruit on earth to the benefit of the user, the grower, the dealer and the carrier.

If you like apples—and every one does—take these facts as a guide for the buying of your winter supply. The seasons I have given for each variety are for common storage. Artificial cold storage prolongs the season and the fruit grown at high altitudes will have a longer or later season than these I have given.

A Helpful Hint

"Our chautauqua closed last week with nearly $100 deficit," related the landlord of the Petunia tavern. "A number of our leading citizens guaranteed it and had to stand the loss. Week before last a medicine show was here, and left town about $400 to the good. That's the way it always goes."

"Well, then," answered the low-browed guest, "why not suggest to your leading citizens that they hold a medicine show each year? It would do the public as much good as a chautauqua and pay said leading citizens a profit."

Your Account

will be welcome at the

First Bank of Genesee

and you will have the satisfaction of dealing with people that desire to help you in every reasonable way, yet with no thought or desire to be other than a helper.

We operate both commercial and savings departments, issue exchange of all kinds, both domestic and foreign, make loans on real estate, write all kinds of insurance—in fact we are here to do everything a good, live and responsible bank should do.

In the District Court of the Second Judicial District of the State of Idaho, In and For the County of Latah

Louise Tierney and W. J. Tierney, her husband, plaintiffs,
vs.
Katherine Evits and the unknown owners of or claimants to the following described premises situated in Latah county, State of Idaho, to-wit: The southeast quarter of the northwest quarter (SE¼NW¼) of section seven (7) in township 37 North of Range 5 West of the Boise Meridian, containing 40 acres more or less; and also a strip of land along the south side of the north half of the northwest quarter of secton seven (7), township 37 north of range 5 W. B. M., in the northwest quarter of the northwest quarter and the northeast quarter of the northwest quarter of said section seven (7), described as follows: Beginning at a point 261.7 feet south and 41.3 feet east of the northwest corner of section seven (7), township 37 north of range 5 W. B. M., and running thence east on a line parallel to the north boundary of said section seven a distance of 2598.7 feet to the quarter section line between the east and the west half of said section seven, thence south on the quarter section line a distance of 1058.3 feet to the one-sixteenth corner; thence west on the one-sixteenth section line 2640 feet to the intersection of the west line of said section seven, said line being the range line between ranges five (5) and six (6) W. B. M., thence north, on the range line 1016.5 feet; thence north 38 degrees 57 minutes east a distance of 66.4 feet to the place of beginning, said strip of land containing 64.089 acres, more or less; and also a piece of land lying in the southwest quarter of the northeast quarter of section seven, township 37 north of range 5 W. B. M., described as follows: Beginning at the northwest corner of the southwest quarter of the northeast quarter of said section seven (7), and running thence east along the one-sixteenth line a distance of 185.4 feet; thence south 8 degrees 00 minutes west a distance of 1333 feet to the quarter corner in the center of said section seven; thence north 1320 feet to the point of beginning, said piece of land containing 2.809 acres, more or less, the above named defendants:

You are hereby notified that a complaint has been filed against you in the District Court of the Second Judi-cial District of the State of Idaho, in and for the county of Latah, by the above named plaintiffs of the nature in general terms as follows: To obtain a decree of this court quieting plaintiff's title to the southeast quarter of the northwest quarter (SE¼NW¼) of section seven (7) in township 37 north of range 5 West of the Boise Meridian, containing 40 acres, more or less; and also a strip of land along the south side of the north half of the northwest quarter of section seven (7), township 37 north of range 5 W. B. M., in the northwest quarter, of the northwest quarter and the northeast quarter of the northwest quarter of said section seven (7), described as follows: Beginning at a point 261.7 feet south and 41.3 feet east of the northwest corner of section seven (7), township 37 north of range 5 W. B. M., and running thence east on a line parallel to the north boundary of said section seven a distance of 2598.7 feet to the quarter section line between the east and west half of said section seven, thence south on the quarter section line a distance of 1058.3 feet to the one-sixteenth corner; thence west on the one-sixteenth section line 2640 feet to the intersection of the west line of said section seven, said line being the range line between ranges five (5) and six (6) W. B. M., thence north, on the range line 1016.5 feet; thence north 38 degrees 57 minutes east a distance of 66.4 feet to the place of beginning, said strip of land containing 64.089 acres, more or less; and also a piece of land lying in the southwest quarter of the northeast quarter of section seven, township 37 north of range 5 W. B. M., described as follows: Beginning at the northwest corner of the southwest quarter of the northeast quarter of said section seven (7), and running thence east along the one-sixteenth line a distance of 185.4 feet; thence south 8 degrees 00 minutes west a distance of 1333 feet to the quarter corner in the center of said section seven; thence north 1320 feet to the point of beginning, said piece of land containing 2.809 acres, more or less, defendants.

SUMMONS

The State of Idaho sends greeting to Katherine Evits and the unknown owners of or claimants to the following described premises, situated in Latah county, State of Idaho, to-wit: The southeast quarter of the northwest quarter (SE¼NW¼) of section seven (7), in township 37 north of range 5 West of the Boise Meridian, containing 40 acres more or less; and also a strip of land along the south side of the north half of the northwest quarter of section seven (7), township 37 north of range 5 W. B. M., in the northwest quarter of the northwest quarter and the northeast quarter of the northwest quarter of said section seven (7), described as follows: Beginning at a point 261.7 feet south and 41.3 feet east of the northwest corner of section seven, township 37 north of range 5 W. B. M., and running thence east on a line parallel to the north boundary of said section seven a distance of 2598.7 feet to the quarter section line between the east and west half of said section seven, thence south on the quarter section line a distance of 1058.3 feet to the one-sixteenth corner; thence west on the one-sixteenth section line 2640 feet to the intersection of the west line of said section seven, said line being the range line between ranges five (5) and six (6) W. B. M., thence north, on the range line 1016.5 feet; thence north 38 degrees 57 minutes east a distance of 66.4 feet to the place of beginning, said strip of land containing 64.089 acres, more or less; and also a piece of land lying in the southwest quarter of the northeast quarter of section seven, township 37 north of range 5 W. B. M., described as follows: Beginning at the northwest corner of the southwest quarter of the northeast quarter of said section seven (7), and running thence east along the one-sixteenth line a distance of 185.4 feet; thence south 8 degrees 00 minutes west a distance of 1333 feet to the quarter corner in the center of said section seven; thence north 1320 feet to the point of beginning, said piece of land containing 2.809 acres, more or less, defendants, and you are hereby notified that unless you so appear and answer said complaint within the time herein specified, the plaintiff will take judgment against you as prayed in said complaint.

Witness my hand and the seal of the District Court of the Second Judicial District of the State of Idaho, in and for Latah County, this 27th day of October, A. D. 1923.

HARRY A. THATCHER, Clerk.
By ADRIAN NELSON, Deputy.
[SEAL]
GEO. G. PICKETT,
Residence Moscow, Idaho,
Attorney for Plaintiffs. 18-6

Notice

Notice is hereby given that on Saturday, December 1st, 1923 at Genesee, Idaho, in the Genesee Highway District, County of Latah, State of Idaho, an election will be held to elect three commissioners of the said Genesee Highway District, for a term of four years at which election the polls shall be open at 8 o'clock a. m. and continue open until 7 o'clock p. m. of the same day.

Dated this 31st day of October, 1923.

DONALD BRESSLER
Clerk of the Board of Highway Commissioners, Genesee Highway district. 18-3

The latch string swings outward only to those who pull it in moderation.

A Good Thing—Don't Miss It

Send your name and address plainly written together with 5 cents (and this slip) to Chamberlain Medicine Co., Des Moines, Iowa, and receive in return a trial package containing Chamberlain's Cough Remedy for coughs, colds, croup, bronchial, "flu" and whooping cough, and tickling throat; Chamberlain's Stomach and Liver Tablets for stomach troubles, indigestion, gassy pains that crowd the heart, biliousness and constipation; Chamberlain's Salve, needed in every family for burns, scalds, wounds piles, and skin affectations; these valued family medicines for only 5 cents. Don't miss it.

Special Notice

KINDLY accept this little reminder in the spirit of fairness that prompts us to call your attention to your account or note which is past due. We feel assured it will receive your prompt attention.

MEYER & SON

Clover Coming To Front

A complete change in agricultural activity in the Inland Empire is not far distant and clover is going to be one of the principal elements in the change, believes David Brown, vice president of the Hazlewood company of Spokane. An empire that ranks first in the United States for the production of eggs, butter and milk is inevitably to surround Spokane, is the conclusion arrived at by the manufacturer after years of watching the developments and taking active part in fostering the growth of this vast section.

In the Okanogan, throughout the Colville valley, on the sloping hills of the Priest lake country and to St. Maries on the south producers are solving the feed question with clover and are gradually learning how to handle big increases in their production.

Short Undertaking Company

Parlors at Genesee and Moscow. Prompt attention given night or day calls. Embalming and auto equipment furnished all funerals without extra charge. Full line of caskets at both places. At Genesee call George Schlerth at the Genesee Hotel.

"Courtesy and Service" is our motto. We relieve you of every care. 14-tf

LOOK at the way Goodyear Tire prices have been kept consistently lower than the average for all commodities. Then think of the improvements represented by that finest of all Goodyears, the new Goodyear Cord. Despite this, prices are 37% lower now than in 1920, and 30% lower than in 1914. This is the time to buy Goodyears.

As Goodyear Service Station Dealers we sell and recommend the new Goodyear Cord with the broaded All-Weather Tread and back them up with Standard Goodyear Service

Her Chance for Feathers

Mr. Hicks was in a bad temper as he sat down to supper.

"I wish I was an ostrich," he exclaimed, as he tried to eat one of his wife's cakes, but couldn't.

Mrs. Hicks wasn't going to stand this insult to her cooking.

"Yes, I would you were," she replied. "Perhaps I'd get a few feathers to put on my last year's hat then, and make it look decent."

Chamberlain's Tablets Have Done Her a World of Good

"Chamberlains Tablets have done me a world of good," writes Mrs. Ella L. Button, Kirkville, N. Y. "I have recommended them to a number of my friends and all who have used them praise them highly." When troubled with indigestion or constipation, give them a trial and realize for yourself what an excellent medicine it is. Sold at Clark's Drug Store.

THE GENESEE NEWS

VOL. XXXV — GENESEE, LATAH COUNTY, IDAHO, FRIDAY, NOVEMBER 9, 1923. — NO. 19

PUBLIC SCHOOL NOTES OF MUCH INTEREST

By Estel Rogers

"What's wrong with our Public School System?" Is there anything wrong? If so, what is it? On Friday last week Pastor Barrington answered this question in a very explicit and convincing way. He pointed out very plainly that under the present system we are trying to do too much; we are trying to learn something about many things, and as a result do not get very much out of anything. In many cases high school graduates are deficient in the common and most used subjects. The blame for this situation, according to Mr. Barrington, cannot be laid on the instructors, boards, or state educational authorities, because they are simply a part of the big educational wheel of the nation. But the blame can be laid on the national educational authorities for they have the power to change things if they choose. The best plan seems to be to adopt a national curriculum, or a uniform course of study. It is also suggested that this course of study eliminate some of the many subjects now being taught and should place more stress on the common fundamentals of education.

On Wednesday of last week Miss Lela Patch entertained and instructed the school by playing several selected musical compositions on the Victrola and by giving a brief biography of the author of each. The records were as follows: Traumeir, by Schumann; Humoresque, by Dvorgk; Bird Imitations, by Margaret McKee. The selections were greatly enjoyed and appreciated by the students.

The idea that girls do not need physical development is rapidly becomming an idea of the past; that is, at least in our high school, for the girls have recently organized an athletic association and are going into their work with enthusiasm. They are planning on taking several hikes in the near future and a little later they will organize a basket ball team. The officers chosen for this year are: President, Olive Mulalley; vice-president, Agnes Johnson; secretary and treasurer, Margaret Becker; basket ball captain, Oma Castle; manager, Miss Marie Hummel.

The high school takes pride in announcing that one of its members, Sylvia Johnson, has been awarded the honor of writing the best essay in the county, on the subject "Why Immigration Should Be Stopped for the Next Five Years." This essay was printed some time ago and you will probably recall the arguments and ideas that it conveyed. The essay will next be sent to the state judges and if classed as first there, it will be sent to the National American Legion headquarters to compete for first place in the nation.

Officials report that the proceeds of the Thomas Elmore Lucey entertainment were $120. That means that approximately sixty dollars was made by the high school. The entertainment may not have been as good as can be secured, but it was as good as you can get anywhere for the price we paid for it. For a first-class entertainment you will pay all the way from $200 to $250, while we only paid $50 for this one. Some time before the entertainment a campaign was started in the high school for the purpose of seeing which class could sell the most tickets. As a result the sophomores ranked first, seniors second, juniors third, and freshmen fourth. The program presented by Mr. Lucey was composed of songs, character sketches, stories, and character impersonations. Two of the most widely known characters which were impersonated by Mr. Lucey were Abraham Lincoln and Edgar Allen Poe. The one of Poe was especially good. One thread of thought which seemed to extend throughout the entire program was the importance of developing brotherly love, harmony, patriotism and unity. Mr. Lucey is helping to bring about peace and harmony by working with the common people.

As the school is working for the beneft and progress of the child and as health is very essential to progress, it seems very fitting and proper that the school should adopt some plans by which it can help the students develop healthy bodies and minds. In accordance with this idea a plan has been adopted called the "Modern Health Crusades." Each grade student will be presented a chart on which is listed a number of health chores which are to be observed each day. It is hoped that the parents will cooperate with the school in seeing that these chores are put into operation. No record of the child's observance of these rules will be kept by the teacher for it is hoped the parents will take this responsibility.

The sophomore party held at the home of Agnes Sweeney last Saturday evening was reported a complete success by every one who attended it.

The seniors held a party at the home of Miss Sylvia Evans last Wednesday evening which, from all reports, was a very well spent evening.

Adelene and Evangeline Foster entered the Genesee public school last week as students of the eighth grade.

The eighth grade held a class meeting Monday night after school to organize their class. The following officers were elected: President, Roy Cameron; vice-president, Bernice Nordby; secretary, Elvan Hampton; treasurer, Marvin Hickman.

Hazel and Ida Foster entered school October 29 as fourth and fifth grade students.

Geraldine Bumpass entered school November 5 as a fifth grade student.

Mrs. George Boliou has made a splendid gift of a six-volume set of Ellis's History of the United States, comprising about 2345 pages of good references, readings, and illustrations, to the Public School library. The illustrations contained in this set are especially interesting and will prove a real source of information to the students of American history. The printed historical material is of good standard quality, written in an interesting and readable way that does not become tiresome in the reading. Details of various incidents described are quite complete and all around we feel quite proud of our new addition to the library. The high school wishes to extend to Mrs. Boliou its heartiest appreciation and many thanks for this wonderful and thoughtful gift.

Game Protective Association Meets

The November 2nd meeting of the Genesee Game Protective association, held at the office of W. W. Burr, was attended by a few of the local rimrods and desciples of Izak Walton. What the meeting lacked in numbers was made up in "pep" and enthusiasm and a short and snappy business meeting resulted. In a previous meeting plans were made to secure a suitable badge or button to be worn by the members of the organization but it has since been determined that these emblems would be more expensive than the funds available would warrant and the matter was dropped.

It was then decided that these funds should be used for the actual protection of game birds by the provision for a small bounty to be placed upon certain members of the bird and beast tribes. Until further notice a bounty of five cents will be paid for each head of magpie, crow or raven, all hawks with the exception of the so-called sparrow hawk, large owls, and weasel. No bounty was ofered on coyotes.

It is true that these bounties are not large and they cannot be paid over an indefinite period, but as far as the funds of the organization will permit, the amount mentioned will be paid for the heads when presented at the office of the treasurer of the association, C. P. Whalen, at the Exchange Bank. Here is the chance for local sportsmen to sharpen their eye by a little practice and get part of the cost of their ammunition back!

A big drive is being planned for later in the season with the organizations of Lewiston and Moscow. Take down that old rusty 22 rifle and go out and learn to tell the difference between a meadow lark and a magpie, (the magpie is one that is black and white and makes a lot of noise about nothing), and when you are sure of the difference, shoot the magpie and collect the bounty.

Uncle Sam Says No!

Uncle Sam is taking a hand in the writing of screen scenarios! This fact developed during the filming of "The Bonded Woman," Betty Compson's latest feature, which will be the big feature at the opera house Saturday night.

This is a sea-story, and Albert S. LeVino, the writer of the scenario, named the ship on which the action takes place, "The Comet." Uncle Sam's order, however, will change this, for he insists that no fictitious names shall be painted on hulls, or the name changed from that under which the vessel is duly registered.

So the vessel you see at the opera house will bear the name under which it was "christened." John Bowers and Richard Dix contend for leading male honors in this powerful picture.

A New Serial Story

Don't miss reading the opennig chapter of the new serial story—"The Gift of the Desert," by Randall Parrish, in next week's News.

WHAT HAPPENED HERE TWENTY YEARS AGO

John Dresher, a well known reservation farmer, and Miss Alma Broberg were quietly married last Wednesday in Lewiston. The bride is a sister of John Broberg and arrived here last summer from Sweden.

In all probability in the near future one of our wealthy and retired farmers will be cutting the air in an up-to-date automobile. Councilman Scharnhorst has about decided to invest in one of the instruments of destruction and it will be a good one, too.

Following are the members of the newly-organized football team of this place: Le Roe Tice, manager; Louis Tweedt, captain; Fred Tweedt, Frank Harris, Dan Burr, Emery Vandenburg, Eli Morgan, Roy Burr, R. T. Brooks, Sam Davidson, John Gibb, Ben Heitstumann, Elmer Vanouck, Reed Klapp, and Meyers Olson. The first game will be played tomorrow afternoon at the race track when "eleven" from the above list of players will be pitted against the Lewiston Normal.

Tuesday morning at the Catholic church occurred a double wedding. Rev. Fr. Keyzer united "for better or for worse" Andrew Dertinger and Mrs. Veronica Jutte, and Joseph Roth and Miss Dertha Baldus. The contracting parties are all well known residents of this community and many friends wish them long and happy wedded lives. We understand that Mr. and Mrs. Dertinger will continue to reside in this city, while Mr. and Mrs. Roth will make their home on his farm east of town where he has made everything comfortable, having recently completed a fine six-room cottage.

Married, Wednesday, at Colfax, Wash., at the Hotel Whitman parlors, Rev. Bainton of the Congregational church officiating, Clarence Jain and Miss Lulu Spears, both of this place. Clarence left here Monday telling all that he was going to the Nezperce country for a few days' visit but his looks and actions gave him away and nearly all surmised what was going to happen. The newly married couple will return to Genesee today. The bride is a very estimable young lady who for the past two years has been a resident of this community and during the greater part of the time has been an assistant of this office. The groom is a native son of the Genesee valley and is the owner of the Star barber shop. Their many friends extend best wishes for a long and happy wedded union.

"Gift of the Desert"

The above is the title of the new serial story to be run in The News and is from the pen of Randall Parrish. The story is one of the great big West and one that will be appreciated by all westeners. It is laid in the southwestern portion of the United States and is told in a way that can only be done by Mr. Parrish—one of the great virile writers of western stories.

If you miss a single installment you are going to miss a rare treat. For any reason you fail to get your News containing this wonderful western story, call or phone the News office and we will see that you get one.

Tuesday Club Meets

The card club met at the home of Mrs. F. K. Dressler on Tuesday. Pinochle was played, and Mrs. R. S. Sullivan, Mrs. W. W. Burr, Mrs. W. E. English and Mrs. F. C. Shork cut for the honors, Mrs. W. W. Burr being the lucky one. The invited guests were Mrs. Frank Hoorman, Mrs. R. S. Sullivan, Mrs. A. H. Potsch, Mrs. Harry Schooler, Mrs. Mahlon Follett, Mrs. T. H. Herman, Mrs. J. J. Hirselberger, Mrs. F. B. Evans, Miss Clubb. Mrs. F. J. Niemann, Mrs. Arthur Springer, and Mrs. F. H. Thomas.

The next meeting will be at the home of Mrs. W. E. English in two weeks.

The Mail Order Houses

That not all business enterprises in the country are "going behind" is indicated by the following report sent out by a banking institution, showing the percentage of increase in the volume of business done during the month of September, 1923 and 1922:

Montgomery Ward & Co., September sales, 1923—$9,949,396; 1922—$7,088,684; percentage of increase, 40.

Sears, Roebuck & Co., September sales, 1923—$16,103,251; 1922—$14,375, 429; percentage of increase, 12.

J. C. Penny Co., September sales, 1923 — $6,010,298; 1922 — $4,762,894; percentage of increase, 26.

Professor (in zoology laboratory)—"What insect lives on the least food?"

Pupil—"The moth. It lives on holes."

FARM PRICES AND THE FARMER'S DOLLAR

The following interesting bit of information has just been recently furnished by the farm loan division of the Metropolitan Life Insurance company regarding farm prices and the farmer's dollar, which should be of interest to every tiller of the soil, and is naturally of much interest to every business man, no matter where located, or what his business, for if the farmer is not prosperous no business can prosper, for he is the center and hub of all business, no matter whether he be a wheat raiser, stockman or whatnot. Read this carefully then think it over seriously:

Farm Prices—"Farmers of this country receive $2,000,000,000 annually from milk and its products. This is several times the proceeds of the wheat crop. Of the five most important products of the United States only two, cotton and dairy products, are as high as the general price level."

The farmer's dollar—"The Farmer's Price Index, put out by the Department of Agriculture, shows the farmer's purchasing 'power' at 69 to 70 as compared with 100 in 1913. This does not mean that all farmer's dollars are thus depressed. Figures show that the cotton farmer's dollar is now worth $1.33, the wool grower's $1.60, and the dairyman's dollar is right around par, and the corn dollar after an extended depression, has risen to a value of 92 cents. It is the hog, cattle, hay and wheat men who are the worst sufferers now, the indices being respectively 61, 63, 76 and 87."

The above are very enlightening, and as any farm can feed a few cows and a few sheep, which would add much to the food and comfort of the farmer, at really no extra cost, for there is always a great deal of feed that goes to waste on the average farm, besides what can be easily raised on summerfallow land with just a little extra work, it would seem that it would be well worth the while of most any farmer to think the matter over and see if it would not be possible to have at least a few cows, pigs and not forgetting the humble hen, on the farms as ready-cash producers. It will astonish you how soon it will have a beneficial effect.

Knights of Columbus Install

On Tuesday night, November 6, State Deputy Leo J. McCarty of Lewiston, assisted by a number of the members of Lewiston council, Knights of Columbus, installed the newly-elected officers of Genesee council and a very interesting and profitable meeting was had. After the installation of officers several interesting talks were made by the visitors and members of the local council after which one of those old-time "feeds" was indulged in, to the satisfaction of all.

The newly-elected officers are, A. C. Linehan, grand knight; J. H. Broemeling, past grand knight; C. P. Whalen, financial secretary; F. J. Scharbach, chancellor; Martin Hasfurther, advocate; M. E. Earls, recording secretary; John Kries, warden, Anthony Weber, inside guard; Frank Hoorman, outside guard; John Hordemann, treasurer; Chas. F. Grieser, sr., trustee.

Farmers and Labor Unite

Organizing of railroad unions and farmers' bodies into the progressive party of Idaho started at Boise on Monday. Benjamin C. Marsh, director of the farmers' national council at Washington, D. C., and executive secretary of the People's Reconstruction league, delivered an address outlining economic needs as he sees them and plans for meeting them.

Mr. Marsh said: "City consumers of farm products have always paid enough for them to pay the producer's costs of production, a fair return on investment, and good wages for labor. Farm and other workers have been robbed of close to ten billions of dollars a year in the distribution of farm products by land speculators, middlemen, and railroads.

"State legislation is needed to prevent land speculation, but congress must promptly create a government marketing corporation to buy farm products from farmers and farm organizations at a fair price, and to sell them here and abroad to secure efficiency in distribution and save agriculture."

"The Norris-Sinclair bill before the last congress creating such a corporation was defeated by the wheat gamblers, cotton speculators and the American Farm Bureau federation."

Has New Truck

Ray Edwards is now perched "high and dry" on the seat of a new G. M. C. truck, which he purchased a few days ago.

Death of Mrs. Mary Nesbit

Mrs. Mary Nesbit, a former Genesee resident, died at her home in Dufur, Oregon, Monday morning, November 5, at 12:05 o'clock, following a slight stroke of paralysis, at the age of 69 years, 6 months and 10 days.

Mary Mackie was born near Oshkosh, Wisconsin, April 25, 1854. She was married to John A. Nisbit of Fisk, Wisconsin, on May 11, 1874. They moved from Wisconsin to the Genesee section in 1904, where they made their home until six years ago, when they moved to Dufur, Oregon, where the family had since resided. Mr. Nisbit passed to the Great Beyond some four years ago.

Five children survive, namely, James Nisbit and Alice Nisbit of Dufur, Oregon, Maggie J. Nisbit of Thos Dalley, Oregon, John Nisbit of Moscow, Idaho, and Dr. O. M. Nesbit of Walla Walla, Washington. There are also three sisters, four brothers and three grandchildren.

She will be remembered by those who knew her as one of the best citizens in whatever community she lived, always having a word of kindness for every one. Since girlhood she had been a member and active worker in the Methodist chuprh.

Funeral services were held from the home at 2 o'clock Wednesday afternoon and burial was made in the Dufur cemetery by the side of her husband.

Parent-Teachers Meeting

The regular monthly meeting of the Parent-Teachers association will be held on Tuesday night, November 13, instead of the 19th, as had been planned, and which date is the regular time for holding the meeting. However, it was necessary to make the change on account of other business conected with the school.

One of the best programs that has ever been offered will be given Tuesday night, when members of the faculty of the Lewiston State Normal will give the entire program. It will be a rare treat and everyone should be on hand to hear this splendid entertainment, which will be as follows:

There will be two readings by Miss MacBeth, head of the elocutionary department of the Normal.

Miss Wilmar, head of the music department, will give two piano solos.

Prof. Harlan, head of the educational department, will deliver an address, which will be along educational lines and will, or should be, of interest to all.

Be sure and be at the school building at 7:30 Tuesday evening, November 13, and enjoy the entire program.

Classified Ads.

The attention of the general public is again called to the fact that "classified" or "want ads." are cash at the time of insertion. We again have several dollars' worth on our books. By the time they are charged, a bill made out and mailed to the party who inserted the adlet, there isn't much left, so please remember that when you want to put in a small ad., the cash must accompany the order. Just figure it out at one cent a word, with the minimum of 25 cents.

Meeting of Voters

There will be a meeing of all the voters of the Genesee Highway District in the American Legion hall on Saturday, November 10, at 2 p. m. for the purpose of nominating four commissioners to serve a term of four years.

The men nominated at this meeting will be voted on at the election to be held on Saturday, December 1. All voters are urged to attend.

Fine Fall Weather

The present has been one of the finest falls for out-door work in the history of the country. This ideal weather of the past month has been put to good use by the farmers and an unusually large amount of work has been done by them and all indications point to a large acreage of seeding this fall. Here's hoping that the yield will be as good, or better, next year than it was this.

Loses Index Finger

Little Joe Tobin had the misfortune to lose the index finger of his right hand the other day while playing around a grain drill which his father was operating, he in some manner getting the digit caught in the gearing severing it above the second joint.

Are Parents of Daughter

Mr. and Mrs. W. O. Borgan are the proud parents of a baby girl born Friday morning, November 2. Both mother and babe are doing nicely.

We do printing of all kinds.

NEWSY NOTES FROM THE COUNTY SEAT

(Clipped from Star-Mirror)

Australian Wheat a Factor

Moscow farmers, in session at the Farmers' Union hall this afternoon, discussed various phases of the wheat situation, and among other things the desirability of a higher tariff, to protect the farmer from the wheat grown in other countries for export. An article from the Harvester World, published by the International Harvester company, created considerable interest, showing very plainly the need for a higher tariff on wheat.

The article showed that an Australian wheat grower had harvested a 400-acre crop, yielding 30 bushels to the acre, at a cost of one cent per bushel. The owner and two other men, using a combined reaper-thresher, drawn by a tractor, averaged 30 acres per day, or 900 bushels, at a cost of $9, which included the cost of fuel and oil for the machinery.

George Sievers, manager of the Moscow Union Warehouse company, referring to this stated: "If this is true, then how can the American grower produce wheat in competition with the Australian grower? The Australian grower secures labor at $2 per day, grows his crop on cheap land and has made the land on the American grower paying as high as $8 a day for labor, growing his crop on high priced land and paying an enormously high tax."

Lack Scale Conscience

Gasoline pumps generally over Idaho are measuring from one-half pint to one quart short, according to Joel Brown, state director of weights and measures. Mr. Brown has just returned from an inspection trip over southeastern Idaho, says the Statesman.

"There are very few cases in which I think the shortage is intentional," Mr. Brown said, "but I found some pumps which I believe were manipulated to give short measures. Of course it would be hard to prove this. Gasoline salesmen are always more than willing to make the adjustment of their pumps, which is the work of but a minute."

Mr. Brown said he found many scales out of adjustment and weighing short, to the disadvantage of the buyer. This mostly results from carelessness and failure of dealers to inspect their scales regularly.

"So many people seem to lack 'scale conscience,'" Mr. Brown said, "which is a satisfied state of mind existing with sellers when they feel the person on each side of the scale is getting a square deal."

Stage Driver Charges Violation

Ross Howard, prominent sheep man from Oregon and believed to be a partner of Senator Stanfield of Oregon, was charged today with the violation of an order creating a herd district in Latah county. C. L. Drew, the complaining witness, operates an automobile stage between Moscow and Lewiston.

Several days ago Howard filed an action in the probate court against Drew for $10, the action being based on the killing by Drew of one of Mr. Howard's sheep. In this civil action Howard seeks the value of the animal.

Teachers' Examinations

Regular examinations for all classes of certificates will be given to teachers of Latah county at the court house on November 15, 16 and 17, according to a notice issued by Miss Ellen Peterson, county superintendent.

Miss Peterson expects to spend the next week visiting the rural schools of Latah county, in order to ascertain in a general way, the condition of the schools and the progress they are maknig.

It Prevents Slipping

It isn't every farmer that knows that ordinary printing ink is one of the best belt dresings there is—and you can have enough to make your belts work by calling at the News office—free of charge. It keeps your belts from slipping.

The self-same ink used by merchants in advertising will keep their business from slipping, too.

Both the farmer and the merchant are invited to call at the News office and try some of the ink and see if we are not right.

Underwent Operation

Miss Lucille Stovall underwent an operation for appendicitus at St. Mary's hospital, Walla Walla, Washington, on Monday morning of this week. Her many friends will be glad to learn that the operation was a success and that she is getting along nicely at this time.

Cattle Judging Scene at the Great Pacific International

Judging the Holstein herds at the Pacific International Livestock Show that is being held at Portland this week. The Pacific International is the largest general livestock show in the world; and this year a new feature has been added in a general exhibit of farm and orchard crops.

Dr. Steinmetz Dead

DR. STEINMETZ

Dr. Charles P. Steinmetz, one of the world's greatest mathematicians, scientists and electrical wizards, died suddenly on October 26 of heart failure, induced by the fatigue of a lecture trip to the Pacific Coast. He came to this country 30 years ago, a political refugee. He was a mechanical engineer, with $10 in his pocket, and unable to speak the English language. He became one of the greatest experts in the world. The General Electric Company of Schenectady built and maintained laboratories for him and paid his expenses for experiments and for his living—the inventor asked no more.

Children and child welfare particularly interested Dr. Steinmetz. He aided and supported child welfare legislation wherever he could. He was one of the greatest mathematicians, and yet when he was a child one of his greatest difficulties was to learn the multiplication table.

He was born in Breslau, Germany, April 9, 1865, and educated at its famous university. He early became interested in socialism, and was obliged to flee from Germany to avoid imprisonment. He went to Zurich and later came to America. His profound knowledge of all the phenomena of electricity attracted the attention of the world, and the world suffers a great loss through his untimely death.

A New Novel of Back Home

Florence Bingham Livingston

The small town is the scene of Florence Bingham Livingston's new novel, "Under a Thousand Eyes," which tells the story of a girl who went back home after eight years in the outside world—and of her reaction to her childhood friends of the village. "Under a Thousand Eyes" is being discussed as a novel which gives a new angle on the small town.

A LITTLE TALK ON THRIFT

Contact with conditions in Europe emphasizes above everything else the stabilizing value of thrift to a nation, said S. W. Straus, president American Society for Thrift.

In America, happily, we are not confronted by many of the problems that are demanding solution across the sea.

Ultimate national progress must depend on the sound economic status of the individual. In this fact lies the priceless value of thrift to the nation because thrift results in personal economic improvement, thus fostering a contented and happy citizenship.

Our schools, churches, banks and all other institutions which are today seeking the development of more intensive thrift practices in the United States are going straight to the heart of one of humanity's gravest problems.

Each individual who adopts a routine of systematic thrift becomes an added unit of defense against the encroachment of those fanatical systems which have for their object the overthrowing of the present established order of civilized progress.

Practice thrift, preach thrift, teach thrift and you will be directly safeguarding the future stability of our nation.

No fair-minded man can be pessimistic over conditions and tendencies in this country, yet the fact remains that, with so many disturbing factors abroad, we should with all the greater diligence see that the foundations of our own country are secure. This means more savings bank depositors, more home-owners, more intelligent investors, more school children in the school savings banks, more building and loan association members, more teachers, preachers, newspapers and magazines developing an intensive and practical appreciation of thrift.

The stability of our present social system is based on individual thrift. We need have no fear of Bolshevism, communism, syndicalism or any other kindred destructive systems if we keep this fact well in mind at all times and apply it persistently.

Washington Names

Kitsap County

Kitsap County formerly was called Slaughter County in honor of Lieut. W. A. Slaughter, United States Army, who was killed on December 4, 1855, according to the book on Washington names just published by Prof. Edmond S. Meany of the University of Washington.

The people later were given privilege of choosing another name at a general election, and they chose Kitsap, the name of one of the Indian chiefs whose tribe occupied a part of the new county. Afterwards the Washington Territorial legislature declared that name in an act approved January 16, 1857, and Kitsap County was created.

Indian word Kitsap means "brave," according to Professor Meany. During the war against the whites on the Puget Sound, Kitsap, Leschi, and other chiefs were captured and were tried by civil authorities. Kitsap eventually was acquitted, freed and permitted to return to his people.

Port Orchard, county seat of Kitsap County, takes its name from the inlet on the opposite side of which is located the Puget Sound Navy Yard. Captain Vancouver gave this name on May 24, 1792, in honor of H. M. Orchard, of the ship "Discovery." The Indian for Port Orchard, according to Professor Meany, was Tech-i-bus.

Poulsbo was first settled by Norwegians, the family of Jargen Ellason being first, in September, 1883. The next was I. B. Moe, who was the first signer of a petition for a postoffice. He suggested Poulsbo for the name in honor of a small place near his home in Norway.

Charleston was named in honor of the United States steamship "Charleston," on June 5, 1891.

Bremerton was named in honor of William Bremer, who is regarded as the founder of the city. He was born in Seesen, Duchy of Brunswick, Germany, in 1863. His experiences in Washington reached back to territorial days. He died at his home in Seattle on December 28, 1910.

For School and Road Funds

One-fourth of the moneys received by the Forest Service from timber sales, grazing permits, summer home site leases, and other uses of national forest lands is turned over to the states in which such lands are located on a pro rata basis in accordance with an act of Congress. Such sums are for the school and road funds of the counties containing national forest lands. Washington has received for roads and schools since 1906 as its share of national forest receipts a total of $653,683.

The total sum turned over to all states containing national forests during the fiscal year 1923 amounted to $1,321,422. Twenty-seven states and Alaska shared in the distribution of this sum, which exceeded the annual average for the previous five years by about $250,000. Increased sales of timber were largely responsible for the record-breaking 1923 receipts.

RECLAMATION FORCES MEET

The forestry, reclamation and home making conference of the Southern Pine Association meets at New Orleans, next week.

ROAD BUILDERS TO MEET

The American Road Builders Association will hold its national convention at Chicago the week of January 13 to 18, 1924, inclusive. Good roads associations in the Northwest will be asked to send delegates.

Idaho Banker Buys Feeder Lambs at Walla Walla

Gilbert A. White, banker and sheepman of Jerome, Idaho, recently visited Walla Walla, Wash., for the purpose of buying several carloads of feeder lambs, which he intends to place in his feed lots. These lambs will be fed through the winter on alfalfa and grain, and marketed next spring before grass mutton is ready.

Motion Picture Book Week To Be Observed Nov. 11-17

National Board of Review of Motion Pictures, American Book-sellers, and the Library Association Combine for Better Books and Better Films

The week of November 11-17 has been selected by the National Committee for Better Films for "Motion Picture Book Week" and already the various organizations in all sections of the country interested in having the best pictures made shown for the young folks are cooperating to make this second annual event a greater success than it proved on its introduction last year.

"Motion Picture Book Week" is not only sponsored by the Committee for Better Films, which is a part of the National Board of Review of Motion Pictures, but is being held in conjunction with the Fifth Annual Children's Book Week. The organizations with which the National Committee is working to make the combined events a success are the National Association of Book Publishers, the American Booksellers Association, the American Library Association and the Boy Scouts of America. Cooperating with these organizations are the motion picture exhibitors and the motion picture producers, individually and as organizations; librarians, school teachers, women's clubs, community service organizations and the individual booksellers of the nation.

Special Campaign Planned

A special campaign is under way to have films of some of the worthwhile books shown in every community during the week of November 11-17. Librarians are cooperating by making special displays of the books that will be shown on the screen that week, and school teachers are aiding the movement by making the books topics for essays, stories or criticisms by their pupils.

The motion picture exhibitors are falling into line and are booking the films recommended by the National Board of Review of Motion Pictures, and, in some instances, schools are offering prizes of tickets to their pupils whose essays are adjudged the best.

Will Furnish List

Among the films recommended for Children's Book Week are: "David Copperfield"; "Penrod and Sam"; "The Flying Dutchman"; "Just Tony" (From Alcatraz); "The Spoilers"; "Scaramouche"; "The Call of the Wild"; "The Prince and the Pauper"; "Timothy's Quest"; "Richard the Lion Hearted" (The Talisman); "The Ramblin' Kid" and "Masters of Men."

The National Board of Review of Motion Pictures of 70—5th Avenue, New York, N. Y., is furnishing to the public, on request, a complete list of the pictures it has selected for Motion Picture Book Week.

Practically every motion picture exhibitor and producer in the country has been asked by the officials of the National Board of Review for his cooperation and letters have gone to 2800 School Superintendents and the presidents of all woman's clubs in America outlining what was accomplished by "Motion Picture Book Week" last year, and showing how it stimulated the reading of good books, according to statistics furnished by educators and librarians. Their cooperation was sought and, from the response given the letters, the indications are that this week will become one of the big "weeks" of the year and will prove a decided factor in directing children's literary taste, as well as furnishing them and adults with pictures worth seeing.

Among the members of the Executive Board of the National Committee for Better Films are: Miss Louise Connolly, Educational Expert, Free Public Library, Newark, N. J.; Mrs. Howard S. Gans, President, Federation for Child Study; Mrs. Oliver Harriman, President, Camp Fire Girls of America; Rev. Chester C. Marshall, D. D., Editor Film Lists, Methodist Episcopal Church; Mrs. Miriam Sutro Price, Chairman Executive Committee, Public Education Association; Dr. Myron T. Scudder, Scudder School for Girls; Rev. Wm. B. Tower, Dept. of Surveys, Methodist Board of Foreign Missions; George J. Zehrung, Director of Motion Picture Bureau, International Committee of Y. M. C. A.s and of the National Committee for Better Films, Mrs. Alonzo Richardson, President Atlanta Better Films Committee and Atlanta Women's Clubs.

MY LADY'S MONEY

An Episode in the Life of a Young Girl

By Wilkie Collins

(Installment No. 26)

She looked at him with sad, compassionate eyes. Her voice was firm as she answered him in the one word that he had desired. The word was —"No!"

A knock at the door startled him. "Come in!" he called out, sharply.

He looked up, expecting to see one of the guests or one of the servants. It was Moody who entered the room. Hardyman laid down his pen, and fixed his eyes sternly on the man who had dared to interrupt him.

"What the devil do you want?" he asked.

"I have seen Miss Isabel, and spoken with her," Moody replied. "Mr. Hardyman, I believe it is in your power to set this matter right. For the young lady's sake, sir, you must not leave England without doing it."

Hardy turned to his foreman. "Is this fellow mad or drunk?" he asked.

Moody proceeded as calmly and as resolutely as if those words had not been spoken. "I apologize for my intrusion, sir. I will trouble you with no explanations; I will ask one question. Have you a memorandum of the number of that five-hundred-pound note which you paid away in France?"

Hardyman lost all control over himself.

"You scoundrel!" he cried, "have you been prying into my private affairs? Is it your business to know what I did in France?"

"Is it your vengeance on a woman to refuse to tell her the number of a bank-note?" Moody rejoined, firmly. "That answer forced its way through Hardyman's anger to Hardyman's sense of honor. He rose and advanced to Moody. For a moment the two men faced each other in silence. "You're a bold fellow," said Hardyman, with a sudden change from anger to irony., "I'll do the lady justice. I'll look at my pocket-book."

He put his hand into the breast-pocket of his coat; he searched his other pockets; he turned over the objects on his writing table. The book was gone.

Moody watched him with a feeling of despair. "Oh, Mr. Hardyman, don't say you have lost your pocket-book!"

He sat down again at his desk, with sullen submission to the new disaster. "All I can say is, you're at liberty to look for it," he replied. "I must have dropped it somewhere." He turned impatiently to the foreman. "Now, then, what is the next check wanted? I shall go mad if I wait in this damned place much longer."

Moody hastened back to the part of the grounds (close to the shrubbery) in which Isabel was waiting his return.

They had advanced nearly as far as the tent, on their way out of the grounds, when they were met by a gentleman walking towards them from the cottage. He was a stranger to Isabel. Moody immediately recognized him as Mr. Felix Sweetsir.

"Who is that?" Isabel asked.

"Lady Lydiard's nephew, Mr. Felix Sweetsir," Moody answered, with a sudden sternness of tone and a sudden coldness of manner which surprised Isabel.

"You don't like him?" she said.

As she spoke, Felix stopped to give audience to one of the grooms, who had, apparently, been sent with a message to him. He turned so that his face was visible to Isabel. Moody pressed her hand significantly as it rested on his arm.

"Look well at that man," he whispered. "It's time to warn you. Felix Sweetsir is the worst enemy you have!"

Isabel heard him in speechless astonishment. He went on in tones that trembled with suppressed emotion.

"You doubt if Sharon knows the thief. You doubt if I know the thief, Isabel, as certainly as the heaven is above us, there stands the wretch who stole the bank-note!"

She drew her hand out of his arm with a cry of terror. She looked at him as if she doubted whether he was in his right mind.

He took her hand, and waited a moment, trying to compose himself. "Listen to me," he said. "At the first consultation I had with Sharon he gave this advice to Mr. Troy and to me. He said, 'Suspect the very last person on whom suspicion could possibly fall.' Those words, taken with the questions he had asked before he pronounced his opinion, struck me with a knife. I instantly suspected Lady Lydiard's nephew. Wait! From that time on this I have said nothing of my suspicion to any living soul. I knew in my own heart that it took its rise in the inveterate dislike that I have always felt for Mr. Sweetsir, and I distrusted it accordingly. But I went back to Sharon, for all that, and put the case into his hands. His investigations informed me that Mr. Sweetsir owed 'debts of honor' (as gentlemen called them), incurred through lost bets, to a large number of persons, and among them a bet of five hundred pounds lost to Mr. Hardyman. Further inquiries showed that Mr. Hardyman had taken the lead in declaring that he would post Mr. Sweetsir as a defaulter, and have him turned out of his clubs, and turned out of the betting ring. Ruin stared him in the face if he failed to pay his debt to Mr. Hardyman on the last day left to him—the day after the note was lost. On that very morning Lady Lydiard, speaking to me of her nephew's visit to her, said, 'If I had given him an opportunity of speaking, Felix would have borrowed money of me; I saw it in his face.' One moment more, Isabel. I am not only certain that Sweetsir took the five hundred-pound note out of the open letter, I am firmly persuaded that he is the man who told Lord Rotherfield of the circumstances under which you left Lady Lydiard's house. Your marriage to Mr. Hardyman might have put you in a position to detect the theft. You, not I, might in that case have discovered from your husband that the stolen note was the note with which Mr. Sweetsir paid his debt. He came here, you may depend on it, to make sure that he had succeeded in destroying your prospects. A mean depraved villain at heart is the man that can never swing a gallows!"

He checked himself at these words. The shock of the disclosure, the passion and vehemence with which he spoke overwhelmed Isabel. She trembled like a frightened child.

While he was still trying to soothe reassure her a low whining made itself heard at their feet. They looked down and saw Tommie. Finding himself noticed at last he expressed his sense of relief by a bark. Something dropped out of his mouth. As Moody stopped to pick it up, the dog ran to Isabel and pushed his head against her feet, as his way when he expected to have the handkerchief thrown over him preparatory to one of those games at hide-and-seek which have been already mentioned. Isabel put out her hand to caress him, when she was stopped by a cry from Moody. It was his turn to tremble now. His voice faltered as he said the words, "The dog has found the pocket-book!"

He opened the book with shaking hands. A betting-book was bound up in it with the customary calendar. He turned to the date of the day after the robbery.

There was the entry: "Felix Sweetsir. Paid £500. Note numbered N 8, 70561, dated 15th May, 1875."

Moody took from his waistcoat pocket his own memorandum of the number of the lost bank note. "Read it, Isabel," he said. "I won't trust my memory."

She read it. The number and date of the note entered in the pocket-book exactly corresponded with the number and date of the note that Lady Lydiard had placed in her letter.

Moody handed the pocket-book to Isabel. "There is the proof of your innocence," he said, "thanks to the dog. Will you write with me, Mr. Hardyman what has happened?" he asked, with his head down and his eyes on the ground.

She answered him, with the bright color suddenly flowing over her face.

"You shall write to him," she said, "when the time comes."

She threw her arms round his neck and hid her face on his bosom. "The time," she whispered, "when I am your wife."

THE END

The Smallest Airplane

The Sperry Sport or Messenger plane is without doubt the smallest plane of standard manufacture in the United States. There are others as small or perhaps a little smaller, but the Sperry has been adopted by the U. S. Army Air Service and at the present time is in use on most of the air service fields.

Quite a number of sportsmen also use this little plane as a quick means of getting about, while Lawrence Sperry, the man who designed it and manufactures it, has almost given up the use of his automobiles, for he finds that he can go anywhere in his "Messenger" in faster time and much more comfortably than he can in a slow automobile. A little over a year ago Mr. Sperry landed with his plane on the small space in front of the Capitol steps in Washington, and after attending to his business took off again with perfect safety and with room to spare. Just a few days ago, too, Mr. Sperry flew from Washington to Dayton, O., in just a few hours when it would have taken him much longer to go by fast express trains.—Adventure Magazine.

From Bocas del Terro, Panama, comes the news that 350,000 banana trees were destroyed by the recent storm in Talamanca Valley.

Plan Tourist Campaign

With the Pacific Highway now paved from the northern boundary of Washington to the Oregon-California line, tourist travel by automobile to the Pacific Northwest will be greatly facilitated. This highway is not merely a local route, just for the convenience of the Pacific Coast, but it is a wonder-trail for the whole nation. Along it will travel cars from every state, and the mountains and scenic marvels of Washington will be the lure that will lead them here.

Supplemented by the active tourist campaigns promoted by the various railway and steamship lines serving the Pacific Northwest, the extensive advertising campaign of the Seattle Chamber of Commerce during the past year resulted in bringing to Washington during 1923 the greatest multitude of tourists that has ever visited the Evergreen State. Conservative estimates place the expenditures while in the state at $10,000,000.

Plans are already in preparation for even more intensive efforts to attract tourists here in 1924, and there is every reason to expect this year's record to be exceeded greatly during the coming season.

The Seattle Chamber of Commerce's advertising this year gave publicity to the entire state—not simply to Seattle.

"Come to the Charmed Land" of the Northwest, was the message which in various forms was heralded across the nation. The scenic beauties of the whole state were extolled. Mention was made of many of the other communities. The whole effect was to get visitors to come to Washington and while here to see as many of its wonders as possible. Plans for 1924 contemplate following out this line of advertising to even greater lengths.

In outlining their advertising campaign for next year they are giving recognition to every other community in the state, and while not asking others to bear in the expense, they are offering them an opportunity to participate in the benefits of this campaign.

With a smooth paved highway extending from Portland to the British Columbia line, connecting with excellent road systems of Western Washington and an excellent highway over the Cascades to connect up with the Eastern and North-Central Washington network of highways, auto tourists will flock to this state in response to such invitations as Seattle is extending through national advertising. Every other city and town through which they pass will reap some of the profit and pleasure from their visits.

Noted British Statesman Dies

Andrew Bonar Law, former premier of Great Britain, is dead.

Mr. Law had been in ill health for some months, due to an incurable throat disease. He succeeded David Lloyd George as prime minister of England, October 23, 1922; but ill health caused him to resign the office a few months later—May 20, 1923.

Andrew Bonar Law was born in New Brunswick, Canada, September 16, 1858. In early youth he was sent to Glasgow, Scotland, to be educated. He remained in England, and later won great distinction as a statesman.

KEEPING POTATOES THROUGH THE WINTER

Specialist Tells How to Do Away With Storage Rots

Much has been said about controlling potato diseases in the field and also proper seed selection and seed treatment. The care of potatoes after they are produced has not been emphasized so much.

"In harvesting potatoes much can be done to aid in their keeping quality," asserts George L. Zundell, extension plant disease specialist. "Everyone is familiar with the 'mushy' frozen potato. Where the potatoes are kept in a temperature of around 30 to 32 degrees F., for only three hours, there will be black streaks formed on the inside though the outside may look perfectly good.

"Insufficient air in the storage house will cause a superficial breakdown which appears as dark sunken spots on the outside of the potato. Black heart is also caused by too high temperatures and lack of fresh air.

"In handling the crop be careful about breaking the skin of the potato. When the skin is broken it gives fungi a chance to enter the potato and cause storage rots. To help overcome the damage to the potato crop I would suggest that the potato cellar be disinfected by using either Bluestone at the rate of one pound to ten gallons of water or formaldehyde at the rate of one pint to ten gallons of water. Spray on bins and walls.

"Provide each potato cellar or storage house with inlets for fresh air and outlets for foul air. Also provide false floors and walls for the bins. Have an air space between bins.

"Never store potatoes in piles more than five feet deep without making some provision for air to get to the center of the pile. Lastly do not dig more potatoes than can be put in storage the same day."

Teachers in County Schools Average $729 Yearly

In Majority of States Average Is Below This, In Some Cases as Low as $300 a Year

WASHINGTON.—The Division of Rural Schools, United States Bureau of Education, has ready for printing the results of an inquiry concerning the salaries of teachers in rural schools in 1923. About half the counties in the United States are represented. The number of one-teacher schools reported was 97,758 and the average salary received was $729. In 22 states the average was above this salary and below in 26 states. In only six states does the average salary for one-teacher schools reach $900. Of the nearly 98,000 teachers 3,100 received less than $300 a year. Nearly all of these are in 12 states. There were 4,580 salaries from $300 to $399, designated as the $300 group. There were 5,589 in the $400 group, 8,367 in the $500 group, 16,432 in the $700 group and 20,826 in the $800 group. This represents the largest group of the 98,000 teachers. It appears that in two large states, Indiana and Ohio, the minimum salary fixed by law. In New York the minimum is $800 for a full term of 40 weeks.

In the two-teacher schools reported are 21,624 teachers were paid an average salary of $738. The number receiving less than $300 was 1,138. The $800 group was the largest, with 2,988 teachers. In 19 states the average exceeded $900.

In schools in the open country employing three or more teachers, not consolidated schools, there were 12,745 teachers reported, the average salary being $842. Here $900 is the largest salary group, 27 states reporting averages above this figure.

The reports show that there were 17,260 teachers in the consolidated schools, the average salary being $1,031. Here the largest salary group is $900 with 2,523 teachers, only 13 states averaging below this group. In 16 states the average salary paid teachers in the consolidated schools exceeds $1,100.

In schools having three or more teachers in country villages and towns there were 42,025 teachers reported, the average salary being $1,133. Here also the $900 group has the largest number of teachers, 5,870. Thirteen states show less than $900 for the average salary paid, while 19 pay exceeding $1,100 for the average.

While the salaries here quoted are considerably higher than those prevailing in pre-war days, it is a deplorable fact that the country school teacher's dollar will pay for less of the necessities of life than it did 10 years ago.

No one will claim that city teachers are paid too much, but reports for this year show that elementary teachers in cities of 2,500 to 5,000 population receive an average salary of over $1,100, in cities of 5,000 to 10,000 the average reaches $1,200, in cities 10,000 to 30,000 it is $1,277, in cities 30,000 to 40,000 the average is $1,467, and in the larger cities the average salary has already gone beyond $1,875.

On account of the higher cost of living the salary of the city teacher will always be higher than that received in the country for similar service, but the gap between the two is far too wide.

Washington News

A most successful season for farming is just ending in Skagit County. The dairymen have had a good season; there is a marvelous crop of hay and oats, and the "seed" farmers have also had a good crop.

Carload lots of turkeys are being offered by Montana to the Seattle market. Jobbers predict that any operator who pays more than 35 cents per pound f.o.b. Seattle for fancy, fat, dry-picked birds, is inviting a loss on the Thanksgiving trade.

Seattle and Sequim boys received Carnegie medals for bravery in saving life. Phillip W. Simmons of Seattle saved a boy from drowning at East Seattle on Lake Washington July 15, 1920; and Joseph Sheppard of Sequim lost his life while attempting to rescue a man and a woman from drowning at Ione, Wash., June 25, 1922. His father was given a bronze medal.

Eight million dollars were spent in Seattle by tourists in cash, is reported by the Chamber of Commerce. This amount represents what was spent in the last three seasons—a return of 277 per cent on the $222,236 expended in a national advertising campaign and in maintaining the tourist bureau. Altogether 440,305 persons received direct service from the tourist bureau. It pays to advertise.

Washington stands ninth in the list of states in the use of electric current, generated by privately and publicly owned central stations, according to a bulletin of the U. S. Department of Commerce received lately by the Manufacturers Association of Washington. This shows the growth of Washington as a manufacturing state. Light and power plants, in 1922, in the United States, generated 45,307,536,711 kilowatts, as compared with 32,676,896,893 kilowatts in 1917, the consumption having increased 157 per cent.

For the dome of the new state capitol building at Olympia will be poured the largest amount of reinforced concrete footing for any bit of construction in this section of the United States; calling for the use of 4,300 barrels or 25,000 sacks or 26 carloads of cement. It calls also for 1,700 truckloads of gravel and sand and the use of 420 tons of steel bars. Every bit of the material has been purchased from Washington state business concerns.

Governor Hart welcomed the delegates of the Washington State Good Roads Association, in Olympia, last week. He said that Washington has the best roads in this country. He has just returned from a trip east, and he said that he did not find the highway situation there as well in hand as it is in this state. There is a definite system of connected highways planned in Washington, and now that the Pacific Highway is completed, the next job is to plan the east-and-west highway across the state.

A golden wedding anniversary was lately celebrated in Clarke County. Mr. and Mrs. Richard C. Ungemach of Ridgefield celebrated the day with their three sons, four daughters, seventeen of twenty-one grandchildren and many friends. A dinner and reception featured the day. The happy couple were born in Germany, came to New York, where they were married in 1873. Then half a century ago they came west, living three years in San Francisco, then a short time in Portland before moving to Clarke County. In addition to the above mentioned children and grandchildren, Mr. and Mrs. Ungemach have two great grandchildren.

C. J. Zintheo, a highly educated ex-professor in Iowa State College at Ames, and recently taken to Yakima from Seattle to face charges of passing worthless checks, has organized a vocal quartet at the county jail, there. There is much time for practice, and he has discovered some fine voices among the prisoners to work on, and he hopes to make them fine performers in time.

The State of Washington claims an enrollment of 4,301 boys and girls in club work. Pig clubs claim 379 members; poultry clubs, 327 members; dairying bringing up the rear with 269 in its clubs. The encouraging feature of club work activities in this state is the fact that the clubs are growing in membership and new ones are constantly being formed.

Snohomish County poultrymen met recently at Alderwood Manor to organize a county association. M. T. Hokenstad of Snohomish was elected first president of the association; C. E. Westlind, Getchell, vice-president, and Mrs. W. T. Taylor, Alderwood Manor, secretary. J. H. Guffey and County Agent A. Z. Smith, with the officers mentioned, make up the board of directors. At the next meeting plans for the year will be worked out.

Lined up for battle, 12 Aberdeen-Angus and 12 Shorthorn baby steers faced each other in competition at the Washington State Fair. These calves were the property of Boys' Calf Clubs of Kittitas County, and in each club the boys had been instructed in their feeding and fitting work by D. L. Davis, county agent of Kittitas County. O. V. Battles of Yakima was sponsor for the Angus Club and Frank M. Rothrock of Sprague was the guiding genius for the Shorthorn boys. In breed competition, best doddie went to Thomas Newton, second and third being taken by Alva Pays on his two entries.

P. G. Kinzer, general manager of Carnation Milk Products Company on the Pacific Coast, is now in France, where he was sent to start arrangements preparatory to the manufacture of evaporated milk and other milk products in that country. This branch of the Carnation company will be known as the American Milk Products Company, and will be located at Carentan, France. Mr. Kinzer, who has been connected with the Carnation Company since 1907, was presented with a handsome gold watch and chain by the employes of the company before his departure for his new field of labor.

A STUDY IN HEREDITY

An Irishman was seated in a train beside a pompous individual who was accompanied by a dog.

"Fine dog ye have," said the Irishman. "What koind is it?"

"A cross between an Irishman and an ape," the man replied.

"Shure an' it's related to both of us," the Irishman rejoined.

HAVE NEGLECTED TO MAKE TAX RETURNS

Investigations conducted by field deputies of the Internal Revenue Service indicate that hundreds of taxpayers in the district of Washington have neglected, intentionally or otherwise, to include an income in their returns for 1920, 1921 and 1922 profits realized from the sale of real estate, according to Collector Burns Poe, who several weeks ago ordered a rigid probe to be made of suspected evasions of income regulations.

In order to close up the government tax net, the collector has ordered that a transcript be made of all doubtful transfers. A careful investigation will be made of all these files, to determine whether or not the sales involved have been reported upon the income tax returns. The collector has suggested that all persons who failed to include the profit realized from real estate sales call at his office or file amended returns, as it is the policy of the revenue department not to assert heavy penalties where the disclosures of failure to include income are voluntarily made by taxpayers.

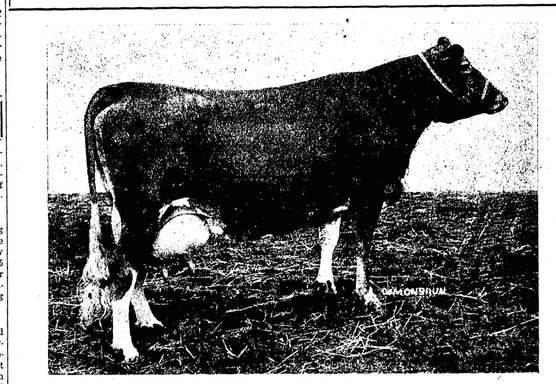
In cases where the taxpayer does not voluntarily disclose items of income that were omitted, and where the gains from real estate sales have not been reported, the collector said that it would be necessary to assert full penalties from all returns where the investigation disclosed the failure of the taxpayer to include real estate gains in his income tax returns.

W. B. Barney, ex-dairy commissioner of Iowa, is responsible for the statement that 36.2 per cent of the milk produced in the United States is used for the manufacture of butter; and that Minnesota ranks first and Iowa second in the production of butter.

CREATION OF FRENCH RIBBONS AND CHARMEEN

French or novelty ribbons make effective trimming for the tunic dress. Vertical bands of narrow, brilliantly-colored ribbon form the sole trimming of the waist, while two horizontal bands of wide ribbon alternating with bands of the material form the tunic. There is unusual distinction in a frock of this sort which is appropriate for any but the most formal affairs.

Record Price for Guernsey Paid at Sunnyside Sale



World's record Guernsey cow brings $2,800 at the Wallace and Fordyce sale, held recently at Sunnyside, Washington. This is the highest price ever paid for a Guernsey at public auction in the Northwest. Her new owner is R. W. Krobitzsch of San Francisco, owner of Troutmere Farm at La Hunda, California. Edna of Mountain View holds a world's record for having produced 983.05 pounds of butterfat in 365 days, as a 4-year-old.

Illiteracy Prevails in America

One-Fourth of Population Cannot Read or Write English

WASHINGTON.—The public discussion in connection with education week, Nov. 18-24, will emphasize the growing menace of illiteracy in America.

Illiteracy statistics are usually quoted from the United States census, which is collected by inquiry in which citizens are asked whether they can read and write. Because many answer the question without knowing what it means, and others answer it affirmatively because they are able to write their names or copy a few words in English the percentage of illiteracy as set forth in the census figures is misleading. The census of 1920 shows the total percentage of illiteracy in the United States to be only 6 per cent.

This does not correspond, however, to other investigations. The most exhaustive, as well as most reliable, test of literacy was made during the war under the draft act. It was absolutely essential from the standpoint of public safety and efficiency of the army to know whether men mustered into service could read instructions, write orders and otherwise prove themselves capable of understanding the English language. The government made a literacy test of every man drafted. The result was astounding and alarming. Over 25 per cent of men called to service were unable to read and understand the English language and unable to write the English language, with the exception of probably their names.

This led government and educational authorities to an investigation of those who were not drafted, and the result has been the shameful disclosure that illiteracy, meaning inability to read, write and speak the English language to any extent, prevails among at least one-fourth of our population. In some sections of the country this percentage runs much higher.

Illiteracy in the cities is very closely related to the problem of immigration. Statistics show that 67.8 per cent of illiterates in cities are foreign born. This large group is composed of those who cannot write, read or speak to any extent in the English language. By virtue of this fact, they are cut off from the possibility of reading American newspapers and engaging in discussion with American neighbors. They are condemned to the necessity of thinking in terms of the Old World. They are the prey of the labor agitator on the one hand and the unscrupulous employer on the other.

It reacts upon them not only mentally and spiritually, but physically. Proof of this is furnished by the New York State Industrial Commission. There are 800,000 factory workers in New York state who cannot speak English. The commission estimates that a very high percentage of injuries and deaths to these workers is due to their inability to read and understand safety rules and signs.

Statistics of the U. S. Labor Department show that the rate in accidents in the iron and steel industry, covering a period of years, was much higher among the non-English reading workers than among those who both read and spoke the English.

The Ford Motor Car Company officials state that since they have started night schools for the Americanization of their foreign born workers accidents in their plants have decreased 54 per cent. The U. S. Bureau of Mines is authority for the statement that 465,000 men are engaged in the mining industry who do not speak the English language and that the rate of accidents among this class of miners is twice as high as among those who do speak and read the English language.

The problems of Americanization and education are inter-allied. This fact is being realized more and more by all authorities. In a great many states the work of Americanization through the educational activities of the state is being stressed. In Massachusetts the policy of establishing immigrant education as a definite function of the State Department of Education has been in effect for many years, and is regarded as a model for other states. During the first year the law was in effect the state instructed 3,381 adult immigrants in the American language. Last year the number had increased to 22,244.

PROF BEHRE LEAVES UNIVERSITY OF IDAHO

University of Idaho.—As a farewell to Prof. C. Edward Behre and to introduce Harry I. Nettleton, a meeting of the Associated Foresters of the university was held recently.

Professor Behre, who has been associated with the school of forestry for four years as associate professor of lumbering, will leave soon to take up his new work at the Northeastern forest experiment station at Amherst, Mass.

Professor Behre's work will be taken up by Mr. Nettleton, who comes from the Oregon school of forestry, where he served as instructor in forestry for some time. He has more recently been connected with the Oregon Lumber Company at Enterprise, Oregon.

The foresters elected Jack Rodner, a senior in the school of forestry, editor-in-chief of the Idaho Forester for the current year. Rodger Wheaton, also a senior, was elected business manager. Prof. Clarence W. Watson was chosen faculty adviser to the staff.

Gullies are monuments to the greed of men who farm for themselves alone; men who give no thought to the welfare of coming generations.

A PRACTICAL GIFT FOR THE BRIDGE PLAYER

To decorate the box which holds the extra deck of cards at the bridge table cover it with a brilliantly colored ribbon. The neat qualities of liquid glue applied sparingly from a tube will hold the ribbon on neatly and will secure the box to the cardboard base which has been covered with ribbon. This makes an acceptable gift for the bridge lover.

Idaho Cleans Gonzaga

In a very one-sided, but nevertheless interesting and hard-fought game of football at the University of Idaho last Friday afternoon the Vandals, Idaho's crack football team, cleaned the Gonzaga Bulldogs in a way they will not soon forget. The Spokane team came down full of confidence and went home full of defeat for the score stood 13-0 at the final count.

All the Genesee business houses were closed during the afternoon and the town was almost depopulated—for they nearly all went to see the game.

Hundreds of cars went through here from Lewiston— all going to see the big game. It is said that some of the Lewiston sports reported that it was one of the biggest games they ever saw. At times, they said, there were as many as 22 players on each side.

Read the want eds. this week.

New Depot Agent

D. B. Eronson and family have arrived in Genesee and Mr. Eronson has been duly installed as agent for the Northern Pacific at this place. Mr. Eronson has been doing extra duty for the road for several years and said he was getting tired of traveling around and decided on Genesee as a place to "light." When you call at the depot, tell him who you are and he will be glad to chat with you about crops, weather, or railroad business.

Again Have Pool Hall

Edwards & Son have again taken over the Pastime pool hall and Nate is back behind the bar dishing out drinks, candy and cigars.

Cash and Carry Store

Another "cash and carry" store will be in full operation at the Federated ladies aid bazaar, in the Legion hall, on Wednesday, November 21—and you can buy anything from a toothpick to —well, no matter what, they'll have it. 18-

Good Health

If you would enjoy good health, keep your bowels regular. No one can reasonably hope to feel well, when constipated. When needed, take Chamberlain's Tablets. They are mild and gentle. Sold at Clark's Drug Store.

Federated Ladies' Aid Bazaar

Wednesday, Nov. 21

AT AMERICAN LEGION HALL

Good Dinner and Supper

Art work, fancy baskets, quilts, aprons, bed linens, country store, general merchandise in advertising packages, home made candies, toilet articles, fish pond, rummage booth. "You can get it here."

CHURCH SERVICES

SEVENTH DAY ADVENTIST CHURCH
AVERY ROGERS, S. S. Supt.
Mrs. B. B. CALDWELL, M. V. leader

Sabbath school at 10 o'clock Saturday morning.

Young people's M. V. at 12 o'clock Saturday.

LUTHERAN CHURCH
A. F. WOLFF, Pastor.

English services will be held each Sunday morning at 10:30 o'clock, with the exception of the first Sunday of each month, when German services will be held at the usual hour.

Sunday school at 9:30 a. m.

FEDERATED CHURCHES

Church school at 9:45 a. m.

Church meeting at 11 o'clock.

There will be the usual meeting of the Christian Endeavor at 7:30 p. m. Everyone is invited.

Auxiliary Meeting

There will be a meeting of the Auxiliary to the American Legion in their hall on Thursday evening, November 8. All members and those eligible to become members are requested to be present.

Will Give Bazaar

The Genesee Valley Ladies Aid will have a dinner and bazaar November 15. Various boths will be open and there will be a cake sale. 18-2

Pythian Sisters Card Party

The Pythian Sisters will give a card party at the K. P. hall on Friday, November 9, at 8 o'clock. Admission 50 cents a couple. Lunch will be served. 18-2

The Sterner Studio

at 521 S. Main Street, Moscow, Idaho, has just installed a new Hi-power twin arc white flame photographic lamp, which will make the stduio independent of daylight. The light is powerful and duplicates daylight perfectly, making it possible to distinguish all colors in their true tones. With this lamp pictures are made instataneous, so we always get the baby's smile.

DOUGLAS FAIRBANKS IN "ROBIN HOOD"—LEWISTON

Douglas Fairbanks' greatest picture "Robin Hood," will be shown at the Liberty Theater, Lewiston, on Sunday, Monday and Tuesday, November 11, 12 and 13. The proceeds of this famous picture will go to the support of an American patriotic organization. This will probably be your only chance to see this wonderful picture in this section of the country and every one should avail themselves of this opportunity.

In the making of the picture many fine horses were needed for the scores of bold knights appearing in Douglas Fairbanks' cinema version of "Douglas Fairbanks in Robin Hood" and the service of a recognized authority oni "steedly points" was required. So one of the first things Mr. Fairbanks did upon deciding to screen this dramatic romance of the Twefth century was to summon the most generally recognized horsemon on the Pacific coast. His name is Charlie Miller and with a lot of confidence in his ability Mr. Fairbanks turned him loose to assemble all the animals necessary for the production.

After Miller had accomplished his task and several scores of his selections were on the great tournament field in front of the replica of King Richard's castle, ready to participate in the exciting jousting contest which is a feature of the play, Fairbanks was rather dissappointed over the fact that many of the horses seemed unmanageable.

"Say, Charlie, are those the horses you picked out for us?" Fairbanks asked a little apprehensively.

"Yes I picked the horses but somebody else picked the riders," Charlie replied blandly.

This was enough said to bring forth the Fairbanks smile.

Had Leg Broken

News was received last week by Mrs. Wm. Post that her son, Robert Post had been quite seriously injured in the mines at Kellogg. It seems that while holding onto some levers he suddenly lost hold and fell through two levels of the mine, breaking his right thigh, and two ribs. It was four days before the fracture could be reduced, the bone having broken in such a way as to overlap.

The last word was to the effect that he was resting well, but he will be confined to the hospital for a few weeks. His mother left Tuesday morning for Kellogg to be with him for a time.

Hard Times Dance

Genesee post of the American Legion will give a hard-times dance in their hall on Friday night, November 16. The "Dokkey" orchestra of Lewiston will furnish the music, which is a guarantee that you will not be dissappointed in the syncopated part of the dance. Prizes will be given for the man and woman wearing the most unique costume.

If you haven't had a good time since the hard-times dance last year, be on hand the 16th.

Rollins Hosiery

We feature Rollins Armor Plate Hosiery because of the satisfactory service it gives the wearer. The "harms-not" dye gives longer wear and greater comfort. "There's miles of wear in every pair." In the staple silks our experience has proved the two following numbers to be the "best sellers":

2527 A pure thread silk hose with a mercerized lisle garter top; knit to shape; seamed back. A serviceable hose. Black, white and brown, per pair $1.50

2501. One of the most dependable silk stockings on the market. Made of medium-weight pure silk thread. None better for the price. Black, white, suade, gray, brown, per pair $2.25

Seasonable sport wool, wool and fiber, and silk and wool hose in an assortment of colors at prices, per pair ..... $1.00 to $3.00

Infants' and children's hose to fit every foot and to meet all climatic conditions. Per pair.. 25c to 75c

Specials

Ladies' silk hose—caramel, flesh and mode only; regular $1.50 values $1.00

Ladies' cotton clocked hose, cordovan only; $1.00 values, per pair 75c

Ladies' heather mixture hose, $1.00 values, pair 75c

Children's knit sweaters, $3.25 values, each $2.00

Infants' knit sacques, $2.25 values, each $1.50

Infants, knit sacques, 75c values, each 55c

Misses' knit bloomers, black and pink only, 50c values, pair 35c

Children's grey vests, sizes 1½ to 8 years, regular 45c values, each 30c

Please remember that accounts are due on the first of each month. Satisfactory settlement must be made by the 10th, or further credit cannot be extended.

EMMETT & BOLIOU

PERSONAL MENTION

Frank Hastings was a Pullman visitor on Thursday.

Mrs. Geo. Boliou was a Lewiston visitor on Wednesday.

Mr. and Mrs. N. Nelson left Friday for Spokane for a few days' visit.

Mrs. Frank Willoughby returned to Spokane Friday after a visit with her husband.

Theodore Anderson left Thursday morning for Spokane where he will enter college.

Mr. and Mrs. J. W. Jutte arrived home Thursday from an extended visit with relatives in the east.

Postmaster A. H. Potsch was a Thursday morning passenger for Spokane for a short stay.

Mr. Whitcher left Saturday morning for Latah, Washington, for an over-Sunday visit with his family.

Mrs. Mina DeBow arrived Monday from Clarkston and will live in her Genesee property for the present, at least.

Tom Platt, who is attending college at Spokane, spent Saturday and Sunday with his parents, Mr. and Mrs. John Platt.

Mr. and Mrs. F. E. Lambert and children and Miss Sylvia Evans spent Sunday with Mr. and Mrs. Arthur Mayer in Troy.

Mrs. Alma Butterfield returned to her home in Pullman Saturday after a few days' visit with her parents, Mr. and Mrs. J. W. Lawson.

Dan Adams, baggage and express man on the "Genesee Bullet," left Monday morning for Los Angeles, where he will spend the winter.

Mrs. Wm. Post left Tuesday morning for Kellogg where she went for a visit with her son, Robert, who was badly injured in a mine accident.

Mr. and Mrs. Jack Barnes left Saturday morning for their new home at Wilbur, Washington. Leon Follett took them over in his car, returning Monday.

Mr. and Mrs. Leo Edwards and Mrs. H. M. Warren spent Wednesday in Lewiston at the home of Mr. and Mrs. W. J. Davee. Mrs. Warren remained there for a few days' visit.

Mrs. F. K. Bressler was a Wednesday morning passenger for Pullman, where she was met by her daughter, Mrs. Geo. Gannon. They went to Spokane where little Don Gannon will have his tonsils and adenoids removed.

Mrs. Mabel VanMatre of Clarkston arrived in Genesee Monday afternoon and will have charge of the P. C. McCreary household. Miss Grace Cressett, who has been at the McCreary home for nearly two years, will go to Lewiston to receive medical attention for the next few weeks.

Dr. and Mrs. J. E. Reilly and son, John, and Mr. and Mrs. Geo. Medvid of Cottonwood were Genesee visitors for a short time Monday. They were returning home after a few days' visit with relatives and friends at Moscow. Dr. and Mrs. Reilly and oldtimes residents of Genesee and have a host of friends here who are always glad to see them. Mr. Medvid is owner and publisher of the Cottonwood Chronicle, one of the best country papers published in the Inland Empire.

Highway Election

Your especial attention is called to the notice of election on the last page of this paper, to be held on Saturday, December 1, for the purpose of electing three highway commissioners for a term of four years each, in the Genesee Highway district.

You are undoubtedly interested from a taxpayers' standpoint, if from no other, and it is your duty to go to the polls and cast your vote for the ones you think will give the district the best administration. You want the very best roads you can get for the money expended, but you have a right to know that your money is being spent in a way that will give the best results. Look for that kind of a man, then vote for him.

Banks Will Close

The banks and the postoffice will be closed all day Monday, November 12, in celebration of Armistice Day. All other business houses will be open as usual, at least most of the day. The News office will remain open all day.

Don't Forget

The card party at the K. of P. hall on Friday, November 9, at 8 o'clock. 18-2

Coyote Club Sore

It has been persistently reported that some members of the Coyote club have taken umbrage at a certain portion of the proceedings of the Game Protective association meeting the other night and are going to see to it that a grevious wrong is righted. One or two certain members of the association, whose names we would not like to disclose, but whose initials are ex-Captain Fat Sampson and Brigadier General Buffalo Bill Rader are the complainants.

When interviewed as to their grievances they were of the opinion that the association was in the wrong by offering a large (?) bounty for everything from a measley little magpie to the ferocious screech owl, or some other spacie of that bird, and not placing a price on the scalp of the stately coyote—at least as large as that placed on magpies. Both have threatened to take the matter up with the "powers that be" and see what can be done.

They both admit that it is an accident if they hit a coyote, to say nothing of trying to hit anything as small as a magpie. Then there's Corporal Carl Osmundson who also says that it is measley shame that no bounty is to be paid for coyote scalps for he has one that he has had for lo, these many years, and he would like to cash it in. And there are others of that famous organization who possibly have some old coyote scalps they would like to turn to account. And we can readily see where there is going to be a chance for an argument within the confines of the organization.

And the end is not yet!

Lutheran Ladies' Bazaar

The Genesee Valley Lutheran Ladies' aid will give a dinner at noon and a bazaar in the American Legion hall, Genesee, on Thursday, November 15. Various kinds of cakes will also be on sale. No booths will be made as stated in last week's paper. 19-1

An Invitation

You are cordially invited to be Clarkston's guest on Saturday, November 10, from 9:30 a. m. until 3:30 p. m. There will be free trips to all points of interest and a free barbecue with wild meat. 19-1x

Warehouses Will Close

By special agreement all warehouses and elevators in Genesee will be closed on Monday, November 12, for the observance of Armistice Day. 19-1x

A Timely Suggestion

This is the season of the year when the prudent and careful housewife replenishes her supply of Chamberlain's Cough Remedy. It is almost certain to be needed before the winter is over and results are much more prompt and satisfactory when it is kept at hand and given as soon as the first indication of a cold appears and before it has become settled in the system. There is no danger in giving it to children as it contains no opium or other harmful drug. Sold at Clark's Drug Store.

First-Class Undertaking Service

The W. J. Herman Company has made arrangements with the Vassar Undertaking company of Lewiston whereby they will handle all cases in that line in a first-class manner at no additional charge for work in this community. Licensed embalmer, auto hearse. Phone your orders to W. J. Herman Company. Phone 6F2. 12-tf

A Very Pretty Party

A very pleasant dancing party was given Monday night at the Smolt confectionery in honor of Miss Carrie Mae Hickman who is soon to leave to attend normal at Lewiston. A very good time is reported by those in attendance.

A Big Country Store

Will be in full operation at the ladies bazaar to be held in the Legion hall November 21. You can get it there. 18-

Card Party

Watch for the card party given by the Pythian Sisters at the K. of P. hall on Friday, November 9, at 8 o'clock. 18-2

PERSONAL MENTION

Frank Hastings was a Pullman visitor on Thursday.

Mrs. Geo. Boliou was a Lewiston visitor on Wednesday.

Mr. and Mrs. N. Nelson left Friday for Spokane for a few days' visit.

Mrs. Frank Willoughby returned to Spokane Friday after a visit with her husband.

Theodore Anderson left Thursday morning for Spokane where he will enter college.

Mr. and Mrs. J. W. Jutte arrived home Thursday from an extended visit with relatives in the east.

Postmaster A. H. Potsch was a Thursday morning passenger for Spokane for a short stay.

Mr. Whitcher left Saturday morning for Latah, Washington, for an over-Sunday visit with his family.

Mrs. Mina DeBow arrived Monday from Clarkston and will live in her Genesee property for the present, at least.

Tom Platt, who is attending college at Spokane, spent Saturday and Sunday with his parents, Mr. and Mrs. John Platt.

Mr. and Mrs. F. E. Lambert and children and Miss Sylvia Evans spent Sunday with Mr. and Mrs. Arthur Mayer in Troy.

Mrs. Alma Butterfield returned to her home in Pullman Saturday after a few days' visit with her parents, Mr. and Mrs. J. W. Lawson.

Dan Adams, baggage and express man on the "Genesee Bullet," left Monday morning for Los Angeles, where he will spend the winter.

Mrs. Wm. Post left Tuesday morning for Kellogg where she went for a visit with her son, Robert, who was badly injured in a mine accident.

Mr. and Mrs. Jack Barnes left Saturday morning for their new home at Wilbur, Washington. Leon Follett took them over in his car, returning Monday.

Gave Dinner

One of the most pleasant events of the season took place at the home of Mr. and Mrs. Gus Rosenau last Sunday, when friends and neighbors gathered to partake of a goose dinner. The time was spent in a social way, the men playing horse shoe and the women (?).

Those present were Mr. and Mrs. G. D. Rosenau, and family, Mr. and Mrs. W. H. Rosenau and family, Mr. and Mrs. G. H. Rosenau of Spokane, Wash., Mr. and Mrs. Henry Morscheck and baby, Mr. and Mrs. Fred Taylor and family, Mr. and Mrs. Hugo Gehrke and family, Mr. and Mrs. Dick Nebelseick and daughter, Marjorie, Mr. and Mrs. Ingel Halverson and family, and Wm. Rosenau.

Linger Longers Meet

The Linger Longers met Tuesday afternoon with Mrs. Ben Jain at her country home and a splendid time is reported by the ladies. Delicious refreshments were served during the afternoon.

The invited guests were Mrs. Nell Haymond, Mrs. A. J. Culwell, Miss Ruth Martinson and Mrs. Lou Jain.

The next meeting will be at the home of Mrs. T. H. Herman on Wednesday, November 14.

Big Free Barbecue

A big free entertainment is being planned at Clarkston for November 10 on the occasion of the opening sale of Parkway addition, a new model residence district. Preparations are going forward for a big old-time barbecue with wild meat on the side. For this purpose hunters have been dispatched to the hills to obtain elk and bear ment. People who have never had the pleasure of attending a barbecue will be pleased with the deliciousness of the meat, potatoes beans, etc., when cooked in their own juices in the ground or in earthenware.

No matter what the condition of the weather, it is bound to be more moderate here since the low altitude makes it more favorable than in the surrounding upper country. Early in the day a committee from the local chamber of commerce will meet visitors and personally conduct them to various orchards, fruit ranches and vineyards and other points of interest. "Help yourself" boxes of fruit will be placed conveniently.

The barbecue will be held at noon after which the sale of lots will commence.

We do all kinds of printing.

COST LESS

than "cheaper" overalls because they give more wear

You're willing and glad to buy an overall that will give you longer wear. Yet it's hard to tell the difference between overalls, as they're all blue and look about alike But here's a test that will settle the point of longer wear for you.

Toss the ordinary overall on the scales and read the weight. Then place the same size in an Oshkosh B'Gosh Overall on the same scale. Watch the indicator go past the previous mark, one—two—three—four—five —yes, sometimes six or seven ounces!

That's the story! Heavier denim has larger, stronger threads and more of them to the inch, hence it wears longer and gives you more for your money.

There is no other overall that will weigh as much as Oshkosh B'Gosh! There is no other overall that will wear as long or actually cost as little. These are not idle statements. We will gladly prove the former to you in our store. You can prove the latter by trying an Oshkosh B'Gosh in actual service. That's the final test. Remember, "they must make good or we will."

OSHKOSH B'GOSH

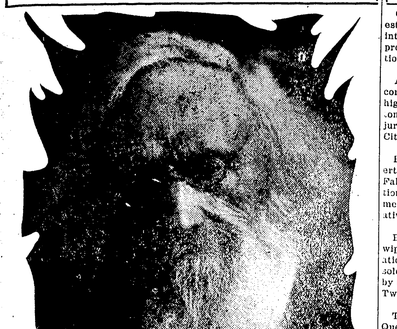
Famous Northwest Pioneer



EZRA MEEKER

Ezra Meeker, famous Northwest pioneer, in his 93rd year, had a final ambition to successfully produce an historically correct monument to mark the West. He went to New York City last spring and organized a film producing company. Last month on his return from his brother's funeral at Bellingham he was stricken with influenza, which doctors agree is usually fatal to one nearing the century mark in life. His condition brings to the minds of many old-timers the life history of a man who has been active in Washington history for many years.

More than 70 years ago, Ezra Meeker, the "trail blazer," crossed the plains to try his fortune in this Northwestern country. The first 22 years of his life were spent in the great Mississippi valley, in Ohio and Indiana, with one winter spent in Iowa. Then he started across the plains with an ox-team, a young wife and a baby boy eight weeks old. They reached the Oregon country safely, after many hardships, looked around for the 60 acres each for man and wife which Uncle Sam gave to settlers. They built their first cabin in January, 1853, on the spot where Kalama town is now situated, about 40 miles from Portland, Oregon. Congress had given a new name to that part, calling it Washington Territory

Two Only Are Left

Two white adults, Ezra Meeker and possibly another, are left of the first white inhabitants of this region —all gone to their long home.

Deep snow fell in December of their first year. Wild animals prowled around their home, frightening the little wife in her log cabin. Then when the thaw came the driftwood and logs proved a godsend to Ezra Meeker and his brother, who with an Indiana neighbor boy caught the logs, towing them to a place of safety, and after selling them they found they had cleared $800—enough money to take them to Puget Sound, for they now saw there was little chance for them in the country where they had first settled; so they struck trail for Puget Sound, where "men go down to the sea in ships"—and vision that Ezra Meeker had had when he was a very young man, living in the western part of Iowa, where all was one vast level plain, scorching hot in summer and bitter cold in winter. This vision of a country bordering on the ocean, accessible to the great wide world, became a reality. He has seen the little sailing boat on Puget Sound give place to the gigantic liners—floating palaces, huge freighters, and the luxurious pleasure yachts—all this, not in a year nor a decade, but the wonderful development of 70 years; due to the indomitable energy and public spirit of men such as he. Valleys everywhere cultivated and fertile, yielding fruits and grain; wonderful herds of fine cattle; scientifically developed poultry plants; huge shipyards; factories; seats of learning; in fact, every feature of a highly civilized nation has come into being here, well within the 70 years of Ezra Meeker's life in the West.

He has seen the state develop from a struggling territory, where there were scarcely citizens enough to fill all the offices, to the present flourishing state. The beginning of railroading in the United States was almost contemporaneous with the birth of Ezra Meeker. The introduction of the stage coach into Washington followed the ox-teams of the pioneers; and then came the railroad. The first steam railway in the state was the "Baker" road from Wallula, on the Columbia River, to Walla Walla, 32 miles. Then the "Yakima" road, being in operation in 1871. Ten years previously the Oregon Steam Navigation Company operated a six-mile steam tramway from the upper to the lower cascades on the Columbia, in connection with the river steamers.

Then Came the Railroads

Then came the Northern Pacific transcontinental railroad. Since then there have been three transcontinental roads built and innumerable connecting lines all over the state; and the electrification of 400 miles of the Milwaukee in this state, and the Canadian Pacific connects with the Great Northern at the boundary line.

The "trail blazer" has seen thousands of gasoline motor vehicles traveling at a high rate of speed on the very trails he first crawled over with his ox-cart; and the canoes and sailboats on the Sound giving way to the ocean liners and the fast gasoline motor boats.

Schools had claimed the attention of the pioneers from the very first; and private schools were started, later giving place to the public schools, which developed into the unequaled system of today. The first permanent public school building was opened in Seattle in 1867, and the Holy Names Academy in 1868. Now there are 2,554 school districts in the state. Washington is very proud of its University. It was a hard struggle to keep it going at first. In 1868 it was closed for two years, owing to financial and political troubles. Now the total value of the University property is ten million dollars and the number of students enrolled is upward of seven thousand. It is very doubtful if there is a university on earth that can show such a percentage of increase.

State institutions are numerous, all efficiently managed and doing wonderful work in helping and reclaiming the insane, the feeble minded, the aged, the deaf and blind and the criminals.

All these, and many more developments in the state, have come in the lifetime of Ezra Meeker, who is known all over the country for his enthusiastic work in placing stone monuments along the line of the trail that was first taken on the way "out west."

A Novelty Boudoir Lamp

A novelty boudoir lamp which arches over a dainty basket can readily be made with ribbon and liquid glue, and may be placed wherever needed. The shade is made of rose-colored georgette decorated with tiny ribbon flowers. The supporting wire stem is closely wrapped with narrow rose ribbon to the top of the basket, attached lightly with drops of glue squeezed from the tube. Use the best quality liquid glue. The basket itself is made on a wire frame closely wrapped in ribbons of rose shades. The bottom of the basket is a circle of pasteboard to which is glued a circle of rose silk. It may be used on dressing table, desk or by the bedside. In using the glue, which takes the place of needle and thread throughout, apply sparingly and smoothly.

Jeweled headbands for evening wear will continue in the mode this season, says Pierre Cartier, international authority on the art of jewelry. The circlets are worn very low over the forehead.

World's News

On his way from Australia to Palestine, Dr. Elwood Mead of Berkeley, internationally known land colonist, proposes to aid in a large colonization enterprise for Jewish people.

Another gridiron fatality is recorded. Roscoe Faris, prominent high school football player of Vinton, Iowa, died from internal injuries received in a game at La Porte City.

Posted lately at all mining properties in Butte, Anaconda and Great Falls, are notices of a 50-cent reduction in day's pay. Four thousand men are affected. The cut is operative on November 1.

Bulgaria's military air force was wiped out by an accident on an aviation field near Belgrade when the sole military plane left to Bulgaria by the treaty of Neuilly was wrecked. Two officers were killed.

The Earl of Athlone, brother to Queen Mary, has been appointed governor-general of South Africa, to succeed Prince Arthur of Connaught.

Princess Olga of Greece and Prince Paul of Serbia were married at Belgrade on October 22. Another royal marriage which has occurred recently in the Balkan states and which it is hoped will prove a happy one.

Water skis have been invented. Two men walked three and a half miles on the water across San Francisco Bay lately. They took 3 hours and 33 minutes to make the trip—about one hour for each mile.

At St. Louis recently two sisters were married to two brothers. In the wedding party were two sisters of the brides who had married two brothers; and a brother of the brides had married a sister of the other brothers.

Former Senator Frank B. Kellogg has been suggested to Great Britain as President Coolidge's choice for ambassador to the Court of St. James, to succeed Colonel George Harvey. It is almost certain that this selection will receive the approval of the British government.

The British government has accepted in principle the proposal of the American government that vessels in American waters be searched for contraband liquor within 12 miles of the American shore. The plans of the expert committee of the imperial conference have been drawn up, and it is expected that they will be approved.

Recently during the night two great Gobelin tapestries were stolen from the walls of the Palace of Versailles. They were made in 1674, and were part of Louis Fourteenth's collection. One represented the siege of Douai and the other the entry of the king into Dunkirk. These two tapestries are of priceless value, and have been guarded carefully with many other treasures in the old palace of Versailles. They measure 15 by 20 feet, and each weighs 140 pounds. Two women are supposed to be the thieves. During the war these treasures were carefully hidden away, for the Germans were too near to leave them to the tender mercy of the vandals they had shown themselves to be.

Four Japanese girls, buried under a heap of debris during the earthquake, were found imprisoned 25 days afterward and rescued alive. All they had had to support them was the water that trickled down from above them. A protecting boulder saved them from being crushed. They were taken to a hospital, where they are said to be recovering.

The Ford Motor Company is planning the erection of 30,000 homes on a 50-acre tract of land south of the Dearborn plant of the Ford Motor Company. The homes are to be constructed of cement, according to a plan Thomas A. Edison has just perfected. The houses will be sold at close to cost to anyone wishing to buy them.

For some time France has been making desperate efforts to raise the birth rate, but so far has failed to make a success of the endeavor. The measures already in effect are: Pensions for families with three or more children; reduction in tax rates for parents; abolition of taxes on apartment houses built especially for large families. The government is now proposing to tax heavily all bachelors and married couples without children.

It is possible that the American government will render similar aid to Germany as was rendered to Russia, if famine conditions develop. The government is looking with favor upon the plan of the western wheat growers to ship 50,000,000 bushels of wheat to Germany, payment to be guaranteed by the Berlin government.

The Navy Department of Washington has ordered a general court-martial for the eleven naval officials among whom rests the responsibility for the wreck of seven destroyers at Point Honda, California, in which 23 sailors lost their lives. Eight high officers of the navy have been appointed to the court. The sessions will be held at San Diego.

CRIME EXPENSIVE IN AMERICA

Crime costs the American people more than three billion dollars a year—or roughly $30 for every man, woman and child.

This is the estimate by the National Surety Company, which bonds employes who handle money—cashiers, treasurers, etc.

It's only part of the real bill, of course, for it covers only the visible or reported crimes. Petty thefts, which never get publicity, never are called to attention of public officials, must mount to a staggering sum each year.

It is estimated that stock frauds cost the American people a billion dollars a year, or a third of the total cost of crime. Fraudulent bankruptcies get away with $400,000,000 a year. Based on police estimates bezzlers and forger embezzlements are about equal, making off with about $100,000,000 each during a year. Banding companies' books show that between 1910 and 1922 the losses from burglaries increased 1200 per cent, while embezzlements jumped 500 per cent.

Comparing the national crime bill with the total income of the American people, about $1 in each $15 or $20 that is produced by honest effort is stolen by parasites.

RARE COLLECTION OF KNIVES

Among the possessions of V. V. Gandrabura, lawyer of Seattle but formerly state's attorney in Russia and judge in the Minusiisky district in Siberia, are a number of knives, collected by him from among the Tartars of the Siberian steppes, evidently belonging to the iron and bronze ages, being taken from tombs in hills made by human hands 2,000 years ago, or even perhaps earlier than that. These mounds are called Kurgans by the Tartars. The government opened up these tombs and put the relics found in them in the museums in Petrograd and Moscow. Anything the natives find now, such as knives, arrowheads, meat skewers and ornaments are sold to whoever has money to buy them.

Hog Cholera Ravaging Herds

An epidemic of hog cholera is ravaging the herds in the upper end of Pleasant Valley, is the report that comes from St. John. Several hundred head have already died, and federal veterinarians have arrived and are attempting to check the disease. The heaviest losers of animals are R. G. Miller, J. A. Grabb, Robert McNeil and E. P. Freeman. Mr. Freenan is reported to have lost over 200 head.

Pacific County Wins on Cheese

Pacific County cheesemaker at Green Meadow Dairy Farm, was awarded first prize on three bricks of his cheese at the recent State Fair at Yakima. Both a blue ribbon and a substantial cash prize were awarded him.

Boys of Clubs Do Workout Judging

Club member boys from Adams and Spokane counties recently met at the Shorthorn breeding ranch of Frank Rothrock, near Spragan, for a "workout" in judging before going to the Pacific International Livestock Show at Portland next month, where they will meet other teams in judging contests. They were accompanied by their agricultural agents, and Professor Hubbard of the State Extension Service was on hand to act as coach.

Reorganize Fair Association

At a recent meeting of the Grant County Fair Association, held at Neppel, the business of the 1923 fair was settled up, and officers of the association were elected for the ensuing year. Charles Scott was elected president; A. P. Rommle, vice-president; William Knapp, secretary, and F. F. Smith, treasurer. The association's finances were found to be in good shape, there being over $100 on hand after all accounts of the fair had been paid. The directors have decided to make the Fair an annual event.

Bullocks to Have an English Judge at the International

William Reid of London, a man of high repute in Great Britain, will judge the classes for single bullocks at this year's International Show. Mr. Reid is a man of broad knowledge in types of cattle used to supply meat to England, and everyone thinks that no better man could have been chosen for this important work in Chicago this year. He has umpired many championship decisions, so all classes of exhibitors at the coming show will be satisfied to have their entries judged by so competent a man.

MORNING GLORIES CAN BE KILLED

Carbon Bisulphide Handles Small Patches Before Spread

"What am I going to do with that Wild Morning Glory?" is the question being asked by many Washington farmers. The Morning Glory is a dangerous weed and is spreading rapidly where no effort is made to control it. The weed spreads by seed and by root and from a small beginning will soon occupy the entire field.

The time to fight this weed is when they are few in number, is the recommendation of Leonard Hegnauer, extension specialist in crops and soils. It can be done in the early stages in the best possible way and at small expense. When they have once spread over the field the problem becomes very much more serious and the expense is far greater.

"During the past summer," said Mr. Hegnauer, "some successful demonstrations have been carried on in Walla Walla County on summer fallow land. The demonstration showed that carbon bisulphide will do the work and can be successfully used where conditions are favorable.

"Where a patch is to be treated with this material holes 18 inches deep and three feet apart are made in the ground. These holes can be driven with a sledge and an inch and a half iron bar, some three feet long. About four ounces of the liquid should be poured into each hole and the hole tamped with dry earth. In one week's time the tops begin to show the effect of the treatment, and in a month the vines will be dead.

"Carbon bisulphide should be used while the soil is quite dry in order to let the gas spread as far as possible. When the soil is dry there is more air in it than when wet; and since the carbon bisulphide is heavier than air, it can readily displace the air and will spread fast in a dry soil."

The use of carbon bisulphide can be recommended for small patches, and has been used successfully in California, as the result of the experiment station of that state.

INDIAN WEARS A "CADY"

THAT'LL MAKE NO MAN BALD

If the paleface man will tear the crown out of his hat and wear only the brim as a sun shade for his eyes, baldheadedness in a single generation will become obsolete, according to the prediction of Chief White Dog of the Glacier National Park Blackfeet Indian Reservation.

Indians of this tribe who are inclined to the white man's headgear are heeding White Dog's warning and are adopting the style of "skypiece" which the old medicine man affects.

"The hair needs air." This is White Dog's slogan.

Take a squint at White Dog in two of his summer models. One is the brim of an ordinary summer straw hat of the leghorn variety. The other shows him with what he characterizes as his "fly-shooer." He leaves a well-ventilated perforated crown on this one, and the fringed brim serves as an automatic fly chaser. White Dog blames the hat manufacturers for making such a horde of bald-pated men among the paleface race, and says the barber with all his tonics and massaging never can help matters any.

Japan Controls Pacific

Materially assisted by our own failure to maintain a strong army, Japan has so skillfully built up her military and naval preparations prior to the earthquake that today she, rather than the United States, holds the balance of power in the Pacific. Should world events precipitate some day a war with Japan under conditions like those of today we would face a great and unparalleled disaster.

The Philippine Islands, with their pitiful "garrison" of 2,500 white troops, would fall in 48 hours. We should promptly lose Guam, our fortified base, where only a few marines are on guard. Indeed, save for Hawaii, we would face a severe uprising on the part of the military Japanese settlers.—Herbert B. Mayer in McClure's.

Old Books Yield Small Fortune

When examining some old books which he had lately bought from the widow of John Troutbeck, for many years coroner of Westminster, London, a bookseller found between the leaves of one of the books, 200 pounds in Bank of England notes. When he returned them to Mrs. Troutbeck, she promptly fainted—no doubt for joy. She thought they were old medical books belonging to her late husband, never imagining that between the leaves was this small fortune.

English Doctors Go on Strike

The National Health Fund of Great Britain, counts 15,000,000 men and women contributors to the fund, served by the members of the Panel Doctors' Union. The Minister of Health has proposed reducing the rate for each patient from nine shillings and six-pence (worth about $2.00) to eight shillings and six-pence. The doctors have decided to strike on January 1st. This decision was made at a conclave of the doctors in London as an act of refusal to accept a reduction.

A WORD FOR THE WIFE

She's running the greatest institution in the world, a business on which all other industry depends — the Home.

Farming, manufacturing, transportation, all industries, though better equipped with machinery and laborsaving devices, bow down before her industry—for the safety of the home is the end toward which they work. Are you giving her the backing she deserves? She needs equipment, she needs labor-saving machines, she needs comfort and the electrical servant, and these things demand capital. Are you supplying it?

PRISON DISCHARGE IS GOOD REFERENCE IN PHILIPPINES

Imagine a convict, just out of prison, proudly exhibiting his prison discharge as the best reference he can offer when seeking a new job and a new chance to make good!

This is precisely what convicts discharged in the Philippines do. The penal system which has made such a thing possible, described by Philip Kerby in McClure's, has made the Philippine prisons the most advanced in the world.

"The prisoner returns to society a sane, normal, self-respecting citizen, sure of his ability to earn an honest livelihood," says Mr. Kerby, after describing his visits to the San Ramon Prison Farms on the Island of Mindinao and the model penal colony at Iwahig. "When applying for employment, he proudly exhibits his prison discharge certificate as his best recommendation and as guarantee of his reformation and present fitness to take a place in his community previously denied him by his former habits of thought and consequent misdeeds.

"Under the sympathetic guidance of American hands, the Philippines have 'proceeded far along the path of progress'."

When over 100,000 people view a farm exhibit it makes the fair a great advertising medium.

Mrs. Ruth Osborn Boyer was elected Queen of Elks' Charity Carnival, held recently at the Arena in Seattle.

Idaho News

Idaho and Yakima shippers of potatoes are contending for California business.

A maddened bull attacked Mrs John Erickson, the wife of a rancher at Naples, trampling upon her and fracturing her leg.

Reports from Idaho show that the turkey crop will be heavy; prices recently show that the costs to consumers will be 45c per pound.

Lately two carloads of Holsteins were sold from the Boise valley to the Cache valley of Utah. The stock business is quite active around about Nampa also.

Seeing a bright future for the creamery business around Orofino, Joe W Brierly, an efficient creamery man, has invested substantially in the stock of the Orofino Creamery Company.

The dairy industry is forging ahead around Caldwell. More than $1,300 is being expended daily by the three creameries of the city among the farmers of the nearby country. Bankers and business men are encouraging this industry to the fullest measure.

The University of Idaho rooters to Boise for the Armistice Day game with Oregon Agricultural College will have a 10-car special train to accommodate 200 passengers, at their disposal. The train will leave for Boise, November 9, and return to Moscow on the 12th. From Boise, the special car carrying the team and coaches will be routed to Palo Alto and Los Angeles, for the Vandals' game with Stanford and the University of Southern California.

The latest addition to the Idaho Tech. at Pocatello is a modern poultry plant. It has a 1000-hen capacity, situated on well-drained, high ground. The plant is being built some distance from the road to insure quietude for the "biddies." Trapnesting will be a feature of the plant. A. L. Gardiol, a successful, practical poultryman, will run this poultry project. He will give courses of instruction in poultry husbandry at the winter course, the date of which will be announced later.

Idaho Offers the Only Correspondence Course in Forestry

Professor F. G. Miller, dean of the department of forestry, University of Idaho, has recently received an inquiry relative to the correspondence course in forestry, from a government official on the Island of Cyprus. This correspondence in forestry, so far as has been reported, is the only course of its kind offered by a state university. The letter was written by Constant J Antoniades, officer in charge of the Paphos forests on the southwest coast of Cyprus. The writer, in his letter, stated that he had been in correspondence with the United States department of forestry and had been recommended to write the University of Idaho as being the only university offering such a course.

U. S. S. "Idaho" let go her anchor on Thursday, Oct 25, in Elliott bay, "Navy Day" was officially announced for Friday, Oct. 26, when a grand reception was held on the boat. Mayor E. J. Brown of Seattle and the reception committee paid their respects to Capt. W. S. Crossley. The "Idaho" will be dry docked at the Bremerton Navy Yard for a thorough overhauling, and is expected to take until the middle of December. The "Idaho" now carries "E" for gunnery, and the ship also won the Olympic cup in the boat races in San Francisco, but, unfortunately, it was later disqualified.

The claim of Mrs. Robert Wilson, of Coeur D'Alene, for compensation from the Edward Rutledge Timber Company, has been denied by the State Industrial Board. The claim was for the death of her husband last January. The board held that Wilson died of sleeping sickness and not from injuries.

Leo Rutten, an employe of the Coeur D'Alene cannery, was struck by an auto, and although the car wheels passed over him, he escaped serious injury. The car was without lights and did not stop after hitting Mr. Rutten.

John T. Montgomery, U. S. Department of Agriculture, Rupert, Idaho, advocates that more sheep be kept on the farms on the Minidoka Project. The breed selected, if sheep are to be kept, should depend on the demand for rams. Some shelter is necessary and overstocking should be avoided.

At the closing sessions of the Baptist Bible and Missionary conference at Boise lately, alms of the Baptist new world movement, educationally and financially, were discussed, and plans were outlined for raising Idaho's share of the $12,000,000 fund asked for the entire denomination. Dr. F. W. Padelford discussed the financial drive, which has been set for Dec. 2, when the needs of the church will be outlined. Sixteen workers will work for pledges from every member of the churches.

Class Carlson, a farmer living near Meridian, died recently from injuries received by being trampled by an infuriated bull. Carlson was trying to put a chain around the bull's neck, when the bull knocked him down and crushed his chest in by trampling upon him.

An interesting story is told of an aged Chinese couple who saw a railroad train for the first time when they boarded it at Greer. They had been placer mining at Pierce City, 35 miles from Greer, for the past 60 years. When they first came to Pierce City they had walked all the way from Portland, Ore., a distance of 500 miles.

An idea of how dairying is increasing in some sections of Idaho can be gained from the report of the amount of butter sold by the co-operative creamery at Jerome for the past four years. In 1920, the output totaled 42,349 pounds. In 1921, an increase to 65,437 pounds; 1922, the total was 105,567 pounds, and up to this date this year over 170,000 pounds have been produced.

That some branches of farming are profitable, even under present uneven conditions, is proved by the results that two brothers, near Moscow, received from a 137-acre-crop of Blue Prussian peas, which yielded 2,160 sacks of A-1 seed stock. They sold the crop for $3.20 a sack.

Murtang lake will soon be stocked with approximately 110,000 perch, to be taken from Lake Lowell, according to G. W. Stroud, president of the Twin Falls Fish and Game Association. A short time ago a large shipment of small perch was sent to Payette lake, and smaller shipments have been made to other lakes of the state.

Idaho State Cattle and Horse Growers' Association Meet at Pocatello

This association, organized nine years ago, held its ninth annual convention lately, and it was the second gathering, in Pocatello, of the officers and members of the association, which represents one of the largest interests of the state.

All the prominent producers of the state took part in the program, also commission men and representatives of the packers and forest officials. The subjects of discussion were the threatened reduction of the tariff in Canadian cattle, hides and meat, better financing, freight rates and forest reserve policies.

More than 40 years ago, C. A. Thatcher, of Lewiston, built a home in a deep grove of apple trees, which was considered one of the finest home properties in the inland northwest. All the district around it now is occupied by modern business blocks, so the Thatcher home is to be razed, to give place to a modern carpenter and woodworking shop.

At a meeting of farmers in Moscow recently, sentiment was strongly in favor of the farmers aiding the movement to market the surplus of the 1923 wheat crop, and for congress to advance the tariff on wheat to 40 or 45 cents.

Sheep Being Fed in Grain Fields Around Nez Perce

Sheep, to the number of 30,000 have been brought from the summer mountain range to the grain fields of Nez Perce. These grain fields were hail-swept during the summer, and the sheepmen will be able to salvage some of the grain, getting feed for their sheep at a comparatively small cost, while the farmer will get some unexpected cash. Farmers are charging a grazing rate to sheepmen as low as one-quarter a cent a day a head. The feed is expected to last through December. Sheepmen have suffered an unusually heavy loss in the mountain country from bears, due to the light berry crop, which has caused the bears to attack the sheep. The higher mountains of the Bitter Roots are infested with black and brown bears. One crew of sheepherders bagged eight bears, long-range shooting. Not all bears are "killers," but if once bruin gets a taste of fresh mutton, he becomes more ferocious. Bears do not attack the throat of their victims. They evidently crush the animal with a blow of their paws.

Idaho Holsteins Make Record

Idaho Segis Walker Colantha recently completed a seven-day record of 617.5 pounds of milk and 24.83 pounds of butterfat, equivalent to 31.04 pounds of butter, and by so doing becomes state champion senior four-year-old in the seven-day division. This record displaces that of Idaho Segis Lily, her half-sister and stablemate, which is 609.1 pounds of milk and 24.066 pounds of butterfat, equivalent to 30.08 pounds of butter.

In 30-day test Idaho Segis Walker Colantha produced 2584.3 pounds of milk and 101.09 pounds of fat, equivalent to 126.36 pounds of butter, and thereby becomes Idaho state champion senior four-year-old in the 30-day division. Idaho Segis Lily held this record, too, with 2,689.2 pounds of milk and 98.92 pounds of fat, equivalent to 123.6 pounds of butter, until she was defeated by the new champion.

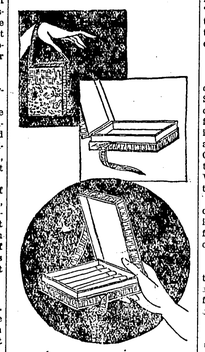
SMALL PROFITS FOR MEAT PACKERS

L. D. H. Weld, of the Institute of American Meat Packers, in a press notice, makes the statement that, "for a nine-year period, ending with 1921, certain leading packing companies together earned from all sources an average profit of 1.3 cents per dollar sales. This amounted to a very small fraction of a cent per pound sold, and obviously had practically no effect on prices. The packer, however, turned over his capital five or six times a year, and during the same period; so this 1.3 cents per dollar sales amounted to 6.2 per cent on the investment." If Mr. Weld's statement is correct, and there seems no good reason to dispute it, there is no justice in the criticism of the earnings of the large packer, particularly when it is known that "the average returns for over 300 corporations in all industries for the same period was 8.5 per cent on the investment," according to Mr. Weld's statement.

To make rubber plants bright-looking, wash all dust from the leaves with a clean sponge, warm water and Ivory soap, then go over again with warm water and a little olive oil.

Prepare to keep your animals comfortable for the long winter months.

ATTRACTIVE GIFT SUGGESTION



A large pasteboard cigarette box has a lining and cover of ribbon glued to the surface. The sides are covered with a narrow plisse ribbon glued on and a ribbon loop is used to swing it from the wrist. The best quality of liquid glue should be applied sparingly from a tube and spread with a piece of cardboard before the ribbon is attached.

North and South Connected By Completion of Pavement

After many months of waiting, there is at last an unbroken concrete ribbon stretching from the British Columbia line on the north into Oregon on the south; and "Profanity Detour" is no more.

The completion of the paved road through Washington State was made an occasion of much jollification and celebration, in which the governors of two states participated.

The day—a beautiful sunny one—started with a caravan of 200 machines from Olympia at 8:30 a. m. As the journey progressed the number increased, until fully 500 cars were in line coming from the north and up from the south, when the Governor from Washington met the Governor from Oregon, on the interstate bridge spanning the Columbia, at Vancouver. Here Governor Hart of Washington extended his hand to Governor Pierce of Oregon over the imaginary line that divides the two states, giving official significance to an occasion that means much to the welfare of both states; in fact, to the entire Pacific coast; for with the completion of the concrete highway machine travel up and down the coast will be greatly stimulated; and by the elimination of an abominal detour, there remains nothing to mar the pleasure of one of the most beautiful and scenic rides in the world.

NEW LIGHT ON LIVING COST

Sustained high levels both in the cost of living and to a greater degree in the earnings of the American workingman are revealed in two research reports, the results of which were made known today by the National Industrial Conference Board, New York. The reports cast new lights on the trend both of wage costs the average American family to live and what the head of the family has left in his pay envelope when the bills are paid. In brief, the wage situation reflects at present a higher level for "real" earnings, as weighed with what these earnings will buy, than at any time since before the war, not excepting the so-called "peak" period of 1920. The cost of living in July, the latest time when comprehensive figures were available for a survery of this magnitude, was 61.9 per cent above the 1914 level, and this was a decline of 20.8 per cent from the peak of high prices in July, 1920. Most noteworthy were the increases in rents throughout the country. In fact, the rent item in the average family budget in July last was 75 per cent higher, the board's figures show, than in 1914, and even higher than their former peak of 71 per cent in the spring of 1921.

Between March and July this year food prices increased 3.5 per cent, and in July they were 47 per cent above the pre-war level, but had declined 33 per cent from the peak of July, 1922. There was a noteworthy difference in the relative increase in the price of food from city to city among the 39 reporting changes in the last nine years. In Washington, with 58 per cent; Chicago and Detroit, 57 per cent each, and Richmond, 56 per cent, the increases were more than twice as great as the smallest advances—in Salt Lake, of 27 per cent.

The average cost of clothing increased less than 1 per cent between March and July this year. Clothing prices in July had declined 39 per cent since March, 1920, when their peak, totaling 177 per cent since pre-war days, was attained.

Most magnificent of all, however, is a comparison of the report on the cost of living with the concurrent report on wages, hours and employment—the first time such a comparison on the basis of the board's authoritative figures has been made possible in nine years. Especially noteworthy is the decided advance in "real earnings," which establishes the contention of economists that the American workingman is better off today than he ever was before.

Gets Money From Forest Lands

The state of Washington has received $86,243.87 from the Forest Service, U. S. Department of Agriculture, as its share of the receipts from national forest resources during the fiscal year 1923, according to an announcement from the office of George H. Cecil, district forester of the North Pacific Forest District. Word to this effect has been sent to Governor Louis F. Hart.

Washington contains 9,900,369 acres of national forest lands, all of which is embraced within the ten national forests located within various parts of the state.

Lime alone without manure makes the farm and farmer poor; but lime and legumes—clover, vetch and alfalfa—make the old farm rich all over.

From 20 to 25 bred ewes may be sufficient for the inexperienced farmer to start his flock.

Better Health Service

PUBLIC HEALTH IS PUBLIC WEALTH

These Articles Compiled by the Public Health League of Washington

Causes of Painful Feet

The most common cause of painful feet is arch strain. The term "broken arches" is misleading, because in these cases there is nothing broken, but simply a strain on weakened muscles and ligaments. When the strain is on the arch under the inner border of the foot, there is pain and tenderness at the point of this arch and sometimes pain and aching along the muscles up the inner side and back of the leg.

The transverse arch across the ball of the foot is a common location for trouble and manifests itself by pain and aching under the ball of the foot, burning and tingling of the toes and callouses under the foot just back of the toes.

Both of these conditions may be aggravated by a shortening of the heel cords or Achilles tendons, which may also cause a pulling sensation back of the knees and in the calf muscles.

Not All "Flat Feet"

It is a common error to call all sorts of foot trouble "flat feet" or "broken arches," which on careful examination, may be some entirely different condition.

It seems to be the general opinion that all arch conditions should be treated with arch supports. The ordinary arch support simply gives temporary relief, making the already weakened muscles weaker. They do not cure the conditions.

One of the common complaints is of a painful heel. This may be due to various causes such as a strain on the ligaments attached to the heel bone, or it may be an inflammation of the covering of the bone. One of the rather frequent and disabling causes of the painful heels is bony growths or spurs which grow from the lower border of the heel bone, giving the sensation of diffuse tenderness under the heel or of walking on some sharp object.

Many Bones in Foot

The feet are made up of a number of small bones. The joints between these bones may be affected with rheumatic conditions the same as other joints in the body. This may accompany an arch strain and one aggravate the other.

The tendons or cords of the feet and ankle move inside a covering or sheath. These sometimes become inflamed, due to constant pressure or rubbing, or due to some infection at some distant point in the body. These become very tender and make any movement of the affected tendons very painful.

The bones themselves may be diseased either by some acute infection which destroys the bone and forms an abscess, or it may be some chronic infection such as tuberculosis, which progresses slowly usually without abscess formation.

The foot is a common location for all sorts of slight injuries. One of the most common is sprained ankles, which means an actual tearing of the ligaments with permanent disability if not properly treated.

Lastly, we have corns, calluses and ingrown toe nails which are due to rubbing or pressure from short stockings or improper or poorly fitted shoes.

Women leaders of the country are urging the return of the washrag and pure white unscented soap to milady's favor as first aid to American beauty.

Imagine!

PAINT the picture to yourself of a shoe which you admire on your foot—but which you can hardly feel, it is so perfect in fit and comfort. Then ask for the Truwauk Oxford.

Gift of the Desert

by

Randall Parrish

An unusual drama of the West replete with action and stirring conflict, with its background of the lonely desert and all the surprises which that desert can so suddenly present. The record of a fearless man and a splendid woman. A man's story, but the kind a woman loves to read.

"Gift of the Desert" is additional evidence of Parrish's marvelous story-telling powers and of his inimitable style of writing.

REASONABLE SAVING HELPS US ALL

In the District Court of the Second Judicial District of the State of Idaho, In and For the County of Latah

Louise Tierney and W. J. Tierney, her husband, plaintiffs,

Vs.

Katherine Evits and the unknown owners of or claimants to the following described premises situated in Latah county, State of Idaho, to-wit: The southeast quarter of the northwest quarter (SE¼NW¼) of section seven (7), in township 37 north of range 5 West of the Boise Meridian, containing 40 acres more or less; and also a strip of land along the south side of the north half of the northwest quarter of secton seven (7), township 37 north of range 5 W. B. M., in the northwest quarter of the northwest quarter and the northeast quarter of the northwest quarter of said section seven (7), described as follows: beginning at a point 261.7 feet south and 41.3 feet east of the northwest corner of section seven (7) township 37 north of range 5 W. B. M., and running thence east on a line parallel to the north boundary of said section seven a distance of 2598.7 feet to the quarter section line between the east and the west half of said section seven, thence south on the quarter section line a distance of 1058.3 feet to the one-sixteenth corner; thence west on the one-sixteenth section line 2640 feet to the intersection of the west line of said section seven, said line being the range line between ranges five (5) and six (6) W. B. M., thence north, on the range line 1016.5 feet; thence north 38 degrees 57 minutes east a distance of 66.4 feet to the place of beginning, said strip of land containing 64.089 acres, more or less; and also a piece of land lying in the southwest quarter of the northeast quarter of section seven, township 37 north of range 5 W. B. M., described as follows: Beginning at the northwest corner of the southwest quarter of the northeast quarter of said section seven (7), and running thence east along the one-sixteenth line a distance of 1333 feet to the quarter corner in the center of said section seven; thence north 1320 feet to the point of beginning, said piece of land containing 2.809 acres, more or less, the above named defendants:

You are hereby notified that a complaint has been filed against you in the District Court of the Second Judi-ial District of the State of Idaho, in and for the county of Latah, by the above named plaintiffs of the nature in general terms as follows: To obtain a decree of this court quieting plaintiff's title to the southeast quarter of the northwest quarter (SE¼NW¼) of section seven (7) in township 37 north of range 5 West of the Boise Meridian, containing 40 acres, more or less; and also a strip of land along the south side of the north half of the northwest quarter of section seven (7), and running thence east along the one-sixteenth line a distance of 1854 feet; thence south 8 degrees, 00 minutes west a distance of 1333 feet to the quarter corner in the center of said section seven; thence north 1320 feet to the point of beginning, said piece of land containing 2.809 acres, more or less, the above named defendants:

You are hereby notified that a complaint has been filed against you in the District Court of the Second Judicial District of the State of Idaho, in and for the County of Latah, by the above named plaintiffs of the nature in general terms as follows: To obtain a decree of this court quieting plaintiff's title to the southeast quarter of the northwest quarter (SE¼NW¼) of section seven (7) in township 37 north of range 5 West of the Boise Meridian, containing 40 acres, more or less; and also a strip of land along the south side of the north half of the northwest quarter of said section seven (7), and running thence east along the one-sixteenth line a distance of 1854 feet; thence south 8 degrees, 00 minutes west a distance of 1333 feet to the quarter corner in the center of said section seven; thence north 1320 feet to the point of beginning, said piece of land containing 2.809 acres, more or less, defendants.

SUMMONS

The State of Idaho sends greeting to Katherine Evits and the unknown owners of or claimants to the following described premises, situated in Latah county, State of Idaho, to-wit: The southeast quarter of the northwest quarter (SE¼NW¼) of section seven (7), in township 37 north of range 5 West of the Boise Meridian, containing 40 acres more or less; and also a strip of land along the south side of the north half of the northwest quarter of section seven (7), township 37 north of range 5 W. B. M., in the northwest quarter and the northeast quarter of the northwest quarter of said section seven (7), described as follows: Beginning at a point 261.7 feet south and 41.3 feet east of the northwest corner of section seven, township 37 north of range 5 W. B. M., and running thence east on a line parallel to the north boundary of said section seven a distance of 2598.7 feet to the quarter section line between the east and the west half of said section seven, thence south on the quarter section line a distance of 1058.3 feet to the one-sixteenth corner; thence west on the one-sixteenth line 2640 feet to the intersection of the west line of said section seven, said line being the range line between ranges five (5) and six (6) W. B. M., thence north, on the range line 1016.5 feet; thence north 38 degrees 57 minutes east a distance of 66.4 feet to the place of beginning, said strip of land containing 64.089 acres, more or less; and also a piece of land lying in the southwest quarter of the northeast quarter of section seven, township 37 north of range 5 W. B. M., described as follows: Beginning at the northwest corner of the southwest quarter of the northeast quarter of said section seven (7), and running thence east along the one-sixteenth line a distance of 1333 feet to the quarter corner in the center of said section seven; thence north 1320 feet to the point of beginning, said piece of land containing 2.809 acres, more or less, the above named defendants:

You are hereby notified that a complaint has been filed against you in the District Court of the Second Judicial District of the State of Idaho, in and for the county of Latah, by the above named plaintiffs of the nature in general terms as follows: To obtain a decree of this court quieting plaintiff's title to the southeast quarter of the northwest quarter (SE¼NW¼) of section seven (7) in township 37 north of range 5 West of the Boise Meridian, containing 40 acres, more or less; and also a strip of land along the south side of the north half of the northwest quarter of said section seven (7), and running thence east along the one-sixteenth line a distance of 1854 feet; thence south 8 degrees, 00 minutes west a distance of 1333 feet to the quarter corner in the center of said section seven; thence north 1320 feet to the point of beginning, said piece of land containing 2.809 acres, more or less, defendants.

SUMMONS

The State of Idaho sends greeting to Katherine Evits and the unknown owners of or claimants to the following described premises, situated in Latah county, State of Idaho, to-wit: The southeast quarter of the northwest quarter (SE¼NW¼) of section seven (7), in township 37 north of range 5 West of the Boise Meridian, containing 40 acres more or less; and also a strip of land along the south side of the north half of the northwest quarter of section seven (7), township 37 north of range 5 W. B. M., in the northwest quarter and the northeast quarter of the northwest quarter of said section seven (7), described as follows: Beginning at a point 261.7 feet south and 41.3 feet east of the northwest corner of section seven, township 37 north of range 5 W. B. M., and running thence east on a line parallel to the north boundary of said section seven a distance of 2598.7 feet to the quarter section line between the east and west half of said section seven, thence south on the quarter section line a distance of 1058.3 feet to the one-sixteenth corner; thence west on the one-sixteenth section line 2640 feet to the intersection of the west line of said section seven, said line being the range line between ranges five (5) and six (6) W. B. M., thence north, on the range line 1016.5 feet; thence north 38 degrees 57 minutes east a distance of 66.4 feet to the place of beginning, said strip of land containing 64.089 acres, more or less; and also a piece of land lying in the southwest quarter of the northeast quarter of section seven, township 37 north of range 5 W. B. M., described as follows: Beginning at the northwest corner of the southwest quarter of the northeast quarter of said section seven (7), and running thence east along the one-sixteenth line a distance of 1333 feet to the quarter corner in the center of said section seven; thence north 1320 feet to the point of beginning, said piece of land containing 2.809 acres, more or less, the above named defendants:

You are hereby notified that a complaint has been filed against you in the District Court of the Second Judicial District of the State of Idaho, in and for the county of Latah, by the above named plaintiffs of the nature in general terms as follows: To obtain a decree of this court quieting plaintiff's title to the southeast quarter of the northwest quarter (SE¼NW¼) of section seven (7) in township 37 north of range 5 West of the Boise Meridian, containing 40 acres, more or less; and also a strip of land along the south side of the north half of the northwest quarter of said section seven (7), and running thence east along the one-sixteenth line a distance of 1854 feet; thence south 8 degrees, 00 minutes west a distance of 1333 feet to the quarter corner in the center of said section seven; thence north 1320 feet to the point of beginning, said piece of land containing 2.809 acres, more or less, defendants.

SUMMONS

The State of Idaho sends greeting to Katherine Evits and the unknown owners of or claimants to the following described premises, situated in Latah county, State of Idaho, to-wit: The southeast quarter of the northwest quarter (SE¼NW¼) of section seven (7), in township 37 north of range 5 West of the Boise Meridian, containing 40 acres more or less; and also a strip of land along the south side of the north half of the northwest quarter of section seven (7), township 37 north of range 5 W. B. M., in the northwest quarter and the northeast quarter of the northwest quarter of said section seven (7), described as follows: Beginning at a point 261.7 feet south and 41.3 feet east of the northwest corner of section seven, township 37 north of range 5 W. B. M., and running thence east on a line parallel to the north boundary of said section seven a distance of 2598.7 feet to the quarter section line between the east and the west half of said section seven, thence south on the quarter section line a distance of 1058.3 feet to the one-sixteenth corner; thence west on the one-sixteenth section line 2640 feet to the intersection of the west line of said section seven, said line being the range line between ranges five (5) and six (6) W. B. M., thence north, on the range line 1016.5 feet; thence north 38 degrees 57 minutes east a distance of 66.4 feet to the place of beginning, said strip of land containing 64.089 acres, more or less; and also a piece of land lying in the southwest quarter of the northeast quarter of section seven, township 37 north of range 5 W. B. M., described as follows: Beginning at the northwest corner of the southwest quarter of the northeast quarter of said section seven (7), and running thence east along the one-sixteenth line a distance of 185.4 feet; thence south 3 degrees 00 minutes west a distance of 1333 feet to the quarter corner in the center of said section seven; thence north 1320 feet to the point of beginning, said piece of land containing 2.809 acres, more or less, in Latah county, state of Idaho, against the said defendants. The complaint avers that the plaintiff, Louise Tierney, is the owner in fee, as her sole, separate property and estate, of the said lands and premises, and that defendants, without right, claim some title or interest therein, adverse to plaintiff. The prayer of the complaint is that defendants be adjudged to have no title or interest in said premises, and that plaintiff, Louise Tierney, have her title quieted in and to said lands and premises. Plaintiff further pray that it be adjudged and decreed that John Kambitsch and John Kambitzh, mentioned and named in the complaint, was and is one and the same identical person. It is further prayed in the complaint that it be adjudged and decreed that Michael Irvitz, Michael Irwitz, Michael Iwetz, Michael Evetts and Michael Evits, mentioned and named in the complaint, was and is one and the same identical person. It is further prayed in the complaint, that it be adjudged and decreed that Louise Tiernie and Louise Tierney, mentioned and named in the complaint, was and is one and the same identical person, and pray for such other and further relief in the premises as to the court may seem just, meet and proper.

And you are hereby directed to appear and answer the said complaint within 20 days of the service of this summons, if served within said judicial district, and within forty days if served elsewhere. And you are further notified that unless you so appear and answer said complaint within the time herein specified, the plaintiff will take judgment against you as prayed in said complaint.

Witness my hand and the seal of the District Court of the Second Judicial District of the State of Idaho, in and for Latah County, this 27th day of October, A. D. 1923.

HARRY A. THATCHER, Clerk.
By ADRIAN NELSON, Deputy.
[SEAL.]

Attorney for Plaintiffs. 18-6

Notice

Notice is hereby given that on Saturday, December 1st, 1923 at Genesee, Idaho, in the Genesee Highway District, County of Latah, State of Idaho, an election will be held to elect three commissioners of the said Genesee Highway District, for a term of four years at which election the polls shall be open at 8 o'clock a. m. and continue open until 7 o'clock p. m. of the same day.

Dated this 31st day of October, 1923.

DONALD BRESSLER
Clerk of the Board of Highway Commissioners, Genesee Highway district. 18-3

In Henry Ford's Town

A 15-year-old girl of Detroit has written these slogans for autoists:

"Drive right and more pedestrians will be left."

"Watch your 'step on it.' "

"Taking the other fellow's dust is better than 'to dust returneth.' "

"Six feet have awaited many a driver who wouldn't give an inch."

A Good Thing—Don't Miss It

Send your name and address plainly written together with 5 cents (and this slip) to Chamberlain Medicine Co., Des Moines, Iowa, and receive in return a trial package containing Chamberlain's Cough Remedy for coughs, colds, croup, bronchial, "flu" and whooping coughs, and tickling throat; Chamberlain's Stomach and Liver Tablets for stomach troubles, indigestion, gassy pains that crowd the heart, biliousness and constipation; Chamberlain's Salve, needed in every family for burns, scalds, wounds piles, and skin affectations; these valued family medicines for only 5 cents. Don't miss it.

A Personal Interest

Every man woman, and child in the United States has a personal interest in good roads.

The farmer and the motorist have the most immediate and practical interest, but the interest of others is no less vital that it expresses an indirect relation.

The farmer wants good roads because he can make more money with good roads than with poor roads. If the farmer can make money, he spends more, which means greater prosperity for the whole nation. And if he can do with less money, good roads enables him to sell his products for less and still make as much as at present; that means lower prices for food.

Everyone who lives in a rural or suburban location is interested in good roads, because they decrease the time distance which separates the rural or suburban home from the city. Every rural or suburban dweller needs to get to the city sometime; the less the distance the less it costs.

Every one who lives in a city wants at times to get into the country. The good road is the means. If there are no good roads, there is a sharp line drawn between city and country, which makes for the good of neither.

The more good roads the more travel. The more the travel, the more understanding of people by their neighbors, and the less possible is misunderstanding, strife, rivalry, or political discord.

Roads are a part of the foundation of Americanism. Let us all work to make that foundation broad and long and lasting.

Short Undertaking Company

Parlors at Genesee and Moscow. Prompt attention given night or day calls. Embalming and auto equipment furnished all funerals without extra charge. Full line of caskets at both places. At Genesee call George Schlerth at the Genesee Hotel.,

"Courtesy and Service" is our motto. We relieve you of every care. 14-tf

A "For Sale" ad. will sell your stuff.

GOODYEAR Service Station

THE high, thick, sharp-edged blocks of the Goodyear All-Weather Tread keep the maximum traction and safety under your car every foot of the way. They resist sideslip and skidding, help make the most of fuel, and protect your motor from the strain of stalling or spinning wheels.

As Goodyear Service Station Dealers we sell and recommend the new Goodyear Cords with the lowered All-Weather Tread and back them up with standard Goodyear Service

Starting Young

A small girl asked her mother, "If I grow up will I have a husband like pappa?"

"Yes, my dear," mother replied.

"And if I do not get married, will I be an old maid like aunt Susan?"

"Yes," was the reply."

The little girl thought for a minute, put her hands to her head and said, "Well, I'm in a fix."

Chamberlain's Tablets Have Done Her a World of Good

"Chamberlains Tablets have done me a world of good," writes Mrs. Ella L. Button, Kirkville, N. Y. "I have recommended them to a number of my friends and all who have used them praise them highly." When troubled with indigestion or constipation, give them a trial and realize for yourself what an excellent medicine it is. Sold at Clark's Drug Store.

THE GENESEE NEWS

VOL. XXXV — GENESEE, LATAH COUNTY, IDAHO, FRIDAY, NOVEMBER 16, 1923. — NO. 20

PUBLIC SCHOOL NOTES OF MUCH INTEREST

By Estel Rogers

When November 11 is mentioned everyone will immediately call to mind the great historical event which took place on that day and the significance of that event. The day has been set apart by the government as a national holiday. Since the eleventh came on Sunday, Monday was observed instead. Some schools did not hold their regular session, but celebrated the day as a holiday. Although we did continue with regular work, November 11 was not forgotten by the school by any means.

Of all the great men produced by the United States, Abraham Lincoln is classed as one of the greatest. He is so classed not only because he guided the nation through very troubled times, but also because he possessed a character, a will power, and a determination, that stood the test and that might easily become a pattern for many people today. The lives of such great men are generally taught in the schools in order to encourage pupils to become acquainted with, and to practice the principles and ideals of, these men who have played such a part in our history. In accordance with this idea the Illinois Watch Co., located at Springfield, Ill., which was Lincoln's home town, has decided to adopt a plan whereby students will become better acquainted with his life. The company is going to give a Lincoln medal to one senior who writes the best essay on the subject, "The Life of Lincoln" in every high school in the Union. This work is soon to be taken up and some good essays are expected, for only seniors are eligible.

"If you give a child an inch he will take a mile." If you give a high school student an inch he will—. We will leave the rest for the speculation of the reader. Entertainment and a good time fill a larger part of the younger people's life, but when these activities begin to predominate over the school work it is time to call a halt. Last week the bands of discipline were tightened in the high school and some of the privileges withdrawn. The reason for this step is that a number of articles have been missed in the school; too much visiting has been going on during school hours, and the work of the high school students in general has not been as high as in previous years.

Superintendent Thomas has made the statement that if some of the students do not get down to some real work and go at it in earnest and show improvement, he cannot promote them, because if he promotes a student who does not deserve it, he is hurting the student a great deal more than he is helping him. If a student is promoted who does not deserve promotion he finds himself on strange ground if he attends a higher school or attempts to take up a business or continue his studies.

Another reason for the general fall-down of the students is too much outside activity. Evening after evening when students should be studying, they are doing everything but studying.

Miss Hummel reports that the beginners in typewriting have completed their first nine exercises and are making the covers for them. These booklets will be on display next week.

According to statistics, in 1921 there were 200 children between the ages of 6 to 21, living in this district. Last year there were 302 and this year there are 267. This shows a decrease in child life, which is a drawback for any community.

The basket ball season is now beginning, and the boys are starting to work in earnest. They have received some new equipment and have elected Fred Cann as captain. At the present more boys are turning out for basket ball than turned out for foot ball.

From all reports the girls who went on the hike last Wednesday after school, had a very good time. They hiked for some distance and then after building a fire engaged in what we boys would have counted the best thing on the program, that is the eats.

You are cordially invited to attend the program to be given by the juniors and freshmen this coming Friday afternoon at the school building at 2:25 o'clock.

Thanksgiving will soon be here, and as it is a time of merrymaking and rejoicing it seems that a musical program would fit in very nicely. The Girls' Athletic association is going to have charge of a musical number on the night of the 29th for the purpose of helping finance their newly-organized association. The program will be put on by "The Elliott Family Orchestra," a Canadian organization which is very widly known. The orchestra is composed of one family of eight members and is highly praised in both the United States and Canada. Be sure to watch for particulars. This group makes the guarantee that anyone who is not satisfied with the entertainment will upon request, have his money refunded at the conclusion of the program.

Not Dead, But Sleeping

In looking over some old papers in a pigeon-hole we accidently found a very interesting one. It contained the names of the 87 men who had become members of the commercial club that had been organized during 1921.

It does look as though a good commercial club could be kept alive here but it seems that it is impossible. However, the last organization survived longer,perhaps, than any of its predecessors, and that is one thing to look back upon and be proud of. If there is any place on earth that needs a commercial club, it must be Genesee. There many things that could be taken up and handled to good advantage by a group of men who are interested in the town and its advancement—or, at least, in its upkeep.

Some say "it's no use," others say "you can't," etc., but it has been done in other places no larger than Genesee and there seems to be no good reason why it should not be done here. It has been done for a short time—almost a year the last time—and it can be done again. Many things were accomplished that were of real benefit—and it could be done again.

There are roads, schools, streets, and many other things that practically every one in Genesee and the surrounding country are, or should be, interested in, that could be taken up and much aid given in a way that would be a real help to those in charge.

Just now there is the important question of electing three highway commissioners for the Genesee Highway district. A meeting was scheduled for Saturday afternoon—and there wasn't enough interest taken for more than half a dozen to appear at the place of meeting, when the hall should have been packed with interested taxpayers.

There doesn't seem to be enough interest taken in public affairs of any kind. A general lethargic feeling seems to pervade the general public and there seems to be no way of getting them out of it.

Genesee Has Bad Fire

Last Friday morning between 2 and 3 o'clock the fire bell was used for the first time for several weeks, and only the second time in many months, when it was discovered that the Smolt confectionery store was on fire.

Mr. Smolt was awakened by the smell of smoke and awakened Miss Selma Roskammer, who was sleeping in another part of the building, and said he believed there was a fire and asked her to go and ring the fire bell, while he did, but by the time the fire fighters arrived with the apparatus the flames had gained such headway that it was impossible to save the building, although the front part was not consumed. The entire rear of the building, including the kitchen was destroyed and the stock and fixtures in the front part were badly watersoaked and practically ruined. The origin of the fire is unknown.

Mr. Smolt is yet undecided as to what steps he will take.

Wagon-Load of Postage

That it takes a good-sized wagon-load of German marks to bring a letter from that stricken country to the United States is born out of the fact that it takes 15,000,000 of them to carry it across the pond. The particular letter in view bore 17 stamps: one of one million, one of two million, and fifteen of 800,000 marks each.

The letter stated that a pair of shoes costs from 12 to 13 billion marks, and that as an advance charge for entering a hospital for an operation the wife or was compelled to pay 700 billion marks—a sum incomprehensible to the layman.

Highway Commissioners Nominated

At a meeting of the taxpayers last Friday afternoon nominations for three commissioners for the Genesee Highway district were made, the following being placed in nomination: Ole Iverson of the Lenville district, Ernest Peterson of the Pine Grove district and Henry Martinson of Genesee.

These nominations make an equitable distribution of the commissioners, they representing every section of the district.

The election will be held on Saturday, December 1—and you are expected to be there and cast your vote.

SEMI-LOCAL NEWS CLIPPED FROM EXCHANGES

Some Potato

T. P. Mitchell brought to the Chronicle office last week a potato weighing just five pounds. The potato is of the Blue Victor variety. Mr. Mitchell stated that he had 40 potatoes of the same variety that just filled a sack brim full.

The monster potato is now on display at the Chronicle office and has been admired by many tuber growers in this vicinity.—Cottonwood Chronicle.

Woof! Woof! Its a Bear!

There seems to be rather a larger number of bears in this section this year than usual. Several farmers state that their orchards have been visited by bears during the past few weeks. James Dillman set a trap in Frank Davis' orchard, and in a very short time a fine fat bear stepped into it and didn't step out again. Mr. Davis came to the rescue—with his trusty rifle—and that closed the incident. Frank got a bear in his orchard last winter.—Deary Press.

First Car Beans Shipped

Manager J. F. Micheals of the Orofino Rochdale company this week shipped out the first car load of beans going from Orofino this season. The shipment consisted of 80,000 pounds and went to the Idaho Bean and Elevator company where the beans will be recleaned and polished for further shipment. The selling price f. o. b. Orofino was 4¼ cents per pound. This price is not very high and it is probable, said Mr. Micheals, that it will rise before spring. But even at this price with a yield of 5 sacks per acre one grower received $30.60 per acre for his crop which appears to be better by considerable than wheat at its present selling price. —Clearwater Tribune.

Salvaging the Hailed Wheat

"It is an ill wind that blows nobody good" fits last summer's hail storm on the Nezperce prairie in the light of the present events. It is said that no less than thirty thousand sheep, brought from the summer mountain range with the approach of the snow season, are being fed in the grain fields devastated by the storm. The sheep are able to pick up considerable of the grain, which otherwise would have been a total loss, getting it at a comparatively small cost, while the farmer gets some direct cash returns—probably as much as he would have from the harvested crop —has his field cleared of the tangled straw and gains considerable fertilizer for his land. The sheep men are getting a grazing rate as low as one-fourth of a cent a day per head. —Kamiah Progress.

Theory and Practice

None of us are perfectly balanced. None of us are so nicely adjusted that we can fit into our respective positions in a way that will leave no room for criticism.

There is room for both the theorist and the practical man. We need them both. The theorist is objectionable only when he has both the power and the inclination to put his theories into practice without the restraining hand of the practical man.

Two great men were once compared, one being described as a man of theory with a great capacity for action, and the other a man of action with a great capacity for theory. Probably the latter was the most useful. The man who, by nature is a man of action, has the intellectual power to analyze underground forces has a supreme advantage over all others.

The distinction is often distinguishable in agriculture. The average farmer or breeder is too engrossed in daily details to be able to grasp fundamentals. It is noticeable that in most cases the most successful breeders are those who have taken the time and displayed the inclination to delve into the results of investigators and theorists.—Western Breeders Journal.

A Nervy Man

About the nerviest man we have read about in a long time is a fellow who is said to reside at Winchester. The other evening he was out taking a spin in his flivver and in the process of his exuberation at the extremely nice weather, or something of that sort, he failed to see a big Cadillac 8 and had the nerve to collide with it, badly damaging both cars. It takes a lot of nerve to do a trick like that.

A partisan for revenue only is always ready to start a revolt in his party when his money is shut off.

WHAT HAPPENED HERE TWENTY YEARS AGO

Mr. and Mrs. W. E. Smith entertained a party of friends at duplicate whist Friday evening.

Roy and Will Burr left yesterday morning for the Jansville country to take a look at the latter's claim.

Peter Johann has sold to Charles Swenson 3½ acres of ground near the mill. The sale price was $350.

Peter Steltz, A. A. Haymond and D. Scharnhorst expect to leave soon on a hunting trip up the Snake river. They expect to bring back a wagon load of geese.

J. P. Steltz has nearly completed a new cottage on his five acre tract of ground in the western part of town. He expects to move out there to reside permanently.

The enrollment of our public schools lacks but little of the 300 mark. It is a foregone conclusion that more room will be necessary to handle the increase another year.

During the present week we have had some weather. The rain of Friday turned to snow and Saturday fully four inches of the beautiful covered the ground. At intervals it has continued to snow throughout the week and at present the sleighing is fair, Wednesday a chinook wind prevailing for several hours. Signs, fences and other movable articles were scattered promiscuously about town.

One who is posted in the mater informs us that during the past fall there have been ten balers in operation in the country tributary to Genesee. That each one of the balers has averaged about 1000 tons. As the same has been sold, or can be at an average of not less than $9 per ton, it means an item of receipt for this point this year of $90,000. We dare say that not another point in the Pacific northwest can make an equal showing.

Auto License Tags Ready Dec. 1

Issuance of 1924 Idaho automobile and truck registration plates will begin December 1, it was announced by F. A. Jeter, secretary of state. The plates have already been shipped and will be ready for distribution at that time, he said.

"The law says all motor vehicles must be registered before January 1," said Mr. Jeter.

Passenger cars, trucks and trailers will be registered on a new basis next year and the fees are different, in accordance with the provisions of a law passed by the 1923 legislature. The 1924 plates have black letters and figures on a lemon colored background. The first 50,000 will be for passenger vehicles and the state has an option on an additional 10,000 plates for this class. Truck registration plates will be designated with a "T" in addition to the number. Trailers weighing more than 400 pounds must be registered and these plates will be marked with a "TR."

Idaho's two-cent tax on gasoline has netted the highway fund $274,425 in the six months period ended October 1, Mr. Jeter said.

This is an average of more than $40,000 a month, so that in two years, officials estimate, the state will receive approximately $1,000,000 from this source for highway work. Officials believe that the average monthly income will not be reduced through the winter. They say that the number of cars "put up" for the winter in the rural parts of the state will be compensated for by the increased use of cars in cities during bad weather.

Ancient and Modern

I recollect the overshoes my Aunt Malindy wore.....The kind that used to last her mebbe seven years or more. .....They buckled up as tight as wax, for keepin' out the snow,—we likened Aunt Malindy's tracks to maps of Mexico.....There weren't no moisture filtered through, when Aunt Malindy strode across the fields to Centerview, or up the country road. We'd allers hear her comin' long before she landed there, for the overshoes was real, that our auntie used to wear.....an' when she firmly kicked the mud, from off their spacious soles, the pups would start to barkin' and the rats would hunt their holes!

Now,.....Ethyl Maude has got a pair,—or maybe it's a set,—she wears 'em nearly everywhere, whenever walks is wet..... A pair of rubber nipples, mounted on her dainty toes, and a crupper back around the heel, to keep 'em on, I s'pose.....Sech little hangin' baskets ain't built for snow or floods, but they look about as pretty as Ethyl's other duds.....It may be they're as healthy as the big, old-fashioned sort, but if Aunt Malindy seen 'em, you'd be apt to hear her snort!

We do all kinds of printing.

"Making a Man"

"Making a Man" will be the feature film at the opera house Saturday night when Jack Holt and Eva Novak will play the stellar roles, and these are some of the big scenes:

When Winsby narrowly escapes death at the hands of an Italian whom he seeks to dispossess by foreclosing a mortgage he holds on the Italian's farm.

When he asks Patricia Owens to marry him and she refuses him with the statement that no girl in the valley would accept him.

When Winsby finds himself penniless in New York, without the means of indentifying himself.

When, suspected by hotel detectives of being a crook, he is thrown out into the streets, without money, and forced to accept a job as a waiter in a cheap restaurant.

When Patricia, on learning of Winsby's whereabouts, has him discharged in pursuance of her plans to make a real man of him.

When Shorty, a "down-and-outer," teaches him a lesson in manhood and starts him on the right road to reformation.

When, after coming into funds again, he meets Patricia and asks her to marry him. She accepts and both are happy in the promises of the future.

When Winsby, a changed man, wires his agent to cease all mortgage foreclosure proceedings in the valley, a circumstance that brings joy to many.

Give Splendid Program

The regular monthly meeting of the Parent-Teacher association was held in the public school building Tuesday evening and a very pleasant and entertaining evening was spent. The program was in charge of members of the faculty of the Lewiston normal and was indeed a treat.

Miss MacBeth of the elocutionary department gave three splendid readings and Miss Wilmar of the music department gave three piano selections which were thoroughly enjoyed as was the splendid talk made by Prof. Harlan of the educational department of the normal, his talk taking up the subject of school criticism by parents, students, and even many instructors themselves, much of which he pointed out, is unjustified. On the whole it was one of the very best programs that has been given at these very profitable meetings.

Legion Auxiliary

The regular meeting of the American Legion Auxiliary was held last Thursday evening and a very pleasant time was reported. There was an average attendance, but not so many as had been expected. Six new members were taken in, bringing the membership up to 21.

Permanent officers were chosen and will be installed later. The president ureges that all who are eligible join the auxiliary as little can be accomplished without co-operation. It should not only be considered a pleasure but a duty of those eligible to become members and take an active part in the organization.

The next meeting will be held on Thursday, November 22, and on the second and fourth Thursday of each month thereafter.

Linger Longers Meet

The Linger Longers met at the home of Mrs. H. H. Herman on Wednesday afternoon of this week. The time was spent with fancy work and social converse. A delicious luncheon was served by the hostess.

The invited guests were Mrs. Chas. Whalen, Mrs. A. H. Potsch, Mrs. W. M. Herman, Mrs. Henry Lorang, and Mrs. Milton Rader.

The next meeting will be on December 5, at the home of Mrs. Virgil Sampson.

Large Enrollment

Monday, November 19, the second quarter of the year 1923-24 at the Lewiston State Normal School begins. Students who are attending this quarter have been registering this week and the new students will register for the coming quarter's work November 19. The student body during the first quarter has exceeded the first quarter of last year by almost 20 per cent. Three hundred nineteen students have been attending throughout.

Armistice Day Quiet

Armistice Day was very quiet in Genesee. While the stores remained open during the day, they might just about as well have been closed as there were very few people in town. All warehouses, the banks and the postoffice were closed during the day. There were no entertainments or public gatherings of any kind and on the whole there was very little doing.

NO OPEN SEASON ON HUNGARIAN PHEASANTS

Word has come to town that some hunters have been shooting the Hungarian partridge and we wish to state that this is contrary to the laws of the State of Idaho and that any person caught in such an act will be dealt with in the usual way.

The following letter from the office of the State Game Warden is self explanatory and covers this situation fully:

"I would advise for your information owing to the fact that two different bills were introduced at the last session of the legislature, the last bill amending both the Idaho Compiled Statutes and the bill which preceeded: that is, House Bill 236, and leaving blank any reference to an open season on Hungarian partridges, necessarily closed the season on Hungarian partridges in northern Idaho.

"We have written to A. R. Johnson, assistant chief deputy at Lewiston with reference to the above and have explained it, I believe, to his entire satisfaction. Once and for all, there is no open season on Hungarian partridges in Idaho, nor will there be until the next legislature convenes and the matter rectified. I believe, also, that the people of Nez Perce county thoroughly understand by reason of the fact that a recent article published in papers of this county conceded the fact that, owing to the amendment of the Idaho compiled statutes and House Bill 236, there is no open season on these birds."

The Genesee Game Protective Association wishes in every way to co-operate with the farmers and the hunters of this district in the preservation of the bird and game life of this region. Any violations of the Idaho fish and game laws coming to the attention of any individual interested in the matter should be reported to the association and action will be taken to prevent the recurrence of the violations. Word should be sent to Frank H. Thomas, president of the local association and deputy game warden; to Charles P. Whalen, secretary of the association; or to any active members of the Genesee association.

Attention is called to the carelessness of some irresponsible individual who cannot tell the difference between a Missouri mule and a Mongolian or "China" pheasant. Two cases of livestock shooting have been reported this season from the districts immediately adjacent to Genesee. The individual in the field is a real menance and constitutes a danger wherever he may be. He is the kind that leaves cartridges in the gun and shoots his wife or young son; or blows a hole through the kitchen ceiling when he starts cleaning his fowling, (a load in the muzzle), piece after his day of destruction in the field is over. We do not blame the farmer when he puts up signs that read "No Trespassing" to ward off this species of the ivory-topped biped. Surely it behooves every self-respecting citizen to make his life or find a place of safety when such individuals are turned loose. We are of unanimous opinion that a fool and his gun are a dangerous combination and that all rabid hunters should be "degunned" permanently.

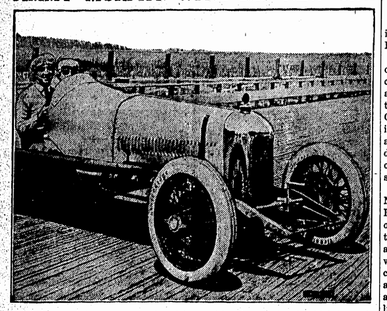
Pythian Sisters Card Party

The Pythian Sisters card party, which was held last Friday evening, proved to be a very pleasant affair. The time was spent in playing pinochle and everyone seemed to enjoy themselves. Mrs. Henry Craft and Mrs. Fred Nagel cut for the ladies' honors, Mrs. Craft being the lucky one. The men's prize was won by Henry Herman; Ira Hanson and Walter Jain also having won a equal number of games, but Mr. Herman being lucky in the cut. Miss Edith Winegardner won the ladies' consulation and W. W. Burr the men's. A very delicious luncheon was served by the ladies at 11 o'clock and a very good time was reported by all present.

St. Mary's Church Card Party

The Ladies of the Altar Society of the Catholic church gave a card party at the K. of C. hall on Friday night of last week. The evening was spent in playing pinochle, and the ladies' honors were won by

JIMMY MURPHY WITH HIS NEW CAR



Jimmy Murphy, famous racing driver, with his new mount which he took to Europe for the racing meet there The machine is a new two-seated special built by Harry Miller of Los Angeles.

DRIVE CAR WITH EASE AND GRACE

Motors Show to Best Advantage Under Tutelage of the Good Form Driver.

(By ERWIN GREER, President of Greer College of Automotive Engineering, Chicago.)

When the ponies are clattering in on the home stretch, all other things being equal, it is the headiest rider that brings his mount first under the wire. Just as a Kentucky filly responds splendidly to the rein of a skilled driver, so does the thoroughbred of motors show its mettle to the best advantage under the tutelage of the "good form" driver.

Pleasure in Motoring.

Half the pleasure in motoring comes with learning to manipulate your car with consummate ease and grace. Correct form in driving means minimum strain on car mechanism and incidentally minimum drain on the pocketbook. Velvety stops and starts prevent unusual strains on the motor, clutch, transmission, axles and tires. They also cut down the consumption of gasoline and oil. A well-made motor, like a Swiss watch, is a sensitive thing. It resents abuse but responds willingly, capably to gentle handling.

Starting an automobile is an art. Simple though it may be, nevertheless there are hordes of drivers who never acquire it. The master driver aims to create a steady pull on the driving mechanism from the moment he slips into first speed until the car is under full headway. To wit, a homely formula for starting which may be taken after the entree of gear shifting:

Learn to Accelerate.

Learn to accelerate simultaneously with letting in the clutch. The mechanical act of gear shifting can be learned in five minutes.

As soon as you have the car in high speed, assume a natural, comfortable position. Avoid a strained, high-tension grip on the wheel. Driving a car is not tiresome if one sits in an easy upright position. The driver who slouches in his seat must be constantly shifting. He cannot apply the brakes without sitting erect. He must change his position to shift gear.

It is quite as essential to know how to stop the car quickly and smoothly as it is to know how to start it. The operation of braking is one of the most important in driving.

Worshiped at Shrine of Speed.

The highways are strewn with the wrecks of cars whose drivers worshiped at the shrine of speed. When the crisis comes the green driver is apt to forget the counsels of his glib instructor and another accident is chalked to the toll of "I didn't know." If you must test the spirit of your car, wait until you are perfectly sure of your ability to drive, until you would be willing to be the man in the tonneau.

You have heard many an enthusiastic owner boast that his car could take such and such a hill on "high." Doubtless it will, but at the same time he is putting an unnecessary strain upon his motor when he forces such a performance. The intermediate speed is placed on the car to use. It is a mistake to allow the motor to labor.

Good Accident Preventive.

Second speed is a good accident preventive when threading the maze of city traffic. The car is easily held under leash and may be stopped gently without jamming the brakes.

Only an amateur will allow his motor to race unnecessarily. Motor racing consumes gasoline in appalling drafts, and is also hard on the engine. After you have learned the A, B, C's of car manipulation, adopt the accelerator instead of the throttle-lever on the steering wheel.

When you come to a stop in traffic, don't forget the man behind. The hand held up in warning may save a rear-end collision. Show your intention of swerving off into a side street by holding out your arm horizontally. These signs have become accepted among motorists as a universal sign language. It's these little courtesies that help to make motoring a pleasure.

AUTOMOBILE MIGHTY HANDY ON FARMERS

Faster Than Any Other Means of Transportation.

A writer, in discussing the relation of the automobile on the farm, says that after a hard day's work it is a pleasure to get into a car and take a 25-mile spin. We rest as we do, and study the methods of our neighbors.

Moreover, the automobile has another service to perform. It can bring more rapidly than your best horse "first aid to the injured." If there is an accident to a child or man, and a doctor or a surgeon is needed in a hurry, the automobile can bring him faster than any other means of transportation.

If there is trouble in the field, if some part of your farm machinery is broken down, the automobile can bring from town the needed help or the parts that you need to set the machine in motion again.

Again, the automobile brings the farmer closer to the market, whether it is the local or the distant market, and enables him to market his produce more rapidly and on better terms. The writer to whom we have referred says that he has a machine that has run for 16 months on the original set of tires, with only $3.25 expense for patching tubes. He says the purpose of his machine is pleasure, business and marketing; that he has hauled apples, potatoes, oats, eggs, butter, pigs calves and hitched it to the hay rope to unload hay into the mow.

AVOID TRAILING IN TRAFFIC

No Use Running Risk of Bumping Into Expensive Cars on Congested City Streets.

Here is a hint for the man who drives through congested city streets:

Don't trail behind expensive cars.

The best of drivers find themselves ramming into the rears of other cars

Don't Trail High-Priced Cars.

or clipping off rear fenders. It's inevitable in traffic such as we know it today.

But there is no use running the risk of bumping a $10,000-gold-plated-palace-on-wheels when there are thousands of dilapidated buses to stick behind.

The owner or driver of an expensive car is much more likely to raise a rumpus if you hit his property because a slight scratch looks like the dickens. Some drivers of flivvers, or near-flivvers, are likely to mistake a bump for pep in the motor.

AUTOMOBILE GOSSIP

A motorist who "slips" his clutch scorches and hardens the leather on the cone.

* * *

When planning a trip of any length it is a wise motorist that inventories his car and its equipment.

* * *

At the same time that you grind in the valves, clean the stems of all foreign matter and make them bright and shiny.

* * *

Always be careful to attach the rope to some part of the frame and not to the axle whenever it is necessary for a car to tow another.

* * *

A small bottle of shellac should always be carried in the car as it is invaluable for many purposes in an emergency. Gasoline will not dissolve shellac.

* * *

When the starting motor for any reason lacks power to turn over the crankshaft it may be strengthened by coupling on another storage battery, connecting it in multiple so as not to increase the voltage.

NEW ZEALAND LIFE DESCRIBED BY VISITOR

There is no unemployment problem in New Zealand. Why? Page Baby Bunting, and also the varnish makers.

James Begg of Dunedin, a member of the New Zealand Board of Agriculture, told some interesting things about his country in a recent talk to students and faculty of the State College of Washington. He is touring Washington and Oregon, studying agricultural methods, as climatic conditions there are more similar to those of his country than are those of other states.

"There were no white people in New Zealand before 1848," said Mr. Begg, "and the natives, descendants of some canoe load of Hawaiian natives who found their way there ages ago, had become very degenerate when we found them. They were cannibals and were rapidly exterminating each other when we stepped in and established civilized modes of living.

"There were no animals of any kind in the country, no birds, no fish in the streams. We have stocked the inland waters with your rainbow trout and salmon. Since there were untold ages of acumulated fish food in the lakes and streams, the fish throve marvelously at first, and it was not at all uncommon to catch rainbow of 25 or 35 pounds weight. They are settling down toward normal now, of course, and the average is seven or eight pounds. I suppose in time they will average about what yours do here, but we can still offer tourists the finest trout fishing in the world.

"Someone thought it would be nice to have a bit of rabbit hunting and let loose some rabbits. In a short time they had increased so, with no natural enemies to keep them down, that they literally wiped out all the big sheep ranches in the south by eating off all range grass as smooth and clean as a floor. For a long time a bounty has been offered for them, and the skins are used in making artificial sealskin coats. So any man temporarily out of a job has only to get him some traps and poison and go out after them to make a good income. In winter one can easily get from 20 to 100 a day, and at 25 cents a piece, that is good money.

"In one district in the north there were evidently, in some previous age, forests of some sort of resinous trees, for there are buried great beds of lumps of the resin, from the size of one's fist to a yard or more through, a few feet under the surface of the ground. In a slack season men go out with a spear, a shovel and a basket, and probe for these resin lumps which are marketed to the manufacturers of high grade varnish, the poorer quality going to linoleum factories. A man can easily make at least $2 a day spearing resin. It is so profitable that recently companies have been formed to sluice large areas and uncover the buried resin. We report about a million pounds a year.

"Because the climate is so mild and varies so little from season to season throughout the year, agriculture goes foreward without pause and stock raising is very profitable. Labor is so scarce that we are forced to use rather wasteful methods of feeding our sheep, just letting them crop off the turnip tops and leave the tubers in the ground. We have about 24,000,000 now, and annually export in refrigerator ships 6 or 7 million lambs. London will take only prime lambs, and we believe they deteriorate very rapidly if not frozen within 24 hours after they leave pasture. It was a great astonishment to me to see your cattle starting from the coast to Chicago—such an enormous distance between pasture and slaughter house. We have 42 freezing houses now in operation.

"Dairy products are our greatest export. With an area equal to Oregon and Washington, and a population about that of Washington, we now have one dairy cow for every man, woman and child in the country—about 1,200,000. Our butter and cheese come to Seattle, Vancouver and overseas to London.

"Our home consumption is not sufficient, or our labor supply enough, to warrant the estblishment of woolen or steel factories, so we import such products as textiles, autos, gasoline, books. We export wool, and have a fleet of fifty or sixty 10,000-ton steamers constantly employed, carrying our exports to the annual value of 40 or 45 million sterling. Nearly 95% of our exports are agricultural products.

"Although illiteracy is practically unknown in New Zealand, our agricultural education facilities have lagged far behind the other schools, and that is one reason why I am here in America—to see what you are doing at the Washington State College and the Oregon Agricultural College, that we may pattern after your fine work here.

"It is astonishing the social progress the farmer has made in America in the past 20 years. He is now a power in the land, instead of being everybody's football. There is a big chance for him now in our country. We have not the flood of immigration that you have here. We are trying to keep it a white man's country, and discourage immigration of the colored races, but would be glad to increase the present quota of 10 to 15 thousand white immigrants.

Hard to Understand

"Are you there?"
"Who are you, please?"
"Watt."
"What's your name?"
"Watt's my name."
"Yeh, what's your name?"
"My name is John Watt."
"John what?"
"Yes."
"I'll be around to see you this afternoon."
"All right. Are you Jones?"
"No I'm Knott."
"Will you tell me your name then?"
"Will Knott."
"Why not?"
"My name is Knott."
"Not what?"
Barrr, clank, crash, stars.

Something Burning

At a summer camp, two girls shared an upstairs sleeping porch.

One, never having been very far away from the comforts of home, knew very little about the wonders of nature.

Waking one night she became aware of a most unusual odor. Sitting up in bed she called out: "Mildred, Mildred, I smell something burning! I am going down stairs to see about it."

Experienced Mildren drawled: "Lie down, Betty, and go to sleep. That's nothing but a skunk."

Short Undertaking Company

Parlors at Genesee and Moscow. Prompt attention given night or day calls. Embalming and auto equipment furnished all funerals without extra charge. Full line of caskets at both places. At Genesee call George Schlerth at the Genesee Hotel.

"Courtesy and Service" is our motto. We relieve you of every care. 14-tf

A Timely Suggestion

This is the season of the year when the prudent and careful housewife replenishes her supply of Chamberlain's Cough Remedy. It is almost certain to be needed before the winter is over and results are much more prompt and satisfactory when it is kept at hand and given as soon as the first indication of a cold appears and before it has become settled in the system. There is no danger in giving it to children as it contains no opium or other harmful drug. Sold at Clark's Drug Store.

PERSONAL MENTION

R. S. Sullivan was a Saturday visitor in Colton.

Verne Beckman spent Sunday with his parents in Asotin.

W. R. Hickman and daughter, Carrie Mae, were Lewiston visitors Tuesday.

Dr. F. B. Evans returned from a short business trip to Spokane Tuesday.

Attorney John Nesbit was a business visitor in Genesee from Moscow Saturday.

Mr. and Mrs. John Sullivan returned from Rochester, Minnesota, Friday afternoon.

Mr. and Mrs. Geo. Boliou spent Armistice day with their son, Cecil, and wife at Coeur d'Alene.

Mrs. Frank Grieser returned to her home at Colton Thursday morning after a visit here with relatives.

Mrs. Henry Martinson and daughter, Miss Ruth, left Friday morning for Seattle, where they will spend the winter.

Mrs. Wm. Post returned home Tuesday evening after a few days spent visiting her son, Robert, and wife at Kellogg.

Mr. and Mrs. Clarence Trail left Thursday morning for Silcott, Washington, where they will spend the next few months.

R. S. Sullivan returned Friday from a few weeks' stay at Wenatchee, Washington, where he helped pick the big apple crop.

Miss Ethel Nelson returned to her school work near Liberty Lake, Washington, Monday after spending the week-end with her parents, Mr. and Mrs. N. Nelson.

Mr. and Mrs. John Meyer returned last Friday from Myrtle Point, Oregon, where they spent two weeks visiting their daughter, Mrs. G. E. Taber, and family. They report the Tabers as nicely located and enjoying good health.

Rev. and Mrs. Francis E. Ball of Troy were Genesee visitors for a short time Wednesday. Rev. Mr. Ball is pastor of the Methodist Episcopal church at Troy, having been recently transferred there from Montana. They made The News office a very pleasant call and brought word of friends in the East. They returned to Troy during the afternoon.

Valuable Paper Found

A valuable (?) paper was picked up on the street the other day and brought to The News office with the instruction that an owner be found for same. The paper evidently is the property of some school "kid." The message reads: "I nearly forgot to ask: "Honey, kin I bite your nose off?" Owner may have same by calling at The News office—and no questions asked.

Can you beat it?

How About That Dinner?

Why not take one day off from the kitchen and get your dinner at the Federated bazaar and dinner, in the Legion hall, next Wednesday. You will be saving yourself a lot of work and helping the ladies at the same time. It will be one of those dinners that you will remember until next year. 20-1

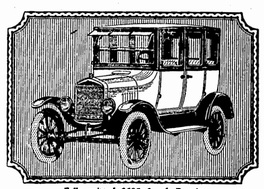
Dr. H. C. Luce

Ford

Four-Door Sedan



Fully equipped, $685, f. o. b. Detroit

Inside and out, the new Ford Four-door Sedan shows improvements of far more than usual importance.

It is lower and sturdier in appearance. New cowl, hood, radiator and apron add size and finish to the front. Sun visor, and wide, well-finished aluminum doors with bar handles perfect the design of the body.

Silk window curtains, deep broad-cloth upholstery; dome light, door lock, window regulators and handles, all finished in nickel, complete a refinement you would expect only at a far higher price.

This car can be obtained through the Ford Weekly Purchase Plan

Catholic Ladies Bazaar

The Catholic ladies will give their annual bazaar, dinner and supper in the American Legion hall on Tuesday, November 27.

This will be one of the best bazaars the Catholic ladies have ever held and is given just two days before Thanksgiving and will give everyone a chance to buy the necessaries for Thanksgiving dinner.

There will be a country store, where everything needed for the table will be on sale. There will also be a fancy articles booth, candy booth, apron booth, and several others.

A chest containing all kinds of bedroom articles, made by the ladies, will be offered for sale.

You can buy your Christmas articles here. 20-1

Not Doing So Well

Bernice Rogers, daughter of Mr. and Mrs. L. C. Rogers, who recently underwent an operation for appendicitis, is not doing as well as her relatives and friends would like to see her doing.

Good Health

If you would enjoy good health, keep your bowels regular. No one can reasonably hope to feel well, when constipated. When needed, take Chamberlain's Tablets. They are mild and gentle. Sold at Clark's Drug Store.

Federated Ladies' Aid Bazaar

Wednesday, Nov. 21

by Randall Parrish

Randall Parrish.

If the surviving frontiersmen of America see fit to form a society, there being a few of the later ones left, they could well include Randall Parrish and give him the position of historian of the body. The death of Emerson Hough was a distinct loss to that narrow circle of writing men who have made a special study of the old West and even accompanied its diminishing frontier, Randall Parrish is one of the few remaining who saw a considerable portion of the untamed region west and southwest of the Missouri.

Parrish's experience with the West goes back to 1879, when he entered upon the practice of law in a portion of Kansas still associated with the Santa Fe Trail—a disturbing era of the wild characteristics of that celebrated thoroughfare of the cattle business. In all probability, the country was too tame, or his chosen profession too prosaic, for he deserted both in the early eighties and became a prospector in New Mexico and Arizona. As the number of newspapers increased in the West the demand grew for men familiar with the country who also could write. Parrish came under the influence of journalism and followed it for a considerable period, as a result which eventually led him into prominent connection with daily papers in Denver, Sioux City, Omaha and Chicago.

Out of a rich and varied experience, accompanied by natural powers of narration, came the inevitable urge to write stories and novels. His first book appeared in 1904 and has been followed by such a list of works, appealing to a constantly widening circle of readers, that he stands well toward the top among American writers, in the matters of output and popularity. He is an apostle of the virile and thrilling, and divides his ability about equally between detective stories, and romantic stirring western tales. Sometimes he combines the two, as in "Gift of the Desert," a thoroughly exciting western story in which appears an entirely new type of secret service man.

CHAPTER I

The Choice.

It was a wonderful thing to be twenty-three, full of hope and ambition, and in the wide out-of-doors; more wonderful still to possess the glorious memory of nearly two years in the hospitals of France, six months of that time just behind the American fighting line. Yet the girl was not thinking of this then as she sat there alone at the edge of the ravine, gazing silently off across the dull leagues of desert to where a distant blue range of mountains cut off the sky with their ragged summits, while arching over all hung the clear Arizona sky, slowly turning to purple.

She compared that sun-kissed vista with other sunsets in France and Germany, when the ground was yet red with the blood of sacrificed manhood. Her heart ached still with the sad memory that would not die—hours of toil, scenes of suffering. But this mood had also passed away, and now although her eyes were still upon that outspread picture below, her thought had centered upon the present in a dull wonderment at the strange situation surrounding her. Why had she ever listened to the plea of old Tom Meager, back there in Chicago, and finally, partially from pity, partially from that new love of adventure engendered within her by service across the water, agreed to come out with him? Of course, she never had dreamed what it really would be like—life on this vast isolated ranch along the southern border, with the great desert stretching away on every side from this little oasis of water and grass. Tom Meager had never told the whole story: he had dwelt on the loneliness of his sick wife, the chance she had of regaining health, with proper nursing and care; the rare beauty of the sunsets, the wonderful glow of the cool desert nights, the wild, free existence of the range, filled with excitement and a dash of danger. It all had appealed to her strangely—the service, the complete change in environment, the escape from the humdrum life of the Marine hospital. The pay was good, the opportunity excellent, and she had said "yes" without half realizing then what it all meant.

But she realized now. Those first few weeks had been glorious indeed. She found everything new, attractive, loved, radiator and apron add size and finish to the front. Sun visor, and wide, well-finished aluminum doors with bar handles perfect the design of the body. Meager's nurse, you said? Pretty soft job, isn't it? I don't believe there will be any necessity for her having a nurse very long. What's your name?"

"Deborah Meredith."

He laughed, showing a row of cruel white teeth.

"Sounds like a story book; where did the old man pick you up?"

"My home is in Chicago."

"Well, he certainly showed good taste, I'll say that for him. You are some good-looker, Deborah Meredith. I'm d—d if I don't rather like your style."

He stared at her insolently, his glance appraising form and features much as he might take in the points of some animal he contemplated purchasing. The girl's face flushed indignantly, but her eyes never fell.

"You sure do look good to me," he announced finally, "and I don't believe I'll fire you—not yet, anyhow."

"It will not be at all necessary," she said quietly. "I shall attend to that for myself."

"You mean you will quit?"

"I certainly shall."

"Oh, h—l! Spunky little tigress, ain't you? I reckon I'll have some thing to say about that."

"You mean you will compel me to remain whether I wish to or not?" she asked in surprise. "Why, that cannot be done; I am not a slave."

"It can't hey? Do you know where you are?"

"Certainly I do."

"By G—d, I doubt it. This is the Meager ranch in Arizona. There ain't another outfit within fifty miles, and nothing else round us but desert; there ain't no water, and no grass. I'm a-runnin' things here, and you bet I know how to run them. You get me? I'm the boss; before another week's out every white man on this ranch will be hunting a job, and there'll be Mex in their places. I know how to handle 'Mex;' they'll do what I say—you bet they will. So Miss Deborah Meredith, how is it you're going to quit before ever I say you can? Aim to hoof it across the desert to Nogales? Ten miles of that stuff would break your heart. You better think it over."

She saw him clearly in the light of the window, and, in spite of her natural courage, the girl's heart sank. Was there any act of brutality the man would be incapable of? He was big, burly, with broad shoulders and a deep chest, almost a giant of a man, but it was the face which bespoke his character. Brute was written plainly all over it, seemingly imprinted on every feature, yet at the moment she did not fear him; instinctively she felt the coward skulking back of his brutishness.

"I prefer," she said quietly, "not to discuss the matter now. Surely this was not why you came in here?"

"I sure like your nerve, little girl," he admitted admiringly. "No, I didn't come exactly for that, but whatever brought me I've changed my mind. We'll let things go on just as they are at present, I reckon. But don't you ever imagine I am playing with you; I sure don't count for much out here, sister, an' what I say goes."

She watched him as he turned and went out the door, her hands clenched, a wave of intense hatred surging over her. Yet in another moment she had conquered herself, and moved quietly back to the side of the bed on which her patient lay sobbing. She bent above the distressed woman.

"He is worse even than I thought," she said, unable wholly to hide her distress. "What caused him to come in here, do you suppose?"

"He came to send me away," answered the other clasping the girl's hands. "I knew it would not be long; he has disliked me always."

"Send you away! Why, you were his father's wife. Even if there was no will you must have dower rights in the estate. Surely, that is the law."

"I—I do not know," wearily. "Tom never explained anything to me, but—but I am afraid of Bob Meager. Don't cross him; don't anger him. He is dangerous, and I am afraid of him, for your sake as well as my own."

"What do you want me to do?" the girl questioned, influenced by the timidity of the other. "Let that beast have his own way with me?"

"No—no, not that. But—but treat him fairly, Miss Meredith. He will not always be as he is today. As he said, you cannot fight or run away. All depends on winning his favor. Then sometime there will be a chance. We must wait and watch, until he is in a mood to let us both go. But even if there was a way for you to escape alone, you could not leave me here in his power."

"You fear him like that?"

"If I stand between the man and this fortune his father left, my life is worth nothing—I know that."

And Deborah Meredith, looking down into the white face lying on the pillow, made her choice.

CHAPTER II

Meager States His Plan.

It was the memory of this scene—her promise to Mrs. Meager, and her dislike of Bob Meager—which left the girl unobservant of the desert view outspread below, and thoughtless of the descending night. She had sought this spot to be alone, to escape any possibility of encountering Bob, and to turn over once more in her mind the conditions which had made her virtually a prisoner. There had been an expression in the man's eyes that had frightened her more than she would even confess to herself—an insolent boldness, a sneering dominance which haunted her memory with its sinister threat. He was playing with her as a cat plays with a mouse, biding the proper time to strike. He knew he could afford to wait; that she was utterly in his power. His very silence and aloofness increased her alarm, her dread of the morrow.

Not a day passed without witnessing a change in the personnel of the ranch. She might not have observed this, but for her own personal suspicion. Old Tom Meager would never employ a Mexican on the place, nor trust them; but now, one by one, the old hands disappeared, while swarthy-skinned riders appeared mysteriously to take their places. Within a few days the transformation was practically complete, and Bob Meager was surrounded by those of his own kind. Creatures of his will, denizens of that world he knew best. This change was, to Deborah's mind, ominous of evil; it increased her fear, and rendered more difficult any possibility of escape. The walls closed her more tightly in. What did this man plan to do with her? The question could not be answered; she could only wait fearfully for his actions to make reply. Yet it must be evil; she could conceive nothing else in Bob Meager's heart.

Her thought was not with the wild desert scene outstretched before her, or the beauty of that red sunset behind those far-off peaks. She was not even conscious of her more immediate surroundings, reminding totally oblivious to the solitary horseman, approaching along the barely discernible trail skirting the edge of the mesa. The horse was moving slowly, with nearly drooping head, and on the hard-beaten sand the hoofs made no noise sufficient to disturb her. It was on the farther edge of the chaparral that the horseman suddenly perceived the girl, her white skirt showing conspicuous in the purple light, and quickly held up his pony. She had evidently neither seen nor heard his approach, and he swung silently over the animal's head, before advancing toward her on foot. It was not until he had reached within a very few yards of her position that Deborah became aware of some presence near, and arose instantly to her feet, facing him in sudden alarm. It was too late then to flee; the man blocked the only path available.

"Frightened you, didn't I?" he asked carelessly, flipping a weed with his quirt, but with searching eyes on her face. "You must have been in some daydream, I'll say."

"I—I was thinking," she answered, a little catch in the voice, but as instantly determining to tell the truth, and thus learn, if possible, his purpose, "of what you intend to do with me. I—I cannot continue to bear things as they are."

"Why, they are not so bad, are they?" he asked provokingly, but making no effort to advance. "This is the same ranch to which you came voluntarily; I have not cut down your wages, and the food, and all that, is just as good. Do you mean you don't like it here any longer?"

"I certainly do not under the circumstances. I am no longer here of my own free will."

"Oh, is that it? Well, perhaps we can remedy that trouble. Sit down there again while we talk it over."

"I prefer to stand."

"All right then, only it ain't going to do you no good to be offish about it. I'll tell you that at the start. You ought to know by this time that I ain't the playing sort. Found any way to leave yet? I reckon not, or you wouldn't be here. Well, that lesson ought to mean something to you. I've left you alone for three days now, just to let it sink in."

"That I could not escape from here without assistance?"

"Sure; there ain't no way for a woman—a tenderfoot—to get across that desert without help of some kind, and a horse. I reckon you are smart enough to know that. It was mostly on your account I sent them old punchers away, an' got a lot o' Mex in to ride herd, an' do whatever odd jobs were needed. There ain't nobody round who cares a whoop in h—l what happens. You better let that sink in, too, first of all. Then it will be easier for us to come to an understanding."

"An understanding!" she asked in surprise. "You desire to explain, then? Yet first you threaten me?"

He laughed.

"Threaten, h—l! I don't have to threaten: I'm holding all the cards." He took a step forward, and, as the girl drew slightly back from his approach, his face quickly darkened with anger. "You don't want me to touch you, hey? or come near you? All right, I'll wait, but just the same you'll do just what I tell you to. Sit down there on that log. You hear me? sit down!"

She took the place designated, realizing the utter uselessness of refusal, while he remained standing, with one foot insolently planted on the log beside her.

"Very well," she said, forcing a strange calmness into her voice, "I will listen to what you have to say."

"Listen! I rather guess you will. I like your d—n nerve, but you'll find out I've got some myself. Now, see here, Miss Deborah Meredith. A week ago I didn't even know you existed. But after we had that little seance together the other day in the old lady's room, I made up my mind that I was going to give you a lesson. You didn't like me, did you?"

He stopped, but she did not answer, although her eyes met his own.

"Come on! talk up. I know you didn't; but I want to hear you say so."

"It certainly is true."

"Sure it's true. Why in h—l shouldn't it be? The old man had filled you full—"

"Your father never once spoke of you to me."

"Then my precious stepmother did."

"Only in reply to some questions. but nevertheless, I knew. If it is necessary for me to answer, I will—I do not like you, Bob Meager."

The man grinned almost cheerfully.

"Some fellows might get mad at that, but I don't. I rather enjoy it. Why? Because I've got you where it don't make any d—n difference. That's why. As long as I want you, I'm going to have you. I don't care what you think o' me. Likely I'm even worse than that; but from the first minute I seen you in that white uniform, I made up my mind you was the girl I wanted; and I made up my mind, too, that it wasn't any use of my trying to make love to you—not a d—n bit. You'd just laugh at that. So I went to work and figured out another way."

He turned, and walked back to his horse, and she stood there, trembling in every limb, as he vanished amid the shadows.

She understood now, clearly, definitely, just what she was called upon to face. Bob Meager had not minced his words, or left anything to imagination. He had planned this deliberately, in cold blood, and he had the will, and, perhaps, the power, to carry it out.

At first she was in a white flame of indignation; she even laughed hysterically at the fellow's threat. It seemed preposterous, absurd, a dream of delirium. Marry him! Marry that degenerate brute! Why, she would rather die a hundred deaths than have him even touch her. He was a foul, brutal cur! Yet even as she realized this, shrinking in terror from any possible contact with him, there arose in her mind a sense of fear, a grim, persistent fear she could not conquer.

He was ruthless, merciless. If he truly desired her, nothing would be permitted to stand in his way. He had not been drinking when he talked with her; he had spoken soberly and with full knowledge of what he said. Fiendish as it was, he had acted deliberately and in cold blood. That made it all the more dangerous, for he would like drink now and become an utter fiend. Within an hour he would be raging drunk, capable of any indignity, any wild act. A brute sober, he became a demon drunk. And she must face it—alone! This was the conviction that slowly took full possession of her mind. His threat was not an idle one. He could turn contemptuously away and leave her there, completely confident that she could not escape. There was no spot of safety to which she could fly, no friend to whom she could appeal.

She gazed hopelessly out into the black void; not a light gleamed anywhere except from those distant stars overhead. There was but one way leading across that expanse, the single trail connecting with the pass through the mountain canyon beyond. There might, of course, be others—known to Indian or outlaw—but this path was the only one she ever had traveled. And it never could be traversed alone on foot.

Yet, was there any other hope of escape—of postponement even? To appeal to Bob Meager would accomplish nothing. She knew the base heart of the man now if she never had before; he would only laugh, whether she came to him with reproaches or tears. And there was no one else—not a single white man left on the estate to her knowledge; not an officer of the law nearer than Nogales. The justice of the peace who was coming out to marry them! Bah! Whoever he was, he would assuredly be a creature of Meager's own choosing. No other kind would be employed under the circumstances. And Mrs. Meager would only break down and cry; under no conditions could she be of the slightest service, her terror of her stepson was the real cause of her nervous breakdown.

No, there was absolutely no one to rely upon but herself. And what could she do? The girl stood up in the darkness, her hands gripped, her eyes on the opening through the chaparral leading toward the house—the trail along which Bob Meager had disappeared. She must follow him; there was nowhere else for her to go. She must face this thing alone, with all the desperate courage she could muster. If the worst came she must act, swiftly, decisively—even to killing the monster. There was no other choice left, no other possibility of escape. But where could she procure a weapon? She possessed none of her own; had never dreamed of owning such a thing, yet they were plentiful enough about the ranch. Surely one could easily be secured.

Impelled by this thought of self-defense, realizing clearly that she could turn nowhere else with any hope of escaping this detlement; that she could neither flee the place nor find assistance, Deborah, the color high in her cheeks, her lips firmly pressed in determination, advanced resolutely through the darkness toward the house. She would defend herself at all hazards; before she would submit to that brute she would shoot to kill.

The men of the home ranch were evidently at supper, the big dining-hall being lighted, and, as she slipped past the unshaded windows, she had glimpse of the fellows within and heard their voices conversing loudly in Spanish. They were a motley bunch, scarcely a face down the long table that was not vicious and depraved—the scum of Mexico, the murdering exhibiting Indian blood. They were a precious gang of ruffians, indeed, worthy of their master, and the girl crept away, glad to escape the sound of their voices. There was a single dim light burning in the bunkhouse, but no sign of any occupant. Undoubtedly every hand on the place was at supper, and no better opportunity could be found in which to seek for and appropriate some forgot-

"Who Are You?" He Asked Gruffly.

yet with a measure of doubt in the tone. "Some poor relative?"

"Not quite as bad as that," she answered, resenting his manner, yet endeavoring to control her speech. "I am Mrs. Meager's nurse."

"Nurse!" he sneered sarcastically. "Good Lord, so the old man stood for that, did he? Well, you can hardly expect me to; it is more than my mother ever had. Do you know who I am?"

"I presume you must be Robert Meager."

"You guessed right, and I've come back here to run this ranch; you get me?"

"Quite clearly—yes."

"Oh, you do, hey? Then I'll enlighten you further. You're Mrs.

"Now Do You Get the Picture?"

ters to prove it. Now, do you get the picture?"

It was almost dark, but she could still distinguish his face, as he leaned forward peering at her. There was no doubt as to the real meaning of the man, and she comprehended fully her own helplessness of resistance. All she could hope to do now was to cause delay, to thus win a chance to think and act.

"Yes," she managed to say, marveling at the calmness with which she spoke, and now on her feet facing him. "I think I know what you mean. You have me completely in your power; you have planned it all out."

"That's the ticket. Now there ain't no use your getting mad. I like you; I like you awfully well, and I'm going to be mighty square with you. But there wasn't any other way for me to get you—was there?"

"No," she said frankly, "there was no other course possible."

"Which means you don't like me at all?"

"It means all of that, and more, Bob Meager. I do not believe I ever despised anyone so much in my life as I do you. I disliked you before I ever saw you; now I hate the very ground you walk on. Have you any use for me after that?"

"You just bet I have," he grinned. "You're sure a wildcat, but I'll tame you. D—n it! I like it in you; you're not the wishy-washy kind. One of us has got to be boss; I saw that from the very first, and that's what this means now; I'm going to be the one."

"In what way do you mean?"

"Haven't you got the idea yet? I'm going to marry you—see? I took the notion the first time I saw you—you're exactly my style. But I know'd then there wasn't but one way to do it. Now I'm ready to talk business. How is it, my lady? Going to be nice about it?"

She endeavored to rally her courage, ever attempting a laugh.

"Marry you! Not in this world. I know you are a scoundrel, but I never thought you were a fool before."

"No, and you never will again," his voice hardening. "Because you will have no chance. It is nothing to me whether you say yes or no. I been down in Nogales today, an' among

ten weapon. She advanced cautiously, listening intently for any sound, eager to accomplish her object. Once armed, she would feel more confident; the very touch of a weapon in her hand would bring her renewed courage.

The bunkhouse was a long building of adobe, the bunks lining the walls, open at both ends, the only light a lantern swung from a center beam. The glass of this was blackened with smoke, and only a dim radiance made the interior barely visible. However, there were no occupants. Without hesitation, but with heart beating wildly, she slipped silently within, her eager eyes swiftly searching the vacant bunks and the wooden pegs above, on which dangled a miscellaneous collection of garments. She advanced gingerly, satisfied that if any occupant had left his belt behind it would be found in one of the bunks.

She had gone entirely down one side, and moved across to the other before she found what she sought, her heart leaping exultantly as she perceived the gleam of a steel barrel in the dim light. It lay fully exposed on top of a dirty blanket, a wicked-looking .44 in a well-worn holster, with a belt containing a half-dozen cartridges. She grasped these in her hands, conscious, even as she did so, of the sound of voices outside. The men were already returning; scarcely a moment remained before some of them would enter the upper door. The moment was sufficient to permit the frightened girl to dash out of the lower entrance into the darkness beyond, and crouch there, the prize still securely in her hands, waiting opportunity to steal away toward the protection of the ranchhouse. None of the fellows chose that entrance, but surged in through the other without a care in the world.

The two who had entered first stretched themselves out in bunks opposite each other, puffing vigorously on their cigarettes, and conversed in English, evidently proud of the accomplishment. One she recognized as Juan Sanchez, who had accompanied Bob Meager on his return, and had since been made foreman, a swarthy, evil-eyed half-breed, with a long mustache and a livid scar on one cheek. The other was an Indian, a mere boy, but with cruel mouth, and face hideous from pockmarks. Sanchez called him Pedro, yet talked to him as he might to a dog. It was the boy who questioned eagerly:

"Vat he say, senor—the man? I hear eet not all, the fools they make so mucha noise. You have hesta?"

Sanchez blew a cloud of smoke into the polluted air, flipping the ash of his cigarette onto the floor.

"Plenty drink, Pedro," he said indo-

Sanchez Laughed Grimly.

lently, "an' no work tomorrow. The boss he marry."

"Marry! the gringo? How that he again, senor?" and Pedro sat up, dangling his feet over the edge of the bunk.

Sanchez laughed grimly.

"Ah, Pedro, I forgot you were there. It was a great night, was it not; yet, Santa Anna; it counts for nothing this side the line. 'Tis no senorita of Mexico this time, but one of his own race, which is different; now he marry for long while."

"He marry of his own race—here?"

"Sure; you have seen her; she cares for the old senora."

"The girl in white?"

"'Tis she; and Madre de Dios, I would it was I who had her. Pedro! Did ever you see such eyes? Sacra! I would ride through h—l to make her smile on me."

"Pah!" indifferently, "she is too pale for my taste."

"Pale! with those cheeks and lips! My blood boils at dream of her kisses. I'd give every maid in Mexico for such as her."

"'Tis as your taste runs, senor; but how came she to love this fiend of an Americano?"

"Love him!" Sanchez rocked with laughter. "H—ll he has but spoke to her the once, to my knowledge. I doubt if she knows yet the happiness in store for her. 'Tis when I like about him; he does not ask, he takes. Sacra! he got the other so; she hated him, yet it made no difference. He is the devil's own, Pedro. Let's stop this chatter and win a bit of sleep before the bout begins."

Deborah, scarcely venturing to breathe, her heart fluttering with terror, but her hands clasping tightly the heavy revolver, stole silently away through the darkness.

LEWISTON, IDAHO

In the District Court of the Second Judicial District of the State of Idaho, In and For the County of Latah

Louise Tierney and W. J. Tierney, her husband, plaintiffs,
vs.
Katherine Evits and the unknown owners of or claimants to the following described premises situated in Latah county, State of Idaho, to-wit: The southeast quarter of the northwest quarter (SE¼NW¼) of section seven (7) in township 37 North of Range 5 West of the Boise Meridian, containing 40 acres more or less; and also a strip of land along the south side of the north half of the northwest quarter of section seven (7), township 37 north of range 5 W. B. M., in the northwest quarter of the northwest quarter and the northeast quarter of the northwest quarter of said section seven (7), described as follows: Beginning at a point 261.7 feet south and 41.3 feet east of the northwest corner of section seven, township 37 north of range 5 W. B. M., and running thence east on a line parallel to the north boundary of said section seven a distance of 2598.7 feet to the quarter section line between the east and the west half of said section seven, thence south on the quarter section line a distance of 1058.3 feet to the one-sixteenth corner; thence west on the one-sixteenth section line 2640 feet to the intersection of the west line of said section seven, said line being the range line between ranges five (5) and six (6) W. B. M., thence north, on the range line 1016.5 feet; thence north 38 degrees 57 minutes east a distance of 66.4 feet to the place of beginning, said strip of land containing 64.089 acres, more or less; and also a piece of land lying in the southwest quarter of the northeast quarter of section seven, township 37 north of range 5 W. B. M., described as follows: Beginning at the northwest corner of the southwest quarter of the northeast quarter of said section seven (7), and running thence east along the one-sixteenth line a distance of 185.4 feet; thence south 8 degrees 00 minutes west a distance of 1333 feet to the quarter corner in the center of said section seven; thence north 1320 feet to the point of beginning, said piece of land containing 2.809 acres, more or less, the above named defendants:

You are hereby notified that a complaint has been filed against you in the District Court of the Second Judicial District of the State of Idaho, in and for the county of Latah, by the above named plaintiffs, of the nature in general terms as follows: To obtain a decree of this court quieting plaintiff's title to the southeast quarter of the northwest quarter (SE¼NW¼) of section seven (7) in township 37 north of range 5 West of the Boise Meridian, containing 40 acres, more or less; and also a strip of land along the south side of the north half of the northwest quarter of section seven (7), township 37 north of range 5 W. B. M., in the northwest quarter of the northwest quarter and the northeast quarter of the northwest quarter of said section seven (7), described as follows: Beginning at a point 261.7 feet south and 41.3 feet east of the northwest corner of section seven, township 37 north of range 5 W. B. M., and running thence east on a line parallel to the north boundary of said section seven a distance of 2598.7 feet to the quarter section line between the east and the west half of said section seven, thence south on the quarter section line a distance of 1058.3 feet to the one-sixteenth corner; thence west on the one-sixteenth section line 2640 feet to the intersection of the west line of said section seven, said line being the range line between ranges five (5) and six (6) W. B. M., thence north, on the range line 1016.5 feet; thence north 38 degrees 57 minutes east a distance of 66.4 feet to the place of beginning, said strip of land containing 64.089 acres, more or less; and also a piece of land lying in the southwest quarter of the northeast quarter of section seven, township 37 north of range 5 W. B. M., described as follows: Beginning at the northwest corner of the southwest quarter of the northeast quarter of said section seven (7), and running thence east along the one-sixteenth line a distance of 185.4 feet; thence south 8 degrees 00 minutes west a distance of 1333 feet to the quarter corner in the center of said section seven; thence north 1320 feet to the point of beginning, said piece of land containing 2.809 acres, more or less, the above named defendants:

Ornamental interior fittings are finished in nickel.

This car can be obtained through the Ford Weekly Purchase Plan.

Doors are made of one solid sheet of heavy aluminum, very light and strong

MORSCHECK BROTHERS

Ford

CARS · TRUCKS · TRACTORS

He Spoke Last

Competition was keen in the London street market. Two rivals selling ready-made coats and things, and each tried to undercut the other.

"Look 'ere," shouted the first, as a brain wave struck him. I tell yer I am selling these coats at rock bottom prices. I charges only for makin'. I don't need to make you pay a penny for the cloth, 'cause I pinches it. See?"

The other stallholder did some hard thinking. He saw the opponent's glib lie had attracted the crowd.

"Oh, yus!" he yelled derisively. "e says as 'e charges you only for the makin' 'cause 'e pinches the cloth. But I don't even charge yer for the makin', cause I pinches 'em ready made!"

Fooling His Wife

A man traveling in Kentucky came across an old negro who was fishing with a rod and line in a pool of water in the middle of the road. He approached him and said:

"You wan't catch any fish there, Jake."

"Ah know that, boss."

"Why, that's only a pool of water left there by the rain this morning."

"Ah know dat, too, boss."

"Then what are you fishing there for?"

"Well, it's like this boss. I'se jes showing mah old woman dat Ah ain't got no time to tu'n de wringch."

Soft-spoken persons seldom lead hard lives.

WHAT PROTECTIVE TARIFF HAS DONE FOR IDAHO

The following communication, stating what the protective tariff has done for the state of Idaho and saying that it has made it possible for the people to recover after the war, has been received by The News:

Protection Against Foreign Imports

Wheat per bushel, 30 cents; alfalfa and red clover seed 4 cents per pound; timothy and red top seed, 2 cents per pound; eggs, 8 cents per dozen; poultry, 6 cents per pound; butter, 8 cents per pound; hay, $4.00 per ton; barley and oats, 20 cents per 100; beans, 2 cents per pound; milk, 2½ cents per pound; wool, 31 cents per pound; cattle, 1½ to 2 cents per pound.

In fact every product that moves from Idaho from the farms and mines is protected against foreign imports into the U. S.

Examples

One hundred one cars of eggs were shipped out of southern Idaho the first three months of this year, twenty one thousand dozen to the car, gives the Idaho producer an advantage over foreign producers for the U. S. market of $1680 per car. Do you remember the eggs that were coming into our markets under free trade from China?

Beans and Peas

We have in Idaho in 1923, 150,000 acres of beans and peas with a protection of 2 cents per pound. Take your yield and multiply it by 2 cents will give you the protection the tariff has given you per acre against foreign producers for the U. S. market. Under free trade in the years 1919 and 1920, there came into the ports of Tacoma and Seattle 188,000 tons of beans from Japan, China and Manchuria, valued at $24,000,000. In 1922 and 1923, since the tariff was put on beans and peas, only $59,000 worth came into Tacoma and Seattle.

Wheat

Take your yield of wheat per acre and multiply it by 30 cents per bushel. The tariff has given you the advantage of the result over foreign producers for the U. S. market. Prices paid at local stations in interior Canada for wheat and prices paid in Idaho interior points for wheat are just about the difference in the 30-cent tariff favorable to the U. S. market.

Sugar Beets

The price of the farmers beets is based on the selling price of sugar. This year it means in the state of Idaho from a million and a half to two million dollors additional money to the sugar beet growers, when under free trade there was no market that kept the producers to grow them. Sugar beet factories were standing idle and in the hands of the receiver.

The republicans claim that our government has no right to open up the markets of this nation to foreign producers and manufacturers and lower the standard of living. Since the war our people are making a sound recovery from the terrible conditions caused by the war. Agriculture has just begun a period of prosperity under the provisions of the present tariff.

Talked About

"Mr. Smith left his umbrella again. I do believe he would lose his head if it were loose."

"I dare say you're right. I heard him say only yesterday that he was going to Colorado for his lungs.

Short Undertaking Company

Parlors at Genesee and Moscow. Prompt attention given night or day calls. Embalming and auto equipment furnished all funerals without extra charge. Full line of caskets at both places. At Genesee call George Schlerth at the Genesee Hotel.

"Courtesy and Service" is our motto. We relieve you of every care. 14-tf

A Timely Suggestion

This is the season of the year when the prudent and careful housewife replenishes her supply of Chamberlain's Cough Remedy. It is almost certain to be needed before the winter is over and results are much more prompt and satisfactory when it is kept at hand and given as soon as the first indication of a cold appears and before it has become settled in the system. There is no danger in giving it to children as it contains no opium or other harmful drug. Sold at Clark's Drug Store.

THE GENESEE NEWS

PUTTING FLESH ON FLOCK AS MARKETING TIME NEARS

Until late summer or early fall the majority of poultry raisers make little effort to fatten their birds. Up to this time the flocks are usually left on free range and their gains are more of growth of size than flesh. In September, however, the wise, among those who have birds to dispose of confine the surplus of their flocks and put them on a fattening ration.

Three methods of fattening poultry are practiced in this country—pen fattening, crate fattening, and machine fattening. The first two are the most common to-day, poultry specialists of the United States Department, of Agriculture say, while the third is used in a few places where fine quality is appreciated.

Pen fattening is practiced by many people who do not have the time or inclination to use other methods. The essentials of pen fattening are quiet, and plenty of soft food given at regular intervals, usually three times a day. Birds may be kept in flocks of 15 or 20, but the sexes should be separated. Only cockerels are usually fattened, as it pays to keep the pullets for laying.

In crate fattening a few fowls are confined in crates and fed from a trough. A crate 6 feet long, 18 or 20 inches wide is suitable and is large enough for a dozen birds. Sometimes such a crate is divided into two or three compartments, with four to six birds in each compartment. Only a little room for the birds to move about is desirable, for the less exercise a bird obtains the more readily it fattens. The top, back and ends of the crate should be solid if they are to be placed outdoors, but if they are to be in a building they may be built of lath or wire. These slats should be two inches apart in front, so as to permit the birds to eat from troughs, which are hung just outside the coop. The slats of the bottom of the coop should be obtu one inch apart to permit the droppings to fall through.

In indoor feeding the crates are placed in tiers to save space and arranged to allow for convenience in feeding and to give the chickens good ventilation. They are usually fed three times a day and are permitted to eat for half an hour at a time, when the uneaten feed is removed. The chickens should be given a heavier feed at night than in the morning or at noon.

For the highest quality a machine is essential, especially for the last 10 days; otherwise the birds will not eat nearly so much as they can digest and assimilate. The labor involved by this method makes the cost rather excessive in this country. In this method the bird is held between the arm and the side of the operator and the machine, which consists of a reservoir, and small force pump, is operated by a lever worked by the foot. The head of the chicken is grasped in the left hand and the rubber tube gently inserted until it reaches the crop, the neck being elongated as much as possible. The lever bar is lowered by the foot and the food is thus forced into the crop. When the crop is sufficiently full the tube is removed. Any chickens having feed in their crops at the next feeding period are not given any fresh feed.

Optimistic Darkey(winner of two dollars): "Ain't you all goin' to shoot any more crap?"

Second Darkey: "I'se done used up all my ammunition."

A case of very fine oranges just received. 21-1

Your dinner and supper will be ready in time November 27th in the Legion hall. 21-1

Chamberlain's Tablets Have Done Her a World of Good

"Chamberlains Tablets have done me a world of good," writes Mrs. Ella L. Button, Kirkville, N. Y. "I have recommended them to a number of my friends and all who have used them praise them highly." When troubled with indigestion or constipation, give them a trial and realize for yourself what an excellent medicine it is. Sold at Clark's Drug Store.

BANK ROBBERS HERALDED AND YEGGS ARE FOILED

(By Special Correspondent)

As George Schlerth was thinning his coffee the second time Saturday night at the Hotel Genesee, the telephone rang. George re-waters his coffee Saturday night at seven-thirty so the movie hounds will not fall asleep at the show.

After two minutes and thirty-two seconds listening to the phone, George grew pale, swallowed his Adam's apple twice and hung up.

Bandits were going to loot Genesee!

That was the low-down on the situation. The grape-vine dope was said to have been purveyed by the sheriff at Moscow.

Saturday is generally a moonshine night around Genesee. George had little trouble in gathering reinforcements and setting the stage. The gang was all there excepting one or two, perhaps. George planned to mass his force in the Potsch' apartment at the corner of the second floor. There from that vantage point the guard could catapult greasy dishwater and bedroom slippers at the invaders. General Schlerth appointed Arthur Potsch, postmaster-in-chief of Genesee, as captain of the guard. George Wheeler, police captain, was named chief scout. With his feet muffled by moccasins he was to stealthily slip up on the bandits and warn the guard of their approach.

The guard assembled and quietly awaited in their stocking feet. Watchful waiting. Not a sound was heard except the deep exhalations of the odoriferous feet. One of the leaders donned his wife's night gown thinking the bandits would not shoot an innocent women. All watched for the approach of a Buick car with an Oregon license carrying some less than seventeen bandits. One, who knew that Emmett Dalton was playing at the Spokane Hippodrome, wondered if he were leading the gang.

The hands of the clock rolled around toward morning.

Still the guard waited.

At 3:30 a big truck with a trailer, camouflaged to look like a war tank, came creeping up the street. There must have been enough nitroglycerine aboard to have blown up the town —so much that everybody was afraid to shoot.

The truck slipped up under the barricaded window. No one dared to breathe. Finally a man crawled from the front seat and glanced around. No one was in sight. He walked back to unload the swag.

—A pile of Sunday papers!!

The yeggs were foiled! ! !

Our line of personal Christmas greeting cards was never finer. You are invited to call and see them.

Building Bungalow

Contractor F. W. Loncosty is busily engaged in building a new five-room bungalow on the old Gibb farm, now owned by the Vollmer estate.

Say, Do You Like Pie?

EMMETT & BOLIOU

For a Better Thanksgiving Table

THANKSGIVING means food, and food means cooking utensils, Let us help you. There is nothing like a roaster to assist in getting a handsome, appetizing turkey prepared for the Thanksgiving table.

The enamelware roaster is the right shape and the lid is properly fitted. The sanitary surface is easily cleaned even after the longest cooking of the heaviest gravies.

The oval aluminum roasters are just the right size for praticcal use all the year. The cover sets into the rim to retain the juices.

Don't forget a medium-sized preserving kettle for the cranberry sauce. Enamelware is not affected by the acid of the fruit, and the fruit is not affected by the enameled surfece. The cranberry sauce comes on the table in full color and flavor.

We have a nice line of roasters and kettles, as well as all other utensils necessary for kitchen use.

PERSONAL MENTION

Mrs. Chas. Whalen spent Tuesday in Lewiston.

John Stoudt returned to his home in Uniontown Monday after a visit here.

Mrs. Ira Hanson returned home Friday after a week's visit with friends in Colfax.

Mrs. Ray Edyards returned home Sunday after a visit with her mother who lives in Moscow.

Mrs. Henry Craft left Thursday morning for Spokane for a visit with a sister who is quite ill.

Miss Louise Herman left Friday for Spokane where she will spend the winter and attend school.

Lena Benham arrived Friday from Pullman where he is attending college and spent the week end with relatives here.

Mrs. A. B. Maxwell returned to her home in Johnson Monday after a visit with her sister, Mrs. Mary C. Wahl.

Jack Whitted and Hartzel Edwards of Lewiston spent Saturday and Sunday with relatives and friends in town.

Mrs. A. O. Trout returned to her home in Julietta Monday after a visit at the home of Mr. and Mrs. Chas. Herman.

Misses Ida Johnson and Helen Fruth returned to their school work in Colton Monday after the week-end spent with home folks.

Leon Follett, F. C. Shork and F. S. Casebolt attended the Scottish Rite initiation ceremonies at Lewiston on Tuesday evening.

Walter and Victor Casebolt arrived Saturday from Moscow and spent the week-end with their parents, Mr. and Mrs. F. S. Casebolt.

Dave Spurbeck left Tuesday morning for his new home in Beremerton, Wash. Mrs. Spurbeck left a few weeks ago for that place.

The Misses Sylvia Evans and Carrie May Hickman left the latter part of last week for Lewiston where they will attend normal school.

Dr. and Mrs. W. H. Ehlen and Cuvier and Maxine returned home Sunday evening from a few days' visit at Spokane and Coeur d'Alene.

Mr. and Mrs. F. E. Lambert and son Loraine, and Mrs. Glen Sampson and daughter, Margaret, spent Sunday with Mr. and Mrs. Arthur Mayer at Troy.

Mrs. W. F. Jain returned home Tuesday evening from a four-weeks trip of visiting the Pythian Sisters lodges of the state in her capacity as grand chief of that order.

Mrs. A. J. Fitz came over from Pomeroy, Wash., Saturday for a few days' visit with friends and to look after property interests. She reports that Mr. Fitz is not in the best of health.

Elmer Stovall left Thursday morning for Colfax, Washington, where he will be employed in the office of the Washington Water Power company as stock clerk. A deserved promotion from the pole-climbing job at Genesee.

Mr. and Mrs. Roy Donnelly and Cecelia, Louise and Leslie Donnelly and Don Jain all of Spokane spent Saturday and Sunday at the home of Mr. and Mrs. Lou Jain. Miss Louise remained for Thanksgiving. Mr. and Mrs. Emery Vandenburg of Troy and Walter Jain and daughter, Grace, were also present on Sunday.

Some Carrot

G. A. Bumpass claims to hold the championship belt for producing long carrots this season. He claims to have pulled (with a stump-puller probably) a carrot that emasured just three feet six inches in length, out on his farm recently.

If there are any who can beat it for length, bring them in and we will see to it that the belt is transferred to the winner.

Better Watch Your Step

According to The Lewiston Tribune, 73 traffic violators were before the city judge at Lewiston for infractions of that ordinance since November 1. It might be a good idea for people of this section of the country to remember this.

Be sure to be present at the Catholic bazaar November 27th in the Legion hall. It is all for a good cause. 21-1

Business and visiting cards—all kinds at all prices.

To know how good a cigarette really can be made you must try a

That Hard Times Dance

The hard-times dance given by the Genesee post of the American Legion last Friday night was one of the very best affairs of the kind given this season. The attendance was large, the music was of the very best and everyone in attendance seemed to have a good time.

Many of the hard-times costumes were very good, but it remained for Mr. and Mrs. L. J. Baker to carry off both prizes for the "hardest" hard-times costumes.

The hall was suitably decorated for the occasion with old newspapers hanging from the ceiling, making it appear as though it was in a very bad state of repair.

Nels Liberg was cashier and he seen to it that no one got by without having the password, which was "one plunk." A. H. Potsch was appointed judge and jury as to whether fines should be assessed upon those who failed to wear a suitable make-up for the occasion. He reported having collected $5 in cold cash, and said he should have made it twice that much. He'd make a good cashier at a circus ticket wagon.

Little Boy Injured

The little son of Mr. and Mrs. Chas. Mauch had the misfortune to fall last Monday, causing a very bad rupture. The little fellow was given immediate attention and it is thought no lasting injury will result.

Jacksons Heard From

In a brief letter from Mr. and Mrs. J. H. Jackson, who are now located at Los Angeles, they state that they are nicely located and are doing well, the letter stating that "Our business is picking up fine and we are doing better each week and like it fine. It is just like summer here all the time and everything is just as green and the flowers are just as lovely. Last Sunday we all drove to Hollywood to see "The Covered Wagon." It is a wonderful play.

"Give our best regards to all."

Their address is 412 East 36th Street, Los Angeles.

The "Mellow Moon" orchestra plays for the dance given by the Ladies of the Altar Society Tuesday night. 21-1

The shooting match at Pine Grove on Monday, November 26, will be one worth attending. Don't miss it. 21-1

Don't forget the dance given by the Catholic Ladies Altar Society Tuesday evening, November 27. 21-1

Pine Grove News

Lester Hayden, jr. is reported to be down with the measles.

Percy Armstrong has returned to Bend, Oregon, after a couple of weeks stay with his brothers here.

Mr. and Mrs. Henry Whitted and children spent Saturday and Sunday in Moscow visiting relatives of Mrs. Whitted.

Dave Spurbeck left on Tuesday for Bremerton, Wash., where he will join Mrs. Spurbeck, who is visiting home folks. They have not definately decided where they will reside.

Mr. Johnston of Lewiston, prominent as a Sunday School organizer, visited the Pine Grove Sunday school last Sunday and gave an interesting talk. Sunday evening many came out to see the magic lantern slides shown by him. Several slides of various Sunday schools and scenery, as well as many slides from Bible history were shown. These were made especially interesting because of the explanation accompanying each slide.

Are Nicely Located

A few lines from Mr. and Mrs. Jack Barnes, now residing at Wilbur, Washington, ar to the effect that they are fairly well settled now and that they like their home very well. Mr. Barnes says they expect to visit Genesee at Christmas time, if nothing unforseen happens to prevent.

An Appreciation

Mr. and Mrs. Smolt wish to voice their appreciation of the many kind acts and help extended them during their recent fire, and especially do they thank those who worked so hard in keeping the fire from spreading to their apartments and to other buildings. A telegram expressing sympathy from Mr. and Mrs. J. S. Larrabee at Sacremento, California, also gave them heart to renew their business efforts in Genesee.

Mr. Smolt will rebuild and remodel his building as soon as possible and will make the place fully as inviting as before. He will soon place on sale all stock on hand at greatly reduced prices. 21-1

Attention Bowlers

Members of the Bowling club will please call at Burr's office and pay their club dues before November 23. We need the money now to pay for remodeling the alleys.

Comittee. 21-1

I will remember Tuesday November 27th to take dinner at the Legion hall. 21-1

Catholic Bazaar

The ladies of the Altar society of St. Mary's church have made an earnest endeavor during the summer and fall months to collect meaterial for their annual bazaar, which will be held in the Legion hall on Tuesday, November 27. The sale of articles will begin at 10 o'clock. There will be a fancy articles and apron booth; a home-made candy booth for the sweet, with all kinds of dolls for young and old; the fish pond is prepared for big business; the country store will help you in every way to make preparations for your Thanksgiving dinner. You will find there the famous potato, raised in our own country, with the Genesee flavor. The chicken, duck or goose, dressed or undressed, cookies, creampuffs, doughnuts etc., everything you may wish for.

Dinner will be served at 12 o'clock, and such a dinner! It will be the talk of the town, and you will miss a great deal if you are not there. Supper, which will be served at 6 o'clock, will help you out for the dance which will be given in the evening, after all the articles have been sold.

The whole affair will help you to drive away the cares and troubles of life. Here you will meet your friends, whom you have not seen for a long time, and we will all be young again. 21-1

Shooting Match

You are asked to not forget the shooting match to be held at Pine Grove on Monday, November 26, when contestants will shoot for turkeys, geese, ducks, pork and beef. Lunch will be served. 21-1

Printed and engraved visiting cards.

TOOTH PASTE

SYNOPSIS

CHAPTER I.—On the isolated Meager ranch, on the southern border, Deborah Meredith, trained nurse, is in attendance on Mrs. Meager, whose husband has recently been killed, victim of an accident. Immediately after the death, Bob Meager, Mrs. Meager's stepson, arrives and takes possession. He insults Deborah and she resolves to leave, but there seems no possibility of her getting away, alone.

CHAPTER II.—Meager gloats over Deborah's plight, telling her he has sent for a justice of the peace, who will marry them tomorrow. Horrified, the girl secures a revolver.

CHAPTER III

The Coming of the Judge.

Assured that the way was clear, Deborah made a quick passage across the open space, a dim, ghostly figure fleeing through the night, and succeeded in obtaining entrance at the side door without being observed.

First of all she must safely conceal the weapon she had stolen, which was too large and cumbersome to be carried upon her person. Her own room at the end of the hall, small, but neatly furnished, gave the greatest promise of security, and she felt a decided sense of relief when she finally thrust the weapon under various articles at the bottom of a bureau drawer. It was there, ready at hand, if an emergency arose, while she felt fully prepared to make use of it. The conversation just overheard had strengthened her resolve to defend herself at all hazards.

Certain that nothing further would occur until after the arrival of the expected guests from Nogales, she stole into the room occupied by her patient, relieved to find Mrs. Meager sleeping soundly. Locking the door, she sat down wearily at the window, which was slightly open, peering anxiously out into the night, the cool evening air of the desert caressing her hot cheeks.

Another day? What would it bring to her? Married to Bob Meager? death? or would she be a fugitive, with the stain of murder on her soul? She shuddered, the blood seeming to stop circulating in her veins, as these questions brought home so nakedly the situation. It must be one of the three; there was no alternative. The fellow was fully capable of this in fact. He was but repeating an old offense. Somewhere, down below those mountains that marked the boundary line, a girl of another race had met this same fate now confronting her, and was paying the price.

Well, she would never pay it, or if she must, then she would choose herself what that price should be. She felt at that moment that she could kill the brute as she would a mad dog. It was a duty, a privilege. Again and again her mind swept about the unbroken circle; the chain binding her was complete; she could turn nowhere for help; she was absolutely a prisoner. The revolver hidden away in that bureau drawer alone promised protection. There were tears in her eyes, but not tears of weakness or of pity; her lips were firmly set, and her hands clasping the window sill were steady with determination. She had made up her mind.

She was alone—alone! Beyond law, justice, mercy even, without a friend, a hope; a mere atom left to perish at the will of a brute. Even God had deserted her.

Her wrist watch had stopped, and she possessed no knowledge of the time, yet surely it must be late. The respite now would be short; those who were coming to carry out this mockery could not be delayed much longer. She even hoped now they would come; anything was better than this uncertainty, this horror of waiting.

She wondered where Bob Meager was, and what he was doing. There was no movement about the house, except faint of the cook in the detached kitchen. The fellow's regular work would have been completed long ago; no doubt he was busily preparing some sort of feast with which to celebrate the wedding. The wedding! Her wedding! There was the harsh mockery of laughter in her voice as she repeated over aloud the ironic words. Her wedding! Girl-like she had wondered often what it would be like. And now it was here; she was actually waiting the hour, the moment. And the husband; the man whom Fate or the devil had brought to her? He was waiting, too, no doubt, alone in the front room yonder, drinking himself into a reckless courage, becoming a greater demon with every moment of delay. It was too much, too much. The very heart seemed to go out of her, and she buried her face in her arms on the sill, her body shaking with the sobs which could no longer be restrained.

Suddenly her ears caught the distant sound of horses' hoofs through the silence, and she sat up, gasping for breath, once more clutched by fear. Yes, they were actually coming. the hour was already at hand; he had not died, to her, not merely threatened—he was really brute enough to carry out the mad scheme. She was upon her feet, standing, motionless and rigid, back beyond view, when the little party rode up to the main door of the ranch house, which opened at their approach, a startling beam of light flashing within.

There were but three in the company, all men. Two of the faces she could not distinguish at all, one a rather trim figure, sitting his saddle like a cavalry man; the other a humping, decidedly ungainly fellow, topped with a broad Mexican sombrero which completely shaded his features. These two remained mounted, but the third man swung instantly down from the saddle, noisily greeting Meager as he stepped into the open doorway. He was a heavily built American, with coarse, bloated face, and wore a scraggly beard. When he spoke he croaked like a frog.

"Hullo, Bob!" he called out, wadding forward. "Well, I got here all right."

"So I see," with no special cordiality in the voice, which was hoarse from drink. "And you didn't come alone, Garrity; who the h—l is with you?"

"Alone!" He sputtered out a laugh. "Did you think I'd ride across that d—d desert at night alone? Not for all the money you got, Bob Meager. Arvan came along with me, an' out here at Silver Springs we run into another old pard o' yours, an' persuaded him to ride on along with us. Ain't that all right?"

"It depends! D—n you, Garrity, I told you this was to be a private affair, didn't I? Who is the fellow you brought along from Silver Springs?"

"Frisco—don't that beat h—l?"

"Frisco! Why, by G—d, I never supposed he dared show up this side the line." He stepped out eagerly, reeling a little from the liquor he carried, yet heading straight toward the taller figure in the dim light. The latter swung down from the saddle and met him. Meager, garrulous with drink, greeting him effusively.

"Say, I'm glad to see you, Kid," he burst forth, "but how the h—l do you dare come here? There is a lot o' guys who'd kill their own mother for the reward Arizona's got on you. Tryin' to commit suicide?"

"No, not as desperate as that, Bob," answered the other, his voice rather low and musical. "I knew what I was doing all right, and these fellows didn't catch me asleep out at Silver Springs. I knew who they were before I joined up with them. Fact is, Bob, I was headed this way and willin' to have company of the right sort."

"Headed this way? Huntin' me, you mean? What's up?"

"Nothing to worry about tonight. What I came for will wait. Safe for me here, isn't it?"

"Sure," and Meager burst into a drunken laugh. "I've cleaned out the old outfit complete. Come on in, all of you, an' let's have a drink. Hey there, Sanchez," and his voice roared out the order to the bunkhouse. "Take care of those horses."

Deborah, her heart beating wildly, sank down upon a chair, with face buried in her hands. They had come, and there was no hope in them. The judge, the half-breed, were there in the pets, dancing to the voice of their master; the very tone in which he greeted them spoke his contempt of the fellows. Any appeal for mercy to such as they would be but wasted breath. And the third man! The girl had somehow, at first view, hope of him. His trim appearance in the dim light, the pleasant, firm sound of his voice, her knowledge that he was not part of the original conspiracy, had given her a sudden thrill of expectation. But this existed no longer since she heard his name. The "Frisco Kid"; the very sound of it served to chill her blood. Outlaw, desperado, spoken of in whispers along the border; tales of him had reached her ears ever since her first arrival. There was no hope for her in his presence.

Someone rapped gently on the door, and she sprang to her feet and stood motionless, staring through the darkness. The rapping came again.

CHAPTER IV

The Marriage.

Deborah stepped forward silently, her lips pressed shut, opened the bureau drawer, straightening up once more with the heavy .44 gripped in her hand. The time had come, and she suddenly felt calm and cold.

"Who is there?"

"It's just me, Miss Meredith," answered a woman's voice weakly. "I've got one of my spells again. I—I need you bad. I just thought I couldn't drag myself this far; only I had to."

The reaction left the startled girl trembling, but she had no doubt as to the urgency of the case. Thrusting the revolver back into its hiding place, unwilling that Mrs. Meager should even see it, she swiftly unlocked the door and stepped forth into the dimly lit hall. Her eyes caught one glimpse of her patient's face, ghastly white, but

Directly Fronting Her Stood Juan Sanchez.

with terror rather than pain, and as quickly realized that she had walked into a set trap. Before she could even spring backward, a burly form crowded past her into the opening, completely blocking it, while directly fronting her, grinning maliciously, stood Juan Sanchez. She knew, without seeing, who was behind her—Bob Meager, chuckling in drunken satisfaction. It was the shrinking, frightened woman against the opposite wall who spoke first.

"I—I didn't want to do it," she screamed hysterically. "He—he made me; he—he said he'd kill me if I didn't. My G—d! what do these men want of you?"

"Shut up!" roared Meager angrily. "Run the old fool back into her room, Juan, and shut the door on her. Go in; I'll take care of the girl. Rather looked you that time, I reckon, young lady."

She looked him coldly, contemptuously in the face, conscious of the struggle to remove the older woman.

"Don't try to remain, Mrs. Meager," said quietly. "Go back to your room. I can take care of myself."

"But—but, dearie, what is it they want to do with you?"

Deborah laughed bitterly, so desperate by then as to be reckless.

"Marry me to this drunken brute," she explained, "this delightful stepson of yours. There is nothing you can do to help me; so go on back to your room—please go!"

Sanchez, grinning still, as though he enjoyed the task, forced the helpless woman down the hall. He shoved her roughly into her room, closed and locked the door. Deborah heard the fall on the floor within, but her eyes were upon the threatening face of Bob Meager.

"Well?" she said shrply, "you seem to have won the first round?"

"You bet I have. There wasn't no need breaking in, while there was an easier way. So you ain't going to make no row?"

"I have not said what I mean to do."

"An' I don't give a d—n," roughly. "Only I'd like to know whether you're going along by yourself, or whether we got to drag you? It's one or the other of them two things."

"Along where?"

"To the living-room, of course. That's where I aim to have the ceremony pulled off."

The girl thought quickly. Resistance there and then was absolutely useless. Both men were armed, and one of them, at least, was crazy drunk. It would be better to appear to yield, to seem reconciled to the inevitable. She was weaponless, unable to put up any defense; perhaps in the larger room some better opportunity for action might present itself. If she lulled their suspicions, led them to believe that she was unarmed, she might be able to snatch a revolver from some holster, or even evade them and rush back to the safety of her own room. It was a grim, ghastly chance, but she could think of none better.

"I prefer going there by myself," she said, wondering at the steadiness of her voice, watchful of the expression on Meager's leering face. "No! don't touch me; don't dare to touch me."

The fellow laughed, but there was a snarl to his tone.

"All right; so the cat has still got claws, has she? Well, I guess I can wait putting hands on you; it won't be for long. Go on ahead, then. Come along, Sanchez."

In spite of her trembling limbs the girl walked firmly, never so much as turning her head to glance at the two behind her. She must act her part, play her character, permit them to think her indifferent to results, yet in no way afraid. Without a question she opened the door herself at the end of the narrow hall, and stepped into the room beyond. There were two men in the room, the short, thick Mexican called Arvan, sprawling on a settee, and the judge, sunk into the easy chair, where old Tom Meager had sat for so many years, calmly smoking a pipe. At their entrance the fellow sprang to his feet, conscious of the presence of a woman, and stepped forth into the light.

The Startled Mexican and Meager Collided.

"Frisco! Why, by G—d, I never supposed he dared show up this side the line." He stepped out eagerly, reeling a little from the liquor he carried, yet heading straight toward the taller figure in the dim light. The latter swung down from the saddle and met him. Meager, garrulous with drink, greeting him effusively.

"Say, I'm glad to see you, Kid," he burst forth, "but how the h—l do you dare come here? There is a lot o' guys who'd kill their own mother for the reward Arizona's got on you. Tryin' to commit suicide?"

"No, not as desperate as that, Bob," answered the other, his voice rather low and musical. "I knew what I was doing all right, and these fellows didn't catch me asleep out at Silver Springs. I knew who they were before I joined up with them. Fact is, Bob, I was headed this way and willin' to have company of the right sort."

"Headed this way? Huntin' me, you mean? What's up?"

"Nothing to worry about tonight. What I came for will wait. Safe for me here, isn't it?"

"Sure," and Meager burst into a drunken laugh. "I've cleaned out the old outfit complete. Come on in, all of you, an' let's have a drink. Hey there, Sanchez," and his voice roared out the order to the bunkhouse. "Take care of those horses."

Deborah, her heart beating wildly, sank down upon a chair, with face buried in her hands. They had come, and there was no hope in them. Newspaper Association Member No. 2350

IS THERE A MILE POST IN YOUR TOWN?

The Zero Milestone, located just behind the White House at Washington, on Meridian of Longitude Zero, dedicated to the Nation and accepted by President Harding, is the starting point for road measurement east, west, north, south of the capitol of the Nation.

It is forty miles to Baltimore. It is also forty-five miles to Baltimore, depending on the part of Baltimore to which one measures! It may be two hundered and fifty-three or two hundred and sixty-seven miles to New York, acording as one measures to the Battery or somewhere up above Harlem.

Every town in America ought to have a milestone, to which road distances from other towns could be measured, and from which distances could be computed. If an error of one mile was made in estimating distance between town and town, across the continent, the motor traveler might easily be several hundred miles out of his calculations.

A town milestone costs little. It can easily be financed by the local civic or commercial club. Its placement and use will foster civic pride, encourage tourist travel, and be an everlasting convenience to all who use it. A little research will compute its exact distance from the Zero Milestone at Washington, still further adding to its interest.

From a commercial standpoint an official milestone would be of service in giving readers of advertisements of real estate, for example, definate information. A farm may be advertised as being six miles distant from Jonesville, the reader would know that the distance is six miles from a fixed point in Jonesville, which would be in the heart of the city.

Why They Flunked

Among recent schoolboy examination "howlers" we choose the following:

"Things which are equal to the same thing are equal to anything else."

"A grass widow is the wife of a dead vegetarian."

"Oceania is that continent which contains no land."

"In India a man out of a cask may not marry a woman out of another cask."

"Parallel lines are the same distance all the way and do not meet unless you bend them."

"Gravitation is that which if there were none we should all fly away."

"Louis XVI was gelatined during the French revolution."

"Horsepower is the distance one horse can carry a pound of water in an hour."

"Slang is a kind of new writers dance."

"Letters in sloping print are hysterics."

Such Service—Such Service

He went into a restaurant on Friday.

"Have yez any stewed whale?"

"No sir," said the waiter.

"Then bring me a beefsteak. The Lord knows I tried hard enough to get fish."

A Great Story Year

A golden sheaf of stories is in preparation for 1924 readers of The Youth's Companion. There will be stories of the Western ranch life and thrilling adventure; stories of gumption in getting a job and making a success at it; stories of lively scrimmage on the athletic field—football, baseball; stories of girls in school and college and working their way in the world of business; stories of the old farm folks down in Maine, told intimately by C. A. Stephens; stories of Caleb Peasleе's shrewdness and horse sense; stories of resourcefulness and pluck in situations of danger and extremity; stories of the sea and of the mountains—stories to please every fancy of old readers who love the story of character and for those who like best the story of swift action. It will be a great year in the history of The Youth's Companion.

The 52 issues of 1924 will be crowded with serial stories, short stories, editorials, poetry, facts and fun. Subscribe now and receive:

1. The Youth's Companion—52 issues in 1924.

2. All the remaining issues of 1923.

3. The Companion Home Calendar for 1924. All for $2.50.

4. Or include McCall's Magazine, the monthly authority on fashions. Both publications, only $3.00.

Washington Water Power Co.

In the District Court of the Second Judicial District of the State of Idaho, in and For the County of Latah

Louise Tierney and W. J. Tierney, her husband, plaintiffs,
vs.
Katherine Evits and the unknown owners of or claimants to the following described premises, situated in Latah county, State of Idaho, to-wit: The southeast quarter of the northwest quarter (SE¼NW¼) of section seven (7) in township 37 North of Range 5 West of the Boise Meridian, containing 40 acres more or less; and also a strip of land along the south side of the north half of the northwest quarter of section seven (7), township 37 north of range 5 W. B. M., in the northwest quarter of the northwest quarter and the northeast quarter of the northwest quarter of said section seven (7), described as follows: Beginning at a point 261.7 feet south and 41.3 feet east of the northwest corner of section seven (7), township 37 north of range 5 W. B. M., and running thence east on a line parallel to the north boundary of said section seven a distance of 2598.7 feet to the quarter section line between the east and the west half of said section seven, thence south on the quarter section line a distance of 1058.3 feet to the one-sixteenth corner; thence west on the one-sixteenth section line 2640 feet to the intersection of the west line of said section seven, said line being the range line between ranges five (5) and six (6) W. B. M., thence north, on the range line 1016.5 feet; thence north 38 degrees 57 minutes east a distance of 66.4 feet to the place of beginning, said strip of land containing 64.089 acres, more or less; and also a piece of land lying in the southwest quarter of the northeast quarter of section seven, township 37 north of range 5 W. B. M., and running thence east on a line parallel to the north boundary of said section seven a distance of 2598.7 feet to the quarter section line between the east and west half of said section seven, thence south on the quarter section line a distance of 1058.3 feet to the one-sixteenth corner; thence west on the one-sixteenth section line 2640 feet to the intersection of the west line of said section seven, said line being the range line between ranges five (5) and six (6) W. B. M., thence north, on the range line 1016.5 feet; thence north 38 degrees 57 minutes east a distance of 66.4 feet to the place of beginning, said strip of land containing 64.089 acres, more or less; And also a piece of land lying in the southwest quarter of the northeast quarter of section seven, township 37 north of range 5 W. B. M., described as follows: Beginning at a point on the west corner of the southwest quarter of the northeast quarter of said section seven (7), and running thence east along the one-sixteenth line a distance of 185.4 feet; thence south 8 degrees 00 minutes west a distance of 1333 feet to the quarter corner in the center of said section seven; thence north 1320 feet to the point of beginning, said piece of land containing 2.809 acres, more or less, all in Latah county, state of Idaho, against the said defendants. The complaint avers that the plaintiff, Louise Tierney, is the owner in fee, as her sole, separate property and estate, of the said lands and premises, and that defendants, without right, claim some title or interest therein, adverse to plaintiff. The prayer of the complaint is that defendants be adjudged to have no title or interest in said premises, and that plaintiff, Louise Tierney, have her title quieted in and to said lands and premises. Plaintiffs further pray that it be adjudged and decreed that John Kambitsch and John Kambitsch, mentioned and named in the complaint, was and is one and the same identical person. It is further prayed in the complaint, that it be adjudged and decreed that Michael Irvitz, Michael Irwitz, Michael Ivets, Michael Evetts and Michael Evits, mentioned and named in the complaint, was and is one and the same identical person. It is further prayed in the complaint, that it be adjudged and decreed that Louise Tibnie and Louise Tierney, mentioned and named in the complaint, was and is one and the same identical person, and pray for such other and further relief in the premises as to the court may seem just, meet and proper.

And you are hereby directed to appear and answer the said complaint within 20 days of the service of this summons, if served within said judicial district, and within forty days if served elsewhere. And you are further notified that unless you so appear and answer said complaint within the time herein specified, the plaintiff will take judgment against you as prayed in said complaint.

Witness my hand and the seal of the District Court of the Second Judicial District of the State of Idaho, in and for Latah County, this 27th day of October, A. D. 1923.

HARRY A. THATCHER, Clerk.

Good Health

If you would enjoy good health, keep your bowels regular. No one can reasonably hope to feel well, when constipated. When needed, take Chamberlain's Tablets. They are mild and gentle. Sold at Clark's Drug Store.

We do printing of all kinds.

WHAT DO YOU READ EVENINGS?

With old Sol tucking himself into bed early, there will be lots of time for evening reading in the next few months. It's wisdom to lay in a supply of good books and magazines now.

Here is one of the best bargains of its kind in the world:

The Open Road

an interesting monthly magazine, and your choice of one of these famous books:

Blazed Trail by Stewart Edw. White.
The Trimmed Lamp by O. Henry.
Lord Jim by Joseph Conrad.
Return of Sherlock Holmes by C. Doyle.
Haunted Bookshop by Chris. Morley.
Magnificent Ambersons by Booth Tarkington.
Ivanhoe by Sir Walter Scott.
Alice's Adventures in Wonderland by L. Carroll.

Separately they would cost $3.40, but the combination price is only $2.60

The books are full size, richly bound in English red leather, and beautifully printed,—a splendid addition to your library or a fine Christmas gift for your best friends.

The Open Road comes 12 times a year. It's a magazine that hits the "men folks" just right, and the women and girls are reading it with equal interest. Stirring stories of life in the great cities, in the deep woods and on western plains fill the pages of The Open Road, also articles on business opportunities, athletics, exploration and adventure in far countries, and on the personal problems of life. President Coolidge has recommended The Open Road highly.

It's helpful as well as an entertaining magazine,—just what your family will enjoy.

Don't delay getting this remarkable double bargain. Send today $2.60 to The Genesee News office, and state what book you want. Your subscription will be forwarded to the publishers at once.

Notice for Publication of Time Appointed for Proving Will, Etc.

In the Probate Court of the County of Latah, State of Idaho.

In the Matter of the Estate of Mary Isaksen, Deceased.

Pursuant to an order of said Court, made on the 19th day of November, 1923, notice is hereby given that Monday the 10th day of December, 1923, at 1 o'clock p. m. of said day at the court room of said Court, at the Court House in the County of Latah, has been appointed as the time and place of proving the Will of said Mary Isaksen, deceased, and for hearing the application of Peter Isaksen for the issuance to him of Letters of administration with the Will annexed, when and where any person interested may appear and contest the same.

Dated this 19th day of November, 1923.

THE GENESEE NEWS

VOL. XXXV — GENESEE, LATAH COUNTY, IDAHO, FRIDAY, NOVEMBER 30, 1923. — NO. 22

SEMI-LOCAL NEWS CLIPPED FROM EXCHANGES

$100 Reward

The Fidelity & Deposit company, of Maryland, has offered a reward of $100 for the arrest and conviction of the young man who robbed the Cottonwood State Bank here November 9.—Cottonwood Chronicle.

Work Started on City Water Plant

Contractor J. W. Poe has a large force of men at work on the excavation for the purification and filtration plants as well as the new reservoirs. Men are also digging the trenches for the new iron pipe to be installed. About two-thirds of the laborers are local men.—Lewiston Banner.

Dog Had Hard Luck

S. P. Callison's spaniel has had hard luck this fall during his bird hunting expeditions. Five different times he has had rows with porcupines and suffered accordingly. Each time he came came out of the battle with his mouth full of quills which had to be pulled out with pliers—a painful process to say the least. The last time he had 35 or 40 quills in his mouth and head. A number of porcupines have been killed in this vicinity this fall.—Kendrick Gazette.

May Use Uniontown Brick

W. D. Seaver of Kansas City, engineer for the Chinook Construction Co., which has the contract for installing Lewiston's $380,000 water system, was in the city last Friday negotiating with George Herboth, proprietor of the Uniontown brick yard, for a large amount of brick to be used in the work on the water system being done at Lewiston. It is stated that if the deal is completed the entire output of the local plant will be required.—Uniontown Journal.

Arrested on Moonshine Charge

Sheriff James J. Keane and Deputy Grant Robbins Tuesday afternoon arrested Herman Boyd, a farmer of the Randall flat vicinity. The officers found a home-made still and a keg of home-brewed liquor. Mr. Boyd was arrested on the charge of possession and manufacture of intoxicating liquors. He waived his preliminary hearing before Judge Nelson Wednesday and was bound over to the district court, under a $500 bond. The arrest of Mr. Boyd came as a surprise to many of his friends. —Troy News.

Conversation 3900 Miles

The local office of the Interstate Utilities company reports what is probably the record for long distance conversation to be held from this county. Tuesday afternoon they completed a connection between Pierce and Keokuk, Iowa. The call was routed from Keokuk to San Francisco, Portland, Spokane, Orifino and Pierce, a total distance of 3900 miles. According to reports the conversation was just as distinct as the local one. This was made possible by mechanical repeaters at Spokane and Portland and a transcontinental repeater at San Francisco. It took 15 minutes to complete connections, and the conversation lasted 8 minutes. The toll was $15.30.—Clearwater Tribune.

Grain Continues to Roll In

The hauling of wheat continues day after day, and will doubtless last for a week or two longer. Despite the fact that many thousands of sacks of wheat were delivered to Lewiston early in the season, as soon as harvest began, in order to take advantage of an early cash market, there have been stored at the Farmers' warehouse in Asotin at this time close to eighty-five thousand sacks of wheat, and the manager, Mr. Tate, is of the opinion that a total of one hundred thousand sacks will be in the warehouse before the hauling season reaches an end. This is remarkably good, when it is known that the two mills, at Jerry and in Asotin, together will have taken in nearly that much more, to say nothing about the quantity that has gone to Lewiston.—Asotin Sentinel.

"What Do They Mean?"

"Farmers in the vicinity of Colton have less mortages on their land than farmers in any other district of Whitman county, and now these same farmers are planning to ship in dairy cattle through the Farm Bureau. What do they mean?"—Colfax Gazette.

The answer to that query is that the Colton farmers have found that dairying pays. The ones who have been making the most of this line of farming are those who have come through the hard times with money in the bank; who have paid their bills regularly, and are comparatively on "easy street."

They have seen the profits to be made by dairying, and are now on the highway to increase these profits by building their herds to a higher grade of efficiency. Some have been compelled to use only the poorer grade of milch cows to get results, yet they have seen that the returns are good even from scrub stock, and are getting better stock to replace the poorer ones.

Some have small herds of good cows and are adding to their number for increased revenue. Others have good herds now and are buying heifers for replacement.

Only the pessimists scout the good in the plan of shipping in better cows. Their cry is "over production."

When the state furnishes enough milk and other dairy products for local consumption, then the cry of overproduction may be of some effect.

Even then, the orient will be a ready market for any surplus for many years to come.

Going way back to the New England states, and coming across the continent, there is no overproduction in dairy products. The population is growing too fast for that. It is a visionary bugaboo that exists only in the minds of those who refuse to see the light.

Colton farmers are on the right track and their rewards will be certain.—Colton News-Letter.

Barthelmess In "Tol'able David"

The picture at the opera house Saturday night will be "Tol'able David," in which Richard Barthelmess will star. While Mr. Barthelmess is new to Genesee picture fans he is conceded to be one of the best on the silver screen.

The story tells of the love and adoration of a carefree mountain youth for his big brother that lifts him from boyhood to manhood in a single day and causes him to scale insurmountable heights in behalf of his brother.

The play, replete with thrilling adventures staged in the mountains of Virginia, is full also of heart thrills and unusual simple family life. Mr. Barthelmess, as David, reaches the hearts of his audiences through his appeal for sympathy for the ideals of the romatic country boy, and he thrills them with his revelation of indomitable courage and tenacity of purpose at the risk of his own life in defending these ideals.

The touching love theme which runs through the story, being the basis for many delightful romatic scenes, not untouched by comedy at times, furbishes a beautiful background.

Mr. Barthelmess, who first appears before the public as a star in this play gives a sympathetic and understanding portrayal of the youth "David,"which will bring an answering heart throb from all who see him.

Idaho Potatoes Take First Place

Idaho potato growers were the big winners at the third annual Pacific Northwest potato show given recently in Spokane under the auspices of the agricultural bureau of the Spokane Chamber of Commerce, according to an announcement made by H. O. Werner, University of Nebraska, who acted as chief judge. Idaho growers took first prize, both in commercial and certified seed stock, with Netted Gems, Idaho Rurals and Bliss Triumphs.

Oregon excelled with Burbanks, taking first in both the commercial and certified seed classes. Montana won in both classes with Irish Cobblers. Washington won first in both the commercial and certified classes with Early Ohios, and British Columbia took home all the prizes in miscellaneous varieties of certified stock.

New Arrivals

Mr. and Mrs. Sam Lange are the proud parents of a baby boy, born Sunday, November 18. Weight, eight pounds. Mother and babe are doing nicely.

Mr. and Mrs. F. J. Niemann are the proud parents of a baby daughter, born Wednesday, November 21. All included are doing nicely.

Mr. and Mrs. A. C. Linehan are entertaining a little stranger at their home, who came up from Lewiston with her mother the other day. She weighs 8½ pounds and arrived at St. Joseph's hospital on November 16. All concerned are doing nicely.

Plenty of Turkeys

For the first time since the war, Moscow dealers report an abundance of turkeys to supply the Thanksgiving market at a price of 10 cents a pound below that of last year. The demand is greater than usual.

You may not believe in the old saws, but some of them have sharp teeth.

WHAT HAPPENED HERE TWENTY YEARS AGO

Jim Mulalley left yesterday morning for Rosalia where he says he will assist a friend in getting married.

Miss Pauline Steltz returned the last of the week from a visit to Spokane. Going she was accompanied by her brother Ed who has entered the Blair business college.

Mr. and Mrs. E. T. Platt returned Tuesday evening from their visit to Salmon river. Returning, in crossing the divide from Forest they experienced much difficulty on account of the storm and heavy snow.

Star Lodge, No. 5, Knights of Pythias has chosen officers as follows for the ensuing term: A. J. Fitz, C. C.; Dr. H. J. Smith, V. C.; F. E. Dicus, Prelate; H. A. Thatcher, M. of W.; A. A. Haymond, M. at A.; Hans Bugge, I. G.; M. Driscoll, O. G.; P. W. McRoberts, K. R. S., M. F.; Chas. Power, M. of E.

Anna and Laura Sheldon accompanied by Paul Rock left yesterday morning for Spokane where they will be joined by Tom Ingle. A double wedding will follow. Anna Sheldon and Paul Rock and Laura Sheldon and Tom Ingle will be made man and wife. In departing Mr. Rock informed us that he was undecided as to what he will do in the future but does not intend returning to Genesee.

Poultry Show at Moscow

The ninth annual show of the Panhandle Poultry association will be held at Moscow, Idaho, December 12-14, inclusive. This is an official American Poultry association show. The judging will be by comparison and competition is open to anyone who owns poultry. The association receives the birds from the station, cares for them during the show, and returns them to the station after the show. Cash premiums will be awarded for any breed recognized by the American Poultry association. A number of special prizes will also be awarded.

In addition it is planned to hold a judging contest between teams representing the Washington State College and the University of Idaho. Besides a special poultry institution where experts will discuss the various phases of the poultry industry will be held by the county agent of Latah county. A premium list and entry blank which gives all of the detailed information in regard to the show may be secured by writing to the secretary, H. H. Hulbert, Moscow, Idaho.

Twelve Die of Poisoned Liquor

A news dispatch from Philadelphia under date of November 26 says: Poison liquor caused five deaths yesterday and sent scores of other drinkers to hospitals seriously ill.

Another dispatch from Pittsburg, Pa., under the same date, says: Seven deaths in as many days caused by poisoned liquor, put on the market to meet the pre-holiday demand, has brought united action from the city, county and state authorities.

It is said that "There is many a slip between the cup and the lip," but from all indications good connection was made in at least several instances, as reported above.

The man who drinks moonshine liquor of any kind is taking desperate chances and it is indeed too bad bad that the "cup" isn't bottomless.

Scarcely a day passes that city papers do not contain reports like the above and it is high time drinkers were sitting up and taking notice of the results.

Potlatch Yard Is No More

On Tuesday of this week the Potlatch lumber yard at this place was discontinued, the material being turned over to the Standard Lumber company. It has long been a matter of conjecture just why the two yards were maintained at Genesee as there has hardly been enough business to keep one going in good shape. It has been known for a long time that the two yards were headed by the same interests, so the only conclusion reached was that they wanted to keep out competition by forstalling the putting in of another yard here by a rival company.

Progressives have Annual Banquet

The Progressives had their annual banquet on Friday of last week at the home of Mr. and Mrs. W. W. Burr. A Thanksgiving dinner was served, paper turkeys being used for both decorations and favors. After dinner pinochle was played. Everyone reported a good time.

Understanding Muddied

The youth who goes to bed about the time the farmer and mechanic are getting up, cannot understand why the boss "has it in" for him.

LUTHERAN PASTOR ARRIVES ON LOCAL FIELD

Rev. Gerhard A. Peterson, of Rosholt, Wisconsin, who has been called to the pastorate of the Norweigian Lutheran church of this city, arrived with his family in Moscow today and will preach his initial sermon at 7:30 tomorrow evening. Rev. A. M. Skindlov, of Spokane, president of the Rocky Mountain district, will have charge of the installation service.

The local congregation has been without a pastor since Rev. J. E. Lee left here about six months ago, and it considers itself particularly fortunate in securing Rev. Peterson. He paid Moscow a brief visit while here last summer for the purpose of looking over the field and made a favorable impression on all who met him. He and his wife are both graduates of St. Olaf College. While in college Rev. Peterson took part in all the student activities and was a member of the famous St. Olaf choir. Mrs. Peterson served as preceptress at Pleasant View College at Ottawa, Illinois, before her marriage, and has also been active in literary work. Rev. Peterson is a graduate of the Luther Theological Seminary at St. Paul, Minn., and has been in the ministry for a period of four years.—Star-Mirror.

Rev. Peterson was also installed as pastor of the Genesee Valley Lutheran church on Sunday at 11 o'clock and will hold services in that church regularly, to which the general public is cordially invited.

Receives Sad News

Mrs. B. B. Caldwell on Monday received the sad news of the death of two sisters of Mr. Caldwell near Sterling, Kansas, Sunday evening.

It seems that the two sisters and their husbands were out riding in an automobile when the machine was struck by a train at a railway crossing, the two women being killed instantly. One of the men was seriously injured, while the other, who was driving the car, was uninjured.

These are the first deaths in the family of six children, the eldest and youngest sisters of Mr. Caldwell being the victims.

Mr. Caldwell has been working on the coast for the past several months and word of the tragedy was at once forwarded to him.

Pie Social a Success

The program and pie social given at the Smith school last Friday was a success in every way, regardless of the steady downpour of rain. A new built-in bookcase is to be built soon with the proceeds. We wish to thank all those who so generously assisted us, and also those who brought pies.

Federated Bazaar and Dinner

The ladies aid of the Federated churches gave a bazaar and dinner in the American Legion hall on Tuesday of last week. A good crowd was in attendance and all who did not go away satisfied could blame no one but themselves. The ladies were many dollars ahead at the end of the day.

Clearing Away Debris

The work of clearing away the debris from the rear of the burned Smolt building has been going on for several days and within a short time Mr. Smolt will begin the repairing and rebuilding of his restaurant which was recently partially destroyed by fire.

New Bridge Completed

The new bridge across the Clearwater river at Spalding has been completed and will be open for traffic within a week or two, according to reports. The structure is 600 feet long, including approaches, and was built at a cost of $100,000.

The Best Race

Following the recent exhibitations on the surf involving Zev, Papyrus, and My Own, we reach the conclusion that the only real horse race, after all, is the old Irish race in which each man rides the other fellow's nag and the last horse in wins.

All Wage-Earners Help

According to figures recently made public every man, woman and child in the United States, over ten years of age, gainfully employed, chips in $94 a year to defray the expence of running the government.

Parallels

Charles M. Schwab declares ninety percent of his misfortunes have come from his kindness to others. It is pleasing to note that millionaires have at least something in common with newspaper publishers.

A Song For Thanksgiving

Sweet land of Liberty, how fitting is this hour of thanksgiving for all the blessings we enjoy. How inspiring is the vision of your bounty under government based upon equality and temperate consideration of human rights. There is something deeper in the day than selfishly to review those betterments that personally have blessed us through the year. Rather should our thanks go forth to Him for planting in the American hearts those principles of government which ensure our happiness and contentment.

We will be poor indeed if we offer only formal lip service of appreciation yet fail firmly to resolve to protect to the last ounce of our power our sacred heritage of freedom. Yes, at this Thanksgiving time, let each throat shout in clarion tones: "From every mountainside let freedom ring," and with that glorious song of inspiration let each man gird his loins to resist the insidious attacks that constantly wage war to undermine the principles of our constitution.

Our thanks for bounteous crops will be as tinkling cymbals if each of us is not a constant watchman at the tower ready to sound the alarm when sinister interests seek to undermine the tiller of the soil. Our praise of our prosperity will be put as babble if we do not resist the insidious and grasping flank assaults on equal opportunity.

Americans will give their greatest thanks in action. Let us express our thanks in intelligent interest in the management of our country. The government is not a thing apart. It is not a private enterprise. It does not belong to officials elected or appointed. It is the expression of the people's will. As founded it is the only successful system of government in the world. Let us give thanks a thousandfold for its existence, but let this thanks be buttressed by a determination to protect it—Sweet Land of Liberty.

A Nation of Kickers

A Cedar Rapids man, discussing the proneness of the present generation to complain of its hard lot, promulgates a little essay that should be widely read and carefully pondered. It begins with this inelegant, but easily understood question:

"What is eating us, anyway? Many things no doubt—among them these:

"First, the lack of appreciation of things 'handed to us.' To those who remember the time when $4 an acre was considered an outrageous price for land in eastern Iowa, a spring seat on a farm wagon a luxury, and the possessor of a 'top buggy' a nabob; when there was scarcely a furnace or a bathtub in the entire state of Iowa; when the only refrigerators in town were those in the 'butcher shop;' this age when one only has to touch a button to get a light with the strength of a hundred candles, when you turn one faucet and get cold water and turn another and get that which is hot; when houses without bathrooms and furnaces are exceptions; when school houses in small towns are better appointed than state capitols used to be; and country children are taken to and from school in automobile busses, and high schools are not considered quite up to date unless equipped with a swimming pool; when workmen drive to their daily work in gas cars; and there are enough autos in the state of Iowa to take every man, woman and child in the state out for a joy ride at the same time, it seems as though some mental hex should a modern Aladdin's lamp and that we are now living in Fairyland. The truth is that these things 'handed to' the young people of today are results of toil and thrift —the subjugation of a wilderness—by men and women, who asked only a chance to try their strength, and to the triumphs of science and industry. Every child in this pampered generation these facts, the toil, the sacrifice, the hardships and privations are unknown. The rich heritage is accepted as a matter of course—often without so much as thank you, and frequently with complaint because there is not more."

With the same set of thoughts in mind we have attempted not infrequently within the past two or three years to impress the same lesson. We are not only better off in every way than ever before, but are incomparably better off than the people of any other nation are now or ever have been in all history.

Another Idaho Cow Record

Idaho Segis Lily, University of Idaho Holstein cow, has become the highest record cow of milk production owned by any state agricultural institution, with a production record of 30,015 pounds of milk, and a butter equivalent of 1191.1 pounds, over a one-year period.

Three state institutions in America are using Idaho stock for their herds.

If a girl slaps your face, don't slap her back.

PUBLIC SCHOOL NOTES OF MUCH INTEREST

By Estel Rogers

On Monday of this week the students of the school were asked to help better conditions and make life a little brighter for the children who are living at the children's home at Lewiston. Small envelopes were passed out, which are to be handed back by the students with whatever amount they can give for the benefit of these little ones.

Last week about 30 "hurry up" cards were mailed to 30 different students. The cards are designed to show the parents the standing of the pupils and the subjects in which improvement is desired.

The regular six-weeks examinations were given last week, which means that two-thirds of this semester is gone. The report cards will be handed out this week.

When you attended school what did you study? Was what you studied similar to what we are studying today? Has the curriculum been changed a great deal or just been modified to meet modern conditions and ideals? Following is a list of the subjects being taught in the high-school and the number of pupils taking each:

American History, 15; Sociology, 5; World History, 36; Piano, 8; English I, 24; English II, 24; English III, 17; English IV, 15; French, 8; Physics, 23; Geometry and advanced algebra, 29; Algebra I, 29; Bookkeeping, 20; Commercial Law, 21; General Science, 24; Typewriting, 15.

The grades have adopted a plan in which there is competition between the students and as a result some good work has been done. The plan is to give one quarter of a day to the students who do the most efficient work. Efficiency in this case takes in willingness to work, promptness, attention, application to work, and good daily grades. Those who will receive the quarter holiday this time are: Fern Halverson and Glenna Harris from the second grade; Russel Rogers and Adeline Dresher from the third; Rose Currin, May Libby and Eloise Emmert from the sixth; Ida Foster, Reil Rogers, Ruby Hollingsworth, Edith . Craft and Geraldine Bumpass from the fifth, Orvill Halverson and George Blume from the fourth grade; Wilma Ingle, Harley English and Edwin Blume from the seventh; Harriet Evans, Bernice Nordby, Verona Wolff, Roy Cameron, and Matilda Dresher from the eighth grade.

The seventh grade will receive the Roosevelt picture next month for having the best attendance in the school during the month.

The basket ball team is still at work in earnest, for the boys are turning out in good numbers and are practicing after school at the hall.

Yes, we know you are anxious for Thanksgiving evening to arrive because you are going to hear some real music. The Elliott Family orchestra, an orchestra that is going to give us a real musical treat on that night. This is the last time this year that the school will put on an outside entertainment, so don't fail to attend, for it's going to be good. You will be helping the school as well as hearing some very unusually good outside talent. Give us our support; we are expecting it. Remember the date—this coming Thursday evening, November 29th, at the opera house, at 8 o'clock. Come prepared to listen to some good music.

Students coming back to school from homes where there has been measles or other contagious diseases must have a written statement from a physician taking care of the case and stating that they are entitled to enter school. Pupils will be refused admittance until such statements are presented at the office of the superintendent of schools.

Frank H. Thomas, Supt.

Highway Commissioners Election

All taxpayers, especially, are asked to not forget the highway election to be held at Burr's office on Saturday, December 1. You should be interested and you should therefore come out and cast your vote. You can vote for anybody you see fit. If the man you prefer is not on the ticket, there is a blank space to write it on—but vote, anyway.

Ladies are Thankful

The ladies of St. Mary's church wish to thank the general public for their liberal patronage at their bazaar, dinner and supper on Tuesday when more than $760 was taken in. If anyone left the hall hungry it certainly was not the fault of the ladies in charge.

Ford
$370 Truck Chassis F.O.B. DETROIT

Body types can be supplied to meet every requirement.

Ford Trucks Are Bought On Performance Records

If you were to ask a hundred—or a thousand—Ford truck owners why they use Ford trucks, in preference to all others, they would likely say, "Because the Ford stands up."

They know that under the endless grind of daily service the Ford stays on the job month in and month out, with very little mechanical care, and with practically no expense for repairs or replacements.

They would emphasize the work this truck does, not its initial cost.

Ford Trucks can be bought through the Ford Weekly Purchase Plan.

Coal and Gasoline

Bituminous coal production for the calendar year to September 29 was 413 million tons compared with 271 million tons for the corresponding portion of last year, the increase over a year ago being 53%.

Gasoline production for August totaled 649 million gallons compared with 637 million gallons the month before and 550 million gallons a year ago, the increase over a year ago being 18%. Stocks on September 1 totaled 1,064 million gallons compared with 1,165 million gallons a month before and 704 million gallons a year ago, the increase in stocks over a year ago being 50%.

Commodities On Increase

The average wholesale price of all commodities at the principal markets, according to the Bankers Commodity Index, on the first of October was $486.31, compared with $481.34 a month before and $441.58 a year ago, which places the average wholesale price of all commodities 34 per cent above the 1913 average. The increase over a year ago was 10 per cent.

A man may have sad, solemn thoughts,
But the saddest of all by far
Is when he thinks of the many times
He said, "Oh, I'll take a cigar!"

Newspaper Association Member No. 2350

MUCH SURFACING ON NORTH AND SOUTH HIGHWAY

H. W. Gregory, director of highways, who drove from Boise to open bids for the grading and surfacing of 5.9 miles of the North and South highway extending from Potlatch east toward Harvard in the Harvard-Princeton highway district, this being known as federal aid project No. 74, announces that excellent progress is being made throughout the Canada to Utah route.

He expects that within 30 to 45 days an additional 12 miles will be let to connect the Harvard-Princeton roadway with Viola. Work on these two contracts will not be completed until next fall, but assurance is given of the material growth of surfaced mileage of standardized grade.

The highway department is at present expending much effort and money on gaps of the North and South road in the canyon country, concerning the condition of which there has been protest at various times. Between Lucile and Whitebird contractors are engaged in construction, while the department has a crew removing the centers and back-surfacing on the McCully grade in the vicinity of Allen's point. Progress has been retarded by lack of labor, but since the completion of harvest operations more men are available and the department will push its activities in this direction.

The work is intended to be temporary in character, having for its purpose the facilitating of travel between north and south Idaho. No widening is being done, but ease of travel over the road, because of the elimination of high centers and the addition of a light surfacing, will be enhanced perhaps more than the traveler realizes, Mr. Gregory ventured to assert.

The road will not be perfect but there will be fewer stones and the results of thin surfacing were evident says Mr. Gregory, in the fact that he was able to make the McCully grade on intermediate whereas previously there had been difficulty in making it in low gear, and there was also the ever-present danger of going off the road entirely in rainy weather. Heavy precipitation had just been experienced when Mr. Gregory made the ascent without trouble of any kind.

Mr. Gregory drove from Boise to Lewiston, a distance of 332 miles, in a little more than a day and a half and cites this as evidence of the state of the North and South highway.

With work to be completed in the near future giving a surfaced road from Sandpoint to the Canadian boundary, a number of other projects being pushed in northern Idaho, progress for the north and south route is not satisfactory.—Lewiston Tribune.

Always Hope

"Remember, Mrs. Jones, that though it may be hard to be made a widow there is always a comforter for you."
"Could you give me his address?"

Short Undertaking Company

Parlors at Genesee and Moscow. Prompt attention given night or day calls. Embalming and auto equipment furnished all funerals without extra charge. Full line of caskets at both places. At Genesee call George Schlerth at the Genesee Hotel.
"Courtesy and Service" is our motto. We relieve you of every care. 14-tf

A Timely Suggestion

This is the season of the year when the prudent and careful housewife replenishes her supply of Chamberlain's Cough Remedy. It is almost certain to be needed before the winter is over and results are much more prompt and satisfactory when it is kept at hand and given as soon as the first indication of a cold appears and before it has become settled in the system. There is no danger in giving it to children as it contains no opium or other harmful drug. Sold at Clark's Drug Store.

PERSONAL CHRISTMAS GREETING CARDS

OUR FINE LINE of personal Christmas Greeting Cards has arrived and you are cordially invited to call and see them. There are many styles of embossing and our type faces are the latest so you should have no trouble in making a selection. An early order will insure your getting just what you want when you want it.

THE GENESEE NEWS

Load-Speed-Profits

We quote from the official organ of the Dairyman's League:

"A farmer of the famous Aroostock potato-growing section of Maine, has 160 acres devoted to potatoes, seven and one-half miles from market, producing 24,000 barrels of potatoes a year, and found it impossible to deliver the potatoes in season.

"On account of the road grade between farm and railroad, one team of horses could only haul 20 barrels of potatoes at a trip. It would have taken 1,200 working days with one team—just a little more than three years to haul the potato crop to market. It would take twenty teams and twenty drivers to do the work in season which would cost more than $6,000.

"A motor truck was put to work, and based on the old price of 25 cents a barrel for hauling the potatoes by horses, this truck paid for itself the first season, hauling 24,000 barrels."

This is not an advertisement of the motor truck. Any motor truck would do it provided it had the road and no motor truck could do it unless it had a good road over which to travel.

This is not an advertisement of potato farming. The same economy may be had with any produce, whether lettuce or grain, hay or onions, alfalfa or corn, if there is a real good road over which to travel. No crop, no matter how profitable to raise, is as profitable to sell, if it has to be marketed over a poor road.

This is an advertisement of the need of good roads!

For if there had been no heavy road grade, which cut down horse hauling to the point where the price was prohibitive, the motor truck, which could make it, could have made it at twice the speed or with double the load and half the cost.

Mud stalls the horse. Grade cuts down his load. Mud stalls the truck. Grade cuts down its speed. "Load" and "speed" as used here, are both synonyms for "profit." Good roads, proper grades, quick, sure, heavy hauling at low cost—that's the answer to the farmer's need of some way to make his business pay better.

When the farmers of the United States unitedly say that they must have good roads everywhere, they will get them.

Have You Got Yours

According to late reports the money in circulation in the United States on the first of October totaled 4,850 million dollars a year ago, making the per capita circulation $43.45 compared with $42.85 a month before and $41.04 a year ago. The increase over a year ago was 7%. The total stock of money in the United States was 8,772 million dollars compared with 8,707 million dollars a month before and 8,388 million dollars a year ago. The increase over a year ago was 5%. Stocks of gold coin and bullion were 4,135 million dollars compared with 4,109 million dollars a month before and 3,874 million dollars a year ago. The increase over a year ago was 7%.

Sometimes a man can get away with the policy of being "all things to all men," but you can't fool the women.

A Disappointed Husband

FRIEND WIFE: You have probably noticed that men folks are more or less indifferent to Christmas. Why?

Year after year they get you that gift that has been suggested or hinted. But they seldom express a wish for themselves.

When Christmas comes they receive that necktie or socks that you have purchased in desperation the last minute. They are glad Christmas is over for another year.

But, men are only boys grown up!

If your man likes to hunt, get him one of those Game Coats with pockets all around for birds; also a pocket for pipe and tobacco.

Or a Shell Vest would make him happy. They hold 30 12-gauge shells—where he can get them in a hurry.

We have many gifts for the regular fellow—Guns, Fish Rods, Marble's Hunting Knives, Flash Lights, Knives, Etc.

Herman's Hardware Shop

PERSONAL MENTION

Dr. T. A. Elliott was a Uniontown passenger Saturday.

Frank Lawen left Tuesday morning for Seattle for a visit.

A. Rach was a Uniontown passenger Saturday for a few hours stay.

Mrs. Emery Vandenburg of Troy arrived Tuesday for a visit with relatives and friends here.

George Bershaw and Albert Gray returned Tuesday evening from a short visit in Lewiston.

Miss Lucille Gray arrived Thursday of last week from Moscow for a visit with relatives here.

Tom Platt and Charlie Belmore motored down from Spokane Sunday for a day's visit with friends and relatives.

Fred Comnick returned to his home in Pullman Wednesday, after a visit with his grandparents, Mr. and Mrs. Brown.

Mrs. Ray Kennedy left Friday morning for Spokane where she will visit her sisters the Misses Bertha and Christina Lorang.

Mrs. F. E. Dicus left Wednesday morning for Garfield, Washington, where she will spend Thanksgiving day. Mr. Dicus and Fred will go Thursday.

Floyd and Avery Rogers, sons of Mr. and Mrs. A. L. Rogers, left Genesee overland Monday for Granger, Washington, where they will attend Granger academy.

Miss Bernice Martin arrived Tuesday from Garfield, Washington, where she has been visiting, for a visit with her aunt, Mrs. H. H. Schooler and family, before returning to her home at Nyssa, Oregon.

Again Loses Chickens

H. H. Manderfeld has been playing in hard luck during the past few years in regard to chickens. The Manderfelds have always raised a large number of fowls and just as soon as they become a size large enough to eat, some miscreant comes along and helps himself. Last year they lost several hundred and this year they have lost between 280 and 300 of their finest birds. Mr. Manderfeld spent several nights watching for the thief, or thieves, and had they shown up they would have been fit subjects for either the morgue or a long term in a hospital.

Mrs. Margaret Lawen also lost many fine chickens during the summer and fall.

Entertain at Dinner

On Thursday evening of last week Mrs. F. E. Dicus and Miss Edith Winegardner entertained a number of friends at 6:30 o'clock dinner. The evening was spent in playing pinochle.

Those present were Mr. and Mrs. G. E. Sampson, Mr. and Mrs. Ira Hanson, and daughter, Rowena, Mr. and Mrs. F. E. Dicus, and son, Fred, Misses Lela Patch, Frances Vaughn, Lillian Collins, Edith Winegardner, James Winegardner, Verne Beckman, Mike Earls, A very good time was reported.

Death of Mrs. Elizabeth Sanford

Word has been received in Genesee of the death of Mrs. Elizabeth Sanford, a former Genesee resident, at her home at Mabton, Washington, October 31, 1923. Deceased was 80 years, 11 months and eight days of age at the time of her passing. Burial was made at Mabton.

Mrs. Sanford resided in the secition for many years and will be remembered by many of the older residents. She left here some nine years ago.

K. of P. Meeting

At the regular weekly meeting of the Knights of Pythias Tuesday a very pleasant and profitable time was had. Two very important things for the Knights were on hand—the annual visit of the grand chancellor, and a "feed" given by the Pythian Sisters, both of which were much enjoyed by those present. These occasions always leave pleasant memories and the meeting Tuesday night was one that will not soon be forgotten.

Woodmen Lodge Flourishing

Saturday evening, November 24, the Woodmen of the World held a meeting in the K. of P. hall and started off their fall activities with a contest for members. E. G. Dirks, district manager, was present and is anxious to secure a large class to be taken to Pullman for initiation at the first big campaign being put on there.

The meeting was well attended and to make it seem more like old times the wives of the Woodmen and the Neighbors of Woodcraft surprised them with eats and a good time was reported by all who attended.

Mary V. Stevens, district organizer for Neighbors of Woodcraft is securing a fine class of new members and will soon reorganize the circle here when a public installation will be held. Offcers from Lewiston and a drill team of guards will exemplify the work.

It is said that there are only seven jokes in the world, but there are more men than that who think they are orators.

All Was Bright

A citizen seven years in arrears for his country paper who had never had a good word to say for the editor, and who was always oposed to public improvement, was dying, so the story runs. "How do you feel?" asked the editor who was on hand to write the obituary. "All looks bright before me," gasped the dying man. "I thought so," returned the editor, "you'll see the blaze in about ten minutes."

A Difference

It's pretty hard for the old-fashioner man to get used to the new-fashioned banker. The old-time money-lender greeted the borrower with a look of suspicion that made him feel like a criminal. The new kind sometimes gives him a cigar even when he turnes him down.

The Neighbors Too

Thanksgiving Poem
(By Uncle John)

Thanksgivin' Day is here at hand,
with joys that all may understand;
I take it, that our folks will share the
friendly feelin' everywhere; that each
and every heart an' mind holds Peace
—Good-will for all mankind.....I
can't help thinkin' that's the way to
celebrate Thanksgivin' Day.

I'll say—so far as I'm concerned,
from what I feel, and what I've
learned—the soul that's grateful in
this way, should render thanks most
every day. Our blessin's come so
thick and fast—each new one richer
than the last—It seems we ain't
got time to pray, for, Life's one long
Thanksgivin' Day!

The Sperit born at Plymouth Rock,
shrinks not from fear or tempest-
shock; We consecrate our good right
hand to God, and Home, and Native
Land! From heart within, to God
o'erhead, we're thankful for our
daily bread! Behold the stuffed and
basted turk.....Roll up yer sleeves—
an' go to work!

The Reason

If we wonder whence Henry Ford obtained his great imagination and his delicate wit, let us remember that his parents were born in Cork, Ireland.

Our line of personal Christmas greeting cards was never finer. You are invited to call and see them.

Record Cabbage Crop

The over-stocking of the cabbage market in Spokane has been prevented, the growers say, because of shipping out in carload lots. The cabbage crop in the Inland Empire is believed to be the record and many of the growers are marketing their produce through a pool formed by the county farm bureau. The prices to Spokane growers are kept around $1 a hundred.

Tom Platt Is Star

In the annual football game between Spokane college and Spokane university last Friday, Tom Platt of Genesee was easily the star of the Spokane college team, which won the game by a large score. Don Jain, who is also attending the college, placed as a substitute on the team.

Gift of the Desert

by Randall Parrish

COPYRIGHT A.C. McCLURG & CO.

SYNOPSIS

CHAPTER I—On the isolated Meager ranch, on the southern border, Deborah Meredith, trained nurse, is in attendance on Mrs. Meager, whose husband has recently been killed, victim of an accident. Immediately after the death, Bob Meager, Mrs. Meager's stepson, arrives and takes possession. He insults Deborah and she resolves to leave, but there seems no possibility of her getting away, alone.

CHAPTER II.—Meager gloats over Deborah's plight, telling her he has sent for a justice of the peace, who will marry them tomorrow. Horrified, the girl secures a revolver.

CHAPTER III.—The justice, Cornelius Garrity, scoundrel and bosom friend of Meager, arrives with a party, among them the "Frisco Kid," notorious desperado. The girl locks herself up.

CHAPTER IV.—Forced by Bob, Mrs. Meager decoys Deborah from the room and despite her protests the justice performs the marriage ceremony, immediately afterward, she escapes and reaches her room.

CHAPTER V.—Meager seeks the girl, but she stuns him with the revolver and rushes to the stables, hoping to secure her horse and escape, anywhere away from Meager, if she must die in the desert. In the stables she meets the "Frisco Kid." Somehow he inspires her with confidence and she explains the situation, he not having been present at the wedding.

But what now? This question overshadowed all else. The thing she had been imagining for so long had at last come to pass. He had come to her, come claiming her with insult and outrage, and she had actually dealt the blow of which she had dreamed. Her courage had not failed her, and he was lying there now in the darkness at her feet, sorely wounded, perhaps dead.

She Hurried to Carry Out Her Plans.

It was her act; she had done it—what now? She had never faced this situation before, the aftermath. Whether Meager was dead or alive, she must get away. Better to face any danger of the great desert than remain where she was, with not a friend to counsel or protect her, not a white man to whom she could appeal.

The girl thrust the revolver back into its holster at her waist, and glanced out through the window into the quiet night. Of two evils, the desert, or these lawless men, she chose the less cruel, the desert. If she was to die, it would be, at least, in honor. Once decided, her mind worked rapidly. In all probability not a man remained sober about the home ranch; if any horses had been left in the stable, she therefore ought to get several hours the start of a pursuing party. She believed Meager was dead, and if so, his followers would be slow to discover what had happened, and would possess no leadership. This inevitably would mean delay. While, even if the fellow should live, hours surely must elapse before he could take the trail. With a good horse under her, she would be beyond sight out on the desert, riding straight for those two peaks old Tom Meager had pointed out to her as marking the Nogales trail. With such a start in the race there was surely a chance to win. Her pulses throbbed exultantly at this sudden awakening of hope, and, without so much as another glance at the body prostrate on the floor, she hurried to carry out her plans.

An unrecognized Mexican lay in drunken slumber, curled up like a dog, on the floor of the passage, but she found no difficulty in passing the fellow. She neither heard nor saw any of the others, as she made her way through the rear door and across the few feet of open space dividing the main house from the detached kitchen. There was a lamp burning in the latter, and the remains of fire in the stove, but no occupant. Deborah knew the place well, and lost no time in gathering together what food she required, fortunate enough to discover a small sack in which it could be conveniently transported.

The effort had proven easy and safe so far, and her heart beat hopefully as she emerged from the kitchen, thus equipped. Now if she could only procure a horse, escape actually appeared possible. Doubtless the ranch horses had all been turned loose in the large corral. She had no means of catching these half-broken animals, but it might be that the horses ridden by the party arriving during the evening had been put up in the stable, ready for immediate use. There were weary enough from their desert trip when they arrived, but that was hours ago; they must have been fed and watered since, and, with the rest, would be fairly fit by this time for another journey. They were wiry broncos, able to endure any amount of hardship. It was then she remembered the horse the "Frisco Kid" had been riding. Even in the darkness she had marked the fine, blooded lines of the animal, the far better condition in which he appeared to be. If she could only lay hands on him.

"Frisco Kid!" What had ever become of the fellow? She wondered as she slowly made her way down the slope, keeping as far from the bunkhouse as possible. She had neither seen nor heard of him since that first meeting with Meager. Perhaps he was among those drunken dogs in the living room, sleeping off their carousal; yet somehow she did not believe it. Someway his voice and manner had strangely impressed her as different; he did not belong with that crew. Outlaw, desperado, she knew him to be, a man with a price on his head, yet surely he was no drunken, roystering brute. He had not even gone into the house; she was sure of that now, remembering clearly. He had led the horses away, while the other two entered with Meager. Nor had he returned later; not at least while she was at the window, and he was not in attendance at the wedding.

Then the truth suddenly occurred to her—the man was hiding out. He dare not risk drinking, or being shut up in a house. He was a hunted creature, watchful of treachery in every human being. He could trust to no one, not even his companions in crime; there was a reward for him, dead or alive. He would be out yonder in the dark somewhere, alone, he and his horse, wakening at the slightest sound. Perhaps he would be the one she needed to fear the most, when the pursuit started. These thoughts flashed swiftly through her mind, almost unconsciously, as she stole forward silently through the shadows. She passed a figure lying in the trail, too drunk even to reach the bunkhouse, but as she crept past the open door she saw no signs of any occupants within. Except for the few lineriders, and that outlaw hiding in some thicket of chaparral, the whole personnel of the ranch were stupefied with liquor, indifferent to any occurrence going on about them.

A bit reckless now, because of this knowledge, the girl ventured through the great open door of the stable, and began groping her way forward searching the stalls. The first was empty, and, as she started to advance toward the second, she came to a sudden pause, with heart leaping into her throat—there had been a sound at her left, a rustling of straw, as though something had made a quick movement. She listened intently, drawing a breath of relief at the succeeding silence. No doubt it was a horse stirring, or possibly a rat. Then a voice spoke sternly not three feet away.

"Put up your hands! Who are you? What are you doing in here?"

She obeyed instinctively, too frightened to even speak, dropping the key to the floor, forgetting completely the revolver buckled about her waist.

A hand reached forward out of the darkness and gripped her upraised arm; she was conscious of the close presence of a man, yet for the instant retained no power of movement.

"Why don't you speak?" said the same voice, impatiently, evidently angered at her silence. "What are you sneaking about in here for? Well, I'll be d—d!" his tone changing. "If I don't believe it's a woman."

"It is a woman," she managed to reply falteringly. "But—but does that make any difference?"

He laughed, a certain relief evidenced in the sound, although he did not in any way relax his vigilance.

"Well, I confess it might," he admitted, "for you are a most unusual discovery in this section. I was looking for almost anything else. You belong with this outfit?"

"To the Meager ranch, you mean? Yes—that is, I have been employed here. You—you are not a Mexican, are you?"

"I should say not. I belong north of the line, if that's any relief to you. And what's more, if you want to be square with me, I'll play fair on my side. You believe that?"

"I shall have to; it wouldn't do me any good to lie."

"I reckon not; so let's get it over with; who are you?"

"Deborah Meredith," she explained, rather eagerly. "I—I am a professional nurse; my home is in Chicago. Tom Meager employed me to come out here and take care of his wife. Are you a friend of Bob Meager's?

The man chuckled, and she knew he had put away the weapon he had held in his hand.

"Well, he's got an idea that I am. We've run about together a bit, I admit; which confession maybe is no recommendation to you."

"No. It is not."

"I thought likely it wouldn't be. So you and Bob are not good friends?"

"I despise and hate him; he is a drunken brute."

"Granted freely; but if you feel that way, why did you remain here on the ranch?"

"Because I have had no chance to get away since his father died. I could not desert my patient, and besides, he had no reason to suppose Bob would come back and take possession. He was a fugitive from justice; his father had lost all faith in him, and—and I had reason to believe he had been shut out from all right to this property."

"You had reason to believe? What reason? I am not asking merely from curiosity; I want to understand the entire situation. I already have an idea what this means; you are endeavoring to escape alone?"

"It seemed my only chance," she confessed. "But I am talking with a stranger; perhaps I trust you too much. You are not employed here?"

"No; I just blew in last night."

"What is your name?"

"Daniel Kelleen."

"You are not a cow-puncher surely? You—you have education."

He laughed good-humoredly.

"Nevertheless I am quite accustomed to cow-punching. Perhaps I've had a trifle more schooling than some of the boys. Now let me have the straight of this affair, and then we'll get busy. Tell it to me from the first."

Deborah stared at the man's dim outline through the darkness. If she could only see the expression of his face. And there was no choice left her—she must trust him blindly, absolutely; he could defend or betray her at his own will. So clear was this situation she scarcely hesitated.

"Yes, I will tell you, Daniel Kelleen," she said gravely. "I must trust someone, and you seem to be the one sent. All I know of you is that you are an American. I am an American also, and a woman. If that does not appeal to you, then nothing else will. I have told you already who I am and how I came here. The remainder of the story is brief. I have had nothing to do with Bob Meager since he returned, immediately after his father's sudden death. There was no opportunity for me to leave the ranch, so I remained in care of Mrs. Meager. Until last evening I never even encountered Bob but once. Then he came unexpectedly into his stepmother's room. He was brutal and insulting to us both. After that I kept out of his way, and he apparently ignored my presence entirely. I did notice, however, that he was getting rid of all the old employes on the ranch, and replacing them with Mexicans. Evidently he wanted no Americans about him."

"I understand; not his kind."

"So I thought, but with no conception that this change had any reference to me."

"It did have, then?"

"So it seems now. He came upon me suddenly alone last evening. There was no chance for me to get away, and I had to listen to what he said." She dropped her face into her hands, but instantly lifted it again, and went on, her voice strengthening with indignation. Kelleen made no movement.

"He—he was not even decent about what he had to say. I was merely a chattel he had to deal with, a slave to use as he pleased. It doesn't sound true, but it is true, every word."

"Go on," said the other dispassionately. "I know Bob Meager."

"He said he was going to marry me; he didn't ask me about it at all; just stated it as a fact. When I tried to object, the brute just laughed, and asked how I was going to help myself. He made me realize the situation I was in, without an American left on the ranch, and those miles of desert stretching away on every side. Then he told me everything was arranged for this very night. A—a man was coming out from Nogales to marry us. He said I better go into the house, and get ready. Then he laughed again, and went away. He—he wasn't afraid to leave me there alone, for there was no place where I could hide, no chance to leave the ranch. I—I was hardly sane, but—but after awhile I went back to the house; what else was there I could do?"

"Nothing, I reckon, unless you killed the cuss. What did you do?"

"I—I made up my mind to do even that," she confessed. "I stole a revolver from the bunkhouse while the men were at mess, and then locked myself in my own room to wait. Along about nine o'clock the outfit rode in from Nogales. There was nothing for me to do but wait desperately. I meant to stay there, and defend myself, behind that locked door. But that devil tricked me. He got Mrs. Meager to call to me from the hall, saying she had one of her bad turns, and I opened the door to help her. I—I hardly know what happened after that. I tried to explain to the man who came to marry us, but he wouldn't listen. He was just a creature Bob Meager had picked up to serve him."

"Sure! I know him—Garrity; he'd murder his mother for a drink of booze."

"But is he really a judge?"

"He's a justice of the peace down at Nogales."

Then I was really married? It—it was legal?"

"Darn if I know about that. I think likely the whole outfit would swear you consented. Who were in the gang?"

"Juan Sanchez, a ranch foreman, and a black-faced fellow who came out from Nogales."

"Arvan; they'd swear anything Bob

"I've—I've Killed Him!"

told them to. They'd make it out you were married all right."

"But—but I'm not; not now!"

"Not now? What do you mean?

"I've—I've killed him!"

CHAPTER VI

A New Alliance.

For a moment Kelleen did not move; then impulsively he groped for her hand in the darkness.

"You killed him? You did? Say, I like you," he exclaimed earnestly. "You are sure some girl, you are. But are you certain you killed him?"

"I—I think so—yes," she stammered, totally surprised by the way in which he greeted her news. "But I—I am not exactly sure. All I know is he is lying there on the floor of my room, and—and he never moved after he was struck."

"Struck? You did not shoot, then?"

"No; I had no chance. I got away from them, and ran to my room, where I meant to lock myself in, but someone had taken the key. I shut the door behind me and got the revolver out of a drawer, determined to defend myself. The men followed, but stopped outside in the hall. I could hear them laugh and talk; then they went back to the front room again. Bob was so sure I couldn't get away, he wasn't afraid to leave me there. He planned to get drunk first, and then come back."

"Sure; that would be his style; and you waited? You didn't try to get away?"

"Get away! Where could I go? Only out into the desert, and those men would have trailed me if I tried that. Yes, I waited in the dark, desperate, determined to kill him when he came. And he came finally, so drunk he could hardly stand, but ugly with the liquor. I do not seem to remember exactly what did happen; he laughed and jeered at me, and got hold of the weapon before I had courage to fire. Then we struggled, and the grip of his hands drove me mad. The revolver fell to the floor, but I got it, and struck at him with all my might. That was all; he just lay there, and never moved; I could see his face in the starlight, but—but I couldn't make myself touch him. I—I believed he was dead, that I had killed him."

"Never mind, little girl," interrupted Kelleen firmly, "maybe he was, but I doubt it; guys like that are not croaked so easy. Then, I take it, you ran away."

"Yes; I—I couldn't stay there, and I thought perhaps there might be a chance, if I could only find a horse somewhere. I knew the others were all drunk, and I would not be missed before morning. I had to try, and that was how I came to be here. You—you understand now?"

"Yes, I understand, and I am going to stay with you. But first, let's get this straight. The main question is, are you ready to trust me as a white man?"

"Yes—I am."

"That means a lot more than you think right now," he went on, but evidently encouraged by her tone. "Because it ain't going to be so easy getting away. I don't take any stock in Bob's being dead; he's got a knock-out, that's all, and when he comes to himself again he's going to be raving. He'll have every rider on this ranch on our trail, and the best we can reckon on is maybe three hours' start. You got to stay with me, and do just what I say—and, girl, that sure means you must trust me plumb to the limit. Do you sabe that? This ain't going to be no canter between here and Nogales; the only chance we've got is to hide out, first in the desert, and then in the hills. I'm telling it to you rough; but you better know it now than later."

"You mean we shall have to be alone together for—for some time?"

"That's the stuff. We ain't going to have an easy gallop into town. You don't know me from Adam, and if you did, I reckon you wouldn't go a mile with me. I ain't very highly thought of along this border, I'll say that; there ain't many would choose me for a partner, that's a fact. More, I ain't got nothing to say to you except that I'm going to play square. If you trust me I'll bring you through safe enough in one way or another; but if you don't feel that you can go the limit, then the best thing for you to do, maybe, is to stay here, and scrap it out with Bob Meager. My notion is this running away with his wife ain't going to be no snap even for me, and darned if I'm going to tackle the job except you're of a mind to go clear through with me."

"You think I am his wife, then—that he is really alive?"

"I won't a doubt of it. At least I am going to proceed on that theory. Meager is the one we have got to escape from; if he recovers by daylight from that rap you gave him, he is going to lead us a merry chase. Every minute of a start we get, the better. But I want you to get it straight—will you go with me?"

There was an eager earnestness in his voice of which she was fully conscious, yet some way this did not frighten her. The one vision of Bob Meager, drunk and grasping her in his arms, dominated all else, and left her careless of any lesser danger. Impulsively she thrust out her hand in silent promise.

"You mean yes?"

"I mean yes. I trust you fully, absolutely. I will do exactly as you say."

"It is bound to be some test, young lady," he returned gravely, releasing her hand, and rising to his feet, "but I reckon I won't let you regret it. Nobody ever trusted Dan Kelleen yet and found him a piker. We're pardners now; let's go."

He picked up a saddle from the bed of hay on which he had been resting, found another hanging on a stake driven into a beam, and with both flung carelessly over his shoulder, emerged through the open door into the starlight. Deborah followed closely, a new feeling of relief giving lightness to her step. She was no longer alone, unguided; something about the words and actions of the man brought confidence. The situation was plainly no novelty to him; he had been a fugitive before and had learned every trick in the hard school of experience. Whatever had happened to Bob Meager, it was clearly evident the fellow had not yet recovered consciousness, and it was hardly likely his fellows would become aroused until he sounded the alarm. The way of escape still remained open, but no one could tell for how long. Success might hang upon moments. Kelleen's keen eyes searched the deep shadows anxiously, but his lips smiled in satisfaction.

"It's all right," he whispered confidently. "You ride, don't you?"

"Yes."

"Good! It struck me maybe you didn't, being a nurse from the East. My horse is all right, but I'll have to rope one for you, and I might pick a wild devil in the dark. Could you stay?"

"As long as he keeps his feet."

"D—n, but I like your style!" he said enthusiastically, letting his hand

"D—n! But I Like Your Style!"

rest an instant on her shoulder. "You and I are going to hit it off fine. Come on, now; keep back in the shadow."

She waited at the bars of the corral while Kelleen vanished in the darkness of the open, lightly swinging a coiled lariat in his hand. Both horses were from there hidden from view, and, now that her newly found companion had disappeared, Deborah felt entirely alone. Had she done right to repose trust in him? Who was the man? Why was he at the ranch if he had no connection with Bob Meager? What would his presence there imply? The ranch was on no commonly used trail; visitors never came without a purpose. To reach there at all required miles of desert travel, with no little hardship. There must always be an object in such a journey. What could it be in this case? Was the fellow a mere drifter, seeking a job? A fugitive from justice, hiding from the law? or actually in Meager's service? Surely he must be one of the three; nothing else would account for his presence under such circumstances.

Yet she liked, and trusted him; felt no fear of the man. So far as his relations with her were concerned not a doubt of his absolute squareness assailed her. She believed his promise. Outlaw, fugitive, border desperado, he had won her faith already. The reaction she experienced from being helplessly alone caused her now to rest all hope on this stranger who had so mysteriously come to her rescue; she cared not who he might be, or from whence he came. Enough that he was there, strong-armed, capable, fearless, willing to befriend her, to guide her safely. It was in this spirit of almost blind confidence that the girl welcomed his return when he finally emerged from out the black shadows, leading two horses trailing quietly behind, through the corral gate.

He saddled and bridled the two rapidly, evidently accustomed to working in the dark.

"Are you ready?"

"Yes."

"Put your foot in my hand. This is my horse; he'll carry you fine. Now, up you go. This your water bottle? I'll strap it to the pommel where it will be handy."

He swung into the saddle himself, restraining the half-broken animal with an iron hand.

"You know the way down the mesa?" he asked, "the Nogales trail?"

"Of course."

"Then ride ahead, and I'll follow. I may have trouble with this brute before he learns who is master. Just go straight on out into the desert. I'll not be far away."

She rode forward, never questioning his right to command. The horse under her moved steadily at a swift walk, alert but well trained, obedient to the slightest pressure of her fingers on the rein. Her courage was high; she was no longer alone; the dread of the desert had left her.

Deborah found passage down the stony hillside and had advanced some distance across the level, before Kelleen joined her. No words were exchanged between them as he reined in his horse beside her own. Evidently the man was satisfied with her knowledge of the trail as well as the progress made. He turned in the saddle, gazing searchingly back at the dim outline of the mesa, now barely visible through the gloom. She glanced aside uneasily.

"There is something wrong?" she asked, troubled by his silence.

"No, nothing stirring. I circled the bunkhouse before leaving; the whole outfit is still asleep. I was just getting directions fixed in my mind. We are going a route I haven't traveled lately."

"But the Nogales trail is not difficult to follow."

"That is exactly what is wrong with it," he explained, his face now turned forward. "It is so easily followed, we could never get far enough ahead of pursuit to be safe. They will jump to the conclusion that you have gone this way, of course. I am hoping they will believe you have gone alone."

"Do they know you were at the ranch?"

"Yes, unfortunately; but my disappearance during the night will not necessarily make them conclude we have disappeared together." He laughed. "I haven't a reputation for remaining very long in any one place, so my going will create no particular suspicion. Then I've covered things the best I could. They'll be sure you've gone this way—because it's the only trail you knew anything about—but they won't have the ghost of an idea what has become of me. That is exactly what I'm aiming to do—get the bunch riding this trail, thinking you're going it blind, and that all they've got to do in order to catch you is to ride hard enough. Then they won't stop to read 'Sign'—see?"

"But—but I do not," she ventured doubtfully. "It seems to me we are doing exactly what they expect us to do."

"Sure; I'm counting on two hours and a half, or maybe three hours of darkness yet. An hour will bring us to Silver springs. Silver springs is where we take a side trip, the sort not many know about. Two hours' ride from there the whole United States couldn't find where you was hid away."

"How did you know?" she questioned, suspiciously.

"Oh, it's part of my trade to learn the country I'm working in."

"Your trade?"

"Sure; you never supposed I was here for my health, did you? I've got a trade, all right, and perhaps I'll tell you about it some time. It's enough now for me to say that it has taught me as much about this desert as any Indian ever knew. I've rode it alone, east, west, north, and south, and one of the strange places I stumbled into—by good luck, not more than two days ago—was this Devil's gulch I'm heading for now. If we get there by daylight we'll have this game blocked."

"You believe no one else knows the place?"

(Continued next week)

Who Remembers

When it was thought if you saw a white horse the next thing you would see was a red-headed girl?

OLDEST HIGHWAY ON CONTINENT IN NEW MEXICO

The most ancient highway in North America is said to be the New Mexico section of the National Olo Trails Road. According to Judge J. M. Lowe, president of the National Old Trails Road Association, this section of the great highway is the oldest road established on the North American continent. It extends from Socorro to Sante Fe, about one hundred and fifty miles. Don Juan Onate, a Spaniard, who was governor of New Spain (which comprehended all of Mexico) in the fifteenth century, was the first man to estblish a road in America.

Long years before the Pilgrim Fathers landed at Plymouth Rock, Onate had marked out and estblished this road, which started at Santa Barbara, now Jiminiz, Mexico, and ended in the vicinity of what is now Santa Fe, New Mexico. This territory had been claimed by the King of Spain in 1598, and 1606 Santa Fe was founded as the capitol of New Spain. This route was used later as a highway over which goods were freighted from the Gulf of Mexico via Vera Cruz, via the City of Mexico and Santa Barbara, until the Santa Fe Trail was opened under the Act of Congress of 1824. This old road was then known as the "Camino Real"—"The Kings Highway"—and it traversed the Rio Grande volley from the Gulf to Santa Fe.

It Happened Like This

Two thrifty Scotchmen attended an Irish Freestate meeting. At the conclusion the chairman announced:

"All doors and windows have been locked and no one will be permitted to leave until they have contributed to the cause."

A minute later a Hebrew fainted and two Scotchmen carried him out.

A SUGGESTION FOR CHRISTMAS

Haven't you often found it pretty hard to choose Christmas gifts for your men friends and relatives? Neckties, collars, socks are usable of course, but once in a while it's better to give something different, something that will bring long continued pleasure and enjoyment.

What could you get inexpensively that would be more appreciated than a famous book which can be read with interest over and over again? Or a magazine which prints just what men like to read and which will bring pleasant reminders of the giver throughout the whole year?

The Open Road
an interesting monthly magazine, and your choice of one of these famous books:

Blazed Trail by Stewart, Edw. White.
The Trimmed Lamp by O. Henry.
Lord Jim by Joseph Conrad.
Return of Sherlock Holmes by C. Doyle.
Haunted Bookshop by Chris. Morley.
Magnificent Ambersons by Booth Tarkington.
Ivanhoe by Sir Walter Scott.
Alice's Adventures in Wonderland by L. Carroll.

Separately they would cost $3.40, but the combination price is only $2.60

The books are full size, richly bound in English red leather, and beautifully printed,—a splendid addition to your library or a fine Christmas gift for your best friends.

Then there is a great treat in store for the men to whom you give The Open Road, a treat that will come 12 times a year. Prepared especially for young men, the magazine has won its way into the hearts of men of all ages. Stirring stories of life in the deep woods, on western plains and in the business world of great cities fill these pages, and there's many a good laugh in every number. Also there are up-to-the-minute articles on business opportunities, athletics, exploration and adventure in far countries and on the personal problems of life.

President Coolidge says, "The Open Road is clean, animated, and of genuine inspiration for courageous living."

Let this special combination at $2.60 help take care of your Christmas list this year. Send your orders to The Genesee News office. They will be forwarded to the publishers at once.

Chamberlain's Tablets Have Done Her a World of Good

"Chamberlains Tablets have done me a world of good," writes Mrs. Ella L. Button, Kirkville, N. Y. "I have recommended them to a number of my friends and all who have used them praise them highly." When troubled with indigestion or constipation, give them a trial and realize for yourself what an excellent medicine it is. Sold at Clark's Drug Store.

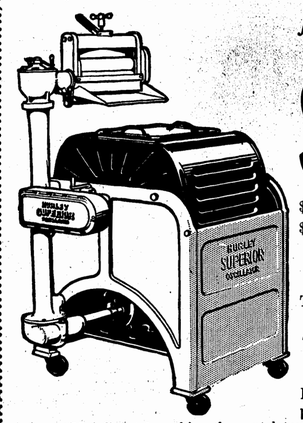
Only One More Day Left

THE SALE OF OSCILLATORS is fast drawing to a close. Have you got your washer yet? The sale of this machine has been the biggest opportunity of the year.



Just Think Of It!
ONLY
$1.00 DOWN

$109.10 on long-time payments.
$ 99.00 if paid for within 30 days of time of purchase.

All Thor Washers
This month $1 down and balance in easy payments.

The Sale of Westinghouse Percolators
Is also a great opportunity. A $12 percolator for $9.85—$1 allowed on any old coffee pot, making the percolator to you for $8.85. Don't miss this opportunity. Get your order in early Friday morning so we can deliver one to you before the sale is closed.

Washington Water Power Co.

In the District Court of the Second Judicial District of the State of Idaho, In and For the County of Latah

Louise Tierney and W. J. Tierney, her husband, plaintiffs,
vs.
Katherine Evits and the unknown owners of or claimants to the following described premises situated in Latah county, State of Idaho, to-wit: The southeast quarter of the northwest quarter (SE¼NW¼) of section seven (7) in township 37 North of Range 5 West of the Boise Meridian, containing 40 acres more or less; and also a strip of land along the south side of the north half of the northwest quarter of section seven (7), township 37 north of range 5 W. B. M., in the northwest quarter of the northwest quarter and the northeast quarter of the northwest quarter of said section seven (7), described as follows: Beginning at a point 261.7 feet south and 41.3 feet east of the northwest corner of section seven (7), township 37 north of range 5 W. B. M., and running thence east on a line parallel to the north boundary of said section seven a distance of 2598.7 feet to the quarter section line between the east and the west half of said section seven, thence south on the quarter section line a distance of 1033.3 feet to the one-sixteenth corner; thence west on the one-sixteenth section line 2640 feet to the intersection of the west line of said section seven, said line being the range line between ranges five (5) and six (6) W. B. M., thence north, on the range line 1016.5 feet; thence north 38 degrees 57 minutes east a distance of 1058.3 feet to the one-sixteenth corner; thence west on the one-sixteenth section line 2640 feet to the intersection of the west line of said section seven, said line being the range line between ranges five (5) and six (6) W. B. M., thence north, on the range line 1016.5 feet; thence north 38 degrees 57 minutes east a distance of 664 feet to the place of beginning, said strip of land containing 64.089 acres, more or less; also a piece of land lying in the northwest quarter of the northeast quarter of the northwest quarter of said section seven (7), township 37 north of range 5 W. B. M., and running thence east on a line parallel to the north boundary of said section seven a distance of 2598.7 feet to the quarter section line between the east and the west half of said section seven, thence south on the quarter section line a distance of 1033.3 feet to the one-sixteenth corner; thence west on the one-sixteenth section line 2640 feet to the intersection of the west line of said section seven, said line being the range line between ranges five (5) and six (6) W. B. M., thence north, on the range line 1016.5 feet; thence north 38 degrees 57 minutes east a distance of 664 feet to the place of beginning, said strip of land containing 64.089 acres, more or less; also a piece of land lying in the southwest quarter of the northeast quarter of section seven, township 37 north of range 5 W. B. M., described as follows: Beginning at the northwest corner of said southwest quarter of the northeast quarter of said section seven (7), and running thence east on the north boundary of said southwest quarter of the northeast quarter of said section seven (7), 1333 feet to the northeast corner of said southwest quarter of the northeast quarter of said section seven (7), and running thence south on the east boundary of said southwest quarter of the northeast quarter of said section seven (7), 1333 feet to the southeast corner of said southwest quarter of the northeast quarter of said section seven (7), and running thence west along the one-sixteenth line a distance of 1333 feet to the point of beginning, said piece of land containing 2.809 acres more or less, the above named defendants:

You are hereby notified that a complaint has been filed against you in the District Court of the Second Judicial District of the State of Idaho in and for the county of Latah, by the above named plaintiffs of the nature in general terms as follows: To obtain a decree of this court quieting plaintiff's title to the southeast quarter of the northwest quarter (SE¼NW¼) of section seven (7) in township 37 north of range 5 West of the Boise Meridian, containing 40 acres, more or less; and also a strip of land along the south side of the north half of the northwest quarter of section seven (7), township 37 north of range 5 W. B. M., in the northwest quarter of the northwest quarter and the northeast quarter of the northwest quarter of said section seven (7), described as follows: Beginning at a point 261.7 feet south and 41.3 feet east of the northwest corner of section seven (7), township 37 north of range 5 W. B. M., and running thence east on a line parallel to the north boundary of said section seven a distance of 2598.7 feet to the quarter section line between the east and west half of said section seven, thence south on the quarter section line a distance of 1058.3 feet to the one-sixteenth corner; thence west on the one-sixteenth section line 2640 feet to the intersection of the west line of said section seven, said line being the range line between ranges five (5) and six (6) W. B. M., thence north, on the range line 1016.5 feet; thence north 38 degrees 57 minutes east a distance of 66.4 feet to the place of beginning, said strip of land containing 64.089 acres, more or less; And also a piece of land lying in the northwest quarter of the northeast quarter of section seven, township 37 north of range 5 W. B. M., described as follows: Beginning at the northwest corner of the southwest quarter of the northeast quarter of said section seven (7), and running thence east on the north boundary of said southwest quarter of the northeast quarter of said section seven (7), 1333 feet to the northeast corner of said southwest quarter of the northeast quarter of said section seven (7), and running thence south on the east boundary of said southwest quarter of the northeast quarter of said section seven (7), 1333 feet to the southeast corner of said southwest quarter of the northeast quarter of said section seven (7), and running thence west along the one-sixteenth line a distance of 1333 feet to the point of beginning, said piece of land containing 2.809 acres more or less, the above named defendants; and you are hereby directed to appear and answer the said complaint within 20 days of the service of this summons, if served within said judicial district, and within forty days if served elsewhere, And you are further notified that unless you so appear and answer said complaint within the time herein specified, the plaintiff will take judgment against you as prayed in said complaint.

Witness my hand and the seal of the District Court of the Second Judicial District of the State of Idaho, in and for Latah County, this 27th day of October, A. D. 1923.

A Swede Who Knows

Aye bane yust a gude Swede farmer more than saxteen yare,
Aye raise some wheat and corn, and fat some hogs and steer,
Aye watch that farmer close for whare de money gits,
And aye find it koming kwickest when you bane pullin' titts.
Doze fellas wat ban raisin' grain and haulin' dem to town,
Hay got no money in da pocket; hay bane broke the whole yare round.
Dem fellas what bane fattin' stock bane rich and some bane poor:
Sometimes hay makes plenty money sometimes hay losin' more.
But dem fellas wit a brindle cow, hay got bully ting, you bet;
Hay never lost him whole yar's crop if ground too dry or wet.
When hail bane strikin' down da crop and yust bane raisin' fits,
At night hay call dem brindles in and yust bane pullin' titts.
Hay got da separator, what makes him lots o' cream,
Hay got dem money comin' in, yust like a pleasant dream;
Hay got de money in da bank hay got de money in da mitts,
Hay ent bane no Rockafella—hay yust bane pullin' titts.
—Exchange.

New Fish Hatchery

R. W. Thomas, state game warden of Idaho, recently announced that the Idaho game and fish department is finishing a $12,000 fish hatchery at Ashton, Idaho, and that next year the department plans to make improvements at the Sandpoint hatchery involving on expenditure of about $4,000.

The state game warden is not entirely satisfied with the result of the eastern brook trout in northern Idaho streams and that as far as possible only native trout will be raised in the state hatcheries in the future.

Is Proud of It

Your city man never looks up for fear he will be mistaken for a countryman. The countryman always looks up. He is proud of being a countryman.

Notice for Publication of Time Appointed for Proving Will, Etc.

In the Probate Court of the County of Latah, State of Idaho.
In the Matter of the Estate of Mary Isaksen, Deceased.

Pursuant to an order of said Court, made on the 19th day of November, 1923, notice is hereby given that Monday the 10th day of December, 1922, at 1 o'clock p. m. of said day at the court room of said Court, in the Court House in the County of Latah, has been appointed as the time and place of proving the Will of said Mary Isaksen, deceased, and for hearing the application of Peter Isaksen for the issuance to him of Letters of administration with the Will annexed, when and where any person interested may appear and contest the same.

Dated this 19th day of November, 1923.

Mrs. Stribling Boosts Her Fighting Son

Young Stribling, 160 pound high school heavyweight of Georgia, who recently fought a sensational battle with Mike McTigue, light heavyweight champion, comes of strong stock, as is proved in the above photo. Ma Stribling is with her son in Boston while he trains for fight.

WHEAT GROWERS ASSOCIATION HAVE SALES PLAN CROP

Proposals for legislation to improve conditions in the wheat industry will be at the front during the session of congress which is just opening, and the most discussed among the many plans to increase wheat prices is the program advocated by the American Wheat Growers Associated. This organization is the sales agency for nine state wheat growers associations, and brings to the support of its proposal the united strength of the more than 60,000 members of these state organizations.

The American Wheat Growers Associated advocates the creation of an agricultural export commission consisting of the secretary of the treasury, the secretary of commerce and the secretary of agriculture, who would be chairman. The commission would have power to levy a tax upon all of the saleable wheat produced in the United States. The fund thus created would then be applied as a premium on that portion of the wheat crop which is sold for export. Inasmuch as the export portion of the crop is less than one-fourth of the total production, the bushelage tax collected would be increased fourfold when applied as a premium on the export wheat.

Through the addition of this premium to the export price, according to the American Wheat Growers Associated, the domestic price paid for the three-quarters of the United States crop which is consumed in this country would be increased a like amount. The marketing organization declares that domestic buyers of wheat would be forced to increase their prices to compete with the world's price plus the amount of the premium, thus creating a general large increase over the going international markets.

"Thus the present price condition as an example to see how this plan would work out," said George C. Jewett, general manager of the American Wheat Growers Associated: From the present crop we have approximately 700,000,000 bushels of saleable wheat—that portion which leaves the farm. A tax of seven cents a bushel, or $49,000,000 would be assessed against this amount of grain. Then the fund would be applied as a premium to the available price which could be secured for the portion which we export, approximately 170,000,000 bushels. This would add about 30 cents a bushel to the price received for the export wheat.

The result would be that the amount thus added to the export price would also place the domestic price 30 cents a bushel above the present world's level. The enhanced price for export wheat would have to be met by those desiring to purchase domestic wheat. The returns to the farmer, then, would be 30 cents a bushel above the price he is now receiving, and from this would have to be deducted the sevencent tax, leaving him a net gain of 23 cents a bushel through the operation of the export commission.

"In considering this plan it must be understood that because of the fact that we have a considerable surplus to dispose of on world's markets, our domestic prices are definately limited by those obtaining outside the country. American wheat growers are able to increase the world's level of prices, so this plan in reality amounts to the arbitrary addition of about 30 cents a bushel to the Liverpool wheat prices. Our domestic prices, of course, would then increase a corresponding amount."

The tax, acording to the plans of the marketing organization, would be collected by the government through railroad channels and through certified mill reports on wheat delivered directly to mills by farmers. Export premiums would be applied on an equitable basis on flour milled in this country from United States wheat and then exported.

The tax and premium would be subject to revision by the commission from year to year depending upon the probable amount of the surplus and the world's price range, but always so fixed that the actual return to the farmers would be maintained at a point equal in purchasing power per bushel of wheat to the pre-war value of the commodity. The present tariff would be increased to at least 60 cents a bushel to protect domestic markets from the influx of foreign-grown wheat.

Mr. Jewett meets the argument that such an increase in price would result in greatly increased production by the statement that the collection of the tax would be an ever present argument to all farmers of the evil of growing an excessive surplus.

"It is obvious that the greater the exportable surplus in proportion to the domestic consumption, the higher would be the tax and the less the net results of the federal operation," he said. "The operation of an export commission on this plan would greatly assist the growth of co-operative wheat marketing associations such as ours, which heretofore, while making wonderful progress, have been handicapped by their inability to control enough wheat to protect domestic markets from the depressed conditions of international markets."

The American Wheat Growers' Associated plan, according to the organization, would result in benefits to high premium wheats equaling those of other varieties. The effect would be a flat increase in basic domestic price according to the amount added to the export price. The various price differentials in wheat values, based on different qualities, would be maintained.

The plan is defined by the organization as being a "reverse application of the tariff principle making that principle effective to the farmer on what he has to sell as well as on what he has to buy." Expense of operation it is claimed, would be comparatively insignificant because of the ease with which the tax may be collected from the saleable wheat and then applied as a premium to the surplus for export.

Engineer Warns Reckless Motorists

An appeal to all motorists not to approach railroad crossings at high speed, both for their own safety and out of consideration for locomotive engineers, is voiced by M. J. Malony of the Northern Pacific railway, Parkwater, near Spokane.

Mr. Malony said, "Every day we read of fatal accidents at railway crossings. If, as a locomotive engineer on fast trains, believe that 50 per cent of these accidents could be avoided if the country and city were forced to put up warning signs in conspicuous places, not less than 300 feet from the crossings on all public highways.

"The railway companies can not put up signs outside their right of way and those within their right of way are too near the crossings to be effective. Please ask automobile drivers not to come so close to the tracks at high speed.

"The automotive engineer, if he is near the end of his journey, has had thrills enough. His system has absorbed about all the shocks he can carry. If he is beginning his journey he will get them before he finishes it. And remember the warning, 'Keep to the right.' "

Concert Enjoyed

The musical concert given at the opera house last Thursday night by the Elliot family, a traveling organization, under the auspices of the students of the high school, was well rendered and thoroughly enjoyed by those in attendance.

A dance was given after the concert and the youngsters seemed to have a very good time—which they always do under such circumstances.

First Picture of Crown Prince Home Again

Here is the first and exclusive picture of the German former Crown Prince at home again. With him is his wife, who stayed in Germany through his five years of exile in Holland. This picture was taken at Oels, where they are now living in his castle there.

PUBLIC SCHOOL NOTES OF MUCH INTEREST

By Estel Rogers

Another good report has been received which shows that Genesee is still on the map; that our school can do good work, and that it has done work which has received recognition abroad. This report states that Sylvia Johnson has been awarded second prize in the state for writing the second best essay on the subject "Why immigration should be prohibited for five years." As a reward Sylvia will receive a bronze medal and fifteen dollars in cash, which makes a total of eighteen dollars she has received, for the local prize was three dollars. As this is a national contest, the best essays from each state will be sent on to the national headquarters, and we are hoping to hear in the near future that Sylvia has received a national prize.

This coming Friday night the boys basketball team will start the ball rolling by playing the first game of the season with the Johnson team, at Johnson. The team has three letter men , or men who played on the team last year. They are George Miller, Fred Cann and Clarence Doyle. The new players are showing up nicely and we have reason to believe that the squad will "bring home the bacon."

A week from this coming Friday night Moscow's team will play with our team on the local floor.

How many industries are there in existence? Is perpetual motion impossible? If so, why? What is ether? Do you weigh more at Lewiston or at Genesee? These are some of the questions being discussed in physics, which are causing the students to do some real work. Do the questions seem easy to you? Can you answer them? It will probably surprise some to find that there are in existence only six simple and distinct machines and these six can be grouped into two families. Although there are many complex machines they are just combinations of these six simple ones. You may not immediately call to mind the names of these six machines. If this is the case, they can easily be found in any good physics text.

We are not stating here what we believe regarding perpetual motion because if you were planning to build a perpetual machine, our idea might throw a damper on your plans. At any rate we will be willing to take off our hat to you if you can perfect such a machine.

If you did not hear the Elliott orchestra last Thursday evening at the opera house you missed a good musical treat. The program was started with a lively march which was very good. Next in order followed overtures, waltzes, violin solos, cornet solos, selections from operas and some sacred and well-known popular music. After the concert the orchestra played for the dance. Weather conditions prevented a large attendance, but just

(Continued on last page)

"The Sea Lion"

The film feature at the opera house Saturday night will be "The Sea Lion" with Hobart Bosworth in the leading role, who takes the part of Nels Nelson, the fighting "Sea Lion." Mr. Bosworth again comes to the screen in the Viking type that his genius depicts so faithfully.

Nels Nelson, the "Sea Lion," was naturally endowed with a buoyant and happy nature. But the domestic tragedy of his early manhood, combined with the constant, sombre battle waged against the sea welded him into a man of iron before whose strength all bowed in fear. Warped and twisted by the hate against mankind that he had carried in his heart so long, the old "Sea Lion" terrorized all with whom he comes in contact. The discovery that he has wronged the memory of his wife, and the love for his daughter whom fate has cast into his life succeed in softening his embittered nature.

The qualities of Bosworth's acting are essentially those of energy and viritity, and it is hard to believe that he could ever have found a role more suited to his gifted personality than "The Sea Lion."

Wins State Prize

The local post of the American Legion was notified last Saturday afternoon that Miss Sylvia Johnson of Genesee had been awarded second prize in the American Legion essay contest on the subject "Why immigration should be prohibited for five years," and would thus receive a prize of $15 in cash from the state headquarters of the Legion and will also receive a bronze medal from the national organization as a reward for her efforts and ability.

Miss Johnson received first place in the local contest, receiving a prize of $3 in cash; she also secured first place in the county contest and the award of second place in the state contest places her near the top in the contest.

Her many friends in Genesee will rejoice with her on learning of her reward for her ability.

Real Snow and Coasting

Last Friday the first real snow of the winter season came, and while there was not a great deal of it, the youngsters took advantage of the opportunity and brought forth their coasters and had several hours of real coasting. However, since that date the weather has been mild enough to suit the most exacting in the weather line.

Here's hoping that Old Man Winter does not come any closer to our little "berg" than he has to date.

At Federated Church

There will be preaching at 11 o'clock by a local preacher. Text, "Salvation by Grace."

A special invitation is given to all to come and hear a "farmer preacher" discuss the things that pertain to eternal life.

Can't we spend one hour with Jesus on the Lord's Day?

SEMI-LOCAL NEWS CLIPPED FROM EXCHANGES

Buys High Grade Ayrshire

Mike Kinzer last week received from the coast a high grade milking strain Ayrshire calf which he purchased through the farm bureau. He is well pleased with it and will develop the little animal into a milk cow to add to his present herd.—Uniontown Journal.

60 Acres Sold For $5300

James Johnson, the first of the week sold his 60 acre ranch in the Greencreek district to W. J. Miller for a reported consideration of $5300. The deal is said to have been for cash. Mr. Miller will farm the land with his own holdings in that section. —Cottonwood Chronicle.

Lauds "Biddies"

C. M. Busch is one of the Colton farmers who is getting results from a fine flock of chickens. During the last year or two if he had depended on the grain crop alone, he would not have gone very far, but the eggs and fryers helped materially. — Colton News-Letter.

Dairy Cows Sold Well

The dairy cow sale held here last Saturday indicated to a marked degree that there is a very strong demand for dairy cows in this section. The average price paid for the 27 head sold was over $100 each. There was a large crowd present at the sale and bidding was spirited and showed keen interest. Mr. Cranke may bring another carload from Oregon some time the latter part of next month.—Kendrick Gazette.

Russell-Hagan Nuptials

Louis B. Hagan and Miss Irma Russell were united in marriage at 10 o'clock a. m. Saturday, November 24, at the home of the bride's grandparents in Lewiston. Rev. Mark Pike of the Methodist church officiated. The contracting parties are well known in this vicinity.

Upon their return from Spokane Monday night, Mr. and Mrs. Louis B. Hagan were most pleasantly surprised at the home of his sister, Mrs. Don L. Peterson where a number of friends and relatives had gathered to give them a shower.

The principal feature of the evening was a mock wedding. The evening was spent in music and singing, after which a most delicious luncheon was served by the hostesses, Mesdames John Peterson, Simon Hagan, Sam Olson and Olie Hagan.

Mr. and Mrs. Hagan were the recipients of some beautiful, as well as useful, gifts.—Troy News

Dairy Cattle Arrive

A car load of dairy cattle reached Colton last Saturday.

M. Schultheis Jr., president of the Colton State bank, and a dairyman of experience, in company with Patrick Burford, agent of the Whitman county farm bureau, made a trip to Mount Vernon and picked the cows and heifers. Thirteen farmers formed a dairy club for this shipment.

Fifteen silos were built in the district this fall and were filled with silage for the winter.

From the number of dairy cattle being shipped into the Colton country it is very evident that the farmers of that country think there is some reward for the labor expended.

The Children's Home

Rev. M. A. Covington of the Children's home at Lewiston was in Genesee Thursday presenting the work of the home. He reports the response very good. The offering of the public school was very good also.

A school teacher writing from Genesee wished to help by sending a donation of fruit and clothing but failed to sign her name so the society can not answer her communication. There are 43 children in the home at the present time and on behalf of these and others coming for care the management wishes to express their apreciation of the support from Genesee friends.

Pine Grove News

The annual Thanksgiving dinner at the Pine Grove school house was well attended. A very bounteous' dinner was served, followed by a bazaar which consisted of articles furnished by ladies of the sewing circle. The proceeds will be used to purchase the Christmas treat and decorations.

Lester Hayden, jr., has recovered from the measles but four other members of the family have taken them but at last report they were able to be about.

Mr. Brazier made a trip to Levistan Monday.

Contempt Decision Stirs Public

Charles L. Craig (above) Comptroller of the City of New York, through a decision of the U. S. Supreme Court must serve sixty days in jail for contempt of court unless public opinion now rallying to his support forces a pardon. Below is Justice Julius Mayer, of New York, whose decision, almost three years ago, was upheld by the higher court. Prominent men declare it complete violation of the principal of free speech and free press.

MORE SODATOL FOR LATAH COUNTY FARMERS

Arrangements are being completed by County Agent O. S. Fletcher to get another carload of sodatol for farmers of Latah county to use in land-clearing work. This carload will probably be shipped to Troy, as more than 10,000 pounds have already been ordered by farmers tributary to that point. Anyone desiring to get sodatol should write to the county agent at Moscow at once and let him know how many pounds he will take if enough orders for another carload can be secured. No money should be sent with this letter.

Sodatol is a high explosive made by mixing together TNT and sodium nitrate, both powder or meal forms. The bureau of public roads of the federal government is distributing this explosive to farmers for land improvement work at the actual cost of transportation, loading, and hauling. This explosive can be laid down at Latah county points for not to exceed eight cents per pound. Farmers desiring sodatol will deposit $8 per hundred pounds in advance, and any surplus left after accounts are paid will be refunded. Thirty cents per hundred was refunded on the first orders, making the net cost $7.70 per hundred.

Sodatol is a comparatively safe explosive. While it is more sensitive than TNT or picric acid, there is no danger in handling it provided that the ordinary care used in handling explosives is used. In locomotive of sodatol, as it has been prepared for distribution, weighs about seven ounces and is equal in strength for agricultural blasting to the usual cartridge of 40 per cent dynamite which weighs eight ounces. Sodatol can be completely detonated by a No. 6 cap of either the electric or fuse type.

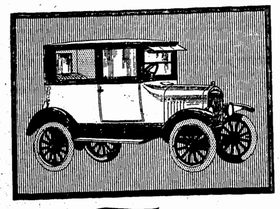
Two carloads of this explosive were distributed to Latah county farmers during November by County Agent Fletcher. One carload was shipped to Princeton and one to Deary. The shipments were made up of orders from 139 farmers living in 14 different communities. Caps were furnished for this lot by the government for the cost of transporting them from Virginia to destination. Figuring 40 per cent dynamite at 20 cents per pound and caps at $1.50 per hundred, both very conservative figures, Latah county farmers saved a total of $4873.05 on these two carloads of explosives for land clearing work. Eighteen farmers who purchased sodatol with the first shipments have ordered more sodatol. This would seem to indicate that the explosive is giving good results.

Mercury Takes Drop

The mercury hit a new low point for the winter season last Thursday night, it having gone down to 16 degrees above zero—and every one seemed to think it was cold—just because we have been having California weather here for so long.

It's been great!

A New Body Type



THE *Tudor* SEDAN

F.O.B. DETROIT **$590** FULLY EQUIPPED

The Tudor Sedan is a distinctly new Ford body type, admirably designed for harmony of exterior appearance and excellence of interior comfort and convenience.

At $590, its price is lower than any sedan ever put on the American market.

Wide doors, folding front seats, well spaced interior, dark brown broadcloth upholstery and attractive trimmings give it individuality, comfort and convenience.

See this exceptionally desirable new Ford product in Ford showrooms.

This car can be obtained on the Ford Weekly Purchase Plan.

Inconsiderate

As long as the grass in a Chicago public park is healthy and green the citizens seem to look upon it as some sort of garden and keep off of it as the signs command them. When it begins to die out, however, their respect for it instantly vanishes.

A man in a hurry one day started to cut across a narrow patch in the upper park but was stopped by a policeman.

"What difference does it make?" demanded the citizen. "The grass is half dead already."

"Sure," said the indignant officer, "if ye had a sick friend, would ye be walkin' on his stoomach?"

EAT CARLOAD OF SPUDS AND DRINK 4,500 GALLONS MILK

Students in the dormitories of the State College of Washington eat a carload of potatoes every thirty days, and drink 150 gallons of milk a day—which is 4,500 gallons a month.

If the bread they eat in the three dormitory dining halls every thirty days were built into a wall a foot thick and six feet high it would make a barrier 144 feet long. And if the butter served during that same period were spread an eighth of an inch thick it would cover a slice of bread 808 feet long and 408 feet wide—as big as the lawns separating the dormitories.

A refrigerator car of beef, or 12,750 pounds, would last just a month, for beef or some sort of meat is served at least once a day, and it takes 425 pounds of beef for a single meal for the men of the New dorm and Ferry Hall (who eat together) and the women of McCroskey and Stevens Halls, who have separate dining halls.

If the plates that have to be washed each day in the supplying kitchens were laid in a row they would reach a mile and a quarter—2,900 of them. And there are, of course, all the auxiliary dishes, as well including some 19,000 pieces of silverware.

These figures give some conception of the vast task of feeding regularly and satisfactorily even the portion of the student body housed in the dormitories. There are, in addition, hundreds of students who have their meals elsewhere of couse, in the 32 fraternities, the Vocatioal club and like organizations, and those living in private homes.

A trained dietitian is in charge of the planning, purchasing and preparation of the meals, with an assistant in each dining hall. A small staff of cooks and bakers is supplemented by a large corps of student waiters and helpers. This is one of the avenues through which the college gives employment to many self-supporting students.

There Must Be a Reason

"American Men In Rags," reads a newspaper heading to a news dispatch sent out from Chicago the other day telling of a meeting of the National Association of Retail clothiers. It is very plain to be seen that the real reason that "American men" are in rags is on account of the unreasonably high prices that have prevailed.

One can always get a guarantee that the piece of cloth or ready-made suit is "all wool," but they fail to state whether it is "virgin" wool or "shoddy," that is, old woll clothing ground up and mixed with a little new wool in order to make it hold together.

The report of the gathering said, in part:

Conspicuous by their absence were the boiled shirt, the detachable cuffs, the dickey and padded shoulders in men's coats.

The college men of the country are dictating the fashions of today, clothiers say.

Fifty per cent of the Amecan male population is practically in rags, Fred Volland, president of the organization, declared today, adding that the retail clothier stands in the midst of a virgin field of endeavor. Last year only 52 hats and 62 suits were sold for each 100 American men, he said.

"This means," he stated, "that should a series of material misfortunes engulf American men overnight about one-half would have to seek refuge in overalls or in bed."

"Outside appearances of the average male are even better than the clothing found underneath," he said, adding:

"A national laundry statistican gives me the statement that more than 50 per cent of the men's laundry is either worn out or sadly in need of repair."

He said clothiers might expect a good fall business, but advised them not to try to "stretch a two-base hit into a home run."

THE GENESEE NEWS

HELPFUL HINTS by Aleda

Mrs. Housewife: This newspaper will publish "Helpful Hints" in this form at regular intervals. We suggest you clip this column and paste it in your recipe book.

Removing Wall Paper.—In removing wall paper first wet it all over with a thin paste made of flour and water. When it has dried, the paper will shrink and may be pulled off in strips.

• • •

Straw Matting.—If one finds the necessity to lay straw matting in corners it can be done very easily if a brush is dipped into a pail of water (into which a cup of salt has been added) and thoroughly wet the straw.

• • •

Shoe Economy.—When taking off shoes, use the hands and not the feet. When putting them on use a shoe horn. They will last much longer.

• • •

Gasoline.—Gasoline which has been used for cleaning an article may be used again and again if, when soiled, it is filtered through filter paper which can be purchased at any drug store.

• • •

Steaming Velvet.—A piece of velvet that needs the nap raised may be made to look almost like new if this simple process is followed. Hold the wrong side of the velvet taut over a pan or kettle of boiling water. Then hang in a shady place and when dry brush with a soft bristled brush.

• • •

For the housewife who does her own cooking (and especially for the one who is just starting out), these tables may prove of great value.

A Man of His Word

"Sorry to mention it, old man," said Brown, "put it's six months since you borrowed that $5 of me and you promised faithfully to return it in six weeks."

"I know it," returned Johnson, taking a memoranda from his pocket. "That bill was series F, No. 672,945, issue of 1910. I made a note of it, then spent the money. Since then I've been trying to recover it but haven't succeeded."

"But," said Brown, "any other $5 bill will do as well."

"No," reasonoded Johnson, shaking his head. "I'm a man of my word. I said I'd return that bill to you Brown old friend, and I meant it. Just as soon as I come across No. 672,945, series F. issue of 1910, I'll see that you get it, for I'm not a man to go back on my promise, no sir."

LEVIATHIANS DROWN IN BATTLE WITH SHARKS

An unusual battle between monsters of the deep was witnessed by members of the territorial legislature and their guests while traveling between the islands of Oahu and Molokai on an inspection tour of the leprosarium at Kalaupapa and the rehabilitation tract at Kaunakakai, Malakai.

The smooth sea was broken suddely, about a mile from the ship, by the broaching of one whale and then a second, leaping clear of the water and then plunging into the sea as though they were playing. Presumably they were sounding, but they were down less than a minute and appeared again, leaping high in the air. Next the whales reared their ungainly heads above the water and seemed to be spinning slowly on their tails like huge tops.

At this point the vessel carrying the legislators came sufficiently close to the whales to make the movement of the mammals clearly visible from the decks. It was found that the whales, instead of playing, were being attacked by two thrashers, or huge sharks, which are remarkable for the length of their tails.

Time after time the whales rose above the surface. They whirled and spun around, it was explained by the ship's officers, in an effort to shake off the thrashers.

"When the whale sounds he tries to loose the thrashers in the depths," said Representative G. F. Wilder, an authority on marine life. "The thrasher, being more nimble, dives under the whale and prods him in the belly, forcing him to the surface again.

"As soon as the whale broaches the thrasher hammers him on the snout. The broad flukes lifted in the air that look as though the whale had grown another tail between his shoulders belong to the thrasher.

"The whale cannot stand that punishment very long. Every time the thrasher hammers the whales head under water before he has time to fill his lungs with air he grows weaker. Ultimately he drowns, for a whale must have air, and if he cannot obtain it he suffocates."

Finally the battle was left astern by the legislators' vessel. The struggles of the whales had passed into the death furry. The interval between their rearings from the water had grown so short that they were in the air most of the time, spinning slowly in small circles. The end came after the whales had passed from view.

Boycott Them

"Now, children," beamed the Sunday school teacher, "who can suggest the lesson we are taught by the downfall of Samson. Very well, Georgie."

"Don't patronize women barbers, ma'am."

There's a Reason

Wife: "Didn't I hear the clock strike two, as you came in last night?"

Hubby: "You may have. It started to strike eleven an' I stopped it so's not to waken you."

His Reward

"John Jurdan is dead at the age of eighty-two," said Timrod Tarpy. "For many years he walked quietly along in the straight and narrow way, harming nobody, running over no one shoving no one out of it, and now and then pulling some weaker brother back into the path. He paid for everything when he bought it, minded his own business, and was not inquisitive about the affairs of others. He never gossiped and always did his duty as he saw it. Consequently a good many people suspected him to be playing a smooth game of some sort, and the rest regarded him as a slow going old fogy with no great amount of sense and to prove it called him 'Uncle Johnny' during the last thirty-five years of his life.

Gift of a Tightwad

Jeff Doakes was known far and wide for his economical habits, and gloried in them.

"I'll bet, Jeff," remarked an acquaintance, "that you didn't even spend money to buy your wife a birthday present this year."

"Well, yes," admitted Jeff regretfully, "I weakened a little when her birthday come around. I went and spent $2 for puttin' an ad in the paptr that she takes in sewing.'

Fast, Faster, Fastest

Judge: Ten dollars.

Motorist: Can you change a $20 bill?

Judge: No, but I can change that fine. Twenty dollars.

MICKIE SAYS—

This is deep sea-going stuff. A man may be as old as his arteries, but a vain man thinks he is as old as he looks.

Church meeting at 11 o'clock.

There will be the usual meeting of the Christian Endeavor at 7:30 p. m. Everyone is invited.

Many Tourists Register

The Highbridge tourist park of Spokane has returned to the park board $4,932 in receipts for the season, according to figures compiled by city officials. During the season 6,287 cars visited the camps and spent from one to three days within its borders. The average for the season was a day and a half per car.

Progressives Will Meet

The Progressives will meet at the home of Mrs. Ira Hanson on Thursday, December 13. All ladies are urged to attend and bring their share of the pick-up lunch, which will be served.

Ladies Aid to Meet

The ladies aid of the Federated church will meet at the home of Mrs. F. S. Casebolt with a pick-up lunch on Wednesday, December 12. All ladies are requested to be present.

First-Class Undertaking Service

The W. J. Herman Company has made arrangements with the Vassar Undertaking company of Lewiston whereby they will handle all cases in that line in a first-class manner at no additional charge for work in this community. Licensed embalmer, auto hearse. Phone your orders to W. J. Herman Company. Phone 6F2. 12-tf

A Good Thing—Don't Miss It

Send your name and address plainly written together with 5 cents (and this slip) to Chamberlain Medicine Co., Des Moines, Iowa, and receive in return a trial package containing Chamberlain's Cough Remedy for coughs, colds, croup, bronchial, "flu" and whooping coughs, and tickling throat; Chamberlain's Stomach and Liver Tablets for stomach troubles, indigestion, gassy pains that crowd the heart, biliousness and constipation; Chamberlain's Salve, needed in every family for burns, scalds, wounds piles, and skin affectations; these valued family medicines for only 5 cents. Don't miss it.

New Board of Health

At a special meeting of the city council Wednesday night a city board of health was appointed by the city council, which will have the same authority as any board of health, and which was appointed at the request of the state board of health.

In conformity with the rulings of the state board of health the following rules are to be applied in the prevailing epidemic of measles.

A warning sign must be placed in a conspicious place on the residence.

All children of school age must be kept on the premises.

Adults who have had the measles may go and come if they do not come in contact or have to eat and sleep in rooms occupied by the sick.

The quarantine can not be released until two weeks after the recovery of the last sick one.

After release all school books which are in infected houses may be wrapped in newspapers and carried to the school superintendent who will look after their disinfection.

Any one harboring a contagious disease must either call a doctor or notify the local board of health of the existence of such disease on his premises.

No person residing in a house in which there is a person suffering from a contagious disease shall be permitted to attend any public, private, parochial school, or college, or Sunday school or any other public gatherng until the quarantine has been removed by the board of health.

Any one violating these rules is subject to a $50 fine.

Dr. F. B. Evans
Supt. F. H. Thomas
W. M. Herman
Genesee Board of Health

New Candy Cases

Outing flannels, 25-cent values, 20 cents.

Very good silk pongee, 36 inches wide, $1.10 per yard.

Ida Wheeler

Our line of personal Christmas greeting cards was never finer. You are invited to call and see them.

Some Reasons

We would like to give just a few reasons why this issue of the news may appear to be a little short of real local news: In the first place we have just installed a new stereotyping outfit, which of course had to be uncrated and set up—and tried—the result of which you will see in this issue of the News—the up-to-date picture and news service, which is used by no other country weekly in this section of the country, and which we sincerely hope our readers will enjoy.

In the next place, when the News man came to the office Thursday morning he found—as had been the case many times before—that the rain had fallen on the roof and come straight through to the desk immediately beneath a hole, or many holes, and everything was soaked to perfection. Of course our temper was somewhat ruffled but that did not dry out the desks, books, papers, letter files, etc. that had been almost ruined.

And in several "other places" we have reason to have sore spots from the general drift of various things, in which our readers are not interested, but which do not help matters. However, we hope to have things working in good shape by another week, when our big Christmas paper will appear, and we hope you will enjoy it.

Guaranteed the longest Wearing Tire on the Market

A C-T-C Tire FREE If It Does Not Outwear Any Other Tire

UNTIL January 15th authorized C-T-C tire dealers will match a C-T-C tire on any user's car against any other tire of the same size on the market.

Place a new C-T-C tire on any wheel of your car opposite a new tire, equal size, of any other make you care to choose. Then drive them continuously until one gives out.

If the C-T-C fails to outwear the other tire, you will get another C-T-C tire FREE.

This astounding factory Guaranty is simply an offer to PROVE to every tire user the remarkable performance of these hand-built C-T-C tires, and to demonstrate the good faith of the manufacturer behind them.

C-T-C tires won't skid—and can be driven at low inflation to "Conserve the Car." They are the strongest, toughest, longest enduring tires built.

BUY YOUR TIRES FOR SPRING NOW

In spite of their GUARANTEED SUPERIORITY C-T-C's cost NO MORE than ordinary tires.

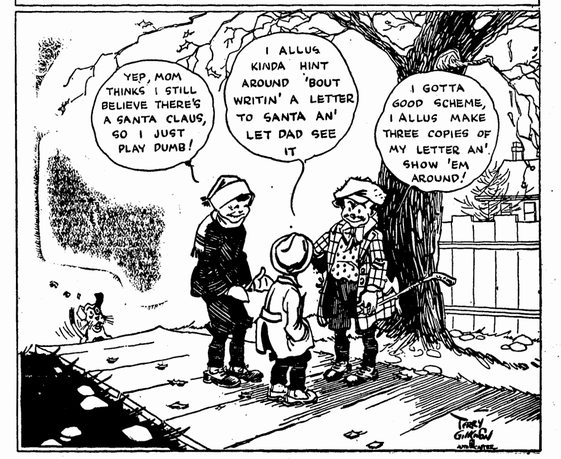
Mr. and Mrs. H. A. Manderfeld are the proud parents of a baby girl, born Thursday evening. All concerned are reported as doing nicely.

The world is fairly well divided between those who like music and those who like jazz.

"THE THREE WISE MEN"



Linger Longers Meet

The Linger Longers met at the home of Mrs. Virgil Sampson on Wednesday, December 5. The afternoon was spent ni fancy work and social converse, after which a delicious luncheon was served by the hostess. The invited guests were Mrs. Glen Sampson and Mrs. Walter Jain. The next meeting will be at the home of Mrs. Harry Schooler on Wednesday, December 19.

Chamberlain's Cough Remedy the Mother's Favorite

The soothing and healing properties of Chamberlain's Cough Remedy, its pleasant taste and prompt and effectual cures have made it a favorite with people everywhere. It is especially prized by mothers of young children for colds, croup and whooping cough, as it always affords quick relief and is free from opium and other harmful drugs. On sale at Clark's Drug Store.

They used to spank the children and send them to bed, but now the children don't get home in time for their parents to send them to bed.

GIFTS OF UTILITY

A Gift With a Personality

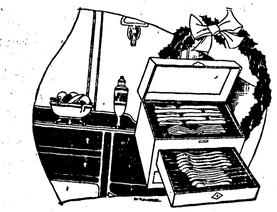
NEVER before have we been able to secure such an extensive stock of fine CHINAWARE for CHRISTMAS. We can suggest nothing better than a piece of this imported HAND-PAINTED CHINA. We now have a large display of these handsome dishes in our display window.

Salad Bowls and Cake Plates
Berry Sets *Sugar and Creamers*
Bread and Butter Plates
Cups and Saucers in Lunch Sets
PRICES, $1.25 -- $9.50

GIFT LAMPS TO BRIGTEN DARK CORNERS

Coleman Quick-Lite—"The Sunshine of the Night." 300 candle-power; brighter than 20 old-style oil lamps. Lights with a match. Choice of different models. Priced from $8.75 to $12.00.

A Beautiful Chest of Silverware



A Gift of Silverware will Shine Through a Thousand Gifts

WHAT gift could bring a greater joy to the home than the gift of gleaming new silver for the table? Announcing Tudor Plate—a new line with a 20-year replacement guarantee. Patrician and Grosnover Community patterns. This silverware is put up in dainty boxes just right for Christmas.

Pyrex Oven Glass

Gifts that bring joy to the task of home-making. Aren't these gifts worth while?

Teapots *Pie Plates* *Casseroles* *Bread Pans*
Custards *Pudding Dishes* *2-Compartment Dish*

HASFURTHER HARDWARE

Poem by Uncle John

Since I've been wearin' glasses, I command a better view of myself an' my surroundin's than my naked eye could do. . . . They have broadened my perspectif in a gratifyin' way—till my neighbors pay attention to most anything I say.

A feller can't help smilin' when he puts his glasses on, an' views his feller-mortals with their imperfections gone. . . . They used to look so snoopy, with so much to criticize,—O, it's powerful misleadin' when ye got defective eyes!

When the age for wearin' glasses fetches hair of silver grey, we can love our neighbors better, as their failin's melt away. . . . If we keep our sight corrected by self-sacrificin' art, we attain that calmer vision, which endows a nobler heart.

Important Discovery

"What we want to discover," said council, "is who was the aggressor,"

"Eh?" said the fierce looking witness, doubtfully.

"Let me explain," said the council patiently. "If I met you in the street and struck you in the face I should be the aggressor."

"No, no. You don't understand. If I struck you without provocation I should be committing an act of aggreviation."

"Excuse me, boss, you'd be committing suicide," declared the witness.

The Peacemaker

The small boy came careening down the street at a terrific speed. He bumped into old women, trod on all the dogs that got in his way, upset a tray of muffins in front of a bakery, and finally collided with Mr. Smith on his way to town.

"Don't stop me!" yelled the boy as Smith siezed his arm.

"What are you running for?" asked Smith.

"I'm trying to keep two fellows from fighting!" gasped the small boy.

"What two fellows?"

"Johnny Mason and me."

EGGS 6 CENTS A DOZEN—MILK 3 CENTS A QUART

Eggs at 6 pence a dozen, milk 3 pence a quart, choice meats, 5 pence a pound. No, it is not Utopia, or any other mythical socialistic colony. It is Mount Silinda, South Rodesia, in Africa.

E. D. Alford, a 1915 graduate of the college of agriculture at the State College of Washington is stationed there by the American Board Mission, and is looking for a teacher of agriculture in the school that has been opened there. In reply to a query as to the salary pair he says:

"The basal salery here is $1200. This may seem small to you, but on top of this is the children's allowance; a residence and its upkeep free of charge, a health fund of $50 a year which may be allowed to accumulate to use at one time if desired. Personally, I feel that with my present salary I am better supplied and have much less to worry about in the way of pecuniary support than if I were in Pullman drawing a salary of $3,-000.

"This may sound strong to you. But we have no fuel and water bills; medical attention and supplies are free aboard in the hospital; 15 shillings a week); garden crops can be grown in abundance the year around; eggs are 6 pence per dozen, milk 3 cents per quart; choicest cuts of meat at a butchery run by a nearby neighbor, 5 pence per pound; chickens from the natives 6 pence each; a boy for garden work, 15 shillings per month. I might go on indefinately. However, things for which we must send away are very expensive. Sugar is 1 shilling per pound, clothing the London price, or American, plus the postage. But outside of sugar and clothing all our needs are supplied at the door.

"I forgot to mention the equipment allowance. All appointees of the Board are given outfit allowances: for a married missionary $500 on appointment and $150 at the end of the first year in the field. No account is asked for as to the expenditure of the allowance. The Board pays freight and charges to destination, including duties, on 240 cubic feet of outfit, regardless of weight, also insurance to the extent of $1,000. A refit allowance is given after a five year term of $175, and freight and other charges are met by the Board on 90 cubic feet. Outfits purchased for use by such allowances are the personal property of the missionaries.

"At the end of each five-year term the Board pays all traveling expenses of a journey home by the most direct and economical route consistent with health (they consider traveling third-class unhealthy). A traveling grant of 10% of the basal salary is given per month, so that a missionary may take advantage of side trips of an educational value en route if he desires.

"A home allowance is given, dating from arrival at destination, of $1,000 a year for husband and wife, $100 for each child under 7, $150 for each child between 7 and 14, and $250 for each child between 14 and 20.

"Finances are the least of my worries. I have a good living, my children will have much better support while in school than I had, and—greatest of all—I have the satisfaction of serving in the most worthwhile cause in the world."

"Dance Craze Sweeps Europe," announces a headline. What tourists know is that something ought to sweep it.

Perpetual Spring Fever

Visitor—"Don't you have a curfew law here?"

Native—"Well, we did once, but we cut it out."

Visitor—"Why?"

Native—"Because it woke people up."

RICHARD LLOYD JONES SAYS

Justice is the Goal of Civilization

Virtue finds its truest expression in justice. Liberty and equality are empty words unless they rest upon justice which at all times is the true principle for humanity. Separate liberty or equality from justice and neither can stand. The passion of all great prophets throughout all ages has been for justice.

It is the one-word definition of the Golden Rule. It was not only the basis of the teachings of Jesus but of all great religious seers and prophets. Each in his turn and time and in his own way said the same thing. Confucius put it: "What I do not wish men to do to me, I also wish not to do to them."

Justice is virile; it is never passive or indifferent. It is the truth in action. Justice may be violcent; it is always violent to the one who offends it. We may prize success, covet wealth, seek honor, but none of these can satisfy unless they come through justice.

He is great who, for justice's sake, can forget friends, kin, self-interest—all—to fight for or to work for that which is right for another, a stranger perhaps, or even an enemy. We cannot secure justice for ourselves through denying justice to others. It is not in the order of things, for justice is consistent, impartial and always fair.

Though justice is impartial it is not blind. Science is governed by its laws.

The nation that loves liberty most sincerely and that fights only for human justice is seldom found in the brutal entanglements of war and then only in a benignant war made holy by the passion for justice. The nation that covets property and men, that seeks to enrich itself by devastating its neighbor, is found most often in the throes of war and then for the shameful and unsatisfying end of boldly defying justice. And as with nations so with men. Such nations come to no good end.

"Justice," said Daniel Webster, "is the greatest interest of man on earth. It is the ligament which holds civilized beings and civilized nations together."

Happiness and progress are secured only when justice is honored,

How Did Felix Know

Gift of the Desert

COPYRIGHT A.C.McCLURG & CO.

by Randall Parrish

SYNOPSIS

CHAPTER I.—On the isolated Meager ranch, on the southern border, Deborah Meagher, betrothed nurse, in attendance on Mrs. Meager, whose husband has recently been killed, victim of an accident, immediately after the death, Bob Meager, Mrs. Meager's stepson, arrives and takes possession. He insults Deborah and she resolves to leave, but there seems no possibility of her getting away, alone.

CHAPTER II.—Meager gloats over Deborah's plight, telling her he has sent for a justice of the peace, who will marry them tomorrow. Horrified, the girl secures a revolver.

CHAPTER III.—The justice, Cornelius Garrity, scout and bosom friend of Meager, arrives with a party, among them the "Frisco Kid," notorious desperado. The girl locks herself up.

CHAPTER IV.—Forced by Bob, Mrs. Meager decoys Deborah from the room and despite her protests the justice performs the marriage ceremony. Immediately afterward, she escapes and reaches her room.

CHAPTER V.—Meager seeks the girl, but she stuns him with the revolver and rushes to the stables, hoping to secure a horse and escape, anywhere away from Meager, if she must die in the desert. In the stables she meets the "Frisco Kid." Somehow he inspires her with confidence and she explains the situation, he not having been present at the wedding.

CHAPTER VI.—The "Kid" tells her his name is Daniel Kelleen, that he is no friend of Meager, and, securing two horses, the pair ride into the desert.

"Sure, someone does, but not this outfit. I doubt if old Tom Meager ever knew of it, but I have some reason to believe Bob may. It has been a thieves' den in its day, no doubt, if the story was known."

"A thieves' den?"

"Likely—yes. You do not know this country very well, Miss Deborah, but it has been the headquarters for cattle rustlers and smugglers for years, centuries, for all I know. In some respects it is as bad today as it ever was. Mexico is just over yonder," and he made an expressive gesture with one hand, "and this desert stretches along both sides the line; on every side mountains and wild country. The Meager ranch is the only oasis in a hundred miles. I don't know how the place was ever found, but I'll bet it was held by the rifle."

"It was," she said, eagerly. "Old Tom told me the story. He came in here, a young man, prospecting, and discovered these hundreds of acres, with water, grass, everything, even a considerable band of wild cattle. There was no one in the country then, and the cattle were not even worth stealing. He lived here alone for years, found gold somewhere, and got enough to develop this property. The Indians never troubled him much, but rustlers did, both Yank and Mexican. They had a regular trail through those hills to the east. It is used yet occasionally; I rode out there with Tom Meager once, and it is like a road—"

"Yes, I've seen it," Kelleen interrupted, "running through Glorietta canyon. There's another trail also down Box creek."

"Thousands upon thousands of stolen cattle were driven along there north and south, and others were driven there to pick up some of the Meager stock in passing. For years they were fighting almost all the time. Then soldiers came and patrolled the border, and broke the band up very largely."

"You have a pretty clear idea of the situation, young lady!" the man said, quietly. Tom Meager ran this ranch straight and fought for his rights like a man. Everybody along the border knew that, and respected the old man. But this cub of his is another proposition. The whole border brood contains nothing worse than Bob Meager. He is low-down mean, and has been a thief, and an associate of thieves, all his life. It doesn't make any difference how I know all this—I do know it." There was a bitterness to Kelleen's voice which startled the girl.

"You hate him?"

He looked at her slightly.

"Oh, no; I cannot afford to do that, but you have got me started, and I might as well finish up. I reckon you know the fellow fairly well yourself. I get his from another angle. It is not clear in my mind yet exactly how he got possession of this property. Of course, I know he is old Tom's son, and the natural heir, but I met the father once or twice, and cannot believe he ever put the ranch unreservedly into Bob's hands, giving his widow nothing. I'd like to see that will, for I'll bet all I'm worth it's phony. Garrity drew it, as I understand, and still holds it. The instrument is duly recorded, but the original remains safely in possession of the judge."

"Is that regular?"

"Perhaps so; not being a lawyer, I can only guess at the regularity. Of course it will have to be produced in court for final settlement of the estate; but I don't think they anticipate any serious questioning as to the validity of the document."

"Could it be contested?"

"The widow could claim her dower rights."

"But Mrs. Meager would not dare. She is an invalid, and in deadly fear of her stepson."

"And you have heard of no other will?"

"Not a word. Mr. Meager's death was very sudden, an accident."

"He was found dead on the trail, I heard?"

"Yes, his horse came home without him. There was an inquest, the evidence going to show that his horse stumbled and threw him. The skull was crushed in, a jagged wound which might have been made by a sharp rock. I suspected nothing else at the time."

"Naturally not, and since then?"

"Nothing I can put in words," she confessed hesitatingly, "without a more careful examination."

"You testified at the inquest?"

"No; I was not called. A doctor was brought out from Nogales."

"Then probably you never saw the man who conducted that inquest."

"No. I remained with Mrs. Meager in her room. She was very much broken down. Who was he?"

"Judge Cornelius Garrity, who thus manages to become the central figure in the whole tragedy. This interests me from the first, and more than ever now that I have met you. You see, I know Garrity, and there is not a wickeder old devil in Arizona. He never did a straight thing in his life. My notion is this, that Garrity fixed this whole matter up for a purpose. Maybe circumstances helped it along, and maybe they didn't. I ain't so sure myself that old Tom Meager died a natural death. Anyhow, everything was ready—the only known will locked in Garrity's safe, and Bob close enough at hand to take possession almost before his father's body was cold. By the time the funeral was over he had discharged half the old men on the ranch and brought in Mexicans to take their places. Since then all the old hands have gone—what does that mean?"

"I am sure I do not know."

"Well, I can guess, from my acquaintance with Bob and Garrity, and their associates. These fellows imported are no Mexican cowboys. That Juan Sanchez has a price on his head; the Indian, Pedro, is known as a cattle thief, and I doubt if there is a greaser in the bunch who hasn't a record somewhere below the line. I tell you, those birds have something up their sleeves besides cattle-raising; that's only a bluff. It is either gun-running, or whisky, or both. I heard whispers in Nogales—"

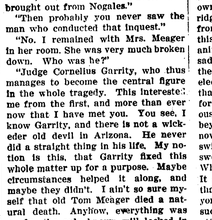
"That was what brought you up here?"

"Well, no; only incidentally. But, good Lord, I never talked so much in my life before. What is in ahead? A pile of stones? Then we are at Silver springs, and business is about to begin"

CHAPTER VII

Covering the Trail

Deborah could perceive nothing, except the dimly visible heap of stones which Kelleen pointed out. All around stretched the black void of the desert, silent and full of mystery. The girl had remained almost unconscious of this intense barrenness as they had talked together, but now suddenly



"What Is That Ahead?"

awakened to a sense of the desolate surroundings. She was along with this man, fleeing for her life into unknown danger. However this realization shocked her, their arrival at the spot sought for only served to arouse her male companion to more energetic action. As the horses came to a stop, he turned in the saddle, peering back through the veil of darkness toward the Meager ranch.

"Everything seems all right so far," he commented quietly. "They are still drunk and asleep back there, I reckon. Now we've got to throw them off the trail."

He grasped her bridle rein, the two horses moving forward at a walk, circling to the left of the stone marker. A hundred feet beyond, the faint sound of horses' hoofs gave evidence that they passed along a narrow ridge of rock. Suddenly Kelleen came to a pause, leaning forward in the saddle to see more clearly.

"You have no memory of how things are here?" he asked.

"No; only that the springs are over to the left yonder."

"Then listen; there is an outer opening of rock which swerves here to the right, and runs almost directly east for two hundred yards. Follow that carefully; go just as far as possible, and then wait there for me. There is no danger, so you keep close to the rocks. Keep to the center so the horse will leave no imprint."

"And what are you going to do?"

"Ride straight ahead down the trail; then circle back through a gully, and meet you out yonder. Don't be afraid; just wait. I'll come, although it may require half an hour or more for me to make the trip safely; I've got to cover every trace after I once strike out into the desert."

She watched him ride away vanishing quickly into the gloom, his horse's hoofs making no sound in the soft sand. Instantly she began urging her own mount along the narrow rock ridge, watchful that he did not stray from the narrow path of rock. Where this very plainly ended she drew the animal to a halt and sat upright in the saddle, staring wonderingly about into the silent desolation. Her mind traveled back over all that had happened that night. She had no time before for thought; she had been continuously forced onward by circumstances beyond control, driven blindly. But now everything which had occurred so swiftly during those past few hours swept over her in memory like a flood. What was the end now before her? It all seemed more a horrible dream than any reality of life. It was beyond belief, beyond experience; that such things were even possible seemed utterly beyond reason.

Yet memory would not die or be deceived. It was true—all of it was true. The death of old Tom Meager; the return of the renegade son; his brutal assumption of control; the glow of lust in his eyes at their first meeting; and then—then the happenings of this last night. And now—now she was there waiting, amid all this desolation, for the return of a strange man, whose face she never had seen. The whole situation seemed impossible, yet she could not doubt its actual reality. She was not dreaming; she was wide awake.

Yet as she reviewed all the events leading up to this situation the girl could not perceive where she might have done otherwise. The impossibility of leaving the ranch unaided; the openly avowed purpose of Bob Meager; the forced marriage; the drunken assault; the blind effort at escape, believing she had killed the man in self-defense; and the unexpected meeting with Kelleen—all these had been utterly beyond her control. Even after that scarcely a choice had been left her. The man had to be accepted as a friend, or else left behind as an enemy. He was in position to either serve or betray her, as he chose, and there was that about his personality which had won her faith. What it was she hardly knew, nor did she have the slightest conception still who the man actually was. Her evident dislike of Meager and Garrity meant nothing, except perhaps as thus explaining his willingness to befriend her against them. She had seen him as only a dim, shadowed shape in the night. She had gained no glimpse of his features, but she liked his voice, the genial yet respectful way in which he addressed her, the cool assurance with which he had taken complete control; whatever the fellow's past might have been, she felt confidence in him, believed firmly that he was really endeavoring honestly to serve her in this emergency.

It seemed a long while, so long as to almost frighten her, before she became aware of his approach. Indeed, he was actually beside her on foot before she recognized his presence, approaching silently from the opposite direction from that anticipated. Her startled gaze had scarcely distinguished his dim outline, when he spoke, his hand already grasping her horse's rein

"There, that is over with," he said genially. "Now I'll lead you for the next five hundred yards. After that we'll do some real riding."

Where their course led she could not clearly determine from the saddle, but they moved forward slowly. After some hundred yards had been traversed, the path led upward once again, the horses' hoofs now sinking into deep sand. Then a horse whinnied just in front of them, and the next instant she could make out the darker shadow. Kelleen released his grip, with a little laugh of relief.

"Lonely, old fellow? Well, I won't leave you again. Now we've got a straightaway ride for it, Miss Meredith. I'll lead off, and you follow. You'll have to keep up pretty close to see me in the dark, and there will be no noise to guide you in this sand."

"But—if I should lose you?" she asked, staring about, half frightened by the thought.

"No danger; the horse you're on won't get lost. But if you miss me call out; there's no one to hear in this desert. Ready now?"

He swung into the saddle, and faced her waiting.

"Yes."

"Then we'll ride fast, and don't be afraid; it's level as a floor."

The girl rode low in the saddle, her head bent forward to protect her eyes from the shower of grit hurled against her by the ceaseless wind. She was conscious now of her extreme weariness; she could only cling grimly to her seat, aching in every muscle, blindly following his lead. She knew the horse under her was panting for breath, his sides wet with sweat, but Kelleen never once drew rein, or, to her knowledge, even glanced back to assure himself of her presence. There were moments when she felt she must actually cry out, her nerves failing her, but she crushed the desire back, and rode on, dulled with fatigue.

Her eyes and thought centered on the figure of the man riding steadily in front. She could obtain no glimpse of his face, not even its contour, yet how straight he sat in the saddle, his shoulders thrown back, his left hand grasping the rein lightly. His seat was that of the trained, disciplined cavalry man, rather than the cow-boy, and she could but mark how easily his body followed the slightest movement of the animal under him. Suddenly, but without glancing back he pointed into the grim, gray desert ahead.

"Do you see anything over yonder?" he asked. "Just ahead there—a hundred yards?"

She stared where he pointed, both halting their horses, but could perceive nothing except the same dreary expanse of sand.

"No; what is it?"

"One of nature's marvels; the place I'm heading for. You can be within ten yards and never know it is there." He turned and faced her smilingly. "Made it straight through the night, too. Why, what's the matter?"

She was staring at him through the dim light, her lips parted, her eyes expressive of fear. For the moment she did not speak, and he asked again anxiously.

"What is it? Are you afraid of me?"

"I—I know now who you are," she managed to say. "You—you are the 'Frisco Kid.'"

A moment his lips shut tight, a bit grimly; then he laughed.

"Sure; but how did you guess?"

"I saw you ride in last night with Judge Garrity. I had a good view of your face from my window, and heard Bob Meager call you by name."

"No doubt that's all true enough, but what of it? Ever heard of me before?"

She hesitated, but only for an instant. It was her nature to speak truth.

"Yes, I have," she answered steadily, looking straight at him, yet in some mysterious way not the least afraid. "I have been led to believe you a most desperate character, an outlaw, a criminal, with a price on your head. I have been told many of your exploits—and, but why need I repeat me to repeat all this?"

"Because it is extremely interesting, for one thing; quite flattering for even a better reason. If we are going to continue being friends—and I mean to, but we are—we shall have to come to a mutual understanding. What am I in your estimation? A robber and thief, I suppose? Who told you all this—Bob Meager?"

"Oh, no; I heard all about you before he ever came back. That was months ago; there were soldiers through here searching for you, a major and twenty cavalrymen."

"What major?"

"His name was Reynolds."

Kelleen chuckled and leaned suddenly forward, placing his hand squarely on hers where it rested on he saddle pommel. Somehow she made no effort to withdraw her fingers from the contact, and their eyes met.

"'Pop' Reynolds, hey!" he said lightly. "Then I am sure his story must have been a good one. So he told you I was a mighty bad man? Well, now you've met me, do you believe it?"

"I—I don't know," she confessed doubtfully. "I—I would rather not think that."

"Which is a hopeful sign. Well, please try not to think so for the next half-hour, at least. Then maybe I can tell you my side of the story. There is no time now, for we've simply got to get under cover. Do you see that blue ridge over yonder? You know what it is?"

"The Meager ranch, isn't it?"

"Yes, and in twenty minutes, as soon as the mist rises, they could pick us out from there with a good field glass. We'll have to find a safer place to talk in than this. Here, I'll lead the horses; it's only a step to the rim; then we'll both have to make the descent afoot."

They moved forward slowly, into what appeared to be the interminable desert, the sun plowing his way through sand, the tired animals following with drooping heads.

Suddenly he stopped, gripping the reins tightly and pointing with his other hand. Deborah needed no guidance, for her eyes were already riveted on the yawning gash in the surface of the desert, staring down with a startled feeling of awe into the apparently bottomless chasm not five yards away. A moment she gazed, hardly comprehending, too thoroughly dazed by this phenomenon of nature to completely grasp its significance. Then she felt Kelleen lift her bodily from the saddle and lead her forward to the very edge. Below lay exposed in the cold gray of the dawn the full marvel—a deep gorge, as though scooped out by a giant spoon, cut directly across the barren sand plain, with no evidence anywhere above of its existence. To the eye it seemed some three hundred feet wide, but much deeper, the side walls rocky and irregular, the crevices and ravines choked with sand, while far below appeared the soft green vegetation, and along the base of the opposite wall, much more precipitous than the side on which they stood, the silvery sparkle of a small stream. Deborah drew a quick breath, glancing aside into the face of the man at her side.

"You have been down there?"

"Yes; the descent is not particularly difficult along these ravines; the sand gives purchase, even the horses will pick their way."

He smiled at the consternation in her face.

"What is it?" he questioned; "fear of the passage, or of the 'Frisco Kid'?"

She looked straight at him beneath leveled brows, conscious of the sudden flush of her cheeks.

"Neither; I am not afraid."

"I did not believe you would be, for you are not that sort at all. The truth is, young lady, you really haven't so much on me in this matter of recognition. I happen to know quite a bit about you."

"About me? You? What, may I ask?"

"Just a bit, as I say, a mere picture not easily forgotten. I saw you once, before ever you came to Meager's ranch, and I have remembered it ever since. Do you remember a morning in August, 1918, when the Thirty-third division went over the top, waded a river, and cleaned out the heights beyond? It was a snarly fight, and lots of men never came back. You remember, don't you?"

"Yes."

"Well, I was there, and I got mine about eight o'clock. Mine must have been plenty, for they hauled me back to the first-line hospital and had some sort of surgical job done before I woke up. The man next to me died, and the nurse who was with him—she was heavily built with very light hair—"

"Jessie Seevers."

"I don't know, but she gave me a drink of water, and then they put another wounded guy into the place where the dead body had been. He was just a kid, not more than seventeen, I reckon, and was crying like a baby, his nerves all shot to pieces. You were his nurse, and I lay there and watched how you fixed him up. It's not likely you've forgot that."

"No! She bent her head. "He was from my town; he—he died that night."

"I didn't know, for they took me away, but I lay there and watched you for another hour before the stretchers came. I never saw you again. I would have liked to mighty well, and I didn't even know your name then—just a memory of your face."

He reached out his hand suddenly.

"I—I wish you'd shake hands with me," he said, almost hesitating at his boldness, "and never pretend to forget that 'Frisco Kid' business."

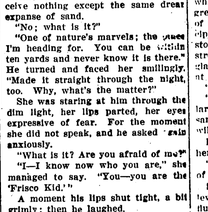
"I have forgotten it," she answered steadily, their eyes and hands meeting. "You were a soldier in my division; I believe in you, and am your friend."

CHAPTER VIII

Story of the "Frisco Kid."

To Deborah, Kelleen was no longer a bandit, a fleeing fugitive from justice, but a soldier who had been wounded in battle, who had played the part of a man; while to him the girl was no longer a stray runaway in whom he felt little interest, but a nurse whose face had haunted his memory since he had first watched her in the glow of the French sun. They stood there on the rim of that strange crater, the grim, gray desert circling them about, neither able to think of a word to say. Deborah's eyes fell, and she withdrew her hand, turning to stare into the depths below. The slight movement served to arouse Kelleen to the situation.

"Well, this will never do," he exclaimed, new cheerfulness in his tone. "They will have a glass trained on us over there before we get to cover. We'll send the horses down first; they'll find the best route and we can follow. Come, Sultan, ever you go, old boy; oh, no, you're not afraid; we've done this little trick before. Go on, sir!"



"You—You Are the Frisco Kid!"

He struck the animal with the flat of his hand, and, with a reproachful shake of the head, Sultan slowly and cautiously began the steep descent, seeking a path along the deeper layers of sand, and zigzagging from gulch to gulch better to obtain foothold. The other horse followed, but not without a struggle, trembling with fear, and keeping close to the trail left by the leader. Kelleen touched the girl's arm.

"Come," he said briefly, a bit of command in the voice. "Really it is not so dangerous as it looks from here. Sultan has found the best trail, and we'll drill along after him."

They made it slowly, picking their path along the trail left by the two animals, finding purchase in the sand, occasionally steadied by an outcropping rock or the exposed root of some clinging shrub. The drop was more extensive than Deborah previously had realized from above, and the sharp descent left her breathless.

The sand disappeared as they reached the lower levels, the walls becoming sheer rock, but slashed with gullies, and finally these were more or less choked with vegetable growth. At the bottom, where the two horses were contentedly munching the short grass, the valley had all the appearance of a new land, made fresh and verdant by the magic touch of water. Deborah at the foot of the long descent, clung to the projecting root of a tree and stared about her with wide-open eyes, unable to restrain her amazement.

"Why this is simply marvelous," she exclaimed. "I did not appreciate what it meant from up there. You have been down here before, you said? You—you do not believe you are the only one who has made this discovery?"

"No; that is hardly probable. There were reasons why it was impossible for me to determine the truth when I was here before, yet I found evidences that others had been before me—the remains of a camp fire, an exploded cartridge shell, and even the imprint of cattle. I have no wish to frighten you, Miss Deborah, but my idea is that probably this place has been, and perhaps still is, a hiding place for thieves."

"Cattle stealers, you mean?"

"Yes, and munition runners. This whole border is honeycombed with that sort of thing, and this hole is certainly an ideal hideout. Come, let's sit down here and eat what we have, for I am not going to risk a fire, and I'll tell you a theory I've worked out."

"Please do."

The bag of food the girl had secured from the ranch kitchen was carefully strapped to the saddle of Sultan. Kelleen procured this and spread the contents on a strip of grass. They were both eating when he resumed speech.

"I am inclined to think," he said gravely, "that this has been a rendezvous for that sort of traffic for years. I don't believe many have known about it, or else some whispers would have reached me, but this particular section of the border has been a sore spot for years. Someone stumbled on this place just exactly as I have—perhaps several somebodies—but my present notion is that the discoverer was either Bob Meager, or one of the disreputable gang he has with him.

His determination to get control of the ranch at his father's death, the fellows he has brought there from across the line, and Garrity's deep interest in the affair, all combine to make me suspicious. Do you see? The ranch, and this hole, together, make an ideal outfit for running either cattle or munitions across the border, and some of those fellows over there have been at that job for years."

"Then how do you dare come here with me?"

"Because it alone promised security for this one day. Tonight we'll go on, but we could not travel across the desert in daylight without being seen."

Her eyes were on his face inquiringly.

"You dislike Bob Meager very much? Was that why you were so willing to help me?"

"Not altogether; it may have had weight, I confess. Now, however, that I have seen more of your face—"

"And Judge Garrity?"

"He is utterly despicable."

"Yet you seemed very friendly with him only last night. On excellent terms."

He smiled good-naturedly.

"You are quite a cross-examiner, Miss Meredith. Sometimes, you know, it becomes necessary to play a part in life. What is the cause for all this shrewd questioning?"

"I hardly know myself, but it is all so strange, and has happened so suddenly. I am just beginning to think clearly. How did you happen to serve in the Thirty-third division—they were all Illinois troops?"

"So you even noticed that. I was transferred."

"From what command?"

"The regulars."

"Was that not very unusual? You—you were surely an enlisted man?"

"I did not say so," he smiled back; "and now that you drive me to a confession, I might as well make a full breast of it. I was transferred to take command of a company."

"A captain?"

"Yes."

PUBLIC SCHOOL NOTES OF MUCH INTEREST

(Continued from first page)

the same everything came out all right, for the results could have been a great deal worse.

Contagious Diseases

For the information of those interested, the following extracts are taken from the Compiled Statutes of the State of Idaho and are the regulations that should govern our actions when our community is visited with any of the contagious diseases.

Chapter 41, Article 16—Prevention of Disease. Sec. 987 (663) School Board to be Notified of Contagious Disease. The owner, or agent of the owner, of a house in which a person resides who has smallpox, diptheria, scarlet fever or any other contagious or infectious disease, dangerous to the public health, and the physician called to attend the person or persons so affected shall, within 24 hours after becoming cognizant of the fact, give notice thereof to the clerk of the board of trustees of the school district in which said person so afflicted resides, and said person so afflicted should be kept away and apart from all other persons except those whose presence may be necessary to the spiritual or physical well-being of such persons. ('99, p. 451, Sec. 1).

Sec. 988 (664)—Exclusion of Pupils from Infected Households. The school trustees of the various school districts in the state shall not allow any pupil to attend the public schools while any member of the household to which such pupil belongs is sick of smallpox, diphtheria, scarlet fever or other contagious or infectious disease, dangerous to the public health, or during the period of two weeks after the death, recovery, or removal of such sick person; and any pupil coming from such household shall be required to present to the teacher of the school the pupil desires to attend, a certificate from the attending physician of the facts necessary to entitle him to admission in accordance with the above regulations. ('99, p. Sec. 2.)

Sec. 989. Disinfection of Text Books. Whenever any textbook or books belonging to any school district shall be in the house during the time that pupils residing in such house are prevented from attending the public school in accordance with the provisions of this article, such book or books shall not be returned to such public school until the same shall have been thoroughly disinfected under the direction of the attending physician, who shall certify the same to the teacher of the school, or to the clerk of the board of trustees in case the school is not in session at the time. ('21, c. 159, Sec. 144, p. 539.)

(D. Stevenson, Latah County Health Officer, informed us that under no circumstances were books taken from school and used by students with infectious or contagious disease or in homes where there was such disease to be returned to school and used. Any books used under such conditions were to be destroyed and new ones secured in their place. He left instructions not to allow books to be taken or sent to the homes where the children had to stay out of school on account of quarantine.)

Sec. 990. (666) Violation of Article a Misdemeanor. Any school trustee or other person violating any of the provisions of this article shall be deemed guilty of a misdemeanor.

FRANK H. THOMAS
Supt. of Schools.

Road Tax Heaviest

The total amount of Latah county's taxes, the statements for which have just been sent out by Mrs. Audrey Herington, county treasurer and tax collector, is $611,540, figured on an assessed valuation of $18,485,613.

The tax role on personal property will be submitted to the board of county commissioners, who will meet tomorrow as a board of equalization.

Slips sent out with the tax statements show that by far the heaviest levy is for district highway purposes. The valuation on many classes of property is higher than last year, as fixed by the state board of equalization. Merchandise was raised 10 per cent, lumber 10 per cent, agricultural land 11 per cent, timber 10 per cent, business lots 5 per cent and residence lots 5 per cent.

"Biddy" to the Fore

Fifty thousand hens have been signed in the egg marketing pool of the Farmers' Union Egg and Poultry association in Spokane, according to D. F. Mitchell, president of the organization. This number represents 125 Spokane county poultrymen.

The association is marketing about 100 cases a week at the present time, and are disposing of them entirely on the local market.

Guilty

A Genesee barber has been found guilty of giving the best shave and hair cut in town, at Ole's Pool Room. 23-2x

In the District Court of the Second Judicial District of the State of Idaho, In and For the County of Latah

Louise Tierney and W. J. Tierney, her husband, plaintiffs,
vs.
Katherine Evits and the unknown owners of or claimants to the following described premises situated in Latah county, State of Idaho, to-wit: The southeast quarter of the northwest quarter (SE¼NW¼) of section seven (7), in township 37 North of Range 5 West of the Boise Meridian, containing 40 acres more or less; and also a strip of land along the south side of the north half of the northwest quarter of secton seven (7), township 37 north of range 5 W. B. M., in the northwest quarter of the northwest quarter and the northeast quarter of the northwest quarter of said section seven (7), described as follows: Beginning at a point 261.7 feet south and 41.3 feet east of the northwest corner of section seven (7), township 37 north of range 5 W. B. M., and running thence east on a line parallel to the north boundary of said section seven a distance of 2598.7 feet to the quarter section line between the east and the west half of said section seven, thence south on the quarter section line a distance of 1058.3 feet to the one-sixteenth corner; thence west on the one-sixteenth section line 2640 feet to the intersection of the west line of said section seven, said line being the range line between ranges five (5) and six (6) W. B. M., thence north, on the range line 1016.5 feet; thence north 38 degrees 57 minutes east a distance of 66.4 feet to the place of beginning, said strip of land containing 64.089 acres, more or less; And also a piece of land lying in the southwest quarter of the northeast quarter of section seven, township 37 north of range 5 W. B. M., described as follows: Beginning at a point 261.7 feet south and 41.3 feet east of the northwest corner of section seven, township 37 north of range 5 W. B. M., and running thence east on a line parallel to the north boundary of said section seven a distance of 2598.7 feet to the quarter section line between the east and the west half of said section seven, thence south on the quarter section line a distance of 1058.3 feet to the one-sixteenth corner; thence west on the one-sixteenth section line 2640 feet to the intersection of the west line of said section seven, said line being the range line between ranges five (5) and six (6) W. B. M., thence north, on the range line 1016.5 feet; thence north 38 degrees 57 minutes east a distance of 66.4 feet to the place of beginning, said strip of land containing 64.089 acres, more or less; and also a piece of land lying in the southwest quarter of the northeast quarter of section seven, township 37 north of range 5 W. B. M., described as follows: Beginning at the northwest corner of the southwest quarter of the northeast quarter of said section seven (7), and running thence east along the one-sixteenth line a distance of 1854 feet; thence south 8 degrees 00 minutes west a distance of 1333 feet to the quarter corner in the center of said section seven; thence north 1320 feet to the point of beginning, said piece of land containing 2.809 acres more or less, the above named defendants:

You are hereby notified that a complaint has been filed against you in the District Court of the Second Judicial District of the State of Idaho in and for the county of Latah, by the above named plaintiffs of the nature in general terms as follows: To obtain a decree of this court quieting plaintiff's title to the southeast quarter of the northwest quarter (SE¼NW¼) of section seven (7) in township 37 north of range 5 West of the Boise Meridian, containing 40 acres, more or less; and also a strip of land along the south side of the north half of the northwest quarter of section seven (7), running thence east along the one-sixteenth line a distance of 1854 feet; thence south 8 degrees 00 minutes west a distance of 1333 feet to the quarter corner in the center of said section seven; thence north 1320 feet to the point of beginning, said piece of land containing 2.809 acres, more or less; defendants.

SUMMONS

The State of Idaho sends greeting to Katherine Evits and the unknown owners of or claimants to the following described premises, situated in Latah county, State of Idaho, to-wit: The southeast quarter of the northwest quarter (SE¼NW¼) of section seven (7), in township 37 north of range 5 West of the Boise Meridian, containing 40 acres more or less; and also a strip of land along the south side of the north half of the northwest quarter of section seven (7), township 37 north of range 5 W. B. M., in the northwest quarter of the northwest quarter and the northeast quarter of the northwest quarter of said section seven (7), described as follows: Beginning at a point 261.7 feet south and 41.3 feet east of the northwest corner of section seven, township 37 north of range 5 W. B. M., and running thence east on a line parallel to the north boundary of said section seven a distance of 2598.7 feet to the quarter section line between the east and the west half of said section seven, thence south on the quarter section line a distance of 1058.3 feet to the one-sixteenth corner; thence west on the one-sixteenth section line 2640 feet to the intersection of the west line of said section seven, said line being the range line between ranges five (5) and six (6) W. B. M., thence north, on the range line 1016.5 feet; thence north 38 degrees 57 minutes east a distance of 66.4 feet to the place of beginning, said strip of land containing 64.089 acres, more or less; And also a piece of land lying in the southwest quarter of the northeast quarter of section seven, township 37 north of range 5 W. B. M., described as follows: Beginning at the northwest corner of the southwest quarter of the northeast quarter of said section seven (7), and running thence east along the one-sixteenth line a distance of 1854 feet; thence south 8 degrees 00 minutes west a distance of 1333 feet to the quarter corner in the center of said section seven; thence north 1320 feet to the point of beginning, said piece of land containing 2.809 acres more or less, the above named defendants:

You are hereby notified that a complaint has been filed against you in the District Court of the Second Judicial District of the State of Idaho in and for the county of Latah, by the above named plaintiffs of the nature in general terms as follows: To obtain a decree of this court quieting plaintiff's title to the southeast quarter of the northwest quarter (SE¼NW¼) of section seven (7) in township 37 north of range 5 West of the Boise Meridian, containing 40 acres, more or less; and also a strip of land along the south side of the north half of the northwest quarter of section seven (7), running thence east along the one-sixteenth line a distance of 1854 feet; thence south 8 degrees 00 minutes west a distance of 1333 feet to the quarter corner in the center of said section seven; thence north 1320 feet to the point of beginning, said piece of land containing 2.809 acres more or less, the above named defendants:

You are hereby notified that a complaint has been filed against you in the District Court of the Second Judicial District of the State of Idaho in and for the county of Latah, by the above named plaintiffs of the nature in general terms as follows: To obtain a decree of this court quieting plaintiff's title to the southeast quarter of the northwest quarter (SE¼NW¼) of section seven (7) in township 37 north of range 5 West of the Boise Meridian, containing 40 acres, more or less; and also a strip of land along the south side of the north half of the northwest quarter of section seven (7), running thence east along the one-sixteenth line a distance of 1854 feet; thence south 8 degrees 00 minutes west a distance of 1333 feet to the quarter corner in the center of said section seven; thence north 1320 feet to the point of beginning, said piece of land containing 2.809 acres, more or less; defendants.

You are hereby directed to appear and answer the said complaint within 20 days of the service of this summons, if served within said judicial district, and within forty days if served elsewhere. And you are further notified that unless you so appear and answer said complaint within the time herein specified, the plaintiff will take judgment against you as prayed in said complaint.

Witness my hand and the seal of the District Court of the Second Judicial District of the State of Idaho, and for Latah County, this 27th day of October, A. D. 1923.

Good Health

If you would enjoy good health, keep your bowels regular. No one can reasonably hope to feel well, when constipated. When needed, take Chamberlain's Tablets. They are mild and gentle. Sold at Clark's Drug Store.

We do printing of all kinds.

Believe Moonshine Killed Indian

Authorities have been investigating the cause of the death of Charles Broncheau, a Nez Perce Indian, who died at 2 o'clock Sunday morning at his home in Lapwai. His death is believed to have been due to drinking poisonous moonshine whiskey. Broncheau left his home about 9 o'clock Saturday night and returned about midnight.

His wife noted that he was in somewhat intoxicated condition, but he complained about being ill. He went to bed and she retired. When summoning him later the wife discovered he was dead.

Marshal Sid Price of Lapwai, working on the case, later found a gallon of moonshine whiskey in a barn and is starting a search for its supposed owner. Broncheau was well known on the reservation, his friends designating him as "Whiskey Charley."

Will Make More "Juice"

Work on the installation of the new 22,500 horsepower hydro-electric generating unit at the Long Lake power plant of the Washington Water Power company is rapidly progressing and the entire unit will be in place by February 1. This is the fourth unit of this size making the entire capacity of the plant 90,000 horsepower.

Wasted Energy

"When I wuzz a young man, mum, de neighbors where I lived called me a 'human dynamo'," said the languid looking tramp.

now," answered the housewife.

"No'm. But I wuz like a dynamo in one respect."

"How's that?"

"The energy I created never got me anywhere."

When You are Constipated

In insure a healthy action of the bowels and correct disorders of the liver, take two of Chamberlain's Tablets immediately after supper. They will not only cause a gentle movement of the bowels, without unpleasant effects, but banish that dull, stupid feeling, that often accompanies constipation. For Sale at Clark's Drug Store.

Notice for Publication of Time Appointed for Proving Will, Etc.

In the Probate Court of the County of Latah, State of Idaho.

In the Matter of the Estate of Mary Isaksen, Deceased.

Pursuant to an order of said Court, made on the 19th day of November, 1923, notice is hereby given that Monday the 10th day of December, 1922, at 1 o'clock p. m. of said day at the court room of said Court, at the Court House in the County of Latah, has been appointed as the time and place of proving the Will of said Mary Isaksen, deceased, and for hearing the application of Peter Isaksen for the issuance to him of Letters of administration with the Will annexed, when and where any person interested may appear and contest the same.

Dated this 19th day of November, 1923.

Christmas Number

Christmas Is Coming

By Richard Lloyd Jones

Yes Christmas is coming, sometime. It is coming when Christmas is a life and not a day; when it is an abiding spirit and not a one day in the year manifestation; when it is a conduct and not a seming; when it is a habit and not an exertion; when it is something within us and not without.

Christmas is coming when at all times we love to give more than we love to get; when we love to serve at least as much as we love to be served.

Christmas is coming when not only some homes but all homes are happy when the spirit of good cheer binds all homes in its wonderful, warm and inclusive radiance and good homes are no longer bound within themselves.

Christmas is coming when all children can play; when all homes are sunny and warm; when all tables are spread with bounty, when all stockings are full.

Christmas is coming when our associated charities will no longer have to dispense dolls to the little daughters of drunken fathers; when men are not allowed to grow rich by robbing children and mothers; by demoralizing weak fathers and husbands.

Christmas is coming when men are brave enough and true enough to help their brothers stand up soldier-like and fight the sordid powers that seek their selfish pots of gold by bringing me to shame and women and children to suffering and want.

Christmas is coming when we allow no one to capitalize human weaknesses to beggar the individual and debauch public morals.

Christmas is coming when every laborer can look forward to an old age without fear; when widowed mothers do not have to live in dread lest some "benevolent" asylum will rob her of her children.

Christmas is coming when judges look for justice and not for loopholes and petty technical errors in the law.

Christmas is coming when men seek not to take unfair advantage one of another but dwell in harmony, learning to love one another as He urges us to do; when men no longer suffer commercialized gambling places; when men no longer, with sunken eyes and fevered brain, clutch at each others throats for gold; when stony faces no longer sneer at breaking hearts; when men are no longer set adrift on the waters of misery by fickle fortune; when their wailing voices are no longer lost in the rumbling roar of greed.

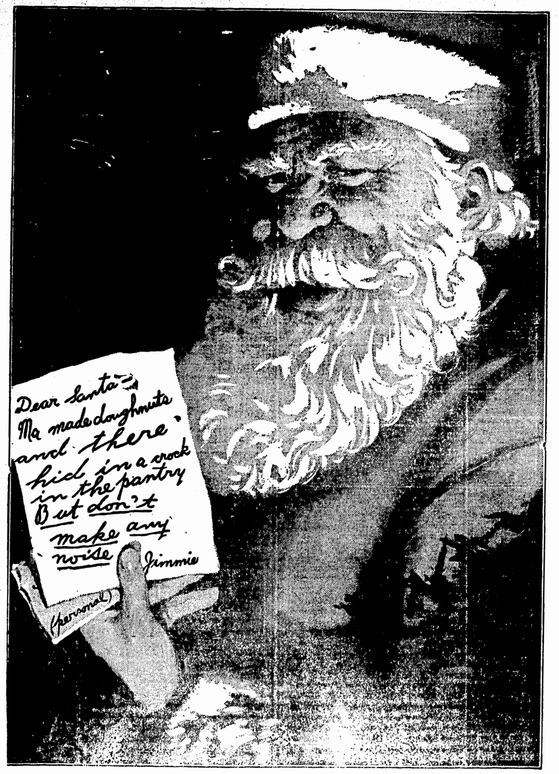
Christmas is coming when frail human moths are no longer lured to flutter about false lights and drop at last, burned and bruised, on the cold gray stones of dissipation.

Christmas is coming when women no longer let themselves drift easily down the river of foolish fashion which has its end in the sea of unrest and where the false god of envy waits.

Christmas is coming when we grow tolerant; when our wasting jealousies are woven into love and helpfulness.

Christmas is coming when democracy is within rather than without the churches; when we follow the Master and not some sectarian interpreter of the Master; when all our churches grow strong enough through simple sincerity and as He would have us, become one in His name.

When every man is at his best every day in the year and just one day in the year, when we live as Christ taught us to live, then will Christmas come.



Dear Santa; Bring Us

We see once more the vision of Bethlehem—that homely manger in which there came to us the baby Jesus with wonderous eyes illumined by the soul of God. 'Tis Christmas time—another Christmas, with others yet to come and pass into eternity—and still with all the years there thunders down the message of the Savior, "Peace on Earth, Goodwill to Man." The message: now remembered, now forgotten for the moment, but growing in power and strength with each succeeding generation. It is the inevitable, it is The Word, the avalanche of the truth before which all obstacles must resolve themselves into their original elements to be merged into the current of divinity that sweeps ever onward for the salvation of mankind.

How better would be our weak humanity were we able to read aright that word which came to us in all its fullness. We ponder on that infant child, we see the growth to manhood we try to sense the underlying and determined standards into whose image we are destined to shape ourselves.

We resolve again and then again to more properly reflect His simplicity, His unconquerable courage and force. Here was determination in action, here was kindly sympathy in full expression, but here too was bravery and uncompromising warfare on all that was hollow and mockery. We fain would sense it, but we weakly fail.

Have we today one who lashes the money changers from the temple, or do we rather compromise with conscience for the cash? Do we lay up our treasures immortal or seek to hide them in the safe deposit vault? do we act in superficials and only think in fundamentals?

What is this Charity that has left to us a heritage—surely but a guide post pointing down the lane of Justice which once traveled leaves the signpost far behind unneeded in the future march? Ah, Christmas time has little meaning if we cannot garner from it more than sentimental yearning of the hour.

It is the season of the child of course—the time for happy hearts—the strange enchanting moment that thrilled us in the years gone by in the land of toys and the mystery of our Santa Claus.

But it is our season, too, even today. Aye, think in the sear and yellow leaf we are not too cold to write another letter, to watch with slippered feet by the burning embers for the gift we would prize so much. Then let us write:

Dear Santa: Bring to us bravery and give us understanding of our great complexities. What we want most is strength to do, Courage to carry on, and Love for humanity, based on understanding. Bring us this holy gift, for this is Christmas time.

KEEP A CHRISTMAS RECORD

Why wouldn't it be fun for a family to keep a record book in which to preserve the interesting things about the annual Christmas celebration from year to year? Some people keep a record of the important happenings of their everyday lives, but it is rather inconvenient for the average person to take the time to make it complete enough to be more than a date and a line or two. A Christmas record would give all the details of the family's Christmas presents, the names of the guests, the menu of the Christmas dinner, the amusements and games, and maybe a tracing of the baby's first little shoe! Every succeeding year would add to its value and interest.

We wish to extend to all our patrons and subscribers the Season's Greetings and assure you of our keen appreciation of your good will and patronage

SANTA CLAUS WANTS TO SEE ALL OF YOU

Old Santa has sent almost a train load of toys to be displayed in town. He wants you to come and look them over—see the many new things. He's a good old fellow, so send him a letter; he is anxious to hear from you. Tell him what you want for Christmas and just what to bring Dad and Mother.

Lewiston's greatest store is full of good, sensible gifts for men, women and children. The store is beautifully decsrated and the Christmas spirit prevails throughout the entire institution. It will be worth your while to make a trip to Lewiston and buy your Christmas things, and don't forget to visit *Beach's Big Economy Basement.*

We joined with six large institutions in the city of Spokane and very early in the year sent our buyer direct to Germany for our toys. You never saw such a wonderful assortment and low prices. Come and see for yourself.

GAMES

Popular games, checkers, dominoes, rok, pit, flinch, rummo, board games, puzzles, tinker toys and many more. Come to Toy Town and look them over.

BOOKS

Toy books, fairy tales, Mother Goose, painting and drawing and juvenile books, many lots to select from at .....

5c, 10c, 15c and 19c

Alger Books, each 29c

GAMES AND PUZZLES

Our assortment is most complete. A trip through the many aisles in Toy Town will continve you that we have almost every kind.

SANTA CLAUS

Has installed a mail box in our store, so be sure and write him a letter. He is always glad to hear from good little boys and girls. Address letters,

SANTA CLAUS,
Beach's Toy Town,
Lewiston, Idaho.

or drop your letters in the mail box in our store in Toy Town.

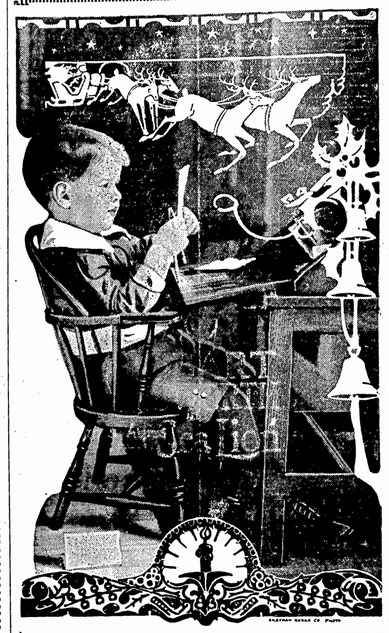
The Letter to Santa Claus



Newspaper Association Member No. 2350

WILL OUR ROAD STAY OPEN THIS WINTER?

A good road with a boulder blocking it is of no more value than if it did not exist. For "boulder" read "snow" and get the problem which the middle and northern half of the United States has to face every year. A good road covered with deep snow is of no more value than if it did not exist!

The Bureau of Public Roads of the department of agriculture makes a definite effort each year to try to interest more and more highway officials in the matter of keeping snowbound roads open to traffic. More and more every year both state highterest more and more highway officials are seeing the wisdom of spending some money for snow removal.

Experiment has proved that a snow plough attached to a wagon and pulled by two or four horses, can clear inexpensively, enough of a highway of snow to enable it to be used. On very well traveled roads a complete snow removal is necessary, but for many highways a partial snow shoveling meets the demands of the traffic, naturally lowered in amount by cold weather.

It is slowly but surely becoming recognized that the main roads are as much needed to keep down the cost of living as are main streets of cities and towns. The individual shovels his own snow path from door to street; the town shoulders the responsibility of keeping the streets open to traffic; why should not the county keep its main trunk line roads open and the state do the same service for its principal highways?

While the Genesee road has suffered considerably from blockades during the life of the North and South highway, the people of this section have every reason to believe that the road will be kept open during the coming winter as a regular maintenance man with necessary equipment will be on the job all the time.

Hens and Cows On Farm

A news dispatch under a Pullman date, to the Spokesman-Review, says:

With a flock of 1350 White Leghorn hens and a herd of nine high-grade cows, Mert Davis, a farmer residing five miles east of Pullman, has solved the farm problem, so far as he is concerned. Mr. Davis is marketing a crate of eggs daily at from 45 to 60 cents a dozen and his cream credit for two weeks was 205 pounds. He does all the work himself and says he doesn't care a rap whether wheat prices ever come back, although he still holds 200 acres of choice farm land.

Mr. Davis is a crank on balanced feeding for his poultry and also provides plenty of light, his big chicken house containing two 'sun rooms,' where the hens can sun themselves. He feeds his flock a sack of wheat daily, 50 pounds of wet mash and plenty of butcher shop scraps, with a dry mash of bran and shorts. His chickens are selected from the best laying strains and for most of them he paid $1 at eight weeks old.

Mr. Davis has dabbled in poultry 14 years, but admits that he knew nothing about it until last winter, when he took a short course in poultry husbandry. Soon afterward he increased his flock from 500 to 1350 and went into the business on a scientific basis. Last summer he sold eggs as low as 17½ cents a dozen, but his income was almost as great as at present, because of the larger production.

Most of those who think the world is upside down are standing on their heads.

Will Try New Wheat

Farmers in the vicinity of Culdesac are organizing to purchase a carload of 1,000 bushels of Luther Burbank variety of white spring wheat seed raised on the farm of Ralph Chick near Reardon.

The farmers believe they have struck the right seed to take the place of the wheat being used in that territory at the present time.

Installing New Machines

Eight new machines are being installed in the St. Maries Garment Manufacturing plant at St. Maries, according to advices received from that busy little city.

Sixteen machines have been installed since organizing the company this last spring. Additional business and an expansoin of territory have necessitated putting another salesman on the road.

Organ Missing

Handicapped, but undaunted, the actors in the touring "drammer" were doing their best, but their efforts were spoiled by the rude comments of a small boy at the back of the hall.

At last, after some of his best "scenes" had been spoiled, the hero hissed melodramatically:

"Ladies and gentlemen, five years ago I lost a monkey. Tonight it has turned up agan at the rear of the hall."

The applause and laughter which greeted this brilliant sally had hardly subsided when the voice of the insultor was heard to ask blandly:

"What did you do with the organ?"

Stites Suffers Bad Fire

Fire, originating in a pool hall in Stites on Wednesday of last week caused damage to the extent of $16,800, according to reports from that place. The origin of the flames is unknown.

Yuletide Suggestions

THE SOURCE OF YULETIDE GIVING WAS SACRED. PRESENT DAY ABUSES HAVE NOT ROBBED IT OF ITS REAL SIGNIFICANCE. EXPRESSION OF SENTIMENT BY USEFUL, PRACTICAL GIFTS FOSTERS ALL THAT IS GOOD IN FRIENDSHIPS AND BRIGHTENS THE FLAME OF UNSELFISH FELLOWSHIP.

All wool 40-inch poplin, yard $2.50
Serges, yard .....$2.00 to $2.50
54-inch tricotnie, yard $4.00

EMMETT and BOLIOU

The First Christmas Carol

Fear not, for, behold, I bring you good tidings of great joy, which shall be to all people. For unto you is born this day in the city of David a Savior, which is Christ the Lord. And this shall be a sign unto you; ye shall find the babe wrapped in swaddling clothes, lying in a manger.

Chorus: Glory to God in the highest, and on earth peace, good-will toward men.

Christmas Alone

A fellow that is far away from his home folks on Christmas day may make an effort to be gay, but doesn't have much luck, says a writer. For though he occupies no chair, across the miles his heart is there, with mother, dad and sis to share the dressing and something in his throat grows tight and makes him dream of home.

Printed and engraved visiting cards.

A Suggestion for the Coyote Club

A St. Paul, Minnesota man has had made for himself a suit of cowhide set with 1200 nails in which he expects to hunt wolves in northern Ontario for the government bounty.

His plan is to get the wolves mad at him, get them to bite his coat of mail and then while they are chewing the nails in his suit he will "biff them on the bean" and take their hide.

From all reports it would be a very good thing for some members of the Coyote club to follow the St. Paul man's example, for that is the only way they will ever get any coyotes.

Brigadier General Buffalo Bill Rader says the sights on the guns aren't any good any more; that the only one he ever had that was worth a "whoop" was on his famous "gas-pipe" gun—the one that exploded. And Private Fat Sampson says the sights are as good as they ever were but that Buffalo Bill is getting too old to shoot good any more.

However, it doesn't make so much difference to the "old scout" as he has about given up the idea of making money off coyote pelts and has gone go "fixing" roofs. It is expected that he will have his "professional" shingle hanging in front of the butcher shop within a few days.

It's a Good Tryout

The man who has tried to hide some gifts from the wife or kids knows how futile is the attempt to secrete the jewelry from the burglars.

A Generous Prayer

There is no finer Christmas sentiment than the words of Tiny Tim: "God bless us, every one!"

MYSTERIOUS KINDNESS BOUND UP A BUNDLE

After the joyous excitement of Christmas Day they all sat about the blazing hearth fire with happy reminiscent thoughts and called upon the doctor to tell them a story.

"I will," he said, "upon one condition; each one of you must throw a small fagot upon the blaze and tell a story as long as it burns, then I will tell my story.

So they did, and pleasant and laughing interest went round until the turn came to the doctor.

"Well," said he, as he threw a larger fagot into the fire, "my story is not yet a day old, and still it is not a little one, for, as I went my round of calls this morning I was surprised to see a large bundle lying in front of the door of a cottage by the roadside that looked as if it were in need of paint and everything else. Curious to understand the matter, I stopped to investigate it and discovered by a card that was pinned upon the wrapper that the bundle was designed for Mrs. Cafferty. Knocking upon the door, I at last induced the woman herself to open it. Reading the card to her I lifted the bundle into the room, whereupon she called out in a loud voice: 'Here, you Mike, Nora, Rose, Timothy, Patrick, Bridget and Kate, come here you spalpeens and see phwat the leprechauns have brought ye.'

"They came, from above, below, and and from all sides they came, and it is many days since I have seen as much joy as came out of the mysterious kindness that was bound up in the good things of that bundle."

Before they went to bed they went to the doctor's story the best Christmas story of them all.

Lost His Hat

An Irishman, coming out from under the influence of ether after an operation, exclaimed audibly: 'Thank God, that's over." "Don't be too sure," said the patient in his bed to the left. "They left a sponge in me and had to cut me open the second time." And the patient on his right side said, "Why, they had to cut me open again to find one of their instruments." Just then the door opened and the doctor who had operated on the Irishman stuck his head in. "Has anyone seen my hat?" he asked. Pat fainted.

The movies are improving. The persecuted heroines hardly ever shed glycerine tears, nowadays.

CHRISTMAS CANDIES

CANDIES AND NUTS FOR CHRISTMAS

HOTEL GENESEE

71,000 Owners

MANY people believe that the railroads of this country are owned by a few wealthy individuals. This is not true.

A railroad more than any other kind of business represents a multitude of owners. For example, 71,000 different individuals and corporations own Northern Pacific securities.

The outstanding bonds, amounting to $321,466,500, are distributed among 33,000 owners, an average of $9,741 for each.

There are 38,000 different holders of stock representing total par value $248,000,000, the average holding being 65 shares, worth at present market price less than $4,000.

20,612 individuals hold from 1 to 19 shares.
11,799 individuals hold from 20 to 99 shares.
32,391 individuals, or 85%, hold less than 100 shares each.
5,397 individuals hold 100 or more shares.
37,788

13,599 of the stockholders are women.
2,269 of the stockholders are savings banks, insurance companies, trustees, guardians, colleges, charitable institutions.

Northern Pacific Ry.

Things That Old Kris Brought

The Miraculous Christmas Gift

It's a very nice thing to make a gift that will please all the members of the family. A box of candy will do that or a crate of fruit. But usually some one in that family gets the lion's share. That is not possible when the gift is a subscription to The Youth's Companion. It is like that fabulous pitcher of milk of the Greeks; though everyone drank deep the pitcher remained full. Everyone has a lion's share in the good things of The Companion; everyne skims his own cream, yet there is the very choisest cream left for the next comer. What better Christmas present can you make than a periodical with such fabulous powers of dividing its pleasure among a dozen and yet keeping it all intact.

The 52 issues of 1924 will be crowded with serial stories, short stories, editorials, poetry, facts and fun. Subscribe now and receive:

1. The Youth's Companion—52 issues in 1924.
2. All the remaining issues of 1923.
3. The Companion Home Calendar for 1924. All for $2.50.
4. Or include McCall's Magazine, the monthly authority on fashions. Both publications, only $3.00.

The Youth's Companion
Commonwealth Ave. & St. Paul St.
Boston, Mass.

Reasonable

Sign near railroad crossing to warn autoists:

"Say It With Safety and Save the Flowers."

"The Woman He Married"

"The Woman He Married," one of the most successful plays on the legitimate stage, has been transformed into a motion picture, which will be shown at the opera house Saturday night. Anita Stewart is the star of this special attraction and Fred Niblo, the creater of "The Three Musketeers," directed it. In "The Woman He Married," Herbert Bashford, its author, produced a play that provided a startling novelty upon its presentation to Broadway. After a long and successful run there it made a triumphant tour of the country, playing to packed houses in almost every city.

The story relates the difficulties which assailed a beautiful young artist's model when she married the son of a millionaire steel magnate, and it is conceded to be the best production in which Miss Stewart has ever appeared on the screen.

If Pessimists Will Allow

We haven't even begun to scratch the wealth of this country. Wages are higher than they ever were prosperity is greater than it ever was; and there is more money to be spent than there ever was.

Nineteen hundred and twenty-four, the presidential year, ought to be the maximum year of American prosperity for all time.

It will be if the pessimists will allow it.

Poor Thing

Proud Father (showing baby)—"And do you think he looks like me?"

Visitor—"Why—er—I'm afraid he does."

He's only some five an' a half year old—an' they say he's bright fer his size. He never forgets a thing he's told, nor what he may glimpse with his eyes,—So, I've got to be keerful of what I do in front of my offspring guest,—for I'm the one that he keeps in view—this feller that knows me best. . . .

He'll climb on the arm of my Morris-cheer, with eyes wide open, ye know . . . an' he'll ast me *what is tobaccher for*, an' why does my whiskers grow. . . . An' he'll mebbe enquire afore he's through, why don't I button my vest? He's a little aristocrat, staunch an' true—this feller that knows me best. . . .

I've got to look pleasant around the house—an' cultivate manners new. . . . It beats the world how this little mouse will copy the things I do. . . . I tell ye—I'm livin' a constant prayer, with an anxious heart in my breast, but, I reckon it ain't no more'n fair, to the feller that knows me best.

Such a Relief

The chronic borrower met the well-known tight-wad.

"Oh," said the C. B., "I need five dollars the worst way, and I haven't the least idea where I will get it."

"Fine," snapped the W. K. T. W., "for a minute I thought you thought you could borrow it from me."

More minds than bodies are suffering from malnutrition.

German Agriculture

Reports to the U. S. department of agriculture indicate that Germany is rapidly coming back to normal conditions in her agricultural products. This year, Germany's grain crops will be 50 per cent larger than last year. She will produce 77,000,000 bushels of wheat, as against 54,000,000 last year; 331,000,000 bushels of oats as against 217,000,000 last year, and 83,000,000 bushels of barley as against 56,000,000 last year.

PRESIDENTIAL YEAR METHODISTS SHOCKED DOC COOK AGAIN MEN ARE DULL—VERY

(By Arthus Brisbane)

The business iman's "bad presidential year" will not be a bad year, unless merchants and people combine to make it so.

A good year depends on good buying. Nothing in the election of a president prevents people buying the usual supplies, from ice cream sodas to fur coats, from factory sites to bungalows.

This presidential year ought to be our most prosperous year. The election reminds the people that this country is managed by its inhabitants, for the benefit of the inhabitants, when they take the trouble to vote thoughtfully.

Europe is worried, harrassed, nations mistrusting each other, taxing each other's products. Here we have one hundred and ten millions of people living at peace in 48 different states, all trading freely, back and forth, from ocean to ocean.

While other nations lack food and raw materials, our problem is to get rid of our surplus on a profitable basis.

A few years ago even Henry Ford wouldn't have thought it possible. He will talk through the air, from his WWI station at Dearborn, using his 360 metre wave, across a thousand miles of this continent, three thousand miles of the Atlantic Ocean, to men and women "listening in" in England.

That miracle would have astounded those living when the Old Testament was written.

Let's hope that in a few thousand years, with every human being able to talk at will with any other on earth, men will decide to stop murdering each other, and follow Joseph Pulitzer's advice, "Don't fight; advertise."

Young ladies of Chicago's Co-ed University decide that "all men are talkers" and are all dull. Some, with dullness, combine seriousness, others froth, others triviality, but all are dull.

Nothing new in that truthful statement. The miracle is that women have endured men's dullness, pretending to be interested in their conversation, for so many centuries, from dull modern man back to Adam. He must have had nothing at all to say, being so freshly made and having no gossip to bring home to his wife. You do not wonder that, in the despair of boredom, she talked to the snake.

The King of Denmark, who was told a while ago that Dr. Cook had discovered the North Pole, has now been told that Dr. Cook is sentenced to 14 years in jail for swindles in connection with oil wells.

Psychologists, if they evamine Dr. Cook, would probably find that he has the brain and the imagination of a young school boy.

Years ago he exhibited himself in a dime museum in New York, with Esquimau dogs, sleds and heavy furs, and gradually imagined himself a real explorer. Finally he imagined that he had discovered the North Pole—perhaps he almost believed it. There is no penalty for imagining that.

But when he imagined that he had discovereved valuable oil wells and sold stock—that was a different offence.

The Methodist Episcopal Board of Public Morals has things to say about the stage in New York. Young ladies, its seems, many at a time, "troop down to the footlights naked from the waist up, and practically from the waist down—don't call it nude, just plain naked," so say the board.

Much seems to depend on what people are doing, and why, and where. In ancient Greece young girls ran in the races entirely naked without hurting anybody's morals. Their intentions were good. That makes all the difference.

A Christmas Thought

The greater happiness of the Christmas season is a direct result of the greater participation of men and women in the spirit of Christ. For then weakness has a power over strength; and then the laughter in the eyes of little children seems a better thing than our own good; and then the tired routine in the lives of those around us looks out upon us through enigmatic eyes, and we understand better, we pity, we cease to condemn—we would even ameliorate, we would show that we see and understand—and so we offer the dumb gift which mutely tells what our words could never tell; and then in our hearts, in our households, in our little world, there is Christmas joy and peace—earth's highest happiness.

A Present for Kitty

"I'd like to give my kittie a radio," declared small Lucy.

"What for?" inquired her father.

"So she can enjoy all the cat-concerts over the world!"

The Right Spirit

Put the Christmas spirit into your policies and keep the partisan spirit out of your Christmas.

Neighbors of Woodcraft

The next meeting of the Neighbors of Woodcraft will be on Saturday December 22 at the K. of K. hall.

THE "GOOD" LITTLE BAD BOY

WALKING AND TALKING DOLLS

Lifelike Forms Gracefully Step Across the Floor Saying "Mamma" or "Papa."

DOLLS that walk and talk and wink and roll their eyes are Parisian Christmas novelties in toyland. These dolls seem almost human, as they walk in sprightly style across the floor saying "mamma" or "papa" just as real children would.

Walking dolls being a new invention, seem wonderful and bring screams of delight from little girls and boys, too, who watch with intense interest every step of the lifelike dolls as they are exhibited in the shops.

The machinery that moves the doll's legs is set in motion by a key that is inserted in the works at the waist line.

The voice is made active by works that are wound with a key.

The eyes move as the body sways from side to side, just as the real children's eyes roll and blink, etc.

CHRISTMAS WEEK IN ENGLAND

Time When Scattered Families Are United and Tender Memories Are Revived.

MANY and great are the changes which have occurred in England since Dickens wrote "A Christmas Carol," but they have not affected the national love for the festival and the determination to preserve unimpaired the traditional warmth and heartiness of its celebration. Christmas week is still the great week of the year for the English people. It is the one week when scattered families are reunited, when tender memories and old associations are revived, when friend greets friend with a cheery expansiveness in striking contrast with the characteristic reserve of the English nature, so, undemonstrative to those who do not know it well, apparently so distant and unsympathetic.

From Wednesday all business will be suspended, not to be resumed till Monday morning. The whole nation will give itself up to good cheer and good fellowship, and for a brief season, all strife and controversy are hushed, and peace, charity and concord reign supreme.

Substitute for a Tree.

We are not going to have a Christmas tree, writes a correspondent. To make them brilliant many pretty little ornaments are needed and they cost a good deal. My plan is for a barrel in place of a tree. I have the barrel now in a closet. It is covered with old dark green cambric and the day before the great holiday I am going to pin sprigs of evergreen and holly over it. It will look pretty gay, I think, when it is filled with the gifts that are going into it now, all prettily tissued and tied, and my son as Jolly Old Santa Claus stands over it to delve into its mysteries and to proclaim the names of those who are to solve them. I am sure we will enjoy our barrel as much as we would a tree.

Not Out An Hour

Shortly after Detroit's motor ordinance went into effect, a policeman hailed a lady driving a limousine on the boulevard and ordered her to report at 9 o'clock the next morning.

"The very idea! Why?" exclaimed the lady.

"I'm sorry, ma'am," insisted the bluecoat; "but you were going forty miles an hour."

"Impossible!" exclaimed the lady indignantly. "Why I haven't been gone an hour yet."

The cop said that was a new one on him and he crossed the memoranda off his tab.

CALIFORNIA ADOPTS GAY CHRISTMAS BERRY

Loyal to its own products, California has adopted the "Christmas berry" as its holly, and from some points of similarity it makes a very good substitute for the well known holly of the eastern states.

The California holly—Christmas berry—toyon—is very similar to the regular holly in structure, but the tint of the leaves and of the berries approximates the colors afforded by the regular sort.

The leaves of the California holly are not of the form of holly leaves, but the berries easly suggest the regular species. To make the effect seem more real, some florists of coast cities mix the berries of the California holly with the prickley foliage of the live oak.

The shrubs of the California holly grow 4 to 25 feet tall and the flowers appear in July and August, and the berries, which grow in large clusters similar to cherries, are ripe by Thanksgiving and remain on the trees for some time; although they do not keep well after being plucked.

The plant is common in most of the southern half of the state, and at Christmas time the rich cardinal berries contrasted with the full green of the foliage adds a gay note to the florists windows and the baskets of the street vendors.

The berries have a rather pleasant taste, somewhat acid and astringent, and are "sometimes eaten by the Indians with great relish,' 'according to Mary Elizabeth Parsons Cunningham, in "Wild Flowers of California."

Such has been the wild scramble for California holly at Christmas time in recent years that it has been necessary to protect the shrubs by law, it now being a misdemeanor to gather the holly in the hills and along the highways without the permissoin of the owner of the property. Landowners however, usually are willing for motor parties to avail themselves of a reasonable supply of the rich red and green decorating material for home use, but dealers are often at a loss to supply the demand at Christmas time.

The Reason of Reindeer

"I know why Santa Claus has reindeer," announced little Mary.

"Why?" asked her mother.

"'Cause they have Christmas trees growing on their heads!"

Linger Longers Meet

The Linger Longer club gave the first of a series of card parties at the home of Mr. and Mrs. Frank Thomas last Friday night. Pinochle was played at four tables, Mrs. James Magee, Mrs. W. W. Burr and Mrs. H. H. Schooler were high for ladies honors and James Magee, Mahlon Follett and Joe Tobin for gentlemans honors. The ties were decided by a unique contest, the honors going to Mr. and Mrs. James Magee. The remainder of the evening was spent in various stunts after which a delicious three-course luncheon was served.

After thanking Mr. and Mrs. Thomas for their hospitality the guest departed at an early hour.

Tuesday Club Meets

The Tuesday club met at the home of Mrs. Ira Hanson on Tuesday of last week. The afternoon was spent in playing pinochle, and in a general good time. The honors were won by Mrs. T. H. Herman. The invited guests were Mrs. Mahlon Follett, Mrs. Harry Schooler, Mrs. Frank Hoorman, Mrs. Henry Herman and Miss Chubb.

Disadvantages Too

Fine Feather showed life enough to remark: "The feller ridin' a high horse gits a big fall when he flops."

A Good Thing—Don't Miss It

Send your name and address plainly written together with 5 cents (and this slip) to Chamberlain Medicine Co., Des Moines, Iowa, and receive in return a trial package containing Chamberlain's Cough Remedy for coughs, colds, croup, bronchial, "flu" and whooping coughs, and tickling throat; Chamberlain's Stomach and Liver Tablets for stomach troubles, indigestion, gassy pains that crowd the heart, biliousness and constipation; Chamberlain's Salve, needed in every family for burns, scalds, wounds piles, and skin affectations; these valued family medicines for only 5 cents. Don't miss it.

The Kindly Star

The little boy was afraid of the dark, but, as he looked out through the low window, upon the panes of which Mr. Frost was making his pictures, he saw a bright star that was winking at him with a most friendly and assuring light. It shone through his tears and seemed to say that it would watch over his sleep. So he shut his eyes, and, stilling his sobs, the better to hear the carol singers across the street, was safely away to slumber and a dream. The dream lady looked like his mother, all dressed in a robe that glistened and sparkled like snow, and she was bringing him the hope of his heart, the sled that was to take him so delightfully down the hill. And when he woke so early on Christmas morning he found that his dream had come true.

New Auto Plates Ready

Word from Boise is to the effect that 1924 auto license plates are now ready for distribution. While the word has been given out that there has been an change in rating of cars, the News has nothing to publish along that line. It is probable that either one of the banks can give you the necessary information when you apply for your license.

It has been stated that there will be no "dead line" this year, but that plates must be in place by January 1, 4924, if you expect to run your car on the highways. It will cost no more to procure your license plates right now than it will after a while —and you will be running no chances of getting "picked up," and you know this "pick-up" game is being worked overtime just now along some lines. So better beware!

PERSONAL MENTION

Lester Craft spent Saturday in Pullman.

Joe Knapps left Monday morning for Spokane for a few days.

Henry Sweeney left Monday morning for Uniontown for a short stay.

Ernest Becker left Tuesday morning for Spokane for a short business trip.

Mr. and Mrs. Tony Halverson and family were Genesee visitors on Sunday, from Lewiston.

Irvin Manderfeld left Saturday morning for Spokane where he will reside for the present.

Mrs. Henry Craft left Wednesday morning for Spokane to visit her sister who is quite ill there.

T. Driscoll left Monday morning for Los Angeles, California, where he will spend the winter months.

Mr. and Mrs. John Sullivan left Monday morning for Spokane where Mr. Sullivan will receive treatments.

Mrs. Ernest Cameron left Friday morning for her home in Potlatch after a visit with her mother-in-law, Mrs. L. C. Cameron.

Henry Martinson left overland Saturday, via Portland, for Seattle where he will join his family and they will spend the writer there.

Smolt's Nearly Completed

Workmen have about completed remodeling the Smolt confectionery store which was so badly damaged by fire a few weeks ago and Mr. Smolt says he will have a neater place than he had before the fire. His opening date is set for next Tuesday, when he invites all his friends to come and get acquainted again.

Too Much Anatomy

Johnny, out to dinner, thrice refused chicken gravy of which he was very fond. His hostess, who had added macaroni to the gravy, finally said: "Why, I thought you liked chicken gravy?"

"I do, sometimes," replied Johnny, "but my mamma never puts the windpipes in."

Feel this Power!

Give yourself a treat! Get into an Overland Sedan and "step on it"! *The sensation of power is wonderful.* The bigger new engine makes you master of traffic and hills! And the Triplex springs (Patented) give the road comfort of a long, heavy car. Before buying *any* car, find out how much *better* you will like an Overland. The price has just been reduced. Ask us for a demonstration.

Meyer & Son

Overland Sedan $795 f.o.b. Toledo

Who's Driving This Thing Anyway?

Two gentlemen who had imbibed freely of white mule, were flivering their uncertain way home from the county seat.

"Bill," said Jim, "I wantcha to be (hic) vur' careful. Firs' thing y' know, you'll (hic) have ush ina ditch."

"Me?" said Bill in astonishment, "Why, I thought (hic) you wuz drivin'."

And He Did

Bad-looking Tramp: "Have you ever seen a murder?"

Native: "Waal, no-o, and I niver want to."

Bad-looking Tramp: "Well, hand out your wallet and you won't.

There will be a shooting match at Pine Grove on Thursday, December 20. Everyone is invited. A lunch will be served. 24-1

T. O. MILLER DIES IN SPOKANE—FUNERAL HERE

Tennis O. Miller, one of the pioneers of the Genesee country, passed away in Spokane on Friday, December 7, 1923, aged 78 years, three months and 28 days, of infirmities consequent upon old age.

Tennis O. Miller was born in Norway August 10, 1845, and came to this country when a young man. He was married to Miss Gumber Christenson May 12, 1868. Six children were born to this union of whom three survive. They are Emil Miller of Harrison; Chris Miller of Coeur d'Alen, and Mrs. Ida Oylear of Clarkston, Wash. His son Chris was unable to attend the funeral on account of illness. His beloved wife preceeded him to the Great Beyond, having passed away July 25, 1919.

Mr. and Mrs. Miller lived happily together for more than 50 years, they having celebrated their golden wedding anniversary May 12, 1918. This privilege is allowed to but few and Mr. Miller was aware of the fact that he had been specially favored during all those years.

Deceased was a civil war verteran, having been a member of Company C, first heavy artilliary, Wisconsin, and he served with distinction in the great conflict. He greatly enjoyed recounting the days of the Civil War with his comrads, of whom there are but two left in this community: J. N. Hollister and Patrick Ryan.

The funeral was held Monday at 11 o'clock from the Federated church with Wood Cash in charge of the services and burial was made in the I. O. O. F. cemetery.

The pallbearers were Frank Hoorman, Dewey Wardrobe, Lew Jain, Dick Green, Chas. Mauch and Andrew Wardrobe, all members of the American Legion. A squad from the Legion also fired a salute at the grave.

Farmers Will Meet Saturday

The attention of all farmers is called to a meeting that will be held in the American Legion hall on Saturday, December 22, at 2 o'clock in the afternoon for the purpose of talking over the organization of a farmers' co-operative produce association in Genesee. The idea of the association is to erect and maintain a cold storage plant in Genesee for the purpose of storing eggs, butter, and produce of all kinds so that it can be held during the low-price period in place of allowing commission men to do it.

All farmers are requested to be present and take a part in the discussion. This is in no wise a farmers union meeting and every one interested is urged to be present.

Still Have California Weather

The Genesee section is still blessed with California weather—or nearly so. While the mercury takes a downward trend once in a while, yet the weather on the whole is all that could be desired at this time of year.

The mercury stood at 18 above zero Sunday morning.

The annual Christmas shooting match will be held at Pine Grove on Thursday, December 20. Be there with your favorite rifles. 24-1

Woodcraft Circle Organized

Monday evening, December 10, Mary V. Stevens organized a new circle in Genesee. There were 12 visitors from the Johnson circle who put on the floor work in a fine manner with Bessie Swales as captain. The officers from Lewiston circle were G. N., Anna Garlinghouse; advisor, Katherine Davis; Magician, Evangeline Stevens; attendant, Henry V. Hammonds; Inner sentinel, A. R. Garlinghouse; outer sentinel, Ethel Hammonds. The following officers were installed in the presence of the invited guests: Guardian neighbor, Emma Shirrod; post guardian neighbor, Nellie Haymond; advisor, Jennie Erikson; magician, Maggie Bottjer; clerk, Lillian Morscheck; attendant, Margaret Edwards; outer sentinel, Helen Warren; inner sentinel, Frances Reil; captain of guards, Evelyn Baker; musician, Oma Castle; managers, Johanna Christenson, Lela Jain, Bertha Stucker; correspondent, Lillian Morscheck.

After installation a fine lunch was served by the new circle and a social hour was enjoyed.

The new circle will meet twice a month in the Pythian hall.

A nice line of envelopes and letter paper. We print them just the way you want them.

Smolt's Confectionery to Open

Wm. Smolt announces that his confectionery will be opened for business on Tuesday, December 18, with an entire new line of cigars, tobacco and confectionery of all kinds.

He also announces that what is left of the old stock damaged by fire will be sold at greatly reduced prices, for quick sale. 24-1

You will find almost everything in jewelry here—**Rings, Knives, Chains, Beads, Necklaces, Pearls, Pins, Bags, Vanity Cases, Watches, Clocks, Silver Sets, Candlestick Holders,** and novelties of all kinds.

F. C. SHORK, Jeweler

Silver or gold belt buckles with new fasteners—can be fastened on any belt—monogram engravings of full initials; special at **$1.00 to $6.50**

Fountain pens, the famous **Waterman** and **Parker** make, plain or specially capped in gold or silver and engraved, priced from ....**$1.50 to $8.00**

Cuff links—the new white gold link, plain or engraved in a variety of designs, at prices from .....**75c to $6.50**

Knives and chains—the ideal vest pocket knife—in gold or silver, but with best steel blades .....**$1.00 to $4.50**

Christmas

Is here and the Holiday spirit of joy and thankfulness is rightly prevalent everywhere. It is therefore meant that we should express ourselves with unbounded thanks during these Holidays for what the country has accomplished during the past year.

In looking back on the year that is past, we give thanks for the business we have received, for the friends we have made, and for the success we have enjoyed.

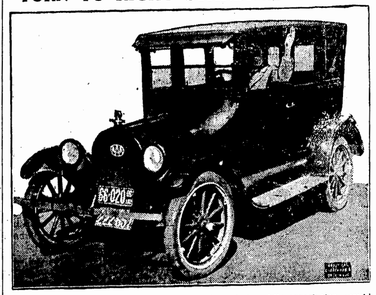
F. J. NIEMANN, Cashier

TURN TO RIGHT STANDARD SIGNAL



This gentleman, an official of the American Automobile association, would "turn to the right" as indicated by the raised hand. This official of the A. A. A. is demonstrating on Washington streets the various standard signals which should be universally observed the country over.

MEANS OF STARTING CAR ON LOW BATTERY

Method of Short Circuiting to Reduce Resistance.

If one cell of the storage battery is out of commission, the starter cannot be operated and the engine may be difficult to start because the internal resistance of the dead cell may be so great that it does not allow sufficient current to pass to produce a spark at the plugs when the engine is cranked by hand. The resistance of the dead cell may be overcome and the full current of the remaining cells made available if, after the cell at fault is located, a wrench or other piece of metal is held firmly in contact with the posts of the cell.

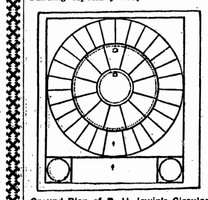
After the engine starts, the wrench may be removed because the generator will supply the current for ignition if the engine is kept running fast enough. Care should be taken to use this expedient only on a cell that is dead, as an active cell would be injured by the short circuit. The dead cell may be quickly found by using a hydrometer or voltmeter.

If the current is still insufficient to produce a satisfactory spark and the engine does not start, the resistance in the circuit to the spark coil may be further reduced by placing a shunt around the resistance coil usually found on the top of spark coils. This shunt may be of copper wire and need not be securely connected since it is advisable to remove it, or at least disconnect one end after the engine starts.

SPACE IS SAVED IN GARAGE

Vehicles Placed on Circular Turntable and Brought to Compartment to Be Used.

The Scientific American in illustrating and describing an invention of R. H. Irwin of Medford, Conn., says: The invention aims to provide a building especially adapted for use as



Ground Plan of R. H. Irwin's Circular Turntable-Equipped Garage That Eliminates Back Around.

a garage, or for storage purposes. The object is to construct a building in such a manner that space heretofore wasted will be used to the fullest extent and that vehicles stored therein will be readily available and that backing will be practically eliminated, the vehicles after entering the building being placed upon a turntable and brought in direct contact with the compartment to be occupied.

AUTOMOBILE NEWS

Don't try to beat a railroad engineer to a crossing.

* * *

When approaching the crest of a hill slow down and keep to the right.

* * *

Leaks around the car mean power wasted and lost. The leak may be of water, oil or fuel.

* * *

A common cause of fenders rusting at the fastenings is neglect in not washing the underside of the fenders which are sure to accumulate dirt and mud.

* * *

Spark plugs should never be forced into a position by severe wrench action. They should seat firmly against a copper abestos gasket, with but little more force than can be applied with the fingers.

RIGHT ESTIMATE OF STEEP GRADE

Not One Driver in Hundred Has Proper Calculation of Incline of Road.

(By ERWIN OREER, President of Oreer College of Automotive Engineering, Chicago.)

"How steep is the grade on that road? Well, I should say that it is all of 30 or 35 per cent. But I didn't have any trouble in making it with my car. No sir. She pulled it like a house afire. Made it on high all the way. Passed two cars laboring along in second."

Has Not Proper Estimate.

How often, with variations, do we hear these words from drivers proud of the achievements of their cars frequently to the disparagement of higher-priced cars from which, presumably, a better performance should be expected. After listening to statements of this kind from hundreds of tourists anxious to tell of their trips and the remarkable exploits of their cars, one is at least convinced that not one man in a hundred has the proper estimate of the percentage of a grade encountered. No reliance is to be placed on such estimates expressed by any other than one who knows from actual measurements with a gradometer.

Approaching an ascent the grade naturally appears steeper than it actually is. This, coupled with the performance of the individual car which may or may not make the grade in high gear gives rise to an incorrect estimate of the percentage of the grade.

Many motorists do not understand the process by which the designation of a grade percentage is arrived at, believing that a 20 per cent grade, for instance, is one which rises at an angle of 20 degrees from the horizontal. This is erroneous.

How to Find Percentage.

The designation of 20 per cent to a grade means that in the grade there is a perpendicular rise of 20 feet in 100 horizontal feet. In other words, to generalize the numerical percentage of a grade indicates that number of feet perpendicular rise in 100 horizontal feet. In relation to degrees it will be found that a grade percentage properly arrived at in this way forms an angle equal to about one-half of the angle formed when the numerical expression is taken to mean degrees. Definitely, a 30 per cent grade is about one-half as steep as the grade formed by a 30-degree angle from the horizontal.

The steepest grade on which a car can obtain traction is 45 per cent, and this is a very stiff grade, indeed. You can be reasonably certain that if you have estimated a grade as 30 or 35 per cent and your car pulls it in high gear that your estimate of the road's steepness is probably double or even more than it actually is.

DRIVING STRAIN IS RELIEVED

Stunt Is Simply to Turn Head to One Side and Watch Road With Eyes on Surface.

There is a way to remedy that neck and head strain that comes from the see-sawing of a car over a rough road. The stunt is simply to turn the head to one side and watch the road with the eyes on an angle to its surface. If the head is held up straight the motion of the car will keep jerking it back and forth, resulting in a sort of neck strain that is very tiresome. It is not recommended that the head be turned to one side constantly, but only as a relief from strain.

CAUSE OF IRREGULAR FIRING

Trouble Made by Defective Contact Point or Improper Movement of Interrupter.

The usual timer trouble, causing irregular firing of an engine, is defective contact point or improper movement of the interrupter. Sometimes the small arm bearing one of the points which opens and closes the electric circuit becomes dry at its hinging point and will not work freely or fast enough, and sometimes sticks altogether in the open position.

Etiquette

What & When & to do it

By A. Leda

Readers desiring personal replies on points of Etiquette or heart affairs may write Miss A. Leda, care of this newspaper, enclosing a self addressed and stamped envelope.

DEAR A. LEDA:

Is it necessary for a man to put his chair under the table at the conclusion of a meal?

R. M.

No. Unless dining at home or at a friend's house where this is the custom, do not do so.

* * *

A. LEDA:

Will you kindly state what is the correct thing for a man to say to the bride at the wedding reception? Also what might a woman say if she is not an intimate friend of the bride's?

R. L.

At a wedding reception a man usually compliments the bride on her appearance or he may say "pray accept my sincerest good wishes." The woman could say to the bride "let me wish you every happiness in your married life," and to the groom words to this effect, "I congratulate you most heartily on the good fortune that is yours today."

* * *

DEAR A. LEDA:

If one has friends in the audience during a play is it all right to go over and sit with them during an intermission? 2. If two men and two women are at a play together is it permissible for the men to leave the women to go and smoke during an intermission? 3. Supposing there is just a man and a woman alone, does the same rule hold?

AN INTERESTED READER.

Yes. On one condition—which is, that your friends have aisle seats, otherwise you should go out in the lobby to visit. 2. Yes. 3. No. A man should not leave a woman seated alone in the audience.

HELPFUL HEALTH HINTS

Shampoo.—A nice shampoo can be made by dissolving a cake of pure castile soap in water. To have it in a jelly consistency use one pint of water to a cake of soap. If hair is very oily, wash once a week or every two days. Otherwise once every three weeks is enough. In either case be sure to rinse thoroughly afterward.

UNIFORM TRAFFIC LAWS ON NATIONAL HIGHWAYS

Traffic laws which differ in different states and different towns in the same state, are a cause of confusion, accident, loss of property, and loss of life. Uniform traffic laws, the same the country over, will promote safety.

The objection urged against uniform traffic laws that traffic conditionh are different in different localities, does not hold in the face of the obvious power of the locality to modify or add to the uniform law for special conditions. There are many observances which, made uniform, would make for safety, such as the system of signalling for a stop, slow up and turn, a uniform rule as to right of way at crossings, a heavy penalty for such dangerous practices as passing another car when coming to a curve or top of a hill, etc.

With forty-eight states and thousands of municipalities, all making their own traffic laws, the motorist is more or less at sea as to what he can and can not, should and should not do. But when the National government builds roads for the Nation, a national traffic law will be inevitable as a national police force for the national highways.

"A paved United States in our day" is not only devoutly to be wished for, because o fthe material benefits it will bring, but because of the safety the uniformity of traffic rules will provide, when the Congress authorizes a system of national highways which will serve all the United States as a good state highway system now serves all the counties in the state.

A New Penance

An old time acrobat called at Father McGuire's church. He told Father he was hungry and for a mere crust of bread he would show him a new acrobatic stunt.

He ate the offerings of the priest, and, getting down in the vestry, placed his heels over the back of head and walked on his hands.

Just at this moment in comes Mrs. McGinnis, and, throwing up her hands exclaimed: "Holy Mother, Father McGuire and a new penance, and me not dressed for such!"

Both Nights

"And now," said the monocled gentleman who had borrowed a match from the traffic cop, "I suppose you would like to know who I am?"

"Sure."

"I am Sir W. Gabriel Birkingham, Knight of the Bath, Knight of the Garter, Knight of the Double Eagle and Knight of the Golden Cross."

"And I," said the cop, "am Mike O'Flanagan, tonight, last night, tomorrow night, and every other night."

16 Year Old Boy With Bride of 46

Even though his dad, Postmaster Joseph Tucker, of South Essex, Mass., is asking investigation and annulment of his boy's marriage, Berton S. Tucker, 16 years old, says he wooed and won and loves his 46-year-old bride, who was Mrs. Susan O. Simpson, wealthy widow and owner of a big hotel in New York.

Pictures show youth and his bride—also photo of bride's summer home at Gloucester, Mass.

That Money Question

Unfortunately, those who have the most Christmas spirit to make others happy are shy of funds; and probably if they had the funds, they'd be shy of the spirit. The reason lots of folks have piles of money is because they are careful about spending it.

Christmas Candles

It is a pleasant custom, when the Christmas tree is lighted and it's many candles fail to give all the needed cheer, to light a candle from it's fires and give the taller candles on the shelf and on the table a share in the happy illumination.

WE WISH to extend to all a cordial invitation to visit our market, where you will find a good selection of meats of all kinds. Also pickles of various kinds. And everything that goes to make up a first-class market establishment.

If it is poultry you want, we have it. If you have any to sell, we will buy it.

SEE THE BUTCHER SHOP FIRST.

PUBLIC SCHOOL NOTES OF MUCH INTEREST

By Estel Rogers

Now is the time of year when work is scarce, and wages are low. A common workingman will probably be doing well if he can receive $3.00 per day. But at the same time, are you aware of the fact that there are over two hundred persons in this community who are earning what is equivalent to $9.25 per day, five days out of every week? The people who are earning this sum are the students of the school. According to statistics which are based on the 1913 wage scale the uneducated laborers earn on the average of $500 per year, for 40 years, making a total of $20,000. The highschool graduates earn on an average $1,000 per year, for 40 years making a total og $40,000. This education requires 12 years of 180 days each, a total of 2,160 days in school. If 2,160 days at school add $20,000 to one's income for life then each day at school adds $9.25.

The figures are based on an investigation made by Dr. A. Caswell Ellis of the University of Texas, at the request of the U. S. Bureau of Education.

In the light o fthese figures does it pay to keep a child at home to work? It would not be a paying proposition unless the child is earning $9.25 a day at the present.

As an education is very essential in our modern age and as the government is managing and financing the school system, no one should miss the opportunity of receiving a good education, which will help him in both a social and a financial way.

On Monday of this week the president of the Associated students of the high school appointed a number of committees to work on the different parts of the high school constitution. The constitution was started last year, but was not entirely completed. As there is not a great deal of work or rearranging to be done, it will probably be ready for the vote of the students in about a week.

Last Friday night luck seemed to be against the boys' basket ball team, for when the game closed the score stood 27 to nine in favor of Johnson. The game was started with a good spirit, which was kept during the entire game. This is the third game Johnson's team has played this season, while it is our first. We also had two new men on the floor who had never played a regular game before so taking all into consideration, the returns could have been a great deal worse.

This coming Friday night Moscow's team will meet our boys on the local floor. Moscow has played a number of games, while this will be our second, but just the same the boys are "ready to go."

The girls' basket ball players are also beginning to get busy, for they are going to practice several nights out of each week, at the hall.

During the first part of the week occurred a misfortune at the school building which might have proved very serious had it not been taken in hand in time. There are about 45 tons of steam coal in the furnace room, a part of which, from some unknown cause, began heating. The furnace room was filled with smoke and gas while at the same time the offensive gas could be detected in the entire building. Workmen were immediately summoned and the heating coal was shoveled outside, where it will remain until all fire is extinct. It will then be put into the building again. The amount moved was between 25 and 30 tons, which required a considerable amount of labor. The building was in no way damaged and the students were in no danger whatever, for the fire was watched very closely and was put out as rapidly as possible. The furnace room is fireproof and even if the coal had burst into flames, the rest of the building would probably have received no damage.

The school has never practiced fire drills before, because fire was never given much thought. At this time, however, when everyone knew of the condition of the coal in the basement we were not greatly surprised when immediately after noon on Tuesday the fire gong sounded which meant immediate exit from the building by everyone. The entire school filed out in order and in a very short time. The drills are going to be practiced in the future. At what time no one knows, in order to show the students what to do in case of an emergency.

On Wednesday of last week Superintendent Thomas read to the high school some of the poems of the far north and the Yukon region, which were written by Robert W. Service.

Margaret, Ednah and Willard Rosenau entered the grades this week.

A large number of the students who were absent on account of illness have returned to school and are working extra hard to catch up with their classes.

The one who rails loudly at "politicians" never could be one and knows it.

Santa Claus Visits Auxiliary

It will no doubt interest the children of Genesee and the surrounding country to know that Santa Claus has visited Genesee and has made preparations for the Christmas season.

I do not remember the exact date of his visit but it was when the ground had its first covering. You can imagine the sensation that was experienced by the members of the American Auxiliary when Santa Claus suddenly made his apearance. He tied his restless reindeer to the chimney of the American Legion roof and slid through the open skylight.

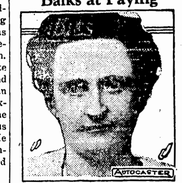
After greeting the ladies he announced he was on a tour to train his deer and to see which children are good. Santa also asked the ladies to prepare a Christmas tree and have it ready for him on Sunday, December 23, in the American Legion hall. So all you children ask your mothers to bring you to the hall on that day and Santa will have candy for all of you and you can tell him what you want for Christmas as he will be there in person.

The members of the auxiliary have prepared a little program and have asked the "Mellow Moon" orchestra to play for Santa. The preformance will begin at 2 o'clock. Everyone be sure to come as this will be a day of days for the children.

There is a possibility, however, that the spread of measles will prevent such a gathering. In such case the change will be reported in next week's News.

Many who marry for money have to get a divorce before they get the money.

Balks at Paying



Mrs. Mary Summertime, of Detroit, collected her husband's $90 army disability pension for five years, but now balks at paying him alimony and will appeal.

The Spirit of Christmas

giving tends more and more to lend itself to the consideration of practical and lasting gifts for friends, relatives and loved ones. This is fitting and commendable. This year we have purchased with the idea of practical gifts for women, from the miss to the grandmother and being an exclusive woman's shop you are assured the very latest in all things.

Holeproof Hosiery

We are most fortunate in having the exclusive agency for Holeproof, Spuntex and Van Raalte hosiery in all the most wanted shades.

Spuntex, per pair ..... $ 1.50
Holeproof, per pair $1.65 up to 3.00
Van Raalte, per pair.....$2.75 and up

We will fill mail orders, or will, on receipt of letter stating size and color wanted, mail direct to the party to whom the present is to be given.

DIVORCE

The greatest evil that faces the social world today is the divorce evil.

It is perfectly clear that the Bible does not permit of divorce and remarriage on any ground except one, and that whosoever putteth away his wife, saving for the cause of fornication, maketh her an adulteress, and if he marries another he himself commits adultery. This much is plain as day, namely, that there is only one Scriptural ground for divorce and remarriage—impurity on the part of the other party.

But, what are you going to do when divorce has really become a pastime? Some are treating it as but a passing experience. Social lines are being broken, moral standards are being shattered, children are being cursed, homes are being broken up, and men and women are losing all sense of regard for the sacredness of the marriage vow.

Of course, where one party is guilty, the innocent party has a perfect right to re-marry, and the innocent party ought to get a divorce. But, there are too many people deliberately committing the offense in order that they may secure the divorce. They are deliberately creating the cause for the purpose of being separated.

Nearly sixty per cent of the divorces of today have been brought about by the parties premeditatedly creating the cause for the divorce.

Why don't the Christian forces of the country speak and suppress this evil?

HOW FOUR OLD MAIDS HAVE A REAL CHRISTMAS

They were a family of old maids—four sisters. But they wewe the jolliest, nicest old maids I ever knew. I always swore it, and now I know it. What do you think they did for Christmas? Did they have a tree for themselves and exchange costly gifts with each other, and then eat a turkey with dressing and pies, alone in their charming white dining room? Not a bit of it. They know what Christmas was meant for, and they acted on the knowing. Their friends tell me they have done it every year; but since I'm only a new acquaintance, comparatively, I couldn't know that.

They invite in a dozen children who wouldn't ordinarily have a Christmas tree at all and give their presents to them. And then those twelve poor mites sit down at the table in the old maids' charming white dining room, and the old maids themselves serve them with turkey and all the fixings. And they don't do it for charity either. They do it because they adore children and making them happy is to them a treat. You see, from their cradles, these four maid sisters were blessed with the Christmas spirit, a spirit that lasts all the year around when it is genuine.

But why should I call them "old maids?" That term is in such disrepute? They are four angels! And knowing that, I am going to try my luck, some time when I can get the courage, and ask one of them, the one I happen to be in love with, to "have me." Perhaps if I make the proposal within the Christmas season she'll remember she's a Christmas angel, and take me. Don't laugh at my audacity. Anything may happen at Christmas time! For Christmas is a magical time. Even a child can tell you that.

Her Christmas Trip

The family were going away for Christmas to their old home in the beautiful country which they loved so much. They hadn't gone back at Chrismas time for ever and ever so long. They said, at first, they would give their faithful, wonderful cook a check and a holiday, and then they asked her if she would like the Christmas trip as her Christmas present.

Would she indeed? Just because she was no longer a child it didn't mean she couldn't enjoy as a child!

She went and she loved it all—even the over-crowded trains, the hurrying masses of people in the jammed stations—for wasn't it her Chrismas trip?

She, too, was a part of the great holiday travel.

A successful man becomes that way not alone by knowing his own mind, but mostly by knowing others minds.

Merry Xmas and a Happy New Year

IDA WHEELER

THAT PLUM PUDDING AND SOME TWISTED MOTTOES

Louise loved jokes. She caught with questions and puzzled them with conundrums. So she had arranged a program that centered about the Christmas plum pudding. When that came upon the table, each one was to put n his thumb and ipull out a plum in the shape of a twisted motto; there they were, all around the sides of the platter.

Father was first, unfolding his plum he read off the pit of it and, as if to moderate the coming merriment, said "All is not laugh that titters."

Then mother read hers: "It's a wrong turkey that has no turning." As this did not apply to the bird that had just disappeared, the self-satisfied smile of the cook behind the door did not come off.

Then Aunt Mary: "A hitch in time saves mine." This reference to Bobby's trousers asserted his independence of suspenders, but caused his relative to remind him that he was not as needless of stitches as he thought, upon which he replied that he could depend upon that tailor who had advertised "pants a dollar and a half a leg, seats free."

Then Susan: "We never miss the swatter till the flies go by." This was a fly paper upon a dead subject and it was filed for future reference.

Bob's plum was also laid on the table after he read: "A strolling boy catches no horse." A sentiment that he was inclined to think a little too personal.

Louise had the last plum and declared; "All's well that ends swell." Expressing the traveler's satisfaction with terra firma, less terror and more firmer.

But the pudding was coling and that was no joke, so, as the temperature fell, they fell to.

Hot Tamale King

A friend gave Wm. A. Dye, of Wichita, Kansas, a hot tamale and chile con carne recipe 15 years ago. He borrowed money and started a chile stand. As soon as possible he started advertising in the newspaper. Today he does $100,000 a year business and is wholesaling chile from his new $75,000 factory.

MICKIE SAYS—

On Shoppers' List

The next event in the shopper's life will be the January sales.

Home Talent Play

Local talent, under the auspices of the local post of the American Legion, are rehearsing nightly for the production of three-act farce comedy entitled "The Purple Pill"—and they say it is easy to take.

The date set for the enactment of the play is Wednesday night, December 19, in the opera house.

If you have ailments of any kind you must not fail to go and find out about the "Purple Pill" for it is a guaranteed cure for all earthly ills—it is said to be even greater than Dr. Daniel Healy's Native "yarbs"—and that is going some.

Don't forget the date—and don't lose sight of the "old sock" until after you have bought a reserved seat ticket at Dicus' drug store.

An Appreciation

Ed. Vanouck, who has been quite seriously ill at his home for the past several weeks, is getting along nicely at this time and expects to again be able to be down town before long.

He wishes to express his appreciation of the many kindnesses that have been extended to him by his host of friends during his illness.

Sisters Will Give Card Party

The Pythian Sisters announce that they will give a card party in their lodge rooms on Friday night, December 28.

Whitman County Stops Stages

According to word sent out from Colfax all motor stages will be prohibited from using the improved highways in Whitman county, Washington, from December 17 to April 15, inclusive. The order is made by the county commissioners in an attempt to prevent serious damage to crushed rock roads during the winter season when the roadbed is soft.

Heavily loaded trucks also come under the ban. Trucks of less than two tons rated capacity will be barred from carrying loads of more than 50 per cent of their rated capacity. Trucks whose manufacturers' rated capacity is tons or over must not carry loads weighing more than 2,000 pounds.

It would seem that some provision could be made for the protection of Idaho roads—and if there is such a thing possible it is hoped that the "powers that be" will use that prerogative and save the roads.

Dance After Game

The boys of the basketball team announce that there will be a dance tonight (Friday) after the basketball game, in which the general public is invited to participate.

Some People

Some grownups are so childish that they do not even believe in Santa Claus.

Beneath It All

A boy stood by the roadside near an overturned load of hay. A neighboring farmer noticed his predicament and as it was dinner time, invited him to eat, explaining that they would take care of the hay afterwards.

The boy hesitated, but finally accepted.

During the meal the boy was very nervous and several times and that his father wouldn't like it. On being urged to give the reason for his father's objection he said:

"Well, you see, Dad is under the load of hay."

The Youth's Companion Home Calendar for 1924

According to our way of thinkink, a calendar should be, above all, useful. Unfortunately many of the calendars we see are nothing but pretty pictures with calendar attachments. In the Companion home calendar for 1924, however, we find a calendar beautifully printed in red, blue and gold, and designed especially for handy reference. Each page carries not only the calendar of the current month in bold readable type, but also a marginal reference to the preceding and coming months, the moon's phases, and a choice bit of cheerful philosophy. A copy of this calendar is sent free to every subscriber who pays $2.50 for the 52 numbers of The Youth's Companion for 1924.

RICHARD LLOYD JONES SAYS

Envy is the Door-Plate of Ignorance

Inferiority is the root of all envy. The strong covet the respect of others, not their envy. For envy is the rebellion of the incompetent.

Once envy is permitted to take root it crowds out ambition as a weed kills a cultured plant. Envy benumbs and stupifies determination. It is a confession of despair. It produces nothing. It yields no return. To submit to it is to bankrupt endeavor.

Hatred has the virtue of force. You can battle with resistance. But envy lays down all arms. Irreconcilable, it cannot even be offended into action.

They who are unwilling to hear good tidings of a neighbor and can find happiness only in seeing others depressed to a level with themselves are the most hopelessly lost to the work of the world. Their envy is a passion so full of cowardice that even they have not the confidence to openly own it. The weakest are reluctant to pose as foes of character. Envy is a secret vice.

Upon all occasions that ought to give him pleasure the envious man wilfully puts himself in pain. He converts what should be life's relish into secret anguish. Those things which give the highest satisfaction to others give him the quickest pangs. To him all the perfections of fellow creatures are odious. Youth, beauty, valor, integrity and wisdom are provocations for his displeasures.

To be offended with excellence, to hate a man because the world approves is but the faint praise of a wretched soul.

So false to all good is envy that no man can despise it more than he who envies most. As a slave to a drug he would rise above it if he could, and envies no one so much as he can.

Envy hurts only the possessor. Like a scorpion confined within a circle of fire it stings itself to death.

The truest evidence of character is to be without a touch of envy.

Our Stock of Holiday Goods is Now on Display

We are proud of this selection this year and want you to call and look it over. While we have been handicapped somewhat in securing various items usually obtainable for Christmas gifts, we have made special effort to secure suitable and useful gifts for all members of the family. Let us help you in making your Christmos selections.

SHOP EARLY AND AVOID DISAPPOINTMENT---SHOP AT OUR STORE

Gifts for Dad and Brother

Smoking sets, tie racks, playing cards, military sets, fancy handkerchiefs, neckties, neck scarfs, silk and wool hose, novelty suspenders, armbands, garters, cuff links, tie clasps and collar buttons. Also a splendid line of gloves, warm socks, shirts, caps and hats—all of which make splendid, useful Christmas gifts.

Gifts for Mother or Sweetheart

A large assortment of useful presents, such as bed spreads, table linens, fancy towels, pillow tops, napkins, art linens, furs, dress patterns, parasols, beautiful handkerchiefs in boxes, sweaters, knit caps, cosy, warm shoes; also stylish leather shoes. Beautiful camisoles and envelope garments, silk, lisle and woolen hose. Also Pendleton woolen robes and blankets. Warm woolen and cotton blankets and bed spreads.

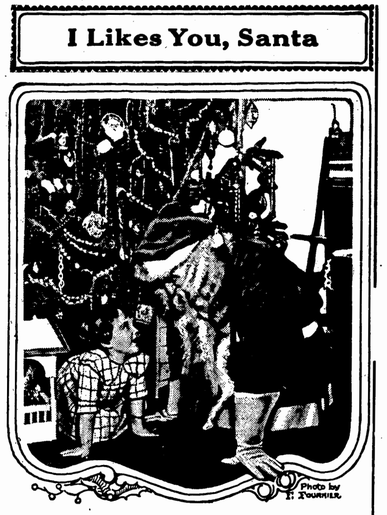
Bring your Christmas shopping list to us and let us help you in your selections.

Don't wait—shop early—while the selection is yet good.

FURS MAKE USEFUL GIFTS FOR MOTHER AND SISTER

USEFUL GIFTS FOR MEN
All mackinaws and leather coats—Holiday special
10% Discount

I Likes You, Santa



Gifts for Girls

We have a beautiful line of toilet sets, manicure sets, comb and brush sets, mirrors, albums, music rolls, perfume sets, ivory novelties, beautiful ribbons, story books, leather and velvet purses, bead necklaces. Also a splendid assortment of handkerchiefs.

WE HAVE SCORES OF

Presents for the Boys

Machine guns, trains, drums, watches, tops, pop guns, autos, kiddie cars, banks, balls, best story books, blocks, horns, wagons, rubber and floating toys, toddler and tinker toys for little boys.

GIFTS IN PLENTY

For the Little Girls

Dolls, tables, chairs, beds, dishes, maps, games, doll buggies, stoves, washboards, paint sets, story books, movie picture lanterns, checker boards.

Bath Robes

We have a nice selection of bath robes and bath robe blankets for both women and men.

GIVE BLANKETS FOR CHRISTMAS

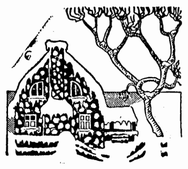
Warm Blankets make useful Christmas gifts. A special discount of 10% will be given on all blankets during the holidays.

Delicious Eats for Christmas

Our grocery department is well filled with plenty of good things such as candies, in bulk, packages and boxes. Nuts, figs, dates, oranges, lemons, bananas, grapefruit and grapes. Also lettuce, celery, sweet potatoes. Besides our shelves are filled with a complete line of fresh stable groceries ready for delivery.

Come to Follett's Store Where Christmas Shopping is Made Easy

All Ladies' and Children's Coats on Sale During the Holidays at Greatly Reduced Prices



We wish you one and all a Merry Christmas

Good Things to Eat and Wear

Gift of the Desert

by Randall Parrish

SYNOPSIS

CHAPTER I.—On the isolated Meager ranch, on the southern border, Deborah Meredith, trained nurse, is in attendance on Mrs. Meager, whose husband has recently been killed, victim of an accident. Immediately after the death, Bob Meager, Mrs. Meager's stepson, arrives and takes possession. He insists that Deborah at once resolves to leave, but there seems no possibility of her getting away, alone.

CHAPTER II.—Meager gloats over Deborah's plight, telling her he has sent for a justice of the peace, who will marry them tomorrow. Horrified, the girl secures a revolver.

CHAPTER III.—The justice, Cornelius Garrity, scoundrel and chosen friend of Meager, arrives with a party, among them the "Frisco Kid," notorious desperado. The girl locks herself up.

CHAPTER IV.—Forced by Bob, Mrs. Meager decoys Deborah from the room and despite her protests the justice performs the marriage ceremony. Immediately afterward, she escapes and reaches her room.

CHAPTER V.—Meager seeks the girl, but she stuns him with the revolver and rushes to the stables, hoping to secure a horse and escape, anywhere away from Meager, if she must die in the desert. In the stables she meets the "Frisco Kid." Somehow he inspires her with confidence and she explains the situation, not having been present at the "wedding."

CHAPTER VI.—The "Kid" tells her his name is Daniel Kelleen, that he is no friend of Meager, and, securing two horses, the pair ride into the desert.

CHAPTER VII.—Alone with Kelleen, the girl becomes somewhat apprehensive, but he tells her of his service in France, where Deborah had been a nurse, and she puts full faith in him.

CHAPTER VIII.—Kelleen explains that the "Frisco Kid" is a manufactured character, that he is really a captain in the regular army, detailed to run down a gang of thieves and smugglers of arms into Mexico, among them Meager and Garrity.

"Why!" She drew in her breath sharply, leaning forward with new eagerness. "Then surely you are not now what I thought you to be—an outlaw, a renegade? You are not really the—the 'Frisco Kid'?"

"Oh, yes, I am. At least I am all the 'Frisco Kid' there ever was, to the best of my knowledge, although I fail to line up entirely with the reputation so kindly given me by 'Pop' Reynolds. The 'Frisco Kid' is an entirely manufactured character, made for a practical purpose. Do you grasp the idea?"

She shook her head, but her eager eyes belied the action.

"You have a glimmer, nevertheless. I'll explain. This portion of the border has been a hotbed of outlawry for years. It has baffled every commanding officer assigned to this district. We had no information to work on, suspects were numerous, but proof lacking. Finally a plan of action was evolved, but to carry it out successfully, a desperado with an established reputation as a bad man was first of all most essential. With this end in view the 'Frisco Kid' was carefully put on the stage. Newspapers along the coast, and near the border began to note his exploits; dispatches regarding him were sent east; rewards for his capture, dead or alive, were posted. It was intimated, finally, when his name had become sufficiently familiar, that he had escaped into Mexico, and then that he had been seen again in this neighborhood. Troops were dispatched to run him down, and word to that effect scattered broadcast on both sides the line. You see the purpose of it all?"

"To win the confidence of the real gang?"

"Exactly; and it worked. The end is already in sight."

"But who, then, are you?"

"Daniel Kelleen, just as I told you, a captain in the —rd cavalry."

"You—you volunteered for this service?"

"Yes; you see it was impossible for the department to use any officer who had been stationed lately along this border. Such a one might be immediately recognized, and the whole scheme ruined at once. At the same time, whoever was chosen to play the character must have intimate knowledge of the border. I met the requirements fully, as I had served here ten years ago as a mere boy, and knew the country fairly well. So here I am, the 'Frisco Kid.'"

Deborah held out here hand impulsively.

"I'm glad you told me," she said in all frankness.

CHAPTER IX

A New Viewpoint.

She had been sleeping for nearly two hours, with head supported on a saddle, the steep wall of the canyon on one side of her and the valley itself shut completely off by a thick growth of shrub. She had not realized how tired she was, and, in fact, rested there some time in this nook Kelleen had found, staring with wide-open eyes up at the strip of blue sky, her mind still active. The knowledge of who this man really was had brought her instant relief, and a new sense of safety in his presence. So her heavy eyes closed, and she slept.

Something must have awakened the girl suddenly, for she sat bolt upright, with eyes wide open in fright, Kelleen had disappeared, but beyond this no change of any kind was apparent. The entire scene was so calm and peaceful that Deborah's heart ceased its first violent throbbing, and she even smiled at her earlier fear, and arose expectantly to her feet.

What had become of Kelleen? Through the tree branches behind which she had been concealed Deborah searched the full length of the chasm within reach of her vision, but discovered no trace of his presence. It was not likely the man would be absent long. It must already be noon by the sun, and, actuated by a desire to do something, she finally began to arrange a meal for his return. She had opened the bag of provisions, when suddenly her eyes caught sight of something moving far below, and to her right, objects at first hard to distinguish, and then quickly discerned as two horsemen, emerging from the very cleft in the rocks where she had decided the canyon probably ran. They came slendily on, growing more distinct each minute, yet still too far away for recognition.

She crouched lower behind her screen, and waited breathlessly. Two, what could that mean? It seemed highly improbable that Kelleen could have encountered a friend in this spot—a man in whom he had faith—who was returning with him. If this was, as he so evidently believed, a hidden lair of outlaws, a rendezvous for border crime, it was hardly possible he had met with any comrade here, if—if he was really what he had claimed to be. The thought of that "if" struck her like a blow. But was he? was he? Her eyes strained to watch every movement of those approaching horsemen. She could perceive enough already to be certain that Kelleen was not one of the group; they were both Mexicans, or at least so attired, and their mounts bore Mexican trappings. Little as the girl knew of the frontier, she at once realized the danger of being discovered by such men.

Deborah was conscious of trembling in every limb, as she crouched there, behind the leaves, instinctively grasping the only weapon in her possession. Then she suddenly recognized one of the riders as Juan Sanchez.

They had followed her then, and were seeking her now. There could be no possible doubt as to Sanchez' mission. How the fellow had reached there so quickly, and why it even had been suspected she had sought this remote spot of refuge, were unsolved questions, yet it was highly probable that searching parties had been dispatched in all directions, and the Mexican had been the one whom Fate had headed that way. Anyhow she could not speculate as to how or why. She must find hiding place somewhere among the rocks.

Her eyes traced the rugged bluff hopelessly; to attempt scaling that would only bring her into full view, yet there was a fringe of thick bushes below into which she might plunge. This seemed the only hiding place available, and she crept through the thick fringe of brush into the shadow. The two horsemen came slowly, cautiously, up the slight slope, staring about them suspiciously, yet finding nothing at the summit but a bit of trampled grass to tell that the spot had been occupied previously.

Deborah, secure in a cleft of the rock behind a five-foot screen of chaparral, crouched motionless, with ears strained to detect the slightest sound. She was unable to see, but could hear plainly, and there was no difficulty in recognizing the voice of Sanchez.

"Whatever do you suppose has become of them, Jose?" he asked complainingly. "They were to have come yesterday, you tell us, and yet they are not here."

"But someone is, senor—see, there has been camp made."

"That was the guard; the ranch brand is on the pony grazing yonder; I took note as we rode by. I wonder where in h—l the fellow has gone? But he has naught to do with Casebeer's outfit. The gulch is empty, except for the lad we met below."

"And evidences he de in here, senor? Who was 't you call him?"

Sanchez laughed mirthlessly.

"Hilding out, Jose; there is no reason to fear that guy. He's the 'Kid.'"

"The 'Frisco Kid?'" Sure, I hear of him. They say he held up the Los Colos stage."

Sanchez laughed.

"'Tis not all they say. He is the devil's own, if half the tales be true—a smooth-spoken boy enough, but not the sort to make sport of. Menger knows him—aye!" and he slapped his knee roughly at the happy thought, "and that is why the lad is here, no doubt. I have it now; Bob could not come himself, Jose, so he sent this fellow. But why the h—l didn't he tell me, I wonder?"

"Who tell you—the 'Kid?'"

"Either one of 'em; I like to know what I'm bein' stacked up against on a job like this. Casebeer's lucky, but his outfit this trip would be a mighty rich haul if he should happen to fall down."

"Guns?"

"Ammunition, and booze for Villa; some combination that. It is to go over the border tonight, and a nice wad of money comes back. That will be the 'Kid's' job, perhaps, if Menger doesn't show up by dark; we haven't any orders beyond here."

"You think Senor Bob maybe would send him to bring back the money?"

"Sure; it's fifty-fifty with Casebeer, and 'Frisco' is all right. He's square as they make 'em, I've always heard. Raises h—l, of course, now an' then, but he never double-crossed anybody. Ain't that him roundin' that bluff yonder? Sure it is—ridin' this way. I'm goin' to ask him straight when he gets here."

Deborah, frightened by what she heard, lifted herself slightly so as to see better up the narrow valley. The

The Approaching Horseman Was in Plain View.

approaching horseman was in plain view, and, even at that distance, the girl had no doubt as to his identity. Her very heart seemed to cease beating as she knelt, anxiously watching his approach, the horse loping steadily, the man swaying gently to the movement of the animal. Who, indeed, was he—this Daniel Kelleen? this "Frisco Kid"? Was he a real man in whom she could trust and believe? in whose honor she could confide?

Or was he what these ruffians so confidently proclaimed—an outlaw, a desperado of the frontier, an escaped felon, hiding from justice, and even now engaged in the committal of crime? These fellows took it for granted that he was present on the same criminal mission as themselves; he had deliberately left her, and rode away seeking traces of Casebeer's gang in the valley—seemingly there was no escape from the one conclusion, that he was part of the conspiracy. He had lied to her, deceived her, told her a fairy tale, laughing at her credulity, while coldly going forward with his own plans.

Deborah grasped all this almost instantly, unable to perceive any possibility of escape from the net. Her limbs trembled, yet she could only kneel there in silence, watching the approach of the rider. A wild hope thrilled into her heart, that perhaps this man was not all bad; that whatever his real life might be, he may have meant to be square with her, and would yet protect her. Surely he never had revealed her presence to these others; perhaps that was why he had not returned with them, hoping she might see the strangers, and hide, his first words sent a thrill through her heart—he was playing a part for her protection.

He reined in his mount sharply, glancing keenly about, but with face expressionless as his eyes finally encountered the two awaiting him.

"Whose horse is that?" he asked inquiringly, indicating the grazing animal.

"I know not that, senor; 'tis Meager's brand."

"I can see that for myself, but it was not here when I came by. Was anyone besides you two sent in here on this business?"

"No, senor," there was a touch of deference in Sanchez' voice most unusual. Deborah was quick to note and appreciate. "Only the two of us. Yet it might be, for we knew not even that you were to come also."

"That was an after-thought, and why I rode so hard and straight. I know about you, didn't I?"

"Si, senor; no doubt."

Kelleen swung one leg carelessly over the pommel of his saddle, and deliberately rolled and lit a cigarette. His face expressed no emotion, no particular interest, yet Deborah was certain the keen, searching eyes had swept swiftly over her covert, and up the steep front of the overtowering cliff. He suspected where she was hidden, and was endeavoring to protect her from discovery; but who was he really playing fair with? was he trying to deceive both? or merely playing a desperate game in which a single slip would mean disaster? Was he outlaw or honest man? Nothing in the situation, or in the conversation thus far overheard, gave her certainty. She dare not move, scarcely venture to breathe, as she watched the three men below.

"When is this Casebeer gang expected?" Kelleen questioned.

"Tonight, senor; it was to be earlier, but they not come. Now not until tonight; they never cross the desert by day."

"No, I reckon not; it would be too risky. Any trouble here lately?"

"Non, non, senor; not of late trouble. It was all fixed. The Senor Meager he know who best to see. They come—yes; last week a man come, an' question, but he ride away, an' know nothing. A troop come, soldiers from the fort, an' stay two, three day. I talk with officer; he drink with Bob; then they go back to Nogales. It be all right sure now—no see? We know they not be back soon as this week. So we send word for Casebeer."

"Yes, I see; but it is not so sure after all. Perhaps they do come back."

The Mexican shook his head positively.

"No, senor, we know. We have watch always. Senor Meager very slick bird when not drunk. You at the ranch last night?"

"Certainly; you saw me there. Why?"

"You not there alone, senor. The judge came also from Nogales. He brought the word. 'Twas for that he came, not to marry Meager. That all came later, by what you call luck."

"Where does this northern gang come from?"

"Out of Calabasis, senor, by way of the river."

"Then they will enter down below, through the gorge. This is no place for us. Suppose they were delayed all night, and took a chance to come on this morning by daylight—and why not? They'd be under rock cover all the last part of the way. It's beyond here that they'd have the open desert to cross. Let's ride down there and wait. Saddle up, both of you; there is just as good camping ground down below."

Within five minutes the three were trotting soberly down the valley. Not one of them glanced back, and Deborah lifting her head higher and higher to peer after them through the brush screen, watched until they disappeared entirely about the sharp protuberance of rock, which marked the end of the vista. Kelleen had done this purposely; his conversation with these men had been largely carried on for her benefit and guidance. He knew where she was; that she could easily overhear. Through these means he endeavored to convey to her unsuspected the complete situation in which he was involved, and then, this accomplished, he had inveigled the two unsuspecting Mexicans away, thus giving her opportunity to escape unseen.

Deborah was not yet wholly convinced of the man's innocence. In spite of his evident intention of shielding her from discovery, his intimate association with Bob Meager, the understanding between him and Sanchez, was seemingly proof positive that he was an important link in this conspiracy. The man was endeavoring to make her think otherwise, but the doubt of him lingered in her mind. In the night she had begun to trust, to believe; the fellow's very recklessness and good humor had been attractive; her vague suspicion seemed to vanish in his presence. But now this doubt returned with redoubled vigor, and, for the moment, she actually feared him as much as the man she had tried to kill. More, perhaps, for Menger was only a rough, passionate brute, while the very nature of Kelleen rendered him a far more dangerous adversary. If he also was interested in her—and the girl felt that he was—she was in greater danger now than on the ranch from which she had fled. She shrank from the thought, yet it haunted her, and would not be driven away. Where could she go? What could she do to escape the man's return? Suicide, impossible as it appeared, she must find some means of leaving that fatal valley before he came back again alone seeking her.

The girl drew back slowly, with eyes searching the open valley, intent first of all on reaching the horse grazing below. The only possible way was the one she had taken in climbing there, along a ledge of stone close in against the rock wall. The whole face of the cliff was a mass of trailing vines, clinging in some mysterious way to imperceptible crevices in the rock, completely veiling its front far up above her reach. Deborah pressed these back to gain passage, and had advanced a dozen steps or more, when she stopped, paralyzed with fear, staring into two terrifying eyes. She could not move a limb, or scream in that first instant of horror. Then a hand reached out, swept the concealing vines aside, and gripped her.

CHAPTER X

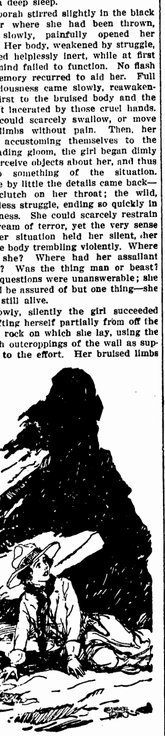
Within the Tunnel.

Deborah struggled to break away, emitting one startled cry for help, before the fingers of her assailant closed viselike on her throat. She was in the grasp of a giant, merciless in the exercise of his power, and felt herself dragged helplessly through the tangle of vines into blackness beyond. It was a man; she knew that, although she had no glimpse of the face, and made desperate effort at release, given unusual strength by terror; but the grip on her throat tightened remorselessly, and her power of resistance waned, until she suddenly lost consciousness and all sense of her surroundings. Her body lay limp in the fellow's arms, and, with a growl of satisfaction, he bore the motionless, seemingly lifeless body back through the deepening shadows, and cast it down on the stone floor. The man stood above the huddled figure of the girl, hardly defined, shapeless in the gloom, and laughed silently. He bent down and touched her, only to straighten up once more, convinced she was not dead. A rifle leaned against the back wall, and he picked it up, tested its mechanism, and moved silently forward to the entrance, the weapon resting in the crook of his arm.

Cautiously he parted the leaves and looked out, searching the full length of the deserted valley. Nothing of consequence met his gaze, for he rested back on a convenient boulder, and continued his vigil, as motionless as the stone on which he sat. He must have remained in that position for an hour, occasionally shaking his head, and muttering incoherently to himself. Then, suddenly, and without warning, the fellow appeared to relax, his head sank forward on the arm resting above the gun muzzle, and he sank into a deep sleep.

Deborah stirred slightly in the black corner where she had been thrown, and slowly, painfully opened her eyes. Her body, weakened by struggle, seemed helplessly inert, while at first her mind failed to function. No flash of memory returned to aid her. Full consciousness came slowly, reawakening first to the bruised body and then the face, and a black beard sweeping her throat incensed by those cruel hands. She could scarcely swallow, or move her limbs without pain. Then, her eyes accustoming themselves to the pervading gloom, the girl began dimly to perceive objects about her, and thus grasp something of the situation. Little by little the details came back—the clutch on her throat; the wild, helpless struggle, ending so quickly in darkness. She could scarcely restrain a scream of terror, yet the very sense of her situation held her silent, her whole body trembling violently. Where was she? Where had her assailant gone? Was the thing man or beast? The questions were unanswerable; she could be assured of but one thing—she was still alive.

Slowly, silently the girl succeeded in lifting herself partially from off the hard rock on which she lay, using the rough outcroppings of the wall as support to the effort. Her bruised limbs



Her Bruised Limbs Ached.

ached, and her head throbbed with agony as she changed her posture ever so slightly, yet the movement served to clear her mind and bring back a measure of courage. Her thought swept back to Kelleen, and the memory of the man was no longer wholly that of his presence. In spite of her doubts, her distrust, the recollection of their night's ride together recurred now as almost a pleasant remembrance. Criminal, outlaw he might be, but he was no brute, no beast of the jungle; rather he had shown himself a man, even a gentleman. Yet what help could she expect from him? If he was loyal and worthy, how could he be of any aid?

Beyond all doubt the man would return in search of her. He had shrewdly guessed where she lay in concealment, and had led those others away for no other purpose but to leave her there securely hidden. As soon as he could rid himself from their observation he would surely be back once more. But even if he came had she left any trail he could follow? Her passage back from the edge of the covert had been made over smooth rock, on which her feet could have left no slightest trace. If she had been unconscious for the final entry of her disappearance could not have been greater. Suppose he even approached the front of the precipice, or stumbled blindly into the mouth of the tunnel behind the canopy of vines—what then? She could conceive but one inevitable result—his death

She was surprised, shocked at how that new thought sickened and disheartened her. In some way his personality had touched her strongly, and she refused to snap. Yet death certainly stood grimly between them now. If this guardian of the hidden tunnel must treat her as he had—actuated by terror, or whatever cause had led to action—he would surely prove no more merciful to him. He would be on watch, would mark Kelleen's approach, his every footstep. Skulking behind that screen of leaves, unsuspected, he could kill safely, and in that wild land the report of the death shot would bring no danger.

Deborah's searching eyes, now able to distinguish objects with some clearness, scanned the rock walls to the obscured entrance. At first she could not be sure, but finally the vague outlines of the man seated on the rock became visible. He was huddled forward in such grotesque posture as scarcely to appear human, but gradually the girl realized what the uncouth shape must be, could even detect the long, scraggy beard, the great breadth of shoulders, and the rifle, on which he leaned. With this discovery came the instant assurance also that the fellow slept soundly. A thrill of hope brought courage, and new strength to her limbs. Might it not be possible for her to steal forward silently, and then, with a sudden spring, clear the obstruction of vines, and gain the free day without, before the slumbering guard could even comprehend what had occurred? The horse was not a hundred yards away, and even if she had to leap boldly from off the shelf of rock, she would willingly dare all for a chance at escape. Yet she had not advanced three steps until she realized the impossibility of the effort—the sleeping body utterly blocked the passage.

She could perceive the fellow now with some distinctness, a giant of a man, with long, apelike arms, bare and hairy, an oddly formed head, almost pear-shaped, long hair shading the face, and a black beard sweeping to his knees. Slowly, silently, without actually knowing why, the girl drew back into the deeper darkness behind her, guiding herself with one hand against the rough wall. Into her mind had come the faint hope of another egress somewhere, the very purity of the air suggesting such a possibility, she even imagining she felt a draft upon her cheek. Yet there was no glimmer of light. Once her groping foot struck against fragments of rock left lying where they fell. She bent down better to assure herself of the obstruction, and her exploring fingers touched a pick. It was a mine, then; this secret excavation had been man's work; Nature may have pointed the way, but this tunnel itself originated through lust of wealth. Her captors were not outlaws but men crazed by fear of losing what they had uncovered in these rocky hills. Yet this knowledge rendered her situation no whit less dangerous.

Deborah crept forward over the pile of debris, discovering that this fall of stone did not denote the ending of the passage. Suddenly her groping hands revealed a sharp curvature in the tunnel, and she worked her way about the corner with utmost caution. Then she stopped, rooted to the spot, her heart almost ceasing to beat. Far above, up what appeared to be a sharply inclined chute through the solid rock, came streaming down a single ray of daylight, its faint reflection resting directly upon the upturned face of a dead man, stretched on the tunnel floor.

Deborah, startled, swayed back against the wall for support, staring down into that white, upturned face, clearly revealed within the little pool of light. It was the face of a young man, his dark, wide-open eyes staring blindly up into vacancy, his brown hair cut short, almost good-looking even in death, with cheeks freshly shaven. This last was what aroused the girl, brought her back quickly to life and action. He had the appearance of having shaved that very morning; the stubble of his beard was not even visible. Then she noted two other facts—his revolver was in the holster at his waist, and the hand, held upright against the side wall, grasped a folded paper. He had just been killed, not more than two hours before surely, and in no duel—perhaps he had fallen to where he lay while climbing that narrow passage above. But the wound? There was none visible—not even a bruise on the face. As a woman, Deborah shrank from touching the body, but her training as a nurse instantly conquered. She must learn the truth, disagreeable as the task might be. On her knees, exerting all her strength, she partially turned the body—the man had been shot in the back.

She seemed to comprehend it all in a flash, visioning the scene as she rose quickly to her feet. He must have done the deed—that older man with the beard—shooting treacherously from behind. It had been deliberate murder. But the purpose was not so clear. To all appearances the assassin had never even approached his victim after he fell. Confident of the deadly accuracy of his aim, he had left the inert body lying where it struck, untouched, not even the dead man's gun being removed from its holster, or the folded bit of paper released from those enfolding fingers.

(Continued next week)

As It Sounded

Little Verna lives with Daddy and Mother in one of the Ohio Valley's prettiest towns not far from Pittsburg. Of the musical profession themselves, Daddy and Mother are intensly interested in the furthering of their small daughter's education along the same lines.

Recently, upon her return from Sunday school, Verna was questioned as to what hymns the children had sung, and gave the not particularly enthusiastic answer that "one of them was something about save your garters." Investigation revealed that it was the old familiar "Saviour, Guard Us."

AVOID CHRISTMAS TREE FIRE

Utmost Care Should Be Used In Trimming, Thus Preventing Fatalities in the Homes.

PEOPLE cannot be too careful in guarding against fire when trimming a Christmas tree, says a correspondent in Good Housekeeping. There have been scores of Christmas tree fatalities in homes and in Sunday schools which a little care might have prevented. The writer once set a tree in a blaze, consuming nearly half of it, tinsel ornaments going with the green branches. A tiny candle had been wired too high, and it took only a few minutes of its brisk heat to char a branch above it and start a flame. A thick portiere was torn from its pole and thrown over the blaze. If it had not been at hand the light window curtains would have caught fire in another minute. Since that Christmas our tree has always been placed in the center of the room, and we have eschewed cotton wool, tissue-paper angels, and celluloid ornaments. First of all, we wire each candle securely in place at the furthest end of a branch which has nothing above it, either fir tree or trimming. Then as the tree is denuded we watch carefully the fast-disappearing candles. Sometimes one of them, nearly burned down, will topple over or be merely a spark of flame, but near to something inflammable and be a menace.

GOOD TURNS ON CHRISTMAS

Chance for All to Aid the Friendless in Having Happy Yuletide Season.

REAL purveyors of Christmas cheer may often find a market for their precious wares outside the pale of charity, for all homeless people are not necessarily poor, and neither are all childless homes necessarily unhappy. Housekeepers who are short on homes may combine these two lackings and make Christmas day a merry delight for the grown-ups in spite of these unfortunate conditions.

There is always something peculiarly pitiable in the idea of any one "flocking alone" which should appeal to the home-maker without a family, so that this should be the occasion for her to gather in all the bachelor maids and homeless men of her acquaintance and give them a joyful opportunity to "flock together." Even the Scrooges, if she knows any, should be rescued from their lonely bowls of gruel and persuaded to open their shut-up hearts and wear them outside for general inspection, as Dickens says, "For Christmas daws to peck at." Therefore, collect six or eight of these birds of a feather who are destitute of near-by kith and kin and make your Christmas feast a center of good cheer for all the charming solitaires you are able to draw within its radius.—Woman's Home Companion.

Good Year for Violets.

Sweet peas have been forced for the Christmas market only for many years past. They must be started blooming before the cold weather begins. Then they will bloom all winter. Daffodils do not get in until February, but almost all the rest of the spring flowers, hyacinths, narcissuses, bavardia, and so on, are on the Christmas counters. Easter lilies, too, though rather cold and white for Christmas, are sold. Violets, are fine this winter, deeply, darkly, beautifully blue. Some mignonette now comes in enormous sprays. There are carnations but the bright red Christmas carnation is the favorite. Holly comes from the hills of Maryland and the south. The wild holly supplies the market and there has never seemed to be any perceptible diminution of the supply. Great quantities of it are purchased by all sorts of dealers, who decorate their stores with it and send out a sprig attached to every Christmas parcel.

SAD FATE

Wooden Soldier: After faithful service in the nursery for a year, I will be cast aside for a new toy this Christmas.

Dumb Animals Remembered.

The noblest observances of Christmas are its charities. In all ages and among all peoples the poor have always been bountifully remembered on that day, and in many parts of England and Scotland even the lower animals are given an extra feeding that they, too, may have cause for rejoicing when all mankind are glad. Many readers will remember Burns' address of the auld farmer to his mare when presenting her with an extra feed of corn on New Year's day. "A guid New Year I wish thee, Maggie. Hae, there's a ripp to thy auld baggie."

To Avoid the Rush.

Soldier, just back from his harvest furlough, to the sergeant—"My father wants to know if I'll get another furlough at Christmas. Here is the picture of the pig that is going to be killed."—Fliegende Blatter.

STORY OF A STOCKING THAT WAS SO EMPTY

Jacob Scrim was accounted a prosperous man. Early in life he had adopted a motto to get-there-activeness that had apparently served him well. He could survey premises that yielded good rentals to him, mortgages that were a first claim upon good farms, stocks and bonds that were called giltedged. Sitting in his dingy office he did not appear to have any very exacting business, but his clients found that there was plenty of exaction before they were done with him. It was a favorite amusement with him during the intervals of occupation to go over his books, gloat over his securities, and refinger a stock of gold that he kept to assure himself of the reality of his power and the possibilities of his life, should he ever care to use them. This glittering illusion he strangely kept in an old stocking, hard by another in the massive safe,thesecond containing a collection of gems that he loved to handle without letting any of them slip through his fingers.

He was thus amusing himself one Christmas Eve, all unconscious of the radiated and radiant hopes that filead the atmosphere outside and ever surged through his room in which he sat, and all unable to tune in with any of them, when he seemed to see upon the wall a handwriting and to hear a voice that interpreted it to him, saying: "Oh poor dupe of falsity! When will you hang up a stocking emptied by benevolence and make an investment in real happiness? When will you serve love, that it may present you with His best gifts? Are there none who need but cannot have in this great city? Are there no hopeful children who will creep down to disappointment on Christmas morn-morning? Power of light and heat of truth and love, of purest happiness is in these baubles that you handle, but your heart is shriveled up into nothingness. You have lost your income and must leave your principal. Come with me."

Was it a dream? Who can say? But they found him there the next morning, cold with a new coldness and grasping with a futile hand the full stocking that was so empty!

Desert Holly

Though not profuse enough for general gathering at Christmas time, and not as suitable as the regular holly for wreath making purposes, the desert holly (Pereza nana) of the Southwest is a peculiar little plant with stiff, smooth, dull bluish-green leaves, but not so stiff.. The plant bears one light purplish-pink flower, the head about an inch long, with purplish braces. The plant grows but two or three inches high, and looks somewhat like a little sprig stuck in the sand. Another plant with bluish-white leaves and erroneously called "desert holly" is sometimes used for wreaths on the Pacific coast.

Height of Irony

To put new bumpers front and rear then to ram your radiator against a high truck.

GOOD YEAR Service Station

THE best footing your car can get on rain-swept streets and slippery hills is the gripping All-Weather Tread of a Goodyear Tire. The high, thick, sharp-edged blocks of that famous tread take a slipless hold and hang on with a wedgelike action that prevents side-slip or skidding.

As Goodyear Service Station Dealers we sell and recommend the new Goodyear Cords with the beveled All-Weather Tread and back them up with standard Goodyear Service

A Merry Christmas

Everybody Should Be Happy at Christmas Time

WITH CHRISTMAS LOVE CAME UNDERSTANDING

"Well, girls, I made it up with Beatrice." Ann, the hard-boiled" of the office, yanked off her coat and hat and placed them in the locker that ranged across the end of the room.

No one paid any attention to Ann usually. She was of such an explosive nature, and said such irresponsible things, that she was not taken seriously. But the break between Ann and Beatrice had been of long standing and had been commented upon so much by Ann that her announcement caused the other girls to look up questioningly.

"That's a fact," continued Ann, "and I'm so ashamed of my treatment of her this long time."

"How did it come about?" asked Sadie, assistant to the department manager.

"Well," exclaimed Ann, "I will have to confess my beastly nature, before I can tell you how it happened. In a spirit of spite I sent Beatrice at Chrismas time a present, which no one but good little Bea could ever have accepted as anything but an insult. It makes no difference what it was. Today noon I met her on the street and she stopped me to thank me for the present.

"It was not the present so much, Ann, that came by mail,' said she. 'What made me feel good was that you had been thinking of me.' Then she took hold of my hand to caress it and said, 'It was not any kind of a present that I wanted most from you Ann, but your love and companionship and sympathy. I have been hungry for you, Ann, and you had no right to take yourself from me. I give you my love for Chrismas—will you give me yours?' And little Ann, the hard-boiled, cried right on the street. What do you think of that, girls?"

"The day of miracles is not past, it seems," commented one.

"And now do you know what?" This from Ann. The girls waited expectantly for further information from the erratic one.

"Well, I always thought Chrismas was to get people to spend lots of money to send things to other people that they did not want," rattled off Ann. "Now I have a new understanding of Christmas since my most loyal friend has asked me only for my love—and she shure is going to get it."

Investing for the Family

Abraham Lincoln humorously said of a poor neighbor's assets, "He has a wife and two children, which I should think were worth thirty thousand dollars to any man."

The family is the greatest wealth of any member in it—the first concern of the individual or of society. It is a golden investment and needs the same protection and care that any investment requires.

One of the best safeguards is good reading; one of the things that puts it in jeopardy is bad reading. The Youth's Companion has always been in the matter of supplying good reading, what a United States bond is to the investor. Its principle is guaranteed, and its interest is paid with everp issue. Try this investment for your family.

Picking His Pals

Mother: "Harold, stop using such awful language."

Harold: "Well, Mom, Shakespeare uses it."

Mother: "Well, then, don't play with that naughaty Shakespeare by any more."

Good Idea

He—Don't you think it would be a good idea to hang up some mistletoe?

She—Christmas is several weeks away.

He—Yes, but we could be practicing.

Never Too High

It might be different with a lot of things around Christmas, but the mistletoe is never too high.

"COMET" AND "CUPID" AND SANTA'S SLEIGH

Comet and Cupid were growing restless in their stalls. As the two leaders of Santa's reindeer, they felt a great responsibility on Christmas eve.

"None of the others," remarked Comet anxiously, "know the short-cuts as we do. Last year we got stuck in an oak tree, and once we had to wade through the Milky Way. Do you remember that little boy in Poland who cried because he didn't see us? We must make a great racket tonight so he will wake up. And there was a child in Canada who set out some hay for us; dear little thing."

The stable door flew open, letting in a great lust of icy wind.

"Ah, my fine fellows!" exclaimed a big, jolly voice, "the packs are ready, and we must be off. Comet, I expect you to keep a sharp eye out for accidents. Cupid, don't forget the corners, and the care with which we must land on the roofs!"

In no time at all the reindeer were harnessed, the packs tumbled in, and off they flew, Santa holding the reins in both hands.

Comet and Cupid outdid themselves. They went like the wind. The little boy in Poland heard their impatient feet on the roof and caught one tiny glimpse of the sleigh. The child in Canada found the hay she had left for the reindeer all gone in the morning. No present was lost no house forgotten.

Back in their stalls once more, Comet and Cupid gave long sighs of satisfaction. "Of course Santa is the one people think about most, but after all, where would he be without us?"

That Christmas Robe

Hustling up a living for the family generally keeps father so busy that he doesn't have much chance to use that Christmas lounging robe.

Don't miss reading a single ad. this week. They are interesting.

GOOD JOLTS AT CHRISTMAS TIME

He was a high school teacher on a salary of eighteen hundred. There were five growing-up children and a wife who was not strong enough to do her own laundering. Still, at Christmas time, his relatives would say, "Mary and John always do send the cheapest things! I'm surprised, since they spend so little on their gifts, they bother to send anything at all."

John heard of this and was grieved. An innocent little nephew had given his elders away. But Mary was not grieved. She held her head high and only laughed, for she knew that she and John were not stingy, and that they were just as fond of the family as any other members of it. But she did more than laugh. She made a plan.

And the next year John's relatives got jolts instead of presents for Christmas from Mary and John.

Sister Isabel, whose husband was a successful coal man, received a note saying: "We sent the thirty-one cents that we could have afforded for your present this year to the Serbian Relief. It will give some starving babies some soup. We knew you would rather have us do this."

And brother Thomas, the shoe dealer, got a note too. "We gave the quarter we usually spent on you, to our postman whose wife is in the hospital. It will pay a carfare or so for one of the children to visit her."

And so on. All the relatives, over twenty, got the same sort of notes, telling where the few cents that had usually been spent on them by the school-teaching brother at Christmas time, had gone this year. And into each one was tucked a hearty "Merry Christmas."

John's family was puzzled at first. But after they had shaken their heads together over it a bit, light suddenly dawned. They realized then that the few cents John and Mary had spent on each of them at Christmas time had been more of a gift, in the real sense of the word than their expensive, and often useless, presents in return had been. And they saw, too, what real good that scattered money was doing this Christmas.

They ended by praising John and Mary, and thinking their Christmas notes the best thing they had got.

And indeed a jolt can be a very useful thing, even for Christmas presents.

Changing Times

It is often said by the wiseacres that these are "changing times," that this is a period of transition.

We are moved to wonder there was ever a period that was not a period of transition. It seems to us that Change was always with us, that we are always confronted by the New, and that the Old never entirely leaves us.

We were reading just the other day of a system of cooperation among savages, possibly hundreds of thousands of years ago. The rude instruments used in acquiring a living were owned and operated in common—a system that some people regard as quite a modern invention. Times have changed wonderfully since then, and yet those savages were using an industrial system, in part at least, to suggest the adoption of which now lays a man open to the charge of being "ahead of his time."

The fact is that the great changes of history take place, not through the conscious effort of man, but by way of forces little understood by man acting through his necessity. No man, no group of men, consciously directed the change from cannibalism to savagery, from savagery to feudalism to our present system of industrial and social life.

The human race will zigzag onward, with probably little conception of whence it is going for some time to come.—Western Breeders Journal.

Still, if you worry about your past you won't have so much time to worry about your future.

THAT MASK WHICH GREW ON MR. PHILETUS FACE

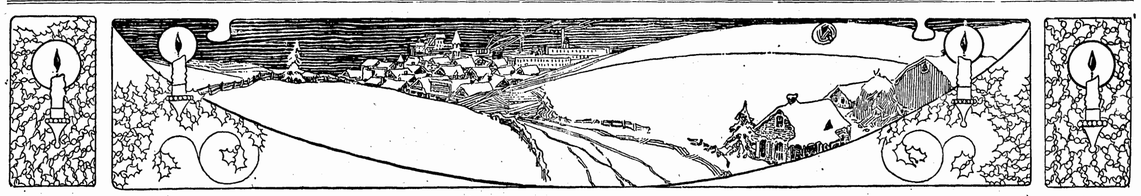
Philetus Solemcolly could not understand why the children did not like him. He gave them good advice. He patted them upon the heads. He expressed the hope that they would be successful in life as he had been. He promised them rewards if they would behave themselves as he wanted them to. Yet they came to his school unwillingly and went home from it gladly. They were respectful, but unsmiling.

It was with hope, but not without difficulty, that a friend persuaded Philetus to officiate as Santa Claus at the Christmas festival and to assome traditional garb of the part. Philetus did not see much use in such fanciful doings, but yielded to solicitation and appeared upon the occasion with as much grace as a feeling of foolishness would allow. His spare form was now rotund, his sober garments had become gay, and the jolly mask that had been adjusted to his long face gave him quite a new expression.

As the joy among the children progressed and the spirit of fun and frolic mounted high Philetus began to experience a change of heart. To his amazement he began having a good time himself and to feel like a real Saint Nicholas. For this reason he overexerted himself to such an extent that his mask fell off and it was revealed to the surprised audience that it had been contradicting the face of Mr. Solemcolly.

This was really the best feature of the evening, and it proved to have a permanence about it, for from that time, the Philetus phiz shortened, and broadened, and fattened, and colored up, until it came to look a good deal like the face of that old fairy who is always young and kindly.

So the mask that fell off left its imprint and stayed on, and Philetus, able to be merry, became the familiar friend of the children.



Yuletide Suggestions

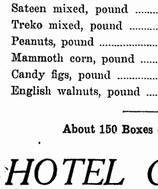
THE SOURCE OF YULETIDE GIVING WAS SACRED. PRESENT DAY ABUSES HAVE NOT ROBBED IT OF ITS REAL SIGNIFICANCE. EXPRESSION OF SENTIMENT BY USEFUL, PRACTICAL GIFTS FOSTERS ALL THAT IS GOOD IN FRIENDSHIPS AND BRIGHTENS THE FLAME OF UNSELFISH FELLOWSHIP.

SLIPPERS

House slippers for the whole family—men, women and children. A gift of slippers is a gift of many hours of comfort. Our slippers can be counted on for warmth, service and "all-around" satisfaction.
Men's slippers, moderately priced .....$1.00 to $2.00
Women's slippers, moderately priced...$1.35 to $2.25
Children's slippers, moderately priced ..$1.0 to $1.50

HOSIERY

The gift that has always been welcome is silk hosiery. Do not limit your gift to one pair for there are no better values than Armor Plate hosiery and a woman never has too many pairs of silk stockings.
Ladies' full fashioned pure silk thread hose, black, brown and white, per pair $1.50, $2.25, $3.00
Ladies' silk hose, as above, in colors, pair $1.50, $2.25
Ladies' silk and wool hose, pair $1.50, $2, $2.50, $3



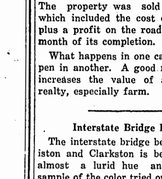
Ladies' plain colors wool hose, per pair $1.00
Ladies' heather mixture clock hose, per pair 75c
Children's wool hose pair ..50c, 65c, 75c
Men's silk hose, pair $1.00, $1.25, $1.50
Men's heather mixture hose, per pair 50 cents.

MEN'S AND BOYS' TIES

"Friend wife" is the best judge of ties suitable for "friend husband." Be sure not to forget one. Our ties are reasonably priced—50c to $1.50. Individual gift boxes—65c to $1.50.

MEN'S SHIRTS

Every man wears shirts all the time. Acceptable always.
Men's dress shirts, each .....$1.50 to $3.00
Men's negligee shirts, each .....$1.75 to $2.50
Men's wool shirts, each .....$3.00 to $5.00



FANCY TURKISH TOWELS, BATH SETS ETC.

Novelty colored borders and pleasing centers etaoin
Attractive Yuletide Gifts—Novelty Colored Borders and Pleasing Centers

Four-piece bath set $2.50
Three-piece bath set .....$1.50 and $2.00
Nifty three-piece wash cloth sets 65c
Bath towels, attractive selection, each 40c to $1.50
Martex wash cloths, each .....10c and 15c
Embroidered combing jackets, each $1.50
Bedspread sets, pink or blue figured, each.....$8.00
Bathrobe material, per yard .....$1.25 and $1.75

THE PRACTICAL GIFT

Nothing is more necessary than a handkerchief. We have hundreds of them for men women and children.

MISCELLANEOUS GIFTS

Shirred ribbon elastic for fancy garters..35c and 85c
Children's tea aprons, each .....75c and $1.00
Ladies' tea aprons, each $1.50
Fancy barrettes, each .....10c to 50c
Ladies' purses, each .....$1.00 to $6.00
Baby silk and wool caps, each $1.00
Baby bootes, pair 35c
Baby sacques, each 75c, $2.00, $2.25
Baby blankets, colors, each .....$1.35 to $5.00
Boys' knit caps, double wear, each.....65c and 90c
Ladies' and misses' golf gloves, pair 75c and $1.00
Knicker bloomers, pair .....65c, 90c, $1.15 and $1.35
Men's fancy armbands, pair .....15c to 35c
Men's suspenders, pair .....65c to 75c
Men's combination sets, each .....50c to $1.25
Men's dress gloves, pair $2.75

Women's gift handkerchiefs, 3 in a box, each 50c
Women's all linen handkerchiefs, at each 50c
Women's fancy colored handkerchiefs each .....15c to 60c
Children's handkerchiefs, each .....10c to 50c
Men's handkerchiefs each .....15c to 50c

MEN'S BELTS

Belts for me nand boys are always acceptable, Moderately priced at 50c and up.

YARD GOODS

Yardage of dainty silk or warm woolen material is a popular gift.
Many knids of lingerie, per yard .....50c to $1.00
All silk chiffon taffeta, yard $3.00
All satin satin militaire, yard $2.50
40-inch Canton crepes, yard $4.00
Faney crepe d-chines, yard $3.50
Midday flannels—red, grey, blue, rose, yard.....$1.50
All wool checks, yard $2.50
All wool 40-inch poplin, yard $2.50
Serges, yard .....$2.00 to $2.50
54-inch tricotnie, yard $4.00

EMMETT and BOLIOU

Christmas Editions

The Lewis County Register, published at Craigmont, carried 14 pages in its issue of last week, which shows that the merchants of that thriving little city believe that the proper way to get the Christmas business is by advertising and letting the people know what they have to sell.

The Ainsin Sentinel carried 10 pages, as did the Unontown Journal. The Genesee News carried 16 pages.

Fifty-Fifty

Biff! Bang! Bluey! Wow!!

Dumb Dan rides from a doctors office on the toe of a No. 10.

Friend walks up. "What's the matter?"

"When I consulted the Doc he said he would examine me for $10. —I told him to go ahead but if he found it I thought I ought to get five of it."

Printed and engraved visiting cards.

CHRISTMAS CANDIES

CANDIES AND NUTS FOR CHRISTMAS

Santa Claus mixed candy, pound 30c
Broken mixed, pound 30c
Plain mixed, pound 30c
Broken taffy, pound 30c
Cream mixed, pound 30c
Chocolate drops, pound 35c
Taffy straws, pound 60c
Sateen mixed, pound 40c
Treko mixed, pound 40c
Peanuts, pound 25c
Mammoth corn, pound 35c
Candy figs, pound 50c
English walnuts, pound 40c

About 150 Boxes of Fancy Candies

HOTEL GENESEE

Democratic Choice

Congressman Finis Garrett, of Tennessee, choice of Democratic members for speaker of the House of Representatives of the present Congress, was led by former speaker Gillett (Rep.) by only three votes on the first ballot.

Short Highway Sells Property

A land owner in a Southern state had a large property of many acres, a beautiful house, and a big peach orchard in bearing. Family circumstances made it necessary for him to sell his property, which was valued at about a hundred thousand dollars. Putting it in the hands of some able real estate men, the property owner received several calls from prospective purchasers. He met these purchasers at the railroad station, motored them six miles over a good state road, and half a mile over a very rough and bumpy road to his house.

None of them purchased.

Acting on the advice of one of the real estate men ,the owner spent five thousand dollars and made that last half mile as good as the state road. The property was sold at a price which included the cost of the road, plus a profit on the road, within one month of its completion.

What happens in one case will happen in another. A good road greatly increases the value of all adjacent realty, especially farm.

Interstate Bridge Paint

The interstate bridge between Lewiston and Clarkston is being painted almost a lurid hue and from the sample of the color tried out there will be no need of lights on the bridge to direct the traveler.

SAYS BILL BORAH WILL RUN FOR PRESIDENCY

Senator William E. Borah of Idaho will announce his canddancy for the presidential nomination on the progressive ticket within 90 days, says Frank E. Johnesse, state chairmtn of the progressive party asserting that in a conversation with the senator in Washington recently, Mr. Borah declared. "I cannot run on the progressive platform, railroad plank and all," referring to the government ownership of railroad planks of the party.

Johnesse said he told him that if things shaped up right he would accept the nomination. "I look for him to avow his intention to become a candidate as soon as congress is settled down and the organization fight has been settled. He declared at that time that he did not want to take his stand until after the president's message had been delivered and he had observed congress' reaction to it," the progressive leader added.

Mr. Johnesse denied the progressive party of Idaho favors drafting Henry Ford as its standard bearer. Referring to press dispatches regarding a telegram sent by Dow Dunning, member of the state central committee, urging Mr. Ford's candidacy, he said:

"Mr. Dunnng was not authorized to speak for the party, and I am satisfied he would be the first to disclaim any intention of so speaking in this matter.

"The fact of the situation is that the progressive party of Idaho will not indorse any man until something is known of what he stands for. As to Mr. Ford's principles, no man seems to know what they are at the present time, except possibly Mr. Ford."

Cuts Hand Badly

Isaac Isaksen is nursing a very sore left hand as the result of getting on too friendly terms with an axe while splitting kindling. While wielding the axe he was holding a stick with his left hand and very evidently miscalculated the exact position of the place he intended to strike and his left hand got in the way, badly cutting the index finger at the knuckle joint.

We have always advocated letting the women split the wood. Isaac's case is just another example of the awkwardness of men when it comes to handling an axe.

Read the Christmas ads.

Editorial

That which makes a man great is the power to give others power.

The Farmer Won't Be Fooled

Whatever may be public opinion in reference to a soldiers' bonus, whether approval spring from the welling of gratitude in the American heart, or disapproval come from calm examination of the country's finances, Senator Smoot, who opposes the bonus, is likely to stub his toe in his proposition to meet the emergency by establishing a sales tax. And he is not likely to fool the farmer by alluding to his proposed bill as an "expenditure tax."

The people are already taxed to death.

The farmer already is suffering severely from having to pay exhorbitant prices for the things he has to buy while obtaining very low prices for what he has to sell, and, unquestionably a sales tax will not lessen this burden. The Senator who admittedly is one of the country's foremost experts in taxation, tries to cross this bridge and assuage the farmer by providing that all expenditures below $6,000 shall be exempt from the proposed tax, but it is difficult to see how this will affect the farmer any more than any other class of our citizens.

The expenditures of the farmer as a fact are usually on a larger scale than the expenditures of men personally engaged in many other industries. Moreover, Senator Smoot should remember if there is one characteristic that stands out in the man with the hoe it is the spirit of fair play which always bespeaks opposition to class legislation. The farmer's cry is for a square deal. He does not ask anyone to discriminate in his favor. All he asks is that the government shall not discriminate against him. No matter how sincere the senator from Utah may be, the farmer will not silently agree to be placed in a position where he may be pointed to as accepting benefits under a system of class legislation which he has consistently and persistently protested against this sort of thing. He knows, too, the ills from which he suffers never can be soled by any sales tax, and that the proposed exemption is aimed only at obtaining his approval of a measure that will add a still greater burden to the American people.

If Senator Smoot wants to find a way to meet the soldiers' bonus problem, let him approach the task from a different angle. The farmer is opposed to a sales tax, call it what you will, and he won't be misled by the exemption clause.

Twenty-five dinasaur eggs laid 10,000,000 years ago have just reached the great Metropolitan Museum in New York. Here is cold storage with a vengeance.

Advertisements are trade announcements that effect almost every phase and hour of our lives. The folks who don't read them lose out to the fellow who does. He buys better and constantly adds to his store of knowledge, which is education.

Motorcycle policemen should wear uniforms. The sight of a uniform stops speeding. That is the aim of the law—not to trap reckless drivers and gather in fines to ease up local taxes.

It may interest newspaper readers to know that the book of reference most used in a newspaper office is the Bible. Milton comes second, with Shakespeare a close third. Once in a while we use the *Congressional Record*.

Read Every Ad. This Week

Friction Toys
Children Like These

Children always like such toys as these. Exact reproductions of locomotives, battleships, U. S. mail carts, fire engines, automobiles, and hook and ladder trucks.

All are made of strong metal and highly colored to please the children. A lot of pleasure in these for a small price!

49c to $2.49

You Should Complete Tomorrow's Job Today

It always is good policy never to put off until tomorrow what you can do today.

When this is accompanied by real advantages by immediate action, the policy then is even more worthy.

You should do your holiday shopping now. By doing so you have our complete stocks to select from and smaller crowds to contend with.

Early holiday shopping is advised!

Newspaper Association Member No. 2359

NEED HIGHWAY BUREAU MAINTAINED BY GOVERNMENT

An association of railroads maintain in the capital city of the nation what is known as the Bureau of Railway Economics, paying each their proportionate share towards it maintenance.

Its activities include the gathering of a large and valuable library, bearing upon all phases of railroad transportation, and the issuing of bulletins and statistical summaries, designed to present a national picture of railroads, their operation, and costs.

The railroads contributing to the support of this institution, through it enabled to understand what all railroads are doing, and get a complete vision of national railroad operation, find it a most valuable adjunct to their business.

Such an organization is needed in that other growing and vitally important transportation field, the highway world. For highways are rapidly becoming much more than mere connecting links between farm and town, city and country, over which the farmer drives his grain and pigs, and hauls his household supplies. With the increasing use of the automobile as a passenger carrier and the truck as a means of freight transportation, the highway is coming to take place in the nation, not as a secondary system, but as a primary or arterial transport system, which will, in a few short years, rival the railroads in tonnage, if not in speed.

A Bureau of Highway Traffic Economics will enable all road makers, road planners, and road organizations to function more perfectly, make more progress, save more money, and use roads more efficiently.

"But who woll do it?" The nation must do it. Its need is but one more argument for the establishment of a policy of national highway building, and national road using by which the national government will not only build, pay for, and forever maintain a system of national roads, but will through some organization laid down along similar lines to the Bureau of Railway Economics, make it possible for all highway users to employ these roads with the greatest economy and efficiency.

What Becomes of License Fees?

Forty-eight States collected $152,367,023 in 1922 as receipts from automobile license fees. The cost of collection, the cost of the plates themselves, and other expenses was less than four million dollars, so that a total of $148,750,000 was left as the net receipts to be spent on highways.

This sum is divided into appropriations for state highway departments, 16 millions; federal aid funds, 34 millions; maintainance of federal aid roads, 32 millions; construction of other than federal aid roads, 6½ millions; maintainance of other than federal aid roads, 21½ millions; and given as aid to counties, 25¾ millions.

New Hampshire collects the largest revenue per individual car or truck, getting an average of $25.73 each, while Arizona is easiest upon car owners from the license standpoint obtainnig but $5.69 each.

Mother's Christmas

After receiving her gifts, mother's Christmas will be devoted largely to washing an extra number of dishes.

A Correction

The News was in error last week regarding the gathering of farmers set for Saturday afternoon in the American Legion hall. It is to be a strictly Farmers' union meeting and is not intended for the general public as announced, the News man misunderstanding the party that handed in the item. You will please bear this in mind.

Produce Much Cream

Pullman farmers will receive about $100,000 for cream and milk produced in 1923, according to figures compiled by the Milk House and the Fairmont cream station in Pullman. Cream production in that region showed a 50 per cent increase over last year, with an average of 10 cents a pound higher.

Is Again On Streets

Ed. Vanouck's host of friends are more than glad to see him on the streets. He has had a pretty hard time of it but is on the high-way to recovery and he says the only trouble now is getting enough to eat.

Hardly That

Christmas is the morning of the year when one call is sufficient for any youngster.

Joins Navy

Word has been received in Genesee by relatives of Jesse McMahon in the form of a navy folder indicating that he was on his way to San Diego, California, to enter the navy. Just what branch he has entered is not known.

A "For Sale" ad. will sell your stuff.

The Genuine Spirit

The genuine holiday spirit consists not only in wishing a merry Christmas, but in making one.

Sisters Will Give Card Party

The Pythian Sisters announce that they will give a card party in their lodge rooms on Friday night, December 28.

Investing for the Family

Abraham Lincoln humorously said of a poor neighbor's assets, "He has a wife and two children, which I should think were worth thirty thousand dollars to any man."

The family is the greatest wealth of any member in it—the first concern of the individual or of society. It is a golden investment and needs the same protection and care that any investment requires.

One of the best safeguards is good reading; one of the things that puts it in jeopardy is bad reading. The Youth's Companion has always been in the matter of supplying good reading, what a United States bond is to the investor. Its principle is guaranteed, and its interest is paid with everp issue. Try this investment for your family.

The 52 issues of 1924 will be crowded with serial stories, short stories, editorials, poetry, facts and fun. Subscribe now and receive:

1. The Youth's Companion—52 issues in 1924.
2. All the remaining issues of 1923.
3. The Companion Home Calendar for 1924. All for $2.50.
4. Or include McCall's Magazine, the monthly authority on fashions. Both publications, only $3.00.

Girls aim at marriage and afterward some of them aim at husbands.

SEMI-LOCAL NEWS CLIPPED FROM EXCHANGES

Skating at Colton

Ice has formed on Union creek of sufficient thickness to make skating safe, and the young people have been taking advantages of the chance for this sport every evening.—Colton News-Letter.

Thanksgiving Strawberries

On Thanksgiving day in the Convent Garden, Sister M. Carolina, O. S. B., picked a dish of nice ripe strawberries from the bed of plants that has been bearing since last spring. The berreis were a little soft from the wet weather, but were good enough to eat. The next day would have been too late, as they froze during the night.—Colton News-Letter.

Steamer Lewiston Launched

Saturday afternoon the steamer Lewiston was launched at Portland. The boat will soon be finished and will then be brought to Lewiston to run in the grain trade on Snake river. The steamer is equipped with splendid conveniences and apparatus. Carrying capacity is estimated at 300 tons; it is 160 feet long, 35 foot beam and 6 feet in depth. It was designed particularly for operation in shallow water.—Lewiston Banner.

Discontinue Nez Perce Agent

The services of a county agent in Nez Perce county will be discontinued January 1, the board of the county commissioners voting unanimously on this action Monday. A proposal was submitted to the board to have the present contract extended a year but was turned down. The present contract expires early in March. W. W. Skuse, present county agent, has presented his resignation and will retire from the work January 1. He will go into business in Lewiston.—Kendrick Gazette.

Build Connecting Link

Idaho's department of public works has filed with the United States bureau of public roads a project statement covering a portion of the Lapwai-Spaulding highway, it was announced by W. J. Hall, commissioner of public works.

When the statement is approved by the federal bureau the state will advertise for bids for the construction of the highway.

When this short stretch of new highway is completed there will be a continuous graveled road from Cottonwood to Lewiston and travelers from the prairie wil lbe able to go into Lewiston without using what is known as the Webb road, badly cut up by the heavy automobile traffic.—Cottonwood Chronicle.

Trees in Bloom

Wallace Jarret, who lives on Salmon river near Rice creek came out from his ranch Monday after a load of provisions. He brought out with him a small twig from an apple tree that had blossoms on it, also a small twig from a thorn bush that had blossoms on it. It is hard to believe such things no doubt but if seeing is believing we certainly are convinced. Mr. Jarret said that he had never seen anything like it since residing on the river, dating back many years.—Cottonwood Chronicle.

Bridge Be Bright Hue

The interstate bridge will be painted a bright red hue, bordering on an orange, when the present crew of painters and bridge cleaners from the Washington state highway department get through with it. Samples of the color have been put on a steel beam at the Lewiston end of the bridge. The past two weeks has been put in by the crew scraping the rust and old paint off the girders in order that the new paint may be effective as a preservative.

It is expected that the painting of the bridge will be completed within a month.—Clarkston Republic.

Fine Weather

Chrismas is almost here, and the Asotin-Snake river valley has had just two blustery days so far this winter, and they were Monday and Tuesday. There have been only a few mornings up to this time that ice has frozen, which is a great contrast to some parts of the country, where blizzards and zero weather have been had as long as four and five weeks ago. But the scientists have been saying, since the late Japan earthquake, that the warm Japan current has been shifted further north and this way, therefore, be it that Asotin will never again know what it is to have cold weather, and that we can pick strawberries all winter through. —Asotin Sentinel.

Gifts With Advice

Ed Purdy was writing to his son in college:

"—and you kin remember, Ebner, that college bred doesn't mean a four-year loaf. With vast and other regards, Pa."

EXPECT GREAT THINGS.
16 MARRIES 50—NOT BAD.
WAKE UP, HENRY FORD.
DEAD TOGETHER—AND HAPPY.
WHICH IS GREATEST?

This is a growing country, and business grows much faster than the population. In 1900 the population was 76,000,000. It has grown to 110,000,000 in twenty-three years, about 45 per cent; not bad.

But consider steel. In 1900 this country produced 10,000,000 tons in a year. Now it produces 40,000,000 tons, an increase of 300 per cent.

If you sell this country "short you'll lose. And don't listen to any talk about "a bad presidential year." Prepare for good times, in the words of the distinguished optimist, Mr. Uppercut, "expect great things."

Wake up, Henry Ford, and get to work on cheap safe flying machines. They are selling them in Germany, all metal, safe, doing sixty miles an hour, less than a gallon of gas for sixty miles—$1,190.

Farmers, salesmen buy the machines by thousands.

Ford could sell them for $500. America needs them. Texas especially. Where is the young Ford to do for America in the air what Ford has done on earth.

The "three estates" of olden time, a trinity ruling all earth's affairs were Royalty, Nobility, Clergy.

Journalism was recognized, in a condescending way, as "the fourth-estate."

John Galsworthy, writing for the London Times about fair play in international thought, says that the three estates now ruling mankind are Science, Finance and Press.

Of the three, science is incomparably greatest. Newspapers can overrule all the power of finance if the newspapers happen to be in the right. Newspapers and finance combined can do nothing against science, except postpone its benefits.

There are nearly seven thousand million dollars in our savings banks. Deposots have increased more than five hundred millions in the last year. That sounds prosperous. Savings bank depositors alone, if they drew out their savings all at once, would call for nearly all the money in the country—only eight billions is the total.

Yes, we have no more Christmas cards this year.

Punchettes

THE CONSPIRACY

There was formed the greatest conspiracy against the resurrection of Jesus Christ the world has ever known. They bribed the people who were at the tomb and manufactured a ridiculous lie in order that they might create doubt concerning the resurrection of Jesus. The resurrection of Jesus Christ was a fact, and therefore the conspirators had to explain the fact away, or in some manner destroy belief in its supernaturalness. Therefore, they held a conference and outlined a program of deception which has been carried down through the ages, and the rationalistic, unregenerated forces of today are still propagating the lie, and are members of that conspiracy.

The original program involved bribery, the use of power and money. They rehearsed their story, memorized it and instructed the people how to repeat it. That same policy is being followed today.

The original program of bribery, conspiracy, lying and attack upon the tomb of Jesus Christ is being carried on today, not only against the tomb, but against the Church and her fundamental doctrines. The purpose, of course, is to deceive the very elect. The agencies of the Church are being used, educational institutions are being invaded, the power of money is being employed, and the great evangelical, fundamental doctrines are being attacked by members of the most damnable conspiracy the world ever saw. The battle is being waged around the empty tomb.

There is no historical fact more perfectly established than the resurrection of Jesus Christ, and yet infamous, perjuring, rationalistic, unregenerate preachers and teachers are denying the supernatural, bodily resurrection of Jesus Christ. They are members of this infamous conspiracy.

Real Christians should awake to the fact, be aroused to the crime and expose the conspirators and their conspiracy.

So Particular

"And did you visit Italy and eat some of those wonderful doughnuts fried on the sidewalk of Florence?"

"No—I wasn't that hungry."

CHRISTMAS CHEER

WE WISH to extend to all a cordial invitation to visit our market, where you will find a good selection of meats of all kinds. Also pickles of various kinds. And everything that goes to make up a first-class market establishment.

Summit School News

Last Friday evening the patrons of Summit School enjoyed the first of a series of programs planned for the winter.

The children of the school, although few in number, gave a pleasing entertainment. The rest of the evening was given over to lively games enjoyed by old and young.

At midnight the ladies served a refreshing lunch which sent all home happy and looking forward to the coming programs.

Pine Grove News

Fred Miller and family made a trip to Moscow Saturday.

The Hayden family are all able to go about again after a month of quarantine. Nellie and Lester have returned to their respective schools.

Mr. and Mrs. Brazier drove to Lewiston on Tuesday where Mrs. Brazier intended to have an X-ray taken of her teeth which have been causing her a lot of misery.

Not nearly as many boys and girls go wrong as the scandal mongers like to think.

Good Health

If you would enjoy good health, keep your bowels regular. No one can reasonably hope to feel well, when constipated. When needed, take Chamberlain's Tablets. They are mild and gentle. Sold at Clark's Drug Store.

HEMSTITCHING AND ARTCRAFT SHOP

WHAT HAPPENED HERE TWENTY YEARS AGO

Jens Lende and Miss Olive Hove, well known young people living north of town, were married the latter part of last week in Spokane. They returned to Genesee Sunday and were at once driven out to the Anton Borgen farm where they have taken up residence.

A trainload of baled hay was sent from this esction Sunday evening to the coast. The greater part of the same was from the Porter brothers lot which is now about all shipped out. George Mochel informs us that the total shipment of the Porter brothers will be about 35 cars.

John Kimbel has advised us that he has disposed of all the brick he has on hand to Peter Frazer of Lewiston. At the present time he could dispose of three of four hundred thousand to the same party. In the spring Mr. Kimbel says he will put in a steam plant for the making of brick and expects to be able then to fill all orders. During the past season he has made and disposed of a large number of brick for home consumption but anticipates greater sales the coming year, in fact he already has an order which means the erection of a fine new two-story building.

Better order your engraved visiting cards early to insure your getting them in time for Christmas.

Does It Pay to be Good?

For the benefit of my friends, as well as my enemies, I will state the facts as to my case, which has caused so much notoriety, publicity and expense to me.

The trouble was origingated here in Genesee by some "good" citizen and his coad friend by reporting that I was making booze, wines, beer and other spirits, also sauerkraut, in the basement at my residence, and not being investigated before action was taken. Whoever sent in this report and asked the authorities not to use his name knew he was telling one of the most damnable lies ever uttered by a beast called man. It was done for spite and to hurt my name and business. I cannot see why there is not justice for all, somewhere, and I am going to find out if it is possible, and make someone else sweat blood, as I have done. No one is safe, if one can be prosecuted just from a letter or some personal report, if the party does not have to divulge his name.

It has been stated that the Volstead law has come to stay—also has the moonshiner and the bootlegger—if the prosecution of a case is more damaging to the public than the act itself it will have a tendency to cause people to doubt the justice of our laws and make dries damp and the wets so darn wet that you could not penetrate their skins with a acetylene torch.

I will admit I was in my basement at night until after midnight, or later for at least 50 nights when I was making concrete blocks for my garage and chicken house. All this informer had to do was to was to stand in the middle of the street and see what I was doing—and no doubt did. But that was not his object. It was merely to put me out of business and humiliate me.

There are other things I want the public to know when I positively get the truth.

25-1 Grant Clark

Home Talent Play Success

The home talent play given in the opera house Wednesday night for the benefit of the American Legion was well attended and highly appreciated as was evidenced by the hearty applause given. All the players did themselves proud.

The Mellow Moon orchestra furnished music and Dereal Springer sang a solo which was well received.

Stockholders' Meeting

Notice is hereby given that the annual meeting of the stockholders of the Genesee Exchange Bank of Genesee, Idaho, will be held at the office of the bank on the 8th day of January, 1924, at 2 p. m. for the purpose of electing officers and directors and the transaction of any other business that may come before this meeting.

The Tires That Are Guaranteed to be Best

A C-T-C FREE If You Can Find Another Tire That Will Outwear It

C-T-C TIRES have so completely proved their superiority over ordinary tires that we have been permitted to offer the following remarkable factory Guaranty on C-T-C tires bought from authorized C-T-C dealers before January 15th.

Place a new C-T-C tire on any wheel of your car opposite any other new tire of the same size you care to choose. Then drive the two continuously.

If the C-T-C tire fails to outwear the other tire, you will be given a new tire FREE.

This offer is the most striking evidence of confidence and good faith ever given the public by a tire manufacturer, and the PROOF of C-T-C quality is put squarely up to YOU.

C-T-C tires won't skid—and can be driven at low inflation to "Conserve the Car." They are the strongest, toughest, longest enduring tires built.

BUY YOUR TIRES FOR SPRING NOW

In spite of their GUARANTEED SUPERIORITY C-T-C's cost NO MORE than ordinary tires.

MEYER & SON

Editorial

Add to the strength of men, not to the weakness of men.

Save The Silly American Heiresses

The revolting confession of that unspeakable cad, Count Boni de Castellane, who in a published article tells under his own name how he plotted to marry Anna Gould and her millions, should prove not only a warning to self-respecting American girls—it should provide a guide post for American legislators who have in their power the ability to put an end once and for all time to the deluding of the countrywomen and the exploitation of American fortunes.

There are few people who know the history of the Gould accumulations, and who are familiar with the escapades that have marked the lives of some of the earlier generations who have not regarded the Gould family with a certain measure of regret. They recall how Jay Gould, founder of the fortune, driven to cover by an angry mob, barely escaped the rope and the lamppost by barricading himself in the old Grand Opera House on Eighth Avenue, New York. It has remained, however, for the blood of Europe allied with the Goulds—the husband of the diminutive Anna to descend to the depths of degradation and for a few paltry dollars to write for the public prints the story of his shame and of his wife's unfortunate stupidity and vanity.

Count Boni, whose father frequented the cheap dram shops and tawdry gaming houses of Paris in the hope of picking up a free drink or an easy franc or two while his son plotted the control of the great American fortune, admits his profligacy, the while sneering with a cheap snobbishness at American barbaric taste. He writes himself the most distasteful of American fortune hunters, but he is by no means unique. The others are simply shrewd enough to keep their inner feelings to themselves. Surely the time has arrived to put an end to the operations of these tawdry profligates.

Let Congress and every state pass a law escheating the estates of American girls who sacrifice themselves on the altar of a foreign "nobility"—God save the word! There is a general impression that the law of inheritance is one of inalienable right. This is not the fact. The law of inheritance is based on statutory enactment. Once let Congress or a state legislature pass a law escheating the estates of American girls who wed the scions of an alien nobility, and we will have an end to these disgraceful intrigues. We have laws for the preservation of everything from hogs to angle worms. We have statutes aimed at safeguarding the weak and incompetent against themselves. For Heaven's sake let us have a law that will protect American heiresses from their own folly. This done, the trash of Europe will not long be knocking at the door.

Show me the man with a soul so dead who never to himself hath said the home town paper is a pretty good friend after all.

Carlyle wrote that labor, wide as earth has its summit in heaven. If he were writing today he would change labor for the cost of living.

If any of the readers of this newspaper are puzzled what to do with their time let them count the number of letters in the news columns and see the amount of work they buy for a penny or two—all other labor and material eliminated.

Oh, That's Different

Fearful One: "Well, believe me, I never want to get down and out."

Literal One: "Don't be too sure of that. Suppose you were up in an airplane?"

The Parrot Brand

Salesman: "Yes, siree, our line speaks for itself."

Bored Customer: "All right. Suppose that you keep still for a few minutes and give it a chance."

New "Lincoln, Jr."

Gus Fickens is the proud possessor of a new "Lincoln, Jr.," coupe and is just about as proud as a turkey gobbler after Thanksgiving.

At the holiday season we wish to express to you our appreciation of past favors and wish you a Happy Christmas and a Prosperous New Year.

SAMPSON'S TAILOR SHOP

PERSONAL MENTION

Mrs. Chas. Ingle spent Saturday and Sunday in Pullman.

Joe. Green left Thursday for Spokane for a visit with relatives.

Mrs. Henry Bielenberg left Tuesday for a visit with relatives in Colton.

Mr. and Mrs. Wm. Smolt left Saturday morning for Spokane for a few days trip on business.

Miss Anna Winterfelt left Friday for her home in Clarkston after a visit here with friends.

Mrs. W. M. Herman spent Tuesday with her parents, Mr. and Mrs. John Dunbar in Moscow.

Walter Trautman of New Norway, Canada arrived Monday for a visit with relatives over the holidays.

Mr. and Mrs. W. E. Kreitz of Pullman, accompanied by Maxine Ehlen, spent Sunday at the W. E. Ehlen home.

Mr. and Mrs. Raymond Edwards arrived Thursday from Coronation, Alberta, Canada, where they have been for the past few months for a visit with relatives here. They are visiting at the home of Mr. Edwards' mother, Mrs. H. M. Warren.

Community Christmas Tree

A special meeting of the American Legion auxiliary was held Tuesday evening and arrangements for a community Christmas tree were made. Several of the members announced that they had a long talk with Santa and that he said he would visit Genesee next Sunday beyond doubt. Santa is not coming to see just a few of the town youngsters, but he wants all the children that can possibly come to be there. So if you live in the country, coax your daddies to hitch up and bring you to the American Legion hall on Sunday afternoon at 2:30 and you will find Santa waiting there for you.

There will be a suitable program given so that it will be interesting for the mothers and fathers as well as the children and it is hoped that they will all come.

All children quarantined or at home on account of sickness will be remembered if they will just send in or phone their names to Mrs. Feeney.

Anyone wishing to give apples or any doanations will bring such to Herman's hardware Saturday.

No Rural Delivery on Christmas

The Postmaster General has approved an amendment of the Postal Laws and regulations, as a result of which rural carriers will be granted Christmas Day as a holiday.

He did this in following out of his generous policy of consideration for the welfare and happiness of the postal employees. We confidently expect that carriers will put forth the fullest effort to effect the delivery of every piece of mail, parcels included, reaching their offices before Christmas so that there may be no disappointment and no just ground for complaint on the part of the patrons. Failure on the part of any individual carrier to do this will subject him to severe criticism and be a cause of deep regret to the department.

Postmasters and carriers are requested to notify patrons of rural delivery as generally as possible, without incurring expense to the department, that there may be no delivery on rural routs on Christmas Day so that they may arrange for the early mailing of Christmas packages or other matter.

A Painful Experiment

Having his Christmas joke, Harry Simpkins changed the road sign just a little, to more perfectly express his holiday sentiment. The reading had been, "Go Slow. School Ahead," but when Harry left it the wording ran, "Go Slow To School Ahead." But afterwards the teacher taught Harry that this was too much.

Always Somebody There

When a man tries to sneak a few gifts into the house it seems that the family is always congregated around the door.

Chamberlain's Cough Remedy the Mother's Favorite

The sothing and healing properties of Chamberlain's Cough Remedy, its pleasant taste and prompt and effectual cures have made it a favorite with people everywhere. It is especially prized by mothers of young children for colds, croup and whooping cough, as it always affords quick relief and is free from opium and other harmful drugs. On sale at Clark's Drug Store.

Death of Judge Scales

Judge Wallace N. Scales, 57, judge of the 10th judicial district since it was created in 1917, died Sunday night at Portland. Although Judge Scales went to Portland a month ago for treatment in a sanitarium for leakage of the heart, his death comes as a shock as he kept in close touch with his judicial duties by correspondence up to within two days before his death.

While Judge Scales has been in very poor health for some time, his condition was never considered serious. Judge John M. Flynn of the northern district came here to hold court in Judge Scales' absence, but all his friends confidently expected Judge Scales to return soon.

Judge Scales was born in North Carolina and was a member of a prominent family of that state. He came to Idaho about 30 years ago, opening a law office in Grangeville. He served as prosecuting attorney for Idaho county and was a prominent democrat.

When the 10th judicial district was created in 1917 Judge Scales was appointed to the bench by Governor Moses Alexander, Judge Scales was twice reelected, defeating B. F. Tweedy in 1918 and Miles S. Johnson in 1922.

Judge Scales is survived by his widow and a brother, Rear Admiral Scales, who was formerly superintendent of the naval academy at Annapolis and a leader of the United States navy.

Worth Remembering

"Reggie," said old Goldbags as he handed over a $20 banknote to his son, but still kept hold of one corner of it as he delivered his homily, "Reggie, I don't want to stint you on spending money; whenever you go out with the boys—and girls—I want you to pay your share of the expenses, but—"

The old man stopped, then continued:

"But Reggie, every once in a while I want you to remember that it takes £400 165 days, working, day and night and Sundays, at 5 per cent to earn £20."

Too Thrifty to Wed

She was a comely widow and, moreover, she was Scotch. She mourned MacIntosh, her late husband, for 18 months, and then from a flock of suitors chose honest, homely MacIntyre for her second.

"I'm not good enough for ye, dear," he whispered. "What for de ye choose me oot o' sae mony?"

"Ah, well, ye se, your name's MacIntyre."

"Yes, but—"

"An ye ken," finished the widow, "all my linen is marked 'McI;' that's why, Donald."

Read the Christmas ads.

PUBLIC SCHOOL NOTES OF MUCH INTEREST

By Estel Rogers

From reports given out by the papers the Culdesac public school has been presented a complete new radio outfit. This outfit was given to the school by the business men of Culdesac and is serving as a medium of education as well as entertainment.

As the school plays such a large part in the life of any community, a radio outfit at the school is very beneficial, for at almost anytime programs that are both entertaining and instructive can be heard.

On Wednesday of last week Eugene Tupker resigned his position as "yell king," for the reason that he is on the basket ball team and cannot give his attention to leading the yells. The high school elected Wade Mayer to take Eugene's place.

Last Friday night it was again demonstrated that lack of practice and experience are very serious handicaps and often cause defeat. The basket ball game between our team and Moscow's high school team resulted in a score of 9 to 26 in favor of Moscow. Lack of experience was the principal trouble but at the same time the team has improved a great deal since they played the first game.

After the game there was a dance, followed by a regular social good time which, from all reports, was greatly enjoyed.

Most of the students who were on the sick list some time ago are back at their places again, for the grades as well as the high school are coming up to their recorded attendance.

The recent drive in the school to secure funds for the betterment of the inmates of the Lewiston orphans' home resulted in a contribution of about thirteen dollars.

The instructors of the school have received a large number of anti-tuberculosis Christmas seals which the students are buying as well as selling. The proceeds from these seals are used to take care of tubercular patients.

At the present time there seems to be an unusual amount of anxiety, cheerfulness, and happiness expressed by some of the students. This is especially noticeable in the grades. Of course you will immediately guess the cause for this situation for at the present time the central theme which is second to none, is Christmas.

The students of the grades as well as the high school have exchanged names and are going to give a small present to the person whose name they received. A high school student cannot pay over 25 cents for a present. This is done to insure equality and is bound to bring some real fun.

The grades are not putting on any regular program but will celebrate Friday afternoon in having a general good time, with plenty of fun and possibly a treat.

In the high school the literary division, under the direction of Miss Lela Patch, is going to put on a real Christmas program. The students have been working on their different parts for some time and as a result a very good program is expected.

The program is as follows:

Humorous Reading—Wilma Casebolt.

Play—"Just Plain Jones."

Dramatic reading—Katherine McMahon.

Piano Solo—Oma Castle.

Tattler—Esther Hickman.

Double quartette Alfreida Hampton, Ida Evans, Esther Danielson, Geneva Rogers, Sylvia Johnson, Olive Mullaley, Grace Jain, and Florence Rader.

The program is this (Friday) afternoon, December 21, and will start at 1:25 o'clock, sharp. You are invited to attend the entertainment and share the enjoyment with the students.

There will be two weeks of Christmas vacation extending from December 21, to January 7.

Co-operation

Farmer Boy (alighting from old gray mare): "One of them city boarders has just hung himself down there in the woods.'

Father: "He has? Did you cut him down?"

Farmer Boy: "I guess not. He wasn't dead yet."

Right Back at Him

Scientific Young City Man: "Yes, sire-e! The time will come when you will be able to carry all the fertilizer necessary for an acre of ground in one vest pocket."

Old Farmer: "Yep, and the crop in the other."

Kiddies, come and tell Santa what you want for Christmas, Sunday at the American Legion hall.

FOR SALE—Some Guinea hens, 50 cents apiece. Joe Greiser. 24-2x

Remember children, Santa wants to see you Sunday at 2:30.

RANCH AT CENTER OF U. S. TO BE CUT UP AND SOLD

Land in Nebraska Is Known as "1733" as It Is That Distance From Either Side.

The center of the United States is going to be cut up into small units and sold.

The center of the country is the "1733 ranch" just west of Kearney, Neb. It is called "1733 ranch" because it is just 1,733 miles from New York city and just 1,733 miles from San Francisco. The farmhouse on the ranch is the east-and-west center of the United States. All coast-to-coast automobile tourists on the Lincoln highway pass right in front of the deer. And transcontinental passengers on the Union Pacific railroad pass alongside the ranch for a mile or two.

There are 1,400 acres of fine land in the ranch and the entire tract is to be cut into 40-acre farms and sold. Nebraska is beginning to see, and to believe that a farmer can make just about as much money on a small body of land where he can do all the work himself as he can make on a big farm where he has to hire most of the work done.

At present the "1733" belongs to a hotel syndicate and is being used to produce butter, eggs and poultry for the different hotel units. But the chain is going out of business and it has been decided to subdivide the big ranch and sell it off in small tracts.

FIRST WOMAN TO CLIMB THE GRAND TETON PEAK

Miss Eleanor Davis, of Colorado Springs, Colo., who climbed Grand Teton, 13,747 feet high, the most difficult peak in the United States. The top of Grand Teton has only been reached four times in history and Miss Davis is the first woman to make the climb. She made the climb as a representative of the Colorado Mountain club and was accompanied by Prof. Albert Ellingwood, of Lake Forest college, Lake Forest, Ill., a famous mountain climber.

WARSHIPS VISIT SWEDEN

Nation Has Been Host to Numerous Navies Recently.

Sweden has been host to more naval visitors from foreign countries during six weeks this summer than ever before within so short a period, and the people look on these courteous attentions as a sign of growing interest in the country's trade and political position in the north of Europe.

Ten countries in all have sent war vessels to Sweden, and ten different ports, including Stockholm, Gothenburg and Malmo, have been visited.

The United States cruiser Pittsburgh recently left Stockholm, where its officers participated in the memorial services for the late President Harding. The United States battleship North Dakota also was in Swedish waters this summer.

TURKISH GIRLS HIT VAMPS

Declare Russian Women Are Too Good Looking.

There are too many attractive Russian refugees on the Turkish marriage market to suit local fair ones, it appears. For a petition has been solemnly signed, sealed and sent to the government of the grand national assembly at Angora demanding the expulsion of all 'foreign women under forty years of age.

The petitioners alleged that since the arrival of the refugees a Turkish girl cannot win or buy a husband with any hope of keeping him. The Russians are all too good looking, or have too many jewels, or possess the charm of novelty. Consequently, the Turkish girls want their government to cut off the importation and deport the Volga "vamps."

Good Things to Eat and Wear

Gift of the Desert

COPYRIGHT A.C.McCLURG & CO.

by Randall Parrish

SYNOPSIS

CHAPTER I.—On the isolated Meager ranch, on the southern border, Deborah Meredith, trained nurse, is in attendance on Mrs. Meager, whose husband has recently been killed, victim of an accident. Immediately after the death, Bob Meager, Mrs. Meager's stepson, arrives and takes possession. He insults Deborah and she resolves to leave, but there seems no possibility of her getting away, alone.

CHAPTER II.—Meager gloats over Deborah's plight, telling her he has sent for a justice of the peace, who will marry them tomorrow. Horrified, the girl secures a revolver.

CHAPTER III.—The justice, Cornelius Garrity, scoundrel and boon friend of Meager, arrives with a party, among them the "Frisco Kid," notorious desperado. The girl locks herself up.

CHAPTER IV.—Forced by Bob, Mrs. Meager decoys Deborah from the room and despite her protests the justice performs the marriage ceremony. Immediately afterward, she escapes and reaches her room.

CHAPTER V.—Meager seeks the girl, but she stuns him with the revolver and rushes to the stables, hoping to secure a horse and escape, anywhere away from Meager, if she must die in the desert. In the stables she meets the "Frisco Kid," whose appearance her with confidence and she explains the situation, he not having been present at the wedding.

CHAPTER VI.—The "Kid" tells her his name is Dan Kelleen, that he is no friend of Meager, and, securing two horses, the pair ride into the desert.

CHAPTER VII.—Alone with Kelleen, the girl becomes somewhat apprehensive, but he tells her of his service in France, where Deborah had been a nurse, and she puts full faith in him.

CHAPTER VIII.—Kelleen explains that the "Frisco Kid" is a manufactured character, that he is really a captain in the regular army, detailed to run down a gang of thieves and smugglers of narcotics. She knows them Meager and Garrity.

CHAPTER IX.—While the girl is sleeping, exhausted, Kelleen disappears. Later, from a hiding place, Deborah hears him talking with Juan Sanchez, associate of Meager, and from the conversation she believes Kelleen to be really a member of the gang. Her apprehensions returned, she seeks to escape, but is seized by a concealed man.

CHAPTER X.—Deborah's captor carries her to what is apparently a cave. Feeling he has her securely a prisoner, the man relaxes his watchfulness, and she seeks a way of escape. Exploring the cave she finds the body of a dead man, who had been shot in the back. From him she takes a revolver. Finding a passage, which apparently leads to the open air, the girl is almost free when her guard returns and fires at her. She returns the shot and after a time succeeds in finding her way out of the cave.

The unspeakable, treacherous horror of the act appalled Deborah. There must be some reason behind it all. It was too cold, cruel, deliberative not to have definite cause. No speculation now could solve the mystery, but the murderer still lived; he was back yonder in the darkness she had just left. He would no more spare her than he had shown mercy to his other victim. If he still slept she must take advantage of the moment for escape—the one chance up that long passage toward the gleam of light at the top. She stepped across the dead body, grasping her skirts tightly in one hand; then hesitated for an instant, obsessed by a new thought. Perhaps that paper might explain all, might prove the very key to all this mystery. She bent, and wrested it from out the stiffened fingers, hastily endeavoring to learn what it contained. It was a thick, tough sheet, the folds showing yellow and dirty as though it had been carried a long while, and there was writing inside, in fine penmanship, but so indistinct her eyes were unable to decipher a single word in that dim light. She thrust it into the bosom of her blouse, her eyes anxiously searching the only possible way out.

It scarcely promised even that, as revealed by the single ray barely illuminating the passage. Apparently an irregular sized hole, worn between layers of solid rock by the action of water, it led upward at a sharp angle, and, while wide enough at the lower extremity to permit the entrance of a full-grown man, seemed to contract at the upper opening so as to make it very doubtful if an ordinary body could squeeze through into the open air beyond. Yet Deborah felt that she had no choice but to accept this single chance of deliverance. She could not remain there with the dead man, nor retrace her steps backward to where the murderer remained asleep on guard. Her belt was still about her waist, but its holster was empty. Before beginning to climb, she drew the dead man's gun from its scabbard, and stuck it into her own. As she did so the light from above glimmered on a pearl-studded handle, and a barrel of blue steel.

At first the climbing was not difficult, the slope gradual with the walls sufficiently wide apart to afford comparatively easy passage. Drawing herself forward by her hands, with feet groping in the darkness below for any projection against which they could rest, she won her way upward, almost inch by inch, soon creeping over a narrow shelf, able, finally, to sit upright within a shallow niche at one side, where the stone had been hollowed out for a few inches. She was breathless from the hard climb, her heart beating rapidly. She could see nothing, hear nothing, yet her mind pictured again the dead face of that boy staring up at her—she could not go back to that! Nor to that other living horror beyond! She must go on; better to die there, caught helplessly in that rocky hole, than ever to fall again into the power of that beast. She listened intently, hearing nothing; then lifted her hands to feel upward. She lifted one foot, seeking a fragment of rock to rest upon. Then a flare of red lit the inferno, a dull, muffled report echoed along the imprisoning walls, and a bullet brushed her hair, flattening itself on the rock beyond.

She shrank back into the little niche, scarcely certain of her escape, and rested there on her knees, not venturing to move. The shot had come from below; of that there could be no doubt, but there was no other report, no movement to reveal any presence. Deborah had no question as to who had fired—it must be the man she had left from in the outer cave. He must have seen her outlined against that round opening above. It was a miracle she had escaped; but to have seen her the fellow must have stood directly beneath, beside the body of the dead man. Perhaps he would be there still, peering up to learn the result of his shot, wondering where she had disappeared so quickly. She was safe enough where she was, behind that barrier of rock, and she drew the revolver out of its holster,

She Listened Eagerly for Any Sound From Below.

and listened eagerly for any sound of guidance from below. If he made any effort to climb up, she meant to shoot to kill.

She dare not venture to advance her face around the rock edge, for fear the movement might bring her into view against that vista of light. The fellow was evidently waiting and watching just as she was, disconcerted by her strange disappearance. No doubt he half believed his bullet had found its mark, that she had fallen, either wounded or dead, into some crevice, but was afraid as yet to venture up that narrow tunnel. She could not remain there indefinitely waiting for him to gain courage to attempt the ascent. Her hand, with the weapon in it, reached noiselessly out beyond the edge of the rock, and pointed downward. A stone rattled below and her finger pulled the trigger.

The muffled report echoed back from the rocks, the red flash of the discharge faded into darkness, and the pungent smoke blew back into her face; but there was nothing else. No cry, no crunch of a falling body, no thud of lead. She listened helplessly, half crazed to empty every load from her poised weapon into that silence below. What could it all mean? What had happened behind that black veil? An hour passed, an hour of dreadful watching, of tense expectation. It seemed to her the blue light streaming through that opening was already losing its power, as though the sun was going down. If she would escape she must go while she could yet see the way. Desperate as the chance was, it must be accepted. She did not look down, or permit herself to think of the possible danger lurking below, with lips closely pressed together, and heart beating rapidly, she drew herself up, inch by inch, bracing her body against the side walls as though in a chimney, making use of every projection as a support to either hand or foot, and thus steadily approaching the opening overhead. Her courage had returned; there had been no attack from beneath, no evidence of life.

Deborah reached the end of her climb breathless, her limbs aching from exertion, her heart sinking with dismay. It never could be accomplished, the passage of her body through that narrow opening to the world without. How sweet the fresh air felt; how beautiful the blue arch of sky, yet it was hopeless of attainment. The very nakedness of the place; then put on Mexicans. That made him sore. When he told me that I came pretty near knowing what was up."

"You did, hey! Wanted a hand in the game?"

"Why shouldn't I, Bob? I held you up when you was flat, didn't I? There is no reason why you should forget me now. D—n you! I mean to see that you don't. That's what I'm here for. Now listen—I'm on to what is going to be pulled off tonight—this Casebeer business. You sent Sanchez and his helper over here to take care of the Casebeer outfit—that's right, isn't it?"

Meager growled something indistinctly, his eyes angrily watchful, but Kelleen remained on guard.

"There is no use playing the hog, Bob," the latter went on coolly. "I've got the cards, and I'm no girl you can play the brute with, like you did last night. What time does this outfit come in?"

"Between now and midnight."

"What are they running?"

"War stuff, of course."

"And you have the way cleared—Garrity brought you that information, no doubt. Has he gone back to Nogales?"

"Yes; this morning."

"I see; everything has been attended to. Somebody with brains is engineering this. You and Sanchez do the rough work while the judge clears the trail. All right; I've got it mapped out now. You are really not supposed to be in this deal at all. The Mex takes the stuff across the line, gets your share of the boodle, and brings it back. All you need do is hide out here and wait. Pretty soft, I'd say."

"Is it? Well, what are you going to do?"

"Play square, Bob. I'm d—d if you deserve it, but I'll only take my share. I'll go along with the outfit, though, to make sure I get it. Then we'll split right here. Keep that hand away. You have been edging in toward that gun for the last five minutes. I've got you covered, you sneaking cur. I don't take any chances with your kind. Now are you ready to come clean?"

There was no immediate answer, and Kelleen settled back into his saddle, but still faced the other, who had risen to his feet.

"I came up here half inclined to kill you," the younger man said soberly, "but now I am going to give you a showdown if you play fair. I know you would double-cross anybody if you had a chance. I don't mean to give you any. You stay here until I come back; if you fail, I'll run you down, no matter where you go. And you know what that means?"

Meager's fingers clinched and unclinched, his tongue wetting his dry lips.

"You needn't make any promise, Bob. Your word means nothing to me. You stay here until I come back, if you don't, you are as good as dead—that's all. That's my pledge; and you know whether it is good or not. Anything more you want to say?"

Instantly recognized, never to be forgotten—the voice of Bob Meager.

He was not dead, then; the blow struck had no more than stunned the man, and—and she was his wife. Deborah's fingers dug at the sand in sudden agony, as the hideous thought came home anew to her mind. In some mysterious way he must have discovered what had occurred, suspected that she and Kelleen had ridden away together, and then followed like an Indian on the trail. She lifted her head suddenly; another voice spoke quietly, indifferently. Surely the voice was familiar; it must have been Kelleen himself who spoke.

She crept forward inch by inch, crouching low behind the sage until she could see the figures of two men. Neither one faced her; Meager sat on the side of the bank, his horse grazing just beyond, while the "Frisco Kid" remained in the saddle, his mount still breathing heavily, as though he had only just arrived after a hard ride.

"Well, what difference does it make?" he asked quietly. "Am I in on this or not?"

"Of course you're in now," was the surly response. "I reckon that was what caused you to show up in these parts, ain't it? I wondered what was being pulled off when you rode in last night. Say, 'Kid,' who really piped it to you—Casebeer or Garrity?"

"The less you know about that the longer you'll live, Bob," Kelleen replied calmly. "It is enough that I do know, not only what you are up to out here, but that it was also your game last night to double-cross me. You tried the same game once before, Bob. The scheme has never worked very well. You haven't got the brains to do it with. Casebeer never told me anything; nor Garrity. All I needed was to know you and your kind. You were never honest in your life, and when I heard about this deal it was easy enough to figure what was up."

"What deal, 'Kid'? What do you mean?"

"This ranch inheritance Garrity fixed up so nicely for you. No, I haven't all the dope—not yet. But I'm on my way to it, all right; the rawest deal I ever heard about, and it will blow up like a punctured balloon just as soon as your stepmother gets nerve enough to see a good lawyer. That's true, ain't it, Bob?"

"The old man left it to me."

"Yes, he did—not. I was down in old Mex when I first heard what was going on up here. Young Clair got hold of one end of the story somehow, and told it to me. You remember Clair?"

"He worked here on the ranch."

"Yes; that's what made him talk. He's square, that kid, and you fired him, and every other cowman on the place; then put on Mexicans. That made him sore. When he told me that I came pretty near knowing what was up."

"You did, hey! Wanted a hand in the game?"

"Why shouldn't I, Bob? I held you up when you was flat, didn't I? There is no reason why you should forget me now. D—n you! I mean to see that you don't. That's what I'm here for. Now listen—I'm on to what is going to be pulled off tonight—this Casebeer business. You sent Sanchez and his helper over here to take care of the Casebeer outfit—that's right, isn't it?"

Meager growled something indistinctly, his eyes angrily watchful, but Kelleen remained on guard.

"There is no use playing the hog, Bob," the latter went on coolly. "I've got the cards, and I'm no girl you can play the brute with, like you did last night. What time does this outfit come in?"

"Between now and midnight."

"What are they running?"

"War stuff, of course."

"And you have the way cleared—Garrity brought you that information, no doubt. Has he gone back to Nogales?"

"Yes; this morning."

"I see; everything has been attended to. Somebody with brains is engineering this. You and Sanchez do the rough work while the judge clears the trail. All right; I've got it mapped out now. You are really not supposed to be in this deal at all. The Mex takes the stuff across the line, gets your share of the boodle, and brings it back. All you need do is hide out here and wait. Pretty soft, I'd say."

"Is it? Well, what are you going to do?"

"Play square, Bob. I'm d—d if you deserve it, but I'll only take my share. I'll go along with the outfit, though, to make sure I get it. Then we'll split right here. Keep that hand away. You have been edging in toward that gun for the last five minutes. I've got you covered, you sneaking cur. I don't take any chances with your kind. Now are you ready to come clean?"

There was no immediate answer, and Kelleen settled back into his saddle, but still faced the other, who had risen to his feet.

"I came up here half inclined to kill you," the younger man said soberly, "but now I am going to give you a showdown if you play fair. I know you would double-cross anybody if you had a chance. I don't mean to give you any. You stay here until I come back; if you fail, I'll run you down, no matter where you go. And you know what that means?"

Meager's fingers clinched and unclinched, his tongue wetting his dry lips.

"You needn't make any promise, Bob. Your word means nothing to me. You stay here until I come back, if you don't, you are as good as dead—that's all. That's my pledge; and you know whether it is good or not. Anything more you want to say?"

He backed his horse slowly down into the bottom of the gully, turning the animal's head toward the opposite bank, but still twisted in the saddle so as to confront Meager. He had drawn his revolver, and held it carelessly in his hand.

"You are such a dirty, low-down brute," he said coldly, "it would really be a pleasure to put you out of the world. I sometimes wonder why I don't. The Mex tells me you got married last night. Was it the real thing this time?"

"That's none of your d—d business."

"Perhaps not, but let's be social while we are together. Partners ought not to quarrel. Surprises me you should desert the fair bride so soon. You seem to have your head wrapped up—couldn't be a love tap, could it?"

Meager's temper obtained full control at this unpleasantry.

"H—l, I was drunk!" he growled viciously. "But she'll pay for it, the next time I get hands on the wench."

"So, she got away, then? Lord, Bob, I always thought you was a woman tamer. This one is of another sort, then, than those you are accustomed to handling; doesn't take kindly to the cave-man stuff?"

"She'll take it, all right, the' d—n little vixen. She hit me when I was drunk, and then got away; hid in the old lady's room, I reckon, for I couldn't find her nowhere. But I'll bring the girl out o' there tonight, by G—d, or she won't have no drunk man to deal with neither."

Kelleen laughed, evidently well satisfied with what he had learned, and having no further desire to add to Meager's discomfiture. His restive horse suddenly sprang forward under the quick thrust of the man's heel, crushing through the tangle of sage, and up the steep bank to the level of the desert above. Deborah had barely time to sink her body lower into the sand behind her covert, when the startled animal swept past, one hoof scarcely missing her. Meager, with an oath, swung a hand back to his pistol butt, yet was already too late—Kelleen had gone over the crest, the faint echo of a laugh floating behind him tantalizingly.

All the girl could do was to remain silently where she lay behind that cluster of sage. It was already growing dusk, and shadows hung over the gully, becoming deeper with every passing moment. If she had escaped observation so far she would soon be perfectly safe. And she was—she was!

The certainty was like a glass of wine, the blood coming back to her heart, her pulse steadying. Kelleen had ridden on, never pausing; she could hear the dull thud of his horse's hoofs in the sand, until the sound died away in the distance. And Meager stood there, revolver in hand, cursing impotently; finally leaping forward across the gully to where he could stare out over the edge of the bank toward where his enemy had disappeared. Neither man, then, had seen her; yet she dare not move, or attempt to change position; the slightest motion might mean betrayal. She shrank even closer in the shadow waiting. Would Meager stay there, or go away? In truth, of the two men she dreaded him the least, despising the fellow so thoroughly as to have largely lost her fear—but Kelleen! She was actually afraid of him. If she had still retained any lingering doubt as to what he was, that doubt had entirely vanished during this conversation. The man had worn no mask talking with Bob Meager; made no attempt to disguise himself. She recognized him now as thief and border desperado, no better, probably, than those he associated with—and far more dangerous.

It seemed to Deborah as though that dimly outlined figure standing at the edge of the bank would never move. His actions, and certain muttered words, aroused her interest, and held her in concealment watching his every movement. The fellow purposed something—but what? Those surely were night glasses through which he searched the horizon, crossing from side to side of the ravine, and lying flat on the sand while sweeping the circle before him inch by inch. Evidently nothing was discovered to awaken suspicion, for he came back to his horse and loosened a long rope coiled about the saddle-pommel, and, with this on his arm, tramped down the gully, within a yard of where she lay, his figure fading almost instantly into the darker shadows below.

At that moment the girl scarcely conceived what his mission might be. Her whole mind seemed to concentrate on the opportunity for escape which his absence offered. She arose crouching upon her feet, yet hesitated an instant, feeling a sudden curiosity to learn what Meager might be searching for. He could not go far, for the rope ended abruptly against a rock wall. She had a mental picture of the scene. Good G—d! could the man be seeking after that narrow opening through which she had just escaped? Could it be possible he knew of its presence there? where it led? the secret of that mysterious tunnel in the cliff?

The opportunity to escape was now open; Meager had entirely disappeared in the darkness; she could no longer even distinguish the sound of the man's movements, while his horse, saddled and bridled, stood unguarded but a dozen yards away. Yet the girl lingered, waiting to assure herself as to the real nature of the fellow's mission.

Forth from the darkness to her strained ears came the sound of a low whistle, a peculiar note resembling the call of a wild bird; quite evidently a signal, as it was repeated three times. To Deborah's imagination the whistler must be bending above the orifice in the rock. There was a pause, the desert silence profound, and then again the same signal impatiently given. Apparently there was no response of any nature from below, and Meager lost control of his caution, for he burst forth in a string of oaths, ending this tirade by calling down into the hole, his voice muffled as though he had inserted his head as far as possible within the narrow opening. The words came back indistinct, occasionally lost.

"Below there! you Manuel! Answer me, you d—n dog! This is Bob; do you hear me? By G—d, the fool must be asleep. I'll skin you alive if you fail me now. What the h—l does this mean?"

He apparently stood up, or at least lifted his head from out the aperture, for the voice sounded clearer to Deborah. The change startled her so she sprang to her feet, ready for escape before he could return, yet waited another instant, breathless, poised for flight.

"D—n the luck!" growled Meager to himself, unconsciously aloud, "when I want the fool he fails me. By G—d! something must be wrong, but what the h—l can I do? I got to find out what's up—that's sure; an' there ain't but one way o' doin' it; I got to git down below, an' d—n quick, too, before Casebeer gits here."

Deborah paused no longer. He was coming back; there was no other way if he intended going down the cliff. She ran swiftly through the dark, reckless of the scraggy sage, desperate to attain the horse. The man must have heard her, had some intimation of movement in the black night, for he gave utterance to a startled oath, and his feet crunched in the sand. But he was already too late, too far behind. In a moment more the frightened girl had gripped the bridle rein, flinging it back over the animal's head, and, in spite of his backing away, startled by her sudden appearance, had, in sheer desperation of terror, scrambled into the saddle. The horse wheeled sharply about, maddened by the flap of her skirt, and leaped forward, straight across the gully and up the sharp incline opposite. Her eyes caught one glimpse of the man's figure, dim, indistinct, grotesque, racing toward them; then he fired twice, the red glare lighting up the night. The next instant they were over the top, speeding frantically into the inky blackness of the desert night, no sound but the slugging of the animal's hoofs in the soft sand.

She had escaped; she was free! Nothing else mattered. Meager's hasty shots had failed; neither she nor the horse had been touched. Now he was back there helpless on foot, while she was free and in saddle. But where should she ride? in which direction? where was safety to be found before daylight? She drew the horse down to a walk, and studied the stars overhead in an endeavor to determine even the points of the compass.

Was that a sound—there to her left? She stared, half conscious of a deeper shadow looming, yet uncertain, checking the sudden spring of her horse. Then she knew, but too late; the black thunderbolt rushed upon her, and a man, leaping from his saddle, had clasped her arm, even as he jerked his own mount almost on its haunches.

"No shooting, please!" a voice said a bit sternly. "It is you, then?"

She suppressed a scream which almost escaped her lips, but her answer faltered.

She Hesitated; Then Courage Returned.

"You thought it was I, then? You were seeking after me?"

"Of course; people scarcely meet by chance here—in this desert and darkness."

"But why, may I ask, should we meet by either chance or otherwise?"

"Inclination may have had something to do with that, and a desire to serve. Am I not somewhat responsible in your case?"

"I do not care to acknowledge any such responsibility. I prefer now to go my own way alone. Do you understand?"

"You mean those words just as they sound?" he asked, releasing his grasp of her arm yet only lowering his hand to her horse's rein.

"The words certainly express no meaning exactly, Mr. Kelleen. Why do you retain hold of that rein?"

"To prevent any attempt on your part to ride away," he acknowledged, a slight coldness in his tone, "at least until we understand each other better. I had up to this minute supposed you were endeavoring to escape from that fellow back yonder; now I learn you were running away from me also. Is that the truth?"

She hesitated; then courage returned.

"I fear you more even than I do Bob Meager," she answered honestly, "and despise you more."

"That is a pleasant statement. I wonder if I really deserve it? You think I deserted you? left you unnecessarily? First listen to my explanation—yes, you must; I shall not let you go until you do. Will you listen to me?"

"I know of no way to avoid doing so; but I prefer that you release my horse."

His fingers relaxed their hold on the rein, and he straightened up facing her.

"I trust you," he said simply. "You are better mounted than I, and armed, but I will not believe you look upon me altogether as a villain. You had confidence in me last night—did you not?"

"Yes—last night. I was desperate, afraid, and—and I accepted all you told me."

"I am the same man now," he said earnestly. "I am Daniel Kelleen, just as ready to prove my friendship now as then. You do not believe that?"

"No, I do not; I cannot. Last night I accepted your assistance from necessity. I had to escape that ranch before daylight, and you offered the only chance. I—I did not know who you were then—only—only in a vague way. I rather accepted you as an American cowboy, and—and you made me trust you."

"During our night ride, you mean?"

"Yes, you told me a little about yourself; perhaps it was not true, but you made me think it was, and I gained confidence in you in spite—in spite of your—your reputation."

VOODOO MAGIC AMONG NEGROES

Black Magic of African Jungles Still Practiced.

BLACKS PREDICT OWN DEATHS

Voodooism is dead. The black magic of African jungles long since was laid away by science and education and religion. It could not thrive in these days of the airplane and the radio. Its last stand was in the canebrakes and the cotton patches of Louisiana and Mississippi, but the first flickering electric lights in New Orleans decades ago drove it away forever.

But, nevertheless, they'll tell you at the place where science holds the most undisputed sway, the hospital, there are cases—.

In the negro ward are brought the ground-up needles, the pebbles picked up in the light of the new moon at the crossroads, and the tongues of big frogs bleached in red marked canvas bags which are worn about the necks of the patients. The doctors laugh and the nurses scoff as they throw them away.

Died on Schedule.

Bed No. 12 in the colored men's ward of the Charity hospital died on schedule time.

Late in the afternoon Bed 12 was examined by the doctors. He appeared to be getting better. Certainly, he showed no dangerous symptoms.

But when the nurse passed a glass of water over him to Bed 13, the man in that bed refused it.

"It's got them things in it, nurse," declared Bed 13.

The nurse held it up to the light. Bed 12 and Bed 13 looked at each other and grinned.

"There's nothing in this water, boy."

"Yes, ma'am, you can't see nothing," said Bed 13. "But there's always things in water passed over a man that's going to be leaving soon."

Set Time of Death.

"Boy's right," Bed 12 murmured. "Everything's going to be over tonight."

The day nurse told the night nurse about this matter at seven o'clock before she hurried off to change clothes for a movie.

In the early part of the night Bed 12 slept, but he awoke a little before one o'clock.

"Everything's going to be over in five minutes," said Bed 12.

The nurse went back to her table in the hall where the record of the miseries of her patients is kept in words such as a mechanical god might use. She sat a few minutes wondering if she should call the ward doctor out of bed. She half decided to call him, but she went back to the ward before going to the telephone. Bed 12 was dead.

Nurses Take Away Charms.

Psychology, explains the doctors, and the nurses agree with an eager "of course." But the patients with the rabbits' feet and the pebbles don't care to argue the question.

Not long ago there was a negro woman with pellagra, who called the nurse to her bed and said she saw the angels coming for her. That woman was getting better. There was every reason to believe she was going to get well.

"They'll be here about three o'clock," said the woman.

And at 3:05 she died.

Most likely the bags with their charms are the work of the devil, as one of the sisters who are nurses put it. And so they take them away from the patients and burn them. There are pleadings sometimes, but usually just mumblings.

Silver Coin in Onion.

It's not always at the hospital, either. The other day a colored woman, who was remarkable for her white skin, was murdered by her favored lover, and since all her possessions have been collected and searched in settling the estate, which amounted to more than $4,000. Her estate was turned over to the public administrator, Thomas Nicholls. Among the effects were found certain packages that indicated pretty strongly that the woman had practiced voodoo rites—a coconut emptied of its natural contents and filled with an evil-smelling liquid—a silver dollar found within the cut halves of an onion, and all wrapped in pink silk rags that had once been part of luxurious and costly garments.

Materia medica takes no stock in frogs' tongues, but here is the case of an old negro man brought to the Charity hospital by his employer:

"This fellow says he is going to die next Tuesday," said the employer. "See what you can do for him."

The old negro was, so far as the doctors could find out, not a bit sick.

But he died when Tuesday came.

KILLS BIG BEAR TO SAVE DOG

Champion Hunter of Georgia Slays 300-Pound Bruin.

Another 300-pound bear has been killed by Perry Barber of Waycross, Ga., known as the champion bear killer of Georgia.

Barber made his latest kill on Suwannee creek, in the Okefenokee swamp. He found the bear in the act of killing one of his prize dogs, and when trying to drive him away the bear became enraged and attacked Barber. Calling some friends, the chase was taken up, and the bear soon was overtaken and killed.

JOHNSON AND COOLIDGE STRIPPED FOR BATTLE

According to press dispatches Senator Hiram Johnson of California will make a personal campaign in Massachusetts, home state of President Coolidge, for the republican presidential nomination, says A. B. Murtha, the senator's eastern campaign manager. Mr. Murtha declared Senator Johnson would go to Massachusetts "personally to speak his candidacy frankly and fairly to the men and women who have enrolled in the republican party."

And the announcement is also made that President Coolidge's candidacy for the republican presidential nomination was followed by an immediate drawing of lines with Senator Hiram Johnson of California, at present Mr. Coolidge's only declared opponent.

The gathering of party leaders at Washington for the meeting of the republican national committee, which convened there on Tuesday to fix formally the place and date of the 1924 convention, promised to develop sharply the conflict by President Coolidge and Senator Johnson, with the possibility that Mr. Coolidge may enter the presidential primary in Senator Johnson's home state.

The president was told by William P. Crocker, republican national committeeman for California, of plans of his friends to press his cause in California, Mr. Crocker expressing the belief the contest would result in a Coolidge victory. Senator Johnson in a brief statement said he hoped President Coolidge would enter the California race and added that he had no fear of the outcome.

In the national committee's consideration of the convention city for 1924 there is the germ of another conflict between the Coolidge and Johnson forces. With Cleveland, backed by administration leaders, causing the withdrawal of Chicago from the contest, a movement has developed to fight the selection of Cleveland. A belief apparent among Senator Johnson's friends that administration backing was swung to Cleveland because it was for Senator Johnson might have strength in Chicago was said to be in part behind the reported plans of a fight against the selection of Cleveland.

Several other controversies are to come before the committee. Reapportionment ordered of the 1924 convention roll, providing for 1036 delegates as against 984 in 1920, promises some difficulties.

Vigorous protests against reductions in southern delegations under the new plan were made by a large delegation of negroes before a subcommittee headed by Senator Howell of Nebraska. It was charged that the "loyal" southern negroes were disfranchised in the party's councils under the reapportionment which was ordered by the 1920 convention. The sub-committee took the position that the reapportionment was closed under the 1920 order, could not be reopened except by the 1924 convention and that the new call would have to go out on the protected 1036 basis.

Another question expected to come before the national committee is giving equal powers to the women associate members.

In addition to the reapportionment question, that of the Ku Klux Klan was presented forcibly by R. B. Creager, Texas committeeman, who sent letters to all of the committee members urging them to take a vigorous stand against the klan.

And thus it is shown that the politicians, as well as the wheat farmer, have something to worry about.

Following Suit

An eminent London judge who wrote a wretched hand, once sent a note to a friend among the lawyers seated at the barrister's table.

Not being able to make anything out of it, the friend scribbled something absolutely undecipherable upon a half sheet of note paper and passed it up to the justice. The great man looked somewhat anoyed at it and said to his friend:

"What do you mean by this? I invited you to come and dine with me tonight."

"Yes," said the lawyer, "and I replied that I should be delighted to do so."

Those who won't work until the mood strikes them are likely to find hunger striking them first.

Short Undertaking Company

Parlors at Genesee and Moscow. Prompt attention given night or day calls. Embalming and auto equipment furnished all funerals without extra charge. Full line of caskets at both places. At Genesee call George Schlerth at the Genesee Hotel.

"Courtesy and Service" is our motto. We relieve you of every care. 14-tf

THE GENESEE NEWS

VOL. XXXV — GENESEE, LATAH COUNTY, IDAHO, FRIDAY, DECEMBER 28, 1923. — NO. 26

A Happy 1924 New Year

ONCE MORE we hang up a new calendar. An old year dies and a new year is born. It is invoice time. It is time to measure profit and loss, failure and success. All check up accounts. What has been gained or lost in the material things of the world. Have we enriched or impoverished our spiritual resources? Whatever we have done with the closing year, is done. We cannot rewrite the story. But a new chance is given to all to make the new year what they will.

We live in a country that was built upon the principle that all men are created equal. The dysyeptic mind has always been disposed to repudiate that doctrine, contending that education and opportunity are, after all, for a privileged class. However this may seem, the makers of our government denied no man the right to initiative and enthusiasm. Whoever uses these tools can pack his way into any privileged class, if there be such.

Begin the New Year by warming up an idea or an ideal. Light the wick of enthusiasm.

Emerson says that enthusiasm is the passing from the human to the divine. The Greek word for enthusiasm signifies God within us.

Go to it! Let our resolves be "do" rather than don't. The fulfillment of good resolutions will save disappointment, regret and remorse. Do not make bad resolutions —they may cause disappointment, regret and remorse.

Death Fraud

Ed. J. Sallstad of Eau Claire, Wisconsin confesses after capture to robbing a grave, burning his cottage and eloping with his stenographer, while his wife mourned the charred remains—then remarried.

JACKSON SUNDOWN, FAMOUS NEZ PERCE INDIAN, DIES

Jackson Sundown, one of the most noted and best known of the Nez Perce Indians, died at 11 o'clock Wednesday night at his home on Mission creek, death resulting from pneumonia, from which he has been suffering for two weeks.

News of Sundown's death has sent a clous of sorrow over the whole Nez Perce tribe, every member of which knew the famous horseman. Among the white people, many of whom were numbered as his friends, there is sorrow at learning of the passing of the prominent Indian.

A broncho buster, and champion rider of the world at the 1916 Pendleton roundup, he is known all over the west as the most brilliant of Indian riders. For a number of years he followed the various roundups and won honors on every occasion. Sundown has always been prominent in leading the Nez Perce Indians at their annual parade and in their appearance at the Lewiston-Clarkston fair each fall. He had a distinctive and masterly bearing and is remembered by all who ever looked on his face.

His perfect physique won for him recognition all over the world and the noted sculptor Phineas Proctor was attracted to the west to use him as a model. Sundown posed for a number of statues, with and without his horse, and models of these are in New York. Mr. Proctor was in Lewiston for a time and later he moved to Sundown's home and established a camp and worked daily modelling statues from Sundown's posing.

Jackson Sundown was born on the Grand Ronde river 61 years ago and the first years of his life were full of real early day Indian life. His folks were members of Chief Joseph's tribe and as a boy he accompanied them through the Lolo pass into Montana, later returning to the Nez Perce reservation to reside.

The last years of his life have been spent on his little farm at the mouth of Mission creek, two miles below Culdesac, his early participation in the Lewiston-Clarkston fair marking his only public appearance.

Jackson Sundown is survived by a daughter, Catherine Sundown, and a sister, Ipnasapayanakt, both residing in Montana.

Funeral services were held last Thursday afternoon at 2 o'clock from the Slickapoo Mission church, with Rev. Fr. Lajorie in charge, with interment in the Mission cemetery.—Lewiston Tribune.

Jackson Sundown was well and favorably known in the Genesee section, he having taken an active part in the Nez Perce exhibitions and parades here during the Genesee Horse show , 1914-1917. In riding a bucking horse here one of his ankles was badly injured when the animal reared and fell on him.

All the Genesee country mourns with his people at his demise.

Gave Dinner

Mr. and Mrs. Leon Follett gave a dinner Wednesday evening in honor of Mr. and Mrs. Jack Barnes of Wilbur, Wash., who are visiting with them for the present. The guests were Mr. and Mrs. Harry Schooler, Mr. and Mrs. F. H. Thomas, Mr. and Mrs. Mahlon Follett and Vern Beckman.

SEMI-LOCAL NEWS CLIPPED FROM EXCHANGES

Have Good Fishing

Local sportsmen came in last Sunday with substantial proof that fishing is good on the North Fork. They had a nice mess of trout and white fish. One, a bull trout, was over 20 inches long.—Clearwater Tribune.

Raising Chickens Successfully

J. F. Schultheis is one of the young farmers who is giving much attention to poultry. He has a flock of white leghorns and an up-to-date house for the birds. Electric lights keep them busy early in the morning and in the evening, and he is getting between 11 and 12 dozen eggs a day. —Colton News-Letter.

Holding 60 Percent

In a reply to a telegram from Senator William E. Borah, asking what per cent of the 1923 wheat crop on Camas Prairie was still in the hands of the farmers, J. J. Pulse, of Grangeville, the recipient of the telegram from the distinguished statesman, after investigation, advised the senator that 60 per cent of the crop was still in the hands of the producers.—Cottonwood Chronicle.

Stackpole-Berry Wedding

Mr. William E. Stackpole, of Genesee, and Miss Ina Berry, of Asotin, were united in marrige Wednesday in Lewiston, and residence will be made in the Genesee section. The bride has made her home in Asotin for a number of years and is highly respected and has many friends among the younger people of that community, all of whom extend best wishes and congratulations to the young couple for a life of happiness and prosperity.—Asotin Sentinel.

Got One Cougar

Ted and Al Johnstone returned Saturday from a cougar hunt in the Meadow Creek district. On account of the light snowfall in the mountains, the cougars are not coming down yet, and in the several weeks they were out the boys saw only one, which they shot. Ted says he was one of the biggest cats he ever saw, measuring 9½ feet. They got a large number of coyotes, among which were some extra fine skins, so altogether they figure is quite a successful hunt as to money returns.

The elk and white tail deer are coming down and they saw a lot of them, one herd containing fifty-four nice, fat elk. The coyotes, they say, are working havoc with deer and they rescued one deer which had been driven out into the ice and had broken through partially. They found it with its hindquarters under the water and almost exhausted through its efforts to pull itself out. When finally gotten out it was nearly dead and died soon after. Ted and Al expect to return to the mountains after the holidays.—Kamiah Progress.

Friend Wife Counters

He was fond of playing silly jokes on his wife, and this time he thought he had a winner. " My dear," he said as they sat at dinner, "I heard such a sad story of a young girl today. They thought she was going blind and so a surgeon operated on her and found—"

"Yes," gasped the wife breathlessly. "That she had a young man in her eye," ended the husband with a chuckle.

For a moment there was silence. Then the woman remarked, slowly: "Well it would depend on what kind of a man he was. Some of them she could see through easily enough."

More Light For Less Money

Electric lights are cheaper than candles and the illumination is better.

One hundred years ago and for four decades prior to 1855 sperm oil and candles produced the light in the average home of America.

Today the maximum daily light requirements of an average American home is 18 times that of a century ago. The cost is only two-thirds of what it was then. The cost of lighting per unit now is less than 3 per cent of what it was in the days of sperm oil and tallow candles.

"Nine Cases"

The John Dresher home was the scene of nine cases of measles Wednesday morning—enough to suit the most exacting.

WHAT HAPPENED HERE TWENTY YEARS AGO

A girl was born to Mr. and Mrs. Chas. Grieser Friday.

George Steltz and crew have just completed the fine seven room farm residence of Joseph Roth.

Farmers and stockmen complain of a great deal of "stock rustling," of late. The fate of Walter Wayland does not seem to be heeded by some. A necktie party might better serve the purpose.

One day last week, Leonard Mochel, the 11-year-old son of Mr. and Mrs. Ben Mochel, met with an accident which makes the holidays quiet ones for him. He caught his left eyelid on a poker which was hanging on the chimney bracket and tore the lid loose from the corner near the nose back for an inch over the eye, necessitating the use of four stitches to return it to its place. The eye sight is unhurt but the lid will be disfigured likely.

T. Driscoll is now the owner of the Every stable property on Walnut street occupied by William Biram, having purchased same from A. Murphy Monday of this week. We are not advised as to the purchase price. The purchase shows Mr. Driscoll's faith in the future of Genesee and we are of the opinion that at no distant day this excellent corner will be adorned with a fine brick instead of the present building.

Death of Elof Larson

The funeral services for the late Elof Larson, who passed away Monday at his home near Genesee, was held Wednesday morning from the Genesee Valley Lutheran church, the Rev. Gerhard A. Peterson of Moscow, conducting the services.

Mr. Larson was born in Norway 73 years ago and has lived near Genesee for some thirty years. About one year ago his wife passed away and about two years ago his son, Hans, an only child, died. He is survived by one sister who lives in the east, by his daughter-in-law and two grandchildren, Myrtle and Elmo Larson, and by a host of friends.—Star-Mirror.

Legion Nominates Officers

A special meeting of the American Legion was held on December 21. Nominations for officers was made as follows: Nels Liberg, commander; George Post, first vice-commander; James Winegardner, second vice commander; J. J. Hasfurther, adjutant; Harry Schooler, historian; Frank Hoorman and Thos. Herman sargeant at arms. The only contest was in the case of sargeant at arms, all the other officers being advanced one office higher. The election of officers will take place Wednesday, January 3.

Community Christmas Tree

The community Christmas tree planned by the members of the American Auxilliary was a great success.

True to his promise Santa was at the Legion hall early Sunday afternoon with plenty of apples and candy for every child that came, as well as for those who left their names.

The members of the auxilliary unite in extending their thanks to all who assisted in any way to make the event such a thorough success. It is hoped that the good work will be remembered and be repeated next year.

Cars In Smash-Up

Amand Borgen had the misfortune to have his car turn turtle with him on the Genesee-Lewiston highway, Wednesday, badly smashing his car, but Mr. Borgen escaped with slight injuries.

An automobile and a Ford came together on the highway just east of the Snow school house on the Moscow road on Thursday just before noon, badly damaging both cars. The large car lost at least one wheel while the Ford lost three wheels and was otherwise disfigured.

Sambo the Sherlock

Mandy—"Sambo, why fo' yo' think thet collection today at Church was to git the minister a new suit of clothes?"

Sambo — "Wall—dat congregation sho contributed a lot of buttons."

Rebekah Christmas Party

The Rebekah's gave a Christmas party at the home of Mr. and Mrs. Glen Sampson on Thursday evening of last week. The event was planned in part in honor of the teachers before they left for their various homes. A program was given by the members, each one giving a selection—musical, humorous readings, or vocal solos, after which a lunch was served by the Misses Gertrude and Margaret Sampson and Irene Mulalley.

The program was as follows: Song —Christmas Carols, (Yankee Doodle), Rebekah's. Recitation— "Welcome," Gertrude and Margaret Sampson and Irene Mulalley; Instrumental Selection—Lena Herman; Recitation—Little Edie, Anna Hanson; "At the Ham Museum," Lizzie Boliou; Vocal Solo—Metta Herman; Dialogue—"Do you Believe in Santa Claus?" Marian Morscheck and Anna Hanson; piano duet—(the twins) Lindy Collins and Lela Patch; recitation—"Dear Old Santa Claus," Emma Sampson; drill —nine little primary girls—Anna Hanson, Emma Sampson, Lulu English, Sarah Mochel, Metta Herman, Marian Morscheck, Ruby Cann, Gertrude Sampson and Irene Mulalley.

After the Christmas program, Santa Claus and Mrs. Santa Claus arrived and the presents were distributed, and each one left after reporting a very enjoyable time.

Lotta Truth Here

Three words will cheer the saddest days
"I love you?" —wrong, by heck!
It is another sweeter phrase
"Enclosed—find—check!"

Farmers Meet at Moscow

Leading farmers from practically all communities of Latah county met with Moscow business men at the Farmers'Union store in Moscow on Thursday of this week to put out plans to secure the continuation of county agent service in this county. Those present expressed themselves as believing that county agent work was of great value to the county and stated that the service saved the farmers sums far in excess of its cost.

A. S. Lyon, of Moscow, who presided at the meeting, said: "We sometimes hear complaint that county agent work is expensive. As a matter of fact, of each $100 revenue collected in Latah county from all sources, 35c goes to defray the county's share of county agent work. Our roads and schools are the big items that are making our taxes high. Of each $100 collected as a revenue in Latah county, $23.02 goes to our roads and highways, while $39.74 goes to local and county school funds. County agent work costs little compared to results secured."

Petitions requesting the county commissioners to make an adequate appropriation to continue county agent work will be circulated by those who attended the meeting.

A more complete report of the meeting will appear in next week's paper.

Bet He Was Right

Maiden Aunt—"And what brought you to town, Henry?"

Henry—"Oh, well, I jus' come to see the sights and I thought that I'd call on you first."

Perfect Health

Gladys Hughes of Sunflower, Mississippi, won first honors as the most perfect farm girl in the United States. She scored 99.

CHRISTMAS DINNER PARTIES AND GUESTS

Mr. and Mrs. John Lorang and daughter Viola, were guests at the C. P. Whalen home on Christmas day.

Mr. and Mrs. Chas. Geltz entertained Mr. and Mrs. Nate Edwards and son, Hartzel, at dinner on Christmas day .

Mr. and Mrs. F. S. Casebolt and family and Mrs. W. J. Herman had Christmas dinner with Mr. and Mrs. W. M. Herman.

Mr. and Mrs. G. E. Sampson had as dinner guests on Christmas day, Mr. and Mrs. W. W. Burr and children and Mrs. Geo. Boliou.

Mr. and Mrs. John Vandenburg had as dinner guests on Christmas day Mr. and Mrs. Emery Vandenburg and Dick Vandenburg.

Mr. and Mrs. Leo. Edwards entertained Mr. and Mrs. Raymond Edwards and Mrs. H. M. Warren at Christmas dinner.

Mr. and Mrs. F. J. Niemann entertained Mr. and Mrs. Isaac Isaksen and son, Lowell, and P. C. McCreary and son, William, on Christmas day.

Mr. and Mrs. F. K Bressler had as dinner guests on Christmas day, Mr. and Mrs. Geo. Gannon and little son, Don, of Pullman, Mr. and Mrs. Frank Gerard and J. N. Hollister.

Mr. and Mrs. Cecil Bumpass entertained at Christmas dinner, Mr. and Mrs. C. B. Clark and two daughters and little son, and Mr. and Mrs. G. A. Bumpass and daughter, Geraldine.

Mr. and Mrs. G.E. Taber and family, Mr. and Mrs. K. Uhre and family, Mr. and Mrs. John G. Meyer, and Rev. A. F. Wolff and family were guests at the John Meyer home on Christmas day.

Mr. and Mrs. Walter Jain entertained Mr. and Mrs. James Magee and family, Mr. and Mrs. Lew Jain, Mr. and Mrs. Ben Jain, and Mr. and Mrs. Clarence Jain, of Moscow, on Christmas day.

Mr. and Mrs. George Follett had as their Christmas dinner guests, Mr. and Mrs. Leon Follett, Mr. and Mrs. Jack Barnes and son, Jack, Jr., and Mr. and Mrs. Mahlon Follett and daughter, Dorothy.

Mr. and Mrs. R. I. Witty entertained Mr. and Mrs. F. C. Shork, Mr. and Mrs. Fred Perkins, and daughter, Pearl, Mr. and Mrs. Ira Hanson and daughter Rowena, and Miss Ruth Priest, who is visiting at the Witty home, on Christmas day.

Mr. and Mrs. Arthur Hove entertained Mr. and Mrs. Henry Hanson and family, Mr. and Mrs. Sam Lange and family, Mr. and Mrs. Archie Teglandand family, Mr. and Mrs. W. O. Borgan and family, Mr. and Mrs. Nels Lunde and family and Miss Mildred Nelson of Lewiston, on Christmas day.

Cowcreek News

Miss Martha Tidemann, a graduate nurse of Spokane, came down Friday to spend her Christmas vacation.

Mr. and Mrs. James Skelton and son and Mrs. Skelton's sisters, Clara and Anna Tidemann, motored from Reubens, Idaho, to spend Christmas at the Tidemann home. Misses Clara and Anna are attending school at Reubens.

Mr. and Mrs. John Lindrud had as guests on Christmas day Mr. and Mrs. Joseph Anderson, Mrs. Danielson and family, Mr. and Mrs. James Skelton and son, and Mr. Tidemann, Martha Anna, Carl, Sigford, and Olaf Tidemann.

DON'T

Waste your time reflecting on the past, but make a firm resolve that during 1924 you will do your buying at Smolt's Confectionery—where everything is new and the prices are right.

We are now prepared to serve light lunches at all hours.

Ice cream served at our fountain and sold in any quantity.

We have just received a fine line of boxed candies of all kinds from the coast—so that every young man can get one for his young lady for New Year's—and the price is right.

A good line of cigars and smoking tobacco—all new, fresh stock.

SMOLT'S CONFECTIONERY

Try a Classified Adlet in The News

If you have anything to sell or trade or exchange. You will get results. And the cost is small.

We take this opportunity of expressing to you our deepest appreciation of the cordial relationship which has existed between us in the past. May it continue indefinitely. Accept our greetings and warmest regards.

GENESEE EXCHANGE BANK

That you and yours may have a very Happy New Year.
That the coming year will give you many of the good things of life.
That we may serve you better in 1924.

Tom Herman and Family

SENT TO PRISON; CHOSEN MAYOR

South Carolina Man Elected After Being Sentenced for Slapping U. S. Agent.

Atlanta, Ga.—A year's sentence in the Atlanta federal penitentiary for striking an inspector of the United States internal revenue department may assure the political future of R. V. Bray, Jr., mayor of Beaufort, S. C.

Bray was elected after he had been sentenced chiefly, it is said, because of the year in prison which lay ahead of him.

He will continue as mayor during his twelve months in the penitentiary, with a mayor pro tem serving actively in his place. When the sentence is completed he will return to take over the reins of government.

Appeals to Harding.

Mayor Bray was convicted in June of 1922 before Judge H. A. H. Smith of the United States District court in Charleston, S. C. The case was appealed to the United States Circuit Court of Appeals, and finally taken to President Harding in an effort to get a pardon for the official.

When these efforts failed, after a year's time had elapsed, during which he had been elected mayor, Bray prepared to begin his twelve months' imprisonment. He is the only acting mayor ever numbered among the prisoners of the Atlanta penitentiary.

On Jan. 30, 1922, Harold Smith, a federal revenue inspector, was investigating details connected with the estate of the late George Waterhouse, a wealthy citizen of Beaufort. Waterhouse was Bray's father-in-law, and the latter was manager of the estate.

According to testimony submitted at the trial, an argument sprang up between Inspector Smith and Bray, in the course of which Bray said, "There is no use for me to answer any more questions; you don't believe what I say."

In reply, Inspector Smith was quoted as saying: "You forget, Mr. Bray, that I have the authority to make you talk."

Whereupon Mr. Bray, it was testified, struck him.

Charged Personal Insult.

At the trial Bray's defense was that the inspector had implied that he was lying; and that he had simply resented a personal insult and had not meant in any way to interfere with the government. The jury, in returning a verdict of guilty, recommended leniency. Judge Smith passed sentence and months went by during which the case was appealed, finally reaching President Harding.

United States Senator N. B. Deal of South Carolina and Gov. Thomas McLeod are among those who urged clemency for the mayor. It is reported that Secretary Denby of the Navy department, with whom Bray is acquainted, spoke in his behalf.

Before he left for the prison Mayor Bray said: "This is the first time I have ever been in a difficulty like this. I have always been a loyal citizen of the United States, and always will be. My friends all know that in my difficulty with the revenue inspector I took personal exception to his words, and that it was far from my mind to interfere in any way with the government:

"I am going to prison with my head up, and I shall come out the same way."

A delegation of Beaufort citizens accompanied their mayor to Charleston when he started for prison. They included members of the board of trade, and chamber of commerce, and city officials.

Before the mayor left several negroes volunteered to go in his place.

Baby Two Years Old Knows the Alphabet

West Bend, Wis.—William Feierelsen, Jr., son of Mr. and Mrs. William Feierelsen, at the age of two and one-half years, is believed to possess a mentality that is developed to a remarkable degree. Before he was two he manifested such adeptness at learning without the usual painstaking methods that people were astounded.

Some one gave him an A B C book last Christmas, and in a short time he knew the whole alphabet, including many of the little verses that accompanied each letter, by heart. He will tell you, without hesitating, each letter of the alphabet.

Billy is especially fond of tools. His father is a machinist at a local garage. When asked what certain tools are for, Billy can tell you. He has a kiddie kar, which he likes to take apart and put together again. One day he saw a little boy with a toy automobile on the street, who seemed to have some trouble with it. Billy advised him that he "needed a patch," and immediately set about repairing the little lad's auto with a patch.

Turtle With 1773 Mark of Capt. Cook Found

Washington.—A turtle left in the Tonga islands by Capt. James Cook, the English mariner, in 1773, was found there last month by Capt. E. T. Pollock, governor of American Samoa, according to a report to the Navy department.

Despite the established proclivity of the species toward records for longevity, the turtle exhibited signs of extreme age, Captain Pollock said, adding that it was "blind and when walking creaked like an ox cart."

Interesting

"You have acted very wrongly, Horace!"

Thus Horace's father, in the presence of Horace's mother, to Horace, discovered in the act of stealing jam.

"It may seem a small crime, Horace," continued his father," but it has for its foundation one of the prime causes of the world's unhappiness—disobedience. I am grieved. I want my son to grow up a fine strong right minded man. O want him"—Here his father paused for breath.

Horace turned enthusiastically to his mother. "Mamma," he cried "isn't pa interesting?"

Willing to be Obliging

A British recruiting sergeant, with an eye to business, approached a smart-looking lad who was on a milk cart.

"Well, they wouldn't call you that round in the neighborhood of Buckingham Palace.

"Well, my lad," he said, "and how would you like to serve the king?"

The lad also had an eye to business, and promptly replied:

"Fine, sir. How much does he take a dry?"

Editorial

Officials Who Sidestep Duty Do It Because They Are Allowed To.

Daugherty's Brand of American Justice

Congressman LaGuardia will find behind him every liberty loving citizen of the United States in his determination to introduce in the House of Representatives a bill to provide that no Federal judge shall determine the guilt or innocence of any person he has ordered up for a contempt committed outside of his courtroom. He proposes to establish trial by jury in such cases, trial before a judge not connected in any way with the case. This is sound Americanism—it puts properly into the background rule by mob, as it does rule by despotism, and leaves us on the safe and sane middle ground of the republic founded by the fathers.

The legal political gymnastics which President Coolidge has executed in the Craig case practically acting as a rubber stamp for Harry Dougherty, attorney general, whose appointment shocked the nation, has served only to emphasize the need for a law finally curbing the rapidly growing tendency to despotism in this country. The New York Controller, sentenced by a Judge he had criticised to a felon's cell for constructive contempt, was not pardoned. This upholds the hands of Taft's man, Mayer, and expresses the Dougherty idea of American justice politically administered. In his capacity as Attorney General he upholds the Judicial encroachment on American Liberty, while in his capacity as a back room delegate procurer he saves—or thinks he saves—the political machine of which he is the creature from an embarrassing position. One day spent in prison by the New York Controller and there would be a storm such as would shake the political machinery to its foundation.

The impertinent recommendation submitted by Dougherty to President Coolidge bespeaks the type of reasoning and sense of public rights that fills the mind of the nation's chief law officer. Dougherty characterizes Craig's statements about the court as libelous and false. By what right does this political jack in office arrogate to himself that which in this country we require a jury to decide? Certainly the sooner Representative LaGuardia gets his bill into action, the better.

Mrs. Bertha Ellis, of New York, had a sense of humor when she shuffled off this mortal coil. She lived in a boarding house and left a dollar bill for the landlady to pay for the gas she used to kill herself. The amazing thing is that she could get enough gas for the purpose out of the jets of any New York boarding house.

The New Yorkers are considerate of their state legislature. Recently they voted $50,000,000 for the better protection of the insane.

And now we have the tailor of the Prince of Wales with us. He has a special cloth—sold not to the common folk. You poke a hole through it with a pencil, rub the cloth together and behold there is no hole. Elastic wool, explains the tailor.

Brisbane says: "When you advertise, shout, don't whisper."

PERSONAL MENTION

James Winegardner left Friday evening for his home at Lewiston.

Mike Earls spent Saturday and Sunday with relatives in Lewiston.

Miss Viola Lorang spent Saturday and Sunday with relatives in Lewiston.

F. E. Lambert left Friday morning for Clayton, Washington, on a short business trip.

Mrs. Walter Jain and Mrs. Ben Jain left Wednesday morning for Spokane for a short stay.

Fred Vanouck arrived Monday from Norway, Canada, for a visit with his mother, Mrs. A. Springer.

Allon Sather returned from Spokane Wednesday after a visit of a few weeks there with relatives.

Miss Lindy Collins left Friday for her home in Lewiston where she will spend the Christmas vacation.

Mr. and Mrs. Milton Rader and children spent Christmas vacation with relatives in Walla Walla.

Miss Marie Hummel and Miss Lela Patch left Friday for their homes in Boise for the Christmas vacation.

Verna and Ronald Geltz left Tuesday evening for Lewiston to spend their vacation with relatives there.

Miss Anna Kambitsch of Lewiston is spending the holidays with her parents, Mr. and Mrs. Matt Kambitsch.

Orland Mayer came over Friday from Moscow to spend the holidays with his parents, Mr. and Mrs. Al. Mayer.

Mrs. Frank Willoughby and daughter, Grace, of Spokane are spending the holidays here with Mr. Willoughby.

Mrs. R. S. Sullivan and daughter, Emma Lou, were Sunday passengers for Palouse to spend the holidays with relatives.

Mrs. H. A. Thatcher and H. O. Wiswell and daughter, Ilah, spent Wednesday at the home of Mrs. G. E. Sampson.

Miss Helen Geselchen arrived Sunday evening from Lewiston for a visit with her parents, Mr. and Mrs. John Geselchen.

Mrs. Visby and two sons of Amber, Wash., arrived Monday evening for a visit at the home of Mr. and Mrs. Henry Hanson.

Miss Viola Weber arrived Saturday from Cottonwood to spend the Christmas vacation with her parents, Mr. and Mrs. John Weber.

Miss Ethel Nelson arrived Saturday from Liberty Lake, Wash., to spend the holidays with her parents, Mr. and Mrs. N. Nelson.

The Misses Edith Winegardner and Frances Vaughan left Saturday morning for Seattle where they will visit with the Martinson family.

Miss Idah Peterson came up from Clarkston and is spending a few days with her father and brother on the Peterson ranch just east of town.

Miss Sylvia Evans left Friday for Spokane where she will spend part of her Christmas vacation later going to Naples, Idaho, for a visit with relatives.

Mr. and Mrs. Beck and children left for their home in Oreland, Calif., Friday after spending a few days with their daughter, Mrs. Peter Isaksen, and family.

Misses Johanna and Katherine Dwyer arrived Sunday from their Troy and Deary schools for a visit with their parents, Mr. and Mrs. Thos. Dwyer.

Mr. and Mrs. Jack Barnes and son arrived Saturday evening from their home in Wilbur, Wash., for a visit with Mrs. Barnes' parents, Mr. and Mrs. Leon Follett.

Victor and Walter Casebolt arrived Friday from Moscow, where they have been attending school, to spend the holidays with their parents, Mr. and Mrs. F. S. Casebolt.

Mr. and Mrs. G. E. Taber and children arrived the latter part of last week from their home at Myrtle Point, Oregon, for a visit with Mrs. Taber's parents, Mr. and Mrs. John Meyer.

Mrs. C. R. Heaton left Monday morning for her home in Huxley, Alberta, Canada, after a visit with her sister, Mrs. Herbert Potsch. Robley Nation left Monday for his home in Spokane after a few days visit with his sister, Mrs. Potsch accompanied them as far as Pullman.

Miss Ethel McMillan left Monday morning for Pullman for a few days visit with her parents during the holidays, returning to Genesee Wednesday accompanied by her sister, Miss Elizabeth McMillan.

Kambitsch-Paulson Nuptials

Married, Wednesday in Couer d' Alene, Idaho, Miss Eloise Paulson, popular Moscow girl to Andrew J. Kambitsch, prosperous young farmer from near Genesee. The bride is a daughter of County Commissioner, and Mrs. Elmer Paulson and the groom a son of the late Mr. and Mrs. Joseph Kambitsch. After a short honeymoon on the coast they will be at home to their many friends on the farm near Genesee.—Star-Mirror.

Dance at Lincoln School

There will be a dance at the Lincoln school, District No. 39, on Friday night, January 4. Good music and a good lunch will be on tap.
26-1 — A. C. Linehan.

Bowlers, Attention

There will be a meeting of the bowlers at the club on Saturday night. Your presence is requested.

Happy be your New Year Day;
Happy and with glad good cheer,
To last you through the coming year.

PAULINE STELTZ

Gave Annual Christmas Tree

The members of the Norwegian church held their annual Christmas tree and program on Wednesday evening. A very good program was given, in which a large number of the young people took part, after which the gifts were distributed. Everyone reports a good time.

LUTHERAN CHURCH

A. F. WOLFF, Pastor.

English services will be held each Sunday morning at 10:30 o'clock, with the exception of the first Sunday of each month, when German services will be held at the usual hour.

Sunday school at 9:30 a. m.

FEDERATED CHURCHES

Church school at 9:45 a. m.

Church meeting at 11 o'clock.

There will be the usual meeting of the Christian Endeavor at 7:30 p. m. Everyone is invited.

Resigns Position

Miss Sophia Kambitsch, who has been a faithful employe of the Home telephone company for the past seven years, has resigned her position and will go next week to Spokane where she will enter Northwestern Business college.

Miss Kambitsch will be missed by all who have had occasion to use the telephone exchange—and there are few in this community who have not done so. She has been one of the most obliging and accurate operators Genesee has ever had and while her position will be taken by a competent operator her pleasant voice and obliging way will be noticibly missed. Her many friends here will wish her well wherever she may see fit to cast her lot.

Missionary Society to Meet

The missionary society of the Federated churches will meet on January 16, instead of January 2, at the Evans home. All members are requested to be present.

First-Class Undertaking Service

The W. J. Herman Company has made arrangements with the Vassar Undertaking company of Lewiston whereby they will handle all cases in that line in a first-class manner at no additional charge for work in this community. Licensed embalmer, auto hearse. Phone your orders to W. J. Herman Company. Phone 6F2. 12-tf

The Tires That Are Guaranteed to be Best

A C-T-C FREE If You Can Find Another Tire That Will Outwear It

C-T-C TIRES have so completely proved their superiority over ordinary tires that we have been permitted to offer the following remarkable factory Guaranty on C-T-C tires bought from authorized C-T-C dealers before January 15th.

Place a new C-T-C tire on any wheel of your car opposite any other new tire of the same size you care to choose. Then drive the two continuously.

If the C-T-C tire fails to outwear the other tire, you will be given a new tire FREE.

This offer is the most striking evidence of confidence and good faith ever given the public by a tire manufacturer, and the PROOF of C-T-C quality is put squarely up to YOU.

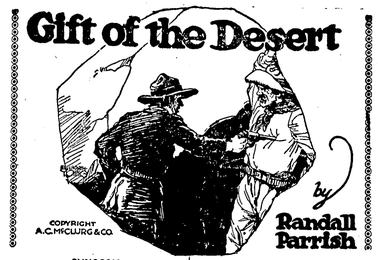
C-T-C tires won't skid—and can be driven at low inflation to "Conserve the Car." They are the strongest, toughest, longest enduring tires built.

BUY YOUR TIRES FOR SPRING NOW

In spite of their GUARANTEED SUPERIORITY C-T-C's cost NO MORE than ordinary tires.

C-T-C TIRES AND TUBES

MEYER & SON



SYNOPSIS

CHAPTER I.—On the isolated Meager ranch, on the southern border, Deborah Meredith, trained nurse, is in attendance on Mrs. Meager, whose husband has recently been killed, victim of an accident. Immediately after stepson, arrives and takes possession. He insults Deborah and she resolves to leave, but there seems no possibility of her getting away, alone.

CHAPTER II.—Meager gloats over Deborah's plight, telling her he has sent for a justice of the peace, who will marry them tomorrow. Horrified, the girl secures a revolver.

CHAPTER III.—The justice, Cornelius Garrity, scoundrel and bosom friend of Meager, arrives with a party, among them the "Frisco Kid," notorious desperado. The girl locks herself up.

CHAPTER IV.—Forced by Bob, Mrs. Meager decoys Deborah from the room and, despite her protests the justice performs the marriage ceremony. Immediately afterward, she escapes and reaches her room.

CHAPTER V.—Meager seeks the girl, but she stuns him with the revolver and rushes to the stables, hoping to secure a horse and escape, anywhere away from Meager, if she must die in the desert. In the stables she meets the "Frisco Kid." Somehow he inspires her with confidence and she explains the situation, he not having been present at the "wedding."

CHAPTER VI.—The "Kid" tells her his name is Daniel Kelleen, that he is no friend of Meager, and, securing two horses, the pair ride into the desert.

CHAPTER VII.—Alone with Kelleen, the girl becomes somewhat apprehensive, but he tells her of his service in France, where Deborah had been a nurse, and she puts full faith in him.

CHAPTER VIII.—Kelleen explains that the "Frisco Kid" is a manufactured character, that he is really a captain in the regular army, detailed to run down a gang of thieves and smugglers of arms into Mexico, among them Meager and Garrity.

CHAPTER IX.—While the girl is sleeping, exhausted, Kelleen disappears. Later, from a hiding place, Deborah hears him talking with Jim Sanchez, associate of Meager, and from the conversation she believes Kelleen to be really a member of the gang. Her apprehensions returned, she seeks to escape, but is seized by a concealed man.

CHAPTER X.—Deborah's captor carries her to what is apparently a cave. Feeling he has her securely a prisoner, the man relaxes his watchfulness, and she seeks a way of escape. Exploring the cave she finds the body of a dead man, who had been shot in the back. From him she takes a revolver. Finding a passage, which apparently leads to the open air, the girl is almost free when her guard returns and fires at her. She returns the shot and after a time succeeds in finding her way out of the cave.

CHAPTER XI.—While resting, after her terrible experience, Deborah overhears a conversation between Bob Meager and Kelleen, apparently a violent quarrel. The two part, Kelleen riding away and Meager, on foot, apparently seeking something. She finds Meager's horse and escapes. She meets Kelleen, who has been searching for her, and rejoining him, but he refuses to leave her. While they are conversing Kelleen discovers the pretended man a plain far below them, of an outfit which he realizes must belong to a notorious character named Casebeer, and is doubtless on his way into Mexico with arms and ammunition.

CHAPTER XII.—Kelleen explains the situation to Deborah, telling her he has got word to a party of American cavalry, who are waiting at a place known as Box canyon to capture Casebeer and his gang. While they are talking, Kelleen, standing at the edge of the mountain, is shot from behind, falling apparently to certain death down the mountainside. Meager, who had fired the shot, and Sanchez, appear and are satisfied that Kelleen could not have survived the bullet and the fall. They fail to discover the presence of Deborah. On their departure the girl starts on foot in the direction which Kelleen had pointed out as leading to Box canyon.

"I see—the 'Frisco Kid' business. That was a little off color, wasn't it? If I remember right you got my history principally from 'Pop' Reynolds, with all embellishments thrown in. Yet, nevertheless, you managed to like me? Is that it?"

"I had to trust you then. I tried to believe all you told me, and—and you were nice."

"Good enough; and then what?"

"It was not because you left me. I thought I understood that; you were seeking to save me from discovery. Yet even then I was not sure, not as confident in you as when we were alone together. Sanchez was too friendly, too willing to acknowledge your leadership, and obey your orders—and—and you knew too much about what was going on here. You told me a very interesting story, Mr. Daniel Kelleen, which I now know to be false."

Kelleen made no movement, and for the moment no answer.

"You have lied to me, haven't you?"

"I prefer learning first why you reach this conclusion," he replied calmly. "Does it come from my conversation with Jim Sanchez?"

"It began there. I could scarcely help suspecting you after listening to what you had to say to that Mexican outlaw. You are not here not so much in my protection, but as the representative of Bob Meager. I am merely your plaything en route."

"You are indeed complimentary. Did I serve Meager, you think, by running off with his wife?"

"There is no law or decency on this border where any woman is concerned," she burst out bitterly. "I have at least learned that. I do not know your real object; only that you are one of this disreputable gang; that you could dare to refer to yourself as that I was therefore only an incident—to be lied to, and laughed at."

"You reached this conclusion from what you overheard of the talk between Sanchez and myself? Of course I knew you were there."

"Exactly, and did not even care. Your very insolence was an insult. You believed me then entirely in your power. You could sit calmly there on your horse, laugh and sneer, and I dare do nothing to protect myself. Then you rode off, and left me—your last glance one of insolent triumph. It was then I fully realized that I was only your victim. I was afraid of you and I hated you then."

His voice was very low, very quiet. "You lost all faith? You attempted to run away, and hide from me before I could return?"

"I attempted to get away—yes. I could not remain there; it would even be better to die on the desert. But—but I am not wholly sure I had lost all faith. Nothing was quite clear but—but I was afraid of you. You had lied to me; I could not trust myself alone with you any longer. But since then I have lost all faith—do you know why?"

"I can make a guess. You also overheard the talk between myself and Bob Meager."

"Every word. How did you know?"

"Because I had a glimpse of you as my horse topped the bank. I had sought you everywhere after I finally got rid of Sanchez. The truth is I was still seeking your trail when I encountered Bob skulking there in the gully. Our meeting was not prearranged; it was an accident. You are perfectly justified in condemning me, as the facts stand in your mind. I am not even going to attempt defending myself. I fear it would be useless. I am merely going to serve you, whether you wish to be served or not. But listen a minute before you cast me off utterly. Will you do that?"

The girl hesitated, biting her lips, angered by his insistence.

"I cannot very well help listening; I doubt if I believe."

"Believe or not, as you d—n please," he broke forth impatiently. "This is no time or place in which to play. The truth is I have been white with you—square. I came here seeking refuge just exactly as I explained to you last night. I knew this was a thieves' hole, of course, but had no suspicion that we were going to run into their outfit at this time. But when we did, I had to act along with them. There was no other way. I had you to consider, and I had something else to consider. I lied to them, not to you—to both Sanchez and Bob Meager. They are going to get the surprise of their lives tonight. Now listen. I came back there for you; I tried to trace you all the afternoon. I knew you couldn't be far away, because you had not taken the horse. Finally I decided you must have climbed the cliff on foot, and I came up and ran into Meager. Neither of us was very happy about it, but I had some knowledge of what was on foot from Sanchez. Only Bob wasn't there for that purpose; he pretended to be, but he had something else up his sleeve. You don't know what he was really up to, do you?"

"No," she said quickly, not willing yet to tell her tale, "why should I?"

Kelleen went on, undiscouraged.

"I didn't know how long you were hiding there. But that is why I came back."

"Because you saw me?"

"Yes; and because I believed Bob was up to some trick. I even had reason to suspect, did I not, that you two might be there together?"

She faced him indignantly.

"You thought I would secretly meet him?"

"Why not? You evidently believe every evil of me. How did I know you had told the truth? You are his wife, by your own statement. Why shouldn't I suspect, finding you there together? Anyhow I went back to discover the truth. That is why I am here with you now."

"Believing what of me?"

"I hardly know—except not that. You were not with him, yet that is his horse you are riding. He fired at you, did he not?"

"Yes; he went past me down the gully after you left. It was dark then and I was not seen. I stole his horse and rode away. I doubt if he even knew it was a woman he shot at."

The listlessness suddenly left her voice.

"But I am not going with you," she went on coldly. "If you are a man you will not try to urge me. I trusted you last night, but not now. Will you let me go?"

"Where?"

"I'll find my way; I have a horse, and the stars. By morning I'll be in sight of some point of guidance. Anyhow if the choice is between the cruel desert and you, I take the desert. Am I free to go?"

Kelleen laughed.

"If you leave it to me, then? Well, I say you are not going. I am not the sort of cur who would let you commit suicide just because you have taken a dislike to me. You would be lost in ten minutes; you don't know this country—it's treacherous as h—l. Now listen; you are going to trust me whether you wish to or not. You needn't like me—that cuts no ice in this affair—but you are going to learn that when I give my word to either man or woman, I'm going to keep it. Now, that's flat. If you want to go back to Bob Meager, all right. I'll take you to him, and we're done. But when you talk of my turning you loose in this desert, to take your chances out there alone, I am the wrong kind of man for any such job. You can hate me all you please, but we stick together until I get you where there are white folks."

"I believe I do hate you!"

"All right; I don't mind that. Will you do what I tell you to do?"

He had spoken quietly, almost harshly, and the tone of command had aroused Deborah's resentment. The two wills clashed, and neither would give way or seek compromise. Deep down in her secret heart a bit of faith in this Daniel Kelleen yet lingered, but she was in no mood then to acknowledge it. He was threatening her; trying to frighten her; endeavoring to force her into his power, and she resented it immeasurably.

"No, I will not," she said sharply. "Take your hand off my bridle rein!"

She struck her mount suddenly, and the startled animal sprang forward, whirling sidewise from the blow, careening against the flank of Kelleen's horse as it swept swiftly past. The next instant the wild race was on through the black night. She rode recklessly, desperately, lashing her mount with the flapping end of her reins, yet, leap by leap, Kelleen drew closer, riding as he often had before in heading off a wild stampede of cattle, pressing her horse more and more to the right into a half-circle as he drew near. Inch by inch they drew closer together, the girl's skirt flapping against his leg; then his iron grip closed on the bit of her horse, and the two animals came to a stop, pawing the air. Deborah was breathless, frightened, angry; but the man was conqueror and in no mood for compromise.

"You fool! do you know where you were going?" he exclaimed sternly, "straight to the edge of that hole; a dozen strides more and you would have been over. By G—d! I got you in time, but that is the last trick, you'll play on me."

"You—you dare speak to me like that—you?"

The man laughed grimly, the nervous reaction thus finding unconscious expression.

"Dare? I'll say dare. What else could I call you? You didn't even know what direction you were going, and headed straight for a five hundred foot drop. Now, listen; from now on I am master, and I'll begin right here."

He jerked the revolver from out the holster at her waist, and thrust it into his own belt. The significance of the action robbed the girl of all defiance; she suddenly felt weak, helpless.

"You—you mean I must do whatever you say?"

"Exactly that. You came to me at first voluntarily; you asked my help. I brought you here, and I am going to take you out safely. You are at liberty to hate me or like me, as you please. I am not asking anything but obedience. I tried being a man with you, and it failed to work; now I'll try being a brute and see what happens."

He straightened up in his saddle, evidently startled by something in the distance. She could barely distinguish his figure in the gloom, yet knew that his unoccupied hand was pointing to the right.

"Do you see that?" he asked, his voice tense and eager. "Down below there—that dull red light? It's Casebeer's outfit coming in?"

CHAPTER XII

Alone on the Desert.

She stared down at the red glimmer uncomprehending, her mind still agitated by Kelleen's sudden forcefulness. He had seemingly forgotten her very presence, so deeply interested was he in what was transpiring below, leaning eagerly forward, with eyes never departing the group now showing vaguely within the reddish glare of the fire, which illumined that little section of the gulch at their feet. Its faint reflection even enabled her to mark the stern outlines of his face against the far-away radiance. Her hostility to the man somehow seemed slipping away. She could not understand what it was which held her there quiet, silent, watching him. At last a sudden uncontrollable impulse caused Deborah to stretch out her hand and grasp his sleeve.

"Who are you?" she asked directly. "You must tell me."

The man turned his face toward her quickly, impatiently, their leveled eyes meeting in the dim light.

"I have already told you" he replied, with no marked surprise in his tone. "I trusted you that far; but you chose to disbelieve."

"But can you blame me if I did?" she exclaimed almost passionately, disturbed once more by his apparent indifference. "It was merely your word pitted against all these others; against everything that has occurred before and since. You gave me just to Do you remember the things I have heard said about you—about the 'Frisco Kid'—before I ever saw you? Stories of reckless murder, of everything despicable. If I had known who you were back at the ranch, I should never have ridden a mile with you, not even to escape from Bob Meager or a charge of having killed him."

"Go on," he said soberly, as she stopped breathless. "Let's have this out; there is no better time."

"I never knew until morning; until I finally recognized you. Then you told me that story—told it so I almost believed it true, almost trusted you. Really I had to believe, or pretend to believe, for I was there alone with you, helpless to protect myself, unable to escape. I was lost in the desert. Then you talked with that Mexican cutthroat, where I could hear all you said. He accepted you as one of the gang, and even obeyed your orders. He believed Bob Meager had sent you out here. You were certainly lying to someone, and naturally I supposed it must be me. There was every reason why you should lie to me. When you rode away together I was sure you would soon be back alone, and I determined you should never find me there. I made my choice—it was the desert and death rather than you. You understand what I mean, Daniel Kelleen?"

"Yes, I understand," quietly. "Go on, let's have it all."

"Then up above, in that little gully, I ran onto you again; it makes no difference how I happened to be there. It was hours later; I had some time in which to think, and began to wonder if my decision had been right. Then, in the gathering dark, I crept through that patch of sagebrush and found you in private conference with Bob Meager. You were surely not playing a part then, for you had no knowledge you were being overheard. After that how could I still retain faith in you or trust myself with you?"

Kelleen did not answer directly, his gaze leaving her face and turning inquiringly to the strange scene revealed below. He stared at this a moment in moody silence. Then he swung down from the saddle, dropped the rein over the horse's head, and stood beside her.

"I am going to tell you," he said calmly. "If you consent to listen. Will you trust me enough to dismount?"

There was something about the man, his quiet confidence, his low, even voice, his entire personality, which Deborah found impossible to resist. Hesitating an instant, even shrinking back from any personal contact, her lips refusing a direct answer, she yet permitted his hand to close firmly over her own and draw her down from the security of the saddle to the common level of the desert sand. Without a word of urging or explanation, Kelleen led her forward to the very edge of the cliff, where an exposed rock, swept bare by the wind, gave them a seat. Directly beneath lay the narrow valley, dimly lighted by that single fire, about which black dots constantly moved, too far away to be clearly visible. It was like a scene thrown upon a screen. Kelleen dropped down beside her, peering first over into the depths, the flicker of the distant flame barely illuminating his face. She could not help but mark its strong outline.

"You really do not understand what is being done down there?" she asked at last, as he held silent.

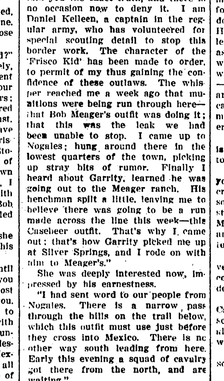
"I do not." He glanced aside at her, the trace of a smile on his lips. "There is something going on here quite beyond me. I had supposed this was a plain case of smuggling war munitions over the line into Mexico. But it isn't. Casebeer's outfit must have come in through that deep pass yonder—beyond the clump of trees," extending his hand, "and the only feasible way to the border lies up the opposite ravine, directly behind the cabin. All they would require here is water for the stock and a guide. That was to be Sanchez' job. He was to assure them that the way ahead was open, unguarded, and lead them over the safe trail. They need all the rest of the night to make it in."

"But—but they are unloading the mules!"

"That is exactly what they are doing—all of them; and taking the stuff back into the cabin. They are not going on at all; they are going back unloaded. Now, what does it mean? Why did Sanchez lie to me about it? and Bob Meager?"

Deborah sat up straight,

The Startled Animal Sprang Forward.



She Was Deeply Interested Now.

"Why" shouldn't they lie to you?" she asked quickly. "If you are really what you pretend to be to me?"

"Because they have no suspicion—they can have none. Nor a thing has occurred to arouse such doubt. The game has been played too carefully. It's not that. Meager has not the faintest suspicion as yet that I am not one of his kind. The fellow, together with Garrity, is pulling off something here out of the ordinary, which they want to keep me out of—that's all."

He stopped suddenly; then turned and placed his hand firmly on her own where it rested on the rock surface, his voice changing.

"Miss Deborah, there is no masquerade between us. I do not know why I talked to you as freely as I did last night. I must have liked you very much, and trusted you. Anyhow I told you the exact truth, and there is no occasion now to deny it. I am Daniel Kelleen, a captain in the regular army, who has volunteered for special scouting detail to stop this border work. The character of the 'Frisco Kid' has been made to order, anyway, under orders, he dumps the stuff—powder, dynamite, whatever it is—and hustles it out of sight into that cabin. Before daylight comes his mule train is back again on the desert empty, travelling north."

"And there is nothing you can do, is there?" she asked. "It is no crime to discover and work a mine?"

"No—only, perhaps, that dead man you tell me about; murder is still a crime, even on this border. There is something about this affair which isn't straight; otherwise Garrity and Bob Meager wouldn't be in it. Those guys are playing dirt somehow—it is up to me to find out how."

Kelleen stood up, advancing to the very edge of the flat rock, where he could look straight down into the deep depression below.

"There is no movement down there. Casebeer's outfit is not onto the scheme; after they go that stuff will all be carried into the tunnel. Meager will never dare leave it out yonder."

"What's the place called where the soldiers are?"

"Box canyon—why?"

"I was wondering—"

A sharp spit of fire leaped out of the night beyond the horses, accompanied by a dull report. The startled animals whirled and disappeared in the darkness, but Deborah saw only Kelleen, poised there on the edge of the chasm—saw him fling up both hands, clutching vainly at the air, and then topple silently down into those yawning depths below. She could not even scream, but some irresistible instinct caused her instantly to roll back from off the stone into the slight depression at its base. In the black darkness of this shallow hole she lay motionless, scarcely venturing to ... In her fright and daze she ... comprehended all that had occurred; the shot had come not from outward, but out of the desert. Kelleen had been killed, the horses stampeded; she was unhurt, but alone.

It was all over so quickly the situation barely flashed through her brain, before a voice spoke, a voice familiar and hated.

(Continued next week)

HOW JAPAN GREETS NEW YEAR

Custom of Oriental Countries is to Give Special Performances in the Play Houses.

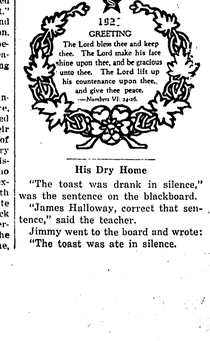
THE Oriental methods of greeting the New Year differ greatly from ours. In Japan, as well as in other Oriental countries, special performances are given in the theaters.

In the temples and shrines priests and attendants entertain the people with special dances. The Kagura, or Sacred Dance With Music, is the favorite, for while it is being given prayers are offered for the continued happiness of the nation during the coming year. This very old dance is performed by young girls, while the priests are the musicians. All are in appropriate costume.

Another ceremonial, which has been handed down for centuries, is the Shu-Sai, or Dance of the Ancestral Sanctuary. This is given within the palace by the imperial family on January 3, and it celebrates the founding of the imperial house, centuries ago.

A NEW YEAR'S CARD

Now what is here
A word of cheer
To herald in another year;
May all its days be free of blame—
A little nobler than your aim;
May all its labors be contest
A little better than your best,
And all the joys within its scope
A little brighter than your hope;
And may each year be found, when past,
A little dearer than the last.
—Arthur Guiterman in Woman's Home Companion.



His Dry Home

"The toast was drank in silence," was the sentence on the blackboard.

"James Halloway, correct that sentence," said the teacher.

Jimmy went to the board and wrote: "The toast was ate in silence.

At the holiday season we think of our customers as our friends. We like to feel that in a broad sense our customers are our partners—and that our success is but the reflection of theirs. And so on the eve of a New Year, we extend to you our hearty good wishes.

HOTEL GENESEE

In appreciation of your good will
we extend to you the season's
Season's Greetings
and wish you a most prosperous
New Year

A Total Loss

Si and Hi were courting the same widow.

Hi had his picture taken showing him siting astride a mule.

When the called at the widow's house, Hi. displayed the picture. Si stood gazing at it.

"That's a good photo of me, ain't it, Si?" asked Hi.

"Sure, it looks something like you," snapped Si, "but who the deuce is thet man on your back?"

Chambelain's Cough Remedy the Mother's Favorite

The sothing and healing properties of Chamberlain's Cough Remedy, its pleasant taste and prompt and effectual cures have made it a favorite with people everywhere. It is especially prized by mothers of young children for colds, croup and whooping cough, as it always affords quick relief and is free from opium and other harmful drugs. On sale at Clark's Drug Store.

May Luck Be With You

Here's to the New Year—may it hold for you prosperity tenfold; may it make up to you in worldly goods and health for and losses in the past; may it keep you at the top of the wave, and help us to merit your continued and appreciated patronage.

FIRST BANK OF GENESEE

CALVIN COOLIDGE TALKS.
HE KNOWS WHAT HE WANTS.
AND HE TELLS YOU.
ANOTHER BIBLE VERSION.

A presidential message, telling Congress what the president thinks it should do, and over the head of Congress telling the people why the President thinks he ought to be re-elected must cover many points.

President Coolidge's message deals with foreign affairs, money, prohibition, education our islands, army and navy, coal Muscle shoals, farmers, the bonus, immigration, taxes, railroads, merchant marine, budget, foreign debts, World Court, negroes, Russian, highways, forests, etc.

All this ground President Coolidge covers in a message that has the merit of being free from high flying oratory and the greater merit of being perfectly blunt, outspoken, unmistakable in its meaning.

The farmer is told that he is doing pretty well, on the whole, eleven of his staple products having increased in value from five millions to seven billions. As one farmer talking to another, Mr. Coolidge tells the farmer he must vary his crops. The man in North Dakota would say, "Come out here and do it."

The president thinks the farmer will profit "indirectly" by reduction of taxiation. He won't when he hasn't any income to tax.

On the whole the farmer must look out for himself. The president says, "No complicated scheme of relief, no plan for government fixing prices, no resort to the public treasury will be of any permanent value in estblishing agriculture.

Seven women have been elected to the parliament of Great Britian and will have their say in governing the British Empire. That's very good. Putting seven women in the house of commons is like putting boric acid in the water with which you wash your children's little eyes and noses. Very purifying.

Another version of the Bible is to be published, "The American Bible." Professor Schaff worked thirty years on the translation. J. P. Morgan and Company are interested in the publication.

But the majority will prefer the marvellous language of the old King James version.

"For the stars of heaven and the constellation thereof shall not give their light; the sun shall be darkened in his going forth, and the moon shall not cause her light to shine."

You can't improve much on that kind of English.

Uncle John's Josh

Human Radio

Doctor: "You see, even the electricity in the air affects your system——"

Patient: "Quite true, Doc, there are times when one feels overcharged."

When You are Constipated

In insure a healthy action of the bowels and correct disorders of the liver, take two of Chamberlain's Tablets immediately after supper. They will not only cause a gentle movement of the bowels, without unpleasant effects, but banish that dull, stupid feeling, that often accompanies constipation. For Sale at Clark's Drug Store.

With full appreciation of the many courtesies shown during the past year we extend our best wishes for a Happy New Year, and may the Goddess of Fortune smile upon you.

W. W. P. Co.

Life is very much what we make it, and our season's wish for you and yours is that each day of the coming year for you may be more happy and more prosperous than the day before.
