Miss Effie Westensee arrived Sunday from Colville for a visit at the Rader home.

Miss Maggie Nesbit left Tuesday for Moscow after a visit her with oldtime friends.

Miss Idah Peterson returned to her home at Clarkston after a visit at the Peterson ranch.

Miss Carrie Mae Hickman came up from Lewiston and spent the week-end with home folks.

Mr. and Mrs. Wm. Rader left Monday morning for Prosser, Washington, where they will reside.

Miss Lillian Luvaas of Moscow was visiting friends in Genesee for a short time Sunday afternoon.

Mrs. Dickey, Mrs. Ira Hanson and Mrs. F. C. Shork motored to Colfax Monday and spent the day.

Mr. and Mrs. Paul Cameron and little sons arrived Tuesday for a visit with Mr. Cameron's mother.

Miss Alfrieda Hampton arrived home Friday from a visit with relatives at Asheville, North Carolina.

Mrs. Geo. VanBuskirk and children, Seneth and Raymond, were Wednesday morning passengers for Pullman.

Mr. and Mrs. Joe Gunther and children left Tuesday morning for Puyallup, Washington, where they intend to locate.

Mrs. Chas. W. Smith returned home Tuesday from Spokane where she had been visiting her parents since before the Fourth.

Miss. Evangeline Fix has returned to her home at Walla Walla after a visit at the home of her aunt, Mrs. J. H. Rader.

Mrs. Dave Johnson and Will Geltz arrived Tuesday from Seattle for a visit with relatives and friends, both having been former residents of Genesee.

Dr. and Mrs. F. B. Evans returned last Thursday from a short stay at Spokane. They were accompanied home by Mrs. B. W. Evans and little son who will visit at the Evans home.

Mr. and Mrs. Geo. Williams and son, Charles, returned to their home at aKlama, Washington, last Friday after a few days' visit with Mrs. Williams' cousin, W. M. Herman, and wife.

Rev. Fr. Ferd. Hoorman left Sunday for California points after a two-weeks visit with his brother, Frank Hoorman, and wife. Fr. Hoorman was very favorably impressed with this section of the country and says he may come back here after a few years to make his home.

Mr. and Mrs. J. F. Mourning of Mabton, Washington, Miss Margaret Hawkins of Kennewick and Miss Driscoll of Pasco arrived the first of last week for a visit with Mrs. Mourning's mother, Mrs. E. Linehan. Mr. Mourning and Miss Hawkins returned to their homes Thursday while Mrs. Mourning and Miss Driscoll remained for a longer visit.

Mr. and Mrs. G. H. Rosenau motored down from Spokane the latter part of last week and are spending a few days here looking after ranch interests and visiting their children and other relatives. Mr. and Mrs. Rosenau recently returned from Santa Ana, California, where they had spent the past 18 months. They have purchased property at 1012 E. Nora, Spokane, and will again make that city their home.

PERSONAL MENTION

Mrs. Herbert Potsch spent Saturday in Pullman.

Elmer Stovall left last Friday morning for Dayton, Washington.

Chas. Scharnhorst was a Genesee visitor from Clarkston Monday.

N. A. Nelson left Tuesday morning for Garfield, Washington, for a short stay.

Miss Lillian Olson left last Thursday for Moscow where she is employed.

Jesse Myers returned to Harrison Wednesday after a visit here with relatives.

Miss Effie Westensee arrived Sunday from Colville for a visit at the Rader home.

Miss Maggie Nesbit left Tuesday for Moscow after a visit her with oldtime friends.

Miss Idah Peterson returned to her home at Clarkston after a visit at the Peterson ranch.

Miss Carrie Mae Hickman came up from Lewiston and spent the week-end with home folks.

Mr. and Mrs. Wm. Rader left Monday morning for Prosser, Washington, where they will reside.

Miss Lillian Luvaas of Moscow was visiting friends in Genesee for a short time Sunday afternoon.

Mrs. Dickey, Mrs. Ira Hanson and Mrs. F. C. Shork motored to Colfax Monday and spent the day.

Mr. and Mrs. Paul Cameron and little sons arrived Tuesday for a visit with Mr. Cameron's mother.

Miss Alfrieda Hampton arrived home Friday from a visit with relatives at Asheville, North Carolina.

Mrs. Geo. VanBuskirk and children, Seneth and Raymond, were Wednesday morning passengers for Pullman.

Mr. and Mrs. Joe Gunther and children left Tuesday morning for Puyallup, Washington, where they intend to locate.

Mrs. Chas. W. Smith returned home Tuesday from Spokane where she had been visiting her parents since before the Fourth.

Miss. Evangeline Fix has returned to her home at Walla Walla after a visit at the home of her aunt, Mrs. J. H. Rader.

Mrs. Dave Johnson and Will Geltz arrived Tuesday from Seattle for a visit with relatives and friends, both having been former residents of Genesee.

Dr. and Mrs. F. B. Evans returned last Thursday from a short stay at Spokane. They were accompanied home by Mrs. B. W. Evans and little son who will visit at the Evans home.

Mr. and Mrs. Geo. Williams and son, Charles, returned to their home at aKlama, Washington, last Friday after a few days' visit with Mrs. Williams' cousin, W. M. Herman, and wife.

Rev. Fr. Ferd. Hoorman left Sunday for California points after a two-weeks visit with his brother, Frank Hoorman, and wife. Fr. Hoorman was very favorably impressed with this section of the country and says he may come back here after a few years to make his home.

Mr. and Mrs. J. F. Mourning of Mabton, Washington, Miss Margaret Hawkins of Kennewick and Miss Driscoll of Pasco arrived the first of last week for a visit with Mrs. Mourning's mother, Mrs. E. Linehan. Mr. Mourning and Miss Hawkins returned to their homes Thursday while Mrs. Mourning and Miss Driscoll remained for a longer visit.

Mr. and Mrs. G. H. Rosenau motored down from Spokane the latter part of last week and are spending a few days here looking after ranch interests and visiting their children and other relatives. Mr. and Mrs. Rosenau recently returned from Santa Ana, California, where they had spent the past 18 months. They have purchased property at 1012 E. Nora, Spokane, and will again make that city their home.

A Rare Musical Treat

A rare musical treat is in store for music lovers of Genesee and surrounding community next Wednesday evening, July 18, when Geo. Nelson, Miss Mildred Nelson and Miss Josephine Olson, assisted by a local ladies' double quartet, will give a vocal and instrumental entertainment at the Federated church.

Mr. Nelson was heard at the opera house last Saturday night and all who heard him were more than pleased. At the coming entertainment he will have a repertoire of songs that will please all.

Miss Olson is a singer of note and has been on the legitimate stage for the past several years. She is considered one of the very pleasing singers before the public today.

Mr. Nelson and Miss Olson will be accompanied by Miss Mildred Nelson, who will also give instrumental selections.

An admission charge of 25 and 35 cents will be made.

Were Genesee Visitors

Mr. and Mrs. Morrison of Medical Lake, Washington, arrived in Genesee the first of the week and spent a day or two visiting relatives and friends. They went from here to Reubens for a visit with Mr. and Mrs. Barney Meyer and later to LaGrande, Oregon, for a visit with Mr. and Mrs. Clyde Meyer. Mrs. Morrison was formerly Mrs. Henry Meyer of Genesee.

Big Bowery Dance

There will be a dance given at the Lenville Bowery Saturday night, July 14. Music furnished by Hanson's orchestra. Tickets, $1. Lunch served.

We have taken over the agency for the Lewiston bakery and are now prepared to furnish you bread, doughnuts, rolls, etc. Hotel Genesee. 52-tf

New Goods Announcement

WE ARE SHOWING at this time a large assortment of new goods, which are on display in the different departments of our store, including new piece goods, bathing suits for men and women, McKibbon hats and caps---Star brand shoes for all members of the family.

NEW NOVELTIES

New chain girdles, each	25c and 50c
Camasole vesties, each	$1.00
New Bertha collars, each	$1.45
New collar and cuff sets, each	.50

Ladies' Ready-to-Wear Goods

Ladies' bungalow aprons, each	$1.25
Ladies' jumper aprons, each	1.75
Ladies' rubber aprons, each	50c and .85
Ladies' all wool bathing suits, each	4.00
Misses' all wool bathing suits, each	3.00

New Materials In Piece Goods Department

32-inch toile du nord gingham, yard	38c
New devonshires, yard	35c
New Jap and serpentine crepes, yard	35c

Piece Goods Specials

All 27-inch high grade ginghams, yard	20c
All 29-inch flaxons, special, yard	20c
All 40-inch organdies and voiles, yard	35c

GENTS' FURNISHINGS

Men's straw and crash hats, each	15c to 85c
Boy Scout hats, each	$1.75
Men's Panama hats, each	2.50
Men's high grade work shirts, each	1.00
Men's Prosknit shirts and drawers, each	.65
Men's E. & F. socks, brown and black, pair	.20
Men's fine quality gray wool hose, pair	.50

Men's Work Shoes

Boys' Defiance work shoes, pair	$2.00
Men's "Opener" work shoes, pair	2.50
Men's chocolate work shoes, pair	3.25
Men's 408 chocolate 8-inch work shoes, pair	4.00
Men's E. & J. Railroader work shoes, pair	4.00
Men's Soft and Good, soft tip, work shoes,	5.00
Men's E. & J. officer 8-inch work shoes	6.50
Men's khaki pants, pair	1.75
Men's extra quality pants, pair	3.50
Men's athletic union suits, each	1.00

Days of Reel Sport Among the Head-Hunters

By HERBERT CROOKER.

Civilization, according to Noah Webster, the prolific compiler of the dictionary, is the state of being civilized.

Civilization might also be called an institution, and there are people who like to live in institutions and others who do not. Uncivilized people are probably just as well satisfied as those who use telephones and paper napkins. It's just according to how you look at it.

We call ourselves civilized and perhaps we flatter ourselves. In many cities at the present time there are young people who have been establishing records. They have proven their endurance by fox-trotting for ninety hours or so without stopping. Shoes have been worn out and any number of pairs of stockings have succumbed to the endurance tests of the terpsichorean mad.

But what would our civilized prancers on the ball room floor think of a dance lasting for thirty days and nights without a rest. And performed by savages and sirens of the South Seas! This cannot be sneered down, for it is one of the startling disclosures made in the new Pathe picture, "Black Shadows."

Here we see an uncivilized people outdoing a civilized people in a form of amusement that is mutually engaging. It makes no difference whether the Tango, the Shimmy, or the Head-hunters' Dance of Victory was performed. The same idea is back of the enthusiastic prancing.

But to return again to the subject of civilization—and this time along a different line—we might speak a bit of methods of warfare. In our recent war a lot of things were done which were not a bit nice. I am sure that little sister is glad she was not present. And in warfare the savage also has his own ideas — uncivilized, of course.

When the head-hunter of the South Seas went into battle, he went in with one idea, and he did not need the certificate or diploma of his local barber college to show how proficient he was at his art. He was a distinctive warrior — a head-hunter — and he knew what was expected of him.

Of course not all the different lodges of the South Seas wax with the same enthusiasm when it comes to warfare. Lodge No. 62 of the Marquesas islands presents a spot where civilization has laid a restraining hand upon a barbaric race that was once cannibalistic. Members of the Ebony brotherhood on the island of Moto Utu, guarding the Bay of Papeete, and the Pago Pago gentlemen, as well as the other Samoan island lodges have fallen under the appetizing influence of the hard-boiled egg and potato salad. They now enjoy picking on the drumstick of a local bird of gorgeous plumage rather than the shinbone of one of their fellow members.

Going southward, the thread of civilization grows more slender at the island of Bou, the largest of the Fijis, and at the island of Malliculo, one of the New Hebrides, many of the natives have never seen a white man. It is at the Solomon islands, the home of the barbaric head-hunter, where civilization shows no mark.

According to Edward G. Salisbury, who filmed and produced "Black Shadows," a head-hunter can often act very much like a gentleman. It is all according to how he feels. Mr. Salisbury is one of those intrepid chaps—the kind of a fellow who starts out to do something and usually accomplishes it.

"I think I'll see if I can't film a head-hunt," he said to himself, as he gazed at the group of warriors on the beach. And Salisbury must be given due credit, for the first time he picked up a native's spear, he inquired what the sharp spear-head was made of. When he learned that it was made from a human shin-bone, he didn't take the next boat northward, either.

The explorer's associates were dubious when they learned of their leader's desire of photographing a head-hunt. The missionary, who acted as interpreter, did not show a great amount of warmth over the proposition. The effect was feared. There was a possibility that the staging of a head-hunt might arouse the sleeping passions of the natives. Finally everyone concerned yielded to Mr. Salisbury's arguments.

Chief Gau, one of the most ferocious of the head-hunters, was to be consulted first. His power as a leader had won him the name of the terror of the Solomon islands. A knife and a gaily decorated hatchet were the explorer's presents to denote good will.

When Chief Gau listened through his interpreter and learned that Salisbury wanted to see a head-hunt, he promised to call his warriors in from all parts of the island. But he could not comprehend the meaning of moving pictures. There were no combination of words in the comparatively few gutteral sounds of his language which could convey the meaning.

The American then reverted to superstition. He informed Gau that he had a magic eye which could always see again anything it ever beheld, and that what his magic eye saw, his followers who looked into it when he returned home could also see. Salisbury further informed Chief Gau that his own warriors of the North had heard of the fighting ability of the warriors of the Solomons, and that he wished his magic eye to see for them that they might learn. More presents were passed over to the great chieftain and to his lieutenants.

When the picture camera was brought forth, and a few incidental "shots" were taken of individual warriors, Salisbury found that his greatest difficulty was to prevent the savages from staring into the camera when they were assembled for the filming.

That "magic eye" fascinated them. It was indeed a problem. But by saying that to look at it was "taboo" and that its mysterious spirit would bring down terrible punishment on whosoever stared into it, the producer of "Black Shadows" was soon able to induce them to go ahead and act like real actors, actresses and "extras," just as though the camera were not there.

As the filming progressed, things became easier. The hunt ceased to be acting. Salisbury declared that, if the savages had not all been under the influence of the mighty Gau, his screen production would have ended in an actual battle with heavy casualties. The likelihood of such an outcome became so apparent that, before the fighting began, all the bone barbs were removed from the spears. Salisbury had observed different warriors in battle practice — practice that often brought serious wounds, so fierce were the onslaughts—hence his precaution.

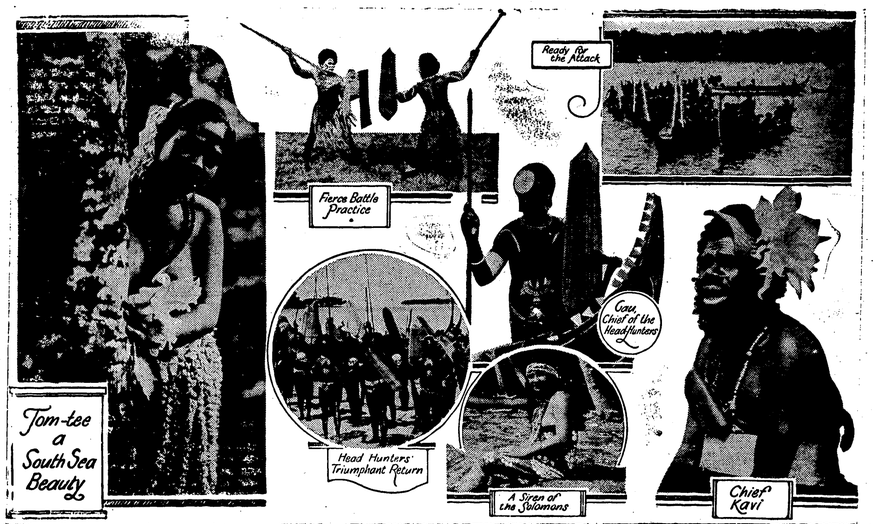
Gau made his attack by water, and when his warriors landed, Kavi's men poured out of the woods and attacked the sleeping village from the rear and the battle was on. Volleys of spears were exchanged and arrows left bows with lightning rapidity. Gau's warriors came in from all sides as war canoes were emptied, forcing the outnumbered villagers to retreat.

Then both sides lost their heads. They jabbered and hammered at one another in deadly earnest, while Gau, perched on the top of the wall, jumped up and down, waving spear and shield, cheering his men on. The villagers made a determined stand before the last wall, but it was hopeless. They were completely overwhelmed by the shrieking savages who poured in on them.

Gau and Salisbury realized what was happening at the same moment. The head-hunter sprang from the wall and the American deserted his camera to separate the struggling mob. When order was finally brought about, many of the savages were bleeding from wounds. The result was the most exciting and realistic screen-fight ever filmed.

And then came the home-coming of the victorious with their captives. The war canoes speeding through the water, propelled by the rhythmic stroke of the many paddles, presented a thrilling sight, but this was easily surpassed by the Head-hunters' Dance of Victory. On and on the wild dance whirled with the savages swirling and shrieking and going through their war contortions.

"And standing outside the circle," Salisbury relates, "watching, his face expressionless, was Chief Gau, greatest of the head-hunters, dreaming, perhaps, of the hundred times that all this had been reality, or, it may be, of a time when it would become real again.



Saving Lives With War's Deadly Tools

Poisonous Gases and Acids Now Being Used in Interests of Peace, Commerce and Life.

How the war gases are now being used to save lives is told by Prof. C. M. Brewster of the chemistry department of Washington State college. He says:

"Among other wastes of the great war, we have always included the time spent in creating devices to be used in destruction, for most of us have thought that these discoveries of devices and materials could be applied only in war and only for the original destructive purpose.

"To be sure, while the war was in progress we may have noticed that the same compounds which are used in peaceful industry had important waruses, resulting in great shortage and hampering of industry.

"Picric acid, in peace time used as a yellow dye, in war was used in vast quantities as an explosive for shells. It also has antiseptic properties making it valuable, when in proper dilution, in treatment of wounds. Thus it often happened that picric acid was used in a base hospital to cure the wound that picric acid itself had caused.

"The principal explosive used by the American forces was made from the toluene of coal-tar, and was called trinitro-toluene, or T N T. Recently this has been used as a base for making a new green dye, which is not only useful for coloring cloth, but has been found effective as a germicide in medicine.

"The possibility of preventing spread of contagion by use of certain war gases or so-called poison gases, has been reported as demonstrated by experiments being conducted by the chemical warfare service at Edgewood arsenal, Maryland.

"While these gases were being made during the war it was noticed that few of the men engaged in making chlorine gas were taken ill from the flu. Through experiments with this gas, in extreme dilution of course, army chemists state that epidemics of influenza, grippe, or colds may be checked almost instantly through introduction of small amounts into the rooms occupied by those who are to be exposed.

"Mustard gas, which caused so many casualties during the war, where it was used in shells in liquid form, is now reported to be beneficial in treatment of tuberculosis when used in proper dilution. This has apparently been demonstrated by the experiments conducted by scientists under the direction of Lieutenant-Colonel Vedder of the army medical corps.

"Guinea pigs inoculated with tuberculosis germs and then with very dilute mustard gas apparently were rendered immune by the gas and all failed to contract the disease. At the same time an equal number of guinea pigs inoculated with tuberculosis germs and not subjected to the mustard gas treatment all contracted the disease.

"The war gas known as Lewisite, developed in the United States by Prof. Lewis at Northwestern university, was being made in quantities just before the armistice, and is more toxic and dangerous than mustard gas. It is a burning gas, made from arsenic and acetylene, and is extremely poisonous. As a result of experiments at Edgewood it has been discovered that Lewisite and related compounds are most beneficial in the treatment of paresis and locomotor ataxia. Dr. Loevenhart of the University of Wisconsin, who did a great deal of work with Lewisite, has the records of some 42 cases of persons committed to hospitals for the insane with paresis, which have come under his treatment by this method. Of that number 21 have been entirely cured and have left the hospitals and taken up lucrative employment, and seven more bid fair soon to be discharged as cured.

"While we may consider these reports with due conservatism, it is evident that without the discovery of these substances in time of war, they might not now be available for experimentation, and we may therefore welcome all serious experimentation, for no one can tell what modification or correlation of results may be of ultimate benefit to mankind. In the present instance it is apparent that substances originally created with a desire to provide formidable weapons are being made to serve a more beneficent purpose, that of saving lives."

First Golf in America.

The origin of golf seems wrapped in mystery, the honor apparently lying between Scotland and the Netherlands, and most of us arbitrarily awarding it to the land of our own descent. Of course the game largely as we know it came to us from Scotland, and as early as 1457 it had become so popular there that the Scottish parliament of that year found it necessary to pass a law against it. The people were giving so much time to the game that they were neglecting the practice of archery upon which the safety of the country depended. This law not proving as efficacious as desired, another act was passed fourteen years later. The country seemed wedded to golf; and we must, at least, arrive at the conclusion that if Scotland did not originate the game, she knew a good thing when she saw it, and at an early date assimilated it more completely than any other country of which we have record.

The first discovered date of golf in America was 1794, and the honor of being the first place where golf was played on the American continent belongs to the city of Charleston, South Carolina. An advertisement published in the Charleston City Gazette on October 13, 1795, conclusively proves that the game was regularly organized at that early date, with the necessary officers, club-house, and greens, and that the organization was continued annually for at least six years thereafter, and probably much longer.

The first advertisement follows—the word "Anniversary" indicating that the club had then been in existence for a year:

NOTICE.

The Anniversary of the GOLF CLUB will be held on Saturday next, at the Club House on Harleston's Green where the members are requested to attend at one o'clock.

William Milligan, Secretary.

WASHINGTON'S PEN IS SELF-SUPPORTING

All the clothing worn by inmates of state institutions, except hats collars, ties and the hosiery that is given inmates upon their discharge, now is made by the state's own industrial plants. Most of the work is done at the state penitentiary, but the girls' and boys' training schools help as much as possible and some of the patients at the asylums do their own sewing.

The state penitentiary shoe factory supplies practically all the needs of the institutions this year, while uniforms and clothing for male inmates, even including cotton gloves, are made by the prisoners. The penitentiary automobile license plate plant will have five months' work this year making the 1924 plate and also filing extra orders for 1923 plates.

All of the state institutions are showing a constant increase in population, the asylums leading. The custodial school has a large list of children waiting for admission. No provision was made by the legislature for extra building and it is impossible to take care of all those who should be cared for by the state.

U. S. Owns All Helium.

Uncle Sam has practically all of the known helium in the world in his control and is going to put it in gigantic airships as soon as he can build them.

Already a huge ship is under construction at Lakehurst, New Jersey, while over in Germany a sister ship is being built.

The ship from Germany must be delivered C. O. D. this time, the government having lost two ships before they were delivered. This big ship will be sailed across the Atlantic.

These huge craft will be the only helium airships in the world, and since the United States controls the supply, there can be no others unless Uncle Sam says so or unless some smart foreign chemist discovers some way of making helium.

A livestock tour through a county gives those attending a splendid opportunity to see how the other fellow does things.

Mighty Tanks Line Up in Readiness for War

Washington.—Mighty battleships of the dry land are being developed by the U. S. army for the "next war."

Great, blunt-nosed monsters. Thirty tons of the strongest steel. Roaring gasoline engines of 328 horsepower. Armor plate as thick as your finger. Caterpillar treads that crush barbed-wire entanglements like they were the merest spider webs and step across wide trenches.

The World war brought forth the tank, but it was poorly developed then. Even so, the opposing infantry stampeded before them every time. The kaiser's best trained troops ran like scared jackrabbits and the allies' men did the same.

Stage Steel Charge.

In a dense forest on the Camp Meade military reservation near here the other afternoon, they staged "The Charge of the Tank Brigade." From the foliage-obscured distance arose a muffled throbbing, following a rending, tearing, crashing noise and the swish of falling trees.

Powerful steel monsters, as big as street cars, crashing along at two miles an hour, pushing down trees like a relentless juggernaut as big as a man's body. Several times a particularly big tree resisted the blunt-nosed monster's approach; the latter merely backed off a little and "bucked" it, with the result that tree went crashing to the earth. At the end of an hour, that forest looked like a cane brake in which a herd of wild elephants had run amuck.

Wireless Is Aid.

A quarter of a mile across the field a herd of steel tanks was lined up, quietly awaiting command. Just in front of the grandstand was a baby radio tank, its upraised aerial resembling the naked frame of an umbrella.

"Proceed," Colonel Rockenbach ordered the radio operator.

"Proceed," repeated the operator into his instrument.

The word was barely out of his mouth before the muffled roar of powerful engines getting under way came rumbling across the field.

First came the big tanks, casting their own smoke screen ahead of them. Then, emerging from the haze that was as thick as pea soup, then lumbered out into plain view. Their six-pounders were thundering away, port holes on each side belching forth flashes of yellow flame. The rattle of machine guns added to the din. Or they went at five miles an hour until they slipped from view over the crest of a steep embankment.

Tank Herd Follows.

Then followed the herd of baby tanks, snaking back and forth across the field and looking for all the world like so many baby elephants following their parents.

The others had lumbered along at five miles an hour, but it dashed across the range at 12 miles per hour. As it sped rapidly across the field, turning, twisting and maneuvering with almost the ease of a Ford automobile, you could almost picture terrified infantrymen fleeing before it.

"The latest word in army tanks," repeated Colonel Rockenbach, "but still not what we want. We want one that will travel 12 miles an hour across a battlefield and do 20 miles an hour over a road."

Device of the Devil.

When, in 1885, it was proposed to light the government railway stations of Belgium with electricity, a member of the Belgian Legislative Chamber arose and spoke at length against electric lights, on the sole ground that they "were the invention of the Devil." —Public Utilities.

The school master was calling on an indignant mother.

"For my part," babbled the good woman, "I can't deceive what on earth edufitication is coming to! When I was young if a gal only understood the aillments of distraction, provision replenishing, and the common denominator, an' knew all about their dormitorels, the provinces and umpires, they had eddification enough."
—Ex.

IDAHO VILLAGE IS MOVING DOWN RIVER

Whole Town Being Floated to New Site by Use of Scows and Tugs.

One of the oddest moving operations ever known to this country is being completed on the Pend d'Oreille river, which is being used as the highway for the transport of a village more than 10 miles.

The reason for the operation, which is said to entail a cost of $20,000, is the destructive fire which wiped out the mill, frame factory and yards of the A. C. White Lumber company at Laclede on August 17, 1922. Mr. White shortly after the fire purchased the idle plant and millsite of the Dover Lumber company, two miles west of Sandpoint, and about 10 miles upriver from Laclede.

With the reconstruction and enlargement of the Dover mill proeprty, the addition of a frame factory and dry kilns, came the need for more and better housing facilities. The White company owned 41 residences at Laclede and had need of fully that many more at Dover. As a result the company gave a contract to the Northern Navigation company of Sandpoint, of which E. J. Elliott is president, for the transportation of the 41 houses from Laclede to Dover, including the moving from the original site to the river and from the river to the new site at Dover.

Thirty of the houses were moved last fall, before the river froze over, and the finishing work will be completed within a few days. The navigation company is using a small tug to do the towing.

Torgan: "Since you lost the bet, I think I can claim the forfeit."

Doris F——: "I really don't know what you mean; besides, someone might see us."—Ex.

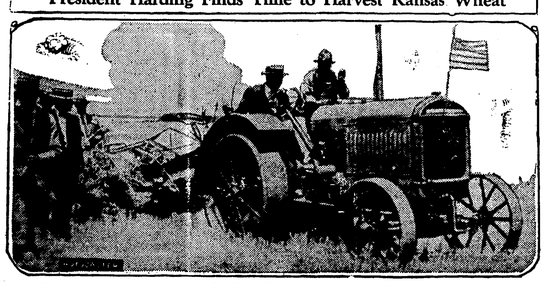
President Harding Finds Time to Harvest Kansas Wheat



A Kansas harvest-sun beat down on President Harding as he gave 'er the gas and threw the tractor into gear to start the wheat-cutting season near Hutchinson, June 25. Then the President gathered up bundles and "shocked" them with the remark, "This is how we do it in Ohio."

DAIRY

The current issue of the Jersey Bulletin ranks Morocco Pioneer, sire of the Glen Tana Jersey herd on the Little Spokane, fifth for the United States in progeny represented in the list of cows producing 50 pounds or more of butterfat per month. Morocco Pioneer has six daughters in the list and one granddaughter, his son being the father of one cow in the list. According to T. S. Griffith, owner of the Glen Tana herd, only four Jersey bulls in the United States have more of their offspring in the list.

The Boundary Holstein-Friesian association is now a going concern, reports County Agent R. E. Alexander of Boundary county, Idaho. Six blocks, consisting of 240 cows owned by 28 farmers, have been formed. The bulls have been purchased and placed.

To represent the state of Washington in competition with American states and provinces at stock shows and dairy congresses this year, a committee of west side dairymen has selected nine Holsteins from the Hazelwood herd of Spokane, for places on the all-state herd. Nine places were awarded to the west side herds. The state herd is being backed by the Washington Holstein-Friesian association.

For the past four years farmers have entered each year an average of 209,000 cows in cow-testing associations organized with the assistance of county agricultural extension agents, to determine whether or not the cows with proper feeding and care could produce sufficient butter fat to pay for the expense of keeping them on the farm. The number of cows entered in 1922, according to reports to the United States Department of Agriculture, was over 270,000.

Boys' and Girls' Farm Club Work

Over 62,000 negro farm girls in the 15 Southern states enrolled in agricultural extension clubs in 1922 to learn better methods of food preparation and preservation, construction and care of clothing, care of home, poultry and dairy work, and gardening. More than 70 per cent of these club members, according to reports to the United States Department of Agriculture, completed the entire year's work as planned by agricultural extension agents.

Whose Job Is Is?

Club members, whose job is it to make a success of your club?

Are you expecting your leader to do it all, or are you thinking ahead and planning to carry your own load? It is your job—there is no getting around that fact. The leaders are all busy people, don't let their club add such a burden that they will wish they had not consented to act as leaders.

Club officers and committees in some clubs do all of the following:

Think of the meeting days and go see the leader ahead of time to talk over plans; call meetings, and remind members to come. Plan programs for each meeting with advice of leader. Visit club members and see that the work and records are in good shape. Send in reports of meetings to county agent or state office. Also write for supplies and send in news stories for the Club Record.

Health Goals.

Several clubs have health goals. We like to feel that club members regard the health as highly as the other three—head, hand heart.

It scales are available it would be interesting to find how many members are with the average health range in weight (not more than 10 per cent below normal average, nor more than 20 per cent above).

Keeping the food habits score card for a week to see how nearly you are following correct diet standards is another interesting thing. You get weight tables and food habits score cards by writing to the Extension Service.

LIVESTOCK

During May 553 persons filed with the department written agreements to use pure-bred sires exclusively in their livestock breeding operations for all kinds of animals kept, including poultry. This number is more than twice that for the preceding month and much above the average for the entire "better sires— better stock" campaign. The total number of livestock owners now co-operating in this work is 10,964.

A hog which remains in good health from the day he is farrowed until he is loaded on a market-bound train is usually a satisfaction to the farmer, the packer, and the consumer. But there are many diseases and parasites which beset him during the few months allotted for his economic performance. If this performance is to be a creditable one, says the United States Department of Agriculture, the hog grower must keep close watch over his herd and learn to know something of the symptoms which indicate the possible approach of dangerous disease.

Hog cholera is the great enemy of the swine industry, although it has been diminishing in importance as a result of widespread use of antihog-cholera serum. It has been reduced by about 60 per cent from the losses during the most disastrous years, but with greater care and better understanding of the plague it could be reduced to a much greater extent.

With the gradually increasing control of this disease, it is important that swine growers give attention to the many other ailments which cause losses, some of which are frequently confused with cholera. Among the diseases with symptoms confused with those of cholera are aonthrax, epilepsy, gastroenteritis, necrobacillosis, pleurisy, pneumonia, poisoning, swine plague, tuberculosis and worms.

When there is anw deviation from the normal in gait, appetite, or digestion, it is time for the owner to take measures to prevent possible losses. Minor ailments often can be successfully treated by the owner, but in case of doubt it is the part of wisdom to call for a veterinarian.

GOVERNMENT CO-OPERATES IN IRRIGATION COSTS STUDY

A study of farm organization and cost of production on irrigated farms in the Yakima Valley, commenced a year ago, will be resumed this season by the Washington State Agricultural Experiment Station with the U. S. Department of Agriculture co-operating again, according to word just received by Director E. C. Johnson of the station from H. R. Tolley of the Bureau of Agricultural Economics.

A careful study was made last year of 175 irrigated farms, and a particular report of the business analysis of these farms was prepared and sent to all the farmers who co-operated, early this year.

In August field studies will be made by Prof. George Severance, head of the division of farm management of the station and of the State college, with G. Orien Baker of Clarkson as his assistant, and S. B. Nuckols of the U. S. Office of Sugar Plant Investigations, with E. R. Johnson of the Office of Farm Management and Farm Economics.

At the close of this year's field studies it is planned to summarize results of the two years' work and publish them in a bulletin for the use of farmers in irrigated sections.

Railroads Assure Plenty Freight Cars

Northwest to Be Given Preference on Empties During Fruit Season.

Assurances that fruit growers of the northwest can depend upon a better car supply during the shipping season than last year, unless something unforeseen occurs, was voiced by the representatives of four transcontinental lines, which serve the fruit sections of the state.

"The Northern Pacific railway for the last 90 days has been tracing all of its refrigerator cars in preparation for the heavy movement of perishable crops, which has already begun," said George R. Merritt, who is in charge of the refrigerator service of the Northern Pacific, with headquarters in St. Paul. "We have approximately 2000 more refrigerator cars a day now than at the same time last year and hope to handle the entire crop without a shortage. Berries and cherries are now moving out of the Yakima valley districts, and lettuce is also moving to points in the east, middle west and south."

J. W. Pewters, general agent of the Great Northern, declared that his road had, through the refrigerator car service division of the American Railway association, taken measures to prevent the recurrence of a shortage. An effort is being made to bring all cars back to the fruit district before the first of July.

The Chicago, Milwaukee and St. Paul and Union Pacific railways are taking similar steps in returning refrigerator cars.

Saving What You Grow

Prepared by the Extension Service, State College of Washington

KEEPING FOOD WITHOUT ICE

Keeping food without ice, has been overcome to a large extent by the home-made iceless cooler. This convenience may be made by anyone who has a saw and hammer.

The iceless cooler is a screened framework of open shelves, having a solid base, a solid wooden top and a screened door with a curtain constantly kept moist by means of a pan containing water, set upon the top of the cooler with wide wicks of material which serve as carriers of the water from the pan to the curtain.

The size practical for a small family measures 42 inches high, 14 inches wide and 16 inches deep. A large cooler may be made 48 inches high, 16 inches wide and 18 inches deep.

There are two methods used in building the box part: 1, by taking a grocery or merchandise box and cutting out large openings on all four sides, leaving enough at the corners to make the framework strong; 2, building the framework of 1x2 inch material and fastening to a solidly built wooden top and bottom.

After the framework or box has been made, cover three sides with galvanized screen and make a screen door for the front. The shelves should be movable and made of slats so as to allow the air to circulate in the cooler.

Curtains for the box may be made of either used or new material, canton flannel, outing flannel, cotton or woolen blanket material or burlap. Make the curtain in two parts, one to fit the door, leaving the rest sufficiently large to cover the remaining three sides of the cooler. Hang the curtain with loops, upon screw eyes around the top of the cooler.

When ready for use, place a pan of water on top of the cooler and put a number of wide wicks made of cast-off woolen socks, split open, or pieces of old woolen blanket in the water. These should feed the water from the pan to the curtain. A pan to catch the drips may be placed under the cooler.

The coolness of the iceless depends upon the evaporation as the water flows down through the curtain. Evaporation takes place and heat is drawn from inside the box.

HELPFUL HEALTH HINTS

Sty on Eye.—A poultice of fresh tea leaves moistened with water will usually cure a sty on the eye. Another cure which is said to be good, is a gold wedding ring rubbed gently on the sty.

Light Hair.—If you have light hair and wish to keep it so, put a little lemon juice in the last rinsing water.

Iodine.—After using iodine do not bandage the effected part. It will cause a severe burn.

Did the Trick.

"This artificial bait does not seem to accomplish its purpose."

"How so?"

"It doesn't catch any fish."

"But it caught you, didn't it?"

Bobby—"Daddy, ook! There's an airplane."

Absorbed Daddy—"Yes, dear, don't touch it."—Ex.

PLYMOUTH TWINE

A Straight Tip

THERE is a real saving in the use of Plymouth Twine, to say nothing of the satisfaction, over the cheap kinds which do not have the necessary strength and uniformity, and which are invariably under measurement.

A recent comparison of a ball of

PLYMOUTH TWINE

with that of another make which was made in the field last season showed that it would take 135 pounds of the cheap twine to bind the same amount of grain that 100 pounds of Plymouth Twine would tie. The cheap twine was not only greatly under measurement, but was decidedly inferior in quality and strength.

Better take no chances; place your order for Plymouth Twine with us and get full length and strength, which is guaranteed by the Plymouth Tag on each and every ball.

Biliousness and Constipation

"For years I was troubled with biliousness and constipation, which made life miserable for me. My appetite failed me. I lost my usual force and vitality. Pepsin preparations and cathartics only made matters worse. I do not know where I should have been today had I not tried Chamberlain's Tablets. The tablets relieve the ill feeling at once, strengthen the digestive functions, helping the system to do its work naturally," writes Mrs. Rosa Potts, Birmingham, Ala.—For sale at Clarks' Drug Store.

Blue Bird Club

The Blue Bird club met Tuesday afternoon at the home of Mrs. M. J. Schei and a very pleasant time is reported.

The program consisted of a reading by Mrs. Hafson and a reading by Miss Mildred Schei.

Delicious refreshments were served by the hostess who was assisted by her daughter, Miss Mildred.

The invited guests were Mrs. Jas. Nelson, Miss Mildred Nelson, Mrs. John Hove and Mrs. Fred Hove.

There will be no more meetings of the club until September 1.

The Doctor Knew Better

Pat had the misfortune one day to fall from the second story of a house just being completed. Mike, his friend, saw him fall and immediately called an ambulance, which, in due course of time, arrived.

The surgeon gave one look at Pat's still form and pronounced him dead.

Pat, who was just coming to, heard him, and rising to a sitting posture, replied, "You're a liar; I ain't."

Mike was standing nearby. He touched Pat gently and said: "Lay down, Pat! The doctor knows better!"

SUMMONS

In the District Court of the Second Judicial District of the State of Idaho, in and for the County of Latah.

Anna Burns, Plaintiff, vs. John Burns, Defendant.

The State of Idaho sends greeting to the above named defendant:

You are hereby notified that a complaint has been filed against you in the District Court of the Second Judicial district of the State of Idaho, in and for the county of Latah, by the above named plaintiff, to procure a decree of divorce from the said defendant on the grounds of wilful neglect and to procure the custody, care and control of a minor child, George Meacham Burns.

And you are hereby directed to appear and answer the said complaint within twenty (20) days of the service of this summons, if served within said judicial district, and within forty (40) days if served elsewhere; and you are further notified that unless you so appear and answer said complaint within the time herein specified, the plaintiff will take judgment against you as prayed in said complaint.

Witness my hand and the seal of said District court, this third day of July, 1923.

W. W. P. Co.

NOTICE OF SPECIAL ELECTION

To the qualified voters of the city of Genesee Idaho: you will take notice, that the city council of the said city pursuant to section 3940 of the Idaho compiled statutes, as amended by the session laws of 1923 at page 229, hereby calls a meeting to consider a tax levy in addition to ten (10) mills for municipal purposes.

The assessed valuation of all property in the city for the preceding year was $264,929.59: a ten (10) mill levy will raise $2649.29: an estimate of the money to be raised to pay the expenses of the city is $4000.00: the purpose for which money levied in addition to the said ten (10) mills is to continue the city government efficiently: a meeting will be held at 7:30 p. m. on the 16th day of July, 1923, at Burr's office.

Only qualified electors of said city are entitled to vote: it will require two-thirds of those present and voting to authorize any levy in addition to the said ten (10) mills; only electors qualified to vote in the city of Genesee at a general election will be entitled to vote at such a meeting: if at such meeting two-thirds of the qualified voters, present and voting, vote in favor authorizing the city to make a levy in addition to the said ten (10) mills, as provided in the session laws of 1923, in any amount not exceeding five (5) mills on the dollar, such city council shall be authorized to levy such additional mills authorized not exceeding the said five (5) mills.

Dated at Genesee, Idaho, this second day of July, 1923.

Attest: JOHN MEYER,
W. W. BURR, Mayor.
City Clerk. 1-2
(SEAL)

The Selfish Neighbor

You may bury your neighbor as yourself all your life and never find a neighbhor that loves you as he loves himself.

One Dollar Saved Represents Ten Dollars Earned

The average man does not save to exceed ten per cent of his earnings. He must spend nine dollars in living expenses for every dollar saved. That being the case he cannot be too careful about unnecessary expenses. Very often a few cents properly invested, that he spends for his garden, will save dollars outlay later on. It is the same in buying Chamberlain's Colic and Diarrhoea Remedy. It costs but a few cents, and a bottle of it in the house often saves a doctor's bill of several dollars.—For sale at Clark's Drug Store.

GOODYEAR Service Station

HIS word is the best bond that any honest business man can put up. We have given Goodyear our word that every customer who buys a Goodyear Tire from us will get real Goodyear Service. We are keeping our word—and we are satisfying old customers and winning new ones.

At Goodyear Service Station Dealers we sell and recommend the new Goodyear Cords with the beveled All-Weather Tread and back them up with standard Goodyear Service

THE GENESEE NEWS

VOL. XXXV — GENESEE, LATAH COUNTY, IDAHO, FRIDAY, JULY 20, 1923. — NO. 3

SEMI-LOCAL NEWS CLIPPED FROM EXCHANGES

Married in Spokane

According to an item in Wednesday's Spokesman-Review a marriage license was issued Tuesday to Theo. J. Schaaf and Miss Alta Black, and it is reported that they were married the same day. They will arrive in Colton soon and Mr. Schaaf will enter on his duties as assistant cashier of the Colton State Bank. Congratulations are in order.—Colton News-Letter.

Pierce-Bungalow Road Open

The road from Pierce to the Bungalow, 27 miles in length, is now open for travel, according to information obtained from the forest here. The government has been constantly working the road with men and teams, preparatory to hauling in supplies by truck. The G. M. C. truck, operated by the forest service, made the first trip over the road Tuesday, going to the Bungalow to bring out Wm. Lyons, the cook on section one trail, 25 miles below there, who was suddenly taken sick. However, it will be several days yet, before heavy hauling can be carried on successfully.—Clearwater Tribune.

Why Not Farmers Too?

Over in the Washington town of Garfield a live commercial club has been functioning for a good many years, and during all of that time has drawn active members from the surrounding farming community. This week J. E. Trimble, well known livestock breeder who lives several miles from Garfield, was elected president of the commercial culb. There is no reason that we can see why, in an agricultural community, the commercial organization should not mean as much to the farmer as to the merchant.—Star-Mirror.

It Surely Pays

Few people realize that crean is being brought out from the Salmon river on pack horses but once in november. Less the truth, for Monday of this week Mr. and Mrs. Roy Unzicker delivered in Cottonwood, to Ed Terharr, cream valued at $32 which they brought here on pack horses. About six weeks ago Mr. and Mrs. Unzicker commenced milking 22 head of cattle and ever since that date they have had a weekly pay check of $32 or more in the cream alone. So enthusiastic are they over the results that they are going to increase their milking herd. Heretofore the cattle have been allowed to run on the range with no profit to their owners whatsoever only when the time came to sell them for beef. At the present time they are just getting half of the milk, the remaining half going to the calves.

The Unzickers have also stocked their farm with hogs and they are being fed on the skimmed milk. At the present time they have a very fine herd of hogs which they plan to market in the very near future.

The cream brought in Monday tested 50, and they say they are well satisfied, the profits amply repaying them for their labor. The best part of it all is that they have a pay day each week.—Cottonwood Chronicle.

Road Graded to Idaho Line

The road from Uniontown, northeast to the Idaho State line, one that residents in that section have been trying to get for the past fifteen years, is at last a reality as far as the grading is concerned. Mike Kinzer road foreman, and his crew of men finished the grading last Saturday and will cease operations until after harvest.

The new road is a little more than three miles long. Work was started on it a little more than a year ago and considerable grading and a small amount of surfacing was done before winter set in. With the opening of spring grading and surfacing was resumed and the work has been going on steadily with the exception of times when rain made grading impossible. The rock crusher has been regularly operating and has supplied material to finish about half of the road. As soon as harvest is over the surfacing will be resumed and it is believed will be finished before winter.

Work on the Leon road by a crew of men under the direction of John Standly has been carried on this spring and grading is practically completed to the Idaho line. The crew expects to finish the work Saturday night and it will disband for the harvest season. This road will be surfaced this fall if the weather permits.

County Commissioner Maxwell, under whose supervision the road work has been done inspected the job last Monday and expressed himself as being well pleased with the results obtained this year. Because of limited appropriations for these roads Mr. Maxwell has been compelled to make one dollar do the work of two in order to complete the work that was started.—Uniontown Journal.

Sunday School Picnic Success

The Sunday school picnic held Wednesday at the old Jain ranch, three miles east of town, was well attended and a splendid time is reported by all. There were plenty of eats and amusement for everybody.

"Tangled Trails"

What romance!—what tragedy!—and stirring events are attached to the name of the "Royal Mounted!" When an officer receives a commission from his chief, his one aim in life is to "Get His Man!" and like a bloodhound on the scent he will follow each clue and trail 'though it leads to the end of the world.

In "Tangled Trails," Neal Hart as Jack Borden, whom evil-doers had named "the tiger," receives instructions to take in Phil Lawson, alias Murdock, a crooked mine promoter, who had added murder to his other crimes, and gets away. He leaves a very tangled trail, which Jack starts out to solve, leading to many sensational episodes.

In his efforts to evade arrest, Lawson crosses the Canadian border into the United States and makes his way to New York, where he is trailed by Borden and finally located in a big office building in the heart of the city. He escapes and makes his way to another location, where he is again taken by "the tiger," but he again makes his escape and recrosses the border into Canada, where he is finally overtaken and captured by the Royal Mounted and brought in.

Of course a tale of this sort would not be complete without a pretty girl, love, and human touches, to stir the emotions. There are several pretty girls who figure in the plot, and excellent character types that lend to make the story a perfect offering.

This thrilling picture will be shown at the opera house Saturday night.

Musical a Treat

The musical entertainment given at the Federated church Wednesday evening by George Nelson and Miss Josephine Hovland, assisted by Miss Mildred Nelson as accompanist and a double quartet of Genesee ladies was one of the most pleasant and appreciated entertainments that has ever been given here—not excepting anything that was on the Chautauqua program this year, or any other time. Mr. Nelson's full deep bass voice has a pleasing tone and range that is hard to find in but few entertainers and Miss Hovland's splendid soprano was highly pleasing and fully appreciated by the large audience as was the piano number given by Miss Nelson.

Mrs. W. D. Woodward gave two readings in her characteristic manner and no doubt as to their appreciation was left when the applause given had subsided.

The people of Genesee and vicinity are to be congratulated upon having the opportunity to hear an entertainment such as was given Wednesday evening and the entertainers are to be congratulated for their ability.

Lewiston-Clarkston Fair

Premium lists have been printed and distributed for the Lewiston-Clarkston Tri-State Fair and Round-Up which will be held at Lewiston September 11 to 15, inclusive. The premium list is a very attractive one and the number of exhibitors should be large.

The premium list is divided into departments, as follows: Livestock, farm products, floral, arts and crafts, pantry and kitchen, poultry, school and home, junior extension department—agriculture and home economics, junior agriculture judging and demonstration. Liberal prizes have been placed and the competition undoubtedly will be strong.

Genesee will be well represented in the junior club work and will undoubtedly make a good showing.

May Drop Title of Doctor

Physicans in Oregon may no longer write the term "Doctor" in front of their names if a movement which took foot at the session of the Oregon State Medical association's annual convention is endorsed by the organization. Several delegates said steps would be taken to do away with the designation and substitute the use of the initials of the degree which has been conferred upon the physican. They said the term "doctor" may now stand for a corn specialist, horse surgeon, piano tuner, doctor of psychenalysis and a score of other practitioners besides a doctor of medicine.

Progressives Meet

The Progressives met with Mrs. G. E. Sampson Wednesday afternoon and a very pleasant time was spent doing fancy work and social converse. The invited guests were Mrs. F. J. Niemann, Mrs. E. Niemann, Mrs. Frank Hoorman, Mrs. Dickey, Mrs. Wm. Morgareidge of Moscow, Mrs. A. Springer, Mrs. D. Springer, Mrs. Geo. Follett, Mrs. W. E. English, Mrs. Dave Johnson of Seattle, Mrs. Arthur Mayer and Mrs. Virgil Sampson.

Went Fishing

T. H. Herman and F. J. Niemann left Saturday evening for an over-Sunday fishing trip to Elk river, returning home Sunday evening. They report a fairly good catch, but they had to work for what they got on account of the brush. However the coolness of the water nor the overhanging boughs had no terror for them and they succeeded in getting enough to make the skillet smell like fish, anyway.

GRANDMA ROGERS PASSES AT HOME OF DAUGHTER

Phoebe Malone Rogers, a well known resident of the Genesee section, died Wednesday morning, July 11, at the home of he daughter Mrs. T. J. Sampson, who is living near Arrow Junction during the summer months. Mrs. Rogers, more commonly known as Grandma Rogers, had been in good health up to the time of her death and passed away very suddenly.

She had been conversing with her daughter before arising and said she wished to go in the garden with her later in the day. At 6 o'clock she arose and was dressing herself and had finished all but putting on the last shoe when Mrs. Sampson passed near the door and saw that she had fallen to the floor. Mrs. Sampson and daughters rushed to her, but she passed away peacefully within 30 minutes.

Phoebe Malone was born in Indiana, September 8, 1843. She was married to William D. Rogers at the age of 18 years. In 1864, in company with her husband, she crossed the plains and settled in southern Oregon, residing in that country until 1872. From that place of residence they moved with their family to Genesee, Idaho, where she has resided ever since. Her husband preceded her to the great beyond 13 years ago.

Mrs. Rogers has lived a devoted Christian life and was a member of the Seventh Day Adventist church.

Unto this union there were born 12 children, nine of whom survive to mourn the departure of a dear loving mother. They are Mrs. W. W. McClain, Lewiston, Idaho; Orion W. Rogers, Freewater Oregon; Mrs. T. J. Sampson, Asotin, Wash.; Mrs. S. E. Harris, Spokane, Wash.; Alonzo D., Fred M., and Pearl Rogers all of Minneapolis, Minn.; A. Lee and L. C. Rogers both of Genesee.

The body was brought to Genesee where burial and funerai services were held from the Fedcrated church Thursday afternoon and was conducted by Elder Thurston of College Place, Wash. Burial was made in the I. O. O. F. cemetery by the side of her husband.

We wish to thank the many friends who assisted us in so many ways in the recent loss of our dear, loving mother. We especially wish to thank Mr. and Mrs. Dale Flemings, Mr. and Mrs. Harry Smith, Mr. and Mrs. Dave Wilson and Mrs. Baugh, for their kindness during our recent sorrow.

Mr. and Mrs. T. J. Sampson,
Mr. and Mrs. W. W. McClain,
Mr. and Mrs. L. C. Rogers,
Mr. and Mrs. A. Lee Rogers,
and other relatives.

Demonstrate Methods

Meetings on farms where crops or livestock were being grown under the direction of the agricultural extension agent to demonstrate approved methods, or other demonstrations in farm practices given by extension agents, were attended by over 88,500 farmers in 1922, according to reports to the United States Department of Agriculture. More than 470,000 farmers attended extension schools or short courses to learn new farming methods which the agricultural colleges and experiment stations have found profitable. The total number of farmers attending extension meetings of all kinds during this year is estimated to be over 14,000,000.

Sunday Picnics

Mrs. George Bolton entertained her Sunday school class of boys and girls at a picnic given at Cold spring on Sunday. The picnic party went out early in the morning and returned in the late afternoon. The time was spent in hiking and eating, and a very good time is reported.

Sunday at 4 o'clock a picnic party left Genesee for the North Fork of the Clearwater where they spent the day fishing and swimming. Those enjoying the trip were: Misses Gertrude and Margaret Sampson, Viola Lorang, D. L. Bressler, George Post, and Jack Hasfurther.

To Show Easterners

Nathan Edwards the other day gathered a few specimens of the crops raised in this section of the country to send to some of his friends back in Kansas. Geo. Mochel contributed a few stalks of alfalfa that measured seven feet in length. A specimen of barley was secured from the ranch of Mrs. Mary Herman that measured four feet ten inches and one from the Chas. Grieser ranch that was an even four feet and having as pretty, plump heads as ever was seen. He will also gather some specimens of wheat to add to the collection.

Weyerhaeuser Takes Option

According to reports from Lewiston the Weyerhaeuser interests have taken another option on 160 acres of land in the eastern part of Lewiston which may be used later as a millsite. The option was taken for eight months and five per cent of the purchase price has been paid owners of the land and it may mean that Lewiston will yet secure the big mill of the Clearwater Timber company, which, if built, will be no small affair and will be a big boost for the Genesee section of the country as well as the territory contiguous to Lewiston.

WHAT HAPPENED HERE TWENTY YEARS AGO

Little Johnie Hasfurther while crossing the street Wednesday evening was run down by a saddle horse and considerably bruised.

As a rule wheat is looking good and the crop promises to be an average one. A large amount of grain hay will be put up this year.

Mr. and Mrs. F. E. Dicus left Wednesday morning for Garfield where they will join a camping party which will spend nearly a month at the headwaters of the St. Maries river.

P. W. McRoberts, F. K. Bressler, H. A. Thatcher and Will McMahon left Tuesday morning for the timber country 'way up north. The three former gentlemen will look after their land interests. They will be absent a couple of weeks.

The first of the week John Kempf disposed of his property and four lots in the western part of town to John Komenda, who with his family will make his permanent home here. He is a wagon maker and is assisting Mr. Kempf in the shop. The price paid was $825.

Will Gray and Miss Lizzie Wardrobe returned Monday from their visit to Sublet, in the southern part of the state. They were accompanied on their return by Miss Maud Powers and Mrs. Elizabeth Gray, mother of the Gray brothers, and A. M. Wardrobe, who will remain here for a visit. Will reports that he found excellent amusement in killing jack rabits which he says are an excellent crop down there the past few years.

An Asset to the Town

That the cream station recently opened in Genesee by the Hazelwood company is a boon to those who have cream, eggs, veal, etc., to sell is shown by the fact that last week—the first week of its operation on the present scale—more than $300 was paid out in cash to the farmers who had cream and eggs to sell—$263.51 being paid for cream and $50 for eggs. A few good cows and a flock of hens will make a pay-roll place of your farm, to say nothing of the pigs that may be fed on the skimmed milk. Had you ever thought of that?

You will find the local market report of the last page of this paper. It will be corrected each week and published for the benefit of those who have stuff to sell.

Progressive Musical Club

The Progressive Musical club, a newly-organized association, meeting each Monday night, met for the first time at the home of Mr. and Mrs. L. Baker. The evening was spent in singing and music and a very nice time was reported by those present.

Refreshments were served at midnight by the hostess.

The following officers were chosen: Mrs. L. Baker, president; Mrs. Herbt. Potsch, vice president; Mrs. Munsell, secretary and treasurer.

Those present were Mr. and Mrs. Munsell and daughter, Ruth, Mr. and Mrs. Herbt. Potsch, Misses Sylvia, Ida, Dorothy and Harriet Evans, Mr. Cain and Mr. and Mrs. L. Baker.

Suffers Fainting Spell

Andrew Rekdal was taken to the Evans hospital Tuesday just before noon suffering from a fainting spell, sustained while piling wood at the Standard lumber yard and he did not regain consciousness for more than two hours.

Mr. Rekdal is past 80 years of age and has been subject to dizzy spells for some time but they had heretofore been of shorter duration.

Knights of Pythias Install

At the regular meeting of the Knights of Pythias lodge Tuesday night the following officers were installed for the ensuing term: Mahlon Follett, C. C.; Nels Liberg, V. C.; T. H. Herman, M. of W.; R. E. Emmett, M. of E.; P. E. Dicus, M. of W.; W. W. Burr, K. of R. and S.; Ray Edwards, prelate; P. F. Mulalley, M. at A.; John Lawson, I. G.; Bruce Wardrobe, O. G.

Went After Huckles

A party composed of Mr. and Mrs. D. Nebelsieck, Mr. and Mrs. W. M. Herman and Mr. and Mrs. Harry Schooler journeyed to the Big Potlatch country near Helmer Sunday, in quest of the elusive huckleberry. They found a few ripe ones, but said they were just about a week or so too early for the best results. However, they claim to have found enough to make a pie or two, which helps some.

Art Shop and W. W. P. Move

Miss Steltz has moved her Artcraft and Hemstitching shop from the brick building just west of the post office to the building recently purchased by her, next door. The W. W. P. company has moved their store and shop to the building vacated by Miss Steltz, upon which they have taken a five-year lease.

Pictures Enjoyed

One of the very best picture shows that has ever been given in Genesee was that of last Sunday evening when "Wonders of the Sea" was given. While there was no plot, the picture was of decided educational value and should have been seen by every one.

Little Boy Drowns

The Lewiston Tribune of Monday carried the sad news of the drowning at a point a short distance above the Clarkston and beach of little Louis Goldsmith, six-year-old son of Mrs. Anna Goldsmith, formerly a resident of Genesee.

The drowning was at a point about 50 yards south of the white sand beach on the Clarkston side, or about half way between the beach and the steep rocky cliff that arises about 30 feet out of the water. The cliff causes to be formed an eddy with a dangerous undercurrent. Experienced swimmers say that when one reaches the deep part of the river where Louis was drowned he is invariably drawn toward the main channel of the river. The little fellow was near a number of boys and girls when the accident occurred, none of whom, however, were his playmates, so far as could be learned. Louis, according to statements secured, had left the guarded beach and had been paddling in the water by himself, and up to the time of stepping off in deep water was careful not to get deeper than about two feet.

In all probability there would have been some chance of saving the boys life had it not been for the fact that he was away from the beach swimmers whose attention was at the time attracted in an opposite direction watching a number of persons diving.

The river was dragged and dynamite was used in an effort to locate the body but so far as known it has not yet been recovered.

Levy Defeated

At the meeting held at W. W. Burr's office Monday evening to determine whether or no authority should be granted the city council to make a levy of five mills in addition to the ten mills allowed by the law, the proposition was defeated by a few votes—19 voting in favor and 16 against the levy, it taking a two-thirds majority in favor to make the levy.

If the above decision is allowed to stand, it will be necessary to curtail the expenses of the city, the levy of ten mills allowed by law to be made by the council will not be sufficient to pay for street lights, city marshal and other expenses that are necessary to keep the town in normal condition. No street work of any kind can be done, nor can work of any kind be undertaken unless necessary money is transferred from the water fund to the general fund, which the present council seems to think is an unwise thing to do in face of the fact that many of the water mains are in bad condition and may need repairing at any time, and if so, the money in the water fund would be required for such repairs.

Wheat Harvest Begun

Harvest in the vicinity of Connell, Wash., began during the week of July 15. The opening of the harvest season was general throughout that section of the state. Repair work on the harvesters had been done and the majority of farmers were able to pull into the field when the wheat ripened.

Nearly all the wheat is past danger of being hurt by hot winds and the yield is placed at between 20 and 30 bushels per acre. Wages are higher and no shortage of labor has been experienced.

Buys Holt Combine

The Hampton & Driscoll Ranch company have purchased a new Holt combine which was unloaded from the car last Friday. The machine is pulled by horses but the cutting and threshing machinery is driven by a four-cylinder engine located at the front of the framework. It has an 18-foot cut and a 26-inch cylinder and under ordinary circumstances can handle from 25 to 30 acres per day.

Sunday School Picnic

The Sunday school picnic held last Sunday by the members and friends of St. John's Evangelical Lutheran church at the Koster country home was well attended and a splendid time is reported. An old-fashioned picnic dinner with new embellishments was served and when the rains came the party took refuge in the large barn.

It is said that Rev. Wolff has a weakness for picnic dinners.

Mr. and Mrs. Elver to Leave

The many friends of Mr. and Mrs. A. E. Elver are very much dissappointed to learn that they have decided to leave Genesee and take up residence at Cocolalla, where Mr. Elver will take over the position of agent for the N. P. at that place. They have been in Genesee for the past two years and have made a host of friends who will be sorry to learn of their decision to leave here.

Lightning Strikes Poles

Two poles of the Home Telephone company's line to the south of town, near the Wm. Ingle farm, were struck by lightning Sunday evening and partially reduced to kindling wood and several phones put out of business. "Tiny" Flomer was on the job early Monday morning and repaired the damage.

If we can't get coal this winter we can least keep warm under the collar.

HAIL, RAIN AND WIND DEVASTATE MANY SECTIONS

Rain, wind and hail storms in this section of the country during the past few days, commencing Sunday afternoon, have laid waste many fields of as fine grain as ever grew. The storm Sunday afternoon did considerable damage, starting in the Uniontown and Colton sections and continuing to the north of Genesee and on to the east as far as Fix Ridge, when rain, wind and hail did many hundreds of dollars' worth of damage. The damage was said to be especially heavy in the Blaine section where gardens and crops were badly damaged and in some instances windows are said to have been broken. Again on Monday one of the worst rain storms of the season visited this section, but was not accompanied by hail or wind enough to do any particular damage. However, there is considerable grain lodged that will never straighten up and much damage will result.

Lester Hayden was in town from the Lenville section Tuesday afternoon and says the storm badly damaged his crop of some 300 acres of as fine grain as one ever looked at. He said the Little Potlatch was a raging torrent and that it took away with it several rods of hog fence, posts and all.

Frank Jones was another heavy looser of that section—in fact, practically all the grain thereabouts was put flat to the ground.

Mr. Hayden has found a solution for taking care of the grain that cannot be cut. He says he is going to make a desperate effort to get enough hogs to take it up.

The Lewiston Tribune of Tuesday morning carried a report of devastating storms in every direction from that city and telling of hundreds of acres of grain that had been ruined by rain, hail and wind. The report said that some 10,000 acres of grain in the Nezperce section had been ruined, the Tammany section flooded, describing it as a roaring mass of water, the roads were also full of rushing water, rocks, wheat shocks and other debris and for five miles this side of Waha the road resembled a lake.

The rain was reported as exceptionally heavy around and above Asotin and the damage to fruit and crops on Clarkston heights was estimated as high as 50 per cent. Lewiston Orchards experienced the worst storm in 10 years and considerable damage was reported to the fruit crop. The Camas Prairie railroad was blocked by slides, but the amount of damage done in the Camas prairie section was not learned, although considerable rain and some hail fell in that section.

The following special to the Lewiston Tribune tells the story of the storm at Uniontown.

A cloudburst breaking on the George Wittman ranch, three miles southwest of Uniontown, at 7 o'clock tonight, wrecked and washed away the barn, hog house and bunk house on the place, and the water rushing into Uniontown filled every gulch, took away several bridges on side streets and at 8 o'clock had inundated the lower stories of a number of residences in the lower section of Uniontown.

The highway between Uniontown and Lewiston was under a foot or more of water for considerable distances and the same thing was true on the road to Pullman. The Northern Pacific railway tracks between Uniontown and Pullman are under water at a number of places and at least two bridges are out.

There was as far as could be learned no hail this evening, but it is conceded that the damage to standing and the beating down of crops will be exceedingly heavy. There was no way of estimating the loss tonight.

The Shane-Lewiston stage left here at 9:30 tonight after having been towed in from the north for restarting the motor which had become stalled by running into the water on the highway.

Pioneer Picnic

The Latah County Pioneer association will hold their annual picnic in the Moscow city park today (Friday, July 20), and all pioneers are asked to come and bring well-filled baskets. Dinner will be served at noon. A good time has been arranged and officers will be elected for the ensuing year.

Lutheran Ladies Aid

The ladies aid of the Lutheran church was very pleasantly entertained on Thursday of last week by Mrs. Henry Hanson, Mrs. Chas. Herman and Mrs. Norman Nelson at the home of Mrs. Herman. Needlework was done and a delicious lunch was served by the hostesses.

Heavy Pea Crop

Peas in the vicinity of Latah, Wash., promise a yield of 60 bushels to the acre. Latah is in the heart of the district that for years has specialized in the growing of peas for seed purposes, virtially the entire output being contracted to the large eastern seed houses.

Never judge a fashionable woman by her clothes. Eye strain leads to blindness.

MY LADY'S MONEY

An Episode in the Life of a Young Girl

By Wilkie Collins

INSTALLMENT NO. 19.

"And I answer," retorted the impenetrable lawyer, "that the suspicion of theft rests on your ladyship's adopted daughter, and on nobody else."

"It's false!" cried Robert, with a burst of honest indignation. "I wish to God I had never said a word to you about the loss of the bank note! Oh, my lady! my lady! don't let him distress you! What does he know about it?"

"Hush!" said Lady Lydiard. "Control yourself and hear what he has to say." She rested her hand on Moody's shoulder, partly to encourage him, partly to support herself, and fixing her eyes again on Mr. Troy, repeated his last words, "Suspicion rest on my adopted daughter, and on nobody else. Why on nobody else?"

"Is your ladyship prepared to suspect the rector of St. Anne's of dishonesty, or your own relatives and equals of theft?" Mr. Troy asked.

"Does a shadow of doubt rest on the servants? Not if Mr. Moody's evidence is to be believed. Who, to our own certain knowledge, had access to the letter while it was unsealed? Who was alone in the room with it? And who knew of the inclosure in it? I leave the answer to your ladyship."

"Isabel Miller is as incapable of an act of theft as I am. There is my answer, Mr. Troy!"

The lawyer bowed resignedly, and advanced to the door.

"Am I to take your ladyship's generous assertions as finally disposing of the question of the lost bank note?" he inquired.

Lady Lydiard met the challenge without shrinking from it.

"No!" she said. "The loss of the bank note is known out of my house. Other persons may suspect the innocent girl as you suspect her. It is due to Isabel's reputation—her unstained reputation, Mr. Troy—that she should know what has happened, and should have an opportunity of defending herself. She is in the next room, Moody. Bring her here."

Robert's courage failed him; he trembled at the bare idea of exposing Isabel to the terrible ordeal that awaited her. "Oh, my lady!" he pleaded, "think again before you tell the poor girl that she is suspected of theft. Keep it a secret from her; the shame of it will break her heart."

"Keep it a secret," said Lady Lydiard, "when the rector and the rector's wife both know of it! Do you think they will let the matter rest where it is, even if I could consent to hush it up? I must write to them, and I can't write anonymously after what has happened. Put yourself in Isabel's place, and tell me if you would thank the person who knew you to be innocently exposed to a disgraceful suspicion, and who concealed it from you? Go, Moody! The longer you delay, the harder it will be."

With his head sunk on his breast, with anguish written in every line of his face, Moody obeyed. Passing slowly down the short passage which connected the two rooms, and still shrinking from the duty that had been imposed on him, he paused, looking through the curtains which hung over the entrance to the boudoir.

CHAPTER VII.

The sight that met Moody's view wrung him to the heart.

Isabel and the dog were at play together. Among the varied accomplishments possessed by Tommie, the capacity to take his part at a game of hide-and-seek was one. His playfellow for the time being put a shawl or a handkerchief over his head, so as to prevent him from seeing, and then hid among the furniture a pocketbook, or a cigar case, or a purse, or anything else that happened to be at hand, leaving the dog to find it, with his keen sense of smell to guide him. Doubly relieved by the fit and the bleeding, Tommie's spirits had revived, and he and Isabel had just begun their game when Moody looked into the room, charged with his terrible errand.

"You're burning, Tommie, you're burning!" cried the girl, laughing and clapping her hands. The next moment she happened to look round, and saw Moody through the parted curtains. His face warned her instantly that something serious had happened. She advanced a few steps, her eyes resting on him in silent alarm. He was himself too painfully agitated to speak. Not a word was exchanged between Lady Lydiard and Mr. Troy in the next room. In the complete stillness that prevailed the dog was heard sniffing and fidgeting about the furniture. Robert took Isabel by the hand and led her into the drawing room. "For God's sake, spare her, my lady!" he whispered. The lawyer heard him.

"No," said Mr. Troy. "Be merciful, and tell her the truth."

He spoke to a woman who stood in no need of his advice. The inherent nobility in Lady Lydiard's nature was roused; her great heart offered itself patiently to any sorrow, to any sacrifice.

Putting her arm round Isabel—half caressing her, half supporting her—Lady Lydiard accepted the whole responsibility and told the whole truth.

Reeling under the first shock, the poor girl recovered herself with admirable courage. She raised her head and eyed the lawyer without uttering a word. In its artless consciousness of innocence the look was nothing less than sublime. Addressing herself to Mr. Troy, Lady Lydiard pointed to Isabel. "Do you see guilt there?" she asked.

Mr. Troy made no answer. In the melancholy experience of humanity to which his profession condemned him, he had seen conscious guilt assume the face of innocence, and helpless innocence admit the disguise of guilt; the keenest observation in either case failing completely to detect the truth. Lady Lydiard misinterpreted his silence as expressing the sullen self assertion of a heartless man. She turned from him in contempt, and held out her hand to Isabel.

"Mr. Troy is not satisfied yet," she said, bitterly. "My love, take my hand, and look me in the face as your equal; I know no difference of rank at such a time at this. Before God, who hears you, are you innocent of the theft of the bank note?"

"Before God, who hears me," Isabel answered, "I am innocent.

Lady Lydiard looked once more at the lawyer, and waited to hear if he believed that.

Mr. Troy took refuge in dumb diplomacy—he made a low bow. It might have meant that he believed Isabel, or it might have meant that he modestly withdrew his own opinion into the background. Lady Lydiard did not condescend to inquire what it meant.

"The sooner we bring this painful scene to an end the better," she said. "I shall be glad to avail myself of your professional assistance, Mr. Troy, within certain limits. Outside of my house, I beg that you will spare no trouble in tracing the lost money to the person who has really stolen it. Inside of my house, I must positively request that the disappearance of the note may never be alluded to, in any way whatever, until your inquiries have been successful in discovering the thief. In the meanwhile Mrs. Tollmidge and her family must not be sufferers by my loss; I shall pay the money again." She paused, and pressed Isabel's hand with affectionate fervor. "My child," she said, "one last word to you, and I have done. You remain here, with my trust in you and my love for you absolutely unshaken. You are dearer to me than ever. Never forget that."

Isabel bent her head, and kissed the kind hand that still held hers. The high spirit that was in her, inspired by Lady Lydiard's example, rose equal to the dreadful situation in which she was placed.

"No, my lady," she said, calmly and sadly, "it can not be. What this gentleman has said of me is not to be denied—the appearances are against me. The letter was open, and I was alone in the room with it, and Mr. Moody told me that a valuable inclosure was inside it. Dear and kind mistress, I am not fit to be a member of your household, I am not worthy to live with the honest people who serve you, while my innocence is in doubt. It is enough for me now that you don't doubt it. I can wait patiently, after that, for the day that gives me back my good name. Oh, my lady, don't cry about it! Pray, pray, don't cry!"

Lady Lydiard's self control failed her," she said, simply. "Is there any age had made Isabel dearer to her than ever. She sunk into a chair, and covered her face with her handkerchief. Mr. Troy turned aside abruptly, and examined a Japanese vase, without any idea in his mind of what he was looking at. Lady Lydiard had gravely misjudged him in believing him to be a heartless man.

Isabel followed the lawyer, and touched him gently on the arm to rouse his attention.

"I have one relation living, sir—an aunt—who will receive me if I go to her," she said, simply. "Isl there any harm in my going? Lady Lydiard will give you the address when you want me. Spare her ladyship, sir, all the pain and trouble that you can."

At last the heart that was in Mr. Troy asserted itself. "You are a fine creature!" he said, with a burst of enthusiasm. "I agree with Lady Lydiard, I believe you are innocent, too; and I will leave no effort untried to find the proof of it." He turned aside again and had another look at the Japanese vase.

As the lawyer withdrew himself from observation, Moody approached Isabel.

(To Be Continued)

WORLD'S NEWS BRIEFLY RETOLD

Important News of Both Hemispheres Boiled Down to Last Analysis.

New wheat sold for less than $1 on the Board of Trade in Chicago recently.

Advices from all wheat sections predicting enormous yields caused a rush to sell, prices dropping quickly to new low for the season.

Simultaneously with forecasts of a big American yield, news from practically all sections of Europe indicated the continent will harvest its largest wheat crop since the war.

July and September deliveries has been quoted as low as 99 7-8 cents, several transactions being made at this figure.

Four men were killed as the result of the derailing of train No. 41 of the Northern Pacific, the through Burlington express from Kansas City, at Butte, Mont. An open switch leading to the Blackstone spur had evidently been sprung with a rock, causing the wreck. Engineer Thomas Barry of Whitehall, and three others, who were riding the tender, were killed. Three were injured.

Sixty-three per cent of the total trade of the Phillippine islands during the year 1922 was with the United States, compared to 37 per cent for all other countries doing business with the islands, according to the annual report of the collector of customs. The imports into the Philippines from the United States during 1922 amounted to $47,738,000, and the exports to the United States were valued at $64,111,600. Imports from countries other than the United States for 1922 were valued at $32,559,319, and the exports amounted to $31,471,697.

Independence of action in settling the reparations question has been decided upon by the British cabinet, Premier Stanley Baldwin announced in the commons recently.

This means that the present dubious ties binding Britian to joint action with France and Belgium in collecting Germany's war obligations will be definitely severed.

Disapproving of her allies' determination to push into occupied areas, this country will adopt her own means of dealing with the Cuno government if France and Belgium persit in coercive measures.

Without reservations, the French chamber of deputies ratified unanimously the Pacific accord signed at Washington in November, 1921, by Great Britain, France, Japan and the United States.

Deputy Archinbaud opened the debate with criticism of the Pacific accords on the grounds they don't include Indo-China, France's far-eastern possession.

The chamber also ratified the Franco-Canadian commercial treaty.

Investigation of the extent of Russia's grain crop, which, if unloaded on the world's markets, would affect prices received by American farmers and a study of the Russian co-operatives are objects of the visit to Russia of Senator Smith, W. Brookhart of Iowa, he said at Moscow, Russia, June 11. On his journey through the grain fields between the Polish border and Moscow, he saw enough to convince him that Russia will have a good crop this year, but he expects to go to the south, visiting the wheat belt around Odessa, on his way to Constantinople.

June 30th saw the official opening of the Banff-Windermere road, completing the chain of the Grand Circle Tour, stretching from California to Alberta and giving the motorist on the North American continent the finest motoring expedition.

The Rev. Luigi Sturzo, secretary general of the Catholic party at Rome, has resigned owing to the differences in the party over the government's proposed electoral reform.

Bimbo—I caught Bill the fisherman digging for worms in my garden.

Timbo—He hooks his bait to bait his hooks.

IDAHO

Sale of municipal water bonds, valued at $380,000, was opened with a large number of bids at Lewiston recently.

Lightning is thought to have started two forest fires on Lost and Miner's creek in the Pritchard district. Smoke chasers have been sent to both fires; no details of which have been reported.

Rumors are rife in Wallace, Idaho, that there is soon to be a cut in miner's wages in the Coeur d'Alenes. The cut is said to be the result of the slump in prices of lead, silver and zinc.

The International hotel at Bonners Ferry burned to the ground last week. This hotel was one of the oldest buildings in town. The building was insured for $7000 and was worth about $12,000.

The Nez Perce Indians held their annual mid summer festival dance at Spaulding this year. Each year the Nez Perce Indians, clad in their most elaborate garbs, some of which are worth thousands of dollars, hold a dance that lasts a week to 10 days.

United States Senator William E. Borah of Idaho took part in the Idaho day program of the national convention of the Federation of Business and Professional Women's clubs at Portland last week.

In an interview the senator expressed the belief that President Harding would receive the republican nomination next year.

Ordering that survey be made for the construction of a road and bridge at Cottonwood Bluffs, the county commissioners at Lewiston plan to permanently settle the matter of construction of this stretch of road, which is a link in the Lewis and Clark highway. The road in the district between the Myrtle and Cherrylanes bridges on the Clearwater river.

As a result of conferences at Lewiston, Idaho and at Lapwai, it seems assured that from $50,000 to $75,000 will be obtained from the federal Indian tribal road funds to supplement existing funds for the construction of the link of the Lewis and Clark highway between Orofino and Greer, along the Clearwater river. The conference was arranged by Orofino citizens.

(Suecial.)—Benewah county's rights to tax certain land on the Coeur d'Alene Indian reservation was denied in the United States circuit court of appeals, at San Francisco, according to information received at St. Maries by the prosecuting attorney. The case was heard before Federal Judge Dietrich at Coeur d'Alene and a decision rendered in favor of Benewah county. It was appealed and Judge Dietrich's decision was reversed. Prosecuting attorney R. E. MrFarland may decide to carry it to the supreme court at Washington.

James C. Evenden, entomologist in charge of the federal forest insect field station at Coeur d'Alene is making an examination of dying timber within the Yellowstone and Glacier National parks.

"Within the Yellowstone National park, spruce and fir is being killed by a moth, the caterpillar of which destroys the new growth," Mr. Evenden says, "and in Glacier the Alpine beetle which girdles the tree by constructing a smalle channel between the bark and the wood."

The purpose of Mr. Evenden's examination is to study the life history of these insects with the idea of devising some possible means of control.

WASHINGTON NEWS

A general committee has been named by the Colfax Commercial club to arrange for the La La Palouser, August 30, 31 and September 1.

Priest lake as a substitute for Flathead lake as a water source for the Columbia basin project is being considered by the federal investigation commission, according to Homer T. Gault, chief engineer.

"Smutproof" wheat is the newest product of the experiment station at Washington State college. The new variety has been produced after 10 years' experiment by Professor E. F. Gaines, station cerealist. It is a cross between Russian, Turkey and the Australian drought resistant Florence, and has proved a good yielder for four years. A limited quantity of seed wheat will probably be available for distribution among Palouse farmers next fall. Qualities of the new wheat, and other products of experiments at the station, will be demonstrated to farmers at the annual excursion over the experiment station Wednesday.

HOMEMAKERS' CORNER

Alice Lindsey Webb, News Editor, and
Lincoln R. Lounsbury, Agricultural Extension Editor,
State College of Washington.

Things Mother Used to Make.

"Good food depends as largely upon the judgment of the cook, as upon the materials used," says Lydia Marie Gurney, in her recent book on "Things Mother Used to Make," which is a collection of old-time recipes, some nearly a hundred years old and never published before. They are simple, not expensive, and if one follows the directions closely, are sure to bring success to the June bride who has struggled along by herself or with the aid of some more "scientifically technical" book. There are, for instance, the

Scotch Bannocks.

1 cup of thick sour milk, ½ cup of sugar, 1 egg, 2 cups of flour, ½ cup cornmeal, 1 teaspoon of baking soda, and a pinch of salt, mixed stiff enough to drop from a spoon, is dropped, in bits the size of walnuts, into boiling fat, and served warm with maple syrup.

Boston Brown Bread.

Mother always made this Saturday night, for Sunday's breakfast. 1 cup each of rye and graham flour, ½ cup of wheat flour, 1 cup of cornmeal, 1 cup of sweet milk and 1 of sour, 1 cup of molasses, ½ teaspoon of salt, and a heaping teaspoon of baking soda, stir the different flours together with the salt, then mix all ingredients together and pour into a tin pail that has been well greased, if you have no regular brown-bread steamer. Set the pail in a kettle of boiling water, and steam it three or four hours, keeping it tightly covered.

Crullers.

Use a doughnut recipe, adding an egg and a little more butter. Roll a small piece of the dough to the size of your finger and eight inches long, double it, twist it together, and fry in boiling fat.

In "Woman of 1923," issued by the Women's News Service of New York City, I learn that Washington state has an incorporated body of Business and Professional Women's clubs, organized two years ago last February, with a membership of 1,500 women. The annual convention was at Olympia, in May, and the retiring president was Mrs. Cora Ainey, the corresponding secretary, Cora Lindaas, 610 Perkins Bldg., Tacoma. There are many other bodies of women banded together in the state for various public-spirited purposes. There is the Congress of Mothers and Parent-Teachers Associations, organized in 1813, with 47 branches now and 24,000 members; the Federation of Women's clubs, organized in 1896, with 2455 clubs now, and 20,000 members; the League of Women voters; the Women's Legislative Council of Washington, organized ten years ago; the Women Lawyers' Association; the Women's Trade Union League; the American Home Economics Association, with 100 members in Washington last year; the Camp Fire Girls, Y. W. C. A., W. C. T. U., Daughters of the American Revolution, Council of Jewish Women (with a state organization as yet, but a state organizing supervisor), the Federation of Music clubs (largely women), Federation of Temple Sisterhoods (no state organization, but affiliations), the National Women's Party, of which Sophie Clark of Seattle is state chairman; and we might also mention the Labor Department of the state, as Mrs. Delphine M. Johnson is supervisor of women in industry for the Department of Labor and Industries at Olympia. Quite an organization showing for the women of Washington, isn't it?

A good purebred boar and sow produced pigs for Robert Polson that sold for $3 more per head for pork than scrubs.

NORTHWEST NEWS

Work on the McKay creek federal irrigation dam has been started, according to an announcement made by R. M. Connor, construction engineer having charge. The department of the interior has accepted the valuations of land made by a jury in federal court in Portland recently, when condemnation suits to secure three farms for the dam site were held, Mr. Connor said.

Some uncertainty had been expressed whether the valuations would be accepted by the government and for a time it seemed probable that the big reclamation job might be postponed.

The department of the interior announces the completion of the Alaskan railroad to Fairbanks, its northern terminal. It is now open for through traffic, both passenger and freight, from Seward to Fairbanks, a distance of 470 miles, without change of cars or transfer of passengers. It has been exactly nine years, three months and five days since the construction of this government railroad began. The average construction cost per mile was approximately $84,000.

A wave of optimism is sweeping over Alberta. After six years of poor crops which discouraged the people of the province to a point bordering on pessimism, new life and hope has come with the rains recently. From every part of Alberta come reports of unequalled or unexcelled crop prospects. At least 100,000,000 bushels of grain will be harvested this year, it is anticipated. This figure is the estimate of H. W. Wood, president of the United Farmers of Alberta.

WINS GANG PLOW BY HIGH COLLEGE GRADES

Stphen B. White of Cloverland, Asotin co., is the winner of the gang ploy offered by the John Deere Plow Company, to the student of the State College of Washington, who made the highest grades in four agricultural subjects the past two years. White was graduated this month from the college, and has gone back to his farm near the Blue mountains. He was a student of unusual mechanical ability, and proved of material help in the construction of the machine for dry treatment of smut, adopted by many Pacific Northwest farmers.

"Mandy, I thinks I'se gwine put on my bes' clothes and go down to the theater ternight and see the chorus ladies dance."

"Rastus, lissen heah. If dat am what you thinks, then yuh'd bettah think again. Niggah, yuh ain't gwine put on nothin' to go no place no time to see nobody do nothin,' never, nohow, an' not at all. Does yuh understan'?"—Ex.

WASHINGTON ROADS GET FEDERAL HELP

Two Projects to be Undertaken by Government in National Forests of State.

The expenditure of $96,000 of National Forest Development funds for the construction of 16 miles of highway in the State of Washington has just been approved by the secretary of agriculture, according to an announcement made by the District Forester's office in Portland.

One of these road projects is the Baker river road in Whatcom county within the Washington National Forest. The project is nine miles in length, and will run between the south boundary of the forest to the south end of Baker lake. The sum of $46,000 has been allotted for the work. The road, when completed, will open up a large interior region that can now be reached only by trail, thus being of great value from a protective as well as a recreational standpoint. It will also be of value to the United States Fish Hatchery located at Baker lake.

The other project consists of seven miles of the Middle Fork Snoqualmie highway located partly within the Snoqualmie National Forest and partly outside, all within King county. The sum of $550,000 has been appropriated for the construction work, King county co-operating to the extent of building a bridge over the Pratt river.

This highway when completed will be of immense value to the Snoqualmie National Forest from the protection standpoint, as it will open up a large interior region containing heavy timber.

District Forester Cecil has been notified that the secretary of agriculture has also authorized an additional $10,000 of the Section 8, highway fund for the construction of the Mount Baker road in Whatcom county, Washington, and within the Washington national forest. This project will open up the wonderful scenic resources of the Austin Pass region to the public. This additional allotment brings the total amount allotted for this highway up to $127,000; two-thirds of which is from federal funds and one-third of which is furnished by Whatcom county.

As a sample of the heavy yield of cherries in the orchards along Snake river, it is reported that at the Ben E. Kelley place on Purrington bar, two miles above Central Ferry, 11 tons of cherries were picked from a 1 1-2 acre orchard. They were mostly Bings and Royal Anns.

Frank: "How are you getting along at home while your wife's away?"

W. B.: "Fine, I've reached the height of efficiency. I can put on my sox now from either end."

SUMMARY OF YEAR'S WORK, VETS' BUREAU

Great Amount of Good Accomplished for Disabled Men in Pacific Northwest.

During the fiscal year ending June 30, 1923, the employment service of the United States Veterans' bureau in Washington, Oregon, Idaho and Alaska developed many hundreds of employment opportunities, which made it possible to place in positions all but a few of the 955 disabled veterans who completed their training courses during this period.

The job of putting this most important touch on the vocational rehabilitation of injured war veterans of district No. 13 is being tackled with untiring zeal. Employers of the Pacific northwest are urged to cooperate with the veterans' bureau even more earnestly than in the past in this campaign of placing in employment rehabilitated ex-service people. The load of training completions is now at its height and quick action is necessary in order that hundreds of war veterans of this district who are scheduled to complete their courses soon will be taken care of.

Chambers of commerce of the larger cities in the district and members of the West Coast Lumber association are actively supporting the drive to stimulate employment of these men who have learned new occupations to replace the ones who they lost because of the war service. Governors of Washington, Oregon and Idaho recently released statements urging the people of these states to meet this just plea for employment.

At no time since the organization of the United States Veterans' Bureau has there been a lack of hospitalization facilities to properly care for injured ex-service people of the Pacific Northwest with the exception of tuberculosis treatment before the opening of the Veterans' Hospital at Walla Walla a year ago. A veterans' hospital for mental and nervous disability cases is now under construction at American Lake, Washington. With the completion of this hospital, practically every injured war veteran of this district will be cared for in a government institution, eliminating the necessity of contract hospitalization. Medical authorities have pronounced the Veterans' hospital at Walla Walla, Washington, an ideal place for tubercular ex-service men.

Benefits offered by the government through the Veterans' Bureau have been heralded in practically every city, town or village of the district by field representatives. Approximately 2,000 veterans were contacted in this manner the latter half of 1922 and early this year. An Alaskan tour of 10,000 miles was undertaken by Cliff Wood, contact representative, in order that every ex-service man in the district might have an opportunity to file claim for benefits offered. He contacted 1083 ex-service men; filed 20 new claims for compensation and training; reopened 85 old claims; reinstated insurance for 138 veterans; converted 175 term policies into permanent forms of government insurance and assisted 648 men in the matter of securing their bonus, allotments, travel pay, liberty bonds, lost discharges, and Victory medals. The 10,000 miles were covered by foot, horseback, boat and train service.

Alaska has furnished a number of employment opportunities during the last year. Radio operators, experts in fisheries and gas engine men were sent to the northern territory this spring.

The Pacific Northwest district of the bureau took the initiative in furnishing expert agricultural instructions for trainees working their own or leased projects. Arrangements were made last fall with state colleges to furnish agricultural instructors to visit project trainees at certain times for the purpose of teaching these war veterans intensive farming. There are approximately 250 project trainees in the district, and several Interstate units have been formed. Another move benefiting trainees was the arrangements made with the University of Washington whereby disabled veterans may enter a special accountancy unit at the university without the usual educational requirements. Nearly 300 men have taken advantage of this course and many of these are men already placed in responsible positions. Rehabilitation supervisors have found that the trade of shoe repairing is proving a bread-winner for many ex-service men with little schooling.

A total of approximately $6,500,000 of war risk insurance was reinstated or converted into permanent forms of government insurance during the year just ending. Between 25,000 and 30,000 veterans of this district are carrying government insurance amounting to more than $100,000,000. Ex-service men who have allowed their insurance to lapse are urged to renew their policies at the earliest date possible.

POULTRY

According to a recent survey on 42 poultry farms in Lewis county made by County Agent R. G. Fowler, the average lay per hen was 128 eggs for the year. The average lay per hen for a year on the farms ranged from 90 eggs the lowest, to 210 eggs, the highest.

Egg City is to be the name of a community to be established near Toronto, Canada. It will be 500 acres in extent and will accommodate a hundred thousand layers. One hundred cases of eggs a day, it is estimated, will be produced when the city is fully developed.

A setting of 50 Chinese pheasant eggs is being hatched in Pullman in an electric incubator. The same incubator secured a hatch of nearly 90 per cent with chickens and is believed to be as successful with pheasants.

A study of a free choice system of mash feeding for chickens made by the United States department of agriculture at its experiment farm located at Beltsville, Md., showed that the best results and highest egg production are obtained when hens are allowed to select their own mash constituents. It was found that hens selected a mash composed of 66 parts corn meal, 26 parts meat scrap, 4 parts wheat bran, and 4 parts wheat middlings. This mash gives best results with Leghorns, and is less stimulating mash, containing more bran and ground oats, with less meat scrap, has given better results with general purpose breeds.

Neighbors frequently object to the keeping of poultry in towns and cities, most complaints being against the vociferous rooster and disagreeable odors. In some cities and towns there are regulations to prevent or control poultry keeping, but flock need not be a nuisance. There will be no annoyance from odors if the dropping boards are cleaned daily and the yards are kept reasonably clean. There is no necessity for keeping a rooster unless the owner intends to hatch chicks, and in that case the rooster should be disposed of as soon as the hens have been set. A flock without a male will produce just as many eggs and, what is more, the eggs will be infertile and will keep better.

Poultrymen in Grays Harbor county report a rapid increase in the number of rats which find shelter under the buildings. There have been over 100 rats killed in one community this year and other breeders have spoken worse each year. The United States biological survey says that two reasons for the rapid increase is the ready feed supply around poultry plants, with the buildings as good breeding places. They average 10 young rats to the litter and have seven to eight litters a year. No wonder they multiply rapidly. The method of control is first clean up nesting places. Poison with barium carbonate, one part to four parts of bait, such as meat mash mixed with blood. Then finish up by trapping with a good rat trap.

LIVESTOCK

Plans were made by Hampshire sheep breeders of Ellensburg, working with the extension service, for a 200-pound lamb contest to be held during the coming season. A gold medal will be given to the Kittitas county breeder of pure-bred Hampshire sheep who grows the best lamb weighing 200 pounds by the time of the county fair. The lambs must have been born after January 1 of this year.

For the first time in the history of the state fair, prizes will be offered in the "baby beef" classification. A schedule of awards was arranged at a conference between E. L. French, state director of agriculture, H. P. Vermilye, state fair secretary, and Frank Rothrock. This was done to encourage boys' and girls' calf clubs to make a showing at the fair. The American Shorthorn Breeders' association offers $100 if there are 20 entries. The money is to be split into 10 prizes graduated from $15 for the first, to $5 for the 10th, with an additional $10 for the grand champion.

With few exceptions, says the United States department of agriculture, there is feed enough wasted on every farm in the country to make the pork and pork products consumed on that farm. The hog is more efficient than other farm animals in making use of the farm by-products. The hog will select and utilize the wholesome parts of unsound and unmarketable grains, refuse from truck crops, and by-products from the dairy. This is one reason why hogs are used on such a large proportion of our farms. But the hog's principal article of diet is corn, and the secretary of agriculture has remarked that 'our hog crop serves as a slow absorber for the variation in production of our corn crop year by year, thus ironing out the irregularities in corn prices."

Better Health Service

Public Health Is Public Wealth.

These Articles Compiled by the Public Health League of Washington

Cancer is Curable.

Irritation is the common cause of cancer. (There may be a cancer germ, but none has been discovered.)

Early removal while it is local will cure cancer.

After 40 years of age, one man out of every 11 dies of cancer and one woman out of 8. Most of them could have been cured by early operation—while delay by misjudged or no treatment makes it inevitably fatal.

Cancer is always local in the beginning, but in a short time may spread and become incurable.

Caustics, including cancer pastes are extremely dangerous and usually spread the disease and hasten death. Cancer is not contagious, but scrupulous cleanliness is advisable.

It is not inherited—almost every family has had some relative, who had died from cancer. Unfortunately, pain is not a sign in early cancer, and is the main reason for not seeking treatment at the proper time.

There is much evidence to support the view that cancer is caused by irritation. Note the frequency of cancer of the lower lip in clay pipe smokers because the pipe rests on the lower lip (not upper, where no cancer occurs) added to this is the irritation by heat.

Don't neglect cracked lips—heat them up—bad teeth with sharp edges irritating the tongue, cheek or lips may start cancer—have them corrected. Old sores that do not heal are common seats of cancer and should not be neglected.

Many innocent warts, moles or small growths on the skin terminate in cancer from constant irritation, and should be removed. Cracked nipples in nursing mothers should be cured and pressure from corset stays avoided—any woman with a lump in her breast should consult her family physician.

Any unusual bleeding at or after the change of life is suspicious of cancer and a thorough investigation should be made. Chronic indigestion may be due to cancer, and should be investigated—this is especially important if accompanied by pallor and loss of flesh. Too hot foods should not be swallowed, because they burn and irritate the lining of the stomach. Don't take it for granted that bleeding from the bowl is due to hemorrhoids—it may be due to cancer of the rectum or bowel. Cancer is on the increase to an alarming extent—in 1890 deaths from cancer in the U. S. were about 50 per 100,000—while today it has increased to over 85 per 100,000, the increase in Europe is still greater; the mortality will be reduced only by the public being educated to seek early treatment while the disease is local and curable.

Jim Smith.

Jim Smith dropped in on old Doc Brown
And said that "Things in this here town
"Are 'bout the worst they've been in years
"And for the future I have fears.
"Wheat is down to fifty cents
"And folks can hardly pay their rents;
"The price of cows and hogs and sheep
"Are low enough to make you weep,
"I don't know what we're goin' to do—
"I tell you, Doc, I'm feelin' blue."
But Doc was busy driving nails
And couldn't listen to Jims' wails;
So Jim put off to call on Jones
And entertain him with his groans.
But Jones was busy grinding corn
And couldn't take the time to mourn;
But Jim kept on around the town
With head bent low and spirits down.
He said "that he was out of cash
And soon the world would go to smash."
"Mebby so," said Henry Moore,
"But I've seen times like these before.
"Why, back in eighteen ninety-three
"I couldn't buy a pound of tea,
"But I kept plugging just the same
"Cause that's the way to play the game.
"If every soul in this here place
"Went on the street with your long face
"Who'd grind the corn and drive the nails
"And milk the cows and fill the pails?
"I know that things don't break just right,
"But now's the time a man should fight,
"Go home, Jim Smith, and feed your shoat,
"This is no time to rock the boat."

—Western Retail Lumberman.

FROZEN DESSERTS

Vanilla Ice Cream—No. 1.

1 quart thin cream, ¾ c. sugar, 1½ tablespoon vanilla. Mix ingredients and freeze.

Vanilla Ice Cream—No. 2.

2 cups scalded milk, 1 tablespoon flower, 1 cup sugar, 1 egg, ½ tablespoon salt, 1 quart thin cream, 2 tablespoons vanilla. Mix flour, sugar, salt and slightly beaten egg and milk gradually. Cook over hot water 20 minutes, stirring constantly at first.

Curdled appearance of custard will disappear in freezing, when cool add cream and flavoring. Strain and freeze.

Milk Sherbert.

4 cups milk, 1½ cups sugar, juice of 3 lemons.

Mix juice and sugar, stirring constantly while slowly adding milk. If added too rapidly the mixture will have a curdled appearance, but the quality of the sherbert will not be affected. Freeze.

Lemon Sherbert.

2 cups sugar, 4 cups water, 2 egg whites, ¾ cups lemon juice.

Boil sugar and water about 10 minutes, cool. Add lemon juice to syrup and then add beaten egg white. Freeze. Raspberry ice may be made the same way by substituting 1 quart berries which have been mashed, put through sieve, and sweetened, for the lemon juice.

Apricot Sherbert.

Put the cooked apricots through a sieve and sweeten, then add this slowly to the cream or milk, stirring constantly, so as not to curdle mixture. If desired, a little lemon juice may be added. Freeze. Other fruits, such as peaches and bananas may be used the same way.

Rich Apricot Sherbert.

1 quart can of apricots, 4 oranges, 2 lemons, 3 egg whites, 1½ quarts of water, 1 cup sugar, 2 cups cream.

Press oranges, apricots, lemons through sieve. Boil sugar and water 10 minutes, cool an dadd fruit pulp, cream and beaten egg white. Freeze.

Chocolate Ice Cream.

Use recipe for Vanilla ice cream. Melt 2 squares chocolate by placing in a small sauce pan set in a larger sauce pan of boiling water and pour hot custard slowly on chocolate, then cool before adding cream.

Caramel Ice Cream.

1 quart cream, 2 cups milk, 1 1-3 cups sugar, 1 egg, 1 tablespoon flour, ½ teaspoon salt, 1½ tablespoons vanilla. Prepare same as for vanilla ice cream (with custard) using ½ sugar in custard and remaining half caramelize. Add slowly to hot custard, when cool add cream. Freeze.

MENU FOR THE WEEK

SATURDAY

Breakfast.

WHAT DOES IT COST TO SEND GIRLS TO COLLEGE?

Interesting Figures Furnished by Colleges and Universities of the Northwest.

What does it cost to send girls to college? That depends, naturally, on both the individual girl, and the college she goes to. Some girls remind one of that old conundrum: "Why do they call a ship she? Because the rigging costs more than the hull." Other girls are thrifty in their expenditures, and capable of saving by doing their own laundry, and earning their board and room. Some colleges are in large cities where the temptation to spend is constantly before the girls; others are in small towns where inexpensive campus affairs constitute most of the social life.

The American Association of University Women, through its St. Louis branch, made a survey last year of 114 colleges and universities where women students are educated, to determine what the expense was all each, and what might therefore be considered a reasonable average.

The average cost, including all catalog expenses (fees, dormitory room, board, as well as books, dues and contributions, recreation, and other incidentals at the State College of Washington for a year for a girl student is $470.88. Comparing this sum with figures given for the other 114 colleges listed in the survey, it is interesting to note that 105 are more expensive than W. S. C., and only 9 list a lower cost. With the exception of one (the University of Nevada) all these 9 are in the middle west and south, mainly very small institutions. The University of California quotes a minimum of $750; the University of Oregon girls spend $645 a year; and those at the University of Washington $675.

Out of the $470.88 the average W. S. C. girls spends a year, it is estimated that somewhere between $11 and $50 goes for books. Buying second-hand copies, sharing a book with a friend in the same course, or enrolling for courses not requiring many or expensive texts, make material differences in this item of expense. Dues and contributions to such student organizations as the Y. W. C. A., and "drives" and charity, run from $1 to $30.50 in the budgets of the W. S. C. girls on which the figures are mainly based. They average about $15.18. Recreation items they listed rum from $5 to $27, with an average of $13.06. (These items, by the way, include the chocolate bars, ice cream cones, and such extra food bought between meals, a considerable item with some girls, entirely absent from the accounts of others.)

Girls coming from outside the state add $130 to-their expense list, for the non-resident student fee. In the matter of dormitory and board bills, there will probably be some decrease in the fall. A more detailed study of the matter of student expenses among the girls of the State College would show some very interesting facts as to self-help. It is astonishing the ingenuity, persistence, courage and ability shown by some of the girls in earning expenses, either wholly or in part. The democratic spirit of the campus assures such girls that there will be no less of social standing because they work.

Old maid (impressively)—Nora, that painting is over a hundred years old.

Nora—And did ye paint it yerself, Mum?—Ex.

Prosperity In Your Pocket Often Becomes Adversity

The people who save are the ones who systematically put their money in a bank until they are aple to invest it to better advantage.

When a fellow keeps his roll in his pocket there is always a temptation to "peel it off." Continued peeling eventually brings a person to the point where there is nothing left to peel.

Where do you keep your roll?

CHURCH SERVICES

SEVENTH DAY ADVENTIST CHURCH
ESTEL ROGERS, S. S. Supt.
Mrs. B. B. CALDWELL, M. V. leader

Sabbath school at 10 o'clock Saturday morning.

Young people's M. V. at 12 o'clock Saturday.

Prayer meeting at 7:30 Friday evening.

LUTHERAN CHURCH
A. F. WOLFF, Pastor.

English services will be held each Sunday morning at 10:30 o'clock, with the exception of the first Sunday of each month, when German services will be held at the usual hour.

Sunday school at 9:30 a. m.

FEDERATED CHURCHES
REV. JAS. PENDLETON, Minister
(Study at the Parsonage)

Church School at 9:45 a. m.

Morning Worship at 11 a. m.

Sermon by Rev. Pendleton, "The Bible and Its Use."

In the evening there will be a pageant presented by the children of the vacation school, entitled, "The Victory of the Cross." This will be followed by an illustrated lecture, "The Ministry of Healing."

Wednesday the ladies aid will meet.

Thursday evening, Bible class subject, "How Shall We Think of Nature?"

The vacation school will close on Friday, and the work accomplished will be felt in the Church school, Christian Endeavor societies and our homes. The faithful service of the workers has made the work a success.

The pageant to be presented Sunday evening was written locally for this special occasion.

Labor Clearing House

Definate arrangements for a central clearing house for harvest labor in Spokane were made recently with the federal employment office by the harvest labor committee of the Spokane chamber of commerce. It is planned to place several thousand harvest hands through the Spokane office this summer.

Arthur A. Lewis, chairman of the chamber committee made the plans with W. C. Carpenter, federal employment agent. The agency was opened in connection with the federal-city free employment office, N. 218 Howard street.

Under the plan worked out, Mr. Lewis will advise farmers to hold local meetings, determine the number of men wanted and then select a local agent to deal with the Spokane office. Names of the local agents will be filed with Mr. Carpenter and the system is expected to permit a constant check on the labor situation in every community in the Inland Empire.

Celebrate Birthday

Sunday, July 15, was the birthday anniversary of O. V. Johnson and Mrs. Albert Peterson, brother and sister, and a goodly number of relatives and friends gathered at the O. V. Johnson home, bringing with them well-filled baskets, containing everything that would make the heart glad and satisfy the inner man and a real picnic dinner was served. Those present were Mr. and Mrs. August Johnson and daughters, Ethel and Ida, and sons, Ernest and George; Mr. and Mrs. Arthur Hillman and family, Mr. and Mrs. Albert Peterson and family, Anton Olson and daughter, Emma; Lenus Peterson, Mr. and Mrs. J. H. Hunchby of Moscow, Mr. and Mrs. F. F. Kimberling of Moscow, Mr. and Mrs. Fred Skog, Moscow.

State Road Badly Cut Up

If you are figuring on going to Moscow, better take the old dirt road to the west of town or you may have to be pulled out of some of the ruts made by the heavy trucks hauling gravel to the north.

The road to the south of town has already begun to show up the deep ruts made by the gravel trucks and by spring one will never be able to tell that four inches of gravel were put on the road. Wherever the road has been cut up by the trucks will be found a rut to correspond as soon as the winter weather sets in, unless much more and better work is done than has ever been done before.

"Our Town" Not "The Town"

Do you take pride in our town? In speaking of it and working for it, do you say "our town?"

When you say "our town," the expression has a different meaning from what it does when you say "the town," "this town" or "your town."

In speaking of our town make every word mean confidence, loyalty, prosperity, welcome, and we will have a town that exhibits all these.

Pavilion Dance

There will be a pavilion dance at the Schwenne grove, five miles southwest of Genesee, Friday night, July 20. Good music and a good time assured. 3-1x

Spokane Merchants' Convention

A new idea in the arrangements for the Merchants' convention and Market Week which will be held in Spokane August 14, 15 and 16, has been worked out by the committee in charge according to G. O. Rogers, chairman of the general committee. "The Conventions Committee for the 1923 meeting decided to try out a plan of combining Market Week and Merchants' Convention and making it interesting to the out-of-town merchants to visit the city during this particular week and do his fall buying," he said. "They had decided to cut down on the long winded speeches and leave the visiting merchants free to go and come at will, visiting the houses with which he does business and selecting the line of goods he wants to stock up on for future trade."

The committee also decided to make it well worth while for the out-of-town merchant to make the trip to Spokane and do his buying at this particular time. This will be effective by offering price inducements that are not given at any other time. Every business house in Spokane taking part in the convention will feature at least one special bargain that will save the merchant money and pay direct dividends on the investment in the trip. Combined, these savings will more than pay the entire expenses of the trip, making the entertainment, the business-building ideas and the good fellowship features just as much profit.

The officials in charge of the convention this year ask each merchant to give this new plan a thorough, fair trial and see for themselves whether or not the new idea is better than the old convention weeks which have been held in the past.

Boys' and Girls' Clubs

E. F. Rhinehart, state livestock specialist, Miss Amy Kelly, state home demonstration leader, and Miss Clara E. Cowgill, district home demonstration agent, will be in north Idaho to work with the Junior club members July 16 to 28 inclusive. Mr. Rhinehart will instruct club members in livestock judging, feeding, fitting and showing. Assistance will also be given in selecting and fitting club projects for show this fall.

Each Junior extension project record in livestock, farm crops and home economics will be inspected at this time. The girls' work may be held in some local home or other convenient place. It may be advisable to have the boys make a tour of farms where suitable livestock classes of hogs, dairy, beef and sheep may be had for judging. Every club member should be present for the judging and demonstration work in order to realize the greatest possible training in their club projects.

The following is the schedule for the county meetings; July 20-21, Latah County; July 23 NezPerce County.

County Agent O. S. Fletcher will more than likely furnish the necessary data as to the location and time of meetings.

Word From the Jains

Word was received in Genesee the other day from the Charley Jain party, who are on their way to the Golden State in quest of sunshine, who were given then at the Lambert home at Crabtree, Oregon, having the time of their young lives. It was said that Charley got reckless and was helping Fred Lambert put up hay, but it was no stated how much or how high he boosted it.

However, they said they were having a great time and expected to be in California by July 20. More news of Charley's recklessness is anxiously awaited by his friends here.

A Splendid Medicine for the Stomach and Liver

"Chamberlain's Tablets for the stomach and liver are splendid. I never tire of telling my friends and neighbors of their qualities," writes Mrs. William Vollmer, Eastwood, N. Y. When bilious, constipated or troubled with indigestion, give them a trial. They will do you good.—For sale at Clark's Drug Store.

PERSONAL MENTION

Mr. and Mrs. Alonzo Hanson arrived Friday from Tekoa for a visit with relatives.

Evening from Lewiston after visiting with her sons Henry, Leonard and Chester, and families.

Mrs. Geo. Van Buskirk and children returned Friday from Pullman where they spent a few days.

Mrs. Winegardner and daughter, Miss Edith, were Genesee visitors from Lewiston Monday.

Miss Effie Westensee left Thursday morning for her home near Colville after a visit at the Rader home.

Mrs. Jas. Edwards and children came up from Lewiston Wednesday for a visit with Mr. Edwards.

Helen Whitted arrived in Genesee Sunday from Lewiston and will spend the summer here with relatives.

Mary G. Stevens returned to Lewiston Friday after a short visit here.

Mrs. Ben Mochel returned Sunday

Mrs. A. A. Butterfield arrived Monday from Pullman for a week's visit with her parents, Mr. and Mrs. John Lawson.

Mr. and Mrs. G. E. Sampson and daughter, Miss Gertrude, Mrs. Dave Johnson and Will Geltz spent Monday in Lewiston.

Geo. Schlerth left early Sunday morning by auto for oPrtland, Oregon, expecting to be gone some four or five days.

Mrs. Geo. Rader and baby returned Wednesday from Harrington, Washington, after a few weeks' visit there with relatives.

Mrs. Wm. Esser and little granddaughter arrived Monday from Kootenai for a visit with friends and to attend to business matters.

Mrs. Ed. Wheeler arrived in Genesee Saturday afternoon from Wimer, B. C., for a visit with Mr. Wheeler's mother, Mrs. Ida Wheeler.

Mrs. J. G. Wilkins and little son returned to their home at Tacoma after a visit at the home of Mrs. Wilkins' mother, Mrs. Mary Isaksen.

Mr. and Mrs. Chas. Mochel and little son arrived Sunday from Walla Walla for a visit with Mr. Mochel's parents, Mr. and Mrs. Geo. Mochel.

Mrs. A. B. Maxwell returned to her home at Johnson, Washington, Saturday morning after a few days' visit with her mother, Mrs. Mary C. Wahl.

Miss Christina Lorang arrived Sunday from Spokane for a visit at the home of her parents, Mr. and Mrs. John Lorang, and with other relatives.

Mr. and Mrs. Carl Osmundson and children left Saturday forenoon via Ford for Los Angeles, California, where they expect to make their home.

Bonnie and Thelma Woodward left Tuesday morning for a visit with relatives at Oaksedale, Washington. Little Miss Patricia Woodward left at the same time for a visit at Johnson.

Mrs. Dave Johnson and Will Geltz left Thursday morning for their homes at Seattle after a week's visit here with relatives. Miss Margaret Sampson accompanied them home for a visit.

Mr. and Mrs. John Meyer and Louis Flomer and Mrs. G. E. Taber and children left Tuesday morning by auto for Myrtle Point, Oregon, where Mr. Taber is at present employed, for a visit with Mr. Taber.

Conrad Caldwell was brought home Sunday from a Lewiston hospital where he had been the past three weeks recovering from an operation for appendicitis. He stood the trip very well and is getting along nicely.

Mrs. Geo. Gillespie and son, George, jr., of San Francisco, California, who had been visiting her aunt, Mrs. Mary C. Wahl, and other relatives here, left Saturday forenoon to resume their journey to Yellowstone park. Mrs. Gillespie was very favorably impressed with the Genesee country and said it is one of the most beautiful farming communities she had ever seen.

R. S. Sullivan arrived in Genesee last Friday evening and spent a few days with his wife and daughter, leaving again Monday "for parts unknown" to the News man, to look up a new location. He had spent the past several weeks at Shelby, Montana.

Mr. and Mrs. George Wheeler and children, Clarence Doyle and Martin Foster left Friday morning for Mullan where they intended to locate for the present, at least. Mr. Foster went to Burke just in time to have his job burned out from under him. He returned to Genesee Wednesday.

F. W. Loncosty arrived home Sunday afternoon from Shelby, Montana, where he has been working at the carpenter business for the past few months, for a visit with his family and to look after business matters. He returned to Shelby Thursday morning where he expects to remain until fall.

Sheriff Jas. J. Keane was in Genesee Wednesday morning for a few hours in quest of those who had not paid their automobile license for 1293. He stated that several had recently applied and that in case others did not do so he would make another visit to the city, although he stated that he was unable to obtain any names.

Given Shower

Thursday afternoon July 12, a host of ladies gathered at the Hove farm home, and gave Mrs. Fred Hove a most pleasant surprise shower of household articles. The gifts were many and useful, consisting of silver, china, linen, cut glass pyrex, and aluminum ware.

The afternoon was spent in sewing and "chatting." Miss Josie Hoveland sang several selections in her usual pleasing manner. Late in the afternoon, a bounteous lunch was served by the ladies, who had brought well-filled baskets of good things to eat.

We do all kinds of printing.

Converting An Irrigated Orchard Tract Into a Diversified Farm

There is no longer any question about the desirability or the necessity of greater diversification in the Valley. We are agreed that other crops must be grown to supplement the apple, and the problem confronting us now is what to grow and how to get a diversified farm out of a bearing orchard.

A definition of what diversification means may help to simplify matters. As opposed to specialized farming, in which one crop only is produced, diversified farming has come to mean the growing of a great variety of crops without special attention to any one product. A little bit of everything and not much of anything, is the popular conception of a diversified farm.

Such diversification can not possibly be profitable and is not desirable under any conditions and especially under the conditions existing in the Spokane Valley. With us the only crops that can profitably be produced are those that give a high return per acre. Such crops must of necessity be grown by intensive methods of farming and require a great deal of attention. For that reason we must concentrate on a very few crops.

Advantages of Diversification.

The one advantage of growing more than one crop that we hear most frequently is that it protects the farmer against a complete failure. Since there is hardly a day in the year when weather conditions of other forces not under the control of the grower may not entirely ruin his chances for a crop of fruit, the protection offered by supplementary crops is especially valuable to the orchardist.

There are two other advantages of diversification that should not be overlooked. Additional crops that are harvested at different seasons will provide work over a greater part of the year and decrease the amount of extra labor that must be hired at certain periods by reducing the acreage of each crop. Furthermore, with two or three harvests each year instead of one the income will be distributed more evenly over the entire year and there will not be so many lean months.

The advantages of diversification can only be realized by choosing the proper crops to grow. On account of the high price of our land and the climatic conditions the following crops or products are probably about all that can profitably be grown on the irrigated land of the Valley: Tree fruits, small fruits, truck crops, poultry products, and dairy products.

Leaders and Supplementary Crops.

It is generally thought best to have one leader or crop that will receive the most attention or be planted in the largest area. Since most of us already have bearing orchards on all or most of our land we will naturally have apples for our leader. If poultry or cows are to have a position of any importance in our scheme it will be best to make that the leader for it is certain to require a great deal of time and attention.

Besides the leader, one, two or not more than three supplementary crops should be selected. The choice of these crops will depend on what is to be made the leader, what the individual's tastes are, and how much land and capital are available.

The fruit grower who is in that business because it appeals to him is not likely to be interested in chickens or cows. His supplementary crop then should be other tree fruits or some of the small fruits. Apples with pears or sour cherries would make a satisfactory diversified farm. The greatest disadvantage of this scheme is that all the crops are subject to injury from the same weather conditions.

The quickest and easiest method of diversifying an orchard tract is to add chickens. No open land is required and the full amount of orchard can be retained. The disadvantage here lies in the fact that both are naturally leaders and one or the other will have to be subordinated with the possibility of unsatisfactory results.

Where the land is not quite so high priced and there is some open land available chickens and cows make an ideal combination for a diversified farm. Two or three examples of this type of farming in the upper part of the Valley are conspicuous by their success. They are not adaptable to the small orchard tracts that are most common in the Valley.

"The third factor is a good brood sow."

Distribution of Labor.

The quickest method of all of obtaining additional income is by growing some of the truck crops. Since no elaborate equipment is required and the returns come in the first year there is much to commend the planting of tomatoes, melons, peppers or some of the other vegetables than can be marketed in Spokane.

A more even distribution of labor has already been given as one of the advantages of diversification and this factor should be given consideration when choosing other crops to go with the leader. The labor required in producing a crop is divided into two kinds, that fixed as to time and that that may be performed whenever there is time available.

Almost all the labor required in raising apples is fixed as to time and must be done at very definite periods. If apples are to be the main crop grown, the other crops should be selected with regard to the labor requirements of the apple crop. Crops with planting and harvesting seasons that do not conflict with the busiest periods in the orchard are most desirable.

Professor G. F. Warren at Cornell, an authority on farm management, has tabulated the labor requirements of a number of crops. For apples he finds that the greatest amount of labor is required at two seasons, during April, May, and June, and during September and October. His data was secured from eastern non-irrigated orchard tracts and would not entirely fit conditions in the Valley. However, the "busy" seasons he determines for apple growing in the east corresponds to our busiest periods here. The spring work, including working the ground, seeding the cover crop, applying the calyx and early cover sprays, and making the irrigation ditches will fully occupy the grower's time for a period of about two months.

The harvest season is the one time that the grower must give his undivided attention to the one crop. Especially is that true if he attempts to pack and market the crop himself. Tree truck crops grown in this district are usually all harvested before apple picking begins, but occasionally, when frost does not come until late in the fall, the truck crops are abandoned before they are all harvested.

What to Do With the Orchard.

The distribution of labor in dairying is more even than with any other kind of farming. Much the same condition exists with poultry except during the incubation season and while the chicks are requiring the most attention. As far as the labor factor is concerned cows and chickens can be combined very nicely on the diversified farm.

With these considerations in mind each grower should select crops to grow that will best fit his conditions. If his land is all planted to trees and the trees are in good condition it would probably not be wise to take any of them out in order to grow other corps. It would be better for him to begin in a small way to build up a flock of chickens or a dairy herd.

But if a part of the orchard is of those varieties that we have found unprofitable in this district, because of inferior quality or failure to bear, those trees should come out as soon as possible and some profitable use made of the ground. After the owner of an orchard has waited for several years for his trees to come into bearing it is hard for him to pull them up, but it is easier than to go on for years paying the expenses, water rent, and taxes without any return.

The short-lived varieties, such as the Wagoner, are beginning to die out already and with the loss of other trees due to winter injury many spaces are appearing in some orchards. Whether to replace the trees that die with others or remove those that remain and plant some other crop on that land must be decided by each grower who finds that condition. Certainly it will not be profitable to leave the survivors scattered over the land after any number of the trees have died.

New trees set where bearing trees have been taken out usually do not grow satisfactorily. For that reason it is better to leave such spaces unoccupied for a period of two or three years and grow a cover crop on the ground. Pear or sour cherry trees will be more likely to grow and will give a diversity of fruit crops, offsetting the inconvience of having different kinds of fruit scattered through the orchard.

A Question of Getting Started.

Many new farms will be established in the Valley during the next few years and the necessity for diversification applies to them just as it does to those already in cultivation. If all of the new settler's land is planted to trees or devoted to any other one crop he will be facing the same problem in a very few years that is confronting the rest of us.

Converting our orchards into diversified farms requires that we first realize the necessity of such a change. Next we must take stock of the conditions we are working under, pick out the crop that those conditions indicate should be a leader and the crops or products that can best be produced in connection with that leader, and then get started.

It is hard to realize and harder to admit that we can not depend on the apple for a sure and sufficient income and that we must change our system of farming to include other crops. Realizing that as a fact, the necessary changes are easily made and there is no reason to believe that we will not be successful. In fact some of our neighbors have already shown us the way.

Boys' and Girls' Farm Club Work

Hallis Stevens of East Hoquiam, the first club member to start in poultry club work secured 100 day-old chicks and lost them in a fire which burned his brooder and stock. Not discouraged he secured 100 more chicks and brooded them under hens. He obtained the stock on the basis of returning 13 pullets when they were 12 weeks old. All of the chicks came from the Grays Harbor hatchery.

Stanley Sporscen and Gordon Balch, members of the Sequim calf club, defeated their opponents, Marion Eacrett and Lexard Dilling of the Mt. Pleasant calf club in a milk testing contest held during the cow testing tour. Not satisfied with this victory, they entered a judging contest in selecting and estimating butterfat production of six cows and won over forty dairymen, Port Angeles business men and editors who were present.

Spokane county will have 100 boys and girls enrolled in swine club work this year.

Walter Motley of Roxboro, Adams county, was the first pig club boy to enter the ton litter contest. Walter's sow produced enough pigs to put him in the running to develop a ton of pork within six months. The ton litter idea is being advocated strongly among boys and girls pig clubs in order to see what can be done in Washington.

N. C. Donaldson, county agent of Adams count, reports that Arthur Motley, another pig club member from Roxboro has furnished four gilts to other club members during the past month. There are now 36 boys and girls enrolled in the sow and litter clubs of the country. It is expected there will be more of these boys and girls qualify for the contest before closing date, April 10.

Breaking a Record.

What promises to be a record breaking summer quarter at the University of Washington opened last week, with 1840 students enrolled at the end of the fourth day of registration. This number represents an increase of 366 over thos enrolled on the same day last year, the 1922 figures being 1474.

A large growth was noted in the registration of graduate students, much stress being laid on post-graduate courses in the summer session.

ON HER, TOO.

Doctor to the patient's wife, on second visit: "How's your husband this morning?"

P. W.: "Ah, Doctor, I fear he is worse. The directions on the medicine bottle say to shake well before using, and he can not stand the strain. It's too rough on him."

DAIRY

The average production per cow for 3325 cows that finished the year in the Snoqualmie cow testing association was 9,2291 pounds of milk and 364 pounds of butterfat. This is an average of 527 pounds of milk and 18 pounds of butterfat over last year. The high average of the association is not surpassed by any other association in the state.

The new King county cow testing association finished the month of May with 25 members owning 708 cows. The production average was 1078 pounds of milk for the month, and 39 pounds of butterfat.

Calves fed on skimmilk get all the nutrients found in whole milk except the butterfat. For thi seasons the grain ration is most satisfactory when composed largely of fattening grains such as cracked corn, rolled barley, wheat or oats. The oats may be either ground or fed whole. The Montana experiment station has successafully used the following rations for a number of years: With a mixed hay for roughage, feed rolled barley, five parts; oats, four parts and wheat bran one part, or cracked corn, five parts; oats, four parts; and oilmeal one part. With clover or alfalfa hay for roughage feed rolled barley six parts and oats four parts.

Thousand-pound butterfat producers in the dairy world are coming about as fast as home runs in the sport world. The latest cow to produce over a thousand pounds of butterfat is Holstein by the name of Irene Segis Pontiac, owned by the Palo Alto Stock Farm at Palo Alto, Cal. Her record, according to the Advanced Registry office, is 30, 022.3 pounds of milk and 1,017.24 pounds of fat, equal to 1,271.55 pounds of butter. Irene is the sixty-eighth Holstein to produce 1,000 pounds of fat. Only ninety cows of all breeds have equaled this production. In her highest month, Irene Segis Pontiac produced 114.3 pounds of butterfat and in her lowest month, she produced 63.5 pounds of fat. She freshened at the age of five years, three months.

Indians Called Olympics "Sun-a-Do"

History of the name of the Olympic mountains, which cover a large area in western Washington, was told by Edmond S. Meany, professor of history at the University of Washington, in an article on the origin of geographic names of this state, recently printed in the Washington Historical Quarterly at the University.

"The Olympic mountains," according to Professor Meany's outline, "occupy a large part of what is known as the Olympic Harbor, the Strait of Juan de Fuca, the Pacific ocean and Hood canal. The mass of mountains has no general axis and it is therefore hardly proper to use the word "Range" as part of the name. The large group of picturesque and glacier-torn peaks receive its proper name through a century of evolution.

"Mount Olympus, highest peak in the range, was discovered by the Spanish Captain, Juan Perez, in 1774, and named by him 'El Cero de la Santa Rosalia.' The Spanish chart was not published until years had elapsed. On July 4, 1788, the British Captain, John Meares, saw the mountain and named it Mount Olympus. Captain George Vancouver saw the mountain in 1792 and charted the name as given by Captain Meares. The name has remained on all subsequent maps.

The evolution began with Captain George Vancouver, who in 1792, wrote these two descriptions: 'The shores of the harbour (New Dungeness) were of a moderate height; its western side bounded at no very great distance by a ridge of high craggy mountains covered with snow, were, as I conceived, connected with the mountain we took for Mount Olympus.' Later, while at anchor opposite the site of the present City of Seattle, he wrote: 'The ridge of mountains on which Mount Olympus is situated, whose rugged summits were seen no less fancifully towering over the forest than on the eastern side, bounded to a considerable extent our western horizon; on these, however, not one conspicuous eminence arose, nor could we not distinguish that which on the sea coast appeared to be contrally situated and forming an elegant bi-forked mountain.'

"The Wilkes Expedition, 1841, used 'Mount Olympus Range' and 'Olympic Range.' In 1853, Theodore Winthrop wrote: '* * * the noble group of the Olympian mountains become visible—a grand family of vigorous growth, worthy more perfect knowledge.' Later, he declares that the Victorin Indians called the Olympian mountains 'S'nganzaneh.' J. A. Costello says the Duwamish Indians used the name 'Sun-a-do.' J. G. Kohl, in his work in Hydrography, 1855, says the mountains 'may be called the Mount Olympus Range.' The may by the Surveyor General of Washington Territory, 1857, shows 'Olympic Range.' Captain George Davidson, of the United States Coast and Geodetic Survey, uses the name 'Olympus Mountains.' Professor Henry Landes uses the name Olympic mountains. Most of the mountains are within the Olympic National Forest, proclaimed on March 2, 1907, embracing 1,594,560 acres. Within this forest there was proclaimed on March 2, 1909, the Mount Olympus National Monument, embracing 608,640 acres.

GRAVEL ROADS LEAD OTHERS IN MILEAGE

The relative mileage of the various types of road being built in this country is indicated by figures given by the bureau of public roads of the United States department of agriculture. These figures apply only to federal aid roads, but since they represent 25,000 miles of road now in use and include roads built in every state they may be taken as fairly representative of the character of the main highways. The 25,000 miles is divided by types as follows:

	Per cent.
Gravel	39.1
Graded and drained	20.6
Cement concrete	18.3
Sand clay	10.8
Bituminous macadam	4.0
Bituminous penetration	3.1
Water-bound macadam	2.7
Brick	1.4

Complete figures covering all roads constructed and now in use would undoubtedly show somewhat higher percentages of the lower types of road, since the more important roads have been selected for improvement with federal aid.

A Bibulous People.

Each year thirsty Americans consume 4,000,000,000 bottles of soft drinks, and this total does not include beverages such as near beer made from cereals, says the department. These drinks come from 10,000 bottling establishments and over 110,000 soda counters. The skilled chemist has provided a host of flavors which the consumer can not distinguish from the original. The same is true as well as the color and flavor of fruits is being imitated. These modern beverages contain nothing dangerous to health, but the food and drugs act demands that such products be libeled for what they are.

She: "Get away from that post there's paint on it."

He: "Oh, I thought it was your face I smelled."—Ex.

OFFSCOURINGS OF EUROPE, ASIA VIOLATING IMMIGRATION LAWS

Who's Loony Now?

With the announcement of the Reichstag that 300,000 paper marks are being paid for one gold $20 piece, American residents in Berlin were laughing Sunday over the latest mark story told in the Adlon bar, famous rendezvous of visitors here.

As the story runs, a lunatic managed to escape from an asylum where he had been incarcerated since 1914. Once free and in the open streets he hired a taxi and ordered the driver to take him to a cabaret.

Taximeters still register the old normal fare, but the man who used a taxi must pay 9000 times what it registers. However, when the lunatic reached his destination, the meter only registered 3 marks.

Fishing about in his pockets, he came upon a 10-mark gold piece, forgotten there years before. This he offered to the chauffeur who, although surprised to see gold in circulation, began to figure up what change he must give.

"Your ride cost 3 marks—that is to say, 27,000 marks," he told the lunatic. "Now, you give me 10 marks gold, that is, 150,000 marks, Therefore, you must get 123,000 marks change."

Pulling a huge wad of paper money from his pocket, the chauffeur began to count off dozens of 5000 marks bills. The lunatic's jaw dropped.

"Here," he said, "do you mean that I actually get 123,000 marks change?"

"Yes—if I can find that much."

"Never mind," said the lunatic, "Keep the change. Drive me back to the asylum, it's the only place where people aren't crazy."

At the Railroad Station.

Boy: "Cary your bag, sir?"

Traveler: "No."

Boy: "I'll carry it for a dime?"

Traveler: "I tell you I don't want it carried."

Boy: "Then why are you carrying it?"—Ex.

"Bootlegging" of Undesirables Is Growing at a Rapid Rate.

THREATEN EXISTENCE OF U.S.

Regular Offices Maintained by Organizaiton Designed to Defeat U. S. Laws.

Unless a way can be found to stop them, the rakings and scrapings of Europe and Asia will soon swamp this country, says a report from Washington, D. C.

Under the 3 per cent law only 357,803 immigrants can legally come into the United States in one year. On July 1 the quota for 1924 became operative and in a few weeks at most this will be about filled.

But immigrants will continue to pour in just the same. Chinese, Japanese, the rag-tag and bob-tail of the off-scourings of Europe—anybody who can beg, borrow or steal the price—can now be smuggled in with more or less ease.

Officials here admit about 300,000 are now coming in annually in this way. And the practice is growing. Just before war, when immigration was unrestricted, about 1,000,000 a year were coming in legally. This number will soon be reached, if not surpassed, through illegal channels, if percautions are not taken to prevent it.

There are regular agencies in Canada, Mexico, Cuba and elsewhere outside the United States to smuggle aliens in. The fee ranges from $50 a head to $1000—or more, if the smuggler can get it.

The Asahi, a Tokyo newspaper, declares it has been discovered there that sailors on Japanese ships have been doing a regular business smuggling Japanese into America.

In Mexico and Canada today there are about 30,000 Chinese and other orientals awaiting their chance to slip across the frontier, while thousands of aliens of the most undesirable kind make their way to the United States via Cuba, the Florida coast or the Mexican border.

While some of these agencies are foreign; others are scallawag Americans of the bootlegger variety who maintain offices both in this country and abroad.

Some of the big employers of the country maintain employment agencies near the Mexican border. These at least facilitate the "disappearance" of thousands of aliens, who, after being bootlegged across the frontier, are swallowed up in the great industrial centers of the east and middle west. These want cheap labor and no questions asked.

This traffic in human beings is an outgrowth of rum-running. If the great rum fleets or underground railways can get by with booze they can get by with the rest. So reason the crooks.

So Washington today faces a new sort of invisible empire, an empire of the underworld. International in scope, highly organized, well financed, it laughs at federal officials and is growing more powerful daily.

Squelching the outlaw Barbary states of northern Africa, which rollicksingly committed depredations against the United States for decades, cost Uncle Sam a scandal, $3,000,000 and a war.

Squelching this new bootleg Barbary threatens to cost more.

HALF WORLD'S WORKERS ENGAGED IN AGRICULTURE.

Fully one-half ethe workers of the world are now engaged in agriculture, according to figures published by the United States Department of Agriculture. Of all occupied men and boys in 23 leading countries, 51.4 per cent are engaged in agriculture, and, of all occupied women and girls, 50.6 per cent follow agricultural pursuits, statistics show. The figures do not include the large agricultural populations of Russia, China, Serbia Hungary, Argentina, and Brazil.

The largest number of both male and female agricultural workers in the countries covered is in India, where 71,000,000 males and 34,000,000 females are employed and comprise 72 per cent of the total number of workers. The United States is second with 11,000,000 male and 2,000,000 female agricultural workers, or 29 per cent of all employed persons.

The figures were compiled to show that problems concerning agricultural workers affect a larger number of workers in almost every country than those engaged in manufacturing, mining, lumbering, or commerce, and in a few countries more than in all these industries combined.

MANY SERVICE MEN IN SUMMER COURSES

State College Training 63 Disabled Veterans from All Parts of United States.

This summer there are 63 of Uncle Sam's marines and army men being given special training at the State college of Washington. They represent 29 cities and towns of Washington, 14 in Idaho, 3 in Oregon, 2 in Montana, 2 in Indiana, and one each in Utah, North Dakota(New York City, Wyoming and Ohio.

They are studying everything from football coaching to typewriting, from plant diseases to control of adolescents in high schools. Some of them are continuing work begun in the regular college session. Others are taking up new lines offered this summer, that interest them particularly and point to profitable employment when they have guished their training.

All of these men are being given all or part of their expenses while preparing themselves for some occupation of greater service to the nation and more profit to themselves than they could enter without Uncle Sam's help.

NATIONAL MONUMENTS AND PARKS OF ALASKA

The Territory of Alaska has within its borders one national park and three national monuments, according to the Interior Department.

Mount McKinley National Park, created by Congress in 1917, is the second largest national park in the United States. It comprises an area of 2,645 square miles or 1,692,800 acres and is the outstanding scenic attraction in Alaska, having as its chief features Mount McKinley, the highest mountain in North America, and immense herds of caribou and bands of mountain sheep. Through the construction of the Alaska railroad, the park has been made accessible to tourists with a stop on the line at McKinley Park Station, No hotel facilities are as yet avgilable at the railroad station or within the park. Roads have not been developed within the park, but one costing $325,000 has been proposed. One trail crosses the park to the Kantishna mining district.

The Sitka National Monument, established in 1910, contains 57 acres: It was the scene of a massacre of Russians by Indians in 1802. Within its limits are 16 totem poles of best native workmanship. It is situated near the port of Sitka.

Katmai National Moument was created in 1918 and contains 1,088,000 acres. It is a wonderland of volcanic action, having within it the "Valley of Ten Thousand Smokes." It is inaccessible to ordinary tourist travel.

Old Kasaan National Monument, established in 1916, embraces 38 acres of land on the east coast of Prince of Wales Island and covers the abandoned Indian village called "Old Kasaan."

The Highways to the Great Far West

Ten years ago the successful completion of a transcontinental motor trip was an event to chronicle in the daily papers. This year probably 40,000 machinee will travel from the Mississippi to the Rockies and beyond. All of which indicates the size of the tremendous road-building job the Far West has accomplished in the last decade.

Look at the heavy black line running from Vancouver in British Columbia through Washington, Oregon and California to the Mexican line below San Diego. It represents 1500 miles of smooth highway, 85 per cent of it paved with concrete or asphalt, across numerous valleys and five mountain ranges, a highway open practically the year round, a road so wide, solid, smooth and substantial that daily records of 400 miles are not rare. With its two branches below San Francisco the Pacific Highway represents an investment of nearly $50,000,000 and from May to November its straightaways and curves are crowded with cars from all the 48 states. The Pacific Highway is so nearly completed, it is so well marked and sign-posted, that its full length can be traversed by strangers without the help of maps or printed directions.

'Cross Continent Roads.

The east-end routes across the continent have not yet reached the perfection of the Pacific Coast's main north-and-south artery, yet enough progress has been made to enable the average driver to cover the 2,000 miles between the Mississippi and the breakers of the Pacific safely, with fair speed and comfort.

At present there are three well-marked principal highways across the country. So far as the west is concerned, these three routes begin at the Twin Cities in Minnesota, at Omaha in Nebraska and at Kansas City in Missouri.

The National Old Trails route traverses Kansas, a corner of Colorado, New Mexico, Arizona, and reaches the Pacific at Los Angeles. It has been improved throughout its entire length and as a rule is kept in good condition.

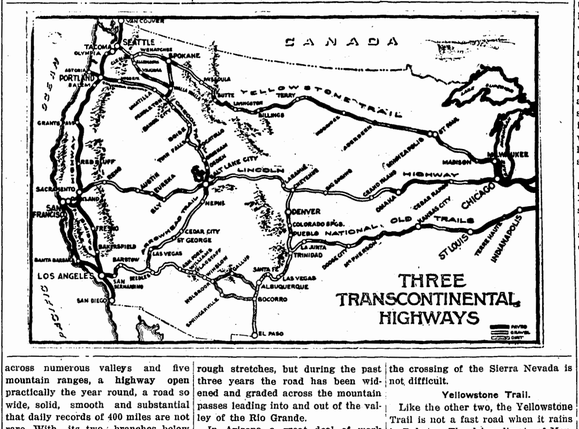
The Southwest.

In Kansas there are many miles of difficult driving during wet weather; in Colorado the road has been graded and graveled for most of its length; in New Mexico there are still a few rough stretches, but during the past three years the road has been widened and graded across the mountain passes leading into and out of the valley of the Rio Grande.

In Arizona a great deal of work has been done on this route, but of course the sparsely settled state has not had the means to improve every portion of the Trail. Eyen in wealthy California the desert portion of the route between Needles and the San Bernardino mountains has not been paved, though it is always kept in good condition. The mountain stretches on this route are principally in New Mexico; elsewhere it traverses a plateau country with gradual approaches to the summits.

Lincoln Highway.

The Lincoln Highway is the oldest and best improved of the three routes here described. In Nebraska the going is heavy during wet weather, but Wyoming has practically completed a graded and graveled route clear across the state. In Utah several miles of rough going through the Wasatch range east of Salt Lake City are being improved this summer. There is less mountain work on the Lincoln Highway than on the southern route and up to Salt Lake City it offers no dangers and difficulties whatsoever. But from Salt Lake City across the Salt Lake desert the highway is not in good condition, no work having been done on it by the state in four years. Rather than tackle this stretch of rough going, most of the tourists prefer to go southwest via the Arrowhead Trail to Los Angeles or northwest over the historic Oregon Trail through southern Idaho and Oregon to the coast. It will probably be another year before a really passable road across the Salt Lake desert has been built. Nevada has improved long stretches of the Lincoln Highway and



might cause no end of trouble not to mention the pain.

Keep Stove Bright—Rub your stove oil daily with an ordinary piece of newspaper and the polish will remain twice as long.

Which Makes Which?

Senator McNary, of Oregon, says that forests make rain. Proof—the coasts of Northern California, Oregon and Washington are densely covered with timber and the rains fall on them voluminously. Dr. Newell, consulting engineer of the Reclamation Service, says to make forests. Proof—it rains heavily on the North Pasific coast, and the forests are luxuriant. This meteorological collision was staged at a hearing of the Senate Forestry Policy Committee, of which McNary is chairman. Dr. Newell hinted that the Cascade mountains and moisture-laden Pacific winds might have something to do with rains on their western slopes and aridity eastward. McNary, however, knew better; hadn't he lived in that country all his life?

Senator McNary wants 50 per cent of the incomes of the National Forests turned over to the states in which they are included. He calculates that this would mean $200,000,000 for Oregon in the next fifty years, or during the period in which the present standing timber is removed. Col. Greeley, Chief of the Forest Service, sidestepped when Senator McNary asked his support of the fifty-fifty plan; the present division being 25 per cent to the county governments and 10 per cent to to public roads and trails through the forests. The Colonel opined that it would take all summer for him to think it over—.

A real dirt farmer held the position of president of the Farm Bureau and president of the Rotary club in a city of 15,000 people. Why not?

HELPFUL HEALTH HINTS

By A. LEDA

A New Broom—Before using a new broom, soak it in bolling water with salt. This will toughen the bristles and make it last much longer.

Iodine Stain—A very hard stain to remove is iodine. It can be done though if soaked in milk, occasionally rubbing the spot.

Clothespins—If you will boil your clothespins once or twice a month you will find they last much longer.

Oatmeal — A little sugar added to oatmeal while it is cooking will improve the flavor.

Fruit Stains—If powdered starch is applied instantly to fruit stains, it will usually remove them.

Short Stemmed Flowers — To prevent flower stems going down too deep in a tall vase roll some ordinary newspaper into a loose ball. The flowers will then stand up. It will hold the moisture, if replenishing the water is forgotten, which is a double benefit.

Ironing Pongee — Pongee, unlike most materials, should not be dampened when ironed. It should be thoroughly dried and ironed on the wrong side for a really good effect.

For Sticky Substances — If when grinding raisins or any such sticky substances a few drops of lemon are squeezed into the food grinder first, the difficulty will be removed.

Broken Glass—If a glass is broken, don't try and pick up the small pieces. Instead lay a wet woolen cloth on the floor where the fragments are and pat it. The tiny particles will adhere to the damp cloth and that can easily be burned. A piece of glass in the flesh

She: Oh, Algy, you English are so slow.

He: Er-er—I'm afraid I don't grasp you.

She: That's exactly it.

Saving What You Grow

Prepared by the Extension Service, State College of Washington.

Those Sour Pickles.

Pickling time will soon be here so we are giving a few general rules to be followed, which will help assure success with your product. Always use a good grade of vinegar. Use a porcelain or agate-lined kettle because of the action of the acid. Do not boil vinegar over 12 minutes as it loses its strength.

Keep the pickles covered with vinegar in good clean glass or stone jars. A few pieces of horseradish added prevents scum from forming on the surface of the vinegar. If cucumbers are soaked in a brine over night they will be firmer, milder flavored, have more of the salt taste and will add to the keeping qualities.

A brine made of about ½ cup of salt to a quart of water is the proportion most commonly used. Let brine come to the boiling point, but do not boil. Cool before using. If too strong, a brine is used for vegetables they will soften and spoil. Wash the cucumbers in clean cold water. Do not use a vegetable brush as this rubs off the little points that make the cucumbers shrivel when soaked.

Lazy Housewife Pickles are made by using 1 gallon vinegar, 1 cup sugar, 1 cup salt, 1 cup mustard and 4 quarts small cucumbers. Mix salt, sugar and mustard together; add the vinegar slowly stirring well. Wash and look over the cucumbers and put in a stone jar. Pour over the pickle brine, or put in glass jars. Pour vinegar over and seal. The brine is not heated and these pickles are ready for use in a week's time.

Sour pickles may be made by taking fresh cucumbers not over 3 inches long, wash and drain. Clean and slice a quantity of horseradish root. Place a layer of the horseradish in the bottom of the container, then a three inch layer of cucumbers and another layer of horserdish until teh vessel is filled. Cover with a boiling hot solution of brine made in the proportion of 1 pine of salt to 1 gallon of water. Let stand 24 hours, drain off. Scald good cider vinegar in which spices have been placed if desired, and pour over the cucumbers. Put on cover and weight to hold the pickles under the vinegar.

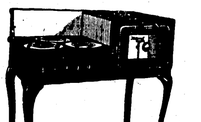
ELECTRIC RANGES



AT THE REDUCED PRICE

Sale Closes Saturday Night, July 21

(We are now in our new office)

The new Bungalow model Electric Range is on display at our new location---(first door west of post office). You are cordially invited to come in and see this wonderful little Electric Range that we are offering at a bargain introductory price. Come today.

Washington Water Power Company

WHAT AUTOMOBILE ENGINE OIL SHOULD TEST

The following is an extract from an article on "What Automobile Engine Oil Should Test," by David L. Gallup, professor of gas engineering, Worchester Polytechnic Institute, as published in the National Petroleum News:

The "flash test" in an oil of reputable manufacture is without question one of if not the most important characteristics. It is on this reality that the life of oil depends. Aside from its other qualities as a lubricant, the flash test, if less than a certain quality may preclude entirely considera-tion for use in an automobile engine. No one would seriously consider for a moment the use in an internal combustion engine of a so-called "machine" oil. The gravity, viscosity, color and cold tests might, however, be in agreement with many brands of automobile lubricants. The distinctions is solely in the value of the flash test. The ordinary man reasons that this is as it should be, since the temperature to which the oil is subjected should affect the oil. What is particularly interesting, though, is that some manufacturers lay great stress on the fact that the oil in an autos mobile engine should not have a high flash test, maintaining that it should be low in order that the oil may burn up cleanly. Is it out of place to ask right here, What is the function of a lubricant, to lubricate, or burn up and furnish heat for the engine? If the latter, why not go a step further, using an oil such as is used on journals, riches, etc., having a flash low enough to guarantee complete cambustion. The argument concerning "burning up clean" has come to the front in a very conspicuous manner recently, and is exceedingly unfortunate, for it would seem that it actually has been made to fit the oil rather than to obtain an oil which satisfies certain conditions primarily laid down as essential.

The proper and sole function of an oil should be to lubricate. It can be distributed in a way so as to be used over again or in a manner which will provide for its complete utilization, and this by wearing out or evaporation but not by burning.

To return, an oil is made up of certain constituents, the combination of which gives to it definate characteristics. If any one of these is changed or removed, that oil has a different lubricating value. Hence, any oil which is subjected to a temperature exceeding the value of its flash test, will have certain portions distilled or burned off, with the result that the oil has deteriorated as a lubricant. Therefore, the logical conclusion is that other things being equal, the flash test should be as high as possible, in order to be proof against this deterioration. The exact value of this is of course difficult of determination, and will need to be governed largely by experience. Results of tests extending over a long time have emphasized the fact that it should not be less than 400 degrees F. approximately. An oil having a lower flash test is burned away rapidly and needs to be replaced by addiaional supply; it is often the case that even though the cost per gallon of the low flash oil is less, the total expense for oil alone per year is more than would be the case with a more expensive high-flash oil: saying nothing of the injurious effect which the inferior oil has upon the bearings.

Theoretically, an oil may burn up clearly; practically, no such thing exists. Oil is compound of H and C, and in order to burn "clean" must have complete combustion, which must be brought about by the proper proportion of air and correct temperature. These demands are almost impossible of fulfillment in ordinary operation. With gasoline a very considerable range of proportion and temperature may exist without seriously impairing the efficiency of burning, but this is not so with an oil used as a lubricant. On the other hand, it is inconceivable when an analysis of conditions is made, to consider that no portion of a lubricating oil is burned away in an automobile engine; hence the aim should be to make whatever amount is burned as small as possible.

In passing, it might be well to state that means should be provided in any automobile engine for keeping the lubricating oil as cool as possible. This refers particularly to the oil in the crankcase and results from the fact that a hot oil cannot be depended upon for lubrication under severe conditions to the extent that a cool oil can. Hot oil is constantly giving off vapor which in turn reduces the oil to many its basic constituents, resulting in a very different lubricating value. A few makers of engines are aware of this fact and are making provisions for it.

SUMMONS

In the District Court of the Second Judicial District of the State of Idaho, in and for the County of Latah.

Anna Burns, Plaintiff, vs. John Burns, Defendant.

The State of Idaho sends greeting to the above named defendant:

You are hereby notified that a complaint has been filed against you in the District Court of the Second Judicial district of the State of Idaho, in and for the county of Latah, by the above named plaintiff, to procure a decree of divorce from the said defendant on the grounds of willful neglect and to procure the custody, care and control of a minor child, George Meacham Burns.

And you are hereby directed to appear and answer the said complaint within twenty (20) days of the service of this summons, if served within said judicial district, and within forty (40) days if served elsewhere; and you are further notified that unless you so appear and answer said complaint within the time herein specified, the plaintiff will take judgment against you as prayed in said complaint.

Witness my hand and the seal of said District court, this third day of July, 1923.

One Dollar Saved Represents Ten Dollars Earned

The average man does not save to exceed ten per cent of his earnings. He must spend nine dollars in living expenses for every dollar saved. That being the case he cannot be too careful about unnecessary expenses. Very often a few cents properly invested, like buying seeds for his garden, will save dollars outlay later on. It is the same in buying Chamberlain's Colic and Diarrhoea Remedy. It costs but a few cents, and a bottle of it in the house often saves a doctor's bill of several dollars.—For sale at Clark's Drug Store.

SUMMONS

In the District Court of the Second Judicial District of the State of Idaho, in and for the County of Latah.

William Post, Plaintiff, vs. Nettie Post, Defendant.

The State of Idaho sends Greeting to the above-named defendant:

You are hereby notified that a complaint has been filed against you in the District Court of the Second Judicial district of the State of Idaho, in and for the County of Latah, by the above named plaintiff, to procure a decree of divorce on the part of the plaintiff on the ground of desertion.

And you are hereby directed to appear and answer the said complaint within twenty days of the service of this summons, if served within said judicial district, and within forty days if served elsewhere; and you are further notified that unless you so appear and answer said complaint within the time herein specified, the plaintiff will take judgment against you as prayed in said complaint.

THE GENESEE NEWS

VOL. XXXV GENESEE, LATAH COUNTY, IDAHO, FRIDAY, JULY 27, 1923. NO. 4

WM. SCHLUETER SAYS 160 ACRES OF LAND IS ENOUGH

Relative to a recent editorial of the Tribune, "What Is Wrong With the Growing of Wheat," the following article written by L. T. Babcock, Palouse, Wash., and printed in the Idaho Farmer under the caption "One Quarter is Enough for this Family," it being a description of the diversified farming activities of William Schleuter, whose 160 acres is situated between Uniontown, Wash., and Genesee, Idaho, just within the state of Idaho, is submitted by J. J. Pulse of Grangeville.

This, says Mr. Pulse, not only supplies an answer to the editorial query of the Tribune upon the growing of wheat, but is also suggestive of a growing number of agricultural establishments in Idaho county. Mr. Babcock's article is in part:

I visited at the Schleuter home one Sunday afternoon when out driving with a friend and at once I sat up and took notice that I had discovered a farm home very much out of the ordinary in the Palouse country of wonderful homes. Before long we were being shown over the premises. We first visited the large barn, a very conspicuous building, which contained concrete floors and an excellent root cellar. One side is for the horses and the other is for the dairy cows, which he always keeps. The fine substantial structure stands at the foot of a mighty hill which forms a sort of semi-circle to the south and west of the buildings and Mr. Schlueter has constructed a roadway which leads to convenient doors on the second story. Here he unloads all the feed for his stock, where it is weighed and placed in convenient bins. From these it is distributed right where it is wanted on the first floor. Wooden pipes open from these bins to boxes located here and there and all he has to do is to loosen the hinged cover, dip out the required amount of feed, and, after he is done feeding the animals, fasten the lid down again.

He has concrete floors in all of his cow stalls, each of which is equipped with a suitable stancion. These stalls are always as clean as they can be, and would pass any state or government inspection with a grade of 100 per cent. He never burns his straw, as many farmers do, but uses it for bedding and after it has served that useful purpose it goes into the manure bin and from there into the spreader which places it in his fields to help maintain the necessary amount of humus in the soil.

Alfalfa Hay in the Mow

We climbed up into the spacious hay mow through a sort of vertical tunnel, from which we emerged by and by on top of about 75 tons of hay. Some of this was grain hay, but by far the greater part was as fine alfalfa as one could wish to see. He told me that his mow has hay in it that was stored there when the barn was first built about a dozen years ago.

We next visited the hog house. It is a substancial building, with concrete floors, various pens for segregation, breeding, farrowing and feeding and an immense root cellar, beside which is a big cooking vat. This building is always scrupulously clean and I asked how he kept it so. In answer, he stepped to a hydrant, picking up one end of a rubber hose and presto! A stream of water was issuing from the nozzle with sufficient force to drive all filth before it into convenient gutters. I mentioned it all but the source of the water supply. He told me he would show me that a little later.

At the time I visited him he had about 50 shoats, which were about half-way on their road to marketable size and condition. They had access to an alfalfa field and did not require a great deal of attention or other feed for the time being. He always keeps a fine type of hogs. At that time he had Poland Chinas, but last summer his entire drove consisted of Duroc Jerseys. He believes the latter type is more prolific and, therefore, more profitable, as they are almost as easily fattened at any age. He generally has from 50 to 75 head to put on the market twice each year,

(Continued on last page)

Sad—But True

An automobile load of motorists try to get across the crossing ahead of a train that is coming. The train and the automobile arrive at the crossing at the same time. As soon as the funerals of the motorists have been held the chances are that the railroad company will be sued for thousands of dollars for having that train reach that crossing at the same time that the occupants of the car reached it.

According to most accidents at grade crossings it is thought by the relatives of the killed and injured, that an engineer, when he approaches a crossing, should stop his train, look for approaching automobiles, ring his bell for three or four minutes, and then proceed to cross.

But juries and judges are beginning to see that the moral responsibility for most accidents rests squarely upon the highway travelers who, warned by road signes, danger signals, whistles from the engineer, etc., are either in too much of a hurry, have too much hooch under their belts, or are too careless to exercise just good common sense when about to drive across railroad tracks.

There is nothing about who is to blame, and who is to pay, it usually is the passengers of the car the driver is driving that get killed or wounded instead of the passengers that the engineer is hauling.

All the money in the world will not bring back a human life that is lost. The driver of the car should remember this. He should think of the responsibility that is upon his shoulders. In fact in most grade crossing accidents it is the driver of the car that should be sued, instead of the railroad company who employs the engineer.

"X Y Z" on the Weather

Occasional thunder storms, as the result of the present rising and sultry temperature, are likely to occur during the coming week, according to "X Y Z," the local weather observer, who states that such storms will be only preliminary to more severe ones which are expected not far from the first of August, or soon after the first of the month; also that August is likely to be unusually stormy, with at least three important storm periods. The destructive storms early this week were the result of the high temperatures last week, but were expected a little later than the day they came, same being forcasted for a little after the middle of the month. As a matter of fact the severe storm on Monday came on the exact middle day of the month, July 16.

As long ago as July 1 the forecast published in these columns stated that "some hot weather and severe storms are expected during July, one coming soon after the middle of the month"; and in the issue of July 7, the forecast said that there was expected "another storm period soon after the middle of the month, making July unusually stormy, as August is also likely to be."

As to hailstorms, any sudden and violent thunder storm, following a period of excessive and oppressive heat, is apt to develop hail conditions, but the exact locality where hailstorms are to occur it is impossible to exactly forecast, as they are always confined to a comparatively small territory. It is, however, often possible to forecast the coming of periods when conditions are favorable to hail.—Lewiston Tribune.

Reached Destination In Safety

Word from Mr. and Mrs. John Meyer and Mrs. G. E. Taber is to the effect that they had reached Myrtle Point, Oregon, in due time and in good shape and found Mr. Taber well and doing nicely.

They report a splendid trip with the exception of a few detours—which one must expect on a trip of that length.

May Be State Park

Steptoe butte, nine miles north of Colfax, noted in the history of the Inland Empire as the site of Colonel Steptoe's battle with the Indians 66 years ago, may be a state park. Prominent men of Colfax, together with citizens of Spokane and other cities and towns in the Inland Empire, are working on the movement.

WHAT HAPPENED HERE TWENTY YEARS AGO

A large amount of building is still going on in this country.

Work on the Follett building is progressing at a rapid rate.

The first of the 1903 crop sold on the Pendleton market for 62 cents.

W. H. Gage was around the first of the week setting up the Havanas on the strength of a new girl at his home.

M. H. Nordby, who sometime ago purchased the James Dermone ranch north of town, is putting the finishing touches to one of the finest farm residences in this section.

Several cars of the new crop of hay have been shipped during the week to the coast market by Mr. Thomas. The price paid for timothy has been in the neighborhood of $11.50 per ton.

Congressman Burton L. French has associated himself with the law firm of Orland & Smith at Moscow for the practice of law. Mr. French at Boise last winter was admitted to practice before all the courts.

Rainfall Heaviest In 30 Years

F. L. Burkart, weather observer at the University of Idaho agricultural experiment station, who recently returned from an extended eastern trip has compiled and issued the monthly Meteorological report for the months of April, May, and June. The exceptional thing noted in the June report is the rainfall, which was 3.37 inches, the heaviest since the station was established in 1892. In 1923 the rainfall for June was 3.20 inches, the rain falling aside from the present season, when the rainfall for the month was more than three inches. Last year the June rainfall was but .22 inches. The greatest precipitation in 24 hours was June 1, when 1.61 inches of rain fell. The normal June precipitation for the past thirty years has been 1.31 inches. There were but nine clear days in the month of June this year, as against 20 clear days last year.

The precipitation in inches since January 1, or for the first six months of the year, was 14.53 inches, as against 8.19 inches in 1922. The rainfall for both April and May was considerable heavier than last year, and was above normal in April, but slightly below normal in May.—Star-Mirror.

North-South Road Good

G. R. Maxwell, of the staff of the Nampa Leader-Herald, arrived in Lewiston over the North and South highway, being on a rambling vacation tour by automobile, says the Tribune.

Mr. Maxwell said that with the exception of a number of aggravating detours, largely within a range of 15 miles each way from Riggins, the highway is in good condition and fair traveling time can be made over it. Mr. Maxwell drove from Cambridge to Grangeville in a day.

Much work is being done on the highway, which is completed in short sections only, and there is not much indication, says Mr. Maxwell, just when the work will be finished.

Warehouse Improvements

The Pacific Coast Warehouse company has just recently completed extensive repairs on their warehouses at Genesee, Leon and Uniontown in preparation for the season's grain rush.

The Seattle Grain company has also made extensive repairs on their local warehouse and have strengthened the foundation as well as the driveway.

Building Bridge

The concrete bridge being constructed at Colfax, will require 2000 barrels of cement, 1400 cubic yards of crushed rock and 700 cubic yards of sand. Forms for the concrete are calling for 150,000 feet of lumber. The bridge will cost over $45,000. Thirty men are employed on the job.

Spend Million On Roads

Nearly 500 men will be employed by the state highway department in eastern Washington by September 1. Contracts for approximately 50 miles of work will be let about August 25. One million dollars will be expended.

MRS. ANNA BECKER PASSES AWAY AT HOME IN GENESEE

Mrs. Anna Becker, one of Genesee's oldest and most highly respected citizen, passed away at her home in this city early Monday morning, July 23, 1923, at the ripe old age of 81 years after several months of gradually failing health.

Anna Lehnerts was born in Luxumburg, Europe, in 1842, (the exact date of her birth not being known) and came to the United States with her parents, two sisters and one brother.

On June 15, 1871, she was married to Frederick E. Becker at Winona, Minnesota, going later to Beaver, Minnesota, where they resided for 25 years and a few years at Rollingstone, Minnesota. In 1902 they removed to Lewiston, where they resided for a year before coming to Genesee to make their home, and at which place Mrs. Becker has resided continuously since that time, living all those years in the same house in which she passed away, Mr. Becker having preceded her to the great beyond some twelve years ago.

While Mrs. Becker had lived a very quiet life she had always been a devoted member of the Catholic church and had done a great deal of good in her quaint quiet way and was universally loved by all who knew her—and her friends were legion.

She was the mother of six children, two of whom passed away some years ago. Those remaining are Mrs. Geo. Heacer, Plainview, Minnesota, Mrs. J. R. Steffen, Winona, Minnesota, Ernest E. Becker, Genesee, and Mrs. E. A. McLean, Auburn, California. There are 13 grandchildren and two great-grandchildren. Only two of the children—Mrs. McLean and Ernest E. Becker were present at the funeral, the others being unable to be in attendance.

The funeral was held from St. Mary's Catholic church Wednesday morning at 9 o'clock, Rev. Father L. C. Godschalx officiating and music was by the church choir.

The pallbearers were Joe N. Hasfurther, Henry Martinson, Fred K. Bressler, Joe Knapp, John Lorang and John Broemmeling.

Vandalism Rife

That vandalism is becoming too frequent in Genesee, evidently by some of the younger generation, is shown by the fact that there have recently been several instances where damage has been done without any apparent reason only for the purpose of destruction.

Windows of vacant houses have been wantonly broken, and in one instance the lower panel of a door of a vacant house was deliberately kicked in by youngsters that should have known better and should be brought to realize the enormity of their offense.

On last Friday or Saturday night some one went into the yard of Glen Sampson and deliberately cut his 70-foot length of rubber hose into several pieces, ruining it for further use.

Instances like the above are becoming entirely too frequent and it will be but short time, if the practice is continued, until some of the perpetrators will feel the heavy hand of the law—and they should receive the limit.

Two Cream Stations

In addition to the Hazlewood station in Genesee, the Purity Creamery company of Moscow have a station at the rear and basement portion of the Sampson barber shop, which receives and ships quite a large amount of cream each week.

The more cream shipped from Genesee, the more ready money there will be in circulation. If you don't have a cream check coming in each week, ask your neighbor how he likes the idea of having a "pay-roll" on his farm.

No More Lectures

Last Sunday evening the last of the series of illustrated lectures held at the Federated church was given and the regular meetings of the Y. P. S. C. E. will again be held each Sunday evening.

The meeting next Sunday evening will be led by Ida Evans.

War Risk Insurance

With approximately $8,000 paid in insurance premium to the Spokane Sub-district office of the United States Veteran's Bureau during the last five months, the work of having World War veterans of Spokane and vicinity reinstate their government war policies is progressing rapidly, according to informotion given out by R. R. Reynolds, bureau chief of cooperation and insurance here.

Mr. Reynolds states, however, that there are still many ex-service men in this section who have not taken advantage of the opportunity to renew their war risk insurance even though it can be done at the present time by paying one month back premium.

"During 1921 and 1922 economic conditions were not any too good and many war veterans were forced to drop their government insurance," said Mr. Reynolds. "There is little unemployment among ex-service men now and conditions generally are much better. War veterans should not delay reinstating their war risk insurance, a duty to themselves and their dependents.

"It is a recognized fact that this veterans' insurance is about 16 per cent cheaper than that offered by old line companies. Government term insurance may be converted into any of six standard policies. Despite these advantages, a large percentage of the ex-service people who held insurance during their active war service have failed to renew their policies to date. These people should make it a point to delay this important matter further."

Mr. Reynolds states also that many veterans who are carrying insurance do not make their premium payments through the Spokane office of the Veterans' Bureau. A cashier's office was established in connection with the bureau office in the Realty building, Spokane, to give insurance service to ex-service people of eastern Washington and northern Idaho.

"The Barriers of Folly"

The feature picture at the opera house Saturday night will be "Barriers of Folly," in which George Larkin and Eva Novak take the stellar roles.

The story goes that Jim Buckley happened to be commanding a good view of the valley through which an automobile and a buckboard were passing. The automobile met the buckboard. The horses became frightened. The car turned out but the beasts were already dashing madly down the gulch.

Jim Buckley was greatly concerned. He knew that the girl in the buckboard was May Gordon. He spurred up his horse and leaped away after the runaways.

The man in the touring car came after. He had seen the girl and he knew that she was pretty. He had a way with women and he didn't know what it meant to deny himself the pleasure of exercising his vanity. All the way along the mad crooked road he smiled—not a nice smile.

Jim got there first. He came up in a swirl of dust, leaped from his own mount to the back of one of May's horses, and after much pulling of the reins, brought the runaways to a breathless halt.

He grinned. "Whew!" he said, "some ride," then, manlike, he turned to receive May's thanks.

He was met, however, by a sight unpleasant to his eyes. The man in the automobile was helping May into his car and saying, politely, "That was a nasty turn you had. Won't you let me drive you home?"

May turned to Jim a little proudly, just to tease him, no doubt, and he frowned darkly. "Uh!" he muttered, not jealously, but a bit disgusted at the air of the dandy who dared to offer May his courtesy.

With proud independence May stepped quickly into the stranger's car, and left Jim standing in the hot roadway, warm—very, very warm—under the collar.

His disconsolated way home was punctuated by words sounding strangely like "Damn" and the place where the bad men go!

This country is full of brains. You can even find a few of them in congress.

SEMI-LOCAL NEWS CLIPPED FROM EXCHANGES

Caught Over 200 Fish

A party consisting of W. H. Hart, John Hart, Arthur Hart, Robert Broker, Emmett McClarin and their families and Jarnagin and Mr. Lenz went on a fishing trip to the Selway last Friday returning Monday. They reported a swell trip and a catch of about 200 fish.—Latah County Press.

Mange Killing the Elk

Elk in the Selway national forest are reported to be suffering from mange and some are dying from the disease. It is believed by game experts that lack of salt is causing the disease. R. E. Thomas, state game warden, has ordered a ton of salt to be distributed in the Selway forest. —Kamiah Progress.

Got the Limit

H. M. Driscoll, Walt Driscoll, Glen H. Riley, Bernard Myklebust and Howard Agrell left early Sunday morning for Elk River, where they enjoyed a day of fishing. They all got the limit in fish and plenty of water on their return trip, being caught in the big rain Sunday night. The fishing fever hadn't left them and they got out their poles and tried to catch more fish, thinking they had come to another stream.—Troy News.

New Corn and "Sich"

Asotin people are enjoying new sweet corn these days, as well as home grown tomatoes, and it will be only a short time until home-grown cantaloupes and water melons are likewise ready for the table. There is no getting away from the fact when such table commodities can be had as a regular daily diet, then living becomes one continuous round of pleasure. It is great to be permitted to live in such a country.—Asotin Sentinel.

County Hail Damage Little

The hail storm on Monday, which destroyed crops on the Nezperce prairie, extended to the Greer and Fraser sections in Clearwater county, being practically spent when arriving. Some slight damage was suffered by grain and hay, gardens and fruits, the Greer section being hit the hardest. Damage in that section was reported to have occured on the bench above Greer, extending just to the top of the hill. Clearwater county was untouched by the storm with these exceptions.—Clearwater Tribune.

Geologist May Come

Patrick Gibbons is in receipt of a letter from Gilbert Grosvenor, editor and publisher of the National Geographic Magazine, Washington, D. C., in which he says they are very much interested in sending an expert here to study the fossil remains in the vicinity of Lewiston.

Mr. Gibbons says conditions at the Swallow's Nest oil well are splendid. They are now more than 1,600 feet, the showing of oil is good and he expects to see a big well brought in any day.

A great deal of interest is being shown in this field. It is interesting to note that all the big oil companies of the United States have holdings here now, not for drilling, but for wholesaling.—Lewiston Banner.

45-Bushel Wheat at Culdisac

Forty-five bushel wheat is being threshed on the Jackson Sundown place at the Jacques Spur, according to a report coming from Harry Palmer, threshing machine man, who is heading and threshing the forty-fold wheat for W. C. Marsh, who has the place rented. The machine started last Thursday and the threshing has proceeded without interruption. Three hundred sacks of wheat have been delivered to the Jaques Spur warehouse. The wheat has been sold and a carload will be shipped Monday.

The Sundown place lies just southeast of the Jaques Spur station and the grain this season has grown so rank that it was thought it would run a good yield. There are any number of fields in the Mission creek and Culdisac section which will yield as good as the Sundown place, Mr. Palmer asserted.—Lewiston Tribune.

MY LADY'S MONEY

An Episode in the Life of a Young Girl

By Wilkie Collins

INSTALLMENT NO. 11.

Thus far he had stood apart, watching her and listening to her in silence. Not a look that had crossed her face, not a word that had fallen from her had escaped him. Unconsciously on his side, she now wrought on him as nature with a purifying and ennobling influence which animated it with a new life. All that had been selfish and violent in his passion for her left him to return no more. The immeasurable devotion which he laid at her feet in the days that were yet to come—the unyielding courage which cheerfully accepted the sacrifice of himself when events demanded it at a later period of his life,—struck root in him now. Without attempting to conceal the tears that were falling fast over his cheeks, striving vainly to express those new thoughts in him that were beyond the reach of words, he stood before her the truest friend and servant that ever woman had. "Oh, my dear! my heart is heavy for you. Take me to serve you and help you. Her ladyship's kindness will permit it, I am sure."

He could say no more. In those simple words the cry of his heart reached her. "Forgive me, Robert," she answered, gratefully, "if I said anything to pain you when we spoke together a little while since. I didn't mean it." She gave him her hand, and looked timidly over her shoulder at Lady Lydiard. "Let me go!" she said, in low, broken tones; "let me go!"

Mr. Troy heard her, and stepped forward to interfere before Lady Lydiard could speak. The man had recovered his self-control; the lawyer took his place again on the scene.

"You must not leave us, my dear," he said to Isabel, "until I have put a question to Mr. Moody in which you are interested. Do you happen to have the number of the lost bank-note?" he asked, turning to the steward.

Moody produced his slip of paper with the number on it. Mr. Troy made two copies of it before he returned the paper. One copy he put in his pocket, the other he handed to Isabel.

"Keep it carefully," he said "Neither you nor I know how soon it may be of use to you."

Receiving her copy from him, she felt mechanically in her apron for her pocket-book. She had used it in playing with the dog, as an object to hide from him; but she had suffered and was still suffering too keenly to be capable of the effort of remembrance. Moody, eager to hear what had happened. "You were playing with Tommie," he said; "is it in the next room?"

The dog heard his name pronounced, even in the most trifling thing, guessed through the open door. The next moment he trotted into the room, and with Isabel's pocket-book in his mouth. He was a strong, well-grown Scotch terrier of the largest size, with bright, intelligent eyes, and a coat of thick curling white hair, diversified by two light-brown patches on his back. As he reached the middle of the room, and looked from one face to another of the persons present, the fine sympathy of his race told him that there was trouble among his human friends. His tail dropped; he whinned softly as she approached Isabel, and laid her pocket-book at her feet.

She took as she picked up the pocket-book, and raised her playfellow of happier days to take her leave of him. As the dog put his paws on her shoulders, returning her caress, her first tears fell. "Foolish of me," she said, faintly, "to cry over a dog. I can't help it. Good-bye, Tommie!"

Putting him away from her gently, she walked toward the door. The dog instantly followed. She put him away from her, for the second time, and left him. He was not to be denied; he followed her again, and took the skirt of her dress in his teeth, as if to hold her back. Robert forced the dog, growling and resisting with all his might, to let go of the dress. "Don't be rough with him," said Isabel. "Put him on her ladyship's lap; he will be quieter there." Robert obeyed. He whispered to Lady Lydiard as she received the dog; she seemed to be still incapable of speaking—she bowed her head in silent assent. Robert hurried back to Isabel before she had passed the door. "Not alone!" he said, intreatingly. "Her ladyship permits it, Isabel. Let me see you safe to your aunt's house."

Isabel looked at him, felt for him, and yielded.

"Yes," she answered, softly; "to make amends for what I said to you when I was thoughtless and happy." She waited a little to compose herself before she spoke her few farewell words to Lady Lydiard. "Good-bye, my lady. Your kindness has not been thrown on an ungrateful girl. I love you, and thank you, with all my heart.

Lady Lydiard rose, placing the dog on the chair as she left it. She seemed to have grown older by years, instead of by minutes, in the short interval that had passed since he had hidden her face from view. "I can't bear it!" she cried, in husky, broken tones. "Isabel! Isabel! I forbid you to leave me!"

But one person present could venture to resist her. That person was Mr. Troy—and Mr. Troy knew it.

"Control yourself," he said to her, in a whisper. "The girl is doing what is best and most becoming in her position, and is doing it with a patience and courage wonderful to see. She places herself under the protection of her nearest relative until the character is vindicated and her position in your house is once more beyond a doubt. Is this a time to throw obstacles in her way? Be worthy of yourself, Lady Lydiard, and think of the day when she will return to you without the breath of a suspicion to rest on her."

There was no disputing with him—he was too plainly in the right. Lady Lydiard submitted; she concealed the torture that her own resolution inflicted on her with an endurance which was indeed worthy of herself. Taking Isabel in her arms, she kissed her, in a passion of sorrow and love. "My poor dear! My own sweet girl! don't suppose that this is a parting kiss! I shall see you again—often and often I shall see you again at your aunt's." At a sign from Mr. Troy, Robert took Isabel's arm in his and led her away. Tommie, watching her from his chair, lifted his little white muzzle as his playfellow looked back on passing the doorway. The long, melancholy farewell howl of the dog was the last sound Isabel Miller heard as she left the house.

PART THE SECOND.

The Discovery.

CHAPTER VIII.

On the day after Isabel left Lady Lydiard's house, Mr. Troy set forth for the head office of Whitehall to consult the police on the question of the missing money. He had previously sent information of the robbery to the Bank of England, and had also advertised the loss in the daily newspapers.

The air was so pleasant and the sun was so bright that he determined on proceeding to his destination on foot. He was hardly out of sight of his own offices when he was overtaken by a friend, who was also walking in the direction of Whitehall. This gentleman was a person of considerable worldly wisdom and experience; he had been officially associated with cases of striking and notorious crime, in which government had lent its assistance to discover and punish the criminals. The opinion of a person in this position might be of the greatest value to Mr. Troy, who practice as a solicitor had thus far never brought him into collision with thieves and mysteries. He accordingly decided, in Isabel's interests, on confiding to his friend the nature of his errand to the police. Concealing the names, but concealing nothing else, he described what had happened on the previous day at Lady Lydiard's house, and then put the question plainly to his companion:

"What would you do in my place?"

"In your place," his friend answered, quietly, "I should not waste time and money in consulting the police."

"Not consult the police!" exclaimed Mr. Troy, in amazement. "Surely I have not made myself understood? I am going to the head office, and I have got a letter of introduction to the chief inspector in the detective department. I am afraid I omitted to mention that."

"It doesn't make any difference," proceeded the other, as coolly as ever. "You have asked for my advice, and I give you my advice. Tear up your letter of introduction, and don't attempt to step further in the direction of Whitehall."

Mr. Troy began to understand. "You don't believe in the detective police?" he said.

"Who can believe in them, who reads the newspapers and remembers what he reads?" his friend rejoined. "Fortunately for the detective department, the public in general forgets what it reads. Go to your club and look at the criminal history of our own time recorded in the newspapers. Every crime is more or less a mystery. You will see that the mysteries which the police discover are, almost without exception, mysteries made penetrable by the commonest capacity, through the extraordinary stupidity exhibited in the means taken to hide the crime. On the other hand, let the guilty man or woman be a resolute and intelligent person, capable of setting his (or her) wits fairly against the wits of the police—in other words, let the mystery really be a mystery—and cite me a case if you can (a really difficult and perplexing case) in which the criminal has not escaped. Mind, I don't charge the police with neglecting their work. No doubt they do their best, and take the greatest pains in following the routine to which they have been trained. It is their misfortune, not their fault, that there is no man of superior intelligence among them—I mean no man who is capable, in great emergencies, of placing himself above conventional methods, and following a new way of his own. There have been such men in the police—men naturally endowed with that faculty of mental analysis which can decompose a mystery, resolve it into its component parts, and find the clew at the bottom, no matter how remote from ordinary observation it may be. But those men have died or have retired. One of them would have been invaluable to you in this case you have just mentioned to me. As things are, unless you are wrong in believing in the young lady's innocence, the person who has stolen that bank-note will be no easy person to find. In my opinion, there is only one man now in London who is likely to be of the slightest assistance to you, and he is not in the police.

"Who is he? asked Mr. Troy.

"An old rogue, who was once in your branch of the legal profession," the friend answered. "You may, perhaps, remember the man; they call him 'Old Sharon.'"

(To be continued.)

WORLD'S NEWS BRIEFLY RETOLD

Important News of Both Hemispheres Boiled Down to Last Analysis.

Resignation of the Philippine cabinet recently is believed by political observers to mean the end of hope for independence for the islands in the immediate future.

The morgue at Breslau, Germany, is filled with bodies of those drowned in the River Odin while seeking relief from the terrific heat. Twenty-eight have been drowned already this week.

Railroad shopmen on strike will "continue to exercise the normal activities guaranteed them by the laws and constitution of our country," and will not be influenced by U. S. Judge Wilkerson, Chicago, in making permanent the "Daugherty injunction," Samuel Gompers, president of the A. F. of L., states.

Another transcontinental line has been planned by the Bell System engineers and actual construction of a new pole line on the section from Denver south and west by way of El Paso to terminate at Los Angeles is well under way.

After July first, all mail bearing special delivery stamps will require a personal receipt, the same as is now required of registered mail. The adoption of this new ruling, which has been announced by Postmaster General New, is for the purpose of reducing the number of losses by petty larceny and otherwise of parcel post and other special delivery matter. It is estimated the value of lost special delivery mail is fully $1,000,000 annually.

Talk about "dangerously large stocks of grain" is propaganda which should be curbed, stated Managing Director Meyer of the war finance corporation. Experience of the past two years, state Meyer, should teach us to be cautious in construing such figures as proof of the impossibility of marketing grain.

The largest wheat crop in Canadian history is being forecast in estimates running as high as 500,000,000 bushels, made by the Dominion bureau of statistics. The condition is 106, as compared with 95 last year. There's abundant moisture to assure growth. The heaviest crop to date was 1915, with 400,000,000 bushels. The Canadian Pacific is adding 60 new engines and 2000 boxcars to care for the increased crop.

France may not need to purchase wheat abroad this year, Le Temps estimated. The French wheat crop is expected to reach 75,000,000 quarters and it will be possible to import another 5,000,000 quintals from French colonies in northern Africa, a total sufficient for domestic needs. A quintal is 220.48 pounds.

IDAHO

A Washington news bulletin sent out by the Department of agriculture contains the information that Idaho will receive $390,900 for 106 miles of highway, including the Lolo Pass road.

The road program for the northern part of Idaho contemplates an expenditure of $3,000,000, according to William J. Hall, state commisioner of public works, Boise. Only 125 miles of the north and south highway remain to be built. This road will lie between the British Columbia boundary and the southern line of the state, more than 500 miles. The uncompleated part is connected by fair roads and is open except in the Salmon river region, where work is being done.

Mrs. Porcia Von Canon, wife of Cashier W. W. Von Canon of the Bonner County National bank, has been appointed Idaho member of the women's advisory council of the national republican committee. Mrs. Von Canon was made aware of the probability of the appointment when she received a letter, under date of June 25, from National Committeeman John W. Hart, of Rigby, stating that she had been recommended for the appointment from this state.

The growing of lettuce is spreading from the Lewiston orchards to the various parts of the surrounding territory. It has been found that head lettuce of excellent quality can be grown in the territory tributary to the Kendrick and no irrigation needed. The lettuce here matures just about the time the last crop is marketed in the Lewiston country. The quality is excellent. Oriel Dumbauld of Juliaetta raised a head of lettuce that weighed 5 1-2 pounds. Other excellent specimens have been brought in from American ridge and from town lot gardens inKendrick. Gardeners in Kendrick have raised first class head lettuce for several years, even through the past dry years, without irrigation.

The business section of Bonners Ferry was threatened with destruction by fire recently when the International hotel, a frame structure adjoining and two warehouses burned to the ground, while the firemen stood by all helpless because of a defective valve. The loss was estimated at $15,000, practically covered by insurance. The hatel was one of the oldest londmarks in the town.

The Triangle Construction company of Spokane was recently awarded a contract by the United States bureau of public roads for placing a nine-inch gravel surface on the Coeur d'Alene highway from Cataldo, 11.30 miles east, on a bid of $2.70 a yard, totaling approximately $59,000.

Peas in the vicinity of Latah promise a yield of 60 bushels to the acre, according to W. S. McEachran, president of the Bank of Latah. Latah is in the heart of the district that for years has specialized in the growing of peas for seed purposes, virtually the entire output being contracted to the large seed houses.

With the practical completion of negotiations for East Lewiston property, 160 acres have been acquired by the Weyerhauser interests for use as a millsite. A small acreage more in the same district is practically secured and it is understood the Porter tract may be need and acquired, though no statement to that effect is made. The fair ground tract is included in the acreage secured. Possession of the smaller lots of the property acquired is by option and several months will elapse before the deals must be closed. While the progress made toward securing the big industrial plant has been marked in the last few weeks, there is nothing to indicate any headway will be made in actual construction work before next year. Detailed plans, with all necessary maps, blue prints, engineers' reports, health inspector's reports and a mass of other data has been assembled and put in shape for immediate use, but the size of the proposition is such that months must elapse before any real construction work can begin.

Washington Man Honored.

A bust of Dean Joseph French Johnson was unveiled in the library 160 Washington square, east, in New York, recently. The bust, presented by the faculty of the school of commerce, accounts and finance, is the work of Rudolph Evans, New York university sent out invitations to the notable ceremony.

Joseph French Johnson, a national figure in educational and public life, was editor of The Spokane Spokesman in the early '90s.

Replacing the elaborate feather fans are those of black lace mounted on ivory sticks and dotted over with dim sequins or brilliants.

Naming of Columbia River; Called "Oregon" in Thanatopsis

How the great river which runs through the state of Washington came to be permanently called the Columbia, how that was the original name given to the territory of Washington, and other geographic uses of the word in the Northwest, are told by Edmond S. Meany, professor of history at the University of Washington, in an article recently published in the Washington Historical Quarterly, printed on the university campus.

Columbia, according to Professor Meany, is the most abundantly used geographic name in America. Aside from the beauty of the word, its history reflects efforts to honor the achievements of Christopher Columbus. Its greatest use in the Pacific Northwest is as the name of the great river. Captain Robert Gray, in the American vessel Columbia, on May 11, 1792, at 8 p. m., sailed through the breakers and at 1 p. m., anchored in the river ten miles from its mouth. On May 19, Captain Gray gave his ship's name to the river. This was the American discovery and naming of the river.

Prior to this, the river's existence had been suspected and other names had been suggested. In 1765-1767, Jonathan Carver, while exploring among the Indians of Minnesota, wrote about a great river of the west and called it "Oregon," a beautiful word which he is now believed to have coined. In 1775, Bruno Heceta, Spanish explorer, noted the indications of a river there. He called the entrance cape "San Roque" and the southern point "Cabo Frondoso." Later Spanish charts showed the entrance as "Ensenada de Heceta," and the surmised river as "San Roque."

In 1778, John Meares, English explorer and fur trader, sought for and denied the existence of the Spanish river "Saint Roc." He called the Spaniard's "San Roque" Capo Disappointment and the entrance he changed from "Bahia de la Asuncion" or "Ensenada de Heceta" to "Deception Bay." That was the situation when Captain Gray made his discovery.

In 1793, Alexander Mackenzie of the Northwest company of Montreal made his memorable journey to the western coast. He came upon a large river which he said the Indians called "Tacootche-Tesse." This afterwards turned out to be the Fraser River, but for a time it was confused with the Columbia. Captain Meriwether Lewis mapped it as a northern branch of the Columbia, spelling it "Tacoutche." William Cullen Bryant in his poem Thanatopsis (1812) revived and gave wide circulation to "Oregon" as the name of the river. Another literary name was "Great River of the West," which of course, did not disturb Columbia as a geographic term.

There are a number of other geographic uses of the word in the state of Washington; in fact, when the bill was introduced into Congress to create the new territory it bore the name "Columbia." This was changed to Washington during the debate in the House of Representative, February, 1853.

What Every Intant Knows.

That he is a boofle, lumpsy, dumpsy, he is.

That he mussen ky!

That he has rosy-posy tootsy feet-sy-wootsies!

How big he is.

Where his curls are.

Who's a tunnin' itsy lump o' soda.

How the mooly cow goes.

That he is knowing for his age.

That he is Gamma's b'essedest angel!

How the rooster goes.

That he must-pat-a-cake pretty for the ladies.

BUT, the infant of today does NOT know how the Horsie goes!—Caroline Wells, in New York Sun.

Better Health Service

Public Health Is Public Wealth.

These Articles Compiled by the Public Health League of Washington

Acidity of the Stomach.

Perhaps one of the most common complaints that a physician has to deal with is the so called "Acid Stomach." More patients will come into the doctor's office with a ready made diagnosis of "Acidity of Stomach" than of any other complaint with the possible exception of "Headaches."

Now before going into the subject any further let us understand once for all that 'Acidity of the Stomach," like "Headache," is not a disease, but is a symptom.

How does one know that things are not functioning properly? He notices perhaps that there is a sense of weight or pressure in the stomach region, or perhaps a burning sensation with belching or acid eructation, occuring usually one-half to three-quarters of an hour after eating, which is often relieved by vomiting or sometimes by taking a little baking soda and water.

The symptoms enumerated above are but a few of the most common. Now comes the question, "what is the cause of this disturbance of digestion?" It is not enough to say acid in the stomach, because every normal stomach has a certain amount of hydrochloric acid, upon which the function of digestion depends. Rather we should say superacidity, or increased amount of acid, is causing the abnormality.

The most common factors in this hypersecretion of acid in the stomach are as follows:

(a) Too hasty eating or bolting of food. Stop and think how long it takes the average individual to eat his meal, especially the business man, and you will be astounded the way the food half chewed is hurled into the stomach. Here the poor overworked stomach is forced to perform the duties of the teeth, mastication, as well as its own work.

(b) Excess in fried foods, sweets, tart cakes, hot breads, pancakes, highly seasoned foods, tea, coffee, etc., too much tobacco in one form or another.

(c) Infectious material from the nose, mouth, gums, as well as absorption from diseased tonsils and abcessed teeth.

(d) General debility due to overwork, worry and loss of sleep which in turn produces nervousness and lack of nerve stability.

From the foregoing list of causative factors, one is prone to think that acidity of the stomach while distressing is not serious.

In answer to that, let us say that in many cases this conclusion is correct. There are, however, a few organic lesions of the stomach and intestines which will give a similar train of symptoms, i.e. ulcer of the stomach, cancer of the stomach, gall bladder disease and chronic appendicitis, all of which are serious.

Therefore, when this condition persists for any length of time and the ordinary home remidies fail to relieve, it would be advisable to consult your family physician and have a thorough study of the case made.

Remove the cause and the acidity will remove itself, and above all things do not lose sight of the old saying, "An ounce of prevention is worth a pound of cure."

BUSINESS MAN GIVES PRIZES TO DAIRYMEN

A Prize of $25 Given Because Dairyman Increased Dairy Herd Average.

In order to stimulate the better production of butterfat in the dairy herds connected with the Grays Harbor county Cow Testing Association, the Manard Company of Elma, offered $25.00 for the dairyman increasing the average butterfat production the most during the past year. George Tannerstet of Montesano won the prize by making the largest increase in butterfat production on his cows over a year's time.

Mr. Tinnerstet increased the production of his herd by 43.3 pounds of butterfat per year which was valued at $42.04 per cow, or made a net profit above feed costs of $14.04. On his 18 cows, he made $252.72 more than was made the year previous.

The second highest man in the contest, which was put on for members of the Grays Harbor cow testing association, was A. A. Seifert, who raised his herd butterfat production by 33.8 pounds.

"If every dairyman in the country," said Arthur Calow of the Manard Company in presenting the prize, "had increased his production one-half as much per cow as Mr. Tinnerstet, it would have meant $35,000 more profit for the 5000 dairy cows in the country."

The presentation of the prize was made a part of the Second Annual Livestock Tour, when it stopped for lunch at Elma. "This was a splendid increase for a herd in one year," stated R. M. Turner, assistant director of the extension service, in speaking of the accomplishmen of Mr. Tinnerstet. "It is only by knowing what your herd is doing, that the foundation is laid to build up the production per cow. It is a better investment to have good producing stock than poor stock. As this demonstration showed, for every dollar spent for better feeding, there was a return of three dollars in milk production."

Give Origin of Washington Names

Origin and history of the names of the Lummi Indians, Mount Baker, and the towns of Nooksack, Sumas, Deming and Blaine, in Whatcom county, Washington, are described by Professor Edmond S. Meany of the University of Washington, in articles published recently in the Washington Historical Quarterly.

According to Professor Meany, Lummi is the name of a tribe of Indians in Whatcom county, which has been applied to a bay, Indian reservation, Island, point, river and rocks, all in the vicinity of Bellingham bay. The Spanish chart of 1792 by Galiano and Valdes show Lummi Bay, northwest of Lummi Island as "Ensenada de Locra." Lummi island was given the Spanish name of "Isla de Pacheco," which was part of the long name of the Viceroy of Mexico. The Wilkes expedition, 1841, changed the name to "McLaughlin's island," an honor intended for Dr. John McLaughlin, chief factor of the Hudson's Bay company at Fort Vancouver. The name was again changed in 1853 by the United States coast survey to Lummi island "because inhabited by that tribe." The name has been used on all subsequent charts and has been applied to several other geographic features in the neighborhood. The Bureau of American Ethnology says the Lummi tribe was quite distinct from the Nooksack tribe neighboring on the north.

Mt. Baker.

The Indian name of Mt. Baker is said to be "Kulshan." The Spaniards called it "Montana del Carmelo." The explorer, Vancouver, wrote on April 30, 1792: "The high distant land formed, as already observed, like detached islands, amongst which the lofty mountain, discovered in the afternoon by the third lieutenant, and in compliment to him called Mount Baker, rose a very conspicuous object."

Nooksack.

Nooksack is an Indian word used as the name of a river and a town in Whatcom county. The Handbook of American Indians shows many spellings in use, but all are evident efforts to express the same sounds. The same work declares that those Indians were mountain men living in small bands on the river of the same name. Dr. Charles M. Buchanan is quoted as saying that Nook or Nook means people and sa-ak means the edible root of bracken or fern. In the same region is the town Ferndale, whose name may be thought of as a sort of synonym of the Indian name of Nooksack. One of the early appearances of the river's name was on the map by the surveyor general of Washington territory for 1857.

Sumas.

Sumas is the name of a stream, of mountains and a town in the northern part of Whatcom county at the international boundary. The name is derived from that of a Cowichan tribe of Indians who lived in that vicinity.

Deming.

Deming was named in honor of George Deming, the first postmaster.

Blaine.

Blaine was named by Cain Brothers on April 23, 1885, in honor of James G. Blaine, republican nominee for president the year before.

'Zactly Right.

A traveling salesman from the north, while spending a few days in Atlanta recently, on business, decided he would like to try a little of the local moonshine, about which he had heard so much. With very little difficulty he secured a pint of the 'white lightning' and retired to his room to sample it. One taste was enough. It was a particularly villainous decoction. He did not care to throw it away, so he presented it to an old dark who had been driving him about the city.

The next day he asked the old negro how he liked the liquor.

"Boss, it was 'zactly right. Yes, suh ;it was jus' 'zactly right."

"Well, suh," said the darkey, "it was just 'zactly right, 'cause it it had a been any better, you wouldn't 'a give it to me, an' if it had 'a been any worse, I couldn't a' drunk it."—Everybody's Magazine.

California Quarantine Protects Washington Against Pear Thrips

For every kind of fruit there are many insect pests. The newer districts are usually comparatively free from such pests but as time goes on they find their way in on nursery stock or shipments of fruit. Just because a certain locality has remained free from certain pests is no indication that it will always enjoy immunity from these pests.

To protect the fruit industry of this state a number of quarantine measures have been passed against other sections of the country where dangerous insect pests are known to exist. The strawberry root weevil quarantine was published in this paper last week, and this week we have the quarantine against parts of California and Oregon on the pear thrips.

Horticultural inspectors feel that a more general knowledge of these measures will aid in protecting the state against a number of serious pests and perhaps save some individuals much trouble and loss through ignorance of the law. For that reason the few quarantines that are of interest to the people of this district will be published from time to time in this paper.

Pertaining to Pear Thrips.

Whereas, it has been determined that a dangerous insect pest injurious to pears, prunes and other fruit trees, which is commonly known as the pear thrips (Taeniothrips inconsequens) and not heretofore prevalent in the state of Washington exists in the counties of San Benito, San Clara, San Mateo, Alameda, San Joaquin, Sacramento, Yolo, Solano, Contra Costa, Napa, San Francisco, Marin, and Sonoma counties in the state of California; and in the counties of Linn, Marion and Polk, in the state of Oregon, and,

Whereas, there is danger of introducing these pests into the state of Washington through the importation of nursery stock from the said infested counties,

Now, therefore, I, E. L. French, director of agriculture of the state of Washington, under authority as vested upon me in chapter 105. Session Laws of 1921, do hereby proclaim and establish a quarantine against the counties of San Benito, Santa Clara, San Mateo, Alameda, San Joaquin, Sacramento, Yolo, Solano, Contra Costa, Napa, San Francisco, Marion, and Sonoma counties in the state of California, and the counties of Linn, Marion and Polk, in the state of Oregon, and such other counties or other states as may be or hereinafter become infested, and from and after this date it shall be unlawful for any person, firm or corporation to transport any fruit trees, shrubs, plants or other nursery stock which may be host of the pear thrips from any of the said counties of California or Oregon, or any other infested territory into or through any part of the state of Washington, except under the following conditions:

Every shipment of trees, shrubs, plants or nursery stock and any host of the pear thrips from any of the counties or territory hereinabove mentioned must have all foreign particles carefully and thoroughly removed by washing or otherwise cleaned from the same before being offered or accepted for shipment into or through any part of the state of Washington, and that during the period of activity of the pear thrips, namely, March, April and May, all parts of such trees, shrubs, plants and nursery stock or any other host of the pear thrips except the roots of same before being offered and accepted for shipment into or through the state of Washington shall be dipped into the following solution or its equivalent: Miscible oil, No. 2, five gallons; Black Leaf Forty, 1 pint to two hundred gallons of water.

All such shipments must be accompanied by an official certificate of the agricultural inspector of quarantine officer showing that the above regulations have been duly complied with. All horticultural inspectors of the state of Washington are hereby instructed and required to refuse admission into the state of Washington of all such articles as are herein designated except under the conditions herein enumerated.

If any such articles as are hereinbefore listed come into the state of Washington in violation of this quarantine they must be at once destroyed by burning or returned to the shipper at his expense.

Any violations of these orders will be dealt with according to law.

This quarantine order to take effect on and after this date.

(Signed) E. L. FRENCH,
Director of Agriculture.

Approved by:
LOUIS F. HART, Governor.
Dated: September 8-17, 1921, Olympia, Washington.

A SONG.

I love you, dear; that is the theme
Of all my dream, of all my dream.

I love you. In your wondrous eyes
Lives all the blue of summer skies.

I love you, sweet; I do not know
Just why the gods have willed it so.

And yet I love you, love you dear
And heaven is mine when you are near.

Oh, may I never throw a fit,
And marry you and get over it.—Ex.

WASHINGTON NEWS

Federal grain inspectors are too technical and will cause the farmers of this state crop losses of $500,000 unless they are removed from office, says E. L. French, state director of agriculture. Mr. French said that the federal inspectors were grading all wheat down and were endangering the sale of the grain crop. He said he was after Secretary Wallace to appoint new inspectors.

Stephen I. Miller, for five years dean of the college of business administration at the University of Washington, has resigned, effective August 1, to accept the position of educational director of the American Institute of Banking.

Interest paid on outstanding state securities during 1921 and 1922 amounted to more than $1000 a day, according to reports compiled by George W. Lewis, state budget officer. The total amount of interest paid by the state in the two years, or 730 days, was $736,304.41, his records show. More than one-fourth of this amount was for interest on highway bonds. The interest on highway bonds amounted to approximately $218,000.

With $20,000 state funds available to help assure its success, copies of the premium list for the Washington State Fair at Yakima September 17-22 have just been mailed out to prospective exhibitors. The prize lists for livestock, agriculture and various lines of production and industry are declared to be extremely liberal this year. Total cost of the fair is estimated at $70,000.

Reports indicate that the paving of the balance of the unpaved section of the Pacific highway will be completed September 1st and the stretch between Kalama and Toledo will be opened to traffic shortly after that. In the meantime the detour is in good shape and thousands of cars are driving from the South to the Puget Sound region and then strike eastward across the state.

Travel to Alaska is breaking all records this year and reservations for July and August having been taken up, a large number of northwest people are planning to make the trip in September, when the same rates are in effect.

Rapid progress is being made in the construction work of the new mental hospital for veterans now being built at American Lake. It is expected that this institution, costing $1,400,000, will be ready for occupancy within three or four months. Veterans suffering from mental and nervous diseases now in state or other contract hospitals will be transferred to the American Lake institution immediately upon its completion. One of the 28 buildings in course of construction will be used for light vocational training purposes for the benefit of the patients.

T. H. Smith, age 94, a friend of William H. Cody (Buffalo Bill) and one of the few remaining stage drivers of the picturesque frontier days, died recently at the Okanogan county poor farm. He came to the Okanogan country in 1890 and since then has remained a resident. A few years ago he took up a homestead on Palmer mountain and lived there until ill health forced him to leave the ranch In the early days he made the crosscountry trip of 1700 miles between Omaha, Neb., and Sacramento, Cal., 11 times.

Thirty-five sacks of onions from a plot 107 by 54 feet is the record made in an experiment on the A. R. Welch farm, two miles east of Pasco. The trial was made on ground reclaimed from sagebrush two years ago on the Inland Empire highway, near the Snake river bridge.

Word has been received from Colfax that the "La La Falouser" is assured for the season, having been enrolled by a meeting of business men recently. The dates being August 30 and September 1. The Chautauqua for 1924 was also endorsed and a number of those present at the meeting volunteered to put it before the public.

Plans to unite all Inland Empire towns in a big Inland Empire day celebration Tuesday, September 4, at the Spokane Interstate Fair and Livestock show were started recently by members of the Spokane Chamber of Commerce. The program, which will be arranged by the Inland Empire relations committee of the organization, provides that each town shall send a special delegation and attraction to the fair. A town street parade at noon will mark the opening and will be followed by special grandstand attractions in the afternoon.

Washing your hands in milk or buttermilk each evening is one way to keep the devastating effects of housework from showing on them.

Household Hints

Sewing—If you will wind a piece of adhesive tape around your forefinger when sewing, it will save you having a pricked finger.

Washing Copper and Brass—Put some vinegar and salt in the water when washing copper and brass and see how they will shine.

Cleaning Piano Keys—Kerosene will clean your oilcloth table and shelf covers, while alcohol rubbed on piano keys will make them bright and clean.

Attaching Window Shades—A new method of attaching window shades, is with the use of adhesive tape. Use tape an inch wide. This is much easier and better than hammer and nails.

Washing Woodwork—When washing woodwork, cold water is very preferable to warm. This because it does not soak in the wood as much and therefore dries more quickly.

Woolen Clothing—Cutting lint, hair and fuzz from woolen clothes is not an easy task. However, it can be made one if a rubber sponge is used. Moisten the sponge with water and squeeze almost dry before using.

Reviving Leather—To revive the luster of your leather chairs, or whatever you wish, use the white of an egg with a small sponge.

Grease on Stove—If grease is spilled on the stove, sprinkle the place with salt. This will prevent an odor of burning grease.

Seeding Dates—Seeding dates is a very sticky job, but if one would wet her hands in cold water, there would not be the least difficulty.

Threading a Needle—When threading a needle, try cutting the thread on the slant, instead of straight ,and see how much easier it is.

Keeping Silver Clean—If you wrap your silver in parafine paper, it will look like new at the end of a summer.

Quick Breads.

LUNCHEON ROLLS (Excellent).

One-half cup scalded milk, 2 tablespoons sugar, 1-2 teaspoon salt, 1-2 yeast cake dissolved in 2 tablespoons luke warm water, 2 tablespoons melted butter, 1 egg, few gratings from rind of lemon, flour.

Add sugar and salt to milk, when luke warm, add dissolved yeast cake and 3-4 cup flour. Cover and let rise; then add butter, egg and grated rind of lemon, and 1 1-4 cups flour. Let rise again. Roll to 1-2 inch thickness, shape with small biscuit cutter, place in buttered pan close together, let rise again, and bake. These rolls may be made and ready to serve in 3 hours if 1 1-2 yeast cakes are used.

* * *

BUNS.

To make regular hot-dog buns use the Parkhouse Roll recipe and pinch the dough off with hands and pat it flat with the hand when putting it in the pan. When baked cover top with melted butter and sprinkle with salt. One recipe makes about 30 buns.

* * *

CINNAMON ROLLS.

Make the dough the same as for Luncheon Rolls, roll to 1-3 inch thickness and spread with melted butter. Sprinkle cinnamon over and use raisins generously. Roll and cut in slices, when baked, cover the top with a mixture of powdered sugar, butter and boiling water. These stay fresh for several days and if reheated before serving they are delicious.

* * *

PARKERHOUSE ROLLS.

Two cups scalded milk, 3 tablespoons shortening, 2 tablespoons sugar, 2 teaspoons salt, 1 yeast cake dissolved in 1-4 cup luke warm water, flour.

Add butter, sugar and salt to milk, when luke warm add dissolved yeast cake and three cups flour. Beat thoroughly. Cover, let rise until light, cut down and add enough flour to knead (about 2 1-2 cups). Let rise again. Toss on slightly floured board and knead, kat, roll to 1-3 inch thickness. Shape with biscuit cutter, and dipped in flour. Brush over each piece with melted butter and crease in center by using a knife. Fold and press edges together. Place in greased pan 1 inch apart, let rise and bake in hot oven 12 to 15 minutes. When taken out of oven brush the tops with melted butter.

* * *

BERRY COBBLER.

Two cups flour, 1 teaspoon salt, 4 teaspoons baking powder, 2 tablespoons shortening, 3-4 cup milk or water. Cut the shortening into dry ingredients with a knife and add milk. Roll the dough to 1-2 inch thickness.

Grease a shallow pan, cover bottom with fruit or berries. If uncooked fruit is used sweeten and add flour (about 2 tablespoons) to sugar to thicken the juice. Place the dough on fruit, brush over dough with melted shortening and bake in a moderate oven if fruit is uncooked, and a hot oven for cooked fruit. Serve with sauce.

MENU FOR THE WEEK

SATURDAY

Breakfast.
Berries and Powdered Sugar
French Toast Butter Syrup
Dry Cereal Sugar and Cream
Coffee Milk

Lunch.
Macaroni and Cheese Creamed Peas
Combination Salad Butter Bread
Preserves Cookies

Easy to Kill Groundhogs.

After two year's work, the federal department of biological survey has discovered that the groundhog is probably the easiest rodent pest to control in this state, according to John Finley, biological assistant at Olympia.

"In demonstrating with alfalfa, I have found that at least 90 per cent of the groundhogs can be killed with one thorough distribution of bait," said Mr. Finley in his report. "Counting only the groundhogs found dead above ground, the total cost of the operation is less than 1 cent per groundhog. It is estimated that each groundhog does $1 worth of damage a season where they are feeding exclusively in alfalfa or grain fields. Good farmers now realize that with the cost of killing so low they can not afford to harbor this pest on their farms."

The permanent grave is here to stay, for it gives so much pleasure to most of us—especially the would-be mermaids.

The people of the United States spend $200,000,000 a year for confectionery.

ANNUAL CLUB CONVENTION DRAWS FROM EVERY COUNTY IN STATE

Boys' and Girls' Club Members Gather at Pullman for Week of Intensive Training.

SPOKANE COUNTY IN LEAD

Sends Greatest Number of Delegates—Many Communities Represented—Get Two State Offices.

The second annual club week at the State college has just been terminated with an attendance of some 200 club members from nearly every county in the state. This week of study and recreation is proving of great value.

The week was planned as a short course in which each delegate may secure intensive training under a specialist in the particular project in which he is interested and a more

Prosperity In Your Pocket Often Becomes Adversity

The people who save are the ones who systematically put their money in a bank until they are aple to invest it to better advantage.

When a fellow keeps his roll in his pocket there is always a temptation to "peel it off." Continued peeling eventually brings a person to the point where there is nothing left to peel.

Where do you keep your roll?

CERTO (Surejell)

No reason now her tongue to tell
That sad old story "It did not jell"
Her jam's now perfect—jelly, too
She uses CERTO—so should you!

A DEFENSELESS NATION IN A HARD-BOILED WORLD

Coming right down to brass tacks, the largest part of the indemnity for the kidnaping and mistreatment of American citizens by Chinese bandits should not be paid by the Peking government. If justice were the guiding star of the international relations, America would present the bill for the Shantung outrage to Japan, England, Russia, Germany, and France. To a far greater degree than the Peking government these Christian nations are responsible for the chaotic conditions that made the bold act of the Chinese bandits possible.

For their own selfish purposes, Russia, England and other powers have for a century been undermining the authority of China's central government. Deliberately and with malice aforethought they have supported first this and then the other military provincial governor with money and arms; they have stirred up Sun Yat Sen in the south, built up the army of the Machurian governor, interfered with Peking and hampered its functions until its rule became a shadow without substance. They were instrumental in creating the private provincial armies whose soldiers became bandits when their pay was not forthcoming. They were accessories before the fact. Now let them pay.

But they won't. Might still is Right in the crooked game of international draw poker. There is no help for China except from within.

We may deplore the results of extreme nationalism, but the nation without the spirit of nationalism is defenceless in a hard-boiled world.—July Sunset.

Beef Cattle Now Moving

Approximately $17,000 worth of livestock was shipped from Cottonwood the past week to the coast markets, Saturday morning Wm. Jones, W. I. Rooke and James Aram shipped out 11 carloads to Seattle, and Monday morning Ed Fick and John Baer shipped a carload each. Jones shipped 114 head, W. I. Rooke 76 head, James Aram 106 head, Ed Fick 27 head and John Baer 23 head. All of the cattle were in fine shape for beef.

The cattle all ranged in or near Joseph plains section. Saturday's shipment marked the earliest made from Idaho county in many years, the weather conditions prevailing last winter making it possible for the cattle to prosper and be fit for market several weeks earlier than is customary, particularly when the range country is visited by such heavy snows or extremely cold weather.

Wm. Jones, one of the owners, who, with Mr. Aram made the trip to Portland market with the cattle, stated that several other large shipments will be made within the next few weeks from the Joseph plains and Whitebird sections. Inquiry made by the cattlemen late last week brought the information that the cattle market was strong and showing signs of remaining so, or even advancing, and for this reason the cattlemen are trying to get their cattle to market.—Cottonwood Chronicle.

McDowell-Kidwell

Miss Juanita McDowell, daughter of Mr. and Mrs. E. E. McDowell of this place and Fred Kidwell of Kelso, Wash., were united in marriage, Wednesday evening, by Justice of the Peace, H. P. Hull, at the Hull residence. The bride was a member of the 1923 graduating class of Kendrick High school and was very popular among the younger set of this community.

Mr. and Mrs. Kidwell left on the night train for Lewiston, after which they will go to Kelso, Wash., where they will make their home.—Kendrick Gazette.

Reputation Ruined

Johnny Roberts had better hurry home and take care of his beloved "Bullet" or it might get into disrepute for the report comes to Genesee that three head of cattle had been killed near Colton—and Johnny would never have thought of doing such a thing. Coal is cheap and it would not have taken long to chase them off the track.

Local Harvest Has Started

The cutting and threshing of grain has started in the Genesee section. It was stated that Fred Hove began threshing barley Thursday and that Roy Evans had commenced the cutting of wheat on the same day—and it will be but a short time until harvest activities will be in full blast in this section.

NOTICE!

Are you coming to Moscow to enjoy the splendid school advantages this year? If so you will need a good house. Now good houses are scarce, therefore it will pay you to take up the matter at once. If you are interested in buying a home, I have some good bargains which I will be pleased to show you. Some of them I can sell with a small payment down and the balance like rent.

It will pay you to call on

PLYMOUTH TWINE

A Straight Tip

THERE is a real saving in the use of Plymouth Twine, to say nothing of the satisfaction, over the cheap kinds which do not have the necessary strength and uniformity, and which are invariably under measurement.

A recent comparison of a ball of

PLYMOUTH TWINE

with that of another make which was made in the field last season showed that it would take 135 pounds of the cheap twine to bind the same amount of grain that 100 pounds of Plymouth Twine would tie. The cheap twine was not only greatly under measurement, but was decidedly inferior in quality and strength.

Better take no chances; place your order for Plymouth Twine with us and get full length and strength, which is guaranteed by the Plymouth Tag on each and every ball.

PERSONAL MENTION

Chas. Scharnhorst was a Genesee visitor from Clarkston Monday.

Miss Lillian Olson left Monday for Portland where her parents reside.

Miss Amalia Lawen returned Friday from a visit with her sisters at Spokane.

B. W. Evans of Spokane was a Sunday visitor at the home of Dr. and Mrs. F. B. Evans.

Miss Baalim left Thursday morning for Lewiston after a visit at the John Friedericks home.

George Schlerth returned Wednesday from an overland trip to Portland and other coast cities.

Mr. and Mrs. F. C. Shork returned from Spokane Wednesday morning after a few days spent there.

Mrs. A. A. Butterfield returned to her home at Pullman Saturday after a visit with her parents, Mr. and Mrs. John Lawson.

Norman Nelson returned Friday from Grangeville where he had been for the past few weeks working with an extra gang.

Miss Vera Daugherty and Mrs. A. J. Hassell and children have returned to Spokane after a visit at the Daugherty home here.

Mr. and Mrs. Chas. W. Smith returned Sunday evening from a short visit with Mr. Smith's parents at Palouse, Washington.

Mrs. Ed. Wheeler and little son returned to their home at Ymir, B. C., Friday after a visit with Mr. Wheeler's mother, Mrs. Ida Wheeler.

Mr. and Mrs. A. E. Elver left Friday morning for Cocolalla, where they will make their home and where Mr. Elver will be agent for the N. P.

Grace Jain left Tuesday morning for Troy where she will visit relatives for a time before going to Newman lake to spend part of the summer months.

Rev. A. F. Wolff and family returned Friday evening from Walla Walla, where they had gone to help his brother and wife celebrate their twenty-fifth wedding anniversary.

Mr. and Mrs. H. L. Fickens left Sunday on their return trip to their home at Fort Morgan, Colorado, after a two-weeks visit with Mr. Fickens' brother, Gus Fickens, and wife.

Miss Helen Casey left Monday morning for Spokane where she expected to spend a few days before going to her home at Mullan. She had been visiting friends here for the past two weeks.

Mr. and Mrs. W. M. Herman left early Sunday morning for an overland trip to Portland, Tacoma and other coast points. Mr. Herman will attend a furniture dealers' convention at Tacoma during his absence.

Real Summer Weather

Genesee and vicinity have been experiencing some real summer weather during the past few weeks—and especially on Sunday and Monday, when the mercury reached the high point of the season—97 on Sunday afternoon.

At the same time Sunday afternoon at Lewiston the mercury registered 104 degrees by the weather bureau instrument and at the Clarkston beach the thermometer registered 112.

Regardless of these facts, the Clarkston and Lewiston beaches enjoyed the largest crowds of the season. The water was said to have been "just right."

There was also a fair representation of Genesee people at the Dertinger beach and the Clearwater was said to be fine for bathing.

Two Slight Injuries

Two slight injuries occurred at the rock crusher the latter part of last week which might have easily proven more painful.

Robert Post was cranking one of the big engines at the crusher last Friday and the thing "kicked" on being started and as a result Robert got quite a bad cut on his right cheek in which Dr. Evans had to take several stitches to close.

On Saturday as Arthur Mayer was prying rock loose in the pit a slide caught him and badly bruised his left foot and he is now wearing a carpet slipper on the member to make it more comfortable and is on the retired list for a few days.

Goldsmith Lad Found

The body of little Louis Goldsmith, who was drowned in the snake river on Sunday, July 15, was found last Thursday and the funeral held on Friday afternoon at 2 o'clock, the Rev. Father E. A. Jordan officiating.

If your auto spokes are loose and your wheels need setting, I have a Klein machine with which to do the work. Satisfaction guaranteed. See Gus Fickens. 4-4x

Bielenberg-Schooler Post The American Legion Meets Each First Wednesday In June, July and August

The local Legion activities are in a "state of suspended animation" during the present warm weather and rush of harvest preparations. A short business session is scheduled for the regular meeting night, Wednesday, August 1. Excepting this meeting, no post activities are on the calendar until after harvest.

The lull n local activity on the part of Legionaires is offet by the activity preparatory to the attending of the annual department convention to be held at Coeur d'Alene, August 9, 10 and 11.

Pre-convention rumors accord Paul Davis of Boise the outstanding chance to land the department commandership. It is conceded that the next convention will go south, with several southern towns in the running to land it.

Bielenberg-Schooler Post is in receipt of the following open letter from the Coeur d'Alene Post:

To the Ex-Service Men of Idaho:

We wish to say a few words in regard to the coming convention of the Department of Idaho in Couer d'Alene on August 9, 10 11.

Now is the time for each post to lay plans for sending their delegates and we would like to see every post in the state represented.

A good program has been prepared for each session of the convention, and the entertainment feature has not been neglected, so we know you will enjoy your trip to north Idaho.

Couer d'Alene has been called "The playground of Idaho," and at this season it will be at its best. You will find nearly all forms of sport, including bathing, boating, surf riding, golfing and auto rides, so be sure and bring your bathing suit.

At Bozanto Tavern, Hayden Lake, there is one of the finest eighteen-hole golf courses in the country and there will be ample time for a good game.

Benewah Post at St. Maries has invited us to be their guests so you will be treated to a boat ride of 45 miles on Couer d'Alene lake and the St. Joe river. This alone is worth the time and money necessary for a trip to Couer d'Alene.

We want all ex-service men who can to come and attend the convention, whether they come as delegates or visitors. Plan to spend your vacation here in Couer d'Alene amid pleasant summery scenes.

Don't forget your uniform and let's have the biggest parade of ex-service men Idaho has ever seen.

One of the outstanding features of the convention will be the first annual promenade of the Idaho Grand Voiture, 40 et 8. The Lewiston wrecking crew, (translated meaning degree team,) is expected to gain new laurels in the matter of the initiation ceremonial. Genesee will be represented, particularly at the 40 et 8 promenade, various local legionaries having already laid their plans to be in attendance.

All Baby Records Broken

One thousand four hundred eighty-eight babies reported by registrars to have been born in Idaho during the month ending July 10, breaks all previous records, according to the bureau of vital statistics at Boise.

Of the 1488 babies born, 743 were boys, 740 were girls and the sex of the five was not stated. All were white. Parents of 1342 of the babies were born in the United States.

The report also shows that there were 461 deaths during the above reporting period, one of the persons who died being colored. Accidents claimed 27 victims. Ten were killed in automobile accidents, 10 by accidental drowning, 6 were electrocuted by high tension wires, and one was killed by lightening. Organic diseases of the heart claimed 24 persons.

New Oil Company Organized

A Lewiston corporation—The Interstate Oil Company—has recently been organized with a capitalization of $250,000 to carry on a general business in oil, with general offices at Lewiston. The life of the corporation is placed at 50 years.

We wish to announce to the ladies of Genesee and vicinity that we will have a showing of

Fall Millinery about September first

Hemstitching and Needlecraft Shop

We do all kinds of printing.

"TOXAL"

will kill flies
$2.00 A GALLON
Less quantity at a little higher price. No better preparation on the market.

New Goods Announcement

WE ARE SHOWING at this time a large assortment of new goods, which are on display in the different departments of our store, including new piece goods, bathing suits for men and women, McKibbon hats and caps---Star brand shoes for all members of the family.

NEW NOVELTIES

New chain girdles, each	25c and 50c
Camasole vesties, each	$1.00
New Bertha collars, each	$1.45
New collar and cuff sets, each	.50

Ladies' Ready-to-Wear Goods

Ladies' bungalow aprons, each	$1.25
Ladies' jumper aprons, each	1.75
Ladies' rubber aprons, each	50c and .85
Ladies' all wool bathing suits, each	4.00
Misses' all wool bathing suits, each	3.00

New Materials In Piece Goods Department

32-inch toile du nord gingham, yard	38c
New devonshires, yard	35c
New Jap and serpentine crepes, yard	35c

Piece Goods Specials

All 27-inch high grade ginghams, yard	20c
All 29-inch flaxons, special, yard	20c
All 40-inch organdies and voiles, yard	35c

GENTS' FURNISHINGS

Men's straw and crash hats, each	15c to 85c
Boy Scout hats, each	$1.75
Men's Panama hats, each	2.50
Men's high grade work shirts, each	1.00
Men's Prosknit shirts and drawers, each	.65
Men's E. & F. socks, brown and black, pair	.20
Men's fine quality gray wool hose, pair	.50

Men's Work Shoes

Boys' Defiance work shoes, pair	$2.00
Men's "Opener" work shoes, pair	2.50
Men's chocolate work shoes, pair	3.25
Men's 408 chocolate 8-inch work shoes, pair	4.00
Men's E. & J. Railroader work shoes, pair	4.00
Men's Soft and Good, soft tip, work shoes,	5.00
Men's E. & J. officer 8-inch work shoes	6.50
Men's khaki pants, pair	1.75
Men's extra quality pants, pair	3.50
Men's athletic union suits, each	1.00

MOSCOW-MAID BREAD, FRESH EVERY DAY

A Large, fresh stock of groceries at all times from which to select your table supply.

STAR BRAND SHOES — ARE GOOD SHOES

Follett Bros. Mercantile Co.

POULTRY

Too much emphasis is being placed on the number of eggs and not enough on what determines their market value, such as size, color and shell.

John S. Carver, expert in poultry husbandry, will arrive in Pullman August 1 from Massachusetts to take charge of the poultry department at the State College of Washington. Mr. Carver was recently appointed by the U. S. government to organize the work in poultry instruction at the Veterans' Bureau Vocation school at Norfolk, Mass., of which he is now head. He is a graduate of Amherst, and has had wide experience not only in college teaching and experimental work, but also in commercial poultry plants. He at one time operated his own poultry plant, and was for some years superintendent of the famous Essex county egg lay contests. At the University of Maine he was poultry specialist in the extension department, and has done much valuable work in investigating poultry plant methods.

A great many poultrymen exert themselves, at least once a year, to wield the whitewash brush about the interior and upon the nests and roosts of their poultry houses and flatter themselves that they have done their bit to create and preserve a safe and sanitary state of cleanliness. If this was all that was necessary there would be very few complaints of trouble from mites; but these thrifty little insects are not so easily routed. In fact, I have observed instances where a thorough whitewashing every month in the year has had no great effect upon them.

Whitewash, when dry, often produces scales that harbor millions of the pests and in trials with every sort of disinfectant nothing has been found that would effectually penetrate these hiding places. A kerosene mixture with the whitewash will frequently reduce the mites to such an extent that the unobservant poultryman will believe them completely banished but enough always remain to breed and multiply to the same troublesome numbers within a few weeks with the result that one's labor is practically lost.

To get to the bottom of the trouble where mites have gained a strong foothold it is advisable in many instances to remove and burn the roosts as well as nest boxes and litter. These should be replaced with new ones of planed lumber which has been treated to a thorough saturation of creosote or coal tar product. Cracks between the boards should be painted over with warm grease that will harden when cold, thus effectually sealing the common retreats and breeding places where subsequent sprayings of disinfectants would not penetrate.

With this precaution once taken there should be no trouble from mites for a year at least and thereafter occasional sprayings with a reliable disinfectant will positively insure the fowls against the tiny bloodsuckers.

The foregoing may seem quite a bit of trouble but when one considers that it forever banishes the sloppy chore of whitewashing it will be readily admitted that it is worthy of the time and labor.

Can't Afford to Miss 'Em.

He was running a small hardware store in a newly developed district, and the wholesale dealers found him backward in payment of his accounts. They sent him letter after letter, all of them polite, but each more threatening than the last. Finally they sent their representative down to give him a sporting chance.

"Now," said the caller, "we must have a settlement. Why haven't you sent us anything? Are things going badly?"

"No, everything's going fine. You needn't worry. My bankers will guarantee me all right."

"Then why haven't you paid up?"

"Well, you see, those threatening letters of yours were so well gotten up that I've been copying them and sending them out to some customers of mine who won't pay up, and I've collected nearly all outstanding debts. I was only holding back because I felt sure there must be a final letter, and I wanted to get the series complete."

DIET TOO RICH.

Doctor—"What is the matter with your Majesty?"

Cannibal King—"Indigestion."

Doctor—"What have you been eating?"

Cannibal King—"I've just finished an American Steel king."

Doctor—"No wonder you're ill. Didn't I warn you against eating anything rich?"—Ex.

Large hats of black horsehair make an excellent background for the average type of loveliness, besides giving an illusion of coolness which may be furthered by trimmings of summer flowers.

IN MY HAREM.

"The latest song hit," remarks the Arkansas Legionnaire, "by the Sultan of Turkey is: 'If I Had a Thousand Wives to Give, I'd Give Them All to You.'"

All that we can add is a paraphrase on Nathan Hale's valedictory: "My only regret is that I have but one wife to give to my country."—Toledo American Legion Councilor.

LIVESTOCK

Fresh Air in Barns.

"Some means should be provided to give the animals in a barn continuous supply of fresh air without excessive drafts," says Prof. L. J. Smith of the division of agricultural engineering at the State College of Washington, in his new bulletin on "Plans for Small Barns."

"Windows hinged at the bottom, the use of muslin instead of glass, openings between pairs of loft floor joists, standard out-take flues up to cupolas, and halved doors are common methods. Animals must have plenty of fresh air if they are to be kept healthy."

Exercise the Pigs.

Do not let the pigs be idle. Make them take plenty of exercise. If they are penned up, give them something to play with that will cause them to run and frolic.

Meetings on farms where crops or livestock were being grown under the direction of the agricultural extension agent to demonstrate approved methods, or other demonstrations in farm practices given by extension agents, were attended by over 88,500 farmers in 1922, according to reports to the United States Department of Agriculture. More than 470,000 farmers attended extension schools or short courses to learn new farming methods which the agricultural colleges and experiment stations have found profitable. The total number of farmers attending extension meetings of all kinds during the year is estimated to be over 14,000,000.

Shown Fine Cattle.

Orange Blossom Lady, who holds both the Junior and Senior championships for female shorthorns exhibited at the last Pacific International Live stock Show, was one of the fine cattle exhibited to between 500 and 600 visiting farmers at the 5th annual Field Day at the State College of Washing.

Myra Oaksedale DeKol, a holstein shown, recently completed a record production of 813 pounds of fat, and 21,510 pounds of milk, equal to 1,016 pounds of butter a year. Pieterje Natsey Belle, II, another fine holstein, has just made a 7-day record of 34.5 pounds of butter. Willow Moore IIa is an aristocrat with a 365-day record of 736 pounds of fat.

Dean E. E. Wegner of the veterinary school at the State College of Washington is making a tour of seven districts in the state, giving advice and information on the different animal diseases prevalent in those places. The tour, which began July 6 and runs to July 30 , covers Everett, Mt. Vernon, Seattle, Port Orchard, Olympia, Chehalis, South Bend and Cathlamet.

"An Oklahoma editor tells of an old Indian who came into his office to pay for his paper. The editor took the money; then the Indian wanted a receipt. The editor tried to talk him out of it. Mr. Indian insisted. After making it out, the editor wanted to know why he was so persistent about wanting a receipt. The Indian said: 'Me die some time. Go to big gate and St. Peter ask if I been good Indian, I says yes. He says, "Did you pay editor for paper?" I say yes. He say, "Where is receipt?" I no have it. I have run all over hell to find you and get receipt.'"—Charlotte Observer.

One good test to try on a snake to see if it is poisonous, is to hold its head with a forked stick and spit tobacco-juice into its mouth. If the snake is of a poisonous species it will die shortly in convulsions: if not of a poisonous species the tobacco will not affect it very much. I've tested this out on rattlers, copperheads and water-moccasins: also an king, grass, coach-whips and others. The first three died in a few minutes while the others were not bothered except to accelerate their crawling gait when released.—E. L. Marshall in Adventure Magazine for July.

Gold lace is greatly liked for dinner frocks, particularly when combined with wide girdles of velvet or satin in luscious shades of coral, green or blue.

Puffs of white organdie or georgette peep from beneath the three-quarter length of sleeves of tailored dresses of silk and wool.

Occasionally a man breaks his word while telling the truth—if he stammers.

TIMELY HINTS TO FARMERS

Horticulture—(Eastside) Look closely for signs of the red spider. Spray applied early when they first appear is most important in controlling these insects. (Westside) Carefully supervise the berry picking; green, overripe and imperfect berries mixed with the first class fruit will surely reduce the returns.

Livestock—One county breed association has appointed a committee to cull the spring boar crop, castrating all inferior purebred boars. Be sure to alter all grade boars.

Plant Pathology—Farmers in 16 eastern Washington counties treated their seed wheat with copper carbonate this year, resulting in the sowing of 734,000 acres of treated wheat.

Agricultural Engineering—This is a good time to plan for the construction of a septic tank. It can be put in more conveniently from now until September, than later. Be sure you have your water system in first.

Farm Crops—Go over the seed fields and pull all weeds. All mixtures of other varieties of seed must be removed and nothing left except the variety grown.

Apiculture—Bees place a little nectar in each cell, consequently they require plenty of room to ripen honey.

Dairy—Put steamed bone meal in box and let cow run to it. Cows digest mineral best when on green food.

RATS ARE POPULAR WITH GOLD MINERS

However unpopular the rat might be above ground, he was never molested in the precious metal mines of Virginia City or Gold Hill, Nevada, says John L. Considine in Adventure. The lower levels of those deeps were literally alive with the long-tailed rodents.

Their immunity from harm rendered them tame and even saucy. They fared sumptuously on the fragments left from the miners' lunches —for those miners lived well—and even in this respect were of service, acting as scavengers for the removal of scraps of meat and other food which otherwise would have caused bad odors to arise.

Because of the great heat, with a temperature rising often to as high as 140 degrees in the lower levels, the decay of the smallest thing in those mines could not be endured.

Perhaps a reason more important than any other for the extraordinary tolerance accorded by the miners to the elsewhere despised rodents lay in the fact that, when a great cave-in of rock was about to occur in a mine, the rats gave the miners their first warning. The animals became very uneasy and were to be seen scampering about at unwonted times and in unusual places.

The rats always were the first to discover that the earth was settling and set out in search of a place of safety. It was supposed that the waste-rock and timbers, in settling, pinched them in their usual holes and haunts and so forced them to go forth in quest of new quarters in order to avoid being crushed to death.

PAY FARMERS FOR HATCHING PHEASANTS

Farmers will be paid $1 apiece for pheasants hatched from eggs uncovered when hay is being mowed, according to W. E. McGee, deputy state game warden, in an interview given out at Nampa the other day.

He called attention to the fact that farmers will soon be cutting alfalfa and that they will run onto nests of Chinese pheasants. When disturbed the pheasants will not return to their nests. However if farmers will take those eggs and put them under hens they can get $1 for each pheasant when it is old enough to ship which is about six weeks. There are many calls from other states for young pheasants for breeding stock. The young pheasants are very active and will get away as soon as hatched if not closely guarded. The hen should be set in a box three feet high, covered with netting over the top.

In order to raise these pheasants the farmer must secure a permit under the law, but this is merely a matter of form. There is no expense, just write the state game department or see the local deputy.

Horticulture—Now is a good time to cut out the sucker wood in the trees. Their removal admits much more light to trees which will help the apples color.

The size of an egg is important. It makes a difference at times, when selling, of from 12 to 15 cents per dozen.

U. P. SCHOLARSHIP SCHEME EXTENDED

President Carl R. Gray of the Union Pacific system, made the following announcement recently in regard to the system's scholarship scheme:

The provision as to eligibility for Union Pacific scholarships for county winners in boys' and girls' club work, heretofore established in the 18 counties in the state of Washington traversed by Union Pacific system lines, is hereby modified and extended to include girls as well as boys who may participate in county club work, and in addition the fourth section of the plan as stated in announcement of June 15, 1922, is amended as follows:

"Five acres of corn, ten acres of wheat, one acre of potatoes, one or more colonies of bees, one pure-bred or baby beef calf, one litter of swine, consisting of not less than four, or twenty-five poultry, shall be grown by each person entering the above competition."

The scholarship plan as above extended will apply to 1923 club work, and subsequently, unless otherwise later announced.

The Union Pacific offers its hearty congratulations to all participants in this agricultural club work, and hopes that this enlargement of the scope of the competition will create materially added interest in the cooperative extension work of the state college of agriculture.

Curing Snake Bite.

If you are traveling in a reptile-infested region always lay in a good supply of chewing-tobacco, and if bitten by a poisonous snake, chew the tobacco and swallow the juice until you are sick at the stomach. I have seen several saved from death by snake-bite in this way. Snuff would be good also; and if you do not care to eat it, make a poultice with water and place on the pit of the stomach. The tabacco is the best all-over-the-country antidote that can be used for first aid in such cases.

"What would you do if I kissed you?"

"I'd call my brother."

"How old is he?"

"Two years."—Ex.

CHERRY FRUIT FLY OR MAGGOT

Entomologists and fruit growers have found that for each kind of fruit there seems to be one insect pest that overshadows all the others in its capacity for doing harm. In some cases an entire district has become so badly infested with an insect pest that it was no longer possible to grow the fruit affected.

Among the tree fruits the cherry is singularly free from insect infestations. However, one pest, the cherry fruit fly or cherry maggot, does infest this fruit and is a serious menace to the industry wherever it becomes established.

Cherry Maggot.

Cherry maggots have been known to exist in western Washington and the Palouse county of eastern Washington for a number of years, but because the season of 1922 was especially favorable for them they became more numerous than ever before and the State Department of Agriculture has had many complaints from disgusted purchasers of cherries who found the maggots in the fruit they bought.,

If this infection should become general it would not take long to kill the cherry growing industry in Washington as one experience on the part of the consumer in buying canned or fresh cherries in which they find maggots will severely injure the market for them in that vicinity. It is therefore necessary for everyone connected with the cherry industry to do everything possible to see that this disgusting pest is controlled and the spread stopped before the general public learns of its existence.

Eggs Laid in Cherry.

In spite of some reports to the contrary the cherry maggot effects both the sour and sweet cherries. The adult of the cherry maggot is a fly about two-thirds the size of the common house fly. Ordinarily it emerges from the ground about the first of June and so on begins to lay its eggs. The eggs are deposited just under the skin of the cherry and the maggot hatches in about five days. It feeds in the flesh of the fruit until it has attained its full growth which ordinarily takes about two weeks when it emerges from the fruit, drops to the ground and remains hidden in the pupae case, which is about the size of a grain of wheat, until the time for the flies to emerge the following spring.

It is usually difficult to tell the infected fruits from the sound ones and in many cases it is impossible to distinguish between them, so any amount of sorting will not eliminate the infected fruit and the only control measure that will get any results, after the eggs have been laid, is the complete destruction of the fruit. Fortunately the flies can be killed soon after they emerge and such a control measure works out quite satisfactorily by spraying about the first of June and again just after the first blush appears on the Montmerencies with a solution of Arsenate of Lead at the rate of one pound to 50 gallons of water. To this may be added one or two gallons of molasses to make the spray more attractive to the flies though this is not necessary.

Spray for Safety.

It will be seen from this description that no amount of inspection during the dormant season or early spring can show whether the flies are present or not and the only safe method to pursue in those sections where the maggots were known to exist last year is to carefully apply the above mentioned sprays at the time suggested.

It is to be hoped for the good of the industry that all of the cherry growers will see that the sprays are applied as necessary and it should be remembered it is the duty of the orchard owners, under the law, to spray for such pests. If it is probable that the presence of an infected orchard does not intend to spray, this fact should be reported to the nearest horticultural inspector in order that he may give the matter his personal attention and see that the orchard is sprayed at the proper time.

Home Orchards Need Attention.

This warning applies particularly to the small home orchards scattered through the Palouse country and in the Spokane Valley. Those having orchards where the fruit was infected last year, in order to protect one of the larger industries in the state, should either spray their trees to control the pest or should destroy the trees and prevent the breeding and spreading of the pest from the neglected orchards.

Fortunately the pest is not so far reported from the large cherry growing sections, but has been reported in several instances within a few miles of the Lewiston, Clarkston and Snake river sections. If those sections are to be protected the people through the country must help out by trying to prevent the pest spreading to those sections. The flies are just beginning to emerge in some of the warmer sections on the uplands and spray should be applied at once and again in 10 days to two weeks in order to have your fruit for your own use and in order to help protect other sections from the spread of the insect.

ALL IN A DAY'S WORK.

A whole line of type to print a newspaper is cast in one piece, and when a bunch of these lines are mixed up we call it "pi."

Once upon a time a country paper "pied" a column of type which contained the notice of an auction sale, and in the same column was the account of a beautiful wedding which had just taken place.

They sorted out the lines as best they could, and when the paper came out it read something like this:

"Mr. Hiram Smith, a soldier just back from France, was disposed of at public action last Sunday to Miss Carrie Huggins, on my farm one mile east of Fairplain, in the presence of 70 guests, including the following, to-wit: Two mules, 12 head of cattle. Elder Nugin tied the nuptial knot, averaging about 1,200 pounds on the hoof. The beautiful home was tastefully decorated in one spade, one sulky rake, one feed grinder, one set or double harness, nearly new. Just before the ceremony was pronounced Mendelssohn's wedding march was softly rendered by one milk cow, one Jersey cow to be fresh in August, carrying a bunch of flowers in her hand and looking charming in a gown made of light spring wagon, box of apples, six stacks of hay, one grindstone, music in lingerie trimmed with about eight two-horse loads of stable manure. The groom is a well known and popular young man who has always stood well among society circles of 12 Berkshire hogs, while the bride is an accomplished school teacher of a splendid drove of Poland Chinas. Pedigree is complete. Among the beautiful presents were two sets of silver-ware, one spring harrow, one wheelbarrow, one go-car and other articles too numerous to mention. The bridal couple left Monday for an extended trip. Terms: Nine months time to responsible parties, others spot cash. Lunch will be served at the stable. After this Mr. and Mrs. Smith will go to housekeeping on the corner with Penny Brothers auctioneers."

The editor of the paper was running up and down the street bareheaded for an hour trying to get back the copies distributed by the newsboys before the awful error had been found.—Valdese Enterprise.

NORTHWEST NEWS

Definite arrangements for a central clearing house for harvest labor in Spokane were made recently with the federal employment office by the harvest labor committee of the Spokane Chamber of Commerce. It is planned to place several thousand harvest hands through the Spokane office this summer.

Arthur A. Lewis, chairman of the chamber committee, made the plans with W. C. Carpenter, federal employment agent. The agency was opened in connection with the federal-city free employment office, N. 218 Howard street.

Under the plan worked out, Mr. Lewis will advise farmers to hold local meetings, determine the number of men wanted and then select a local agent to deal with the Spokane office. Names of the local agents will be filed with Mr. Carpenter and the system is expected to permit a constant check on the labor situation in every community in the Inland Empire.

Dr. Hubert Work, secretary of the interior; D. W. Davis, commissioner of the reclamation bureau, and F. E. Weymouth, chief engineer of the reclamation bureau, will inspect the Columbia Basin project about October 1.

Dr. Work, traveling as one of the two cabinet members in President Harding's party to Alaska which visited Spokane July 2, gave this assurance to the members of the Columbia Basin Irrigation league at a meeting held in the Davenport hotel.

Word has been received in Spokane that survey work on two important points within the Columbia Basin project, the lower damsite at Camden and Rattlesnake canyon reservoir, has been completed by federal reclamation experts detailed to investigate the project.

Holdings of the Interstate Utilities company were increased to approximately $1,500,000 recently through the purchase of the entire telephone property of the Washington-Idaho-Montana Railroad company, extending from Palouse to Elk River, Idaho, according to word received from the home office.

John F. Davies, president of the company, announced that the company would start immediately to construct a new line between Clarkia and Elk River, a distance of about 15 miles. It is estimated that the cost of this new construction will be between $10,000 and $15,000.

In closing the deal for the Palouse-Elk River service the Interstate Utilities company has gained entrance into one of the most promising territories in the northwest and has also made itself one of the largest independent companies in the United States.

PUREBREDS BETTER PORK PRODUCERS THAN SCRUBS

"A boys' swine club, composed of five members was organized in our neighborhood last summer, each club boy purchasing a purebred sow pig," says W. J. Hutsinpiller of Colerville. A neighbor advised me not to let my boy go into the club as purebred stock costs too much, and he did;not believe it would ever pay out. At that time, I purchased two grades of scrub pigs of this same neighbor to feed and grow opt for family pork. We kept strict account of the feed fed except slop and skim milk, feeding very little of the latter.

"When butchered, February 17, 1923, these two low grade pigs and the feed they consumed cost us $36.93. The two sows had cost a total of 306 pounds, cost 12½ cents per pound. We were giving the purebred swine club pig almost a starvation, diet yet she was larger than the largest one we butchered and two like her, on the same feed consumed by the ones we butchered would have easily made us 150 pounds more pork than we got from the two breeds slaughtered. In feed cost alone, the purebreds would have cost us 6 1-3 cents per pound for the pork produced as against 9½ cents for the grades or scrubs.

"There is no question as to which type is the more profitable to keep, and there is not more satisfaction in caring for something you can feel proud of and not ashamed of. We either go forward or backward. People go forward by improving their stock. We can all do the same thing."

The swine club work has again demonstrated the superior merit of the purebred for pork production. Farrowing larger litters, making a greater gain in 100 pounds of feed, and a larger daily gain; having a greater per cent of the carcass weight in the region of the higher priced cuts, and dressing out a greater per cent of meat, the good purebred sow is proving herself to be a more efficient pork producer, and the right type of hog for the progressive farmer.

A novelty for the summer resort is a red cotton umbrella bound with black, white and red, and equipped with a short, thick handle of black.

IMPROVED METHOD OF CANNING RASPBERRIES

Wash the berries and pack into jars which have been washed and are hot. Pour over the berries boiling syrup made by using 1-2 cup sugar to 1 cup water. Have ready a boiler or large kettle filled with boiling water, and place the sealed jars of fruit in it. Wrap the boiler in newspapers or an old quilt to exclude the air and leave for 24 hours.

The fruit stays whole and does not lose its color as it does if cooked by open kettle method. Raspberries and strawberries canned by this process are much superior to those canned by the open kettle process.

To erase all traces of scorch stains, wet the scorched place, rub with soap and bleach in the sun.

Lincoln R. Lounsbury, Agricultural Extension Editor,
State College of Washington.

I did not realize until I saw it in the World Almanac recently, that 161 American girls had given their lives in the Great War. Their names are in the list published on the last Armistice Day by the Women's Overseas Service League. Washington state's representatives among these heroines Tilda A. Thorkelson, Mrs. Jessie Chisholm and Alice Stevens Dirsko.

It occurred to me recently to look up some lullabies in the Victor record list, and found these that I think all mothers would like: His Lullaby, Healy and Carrie Jacobs Bond, sung by Mme. Schumann-Heink, or by Lucy Marsh; the Brahms Lullaby, sung by Elsie Baker; a cello Lullaby played by May Mukle; an Indian lullaby, sung by Julia Culp; the Bohemian Cradle Song, sung by Alma Gluck's rich soprano; the Swedish Cradle Song, by Gluck and Zymbalist; Tennyson's Sweet and Low, sung by the Lyric Quartet, a double record with another lullaby on the reverse, O, Hush Thee My Baby; or you can get Sweet and Low, sung by Elsie Baker, with A Southern Lullaby on the other side. There are, of course, many more slumber songs. This is merely a selection of a few you would be likely to enjoy most.

You may have noticed how starched things will sometimes blister when ironed. That is probably because it has been made damp in the "sprinkling down" process. Jaunita Sheppard, in her book on Laundry Work, says this is the proper way to dampen a starched shirt: When it is perfectly dry, take it from the line, turn it right side out and wring the upper part of the back (not including the neckband) out in the usual way. Lay it smooth by over the bosom. Then wring the lower part of the front moderately dry from hot water and turn that also up over the bosom. Lay the dry wristbands in such a way that the wet portions will cover them, and roll the shirt up tightly, to lie over night. The beginner will not think it damp enough, but it will smooth out under heavy pressure, and if it is made damper it is liable to blister.

It is sometimes said that a little baby upsets the schedule of the whole family, with the many things that have to be done for it, the constant demands for attention or services of some sort. Here is a day's schedule for a baby six months or less, that will fit into most grown folks' plan conveniently. (I found it in the article on baby care in Compton's Pictured Encyclopaedia, a new authoritative work full of interesting things for members of the family).

6:30-7:00 a. m., feeding; 7:00-9:00 a. m., asleep or awake in bed or carriage; 9:00-9:30, bath; 9:30-10:00 feeding; 10:00-12:30 m., sleep; 12:30-1:00 p. m., feeding; 1:00-3:00 sleep; 3:00-5:00 awake; 5:00-5:30 preparation for bed; 5:30-6:00 feeding; 6:00 10:00 sleep; 10:00-10:30 feeding; 10:30-6:30 a. m. sleep.

Babies are more likely to be "good" (which really means "well and comfortable") if kept on a strict schedule, but made to suit their bodily needs for food, sleep and quiet, to the convenience of a house full of grown-ups, who perhaps, like jazz and late hours, and freedom from regularity. I actually knew one lovely baby girl that died of nervous exhaustion from the noise and disturbance about her—a sensitive little thing with a mother who had no nerves and banged doors and bounced the baby and "booed" at her.

Marian Cole Fisher, in her book "Twenty Lessons in Domestic Science," gives these directions for measuring: Dip the spoon into the materials and strike off with the straight edge of a knife for a level teaspoon; in measuring lard, butter, or margarine, pack the cup or spoon closely, and strike off with the edge of a knife. In measuring flour in the cup measure, tap the cup lightly to insure no unfilled spaces. To measure a half-teaspoon, divide the level teaspoonful between, not crosswise.

Fruit Grafts Successful.

At the Morre orchard below Dayton, Wash., now owned by the Israel-Erbes Orchard Co. about 100 buttings from Rome Beauty apples were grafted on Spitzenburg trees this spring. They are nearly all living and growing but the most prenomenal thing is that one graft had four well-formed apples on it last week. All but one of these were taken off in the process of thinning to allow the graft to make a greater growth. Fruit rarely appears on a graft the first year it is made, and apple men have been greatly interested in this unusual occurence.

Wallace Outlines Plan of National System of Roads

In address upon the subject of public highways delivered before the American Automobile Association, Secretary of Agriculture Wallace recently gave some very interesting facts and figures in connection with the operation of the federal road act. Among other interesting data furnished by Secretary Wallace in the course of his remarks were the following:

"The designation and approval of the Federal Aid Highway System under the act of 1921 is progressing rapidly. By the end of the summer approximately 179,000 miles will have been designated as a part of this system. Up to May 5 all but three states had submitted tentative systems for approval. The systems of thirty-three states had been formally approved, including a total of 105,406 miles.

"Considering the approved systems in the thirty-three states we find that of the 105,406 miles of road in the system, 959 of them lie directly on the approved system, and there is not one but will be connected with the system by an improved state or county road. When the system is completed, therefore, one will be able to travel from any town of 5,000 population or greater to any other town of the same population without leaving an improved road.

"The detailed study of the availability of the improved roads to the total population has not been completed, but if we take typical states in the East, Middle West and West, we find that the roads on the Federal Aid system will give a maximum service. In Maryland, not further than 2½ per cent of the population lives further than ten miles from a federal aid road; in Indiana less than 1 per cent; in Arizona, where the total population is but 334,000 perhaps one-third will live outside of the ten-mile zone. The federal aid road will cross the western mountains at practically every one of the important passes.

"In designating the routes to be included in the federal aid system, the chief aim of the states and the federal agency has been to select routes which will give the maximum of local service and at the same time connect with one another to form a great national highway system. The states were first asked to certify the total mileage of road in existence at the time the act was passed. Seven per cent of this was the maximum allowable mileage that could be included in the system. The total was 194,262 miles. The states were then asked to prepare maps of state systems proposed by them, locating the roads by controlling points. These state systems were carefully reviewed and studied by the department and some changes were suggested as being desirable from the national point of view. Conferences were held between representatives of the department and of states and groups of states, and out of these conferences came agreement as to the systems finally decided upon.

"Federal aid for road building was inaugurated by the federal aid road act, approved July 11, 1916.

"Since the above date, $540,000,000 have been appropriated or authorized for the fiscal years 1917 to 1925 inclusive. Of the above amount, $75,000,000 is authorized for the fiscal year 1925, and will not be available for expenditure until July 1, 1924. Sixty-five million dollars is authorized for the fiscal year beginning July 1 of this year, leaving $500,000,000 authorized or appropriated for expenditure up to the current fiscal year.

"Of the $400,000,000 authorized or appropriated up to the current fiscal year, $226,274,214 had been paid to the states for work completed up to March 31, of which $160,938,223 was paid on projects completed and accepted, and $65,335,991 had been paid in progress payments for work completed on projects which were still under construction on March 31.

"The total mileage completed or under construction on March 31 was 39,062 miles."

TRAP-NESTING HELPS IN EGG PRODUCTION

West Coast Poultrymen Find It Worth Far More Than Cost in Actual Results.

Though it takes one dollar per hen to find out what a hen can do, through the trapnesting method,, M. S. and E. V. Allyn of the Laymore Poultry farm north of Bellingham told the crowd attending the recent livestock tour, that it paid them to spend that dollar.

The main success of the poultry raised on the farm is that they have records of good laying and maintain vigorous bodies. The foundation stock was secured from D. Taucred and has been trapnested since 1905. This year there is being trapnested on Laymore farm 1500 pullets besides the breeding hens in special pens.

Those pullets which made records of 175 eggs or better are removed to the breeding houses where they are given a three months' rest from egg production in order to get into condition for breeding.

The stock matings are made, one composed of hens with records of 175 to 224 eggs and the other of hens with records of 225 to 249 eggs. Hens making 250 eggs or better, are mated to proven mates and housed in small pens for special pedigree work.

"The size of the egg is of great importance," said Mr. Allyn. "It makes a difference at times of from 13 to 15 cents per dozen in the price of eggs. Too much emphasis is being placed on the number of eggs and not enough on those things whic hdetermine their market value, such as size, color and shell."

W. D. Buchanan, extension poultry specialist of the State College examined the stock for vigor and size, and pronounced them up to good type.

Salesmanship Illustrated.

As the boy who tended the news stand was absorbed in reading a book, I hunted around until I found the magazine I wanted and then approached him. When I spoke he did not raise his eyes from the page, but held out his hand for the coin and dropped it automatically into the till. I said:

"Where is the change?"

"What did you get?" he replied, still without looking up.

I told him.

"How much is it?" he asked.

I said I did not know.

"Can't you read it on the cover?" he inquired crossly.

Thus admonished I searched the cover until I found the price mark tucked away in the hair of the pretty girl picture. When I told the news dealer he tossed the change over the counter. One of the coins rolled on the floor, but I recovered it while the boy read on.

Curious to learn the nature of the book he was reading I glanced over his shoulder at the title.

It was called "The Science and Art of Salesmanship."

Saving What You Grow

Prepared by the Extension Service, State College of Washington

SWEET PICKLES FOR THE LADIES

Sweet cucumber pickles may be made by using 1 quart small cucumbers, one-half cup salt, 1 quart water, vinegar to cover, 2 blades of mace, 2 ounce pieces stick cinnamon, 1 cup sugar, 3 ounces mustard seed, and 1 tablespoon cloves.

Wash small uniform cucumbers. Put them in a brine of 1-2 cup salt to 1 quart boiling water for three days, then drain and place in fresh water for 8 hours. Dissolve 1 level tablespoonful alum in one gallon boiling water. Pour over cucumbers and let stand 6 hours on back of stove. Must not boil. Then drain from alum water and throw in cold water. Line an agate lined kettle with grape leaves and arrange cucumbers in layers. To 1 quart of vinegar add 2 blades of mace, and a few sticks of cinnamon, 1 cup sugar, 1 tablespoon cloves, 3 ounces mustard seeds. Pour this over the cucumbers and boil for 10 minutes. Fill jars and seal at once. May be used in three months.

Ripe tomato relish as recommended by Mrs. Fred Bell of Snohomish is made by using one peck of ripe tomatoes, peeled, chopped fine, and drained in jelly bag over night. Mix together well with the chopped tomatoes, 3 pounds brown sugar, 1 cup white mustard seed, 1-2 cup salt, 4 teaspoons cinnamon, 1 teaspoon chili powder, 4 red peppers (chopped), 2 cups celery (chopped), 2 cups onions (chopped), 2 teaspoons red pepper, 3 pints vinegar, not too strong, 1-4 teaspoon paprika. Seal in jars, do not cook.

To make a well recommended picklilli, use 2 quarts green tomatoes, 2 quarts cabbage, 1 quart onions, 2 green peppers, 3 red peppers (sweet), 1 cup salt, 4 cups brown sugar, 1 teaspoon pepper, 2 tablespoons mustard seed, 2 tablespoons mustard, 1 1-2 tablespoons paprika and 2 quarts vinegar.

Chop the vegetables, sprinkle them with salt and let stand over night. Drain and press out as much liquid as possible. Pour on the vinegar, add sugar and spices. Boil about 1 hour. Pack in hot sterilized jars. Adjust covers. This mixture may be boiled from 1 1-2 to 2 hours slowly without sprinkling with salt and standing over night.

SUMMONS

In the District Court of the Second Judicial District of the State of Idaho, in and. for the County of Latah.

Anna Burns, Plaintiff, vs. John Burns, Defendant.

The State of Idaho sends greeting to the above named defendant:

You are hereby notified that a complaint has been filed against you in the District Court of the Second Judicial district of the State of Idaho, in and for the county of Latah, by the above named plaintiff, to procure a decree of divorce on the part of the plaintiff on the grounds of willful neglect and to procure the custody, care and control of a minor child, George Meacham Burns.

And you are hereby directed to appear and answer the said complaint within twenty (20) days of the service of this summons, if served within said judicial district, and within forty (40) days if served elsewhere; and you are further notified that unless you so appear and answer said complaint within the time herein specified, the plaintiff will take judgment against you as prayed in said complaint.

Witness my hand and the seal of said District court, this third day of July, 1923.

Biliousness and Constipation

"For years I was troubled with biliousness and constipation, which made life miserable for me. My appetite failed me. I lost my usual force and vitality. Pepsin preparations and cathartics only made matters worse. I do not know where I should have been today had I not tried Chamberlain's Tablets. The tablets relieve the ill feeling at once, strengthen the digestive functions, helping the system to do its work naturally," writes Mrs. Ona Potts, Birmingham, Ala.—For sale at Clarks' Drug Store.

One Dollar Saved Represents Ten Dollars Earned

The average man does not save to exceed ten per cent of his earnings. He must spend nine dollars in living expenses for every dollar saved. That being the case he cannot be too careful about unnecessary expenses. Very often a few cents properly invested, like buying seeds for his garden, will save dollars outlay later on. It is the same in buying Chamberlain's Colic and Diarrhoea Remedy. It costs but a few cents, and a bottle of it in the house often saves a doctor bill of several dollars.—For sale at Clarks' Drug Store.

DEVILFISH CAUGHT LIKE FLIES OFF CALIFORNIA

Devilfish are being caught at Santa Cruz, California, like flies in a trap, and the tentacles are being shipped to fish markets in San Francisco, New York, and other cities where they are sliced and sold at from fifty to sixty cents a pound, according to C. B. Florence, secretary of the California State Fish exchange. Mr. Florence says the sliced octopus tentacle makes a succulent table delicacy when properly fried.

While fishermen emulate Victor Hugo and other writers of fiction by telling of terrific battles with giant devilfish, usually ending with explaining how the fish reached one of its eight arms above the water and wrapped it around the boat, breaking the craft in two, Mr. Florence and Professor Harold Heath, department of zoology, Stanford University, California, state that this is physically impossible. Professor Heath describes the octopus as being "of a shy and retiring disposition."

"The devilfish has no bones or no structure of any kind," says Mr. Florence, "it cannot swim, but can only float on the water, or propel itself on the floor of the ocean by menas of fastening its suckers on a rock and pulling itself along. Each of the eight tentacles is covered with cup shaped suckers, and these form a vacuum when fastened on an object. Fishermen haul them out of the traps with their bare hands and throw them in boxes in a manner that is extremely undignified to a fish that has an age-old fiendful reputation of being a 'man-killer and boat-smasher.'

In the picturesque food shops that line the narrow streets of San Francisco's colorful Chinatown, the tentacles of the devilfish may be seen hanging from hooks alongside many other edibles that are strange to the native American. On the floors of the wholesale fish houses here the devilfish may be seen stacked in jellylike heaps, with tentacles, in some cases, extending ten feet across, five feet from each side of the small, egg-shaped head.

The traps at Santa Cruz, where the majority of the devilfish are caught on the Pacific coast, are built like fly traps, only much larger. The traps are made of wire, with a cone-shaped intrance for the octopus to squeeze through in order to reach the bait fixed for him. He has no trouble in entering the ever-narrowing funnel, but finds it impossible to leave. Usually, fishermen state, two or more are caught in the same trap.

Instead of being a fighter, the devilfish protects itself from attack by changing its color and hiding from its enemy, according to Professor Heath. He says:

"To angility and naturally acute senses should be added their surprising ability to change their color to harmonize with that of their surroundings, so that prey and enemies alike are usually unaware of their proximity. This color change is based upon minute leastic sacs filled with pigment and supplied with muscles for causing their expansion.

"As a devilfish crawls about on the sea bottom its color can be seen to change in a twinkling from deep chocolate through dull red and to grey. If sand is encountered on the journey the skin is usually thrown into lumps and ridges, so that under all conditions the body is practically invisible."

However, if Professor Heath's opinion of the devilfish as a food is heeded, the fish will continue to be eaten by its celestial admirers and by a limited few who crave the unusual. Properly to place before the American epicurean a dish of tender octopus, Professor Heath says, something must be done "to destroy its rubber-like consistency."

Boys Found With Gun

Two Moscow boys, about 14 years of age, one a Canham boy and the other Carrico, were picked up Tuesday evening by Policeman Olson, with a .22 revolver in their possession, which they had been firing within the city limits. The matter was called to the attention of Probate Judge Nelson, who suggested that the boys be allowed to go home for the night and he would talk to them the next day. It did not seem to be part of the plan of the boys, however, to go home, and they have not been seen since. It is supposed that it had been their intention to leave home and that they had secured the revolver to carry as a weapon. The revolver was purchased at a local hardware store.—Star Mirror.

Both the above-named lads were formerly residents of the Genesee section.

WM. SCHLEUTER SAYS 160 ACRES OF LAND IS ENOUGH

(Continued from first page)

and it goes without saying that he usually "tops the market."

A Flock of Hens

We next visited his poultry house. This is another inconspicuous but substantial building which houses his fine flock of white Leghorns. He supplies these birds with plenty of succulent feed the year round, in the spring and summer with green pasturage and in the fall and winter with vegetables. Every few days he has a case of eggs to deliver to Genesee and as a result his store bills never worry him at all. He hasn't any. A well filled can of cream usually accompanies the case of eggs, which also helps some. He has a cream separator and his hogs get the skimmed milk from it. This does not result in any apparent injury to them. He somehow seems to get eggs when other folks are not so lucky.

Then we went to the garden. I didn't know what this Palouse country was capable of until I saw that garden. He grows hundreds of sacks of carrots and potatoes every year. These he stores in his root cellars and in the basement of his house for use in the wintering months. He cooks the potatoes in the big vat, mixes some cracked wheat with them in the proportion of one part wheat to five or six parts of cooked tubers and there he has a feed fit for the swine of a king. With this concoction he brings the hogs up to 200 within a month or so of marketing time and then he feeds them to a proper finish.

The Source of Water

I noticed a small hillock up on top of the hill which surrounds his garden and we climbed up to where it is. Of course it was his reservoir, which holds about 100 barrels. Down at the bottom of the hill stood a windmill with a tower high enough to reach up into eternally-blowing southwest breeze. It was working with might and main to push the water from the never failing well up into the concrete tank, from which it is distributed under gravity pressure all over the premises. Wherever water is needed there is a hydrant and also a drinking cup conveniently located for use at any time.

Above the garden are the orchard and berry patches. The finest fruits grace his table at all times of the year and add zest and enjoyment to every meal. They are home-produced, home-canned, home-preserved and home stored. The roomy concrete basement under the entire house affords plenty of storage room for all purposes. A dumb waiter is always at hand to lift these products to a point between the kitchen and the dining room above. This basement is entirely frost proof.

Flowers About the House

Flowers will grow in the Palouse country, too, if given an opportunity. Of course they need a little weeding now and then during the long dry season, but the windmill, the reservoir, a rubber hose and a sprinkling fountain take care of that with very little trouble to the proprietors of the beautiful home.

Needs Only a Quarter

I asked Mr. Schleuter once why he did not buy some more land. His reply was that he does not need it and would not know what to do with it if he had it. Now what do you think of that? And he owns only one little old hundred and sixty! Suppose there were a family living on each quarter of land in this Palouse country and each farm was worked like this one is worked that I have described. Would this country not be different from what it is?

His home has every comfort and convenience. If the reader of this article could visit there and inspect his library, the title of the books to be found would bring no blush of shame because of having counted the Schleuter's among his friends. They have been wisely chosen and are cultural as well as vocational. The periodicals that come to his reading table show that these people are in touch with the higher things in life and that they take a genuine interest in the affairs of their adopted country, to which they are as intensely loyal as any native born.

There is a striking significance in all this that wheat growers might well consider. A great slump came to the farming business of the United States and especially to this garden spot of the globe, the far-famed Palouse country, in 1923.

The blow did not fall upon the Schleuter ranch. It hit the big wheat ranches that lie all around him and hit them hard.

I wish some of the agricultural classes in the University of Idaho and in the State college of Washington could visit the Schleuter ranch and see the practical workings of what they study and teach. Here is no get-rich-quick scheme, no life of ease, no round of pleasure, if idleness is pleasure, and nothing spectacular. Everything about the home is the work of this industrious couple. Their lives have literally gone into it and it is a monument to their untiring industry and to the dreams of their youth. It has not been built in a day, nor a week, nor a month, nor a year.

On the ranch there is a place for everything and everything in its place. Machinery is not left to depreciate in the fields for lack of shelter. A suitable shelter is provided for everything. Mr. Schleuter is his own concrete man, his own mason, his own carpenter, his own plumber and his own boss. There is no plaster on his ranch in the form, of mortgages or notes or store bills.

What does he care whether the weather is cold or warm in the winter? He doesn't have to be exposed to its inclemencies. Neither does his stock.

I've told the rock-ribbed and everlasting truth about this matter of diversified farming in the Palouse country and I have seen how it works through a period of more than ten years. The last decade has included years of prosperity and years of adversity, but through them all this ranch has shown a steady profit. Take that example for what it is worth, put into your old pipe and smoke it, Mr. Wheat Raiser. All I wish is that there were many more ranches run like the one I have been describing. There wouldn't be so many folks right now feeling hard times so keenly.

Begin Threshing

Threshing has begun on the Clarkston Flat west of Clarkston Heights, the threshing rig of Joe Polumsky, of Peola is heading and threshing grain on the E. D. Blakeley ranch and has been enjoying a good run since starting last Friday, up to Monday when the rains interfered.

Mr. Polumsky reported that the yield is around 25 bushels to the acre or a little above 11 sacks to the acre. None of the grain has been weighed yet but it is estimated to run 135 to 140 pounds to the sack.

The scale of wages is practically the same this year on threshing rigs as last year being $4.50 per day for box drivers, and $6.00 for the sack sowers and others around the machine running in proportion. The separator tender receives the highest wages.

Mr. Polumsky's is one of the few old fashioned rigs that heads and threshes and the latter part of this week he expects to move the outfit to the lower part of the Peola country, where a complete season's run is offered. The threshers will work from the lower Peola flat back towards the foot hills of the Blue mountains ending the run late this fall. —Clarkston Republic.

Gone Camping

Mr. and Mrs. Geo. Follett and Mr. and Mrs. W. E. English left Sunday for a two-weeks outing and camping trip to Twin Lakes.

The Same Everywhere

The editor of Paisa Akhbar, a native newspaper of Lahore, India, says, "I have used Chamberlain's Colic and Diarrhoea Remedy many times among my children and servants, for colic and diarrhoea and always found it effective.—For sale at Clark's Drug Store.

GOODYEAR Service Station

THERE *is a* difference in tires. Only the new Goodyear Cord Tire is made of highest-grade, long-staple, high-tensile cotton, built up by the Goodyear patented group-ply method, and equipped with heavier sidewalls and the beveled All-Weather Tread. The difference shows in the Goodyear's longer wear and lower cost per mile.

As Goodyear Service Station Dealers we sell and recommend the new Goodyear Cords with the Beveled All-Weather Tread and back them up with the standard Goodyear Service

THE GENESEE NEWS

VOL. XXXV GENESEE, LATAH COUNTY, IDAHO, FRIDAY, AUGUST 3, 1923. NO. 5

SEMI-LOCAL NEWS CLIPPED FROM EXCHANGES

Heavy Wheat Harvest

In spite of heavy rain and hail damage, the Lewiston country and Palouse region will harvest the heaviest grain yield ever known. It is estimated that 40 bushels to the acre will be the average crop.—Lewiston Banner.

1,000 Sacks from 95 Acres

M. J. Crabb secured something over 1,000 sacks of wheat from 95 acres of land on the Clarkston Heights, the harvesting of which was finished today by the Grimm Bros. Most of the grain has been placed in the warehouse in Lewiston. Mr. Crabb contracted his wheat some time ago for 85 cents a bushel. It was of the Turkey Red variety and was graded No. 1.—Lewiston Tribune.

Slightly Warmer

Some hot days have been on the calendar of the past week—in fact, all of them could be so classed. The mercury hangs between 95 and 100 every afternoon, while one day saw it go to 103 in town and 108 at the depot. Also it was about the first week of the season without any rain, so that everything is getting pretty dry and dusty. It's good growing weather, however, as corn and watermelons are thriving under the beating rays of old Sol.—Kamiah Progress.

Small Chance To Play Even

At the beginning of the harvest the prospects for returns from the fall wheat at 40 cents of better with the spring wheat yielding in proportion seemed within the range of possibility. A large acreage of barley is already bound and shocked. The yield will be heavy. Smut conditions will reduce the wheat yield. Some localities run almost half smut. This and the low price gives the farmer no chance to play even.—Colton News-Letter.

School Bonds Carry

At the bond election held at the school house, Wednesday, afternoon, 22 votes were cast. 20 were for the bonds and 2 against. The bonds are for the purpose of improving, repairing and enlarging school grounds, building and equipment, bonding the district in the sum of $2,000 payable on the amortization plan for the period of years not to exceed twenty from date of issuance.—Kendrick Gazette.

Wheat Hends Unusually Large

County Commissioner Columbus N. Clark, who has farmed extensively in the Palouse country for many years is in Moscow from his farm near Julietta, and states that in his opinion the wheat crop which is just ripening will be the biggest harvested since 1907, and will come pretty close to the 1907 yield, when 50 bushels to the acre was not unusual, and not a few crops went 60 bushels or more. The growth of straw this year is greater than in 1907, Mr. Clark states. The wheat yield will be somewhat reduced by smut, he states, but not to the extent that many seem to think.

One of the noticeable things about this year's crop, Mr. Clark says, is the length of the heads, the average heads containing from one-fourth to one-third more grains than for the past several years. Last year and the year before it seems to the head seemed to be about the average, while this year there are few heads that have less than 75 grains and in almost every handful of wheat that can be grabbed out of the field without selecting, a number of heads will be found which have 100 grains.

Mr. Clark called attention to the abnormally heavy cost of harvesting this year, estimating the cost of putting the grain in the warehouse, after it is in the sock, at more than 40 cents a bushel, and sacks are costing 14 and 15 cents, to say nothing of the high price of labor. The harvest will be unusually long, because of the large amount of straw to handle and this, coupled with the fact that the grain is ripening a little later than usual, will mean that harvest will probably run through the month of September.—Star-Mirror.

NEZPERCE TRIBE GROWS SMALLER

Supt. O. H. Lipps of the Nez Perce reservation has completed taking the census of the Nez Perce Indians for the fiscal year ending with June 30, which shows a decrease of 82 members of the tribe residing on the reservation since the taking of the census last year.

June 30, 1922, the number of Indians on the census rolls was 1,497. Births the current year were 22 (11 boys and 11 girls). In the same period there were 37 deaths (15 males and 22 females.) Forty-three were dropped from the tribal rolls on account of being of mixed blood and not being born on the reservation or recognized by the Nez Perces as Indians and non residents. The total number enrolled on the lists when the figures were compiled was 1,415—689 males and 726 females.

From these figures it will be seen that the death rate continues to exceed the birth rate as has been the case for a number of years. Last year the births were 45 and the deaths 62, giving an excess of deaths over births of 17. This year the excess of deaths is 15.

The decline of the tribe can be judged by the fact that Lewis and Clark estimated the number of Nez Perces at 7,850, and Father Cataldo states that they numbered about 5,000 when he first came among them in 1868.

Tuberclosis made its first appearance in the tribe in 1872 and since that time the number has been steadily decreasing. When the allotment schedule was approved in 1895, trust patents were issued to 1887 Nez Perces, which was 472 more than there are now alive, a decrease of 25% in the 28 years intervening. A low birth rate and a high death rate is the cause of this abnormal decrease. Had the Nez Perces increased in the same proportion as the white race, their number now, estimating from the time of their allotment 28 years ago, should be about 3,000, or more than twice their present number.—Kamiah Progress.

Good Time to Cut Weeds

There never was a better time for people to mow down the noxious weeds about town, rake them up and burn them. They are not far from the ripening stage, and since the weather is good and hot it only requires a day or two until the weeds are dry enough to burn up, and thus get rid of thousands of seed. Besides, if the weeds are cut down in some portions of the town, it would give people an opportunity to more easily use some of the walks. It is mighty easy for weeds to get the better of the situation, when the weather is so warm that a person is more inclined to seek the shade rather than look for the work especially when that work is simply the destruction of weeds.

The above recommendation can very easily be applied to Genesee with good results as there are many places where the weeds are not only abnormally rank on vacant lots but they are overlapping sidewalks and much complaint is the result. It is up to the owners and occupants of property to see to it that the weeds along their abutting property are cut and out of reach of women's skirts, at least—and now is a good time to get busy.

Good Yield of Wheat

Threshing reports are beginning to reach Spokane banks and indicate that the output of the separators is fully up to the expectations based on pre-harvest estimates.

The Spokane and Eastern Trust company has a report recently from Grant county of the wheat yield of 28 bushels to the acre from an 80-acre field. Other reports received in Spokane show a heavy yield.

Have Gone Fishing

Rev. A. F. Wolff and family left Tuesday morning for a fishing trip to some of the lakes to the north, the exact one not having been fully decided upon at the time of his departure. They expect to be gone 10 days or two weeks.

The talkative man is heard by many people and remembered by few.

Bielenberg-Schooler Post The American Legion Meets Each First Wednesday In June, July and August

American Legion interest is centering around the department convention to be held at Coeur dA'lene next week. Already Legionaires in north Idaho are sensing the opportunity that will be afforded to them to be present at a sidewide meeting of their comrads.

Lester A. Albert will open his offices at the convention city on August 4, where he will handle matters pertaining to the convention. Coeur d'Alene is making every effort to stamp this convention in the minds of the visiting ex-service men as the finest yet held.

The auto caravan from south Idaho is scheduled to be in Lewiston on the evening of August 7. Originally it was planned that the caravan would go by way of Uniontown, Pullman and Colfax, but every effort is being made by the Genesee, Moscow, and Lewiston posts to have it routed over the North and South highway, thus causing it to pass through Genesee and Moscow. Advices from south Idaho indicate that Genesee will be on the route.

The Lewiston 40 et 8 is making elaborate plans for the convention. Not less than 50 of the "box car" organization will make the trip to the convention city. A complete and accurate replica of the French box car has been constructed and will be one of the features of the caravan and parade.

Upon assurance that the caravan will be routed through Genesee, the merchants and other citizens will be asked to display the flag and other decorations on August 8, so that the south Idaho contingent may be impressed with the city's welcome as they journey through it.

The Labor Situation

That the labor situation has become pretty much of a problem is not to be denied and farmers are making every effort to get men to take care of their crops.

The News has received word from Moscow that a free labor bureau is being maintained at the Farmers' store in that city for the farmers of Latah County.

The management asks that the farmers get together and decide upon about how many men they will need, then select a spokesman who will make arrangements and notify the bureau at Moscow. This will simplify matters considerably and it is hoped will be the means of getting the necessary help for the farmers.

A local bureau has been placed at the office of W. W. Burr, where farmers may list the number of men wanted or where laborers may list their names when they want work. It is all free.

Johnny Again On "Bullet"

Johnny Roberts has again taken charge of his beloved "Bullet" and is guiding its destination safely down the winding way between Genesee and Pullman. He was afraid that the runners thereof might get rough with it and have it out of commission in a short time, so he came back and took charge on Sunday. His many friends here are glad to see his pleasant physog gracing the Bullet.

Mr. Roberts says Mrs. Roberts is getting along nicely after an operation at the Mayo hospital some time ago, and Johnny's friends rejoice with him.

Tuesdays Enetrtained

The card club was entertained last Tuesday at the home of Mrs. Chas. W. Smith. The party was held on the lawn and pinochle was played at four tables. Punch and candy were served throughout the afternoon.

The invited guests were Mrs. F. J. Niemann, Mrs. Milton Rader, Mrs. Frank Hoorman, Mrs. Mahlon Follett, Mrs. Thomas A. Feeney, Mrs. R. S. Sullivan and Mrs. Jack Barnes.

Mrs. Fred Nagel won the honors of the afternoon.

There will be no more meetings of the club until the first of October.

The self made man is often all self.

THE FORD FOR PRESIDENT BOOM NOW ON

By Jim Marshall

All aboard for the Ford-For-President Special. Look out for the chuck holes; a new spring costs about fifteen bucks. Organize your own Ford club. No trouble at all—you can get standard parts at any garage.

Henry was going to be the republican candidate, but Luddie Boy hit a flivver the other day. Now Hank's off the G. O. P. for life. So maybe he'll be a democrat. He believes in democracy. He's been throwing plutocracy and the proletariat together for years.

The Ford policies include planetary transmission for the mails, speedometers for all the senators, priming plugs for the congressmen, a gyp-sy top for the capitol, and an extra leaf in the rear spring.

If he puts in two extra leaves, we'll vote for him. For three extra leaves we'll vote twice.

Everybody kids Henry, but he never gets rattled. The car does all his rattling for him.

The first law he'll want is a law against cruelty to flivvers. Rule 1: Not more than ten relatives or fourteen human beings allowed aboard any one car. Rule 2: Cars will not be allowed to boil the radiator for more than ten miles without a drink. Rule 3: Baling wire barred for repaires.

Henry's not so very radical, but you ought to see some of the rear wheels. They're wobbly.

Opposition says nobody who rides in flivvers will vote for Ford. They're all sore.

Lizzie's dad made the Ku Klux Klan mad at him. He had everybody looking under the hood.

It has been estimated that the nation saved $1,674,876.29 in the last ten years, due to Ford crankers being unable to sign checks.

When Henry's president he'll guarantee the nation against war for one year, providing reasonable care is used and the differential kept lubricated properly; guarantee not to apply to extra equipment like the league of nations, the world court or foreign loans.

Directly Henry's nominated his platform will be a solution of the three major problems worrying the American people:

(1) How to get enough money to make the first payment;

(2) How to make it start in cold weather;

(3) How to take the squeaks out of the doors and fenders.

One of the floorboards in Hank's platform will be 18 miles to the gallon or your money back. Another is free parking space anywhere and priority road rights over automobiles.

Nation's due for a shakeup, some folks say. All wrong. It's been shaken up since the first flivver scared a horse. What Henry wants to do now is put in another foot pedal, so nobody'll be able to kick.

Ford has a plan to stop all the knocking, too. He'll make every owner clean the carbon out of the cylinders once a week.

Congress is due to be depopulated and the reform crowd wiped out. Henry'll need all the nuts for his cars.

You'll see pieces in the paper like this: "The laws plant at Washington broke all production records last month, with 25,465 new laws turned out. New automatic machines now being installed will almost double the capacity of the plant. Ford put congressmen's wages up $1 a day and reduced their hours to forty a week. A corps of breath-sniffers from Detroit plant caught 72 hooch-inhalers at the doors. They were docked a day's pay each. One of the laws provide for a fine and imprisonment for monkeying with the carburetor."

Honk! Honk!

Buys 17000 Grain Sacks

William Boxarth, among the leading farmers in Idaho, and whose crop near Culdesac embraces about 1000 acres, placed an order recently for 17,000 sacks, for the 1923 harvest. Mr. Bozarth remarked that his crop will measure up to the 1916 production, when his grain returned 35 bushels an acre and fall grain 45 bushels.

MILK CONSUMPTION AND PRODUCTION INCREASE

How much whole milk do you consume? In 1922 nearly 103 billion pounds of whole milk was used, according to the United States Department of Agriculture. Much of it was used in the manufacture of butter, cheese, ice cream, milk chocolate, and other milk products. But 47 billion pounds were consumed in milk. In 1921 the quantity of whole milk used was about 99 billion pounds, including 45 billion pounds consumed as milk.

We are becoming a milk drinking nation, which fact, whether or not accountable for by prohibition, is interesting—especially to the dairyman. In many ways we see about us evidences of this increase in milk consumption, and reasons for this increase. Milk, even more than ever is being advocated by physicians as health food, and in some cases as a curative. The number of people who are taking the "milk diet" is large; and milk is becoming, even more than formerly, a favorite beverage with meals. Advertising has played no small part in the increase for who can fail to note the fact nowadays that one quart of milk is equal to so many calories or so much beef steak. And what is before our attention constantly, we gradually accept.

The increase in consumption in 1922 over 1921 was largely noticeable in the city, for, according to the department's figures, two gallons per capita was the increase for the city folks while there was no increase in the rural communities.

Milk chocolate likewise is becoming more popular for there were 100 million pounds of whole milk used in its manufacture in 1922 as compared with only 40 million pounds in 1921.

There are two ways of meeting this increasing demand for milk; first, more cows; second, greater average production per cow, and according to statistics both are on the increase. On Janurary 1, 1923, the number of cows on farms was estimated at 24,430,000 as compared with 24,082,000 on Janurary 1 1922. To the average of these two figures is added 1,250,000 cows in towns making a total of 25,595,000 milk cows producing about 103 billion pounds of whole milk, or an average production per cow of 4020 pounds at the present time, as compared with 3945 pounds in 1921.

If this rate of increase continues, milk will soon be the national drink. Long livb the cow!—Western Breeders Journal.

M. E. Lewis Goes to Spokane

M. E. Lewis, state senator from Idaho, expects to remove to Spokane about August 1, where he will be actively engaged as vice president of the federal farm loan bank and his friends of this section of the country will congratulate him upon learning of his appointment.

The work of Mr. Lewis will have to do for the present with the intermediate credits bank, which is just now beginning to make loans, and which already has requests for $2,000,000 from Montana and an equal sum from Washington. The purpose of the bank, which is a discount bank, is to furnish credit for the farmers, and a heavy demand is expected as soon as wheat begins to move.

Senator Lewis and his family have made their home in Moscow for 20 years, coming here from Iowa. During all of the time he has lived here he has been active in business and political affairs. In 1907 he became identified with the First Trust and Savings bank of this city, as vice president, which position he held until his resignation a few weeks ago to accept the vice presidency of the federal farm loan bank. He has also been engaged in the insurance, loan and real estate business. His son, E. L. Lewis, is associated with him and will have charge of the business in the future.

Sells First 1923 Wheat

The Waikiki farms of Spokane recently won the distinction of marketing the first load of 1923 wheat, selling a big truckload of the wheat to the Boys Conlee company of this city. The wheat tested 62 pounds to the bushel, running about four pounds higher than the first receipts a year ago.

WHAT HAPPENED HERE TWENTY YEARS AGO

With this issue the News starts on the fifteenth year of its existance.

The county commissioners have recently purchased a counting machine for the auditors office. This is a very valuable and necessary addition and will save the labor of one man.

A party consisting of Rev. W. C. Fowler, A. Scroggin, George W. Daggett, and J. Rosenstein left overland Tuesday morning for Cheney near which place they will go into camp for several days and devote their time to fishing.

Messrs. Bressler, McRoberts, Thatcher, and McMahon returned Sunday from their trip to the timber in the Lost lake section. They report an ideal outing the weather being fine during their entire absence. They found fishing to be good.

The local train got tangled up with a cow between Johnson and Colton Friday and as a result did not reach its destination until 9 o'clock the following morning. The engine was derailed and it required the assistance of a helper engine to get it back on the track again. A majority of the passengers hired livery rigs and drove up.

Henry Beechler a son of Mr. and Mrs. M. Beechler of this place, died recently at his home at St. Louis. He had undergone an appendicitis and an operation had been preformed from which he had failed to rally. In response to a message announcing his serious illness, Robt. Beechler left but a few days before he died.

"The Face In the Fog"

Not in some time has a motion picture come to the Genesee with so distinguished a cast as "The Face In the Fog," the attraction at the opera house Saturday night.

Playing the leading role is Lional Barrymore, brother of the famous John and Ethel and one of the most talented and best known players on the American stage and screen. Screen lovers will remember with pleasure Mr. Barrymore's splendid work in "The Copperhead" and "Boomerang Bill." In "The Face in the Fog," Mr. Barrymore has a role of "Boston Blackie," one of the favorite crook characters of fiction.

Seena Owen, the blond star, always a welcome figure on the screen, plays the chief feminine role opposite Mr. Barrymore, that of an expatriated Russian princess. Mary McLaren, former Universal star and last seen as leading lady for Wallace Reid in "Across the Continent," has the sympathetic part of "Mary," wife of "Boston Blackie."

This is one of the best detective stories that has ever been written and will be appreciated by fans who especially admire that sort of play—and it will keep every one in the audience guessing from the opening until the end.

News Is Scarce

News is about as scarce around Genesee as the proverbial hen's teeth, and that's no josh. About the only thing that is happening these days is the preparation being made by the farmers for harvest and threshing.

The hay crop is pretty well taken care of and threshing rigs are being put in shape. Binders have been working for the past week and things are moving along in a way that makes everybody feel happy.

Death of Mrs. Barr

Mrs. Harvey Barr, wife of Contractor Barr, who is doing gravel work on the highway, passed away a a Moscow hospital Sunday morning at 3 o'clock, after an illness extending over several weeks. Besides her husband she leaves three small children, the oldest being nine years of age.

Burial was made in the Colfax cemetery on Tuesday.

Telephone Poles Splintered

The lightning got busy last Friday afternoon during the electric storm and splintered five telephone poles for "Tiny" Flomer—and all he had to do was to take a few of them on his back and go to the seat of trouble and replace them. Several phones were also put out of business.

MY LADY'S MONEY

An Episode in the Life of a Young Girl

By Wilkie Collins

INSTALLMENT NO. 12.

"What! the scoundrel who was struck off the roll of attorneys years since? Is he still alive?"

"Alive and prospering. He lives in a court or a lane running out of Longacre, and he offers advice to persons interested in recovering missing objects of any sort. Whether you have lost your wife or lost your cigar-case, Old Sharon is equally useful to you. He has an inbred capacity for reading the riddle the right way in cases of mystery, great or small. In short, he possesses exactly that analytical faculty to which I alluded just now. I have his address at my office, if you think it worth while to try him."

"Who can trust such a man?" Mr. Trop objected. "He would be sure to deceive me."

"You are entirely mistaken. Since he was struck off the rolls Old Sharon has discovered that the straight way is, on the whole, the best way, even in a man's own interest. His consultation fee is a guinea; and he gives a signed estimate beforehand for any supplementary expenses that may follow. I can tell you (this is, of course, strictly between ourselves) that the authorities at my office took his advice in a government case that puzzled the police. We approached him, of course, through persons who were to be trusted to represent us without betraying the source which their instructions were derived, and we found the old rascal's advice well worth paying for. It is quite likely that he may not succeed so well in your case. Try the police, by all means, and if they fail, why, there is Sharon as a last resource."

This arrangement commended itself to Mr. Troy's professional caution. He went on to Whitehall, and he tried the detective police. They at once adopted the obvious conclusion, to persons of ordinary capacity—the conclusion that Isabel was the thief.

Acting on this conviction, the authorities sent an experienced woman from the office to Lady Lydiard's house to examine the poor girl's clothes and ornaments before they were packed up and sent after her to herauntt's.

The search led to nothing. The only objects of any value that were discovered had been presents from Lady Lydiard. No jewelers' or milliners' bills were among the papers found in her desk. Not a sign of secret exravagance in dress was to be seen anywhere. Defeated so far, the police proposed next to have Isabel privately watched. There might be a prodigal lover somewhere in the back-ground, with ruin staring him in the face unless he could raise five hundred pounds. Lady Lydiard (who had only consented to the search under the stress of persuasive argument from Mr. Troy) resented this ingenuous idea as an insult. She declared that if Isabel was watched, the girl should know of it instantly from her own lips. The police listened with perfect resignation and decorum, and politely shifted their ground. A certain suspicion (they remarked) always rested in cases of this sort on the servants. Would her ladyship object to private inquiries into the character and proceeding of the servants? He ladyship instantly objected in the most positive terms. Thereupon the "inspector" asked for a minute's private conversation with Mr. Troy. "The thief is certainly a member of Lady Lydiard's household," this funtionary remarked in his politely positive way. "If her ladyship persists in refusing to let us make the necessary inquires, our hands are tied, and the case comes to an end through no fault of ours. If her ladyship changes her mind, perhaps you will drop me a line, sir, to that effect. Good-morning."

So the experiment of consulting the police came to an untimely end. The only result obtained was the expression of purblind opinion by the authorities of the detective department, which pointed at Isabel, or at one of the servants, as the undiscovered theif. Thinking the matter over in the retirement of his own office, and not forgoeing his promise to Isabel to leave no means untried of establishing her innocence, Mr. Troy could see but one alternative left to him. He took up his pen and worte to his friend at the government office. There was nothing for it now but to run the risk and try Old Sharon.

CHAPTER IX.

The next day Mr. Troy (taking Robert Moody with him as a valuable witness) rang the bell at the mean and dirty lodging-house in which Old Sharon received the clients who stood in need of his advice.

They were led up-stairs to a back room on the second floor of the house. Entering the room, they discovered, through a thick cloud of tobacco-smoke, a small,fat, bald-headed, dirty old man in an arm-chair, robed in a tattered flannel dressing-gown, with a short pipe in his mouth, a pug-dog on his lap, and a French novel in his hands.

"Is it business?" asked Old Sharon, speaking in a hoarse, asthmatical voice, and fixing a pair of bright, shameless black eyes attentively on the two visitors.

"It is business," Mr. Troy answered, looking at the old rogue who had disgraced an honorable profession, as he might have looked at a reptile which had just risen rampant at his feet. "What is your fee for a consultation?"

"You give me a guinea and I'll give you a half an hour." With this reply Old Sharon held out his unwashed hand across the rickety, ink-splashed table at which he was sitting.

Mr. Troy would not have touched him with the tips of his own fingers for a thousand pounds. He laid the guinea on the table.

Old Sharon burst into a fierce laugh —a laugh strangely accompanied by a frowning contraction of his eyebrows, and a frightful exhibition of the whole inside of his mouth. "I am not clean enough for you, eh?" he said, with an appearance of being very much amused. "There is a dirty old man described in this book that is a little like me." Held up his French novel. "Have you read it? A capital story—well put together. Ah, you haven't read it? You have got a pleasure to come. I say, do you mind tobacco-smoke? I think faster while I smoke—that's all.

Mr. Troy's respectable hand waved a silent permission to smoke, given under dignified protest.

'All right," said Old Sharon. "Now, got on."

He laid himself back in his chair and puffed out his smoke. with eye lazily half closed, like the eyes of the pug-dog on his lap. At that moment, indeed, there was a curious resemblance between the two. They both seemed to be preparing themselves, in the same idle way, for the same comfortable nap.

Mr. Troy stated the circumstances under which the five-hundred-pound note had disappeared in clear and consecutive narrative. When he had done ,Old Sharon suddenly opened his eyes. The pug-dog suddenly opened his eyes. Old Sharon looked hard at Mr. Troy. The pug-dog looked hard at Mr. Troy. Old Sharon spoke. The pug growled.

"I know who you are—you're a lawyer. Don't be alarmed, I never saw you before, and I don't know your name. What I do know is a lawyer's statement of facts when I hear is. Who's this?" Old Sharon looked inquisitively at Moody as he put the question.

Mr. Troy introduced Moody as a competent witness, thoroughly acquainted with the circumstances, and ready and willing to answer any questions relating to them. Old Sharon waited a little, smoking hard and thinking hard. "Now then!" he burst out, in his fiercely sudden way, "I'm going to get to the root of the matter."

He leaned forward, with his elbows on the table, and began his examination of Moody. Heartily as Mr. Troy despised and disliked the old rogue, he listened with astonishment and admiration, literally extorted from him by the marvelous ability with which the questions were adapted to the end in view. In a quarter of an hour Old Sharon had extracted from the witness everything, literally everything, down to the smallest detail, that Moody could tell him. Having now in his own phrase, "got to the root of the matter," he relit his pipe with a grunt of satisfaction, and laid himself back again in his old arm-chair.

"Well," said Mr. Troy, "have you formed your opinion?"

"Yes; 've formed my opinion."

"What is it?"

Instead of replying, Old Sharon winked confidentially at Mr. Troy, and put a question on his side.

"I say! is a ten-pound note much of an object to you?"

"It depends," answered Mr. Troy, "on what the money is wanted for."

"Look here," said Old Sharon; "I can give you an opinion for your guinea; but, mind this, it's an opinknow as a lawyer what that is worth. Venture your ten pounds—in plain English, pay me for my time and trouble in a baffling and difficult case —and I'll give you an opinion founded on my own experience.

"Explain yourself a little more clearly," said Mr. Troy. "What do you guarantee to tell us if we venture the ten pounds?"

"I guarantee to name the person, or the persons, on whom the suspicion really rests. And if you employ me after that, guarantee (before you pay me a half-penny more), to prove that I am right by laying my hand on the thief."

"Let us have the guinea opinion first," said Mr. Troy.

Old Sharon made another frightful exhibition of the whole inside of his mouth; his laugh was louder and fiercer than ever. "I like you," he said to Mr. Troy, "you are so devilish fond of your money. Lord! how rich you must be! Now listen. Here's the guinea opinion; suspect, in this case, the very last person on whom suspicion could possibly fall."

Moody, listening attentively, started and changed color at these last words. Mr. Troy looked thoroughly disappointed, and made no attempt.to conceal it. "Is that all?" he asked.

"All?" retorted the cynical vagabond. "You're a pretty lawyer! What more can I say, when I don't know for certain whether the witness who has given me my information has misled me or not? Have I spoken to the girl, and formed m yown opinion? No! Have I been introduced among the servants (as errand-boy, or to clean the boots and shoes, or what not), and have I formed my own judgment of them? No! I take your opinions for granted, and I tell you how I should set to work myself if they were my opinions too; and that's a guinea's worth—a devilish good guinea's worth to a rich man like you!"

(To Be Continued.)

WORLD'S NEWS BRIEFLY RETOLD

Important News of Both Hemispheres Boiled Down to Last Analysis.

Germany's 4th of July has officially been set for August 11. After several years of discussion, the matter has finally been decided by the juristic committee of the reichstag and August 11—the anniversary of the adoption of the Weimar republican constitution which made Germany a republic in fact—has been legally named as a national holiday.

Last August 11, the third anniversary of the birth of the republic, was only half-heartedly observed in Germany, practically all business going on as usual, though a very formal and popless meeting attended by President Ebert and Chancellor Wirth was held in the reichstag.

The rum-running business between "wet" countries and the United States is falling off because many who have ventured into the business have found that the risks and chances of loss are too great. The British customs officials, especially in Clyde ports, are also making it hard for the smugglers by placing every obstacle possible in their way.

The traffic blockade imposed upon the Ruhr by French and Belgian troops has been lifted, allied authorities announced. A serious food shortage resulted from imposition of the blockade and foodstuffs piled high at the limits of the forbidden zones.

The Lausanne peace treaty ending the Greco-Turkish war was signed here. Ismet Pasha, Turkish representative, was the first signer.

Pancho Villa is reported to have been assassinated. The erstwhile Mexican hero, former bandit and rebel chief, who defied the American government, was reported shot down by his own men near Parral. Villa has lived the quiet life of a farmer during recent years. His name has not figured in Mexican politics lately.

SPANIARDS BROUGHT CATTLE TO NORTHWEST

The first cattle in the Pacific Northwest were brought to Nootka sound during the time that the Spanish government kept an armed force there to maintain Spanish claims around 1790, according to an article by C. S. Kingston in the July number of the Washington Historical Quarterly, just off the University of Washington press.

The Spaniards occupied a site on Nootka sound in 1789, according to Mr. Kingston, and a garrison remained there until 1795. Cattle were brought either from Mexico or California, and seem to have been black in color, Mr. Kingston says. He quotes a description written by Vancouver, the explorer, who arrived in Nootka sound in 1792, as follows:

"The poultry, consisting of fowls and turkies, was in excellent order as were the black cattle and the swine."

Struggles Ten Years for Open Golf Title

After ten years of struggle, Bobby Jones of Atlanta, Ga., long known as the boy wonder golfer of the United States has at last been crowned National Open Champion. He won the title at New York last week. When 12 years old he won a district championship in the South, but until this year was always defeated in National competition.

WASHINGTON NEWS

The statewide contest for the Washington state song, conducted by the State Federation of Women's clubs, will be continued another year. The first plan was for the contestant to produce both the words and music, but the new rules call for submission of poems suitable to be set to music. The song, when adopted, will be the official state song of Washington.

Thomas E. Grady, former superior court judge and member of the state board of bar examiners, stated at Yakima recently that the recent speech of Elmer Smith, Centralia, I. W. W. attorney, would be made the basis for disbarment proceedings. Smith advocated boycotting the lumber industry until "fellow workmen" were released from penitentiaries.

Orientals, especially Japs, will not find it easy to gain entrance to the United States if resolutions passed by the United Spanish War Veterans of Washington and Alaska become effective. The veterans, in convention at Vancouver, will petition congress for a new treaty barring all Japanese from entering this country except on passports.

Prominent educators, business men and newspapermen of the state will appear on the program for talks and addresses at the annual convention of the Washington State Press association at Ellensburg August 23, 24 and 25. On August 23 every industry in the state will be given a place on the program in order to develop unity and better feeling.

Applicants for the franchise for the proposed Wenatchee Southern railway were given until October to file briefs and returns on the number of agreements received to back the road financially, Interstate Commerce Commissioner Aitcheson announced at the conclusion of the hearing that began Monday.

Druggists at the state convention promised to stop sales of illegal preparations and adopted resolutions congratulating Roy C. Lyle, federal prohibition director, for his stand on indiscriminate use and sale of spirits or orange.

In the first year of operation of the Pasco-Kennewick bridge across the Columbia $4,469 vehicles used the bridge and revenues amounted to $25,650, according to a report to directors of the bridge. A three per cent dividend was declared.

C. O. D. Service Popular.

The popularity of the C. O. D. privilege on parcel post packages is indicated by the increase in amount of fees collected by the Postoffice department since the establishment of the service July 1, 1913. During the first year 2,994,600 parcels were mailed C. O. D. from which the government collected $289,460. During the last fiscal year, 30,941,570 parcels were mailed C. O. D. from which the government collected $3,152,150.

Mixed Conclusions

It was Robert's first visit to the Zoo.

"What do you think of the animals?" inquired Uncle Ben.

After a critical inspection of the exhibit the boy replied, "I think the kangaroo and the elephant should change tails."

The state senator stopped his auto on the roadside and asked the young farmer what the politics were in his house.

"Well," said the farmer, "they are very mixed in our house. I'm a republican, my wife is a democrat, and the baby is wet and the cow is dry."

FLAG RESPECT—BY THE RULES

(Suggestion: Either Memorize or File This Article for Future Reference.)

No excuse any longer, buddy, for not knowing your book in the matter of proper respect to the Flag. After 146 years of various conflicting rulings of the Army, Navy and patriotic societies on methods of flag observance, The American Legion brought about this month the adoption of a uniform code to govern civilian usage of the Flag.

Following the recent national conference of 68 patriotic organizations in Washington, a national campaign under Legion leadership has been started in the states to obtain statutes promoting Flag observance. In the conference committee's report, which received the indorsement of the conference delegates, 15 rules for Flag observance were agreed upon, with an equal number of suggested prohibitions which the delegates believed to be irregular usage of the national emblem. Here are the rules:

1. The Flag should be displayed from sunrise to sunset only, or between such hours as designated by proper authority on national and state holidays, and on historic and special occasions. The Flag should always be hoisted briskly and lowered slowly and ceremoniously.

2. When carried in a procession with another flag or flags, the place of the Flag of the United States is on the right, i. e., the Flag's own right; or when there is a line of other flags, the Flag of the United States may be in front of the center of that line.

3. When displayed with another flag against a wall from crossed staffs, the Flag of the United States should be on the right, the Flag's own right, and its staff should be in front of the other flag.

4. When a number of flags are grouped and displayed from staffs the Flag of the United States should be in the center or at the highest point of the group.

5. When the flags of states or cities or pennants of societies are flown on the same halyard with the Flag of the United States, the Flag of the United States must always be at the peak. When flown from adjacent staffs the Flag of the United States should be hoisted first. No flag or pennant should be placed above or to the right of the Flag of the United States.

6. When the flags of two or more nations are to be displayed they should be flown from separate staffs of the same height and the flags should be of equal size. (International usage forbids the display of the flag of one nation above that of any other nation in time of peace.)

7. When the Flag is displayed from a staff projecting horizontally or at an angle from the window sill, balcony or front of building, the union of the Flag should go clear to the head of the staff unless the Flag is at half staff.

8. When the Flag of the United States is displayed other than flown from a staff, it should be displayed flat, whether indoors or out. When displayed either horizontally or vertically against a wall, the union should be uppermost and to the Flag's right, i. e., to the observer's left. When displayed in a window it should be displayed the same way—that is, with the union or blue field to the left of the observer in the street. When festoons or drapings of blue, white and red are used, the blue should be used, but never that the Flag.

9. When displayed over the middle of the street, as between buildings, the Flag of the United States should be suspended vertically in a north and south street.

10. When used on a speaker's platform, the Flag should be displayed above and behind the speaker. It should never be used to cover the speaker's desk nor drape over the front of the platform. If flown from a staff it should be on the speaker's right.

11. When used in unveiling a statue or monument the Flag should not be allowed to fall to the ground, but should be carried aloft to wave out, forming a distinctive feature during the remainder of the ceremony.

12. When flown at half staff the Flag is first hoisted briskly to the peak and then lowered to the half staff position, but before lowering the Flag for the day it is raised again to the peak. On Memorial Day, May 30, the Flag is displayed at half staff from sunrise until noon and at full staff from noon until sunset, for the national lives and the Flag is the emblem of the living nation.

13. When used to cover a casket, the Flag should be placed so that the union is at the head and over the left shoulder. The Flag should not be lowered into the grave nor allowed to touch the ground. The casket should be carried feet first.

14. When the Flag is displayed in church, it should be from a staff placed on the congregation's right as they face the clergyman, with the service flag, state flag or other flag on the left wall. If in the chancel, the Flag of the United States should be placed on the clergyman's right as he faces the congregation.

15. When the Flag is in such a condition that it is no longer a fitting emblem for display, it should not be cast aside or used in any way that might be viewed as disrespectful to the national colors, but should be destroyed as a whole, privately, preferably by burning or by some other method in harmony with the reverence and respect we owe to the emblem representing our country.

A section of the code dealing with the salute to the Flag reads:

"During the ceremony of hoisting or lowering the Flag, or when the Flag is passing in parade or review, all persons present should stand at attention facing the Flag. Men's headdress should be removed with the right hand and held at the left shoulder. Those present in uniform should salute with the right hand salute. Women should stand at attention, facing the Flag, or as the Flag is passing in parade should salute, by placing the right hand over the heart. If the national anthem is played and no Flag is present, all should stand at attention when uncovered and salute at the first note of the anthem, retaining the position until the last note of the air is played. If in civilian dress and covered, men should uncover and stand at attention, facing the music. Women stand at attention and salute."

$10,000 GIFT OF RARE INDIAN BASKETS TO W. S. C.

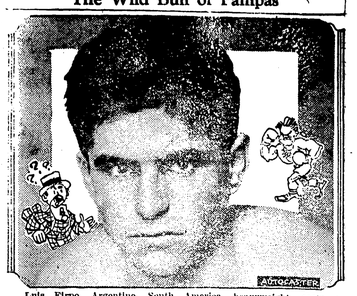
Rare Indian baskets, valued at $9,000 or $10,000 have just been given to the State College of Washington museum of art and natural history by H. C. Stimson of Hollywood Farm, Seattle. They will be known as the Fred S. Stimson exhibit, in memory of the late regent of the college, father of H. C. Stimson.

Mrs. Fred Stimson spent 10 years in personal search and study, which resulted in a collection not duplicated anywhere in the world. Many of the baskets show some of the finest art of the red men, and some are extremely rare, being woven by tribes now extinct.

Among the baskets, which number 150 or 160, are those made by Indians of Alaska, Western Canada, Washington, Oregon, California, Arizona and Nevada, beautifully fashioned in quaint and curious shapes, all sizes and patterns, some decorated elaborately with bird feathers, others with beads, colored grasses and threads. One, the prize of the collection, Mrs. Stimson was offered $2,000 for by another collector who knew that the only other one of the sort in existence is in the Smithsonian institution at Washington, D. C.

Cases for the exhibition of the baskets will be installed in one of the fireproof buildings, probably the Mechanic Arts building where the art department has its studios in conjunction with the department of architecture. The gift is to be boxed, insured, and shipped this summer, to be installed in time for the opening of the fall semester, September 17, when there are always many visitors to the campus who would be interested.

The Wild Bull of Pampas



Luis Firpo, Argentine, South American, heavyweight, casts a threatening shadow over the empire ruled by Champion Jack Dempsey. The grim, serious, never-laughing Firpo has been styled "The Wild Bull of Pampas." His knockout out of former champion Jess Willard in eight rounds makes him the logical opponent for Dempsey in a September battle.

Schedule of Washington Fairs

The dates given below give the time and place for many of the community, county, state and interstate fairs to be held in this state during the season of 1923, and was compiled by the extension service of the state college. We can not always guarantee the dates of some of the smaller fairs for they are subject to change.

Place	Fair	Date
Burlington	Skagit County	August 6—10
Chehalis-Centralia	Southwest Washington	August 20—25
Elma	Grays Harbor County	August 26, Sept. 1
Spokane	Interstate Fair	September 3—8
Port Angeles	Clallam County	September 13—15
Ellensburg	Kittitas County	September 13—15
Mabton	Hay Palace	September 13—15
Republic	Ferry County	September 13—15
Kennewick	Community	September 14—15
Bainbridge Island	Community	September 15
Frances	Community (Pac. City)	September 15
Willapa	Community	September 21—22
Burley	County	September 21—23
Yakima	State Fair	September 17—22
Colville	Stevens County	September 19—21
Dalkena	Pend Orelle County	September 27—29
Lynden	Whatcom County	September 24—29
Granite Falls		September 27—30
Fort Orchard	Franklin County	September 26—2
	Community (Thurston)	September 28—29
South Bay	Community (Thurston)	September 25
Nisqually	Community (Thurston)	September 26
Northwest	Community (Thurston)	September 27
Yelm	Community (Thurston)	September 28—29
Tenino	Community (Pacific)	September 28—30
Menlo	Community (King)	September 26—28
Bothell	Community	September 24—26
Newaukum	Western Washington	September 28—29
Puyallup	Adams County	October 1—7
Ritzville	Community	October 4—6
Oakesdale		October 5—6
Garfield		October 11—13

Apricot Dainties.

Apricot Fluff.

Put about 1 quart cooked apricots through a strainer or colander. To 2 cups of sweetened pulp add the beaten whites of 2 eggs.

Apricot Souffle.

1-2 can apricots, whites of 3 eggs. Drain the apricots and put through a colander and sweeten to taste. Add stiffly beaten whites of eggs and bake in a buttered cake pan about 1-2 hour. Serve with whipped cream.

Apricot Fritters.

6 apricots, 1-2 pint syrup, half lemon, frying batter, and vanilla sauce. Select firm, ripe apricots or preserved ones. Cut in halves and take out stones. Stew gently in syrup to which has been added grated rind of 1-2 lemon. When tender, drain and cool. Have ready frying batter. Dip apricots in batter and then fry in deep fat. When a nice golden brown color, take them up, drain on paper, dish up on napkin and serve with vanilla sauce.

Apricot Tarts.

2 cups flour, 1-2 cup crisco, 4 tablespoons sugar, 1-2 teaspoon salt, 1 egg, 2 teaspoons vanilla, 1 teaspoon baking powder, apricot jam or jelly, whipped cream. Rub crisco into dry indgredients. Break egg in and mix well with fork, then add vanilla. Roll out, cut with cutter and line tins with rounds of pastry. Line with paper and put in some rice or peas to keep paste from rising, bake in hot oven 20 minutes. Remove rice and papers when pastries are cold, put in each one a spoonful of jam or jelly. Fill with whipped cream and decorate with a cherry. Recipe makes about 30 tarts.

Apricot Pudding.

Put 1 pint milk into sauce pan, add 2 tablespoons fat and bring to boiling point. Mix 1-2 cup corn starch with 1-2 cup milk and stir slowly into boiling milk. Add 1-2 teaspoon salt. Heat 1 cup apricot jam and strain off the juice. Stir the pieces of apricot into corn starch and cook 5 minutes. Sprinkle 1 tablespoon nut meats into a wet mold and pour in hot mixture. Turn out when cold and surround with apricot juice.

Apricot Omelet.

Cut 6 preserved apricots into dice, and heat up in a little fruit juice. Beat up 5 eggs, add pinch of salt and 1 tablespoon sugar. Melt in an omelet pan or frying pan 2 tablespoons fat. When hot pour in beaten eggs and stir over quick fire till they commence to thicken, put in the prepared apricots, then shape quickly into an oval form by folding the ends. Allow the omelet to acquire a golden brown by putting it in the oven, turn out on a hot dish, dredge with sugar and serve at once.

4-YEAR SCHOLARSHIP GIFT OF N. E. L. P. A.

A scholarship of a four-year college course is to be given each year by the Northwest Electric Light and Power association to the high school student submitting the best essay on state regulation of public utilities, according to a letter from Norwood W. Beckett of the association recently received by President R. O. Holland of the State College of Washington.

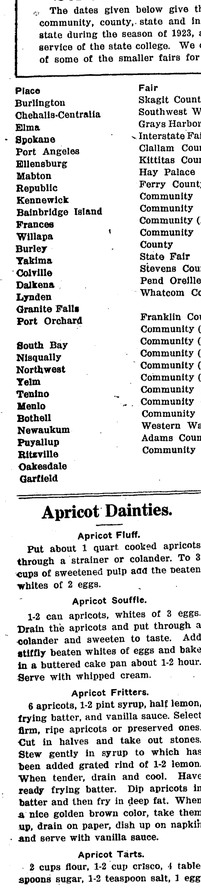
The contest opens this fall, and the judges, to be chosen by State Superintendent of Schools Josephine Preston, will act next June, so that the first scholar will enter college September, 1924.

The scholarship thus established will pay $200 or $250 annually (the sum to be decided by Mrs. Preston) and permits the student to choose any one of the Washington state institutions on higher education.

Reforestration Progress

The work of reforestration made greater progress in 1922 than in any single year since the policy of replanting cut over timber land was inaugurated. During last year over 4,000 acres in the Rocky mountain district were replanted. The largest single operation was in the Minnesota National Forest, where over 1,700 acres were planted in pine. Nebraska replanted nearly 1,000 acres, Colorado over 700 acres, and Michigan approximately 6600 acres. Reforestration is being pushed largely in the productive pine regions. That the work done is but a very insignficant fraction of what remains to be done is shown by the fact that the totni amount of denuded timber land which could be and should be reforested is 1,500,000 acres, and at the rate of replanting as now being conducted it would require over 150 years to reforest this territory.

Cocoa Leading Tone in Fall Frocks



The above creation is featured in Cocoa Satin-faced Crepe, the only trimming being a girdle of bronze beads which catches the left front of circular skirt into a panel. Jenny neck and short sleeves with circular flounce edge, complete this stunning gown. It is topped by a brown felt hat. Amber necklace and brown beaded bag, lend contrast to the outfit.

THE LONG NARROW STREET CALLED "BROADWAY," NEW YORK CITY, FROM THE AIR: REMARKABLE PHOTO OF THE FAMOUS AVENUE OF THE WORLD!

Looking north from the Battery, New York City, as far as the human eye could ever reach, the camera has rivaled its perception. In this photo can be seen the long narrow canyon of commerce and finance, towered by steel mountains built by the science of man—the street called Broadway. From left to right or the photo can be seen a contrast of the old and the new, the small structures and the new steel towers. The circle in the center just below the photo is Bowling Green, and the U. S. Customs House. The Standard Oil Company Building. Looking up, are the American Express Building, the Equitable, Singer, and Woolworth Buildings, a little over towards the right is the Municipal Building and the World Building tower dome.

MENU FOR THE WEEK

SATURDAY

Breakfast.
Apricots
Oatmeal — Sugar and Cream
Fried Corn Meal Mush — Syrup
Coffee — Milk

Lunch.
Cream of Corn Soup — Saltines
Combination Salad — Bread — Butter
Blackcaps — Cookies

Dinner.
Hamburger Loaf — Creamed Potatoes
Spinach — Buttered Carrots — Rolls — Butter
Cherry Pie

SUNDAY

Breakfast.
Orange
Cream of Wheat — Cream and Sugar
Ham — Dropped Eggs on Toast
Coffee — Cocoa

Dinner.
Fried Chicken — French Fried Potatoes
Buttered Turnips — Milk Gravy — Tomato Salad
Rolls — Butter
Apricot Sherbet — Angel Food Cake

Supper.
Cold Meat Sandwiches — Fruit Salad
Iced Tea — Peaches and Cream

MONDAY

Breakfast.
Bananas
Dry Cereal — Cream and Sugar
Scrambled Eggs on Toast — Toast
Coffee — Milk

Lunch.
Potato Salad — Deviled Eggs
Boiled Cabbage — Milk — Butter
Baking Powder Biscuits
Preserves

Dinner.
Veal Stew with Dumplings
Spinach and Egg — Lettuce Salad
Buttered Beans
Bread — Butter — Iced Tea
Peach Shortcake

TUESDAY

Breakfast.
Raspberries
Oatmeal — Sugar and Cream
Waffles — Honey — Bacon
Coffee — Milk

Lunch.
Cream of Tomato Soup — Croutons
Macaroni and Cheese
Bread — Butter — Milk
Peaches — Cream

Dinner.
Lamb Chops — Mashed Potatoes
Creamed Onions — Lettuce and Tomato Salad
Bread — Butter
Banana Cream Pie

WEDNESDAY

Breakfast.
Prunes
Dry Cereal — Sugar and Cream
Fried Ham and Eggs — Toast
Coffee — Milk

Lunch.
Creamed Dried Beef on Toast — Saratoga Chips
Combination Salad — Bread — Butter
Iced Tea — Plums

Dinner.
Swiss Steak — Mashed Potatoes
Asparagus Boiled — Cucumber Salad
Bread — Butter — Iced Tea
Peach Custard

THURSDAY

Breakfast.
Orange
Cooked Cereal — Cream and Sugar
Muffins — Scrambled Eggs — Bacon
Coffee — Milk

Lunch.
Potato Cakes — Sardines
Lettuce and Onion Salad
Bread — Butter
Apple Sauce — Cheese

Dinner.
Boiled Ham — Milk Gravy — Fried Potatoes
Spinach — Bread — Butter
Creamed Carrots
Chocolate Ice Cream

FRIDAY

Breakfast.
Peaches
Dry Cereal — Cream and Sugar
Whole Wheat Hotcakes — Syrup — Bacon
Coffee — Milk

Lunch.
Tomato and Egg Salad
Peanut Butter Sandwiches
Creamed Lima Beans
Apricot Pie

Dinner.
Breaded Pork Chops — Mashed Potatoes
Spinach — Fried Egg Plant
Butter — Rolls
Raspberry Shortcake

Danger!

Guide (in Yellowstone)—"Now, ladies, this phenomenon occurs every three minutes. Maybe you'd like to look down into the geyser before the next eruption."

Mr. Smithers (calling to wife)—"Not you! It's just like you to be late."

The Agricultural Outlook

The committee of economists and statisticians called by Secretary of Agriculture Wallace to consider the foreign and domestic demand for farm products, and particularly the wheat, corn and hog situation, issued the following report Thursday, July 12.

Foreign Demand.

The foreign demand for American foodstuffs during the current marketing season will apparently not be as great as it was a year ago. Unless the foreign situation is very speedily cleared up and a definte turn for the better takes place in Europe, it appears not improbable that Europe will have less buying power in our markets during the next crop year then she had during the last. It needs to be understood that foreign demand is not measured merely by volume of exports. The price at which this demand will be forthcoming is the important consideration.

The principal reasons for the probable reduction in foreign demand are: First, European food production is somewhat larger than last year, due principally to much more favorable crop conditions this year than last, while there is no apparent decline in the output of producing regons that compete with the United States for the European market.

Second: Europe's purchasing power this year is likely to be somewhat smaller than last year. While manufactured exports for the first half year have been appreciably larger than a year ago, the prospect for the second half year is less favorable. There has developed a slight recession of business in leading commercial countries, and the foreign situation has lately been producing serious economic consequences. European earnings from shipping and other services show little improvement, while credits extended to European countries are much below those of a year ago.

Domestic Demand.

In the United States we have had a very high level of industrial activity, distribution, and consumption. With certain exceptions, there is little evidence thus far of any considerable accumulation of goods, either on the shelves of merchants or in the jobbers and producers' hands; and the facts as to the high level of production are clear. It seems clear that the home demand has been near to, if not at a maximum. We can scarcely consume more of wheat and meat and other farm products than we have in the last year or more. The farmer can hardly now expect any immediate increase in the domestic demand. But with the present full volume of employment and high wages, there seems no prospect during the remainder of 1923 for a decrease in domestic demand for farm produce.

Furthermore, our credit position is annually strong and more than equal to any demands which may be made upon it in the crop-moving season. There is no present prospect of any money stringency, or a rise in interest rates sufficient to affect business or the farmer unfavorably.

Changes in general business conditions affect the domestic demand for various agricultural products in differing degrees. Should a depression develop in urban industries it follows, then, that the farmer will feel the effects to some extent. However the probability of a severe depression in th near future seems to be slight. Any lessening in the industrial activity that may occur will, however, doubtless be accompanied by a reduced demand for choice cuts of meat, early vegetables, the more expensive fruits, milk, butter, etc. On the other hand, it will not decrease, but may even increase the demand for the cheaper grades of food.

During the last five years certain forces have combined as to increase the supply that the price level of farm products has been kept below that of prices for other commodities. This situation has generated offsetting forces tending eventually to restore the former equilibrium, thus improving the positon of the farmer. Among such forces is the migration of agricultural population to the city. There has recently been a distinct acceleration in the movement. This movement will, in the long run, add to the urban demand for foodstuffs and will eventually lessen the supply of farm produce, thus tending to establish a more normal relationship between agricultural and other prices.

The Wheat Situation.

The expansion in the wheat area of the chief exporting countries coupled with the decreased buying power of western Europe is responsible for the price situation which now prevails. This committee is less impressed with the immediate wheat supply situation than it is with the future possibilities in case present exporting countries fail to readjust their acreage to offset increasing bread grain production in Europe.

Owing to the world war there was an enormous increase in the wheat acreage of the five principal exporting countries of the world outside of Russia and the Danubian countries. Since the peak of war production these exporting countries have decreased their acreage very slightly and are now growing 28 million more acres of wheat than the pre-war average. In view of the long-time prospects of the return of Russia and the Danubian countries as factors in the world wheat trade, as well as the increase in other exporting countres mentioned above, the American winter wheat grower should take the first positive step this fall to adjust the winter wheat acreage in accordance with this situation. There has been some reduction in the winter wheat acreage of the United States due to adverse weather conditions rather than to a change of planting policy on the part of the producers. However, the expansion remains about 14 million acres above the pre-war average.

The best data available indicate a current wheat crop for the northern hemisphere moderately larger than that for 1922 for the same territory. On the other hand, the carryover stocks for both importing and exporting countries are apparently not greatly changed from last year. The increase represents only a small percentage and might be wiped out entirely or increased by later developments in North American spring wheat or in the 1923-24 coming harvests in Australia and Argentina. Russia will not export grain in large quantities in the immediate future.

The facts that have been presented in this summary of the world agricultural outlook are well known in the trade and have been discounted in the markets.

The statistics in this report were assembled by the Department of Agriculture.

With summer here, be sure your water supply is pure.

NORTHWEST NEWS

The second annual convention of the American Association of University Women was held in Portland with several hundred delegates attending.

Hundreds of tons of scrap tin, collected at British Columbia salmon canneries, are being shipped to San Francisco for manufacture into toys. Germany used to buy this scrap, but no more. During the war and until now it had been a waste.

More than $2,000,000 will pass as the purchase piree of approximately 1,100,000,000 feet of pine timber on 72,000 acres in the Ochoco region, Crook county, Ore., in a deal negotiated a few days ago between the Rogers Timber company and Robert A. Booth, acting for himself and associates.

Ronald Amundsen, famous explorer, is at Wainwright, and will take the first boat for home, en route to the United States via Seattle, according to private advices received here from the explorer himself. The message indicated Amundsen had abandoned for the time being his proposed airplane flight across the polar wastes from Wainwright to Spitzenbergen.

For marketing purposes and to meet actual milling demands the Montana Wool Growers' association have asked for a loan of $2,000,000 from the Federal Intermediate bank of Spokane. The loan, if granted, will bo financed through a new corporation to be organized in Montana and known as the Co-operative Wool Marketing association.

Home-Made Pectin.

Better jelly can be made at a lower cost with home-made pectin, extracted from lemon and orange peelings, than can be made from commercial pectin, according to Miss Martha Dressler of the University of Washington home economics department, whose class in experimental cooking has just completed some experiments with both products. The cost of the jelly prepared by the housewife with home-made pectin will almost surely be less than half the cost of commercial jellies, Miss Dressler believes.

Students in the class estimated the cost of home-made jelly with home-made pectin at 9.3 cents for eight ounces; while it costs 4 cents more or 13.5 to use commercial pectin. An eight-ounce glass of commercial jelly costs 25 cents. These estimates were made when sugar was high, 12 cents a pound, and the cost of eight ounces would now be proportionately lower.

Miss Dressler does not advise the use of either home-made or commercial pectin unless jellies are to be made in large quantities.

A recipe for the preparing of pectin at home may be obtained from a government bulletin on "Home-Made Apple and Citrus Pectin Extracts and Their Use in Jelly Making," issued by the superintendent of documents of the United States Department of Agriculture, Washington, D. C. Miss Dressler warns those who wish to follow this receipt and expect to use dried orange and lemon peelings, to dry these as quickly as possible, with oven heat if necessary, in order to prevent mildew.

Co-operation.

It ain't the guns nor armament,
Nor funds that they can pay,
But the close co-operation,
That makes them win the day.

It ain't the individual,
Nor the army as a whole,
But the everlastin' teamwork
Of every bloomin' soul.

—Kipling.

New Grand Exalted Ruler of Elks

James G. McFarland of Watertown, S. D., was elected Grand Exalted Ruler of the B. P. O. E. for 1923 at the annual convention held in Atlanta, Ga. Governor McMasters of South Dakota nominated Mr. McFarland.

For Your Harvest

Prosperity In Your Pocket Often Becomes Adversity

The people who save are the ones who systematically put their money in a bank until they are aple to invest it to better advantage.

When a fellow keeps his roll in his pocket there is always a temptation to "peel it off." Continued peeling eventually brings a person to the point where there is nothing left to peel.

Where do you keep your roll?

CHURCH SERVICES

SEVENTH DAY ADVENTIST CHURCH
ESTEL ROGERS, S. S. Supt.
Mrs. B. B. CALDWELL, M. V. leader

Sabbath school at 10 o'clock Saturday morning.

Young people's M. V. at 12 o'clock Saturday.

Prayer meeting at 7:30 Friday evening.

LUTHERAN CHURCH
A. F. WOLFF, Pastor.

There will be no services in this church on Sunday on account of the absence of the pastor from the city.

On Sunday, August 12 the regular services will be held with the exception of the Sunday school.

FEDERATED CHURCHES
REV. JAS. PENDLETON, Minister
(Study at the Parsonage)

Church School at 9:45.

Morning worship at 11 o'clock. Communion and reception of new members.

Sermon by the pastor.

Young people's meeting at 7.30, in the church.

August is the vacation month for some and the busiest month of the year for others, but the church continues to offer opportunity to all for the worship of God and the fellowship of Christian people in the service of our fellow men.

Hunger, the Best Sauce

Sauce is used to create an appetite or relish for the food. When you have good digestion, you are certain to relish your food. Chamberlain's Tablest improve the digestion, create a healthy appetite and cause a gentle movement of the bowels.—For sale at Clark's Drug Store.

Jam & Jelly Making now an exact science

Fresh Fruits are Plentiful!

Use the short CERTO-Process for making jam and jelly with Berries, Cherries, Peaches and other fruits in season. You will find they are the best jams and jellies you ever tasted.

CERTO is sold by grocers everywhere or sent postpaid for 35 cents.

1 MINUTE'S BOILING of 2 POUNDS OF FRUIT with 3 POUNDS OF SUGAR plus 4 OUNCES OF CERTO makes 5 POUNDS OF JAM

Wrapped with every bottle is a recipe booklet which tells the story.

HARVEST SHOES

BALL BAND

THE MISHKO Sole outwears leather or rubber

This "Ball-Band" shoe, with leather upper, has a waterproof sole of special compound that outwears the usual rubber or leather sole.

If you are hard on shoes this is the most economical work shoe for you — the Mishko Sole Letho Shoe.

The Mishko sole is a "non-skid" sole. It will keep your feet from slipping, whether on roof, hill, or dry grass. Just the thing for the man who is hard on shoes.

FIRST SHOW STARTS AT 7:30 — TWO SHOWS NIGHTLY

PERSONAL MENTION

Miss Hillis Roberts was a Genesee visitor the first of the week.

Mrs. Johnson and Mrs. McGary are sisters of the late Mrs. P. C. McCreary.

Mrs. George Rader left Monday morning for Mullan to join her husband who is employed there.

Mrs. J. Kitchen returned to her home at Spokane Friday after a visit with her brother Wm. Bozett.

Albert Gray arrived Friday from Priest River and Priest lake for a visit here with relatives and friends.

Mrs. Donnely and daughter, Cecelia, left Monday for their home at Spokane after an extended visit with friends.

W. B. Armstrong of Bend, Oregon, is visiting at the home of his mother, Mrs. Mary Armstrong, who is in very poor health.

George Boliou returned home Tuesday afternoon from Wallace where he had been visiting with his son, Cecil Boliou, and wife.

Mr. and Mrs. Geo. Follett and Mr. and Mrs. W. E. English and children returned Friday evening from a two-weeks outing at Twin Lakes.

Dr. and Mrs. H. E. French and three children arrived Thursday morning from Grand Forks, N. D., for a visit with Mr. French's sister, Mrs. W. E. English, and family.

Mrs. W. J. Davee and daughters arrived Sunday from Tekoa for a visit at the home of her mother, Mrs. H. M. Warren. Mr. Davee accompanied her, returning home the same evening.

Mrs. R. T. Holder and baby son returned Sunday from Moscow. This is the little gentleman's first visit to his place of residence selected by his parents for his permanent place of abode.

Mr. and Mrs. Jas. Edwards, Mr. and Mrs. Ray Edwards and Mrs. N. Edwards left Friday of last week for Spokane and Murray where they went for a visit, making the trip in the Jas. Edwards Ford sedan.

Mr. and Mrs. F. S. Casebolt and family motored to Walla Walla on Sunday and spent the day with Mr. and Mrs. J. W. Smith, returning in the evening with the exception of Mrs. Casebolt, who remained for a longer visit.

Mr. and Mrs. John Meyer and Louis Flomer returned Friday evening from Myrtle Point, Oregon, where they had gone for a short visit with G. E. Taber. Mrs. Taber who accompanied them, remained at Myrtle Point and will later come to Genesee, accompanied by Mr. Taber.

Mrs. Anna C. Rist arrived in Genesee from Lewiston Monday, where she had been visiting friends for a time. Mrs. Rist has spent the past several months with her daughter, Mrs. Ruby Wood, at Fillmore, California, and expects to return there this fall where she will spend the winter.

Mr. and Mrs. W. E. Johnson and Andrew Maxwell of Oklahoma City, Oklahoma, were visitors at the P. C. McCreary home Monday and Tuesday of this week, as were Mrs. Elizabeth McGary and daughter, Maxine, of Oaksdale, Washington. Mr. and Mrs. Johnson and Mr. Maxwell left Wednesday morning for Lewiston for a few days stay, while Mrs. McGary and daughter returned home the same day.

Gone Back to Canada

Mr. and Mrs. M. W. Foster and baby left Tuesday morning for Cowley, Alberta, Canada, where they will spend a week visiting relatives of Mrs. Foster before going to Gulph, Ontario, where they expect to make their home. Gulph is Mr. Foster's old home town and he will help his father take care of his farm, which has been in the Foster name for over 125 years.

Same Old Story But a Good One

Mrs. Mahala Burns, Savanna, Mo., relates an experience, the like of which has happened in almost every neighborhood in this country, and has been told and related by thousands of others, as follows: "I used a bottle of Chamberlain's Colic and Diarrhoea Remedy about nine years ago and it cured me of flux (dysentery). I had another attack of the same complaint three or four years ago and a few doses of this remedy cured me. I have recommended it to dozens of people since I first used it and shall continue to do so for I know it is a quick and positive cure for bowel troubles."—For sale at Clark's Drug Store.

If your auto spokes are loose and your wheels need setting, I have a Klein machine with which to do the work. Satisfaction guaranteed. See Gus Fickens. 4-4x

ABERDEEN'S FOUNDER REACHES 91 BIRTHDAY

First Citizen Retains Clear Mind and Vigorous Body and Still Advocates Every Move for Progress in the City He Founded.

Samuel Benn quietly celebrated his 91st birthday Monday, July 2. Mr. Benn spent a portion of the day in his garden and among the flowers at his home, 500 North G street. He also had time to meet newspaper men and discuss the problems of his own life and those affecting the welfare of Aberdeen.

Mr. Benn, one of the largest property holders in the city and one of the most generous in his public gifts through all the years, has never allowed the question of added taxation to cause him to oppose any new improvement that would benefit this city. This splendid, unselfish spirit accounts for the universal esteem and respect held for him by all classes of citizens.

Biography.

Mr. Benn was born in New York City and came to the Pacific coast by Panama, reaching Grays Harbor in the spring of 1859. He settled at Melbourne, where he met and wedded Miss Martha Redman, daughter of Rufus Rerman, who died at a very advanced age a year or two ago. Mr. and Mrs. Benn enjoyed an unusually happy wedded life. Seven children were born to them, all of whom are living excepting one son, George Benn, who died at the age of 23. The living children are: Mrs. Alice King, Mrs. Phoebe Knutson, Mrs. Mary Benn, Mrs. Minnie Wappenstein, Hon. E. B. Benn and Mrs. Leta Brasfield. Mrs. Benn passed about five years ago.

Mr. Benn resided at Melbourne nine years and then traded land at Melbourne for the area which afterward became the city of Aberdeen. At that time the land was merely a mixed marsh and forest at the junction of the Chehalis and Wishkah rivers, but after making the trade Mr. Benn announced to his friends that he would build a city here.

Aberdeen was incorporated in 1885 and Mr. Benn, who had acted as sheriff and tax collector for the county, served as mayor and also as a member of the town council. There were very few people at this point, both Hoquiam and Cosmopolis having been founded earlier than Aberdeen. Hoquiam had been founded four years before Mr. Benn planned to build a city here.

In laying out the city of Aberdeen, Mr. Benn worked with Captain Weatherwax, who owned adjoining property, and the plan of the city with streets of suitable width and alleys throughout was the result of their foresight. As an aid toward building a city, Mr. Benn gave away, to working men who would build their homes, a large number of lots in Aberdeen. Though his generosity and confidence were often abused by those who received free building sites, he never altered his generous treatment of those who desired to build homes in Aberdeen.

A man of extremely rugged build, great courage and patient fortitude, Mr. Benn endured the hardships of the early days as the first pioneer. His splendid spirit and example had its effect upon the first settlers which may account for the fact that Aberdeen has made the greatest progress of any city in southwestern Washington since the date of its incorporation.

As a testimonial of the esteem in which Mr. Benn is held, the Realtors of Grays Harbor, in their session on Wednesday passed the following resolution:

"Whereas, Hon. Samuel Benn, on Monday, July 2, celebrated his 91st birthday; and

"Whereas, the long and faithful efforts of the founder of Aberdeen, based on good judgment and never failing faith in the future of this section, have had a wide influence in the development of Grays Harbor county and the city that he founded; now, therefore,

"Be it Resolved, that the Grays Harbor Realty Board extend its congratulations and best wishes for continued health and happiness to this most worthy pioneer, pathfinder and builder, our esteemed fellow citizen, Hon. Samuel Benn."—Grays Harbor Post.

Douglas Farmers Plow Early

Seventy-five per cent of the farmers south of Withrow have adopted the recommendations of county agent Zentner and the Experiment Station for early cultivation. The plan is to get their summer fallow over by June 15 in order to hold as much of the moisture in the soil as possible.

Irrigation Disrtict of Pend d'Oreille.

Farmers in the Skookum Creek section, near Newport, have just completed a survey for a new irrigation district comprising 1000 acres. The project work was proposed by the extension specialist in agricultural engineering, A. B. Crane, some time ago, and has since been surveyed.

Outstanding sires and capable caretakers are the two prime essentials in successful registered livestock production.

Save for the urgent needs of the future instead of satisfying the petty wants of the present.

Backbone and not wishbone is what the farmer needs.

Founder of Aberdeen Celebrates 91st Birthday.

SAMUEL BENN AS HE APPEARS TODAY

Better Health Service

Public Health Is Public Wealth.

These Articles Compiled by the Public Health League of Washington

THE ABUSE OF CATHARTIC.

We are proud today, of the progress made in the methods of travel and in scientific discoveries. We are pleased with our intellectual achievements and the comforts of the modern home, but few consider the co-existing evils that have crept into the lives of the present generation and will continue to have their abode in the lives of future generations unless we change our ways.

In the pioneer days, when men toiled with their hands and worked in the fields, women did their own housework and swept the floor with a broom rather than the vacuum cleaner, also pumped water by hand rather than turn the faucet. They ate plain food and lived the simple life, but at the present time in this age of luxury it is proper to ride to and from the office or shop in an auto or street car; live in an apartment with all modern conveniences; and run the competitive race for success with all possible enthusiasm. It is because of the changed conditions that we should pause, and consider the ills produced by the use of cathartics.

The modern diet consists largely of sweets including pastries and daintily prepared foods; and the thought of preparing vegetables with a large amount of indigestible material, such as spinach, carrots and greens, is repulsive to the average housewife and fruits are often omitted in the menu. The children are permitted to develop an apathy for these foods and are given sweets instead.

The result is that practically all the food for the body maintenance and development is absorbed in the small intestine and little waste material is left for the making of the stool.

Consequently, the individual thinks that he is constipated and a cathartic is taken which lashes the bowel so severely that the liquid material in the first part of the large bowel is hurried along to its exodus. The next day there is no bowel movement because there is nothing to come away, but the individual again becomes alarmed and another cathartic is taken. This process goes on for months. Then the discovery is made that the mild cathartic is ineffectual and a more drastic one is used. The large bowel has been so bruised and beaten, battered and "bunked" by cathartics that it cries out in pain—its only avenue of redress. In many cases even the hand pressed over the large bowel causes distress.

By this time the physician is seen and he has the painful task of trying to show the patient the error of his ways. The patient usually expects the physician in some magic way to effect a cure in a few days when he knows he has spent years in abusing the bowel. As a result he falls in the hands of the faker and ends his life in misery "tossing and tossing" as a ship in an open sea without a rudder.

Another abuse of the cathartic is during a migraine headache or so-called sick headache. These last, usually, 12 to 36 hours and come on periodically. The individual affected, not realizing the self limitation of the condition, feels that a cathartic would be beneficial.

Naturally the pain leaves about the time that the cathartic has acted and it is given the unearned credit for relief.

Take another example, a member of the family, rather suddenly develops a diffuse abdominal pain which later localizes in the right lower quadrant. The common thing to do is to administer castor oil or cathartic pills. The pain remains and the family physican is called. The diagnosis of acute appendicitis is made and the patient operated and the appendix has ruptured. If the physician had been called at the onset of the pain the patient might have been saved a long convalescence.

Now let me give some helpful advice:

(1) Study books on dietetics and learn how to make up a balanced diet so that there is a proper amount of waste plus the necessary food for nourishment.

(2) Beware of the cathartic habit and consider the taking of a single dose as important as the taking of any patent drug and always get the permission from your family physician.

(3) Don't substitute cathartics for exercise and if your work does not furnish the proper amount then find proper recreation.

(4) Don't take a cathartic when you have a head cold if your bowels are normal—a cathartic is weakening.

(5) Never assume the responsibility of giving another a cathartic with abdominal pain.

(6) In case of poisoning consult the family physician immediately as some poisons are more soluble and hence more deadly if oils are given as a cathartic.

(7) Have a regular time for emptying the bowel—usually after breakfast is the most convenient time.

(8) In a case of suspected appendicitis, never give a cathartic.

If one needs the advice given above he will save himself many pitfalls and find life more pleasant and worth while.

Captain (in civilian clothes)—"Come on, fellow, open the gate."

Sentry opens the gate: Captain passes.

"Why the d—l do you let civilians through here?"

Sentry—"I knew you were an officer!"

Captain—"How the d—l did you know that?"

Sentry—"By your manners, sir!"

In a western hotel there was a reunion of World War heroes, when the head clerk, who was a first lieutenant, called the porter, who was his captain, and the head waiter, who was a lieutenant colonel, and had them throw out a former general, who was cluttering up the chairs in the lobby.

Twenty counties conducted a potato seed production campaign last year through the efforts of the extension service of the state college. A better seed campaign for commercial production was conducted in 17 counties, resulting in the introduction of 16,951 bushels of seed.

Some people grow under responsibilities, others swell.

IDAHO

Platinum does not exist in commercial quantities in any of the properties near Coeur d'Alene according to a report ready to be made to the chamber of commerce at Coeur d'Alene by Francis A. Thomson, secretary of the Idaho bureau of mines and geology. Thomson said that the investigation was made to confirm, if possible, the reported discoveries, for if true, they would have been of great benefit to the state.

Ten undergraduate students at the University of Idaho made a "straight A" grade last semester, according to announcement by the registrar's office. In no subject did their average fall below 90.

Labor in the fruit harvest is uncomfortably scarce in the Lewiston valley ,according to Clinton Whitthorn of White Bros. & Crumb. Mr. Whitthorn states that his company alone could use a hundred more men, women and well-grown boys.

With the exception of those tracts which were in the region of the recent hail storms the fruit crop in the Snake river canyon is exceptionally good this season.

Twelve inmates of the Idaho penitentiary were recently pardoned before the adjournment of the meeting of the pardon board at Boise, thus bringing to total number pardoned up to 18 out of a total of 108 applicants. The prison board served notice upon the inmates that it was useless to hire attorneys and spend money in advertising their cases until they had at least served the minimum sentence, unless some unusual circumstances warranted earlier action.

New legislation affecting the handling of claims against the state have so increased the problems of the Idaho state auditor that it is no longer possible to file claims any time before the 12th of each month and expect the state board of examiners to act upon them by the regular meeting on the third Tuesday.

Succeeding O. P. Cockerill, who has accepted the position of dean of the law school of North Dakota university, Robert McNair Davis of the University of California has been appointed dean of the University of Idaho law school. He is a graduate of Harvard and the University of Chicago. His appointment is a result of the recent eastern visit of President Upham.

THE TEST OF A MAN.

The test of a man is the fight that he makes,
The grit that he daily shows;
The way he stands on his feet and takes
Fate's numerous bumps and blows.
A coward can smile when there's naught to fear,
When nothing his progress bars;
But it takes a man to stand up and cheer
While some other fellows stars.

It isn't the victory after all
But the fight a brother makes,
The fellow who, driven against the wall,
Still stands up erect and takes
The blows of Fate with head held high,
Wounded, bruised, and pale,
This is the man who will win by and by,
For he isn't afraid to fail.

It's the knocks, the jolts, and the blows you get,
And the shocks your courage stands,
The hour of sorrow and vain regret,
The prize that escapes your hands,
That test your mettle and prove your worth;
It isn't the blows you deal
But the blows you take on this good old earth
That shows if your stuff is real.

Washington has many of the finest producing cows in the country. The average production of milk and butterfat is higher in this state than any other.

Washington has many of the finest producing cows in the country. The average production of milk and butterfat is higher in this state than any other.

Efficient home management must provide means for training children in the fundamentals of good housekeeping.

Wife—"Do you know that you haven't kissed me for six weeks?"

Prof. (who is absent-minded)—"Good heavens, who have I been kissing then?"

Customs Inspector—"What have you to declare?"

Returning Passenger—"I declare that I am glad to get back."

Fads and Fashions of Today

By DOROTHY PHILLIPS

While the cities are sweltering crowds are en route for the mountain resorts where the evenings are all so delightfully cool that heavy wraps are necessary.

For this reason, the sweater is a garment if much importance these days, and the shop windows are filled with an entrancing variety of models in all conceivable styles.

In one window of a shop which is noted for its smart doggy sport things, I noted some exceptionally attractive sweater costumes of sweaters and skirts which were distinguished by their brilliant colors and harmonious combinations.

A sleeveless coat sweater of white alpaca yarn, with fibre silk border in red, topped a pleated skirt of wool crepe with alternating box and side pleats; a manish coat sweater of mohair yarn, with plaided waistcoat front, solid color back and sleeves, to be worn with a wrap around skirt of flannel which was tucked in such a way as to give the new plaided effect; a swagger coat sweater of fibre silk in a smart jacquard design of French blue on a white background, accompanied a box pleated skirt of white satin; and a sleeveless coat sweater of mohair yarn and fibre silk with monogram design, and fibre silk border and belt, had a knife pleated skirt of crepe silk in white.

These were all designed for sports and informal day wear.

The slip-on sweater in the sketch is quite a gay affair. On a background of tete de negre silk, there is embroidered in solid and thread design, Egyptian figures, which are said to be exact reproductions of symbols found on Tut's tomb. Whether this information is authentic or not, an effect is very striking, and worn with a skirt of material matching the foundation of knife pleats, makes a cool costume for afternoon wear.

Wraps for the evening are three-quarter lengths and come in a wide range of designs. Very popular are the knitted wrap in soft silk and wool mixtures in white and pastel shades, lined with matching silks. While we find coats of this fabric, the cape is considered the smarter mode.

Accordion pleated chiffon—several layers in thickness with each layer of a different shade—as extensively used. These are very charming and give warmth and at the same time preserve the dressy effect sought for the more formal entertainments.

The French conceive all sorts of gay things to wear at summer resorts, but the American girl prefers to make clothes a secondary consideration during the play months. For those, however, who like to "dress up" there are quite luxurious wraps and sweaters of delicate fabric and design, which look charming on the model who parades about the salon, but, even according to the keen saleswoman, these are more for display than use.

Clothing Exhibits at Fairs.

Certain facts should govern the entry of articles of clothing for exhibit: Articles unfinished, worn, soiled or not well pressed should not be entered for a premium. Articles must be entered in the name of the makr. One entry only can be made in each class. No article competing as a single should be offered as part of a collection. Articles having no competition will not receive a prize unless worthy.

Saving What You Grow

Prepared by the Extension Service, State College of Washington.

COOKING AND EATING APPLES; WHICH? WHEN?

Some kinds of apples are good for both cooking and eating, while others are best one way or the other. Prof. O. M. Morris, head of the horticulture department of the State College of Washington, with Miss Maude Wilson, assistant extension director, and E. G. Wood, extension specialist in horticulture, have compiled a list of the leading varieties in Washington orchards, in order of preference, which they recommend.

In October and November, they say, eat Delicious, Gravenstein, Jonathan, King David, Grimes Golden and Winter Banana; and cook Jonathan, Grimes Golden, Gravenstein and King David.

December and January, eat Delicious, Spitzenburg, Jonathan, Grimes Golden, Winter Banana, White Pearmain, Stayman Winesap, Wagoner, Rome Beauty or Ortley; and cook Jonathan, Spitzenburg, Rome, Wagoner, Grimes Golden, Red Cheek, or Ortley.

In February the best eating apples are Spitzenburg, Stayman Winesap, Rome Beauty and Black Twig; and for cooking, Spitzenburg, Rome, Stayman Winesap, and Black Twig.

In March eating apples that are best are Winesap, Yellow Newton, Rome Beauty, Black Twig and Arkansas Black; cooking, Rome, Winesap, Newton, Black Twig, Arkansas Black, and Black Ben.

April, May and June end the apple year with the following for eating: Winesap, Black Twig, Arkansas Black and Yellow Newton; and for cooking, Winesap, Newton, Black Twig, Black Ben and Arkansas Black.

Give Origin of Washington Names

How Colville, the county seat of Stevens county, was named from an old Hudson's Bay company's fort, and how Chewelah and other towns of the county received their names is told by Edmond S. Meany, professor of history at the University of Washington in a study made recently for the Washington Historical Quarterly, including nearly all the geographic names of the state.

Chewelah.

According to Professor Meany, the name Chewelah is said to mean a small striped snake.

"There is an old Indian legend to the effect that an old Indian chief saw a snake reaching from east to west, from mountain to mountain, and so they called the place Chewelah," Professor Meany says. "In the sixties a military post was placed there and the old Indian name was accepted. The creek has also received the same name on recent maps. Captain George B. McClellan of the railroad surveying expedition, 1853, camped on the stream and called it 'Kitsemawhep.' Governor Stevens of that same expedition says the Indians on the Colville trail were Skechemouse, a band of the Spokane. A form of the same word appears on the United States land office map of Washington, 1897, as 'Chiel charle Mous Creek' and we now know as Chewelah Creek."

Regarding the other names in Stevens county, Professor Meay says:

Hunters.

"Hunters, a town in Stevens county and a creek of the same name, flowing into the Columbia river, in Stevens county. The name is in honor of James Hunter, the first white settler at that place.

Colville.

"The name Colville is derived from that of Andrew Colville, who succeeded Sir John Henry Pelly as governor in London of the Hudson's Bay company. The name is sometimes spelled 'Colvile.' John Work, of the Hudson's Bay company, indicates the actual beginning dates of old Fort Colville as Thursday, September 1, 1825, and Thursday, April 13, 1826. On the first date men were cutting timbers and on the second were departing from Spokane House to establish the new place near Kettle Falls which was later to receive the name of Fort Colville. It became one of the important trading posts of the Hudson's Bay company. A few miles to the east, the United States established a little fort in command of Major Pinkney Lougenbeel, and in his honor the place was called 'Pinkney City.' Close by was a small settlement known as Colville. When Stevens county was organized, the name of 'Pinkney City' was changed to Colville and that became the county seat.

Marcus.

"Marcus, a town in the northwestern part of Stevens county. On September 8, 1863, Marcus Oppenheimer and W. V. Brown took possession of some buildings abandoned by the British boundary commission. Brown died and Oppenheimer filed a homestead and the town when established on the site, was named for him.

Springdale.

"Springdale, a town in the south central part of Stevens county, formerly called 'Squire City' in honor of Charles O. Squire, who homesteaded there. Spring Creek was formerly called 'Sheep Creek.' Daniel C. Corbin changed the name of the town in honor of the new name of Spring creek.

A New Kingdom.

It has been figured that a pair of rats, breeding uninterruptedly for three years, without deaths, will increase the rat kingdom 358,709,482 individuals. The common brown rat breeds 6 to 10 times each year and produces an average of 10 young. The grain eaten and wasted by these animals on many a farm annually would pay all the taxes on the place.

Poisoned baits containing arsenic, strychnine or barium carbonate are used to advantage. Mix one part barium carbonate or powdered white arsenic to four parts of bait. Strychnine sulphate crystals inserted in baits are effective. Baits most used for rats are: ground meats, fish, liver, broken fresh eggs, bacon, sliced cantaloupe, melons, apples, sliced tomatoes, toasted bread, cheese and rolled oats.

Cost of Poor Roads.

"Hostility to good roads is in many cases due to lack of data as to the cost of poor roads, and neglect of the fact that taxes paid for poor roads are greater than those required to build good ones," said H. E. Phelps, professor of highway engineering at the State College of Washington recently.

"The way to reduce road taxes is to repeal the poor road tax, not the good road tax. That we pay large taxes for the privilege of enjoying poor roads is demonstrated by results of recent research work with especially designed instruments. Attached to numerous automobiles and trucks, they measured the resistance offered by various road surfaces to the movement of vehicles. These tractive resistances were carefully checked against measurement of the amount of gasoline required to propel various cars over the same road surfaces. They showed that the amount of gasoline varied directly with the roughness of the road surface. One gallon of gasoline is required, for example, by modern automobiles and trucks for each ton of total weight carried 14 miles on earth roads, 21 miles on gravel, and 31 on concrete."

NAVY AVIATORS LOSE LIVES

Shows the zaloon bearing Lieut. Louis J. Roth and Lieut. Telford B. Null as it started on its flight from Indianapolis, July 4th. These two aviators lost their lives in Lake Erie.

TIMELY HINTS

By EXTENSION SERVICE SPECIALISTS

Agricultural Engineering—Now is the time to measure that stream to find its minimum flow and estimate its power possibilities.

Apiculture—Beekeepers in white clover and alfalfa sections increase their bees two weeks before the flow ends. It is time to do this in many sections.

Clothing—When altering patterns pin or baste pieces together carefully and adjust on dressform to test for seam directions.

Dairy—When you buy a purebred animal hold all the price above its grade value to be paid on delivery of registration and transfer papers.

Farm Crops—Be sure to rid your summer fallow of all weeds now. They are expensive because they consume moisture.

Livestock—Be sure to cull out barefaced barebellied ewes before breeding this fall. This eliminates light shearers and increases the average clip per head.

Plant Pathology—If dodder appears in your alfalfa, cut it, let it dry, pile on straw, saturate with kerosene and burn.

Poultry—Hens that show yellow beaks, yellow legs and are starting to moult at this date are poor layers. Sell them to eat.

Control Cabbage Aphis.

The cabbage aphis is a small plant louse of grayish or greenish color. These lice gather in large numbers on the leaves and suck the juices from them. Under conditions favorable for these pests they cause considerable damage.

Spraying with black leaf 40 has been found the most effective method in controlling the aphis. Use as follows:

Black leaf 40, 2 tablespoonfuls; soap, 4 ounces; water, 4 gallons.

The soap causes the spray to spread evenly and enables it to penetrate the mealy covering of the lice. If black leaf 40 is not available, 1 pound of soap to 4 gallons of water will give fairly good results. In using any kind of spray for lice remember that they are sucking insects and to kill them we must hit each louse with the spray that kills by contact.

How a New Wheat Is Produced

There is nothing difficult or mysterious about the production of a new variety of wheat hybrid. A few simple instruments and a little patience are all that is necessary. A small pair of forceps, some porous tissue paper and a box to sit on will do. Two or three days after the wheat begins to head out it is easy to find the flower parts in the right condition. By prying apart the chaff with the forceps the three anthers or the male elements of the flower are seen just beginning to turn yellow. All flowers not in this condition should be broken off, and the three anthers in each of the remaining ones removed. From four to 20 of the flowers on a wheat head are in this condition at one time. The entire head should then be wrapped in tissue paper and left for a day or two, until the stigma, or female elements develop and are ready to be fertilized. Then a head of the variety of wheat to be used as the male parent in the same stage of developemnt should be brought and the anthers taken out and put into the treated flowers in the place of the ones that had been taken out the day before.

The treated head may then be wrapped up again and left for a month or until the straw turns yellow. When it is collected any seeds that have grown inside the wrapper should be hybrid seeds. They may be shriveled or shrunken, but probably will show some characteristics of both parents. The plants arising from such seeds will also show the dominant characteristics of each parent. If these plants are allowed to produce seed by self-fertilization in the natural way all the possible variations in seed between the two parents will appear.

The second generation plants arising from them will also show all possible recombinations of the parent characteristics. This is known as the "wild generation" because of the great variability found. Some of these types will breed true in subsequent generations, and it is from the best of these that a new variety may evolve having the desirable characteristics of both parents. It may take from five to ten years to determine accurately which particular type is the most valuable for commercial purposes. Several years more are required to increase the seed for general distribution.

Dr. E. F. Gaines, cerealist at the State College of Washington experiment station has made a great many new varieties of wheat by this process of hybridation.

STATE DEVELOPS CLAY RESOURCES

Thousands of miles of roads and streets in Washington are paved with brick and cement made from ceramic materials quarried within the borders of the state, according to Milnor Roberts, dean of the college of mines at the University of Washington.

Although Washington is one of the youngest states in point of settlement, he points out, it has already made much use of its ceramic resources in the manufacture of brick, and the newer buildings in the state's cities and towns are constructed largely of local clay materials, and faced with beautiful types of brick and terra cotta.

Recognizing the present and especially the future importance of the ceramic industry to the Pacific northwest, the University of Washington added ceramics to its college of mines curricula and in 1919 put the work in charge of Professor Hewitt Wilson, a ceramist trained in Ohio, with technical practice in Washington.

At the same time the United States bureau of mines and the university chose ceramics and clay products as one of the three major lines of investigation to be carried on at the Northwest Experiment station, located at the university, and which is aided by a state fund of $10,000 a year.

The results of some of these investigations are to appear shortly in a bulletin, prepared by Professor Wilson, on clays and shales of Washington.

"Bridget, has Johnnie come home from school yet?"

"Yees, sir."

"Have you seen him?"

"No, sir."

"Then how do you know he's home?"

"'Cause the cat's hidden under the stove, sir."

Copyright Notice.

The first sergeant had died after a rather strenuous life, and the chaplain was delivering a most eloquent address at the funeral service, telling about the many virtues of the late top-kicker.

Two privates of the company, who had been detailed to the firing squad, sat patiently by listening to the eulogies which poured from the chaplain's lips.

"He was a man," said the chaplain, "who was kind and thoughtful; who constantly tried to make life happier for the men; who would go to endless lengths to see that each man was contented with the service, and he would even work hard day and night if he thought he could save some private from a little extra duty."

SUNBEAM ELECTRIC IRON

Does the Nicest Ironing — Lasts the Lonest

IRON IN COMFORT

With the wonderful SUNBEAM ELECTRIC IRON—which never gets too hot; never gives any trouble; always just right; has all the latest improvements and has a double guarantee. And the RIG-JID open end folding ironing table, which is the strongest, lightest and most convenient ironing table ever built. It can,t break, warp, sag or bend—and it folds and unfolds almost as fast as you can say it.

The regular price of the Sunbeam Electric Iron and the Rig-Jid Ironing Table is $12.50.

For a short time only we are going to offer the Sunbeam Electric Iron and Rid-Jid Ironing Table (one set to each customer only) at the reduced price of only $9.75

$1.00 Down and $1.00 a Month

Now is the time to replace that old iron that is about ready to be discarded.

The Washington Water Power Co.

We do all kinds of printing.

Cause of Appendicitus

When the bowels are constipated, the lower bowels or large intestines become packed with refuse matter, that is made up largely of germs. These germs enter the vermiform appendix and set up an inflammation, which is commonly known as appendicitus. Take Chamberlain's Tablets when needed and keep your bowels regular and you have little to fear from appendicitus.—For sale at Clark's Drug Store.

Generous

The new arrival in Suburbia sent over to borrow an egg beater, a double boiler and a saucepan. These were cheerfully furnished.

An hour later she asked for six soup spoons and a kettle. These were less cheerfully furnished.

When a request came for a fish platter and a coffee percolator the old settler spoke up.

"Just tell your mother to send back my utensils," she directed, "and I'll loan her a six-course dinner."

Hot Weather Diseases

Disorders of the bowels are extremely dangerous, particularly during the hot weather of the summer months and in order to protect yourself and family against a sudden attact, get a bottle of Chamberlain's Colic and Diarrhoea Remedy. It can be depended upon. Many have testified to its excellence.—For sale at Clark's Drug Store.

Conceit never finds lodgment in the brain. It abides only where the brain ought to be.

Big Furniture Sale

HAVING DECIDED to put another line of business in the room now occupied by my hardware and furniture store within the next few weeks, and having already disposed of my stock of hardware, I will now close out my entire stock of furniture, consisting of beds, springs, mattresses, tables, chairs, 17 rocking chairs, kitchen cabinets, dishes, curtains and rods, dressers, rugs, and other things too numerous to mention.

Must Move Within a Week

I want to move all my furniture stock within a week and am going to offer the biggest discount you have ever heard of in Genesee.

Come early and make your selection while the stock is yet complete.

GEORGE SCHLERTH

A Farmers Complaint

I own and run a farm in Virginia. Just how the farmer today is prospering as against the city laborer the following facts show:

It takes 63½ dozen, or 762 eggs to pay a plasterer for one day of eight hours work.

It takes 17½ bushels of corn, or a year's receipts from half an acre, to pay a bricklayer one day.

It takes 23 chickens, weighing three pounds each, to pay a painter for one day's work in New York.

It takes 42 pounds of butter, or the output from 14 cows, fed and milked for 24 hours, to pay a plumber $14 a day. It takes a hog, weighing 175 pounds, representing eight month's feeding and care, to pay a carpenter for one day's work.

Who does the way out?

The city workman's wages must decline or we farmers will stop farming entirely, exactly what most of us are doing.

I have planted my last crop and this year nearly 1,000 acres goes down in grass, on which I will raise nothing.

I can see only one way now, teach New York hens to lay bricks instead of eggs.—New York Herald.

Sunday Hottest Day

Sunday, July 22nd, was the hottest day experienced so far this season in Orofino, the maximum temperature being 106 on that day. The thermometer registered 104 on the 23rd, 103 on the 24th, and dropped down to 94 on the 25th. The hottest day last year in July, according to Forest Service records, occurred on the 3rd, when the temperature reached 109. Several days in that month it registered 107 and 105, with only a very few days in below 100. July this year has had many cooler days than the same month last year. The heat drove most local residents to their favorite shady camping places and swimming holes.—Clearwater Tribune.

NOTICE!

Are you coming to Moscow to enjoy the splendid school advantages this year? If so you will need a good house. Now good houses are scarce, therefore it will pay you to take up the matter at once. If you are interested in buying a home, I have some good bargains which I will be pleased to show you. Some of them I can sell with a small payment down and the balance like rent.

It will pay you to call on

THE GENESEE NEWS

VOL. XXXV — GENESEE, LATAH COUNTY, IDAHO, FRIDAY, AUGUST 10, 1923. — NO. 6

SEMI-LOCAL NEWS CLIPPED FROM EXCHANGES

New Grain Comes In

The first load of 1923 grain to come into the city was delivered to the Uniontown Cooperative Assn. elevator last Saturday by Whittman Bros. It was of the red turkey variety and came from their farm southwest of town. They are cutting with a combine and the grain was delivered in bulk.—Uniontown Journal.

Harvest Beginning

Harvest is getting in full swing in this section, several new threshing crews pulling into the fields this week. It is expected that some unusually good yields will be reported in the near future. The weather conditions have been ideal for maturing the crops the past week and many fields are now ready for the binder. If the present favorable weather conditions continue for a short time it is believed one of the heaviest yields in years will be harvested in the Culdisac country.—Culdisac Enterprise.

Harvest in Full Swing

This week sees harvesting in full blast. The weather for the past week or more has been just what is needed and everyone is taking full advantage of it. Threshing is expected to start the latter part of the week. The crop is the heaviest harvested in years. With the price of wheat at a low level, the farmers are making no profit, but are producing at below cost. Efforts are being made to stabilize the price of wheat and to correct to some extent, at least, the condition which is dragging the wheat farmer down.—Troy News.

100,000 Baby Rainbow Trout

M. C. Martin, county game warden, accompanied by Floyd N. Woodruff, motored to Walla Walla Wednesday and returned today, Thursday, bringing back with him one hundred thousand baby trout, of the rainbow family, and planted the greater part of them in the Main Asotin creek. Several other allotments of baby trout have been awarded to Asotin county this season, which have been distributed among the various streams of the county. When these trout are transported by automobile, the services of two men are generally required, and as Mr. Woolruff had just entered upon his period of vacation, he availed himself of the pleasure and opportunity of accompanying Mr. Martin and lending such assistance as he could in bringing these young fish to Asotin county.—Asotin Sentinel.

Will Regulate Auto Headlights

Some automobile owners in the country are not complying with the state regulations concerning the use of automobile lights and the Whitman county Traffic bureau has undertaken the task of informing residents in these matters. Dazzling lights, the use of only one headlight and the failure to always display a tail light at night, are matters that will be given attention.

While the failure to comply with certain lighting regulations is punishable by a fine, the traffic officials will not at present resort to these measures and every car owner will be given an opportunity to comply with the laws. The educational work now under way provides for a traffic officer visiting every town in the county on the evening hours and making observations regarding the lights. Where owners are found not complying with the laws the matter will be brought to their attention and they will be asked to make the desired changes.

Many drivers are not getting the full value of their headlights because of faulty adjustments. The traffic officers will establish testing stations where conditions so warrant and drivers may have their lights tested at these stations free of charge.

Dazzling headlights are a menance to the road and many accidents have been traced to them. This particular phase of the work is to be given special attention by the officers who hope to curtail the nuisance and eliminate the accidents caused by them.—Uniontown Journal.

Some chickens never get as far as the kettle. They marry.

HUNTER GOES DOWN CLIFF TO SHOOT MOUNTAIN LION

Government hunters engaged in predatory animal control work sometimes have to perform feats sufficiently thrilling for the movies. Charley Miller, a cooperative hunter under the Biological Survey, United States Department of Agriculture, recently brought in the famous old Whiteriver lion in the Arizona district, having made his catch under unusual difficult conditions. This mountain lion, which was thought to be a jaguar because of the size of his track, was reported at the Whiteriver crossing by cowmen who had suffered through his depredations.

Miller had a pack of wire-haired terriers, and these were at once put on the trail of the lion, which never before had been hunted other than with hounds. The lion took to the cliffs immediately, and there tried to whip the dogs out as he had whipped several other packs. The little terriers would not yield, however, and even followed their quarry into a cave on the side of the cliff. When he found that charging the dogs two or three times did not scare them off the lion went back into the den.

Miller then arranged that another man with him should let him down over the face of the cliff by means of a rope. Dangling in front of the open den, Miller shot the lion and then dragged him out. Having secured the prey, the hunter was then pulled to safety at the top of the cliff. The lion, which was probably one of the largest ever killed in the state, had been very destructive to live stock in the general neighborhood of White and Black rivers.

"The Cowboy and the Lady"

The feaure play at the opera house Saturday night will be "The Cowboy and the Lady" with a couple of reels of real good comedy.

Ever been to a real cowboy dance? The next best thing to attending one is to see it in "The Cowboy and the Lady," a Paramount Picture featuring Mary Miles Minter and Tom Moore. This is as near a replica of the genuine thing as could be devised. Real punchers took part in the festivities and the costuming and action of the scene were faithfully mirrored.

They came in 'chaps and soft shirts with gaudy handkerchiefs knotted around their necks—the women and men alike; some of the women wore short leather or cloth skirts, others trousers and 'chaps.

While decorufh was preserved, it was hardly to be expected that the elegance of a ballroom could be maintained, and boots, adorned with spurs, made a good deal of racket.

Sends Out Twenty Men

Some twenty men have been sent out to the harvest fields from the local employment bureau at W. W. Burr's office—and there might have been many more had the men been inclined to work. It seems that there are a certain number—the same as always—who will not take anything but "picked" jobs, and many men have been called for while there were several here ostensibly looking for work, who would not go out when a place was offered them. Yet, there are many honest workmen who are looking for work and who have been able to get good places—in fact, there are few places round about here that are not first-class and any man wanting work will do well to go to any of them.

Return From Trip to Coast

Mr. and Mrs. Herman returned Sunday evening from a two-weeks motor trip to coast points, including Portland, Tacoma, Seattle and other places of interest. They visited Mr. and Mrs. Victor Shawe and family at Toledo, Oregon, and Mr. Herman's cousin, Fred Herman, and wife, at Rainier, Oregon, as well Mrs. Herman's brother, C. A. Dunbar, a contractor and builder, at Portland.

They report having seen tourists on the road from almost every state in the Union and that they are all out for a good time. It certainly is a fact that the automobile has made a nation of Gypsies of the American people.

WHAT HAPPENED HERE TWENTY YEARS AGO

Dan Healey is making extensive and needed improvments about the hotel grounds.

Mr. and Mrs. John Jacobs are rejoicing over the arrival of a nine pound daughter at their home Tuesday.

Flamoe & Alexander will start their threshing outfit in T. Driscoll's field of barley on the reservation next Monday.

Martin Meyer left the first of the week for Davenport, Wash., where we understand he was to join a circus to take a position as musican with one of their bands.

A Uniontown girl suggests a new social game to be called Christianity. The girls line up on one side of the room and they are called Christians. The boys line up on the other side of the room and they are called heathens. Then the heathens march across the room and embrace Christianity and they are worse than heathens if they don't rush the Christian line.

Jackson's Leave For California

Word has been received by the News from Mr. and Mrs. J. H. Jackson to the effect that they expected to leave Independence, Iowa, on Monday, August 6, for Los Angeles, California.

The letter says, in part: "As we are leaving the east you may send our paper to the following address: 600 S. Ditman, Los Angeles, California. We are all having the time of our lives. Jim and his brother are out fishing this morning.

"I don't know how you got word that we didn't go to the Park, (Yellowstone) for we did, and were in a big snow storm while we were there. We expect to start for California on the sixth of August, and don't know how long we will be on the road—maybe about three weeks. We are going to stop at Salt Lake City for a few days."

Lewiston-Clarkston Fair

While the Lewiston-Clarkston fair suffered the loss of its grandstand, three of the exposition buildings, the keepers' home and the secretary's office, by fire last Sunday, the fair will be opened as announced September 11 and there will be no curtailment nor embarrassment to the plans, according to an announcement by Secretary Bert F. Savagé.

A covered section of bleachers will replace the grandstand and tents will be used to house the horses used in presenting the afternoon programs. All exhibits will be housed in the buildings saved from the fire.

The fair organization has contracts which insure a larger, more interesting and more entertaining program than has before been offered.

New Kind of Wheat

Tim Hollingsworth, who lives near Lenville, this year has a new kind of wheat known as Thompson's Special. It is a kind of the hybird variety and is a cross between Red Russian and Canadian hybird. He has 62 acres of this variety and estimates that he will get at least 50 bushels per acre. The heads are long and exceptionally well filled, one of which Mr. Hollingsworth brought to the News office and which contained 116 grains of solid wheat. It is comparatively free from smut. It is said that a field of Club adjoining is fully one-third smut.

New Wheat Coming In

The first new wheat of the season to be delivered in Genesee was brought in Wednesday from the ranches of Dr. T. A. Elliot, M. A. Hollingsworth and Henry Hanson. Barley was also brought in from the ranch of John Weber on the same day.

As yet no estimates of yields have been made—but there is one thing sure, there is plenty of straw, and the price of wheat is entirely too low.

A New Arrival

A baby daughter was born at the local hospital to Mr. and Mrs. B. W. Evans of Spokane on Sunday, August 5, 1923. Weight, eight pounds. All concerned are doing nicely.

LOCAL TRAFFIC ORDINANCE TO BE ENFORCED

There has been some considerabele complaint locally regarding the fracturing of the traffic ordinance and the attention of the council was brought to the same and at the special meeting of the city council Monday night the matter was taken up and it was decided to enforce it to the letter—and it may well behove violaors of the past to sit up and take notice. There have been many flagrant violations—not only of the regulations at the street corners—but that of speed especially, and it is high time the city ordinance governing that "pastime" be enforced.

There have been few days that the speed regulations have not been fractured, especially on Main street and the Warehouse street, and if the city is looking for some easy money that is the place to get it. But there should be no favorites played—treat everybody just alike, and then there can be no complaint.

The traffic ordinance says in part:

Section 5. No vehicle shall be moved faster upon the streets than 15 miles per hour.

Section 6. Vehicles shall keep to the right curb or side of the street.

Section 7. No vehicle shall emerge from an alley, stable or garage at a speed greater than six miles an hour.

Section 10. No vehicle of any kind shall stop with the left side to the curb upon any street.

Section 15. No motor vehicle shall be used upon any treets unless provided with lights and sound signals, and when run upon the streets at night shall have lights upon both the front and rear of such vehicles lighted.

The object of deciding to enforce the traffic ordinance is not to work a hardship upon anyone, nor is it to take a spite out on any particular driver or owner of a motor car, but the enforcement is to place everybody on an equal footing—and to treat all just alike—and it is hoped the marshal will adhere strictly to the ordinance in all cases, then there will be no room for complaint.

If you are in doubt as to just what the ordinance says, City Clerk Burr will be glad to show you a copy.

Wool Production Shows Increase

Idaho's 1923 wool clip will be 1,500,000 pounds heavier than the 1922 clip, according to estimates issued Wednesday by Julius H. Jacobson, agricultural statistician of the Idaho crop reporting service.

Mr. Jacobsen places the weight of the clip this year at 16,500,000 pounds, and says the increase over last year is due to an increase in the average weight per fleece over last year. In 1922 the weight of the average fleece was 7.8 pounds, while this year it is estimated its weight will average 8.1 pounds. There is also a larger number of sheep being sheared this year he says.

He also estimates that the proceeds of the sale of the clip this year will amount to approximately $6,935,000. This figure is based on an average price of 42 cents per pound for wool. Not all the wool has been sold, and the estimate of the gross revenue is based on the fact that the remainder will sell for the average price of 43 cents.

In 1922 the wool growers received $4,500,000 for their product, which totaled 15,000,000 pounds in weight. In 1921 there was a total clip of 16,8000,000 pounds, but the proceeds were only $2,252,000.

"Idaho still maintains her rank of fifth in wool production," Mr. Jacobson says, "being exceeded by Texas, Wwoming, Montana, and Utah in the order named. With the exception of Wyoming, these states have a larger wool production than last year."—Star-Mirror.

Many Sacks Being Used

Jake Wicks reports to the News man that he has this season—so far—sold more than 100,000 sacks—which indicates that all the grain is not being bulked. This, in addition to what other houses have sold. However, the tendency to bulk grain is becoming more and more evident as a cheaper way of handling the large crops of this section.

NEWS NOTES OF PALOUSE COUNCIL, BOY SCOUTS

W. E. Crowe, Scout Executive, Palouse Council, Boy Scouts of America, announces that he has now established official headquarters for the council at Room 222, First National Bank building, Pullman, Washington. Post office address is Box 5, Pullman, and the telephone number is 363.

This being the geographic center of the district, with all towns available for all concerned and council affairs may be handled readily and with dispatch.

Mr. Crowe extends a hearty welcome to all the council officials, scoutmasters, scouts, and others interested in scout work and boy leadership and will be pleased to meet and confer with all who may call or write at all times.

It is desired to get all council matters cleared up, adjusted and all business affairs current and if any matter is still unsettled, Mr. Crowe will be appreciate your bringing it to his attention for adjustment. Also new matters will be given careful and prompt attention. Please make use of the office and let us serve you.

Camp Grizzly has now been completely dismantled and all equipment packed and stored away ready for next year. A detailed report is being prepared and will be published later.

W. E. Crowe, executive, will attend the Scout training school for leaders at Diamond Lake, Washington, next week. This course of training is given under the auspices of C. R. Warne, regional executive, for all persons interested in boy leadership. All Scoutmasters and assistants are especially urged to attend.

Mr. Crowe has been invited by the Seattle regional executive, Boy Scouts to deliver a lecture at the Seattle Scout chautauqua, August 24. This lecture will be an illustrated one from slides made from pictures taken by Mr. Crowe while he was a resident in the Orient—Japan, Chna and the Phillipines.

Miss Lois Smith, Pullman, has been engaged as temporary stenographer and is assisting in organizing the local office.

The First Eagle Scout certificate awarded to any scout in the Palouse council has just been received by Executive Crowe for Scout Raymond Howell and it will be formally presented to Mr. Howell upon his return from vacation.

All treasures and chairmen of local budgets for the various towns in the Council are especially requested to see that all moneys due the council are forewarded immediately to R. F. Bigelow, council treasurer, Colfax, as camp bills as well as other bills must be paid at once. All deficits of last year, if collected, would put the council on a sound financial basis and would start the new year off splendidly.

Next week the different budgets of each town will be published, showing amounts pledged and amounts paid to date.

Many Binders Sold

That the farmers of this section are preparing for a big harvest is attested by the fact that some 17 binders and many threshing rights of various kinds have been sold here this season. Meyer & Son have sold 12 binders and many hundreds of dollars' worth of repairs, while Morscheck Bros. have sold five binders, two new and two second-hand threshing outfits. In addition to these four large Holt combines have been unloaded at the local depot—one for D. W. Aherin, one for Tobin Bros., one for the Hampton Driscoll Ranch company and one for Wm. Gray, Jr.

New Moving Picture Show

George Schlerth has decided to close out his hardware and furniture business and put a moving picture show in the building now occupied by that business. He has sold his stock of hardware and will close out his furniture as fast as possible.

Mr. Schlerth will put in an up-to-date moving picture house. A new front will be put in, as well as a graduated floor and opera chairs. The building is steam-heated and he says he will show the best pictures obtainable.

DEATH OF PRESIDENT HARDING AT SAN FRANCISCO

The entire country was shocked last Thursday evening when word was flashed over the wires that President Harding had passed away at San Francisco, death having come very quickly of apoplexy when he was seemingly on the road to complete recovery from what was said to have been ptomaine poisoning. Mrs. Harding was reading to the president at the time of his passing an article entitled "A Calm Review of a Calm Man," in which he was the man reviewed, and his last words were "That is good! Go on. Read some more."

Two nurses, Brigadier General Charles E. Sawyer, the president's physican, were the only other persons in the room and there was no time for a last word from the nation's leader, either to his wife or to the republic he served.

A shudder shook his frame, weakened by seven days' of illness and worn by a trip of 7500 miles from Washington to Alaska and return as far as this city, he collapsed and it was over. Harding only had time to rush to the door and call, "Find Dr. Boone and the others quick," meaning the physicans.

Within a few minutes after the president's death telegrams were sent to Vice President Calvin C. Coolidge at Plymouth, Vermont, where he was visiting at the home of his father and who was ministered the oath of office to his son at 2:47 o'clock a. m. Friday, he being notary public.

The text of the presidential oath of office was telephoned to President Coolidge from the White House, where the understanding was that he would suscribe to it and officially become chief executive at once.

Issues Statement

Routed from his bed by a telegram from George B. Christian, secretary to President Harding, apprising him of the thagedy in San Francisco, the new president immediately met newspaper men and gave them a statement pledging himself to carry out the policies of his dead chief and friend, as follows:

"The world has lost a great and good man. I mourn his loss. He was my chief and my friend."

Will Carry Out Policies

"It will be my purpose to carry out the policies which he has begun for the service of the American people and for meeting their responsibilities wherever they may arise. For this purpose I shall seek the cooperation of all those who have been associated with the president during his term of office. Those who have given their efforts to assist him I wish to retain in office that they may assist me.

"I have faith that God will direct the destinies of our nation."

It was 11:30 o'clock, eastern standard time last night, when the messenger arrived at the Coolidge house in an automobile from Bridgewater with the telegram announcing the president's death. Mr. Coolidge dressed hastily and came downstairs attired in black, with a black necktie. He was very calm and collected.

Mrs. Coolidge Weeps

Mrs. Coolidge came down stairs a moment later, weeping. Her first words were of Mrs. Harding. She spoke of what a great shock it would be to the president's wife and said that it was wonderful how she had stood up under the strain of the crisis.

President and Mrs. Coolidge sent the following telegram to Mrs. Harding:

"We offer you our deepest sympathy. May God bless you and keep you."

The body of President Harding left San Francisco last Friday on a special train for Washington, D. C., and was taken to the White House where it was kept for one day, being later taken to the capitol building where it lay in state for one day.

The president's body will be placed in a receiving vault at Marion, Ohio, his old home, and will remain there until a mausoleum can be erected.

Loved Fellowmen

Massive in frame and feature, a figure to attract a second look in any crowd, that was Warren G. Harding,

MY LADY'S MONEY

An Episode in the Life of a Young Girl

By Wilkie Collins

INSTALLMENT NO. 13.

Old Sharon's logic produced a certain effect on Mr. Troy, in spite of himself. It was smartly put, from his point of view—there was no denying that.

"Even if I consented to your proposal," he said, "I should object to your annoying the young lady with impertinent questions, or to your being introduced as a spy into a respectable house."

Old Sharon doubled his dirty fists and drummed with them on the rickety table in a comical frenzy of impatience while Mr. Troy was speaking.

"What the devil do you know about my way of doing my business?" he burst out, when the lawyer had done. "One of us two is talking like a born idiot, and (mind this) it isn't me. Look here! Your young lady goes out for a walk, and she meets with a dirty, shabby old beggar—I look like a shabby old beggar already, don't I? Very good. This dirty old wretch whines and whimpers and tells a long story, and gets sixpence out of the girl, and knows her by that time, inside and out, as well as he had made her—and, mark! hasn't asked her a single question, and, instead of annoying her, has made her happy in the performance of a charitable action. Stop a bit. I haven't done with you yet. Who blacks your boots and shoes? Look here!" He pushed his pug-dog off his lap, dived under the table, appeared again with an old boot and a bottle of blacking, and set to work with tigerish activity. "I'm going out for a walk, you know, and I may as well make myself smart." With that announcement he began to sing over his work—a song of sentiment, popular in England, in the early part of the present century—"She's all my fancy painted her, she's lovely, she's divine; but her heart it is another's, and it never can be mine! Too-ral-loo-ral-loo.' I like a love song. Brush away! brush away! till I see my own pretty face in the blacking. Hey! Here's a nice harmless, jolly old man! sings and jokes over his work, and makes the kitchen quite cheerful. What's that you say? He's a stranger and don't talk to him too freely. You ought to be ashamed of yourself to speak in that way of a poor old fellow with one foot in the grave. Mrs. Cook will give him a nice bit of dinner in the scullry, and John Footman will look out an old coat for him. And when he's heard everything he wants to hear, and doesn't come back again the next day to his work, what do they think of it in the servants' hall? Do they say, 'We've had a spy among us?' Yah! you know better than that by this time. The cheerful old man has been run over in the street, or is down with fever, or has turned up his toes in the parish dead house—that's what they say in the servants' hall. Try me in your kitchen, and see if your servants take me for a spy. Come, come, Mr. Lawyer! out with your ten pounds and don't waste any more precious time about it!"

"I will consider, and let you know," said Mr. Troy.

Old Sharon laughed more ferociously than ever, and hobbled round the table in a great hurry to the place at which Moody was sitting. He laid one hand on the steward's shoulder, and pointed derisively with the other to Mr. Troy.

"I say, Mr. Silent-man! Bet you five pounds I never hear of that lawyer again!

Silently attentive all through the interview (except when he was answering questions), Moody only replied in the fewest possible words. "I don't bet," was all he said. He showed no resentment at Sharon's facetiousness, and he appeared to find no amusement in Sharon's extraordinary talk. The old vagabound seemed actually to produce a serious impression on him. When Mr. Troy set the example of rising to go, he still kept his seat, and looked at the lawyer as if he regretted leaving the atmosphere of tobacco-smoke in the dirty room.

"Have you anything to say before we go?" Mr. Troy asked.

Moody rose slowly, and looked at old Sharon. "Not just now, sir," he replied, looking away again, after a moment's reflection.

Old Sharon interpreted Moody's look and Moody's reply from his own peculiar point of view. He suddenly drew the steward away into a corner of the room.

"I say!" he began in a whisper. "Upon your solemn word of honor, you know—are you as rich as the lawyer there?"

"Certainly not."

"Look here! It's half price to a poor man. If you feel like coming back, on your own account, five pounds will do from you! There! there! Think of it—think of it."

"Now, then?" said Mr. Troy, waiting for his companion, with the door open in his hand. He looked back at Sharon when Moody joined him. The old vagabond was settled again in his arm-chair, with his dog in his lap, his pipe in his mouth, and his French novel in his hand, exhibiting exactly the picture of frowzy comfort which he had presented when his visitors first entered the room.

"Good-day," said Mr. Troy, with haughty condescension.

"Don't interrupt me," rejoined Old Sharon, absorbed in his novel. "You have had your guinea's worth. Lord! what a lovely book this is! Don't interrupt me."

"Impudent scoundrel!" said Mr. Troy, when he and Moody were in the street again. "What could my friend mean by recommending him? Fancy his expecting me to trust him with 10 pounds! I consider even the guinea completely thrown away."

"Begging your pardon, sir," said Moody, "I don't quite agree with you there."

"What! you don't mean to tell me you understand that oracular sentence of his—Suspect the very last person on whom suspicion could possibly fall'? Rubbish!"

"I don't say I understand it, sir. I only say it has set me thinking."

"Thinking of what? Do your suspicions point to the thief?"

"If you will please to excuse me, Mr. Troy, I should like to wait a while before I answer that."

Mr. Troy suddenly stood still, and eyed his companion a little distrustfully.

"Are you going to turn detective policeman on your own account?" he asked.

"There's nothing I won't turn to, and try, to help Miss Isabel in this matter," Moody answered, firmly.

"I have saved a few hundred pounds in Lady Lydiard's service, and I am ready to spend every farthing of it if I can only discover the thief."

Mr. Troy walked on again. "Miss Isabel seems to have a good friend in you," he said. He was (perhaps unconsciously) a little offended by the independent tone in which the steward spoke, after he had himself engaged to take the vindication of the girl's innocence into his own hands.

"Miss Isabel has a devoted servant, and slave in me," Moody answered, with passionate enthusiasm.

"Very creditable; I haven't a word to say against it," Mr. Troy rejoined. "But don't forget that the young lady has other devoted friends, besides you. I am her devoted friend, for instance; I have promised to serve her, and I mean to keep my word. You will excuse me for adding that my experience and discretion are quite as likely to be useful to her as your enthusiasm. I know the world well enough to be careful in trusting strangers. It will do you no harm Mr. Moody, to follow my example."

Moody accepted his reproof with becomign patience and resignation. "If you have anything to propose, sir, that will be of service to Miss Isabel," he said, "I shall be happy if I can assist you in the humblest capacity."

"And if not?" Mr. Troy inquired, conscious of having nothing to propose as he asked the question.

"In that case, sir, I must take my own course, and blame nobody but myself if it leads me astray."

Mr. Troy said no more; he parted from Moody at the next turning.

Pursuing the subject privately in his own mind, he decided on taking the earliest opportunity of visiting Isabel at her aunt's house, and on warning her, in her future intercourse with Moody, not to trust too much to the steward's discretion. "I haven't a doubt," thought the lawyer, "of what he means to do next. The infatuated fool is going back to old Sharon!"

CHAPTER X.

Returning to his office, Mr. Troy discovered, among the correspondence that was waiting for him, a letter from the very person whose welfare was still the uppermost subject in his mind. Isabel Miller wrote in these terms:

"Dear Sir—My aunt, Miss Pink, is very desirious of consulting you professionally at the earliest opportunity. Although South Morden is within little more than half an hour's railway ride from London, Miss Pink does not presume to ask you to visit her, being well aware of the value of your time. Will you, therefore, be so kind as to let me know when it will be convenient to you to receive my aunt at your office in London? Believe me, dear sir,

"Respectfully yours,

ISABEL MILLER.

"P. S.—I am further instructed to say that the regrettable event at Lady Lydiard's house is the proposed subject of the consultation.

"The Lawn, South Morden, Thursday."

Mr. Troy smiled as he read the letter. "Too formal for a young girl," he said to himself. "Every word of it has been dictated by Miss Pink." He was not long in deciding what course he should take. There was a pressing necessity for cautioning Isabel, and here was his opportunity. He sent for his head clerk, and looked at his list of engagements for the day. There was nothing set down in the book which the clerk was not quite as well able to manage as the master. Mr. Troy consulted his railway guide, ordered his cab, and caught the next train to South Morden.

(To Be Continued.)

In Trouble

Wm. H. Anderson, Supt. of the New York Anti-Saloon League, who faces Grand Jury indictments charging forgery, extortion and grand larceny. Until recently, the league was generously subscribed to by John D. Rockefeller, Jr.

WORLD'S NEWS BRIEFLY RETOLD

Important News of Both Hemispheres Boiled Down to Last Analysis.

Private interests in Italy, with government sanction, have completed plans to lay an ocean cable to New York and another to Buenos Aires. The work will cost about $20,000,000 and will be begun at an early date.

The French government has offered two prizes of 50,000 francs each to the airplane firms that will bring back to France before the end of the year the records for speed and duration. Both records now belong to American aviators.

One wing of the library of Louvain university, in Belgium, which was destroyed by the Germans, was completed and was blessed by Cardinal Mercier, who became a world figure during the war. The work is by American architects.

A climax was reached in the affairs at Manila when the cabinet, council of state and mayor, all Filipinos, resigned. Things were brought to a head when Governor-General Wood reinstated Ray Conley, secret service agent, recently cleared of charges of bribery.

The dail eireann has decided to hold the Irish general elections not later than the first week in September. Campaigning has already begun. Eamonn de Valera, republican leader, made an appeal to American friends for $100,000 election funds, stating that if the republicans get a majority they will govern the country on Sinn Fein lines.

The governor of Valencia, Spain, was denounced in the chamber of deputies as a bullfighter, it being asserted that he had taken part in a fight under an assumed name and had killed his bull amid great applause. The governor, Senor Baillo, went at once to Madrid and handed in his resignation. He would neither admit nor deny that he was a matador.

A general conference of Japanese chambers of commerce of both China and Japan in session at Shanghai issued a warning to China that disorder must be put down and the anti-Japanese agitation stopped or "Japan will be forced to take drastic action." The Japanese government was also called on to take action against the boycott of Japanese goods in China.

American manufacturers and capitalists whose customers are nations, will have to take China off the list for a time. The government will not be a customer for some time, though private business will probably continue to thrive. The government just now is unable to buy the things she needs and pay cash and is unwilling to buy them on credit under the terms offered. She is unable to pay debts or to contract new ones at advantageous terms.

Prison sentences ranging up to life imprisonment were imposed upon four Germans by the French court-martial at Werden recently for listening in on French military telephone lines by means of secret taps at Dortmund. Two of the prisoners, Koch and Brauer, were given hard labor for life; the government consular agent, Nichus, was sentenced to prison for five years and fined 100,000,000 marks. Captain Stubendorf of the security police was given three years and a similar fine.

IDAHO

A movement to extend the town limits of Priest River will be started in the near future as the result of rapid growth during the last year.

Twenty-five states and the District of Columbia drew on Idaho for potato supplies, according to a check just completed for the disposal of the 1922-23 crop of 10,130 cars by Idaho agricultural officials.

Sixty thousand trout fry have been planted at Elk river during the last two days by officials in charge of the fish hatchery at Coeur d'Alene. This year 1,250,000 fry have been planted and 800,000 remain at the hatchery.

Robert McNair Davis from the University of California, has been appointed dean of the University of Idaho law school, succeeding Dean O. P. Cockerill, who has resigned to become dean of the law school at the University of North Dakota.

Lewiston has become interested in a development at the William Lambie ranch, in Tammany hollow, near Lewiston, where a well is being drilled for oil. At 1000 feet a heavy volume of water was encountered and at 1145 feet the well began flowing. For 48 hours the flow reached 200 gallons a minute.

War on rodents in Idaho by the United States bureau of biological survey and the Idaho university extension division, is believed by farmers to have saved crops valued at approximately $750,000 during the year ended June 30, 1923, according to the announcement today by L. W. Fluharty, director of extension.

Forest service trucks this week took 1,000 pounds of salt to the woods for distribution on the elk ranges of the Nork Fork, the state fish and game department furnishing the salt in conformance with its policy of checking range among elk. Three cases of mange were reported for the first time last fall in the Clearwater forest.

First preliminary construction of the new cutoff of the Oregon Short Line, which will bring the main line of that railroad through Boise, has started. The first actual work consisted of the unloading of railroad ties at Sonna station and the unloading of grading machinery at Orchard station. Boise is now served by a branch line from Nampa.

The Rose Lake Lumber company, operating in northern Idaho, was awarded 13,500,000 feet of white pine, fir, spruce and hemlock timber in the Skookum creek district when bids were opened recently at Missoula. The price on green white pine was $9 a thousand, $6 on dead pine, $1.50 on spruce, and 50 cents on fir and hemlock. Ten million feet of the timber is pine.

The wax-moth or bee moth never kills a strong colony of bees. The colony must first be weakened by some other cause. Find out what that other trouble is.

Measure your success as a beekeeper by the average yearly production of your colonies in honey, and not by the number of swarms you get. Learn to prevent swarms.

It is harder to save than spend, but your savings will last longer than your spendings.

The home should teach children the dignity of labor.

CATCHING THE HIGH COST OF LIVING UNAWARES

Planning rear attack on the high cost of living, representative retailers and officials of the Department of Commerce confer on a novel plan of following the finished product back to farm, mine or forest, eliminating each wasteful operation, with the idea of leveling out the peaks and valleys of commerce and providing an even flow of goods into the hands of the consumer. Photo made at the Department of Commerce shows (left to right) Seated—Sol Westerfeld, National Retail Grocers; Irving S. Paull, head division of Domestic Commerce; Julius Klein, Director of Foreign and Domestic Commerce; Robt. A. Jackson, Assistant Director. Back Row—H. C. Balsiger, Secretary, National Retail Grocers; J. A. Ulmer, National Retail Grocers; Herbert P. Sheets, Secretary, National Retail Hardware Assn.; Gordon K. Creighton, National Retail Dry Goods Assn.; Hamp Williams, Retail Hardware Assn.

Saving What You Grow

Prepared by the Extension Service, State College of Washington

DRYING VEGETABLES.

Drying is a race with decay. The shorter the drying process the better. The problem is to so apply the principles of evaporation that the dry stage is reached in the shortest possible time, without damaging the texture or injuring the flavor of the fruits and vegetables.

Drying of fruits and vegetables may be done in the home by using either the sun or the kitchen stove. In the sun it is necessary to have a glass over the material to be dried and there should be a screen around the box to keep the insects and bees away. Over the stove, either a screened hanging rack or a home-made apple box drier may be used.

Two vegetables which lend themselves well to drying are peas and greens. Peas should be dried as soon as picked, if possible; the soon the better. The best results may be obtained by cooking until almost done in salt water, dipping in cold water and then drying. The drying should stop when the peas are of a consistency of rather stiff rubber. Peas are dried very well without any treatment, but are very difficult to cook afterwards.

Greens, such as spinch, mustard, dandelions and all others may be dried successfully without any processing or by blanching and cold dipping.

Drying offers a satisfactory way of providing the materials for "quick action" soups and vegetable stews. Potatoes, carrots, onions and other vegetables may be cut into suitable sized cubes, cooked done, then dried, mixed in desired proportions and stored in packages of convenient size. These "quick-action" soups and stews are of especial interest to busy housewives, campers, hunters and auto tourists.

Full information on making home-made driers may be obtained free of charge by writing to the Extension Service, State College of Washington, Pullman, for Bulletin No. 57. Kindly mention this paper when sending to the college for the bulletin.

SIXTH TO DIE AS PRESIDENT

Harding Also Third Chief Executive From Ohio to Die.

President Harding, 29th president of the United States, was the sixth president to die in office, and the third executive from Ohio so to die.

William Henry Harrison was the first to die while president. He died April 4, 1841, at Washington, after serving but one month of his term.

Zachary Taylor died at Washington on July 9, 1850, after serving one year, four months and five days. Abraham Lincoln was shot by an assassin at Ford's theater, Washington, April 14, 1865, dying the next day. He had served four years, one month and 11 days.

James A. Garfield was shot while in the Pennsylvania station at Washington, July 2, 1881, and died at Elberon, N. J., September 19, 1881. He had served six and a half months.

William McKinley was shot twice, on September 6, 1901, while in the Temple of Music at the Pan-American exposition at Buffalo, N. Y. He died eight days later, having served four years, six months and 10 days.

President Harding had been chief executive two years, four months and 29 days.

Cow testing meant $50 per head to a Lewis county farmer recently.

Girl Writes 250 Words a Minute

Miss Birdie Reeves, 16 year old St. Louis girl, using a new two finger typewriting system, writes 250 words a minute, which is a record and makes her champion.

Better Health Service

Public Health Is Public Wealth.

These Articles Compiled by the Public Health League of Washington

PROPER NUTRITION IN TUBERCULOSIS.

The term "Consumption," widely used for tuberculosis is significant of the most striking symptom of this disease—the emaciation of the tuberculous patient, caused by an increased metabolism of protein. This decomposition of the body building material necessitates a greater consumption of food, and therefore proper and sufficient feeding plays a highly prominent role in the treatment of tuberculosis.

It is a well known fact that people with a tendency towards tuberculosis do not eat adequately from childhood, consequently an undernourished condition exists before the lungs become actively sick. As a counter remedy for this state, "proper feeding" proves an important prophylactic measure; but the food problem is most tuberculosis cases is a difficult one, as digestive disturbances appearing amongst the earliest symptoms of this disease, lack of appetite results.

The tuberculous patient with a chance for recovery and no complications of the digestive tract, must consume a greater quantity of food than the normal, thus the natural ration being 2300 calories per diem, the under-nourished consumptive should receive 3500 calories per diem to be divided into: Four ounces protein, five ounces fat, and 14 ounces carbohydrates.

As a necessary reserve against the ups and downs so common in this disease, the increased food ration should be given until a small overweight is reached, about five to 10 pounds above normal.

Confining a tuberculous patient to a diet containing but a single one of the food principles is of no benefit, but contrary harmful. A mixed and well balanced diet is a vital essential.

The body procures tissue building material from protein containing foods given mainly in the form of meats. Fat pork is particularly commendable, and glands such as liver, kidney and sweet breads, owing to their high nucleo-protein content, are of great benefit. Many authors recommend the use of raw meats.

Eggs should not be given indiscriminately, and it is well to remember that raw and soft boiled eggs are not as easily digested as scrambled or semi-hard boiled eggs.

Owing to the high caloric value of fats, they are especially essential in the feeding of the tuberculous, and are best given in the form of butter, milk and cream. Very good substitutes for this food may be found in cod-liver oil (given in doses of two to three ounces daily), and nuts (which contain 50 to 60 per cent fat).

Starch foods such as bread, potatoes, beans, and rice as well as green vegetables furnish carbohydrates for the body use, thus all should figure on the tuberculous patient's menu. Fresh fruits and vegetables are of specific necessity owing to their vitamine value as well as their content of iron and phosphoric salts.

A single individual should not exceed the consumption of one to one and one-half quarts of milk per diem, and if taken in the form of cow's milk, should be boiled before using. Goats milk in addition to being more nutritious and easier to digest than cow's milk, does not require sterilizing as this animal is seldom tuberculous. Yoghurt, a milk partially evaporized and fermentized by the Bulgarian bacilli, is of high caloric value and extremely nutritious.

In the feeding of the tuberculous it is essential to prepare a variety of foods very moderately spiced and to serve same in an appetizing manner. Beverages such as coffee, tea and cocoa may be included in the diet, but stimulants such as alcohol strictly forbidden.

It is well to educate the patient to thoroughly masticate his food, eat slowly and at strictly regular hours. The above dietary regimen must be caried out in co-operation with the necessary therapeutic measures. Three well balanced meals should be given daily and if necessary, milk, egg-nogge or sandwiches should be given between these intervals. This, however, does not mean to feed the patient to the stage of over-stuffing, as this is the old method which so often caused dilation of the stomach. As a rule, the tuberculous patient is confined to a rest cure, which retards the natural disposition of waste, and consequently bulky and fermentable foods should be avoided.

WASHINGTON LEADS APPLE PRODUCTION

M. L. Dean, Well-Known Horticulturist, Outlines Progress of Apple Industry.

How the state of Washington gradually has become the leading apple producing state in the union, far outdistancing New York, and exceeding the combined outputs of the other eight western states which raise this crop, is told in a volume on "The Economic Resources of the Pacific Northwest," just published by Professor Edward T. Lewis and Dean Stephen I. Miller, of the University of Washington College of Business Administration.

In a chapter on the apple industry, written by M. L. Dean, of Wenatchee, it is pointed out that the development of commercial fruit growing in Washington has been phenomenal.

"Today the industry ranks third in the state from the standpoint of commercial value," Mr. Dean says. In 1919 the total value of all crops in the state was $161,000,000, the value of the lumber cut was, $100,000,000, and the value of the fruit crop among paid growers, was $61,635,064.

Missouri Once Led.

"The growth of the industry can best be shown by comparisons. The state of New York always comes in mind in making any fruit comparisons, although it is but a few years ago that Missouri had more apple trees than New York. The United States census of 1900 gave New York in round numbers 15,000,000 bearing apple trees, Missouri 20,000,000, and the state of Washington less than two and three-fourths millions.

"Up to the year 1917 New York had always produced more apples for market than any other state. That year the New York crop was only 2-300,000 barrels of commercial apples and she ranked second to Washington, which produced 4,176,000 barrels, Missouri producing 1,155,000 barrels. This gave Washington over one-half million barrels more than the combined commercial crop of both New York and Missouri, jumping from sixteenth place in 1910 to first place in eight years. This fact is the more interesting because the state has to ship its product from two to three thousand miles to the consuming market. The commercial value of the boxed apple crop that year was $19,886,000 to which should be added the value of the canned, evaporated and other fruit products of nearly $5,000,000.

Washington First.

"In 1918 New York forced Washington back to second place, but in 1919 Washington forged ahead, again distancing all former competitors with 16,146,000 boxes of 5,382,000 barrels. This was 650,000 barrels more than twice the New York crop of that year; it was more than the combined crops of New York, Missouri, and Virginia, the three leading apple producing states of the east. It was 500,000 barrels in excess of the combined output of Idaho, Oregon, California, Colorado, Utah, Montana, New Mexico, and Arizona, the other eight states west of the Rocky mountains which produce apples. These figures show what has been done and still appears certain in the state has only begun. The possibilities are beyond comprehension."

DISABLED VETERAN WINS APPOINTMENT

Disabled in war service entitling him to vocational training at the expense of the government, Otto G. McDonough of Seattle, upon completing two years of study at the University of Washington, has just received an appointment as assistant director of education of the Virgin Islands. This announcement was made recently by the U. S. Veterans' bureau. McDonough will leave Springdale, Wash., where his parents live, August 10, to take up his new duties which pay him a salary of $2400 a year. He is only 31 years of age.

Mr. McDonough was a bookkeeper before the war. During his service with the 11th Company, Eighth Regiment, U. S. Marines, he suffered an attack of pleurisy which developed into tuberculosis, since arrested. While at the University of Washington, he majored in Liberal Arts.

Home-Made Laundry Soap.

Strain five pounds of melted grease, combine one can lye, three tablespoonfuls powdered borax and five cups hot water. Pour the lye mixture when luke warm into the melted fat. Stir constantly until smooth and honey-like, add one cup of gasoline, pour into a mould, let cool, then cut into bars.

Good feeding comes from knowing what your cows are doing.

Farmer-Labor Senator from Minnesota

Magnus Johnson, Minnesota's new "dirt-farm" Senator, takes off his coat and exposes his galluses when he has a message to get across. Insert photo is of Mrs. Johnson who thinks she will stay on the farm with their six children when her husband goes to Washington to take his seat in the next session of Congress.

CARING FOR HONEY CROP

B. A. SLOCUM,
Extension Specialist in Bees.

The quality of honey depends very little, if at all, upon the secretions of the bees. Apple blossoms, white clover, alfalfa, firewood and other varieties of honey, have each their peculiar flavor nd color. The quality, however, is materially affected by the length of time the supers of honey remain with the bees.

Comb honey should be removed as soon as possible after it is finished to prevent discoloration of the cappings, known as "travel stain." The beekeeper should give additional room just rapidly enough to make it possible to complete all the sections in a super about the same time. After the super is removed, there are often some that are not completed and these may be put in supers and given to the bees. All completed sections should be stored in the shop. Some colonies are better at finishing sections than others and should be used for this work. During the finishing, bees should be crowded to insure the comb being completed before the honey flow ceases.

Extracted honey supers should remain with the bees until near the end of the flow where this is possible. The longer it remains ,the more body and richness of flavor it has. If the honey is removed before two-thirds of the cells are sealed during a rapid flow, there is danger of it not being thoroughly ripened. Unripe honey is thin, contains a high percentage of water and consequently will ferment readily.

During a heavy flow bees may be readily removed by smoking and brushing them out. At the close of the honey-flow, all the supers should be removed to prevent honey from being carried down to the brood chamber and to keep the bees from propolizing the sections excessively. Bee-escapes greatly increase the ease of taking off supers.

In the honey room the supers of honey may be placed in piles similar to the way lumber is piled which will allow a free circulation of air between them. This air should be kept as dry as possible for honey will absorb moisture causing the combs to sweat. Try putting some common salt in a place where you think of keeping honey; if the salt remains dry, so would the honey. The honey should not be exposed to the air in this way for long or much of its aroma will be lost.

Some beekeepers find it necessary to fumigate comb honey to prevent damage by the larvae of the wax-moth. For this purpose fumes of sulpher or carbon bisulphide may be used. Carbon bisulphide is inflammable so care should be taken not to bring it near a fire.

Honey which is kept in a cold place will granulate in time. Extracted honey may be liquified again by placing it's container in water and heating the water. Care should be taken not to boil it for it done, the honey will become dark and lose its enjoyable flavor.

If these precautions are observed an excellent product may be provided for the market.

HOW TO REDUCE TIME REQUIRED TO MAKE PIE

Valuable studies in methods of making lemon pies have demonstrated how a housewife may cut nearly 11 minutes from the ordinary time taken to make a lemon pie.

Much of the time-saving was effected by careful arrangements of utensils and supplies to eliminate extra steps and motions. By getting out all the utensils at one time, making but one trip to the cupboard and opening drawers but once, arranging utensils in the order of their use and so that they could be picked up with the fewest number of motions, the time required for this part of the process was reduced from 124 to 40 seconds.

By similar saving of motion and arrangement of the materials used, 75 seconds were saved.

By having the oven regulated before starting, and lighted (if gas) as soon as the supplies were all laid out, the time required for making the crust was reduced from 367 to 215 seconds.

The time required to make a pie by ordinary methods was 26.05 minutes and that required with scientific methods was 15.7 minutes, a saving of 10.8 minutes.

Fads and Fashions of Today

By DOROTHY PHILLIPS

Fringes and scarves are prominently to the fore in the sartorial march of days. Both these accessories have been with us during many seasons, but this year they are appearing in quite new roles.

Since the lengthening of skirts prohibits the use of fringe around the hem, the dressmakers have taken it and added it to the sleeve hem, to the hat, gloves, parasols, neck lines and fans, as the finishing touch. It threatens to be quite a fringe season this summer in spite of the fact that this form of trimming is apt to give rather a heavy air to the article it adorns.

Scarves, which appeared early in the spring in gay batik colors, knotted around the neck in careless cowboy fashion, have been given a much more dignified place in the wardrobe. Now, indeed, they have become quite the most important part of the gown, and as they advance into the more formal costumes of milady's wardrobe, more and more elaborate effects in fabric and motif are achieved.

On the simplest of chemise frock, we find filmy scarces transforming the garment into a an impressive creation by means of their impressive embroidery of jet and crystal. Draped across the shoulders at the back of an evening frock with long ends falling below the hem in train effect, or twisted in clever lines over the left shoulder, joined at the right of the waistline and flowing in filmy rhythm, these scarves are unquestionably the chief note of the costume.

In tea gowns we see plain satin slips veiled by a very wide beaded scarf which falls over the shoulders to the waistline at the back, thus forming the sleeves and meeting in front well below the waistline, crossing and the two ends brought to the back of the garment forming a two-tailed train.

A clever treatment of fringe is shown in the sketch, edging the nun-like sleeves of a useful afternoon frock whic his a symphony in shades of brown and gold. Sand Canton crepe is box pleated into a deep girdle of golden satin which is ornamented with oriental coins and finished at the top with petals of the crepefli on the sleeves huge poppies are appliqued with small coins circling the center which is achieved of the crepe foundation. The fringe is of golden brown chenille.

Very important these days are the accessories one wears so that the

shop which exhibited the costume in the sketch carried gloves, slippers, stockings, bag and hat to match. The bag is of sand colored silk embroidered in golden brown, stockings and pumps of similar matching shades, while the chic turban with its flaring frill of accordion pleated silk, stiffened by invisible wires, was made of the same material as the frock.

Home-Made Javelle Water.

Among the many recipes given out by Miss M. Minerva Lawrence, is one for the making of home-made Javelle water, which has become popular among the women. This is a very helpful solution to remove all sorts of stains from household linens. It is made by dissolving one pound of sal soda and one-quarter pound chloride of lime in two quarts of cold water.

During the first week in July 41 printing presses in Berlin working day and night ground out more than 17 billions of paper marks per hour. Notes of less than 1000 marks are no longer issued since they are worth less than the paper they are printed on.

Recommends Sweet Clover for Pasture and Soil Improvement

THE SWEET CLOVER SITUATION
By ROY O. WESTLY,
Farm Corps Department.

Sweet clover has proven to be out of the "Weed Class" and well adapted to pasture purposes, according to Prof. Roy D. Westley of the State college. It is a plant that helps build up the soil, and does well under more adverse conditions than alfalfa. On this account, if for no other, it is believed sweet clover will find a permanent place on Washington farms, for a good stand of alfalfa is difficult to secure in many sections. The crop also shows promise of increasing the productiveness of many of our native pastures as well as building up the soil for other crops.

At the Washington Experiment station, at Pullman, an 8.1 acre second year growth of white sweet clover furnished pasture for 140 days when pastured with an average of 2.94 dairy cows per acre. This record is of peculiar interest since successful pasture crops are very limited in this section of the state.

Has Many Advantages.

Sweet clover has several advantages as a pasture crop alone. First, it comes on earlier in the spring than other green feed, and may be pastured closely without apparent damage. In fact it should be pastured when four or five inches high to prevent getting too coarse and to cause new shoots to form. Second, it gives abundant pasture the first year when seeded in the spring without a nurse crop. Third, it does not produce bloating of livestock as do alfalfa and red clover. This is because an acid, cumarin, is contained in sweet clover, which tends to correct digestive disorders rather than cause them. It is this acid which gives the plant the characteristic taste and odor and usually makes it necessary for the stock to learn to eat it, eg. as most of us learn to eat olives. This taste is easily acquired if they are allowed to pasture while the plants are quite young. Fourth, it remains green throughout the summer, and fifth, may be pastured late in the fall for it does not require a growth to go through the winter.

The white and yellow blossom biennial types are the only ones of any importance as yet, and care should be taken to prevent getting the annual yellow type, the seed of which may be distinguished by its dark color and by the white, gritty patches on the seed which resemble miniature pieces of concrete or mortar. Since the biennials are used it means that the second crop must be seeded anew every two years, or pasturing withheld the second year long enough for it to re-seed itself. Some men prefer to disc or harrow in some seed each spring, and still others harvest a seed crop the second year and cause enough seed to shatter to re-seed the field. This detail may be worked out satisfactorily on each farm, with very little inconvenience.

Annual Sweet Clover Not Desirable.

The "agricultural theater" of the state of Washington seems to have no reserved seat for "Huham," the annual white sweet clover guest from Iowa and Alabama. In other words, this clover has not won a place for itself in most sections of Washington, according to the reports available. Many trials of small amounts of seed have been made during the past two years by farmers over the state, but it has been late in ripening seed, and the reports have not all been favorable. It seems difficult for this much-touted crop to find a place for itself in the agriculture of the state, to say nothing of becoming adapted to any particular section. Surely it can not compete with alfalfa, or the annuals, field peas and vetch, where they are grown for feed or seed, so it seems that the only crop for it to "nose out" is biennial sweet clover; and since the most important use of sweet clover in this section is for pasture it would seem that a two-year crop is more desirable than seeding an annual every year.

For pasture, eight to 12 pounds of seed will be sufficient for most localities, although in humid sections, 20 pounds is the common rate. A heavy stand is desired for pasturing, but 10 pounds of seed will furnish this if good, sacrified seed is obtained.

The demand for pasture crops for nearly all classes of livestock, including poultry, may be satisfactorily met under nearly all conditions with biennial sweet clover, which has been called a weed for many years.

AUTO INCREASES DEMAND FOR HOGS

HAM SANDWICHES FOR PICNICS WILL REQUIRE 700,000 EXTRA PORKERS.

The automobile, as an appetizer, will be responsible this summer for an extra consumption of 700,000 or more head of hogs and approximately 450,000 bushels of wheat according to the National Institute of Progressive Farming which based its statement on estimates furnished by livestock producers, meat distributors and organizations of the farm and automotive industries.

At least one-half of the 12,000,000 automobiles in the country will be used for an average of four weekends on comparatively short outings and recreation trips within a radius of 200 miles of the owners, the Chicago Automobile club estimates, with an average of three persons to a car. Inasmuch as the long healthful rides through the open air whet every person's appetite the consumption of meat and other foods is increased above normal, taking the form of sandwiches and even table meals both while on the trip and after returning, the institute says.

R. C. Pollock, director of the National Live Stock and Meat board, which organization sponsored the "Meat for Health Week" in June, informed the institute that speaking conservatively he believed the outdoor appetites of motorists this season will help to bring prosperity to the farmers by using up part of the excess production of meat, noted in department of agriculture statements, and readjust the balance of relationship among meat animals that now has a premium on lamb and beef with a low market value on pork products because of tremendous production.

In this connection he said that present estimates indicate an excess of some 5,000,000 hogs this year as compared to 1922. However, the excess production can not be accurately measured until the U. S. department of agriculture's announcement of spring pig losses is given out early in July.

As indicating that the highways of the country will be more crowded this year than ever before figures of the Chicago Automobile club show that auto touring this last May exceeded May of 1922 by 12 per cent.

Attention Threshermen

WE ARE entering into the harvest season this year with a splendid stand of wheat. However, there is considerable smut and the straw will be very heavy. Both of these conditions tend to increase the chances for fire. The commonest cause of fire in a wheat field is a dust or smut explosion in the separator, usually caused by static electricity.

With this in mind, the Northwestern Mutual Fire Association has placed a fire prevention engineer in the field and has supplied its agents with a limited number of wiring sets. These sets can easily be installed on a separator by the owner. Full directions accompany each set. These are given to the threshermen free of charge, on one condition only—and that is that they be properly applied to the separator.

We now have a number of these sets and will be pleased to give them to owners of separators upon application.

CHURCH SERVICES

SEVENTH DAY ADVENTIST CHURCH
ESTEL ROGERS, S. S. Supt.
Mrs. B. B. CALDWELL, M. V. leader

Sabbath school at 10 o'clock Saturday morning.

Young people's M. V. at 12 o'clock Saturday.

Prayer meeting at 7:30 Friday evening.

LUTHERAN CHURCH
A. P. WOLFF, Pastor.

English services will be held each Sunday morfling at 10:30 o'clock, with the exception of the first Sunday of each month, when German services will be held at the usual hour.

FEDERATED CHURCHES
REV. JAS. PENDLETON, minister
(Study at the Parsonage)

There will be Church school at 9:45 and Young Peoples society at 8 p. m. on Sunday, August 12, and 19. While Rev. Pendleton is attending the Scoutmaster's training school at Diamond Lake there will be no preaching services. While away Rev. Pendleton will attend the Spokane Bible Vacation school, conducted by Mr. Knapp.

Hunger, the Best Sauce

Sauce is used to create an appetite or relish for the food. When you have good digestion, you are certain to relish your food. Chamberlain's Tablest improve the digestion, create a healthy appetite and cause a gentle movement of the bowels.—For sale at Clark's Drug Store.

FARMERS COMMEND BEN HUNT WEEDER FOLLOWING TESTS

(Advertisement)

Ben Hunt, local blacksmith, is gaining in popularity among the farmers each day, due to the great satisfaction that is being given by the new weeder he has recently placed on the market. His patent for this machine is applied for. He places his weeders on trial, stating that if they fail to give complete satisfaction, they may be returned at his expense. At the present time he has fifteen weeders in use throughout the Walla Walla valley and all users are more than pleased.

Matt Lyons, prominent farmer residing on Mill Creek, is using one of the machines, and states that he never saw a weeder to equal it, and has tried many years to get a satisfactory one. He says it is a great improvement over the old style weeders.

Oakley Taylor, another large wheat farmer, states that he can slick about 30 acres per day, with the Hunt machine, while other weeders he has used would cover but 15 or 20 acres. He has two men in the field with old weeders and 12 head of stock, while with the new machine he has one man and 8 head of stock doing the same work. Another strong point that he favors is the fact that the weeder can be moved from one field to another without injury to the blade or to the crops. By simply stepping off the weeder it will automatically run on the shoes and the blade will lift out of the ground.

J. L. Woods, farmer residing on R. F. D. 5, says the weeder has given him satisfaction. He has used it on steep ground, level ground, soft and hard ground, and has used it in large and small weeds, and it has never failed to give perfect satisfaction.

The Hunt weeder is made in three widths, either 16 or 18 feet, for 8 horses, or 20 feet for 10 horses. Hunt is an experienced weeder builder, having specialized in that work for the last eight years. He has small weeders placed throughout the entire Northwest.

"The best guarantee I can give you with my weeder is that anyone may take a machine on trial, and if they are not satisfied, it may be returned at my expense," said Hunt last evening.—Walla Walla Times, July 24.

Fred Hampton of Genesee, Idaho, is also one of the satisfied users of the Hunt weeder, he having purchased one this season.

These machines are sold locally by the Hasfurther Hardware.

Spokane Merchant's Convention

Visiting Inland Empire merchants at the annual Merchant's Convention and Market Week, August 14, 15 and 16, in Spokane, will not lack for entertainment at the luncheons, Armory smoker, picnics, and theatrical amusements. The special features were outlined in detail by G. A. Ketchum, program chairman at the recent committee meeting. All the special stunts will be under the direction of Miss E. Doris Deane, who has been rehearsing a company of 30 girls for the various functions for several weeks.

The 1923 convention is a radical departure from those held in the past, in that there are no formal business sessions. Instead of the speeches and entertainment features will be presented in conjunction with the daily luncheons, the smoker, the theatre party and picnics. The plan is to have the mornings and afternoons free for merchants to visit Spokane wholesale and manufacturing plants, and automobiles will be at their disposal at all hours of the day for the purpose.

Greets Mrs. Harding

Elizabeth Boliou, four year old daughter of Mr. and Mrs. W. C. Boliou, holds the honor of being the only member of a crowd of four thousand people to shake hands with Mrs. Harding when the presidential train stopped for a few minutes in Medford last Saturday. Elizabeth presented Mrs. Harding with a half crate of fancy strawberries and the President's wife immediately called for her name and wished to shake her hand. Borne on Fire Chief Ray Elliot's shoulder, Elizabeth proudly shook hands with the first lady of the land.—Medford, (Ore.) Mail-Tribune.

The little miss mentioned is a niece of Geo. Boliou of Genesee and he naturally feels proud of her—as he should do.

Ice Cream Social

There will be an ice cream social at the Social house, Wednesday, August 15, afternoon and evening, given by the ladies' aid of the Federated churches. Everybody come, have a jolly good time, and get your fill of ice cream and cake. 6-1

Phone In Your Orders

H. R. Short, undertaker, Moscow, asks that you please phone your wants to George Schlerth at the Genesee Hotel or direct to him at Moscow, at his expense. 6-tf

If your auto spokes are loose and your wheels need setting, I have a Klein machine with which to do the work. Satisfaction guaranteed. See Gus Fickens. 4-4x

Hot Weather Diseases

Disorders of the bowels are extremely dangerous, particularly during the hot weather of the summer months and in order to protect yourself and family against a sudden attact, get a bottle of Chamberlain's Colic and Diarrhoea Remedy. It can be depended upon. Many have testified to its excellence.—For sale at Clark's Drug Store.

First Load of Wheat

Fred Mielke of Cameron brought in the first load of new wheat to the local warehouse. It was threshed Thursday. Forty-four acres on his place averaged 32 bushels to the acre. Part of the field went 40 bushels and the rest not so good.—Kendrick Gazette.

Repairing Warehouse

The Vollmer-Clearwater company is making extensive improvements at their warehouse, including a new driveway, which will make it doubly safe for the heavy hauling.

Read the want eds. this week.

Save All Your Canned Fruit

FILL YOUR JARS to the top with fruit or vegetables; put on the new Mason lid and screw it down with a *wrench*. The new Mason lid, with the wrench, makes canning easier. The wrench is also used in opening the jars.

Beaver's Seal Mason jar caps are warranted to keep fruit or vegetables better than any other Mason lid made. Let us show you these lids.

Price, 50 cents a dozen, with wrench.

Hasfurther Hardware

PERSONAL MENTION

Miss Verna Geltz went to Lewiston Saturday for a visit with relatives.

Blanche Craft was a Tuesday passenger for Pullman for a short stay.

Wm. Davee arrived Saturday from Tekoa for a week's visit with relatives here.

Mrs. Harold left Thursday morning for Johnson after a visit at the Sam Stucker home.

Miss Gladys Holder left Thursday morning for Connell, Wash., for a visit with relatives.

Mrs. Wood Gash left Monday for Coulee City, for a visit and to attend to business matters.

Miss Margaret Sampson returned home Friday from Seattle where she spent the last two weeks.

Barney Meyer arrived Wednesday from his home at Reubens and will spend about two weeks here.

Miss Grace Jain returned Wednesday from Newman Lake and Spokane where she had been visiting.

Mrs. Maud Freeman and daughter, Gene, were Wednesday morning passengers for Pullman for a short stay.

Mrs. Elizabeth Gray, Mrs. Ray Edwards and son Jesse left Wednesday morning for Orofino for a visit with relatives.

Miss Martha Lorang returned to Spokane Sunday after a few days' visit with her parents, Mr. and Mrs. John Lorang.

Mr. and Mrs. Chester Mochel and family of Clarkston, spent last week with Mr. Mochel's parents, Mr. and Mrs. Ben Mochel.

Mr. and Mrs. F. E. Lambert and children arrived Thursday from Crabtree, Oregon, for a visit with Mr. and Mrs. Arthur Mayer.

Mr. and Mrs. Paul Cameron and children returned to their home at Hillyard, Wash., Sunday after a visit with Mrs. Caroline Cameron.

Mr. and Mrs. Ray Edwards, Mr. and Mrs. Jim Edwards and Mrs. Nate Edwards returned Saturday from Murray, where they spent a few days.

Mr. and Mrs. Howard Wheeler and daughters arrived Saturday evening from Harrison, Idaho, for a visit with Mr. Wheeler's mother, Mrs. Ida Wheeler.

Mrs. H. C. Halley came up from Lewiston Friday evening for a visit with friends. Mr. Halley came up Saturday evening, they returning home Sunday evening.

Mrs. G. E. Taber and children arrived home Tuesday evening from Myrtle Point, Oregon, where they went for a visit with Mr. Taber. Mr. Taber accompanied them as far as Colfax, going from there to Spokane.

F. J. Niemann, cashier of the First Bank, will leave the early part of next week for Montana on business, expecting to return within a week. Mr. Clarke of Lewiston will be in charge of the bank during his absence.

Mr. and Mrs. William Cook and family arrived last week from Boise, for a visit with Mrs. Cook's parents, Mr. and Mrs. G. A. Bumpass. Mr. Cook returned home Thursday but Mrs. Cook and family remained for a longer visit.

Captures Rattlesnake

The east show window of Clark's drug store attracted the attention of many people from Saturday evening until Monday from the fact that he had therein a real live rattlesnake which had been captured by Marion Mayer down on the Clearwater ranch. The reptile had eight large rattles left—to say nothing of what had been broken off. It was very evident that there had been several rattles distroyed, as well as the button. The snake was more than three feet long and was of the buack diamond variety, one of the most vicious of its kind.

The reptile was given to John Lorang who took it home and will mount it and place it in his curio shop, of which there are none better in the entire Northwest—private or public.

Banks Will Close Friday Noon

Out of respect for the day set apart for holding funeral services for the late President Harding, the Genesee banks will close at noon and will remain closed during the afternoon.

While the harvest season is on and the stores are very busy, it is probable, that all business will cease in Genesee during the funeral hour.

Public Sale of Crops

There will be a sale of all crops owned by Charles Milton on the south half of the south half of section 27, and southwest quarter of section 34, township 37, range 5. Also four horses, six sets of harness, drill, harrow and gang plow.

Sale will take place August 13 at 10 o'clock, at the house on the Vollmer ranch described above. 6-1

Prayer of a Knocker

(Contributed)

Lord, please don't let this town grow; don't even allow it to keep even with the board. I have been here for 40 years and during that time I have fought every public improvement because I am afraid I might have to pay a few cents more taxes. I've knocked everything and everybody. I've done all that I can to keep the town from growing—and am still doing it—and have never spoken a good word for it. I have knocked hard and often. Whenever I have seen anyone progressing or enjoying himself, I have started a movement to kill the business or spoil the fun. I do not want the young people to stay in this town and I will do all within my power to drive them away by making the town an unpleasant place in which to live.

It pains me, O, Lord! to see that in spite of all my knocking many things have been done. Some day I fear that I will be called upon to keep up the street that runs by my premises. This, Lord, would be more than I could bear. Then, too, more people might come if the town begins to grow, and which might cause me to loose some of my pull. I ask, therefore, O, Lord, to keep this town at a standstill that I may continue to be chief—of the knockers. Amen.

Justifiable Resentment

The devil looked up from his daily register. "I see you got a fellow named Sherman here."

"Yes," said Beelzebub, "he came in with the last lot."

"Well, see if he is any relation to a general of that name, who said war was hell, and if he is, give him the limit. I ain't going to stand for people slandering hell that way."

Naturally Endowed

The woman said she wanted a book to give to her little boy on his birthday, something useful and instructive.

"Heres's an excellent one on 'Self Help'," said the clerk.

"Self Help!" she exclaimed. "He doesn't need any instruction in that—you ought to see him at a party."

WE DO JOB PRINTING OF ALL KINDS—AT REASONABLE PRICES

COST LESS

than "cheaper" overalls because they give more wear

You're willing and glad to buy an overall that will give you longer wear. Yet it's hard to tell the difference between overalls, as they're all blue and look about alike But here's a test that will settle the point of longer wear for you.

Toss the ordinary overall on the scales and read the weight. Then place the same size in an Oshkosh B'Gosh Overall on the same scale. Watch the indicator go past the previous mark, one—two—three—four—five—yes, sometimes six or seven ounces!

That's the story! Heavier denim has larger, stronger threads and more of them to the inch, hence it wears longer and gives you more for your money.

There is no other overall that will weigh as much as Oshkosh B'Gosh! There is no other overall that will wear as long or actually cost as little. These are not idle statements. We will gladly prove the former to you in our store. You can prove the latter by trying an Oshkosh B'Gosh in actual service. That's the final test. Remember, "they must make good or we will."

The Sunday School Lesson

BY

Rev. A. Theodore Smith, B. L., M. S.

MARTHA AND MARY

Lesson for August 12.

Lesson text: Luke 10:38-42; Mark 14:3-9. Read also John 11:1 to 12:8.

Time—A. D. 29. Place—A village, Bethany, on the east slope of Olivet, 2 miles southeast of Jerusalem.

Golden text: "Mary hath chosen the good part, which shall not be taken away from her." Luke 10:42.

The study today, taken from the Perean ministry of our Lord, presents the two great women characters, Mary and Martha, sisters of Lazarus.

I.—THE TWO SISTERS AND JESUS.

Luke 10:38-42. Among His disciples was one, whom Jesus loved. Here is the home that Jesus loved. Doubtless He spent many happy hours with these disciples. No home is rightly constituted without Christ. His presence reveals great lacks and corrects unhappy relationships.

Martha evidently was the older sister. "Martha received Him into her house." Many homes were not open to Him. Jesus said once, "The foxes have holes, and the birds of the air have nests ,but the Son of man hath not where to lay His head." The receiving of the homeless one into "her house" changed it into a home.

"Who Also Sat at the Lord's Feet."

Mary as a learner took the lowly position of a pupil. Five Marys are mentioned in the New Testament: The mother of Jesus, Magdalene, the wife of Cleopas, the mother of Mark, and Mary the sister of Lazarus, named in this lesson. Christ had been preaching throughout Galilee and Perea. He now preaches in the home. Family religion is the heart of Christianity.

The "also" intimates that Mary had assisted in the preparations for suitably entertaining Jesus. This is further implied in Martha's words, "my sister did leave me to serve alone." Mary rightly felt that Jesus would rather feed her with the bread of life, than feast Himesif on temporal dainties. We know He forgot His own hunger in talking to the woman of Samaria. Mary instinctively understood Jesus. Paul "sat" at Gamaliel's feet (Acts 22:3).

"And heard." "Was listening," indicating her spiritual attitude towards the great teacher. When Jesus teaches, we should "be swift to hear." (Jas. 1:19). Mary made the most of present opportunities. "Heard His word." To hear Christ's word means life. "To hear" the world's teachers means death. The greatest tragedies of history have "sat at Jesus' feet." In her sorrow, "Mary fell down at Jesus' feet." (John 11:32). Had she not learned previously the way to the Source of Life, she would have been helpless and hopeless, confronted by death.

"Cumbered." The literal Greek is "distracted." Martha was distracted with thought-scattering anxieties. On account of being "cumbered about much serving," Martha did not hear the word. Yet the Son of God was speaking it. The outward service of God distracts the mind of many a loving Christian. Martha was working for Jesus; Mary was having fellowship with Jesus. Martha was concerned about things; Mary was concerned about one person, Jesus.

Martha evidently had her heart set on having a fine meal; but for once she was serving a man, who could not be "reached through his stomach." Jesus was not the only such man. The popular proverb is a lie. Love prompted Martha's service. Pride guided her in it. Envy of her sister's enjoyment destroyed even the love in it. Vanity defeated the purpose of it all. Martha was in contact with Christ, but Mary was in communion with Him. Christ had come to commune with them. Trifles may become tragedies. Let us meet divinely appointed trouble in the path of duty bravely and trustfully, but let us not create troubles for ourselves and others. Millions are pining in want, while Christians are seeking after dainties.

"Lord, dost Thou not care?" Martha begins reverently, but becomes discourteous. Those in the wrong are sometimes the first to appeal to God. Sometimes we, like Martha, get vexed at God, when distracted with our much serving. At that very moment Mary was serving Jesus in a better way than Martha. Martha's words implied a rebuke to Jesus, as well as an unkind criticism of her sister. She assumes that Jesus is to coerce Himself with the right behaviour of the family and that He would be as much concerned about having a great feast as she herself was.

"Bid her therefore." On this ground Martha therefore commands Christ. Martha in accusing Mary of selfishness revealed her own.

Martha, thou are anxious and troubled about many things." The sympathy, forbearance, and tact of Jesus are lovingly manifested in His tender rebuke to Martha. The mortification of Mary and the discomfort of others present is forgotten in the sweetness of the disclosure of "the one thing needful." The one thing needful is to know Christ. Look up Ps. 27:4; 73:25; John 17:3; 1 Cor. 2:2; Phil. 3:10). "As many as Christ loves, He rebukes." (Rev. 3:16; Heb. 12:6). Jesus rebukes Martha not for serving, but for much serving. Martha opened her home to Jesus; Mary opened her heart. The incident was a open text for a sermon on the chief food for the soul. Christ says but one thing is needful. The world says everything is needful but that one.

II.—MARY ANOINTS JESUS.

Mark 14:3-9. This anointing occurred six days before the Passover. The place was the house of "Simon, the leper." The parallel account in John 12:1-8 gives additional details.

"There came a woman having an alabaster cruse." John tells us the woman was Mary, the sister of Martha and Lazarus. "A cruse" or case. "Alabaster." Known as travertin, a finely grained and beautifully tinted limestone.

"Of pure nard very costly." The cost was $51. The value of anything is measured by the cost of labor to purchase it. At this time a day's wages was 14 cents. This then would be exactly equivalent to the wages of a man for a whole year, working every day in the year. Mary's uncalculating love stands out in contract with the calculating prudence of Judas, the betrayer. Judas was not alone in his criticism of Mary's act. "And they murmured against her." Mary did more for the poor by pouring out the costly ointment that day, than had she sold it and given the money directly to the poor, for her deed of love has been a blessing to the poor of all later ages.

"She hath done what she could." Mary's act was utmost love recognizing love's utmost. No other act in the life of Jesus is recorded to have so pleased Him. This was an act of unselfish, holy, sympathetic love. After such a high appreciation of love, we can understand the place Jesus gives love in John 13:35 as the badge of discipleship, "By this shall all men know that ye are My disciples, if ye have love one to another." This act was to become a world-wide memorial, and intimation of the time when the whole world should be evangelized. This act enkindled the envy of Judas not hate,(and he went out to plot for Christ's betrayal.

Among the women disciples, Martha was the Peter and Mary was the John.

TIMELY HINTS TO FARMERS

Agricultural Engineering—Compare results on your drained and undrained fields and not the gains in yield, quality and convenience of work.

Apiculture—End of the honey flow can be told by presence of robbers lurking about hives. Extracting supers should be removed just before the end of the flow.

Poultry—Give your growing cockerels plenty of range; but do not allow them to run with the pullets.

Dairy—Feed cows on pasture all the hay they will eat. Do not let them lose flesh on short pasture.

Farm Crops—If you did not grow your own seed for fall sowing, find out at once where it can be secured. Remember the seed should be the most desirable variety and pure.

Farm Management—Water work stock in the field. A water tank and galvanized trough or buckets in the field will make the work of watering quick and easy.

Livestock—To get a greater percentage of twin lambs, allow your ewe flock to remain in fine thin after weaning them, two weeks before breeding "flush" them on good pasture.

Clothing—A dart at waist line in side front of one-piece dress insures a correct side seam line and prevents fullness from falling in front.

Horticulture—(Eastside)—This is a good time to get the apple boxes made up and ready for harvest. (Westside) Locate some good vetch seed now for sowing in the berry field in August as a cover crop. Sow about 50 pounds of vetch to 15 or 20 pounds of rye or wheat.

Plant Pathology—If bacterial gummosis appears in apricot or cherry orchards, cut out diseased bark and disinfect wounds with solution consisting of one ounce each of mercuric cyanide and corrosive sublimate to four gallons of water.

MME. SOPHIA BRASLAU

Prima Donna Contralto, Metropolitan Opera Co.

The singing of Mme. Braslau was the outstanding feature of the pageant "Americanus" at Seattle. She is shown here as "Sacajawea," the Shoshone Indian who guided Lewis and Clark through the passes of her native country.

The popularity of the historical pageants which have been given in the Pacific Northwest this year, "How the West Was Won," at Walla Walla; the "Light on the Mountains," the University of Idaho historical drama, and the "Americanus" at the Seattle stadium, are evidence of awakening interest in the traditions of the western country and the pioneer spirit of its founders, those rugged and heroic figures which personify the stuff that men are made of.

While the "Americanus" gave glimpses of scenes down through the entire history of the country, beginning at Valley Forge, and coming down to the World War, still the milestones of the west were not forgotten, and the discovery of gold and California's birth into statehood was impressively portrayed, as was the memorable journey of Captain Lewis and Lieutenant Clark, whose names are perpetuated in such undying monuments as rivers, counties or high schools of the west. May the influence of their heroic conquests never be lost on the minds of the oncoming generations.

For inspiration and thrill, the two most prominent features of "Americanus" were the songs by Mme. Sophia Braslau, who came west for her vacation and incidentally to sing at the pageant, and the closing scene, depicting America as the melting pot of the world.

Mme. Braslau sang "Marcheta," "Sweetest Story Ever Told," and other numbers in deep, rich tones, fied with the class of immigrants now ried to every corner of the great amphitheater. At the opening of the pageant she sang the difficult "Song of the Robin Woman," from the Indian opera, "Shanewis," but the cold of the first night affected her voice and caused her to drop the number from her later programs. The audiences were hearty in their response to her singing and called her back for repeated encores.

In such pageants as "How the West Was Won," and "Americanus," the events of history are brought vividly home as in a stereoscope and made to live in the hearts of the beholder. In the "Americanus" finale the thousands of marching feet keeping time to the martial music of the U. S. Navy band, a large proportion of whose members, by the way, are Filipinos of varying complexions, and the blended colors of the many military and fraternal uniforms massed till they almost filled all available space on the parade ground, produced a lasting impression on the attending crowds.

May we have more pageants of America and the west! They make us to know and to love our land.

Give Origin of Washington Names

Yakima.

Does the word Yakima mean lake water, black bear, or runaway?

All these interpretations of the name of the county, city and river in central Washington are mentioned by Edmond S. Meany, professor of history at the University of Washington, in his discussion of the geographic names of the state recently published in the Washington Historical Quarterly.

Yakima, Professor Meany points out, is one of the most extensively used geographic terms in the state of Washington, being applied to a county, city, river, valley, pass in the Cascade mountains, Indian tribe and Indian reservation.

The name, according to Professor Meany, was first applied to the river and the natives who occupied the land drained by the river. Lewis and Clark, 1805-06, give the name as Tapteal, which they spelt in several ways. Gass, the editor of their journals, gives a number of synonyms, such as "Eyakama."

"John H. Lynch, of Yakima," Professor Meany says, "quotes the pioneer Jack Sptawn as authority for 'lake water,' as the meaning of Yakima. Henry Gannet says the word means 'black bear.' The Bureau of American Ethnology says the word means 'runaway' and that the native name for the tribe was 'Waptailmim' meaning 'people of the narrow river.' David Thompson, of the North West Company of Montreal referred to the Indians on July 8, 1811, as 'Skaenema.' Alexander Ross was with the Astorians, 1811, though his book Adventures of the First Settlers on the Oregon or Columbia River was not published until 1849, in which he uses the name 'Eyakema.' The Wilkes Expedition, 1841, refers to the river by the name as now spelled. The same is true of the railroad explorers in 1853, though they call the upper portion of the river 'Yahinse.' In framing the treaty of June 9, 1855, Governor Isaac I. Stevens referred to the river and tribe as 'Yakama.' Yakima county was established by an act of the territorial legislature approved January 21, 1865.

"Hubert Howe Bancroft describes an interesting epoch as follows: 'Yakima city was incorporated December 1, 1883. Twelve months later, when it had 90 inhabitants, the surveyors of the Northern Pacific railroad laid out the town of North Yakima, four miles distant from the old town, upon a broad and liberal scale, and proposed to the people of the latter that if they would consent to be removed to the new town they should be given as many lots there as they possessed in the old, and have besides their buildings moved upon them without cost to the owners. Such an agreement in writing was signed by a majority of the citizens, and in the winter and spring of 1884-1885 over 100 buildings were moved on trucks and rollers, hotels, a bank, and other business houses doing their usual business en route. This was a good stroke of policy on the part of the railroad, general land commissioner, and the company, as it definitely settled opposition, both to the new town and the corporation, which also received a year's growth of North Yakima in 90 days' time.'

"By act of the state legislature approved January 30, 1917, and to go into effect on January 1, 1918, the city was permitted to drop the word 'North' from its name. The same legislature also changed the name of the older town of Yakima to Union Gap."

MENU FOR THE WEEK

SATURDAY

Breakfast.

Oatmeal — Peaches — Sugar and Cream
Bacon — Toast — Milk
Coffee — Preserves

Lunch.

Mustard Sardines — Potato Cakes
Stuffed Peppers
Bread — Butter — Milk
Cookies — Apricot Conserve

Dinner.

Swiss Steak — Mashed Potatoes
Beet Greens — Tomato Salad
Bread — Butter — Iced Tea
Apple Pie

SUNDAY

Breakfast.

Buttered Potatoes
Tomato and Cucumber Salad
Bread — Butter
Apricot Sherbet

HOMEMAKERS' CORNER

Conducted by
Alice Lindsey Webb, News Editor, and
Lincoln R. Lounsbury, Agricultural Extension Editor,
State College of Washington.

KEEPING HOUSEHOLD ACCOUNTS

"My wife has a better head for figures than I have," said a certain Washington man the other day, as he proudly showed his visitor the neat account book in which "friend wife" had made a record of expenditures for the house and for the poultry yard, garden, and the rest of the farm as well. She was his bookkeeper, in other words. He says it doesn't take her much time, either. She keeps a pad and pencil hanging in the kitchen, and every time there is an expenditure or recipt jots it down; then once a week goes over the items and enters them in their proper places in her book.

Anyone can start a simple system of accounts, without an elaborate course of preparation. There are many aids to be had for one starting. For instance, in Compton's Pictured Encyclopaedia, to be found now in many schools and homes, there is an article under "Accounts," which shows how to keep household cash records, accounts of indebtedness, time sheets, etc. Often some one item of the household expenses runs up too high, and it is not given its proper place in the "high cost of living" until an account book makes it stand out on the page by its size.

Every baby should be weighed at regular intervals. Nothing else tells so accurately whether he is thriving, says Dr. Louis Fischer of the New York Post-Graduate Medical School and Hospital, an expert in children's diseases and health preservation methods. For the first year the baby should be weighed every week; every two or four weeks will be sufficient during the second year.

When the baby is undressed, just before his bath, is the best time to weigh him. The same scales should be used each time, and they must be accurate. Scoop scales are the best for young infants. When weighing baby, undress him, wrap him in a little blanket, and lay him in the scoop of the scales; balance the scales and note the amount; then remove the baby, and after dressing him, weigh the blanket in which he had been wrapped and deduct that weight from the total, the remainder will be the baby's weight.

The average healthy baby weighs from 7 to 7 1-2 pounds at birth. A few ounces are generally lost the first week, but are usually made up the second week, and then the baby should gain 4 to 6 ounces a week up to the sixth month. The gain from the sixth to the 12th month is generally less, usually 2 to 4 ounces a week.

Peach Pastry

Peach Shortcake.

Two cups sugar, 1 cup milk, 5 eggs, 3 cups flour, 3-4 cup shortening, 1 teaspoon baking powder, 1-2 teaspoon salt, quartered peaches.

Cream shortening and sugar together, then add milk, eggs one by one, always beating well after adding each one, flour sifted with baking powder and salt, then extract. Mix and divide into layer tins and bake 20 minutes in moderate oven. Turn out and spread with butter. Put together with quartered and sweetened peaches and pile peaches on top. Serve with whipped cream.

Peach Cobbler.

Sift 1 1-2 cups flour and 1 1-2 teaspoons baking powder with tips of fingers work into flour, 1 tablespoon shortening and when well mixed add 1-2 cup milk.

Peel and slice 4 peaches and mix with 3-4 cup sugar and 2 tablespoons melted shortening. In bottom of baking dish invert a cup. Around this arrange peaches and over all place dough patted out to 3-4 of an inch thickness. Bake in moderate oven until crust is brown and peaches tender. The cup keeps the dough from lying on fruit and becoming soaked with juice.

Peach Crusts.

Roll puff or plain paste, 1-8 inch thick. Cut in 2 1-2-inch squares and bake in hot oven. Cool, press down the center, and arrange on each 1-2 a canned peach, drained from syrup and heated in oven.

Sprinkle with powdered sugar and decorate with whipped cream and a cherry.

Peach Pudding.

Fill a buttered baking dish full of peaches and pour over top a batter made of 1 tablespoon shortening, 1-2 cup sugar, 1 cup flour, 1 teaspoon baking powder, 1 well beaten egg, 1-2 teaspoon salt, 1 cup milk. Bake in moderate oven 30 minutes. Serve with cream.

Peach Canapes.

Fry circular pieces of sponge cake in butter until delicately browned. Drain canned peaches, sprinkle with powdered sugar, few drops lemon juice and slight grating of nutmeg. Melt one tablespoon butter, add peaches, and when heated serve on cake.

Peach Delights.

One quart flour, 3 teaspoons baking powder, 2 tablespoons sugar, 1-2 cup shortening, 1-2 teaspoon salt, milk, 1 egg, 1 teaspoon lemon extract, peaches (fresh or canned), whipped cream.

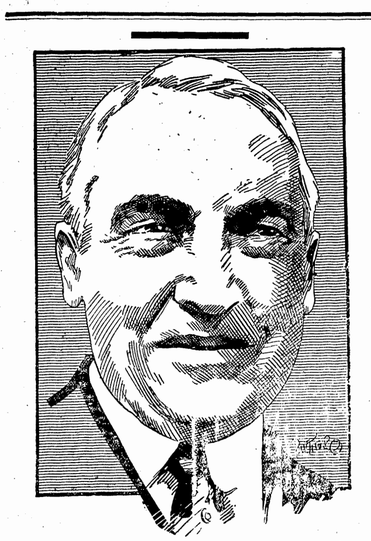
Sift the dry ingredients together then rub in shortening, and extract enough and milk to make a soft dough. Drop mixture into greased gem pans. Place 1-2 peach on each one, fill cavities with sugar and bake in hot oven 25 minutes. Serve with whipped cream. Makes 20 delights.

Spend at least no more for meat than for milk and as much for fruit and vegetables as for meat.

When a dairyman quarrels with his cows, it is a sign of a man who doesn't know his business.

No poor feeder has ever developed high class livestock.

Don't eat spoiled canned food.



WARREN G. HARDING

The death, on August 2, at San Francisco of Warren G. Harding, 29th president of the United States, cast a shadow of sorrow over the entire civilized world. Nations of both hemispheres have felt the far-reaching effect of his constructive administrative policies and thousands had come to know and appreciate the sterling qualities of Harding, the man.

In the short time that the President served as chief executive of the nation he guided the ship of state through the troubled waters of reconstruction following the war and the storms of internal conflicts. It was just two years four months and 29 days from the time of his inauguration at Washington to his death at San Francisco, bringing

Mrs. Warren G. Harding

to an abrupt close a career of public service which began in the Ohio state senate 25 years ago.

Leaves Good Record

The outstanding events of the Harding administration were:

The establishment of peace with Germany and Austria.

The calling of the international arms conference which resulted in the naval limitation treaty and the four-power pact.

Ratification of the treaty with Columbia.

Establishment of the budget bureau for the federal government.

Warren Gamaliel Harding was born in Blooming Grove, Ohio, November 2, 1865, the oldest of a large family of children. At the age of 18 he took a job on a small democratic newspaper in Marion, and began his career as a journalist. On November 26, 1884, he and a chum bought out the Marion Star, of which Mr. Harding was publisher until within a few weeks of his death.

The story of Harding's early efforts to build up the struggling little daily into a powerful political organ is one of alternating disappointments and triumphs for some 14 years before the paper became firmly established and financially independent. Under his control the little paper became a force to be reckoned with and other publishers and his political organ is one did everything in their power to put the Star out of business.

Starts on Political Career

The story is told of how, on one occasion when Harding was attending a political meeting in Chicago, the sheriff took possession of the Star property in the name of creditors. Friends came to the assistance of the young publisher and with a little money that Harding had saved selling insurance, they were able to salvage the paper.

In 1898 the Star was free from all indebtedness and growing steadily. Harding's work had attracted the attention of Ohio republicans and in 1898 he was elected to the state senate. In 1903 he was made lieutenant governor of his state and in 1914 he entered the United States senate, where he served for six years.

At the Republican national convention in June, 1920, Harding was chosen as the Republican candidate and was elected president of the United States on his 55th birthday. He was the first United States senator to be made president.

Early in his years of political service he met William McKinley, to whom his close friends have most often likened him and with whom he had in common a predominant passion for obliteration of class and sectional lines. A friendship sprang up between the two men. Mr. Harding also was close in later days to Theodore Roosevelt, Senators Foraker and Penrose and others high in party counsels.

Mother Given Credit

The Harding family, in which Warren was the eldest son, was a large one and an affectionate one. One of Warren Harding's friends has described him as "just a bundle of sentiment." He loved children, and grieved constantly because he and Mrs. Harding had none of their own. He loved dogs, and said that there was only one man he had really hated in all his life—the man had poisoned a dog.

For 15 years before she died, Warren Harding's mother never failed to receive from her son his regular Sunday gift of flowers. The Harding family was one in which mother and father did not, in their old age, lose close attachment with their children. George T. Harding, the president's father, was complimented on his influence in raising a son who became the leader of his country. "It was not my influence that governed Warren," he said, "but his mother's. Through all his life he has thought of her in connection with everything he has done."

Phoebe Dickerson Harding was an intensely religious woman, who found her greatest opportunity for service in her skill as a midwife, a skill sorely needed by prospective mothers on the farms of half a century ago. She gave religion to her children, and she gave them also the beginnings of their education.

President Was a Baptist.

Few people have known that the president's full name was Warren Gamaliel Jesse Bancroft Harding. Named after a maternal uncle, he took at first the uncle's full name, but early in life found this too cumbersome and kept only the first two portions. The old testament name of Gamaliel linked him definitely with that early American generation in which scriptural names were the rule rather than the exception.

The president was a life-long Baptist and was a trustee of his home church in Marion. He also had been a member of the Elks and Moose fraternities for years and after his election as president he became a thirty-second degree Mason and a Shriner.

Golf was his favorite recreation, but he also liked to fish, although his opportunities for that sport were limited after he came to the White House. He played hard and possessed the faculty of putting all his worries behind him during his recreation hours.

Mrs. Harding a Loyal Helpmate.

Of the many thousands of people who flocked to see and hear the late president on his trip to the Pacific coast, none will be able to think of him without at the same time thinking of the bright-eyed, eager woman, who was constantly at his side and whose friendly smile and warm handclasp she was glad to bestow on all who came. Florence Kling Harding married a struggling Ohio country editor in 1891, eight years before he entered politics, and with him suffered many tribulations before there were triumphs to enjoy.

Florence Kling was wealthy — by rural Ohio standards, while Warren Harding was still poor and unknown. Her father was a banker of Marion county, and he wanted her to marry someone whose standing in the community was at least equal to hers. She disappointed him in her first marriage, which was a short and heart-breaking experience. As a young widow, she had her father's disapproval to fight along with her other troubles. When she met Warren Harding she felt that there could be no mistake this time, and was more or less reconciled with her father, even though he did not consider the match a brilliant one.

Florence Harding threw her energies into the task of helping her husband make the Marion Star a success. She early saw that he had a future in politics, and encouraged him to undertake the hard work that political success in Ohio necessitates. As the Star had prospered, so Warren Harding's political career continued constantly upward, but there were of course moments of doubt and discouragement, when her presence at his side was invaluable in giving him confidence to go ahead.

Coolidge Becomes President.

Routed from his bed by a telegram from George B. Christian, secretary to President Harding, apprising him of the tragedy in San Francisco, Vice-President Coolidge gave out a statement pledging himself to carry out the policies of his dead chief and friend.

He was sworn in as president by his father, who is a notary public, and at whose home he was visiting.

Calvin Coolidge is perhaps better equipped by experience to take up his administrative duties in the White House than was any of his predecessors who have been called to that high office by the death of a president.

Although vice presidents usually have no other duties to perform than that of presiding over the senate, easting the deciding vote when that body finds itself in a tie, Mr. Coolidge has

CALVIN COOLIDGE.

absented his self from its sessions every Tuesday and Friday to participate in the cabinet deliberations. Thus he became familiar not only with all angles of the major public questions, but also with the reasons actuating the president in his decisions.

Having won for himself in large measure the vice presidential nomination by his executive forcefulness as governor of Massachusetts, particularly by his attitude in the police strike, he has kept throughout the Harding administration closely addressed as to the problems of the federal government and has assisted in shaping administration policy by his constant attendance at cabinet meetings.

WASHINGTON NEWS

The general health of Lincoln county is first class and not a contagion exists, according to Dr. Glen Yount, recently appointed county physician.

Efficiency of the portable gasoline pumps now in use by the state forestry department in fighting forest fires was demonstrated last week in a 25-hour battle with the flames in logging works near Issaquah, according to a report to the forestry office.

Cooperative marketing was urged by Congressman Burton L. French as the remedy to secure staple wheat prices for farmers in an address before the Kiwanis club at Colfax. French said that he was opposed to government price-fixing.

Officials of the Mullan Trail association, the organization of which was recently completed at Prescott, have announced a meeting of the executive committee to be held at Dayton in the near future to discuss the establishment of the Mullan trail as a real highway.

The state received $453,703.34 from lands and timber sold at the public land sale last month, the timber receipts totaling $420,586.80, the largest for some time, State Land Commissioner Savidge announced. The appraised value of the lands and timber sold was $427,556.49.

Nearly 500 men will be employed by the state highway department in eastern Washington by September 1, according to Guy Harvey, head of the highway office, who stated contracts for approximately 50 miles of work will be let about August 25. One million dollars will be expended.

The Dominion Silver Lead Mining company near Colville, Wash., has unearthed a body of black sulphide ore, seven feet in width that runs extremely high in silver and lead. The ripest of the apples and knock them to the ground, destroying the market value of the fruit. In years gone by the bluejays did considerable damage in the early part of the apple season, it is said, but not to the extent the crowds are doing now.

If you are remodeling the kitchen be sure and leave space for the cold air closet.

Alfalfa, field peas, vetch and clover build for permanent fertility.

Pocket mice, which are common throughout much of the dry farming country of eastern Washington, are becoming a serious menace to wheat growers in Adams, Franklin, and Benton county, states John Finley, assistant with the biological survey, who has conducted extensive investigations in those sections.

A new concrete bridge being constructed at Colfax will require 2000 barrels of cement, 100 tons of steel bars for reinforcing the concrete, 1400 cubic yards of crushed rock and 700 cubic yards of sand. Forms for the concrete are calling for 150,000 feet of lumber. The bridge will cost over 45,000.

Values of Washington club wheat have been a little more definitely established by the sale of 250,000 bushels of Walla Walla reds in a round lot. This wheat was reported sold at 90 cents delivery on the Columbia river, but it has since been learned that the trading basis was in bulk which would mean 95 cents sacked. If this is to be the price for red wheats, it will bring whites also under a dollar.

That the Great Northern is preparing to move the 1923 apple crop in speedy fashion is indicated by the fact that the road now has all but 610 of its own "reefers" on its tracks, according to good authority. He says that this means that 4800 are now on the line and available for shipping perishables. Four hundred cars are side-tracked on the Wenatchee-Orondo line and 200 are stored between this city and the terminal.

Great clouds of crows are working havoc with the early apple crop in the White Salmon valley, according to advices received at the local offices of the biological survey. The crows swarm down on the trees, peck

SUNBEAM ELECTRIC IRON

Does the Nicest Ironing — Lasts the Longest

RIG-JID

Open End, Folding Ironing Board

IRON IN COMFORT

With the wonderful SUNBEAM ELECTRIC IRON—which never gets too hot; never gives any trouble; always just right; has all the latest improvements and has a double guarantee. And the RIG-JID open end folding ironing table, which is the strongest, lightest and most convenient ironing table ever built. It can't break, warp, sag or bend—and it folds and unfolds almost as fast as you can say it.

The regular price of the Sunbeam Electric Iron and the Rig-Jid Ironing Table is $12.50.

For a short time only we are going to offer the Sunbeam Electric Iron and Rid-Jid Ironing Table (one set to each customer only) at the reduced price of only $9.75

$1.00 Down and $1.00 a Month

Now is the time to replace that old iron that is about ready to be discarded.

The Washington Water Power Co.

Never Opened His Mouth

The farmer and his boy were driving to town with a load of produce and the father had become peeved at the little fellow.

Upon driving up to the store in town, the old man turned the lines over to the boy and said, "Now sit there and keep your mouth shut and people won't find out what a fool you are."

In a few minutes a prospective customer climbed up on the wagon and asked, "Sonny, what are those potatoes worth?" The boy did not answer.

Again the customer inquired, "Sonny, how much are those potatoes?" Still no reply from the boy. The prospect climbed down and, disgusted, snarled, "You must be a durn fool!"

The father soon returned and the boy said, "Pa, I never opened my mouth, and they found it out anyway."

Estimate of Necessary Expenditures

Estimate of probable amount of money necessary for all purposes, to be raised by the City of Genesee, Idaho, for the fiscal year 1923-1924, for which appropriation is to be made:

General fund	$2700.00
Street lighting fund	1300.00
	$4000.00

The amount of money received from all sources for the previous fiscal year was $5316.87.

Approved by the mayor and city council and signed by the mayor, this 6th day of August, 1923.

(Seal) JOHN MEYER, Mayor.

Attest:

W. W. BURR City Clerk. 6-3

NOTICE!

Are you coming to Moscow to enjoy the splendid school advantages this year? If so you will need a good house. Now good houses are scarce, therefore it will pay you to take up the matter at once. If you are interested in buying a home, I have some good bargains which I will be pleased to show you. Some of them I can sell with a small payment down and the balance like rent.

It will pay you to call on

C. H. BRATTON, Realtor,
Room 4, Urquhart Building, Third Street, Moscow, Idaho. 4-4

Cause of Appendicitus

When the bowels are constipated, the lower bowels or large intestines become packed with refuse matter, that is made up largely of germs. These germs enter the vermiform appendix and set up an inflammation, which is commonly known as appendicitus. Take Chamberlain's Tablets when needed and keep your bowels regular and you have little to fear from appendicitus.—For sale at Clark's Drug Store.

The self made man is often all self.

A Busy Man

Not so very long ago, the story runs, a traveling man visited a certain small town and sold the proprietor of the general store an order of jewelry. When the jewelry arrived it was not as represented so the merchant returned it to the wholesale house. The wholesale house attempted to collect the bill, nevertheless, and drew a sight draft on the merchant through the local bank which returned the draft unhonored. The wholesaler then wrote to the postmaster asking the financial standing of the merchant and the postmaster replied that it was O. K. By return mail the wholesaler sold him to collect the bill, and he received the following reply: The undersigned is the merchant on whom you attempted to palm off your worthless goods. The undersigned is the president of the bank to which you sent your sight draft. The undersigned is the postmaster to whom you wrote and the undersigned is the lawyer whose services you sought to obtain for your nefarious business. If the undersigned were not also the pastor of the church at this place, he would tell you to go to hell."—Ex.

Sixty-five Stills Seized

According to the report of the federal prohibition director for the Idaho issued for the fiscal year, 65 stills were seized and destroyed in the state during the past 12 months, as follows:

Number of distilleries seized, 94.
Number of stills seized, 65.
Number of coils seized, 65.
Number of gallons of whiskey seized, 1218.
Number of gallons beer seized, 120.
Number of gallons wine seized, 783.
Number of gallons of mash seized, 13,866.
Number of fermenters seized, 401.
Number of violators apprehended, 329.
Number of cases dismissed, 44.
Number of acquittals, 10.
Number of cases pending, 91.
Number of months imprisonment imposed, 430.
Amount of fines imposed, $47,775.
Amount of taxes assessed, $243-256.59.

Amount of expenditures for all purposes, $36,169.52.

The recapitulation includes an estimate of fines to be imposed on the 91 cases pending, this being $15,000.

The figures from Colonial Marsters office show the total taxes over expenditures to be $26,606.48.

He Was Losing

A negro minister discovered two of his parishioners playing cards on a Sunday—and for money.

"Rastus," said the minister, "don' you know it's wrong to play cards on de Sabbath?"

"Yeh, Passon," answered Rastus, ruefully. But, believe me, ah's payin for mah sins."

Dead Elephants

One of the great mysteries of the natural history world is where elephants go when they die. Curiously enough, the body of an elephant that has died from natural causes has never been discovered either in India or Africa. Among native races there is a widespread belief that, when the beast feel the end approaching, they make their way to some secret place in which to die. The whole question is just as big a mystery as ever, in spite of the fact that many attempts have been made to solve the problem.

The districts where elephants occur in a wild state has been mapped in all directions in hope of discovering the last resting place of the huge animals, but without any result. Quite recently another determined attempt has been made to penetrate the mystery, but up to the present nothing of any value has been discovered. As a matter of fact the problem has more than a scientific interest in it. Any individual who is so fortunate as to find the elephant's grave yard will certainly make a fortune. On this spot there must be a huge accumulation of ivory, a commodity which is constantly increasing in value.

Buys Old Horsepower Relics

An agent representing Henry Ford, the automobile manufacturer, was in this vicinity recently and purchased an old horse-power of Leon Flansburg which had been formerly used for threshing grain.

The machine was purchased in 1892 and was used for threshing until 1901, when it was replaced by newer threshing methods. It was owned by Mr. Flansburg's father and it has remained on the place ever since until it was sold to the Ford interests. It was 12-horse power and was capable of propelling a large threshing machine and it has threshed thousands of bushels of grain.

It was shipped out last week with its destination as Dearborn, Michigan, where Mr. Ford is collecting a large museum of antiquated machinery. It was manufactured by the Buffalo-Pitt company and there is probably no more machines like it manufactured.

It is reported that the same agent purchased one of the first steam threshing engines ever used in this country from parties living in another community.—Palouse Republic.

Threshing Has Started

Ole Flamoe, one of the oldest threshermen in this section of the country, pulled his outfit out Monday evening and his first job was that of threshing barley for John Weber, he having started Tuesday.

Gilbertson Bros., John Lindrud, Cecil Wood and Dr. T. A. Elliot threshed on Monday and it is reported that Walter Herman threshed on Saturday of last week.

DEATH OF PRESIDENT HARDING AT SAN FRANCISCO

(Continued from first page)

the man.

Although slightly less than six feet in height, he carried his 210 pounds without any hint of obesity and his unusually broad and high forehead and heavy, square jaw rounded out an impression of force and distinction.

Contrasting sharply with his almost silver gray hair were markedly thick black eyebrows which almost masked a pair of calm, gray eyes. In repose his face took on the aspect of severity so often seen in his photographs, but when he talked or listened the lines were broken by a smile that radiated cordiality.

Visitors Always Welcome

Mr. Harding was both a good conversationalist and a good listener and he loved to rub elbows with his fellow man. His first official order was that the gates to the White House grounds be thrown open and at the start he received visitors at almost any hour of the day. This took up so much of his time, however, that the establishment of a fixed hour for this purpose was decided upon.

Each day after he had cleared his desk and was ready for lunch he received groups of visitors in the executive offices, shaking hands and exchanging a smile and a good word with each individual. White House officers estimated that an average of 1000 persons called upon him daily. He revived also the more formal functions, such as the New York receptions and the state and diplomatic dinners.

Was Fond of Children

Mr. Harding was very fond of children, though he had none of his own, and Easter egg rolling on the White House lawns was made an annual event. Mr. and Mrs. Harding mingled freely with the little tots and appeared to find much enjoyment in watching them play.

In his rest hours Mr. Harding liked to have around him his personal friends and intimates, in whose company he could put aside the dignity and cares of state and with whom he could swap stories and reminiscences. It was not surprising then that, like Grover Cleveland before him, he frequently slipped away from the White House in the evening to pay informal calls upon former associates in the senate and other close friends.

Golf was Mr. Harding's favorite recreation, and whenever public affairs permitted he sought the links of a Washington country club. His friends of the senate frequently were his opponents and in such matches there always developed a keen, though friendly rivalry. By virtue of his position as an editor and publisher, he participated also in annual golf tournaments of the Washington correspondents.

Gas Down Two Cents

In line with the reduction of the price of gas in other towns, Genesee has reduced the price from 26 to 24 cents a gallon, the reduction being made Tuesday. This is the cheapest gas that has been in Genesee for many months, and the motorists are correspondingly glad.

SUMMONS

In the District Court of the Second Judicial District of the State of Idaho, in and for the County of Latah.

Anna Burns, Plaintiff, vs. John Burns, Defendant.

The State of Idaho sends greeting to the above named defendant:

You are hereby notified that a complaint has been filed against you in the District Court of the Second Judicial district of the State of Idaho, in and for the county of Latah, by the above named plaintiff, to procure a decree of divorce from the said defendant on the grounds of willful neglect and to procure the custody, care and control of a minor child, George Mendham Burns.

And you are hereby directed to appear and answer the said complaint within twenty (20) days of the service of this summons, if served within said judicial district, and within forty (40) days if served elsewhere; and you are further notified that unless you so appear and answer said complaint within the time herein specified, the plaintiff will take judgment against you as prayed in said complaint.

Witness my hand and the seal of said District court, this third day of July, 1923.

HARRY A. THATCHER,
Clerk of said District Court.
(Seal of Court Affixed)
A. H. Oversmith,
Attorney for plaintiff.
Residence and P. O. address
Moscow, Idaho. 1-6

SUMMONS

In the District Court of the Second Judicial District of the State of Idaho, in and for the County of Latah.

William Post, Plaintiff, vs. Nettie Post, Defendant.

The State of Idaho sends greeting to the above-named defendant:

You are hereby notified that a complaint has been filed against you in the District Court of the Second Judicial district of the State of Idaho, in and for the County of Latah, by the above named plaintiff, to procure a decree of divorce on the part of the plaintiff on the ground of desertion.

And you are hereby directed to appear and answer the said complaint within twenty days of the service of this summons, if served within said judicial district, and within forty days if served elsewhere; and you are further notified that unless you so appear and answer said complaint within the time herein specified, the plaintiff will take judgment against you as prayed in said complaint.

Witness my hand and seal of said district court, this 6th day of July, A. D. 1923.

HARRY A. THATCHER,
Clerk of Said District Court.
[Seal of Court Affixed]
By Emma J. Sayles,
Deputy Clerk.

A. H. OVERSMITH,
Attorney for Plaintiff,

THE GENESEE NEWS

VOL. XXXV — GENESEE, LATAH COUNTY, IDAHO, FRIDAY, AUGUST 17, 1923. — NO. 7

WHAT HAPPENED HERE TWENTY YEARS AGO

Grain hay is bringing $7.50 per ton and timothy $10.50.

The city schools will open the first Monday in September, the 7th.

Harry Thatcher is again ready for business at the East End warehouse.

Apples are looking excellent and the crop in this section this year will be a good one. What the price fill be remains to be seen.

Senator Heyburn, while in Washington recently, endorsed State Senator Brigham for forest ranger. The place pays $2 per day.

Farmers of the Big Potlatch are bonsting of one of the largest grain yields in the history of that section. It is claimed that many fields will run as high as 50 and 60 bushels.

Meyer Bros. now occupy the large room in the creamery building with their stock of buggies, hacks, etc., and have excellent quarters. Adair's saloon has been moved into the room formerly occupied by the creamery.

Follett Bros. expect to occupy their handsome new store building by September 1. The mason work is completed and aside from putting in the glass front the carpenters are nearly through. The making and putting in place of the new counters and shelving will take some little time.

Nels Flamoe claims the honor of hauling the first load of 1903 crop to the Genesee market and the same was received by T. Driscoll Monday. The load was of barley threshed on the reservation and was excellent in quality. John Dresher held Mr. Flamoe a close second, reaching town an hour later with a load of barley for The C. E. Wood company. The quality of this load was also good and Mr. Dresher is well satisfied with the yield.

J. T. Peterson, register of deeds of Brookings county, South Dakota, a son-in-law of Mr. and Mrs.' T. R. Qualey, living east of town, has been paying his relatives an unexpected visit the past week. He is well pleased with the country in general and it would not surprise us to learn that he has decided to locate here among us at some future day. He expects to leave Monday for a visit to Portland and other coast points and will then return home.

A Thrilling Picture

A picture which combines magnificent scenic beauty with a thrilling story is "The Valley of Silent Men," adapted from James Oliver Curwood's famous novel of the same name as a Cosmopolitan production, and released by Paramount.

Those farilliar with the novel, which ran serially in Good Housekeeping Magazine in 1920, will recall that it is the story of the Royal North West Mounted Police, with the Rocky Mountains for a background. It is a picture of tremendous power, baring as it does the souls of five men and a woman who are isolated in a picture of unsurpassed scenic beauty.

The picture which features Alma Rubens at the head of a most powerful cast, is coming to the opera house Saturday. It is well worth seeing.

Gas War On In Central States

A gasoline war, brought about by the governor of South Dakota buying several thousands of gasoline and selling it at 16 cents a gallon, has spread to several other states and the Standard Oil company has ordered a reduction in price in the central states of 6.6 cents per gallon and independent companies have made a reduction of five cents per gallon—and they claim they are now selling below cost of production. Sure thing, they are (?). That is the way they have managed to stack up billions of dollars—because they have sold so much of it below cost.

At any rate the war has not yet hit Genesee, but it is sincerely hoped that the war may at least bring about a reasonable retail price for the entire country. Time was when gas could be bought in the West at 12½ cents a gallon, and the Standard Oil company did not go broke, either.

Graveling Approaches

The Mark P. Miller company, which recently put in new approaches to the warehouse leased to the Vollmer-Clearwater company, has had gravel spread at the approaches to the driveway which makes it certain that they will be able to get up the grade regardless of weather conditions.

It would seem that the good people of Genesee have come to know the real value of gravel and more of it has been spread in various places in the town this summer than has been done for many years past.

Heavy Wheat Yield

The heaviest yield reported thus far is that threshed on the Frank Snelling place by Isaac Isaksen, the average being better than 50 bushels, and the amount of smut comparatively small.

Beginning to Swarm

Boy Scout Notes

Due to the fact that some of the towns have not yet reported as to the amount of their budgets collected, it will be impossible to make a complete financial statement as promised last week. However, the amounts to be raised in each town in the council are as follows:

Moscow	$1200
Pullman	1200
Colfax	1200
St. Maries and St. Joe	600
Potlatch	250
Genesee	250
Rosalia	200
Tekoa	200
Garfield	200
La Crosse	200
Oakesdale	200
St. John	100
Endicott	100
Malden	100
Thornton	50
Bovill	50
Deary	50
Julianetta	50
Kendrick	50
Elk River	50

Scout Executive W. E. Crowe, with Scout Chauffeur Cecil Warren, left Sunda for the training school at Diamond Lake, Washington, later to proceed to the coast for a lecture at the Seattle Scout chautauqua. They were accompanied by Scout Stanton Walker of Oakesdale, Washington.

Miss Lois Smith, stenographer, will be in charge of the office during Mr. Crowe's absence and anything that deserves immediate attention will be taken care of by her. Her services will be available between the hours of 1 and 2. Mr. Crowe, however, will not return before the last of the month.

State Wealth Totals $347,867,567

Idaho's taxable wealth exclusive of public utilities for the year 1923 is $347,867,567, it was announced Thursday by E. G. Gallett, state auditor, who has received the last of the assessment rolls from the 44 country assessors of the state.

In keeping with the state auditor's predictions, the valuations in the several countries has fallen off. The 1923 valuation of the state as reported by the assessors is $3,501,071 under the reported valuation of last year. It is approximately $4,200,000 short of the value placed on the property of the state by the equalization board of last year, says The Stateaman.

The work of this board began Monday and it is expected by state officials that after the weeks's session the state's wealth, as reported by the assessors, will be increased. The board consists of Governor C. C. Moore, A. H. Conner, attorney general; F. A. Jester, secretary of state; E. G. Gallet state auditor, and D. F. Banks, state treasurer.

In addition to equalizing the assesmens on various kinds of property in the state, the board also fixes the valuation of all public utilities in the state for taxation.

Making Much Butter

Word is received in Spokane that the creamery located at Republic is making 1,000 pounds of butter a day, and the entire product is sold on the Spokane market, according to P. H. Walsh, president of the Ferry County State Bank of Republic. Mr. Walsh reports that the production has fallen off somewhat with the rush of harvest and has been running higher than 5,000 pounds of butter a week. The surplus was formerly sent to Pacific Coast points.

ASSESSED VALUATION OF COUNTY SHOWS INCREASE

The assessed valuation of real estate in Latah county for 1923, shows a substantial decrease from that of 1922, due to the fact that the valuation of farm land is being brought down from the high peak of war times, to a figure conforming somewhat with normal conditions, and also conforming with the valuation placed in other countries in the state, the Latah county valuation being, until this year, considerably above the valuation placed in other countries.

The real estate valuation for 1923 is $13,582,366, as against $14,626,240 for 1922, a reduction of $1,143,874, according to figures secured from H. A. Thatcher, county auditor. The total valuation of all property in the county is $15,688,692, and the total exemptions, $291,326.

The abstract from the assessment rolls shows 210,182 acres of agricultural land in the county, valued at $37.73 an acre, making the total value of agricultural land $7,930,684. There are 148,273 acres of timber, valued at $13.89 an acre, or $2,060,660. Cut over land is valued at $290,192 and grazing land at $627,264. Business and residence lots are valued at$685,715. Improvements on land outside the incorporated towns is $705,025; improvements on business or residence lots, $799,470.

Flour and grist mills, elevators, and warehouses, are assessed at $101,950, and the brick and planing mills at $291,240. Brick and ice plants show a valuation of $4,700.

The assessment rolls show 5,725 head of cattle in the county, the assessed valuation of which is $149,044. There are 2,743 milk cows. There are 4,239 head of horses and mules, valued at $1,747.82. Of this number 2,804 are work horses, valued at $47.24 each.

The county has 652 head of sheep, 45 head of goats, and 1,967 head of hogs, vauted on the rolls at $16,126.

Lumber is assessed at $693,314, wood and posts at $22.824,and sawlogs at $17,500. Machinery is assessed at $13,830, and merchandise at $295,035. Farm implements are assessed at $89,955, and other small items make up the total of the assessment.—Star Mirror.

Resurfacing Progressing

The resurfacing of the state highway from Genesee to the north has been progressing in good shape and from reports the road is in better condition than it has been for a long time. It is only hoped that the filling in of the deep ruts will be as good as said to be—and if so, the people of this section will have nothing to complain of. Upkeep work is being carried on in good shape and it is the intention of the state to keep it from getting in the condition it was last year—and here's hopin' they succeed.

Eighteen Thousand Cars

Eighteen thousand cars of wheat will be handled this season by the Northwest Wheat Growers' association, according to Walter J. Robinson, manager of the organization. The crop this year, Mr. Robinson declared, will almost double that of last year.

Spokane has received several cars of grain handled by the association so far this season, according to Mr. Robinson, but the bulk of the crop will be held in country elevators until market.

Angling for the finny tribe is great sport, but catching them is a great deal more satisfactory.

COMMUNITY SPIRIT SHOWN IN GRAVELING STREET

A fine community spirit was shown by the residents of what is commonly known as "Church Hill," when they "chipped-in" and raised enough money to gravel the street leading north from the Hasfurther Hardware store. The money for the work was furnished by those named in the following list with the exception of that for street intersections, which was furnised by the city. Dr. W. H. Ehlen and Chas. Geltz also paid for the gravel used in the alley leading to their barns. The following list shows who's who in the matter:

Joe Hasfurther	$10.00
Geo. Follett	10.00
Wm. Smolt	10.00
T. Driscoll	10.00
F. C. Shonk	10.00
G. E. Taber	10.00
Mrs. Etter	10.00
Chas. Geltz	10.00
B. B. Caldwell	10.00
R. E. Emmett	10.00
Dr. W. H. Ehlen	10.00
Grant Clark	10.00
F. E. Dicus	10.00
Leon Follett	10.00
Mrs. Johanna Christenson	10.00
Fred Hampton	5.00

Those interested in the matter are very much indebted to L. J. Baker, highway maintenance man, for valuable suggestions on preparation of the road bed and to W. R. Hickman, street commissioner, for staying up all night and overseeing the work.

While of course there are a few who donated that do not live directly on the hill, they felt interested enough in the enterprise to donate for the betterment of the town.

The graveling of this street adds very materially to the apearance of the town and will prove invaluable to the residents of the Hill during bad weather, especially, and those who were instrumental in having the work done, as well as the donors, deserve the thanks of all public spirited citizens.

A fresh coat of gravel was also spread on the street running north from the bank corner to the alley.

Students From Many Points

Word has been received from Cheney that 25 counties of Washington, 13 other states of the union, the territory of Alaska and the province of British Columbia have sent students to attend the 1923 summer session of the normal school.

They number 1064, four more than enrolled a year ago. Of that number, 231 are making for diplomas or certificates, which establishes another new record for the institution. There are now 125 non-state students registered.

Buys Confectionery Store

Arthur Mayer on Monday closed a deal for a confectionery store at Troy—"The Sweet Shop"—of which he took charge on Wednesday of this week. Mr. Mayer has had considerable experience in this particular line and will undoubtedly give the good people of Troy one of the best stores of its kind they have ever had. His many friends here wish him success in his new venture.

New Telephone Man

C. A. Turner of Clarkston has taken over the position of telephone manager for the Home Telephone company. Mr. Turner is an old head and was recently with the Pacific States Telephone company for three years.

Death of Mrs. Heinrich

Mrs. William Heinrich passed away at the home of her father, M. H. Odberg, in Genesee, on Saturday, August 11, 1923, after a lingering illness of many months, aged 32 years.

Anna Odberg was born on a farm near Genesee March 20, 1891, and had resided here all her life with the exception of a few months during the past year when she and her husband went to California for the benefit of her health, returning to Genesee a short time ago. The trip seemed to benefit her for a time but she gradually failed until the end.

Deceased was maried to William Heinrich February 19, 1917. They had no children and those left to mourn their loss, besides the husband, are her parents, Mr. and Mrs. M. H. Odberg, and three brothers, Henry, Ellis and Lewis, all of whom reside in the Genesee community. A sister, Mrs. Gustafson, preceeded her to the Great Beyond a little more than a year ago.

Funeral services were held at, the home, Rev. Wolff officiating, and burial was made in the Norweigian cemetery north of town.

Special music was furnished by a quartet composed of Mrs. W. W. Burr, Mrs. Arthur Springer, W. E. English, and Rev. Wolff.

The pallbearers were Cornelius Sweeney, Ed Wahl, Thos. Ingle, Albert Halseth, Clarence Trail and John Krier.

We wish to convey our appreciation and sincere thanks to all those who in any way assisted us during our late bereavement.

William Heinrich,
Mr. and Mrs. M. H. Odberg,
Henry Odberg,
Ellis Odberg,
Lewis Odberg.

Picnicked at Winchester

Mr. and Mrs.W. M. Herman and Mr. and Mrs. Geo. Boliou left real early Sunday morning for Winchester, going via Waha, where they stopped and "made" breakfast, continuing their journey by way of Forest, reaching Winchester in due time, where they spent the day.

Mr. Herman reports that Winchester has one of the finest auto tourist parks to be found in the entire Northwest—barring none—and that on Sunday there were fully 40 or 50 cars parked therein.

The road is good all the way from Genesee, it being graveled nearly the entire distance.

Surprise Farewell Party

Mr. and Mrs. Smith Printy were very pleasantly surprised Monday evening when some relatives and friends gathered to have a social time. Mr. Heppner decorated the big cake which was the center attraction, and it was worth seeing. The party was in honor of Mr. and Mrs. Printy who left Tuesday morning for Puyallup, Wash., for a few months visit with relatives. Those present were: Mr. and Mrs. Cris Steltz, Mr. and Mrs. Paul Heppner, and children, Mr. and Mrs. Henry Jutz, Mrs. Chas Ingle and Children, and Mrs. Joe Riel.

Has Poisoned Hand

Andy Meyer is suffering with a badly poisoned right hand, it being swollen to more than twice its natural size. However, a physican was consulted and the hand treated and it is getting along as well as could be expected.

SEMI-LOCAL NEWS CLIPPED FROM EXCHANGES

Threshing Begins

Once more the hum of the thresher is heard in the land, and by next week the early whistle will be heard, waking all the town people until they get used to the noise.—Colton News-Letter.

Weather Cooler

The weather is considerably of a fall nature these days and makes one think something of getting in his winter supply of fuel. The nights are very cool, while the daytime temperature is not what is expected in August. It's fine weather for harvesting and farmers are making the most of it.—Kamiah Progress.

Good Yield at Culdisac

Threshing in the Culdisac section is getting in full swing and yields of 35 and 40 bushels to the acre are being reported. John Maynard from the Tom Beall was in town Wednesday looking for harvest hands and reports harvest in full blast in his section and many fields are turning out excellent yields.—Culdisac Enterprise.

Ship Cattle

Five carloads of the finest beef that has been shipped out of Cottonwood in many days left the local stock yards, Tuesday morning on their way to Seattle, the cattle were shipped by John Baer. They were of excelent condition for beef. Those selling the stock to Mr. Baer were: Frank Hatke, 15 head; Fred Enneking, 6 head; Monastery, 6 head; Frank Kaufman, 17 head; Jim Crea, 5 head; Henry Hatke, 8 head; Frank Enneking, 33 head; August Schroeder, 37 head and H. G. Chicane, 5 head.—Cottonwood Chronicle.

First Home Grown Canteloupes

John Schweiter on Tuesday morning brought to Asotin the first home grown canteloupes of the season, of the Rockyford variety. Melons are fully a month behind the ripening of the melons of a year ago, due no doubt to the cold, rainy spring, which really prevailed until close to the first of July. Last year Asotin-grown water melons were on the market as early as the seventeenth of July, whereas this year, it will still be in the neighborhood of two weeks more before this variety of melons is available. My, but won't they taste good when they do begin to ripen?—Asotin Sentinel.

Meat Market Broken Into

A rear window of the City Meat Market was broken in Friday night or early Wednesday morning, after the screen had been torn off, and the window raised and the market entered. The thief or thieves very evidently were after cash only as nothing had been bothered with the exception of the cash register, from which all money had been removed by the owners.

From the number of idle men and boys in town, many of whom will take only specified jobs, it behooves every business man to see to it that those to the bank or other safe place for keeping. Several places of business were entered last summer and some very good hauls made, which should be a lesson and a warning to be more careful this season.

Of course not all the men who come to town are classed among those who would do such a thing by any means, but this will serve as a warning. Again it may be local talent who has taken advantage of the fact that many strangers are in town and figure the blame would naturally rest upon those who come seeking work.

Poultry and Egg Corporation

Articles of incorporation will be filed shortly by the Poultry and Egg Producing corporation, an auxiliary of the farmer's union, according to J. Q. Adams, president of the latter organization. At a meeting of the board of directors of the poultry organization, held in Spokane recently, it was announced that more than 32,000 hens had been signed up for that organization. Mr. Adams believes that it will be necessary that 50,000 be signed up before the organization can be incorporated.

The new company has had several offers from reliable agencies to handle the poultry and eggs, but have been dealing temporarily with Pacific egg producers.

Better Be Careful

County Game Commissioner E. H. Rosenkrantz, of Colfax, who hatched an incubator full of Chinese pheasants from eggs furnished by the state game farm, turned 55 half-grown chicks loose recently. He reared them in a yard covered with wire, and the game birds were half wild when liberated. The commission has offered a cash reward of $50 for the arrest and conviction of any person killing Chinese pheasants in Whitman county.

Ladies Aid Will Meet

The ladies aid of the Federated churches will meet in the Social house on Wednesday afternoon, August 22.

Anyway motorists still allow pedestrians to use the sidewalks.

MY LADY'S MONEY

An Episode in the Life of a Young Girl

By Wilkie Collins

INSTALLMENT NO. 14.

South Morden was then (and remains to this day) one of those primitive agricultural villages, passed over by the march of modern progress, which are still to be found in the near neighborhood of London. Only the slow trains stopped at the station; and there was so little to do that the stationmaster and his porter grew flowers on the embankment, and trained creepers over the waiting room window. Turning your back on the railway, and walking along the one street of South Morden, you found yourself in the old England of two centuries since. Gabled cottages, with fast-closed windows; pigs and poultry in quiet possession of the road; the venerable church surrounded by its shady burial-ground; the grocer's shop which sold everything, and the butcher's shop which sold nothing; the scarce inhabitants who liked a good look at a stranger, and the unwashed children who were pictures of dirty health; the clash of the iron chained bucket in the public well, and the thump of the falling ninepins in the skittle ground behind the public house; the horse pond on one bit of open ground, and the old elm tree with the wooden seat around it on the other side—these were some of the objects that you saw and some of the noises that you heard in South Morden, as you passed from one end of the village to the other.

About half a mile beyond the last of the old cottages modern England met you again under the form of a row of little villas, set up by an adventurous London builder who had bought the land at a bargain. Each villa stood in its own little garden, and looked across a stony road at the meadow lands and softly rising wooded hills beyond. Each villa faced you i nthe sunshine with the horrid glare of new red brick, and forced its nonsensical name on your attention, traced in bright paint on the posts of its entrance gate. Consulting the posts as he advanced, Mr. Troy arrived in due course of time at the villa called The Lawn, which derived its name apparently from a circular patch of grass in front of the house. The gate resisting his efforts to open it, he rang the bell.

Admitted by a trim, clean, shy little maid servant, Mr. Troy looked about him in silent amazement. Turn which way he might, he found himself silently confronted by posted and painted instructions to visitors, which forbade him to do this, and commanded him to do that, at every step of his progress from the gate to the house. On one side of the lawn a label informed him that he was not to walk on the grass. On the other side a painted hand pointed along a boundary wall to an inscription which warned him to go that way if he had business in the kitchen. On the gravel walk at the foot of the housesteps words, neatly traced in little white shells, reminded him not to "forget the scraper." On the doorstep he was informed, in letters of lead, that he was "Welcome." On the mat in the passage letters black wools burst on his attention, commanding him to "wipe his shoes." Even the hat-stand in the hall was not allowed to speak for itself; it had "Hats and Cloaks" inscribed on it, and it issued its directions imperatively in the matter of your wet umbrella—"Put it here!"

Giving the trim little servant his card Mr. Troy was introduced to a reception room on the lower floor. Before he had time to look round him the door was opened again from without, and Isabel stole into the room on tiptoe. She looked worn and anxious. When she shook hands with the old lawyer the charming smile that he remembered so well was gone.

"Don't say you have seen me," she whispered. "I am not to come into the room till my aunt sends for me. Tell me two things before I run away again. How is Lady Lydiard? And have you discovered the thief?"

"Lady Lydiard was well when I last saw her, and we have not yet succeeded in discovering the thief." Having answered the questions in those terms Mr. Troy decided on cautioning Isabel on the subject of the steward while he had the chance. "One question on my side," he said, holding her back from the door by the arm. "Do you expect Moody to visit you here?"

"I am sure he will visit me," Isabel answered, warmly. "He has promised to come here, at my request. I never knew what a kind heart Robert Moody had till this misfortune fell on me. My aunt, who is not easily taken with strangers, respects and admires him. I can't tell you how good he was to me on the journey here, and how kindly, how nobly, he spoke to me when we parted." She paused and turned her head away. The tears were rising in her eyes. "In my situation," she said, faintly, "kindness is very keenly felt. Don't notice me,Mr. Troy."

The lawyer waited a moment to let her recover herself.

"I agree entirely, my dear, in your opinion of Moody," he said. "At the same time, I think it right to warn you that his zeal in your service may possibly outrun his discretion. He may feel too confidently about penetrating the mystery of the missing money, and, unless you are on your guard he may raise false hopes in you when you next see him. Listen to any advise that he may give you by all opinions, consult my older experience, and hear what I have to say on the subject. Don't suppose that I am attempting to make you distrust this good friend," he added, noticing the look of uneasy surprise which Isabel fixed on him. "No such idea is in my mind. I only warn you that Moody's eagerness to be of service to you may mislead him. You understand me?"

"Yes, sir," replied Isabel, coldly; "I understand you. Please let me go now. My aunt will be down directly, and she must not find me here." She courtesied with distant respect, and left the room.

"So much for trying to put two ideas together into a girl's mind," thought Mr. Troy, when he was alone again. "The little fool evidently thinks I am jealous of Moody's place in her estimation. Well, I have done my duty, and I can do no more."

He looked around the room. Not a chair was out of its place, not a speck of dust was to be seen. The brightly perfect polish of the table made your eyes ache; the ornaments on it looked as if they had never been touched by mortal hand; the piano was an object for distant admiration, not an instrument to be played on; the carpet made Mr. Troy look nervously at the soles of his shoes; and the sofa (protected by layers of white crochet-work) said as plainly as if in words, "Sit on me if you dare!" Mr. Troy retreated to a bookcase at the further end of the room. The books fitted the shelves to such absolute perfection that he had some difficulty in taking one of them out. When he had succeded, he found himself in possession of a volume of the "History of England." On the flyleaf he encountered another written warning: "This book belongs to Miss Pink's Academy for Young Ladies, and is not to be removed from the library." The date, which was added, referred to a period of ten years since. Miss Pink now stood revealed as a retired school mistress; and Mr. Troy began to understand some of the characteristic peculiarities of that lady's establishment which had puzzled him up to the present time.

He had just succeeded in putting the book back again when the door opened once more, and Isabel's aunt entered the room.

If Miss Pink could, by any possible conjuncture of circumstances, have disappeared mysteriously from her house and her friends, the police would have found the greatest difficulty in composing the necessary description of the missing lady. The acutest observer could have discovered nothing that was noticeable or characteristic in her personal appearance. The pen of the present writer portrays her in despair by a series of negatives. She was not young; she was not old, she was neither tall nor short, nor stout nor thin; nobody could call her features attractive, and nobody could call them ugly; there was nothing in her voice, her expression, her manner, or her dress that differed in any appreciable degree from the voice, expression, manner, and dress of five hundred thousand other single ladies of her age and position in the world. If you had asked her to describe herself, she would have answered, "I am a gentlewoman"; and if you had further inquired which of her numerous accomplishments took highest rank in her own esteem, she would have replied, "My powers of conversation." For the rest, she was Miss Pink, of South Morden; and when that has been said all has been said.

"Pray be seated, sir. We have had a beautiful day, after the late long-continued wet weather. I am told that the season is very unfavorable for wall fruit. May I offer you some refreshment after your journey?" In those terms, and in the smoothest of voices, Miss Pink opened the interview.

Mr. Troy made a polite reply, and added a few strictly conventional remarks o nthe beauty of the neighborhood. Not even a lawyer could sit in Miss Pink's presence, and hear Miss Pink's conversation, without feeling himself called upon (in the nursery phrase) to "be on his best behavior."

"It is extremely kind of you, Mr. Troy, to favor me with this visit," Miss Pink resumed. "I am well aware that the time of professional gentlemen is of especial value to them, and I will therefore ask you to excuse me if I proceed abruptly to the subject on which I desire to consult your experience."

Here the lady modestly smoothed out her dress over her knees, and the lawyer made a bow. Miss Pink's highly trained conversation had perhaps one fault—it was not, strictly speaking, conversation at all. In its effect on her hearers it rather resembled the contents of a fluently conventional letter, read aloud.

"The circumstances under which my niece Isabel has left Lady Lydiard's house," Miss Pink proceeded, "are so indescribably painful—I will go further, I will say so deeply humiliating—that I have forbidden her to refer to them again in my presence, or to mention them in the future to any living creature besides myself. You are acquainted with those circumstances, Mr. Troy, and you will understand my indignation when I first learned that my sister's child had been suspected o ftheft. I have not the honor of being acquainted with Lady Lydiard. She is not a countess, I believe? Just so! her husband was only a baron. I am not acquainted with Lady Lydiard, and I will not trust myself to say what I think of her conduct to my niece."

"Pardon me, madam," Mr. Troy interposed. "Before you say any more about Lady Lydiard, I must really beg leave to observe—"

"Pardon me," Miss Pink rejoined, "I never form a hasty judgment. Lady Lydiard's conduct is beyond the reach of any defense, no matter how ingenious it may be. You may not be aware, sir, that in receiving my niece under her roof her ladyship was receiving a gentlewoman by birth as well as by education. My late lamented sister was the daughter of a clergyman of the Church of England. I need hardly remind you that, as such, she was a born lady. Under favoring circumstances, Isabel's maternal grandfather might have been Archbishop of Canterbury, and have taken precedence of the whole House of Peers, the princes of the blood royal alone excepted. I am not prepared to say that my niece is equally well connected on her father's side. My sister surprised—I will not add shocked—us when she married a chemist. At the same time, a chemist is not a tradesman. He is a gentleman at one end of the profession of medicine, and a titled physician is a gentleman at the other end. That is all. In inviting Isabel to reside with her, Lady Lydiard, I reepat, was bound to remember that she was associating herself with a young gentlewoman. She has not remembered this, which is one insult; and she has suspected my niece of theft, which is another."

Miss Pink paused to take breath. Mr. Troy made a second attempt to get a hearing.

Miss Pink paused to take breath. Mr. Troy made a second attempt to get a hearing.

"Will you kindly permit me, madam, to say two words?"

"No!" said Miss Pink, asserting the most immovable obstinacy under the blandest politeness of manner. "Your time, Mr. Troy, is really too valuable, and even your trained intellect can excuse conduct which is manifestly inexcusable on the-fact of it. Now you know my opinion of Lady Lydiard, you will not be surprised to hear that I decline to trust her ladyship. She may, or she may not, cause the necessary inquiries to be made for the vindication of my niece's character. In a matter so serious as this—I may say, in a duty which I owe to the memories of my sister and my parents—I will not leave the responsibility to Lady Lydiard. I will take it on myself. Let me add that I am able to pay the necessary expenses. The earlier years of my life, Mr. Troy, have been passed in the tuition of young ladies. I have been happy in meriting the confidence of parents, and I have been strict in observing the golden rules of economy. On my retirement, I have been able to invest a modest, a very modest, little fortune in the Funds. A portion of it is at the service of my niece for the recovery of her good name; and I desire to place the necessary investigation, confidentially, in your hands. You are acquainted with

This scene is in the Capitol at Washington, D. C., where your Senator and Congressmen rise to remark in stentorian tones of the needs of your district and state. Up until now, the floors have been strong enough for any heavy debate. However, workmen are busy strengthening same. Perhaps the architect has heard of the powerful voice of Magnus Johnson, the new Senator from Minnesota.

WASHINGTON NEWS

Apple producing sections of the state will materially increase vinegar production as a result of a favorable rail rate secured from the Interstate Commerce commission.

Clarence E. Long, formerly sheriff of Spokane county, was recently appointed warden of the state penitentiary at Walla Walla, as a result of the resignation of John W. Pace.

Residents of 97 towns within a 100 miles radius of Spokane are to celebrate Inland Empire day, September 4, at the Spokane Interstate Fair and Livestock show, September 3 to 8.

The commercial club of Sprague recently ordered 2,000 copies of a pamphlet, setting forth the advantages of Sprague and the surrounding country, to be distributed to people interested in that section.

The 270 state banks and six trust companies operating in this state had deposits aggregating $138,476,000 at the close of business on June 30, according to figures just made public by John P. Duke, supervisor of banking.

Hot weather during July not only reduced the anticipated yield of wheat in the Big Bend country, but also seriously impaired the quality of the grain, according to Director D. A. Scott of the department of conservation and development. Director Scott recently returned from an extensive tour of the Big Bend.

Eastern Washington highways will be favored in the road and bridge contracts on which the state highway department opened bids Tuesday, August 7. All but one of the jobs will be for construction work on arterial highways in the eastern part of the state.

An extra heavy shot in the quarry furnishing rock for the concrete in the new $45,000 bridge which is being constructed on Main street, near the courthouse in Colfax, has covered the rock crusher and all the tools with loose rock.

A memorial park in honor of Harrington men who were killed in the World war is being planned as the result of conferences between civic and fraternal committees, the next of which will be held October 5.

With first shipments of steel on the way, double shifts are at work on the steam shovel excavating for Seattle's new $4,000,000 hotel, the Olympic. It is planned to sign the construction contract this week and every effort will be made to have the hotel ready for business in early July next year.

A naval board has recommended the expenditure of $25,000,000 on naval establishments on Puget Sound in the next twenty years, and congress is asked this winter to appropriate $828,000 for the Bremerton navy yard for the fiscal year 1925.

It is reported that the Lantz sawmill at Miles is preparing to deliver several million feet of lumber to the Central Washington railway for shipment east. A ferry is being put in over the Spokane river near the mouth to get the lumber across, as the bridge has been condemned for heavy loads.

The Ellensburg Amusement company, organized to assist the Kittitas county fair board, in handling the rodeo and amusement features of the 1925 county fair, has been incorporated at Olympia. The company pays no salaries, and all profits go to the development and improvement of the fair grounds.

The Pacific northwest will produce a record fruit crop, both as to quantity and quality this season, in the opinion of J. S. Robinson, sales manager of the Earl Fruit company.

A stone pestle and other stone tools were found with part of the skull, part of the right jaw, and several other bones of the skeleton of an Indian, in the earth of a gravel pit 7 miles from Pullman on the Moscow-Pullman road when workmen were excavating for a rock crusher recently. A movement is afoot to add the relics to the Indian life exhibits of the State College of Washington museum.

Washington prunes will take the place of southern molasses as a flavoring for chewing tobacco in at least one big cut plug plant. One car of prunes has already been shipped for this purpose, with 25 more to follow. After extensive tests, the prune juice flavor is said to give the leaf a delicate taste all its own, which is expected to popularize "squirtin' tobacco" more than ever.

IRRIGATION CONGRESS WILL MEET IN VALE

The Oregon Irrigation congress will convene for the thirteenth annual meeting in Vale, Oregon, on October 2, 4 and 5.

About ten men, all of national repute, have been secured for the program of the meeting, and they will speak on every phase of irrigation and drainage. The executive committee of the congress has been busy preparing this program during the past two months, and this year's program will be very interesting and instructive.

Another County Starts Ton Litter.

The Washington Ton Litter contest was introduced into Kittitas county recently with the enrollment of two litters of purebred Chester Whites and one litter of purebred Berkshires. It is the object in the contest to raise a ton of pork from one litter of pigs in six months' time.

Reduce Livestock Commissions.

Schedules of livestock commission rates at Chicago, Omaha, Kansas City, and St. Paul, which have been under consideration by arbitrators of the packers and stockyards administration of the United States department of agriculture, will be amended as a result of the report and award recently made public. The new rates represent reductions in selling charges and it is estimated that producers and shippers patronizing these markets will save approximately three-quarters of a million dollars a year in commissions.

Livestock Increasing Crop Yields.

Livestock is paying S. D. Cornell, who lives southeast of Grandview, Mr. Cornell keeps a good herd of Holstein cattle and raises Duroc Jersey hogs. He uses the manure on his farm and gets results. Where the average alfalfa farm is yielding at the present time less than four tons per acre, Mr. Cornell is securing an average yield of from six to eight tons per acre.

USE WHEAT TO FATTEN LAMBS

Stock Man Says Wheat Equal to Corn—Tests Give Good Results.

CUT MARKETING CHARGES

Reduce Schedules at Terminal Stock Yards—Livestock Makes Better Crops.

"As a feed for fattening lambs, wheat has been used only to a very limited extent," says Howard Hackedorn, professor of animal husbandry at the State College of Washington. "Some lamb feeding trials were reported a number of years ago from the Montana experiment station, wheat and red clover hay being used. In these tests 22 black-faced lambs, weighing an average of 70 lbs. each at the beginning of a 95-day feeding test, gained 25.34 lbs.—a little over a quarter of a pound a day. That is a good average gain.

"The lambs consumed an average ration of 81 lbs. of wheat and 2.04 lbs. hay per day. They were fed about a third of a pound more hay than they consumed. It required 7.6 lbs. hay and 3.02 lbs. wheat per 100 lbs. gain, on the basis of feed eaten, or about a third more hay on the basis of hay fed.

"These results compare very favorably with those of experiments conducted for two years at the Washington experiment station, where lambs were fed 3-4 lb. shelled corn and all the first-cutting alfalfa hay they would eat, which averaged 2.69 lbs. per day. These lambs, 100 in all, made an average daily gain of .275 lbs. each for 60 days.

"The cost of feeding a lamb 95 days (based on the Montana wheat feeding experiments) and assuming the cost of hay to be $8 in the stack, and wheat at 80c per bu. at the farm, would be $1.02 for hay and $1.62 for wheat. If the feeder-lambs cost 10c per lb. and weighed 60 lbs. each, the cost per head would be $6, and the cost of the feed would be $2.04, so that the fat lamb at the feed-lot gate would cost about $8.04, exclusive of loss, interest, risk and labor.

"A average lamb should gain 25 lbs. when fed as these were. Thus the 85 lb. fat lamb would have to sell for $9.50 per 100 lbs. to just break even, exclusive of loss, interest, risk and labor. The normal loss, judging from the Washington experiment station results the past 2 years, for some 2500 lambs fed at the irrigation station, should not be more than 2 per cent. The manure should be worth the labor on most farms, and the interest could be figured at whatever one had to pay.

"As a feed for breeding ewes on the farm or range, I would expect wheat to be equivalent to corn."

Interest in Horses Increasing.

The Adams County Colt club was organized again this year with a membership of ten boys. They made their first appearance at the annual Ritzville Horse show. County Agent Donaldson reports that more interest is being taken in the horse business than for several years past. Stallion owners report that the number of mares being bred is greater than for the past five years.

When a man is so mean that he will feed moldy fodder to a blind horse he has about reached the limit.

IRRIGATION CASE

(To be Continued.)

the case, and the case naturally goes to you. I could not prevail on my—I really could not prevail on myself—to mention it to a stranger. That is the business on which I wished to consult you. Please say nothing more about Lady Lydiard; the subject is inexpressibly disagreeable to me. I will only trespass on your kindness to tell me if I have succeeded in making myself understood."

WHAT EDUCATION MEANS TO THE MEN OF TODAY

At the time the French guillotine was taking its toll of seventy lives a day, some men contended that the millennium would soon arrive. Others were just as sure that civilization was on the road to destruction. Here was a period of conflicting ideas and aims which in a way is paralleled by the conditions of today.

The work of the French guillotine, bloody as it was, accomplished little; but the spreading from one end of Europe to the other of new ideas, customs, and traditions, opened the way for progress in the development of democratic institutions and the placing of personal responsibility upon each individual.

When the French guillotine was working smoothly under the direction of the committee of public safety, men and women of judgment and learning were quickly condemned. It was feared that with their knowledge they might become tyrants. The Red revolution demanded above everything else, equality. One of the men who went to his death in Paris was the greatest chemist of the century. The revolutionary tribunal that condemned him made the bold assertion that the French people did not need wise men or savants.

Today we find in America, in England, in France, in Central Europe, in Russia, many of the worst and some of the finest things to be found in the French revolution. In each of these nations on one side is the revolutionary tribunal, or group, insisting that whatever is is wrong; that progress cannot be made without a complete overturning of all national institutions.

On the other side are men—good men—who insist that there can be no change without loss. Neither of these groups is right. After the tremendous upheaval following the great World war there must be changes in our laws, in our institutions, and in our aims.

Some people insist that all change means progress; others fear that deviation from the established order of things means ruin. Both are wrong; but in a democracy like our own, it requires real leadership, real judgment in the weighing of facts and issues to bring about those changes and advances that will be of enduring benefit. A spirit of mere negation, or of loyalty, is not leadership.

Most men and women are honest. That is why our democracy will endure. But no great people can go forward in peace and prosperity unless there can be good faith and real cooperation, based on a clear understanding of public issues; and no man can get a proper understanding of public issues, or co-operate, who is afraid to study both sides of a question.

The public schools of America were established on the belief that democracy is based on an intelligent and cooperating citizenship. The corollary of this theory is the belief that public education will train competent and unselfish leaders so that they can act with wisdom and judgment.

Unrest is the after-effect of the World war that touches every civilized nation. In each of the defeated countries, with one exception, there has been revolution and the overturning of the previous form of government. In the victorious countries the type of government has been threatened, though not changed. No intelligent student of history can fail to appreciate the crises through which these countries are passing.

Here in America, far removed from the battle zone, free from many of its irritating aftermaths, there have been strikes, accompanied by hatred and violence. This attitude has not been confined to industry; in politics and religion there have been intolerance and animosity, reflecting an attitude in direct conflict with the ideals for which the World war was fought. At no time in our history have the people been more extreme in their views, so imperative, or so contradictory in their demands.

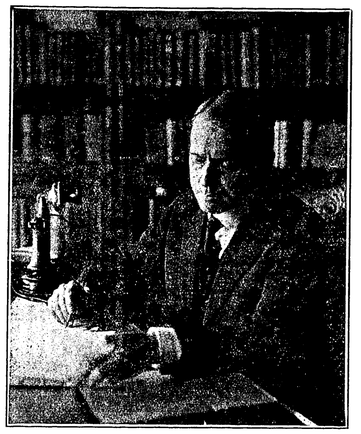
In a despotism, force must be used frequently; a despotic government could not last for a single day without force; anarchy would be loosed in a moment if coercive power were to be abandoned. That is typical of an autocratic government which tries to impose its will upon a people. But in a democracy force is used only in crises, at times when people lose their moral balance because of a great catastrophe, or nation-wide financial depression. Then it is, and only then, that a democratic people is justified in the use of force. If force must be used continuously the country that invokes it can no longer be considered a successful democracy.

The man who is properly educated in college, or out of college, knows there is no short cut to prosperity and he is willing to study both sides of a question. He believes prosperity is based largely on individual industry and economy and cannot be obtained through the enactment of laws any more than the making of paper money can increase the wealth of a people.

A properly educated citizenship can always distinguish between the essential and the non-essential aspects of public questions. If this were not true, democratic government could not exist. It is this sifting of wheat from chaff that preserves the individual, and eventually, the nation.

The one who is truly educated does not lose faith in his fellows during a crisis. He knows that if given a chance the great majority of his fellow citizens will do the right thing. All of us at times are tempted to do things and say things that are dangerous, self-destructive; but in the end, sanely balanced thinking and wise leadership will prevail. It is the business of the college-trained man or woman to see that it does prevail. One who has gone through college to graduation and failed to learn this great lesson has wasted, to a large extent, four years of his life.

It may seem at times that the road we follow has many byways and steep places; but to him who thinks in a straight line the road will always be straight, leading to a greater vision, to greater opportunity, to greater service to his fellows, to himself and to unborn generations.—Pres. E. O. Holland, State College of Washington.



E. O. Holland, President, State College of Washington.

CO-OPERATIVES DO LARGE BUSINESS

Of 4,925 farmers, buying and selling organizations in 1921 more than 23 per cent did a business ranging from $100,000 to $200,000 and more than 15 per cent did an annual business between $70,000 and $100,000 according to figures recently compiled by the United States department of agriculture. Over 82 per cent of the associations reporting did an annual business not to exceed $200,000.

Sixty per cent of the associations doing an annual business of a million dollars or more are located in the Pacific Coast states, and comprise nearly 12 per cent of all the associations in that territory, the figures show.

WORLD NEWS NOTES.

Extraordinary temperatures never before recorded here have been experienced in the south of France. It was 111 in the shade at Toulouse, an unprecedented heat.

Parliament of the Irish Free State has dissolved in preparation for the general elections to be held next month.

The United States has made a gain of 7 per cent in sales or explosives to foreign countries. More revolutions must be in process of incubation or foreign farmers are clearing stump land. Double the amount of alcohol was exported, both denatured and wood. Whether or not the woodpeckers of France are to be used in taking the wood out of the wood alcohol is a matter for conjecture.

The historically famous Isle of Elba is, contrary to general opinion, not just a place for exiling political enemies, but the source of some 500,000 tons of iron ore annually.

Only once in the history of Canada was the gold production record set in 1922 exceeded, and that was in 1900, when the Yukon placers reached the peak of their yield. During 1922 1,263,364 ounces of gold were mined in the Dominion. The value is set at $26,116,050, an increase of 36 per cent over the previous year's figures. In 1900 1,350,057 ounces of gold were mined and the value was $27,908,153.

MORE WOOD CONSUMED HERE THAN IN ANY OTHER COUNTRY

The United States uses more wood than any other country. In fact the consumption in this country equals about two-fifths of the entire consumption of the world, or, expressed in round figures, about 22 1-2 billion cubic feet, declares the forest service, United States department of agriculture. The per capita consumption in this country is 212 cubic feet, of which 119 cubic feet, or a little more than half, is saw timber, and the balance consists of cordwood, continues the department's report, which was recently printed for public distribution.

Including the losses by fire, insects, and disease, the total drain on the country's forests is close to 25 billion cubic feet. At the present time this country is growing only about 6 billion cubic feet. However, according to the data contained in the report, if the entire forest area of the country—some 470,000,000 acres—were placed under intensive forestry almost 27 billion cubic feet of timber could ultimately be produced each year. This amount would exceed the present drain on our forests by a relatively small margin.

TIMELY HINTS

By EXTENSION SERVICE SPECIALISTS

Agricultural Engineering — Watch your drain outlets; clean away the little silt bar that has formed in front.

Farm Crops—Plan now to sow a portion of your field with the finest seed you have. Let that be your seed plot.

Apiculture — (Firewood sections) Remove comb honey sections as rapidly as capped over. (Clover sections) Give plenty of room for the queen and workers as fall storing commences.

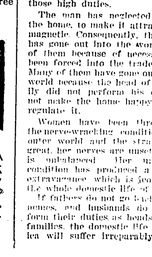
Cooking—Always avoid if possible, making alterations on edges of patterns. Those which are necessary to alter width and lenght, should be made through body of pattern.

Dairy—Produce clean milk by milking from clean healthy cows with clean hands into small top sterile pails and cool quickly to 50 degrees.

Horticulture—Do not overlook the necessary propping. Good pruning and thinning makes a lot of propping unnecessary, but some weak limbs and crotches must be assisted with a prop.

Poultry—Take another look for mites; they multiply rapidly in hot weather.

Plant Pathology—Now is the time to secure copper carbonate for treating wheat and oats. Use two ounces for each bushel of wheat and three ounces for each bushel of oats.



PAPER IS LATEST FORD BY-PRODUCT

HARDWOOD SCRAPS MAKE HIGH GRADE CARDBOARD BY NEW PROCESS.

Wood pulp produced from hardwood for use in paper making is the latest attainment at the River Rouge plant of the Ford Motor company.

It is the first time in the history of the paper manufacturing industry that hardwood has been successfully converted by what is known as the "soda process" into pulp so that it could be utilized in the production of paper, and therefore is an achievement of outstanding importance. Heretofore spruce, poplar and similar soft woods have been looked upon as the only kinds available for paper manufacture.

Experiments covering several months were carried on before the River Rouge plant paper mill finally developed a process whereby hardwood could be used in the making of pulp. Now manufacture is being successfully carried out on a large scale with plans under way for increasing production as soon as new equipment can be installed.

The development of the new process enables the Ford Motor company to use all of the scrap pieces from its body-building plant at River Rouge, thus effecting a new economy in lumber conservation.

Production at the mill at present is confined to that of a superior quality binder board, 1075 to .030 of an inch thick, of firm body, water proof and exceptionally durable.

The mill, operating on a twenty-four hour schedule, daily produces 26,480 finished pieces and in addition turns out 1,000 boxes for shipping purposes. This latest development at the River Rouge plant is in keeping with the company's general policy of eliminating waste wherever possible and of continually setting new and higher standards of manufacture so as to bring the utmost in quality.

It is half-made bargains that make trouble. Make your agreements complete in every point and then write them down.

Livestock—1923 conditions indicate that full feeding and an early market will make the most profitable road for the pig.

Farm Management—Study crop and livestock estimates for information on the supply of different farm products.

MAN IS TO BLAME

If our women are unbalanced or unseated or out of place, what is the cause? Who is to blame? Who brought about this chaos? There is but one answer. Her God-decreed protector is to blame. Man is wholly responsible.

Woman's place is home. Her throne is the domestic circle. She didn't leave it of her own volition She didn't sacrifice her place voluntarily. Man is wholly responsible for the unbalanced condition of woman. It is his business to provide and protect. And it is his business to exercise the firmness discipline necessary to a perfect home

He has utterly failed. He has failed through indulgence, because of a lack of courage, a sense of responsibility, and a willingness to face his plain duty. He has practiced indulgence until he has made the woman extremely extravagant

The average girl hates work. She spises domestic responsibility, and is criminally conspiring to avoid those high duties.

The man has neglected to build the home, to make it attractive and magnetic Consequently, the women has gone out into the world Many of them because of necessity have been forced into the trades to live Many of them have gone out into the world because the head of the family did not perform his duty did not make the home happy, did not regulate it.

Women have been thrown into the nerve-wrecking conditions of the outer world and the strain is too great, her nerves are unstrung she is unbalanced Her unbalanced condition has produced a state of extravagance which is jeopardizing the whole domestic life of America

If fathers do not go back to their homes, and husbands do not perform their duties as heads of their families, the domestic life of America will suffer irreparably.

IDAHO

The reduction works of the Caribou Mining company, near Beauty bay, Lake Coeur d'Alene, including crusher, mills and concentrating table, have been tested for purposes of adjustment, and ore will be started through the works within a few days, according to a statement from G. R. Scott, president of the company.

Interstate commerce commission authorized the Oregon Short Line to construct 2.6 miles of line near Nampa, Idaho, to connect with the Boise branch and permit main line trains to run through Nampa without switching.

Priest River can boast of an exceptionally good health record, having had only one death in three months, May, June and July, the one death being on July 30. The town recorded 40 births in the first six months of 1923.

A revised bulletin on "Housing Farm Poultry" has been prepared in the office of the university extension division and is available for distribution. The publication is a revision of extension bulletin No. 42.

About 15 carloads represents the cherry crop grown at Juliaetta and vicinity this year. The cherries were Bings, Lamberts, and Royal Annes. Except for the Royal Annes the growers received 10 cents per pound.

The Idaho county fair dates have been set for October 10, 11, 12. On the finance committee is H. C. Matthiesen of Cottonwood. John Funke will have charge of the swine department and Joe McDonald of the cattle department.

The Boundary County fair will be held this year on Thursday, Friday and Saturday, October 4, 5 and 6, at the fair grounds west of Bonners Ferry.

Twenty-one million four hundred two thousand five hundred seventy dollars is the amount expended by Idaho during the two-year period ended December 31, 1922, according to a detailed report on receipts and disbursements prepared by State Budget Officer George W. Lewis and submitted to Governor C. C. Moore.

Galli Curci's Youngest Rival.

She is little nine-year-old Valman Mae Vaumgardner, daughter of a farmer in Skagit county, Wash., whose voice, Science, says, is as perfect as the human voice can be. Her voice is birdlike, greatly resembling that of Galli Curci, and it has phenomenally wide register. She is singing before clubs all over northwestern Washington, and her voice is soon to reach wider audiences through radio broadcasting. Her parents have been urged to place her in the hands of teachers in the East, but they have decided to keep her a farmer lass until she reaches her twelfth year.

Watch the other fellow, he knows more about some things than you do. If he has any interesting information, take it away from him.

It makes it hard for a girl to have to decide between the plowboy with the freckles and the one with the pink shirt.

A drunkard is like a camel in that he has a mean disposition and can get along with very little water.

When a dairyman quarrels with his cows, it is a sign of a man who doesn't know his business.

If everybody was satisfied with things as they are, civilization would be at a standstill.

IDAHO UNIVERSITY APPROVES CYANIDE

Experiments There Show New Poison Best Yet Discovered—Cost Is Reasonable.

"Calcium cyanide in the powder form has been used in an experimental way for poisoning ground squirrels by the Idaho Agricultural Experiment station through its departments of animal husbandry and agricultural chemistry. The poison dust in a finely divided state is injected into the squirrel burrows with a hand duster of the sort used in spraying small fruits. From these preliminary trials, calcium cyanide gives more promise for controlling squirrels than any of the other methods employed so far. There is promise that the cost of the material will be reasonable compared with the results."

The foregoing paragraph was taken from the News Letter of the University of Idaho, showing that the use of calcium cyanide promises to become popular in Idaho, as it has in Spokane county and other parts of eastern Washington.

Sen. Hiram Johnson Home from Europe

Sen. Hiram Johnson, home after four months in Europe, said, "I am thinking not of politics, either of myself or any individual. There was no domestic politics in my talk in New York last week. If I am able in the ensuing months, I shall talk generally on international relations in the light which our country, in my very humble opinion, should maintain."

A drop of oil will make a wood-tick let go his grip.

"Can for Proper Nourishment" Should Be Peace Time Slogan

Recent investigations relative to the American diet makes one realize that the slogan "can to be properly nourished" should replace the war slogan "can to save."

The nutrition work carried on throughout the country has emphasized the need of definite food standards, and the lack of sufficient fruits and vegetables of the right kinds the whole year.

For proper nourishment according to present standards, each person in the family, excepting infants, should have the year around, the following vegetables:—

Vegetables (other than potatoes or dried beans) twice daily; greens twice weekly; tomatoes or oranges, twice weekly; fruits, twice daily.

These foods are valuable for their vitamines and minerals which help to maintain health and produce growth; and cellulose, (or roughage) which helps to prevent constipation.

One woman defined a budget as "something which makes you worry before you spend instead of after."

The food preservation budget should cover the months when the garden does not produce. Ordinarily, one-half of the supply may be stored for winter use or be purchased fresh in the market. Dried fruits and vegetables may also be used. The following budget is a guide for estimating the necessary amounts of vegetables:

Vegetable	For One Person for Eight Months. Servings, week.	Servings for 8 mo.	Servings per qt.	No. qts. needed.	Family of 5
Tomatoes	2	64	8	8	40
Greens	2	64	8	8	40
String or Wax Beans	1	32	8	4	20
Baby Beets or Carrots	1	32	8	4	20
Peas and Corn	1	18	9	2	10

Greens include asparagus, chard, beet tops, spinach, dandelions and other green leaf vegetables.

Squash, parsnips, turnips, beets, carrots, salsify, onions should be stored or purchased fresh so that there will be enough for one serving of each per week for each member of the family. Two servings per week of cabbage should be provided. An estimate for a family of five is as follows: 56 lbs. of squash, 22½ lbs. parsnips, 45 lbs. turnips, 45 lbs. beets, 12 lb. each of carrots and salsify, 36 lbs. onions, 40 lbs. cabbage. These vegetables should be stored carefully, and some allowance made for spoilage.

Attention Threshermen

WE ARE entering into the harvest season this year with a splendid stand of wheat. However, there is considerable smut and the straw will be very heavy. Both of these conditions tend to increase the chances for fire. The commonest cause of fire in a wheat field is a dust or smut explosion in the separator, usually caused by static electricity.

With this in mind, the Northwestern Mutual Fire Association has placed a fire prevention engineer in the field and has supplied its agents with a limited number of wiring sets. These sets can easily be installed on a separator by the owner. Full directions accompany each set. These are given to the threshermen free of charge, on one condition only—and that is that they be properly applied to the separator.

We now have a number of these sets and will be pleased to give them to owners of separators upon application.

Lewiston-Clarkston Fair

The big cowboy hats of many colors bearing the slogan "Scratch 'im Cowboy" is the official designation of the Lewiston-Clarkston fair, which opens in Lewiston on September 11. These hats made their official appearance on Wednsday of this week, and the report comes from Lewiston that the ladies are to take on the fair colors beginning September 1.

The poster advertising for the fair is now being placed over central Idaho and southeastern Washington, and while it deals largely with cowboys, Indians and racing, the real setting of the Lewiston show is in comprehensive exhibits that will be representative of the resources of the entire region. The state, the county, the national government, and the two national record associations are joining with the Lewiston organization this year in building up such a substantial department that this fair is being recognized as one of the important development factors in the Northwest. This part of the fair has been advertised by the premium list and the newspapers, while the posters are intended to appeal to those seeking amusement and entertainment.

W. W. P. Has Nice Office

The Washington Water Power company now has one of the nicest offices and show rooms to be found in the Inland Empire in a town of this size and Manager Jack Barnes says they are now better than ever equipped to give prompt and efficient service in this territory.

At their new place of business on Main street they have on display a large line of electrical goods of all kinds—from the largest Hughes Hot point electric ranges and Thor washing machines to the smallest electrical apparatus to make the home work easy and pleasant as well as lights of all sizes.

Just now they are making a special price on ironing boards and irons and Mr. Barnes reports a good sale on these articles as well as a good business in all other lines of electrical equipment.

A glance at their cozy equipment and office, as well as their supply of electrical goods, may help you to decide as to just what you want in that particular line.

Threshing Going Good

Harvesting and threshing is going on in this section in full blast. While only a portion of the grain has been cut to date, threshing of the early cut grain is going on in god shape. While no yields have been officially reported, they are estimated to be from 25 to 50 bushels per acre, which will make a fair average throughout this section.

Some considerable rust in the low places has been reported, but on the whole the amount is negligible. Smut is also reported in some localities but it is said there will not be as much as was at first reported.

Jake Wicks reports the first car shipment sent out from this territory, he having sent out a car for the Elevator company last week from Leon the grain having been bought from Nick Jacobs.

Notice of Election

Notice is hereby given that an election of the qualified voters of Independent School District No. 2, of Latah county, Idaho, will be held on Tuesday, September 4th, 1923, in the school house, between the hours of 1 p. m. and 6 p. m. of said day, for the purpose of electing two trustees, whose term will be for three years, and one trustee for one year to fill out the unexpired term of Julius E. Nordby, resigned.

Dated this 8th day of August, 1923.

By order of School Board of Independent School District No. 2.

7-3 ROBT. EMMETT, Clerk.

For Sale

Twenty acres half mile south of Genesee. Dandy place for one who wants to keep cows; 3 acres pasture with running water; 12 acres was in hay; balance grain. Have small orchard, also chicken house, sheep shed, turkey pens, wood shed and garage. PERSONAL MENTION

Miss Sylvia Evans left Monday morning for Spokane for a visit with friends.

Mrs. Henry Craft was a Saturday morning passenger for Cheney for a short visit.

Mrs. Chas. Geltz was a Monday passenger for Lewiston for a visit with relatives.

Miss Helen Fruith arrived Tuesday from Spokane for a visit at the John Friederichs home.

Miss Lillian Luvaas of Moscow was a visitor at the Glen Sampson home on Thursday and Friday.

Mrs. Nick Fleischman and niece returned to Uniontown Tuesday after a visit here with relatives.

Miss Lucile Gray arrived last week from Seattle for a visit with her mother, Mrs. Eliza Gray.

Mrs. F. W. Loncosty and children left Wednesday morning for Shelby, Montana, for a month's visit with Mr. Loncosty.

Miss Elaine Heitfield arrived Saturday evening from Lewiston for a visit at the home of Mr. and Mrs. Ray Edwards.

Miss Carrie Mae Hickman and Miss Ethel Nelson returned home Friday from Lewiston where they have been attending normal.

Mr. and Mrs. Frank Kraut returned to their home at Spokane Wednesday after a visit here at the home of their son, Chas. Kraut, and family.

Mrs. E. O. McAllister and children left Monday morning for Paradise, Montana, to join Mr. McAllister. They expect to make their home there.

Misse Johanna and Katherine Dwyer, and Miss Viola Weber returned home Friday after a few weeks spent at the normal school at Lewiston.

Mr. and Mrs. Smith Printy were Tuesday morning passengers for Puyallup, Washington, where they expect to spend the next few months with relatives.

Mr. and Mrs. J. P. Gowland of Los Angeles, California, and Mrs. Clarence Qualey and children of Wenatchee, Washington, are visit at the home of Mr. and Mrs. W. A. Ingle.

Mr. and Mrs. W. J. Davee went overland to Tekoa Wednesday for a short stay. Mr. and Mrs. Davee expect to remove from Tekoa to Lewiston where Mr. Davee has secured a position on the Lewiston Tribune.

Mr. and Mrs. Waskey of Oswego, Kansas, and Mrs. C. J. Abrams of Hillyard, Washington, left Tuesday for their homes after a visit at the F. E. Dicus home. Mrs. Waskey and Mrs. Abrams are sisters of Mrs. Dicus.

Mrs. A. A. Butterfield arrived Thursday from Pullman for a visit with her parents, Mr. and Mrs. John Lawson.

Mr. and Mrs. F. E. Lambert and family and Mrs. Arthur Mayer and baby went overland to Walla Walla Wednesday for a visit with Mr. and Mrs. D. Harold McGrath. Mrs. McGrath and Mrs. Lambert are sisters.

Misses Elizabeth and Mary Sampson of Hunters, Washington, and Mrs. Larird and two children of Spokane departed Thursday morning for their homes after a short visit here. The Misses Sampson visited with relatives while here.

Mrs. Ida Wheeler, Miss Pauline Steltz, Miss Katherine McMahon, and Miss Ida Evans left Tuesday morning for Spokane for a few days stay. Miss Bernadine Hasfurther is in charge of Mrs. Wheeler's store while Miss Grace Willoughby is looking after Miss Steltz' store during their absence.

Wm. Springer and Lyle Luther arrived overland Saturday from Wetaskiwin, Alberta, for a visit with Mr. Springer's mother, Mrs. A. Springer. Mr. Springer has been in Canada for the past 11 years. They left Sunday for Spokane, accompanied by Mr. Springer's mother, who will visit relatives there for a time before going to Hunters, Washington, for a visit with her daughter, Mrs. Dave Sampson, and family.

Return From Outing

Rev. A. F. Wolffe and family returned last Friday evening from a two-weeks camping trip to Twin Lakes, Spokane, Ritzville, and other points. They report a splendid time.

W. J. HERMAN COMPANY

COST LESS

than "cheaper" overalls because they give more wear

You're willing and glad to buy an overall that will give you longer wear. Yet it's hard to tell the difference between overalls, as they're all blue and look about alike But here's a test that will settle the point of longer wear for you.

Toss the ordinary overall on the scales and read the weight. Then place the same size in an Oshkosh B'Gosh Overall on the same scale. Watch the indicator go past the previous mark, one—two—three—four—five—yes, sometimes six or seven ounces!

That's the story! Heavier denim has longer, stronger threads and more of them to the inch, hence it wears longer and gives you more for your money.

There is no other overall that will weigh as much as Oshkosh B'Gosh! There is no other overall that will wear as long or actually cost as little. These are not idle statements. We will gladly prove the former to you in our store. You can prove the latter by trying an Oshkosh B'Gosh in actual service. That's the final test. Remember, "they must make good or we will."

OSHKOSH B'GOSH
UNION MADE OVERALLS

Insist on these numbers
101—Elastic Back Overall
201—High Back Overall
301—Coat to Match

FOLLETT BROTHERS MERCANTILE COMPANY

The Sunday School Lesson

BY

Rev. A. Theodore Smith, B. L., M. S.

STEPHEN THE MARTYR

Lesson for August 19.

Lesson text—Acts 6:8-15; 7:54-60.

Time—34-37 A. D. Place—Jerusalem.

Golden text: "Who shall separate us from the love of Christ? Shall tribulation, or anguish, or persecution, or famine, or nakedness, or peril, or sword?" Rom. 8:35.

The election of the Seven marks a distinct advance in the history of the early church, fully as great as the introduction of Abraham in Genesis opens up a new epoch. The early apostolic days are marked with wondrous revelations and marvelous powers, but from the days of Stephen onward the experiences of the church are very similar to the experiences of the modern church.

I.—STEPHEN THE SPIRIT-FILLED MAN.

Acts 6:8-15. Of the seven deacons elected in accordance with the directions of the apostles, Stephen and Phillip stand out as leaders, not only among the board of which they formed a part, but God used these two laymen to lead the church in its mission to the Gentiles, the greatest step ever taken by the Christian church. Of these two men, Shephen was the greater. He is mentioned first among the seven and is the one described as "full of faith and of the holy spirit." (v. 5). The term "full" is applied to him repeatedly: "Full of faith" (v. 5); "full of grace" and "full of power" (v. 8); and twice he is referred to as "full of the holy spirit," vs. 5, 55). His address to the council in chapter 7, shows he was "full of the Word"; also "full of courage"; and verse 60 reveals him as "full of forgiveness." These are all characteristics of the presence of the holy spirit in the life.

Stephen was elected to "serve tables" (6:3). The modern word, "deacon," means "servant." But Stephen was like Paul (Rom. 11:13), in that he "magnified his office" (A. V.), or (in R. V.) "glorified his ministry." The church needs men, who make their office great and glorify their ministry. No wonder Stephen "did great wonders and miracles among the people."

"Synagogue of the Libertines, etc." v. 9. Libertines were freed Jewish slaves. The "Libertines," "Cyrenians," etc., each had a synagogue of their own in Jerusalem, where according to the rabbis, were 480 synagogues.

"Brought him to the council." The Jewish sanhedrin, the same council that tried and condemned Jesus, the highest Jewish court.

"This holy place," (v. 13) indicates that the trial took place in the temple, either in a special council chamber or else in an open court.

False witness charged him with speaking against Moses and blaspheming against God, but God made his face to shine "as it had been the face of an angel," (Ex. 34:29-45).

II.—STEPHEN'S VISION OF GOD. Acts 7:54-56.

Stephen's sermon revealed the sin of Isreal in all ages and also laid bare the hearts of his hearers, but they did not repent. On the contrary the truth, proclaimed, enranged them. Remember this was the council that condemned Jesus. Jesus had stirred these very men to fury by declaring, "Hereafter ye shall see the Son of Man sitting at the right hand of power." Stephen, one of Jesus' followers, hurls at them the same message, which they had used to condemn Jesus, and bears testimony that he actually sees Jesus enthroned at God's right hand. Instantly this sanhedrin is in an uproar and his fate is sealed.

"Son of Man," Jesus, the embodiment of perfect manhood is enthroned today "at the right hand of power." Jesus' manhood is not a mere memory, but a reality. "All authority hath been given unto Me in heaven and on earth" (Mat. 28:18). The right hand of God represents the energy of His omnipotent, unlimited power. The Perfect Man is today omnipotent. This is also the place for the judge.

"Standing." Christ is usually represented as sitting at God's right hand. The fact that He was here seen standing, indicates His readiness to help. Christ is actively interested in each one of His followers. He was about to receive the spirit of His faithful witness.

Christ had been seen after His resurrection. He had been seen ascending. He was now seen by Stephen in heaven at God's right hand. This proves His deity. The God-Man is enthroned.

III.—STEPHEN'S DEPARTURE. Vs. 57-60.

"They stopped their ears," being unwilling to hear the truth, when it hurt them. A riot followed right under the noses of the Roman guard in the castle of Antonio, overlooking the temple court. The holy place is now filled with murders.

This occurred in the year 37 A. D. Pilate had been recalled after 10 years of tyranny, in 35 A. D. The imperial throne also was vacant in the spring or early summer of 37. Hence the Jews at once assumed greater liberties and were able to put Stephen to death.

"Cast him out of the city." Stoning was the official method of execution among the Jews for the sin of blasphemy. The witnesses were required to cast the first stones. Then others could join in, if necessary. Opportunity was given for prayer in official executions, but this was not. Stephen prayed.

"Whose name was Saul." (v. 58). First mention of Saul, later known as Paul. It is probable that this account of the death of Stephen came to us through Paul, for he was a companion of Luke, the author of Acts, for years. Saul never forgot that sight.

Stephen's prayer was similar to the dying prayers of Jesus. Compare v. 59 with Luke 23:46; and v. 60 with Luke 23:34. He departed to be with Christ (Phil. 1:23). In a public debate in London, Joseph Parker was suddenly asked by his infidel opponent, 'If God hears the prayers of His people, why did not God answer Shephen, when he was being stoned to death?" For a moment Dr. Parker knew not what to say. Then, as he believed, the Spirit prompted the answer, "God did hear Stephen's prayer and answered him in a more marvelous way than by saving him from death. God enabled the dying martyr to pray for his murderers, "Lord, lay not this sin to their charge."

This is Buck, a German police dog, who was brought to this country as a pup by W. S. Smith, of Spokane. Buck's mother served in battle with the German army and his father received four citations for service with the French during the World war. He is owned by Joel Hindman of Spokane.

HOMEMAKERS' CORNER

Conducted by

Alice Lindsey Webb, News Editor, and Lincoln R. Lounsbury, Agricultural Extension Editor, State College of Washington.

Perhaps one of the first things bought for the new home, if the bride's wedding gifts have not included one, is the clock. How many stop to consider what the first clock was like, how it happened to be called "clock," and all the various forms it went through before it blossomed into the Big Ben that gets us up in the dark of winter mornings?

In olden times people did not have to catch trains (there weren't any), and minutes were not so precious usually as they seem now in an age of hurry and speed. The first clocks did not have minute hands. Some of them did not even have a face. Indeed, the word clock comes from the French "cloche," bell, because a bell rung at the end of the hour was the means of telling time. Before that, of course, the first men and women who wished to measure time had to do so by the light and dark, the position of the sun or moon or stars, and by shadows cast.

We still have sundials as reminders of those days. Ancient Babylonians were the first to hit on the sundial method of measuring time in intervals which, roughly, corresponded to our hours. Up to the 14th or 15th century this was the main method of computing time when the sun was shining. Because it could not be used at other times, the Egyptians invented the "clepsydra" or water clock which marked off the hours by the dripping of water through a tiny hole. The Greeks and Romans copied it, and when they wanted to know the time they looked to see what mark was exposed in the jar side by the lowering of the surface of the dripping water, or sometimes by the mark reached on the side of the bowl below which received the dripping water. Sometimes the weight of the water was used to send a pointer around a dial. That is an approach to the clock idea, isn't it?

In the middle ages the hour-glass was brought into use, sand being substituted for water, and run through a tiny hole where one glass bulb joins another. The quantity of sand was carefully measured out, so that it took just an hour for it all to run through. Wouldn't we feel abused if we had to wind the clock every hour? The hour glass had to be turned over for each new hour it marked, so that sand should be in the bulb above. Often hour glasses were used in churches to mark the length of the sermon. Small glasses marking three minutes instead of an hour are still used in some places for timing the boiling of an egg.

No one seems to know just when, in the middle ages some time, the form of clock was invented which is still in use; one in which a weight attached to a cord or chain sets a series of geared wheels going which operate a point traveling around a dial, as in the "Grandfather's Clocks" and cuckoo wall clocks. Various devices were used to regulate the speed at which the weight falls, but the best and simplest, the pendulum, did not come into use until after Galileo discovered, in the 17th century, that the successive small vibrations of the pendulum were made in equal time.

Some of the earliest clocks were very wonderful indeed and took years to make. A famous old clock in Strasbourg told not only the minutes and the hours of the day, but the day of the week, the month of the year, and the position of the moon and planets. At various times processions of tiny figures crossed a stage, including a cock that really crowed. Another remarkable performing clock can still be seen in Munich, Germany. A clock in Venice has two bronze giants that strike a bell on the hours. Other clocks had figures that appeared and danced to a strain of music each hour. The cuckoo clocks, in which a little bird pops out of a tiny door and calls its two notes as many times as will announce which hour it is, are still common today. Many of these are carved now in the long dark, cold winters in the Swiss mountains by the men and boys snowed up in their cabins, among the most notable woodcarvers of the world.

The largest clock in the United States was built for the Colgate factory in Jersey City in 1908. The two hands together weigh more than half a ton, and the great 400-lb. pendulum is kept going by a little gravity arm that falls against it. Its dial is nearly 40 ft. in diameter and can easily be read by people three miles away. The tip of the minute hand, which is 19 feet long, travels 23 inches every minute and in the course of a day goes more than half a mile.

Small clocks and watches could not be made until a coiled spring was used instead of the weights and pendulum to furnish power to the cog wheels. The first timepieces small enough to be carried about were made in Germany about the end of the 15th century. Watches vary in construction and delicacy, some as small as a 25c-piece having from 88 to 160 separate parts in its works. For a long, long time watches were made entirely by hand, and were so expensive that only the very rich could have them. But now even the school children in the grammar grades in our city schools, children of hard-working parents, frequently have watches that "really, and truly go"—for a while!

Vegetables

String Beans With Cheese.

Remove strings from beans, wash and cook in boiling salted water until tender, or about 2 1-2 hours. Drain and season, for each 2 cups or beans add 1-2 cup grated cheese, 1-4 cup top milk and 1 tablespoon butter. Stir until heated through and serve.

Harvard Beets.

Wash 12 small beets, cook in boiling water until soft, remove skins and cut beets in thin slices, small cubes or fancy shapes. Mix 1-2 cup sugar and 1-2 tablespoon cornstarch. Add 1-2 cup vinegar and let boil five minutes. Pour over beets and let stand on back of range 1-2 hour. Just before serving add 2 tablespoons butter.

Succotash.

Cut hot, boiled corn from cob, add equal quantity of hot, boiled shelled beans. Season with butter and salt, reheat before serving.

Corn Oysters.

Grate raw corn from cob. To 1 cup pulp add 1 well-beaten egg, 1-4 cup flour and season highly with salt and pepper. Drop by spoonfuls and fry in deep fat, or cook on a hot well greased griddle. They should be made about size of oysters. Serve syrup with them and they make a wonderful luncheon dish.

Fried Tomatoes.

Slice ripe or green tomatoes in 1-4 inch slices dip in flour to which has been added salt and pepper and fry until brown.

Fried Egg Plant.

Pare egg plant, cut in 1-4-inch slices. Let stand in cold salted water about 3 hours. Drain, let stand in cold water a few minutes and dip in flour to which has been added salt and pepper and fry until crisp and brown.

Stuffed Egg Plant.

Cook egg plant 15 minutes in salted water to cover, cut a slice from top and with spoon remove the pulp. Chop pulp and add 1 cup soft, stale bread crumbs. Fry out 3 slices of bacon and fry in bacon fat 1-2 tablespoon finely chopped onion until brown. Add to the chopped pulp and bread and season with salt and pepper and if necessary moisten with a little water. Cook 5 minutes, cool slightly and add one beaten egg. Refill egg plant, cover with buttered crumbs and bake 25 minutes in hot oven.

Stuffed Green Peppers.

Cut a slice from stem of six peppers, remove seeds and parboil pepper 15 minutes. Cook 1 finely chopped onion in 3 tablespoons fat for 3 minutes and add 4 tablespoons lean raw ham and cook 1 minute. Add 1-3 cup water and 3 tablespoons bread crumbs. Cool mixture, sprinkle peppers with salt, fill with cooked mixture. Cover with buttered bread crumbs and bake 10 minutes.

FULL CROP INSURANCE NEEDED BY AGRICULTURE

General crop insurance is feasible, and is urgently needed for the protection of American agriculture. In view of the progress made by insurance in other fields, it is hard to believe that adequate crop insurance facilities will long remain undeveloped.

So say officials of the Department of Agriculture, who have been studying the question. They are preparing data for the Senate committee which was appointed at the last session of Congress to investigate and report on the practicability of extending the scope of crop insurance. This committee held a series of hearings at Washington in April, and will reconvene in December.

Billions of dollars are annually invested in farm crops. So great is the risk in this investment, that the farmers who make it have been called gamblers. But gambling, say department officials, is a term properly applied only to the taking of unnecessary risks, just for the sake of taking a chance. They point out that the risks of agriculture are unavoidable, and should be as readily insurable as similar risks in other lines.

Should Cover Actual Damage.

It is regarded as absurd that agriculture should continue without adequate insurance facilities, in face of the general application that has been given to the insurance principle in nearly all other kinds of necessary enterprise. With proper statistical data as a basis for rates, means of supplying the lack ought to be obtainable, say the department's investigators.

Crop insurance, it is believed, should cover actual damage sustained, but not theoretical losses resulting from failure to reap expected profits. Adherence to this rule would greatly lessen the difficulty of establishing a workable system, it is held. What the farmer really needs is not an insurance contract which will guarantee him profits when nature fails to furnish them, but simply protection against crop damage so severe as to endanger his financial safety. Such protection, in the opinion of department officials, could be given at a reasonable cost. They do not believe it would be a good policy to furnish insurance against loss of prospects, both for reasons of expense and because such protection might discourage diligence and care in farming. In short, it is believed the farmer himself should carry all risks that can be borne without inconvenience, seeking insurance only for serious unavoidable hazards.

On the other hand, adequate insurance ought to cover all the principal hazards. Any policy that left particular hazards uncovered might leave the insured person worse off, since if he lost a crop by a hazard for which no provision had been made, his loss would be increased by the sum he had paid in premiums. In the opinion of department officials, a farmer ought to be able to get all necessary coverage on a single policy, giving protection against damage from deficient or excessive moisture, from plant pests, from storms and frost, from hail and hot winds, and from all other dangers. They hold, in fact, that the policy should cover damage from any cause, except the negligence of the farmer, when the damage is so severe as to bring the crop yield materially below the investment in the crop.

Past Failures Are Considered.

The failure of several attempts made in recent years to work out a general plan of coverage for farm crops is not deemed to indicate insoluble difficulties in the problem. It is attributed rather to special causes, and to lack of experience data. In 1917, for instance, three fire insurance companies which offered crop insurance in North Dakota, South Dakota, and Montana, suffered heavy losses in consequence of drought in the territory covered. In 1920, a large fire insurance company which offered a contract practically guaranteeing the farmer an income from each acre seeded, lost money on nearly every policy, owing to the price recessions, which took place in that year. It paid claims on many perfect crops. These failures, in the opinion of department officials, resulted from defects of policy, rather than from any fundamental difference between the problem of insuring agricultural risks and that of insuring risks in other lines.

In giving what was practically free insurance, for example, the big fire company mentioned is held to have attempted a plan which, considering the circumstances, invited failure. Of course, not every year would play such havoc with price insurance as did the year 1920. But it is felt the cost of insuring the farmer against price fluctuations, as well as against actual crop damage, will nearly always result either in excessive rates or in loss to the insurer. Moreover since the farmers collectively determine the acreage planted, and therefore the probable supply of any crop, they rather than the insurance organization are thought to be the proper parties to carry the major risk of price fluctuations.

Premiums on Actual Crop Yields.

Success will come in crop insurance when it i sapplied on a broad scale, giving an adequate distribution of risk, and is based on proper crop yield data. It is thought the right basis of premium would be the actual crop yield on given farms over a long series of years. While such a plan might necessitate building up much additional yield data, department officials do not believe the magnitude of the task would be a serious obstacle.

As to the form of organization through which the desired insurance should be furnished, definite conclusions have not been reached. It has been said that the scope of the undertaking and its novel character make it almost necessarily a government enterprise. But there are considerations which would work against the success of a government agency. Among these considerations would be that of fixing equitable rates which would be acceptable as such as between different localities and different farms. Great diversity in rates is unavoidable, on account of differences in the hazards from climate, plant diseases, insect pests, and other factors. The government would almost certainly meet with bitter criticism as to the fairness of the rates charged.

Another suggestion is that the producers should be brought into mutual associations for the purpose of carrying on a crop-insurance business. Private companies, though somewhat discouraged by the fate of their first attempts in general coverage crop insurance, are continuing their effort. While still in the experimental stage, crop insurance is believed by those who have studied it to be so thoroughly practical that it is only a question of a few years before some workable plans will be in operation on a large scale.

SHIP JAPANESE BUGS IN ICE CREAM FREEZERS

During the first week of July a large shipment of dexlid and tachinid parasites of the Japanese beetle was received in Seattle. These insects came from Japan in cool storage, and great care was exercised in preparing them for transcontinental shipment to the Japanese beetle laboratory of the bureau of entomology, United States department of agriculture, at Riverton, N. J. At Seattle representatives of the bureau had ready a number of 10-gallon ice cream freezers. The boxes of parasites were transferred directly to the tubs of these freezers, well iced, and started east with as little delay as possible. An express company co-operated in the work by seeing that the freezers were re-iced en route. The parasites are to be liberated in connection with Japanese beetle control work.

DAIRY MEN BUY FINE HERD SIRE

Young Bull From Carnation's Herds Goes to Two Gresham Breeders.

FORM DAIRY ASSOCIATION

Walla Walla Organization Complete—Finds Sweet Clover Makes Fine Dairy Pasture.

H. G. Mullenhoff of Gresham, Oregon, and A. H. Burns of Aldersyde Farm, Gresham, Oregon, have just completed arrangements whereby they become joint owners of the young sire, Carnation Veeman Matador Prospect, which represents the choicest strains of blood at Carnation Stock Farms. This bull is sired by Carnation's Junior herd sire, the son of Segis Pieterje Prospect, the world's greatest milk cow, whose second record, just completed, also surpasses her nearest competitor, giving her the honor of holding two records for yearly milk production, which are higher than any other cow in the world.

The dam of the young bull is a daughter of Segis Walker Matador, one of the present senior herd sires at Carnation, but who was used during most of his early life by David McKeown, another of the enterprising breeders at Gresham. This young cow is of almost perfect type and a wonderful producer. Freshening at 27 months of age she made 25.1 lbs. of butter in 7 days and on yearly test, for 241 days, made 16,411 lbs. of milk and 634 lbs. of butter when she was suddenly taken ill with indigestion and had to be dropped from test.

Freshening this year as a 3-year-old, she made the remarkable record of 34.1 lbs. of butter from 547 lbs. of milk in 7 days. This heifer has great capacity and enormous milking powers and should easily equal the records of two other daughters of her sire, who have made over 1100 lbs. of butter as 3-year-olds.

It is more than a coincidence that this heifer was bred on Mr. Burns' farm and later purchased and developed by Carnation. It is not surprising that Mr. Burns selected her son for his herd sire. It will be remembered that Mr. Mullenhoff developed recently the wonderful cow, Stanhope Belle Johanna, who made the remarkable record of over 32,000 lbs. of milk.

The senior herd sire, being used jointly by these two men, is a son of this great cow and sired by Segis Walker Matador. Their future offspring will combine the blood of these great producers with milk producing cows in the world, one with over 37,000 lbs., and the other with over 32,000 lbs. Holstein men will await with keen interest the results of the use of this new sire by these progressive breeders.

Dairymen Complete Year in Testing.

Fifty-four dairymen of San Juan county completed records on 364 cows for the year. It was found that the cows averaged 5,836 pounds of milk and 278 pounds of butter fat for the year's time. County Agent W. W. Henry figured it cost $74.64 to feed a cow for a year.

Cooperative Dairymen's Association for Walla Walla.

The Walla Walla Cooperative Dairymen's association organization has been completed and a plant started. Chris Johnson from the United States department of agriculture spent some time in the county to give advice on the running of such a plant.

Sweet Clover Makes Good Pasture.

Dewey Rogers, near Spokane, planted nine acres of sweet clover last year and since May 3 has pastured 19 head of dairy stock on the area and they have been unable to keep down the growth. Roy Hayes of Waverly has 80 acres of sweet clover, 265 acres of peas and the balance in wheat. Mr. Hayes is farming close to 880 acres of land and has no summerfallow.

More Purebred Sires.

John Benson, Robert Benson, and Carlson Brothers of Skamokawa purchased purebred bull calves to replace their scrub bulls. The bulls were sold by H. L. Wiester and are out of a sire whose dam has a record of 796 pounds butter fat. One of the calves is out of St. Mawes Lady Etta, who was Washington state champion for some time, having a senior yearling record of 562 pounds of fat.

Lumber production in the United States has been decreasing steadily since 1907, states the forest service. United States department of agriculture, in a recent report tracing the lumber cut from 1870 to 1920. This report is a comprehensive survey of lumber conditions of today compared with those of previous years.

TOYING WITH DEATH—HE PROVES WHY REAR SEAT IN CAR MOST DANGEROUS

J. H. Van Norman, originator of the circus thrill of "looping the loop" in an auto, demonstrates in his present thriller just why the occupants of the rear seat are most frequently hurt in auto accidents. "While the force of gravity," he says, "should bring a heavier body to earth faster than a light one, where a pivoted body is suddenly stopped the centrifugal force overcomes gravity."

His point is proved by this picture, taken at Bridgeport, Conn., showing Van Norman in the midst of a cycle dive into a shallow tank of water. Note that the centrifugal force throws his body, weighing 150 pounds or so, clear over the net and into the tank, while the lighter bicycle falls almost straight down and reaches the earth first. In the same way, the centrifugal force "catapults" occupants from the rear seat of a car, when it is involved in a collision, so that they are thrown a great distance with stunning force, while those in the front seat may escape with a shaking up and glass cuts.

WORLD'S NEWS BRIEFLY RETOLD

Important News of Both Hemispheres Boiled Down to Last Analysis.

The franc fell to the lowest point it has yet known when quotations on the Paris bourse were 17.52 to the dollar.

Several recent arrests have revealed German spies still are active at Seebrugge, according to government agents.

A central heating apparatus used in a Roman villa about 17 centuries ago has been unearthed in the course of excavations at Kenysham cemetery, Somersetshire.

Six hundred Swiss citizens, mostly young farmers, have emigrated to Canada this year, and 700 more are expected to leave for the same country in the next few months, according to official statements.

Four hundred additional recruits of the Chang Tso Lin army, formerly bandits such as those who wrecked and robbed the Shanghai-Peking express and kidnaped its passengers, have been sentenced to death on a charge of desertion.

When the French went into the Ruhr the Germans boycotted French music. The French, who use a great deal of music published in Germany, retaliated. Both sides felt very much inconvenienced by the situation, and finally by mutual agreement the ban was called off.

A Dutch ship was seized by Spanish cruisers at the entrance of the straits of Gibraltar. When searched it was found to be loaded with machine guns and munitions for the Moroccans in revolt against Spain. The vessel was interned at Porto Cuenta pending action by the authorities.

German medical science claims to have found a cure for cancer. Professor Ketzenburg announced to the Hamburg Medical association that he and Professor Deutschmann had made further experiments with a serum which Deutschmann discovered and which he said proved an aid in the curing of cancer.

With nothing but the sun and the moon to guide him, Carbis Walker, Cleveland swimmer, accomplished the unheard of feat of swimming across Lake Erie. The distance covered was 30 miles. The time 20 hours and 5 minutes. The course was from Point Pelee, Ont., to Lorain.

Long the leader in the manufacture of safety matches Sweden was passed by Japan during the war through inability to get phosphorus and paraffin. Not until this year was the lost ground made up. Exports of matches to the United States in 1923 were almost three times as great as in 1913.

Premier Poincare has instructed the ministry of the interior to examine into incidents in which American tourists have objected to association with negroes, often required by French custom, and determine if proprietors of restaurants whence colored guests have been ejected upon the request of Americans should not have their licenses revoked.

ROOM FOR NEW GLASS PLANT, SAYS WILSON

Local consumption of imported glass bottles in the fruit juice, canning and milking industries calls for a well organized glass plant somewhere in the northwest, according to Hewitt Wilson, professor of ceramics in the University of Washington college of mines.

Pure quartz for manufacture of glass, according to Professor Wilson, is available at Merritt, Denison, Buckeye, and Clay City, Washington, near Ketchikan, Alaska, and Moscow, Idaho. High silica sandy clays can be secured in the Green River valley, Professor Wilson says.

Discovery of a fossil leaf of the ginkgo tree, considered as evidence that the mainlands of Asia and America were joined at a recent geological period, has been announced by Thomas A. Bonser, curator of the public museum at Spokane.

Fireproofing of Clothing.

This is a precaution to be used particularly with children's clothes. Many children are needlessly burned while playing with matches or bonfires, especially when wearing Indian or cowboy suits or outing flannel garments. Ammonium phosphate costs about 30 cents per pound. A pound dissolved in a gallon of water makes a solution in which garments may be soaked for five minutes, and become fireproof until washed.

Lace curtains, Christmas tree properties and other inflammable articles may be treated in the same manner. A strong solution of alum in water is also effective.

On September 3 there will be an international celebration to observe the opening of the last bit of pavement between Blaine, Wash., and Vancouver, B. C., and on that date it will be possible to drive from Seattle to Vancouver without getting off the pavement.

Saving What You Grow

Prepared by the Extension Service, State College of Washington

DRYING FRUIT

With sugar high and fruit plentiful, in most parts of the state, drying has a real place in the housework for the summer. To insure best results in drying fruits, the hot syrup treatment should be used.

Dipping in thin boiling syrup for from ten seconds to two minutes does much toward holding the color and flavor and improving the appearance of most fruits. Where Karo is used to make the syrup, take one part of Karo to three parts of water. In using sugar take one part sugar to three or four parts of water.

Fruits such as apples, should be peeled, sliced and dipped as soon as possible for something like a minute in the boiling thin syrup, and dried. A ten to twenty second dip is sufficient for cherries that have been seeded. The purpose of the syrup is to prevent oxidation.

Apricots—The best way to dry apricots is to split, seed, syrup treat until hot through and then dry in a medium high temperature.

Cherries—A fine product of superior flavor may be obtained by seeding, syrup-treating for ten seconds and drying at a medium high temperature. Care must be exercised to lower the temperature as the drying proceeds, as the sugar in the cherry caramelizes readily when the cherry becomes more nearly dry. The time of drying may be decreased by splitting the cherry in half.

Peaches—Scald, cold dip, remove the skins, split, remove the seed, treat with thin hot syrup at very nearly boiling point until the peach is hot through. Begin the drying process at a very high temperature in the artificial heat dryers. Gradually lower to 150 degrees at the end of three or four hours. Continue drying until the peach is in a leathery stage.

Berries—Use hot syrup treatmeat for a few seconds only and dry.

IMMIGRANTS OF BEST CLASS COME TO U. S. NOW

Immigration officials are well satisfied with the class of immigrants now coming to this country, because northwestern Europe has exhausted its quota, with the exception of Germany.

"There would be many more immigrants from northwestern Europe, if the quotas were enlarged," said Commissioner Husband. "England has already exhausted her quota for the month, as have most other European countries. The class of immigrants now coming in is better than ever before."

Bielenberg-Schooler Post The American Legion Meets Each First Wednesday In June, July and August

Liberg Honored

Nels Liberg, post vise-commander of Bielenberg-Schooler Post of the American Legion, was chosen by the department of Idaho, as department master-at-arms at the Legion convention held at Coeur d'Alene last week.

This is the first department office ever held by a local legionaire.

Genesee was well represented at the convention, having six delegates in attendance, including Nels Liberg, Harry Schooler, Don Bressler, George Post, Wilson Archibald and Thomas. A. Feeney.

Those returning report a splendid convention, with much benificial legislation. Many prominent citizens were in attendance, including Attorney General A. H. Conner, Secretary of State F. A. Jester, National Vice-Commander Plummer of Wyoming, Norman Engle of the veterans' bureau, Captain Crossley of the U. S. S. Idaho, representing the navy department, and Mrs. Barrett, national president of the woman's auxiliary.

Inspiring addresses were delivered by the distinguished visitors during the progress of the convention. Old friendships were renewed among the veterans in attendance, particularly members of the old second Idaho. Legislation was passed eliminating the holding of more than one proxy by any delegate at a department convention, and a fund provided for the payment of the expenses of one delegate from each post. The next convention will be held at Pocatello. Department officers elected for the ensuing year were as follows:

Commander, Paul Davis of Boise.

Vice-Commanders, Dr. H. C. Darrah, New Plymouth; Dr. G. B. Crabtree, Idaho Falls; Frank O'Leary, Sandpoint; Wallace McBride, Boise.

National committeeman, Dr. C. A. Robins, St. Maries.

Vice national committeeman, Harry Benoit, Twin Falls.

Historian, Lee Fiske, Parma.

Chaplain, Rev. E. T. Vincent, Salmon City.

Master-at-arms, Nels Leiberg, Genesee.

Delegates to the national convention, Paul Davis, Boise; James Harris, Weiser; Lester Alberts, Boise; F. H. Breashears, Nampa; Joe Murphy, Wallace; Frank Jacobs, Lewiston; L. Hellman, Payette.

Endorse Memorial Building

Among the most important things ever transacted at a department convention was the endorsement of a war memorial building to be erected on the campus of the University of Idaho at Moscow. It is planned to erect a splendid armory and gymnasium, where a portion of it will be devoted to memorial purposes to preserve the names and records of all Idahoans who served in the great war and all other wars. Permanent vaults will be provided for this purpose, there will be trophy rooms, memorial windows and special places allotted to memoralize those who died. The legion will appoint a committee to cooperate with an alumni committee of the university to carry out the project. The building is to be at Moscow because it is the seat of learning of the state, and where the impress of the memorial will reach the great number of our youths.

Approve Compensation

The convention approved adjused compensation for ex-service men and petitioned congressional representatives to support legislation in this respect. Congress will be asked to enact a universal draft law, giving the president authority to call all men between 21 and 30 years of age and the resources of the natioin in time of war.

Resolution were adopted opposing any movement looking to recognition of the Russian soviet government, release or pardon of state prisoners convicted under the criminal syndicalism act or prisoners in federal penitentiaries of draft evading or other so-called political offenses.

The convention went on record favoring immediate restriction of immigration until a commission was appointed and had nvestigated every phase of the question. It approved the national defense act of 1922 and the general preparedness policy of the government.

Genesee secured state office in the 40 et 8, Thomas A. Feeney being selected to head the box car organization in the state for the coming year with the title of Grand Chef de Gare.

The state convention of the 40 and 8 was held on Saturday, the last day of the convention, ceremonies being conducted by the Lewiston voiture. The Lewiston 40 and 8'ers went to Coeur d'Alene in a box car built on a Samson truck, and an exact replica of a French box car in which the boys traveled while across the water.

The box car attracted much attention through the country when it went through and the boys were entertained by the Spokane post in Spoane.

Large delegations were present at the convention and initiation, and it is rumored that Coeur d'Alene was considerably jarred up by the boys during its progress.

The Lewiston voiture—to which local 40 and 8'ers belong—attracted much favorable comment for the splendid manner in which the wrecking crew under the comand of Mark Donaldson handled the ceremonies. The famous 40 and 8 trio, Donaldson, Peterson, and Whalen, were in much demand all during the convention and obliged readily whenever called upon.

MAY SAVE 1923 LOSS BY POOLING WHEAT

The "Washington Farmer" of Portland, Ore., is responsible for the statement that out of the state of Washington comes a new or rather amended plan that will be followed by cooperative wheat marketing associations in the future. The statement says that the idea was advocated by W. F. McCauley, of Columbia county and W. S. Guntle, of Waitsburg. The plan was born of their experience as directors of the Washington Wheat Growers' association when they became convinced that a sign-up sufficient to control production was necessary. This would empower the growers with sufficient strength to establish a set price by a committee made up of directors of the several states, making it possible to maintain it, with the only chance for complete success. Sixty-five percent of the production is required covering all the principal wheat states.

The plan and draft of contract was presented to the Washington Wheat Growers association directors and unanimously adopted. Later the plan was extensively circulated through the southern and central western states—and what comprises the 12 principal wheat growing states controlled by the American Wheat Growers' association in charge of George C. Jewett, manager and W. H. Brown, president, was readily approved, and these gentlemen are now changing the contract in order to meet the national requirements which will render it uniform in all states. It is expected to be ready for signatures in a few days.

It seems probable that growers will resort to mass action by completing the pool and thereby set their own price on home consumption portion as per contract, covering the 1923 crop. The clause in the contract reads as follows: "It is expressly agreed by and between all subscribers and the association that no portion of domestic supply or contract wheat shall knowingly be sold for feed or export until all domestic needs are fully supplied every year. It is hereby mutually agreed and collectively agreed by and before all subscribers that a price fixing board composed of the directors of all the several zones shall hereby be established. And it shall be the duty of said directors to meet on the third Monday in May each year as a price fixing committee, and thereafter whenever advisable to consider market conditions and selling to conform, as nearly as may be to the cost of farm operation, including interest on fair valuation of land and equipment to handle same, and all other supplies used in the operation of a wheat farm, together with a reasonable and fair profit, and an allowance sufficient as payment to labor to attract competent labor towards the agricultural pursuits.

"Should general price levels on market conditions change at any time so as to make it apparent that the association set price and prices is or are unfair, either to the growers or to the consumer in the United States, it shall be the duty of said committee not to speculate in wheat, but to consider markets, trade conditions and raise or lower fixed prices so as to be fair to all concerned and such prices shall not be fixed with intent to restrain, monopolize or control trade or prices, but to secure a fair profit and with reference to fair, free, open markets."

The plan provides for pooling our exportable surplus with other exporting countries and sell same on the world markets collectively.—Walla Walla Bulletin, Sunday August 5th.

Semper Fidelis (Carlton Fitchett)

With wistful eyes and lonesome heart, how patiently he waits to greet his master, home at last, outside the White House gates; to rub against his knees again and lick his hands in joy, and hear his master's loving voice: "I've missed you, Laddie Boy."

He longs to gaze into his eyes, and feel his fond caress; to help him lay aside his cares, forget his weariness. With head bowed down between his paws, he waits beside the door, alert to hear a kindly voice, now stilled for evermore.

He dreams, and barks with plaintive joy, of happy days gone by—the strolls they took together, with their spirits soaring high; inviting fields before them and a cloudless sky above; of days of sweet communion and of comradship and love.

He lives again the morning that his master went away; he feels again the parting hug; he hears his master say: "I hate to leave you, Laddie Boy. The road is long we take." And how he bore up bravely for his pal and master's sake.

Oh, Laddie Boy, though faithful is the vigil that you keep, your master's steps you'll hear no more, to make your heart throbs leap. The road is long he travels—he has crossed the mystic span. We join with you in grieving, for your master was a man.

Odessa Territory Prosperous

With harvest work progressing rapidly more yield reports are coming in which shows wheat in the Odessa (Wash.) district to be much better than was at first anticipated. Spring wheat reports give the yield of early Bart as high as 35 bushels per acre north and east of Odessa. This territory will produce 2,000,000 bushels this year, according to the estimates made, or about four times last year's total yield.

The convention culminated in a boat ride on Lake Coeur d'Alene until the small hours of the morning.

National Chef de Chemin de Fer Ed Eivers of Portland was present.

Estimate of Necessary Expenditures

Estimate of probable amount of money necessary for all purposes, to be raised by the City of Genesee, Idaho, for the fiscal year 1923-1924, for which appropriation is to be made:

General fund	$2700.00
Street lighting fund	1300.00
	$4000.00

The amount of money received from all sources for the previous fiscal year was $5316.37.

Approved by the mayor and city council and signed by the mayor, this 6th day of August, 1923.

(Seal) JOHN MEYER, Mayor.

Attest:

W. W. BURR City Clerk. 6-3

NOTICE!

Are you coming to Moscow to enjoy the splendid school advantages this year? If so you will need a good house. Now good houses are scarce, therefore it will pay you to take up the matter at once. If you are interested in buying a home, I have some good bargains which I will be pleased to show you. Some of them I can sell with a small payment down and the balance like rent.

It will pay you to call on

C. H. BRATTON, Realtor,
Room 4, Urquhart Building, Third Street, Moscow, Idaho. 4-4

SUMMONS

In the District Court of the Second Judicial District of the State of Idaho, in and for the County of Latah.

William Post, Plaintiff, vs. Nettie Post, Defendant.

The State of Idaho sends Greeting to the above-named defendant:

You are hereby notified that a complaint has been filed against you in the District Court of the Second Judicial district of the State of Idaho, in and for the County of Latah, by the above named plaintiff, to procure a decree of divorce on the part of the plaintiff on the ground of desertion.

And you are hereby directed to appear and answer the said complaint within twenty days of the service of this summons, if served within said judicial district, and within forty days if served elsewhere; and you are further notified that unless you so appear and answer said complaint within the time herein specified, the plaintiff will take judgment against you as prayed in said complaint.

Witness my hand and seal of said district court, this 6th day of July, A. D. 1923.

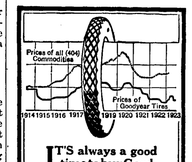
HARRY A. THATCHER,
Clerk of Said District Court.
[Seal of Court Affixed]
By Emma J. Sayles,
Deputy Clerk.

A. H. OVERSMITH,
Attorney for Plaintiff,
Residence and P. O.
Moscow, Idaho. 3-6

Cause of Appendicitus

When the bowels are constipated, the lower bowels or large intestines become packed with refuse matter, that is made up largely of germs. These germs enter the vermiform appendix and set up an inflammation, which is commonly known as appendicitus. Take Chamberlain's Tablets when needed and keep your bowels regular and you have little to fear from appendicitus.—For sale at Clark's Drug Store.

At any rate a wife with a mind of her own is preferable to a wife with no mind at all.



IT'S always a good time to buy Goodyear Tires, for, as this chart shows, Goodyears are priced extremely low, year in and year out. But now is the best time, because Goodyears are selling today 30% below 1914 prices, and their quality now is better than ever before.

As Goodyear Service Stations Dealers to sell and recommend the new Goodyear Cords with the heeled All-Weather Tread and back them up with standard Goodyear Service

THE GENESEE NEWS

VOL. XXXV GENESEE, LATAH COUNTY, IDAHO, FRIDAY, AUGUST 24, 1923. NO. 8

BORAH SAYS RUSSIA, THE RUHR MENACE THE WORLD

Characterizing the Ruhr situation, and Russia, as the two greatest problems confronting the world today, not only as menancing world peace, but also being responsible for the economic ills which are so seriously affecting the American farmer, Senator W. E. Borah spoke for an hour and thirty minutes Sunday evening to a capacity audience at the Methodist Episcopal church, says the Moscow SEar-Mirror, on "Our Economic Problems in Connection with World Peace." The senator had the closest attention of his audience throughout the entire time.

Dr. H. O. Perry presided at the meeting. After congregational singing, prayer was offered by Rev. E. Burton, pastor of the Baptist church. A vocal solo was rendered by Miss Anderson, of the First Lutheran church. Dr. A. H. Upham, president of the University of Idaho, then introduced Senator Borah, stating that Idaho had come into prominence through its big baked potatoes, and through Senator W. E. Borah. He characterized Senator Borah as a "thinker, statesman, and patriot, who genuinely loves his fellow men and who is interested especially in the common folk."

Senator Borah quoted the late President Harding as stating in an address on his western trip that 85 per cent of America's government expences goes to pay for past wars and to prepare for future wars, while all other expences of government are met from the other 15 per cent. He spoke of the disarmament conference and its results, which he said were most gratifying, but said this was about as far as America could go toward cutting down the expenditures necessary for war, without cooperation from Europe. Europe, he said, is now maintaining larger armies and has more equipment than in 1913, a year before the great war started, and an armed nation. The question of taxes and national expences, he said are so linked up with international affairs that there is no possible way of remedying conditions except through better international understanding and co-operation between nations.

The senator then took up the American farmer's market problem and said that he could not suscribe to the theory of over-production as long as millions of people are starving to death, or going under nourished. He said he was not willing to admit that American statesmanship had become bankrupt, and was unable to work out some way to relieve the condition and bring about a better understanding between nations. American ingenuity, he said, should be used to reach world markets. He reiterated the statement made in recent meetings that public credit would afford temporary relief to the wheat farmer and said that he would support a measure for the stabalizing of the wheat market but that America must go still farther and associate such legislature with a program for permanent relief.

The American farmer, Senator Borah said, is paying for the folly of the invasion of the Ruhr. He said that he had asked some months ago for an economic conference and had predicted at that time the invasion of the Ruhr, and a fall in the price of farm products. The Ruhr invasion, he said, is not securing anything for France, but is bringing injury to the world and it may bring war.

The senator expressed himself in favor of cancellation of the French debt to us, only when France disarms and ceases to make further preparations for war. Until that time, he said, he was opposed to cancellation of the debt. "If cancellation will help stabalize Europe and bring markets to American farmers, I am for it," said Senator Borah, "but I am not for it so long as the French have 800,000 men in arms and keep building airplanes and other warcraft at a mad pace."

The senator also asserted he was open for diplomacy, saying that the intrigues of diplomats were the cause of almost every war and that in his proposed codification of international law he would insert a section against any war, save one of defense until the people who would have to fight it and suffer for it could vote upon it. He cited Russia as an early determining factor in government or international amity and contended that public opinion was the moving feature of the civilized progress, pointing that public opinion alone took Japan out of Shantung and Manchuria, where armies would probably have failed.

Regarding the Russian question, the senator said in part:

"My stand on the Russian question may lead to the impression that I favor the communistic or soviet form of government. There is only one form of government I do favor. That is the blessed old republican form of government, created by our forefathers in 1789.

"It is not necessary to approve or disapprove of bolshevism to recognize Russia as a nation. Turkey has been murdering the Christians for 500 years, yet we do not refuse to recognize her. Only six months ago the Turks poured oil on the American consulate and burned the building to the ground. Still we recognize Turkey.

"We do not approve of the crimes committed in Korea by the Japanese; yet we do not break with Japan.

"It is said that Russians are persecuted by their government for certain religious beliefs. America does not look with favor upon any nation which denies religious freedom to its people. I believe every person should worship a supreme being in some form.

"But is the Russian government denying religious freedom? D. Hartman, one of the leading divines of this country who has been in Russia for some time, says there are approximately 400 churches open every Sunday in Moscow without any interference whatever. The teachings of all religions, says Dr. Hartman, has been going in many churches every Sunday since the revolution. I have couldn't get this information into the metropolitan papers with a pick axe.

"Russia has been subjected to the most pernicious scheme of organized lying I have ever heard of. How can the outside public have the slightest conception of the truth about Russia in the face of this propaganda? I challenge anyone to debate this question on the public platform. I have made that challenge from New York to Idaho, and no one has come forward to meet me.

"Mr. Bush, well known capitalisa of New York, went to Russia last year and on the third of July wrote that there was nofrain with Russia. He says the soviet government is stable and durable and that these two great countries (United States and Russia) must inevitably do business together, and the sooner the better.

"Even if all that they say of Russia were true, we should still take her into the family of nations. The precedent was set in 1793 when President George Washington recognized France, saying as he did so, 'This is the only path the people of France are traveling, but is the only path to a free government.' The time will surely come when the Russian people will sepak for themselves."

The senator said that he left impelled to state the world conditions, and to advocate recognition of Russia, regardless of political consequences. He said he cared nothing for Lenine and Trotzky and their doctrines, but that he did care for the 140,000,000 Russian people and for the effect the Russian situation was having on America. He said we must lead Russia to a better attitude in world affairs.

Senator Borah then spoke in favor of a court of international justice, through which international affairs might be settled and said that world sentiment would back the decisions of such a court, just as it backs the decisions of American courts. He said he would outlaw war as a means of settlement of international disputes and make war a crime and those who forment war criminals. He said the organized conscience of the world would be back of any movement to outlaw war, that public opinion is more powerful than force and that the mainstay of the world is justice and righteousness.

Is Not Interested

Tell a man how he can make some money and he jumps at it, but tell him how he can save it and he's not often interested.

Many a man is getting ahead in this world who is getting behind in the next.

U. G. DIXON PASSES AWAY AT LEWISTON ON SATURDAY

After an illness extending over more than four months, U. G. Dickson, aged 58 years, died yesterday morning at 5:50 o'clock at the home of Mrs. Mary Sullivan, Thirteenth and Main streets, where Mr. and Mrs. Dickson had been making their residence for the last two months. The immediate cause of Mr. Dickson's death was Bright's disease.

The first sign of the illness that resulted in his death became noticeable last April, while Mr. Dickson was residing on his ranch near Kamiah, at which time he was devoting himself to stock-raising. His condition bettered for a time and then became worse and in June he came here with his wife and sons for treatment. Up to midnight Friday the condition of Mr. Dickson seemed greatly improved, in fact, scarcely a day passed up to the hour he was fatally stricken but he was enjoyed a walk over the city, meeting and enjoying a conversation with many of his friends.

At midnight Friday his condition took a decided turn for the worse and he then became unconscious, remaining in this state until relieved by death. The devoted wife, two sons, and a daughter were at the bedside when the end came, another son residing at Kamiah being notified when his father's condition showed signs of being critical, but arrival in this city was not possible until after Mr. Dickson's death.

Ulysses Grant Dixon was born May 23, 1865, at Mineral, Ohio, and came west in 1895. Until 1906 he was engaged in the grain business in the Troy and Genesee sections, and later farmed on an extensive scale near Kamiah and in the Hatwai district, this continuing until 1919, when he engaged in the stock business at Kamiah.

The deceased was a man of much principle and stood high in every community in which he resided. For many years he had been in and out of Lewiston at frequent intervals and this resulted in his enjoying a wide acquaintance.

His wife, three sons, Earl and Roy of Lewiston and Elbert of Kamiah; one daughter, Miss Leona Dickson, residing in Lewiston, and seven sisters survive. The sisters are Mrs. M. D. Wright, Pine City, Washington; Mrs. Mina D. Frye, Athens, Ohio; Mrs. Diantha Hester, Mineral, Ohio; Mrs. A. E. Hunter, Springfield, Ohio; Mrs. Curtiss Todd, Marshall, Ohio; Mrs. L. F. Kengle, Cincinnati, Ohio, and Mrs. Laura Davis, Chattanooga, Tenn.

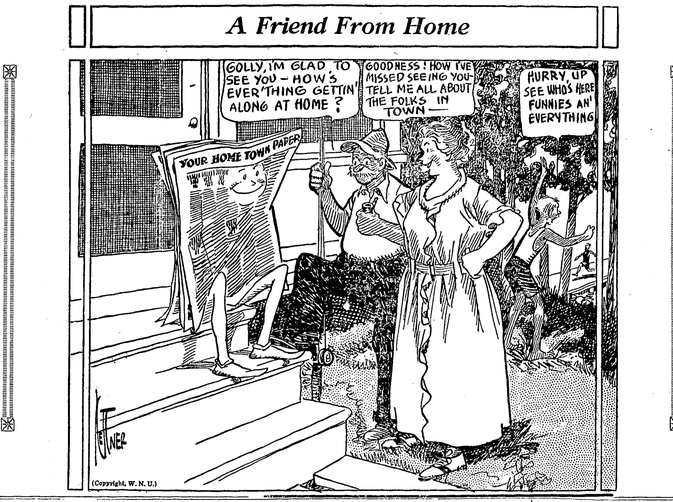
Mr. Dickson joined the Masonic lodge at Genesee on February 15, 1901, and transferred his membership to Nez Perce lodge No. 10, of this city on December 22, 1911. He was also a member of the Woodmen of the World for 27 years, affiliating himself with Poplar camp No. 295, of Lewiston, in 1907.

The funeral was held from the Vassar chapel at 10 o'clock Monday morning, Rev. Mark Pike of the Methodist church delivering a short service at the chapel, the Master Masons having charge of the service at the grave. Interment was made in Normal Hill cemetery.—Lewiston Tribune.

Mr. Dixon was for many years a resident of Genesee and vicinity and had many warm friends here who will indeed sorrow with the bereaved family.

Several old-time friends attended the funeral from Genesee.

The race of life is never to the "swift."



SEMI-LOCAL NEWS CLIPPED FROM EXCHANGES

Ice Mine

An "ice mine" is reported from down Bear Ridge way. This, of course, is a relic of the glacier age, being glacier ice that was buried by upheavals and preserved. Ice is found in chunks by digging down a few feet from the surface of the ground. Ice deposits have been uncovered in many parts of the northwest, indicating that it must have been pretty cold here a million years ago.—Deary Press.

More Fish Coming

H. L. Walrath, deputy game warden, left Wednesday morning for the state fish hatchery at Sandpoint to accompany a shipment of 45 cans of rainbow trout for distribution in Reed's and Orogrande creeks. The 45 cans will contain about 70,000 small fry. The shipment is the fifth one for Clearwater county, making a total of 350,000 fish to be received this year. Forest Service tucks conveyed a like shipment of eastern brook trout to Reed's and Musselshell creeks last Friday.—Clearwater Tribune.

Yields Reported 40 To 55 Bushels

While threshing is just getting under way in the Moscow district, and a number of machines are not yet in operation, the harvest has progressed sufficiently far to make certain that the yield will be up to expectations in most cases. Reports from the Farmers' Union office this afternoon state that in pretty near every case so far heard from, the yield is above 40 bushels. The highest yield so far reported is from the J. P. Peterson place two miles south of town, where the crop averaged 55 bushels to the acre. The wheat is Red Walla and is of good quality.

There is still something of a shortage of men for the harvest work, although there are some coming in each day. While a majority of the men are willing to accept the prevailing wage, there are some who are demanding an eight-hour day, and $5 a day for pitching and driving bundle wagons. These men are being left in town.—Star-Mirror.

Potlatch Wheat Yields Big

Reports from the various ridges of the Potlatch country substantiate the general idea which has been held that there is a bumper wheat crop this year. The biggest yield thus far reported comes from the first grain threshed on American Ridge which was on the Chris Maier place, farmed by Sidney Dicks. He had a field of summerfallow ground that averaged over 65 bushels to the acre, machine measure, his entire crop averaging 50 bushels. In the Cameron country the yields reported are varying from 30 to 40 bushels. Ford Parks threshed 55 acres of Red Russian wheat that averaged 46 bushels. Lester Hill in the Fairview neighborhood reports a yield of 40 bushels of Forty Fold and says his Red Russian is turning out 45 bushels to the abre. Archie May on Potlatch ridge near Leland got an average of 40 bushels. These are but few of the yields that have been reported but they indicate to some extent that the general average is going to be about as expected, or possibly a little better.—Kendick Gazette.

Woman in one respect is like the bible. There are a good many things about her that we never understand.

Attend Wheat Convention

Quite a number from Genesee attended the wheat meeting at Moscow last Saturday and say much interest was manifested by farmers and others concerned.

Senators Borah and Gooding were present and made addresses, the former presenting his plan for the stabalization of the wheat market and resolutions were passed calling for an extra session of congress for relief of the farmer.

E. L. French, director of the Washington state division of agriculture, was also present and stated that the so-called friends of the farmer have destroyed his confidence by "bear" attacks to gain political advantage.

President Coolidge, however, says that it will be impossible to obtain relief for the wheat farmer before December as it will take that long to get a bill through congress, and then the result will be doubtful.

There is no one that questions the fact that the wheat farmer is the "goat" and it is plain that some adjustment must be made, but it is no 24-hour job and many raise the question of advisability of fixing a temporary price above the regular market, and in case such is done, will anything short of an embargo on wheat from other countries do the work?

"Back Home and Broke"

There's many a man longing to return to his old home town who does not because he wouldn't want to come "Back Home and Broke," as expressed in the title of Thomas Meighan's new picture, coming to the opera house Saturday night.

"Tom" returnes to the old town, and he goes through all the embarrassment and humiliation of a man coming back a failure. The strange part of it is that he isn't a failure. You doubtless wonder why instead of coming back with a big "splash" he allows the towns people to believe that he has been unsuccessful. The reason is too good to spoil in the telling, and anyway, the situation must be seen to be appreciated. It provokes many spasms of laughter.

The story is an original George Ade tale, written especially for Mr. Meighan by the well known humorist. Lila Lee, many times leading woman for Wallace Reid, plays opposite Mr. Meighan.

Take it as He Pleased

The irate customer shook his portrait in the photographer's face.

"Do I look like this picture? The thing's an outrage! Why, you've given me an awful squint and the look of a prize-fighting bully. Now, answer me, and no nonsense about it! Do you call that a good likeness?"

The photographer scanned the print then looked at the customer.

"The answer," he said, " is in the negative."

And the customer went away with a look of deep thought on his face.

How Time Changes

The hired man was tinkering around the farmyard. The patent churn man gave him a cheap cigar and asked him how things were coming along.

"Different times," growled the hired man, "different times."

"What's the trouble?" asked the churn agent.

"I used to enjoy giving an apple to a horse."

"And now?"

"Well, I suppose the tractor is glad to see the oil can, but it never whinnies for joy."

GENESEE SCHOOL TO OPEN MONDAY, SEPTEMBER 3

Monday, September 3, will mark the beginning of a new school year for the Genesee district. Some changes have been made in the teaching force and adjustments have been made so that high school students from outside districts may attend the Genesee schools in the same manner they have been accustomed to in the past. Attendance of outside children in the grades, however, will be discouraged.

In the grades Miss Vaughn will have the first grade, Miss Edith Winegardner the second and third grades, Miss Lillian Collins the fourth and fifth, Miss Hazel May Ouse of Spirit Lake the sixth and seventh, and Ray Potter of Clarkston the eighth grade. Plans are being made to have the grade work done departmentally, each teacher having special subjects which will be taught to the different grades rather than taking charge of one grade and trying to teach a wide variety of subjects.

Grades one to three, inclusive, will comprise the primary division and will be in charge of Miss Vaughn and Miss Winegardner. In the other group, grades four to eight, Mr Potter will have the work in arithmetic, physiology and spelling; Miss Collins will teach penmanship, grammar and eighth grade literature and civics, while Miss Ouse will have the work in geography, reading and history. This program is tentative and may be changed somewhat.

For the high school the board has secured the services of Miss Lela Patch for the work in English and French; Mr. Winegardner for the mathematics and science courses; Mr. Thomas for the social sciences; Miss Marie Hummel of Boise for the work in commercial subjects and general science and biology. A course in manual training will also be given. There will be no courses in either agriculture or home economics.

All students who plan to attend high school this winter should get a good start by beginning the first day of school. The importance of regular attendance cannot be overestimated and the effects of poor or irregular attendance is only too often failure in one or more courses. All students entering late will be required to take special written examinations in the work they have missed and have all work up to date within four weeks of date of entry. Students who do not enter school during the first day of September will be refused admission until the end of the first semester except those who have been in regular attendance at some other school.

High school graduates who plan on attending some university or college this fall should have their credentials mailed from this school before September 1. In order to bring this matter early much undue delay may be avoided at the time of matriculation. Supt. Thomas will be glad to forward any credentials if your plans are made known to him. These lists of credits must be mailed from the high school directly instead of being presented by the student at the time of registration.

It is hoped that a very successful school year will be the result of efforts on the part of the Board, Supt and Supt. Thomas are working at the school house getting things in order for the opening day. Mr. Winegardner plans on being in Genesee next week to assist in the preparation.

The School Election

Perhaps one of the most important elections that has taken place in Genesee for many years will be held in Independent school district No. 2 on Tuesday, September 4. It is important not only from the fact that good men should be chosen for the position of trustees, but also from the fact that several serious problems are facing the district and the directors and it behooves the voters to see to it that competent men are chosen to fill these places.

Three directors are to be chosen—two for a term of three years each and one for one year to fill the unexpired term of Julius E. Nordby, resigned.

As all residents of the Genesee district are fully aware, the school problem in Genesee is a serious one and will require the very best that can be given by those chosen to represent the patrons—and thus it behooves the patrons to choose the best men for the place.

Are you ready for the question? Think well before you cast your vote.

Breaks Ankle

News has been received by relatives here that Claud Bumpass of Harrington, Washington, had the misfortune to break one of the bones in his left ankle last Friday while oiling a combine with which he was working. It seems his clothing was caught in the machine, tearing them off and pulling him in far enough to catch his foot. He is getting along as well as could be expected.

Both In The Swim

"My daughter sprang from a line of peers," said a proud father. "Well," said her suitor, "I once jumped off a dock myself.

MY LADY'S MONEY

An Episode in the Life of a Young Girl

By Wilkie Collins

INSTALLMENT NO. 15.

Miss Pink leaned back in her chair at the exact angle permitted by the laws of propriety, rested her left elbow on the palm of her right hand, and lightly supported her cheek with her forefinger and thumb. In this position she waited Mr. Troy's answer—the living picture of human obstinacy in its most respectable form.

If Mr. Troy had not been a lawyer—in other words, if he had not been professionally capable of persisting in his own course in the face of every conceivable difficulty and discouragement—Miss Pink might have remained in undisturbed possession of her own opinions. As it was, Mr. Troy had got his hearing at last; and no matter how obstinately she might close her eyes to it, Miss Pink was now destined to have the other side of the case presented to her view.

"I am sincerely obliged to you, madam, for the expression of your confidence in me," Mr. Troy began; "at the same time, I must beg you to excuse me if I decline to accept your proposal."

Miss Pink had not expected to receive such an answer as this. The lawyer's brief refusal surprised and annoyed her.

"Why do you decline to assist me?" she asked.

"Because," answered Mr. Troy, "my services are already engaged in Miss Isabel's interest by a client whom I have served for more than twenty years. My client is—"

Miss Pink anticipated the coming disclosure. "You need not trouble yourself, sir, to mention your client's name," she said.

"My client," persisted Mr. Troy, "loves Miss Isabel dearly—"

"That is a matter of opinion," Miss Pink interposed.

"And believes in Miss Isabel's innocence," proceeded the irrepressible lawyer, "as firmly as you believe in it yourself."

Miss Pink (being human) had a temper, and Mr. Troy had found his way to it.

"If Lady Lydiard believes in my niece's innocence," said Miss Pink, suddenly sitting bolt-upright in her chair, "why has my niece been compelled, in justice to herself, to leave Lady Lydiard's house?"

"You will admit, madam," Mr. Troy answered cautiously, "that we are all of us liable, in this wicked world, to be the victim of appearances. Your niece is a victim—an innocent victim. She wisely withdraws from Lady Lydiard's house until appearances are proved to be false, and her position is cleared up."

Miss Pink had her reply ready. "That is simply acknowledging. In other words ,that my niece is suspected. I am only a woman, Mr. Troy, but it is not quite so easy to mislead me as you seem to suppose."

Mr. Troy's temper was admirably trained, but it began to acknowledge that Miss Pink's powers of irritation could sting to some purpose.

"No intention of misleading you, madam, has ever crossed my mind," he rejoined, warmly. "As for your niece, I can tell you this. In all my experience of Lady Lydiard I never saw her so distressed as she was when Miss Isabel left the house.

"Indeed?" said Miss Pink, with an incredulous smile. "In my rank of life, when we feel distressed about a person, we do our best to comfort that person by a kind letter or an early visit. But then I am not a lady of title."

"Lady Lydiard engaged herself to call on Miss Isabel in my hearing," said Mr. Troy. "Lady Lydiard is the most generous woman living."

"Lady Lydiard is here!" cried a joyful voice on the other side of the door.

At the same moment Isabel burst into the room in a state of excitement which actually ignored the formidable presence of Miss Pink. "I beg your pardon, aunt. I was upstairs at the window, and I saw the carriage stop at the gate. And Tommie has come, too! The darling saw me at the window!" cried the poor girl, her eyes sparkling with delight, as a perfect explosion of barking made itself heard over the tramp of horses' feet and the crash of carriage wheels outside.

Miss Pink rose slowly, with a dignity that looked capable of adequately receiving, not one noble lady only, but the whole peerage of England.

"Control yourself, dear Isabel," she said. "No well-bred young lady permits herself to become unduly excited. Stand by my side—a little behind me."

Isabel obeyed. Mr. Troy kept his place and privately enjoyed his triumph over Miss Pink. If Lady Lydiard had been actually in league with him, she could not have chosen a more opportune time for her visit. A momentary interval passed; the carriage drew up at the door; the horses trampled on the gravel; the bell rang madly; the uproar of Tommie, released from the carriage and clamoring to be let in, redoubled its fury. Never before had such an unruly burst of noises invaded the tranquility of Miss Pink's villa.

CHAPTER XI.

The trim little maid-servant ran upstairs from her modest little kitchen, trembling at the terrible prospect of having to open the door. Miss Pink, deafened by the barking, had just time to say, "What a very ill-behaved dog!" when a sound of small objects overthrown in the hall, and a scurrying of furious claws across the oil-cloth, announced that Tommie had invaded the house. As the servant appeared, introducing Lady Lydiard, the dog ran in. He made a frantic leap at Isabel, which would certainly have knocked her down but for the chair that happened to be standing behind her. Received on her lap, the faithful creature half smothered her with his caresses. He barked, he shrieked, in his joy at seeing her again. He jumped off her lap and tore around and around the room at the top of his speed, and every time he passed Miss Pink he showed the whole range of his teeth, and snarled ferociously at her ankles. Having at last exhausted his superfluous energy, he leaped back again on Isabel's lap, with his tongue quivering in his open mouth, his tail wagging softly, and his eye on Miss Pink, inquiring how she liked a dog in her drawing room.

"I hope my dog has not disturbed you, ma'am?" said Lady Lydiard, advancing from the mat at the door way on which she had patiently waited until the raptures of Tommie subsided into repose.

Miss Pink, trembling between terror and indignation, acknowledged Lady Lydiard's polite inquiry by a ceremonious bow, and an answer which administered by implication a dignified reproof. "Your ladyship's dog does not appear to be a very well-trained animal," the ex-school mistress remarked.

"Well trained!" Lady Lydiard repeated, as if the expression were perfectly unintelligible to her; "I don't think you have had much experience of dogs, ma'am." She turned to Isabel, and embraced her tenderly. "Give me a kiss, my dear. You don't know how wretched I have been since you left me." She looked back again at Miss Pink. "You are not, perhaps, aware, ma'am, that my dog is devotedly attached to your niece. A dog's love has been considered by many great men (whose names at the moment escape me) as the most touching and disinterested of all earthly affections." She looked the other way, and discovered the lawyer. "How do you do, Mr. Troy? It's a pleasant surprise to find you here. The house was so dull without Isabel that I really couldn't put off seeing her any longer. When you are more used to Tommie, Miss Pink, you will understand and admire him. You understand and admire him, sabel, don't you? My child, you are not looking well. I shall take you back with me when the horses have had their rest. We shall never be happy away from each other."

Having expressed her sentiments, distributed her greetings, and defended her dog—all, as it were, in one breath Lady Lydiard sat down by Isabel's side, and opened a large green fan that hung at her girdle. "You have no idea, Miss Pink, how fat people suffer in hot weather," said the old lady, using her fan vigorously.

Miss Pink's eyes dropped modestly to the ground—"fat" was such a coarse word to use, if a lady must speak of her own superfluous flesh! "May I offer some refreshment?" Miss Pink asked, mincingly. "A cup of tea?"

Lady Lydiard shook her head.

"A glass of water?"

Lady Lydiard declined this last hospitable proposal with an exclamation of disgust. "Have you got any beer?" she inquired.

"I beg your ladyship's pardon," said Miss Pink, doubting the evidence of her own ears. "Did you say—beer?"

Lady Lydiard gesticulated vehemently with her fan. "Yes, to be sure! Beer! beer!"

Miss Pink rose, with a countenance expressive of genteel disgust, and rang the bell. "I think you have beer downstairs, Susan?" she said, when the maid appeared at the door.

"Yes, miss."

"A glass of beer for Lady Lydiard," said Miss Pink, under protest.

"Bring it in a jug," shouted her ladyship, as the maid left the room. "I like to fetch it for myself," she continued, addressing Miss Pink. "Isabel sometimes does it for me, when she is at home; don't you, my dear?"

Miss Pink had been waiting her opportunity to assert her own claim to the possession of her own niece from the time when Lady Lydiard had coolly declared her intention of taking sabel back with her. The opportunity now presented itself.

"Your ladyship will pardon me," she said, "if I remark that my niece's home is under my humble roof. I am properly sensible, I hope, of your kindness to Isabel; but, while she remains the object of a disgraceful suspicion, she remains with me."

Lady Lydiard closed her fan with an angry snap.

(To be continued.)

MANY IN DRIVE FOR GOOD SIRES

MOVEMENT POPULAR IN MANY STATES—1433 PERSONS JOIN IN THREE MONTHS.

IDAHO RAMS SENT EAST

Go to Annual Salt Lake City Sale—To Include Sheep Judging at Chicago Show.

The planting of crops and the rush of spring work on the farm seems to have been the obstacle in the drive for better live-stock through the use of better sires. Although the three months of April, May and June are the busiest months of the year for most farmers, more persons were enrolled in the "Better Sires—Better Stock" movement during those three months in 1923, than during any similar period since the drive began in 1919. During the period a total of 1,433 persons agreed to use purebred sires only in all breeding operations. This new high record is 256 more than the preceding quarter's total, which was itself a record up to that time. Officials of the Bureau of Animal Industry at Washington, who sponsor the campaign, are highly gratified at the sustained and increasing interest that is being shown. Although the five states of Kentucky, Vermont, West Virginia, Ohio, and Virginia, were most active, in the order named, enrollments were received from 14 states and 74 counties during the three months.

Vermont Improves All Over.

The state of Vermont, which stands fifth in number of persons enrolled, with 75,000 head of livestock and poultry listed, is showing uniform interest in purebred sires. Applications were received from every county in the state in which better-sires work had previously been started, 13 in all. This is a record for state-wide activity, as there is but one county in the state (Essex) which had not been heard from.

Kentucky, however, leads all the states during the quarter in total number of enrollments, 427 applications being received.

An attractive sign, bearing the words "Purebred Sires Exclusively Used on This Farm," has been prepared by the department for display by those who enroll in the better-sires drive. The sign is lithographed on cardboard in several colors, and resembles an embossed metal tablet. Each one distributed will bear the official enrollment number of the person to whom it is sent, as authority to display sign. It is distributed free of cost, and persons who have already enrolled in the "Better Sires—Better Stock" campaign, as well as those who will enroll in the future, are eligible to receive it.

Thirty rams, the first consignment ever made from the University of Idaho flocks to the annual ram sale at Salt Lake City, are being prepared for the sale, August 27, 28 and 29. The rams are from unusually good blood lines, and have been carefully fitted. The university flocks have produced many prize winning rams and ewes in recent years.

In the consignment are 27 yearlings and three two-year-olds of Lincoln, Rambouillet, Hampshire and Suffolk breeds. Among the Rambouillets is a son of Monarch, conceded to be one of the greatest rams of that breed.

Sheep Added to Judging Contest.

Contestants in non-collegiate judging contests to be held in connection with the International Live Stock exposition, Chicago, December 1 to 8, will be required to judge sheep in addition to cattle, horses, and swine as formerly.

Six Reasons for Purebreds.

There are six good reasons why purebred livestock is better than common mongrel stock. The reasons are: Better conformation and quality, more products for the same amount of feed, greater uniformity, earlier maturity, greater sales value, and more valuable offspring.

A questionnaire answered by some 500 practical stockmen in all parts of the country backs up the conclusion of the department of agriculture at Washington, D. C., and gives some additional facts on the desirability of purebreds on farm or ranch.

WASHINGTON STATE NEWS

The State Automobile club of Washington will sponsor a campaign to raise $3500 to purchase the auto in which President arding rode in Seattle.

The Distant Work scholarship of $400 has been awarded by Radcliffe college of Cambridge, Mass., to Katherine Kline, a graduate of the Yakima high school. Her father was a graduate of Harvard, A. B., 1900, A. M., 1901. Miss Kline was born in Belmont, Mass., where Mr. Kline taught for several years.

Seattle is mystified by the Associated Press announcement that Dr. Amy Kaukonen, woman mayor of Fairport, Ohio, has resigned to accept a position in Seattle. Because of Dr. Kaukonen's record in the rehabilitation of Fairport's moral tone and in ridding the city of illicit liquor, it is assumed that she is coming to Seattle to be connected either with the anti-saloon league or the federal prohibition enforcement offices of this state.

UNDER SUMMER SKIES THESE "ALPINE MERMAIDS" GLIDE

Copyright by Underwood & Underwood, N. Y.

Track!!—watch out, boys, these pretty "snowbirds" make no stops. Three snow-bathing beauties on a July toboggan party in the snow fields of Paradise Valley, Rainier National Park, Washington. Mt. Rainier, majestic and lofty, looms in the background. Left to right—the school teachers are: Frances Robertson, Seattle; Juliette Palmer, and Inez Micki, Tacoma.

WASHINGTON NEWS

The Wenatchee national forest has dedicated to the nation's dead chief a lasting monument whose rugged features suggest in a measure those of Harding. A peak high in the Cascades has been named Mount Harding in honor of the late president.

Plans for the securing of a substantial short term dairy loan from federal Intermediate Credit bank, at Spokane, will be one of the main matters discussed at the Valley dairy men's chautauqua which will be held in Sunnyside and Yakima about September 3 and 4.

Plans for the formation of a co-operative potato growers' organization were made at the meeting held at Sunnyside, August 3. The organization will be patterned after those already perfected in Maine, New York and New Jersey and will be based on community co-operation. Yakima county will be formed into the Yakima County Potato Growers' exchange with community units, such as Toppenish, Wapato, Moxee City, Sunnyside and Grandview, and if possible they will affiliate themselves with Idaho in the selling of their product.

Predatory animal control in the state for the year ending June 30 resulted in a saving of approximately $131,250 to live stock and wild game, according to the annual report of Glenn R. Bach, predatory animal inspector for the biological survey. The estimates are based on the calculations of experienced stockmen and sportsmen who are familiar with the depredations of predatory animals.

Announcement was made today by Harry Andrews of Aberdeen that he has succeeded in financing a new theater project, and that work will be started early in September. The building planned will cost $250,000.

Farmers, merchants, citizens generally of Washington will have an unusually interesting lot of things to look at when they visit their state fair this fall. The annual agricultural exposition which will be held at Yakima the week of September 17-22 even at this early date, gives promise of being crowded for exhibition space.

The department of agriculture announces that about 800 carloads of onions have been shipped out of the Walla Walla district this season. The shipments were made under state inspection which guarantees the quality of the crop. Director French also emphasizes the fact that Walla Walla shippers of vegetables intended for the markets of Puget sound will be benefited if the fight now on to reduce rates to Puget is successful. The Portland level is successful.

Omak, Wash., has a fine new hospital which was recently opened. It is upto-date in every particular.

The Grant County Fair association was formed at Neppel at a meeting called by the citizens of that community, recently. C. W. Scott, Neppel, was chosen president, and Edgar Dry, Neppel, was elected secretary-treasurer.

Fire, attributed to spontaneous combustion, destroyed the Bass-Huetter Paint company whosesale house at Tacoma with an estimated loss of $100,000. Two hundred guests of the Lacrosse hotel, adjacent to the paint establishment, were routed from their beds, about a time it was believed impossible to save the hotel.

Creation of a federal corporation with a capital of $500,000,000, empowered to "purchase and sell wheat in any quantity at any time or place at a basic price of $1.75 a bushel at primary points," is asked by the Wheat Growers of the Inland Empire in a resolution adopted at their conference in Spokane for sumission to President Coolidge.

A petition for the removal from office of State Director of Utilities Hance of Cleland is being circulated in Seattle by P. H. Wilson, executive secretary of the Telephone Users' association.

Charles W. Brockman, Creston, received the last land patent issued in the name of President Harding.

The patent was issued August 2, 1923, and embraces 160 acres in the southeast portion of Ferry county.

Russell A. Willson, assistant general manager of the Spokane United railways, has been granted a patent on an anti-aircraft shell, according to word from Washington, D. C. It is expected that the shell will be taken up by the government following tests for its effectiveness. The projectile may also be used for breaking up wire entanglements, according to Mr. Wilson. It is said to be a new departure presenting a spread hitting surface up to 10 feet in width.

CARE OF MILK CAN IMPORTANT

STEAMING OF CANS AT RECEIVING STATION NOT ALWAYS SUFFICIENT.

MANY HERDS ARE IMPROVED

Several Districts From Testing Circles and Bull Associations—Creamery Busy.

The washing and steaming of milk cans at milk receiving depots lends a false sense of security to dairymen. In many instances this so-called steam sterilization fails short of accomplishing what it is supposed to do. Indeed, authorities on dairy practice feel that altogether better results would follow if all dairymen were left to wash their own cans.

The reason is quite evident; not only is the brief steaming that is usually given insufficient to render the can wholly sterile but of rather more importance is the fact that in many cases the cans are not properly dried before being turned back. The lids are replaced while the cans are still warm.

Considerable vapor remains from the steaming to which the container has been subjected. In such shape the can goes back to the farm in prime condition to serve as a breeding place for bacteria. All the requirements, in fact, for rapid multiplication of germ life are met—provided temperature conditions prior to the next milking are favorable.

It is possible to tell a good deal about the condition of a milk can by smelling of it. A can that has been properly dried at a milk receiving depot and which is returned in stoppered condition will not have a disagreeable odor when the lid is removed. If, when this is done, the interior of the can has a musty or distinctly offensive odor it is certain that it contains many bacteria and will heavily seed any milk that is placed in it. If this be the case, a good scalding and sunning will be necessary in order to restore the can to a sweet condition.

This factor in shipping cans should be checked up frequently. Changes in help at receiving stations occur often and the methods followed one week may, at the hands of another person, be materially different another week—especially as regards the care and thoroughness with which the work is done. The fact that cans are steamed at the point where milk is delivered is no guarantee that they are fit to be used without first being scalded at the farm.

Better Stock for the Islands.

N. P. Hodgson of Richardson, near Friday Harbor, purchased a purebred Guernsey cow, a heifer and a bull from Mr. Heimstra of Everson, Whatcom county, to add to his herd. Oscar Weeks of Lopez, purchased two purebred Guernsey heifers from H. B. Doubias of Ferndale. This adds some more fine stock to the island herds.

County Agent Zentner, of Douglas county, reports the placing of 12 high grade dairy calves during the month. A loan was negotiated through the Spokane and Eastern Trust company for the purpose of several purebred bulls. Testing stations have been arranged in two localities to help farmers determine the butterfat production of their dairy cows.

Plan New Testing Circles.

Dairymen near Naselle and Brooklyn, Wash., met and made plans to form a cow testing circle. There is much interest in testing cows for butterfat and feeding and it is expected before long to have circles in both of the districts.

The creamery located at Republic is making 1000 pounds of butter a day, and the entire product is sold on the Spokane market, according to P. H. Walsh, president of the Ferry County State bank of Republic. Mr. Walsh reports that the production has fallen off somewhat with the rush of harvest and has been running higher than 6000 pounds of butter a week. The surplus was formerly sent to Pacific coast points.

Preliminary steps were taken by a number of farmers located on Puget Island, located in the Columbia river, to form a bull association. Six dairymen owning 49 cows were signed by County Agent Fred Martin and more showed their intentions of coming into the association. The dairymen are anxious to improve the production of their herds by using purebred sires and it is through the bull association they would be able to have the use of a good animal.

EARLY DAYS IN FAIR PAGEANT

WESTERN WASHINGTON EXPOSITION PLANS HISTORICAL REVIEW.

Old timers in the Puget sound district are scratching their heads and recalling stirring incidents in the history of the settlement of the region from the summit of the Cascades to tidewater, from Seattle southward. They are wondering just how the persons who will take the characters of their dads and mothers, their brothers and sisters, and in some cases of themselves, are going to look and act when they appear on the stage in the historical and allegorical pageant which will be presented by upwards of 1000 actors at the Western Washington fair, October 1 to 7, this year.

These actors are going to be just ordinary folks, men, women and children of the present day, as were those of a previous generation who came into the Puyallup, White and Green river valleys from Portland with Willis Boatman, still living at the age of 97 on his farm near Auburn, and the 165 of the Van Ogle party who in 1853 crossed Naches pass and spread over the rich lands to the westward.

But directing the pageant, and also writers of the scenario, are two with long experience in pageantry, J. H. Stine of Tacoma and Mrs. R. F. Sandall of Seattle. The latter is not only a competent dramatist and director, but one with personal experience on the stage, having been chosen from many applicants for one of the three speaking parts in the first production of "The Wayfarer" at Seattle in 1921, and winning the approval of six great audiences. They have been at work interviewing old timers, searching histories, writing the text, organizing castes and planning costumes, scenery and lighting effects. The stage will be 160 feet long and 40 feet deep.

Participating will be men and women, boys and girls from Puyallup, Orting, Sumner, Enumclaw, Buckley, Auburn and other towns and from the rich farm lands which lie between. Each town has been under direction of Mr. Stine and Mrs. Sandall, with one final rehearsal at Puyallup before the production.

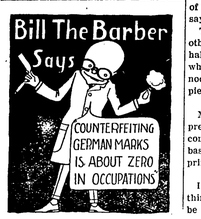
It is planned to give the pageant first on Children's day, October 1, the opening day of the fair, and to repeat it one evening later in the week, probably Friday or Saturday. Although W. H. Paulhamus, president of the fair association, is planning generously for entertainment at the fair this year, he is convinced that the pageant will be the biggest single attraction.

While historical events will be the dominating incidents of the pageant and the audience will feel again the thrills of the White river massacre and other occurrences which tried men's souls, this pageant will be lightened with some very modern episodes, in which those who can sing and dance and young folks who can just play will have a share. The Western Washington fair is bearing the expense of the production and no extra charge will be made to those seeing it. It will be a part of the entertainment offered to all entering the fair gates.

Active work is being done in signing up members for the Northwest Hay Growers' association, composed of hay growers of Kittitas, Yakima, Benton and Walla Walla counties. Work on all four counties has progressed to the point where more than 75 per cent of the hay grown will be in the hands of the association, which is co-operative.

An ice cave, which exceeds any thing that can be found in this part of the country, was discovered recently near Soap lake. The cave is located on the breaks southeast of Soap Lake and is difficult to find, although a car can be driven to a point within half a mile of the cave. There are three levels in the cave, and in the last and lowest level, the room is about 12 feet across and there is room for about 100 people in the space.

Judgment, thrift and system are the three great essentials of success.



Monopoly does not, and never will, prevail in agriculture so long as it is conducted on the present individual basis; nor do farmers holding just principles ever want it to prevail.

If everybody was satisfied with things as they are, civilization would be at a standstill.

MENU FOR THE WEEK

SATURDAY

Breakfast.
Peaches
Cream of Wheat — Milk and Sugar
Ham and Eggs — Toast — Jelly
Coffee — Milk

Lunch.
Stuffed Egg Plant
Tomato and Cucumber Salad
Muffins — Butter — Jelly
Apple Sauce — Oatmeal Cookies

Dinner.
Lamb Chops — Mashed Potatoes
Corn on Cob — Creamed String Beans
Rolls — Butter — Iced Tea
Grape Sherbet — Wafers

SUNDAY

Breakfast.
Bananas
Dry Cereal — Cream and Sugar
Waffles — Honey — Bacon
Coffee — Milk

Dinner.
Veal Cutlets in Casserole — Mashed Potatoes
Creamed Cauliflower — Tomato Salad
Bread — Butter
Peach Sherbet — Devil's Food Cake.

Supper.
Salmon Salad
Potato Chips — Pickles — Iced Tea
Bread and Butter Sandwiches
Cocoanut Cake

MONDAY

Breakfast.
Peaches
Oatmeal — Cream and Sugar
French Toast — Syrup — Bacon
Coffee — Milk

Lunch.
Cream of Potato Soup — Croutons
Eggs and Tomato Salad — Bread — Butter
Jam — Cookies

Dinner.
Creamed Veal — Boiled Rice
Buttered Carrots — Vegetable Salad
Bread — Butter
Lemon Cream Pie

TUESDAY

Breakfast.
Cantaloupe
Cream of Wheat — Cream and Sugar
Poached Eggs on Toast — Jam
Coffee — Cocoa

Lunch.
Macaroni and Cheese — Fried Tomatoes
Cold Slaw — Bread — Butter
Peaches — Cream

Dinner.
Swiss Steak — Scalloped Potatoes
Fried Onions — Buttered String Beans
Bread — Butter
Strawberry Ice Cream

WEDNESDAY

Breakfast.
Peach
Dry Cereal — Cream and Sugar
Whole Wheat — Hot Cakes — Syrup
Coffee — Milk

Lunch.
Rice and Tomatoes — Creamed Lima Beans
Bread — Pear Salad — Butter — Milk

Dinner.
Meat Pie — Fried Potatoes
Greens — Cucumber and Onion Salad
Bread — Butter — Iced Tea
Prune Whip

THURSDAY

Breakfast.
Orange
Oatmeal — Cream and Sugar
Bacon and Eggs — Toast — Conserve
Coffee — Milk

Lunch.
Vegetable Soup
Scalloped Corn — Muffins — Saltines
Lettuce Salad — Butter — Bread
Peach Cobbler

Dinner.
Stuffed Round Steak — Mashed Potatoes
Creamed Carrots — Lettuce and Tomato Salad
Bread — Butter
Watermelon

FRIDAY

Breakfast.
Bananas
Dry Cereal — Cream and Sugar
Waffles — Honey — Broiled Ham
Coffee — Cocoa

Lunch.
Potato Salad — Cream of Lima Beans
Bread — Fried Tomatoes — Butter
Baked Custard

Dinner.
Pot Roast — Brown Potatoes — Gravy
Spinach — Buttered Beets
Bread — Butter — Milk
Prune Fluff — Custard Sauce

WISCONSIN MUSEUM HAS ORIGINAL WATER WAGON

The original "water wagon" has been saved from dusty oblivion.

The ancient surrey, side lights, canopy top and all, in which Frances Willard used to ride about the Middle West, leaving in her wake the first spotless, white badges of the Woman's Christian Temperance Union, now rests in the museum of the Wisconsin Historical society.

It was presented by members of the Beloit, Wis., W. C. T. U. There was no crash of frothing wine bottles on its dusty sides. Anna Gordon, president of the World W. C. T. U., and Miss Willard's ablest companion on the crusaeds in the old surrey, spoke briefly of the life of its owner, the first woman to make a stand for prohibition.

This is not the first buggy belonging to Frances Willard to be discovered. There have been many. Charles A. Brown, curator of the museum, has placed the stamp of authority on this one, however. He has a photograph of Miss Willard driving on an Evanston street. The raklish tilt of the top is unmistakable, Brown says.

The carriage will rest beside another distinguished equippage in the halls of the museum. The coach in which Daniel Webster took his afternoon drive will be its companionpiece.

Calvin Coolidge, President of U. S.

Vegetables

Scalloped Potatoes.

Pare and cut potatoes in about 1-4 inch slices and put in buttered casserole or baking dish. Sprinkle with salt, pepper, and dredge with flour and dot over with small pieces of butter. Repeat until dish is nearly full, add hot milk until it may be seen through the top layer. Bake until potatoes are soft.

In order to vary the flavor of scalloped potatoes or corn a few slices of bacon or small pieces of ham can be put among the potatoes or corn. Either of these additions adds greatly to palatability of these dishes.

Scalloped Corn.

Heat 1 1-2 cups milk in a double boiler, mix 1-2 cup butter and 1-4 cup flour together and add hot water, stirring meanwhile. Then add 1 pint fresh corn or drained canned corn, 1-2 tablespoon salt and 1 tablespoon sugar. Let come to boiling point and turn into baking dish. Cover top with bread crumbs and bake 15 to 20 minutes.

Cold Slaw.

Select a small, heavy cabbage, take off outside leaves, and cut in quarters: with a sharp knife slice very thinly. Soak in cold water until crisp, drain between towels and mix with salad dressing. Decorate with boiled eggs and paprika.

Lima Beans.

Soak 2 cups lima beans over night in cold water. Drain and put into casserole and sprinkle with salt and pepper. Cut a 2-inch cube of pork in small pieces and fry out and strain. To fat add one small onion thinly sliced and 1-2 cup of dried carrots. Stir until vegetables are brown. Add to beans, dot over with 2 tablespoons butter and add milk to half the height of beans Cover and cook in a slow oven until beans are soft.

Potato Puff.

Two cups mashed potatoes and 2 eggs well beaten, 1-2 cup milk, salt and pepper. Beat well and bake in oven.

Boston Baked Beans.

Take one quart beans, 3-4 pound fat salt pork, 1 tablespoon molasses and 3 tablespoons sugar. Soak beans over night. Drain, cover with water, boil until skins burst easily. Drain, put in bean pot. Bury salt pork in beans, leaving rind exposed. Wash and scrape rind and cut into squares. Add seasoning. Cover with tomato juice, bake slowly from six to eight hours.

LEGUME CROPS

Legumes as pasture and cover crops are becoming more and more popular with the farmers of this state, as indicated by reports from many districts. Inoculation of seed is being generally practiced and some experimental work is being done with fertilizers.

Sweet clover as a cover crop in the orchards is receiving considerable attention in the Yakima valley, according to a recent report made by County Agent A. E. Lovett. One orchard in which the clover was grown for four years in comparison with alfalfa shows decidedly favorable results. If the nitrogen is supplied as readily with the sweet clover as it is with the alfalfa, there are two thing in its favor: first, it creates a looser soil and allows much better irrigation; and, second, through the decay of its roots, biennially it is adding much more humus to the soil than does alfalfa.

Farmers of Spokane county have purchased nearly six tons of legumes pasture seed, according to a recent report made by County Agent O. W. Patton. This greatly increased interest in legume pasture has been brought about by demonstration plots and pig club pasture plots which have been established over the county. Farmers purchased 1184 pounds of vetch, 1660 pounds of red clover, 1036 pounds of sweet clover, 1052 pounds of Grim alfalfa and 7021 pounds of common alfalfa.

A total of 453 acres has been sown to certified alfalfa seed around Newport. All the seed used was inoculated.

C. N. McLaughlin of Clallam county reported to County Agent A. W. Holland that he planted a new field of alfalfa in the spring and it is making a fine stand. Last year A. N. Taylor of Jamestown, harvested 42 tons of first-class alfalfa from seven acres of land and sold the third crop in the field for sixty dollars.

Checks were made on two farms by County Agent Kastens at Walla Walla on the results of using sulfur as a fertilizer on alfalfa. Increased yields ran from 25 to 125 per cent over places where no sulfur was used.

Vetch planted without being inoculated alongside of that which had been inoculated lost in the growing contest in the Naselle district. Where vetch had been inoculated there was from six to eight times as much growth as that which had not.

GUARDING THE BODY BY INSPECTION

Our definition of this is that by frequent examinations of the child we are able to detect the early symptoms of any abnormal condition; and from experience, the accumulated experience of the world's history, we are able to advise what should and ought to be done to prevent disabling conditions found in after life.

The question could then be properly asked: "What are some of these conditions found in childhood that disable in after life if not corrected?" In a word, this might be answered by saying all conditions except congenital, accidental and most of the acute infectious diseases. But let us be more specific and by illustrating what we know to have been the cause in innumerable instances, by observing over a period of several years those who had and those who had not corrective measures taken with comparative results. Most diseases are preventable if steps are taken to insure early detection and have the proper remedial measure applied.

The war brought to the attention of the world what a costly thing physical unfitness was. Of the great powers participating, the following is given as the per cent of unfitness for the countries named:

United States	33%
England and colonies	23%
France	17%
Germany	6%

The Germans have had for many years a system of preventive medicine which accounts for the low per cent in their case. In the other countries a like condition would have obtained had there been a system of guarding the body by inspection. It requires no master mind to figure out for you the ultimate end if this condition of affairs is not remedied.

One frequently hears the remark that years ago we did not have this, that, or the other disease. The same may be said of all other things with which the human family have to do. Medicinal science, like other progressive sciences, has made discoveries and it may also be said that it has contributed more than any other toward preventing sickness, suffering and death.

In the past few years typhoid fever, malaria, yellow fever, pelagra, hookworm disease and diphtheria have been brought under control. Many other diseases are being carefully studied and an early control may be reasonably expected.

In the past the physician has busied himself to a great extent with the discovery and interpretation of physical signs of disease. Today our interest is more in what an organ can do, as an effect of changed conditions. Function, rather than structure, is our chief interest.

The practice of medicine is based upon facts as old as the human race itself. The necessity for prevention has always been with us and the war has brought to our attention the need of greater effort to combat the evil influences that tend to undermine the health of the nation. Let us no longer neglect our duty as parents and citizens. Protection of the children is the highest patriotism. The young of today must carry the burden of tomorrow. Our duty is to make this possible for them.

POVERTY

By M. Margaret Lay

Her eyes are sad and unsmiling—I wonder why?
She has everything possible that money can buy—
A wonderful palace of antique pageantry,
Where ancestral lords and ladies tripped in royalty;
Ballrooms and servants and books by the score,
Enough enjoyment for a lifetime—and more;
Acres in gardens with fountains and flowers,
Constant sources of pleasures for long idle hours;
All of Nature surrounds her, all the beauty of earth,
She has a strong, stalwart husband of noble birth—
Yet she remains unhappy 'midst these riches so fair,
Why? In an upstairs chamber stands a tiny, empty chair.

IDAHO

$240,000 Timber Deal Reported.

A sale price of $240,000 is involved in the purchase of 35,000,000 feet of timber on Falls creek, 16 miles north of Pritchard, Idaho, by the Rose Lake Lumber company. The purchase, which was concluded today, includes 27,000,000 feet of white pine, for which the company paid $8.25 per thousand feet. Contract for cutting runs until June 30, 1928.

Approximately 10,000 acres of idle peat soil in Boundary county can be made highly productive through proper soil treatment, accordin gto G. R. McDole, soil technologist of the university of Idaho who was here three days of last week making examinations of local peat bogs.

While the Lewiston-Clarkston fair suffered the loss of its grandstand, three of the exposition buildings, the keepers home and the secretary's office by fire recently, the fair will be opened as announced on September 11 and there will be no curtailment nor embarrassment to the plans, according to an announcement by Secretary Bert F. Savage.

Homes for the miners and families and others living in the recently burned towns of Burke and Mullan are badly needed—and the Wallace board of trade proposes to supply the need by providing a revolving fund with which to buy a lot and build a home. When sold, the proceeds will go to build still other homes.

Fully 800 acres are being seeded this week with lettuce for the fall crop. This makes a total of more than 1000 acres of lettuce to be grown in the Lewiston orchards this season. This year's fall planting is the largest ever known, being more than twice that of a year ago.

The Boundary fair will be held on October 4, 5 and 6, at the fair grounds west of Bonners Ferry, according to the announcement just made by the board of directors. The premium list has been issued and several prizes have been provided. There will also be two days' racing for which several hundred dollars in cash purses have been subscribed.

The prune crops of southwestern Idaho will approximate 2300 cars, according to the estimates of the Idaho Growers' association. The price is expected to realize a better return for the grower for this year's crop than for the past two years.

Acceptance of the offer of Jerome-Day to sell to the University of Idaho property at Moscow for the development of the institution's engineering school has been made to the state board of education. Mr. Day's offer was $45,000 for property and buildings, which he said cost $100,000. The property consists of six acres and five fireproof buildings, formerly known as the Idaho harvester plant.

Buffalo on Increase.

The buffalo herds on the game preserves maintained by the United States department of agriculture have been increased this season by the birth of 118 calves. Of these, 92 are on the Montana Bison range, 16 at Wind Cave game preserve, South Dakota, 8 at Niobrara reservation, Nebraska, and 2 at Sully's Hill game preserve, North Dakota.

The blooded riding horses presented to Warren G. Harding early in his administration by Harvey S. Firestone soon will be returned to Mr. Firestone's stables in Ohio.

Wilson Edwards, negro farmer of Shreveport, La., 100 years old, purchased a license to marry a 40-year-old woman. It will be the former slave's third marriage.

Roadside markets have helped more than one farm family, living on a much-traveled state highway, to add a neat little sum to its bank account.

Whoever knowingly or ignorantly promulgates doctrines that are unsound and destructive betrays the people.

The most successful farmers are those who work hand in hand with the agencies which are trying to improve agriculture.

When you are trying to make friends never carry a gun with you.

CHURCH SERVICES

SEVENTH DAY ADVENTIST CHURCH
ESTEL ROGERS, S. S. Supt.
Mrs. B. B. CALDWELL, M. V. leader

Sabbath school at 10 o'clock Saturday morning.

Young people's M. V. at 12 o'clock Saturday.

Prayer meeting at 7:30 Friday evening.

LUTHERAN CHURCH
A. P. WOLFF, Pastor.

English services will be held each Sunday morning at 10:30 o'clock, with the exception of the first Sunday of each month, when German services will be held at the usual hour.

Christian Endeavor Notes
By Ida Evans

The regular Christian Endeavor meeting was held last Sunday in the church. Katherine McMahon was the leader and the topic was "How to Get On In Life."

The meeting next Sunday will be led by Maxine Lambert and the topic will be, "School of Prayer."

The attendance in our Christian Endeavor has decreased greatly this summer, but since it is almost time for school to begin we hope to increase the attendance to a larger number than we have ever had before.

Large Wheat Yield

W. W. Richardson, of Pomeroy, reports the largest yield of wheat so far harvested, considering the acreage, according to reports received in Spokane. It is 300 acres of Forty-fold, yielding 50 bushels to the acre. Mr. Richardson contracted his crop several months ago, at 90 cents a bushel.

Can Get Reserved Seats

The management of the Lewiston-Clarkston Fair and Round-up have adopted a plan for affording better accomodations to the visitors from outside points by setting aside a portion of the grandstand that will be reserved.

The sale of the reserved seats will open on September 1 and a patron can make reservations for any number of seats on any designated day and the seats will be available no matter how late the patron may reach the show grounds. An extra charge of 25 cents, or a total charge of 75 cents, will be made for reserved seats and persons making reservations are asked to send a check with their order and to definately designate the number and the day they want the seats.

The fair management has found from experience that the grandstand, if filled more than an hour before the time of opening the afternoon program, and persons desiring a good seat have been compelled to go early and wait that length of time. There will be more than 1,000 grandstand seats not reserved and these will be sold for 50 cents but persons can have their seats reserved by paying the extra 25 cents.

Many Millions of Bushels

Eastern Washington and northern Idaho will harvest 65,000,000 bushels of wheat, worth $50,000,000, this year, in the opinion of W. T. Triplett, vice president of the Spokane & Eastern Trust company. He bases his figures on observations made on a recent 500-mile swing through the wheat belt and on interviews with bankers, farmers and grain dealers in the various communities.

With the usual 9,000,000 bushels held out for seed and consumption on the farms, this leaves a surplus of about 56,000,000 bushels for sale, as against less than one-half that amount of salable surplus in 1922.

So Near and Yet So far

"What do you suppose they will do with this record corn crop we read about—they can't make mash of it."

"No; they will have to make mush of it."

Have Close Call

At the farm of J. H. Broemmeling, just west of town, on Saturday evening about 6 o'clock the lightening struck a couple trees which were some 12 or 15 feet apart, under which at the time were Herman Broemmeling, Lewis Bershaw and James Swenson who were preparing themselves for supper after the day's work had been finished. All three were somewhat stunned by the lightening but Mr. Swenson was rendered unconscious by the bolt, he remaining in that condition for several minutes. All later went to their homes and soon recovered, but it was indeed a very close call for all of them and undoubtedly they would not care to have it repeated.

A Coincidence

A Kansas man has discovered that presidents elected twenty years apart died in office. William Henry Harrison, elected in 1840, died one month after taking office. Abraham Lincoln, elected in 1860, was assassinated at the beginning of his second term. James A. Garfield, elected in 1880, was assassinated soon after taking office. William McKinley, elected in 1890, for the second time, was assassinated in September 1901. Warren G. Harding, elected in 1920, died August 2, 1923, after being in office two years and seven months.—Colorado Springs (Colo.) Independent.

GRANT CLARK

COMPREHENSIVE RESUME OF IDAHO'S RESOURCES

The following comprehensive resume of Idaho's resources were sent to the New York Herald upon request of that paper's editor, the same being sent out from the governor's office at Boise:

Idaho is quite properly called the "Gem of the Mountains." Its natural resources are unlimited; its mountain air and climate are healthful; its landscapes and scenic beauties are unexcelled; its people are prosperious, healthy and contented.

Idaho contains 83,354 square miles, equal to the combined areas of Massachusetts, Conecticut, Rhode Island, Maryland, New York and New Jersey.

Idaho has four and one half million acres of land in intensive cultivation of which three million acres are irrigated.

Idaho's elements of soil fertility, favorable climate and sunshine produce greater agricultural returns per acre than any other state.

Idaho is especially famous for its potatoes, sugar beets, alfalfa, corn, wheat, Italian prunes, apples, beans, oats and barley.

Idaho's pure, fertile and fully developed seeds are in demand in all agricultural sections. The state is particularly adapted to the production of clover, alfalfa and other grass seeds, seed peas, sugar beet seeds, beans, etc.

Idaho's revenue from 21 of its crops for 1922 was $70,591,000.00.

Idaho is the third sheep and wool-producing state in the United States.

Idaho's developed resources are enormous in unreclaimed desert land, timber, minerals and water power. It boasts the largest and best virgin white pine forest in the world. It markets 800,000,000 feet of lumber annually.

Idaho produced the following mineral values in 1922: Gold, $553,000; silver, $1,185,000; lead, $9,560,000; copper, $173,000; zinc, $94,000; quicksilver, $200,000 (approximately).

Idaho's abundant supply of water power available for electrical development, together with its raw materials, affords great opportunities for manufacturing.

Idaho offers the greatest possibility in dairying of any state in the Union.

Idaho's wonderful climate, wholesome mountain air and varying altitudes are conducive to good health. Its mortality rate is lower than any other state.

Idaho has unrivaled scenery, accessible by modern highways, and is one of the nation's greatest playgrounds.

Idaho's educational development is second to none in the Union, its illiteracy being less than 1½%.

Idaho has all of these, and more; what else is there to live for?

Big Saving to Farmers

The reduced grain freight rate, applying from Camas prairie points to the coast, as announced in a recent issue of the Spokesman-Review, will save the farmers of that district between $40,000 and $50,000 on this year's crop, is the opinion of M. B. Mikkelson, manager of the Prairie Mills company, of Lewiston. Mr. Mikkleson estimates that the points benefited by the new rate will ship out a minimum of 2,000,000 bushels of wheat. The saving will be direct and immediate for the farmers.

Much Building Being Done

Priest River is living up to her reputation as being the busiest little city on the Great Nortern railway from St. Paul to Seattle, and its growth has been remarkable. Within one block, seven new houses are under construction. The city is laying 500 feet of water mains to supply these houses, and the Mountain States Power company will supply their light.

Notice of Election

Notice is hereby given that an election of the qualified voters of Independent School District No. 2, of Latah county, Idaho, will be held on Tuesday, September 4, 1923, in the school house, between the hours of 1 p. m. and 6 p. m. of said day, for the purpose of electing two trustees, whose term will be for three years, and one trustee for one year to fill out the unexpired term of Julius E. Nordby, resigned.

Dated this 13th day of August, 1923.

By order of School Board of Independent School District No. 2.
7-3 ROBT. EMMETT, Clerk.

Attention Threshermen

WE ARE entering into the harvest season this year with a splendid stand of wheat. However, there is considerable smut and the straw will be very heavy. Both of these conditions tend to increase the chances for fire. The commonest cause of fire in a wheat field is a dust or smut explosion in the separator, usually caused by static electricity.

With this in mind, the Northwestern Mutual Fire Association has placed a fire prevention engineer in the field and has supplied its agents with a limited number of wiring sets. These sets can easily be installed on a separator by the owner. Full directions accompany each set. These are given to the threshermen free of charge, on one condition only—and that is that they be properly applied to the separator.

We now have a number of these sets and will be pleased to give them to owners of separators upon application.

PERSONAL MENTION

George Boliou was a Pullman visitor Thursday.

Miss Lucille Stovall spent Thursday and Friday in Lewiston.

Miss Ethel Nelson left Friday for Spokane for a visit with friends.

Mrs. Horace Sampson arrived Monday from Eureka, Montana, for a visit with friends.

Emil Schroeder has returned to Genesee after having spent the past few months at Burke.

Miss Edna Roach arrived Sunday from her home at Moscow for a visit with her friend, Miss Irene Mulalley.

Jimmie Kane arrived Friday from Belt, Montana, for a visit with his sister, Mrs. Leo Edwards, and family.

F. J. Niemann, cashier of the First Bank of Genesee, returned Tuesday from a week's business trip to Baker, Montana.

Miss Emma Tweedt returned to her home at Kennewick, Washington, Monday after a visit at the Matt Odberg home.

Don Newbrough and sister, Miss Bessie, returned to Pullman Monday morning after spending Sunday at the Walter Jain home.

Harold Jackson spent Sunday in Genesee shaking hands with old friends. He returned Saturday from his trip to the East.

Mrs. W. R. Hickman and three children left Sunday for Gifford, where they will visit with her cousins, Mr. and Mrs. Will Stoddard.

Mr. and Mrs. Leon Follett and niece, Helen Misenhamer, left Wednesday morning for Spokane for a short stay, from which place little Miss Helen will return to her home in St. Louis, Missouri.

Mrs. B. W. Evans and children left Thursday morning for their home at Spokane after an extended visit at the Dr. F. B. Evans home. Mrs. F. B. Evans and little daughter accompanied them home for a visit.

C. V. Guerrier returned to his home at Portland, Oregon, Thursday after a visit with his daughter, Mrs. Mike Reisenauer, and family. Mrs. Reisenauer accompanied him as far as Pullman, returning the same day.

Heavy Rain and Dust Storm

This section experienced one of the very worst dust storms of the season last Saturday evening just before 6 o'clock during which rain began to fall and continued in a steady downpour for several minutes—and little delay would have been caused in the harvest work had the weather man stopped at that, but instead rain again commenced falling Sunday evening and continued intermittently during the night and all of Monday morning, causing a bad delay in harvest and threshing work. Wind and lightening also were very much in evidence, many shocks, hay stacks and an occasional tree showing the fierceness of the gale.

Many Cars of Many Kinds

It would be next to impossible to get together a greater array of vari-colored, vari-shaped gasoline buggies than may be seen in the Genesee section this summer. Harvest hands come in all kinds and shapes traveling from one place to another, and sometimes too often for when they have an easy way of traveling it seems they would rather travel than work.

Has Foot Badly Injured

Colin Wilson is nursing a very sore left foot as the result of getting it caught in one of the chains on his binder last Thursday, causing severe laceration and much pain and inconvenience. It was necessary to call a surgeon to put the injured member in shape again. He says it is very inconvenient and expensive to have a bad pedal extremity at this season of the year.

A Cold Reply

"Do you have many early frosts here?" asked the landseeker of the old-timer.

"Well, I don't know how early they air; they're always there when I get up—if we have 'em at all."

WHAT HAPPENED HERE TWENTY YEARS AGO

On the fourth of next month Miss Lula Brennan will begin a term of school near Princetown, in the northern part of the county. Miss Jane Brennan will accompony and keep house for her during the term.

Saturday of last week, the weather man gave us enough rain to lay the dust. The weather then continued cloudy and threatening until Tuesday when he opened the flood gates and gave us a soaker. Thursday the skies cleared and harvesting will probably be resumed tomorrow. Dust is a thing of the past. Stockmen are feeling good as a result of the rains as a great amount of good has been done to the ranges. Some damage has been done to barley yet standing also to bundle grain not shocked. But on the whole the rain has been a blessing.

Bill Craig's reservation wheat averaged 39 bushels per acre.

Will Herman, Reed Knapp, Geo. McMahon and Carroll Conant returned Wednesday from their trip to the Bitter Root mountains.

Ed Keane reports serving over 250 meals Sunday at his new restaurant.

John Vandenburg returned Friday from his trip to Nebraska. He succeeded in disposing of the threshing outfit owned by himself and Mr. Edwards of that place. Mr. Vandenburg says Nebraska is harvesting one of the best crops in the history of the state although the scarcity of help is a great hinderance. As high as $3 a day is being paid for shocking.

The population of Genesee is steadily on the increase and the demand for houses was never greater. At this time there is not a vacant house in town that is fit to live in.

Too Late

Blake was talking with his friend Scribbler, the well known English Journalist of Fleet street.

"Do you believe in writing anonymously?" he asked the hero of the pen.

Scribbler looked to see that the door of his study was shut ere he replied in a confidential whisper.

"Well, I've often wished that one of my productions had been anonymous."

"What was that?" asked Blake.

"A letter proposing to Mrs. Scribbler," groaned the famous writer.

New Arrivals

Mr. and Mrs. Fred Bershaw are entertaining a little stranger at their home, a little gentleman having made his appearance there on Thursday, August 16. All concerned are doing nicely.

Mr. and Mrs. Dave Garrett are likewise entertaining a little gentleman who made his appearance at their home on Tuesday, August 21. Mother and son are doing nicely.

On Sick List

Wm. Hardeman has been quite sick during the past few days, but is at present getting along very nicely. He engaged in stacking hay last Friday afternoon and became overheated, causing severe illness. His many friends will be pleased to know that he is, making good progress toward recovery.

It is not t all necessary to sidestep the fellow with a chip on his shoulder. Hell be careful not to let you jostle it off.

If your auto spokes are loose and your wheels need setting, I have a Klein machine with which to do the work. Satisfaction guaranteed. See Gus Fickens. 4-4x

Prepare for School

SCHOOL time is rapidly approaching. Only one more week in which to prepare your boys and girls for school. We have our fall goods and are prepared to equip the boys and girls in new wearables for this occasion.

27-inch gingham, good quality, yard	25c
32-inch extra quality gingham, yard	50c
32-inch French zephyr gingham, yard	50c
36-inch high grade percale, yard	25c
30-inch Jap crepe, fast colors, yard	35c
36-inch ratine spun, yard	75c
32-inch silver tissues, yard	59c
28-inch shirting, stripe and check, yard	25c
32-inch devonshire, all shades, yard	35c
Girls' jersey bloomers, pair	75c
Misses' canvas pumps, sizes 12 to 2, pair	$1.25
Children's canvas pumps, 7½ to 11½, pair	$1.00
Ladies' canvas pumps and oxfords, pair	$1.25 to $2.25

Ask for "Pol-Parrot" all-leather shoes for boys and girls

Boys' knee pants, prices	$1.50 to $2.50
Boys' wool suits, two pairs pants, sizes 8 to 17	$10.00
Boys' caps, McKibbin brand	.65
Boys' caps, McKibbin brand	.90
Boys' caps, McKibbin brand	1.50
Boys' fine quality chambray shirts	.90
Boys' kahki shirts	.90
Boys' "Honor Bright" blouses	.95
Boys' bib overalls, pair	$1.00 to $1.50
Boys' shoes, sizes 12 to 2	$1.95
Boys' Defiance shoes, sizes 2½ to 6	2.28
Boys' Scout hats, regular $1.75, special	1.49

SCHOOL SUPPLIES

All kinds of pencil and pen tablets; pencils and crayons; theme paper and composition books.

FOLLETT BROTHERS MERCANTILE COMPANY

A SEPTIC TANK FOR THE FARM HOME

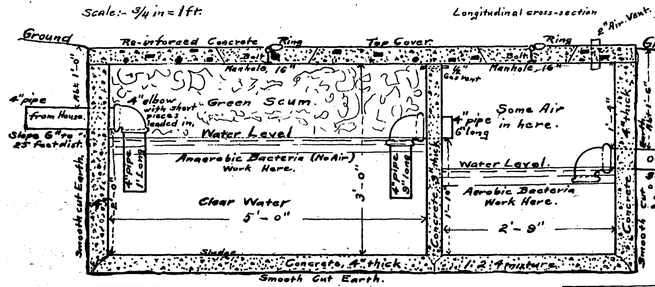
A. B. Crane, Extension Specialist in Agricultural Engineering, State College of Washington.

A simple, effective form of septic tank for the farm home may be constructed by the farmer at a reasonable cost for materials.

The object of the septic tank is to dispose of the sewage from the isolated farm home in a safe, sanitary and permanent manner. The practice of disposing of it by running the raw sewage upon the surface of the ground is unhealthful and creates a nuisance. A cesspool is little better, as it pollutes the ground for many rods away from the source. The septic tank, by making use of nature's best liquefying agents, the bacteria, breaks up the solids, destroys by nitrification much of the harmful materials and leaves the effluent in such a state that it is readily absorbed in the ground as it flows down the outlet pipe.

When the tank is functioning properly the effluent is clean, odorless and reasonably free from organic material and when further purified by the soil filtration is practically as harmless as the ground water with which it mingles. It is understood that the installation of the septic tank assumes that there is running water in the house, as water is the carrier and the medium in which the bacteria work.

The form of septic tank shown is of the continuous discharge type and its dimensions are such as to suffice for a farm home for ten persons. A general rule is to allow four cubic feet of space in the receiving chamber for each person. When the chamber is filled to its water-level line (two feet deep) it will hold forty cubic feet, or just the capacity for ten persons. The capacity of the second, or aerating chamber need not be as large as the first, as the greater part of the bacterial action has already taken place in the first chamber. A study of the cross-section and dimensions as shown in the cut will enable the reader to understand the general plan of construction.



Design of Form for Septic Tank.

DESIGN FOR SIMPLE SEPTIC TANK

FOR MEDIUM SIZE HOUSE—10 PERSONS
Continuous Discharge Type

Dimensions: Length, 8 ft.; Width, 4 ft.; Depth, 3 ft. (inside measure).
Walls: Between ground and form, 4 inches thick; 1:2:4 mixture.
Top and partition: 3 inches thick, 1:2:4 mixture. Top reinforced.
Inside wall troweled smooth with 1:2 cement plaster.
Materials: Cast iron pipe and elbows from house and in tank.
Outlet: Vitrified sewer tile about 20 ft. then drain tile to outlet.
Quantities: 2 1-4 bbls. cement, 1 cu. yd. sand, 2 cu. yds. gravel.

nects with the short piece of soil pipe extending through the wall, should be vitrified sewer tile, 4-inch size, well cemented for about 16 to 20 feet, then ordinary burnt clay drain tile the rest of the way. All outlet pipes should have a grade of 3 inches to 100 feet and laid in a trench about two feet deep. This should run out, to some depression or draw, one hundred feet or more away. If there is no such depression a "dry well" about five feet deep and filled with small boulders may receive the end of the tile, it being filled up and worked over as though it were not there.

Ordinarily the excavation for the septic tank can be dug down smoothly and straight, the sides being firm enough to form the wall for the outside form. This should be dug 3 ft. 7 inches below the ground or the top cover of the tank, or satisfactory for the intake and outlet. If the ground is loose and will not stand up, the excavation must be made larger and an outside form placed also, for the outside of the wall. When the ground is firm two forms should be built according to the diagram here shown.

All forms should be placed in the excavation and leveled up true. Leave a 4-inch space all around, between the earth and the form, and a 3-inch space between the forms, for the partition wall between the chambers. The cast iron soil pipe elbows and short pieces should be leaded together beforehand and set as shown in the diagram and the concrete poured around them.

Concrete Mixture and Floor.

Concrete should be made of a mixture of one part cement, two parts clean sand and four parts small gravel, thoroughly mixed and moistened to about the consistency of plaster. Pour floor first, letting the mass ooze out around the bottom of the form into the wall space. Tamp the floor tight and smooth with a tamping block.

Walls.

Pour the wall before the floor sets, so as to have a water-tight union between the floor and the wall. Fill between the ground and the form to the level of the top of the wall and be sure that the pipes are all well set in the concrete. Let the concrete set three days, then the form can be taken out. Knock the four posts loose with the hammer; the boards can then be taken out very readily. Now plaster the walls and floor with a plaster consisting of one part cement to two parts sand, troweling it down smooth and pointing up tight around the pipes. After this dries you are ready for the cover.

Cover for Tank.

This may be of 3-inch planks laid short way across the tank, or preferably of concrete, reinforced, as shown in the diagram. If of concrete, make a floor even with the top of the wall, setting some posts below to hold it up in place. Place 1 rim around the edge 3 inches high and pour in the concrete with a good supply of stiff iron rods or 1-2 inch gas pipe for re-inforcing, or regular re-inforcing rods may be bought.

Man-Holes.

To make the man-holes and covers a simple way is to take an old dish pan, grease it well, both inside and outside with some kind of cold grease (tallow, lard or axle grease), place on the floor and fill it to the same depth as the top itself. An eye-bolt and ring can be set in the cement in the pan to provide a handle for the man-hole cover. When connecting up the intake and outlet pipes with the tank be sure the joints are water-tight and smooth inside.

Cost of Septic Tank.

The cost of the septic tank runs from $18 to $25 for materials, with about 20 per cent more than the cost of materials for the labor if hired. The farmer and his helper usually build the tank with the minimum of labor cost, sometimes as low as $12.

The Materials Needed.

Cement, 2 1-2 barrels (9 sacks).
Sand, 1 cubic yard (1 load).
Gravel, 2 cubic yards (2 loads).
4-inch cast iron soil pipe, 5 feet (5 short pieces).
3 cast iron elbows, 4-inch size.
1 piece 2-inch air vent pipe, 6 inches long.
1 piece 1-2 inch gas vent pipe 6 inches long.
4-inch cast iron pipe or sewer tile, from house to tank.
20 feet of 4-inch sewer tile at outlet.
100 feet of 4-inch clay drain tile for outlet pipe (approximately).

The cost of these vary with the length of pipe required.

Smaller Tanks.

The design, dimensions and approximate cost shown here are for a tank sufficient for ten persons. If the house capacity is only from five to seven persons the tank may be made smaller by making it only three feet wide instead of four feet, all the other dimensions remaining the same.

Caution.

No chemical is needed to produce the septic action in the tank. It is the result of life activities of the bacteria and will develop as needed. Avoid using crude lye in cleaning the sink or other basins. Lye will kill the bacteria. Soap and mild cleaning powders, being partly neutralized in their manufacture, are all right and may be used as cleansers. Grease and greasy scraps that can be burned had better be consumed that way rather than running them into the tank, as they only tend to make the tank fill with green scum quicker.

After about three years it will be well to take off the man-hole cover from the first chamber, and reaching in with a pitchfork, remove a few wheelbarrow loads of the green scum that has formed. This relieves the tank and keeps it up to capacity. Do not take it all out, as then you would have to wait for bacterial action to be re-established.

Black satin frocks for early fall wear, leas very strongly to circular skirts, and tiny little ruffles of white lace edging these skirts are much approved.

Give Origin of Washington Names

Willapa.

Ah-whil-a-pah was the original name of the tribe of Indians from which Willapa harbor derived its name, according to the treatise on Washington geographic names by Edmond S. Meany, professor of history at the University of Washington, which has been published in the Washington Historical Quarterly.

Professor Meany gives the following account of the name Willapa:

A bay, river and town in Pacific county all bear the name Willapa. It was first applied to the Indians and the river, on the banks of which they lived. Writing in 1853, James G. Swan recorded: "The Indians of Shoalwater bay had no distinct language of their own, but used the Chinook or Chehalis promiscuously, with the exception of the tribe on the Whil-a-pah river, who spoke a language somewhat resembling the Cowlitz. There are two or three of the Whil-a-pah Indians still living at Shoalwater bay, but the rest of the tribe is all extinct."

"Captain George Davidson wrote: 'The Whil-a-pah Indians are extinct. The true name is Ah-whil-a-pah, or Ah-whil-lapsh.' The Bureau of American Ethnology calls these Indians a Chinookian tribe and says a single survivor who understood the language was known in 1910. George Gibbs mentioned the stream as 'Willopah' on March 1, 1854. From that time on some variations of the name was used on maps and charts. The bay was discovered by Lieutenant John Meares, retired officer of the British navy, on July 5, 1788. He was then in the fur trade. He called it Shoalwater bay. Meares on the next day named Deception bay and Cape Disappointment. He was looking for the "River San Roque" reported by the Spaniards.

"After the discovery of the Columbia river by Captain Robert Gray, the chart by Meares was deemed wholly inaccurate. It was thrown aside altogether, and his account of Shoalwater bay considered fabulous. The bay was explored and the name Shoalwater bay was restored to the charts by Lieutenant James Alden, United States coast survey in 1853. The neglect of the bay between the dates mentioned, 1792 and 1853, was not complete. The name of Shoalwater bay proved a commercial handicap and was changed by extending the name of the river to the bay."

SHORTAGE OF TIMBER IS FEARED FOR U. S.

Because this country's timber supply has been mined from the forest much as coal has been mined from the ground—without thought of replacement — America faces an inevitable timber shortage, foresters of the United States department of agriculture declare in a recent report on the timber situation printed for free distribution.

However, if timber crops were to be grown and intensive forestry methods observed on all forest land in the country—some 470,000,000 acres — the nation's timber problem could be alleviated, it is stated.

"Three outstanding measures are necessary to bring about the growing of timber crops on forest lands," according to the report. "The first step is to stop unrestrained forest exploitation and the denuding which is a direct result of timber mining. The second step required is to reduce waste in the use of timber, and the third objective of paramount importance is to increase timber production to the full capacity of the land. Protection from fire, insects, and disease, of course, must go hand in hand with all reforestation projects.

"In short, with the utmost that can be done many years must pass before we can make our forests produce through growth as much timber as is now yearly taken from them, and a period of shortage is inescapable."

LAST CHANCE FOR WAR COMPENSATION

Time Allowed Disabled Veterans for Making Claims Expires This Fall.

Disabled World war veterans, who have failed to make application for government compensation should do so at the earliest possible moment, L. C. Jesseph, Pacific Northwest manager of the United States Veterans' bureau, urges. Laws governing activities of the bureau give the war veteran five years from discharge to file application for compensation. In a large number of instances, this period expires during the late summer and fall months of this year, he stated.

Ex-service men suffering from ailments of 10 per cent or more, due to war service, are entitled to compensation ranging from $8 to $80, depending upon the degree of the disability, Mr. Jesseph announced. Additional allowances are made for dependents. Even though the war disability is slight at the present time, the war veteran should protect himself by making proper claim and proving service connection. With these steps taken, the claimant is entitled to the benefits offered after the five-year period in case the injury or disability becomes aggravated to a compensable degree.

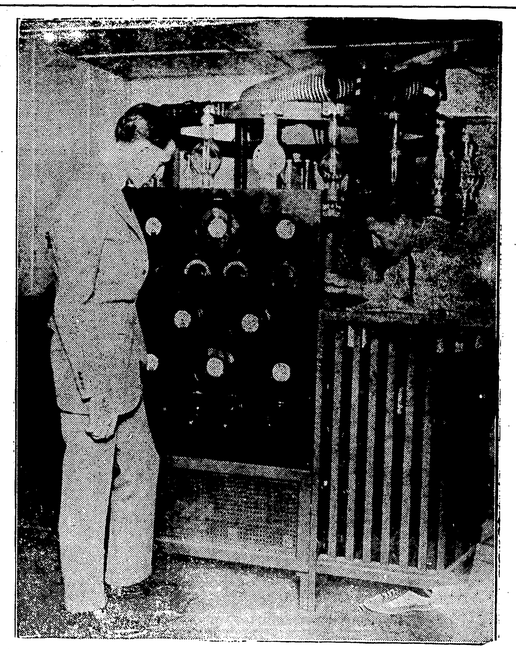
"Every war veteran of this district which includes Washington, Oregon and Idaho, who believes that his illness or present disability is traceable to his service during the World war, should get in touch with the nearest veterans' bureau office," urged Mr. Jesseph. "A letter written to his bureau will receive an immediate response instructing the ex-service man how to proceed in the prosecution of his claim."

The district office of the bureau is located in Seattle and there are branch offices in Portland, Spokane and Boise. These offices handle, aside from the compensation claims, hospitalization of disabled veterans, medical treatment and their vocational rehabilitation.

Alaska Fox Farmers.

Blue-fox farming in Alaska is now being engaged in by 146 farmers, of whom 90 are in southeastern Alaska, 29 in the Prince William Sound region, 8 in the lower Cook Inlet region, 13 in the Kodiak-Afognak region, and 10 on islands off the Alaska peninsula. The biological survey of the United States department of agriculture has prepared a list of these farmers for distribution to those interested, giving their post-office addresses and the names of the islands occupied.

Talking to MacMillan at the North Pole.



Copyright by Underwood & Underwood, N. Y.

Radio is to be carried into the far north and for the first time a practical study made of its relation to the electrical phenomena near the magnetic North Pole, when Donald B. MacMillan reaches the polar regions for the eighth time this fall.

Photo shows the transmission plant at Station WJAZ,, Edgewater Beach Hotel, Chicago. All programs are sent here from the main studio at the hotel, which is located about 300 yards away. Eleven tubes are used in the giant transmitter placed in a circle.

WORLD'S NEWS BRIEFLY RETOLD

Important News of Both Hemispheres Boiled Down to Last Analysis.

Tidal waves, combined with a severe storm, have submerged 25,000 houses along the Yalu river and on the coast of west Korea. No estimate of the loss of life has yet been received, but it is said the damage to crops and the lumber industry will be heavy.

The Orpheus male voice choir of Cleveland, Ohio, composed mostly of steel workers who years ago emigrated from South Wales, won first place in the choral competition at the Welsh national Eisteddfod, the greatest song and poetry festival of Great Britain.

Prince Fabrizio Colonna died on August 8. He was vice president of the senate and the head of one of the most noble Italian families. The prince had been suffering for the last three months from an infection of his left leg. He was born in Rome March 28, 1848.

Captain Roald Amundsen, leader of an aerial and marine expedition that left Seattle in June, 1922, bound for the north pole, is on his way to Nome aboard the United States coast guard cutter Bear, according to advices received at Nome.

Storms of great violence have almost destroyed the grape and olive crops in the communes of Oppido, Radicena, Cittanova and Polistena in Italy. At Varapodio two persons were killed. At Istrimoli three persons were killed and several injured. At San Martino one peasant was killed by lightning.

The prince of Wales will leave London early in September for his visit to Canada and will spend some time at his ranch in Alberta, it was learned. He will be accompanied by his private secretary, Sir Godfrey Thomas and Brigadier General B. F. Trotter.

Randall Parrish, author of many popular books of fiction and history, died at his home at Kewanee, Ill., on August 9. His health had been poor since the time when he was active in Liberty loan and Red Cross drives, speaking for days and weeks in the middle west. He was born at Kewanee June 10, 1858, was graduated in law from the University of Iowa and practiced in Wichita, Kan., until his health failed.

Evidence of a former civilization on the now uninhabited islands to the northwest of the Hawaiian group were found recently by members of the United States government party which is conducting an extensive biological and geologic survey of these rarely visited dots in the Pacific. As a result of these recent findings there may come at last the answer to the question of the origin of the Polynesian arce.

Finding of a skull said to have been positively identified as that of an Indian and which showed evidence of having been in the ground many years, and containing a gold tooth which had been shaped from a solid nugget, caused great speculation as to how an Indian who had evidently died long years ago had known of dentistry. It is evident the tooth had been made by himself or some of his tribe.

Authorities at Rome have completed experiments with a new type of aeroplane which is claimed to be the smallest in the world. The machine has an engine of three horsepower and reached an altitude of 3000 meters during tests which were witnessed by Premier Mussolini and high Italian personages.

The Christmas islands are growing larger and now rise to a height of 70 feet above sea level. Maritime charts show an elevation of only 15 feet. As a further indication that the islands are being lifted, the fact is cited that several small lakes are going dry apparently because of drainage into the ocean.

COIN BRANDED 30 YEARS AGO RETURNS

It is known that patience was described as a virtue by the ancients, but with John Roser of Baraboo it became a habit. Incidentally, he just about proved that anything will happen, if one waits long enough.

While clerking for his brother in a store at Phillips, 30 years ago, Roser scratched his initials on a half dollar and then placed it in circulation again. For many years he has scanned every 50-cent piece that came into his hands, with the idea of finding the coin he had marked.

His patience was rewarded at La Crosse recently, when the coin he had branded was received by him in change.

NEW HATCHERY MAKES RECORD

FIRST ACCREDITED HATCHERY TURNS OUT 25,000 CHICKS—GEESE AND TURKEYS.

The new accredited hatchery in Nason county, and the first to be started in the state finished the first year's run and made a fine record. Twenty-five thousand chicks were hatched and placed in the county and all have given better results than were secured before the hatchery started. The loss was remarkably small, in some instances only 4 per cent at 12 weeks of age. The heaviest loss was 20 per cent, but the chicks were taken from the incubator when still wet, because the buyer did not want to make another trip. One thousand breeders have been secured for the 1924 breeding season. Only the choicest of birds were secured. The hatchery will increase it's capacity for 1924 by 33 per cent and will require at least 2000 breeders. The hatchery system was worked out by County Agent Drew and W. D. Buchanan, extension specialist in poultry.

The Toulouse and the Embden are the most popular breeds of geese in this country. The Toulouse is the largest breed, the adult gander weighing 25 pounds and the goose 20 pounds.

Geese can be raised in small numbers successfully and at a profit on many farms where there is low, rough pasture land containing a natural supply of water.

The goose house only during cold or stormy weather, when an open shed should be provided.

Large boxes, barrels, or shelters are provided as nests for geese, or they are allowed to make nests on the floor of the house.

Recent research indicates that chickens and turkeys—especially turkeys—will not thrive when raised together within comparatively close quarters and small field range. It has been found that blackhead, which is said by investigators to be responsible for 90 per cent of losses among growing turkeys, may be produced in the poultry by feeding them the eggs of a small worm found in the blind gut of chickens. The germ which causes balckhead may and does live in the eggs of the common intestinal worm of hens.

Fred E. Starkey, owner and manager of Pullet Pens hatchery and chicken farm, took a shipment of 2600 White Leghorn pullets to Hawaii recently. It was the third shipment to leave this season from the Pullet Pens hatchery.

Mr. Starkey accompanied the shipment through the eight-day water voyage to be certain that the chickens would arrive in good condition. Mr. Starkey says that he expects to ship the major part of his annual output to this market in the future.

The Henacres hatching plant at Yakima reports hatching and selling 180,000 baby chicks this season.

TIMELY HINTS

By EXTENSION SERVICE SPECIALISTS

Agricultural Engineering—Clean the accumulation out of your water supply reservoir.

Apiculture—The productiveness of queens over two years of age generally decreases and hives should be requeened at that time.

Clothing—Alterations to correct hang of skirt should be made above hip line.

Dairy—Arrange rack for milk scales and record sheets on feed cart or milk can cart and weigh every milking.

Farm Crops—Plans for early spring pasture should be made now. Good crops to use are fall sown rye, vetch or sweet clover and mixtures of these. Choose the ones best suited to your locality and needs.

Farm Management—Records show that it pays to hold potatoes for spring marketing when the crop for the nation is 85 per cent of normal.

Horticulture — Contented harvest help is the most efficient and economical. See that convenient and sanitary arrangements are made at their quarters or camp.

Livestock—The summer grows hotter. For best results have shade, fresh water, a hog wallow and green feed available for the hogs at all times.

Plant Pathology—Potato vines should be kept growing vigorously by proper application of water in the irrigated section and proper cultivation in the non-irrigated section.

Poultry—Any hen that quits laying before September 15 is a suspicious character. Get rid of her.

Ignorance is no excuse if there is available knowledge on the subject.

HOMEMAKERS' CORNER

Conducted by
Alice Lindsey Webb, News Editor, and
Lincoln R. Lounsbury, Agricultural Extension Editor,
State College of Washington.

Of how many wives may it be said as it was of Abigail Adams, wife of John Adams, who was one of the first great men of the nation, a framer of the Declaration of Independence, that it was "to her wise counsel he attributed his success?" If more wives and mothers took care to see that their heads and hearts were working together, that the advice they gave was truly "wise counsel" and not petty worry or nagging, how many more "eminently successful" men would we have? How much of a curtailment of the work of the divorce court might be expected then?

One of the bright virtues of the good housekeeper is the quality of being a good neighbor. That thought was illustrated by the reading of something Jane Addams, fonder of Hull House settlement in the Chicago slums, said when she was a little girl. "When I grow up I will have a large house, but it will not be built among the other large houses, but right in the midst of horrid little houses like these," she said one day when her father took her into the poorer part of the town where they lived. She never forgot the "horrid little houses."

When she traveled in Europe, she visited Toynbee Hall in London, the first of many social settlements where kind-hearted men and women live voluntarily in the slums to aid and befriend the very poor. This suggested a way of carrying out the childhood idea which had developed into a passionate spirit of true neighborliness. In 1889, with her friend, Miss Ellen Gates Starr, she moved into Hull House, that had been a fine mansion in older days, around which had grown up a crowded foreign quarter.

Believing that "the things which make men alike are finer and better than the things that keep them apart," she put into this house the kind of books and pictures and furniture that she woud wish to have in her own home, and in her gracious way invited her neighbors to come and see her. She helped those who were ill or in trouble; she started a day nursery where the little children could be properly fed and amused while their mothers were at work; and she organized clubs and classes of many kinds for the older boys and girls and the grown people.

Poor, puzzled, friendless immigrants of 36 different nationalities were made to feel at home, and here in this atmosphere of true democracy they learned to be good Americans in the best sense. Now we can not all be Jane Adams or Ellen Starr, and most of us never see a slum or a foreign quarter (for which we may be profoundly grateful—pure air, elbow room, sunshine, green fields and trees and cause for great gratitude.) But we all have neighbors, and often they need help or sympathy or advice. If offered in the right spirit, it will make friends of the neighbors, and friends, says Robert Louis Stevenson, are among the things most to be desired in life.

SEEK HISTORY OF OLD GUN

Brass Flintlock Pistol Found in Cowlitz River 200 Years Old.

At Longview, Wash., a brass flintlock pistol, found in the Cowlitz river recently, and discovered by A. N. Thorndike. The pistol was in perfect state of preservation with the exception of the handle, which was rotted off. The weapon was untarnished and unstained and bore upon one side a London, England, trade mark. On the other side was a crest, consisting of a crown set above a crossed sword and gun.

The weapon was sent to a Portland gunsmith who estimated that it had been made more than 200 years ago. It is now on its way to London where, it is hoped, some clew may be found as to its age, the former owner, and something of the history surrounding it.

Saving What You Grow

Prepared by the Extension Service, State College of Washington

STORAGE FOR VEGETABLES

One of the chief items in the family budget is the cost of food. If much food is produced at home this item will be smaller. Living costs may be lessened and the table improved where there are fresh vegetables from the garden available.

The mild climate of Washington gives a naturally long fresh garden season, but even here good vegetable storage will aid greatly to a healthy and appetizing variety for the table.

Good vegetable storage can be cheaply provided and every farm should have such storage. Vegetables differ much in their storage requirements and must be treated accordingly.

Potatoes, beets, carrots, parsnips, turnips and salsify should be stored in a cool, well ventilated place. A cool, well ventilated cellar is a good place for a moderate supply. The roots will withstand considerable frost, especially the parsnips and turnips, which may in the milder sections be dug as needed. A pit out of doors, or an outdoor cellar provides good protection to the root crops.

Cabbage can be pulled and set closely together on the ground with the roots up and then covered over with earth. A drain should be dug to carry off surplus water.

Celery keeps well stacked close together in a trench and lightly covered with straw or corn stalks.

Pumpkins and squash keep best in a dry, cool room which is protected from frost. They can often be stored in the attic or on shelves in an unused room upstairs.

Onions should be thoroughly dried before storing and will keep well in crates or ventilated boxes or barrels in a dry room free from frost. They keep well in the attic.

FORD BUYS OLD HORSE-POWER RELIC IN PALOUSE

An agent representing Henry Ford of the automobile manufacturer, has purchased an old horse-power of Leon Fransburg, near Palouse, which had been formerly used for threshing grain.

The machine was purchased in 1892 and was used for threshing until 1901, when it was replaced by newer threshing methods. It was owned by Mr. Fiansburg's father and it has remained on the place ever since until it was sold to the Ford interests. It was 12-horsepower and was capable of propelling a large threshing machine and it has threshed thousands of bushels of grain.

It was shipped out last week with its destination as Dearborn, Michigan, where Mr. Ford is collecting a large museum of antiquated machinery. It was manufactured by the Buffalo-Pitt company and there are probably no more machines like it manufactured.

It is reported that the same agent purchased one of the first steam threshing engines ever used in this country from parties living in another community.—Palouse Republic.

FEMININE BEAUTY IN FEET, NOT FEATURES

Feminine beauty lies in the feet rather than in the features, Dr. F. E. Hayden, retiring president, declared before the national association of chiropodists recently.

"If a young man who proposes to the lady of his heart would demand a photograph of her arches instead of a portrait of her head this world would be full of happy marriages," he declared.

Dr. Hayden asserted he had examined the feet of 500 co-eds at the University of Kansas and found only two perfect pairs, one possessed by a Chinese.

Why Adam Left Home

Why did Adam leave the Garden of Eden?

A clay tablet has been disovered which is said to give the original story from which the biblical account was obtained.

While the university savants are deciphering the code, we'll venture a few guessed from our meager knowledge of what really happened.

Several reasons may be eliminated offhand. He wasn't compelled to move elsewhere because of his neighbors' complaints. He could not have played the phonograph until 3 o'clock in the morning without rousing the resentment of a hoot owl.

He didn't have to bother about sweeping his front walk, and there was no janitor with whom to raise a quarrel over the steam heat.

But Adam must have had some deeper reason than the orthodox one of curiosity. Eve was a pretty thing, no doubt, and had a way with her. She must have been lonely, poor dear, with nobody to share the cake with when she and Adam celebrated their simultaneous birthday and wedding anniversaries.

But we don't believe Eve's backfence chatter with the snake will be found wholly to blame when the truth on that clay tablet is revealed.

We've a notion Adam really left home because he wanted to be the first man on earth to say to a woman "I told you so!"

Unlucky Suggestion

A countryman went to London to visit some relatives and to see the sights. He remained until patience on the part of his hosts, a married couple had ceased to be a virtue.

Don't you think, my dear fellow," remarked the husband one day, "that your wife and children must miss you?"

"No doubt. Thanks for the suggestion. I'll send for them."

THE NEED OF MINERALS IN FEEDS FOR STOCK

A communication from one of our readers, says the Western Breeders Journal, makes inquiry regarding mineral feeds, and justifies a brief review of the principle underlying the practice.

Chemical analysis informs us that the blood contains salt, sodium compounds and iron, and that when the blood is robbed of these minerals the result is that the blood cannot carry oxygen or perform its other functions. The nervous system is rich in phosphorus, and the bones are made of lime largely.

In the case of a dairy cow, the milk is particularly rich in mineral elements, and a great quantity of lime leaves the cow when she is milked. In an experiment lime was denied the cow in her feed, and she gave in about a month a fourth of all the lime in her body. The result was the weakening of her bones. We wonder sometimes why an animal breaks a leg so easily. Porous, brittle bones tend toward easy fractures. Maybe there isn't enough mineral in the feed. Any animal carrying young needs an unusual amount of mineral matter, or the body is lacking in size and has a tendency toward rickets. The teeth are defective. Pigs suffer from the lack more than calves, colts or lambs, it is said, the latter getting somewhere near the correct mineral proportion in hay.

Leguminous roughage, turnips and grains contain some mineral, and as such are of more value than a good many feeders have realized. Straw, chaff, beet pulp, molasses and potatoes are low in mineral content. This does not mean that they are not valuable as feeds, but that they should be supplemented. Experiments have been conducted where calcium phosphate, calcium carbonate, ground rock phosphate and other inorganic minerals have been fed straight and the results were good.

Every person who has handled livestock knows the urgent craving for salt. We used to think that they liked it because it increased the palatability of food. Salt is really to be classed as food, for it has a definite and extremely important place in the body. The amount of minerals required in rations varies with localities. Soils containing large quantities of minerals undoubtedly produce stuffs with more minerals. Minerals in water supply a need, and water which contains no minerals should be supplemented.

In eastern Oregon and Washington we boast, and rightly, too, of the purity of the water. It is pure; it contains no lime, no salt, no iron. That is fine, but dairy cattle, beef cattle, sheep and hogs need these things. If the water contains no mineral elements, it is because the soil does not contain them, and if they are not in the soil they are not in the plants that grow from the soil.

If they are not present in soil, water or feeds, they should be supplied in some form. When they are supplied the results are favorable.

When it comes to the different minerals, we know at least that salt, lime, phosphorus, iron and a few others are needed, and probably the order given is the correct one—salt first and lime second. As to proportions, that is the work of an expert. Most animals know how much salt they need, and if allowed access to it, will supply themselves.

MICKIE SAYS—

Bielenberg-Schooler Post The American Legion Meets Each First Wednesday In June, July and August

"La Societe des 40 Hommes et 8 Chevaux"

La Societe des Quarante Hommes et Huit Chevaux is the playground and honor society of The American Legion. It responds in a fashion to the degree of the Mystic Shrine in the Masonic Order, eligibility to which depends on valued service to the fraternity. The American Legion is a great fraternity of men-at-arms, embracing those men, young or old, who offered their lives to their country in time of war. The 40-8 is designed to gather into one body the men of the Legion who are willing to actively continue their service to their country and their comrads in time of peace.

La Societe is fundamentally a playground designed to furnish relaxation for the hard workers within the Legion ranks, and as such it brings together socially the leaders in every country. There being but one Locale permitted in a country, La Societe is a great factor in creating, through the social intercourse of its promenades, a closer bond of comradship and understanding between members of the various posts, so necessary to the success of the Legion.

The box car of the French railway with the inscription "40 Hommes 8 Chevaux" (40 men—8 horses) is the insignia of La Societe. French titles distinguish the officers, and the ritual revives the memories of war days. The "Chef de Chemin de Fer" is literally the chief of the road of iron, or railroad president. The "Chef de Gare" is the station master; the "Chef de Train" the assistant station master; the "Conducteur," the conductor; a "Cheminot," a director; the 'Garde de la Porte," the guard of the dor; the "Garde de prisonier," the prisoners' guard, etc.

Members of 40-8 are known by the generic term "voyageurs militaire," or military travelers. Candidates are "prisoniers de gare" or "poor goofs." Translate it as you please. A "wrecking crew" puts on the initiation ceremonies.

Conceived in March, 1920, by Joseph W. Breen, of Philadelphia, La Societe was a success there, and spread to the Pennsylvania state convention. Then it was taken to the national convention at Cleveland and began to spread over the entire country. It was still in swaddling clothes, however, at the time of the Kansas City Convention, there being but 143 Voitures Locale in all the states, but of these states having organized Grande Voitures. Before the close of 1922 the organization had penetrated to every state in the Union with Voitures in three Legion departments outside the continental United States. There were over 500 local Voitures and Grande Voitures were organized and functioning in all states but 11. There are to be organized before the National convention in San Francisco and the number of Voitures will be doubled during 1923 if the expectations of the national officers are realized.

Late Income Tax Rulings

We reprint herewith some legal opinions which appear to have escaped the attention of the honorable editor of the Decisions and Rulings department.

Q. I bought a case of hootch from a bootlegger for $120. Analysis proved it was diluted 50 per cent with water. Can I claim a reduction?

A. You appear to have a double claim. Losses by fire and water, unless compensated for by insurance, are deductible. You have a loss by water. You have also a fire-water loss.

Q. I have a flivver which I use in business, but also to give my family the air occasionally. Can I charge its maintainance to business expense or would it be regarded as a pleasure car?

A. Best legal opinion is that a flivver is not a pleasure car.

Q. I won $1000 in bets on a "rasslin" match. Is this income?

A. We cannot conceive anyone winning $1000 on a wrestling match unless he were in on the "frame," which would be an illegal transaction, on which we cannot offer advice.

Q. I exchanged 20 shares of Southern Pacific bought for 85, for 200 shares of Mammouth Flow Oil Wells, now being drilled, which the salesman says will be worth $100 per share inside of six months. What shall I report?

A. Report to an alienist.

—Chicago Tribune.

Hats Were Knocked Off

Twenty-four hats that were not removed voluntarily by their wearers as the unseen bearing the body of President Harding passed along Pennsylvania avenue during the funeral in Washington were promptly knocked into the street by a man in the uniform of a U. S. infantryman and a companion in civilian clothes wearing a badge of the American Legion, who accompanied him. Many of the disrespectful apologized for their behavior when it was called to their attention. The guardians of respect gave their names as John and Henry Doe, and their residence as the United States.—Ex.

Hot Weather Diseases

Disorders of the bowels are extremely dangerous, particularly during the hot weather of the summer months and in order to protect yourself and family against a sudden attact, get a bottle of Chamberlain's Colic and Diarrhoea Remedy. It can be depended upon. Many have testified to its excellence.—For sale at Clark's Drug Store.

Estimate of Necessary Expenditures

Estimate of probable amount of money necessary for all purposes, to be raised by the City of Genesee, Idaho, for the fiscal year 1923-1924, for which appropriation is to be made:

General fund	$2700.00
Street lighting fund	1300.00
	$4000.00

The amount of money received from all sources for the previous fiscal year was $5316.37.

Approved by the mayor and city council and signed by the mayor, this 6th day of August, 1923.

(Seal) JOHN MEYER, Mayor.

Attest:
W. W. BURR City Clerk. 6-3

"13" or "17"

The periodical cicada, or seventeen-year locust, as it is popularly called, appears in some part of the country each year. These various groups are recognized as different broods by entomologists, and each has a number according to its appearance. Brood XIV is appearing just now in the East-Central States and also in scattering numbers in parts of Maryland, and a single individual was taken at Maywood, Va., according to reports received by the United States Department of Agriculture. Brood XXII, which belongs to the thirteen-year race, is appearing in a full emergence in the four southwestern counties of Mississipp.

SUMMONS

In the District Court of the Second Judicial District of the State of Idaho, in and for the County of Latah.

William Post, Plaintiff, vs. Nettie Post, Defendant.

The State of Idaho sends Greeting to the above-named defendant:

You are hereby notified that a complaint has been filed against you in the District Court of the Second Judicial district of the State of Idaho, in and for the County of Latah, by the above named plaintiff, to procure a decree of divorce on the part of the plaintiff on the ground of desertion.

And you are hereby directed to appear and answer the said complaint within twenty days of the service of this summons, if served within said judicial district, and within forty days if served elsewhere; and you are further notified that unless you so appear and answer said complaint within the time herein specified, the plaintiff will take judgment against you as prayed in said complaint.

Witness my hand and seal of said district court, this 6th day of July, A. D. 1923.

HARRY A. THATCHER,
Clerk of Said District Court.
[Seal of Court Affixed]
By Emma J. Sayles,
Deputy Clerk.

A. H. OVERSMITH,
Attorney for Plaintiff,
Residence and P. O.
Moscow, Idaho. 3-6

Cause of Appendicitus

When the bowels are constipated, the lower bowels or large intestines become packed with refuse matter, that is made up largely of germs. These germs enter the vermiform appendic and set up an inflammation, which is commonly known as appendicitus. Take Chamberlain's Tablets when needed and keep your bowels regular and you have little to fear from appendicitus.—For sale at Clark's Drug Store.

THE GENESEE NEWS

VOL. XXXV — GENESEE, LATAH COUNTY, IDAHO, FRIDAY, AUGUST 31, 1923. — NO. 9

REPORT ON 1923 SMUT CONTROL DEMONSTRATIONS

(By O. S. Fletcher, Latah County Agent)

In the fall of 1921 Prof. George Severance treated part of the seed wheat on his farm northwest of Palouse, in Latah county, with copper carbonate and the remainder with bluestone. The same fall Prof. Chas. W. Hungerford, plant pathologist of the Idaho Experiment Station, treated some seed for O. H. Nordby, of Genesee, with copper carbonate, while Mr. Nordby treated part of the remainder of his sed with bluestone, followed by lime dip, and the balance with bluestone. Washington Hybrid No. 128 was used on both farms. At harvest time in 1922 the Latah county agent made smut and stand counts on these two farms. Results on the Severance farm were favorable to copper carbonate, while those on the Nordby place was unfavorable. Results of tests conducted at the Idaho experiment station were also contradictory.

Since results favorable to copper carbonate were reported from many points in Washington, especially Whitman county, Prof. Hungerford and the Latah county agent felt that extensive demonstrations should be conducted in Latah county to compare copper carbonate with other treatments commonly used on Latah county farms for the control of smut. Farmers of the county were anxious to learn if copper carbonate was better than bluestone and other treatments, and all approached readily consented to co-operate in conducting demonstrations. The tests were planned by Prof. Hungerford and conducted under his supervision.

Demonstrations were started on fifty-seven farms in eighteen communities, with ten different varieties of wheat. Four of these demonstrations were destroyed by hail, one could not be located in the field, and one was pastured, so results were secured on but fifty-one farms. The dates of seeding on these demonstrations ranged from September 8 to November 14. Two varieties were grown on each of four farms, two farms had two different fields of one variety and three farms had two or more brands of copper carbonate, Henry Lorang and O. H. Nordby, of Genesee, each had five different kinds of seed treatment in addtion to a check plot with no treatment, and F. M. Gustafason, of Moscow, had eleven different treatments in addition to a check plot.

The county agent or Prof. Hungerford treated seed with copper carbonate for all but three of the demonstrators. Three farmers purchased copper carbonate and treated their own seed, treating some with bluestone so as to have a comparison. Corona Chemical Company's "Copper Carb" was used on most of the demonstrations, while Mountain Brand copper carbonate was used on others. In all cases two ounces of copper carbonate was used to one bushel of wheat.

On each farm the wheat treated with copper carbonate was sowed the same day as that with which it was compared so that conditions on the different plots would be the same. Each farmer co-operating in these tests kept a record of the date of seeding; how the wheat was treated; whether the wheat was seeded on summerfallow, and if not, what crop was grown on the land; condition of the soil at seeding time, and whether or not it rained just before or just after seedng.

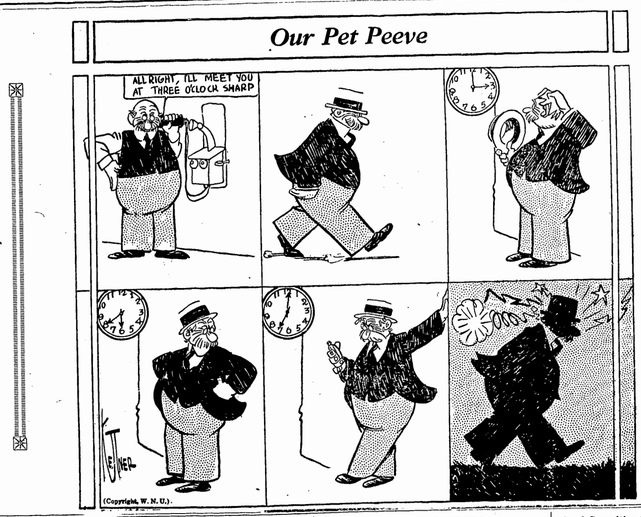
This summer when the grain was ripe enough to distinguish heads of smut from heads of wheat, smut and stand counts were made on all plots. In making these counts, the county agent was assisted by R. E. Every, a student of agriculture at the University of Idaho, and Walter Leth, of the department of plant pathology. All counts and observations were made under the direction of Prof. Hungerford.

In determining the percentage of smut in the various fields two hundred heads were counted in a drill row in three or more places in each plot, care being taken to make counts on all slopes represented and on level ground. This was done in each seed treatment plot in each demonstration, and counts taken side by side to compare all treatments. To determine stand, all the plants in six feet of row were counted wherever smut counts were made. In stating percentage of smut or in giving the stand in this article, averages of the figures thus taken are used in each case.

On twenty-two farms wheat treated with Corona copper carb was grown in direct comparison with wheat treated with a solution of one pound of bluestone to five gallons of water. On these farms there was 11.8 per cent smut in the wheat treated with copper carb and 9.2 per cent in that treated with bluestone. There was an average of 33.4 plants in six feet of row of copper carb treated wheat and 25.7 in bluestone treated wheat.

Copper carb was compared with a solution of one pound of bluestone and one pound of salt to five gallons of water on ten farms. In this lot there was 17.4 per cent smut in the copper carb treated wheat and 12.1

(Continued on last page)



The School Election

Your attention is again called to the fact that a school election will be held in the Genesee district on Tuesday, September 4, for the purpose of electing two directors for a term of three years and one for a term of one year to succeed Julius E. Nordby, resigned. Rudolph E. Nordby has been serving in his brother's stead for the past year and there is no good and sufficient reason why he should not be retained in that capacity for the remainder of the term of office.

It is understood that there are several good men to choose from for the other places, who have already been nominated. The only question is: Are you ready for the question? And who are you goin to elect, It should also be remembered that there are many important questions to be faced during the coming year—and next year will be still harder. We want men who are guarding the best interests of our school; who are alive to the future of the district and will use their best judgment to that end. Again, are you ready for the question?

At the Opera House

"The Top of New York" will be the offering at the opera house Saturday night when May McAvoy will take the stellar role in the main picture.

According to critics and houses where this picture has been shown it is one of the best offerings of the day and is said to be a "real comedy drama" and a real honest-to-goodness picture.

While Miss McVoy is new to local fans, she is by no means an amateur and is said to be one of the best on the silver screen.

In addition to the main picture there will be the usual good comedy and a fairy story that you will not soon forget.

Is In Serious Condition

Arnold Lyon of Asotin, employed as a sack sewer on a combine working on the Ed. Steltz farm, had some kind of a nervous attack while at work last Saturday, falling from the machine and was caught by the sack carrier and his chest crushed in such a manner that a rib was broken, part of which punctured one of his lungs. He was immediately taken to a Lewiston hospital where he was given surgical attention. He is reported to be in a very serious condition.

Will Visit Lewiston

As a result of a special committee, appointed by the Lewiston Commercial club, who visited Spokane in the interest of the Annual Tri-State Fair and Round-up, a special caravan of Spokane business men will visit the fair during the second day, September 12. This is the first time a special caravan has been organized by Spokane people, but in past years a great many Spokane people have visited the fair.

Is Still On Top

The Kendrick Gazette says that the little city of Kendrick is now 34 years old, and that the town has survived three disastrous fires, a flood, and the low price of wheat—For all of which they should be duly thankful.

Time and Change

"Why, what in the world has become of your watch? The one you used to have had a handsome gold case."

"I know it did, but circumstances alter cases."

Bielenberg-Schooler Post The American Legion Meets Each First and Third Wednesday at 8 P. M.

A regular meeting of the Bielenberg-Schooler post of the American Legion, will be held on Wednesday evening September 5, at 8 p. m. This is the first meeting of the fall season.

Among the matters to be taken up will be the report of the delegate to the department convention, the selection of a successor to Charles W. Smith, adutant, resigned, and plans for a series of dances for the fall and winter months.

Auxilliary

One of the major problems of the local post is the rehabilitting of the local chapter of the ladies auxilliary. By action taken at the recent state convention, the Genesee chapter must reorganizo or surrender its charter.

The largest post in Genesee is one of the most flourishing in the entire state and it is hoped that the auxilliary can make a similar record.

The Flag

On Flag Day, June 14, representatives of over 68 organizations met in Washington for a conference, called by and conducted under the auspices of The National Americanism Commission of The American Legion to draft an authentic code of flag etiquette. While the rules adopted by the conference have no official government sanction, nevertheless they represent the cooperative opinion of the principal patriotic bodies of the United States and of the army and navy experts, and are being followed, adopted by all organizations which took part in the gathering, including 45 other organizations which have since adopted this code, representing over 20,000,000 of people. The conference constituted itself a permanent body, so that modifications in the rules can be made if this proves desirable.

There are certain fundamental rules of heraldry which, if understood generally, would indicate the proper method of displaying the flag. The matter becomes a very simple one if it is kept in mind that the National Flag represents the living country and is itself considered as a living thing. The union of the flag is the honor point; the right arm is the sword arm, and therefore the point of danger and hence the place of honor.

1. The Flag should be displayed only from sunrise to sunset, or between such hours as may be designated by proper authority. It should be displayed on national and state holidays and on historical and special occasions. The Flag should always be hoisted briskly and lowered slowly and ceremoniously.

2. When carried in a procession with another flag or flags, the Flag of the United States should be either on the marching right, i.e., the Flag's own right, or when there is a line of other flags the Flag of the United States may be in front of the center of that line.

To be Continued

Has Leg Bruised

John Lawson while shoeing a horse Thursday morning had the misfortune of having his right leg severely bruised. It seems the horse became frichtened, leaning the first time it had been shod, it kicked, hiting Mr. Lawson above the right knee. He is able to be around a little with the aid of a crutch.

Bielenberg-Schooler Post The American Legion Meets Each First and Third Wednesday at 8 P. M.

MRS. MARY E. ARSTRONG, AGED PIONEER, PASSES

Mrs. Mary E. Armstrong, one of the oldest and most highly respected pioneers of the Genesee country, passed away at the family home near Lenville on Tuesday, August 23, after a long period of failing health, at 1 o'clock in the afternoon, aged 72 years.

Mary Elizabeth Johnson, daughter of Mr. and Mrs. Nelson Johnson, Oregon pioneers of 1847, was born at Independence, Oregon, January 8, 1850, being one of a family of six—two sisters and one brother surviving, all being in the eighties.

On March 25, 1867, she was united in marriage to Charles Dexter Armstrong at Virginia City, Nevada. They made their home in Alpine county, California, where nine of their children were born, seven having been born since they came to Idaho. In 1882 they left their California home and came to Idaho, reaching this section of the country on July 9, 1882, and they took up a homestead, the present home in the Lenville section, where Mrs. Armstrong had since resided.

Deceased had been in failing health for the past two years, but her last illness of six weeks was sudden and a shock to her family, all of whom were with her during her last illness this being the first time she had had the entire family, now numbering 14, together since they had been grown.

Mrs. Armstrong leaves, besides, her two sisters, Mrs. Adelia Pederson of Kettle Falls, Washington; Mrs. Evia Loss, Berkley, California, 14 children to mourn their loss. They are John Nelson, Everett, Wash.; Charles Hinton, Winatchee, Wash.; Walter Benton, Bend, Oregon; Joshua William, Bend, Oregon; Edwin Forrest, Sexsmith, Alta., Canada; Elmer James, Seattle, Wash.; George Wallace, Wallace, Idaho; Albert Dewey, Genesee, Idaho; Percy Newton, Bend, Oregon; Clyde D., Genesee, Idaho; Mrs. Ida M. Lile, Lapwai, Idaho; Mrs. Rosalind Childers, Bend Oregon; Mrs. Mable F. McCarty, Clarkston, Wash.; Mrs. Hazel G. King, Elk River, Idaho, and 25 grandchildren and 11 great-grandchildren.

Funeral services were held Saturday afternoon at 2 o'clock from St. Mary's Catholic church in Genesee, and were conducted by Rev. Fr. L. C. Godschulx, pastor of the church, with burial in the I. O. O. F. cemetery where her earthly remains were placed by the side of those of her husband who had preceded her to the great beyond 16 years ago.

The following old neighbors, all being pioneers of Latah county, acted as pallbearers: B. Brigham, Chas. Spurbeck, Frank Lambert, Homer Kenyon, Mike Mulalley and William Gray.

To the many friends who helped us with their kind deeds and manifestations of sympathy during the suffering of our beloved mother and during our bereavement and loss, we wish to express our heartfelt thanks.

Sons and Daughters of
Mary E. Armstrong.

Farm House Burns

The farm house on the Vollmer place tonanted by R. M. Gibbs and which was formerly farmed by J. H. Kidwell, burned to the ground the latter part of last week. Mr. Gibbs reported that practically everything in the house was saved except what was in the kitchen.

It is thought the fire started from a defective flue.

Good Securities Stand Investigated

Have you ever noted that sellers of questionable stocks always point to Henry Ford, the inventor of the telephone, or some well known mining or oil man and show how in the beginning, the men who developed these industries had a hard time financing them and how later fortunate investors received untold profits?

Take these statements with a grain of salt. Investigate the properties mentioned and you will find that in the beginning the men who developed them were hard workers and not stock peddlers with glowing tales of fabulous riches to be gained from investing in their undertaking. It is probably true that these men had a hard time to interest capital in a new proposition but it is also true that their business activity was open to careful investigation and their principal work was in developing the properties for which they sought money and not in the mere selling of stock.

A proposition that has merit will stand the closest investigation and investors will be found willing and anxious to take up the securities. The American people should become more cautious. When they know nothing about a proposition that is offered for sale, they should consult experts on investment.

An Intelligent Tariff Discussion

A western tariff congress is to meet in Denver early in October under the auspices of the Western Tariff association. The purpose of the meeting is to give an opportunity for western producers to consider operation of the present tariff act as applied to western products. The congress will attempt to arrive at a decision on the efficiency of the flexible provision of the tariff act as a fundamental principle of government and an earnest effort will be made to take the tariff out of the partisan politics.

Producers of western products affected by the tariff invite and welcome the judgment and cooperation of everybody concerned in wesern progress as the tasks being undertaken is of large proportion and must have the full strength and co-operation of a united West in order to be successful.

Among western producers most directly interested are wool growers, stock growers, the mining industry, bankers' associations in various western states, sugar beet growers and many other industries of importance to the west.

Prosperity in Our Own Hands

The prosperity of the American people is in our own hands. It is not dependent upon what other people owe us or may do to us, and only in minor degree upon what other people may buy of us. In the last year it has been demonstrated that with some moderate readjustments this country can be quite fully employed regardless of foreign conditions, and with a good degrce of prosperity all around. All that is required is confidence and cooperation, but these are indispensable. For that matter, Europe lacks nothing but these, and there can be no prosperity anywhere without them. We are somewhat critical of the people of Europe for not promptly settling their disagreements, suppressing their miserable suspicions and hatreds and getting down to teamwork, but we have little to brag of in these respects over Europe, if we judge by the political and industrial news that fills the newspapers.—Geo. E. Roberts in the National City Bank Bulletin.

SEMI-LOCAL NEWS CLIPPED FROM EXCHANGES

Last Friday Hottest Day

Last Friday, August 17th, was the hottest day experienced this year, when the thermometer registered 108 degrees. The hottest day previous occurred in July on the 22nd day when it was 107 degrees.—Clearwater Tribune.

Taking a Vacation

Mr. and Mrs. L. E. Combs left Tuesday by auto for a vacation trip, going first to Montana points to visit relatives, then back to the coast, planning to be gone thirty days. They will travel slowly, stopping when they please and should have a most enjoyable vacation.—Colton News-Letter.

Delay in Oil Well Test

Patrick Gibbons, geologist and expert oil man, stated Wednesday that the casing at the Swallows' Nest oil well had to be taken out again. The packer would not hold and lets the water into the oil sands so that a test could not be made for a few days. Mr. Gibbons thought the difficulty would soon be overcome.—Lewiston Banner.

Will Surface Whitebird Hill

A portion of the Whitebird grade from the end of the present macadam toward Whitebird will be surfaced this fall. Extent of the work to be done has not been determined. Money for the surfacing will be available from the state gasoline motor license fees. The macadam will be extended as far toward Whitebird as available funds will permit.—Kamiah Progress.

Few Timber Fires Reported

A big timber fire was reported from the district between Bovill and Elk River just before the rain. Since the rain nothing has been heard of it. The season has been remarkebly free from fires, owing , to some extent, no doubt, to the late rains, but a great deal also to the fact that people are becoming alive to the necessity of exercising greater care when in the woods. The forest service has spent thousands of dollars to educate the people along that line. Usually at this season of the year the atmosphere is so full of smoke from burning forests as to make breathing uncomfortable, but this season we've had nothing but the natural autumn haze. —Deary Press.

Has Spine Badly Injured

Ralph Jackson, 29 years of age, an employe of the Campbell & Barr Construction company, while at work on the highway near Genesee, was brought to the Gritman hospital Monday afternoon, seriously, if not fatally, injured. The young man had been operating the rock crusher, working alone while other members of the crew were hauling the rock. One of the teamsters, upon returning to the crusher for a load, found the machine broken, and Jacobs lying underneath heavy pieces of the machine, unconscious. He was hurried to the hospital, where it was found that he had sustained a serious injury to the spine, and possibly other injuies.

Jacobs is a resident of Lewiston, where his aged mother lives.—Star-Mirror.

Ship Stock Value $26,000

Twenty-one carloads of cattle, valued at approximately $26,000, were shipped from the prairie this week by Grangeville and the remaining 17 carloads were shipped from Cottonwood. In the shipment were 280 head of cattle.

A large number of cattle have been shipped the past two weeks but the peak of the shipments are still to be made, and these cattle will come principally from the Salmon river section, with Cottonwood as their loading station.

According to information which we obtained from a well known railroad man, he informed us upon being questioned that more livestock is shipped from Cottonwood than all other stations combined on the Camas Prairie system.—Cottonwood Chronicle.

Will Begin Work Soon

George Schierth announces that he will soon begin work on his new picture show house, expecting to have it ready for operation within the next few weeks. He also states that he will put in comfortable seats, graduated floor and will have suction fans installed for ventilation and says he will put in a good class of pictures.

Are Holding Hay

Word has been received from Charles Baker, secretary of the Walla Walla County Farm bureau, that 20,000 tons of alfalfa hay, baled and ready for shipment, are being held in the county for more favorable selling conditions. The owners of the hay are members of the new Northwest Hay Growers' association.

Some people never put all of their eggs in one basket. They have too many.

MY LADY'S MONEY

An Episode in the Life of a Young Girl

By Wilkie Collins

INSTALLMENT NO. 16.

"You are completely mistaken, Miss Pink. You may not mean it, but you speak most unjustly if you say that your niece is an object of suspicion to me nor to anybody in my house."

Mr. Troy, quietly listening up to this point, now interposed to stop the discussion before it could degenerate into a personal quarrel. His keen observation, aided by his accurate knowledge of his client's character, had plainly revealed to him what was passing in Lady Lydiard's mind. She had entered the house, feeling (perhaps unconsciously) a jealousy of Miss Pink as her predecessor in Isabel's affections, and as the natural protectress of the girl under existing circumstances. Miss Pink's reception of her dog had additionally irritated the old lady. She had taken a malicious pleasure in shocking the school mistress' sense of propriety, and she was now only too ready to proceed to further extremities on the delicate question of Isabel's justification for leaving her house. For Isabel's own sake—therefore, to say nothing of other reasons—it was urgently desirable to keep the peace between the two ladies. With this excellent object in view, Mr. Troy caused his opportunity of striking into the conversation for the first time.

"Pardon me, Lady Lydiard," he said, "you are speaking of a subject which has been already sufficiently discussed between Miss Pink and myself. I think we shall do better not to dwell needlessly on past events, but to direct our attention to the future. We are all equally satisfied of the complete rectitude of Miss Isabel's conduct, and we are all equally interested in the vindication of her good name."

Whether these temperate words would of themselves have exercised the pacifying influence at which Mr. Troy aimed may be doubtful. But, as he ceased speaking, a powerful auxiliary appeared in the shape of the beer. Lady Lydiard seized on the jug, and filled the tumbler for herself with an unsteady hand. Miss Pink trembling for the integrity of her carpet, and scandalized at seeing a peeress drinking beer like a washerwoman, forgot the sharp answer that was just rising to her lips when the lawyer interfered. "Small!" said Lady Lydiard, setting down the empty tumbler, and referring to the quality of the beer. "But very pleasant and refreshing. What's the servant's name? Susan? Well, Susan, I was dying of thirst, and you have saved my life. You can leave the jug; I dare say I shall empty it before I go."

Mr. Troy, watching Miss Pink's face, saw that it was time to change the subject again.

"Did you notice the old village, Lady Lydiard, on your way here?" he asked. "The artists consider it one of the most picturesque places in England."

"I noticed that it was a very dirty village," Lady Lydiard answered, still bent on making herself disagreeable to Miss Pink. "The artists may say what they please; I see nothing to admire in rotten cottages and bad drainage and ignorant people. I suppose the neighborhood has its advantages. It looks dull enough, to my mind."

Isabel had hitherto modestly restricted her exertions to keeping Tommie quiet on her lap. Like Mr. Troy, she occasionally looked at her aunt, and she now made a timid attempt to defend the neighborhood, as a duty that she owed to Miss Pink.

"Oh, my lady! don't say it's a dull neighborhood," she pleaded. "There are such pretty walks all round us. And when you get to the hills the view is beautiful."

Lady Lydiard's answer to this was a little masterpiece of good-humored contempt. She patted Isabel's cheek, and said, "Pooh! pooh!"

"Your ladyship does not admire the beauties of nature," Miss Pink remarked, with a compassionate smile. "As we get older, no doubt our sight begins to fail—"

"And we leave off canting about the beauties of nature," added Lady Lydiard. 'I hate the country. Give me London, and the pleasures of society."

"Come! Come! Do the country justice, Lady Lydiard!" put in peace-making Mr. Troy. "There is plenty of society to be found out of London—as good society as the world can show."

"The sort of society," added Miss Pink, "which is to be found, for example, in this neighborhood. Her ladyship is evidently not aware that persons of distinction surround us whichever way we turn. I may instance, among others, the Honorable Mr. Hardyman—"

Lady Lydiard,(in the act of pouring out a second glassful of beer, suddenly set down the jug.

"Who is that you're talking of, Miss Pink?"

"I am talking of our neighbor, Lady Lydiard, the Honorable Mr. Hardyman."

"Do you mean Alfred Hardyman, the man who breeds the horses?"

"The distinguished gentleman who owns the famous stud farm," said Miss Pink, correcting the bluntly direct form in which Lady Lydiard had put her question.

"Is he in the habit of visiting here?" the old lady inquired, with a sudden appearance of anxiety. "Do you know him?"

"I had the honor of being introduced to Mr. Hardyman at our last flower show," Miss Pink replied. "He has not yet favored me with a visit."

Lady Lydiard's anxiety appeared to be to some extent relieved.

"I know that Hardyman's farm was in this county," she said, "but I had no notion that it was in the neighborhood of South Morden. How far is he—10 or a dozen miles, eh?"

"Not more than three miles," answered Miss Pink. "We consider him quite a near neighbor of ours."

Renewed anxiety showed itself in Lady Lydiard. She looked round sharply at Isabel. The girl's head was bent so low over the rough head of the dog that her face was almost entirely concealed from view. So far as appearances went, she seemed to be entirely absorbed in fondling Tommie. Lady Lydiard roused her with a tap of the green fan.

"Take Tommie out, Isabel, for a run in the garden," she said. "He won't sit still much longer, and he may annoy Miss Pink. Mr. Troy, will you kindly help Isabel to keep my ill-trained dog in order?"

Mr. Troy got on his feet, and, not very willingly, followed Isabel out of the room. "They will quarrel now, to a dead certainty," he thought to himself, as he closed the door. "Have you any idea of what this means?" he said to his companion, as he joined her in the hall. "What has Mr. Hardyman done to excite all this interest in him?"

Isabel's guilty color rose. She knew perfectly well that Hardyman's unconcealed admiration of her was the guiding motive of Lady Lydiard's inquiries. If she had told the truth, Mr. Troy would have unquestionably returned to the drawing room, with or without an acceptable excuse for intruding himself. But Isabel was a woman; and her answer, it is needless to say, was, "I don't know, I'm sure."

In the meantime the interview between the two ladies began in a manner which would have astonished Mr. Troy—they were both silent. For once in her life, Lady Lydiard was considering what she should say, before she said it. Miss Pink, on her side, naturally wanted to hear what objects her ladyship had in view—waited until her small reserves of patience gave way. Urged by irresistible curiosity, she spoke first.

"Have you anything to say to me in private?" she asked.

Lady Lydiard had not got to the end of her reflections. She said "Yes," and she said no more.

"Is it anything relating to my niece?" persisted Miss Pink.

Still immersed in her reflections, Lady Lydiard suddenly rose to the full surface, and spoke her mind, as usual.

"About your niece, ma'am. The other day Mr. Hardyman called at my house, and saw Isabel."

"Yes," said Miss Pink, politely attentive, but not in the least interested, so far.

"That's not all, ma'am. Mr. Hardyman admires Isabel; he owned it to me himself in so many words."

Miss Pink listened, with a courteous inclination of her head. She looked mildly gratified, nothing more. Lady Lydiard proceeded:

"You and I think different on many matters," she said, "but we are both agreed, I am sure, in feeling the sincerest interest in Isabel's welfare. I beg to suggest to you, Miss Pink, that Mr. Hardyman, as a near neighbor of yours, is a very undesirable neighbor while Isabel remains in your house."

Saying those words, under a strong conviction of the serious importance of the subject, Lady Lydiard insensibly recovered the manner and resumed the language which befitted a lady of her rank. Miss Pink, noticing the change, met it down to an expression of pride on the part of her visitor, which, in referring to Isabel, assailed indirectly the social position of Isabel's aunt.

"I fail entirely to understand what your ladyship means," she said, coldly.

Lady Lydiard, on her side, looked in undisguised amazement at Miss Pink.

"Haven't I told you already that Mr. Hardyman admires your niece?" she asked.

"Naturally," said Miss Pink. "Isabel inherits her lamented mother's personal advantages. If Mr. Hardyman admires her, Mr. Hardyman shows his good taste."

Lady Lydiard's eyes opened wider and wider in wonder. "My good lady," she exclaimed, 'is it possible you don't know that when a man admires a woman he doesn't stop there? He falls in love with her (as the saying is) next."

"So I have heard," said Miss Pink.

"So you have heard?" repeated Lady Lydiard. "If Mr. Hardyman finds his way to Isabel, I can tell you what you will see. Catch the two together, ma'am, and you will see Mr. Hardyman making love to your niece."

"Under due restrictions, Lady Lydiard, and with my permission first obtained, of course, I see no objection to Mr. Hardyman paying his addresses to Isabel."

"The woman is mad!" cried Lady Lydiard. "Do you actually suppose, Miss Pink, that Alfred Hardyman could by any earthly possibility marry your niece?"

Not even Miss Pink's politeness could submit to such a question as this. She rose indignantly from her chair. "Are you aware, Lady Lydiard, that the doubt you have just expressed is an insult to my niece and an insult to me?"

(To be continued.)

POULTRY PAYS FARMER'S BILLS

Idaho Expert Says Value of Hen Not Appreciated—Capital Required Is Small.

"The product of the hen is equivalent to the coin of the realm," says Fren Moore, poultry expert of the extension department of the University of Idaho, in a special article in the current issue of the Idaho Farmer.

"She returns a profit to her owner and saves the financial situation in times of stress. Yet she is the most neglected of all farm animals. More farm children are fed, clothed and educated from poultry income than from any other sources. An investment in care for the farm hen is the most profitable that can be made.

"There is a small appreciation in Idaho as to just what the poultry industry is producing in wealth. There is still less appreciation of the wealth producing possibilities of the industry. Many farmers do not realize, even with the small flock (not well fed and cared for), just how much of the farm expenses are borne by the hens.

Would Pay All Taxes.

"According to the last government census, there are 42,109 farms in Idaho. Figuring possibilities, let us take into account eggs alone, on the basis of 200 hens to the farm, with an average production of 12 dozen eggs per hen at an average price of 25 cents per dozen. There is not an average of 200 hens on Idaho farms, neither is the average production as high as 12 dozen eggs per hen. However, there are many general farms in the state with 500 hens and quite a number running as high as 1,000 and a few with even more. There are many large flocks averaging 16 dozen eggs per hen. The price will average 25 cents per dozen in Idaho. Forty-two thousand one hundred nine farms, with 200 hens to the farm would mean a total hen population for the state of 8,421,800. An average yearly production of 12 dozen eggs per hen would mean 101,061,600 dozens. At 25 cents per dozen, $25,265,400, which is more than Idaho's total tax, of all kinds, including state, municipal, roads, schools and public institutions."

Successful poultry business requires less capital than any type of farming and quick returns make the industry attractive to those of limited means who require an outdoor livelihood, it has been stated by Professor J. E. Dougherty of the University of California.

Poultry farms can be successfully operated in two acres or more, many five-acre farms accommodating from 2000 to 3000 adult fowls and providing sufficient land for the growing of green feed and young stock to maintain the adult flock.

"One thousand laying hens is about as small a number as one could afford to start with if poultry must furnish the entire living," Professor Dougherty has stated.

Need Experience.

"Failure in the poultry business, as in any other business, is due chiefly to inexperience and lack of training, and the overlooking of the details of management and feeding.

"In selecting a breed, the ultimate purpose of the flock should be the single factor governing the selection. In the west the White Leghorn exceeds in importance all other commercial breeds because it is an economical egg producer and lays a standard size white egg.

Business totalling $3,000,000 was transacted last year by the Washington Cooperative Egg and Poultry Association, according to report submitted at the annual meeting of the association. The association shipped 256,284 cases of eggs from western Washington during 1922, a gain of 33 per cent over the previous year, the report states. The average price paid producers in 1922 was 27 91-100 cents a dozen.

Saving What You Grow

Prepared by the Extension Service, State College of Washington

Pitting Potatoes and Root Vegetables.

A good supply of potatoes or root vegetables often keep better in pits out of doors, than in the cellar or basement under the house. Many times the basement is poorly ventilated or is too warm from the furnace.

Pits are easily and cheaply constructed, requiring but a little straw and a good will to use the shovel for a time. For the home supply one pit will generally serve for the potatoes and another for the mixed root vegetables such as carrots, beets and parsnips.

A well drained location should be chosen and the vegetables piled on the surface of the ground or a shallow excavation may be made 6 or 8 inches deep and lined with straw. The vegetables are best clean and fairly dry when pitted. The potatoes or roots are heaped into a conical pile, though rather than make the pit too large, which might cause heating it is better to make a long pile shaped up like a wedge.

Spread a coating of straw or leaves over the pile to a depth of 2 or 3 inches and earth over all to a depth of from 3 to 5 inches. As the weather grows colder, more earth is added according to the severity of the winter. In extreme cold weather, it may be necessary to cover with manure.

Every pit should be provided with ventilation. In the smaller ones the straw can be extended up through the center of the earth cone. A board or piece of tin over the straw which comes out of the ground will keep the rain from getting into the pit. The larger pits should have a small box flue up through the center. A ditch should extend around the base of the pile to carry away surplus water. These pits can be opened at intervals and supplies taken out for use during the winter.

MOVE ENTIRE TOWN TO ACCOMMODATE BASIN

Removal of the town of American Falls to make room for the storage basin of the great American Falls irrigation district marks an epoch in the reclamation service of the United States. The entire town will be moved and in addition a number of miles of railway will be torn up in order to make room for the immense project.

This reservoir will have a capacity of 1,500,000 acre feet and will be the largest reservoir in the United States and the fourth largest in the world. The floor of the reservoir will contain 82,000 acres. The estimated cost is $12,000,000, which includes the cost of moving the town and railroad and construction.

GOOD LETTER GONE WRONG.

A traveler on a steamship had written a complaint to headquarters about the presence of vermin in his berth. He received back from the administrative head a letter of immense effusiveness.

Never before had such a complaint been lodged against this scrupulously careful line, and the management would have suffered any loss rather than cause annoyance to so distinguished a citizen, etc.

He was very delightful with the abject apology. But as he was throwing away the envelope there fell out a slip of paper which had apparently been enclosed by mistake. On it was a memorandum: "Send this guy the bed-bug letter."

GIVE DAIRY COW MOST CARE NOW

Late Summer Is Danger Period in Milk Production—Need More Feed.

Corn for silage must be cut fine and tramped well in the silo if it is desired to make the best quality of feed and fill the silo to its greatest capacity, says the United States department of agriculture. The usual length of cutting varies from one-fourth of an inch to 1 inch, but the latter is a little too long, as the pieces do not pack so readily in the silo, and they are not so completely consumed in feeding as the shorter lengths.

A home-made fly spray for dairy cows made as follows is recommended by the O. A. C. dairy department: Kress dip, 1 gallon; neutral oil, 3 gallons; kerosene, 1 gallon; carbon disulfide, 1 pound, and horse mint, 3 ounces. Mix in 5-gallon container and use as spray twice daily or oftener.

SENDS STOCK TO SHOW

Full Carload of Carnation Holsteins Ready for Circuit of United States.

"Safety First" has become the slogan in all places of danger. The "Safety First" for the dairyman is the proper feeding methods for the next two months if he is going to realize the most profit from his cows. The late summer feeding period is the time when more dairymen neglect their cows than at any other period of the year.

In the spring the cows are turned out on luxuriant pastures and they produce better with less care than at any other period of the year. Then farmers get busy with summer work and seem to forget that the ideal conditions of spring have changed in a few months to the hot months of July and August. Then the cows that withstand the heat and flies and, as if that were not enough, short, brown pastures.

The dairymen turn their cows out to pasture just the same but seem to overlook the fact that the short pastures no longer furnish sufficient food to maintain the normal flow of milk. Not only does this neglect reduce the production during the late summer months, but it greatly affects the winter production, since it is almost impossible to restore the milk flow to its former level after it has been allowed to run down due to lack of sufficient quantity of good feed.

In some cases the dairyman starts winter milk production with cows so reduced in flow that they are practically "strippers." The best of feed and care expended on such cows can seldom produce much profit for the owner. The remedy for such cases is prevention. At best it is difficult to keep the flow up to normal in late summer, so every effort should be exercised in that direction.

A full carload of Carnation Holsteins, largely the "get" of Matador Segis Walker, will start over an arduous show circuit next week, beginning with the Vancouver, B. C., fair; without any rest they will continue through to Wisconsin, Indiana, Illinois, Iowa and the National Dairy show at Syracuse, New York, after which they will return to the greatest live stock show in the world, the Pacific International exposition at Portland, Ore.

Matador Segis Walker 6th, who will head this aggregation and who has already annexed many purple ribbons at previous shows, never looked as well in his life as he does this year and competing bulls will have a real one to beat when this toppy white bull walks into the ring.

Another headliner will be "Daisy," the 33,000 lb. cow, who was the outstanding show cow of last year's season, not to mention Carnation Sylvia Segis, who has been undefeated as a senior calf and senior yearling during the past two years.

A recent survey among the farmers of Pend Oreille county by County Agent E. E. Hupp shows a total of 457 acres of alfalfa seeded this year.

Girls' Club Work in Foreign Lands

Inasmuch as training for farm-home making has been under way in the United States for many years and since Washington has been one of the leading states in its development, it is of interest to the friends of boys' and girls' club work to know that similar work is being developed in other countries.

Day courses for farmers' daughters are conducted in England. These are held during the period from October to April. They meet one day a week from ten until four each period of twelve weeks. They have instruction in domestic science, dairy work, poultry keeping, gardening, veterinary science and bee keeping. Every pupil is required to pass a test every week. These day schools are sometimes attended by farmers' wives also.

In 1921 the first calf club was organized in England. Now they have pig clubs, poultry, bee and horticulture clubs as well. These clubs are carried on much the same as our clubs in this country.

Clubs in All Countries.

In Ontario they have three months' courses in agriculture and home economics in the remote country districts. The home economics' instruction includes sewing, home nursing, foods and cookery, laundry, household management and millinery. In Quebec they have student gardeners who do work similar to our garden club members. A great deal of encouragement is given by the department of agriculture of Quebec to home canning. Not only is the canning process taught but the department of agriculture encourages the establishment of cooperative canneries, so that the people in a neighborhood will grow and can the supplies they need for their own use.

In New Zealand club work was started in 1920 and is now established in many provinces. The department of agriculture provides the club members with free seed and fertilizer as well as with instruction for growing their crops.

In Argentina the farmers' daughters receive instruction in household duties at temporary farm home schools. The teachers go to the district where they wish to locate the school, select a building, enroll the pupils and then enlist the cooperation of interested authorities and citizens in establishing a school. When these preparations have been made the board of agriculture sends the teachers farm and home equipment for use in giving the instruction. In some of the schools they provide a dormitory where the girls live who are too far away to go back and forth from home. These schools usually last two months. The girls are taught gardening, sewing, dairying, cooking, hygiene, first aid and many other subjects of interest.

Housekeeping Schools in France.

In France they have itinerant schools for the girls who can not leave home. These are planned as the itinerant housekeeping schools that have existed in Belgium since 1890. These schools usually last three months in one locality. The girls are taught the usual things of interest to the daughter of a small farmer, including gardening and other outdoor activities as well as housekeeping practices. These schools have been held in France for seventeen years.

Another method of giving instruction is through "after school" classes. They are intended for the country boys and girls of thirteen years and older who are too young for the itinerant agriculture and housekeeping schools.

Many other plans are being undertaken in these countries which have as their main object that of fitting young people as farmers and farm-home makers, of making rural life more attractive and of raising standards of living on the farm.

Welsh Rarebit.

Melt 1 tablespoon butter, add 1 teaspoon corn starch and stir until well mixed, then add 1-2 cup thin cream gradually, stirring constantly. Cook 2 minutes. Add cheese and stir until cheese is melted. Season and serve on toast or crackers. A rarebit should be smooth and of a creamy consistency, never stringy.

WORK ON CONTROL OF ALFALFA WEEVIL

University of Idaho Gets Results in Experiments in Weevil Infested Regions.

Experiments on alfalfa weevil control, conducted at Parma, Idaho, by Claude Wakeland, entomologist of the University of Idaho experiment station, have yielded definite results, according to an announcement given out through the college of agriculture.

Mr. Wakeland used for his experimental work the fields of several farmers in the community, and on these he tested and observed the results of several different methods of weevil control. Among these methods were early cutting of alfalfa, grazing of the first crop with livestock until late in the spring, creation of a dust mulch by means of a brush drag, spraying with a liquid spray, using varying rates of intensity, and dusting with poisons distributed by specially constructed machines.

In addition, Mr. Wakeland has watched closely the prevalence of the parasite of the alfalfa weevil, which appears to be exerting considerable influence toward control in some sections of the state. The attack of the weevil is over for the season of 1923, and Mr. Wakeland is now summarizing his notes, and tabulating the results in such a form that they may be presented to the public.

The experiment station is now planning a program of control for 1924, and for that reason is soliciting the co-operation of farmers in weevil infested regions. Recommendations to the farmers will be based upon the results of this year's experiments, and bulletins will be prepared for distribution throughout the state. These pamphlets will give full information on the habits of the weevil, application of control measures, and other facts of interest to farmers in infested districts.

IDAHO

Fire started in the Abbott block at Sandpoint by defective wiring caused water damages of $10,000 before it was extinguished.

Four high-quality purebred Jersey bull calves will be distributed in Nez Perce county about September 1 from the Waikiki farm near Spokane.

"Housing Farm Poultry," the bulletin issued by the extension department of the college of agriculture, has been entirely revised, and is now ready for distribution.

The White Bird step-ladder grade is to be surfaced with gravel from the south boundary of the Grangeville highway district to White Bird. The work will be complete this fall.

Mrs. John Plato, Bonners Ferry, recently was appointed by Boundary county commissioners to fill the unexpired term of Mrs. Caroline Flood, county superintendent of schools.

J. M. Thompson, member of the Idaho public utilities commission, has been elected president of that body. He succeeds E. M. Sweeley, whose resignation was tendered and accepted by Governor C. C. Moore August 15.

Fifteen potato growers of Tetonia in Teton county have organized the Tetonia Potato Growers' association and have made plans to build a community potato cellar near the railroad tracks. They hope to stimulate quality production and to facilitate marketing, especially in cold weather.

Herbert Wright, former business man, now living upon a berry ranch near Lapwai, Idaho, has returned from Detroit, Mich., where, as manager of the Reonard Roller Gear Thresher company, an Idaho concern, he says he sold to a large auto wheel manufacturer his company's patents upon a new disc auto wheel for $200,000.

Reports from threshing machines in the Kendrick territory support early predictions of a bumper wheat crop. The biggest yield reported comes from the first grain threshed on American ridge on the Chris Maier place, farmed by Sidney Dicks. A field of summer fallow wheat averaged 65 bushels an acre and his entire crop averaged 50 bushels.

"We just received notice this morning from the agricultural and horticultural department of Montana that they had released Nez Perce, Latah, Lewis, Clearwater and Idaho counties from the alfalfa weevil quarantine, so that all local shipments of fruits, vegetables, etc., from those counties will not need an alfalfa quarantine certificate, as has been the rule heretofore," recently declared Commissioner Means.

MENUS FOR THE WEEK

SATURDAY

Breakfast.
Peaches
Cream of Wheat — Cream and Sugar
French Fried Toast — Syrup — Bacon
Coffee — Milk

Lunch.
Baked Beans — Corn on Cob — Cold Slaw
Bread — Butter
Apple Sauce — Cookies

Dinner.
Breaded Pork Chops — Mashed Potatoes
Creamed Carrots — Sliced Tomatoes
Bread — Butter — Iced Tea
Orange Sherbet

SUNDAY

Breakfast.
Orange
Dry Cereal — Cream and Sugar
Waffles — Honey — Ham

Dinner.
Fricassee of Chicken — Buttered Potatoes
Spinach — Creamed Cauliflower — Pickles
Rolls — Butter — Iced Tea
Peach Ice Cream — Chocolate Cake

Supper.
Welsh Rarebit on Toast
Fruit Salad — Bread — Butter
Salted Peanuts — Lemonade — Oatmeal Cookies

MONDAY

Breakfast.
Peaches
Oatmeal — Sugar and Cream
Poached Eggs on Toast — Jelly — Bacon
Coffee — Cocoa

Lunch.
Cream of Potato Soup — Saltines
Tomato and Cucumber Salad — Bread — Butter
Cantaloupe — Milk

Dinner.
Creamed Veal with Baking Powder Biscuits
Mashed Potatoes — Lettuce Salad
Beet Greens
Bread — Butter
Apple Pie — Cheese

TUESDAY

Breakfast.
Bananas
Dry Cereal — Cream and Sugar
Ham and Eggs — Toast — Jelly
Coffee — Milk

Lunch.
Corn Chowder — Tomato Salad
Bread — Butter — Iced Tea
Apple Sauce — Cake

Dinner.
Stuffed Round Steak — Creamed Potatoes
Buttered Carrots — Pickles — Bread
Lemon Pie

WEDNESDAY

Breakfast.
Peaches
Oatmeal — Cream and Sugar
Griddle Cakes — Syrup — Bacon

Lunch.
Potato Salad — Bread — Butter
Sliced Cucumbers and Tomatoes
Apple Fritters — Sauce

Dinner.
Pork Tenderloin — Mashed Potatoes
Milk Gravy — Greens — Cold Slaw
Bread — Butter
Peach Cobbler

THURSDAY

Breakfast.
Orange
Cream of Wheat — Sugar and Cream
Scrambled Eggs and Ham — Toast — Conserve
Coffee — Cocoa

Lunch.
Stuffed Egg Plant — Cream of Lima Beans
Cucumber and Onion Salad
Bread — Butter
Peaches and Cream

Dinner.
Lamb Chops — Baked Potatoes
Swiss Chard — Buttered Turnips
Bread — Butter — Milk — Cookies
Caramel Custard

FRIDAY

Breakfast.
Orange
Dry Cereal — Honey — Cream and Sugar
Waffles — Coffee — Bacon
Milk

Lunch.
Cottage Cheese Salad
Peanut Butter Sandwiches
Boiled String Beans — Lettuce Sandwiches
Peaches — Cream

Dinner.
Scalloped Salmon — Creamed Potatoes
Vegetable Salad — Bread — Butter
Fruit Jello — Whipped Cream

FLAMES WILL MOUNT HIGH INTO HEAVENS

Will Burn Miniature City as Part of Princess Columbia Pageant at Fair.

Flames will leap high in the heavens each night before the grandstand at the Spokane Interstate Fair & Livestock show, September 3 to 8, as a miniature city is burned to the ground as part of the six day night fireworks program.

Greater than ever before in fair history will be this year's program, Thomas S. Griffith, fair association president, announced this week. "Something doing every minute during the afternoon and evening programs," briefly expresses Mr. Griffith's mind on the big free attractions.

"In the night pageant, 'The Domain of Princess Columbia,' we have something unique for the people of the Inland Empire," he said. "More than 250 little boys and girls, with scores of young women, will be seen in this pageant, showing the development of our own Inland Empire, the coming of the Redmen and their departure after combat with their white brothers, the agricultural development of this country and the coming of the Columbia basin project.

"The fireworks program will show the battle of the Mountains, coming of the Spokane river, development of Spokane at Spokane Falls and the big fire of 1889."

Night attacks used by veterans of the World War in "No Man's Land" will be shown by two companies of 161st national guard infantry.

"All this," Mr. Griffith declares, "will be staged in addition to the regular afternoon grandstand consisting of vaudeville acts, Roman standing and chariot races, 50-piece saxaphone band concert, bounding rubes in a hay rack, etc."

With entries coming in daily for running and harness races, there is every indication that the field of starters in every race will be much larger and faster than every before in several years. Horses just completing a successful trip over the Canadian circuit are headed for the local fair grounds. Two shipments of running horses have already arrived and are going through their paces daily, making ready the six-day program.

Eat Vegetables to Obtain Vitamines and Good Health

By MISS MARY E. SUTHERLAND, Extension Specialist in Foods and Nutrition.

A step toward good health—America's greatest asset, is taken by the housewife who makes a wide use of vegetables in the meals of the family every day. By increasing the amount of fruit and vegetables, she saves money and improves the diet of the family.

Vegetables are important sources of the mineral elements needed in human nutrition. They have a beneficial influence upon intestinal hygiene and upon the wants of the body. Taken individually a few of the vegetables are important sources of energy and protein.

Only 10 per cent of the average American diet consists of vegetables in the home gardens. The vitamine content is to some extent dependent upon the freshness of the vegetables.

Vitamins as found in foods are necessary to maintain life and normal growth and increase the resistance against disease. While all three are essential in all diets, they are particular important in the diet of a child.

It is probable that vegetables furnish more than one-tenth of the vitamins in the average diet. Vitamine A promotes the growth of new tissue and is absolutely essential to the growth of the young. The lack of a sufficient amount causes loss of weight, growth is retarded and susceptibility to an eye infection and other diseases such as tuberculosis and rickets is increased.

Vitamine B is essential to normal nutrition at all ages. It assists in keeping the digestive tract and nervous system in good condition. The absence of this vitamine causes loss of appetite and finally symptoms of scrubling beri beri. Lastly a general undermining of health and vigor.

Vitamine C is usually lacking when scurvy appears. The symptoms are soreness of joints, soreness and looseness of the gums and usually a loss of weight. This vitamine likes best to dwell in raw foods. The tomato appears to occupy a unique position in that the fresh or canned protects against scurvy or its symptoms which are not always apparent.

Cooking destroys the efficiency of this substance in some vegetables. Vitamine A is not very resistant to heat, but more so than vitamine C. Drying is not as hard on it as on vitamine C. Drying and aging often result in considerable losses of vitamine C. Tomatoes, potatoes and orange juice are not seriously affected unless subjected to a long period of cooking. Vitamine B is the most resistant to heat.

Steam and bake the vegetables whenever possible. Save the water in which all vegetables are cooked. A large percent of the minerals are in the water. Serve a creamed vegetable soup, a vegetable soup with meat stock once daily.

SAYS FACTS SHOW SMALL EXTRA CROP

Conclusion Reached by Committee on Wheat Research at Chicago.

Estimates of the huge overproduction of wheat are not borne out by the facts. This conclusion was reached at the first meeting of the joint committee on wheat research of the Wheat Council of the United States and the United States Chamber of Commerce held in Chicago August 13. President O. E. Bradfute of the American Farm Bureau Federation is a member of the joint committee and attended all the sessions. The committee passed the following resolution:

"A careful examination of the evidence submitted to the committee by its statisticians and brought to the initial meeting by the members, does not bear out the estimates of huge overproduction that have been so frequently made. While the occasion for proceeding cautiously in the matter of seeding for future production is clear the committee is of the opinion that many reports of surplus quantities of wheat have been exaggerated. It is not unreasonable to assume that this has exerted an unduly depressing effect upon the market."

Members of the joint committee on wheat research are as follows:

For the Wheat Council: O. E. Bradfute, president, American Farm Bureau Federation, Chicago, Ill.; W. I. Drummond, chairman, Board of Governors, International Farm Congress, Kansas City, Mo.; George C. Jewett, general manager, American Wheat Growers, Associated, 400 Corn Exchange, Minneapolis, Minn.; S. J. Lowell, master, National Grange, Fredonia, N. Y.

For the Chamber of Commerce of the United States: H. D. Irwin, president, 304 The Bourse, Philadelphia, Pa.; A. J. Brosseau, 25 Broadway, New York City, N. Y.

Sydney Anderson, president of the Wheat Council of the United States, presided over the deliberations of the joint committee.

The committee authorized an immediate statement as to exaggerations in the matter of surplusage a later statement as to feeding the poorer grades of wheat to stock on the farm, and research immediately regarding the methods used in increasing acreage during the World war with the possibility of reversing these methods so as to help the wheat farmer adjust his acreage to domestic demands.

FAVORABLE OUTLOOK FOR POTATO MARKET

U. S. Department of Agriculture Shows Short Crop With Prospects for Good Price.

The following summary on the probable condition of the potato market this fall is issued in the Agricultural Situation, a brief summary of economic conditions issued monthly by the Bureau of Agriculture Economics, U. S. Department of Agriculture, Washington, D. C.

"The market outlook for potatoes is far more favorable to producers than in 1922. Acreage was 10 per cent less in the United States and 5 per cent less in Canada, and the indicated yield is short in both countries. The July forecast shows probable yield in the United States of 70 million bushels below last season's estimate.

"The shortage is notable in the important second early sections of New Jersey, Nebraska and Idaho, all of which report less than half the production of last season. A dozen of the important second early sections which are the chief sources of carlot supplies in late summer show 9,877,000 bushels compared with 16,819,000 last season.

"Early potato shipments have been only about two-thirds those of the same period last year and slightly less than in 1921. Accordingly the late main crop states are likely to begin shipping early and the movement should continue active because of crop shortage in many of the great consuming states. In seasons when the crops are well below average production, the outlook is favorable for higher winter prices and if recent crop forecasts are confirmed later, there is likely to be fairly active demand from dealers for potatoes to go into storage."

If you haven't kept the weeds out of the garden, cut them down before they go to seed.

ADVANTAGES OF COPPER CARBONATE SMUT TREATMENT

New Dust Treatment Proves Immensely Popular With Farmers All Over State—Better Stands, Stronger Plants and Less Work.

By BRICK BURFORD, Secretary, Whitman County Farm Bureau Colfax, Washington

Despite the fact that this is the first year copper carbonate has ever been used in this county, farmers seem to be very much interested in its success as a control measure for smut. Some are definitely sold to it already. It would seem that, if copper carbonate controlled smut, even as well, let alone better, as vitrol there would be many things in its favor over the old system.

In nearly all cases where the dry treatment was used exceptionally good stands were secured. Frank Holbrook of the Pullman section says: "I reduced my rate of seeding considerably from what I seeded with blue vitrol and still I got too much wheat in my stand. One of the main things our farmers want to see in anything they seed is a good stand. We can discount and overlook a good many other things after the crop has come up, but we cannot overlook a poor stand. We all like to see our stuff come up uniform and even."

Dust Treatment vs. Back Breaking.

To the man who has longed for a better way to treat wheat than to dip a hundred pound bag of seed wheat down into a solution of vitrol on a cold day, drag it out weighing a ton, and then wait till it drys out preparatory to seeding, the new way will find a ready response. With the control exercised over the drill by using dry seed; hardy, vigorous plants, free from seed injury, 100 per cent stands, time, labor and power saved, the dust treatment lends itself to practical use.

Good Machines on Market.

There are several dust treating machines on the market. People interested in securing copper carbonate treating machines should familiarize themselves about capacity, quality of work done, cost, durability, method of adding powder to wheat, whether or not feders or conveyors holding treated wheat are dust proof. Most machines are so arranged so they can be easily and readily attached to a fanning mill. This is a very desirable feature.

Save Time, Labor, Power.

There are many advantages in running one of these machines in connection with the fanning mill. The same operation can take care of the clean wheat by allowing the seed wheat to empty into the hopper of the dust treating machine. At this stage of the game the powder is automatically fed on to the wheat and gravity or some mechanical device generally carries the wheat and powder into the drum for thorough mixing. As a rule two minutes' mixing gives a thorough coating to the wheat kernels. The farmers must be the final judge of the job, as no particular time is set with any of the machines. It is purely a matter of how fast the machine is fed, which determines the length of time allowed for treatment.

So when treating time comes—the treating can be done with the same labor, power and time and have the job off your hands for the year. It is a lisadvantage—a big disadvantage after spending several hours or a day or so cleaning wheat to go through another distinct operation simply to treat it. It would seem to best advantage that, since it is copper in the form of a dry dust on the one hand doing just as good a job in controlling smut, but quicker, more efficient to handle and copper in solution on the other with all of its disadvantages, the dry treatment would bear close study and observation.

No Danger of Overtreatment.

Copper carbonate excels blue vitrol in that there is no seed injury by overtreatment. The main idea is to thoroughly coat the wheat. One cannot get too much powder on the wheat kernel, whereas with vitrol the loss from seed injury is tremendous in this county. The average stand runs about 80 as to 100, with 100 being copper carbonate stands. This may not be true in all cases, but it is a good average. The possible mistake a farmer might make with copper carbonate is to seed too heavily.

Until more reliable information is secured from our experiment station, it is doubtful if anything less than a 65 per cent formula should be used. Even in this case fineness of texture will be a variable factor and one must be sure he is getting the right material for the right job. Copper carbonate is now here, but is not new in other sections of the wheat-growing world.

More copper carbonate will be used in Walla Walla county and other sections of Washington, including Oregon, than last year. Each farmer must judge for himself and in both instances—both vitrol and the dust—are nothing more than control measures. Because a thing is new is no reason for not giving it all the chances possible to demonstrate its true worth.

"Langshans, Brahmas and Cochins are distinctly meat-producing birds, and they are slow to mature and to lay."

Saving an old can rubber may mean losing a can of fruit or vegetables many times the cost of a new rubber.

Now is the time when good farm boosters are getting their exhibits ready for the county fair.

More than 10% women in the United States are engaged in the profession of architecture.

Plug up the leaks in the farm or home by keeping records.

Smut fans prevent threshing machine explosions.

Professor W. D. Moriarity of the University of Washington recently urged members of the Washington Association of Commercial Organization Secretaries to exert themselves to keep high school and college graduates in their home towns. "A high school graduate represents an investment of $3000 and a college graduate one of $6000, whether he looks it or not," said Professor Moriarity.

Maybe you didn't have certified seed this year, but it will pay you to raise it or plant it next year.

The by-chance by-gosh way of producing will have to stop if the farmer wants to make any money.

Every weed means a leak in the soil moisture supply.

Few difficulties are too great to be overcome by the person who says "I will" and lives up to it.

Much Wheat Coming In

Wheat has been rolling into the local warehouses at a rapid rate during the past week, most of which has been in bulk, but it is expected that sacked grain will begin to come pretty lively within the next few days.

Many trucks are busy from early morning until late at night and they will continue to be so for some time to come. Most of the grain is comparatively free from smut and it is estimated that the average yield will be between 30 and 35 bushels to the acre.

Northern Pacific

Signals Cross Half the Continent

From St. Paul-Minneapolis, Duluth To North Pacific Coast

ACROSS half the continent—from the Mississippi River and head of the Great Lakes to the North Pacific Coast—the Northern Pacific is installing electric automatic block signals.

This great undertaking is nearing completion. At the close of this year's construction activities, all the main line of the Northern Pacific Railway from St. Paul and Minneapolis to Seattle, Tacoma and Portland will be protected by the most modern type of electrically operated block signals.

In addition the important main track between Duluth-Superior and St. Paul-Minneapolis has the complete standard installation.

Altogether, the Northern Pacific has more than 2800 miles of track safeguarded with automatic block signals. The cost has been more than $4,000,000.

Every possible care is taken to give passengers on the Northern Pacific safe, comfortable, quick and completely satisfactory transportation service. In the last seven years the Northern Pacific has carried 60,000,000 people safely without a single fatal accident among its passengers.

On your next trip over the Northern Pacific watch the block signals. Notice the accuracy of their operation. They are representative of the scientific precision, skill and genius which goes into the operation of the Northern Pacific Ry.

In 1923

the principal signal work on the Northern Pacific is being done on the

Pasco Division, between Chenoy and Pasco, Wash.—129 miles of track.

Dakota Division, between Mandan and Jamestown, N. Dak.—106 miles of track.

Fargo Division, between Jamestown and Fargo, N. Dak.—150 miles of track.

Attention Threshermen

WE ARE entering into the harvest season this year with a splendid stand of wheat. However, there is considerable smut and the straw will be very heavy. Both of these conditions tend to increase the chances for fire. The commonest cause of fire in a wheat field is a dust or smut explosion in the separator, usually caused by static electricity.

With this in mind, the Northwestern Mutual Fire Association has placed a fire prevention engineer in the field and has supplied its agents with a limited number of wiring sets. These sets can easily be installed on a separator by the owner. Full directions accompany each set. These are given to the threshermen free of charge, on one condition only—and that is that they be properly applied to the separator.

We now have a number of these sets and will be pleased to give them to owners of separators upon application.

A. E. CLARKE, Pres. N. S. VOLLMER-HOPKINS, V.-P.

F. J. NIEMANN, Cashier

Fair Be On Big Scale

The management of the Lewiston-Clarkston Fair and Round-up has announced that plans are complete for the opening of the big show on September 11. There will be county exhibits, a state futurity for Poland China hogs and a free-for-all futurity for Doroc Jerseys. A big poultry show will be held and the boys and girls of north Idaho will have, through their club organizations, a very fine showing in livestock and other lines in which the clubs are engaged. The U. S. department of agriculture will have a very complete showing in forestry, forest protection, highway construction and other departments represented by the several bureaus.

The substantial settings of the big show are much more elaborate than ever before and the program will be very complete in every detail. There will be eleven races daily, wild west and Indian features with plenty of clowns and music to round out a very elaborate program.

Culdesac Has Bad Fire

A fire, starting at 3 o'clock in the morning of August 26, destroyed a large portion of the business section of Culdesac, with an estimated loss of $65,000 to $75,000, according to reports. Very few insurance policies were held by the property owners. The fire started in the rear of a hotel building and spread rapidly to the adjoining buildings.

Residents recall that Culdesac's previous serious fire occurred August 28, 1917. At that time, the buildings destroyed included the principal hotel, the city hall, several churches and warehouses.

Birthday Party

A surprise birthday party was given on Sunday at the Otto Stucker home in the honor of Mr. Stucker's birthday anniversary. A large birthday cake was the center of attraction, and many presents were in evidence. Those present were Mr. and Mrs. Otto Stucker and children, Mr. and Mrs. Al Mayer, and son Glen, Mr. and Mrs. Slim Currin and family, Mrs. Joe Riel, Dr. H. C. Luce, Mr. and Mrs. Sam Stucker, and Adeline Dresher.

New Arrival

Mr. and Mrs. L. W. Vestol are the proud parents of an eight-pound baby boy who arrived Thursday, August 23. Both mother and babe are doing nicely.

Public Sale

Bills are out announcing a public sale of the C. A. Wood personal property, on the Christ Lang farm, five miles north of Genesee, on the state highway, for Wednesday, September 12, commencing at 10 o'clock a. m. There will be sold 12 head of horses, four head of cattle, 11 hogs, and about two dozen chickens; household goods, and a long list of farm machinery. A free lunch will be served at noon.

L. W. Smawley, the auctioneer who will have charge of the sale, says: "I have personally examined this property and find it all to be first class."

Notice of Election

Notice is hereby given that an election of the qualified voters of Independent School District No. 2, of Latah county, Idaho, will be held on Tuesday, September 4, 1923, in the school house, between the hours of 1 p. m. and 6 p. m. of said day, for the purpose of electing two trustees, whose term will be for three years, and one trustee for one year to fill out the unexpired term of Julius E. Nordby, resigned.

Dated this 13th day of August, 1923.

By order of School Board of Independent School District No. 2.

CHURCH SERVICES

SEVENTH DAY ADVENTIST CHURCH

AVERY ROGERS, S. S. Supt.

Mrs. B. B. CALDWELL, M. V. leader

Sabbath school at 10 o'clock Saturday morning.

Young people's M. V. at 12 o'clock Saturday.

LUTHERAN CHURCH

A. F. WOLFF, Pastor.

English services will be held each Sunday morning at 10:30 o'clock, with the exception of the first Sunday of each month, when German services will be held at the usual hour.

FEDERATED CHURCHES

REV. JAS. PENDLETON, Minister

(Study at the Parsonage)

With the beginning of school regular activities assume their function and the church will begin the season with renewed vigor and life next Sunday.

Friends in Genesee and the surrounding country will be glad to know that Miss Josephine Olson, who rendered such splendid music at the church early in the summer, will again sing at the morning service of the church.

There will be a reception of members and communion service with a short sermon by the pastor, who returned last week from a two weeks trip to Spokane and Diamond lake.

The Church school will assemble as usual at 9:45 and it is expected that every teacher and pupil will be in their accustomed place promptly, for the season's work.

The Young Peoples Society of the Christian Endeavor will meet at 7:30, this change of time being necessary. Maxine Lambert led a good meeting last week and we are sure of a good meeting next Sunday evening. Monday evening the Church school workers will meet at the Social house, where plans will be made for the annual meeting of the school in October.

The Young Peoples Society is planning another big social reception to all the new members of the public school on Friday evening, September 7.

Let us all get into the church program early that we may receive the inspiration of Him who can lead us into the better things of life.

We all like fighing men so long as they are not fighting us.

PERSONAL MENTION

Mrs. J. W. Lamb left Friday for a visit with relatives at Johnson.

Gailord Wiggins left Friday for Johnson for a visit with home folks.

F. E. Schooler was a business visitor in Genesee from Lewiston Monday.

J. H. Winegardner arrived Sunday from Lewiston to see about his school work.

Raymond Matterson left Friday for Pullman after a visit at the M. S. Wilson home.

Dr. E. C. Harter, veterinary surgeon, was in the city from Pullman Monday for a short time.

Mrs. S. F. Lamb was a Tuesday morning passenger for Johnson for a short visit with relatives.

Mr. and Mrs. Geo. Wheeler and children arrived Friday from Mullan and will live here for the present.

Mrs. O. R. Sundin and children of Spokane spent the week-end with Mr. Sundin, who is the local depot agent.

Dr. F. B. Evans left Monday for Spokane for a short stay, returning Tuesday. Mrs. Evans returned with him.

Mrs. Jennie Duffus arrived Friday from St. Anthony, Idaho, for a visit with her niece Mrs. J. L. Baker and family.

Miss Alice Winegardner arrived Sunday from Lewiston for a week's visit with her friend, Miss Bernadine Hasfurther.

Mrs. W. J. Davee and children arrived Monday evening from their home at Lewiston for a visit with her mother, Mrs. H. M. Warren.

Mrs. Victor Hasfurther and family moved to Moscow last week where they will spend the winter and where Miss Madeline will attend the university.

Mr. and Mrs. Chas. Smith and baby daughter left Friday for Dufur, Oregon, where Mr. Smith will be employed as teacher of agriculture in the high school.

Mrs. Harry Thatcher, Ilah Wiswell and Mrs. D. C. Burr of Moscow spent the week-end with friends here. Little Miss Wiswell visited with Gail Sampson and Patrica Woodward.

Mrs. C. T. Qualey and children left Tuesday morning for Spokane, from which place they will return to their home at Wenatchee. They have been visiting at the home of Mr. and Mrs. W. A. Ingle.

S. J. Wicks of Quincy, Illinois, left Sunday for his home after a visit here with his brother, J. H. Wicks, and the Wicks family at Moscow. Mr. Wicks is accountant for the Royal Hotel company, which operates a string of hostelleries in the Central states.

Mr. and Mrs. Lou Phipps started on theird return trip home to Wenatchee Wednesday after a short visit at the W. W. Burr home. They were accompanied to Genesee by Mrs. E. L. Phipps who had been visiting at their home for the past several weeks.

Mrs. F. W. Loncosty and children arrived home from Shelby, Montana, Tuesday afternoon. They had been visiting Mr. Loncosty for the past two or three weeks. Mrs. Loncosty reports that the failure of the second and last bank of Shelby was a deadener to the town.

Mr. and Mrs. W. M. Herman returned Tuesday morning from an over-Sunday camping trip to the Hoodoo mining district above Harvard. They were accompanied by Mr. and Mrs. Eli Hickman and Mr. and Mrs. Lou Watson of Spalding. They report a splendid time and state that there are some miners there who have made a fortune out of placer mining.

Surprise Party

Several friends of Mr. and Mrs. Chas. W. Smith gathered at their home one day last week and gave them a surprise farewell party. A lunch was served by the self-invited guests and a very pleasant time was reported Those present were Mr. and Mrs. Ira Hanson, Mr. and Mrs. Glen Sampson and daughters Gertrude and Margaret, Miss Viola Lorang, Misses Ruth and Esther Martinson, Mr. and Mrs. Geo. Boliou, and Mr. and Mrs. F. E. Dicus.

Had Back Hurt While In Bed

It isn't often that one has the misfortune to get hurt while in bed, unless the wife takes a notion that that is the time to "get even," or one has a "night horse" and deliberately falls out, but Chas. Spurbeck is nursing a very sore back from the fact that he and his son, Rollin, had turned in rather early, Tuesday evening, and some of the crew is supposed to have been making for the dance at Colton. Anyway while the driver of the car was trying to dodge the various beds made around the strawstack at the Fred Morscheck farm, they accidentally ran onto Charley's bed and as a result he is suffering from a badly bruised back.

While the wheel of the machine did not run over him, it "lifted" several times and it was all he could do to keep rolling out of the way. The driver stopped as soon as possible, but not until Mr. Spurbeck's back had been pretty badly hurt. However, he does not anticipate any permanent injury from the experience.

It has been aptly said that "anything is never so bad but that it might be worse."

Just Missed Cloudburst

Word has been received from Jack Vandenburg by his parents, Mr. and Mrs. John Vandenburg, to the effect that he just missed being in the big cloudburst and flood that happened near Salt Lake City, Utah, the other week. He was in the inudated area, just three hours before the flood descended. He stated that in some places the land had been covered to a depth of from four to eight feet with debris—mud, rocks the size of a horse, trees, parts of buildings, etc., and that in many instances the land probably would be no good for farming for many years.

Jack says he likes that section of the great big world.

Small Separator Fire

The Walter Herman threshing machine suffered slight damage Tuesday when a smut explosion caused fire to break out. It is understood the machine was of steel and suffered slight damage. No grain was burned. A horse, supposedly hitched to a bundle wagon, was pretty badly scorched, otherwise no particular damage was done.

It was reported that several separator fires had occurred in the Thorn Creek district, but just what damage was sustained has not been learned.

Pretty High School Girl Helps Road Gang Break Paving Record

The age of chivalry is not past. The man of today has as much respect for the modern woman as the warrior in his glittering armor had for his fair lady in the days when knighthood was in flower. And all that in spite of the fact that the modern knight is arrayed in overalls instead of armor and carries a shovel in place of a lance and the lady works at his side instead of languishing in her castle awaiting his victorious return from battle.

The case in point is that of Josephine Ruhl of Otis Orchards, a small crew which manned the cement mixer community near Spokane, and the on a road being paved. Miss Ruhl was a member of the gang and helped finish the $200,000 paving contract in record time. To show their appreciation of her spirit, and to help her reach the goal toward which she has been working the gang presented her with a purse of $40 and their best wishes when the work was finished last week.

Miss Ruhl came from Canada to Otis Orchards with her mother about two months ago. When she saw the new high school being built near her home she determined to enter school there, but wanted to earn the money for her expenses. With this problem in mind she watched with interest the gradual approach of the paving crew working on the new highway.

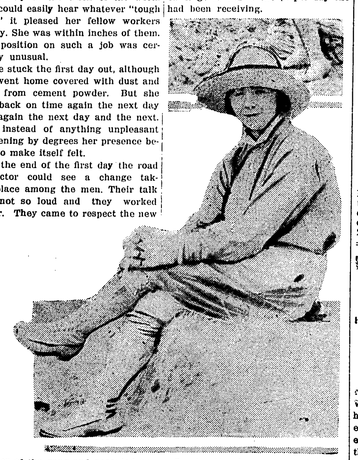
The foreman of the road work must have read her mind for when she finally went to him the first question he asked her was, "Do you want a job?"

The girl looked doubtfully at the questioner and said she didn't know. She wanted a job all right, but whether that particular job was another thing. She looked at the 25 or 30 men covered with cement dust feeding the tireless mixer that was pouring down a concrete road. Some were emptying sacks of cement into the great hopper, others sand and gravel, others were tamping the new road down and all hard at work. They looked like a tough gang and she did not know. She said she would see and disappeared. Presently she came back and told the boss she would take the job.

They put her to work piling and binding empty cement sacks in even piles to be returned to the manufacturer. There was nothing particularly arduous about the task, but she was constantly in the thick of the work. She could easily hear whatever "tough stuff" it pleased her fellow workers to say. She was within inches of them. Her position on such a job was certainly unusual.

She stuck the first day out, although she went home covered with dust and gray from cement powder. But she was back on time again the next day and again the next day and the next. And instead of anything unpleasant happening by degrees her presence began to make itself felt.

At the end of the first day the road inspector could see a change taking place among the men. Their talk was not so loud and they worked faster. They came to respect the new



member of the gang and accepted her as a good workman. They did all they could to make her work lighter and a spirit of good fellowship prevailed.

Inspector Is Pleased.

At the end of another three weeks the big mixer had worked its way to the end of the road and the work was finished. The men wanted to give their plucky fellow worker some token of their good will and show their appreciation of her work. But flowers or candy seemed hardly appropriate for a girl who had worked day after day in the heat and cement dust to earn school money. So they made up a substantial purse from their own earnings to add to the $4 per day she had been receiving.

Construction bosses are not in the habit of encouraging or even tolerating poor work from their men. Ining poor work from their men. The comment made by the inspector on the work of the paving crew when he inspected it at the completion of the job can be taken for all it is worth. His final remark was: "There should be a girl like that nipping sacks on every cement mixer."

"MAKING JUICE" IN THE WORLD'S LARGEST POWER HOUSE—HELL GATE!

A view in the world's largest power house, only recently opened—the Hell Gate station of the United Electric Light & Power Co. of New York, at 134th St. and Locust Ave., the Bronx, New York City. Photo shows—One of the four huge turbo generators. There are two of this type: Curtis horizontal type made by General Electric Company, of 35,000 k. w. each, and also two 40,000 tandem compound Westinghouse generators. The General Electric generators operate at 1,500 r. p. m., 3 phase, 25 cycle, 11,400 volts, Y connected. Steam is taken at 250 lb. gage pressure and 200 deg. (F.) superheat at the throttle.

PRESIDENT FAVORED TRAINING FOR HOMES

Harding Was First Chief Executive to Deliver Address on Home Economics.

When Miss Hafford, the resident director of the General Federation of Women's clubs, presented a key to a home to President Harding, he delivered what is probably the first home economics address by a president of the United States.

"It is not so much the problem of housing," said President Harding, "as it is the problem of increasing the home comforts, of devising new conveniences, of expanding the understanding of domestic science which must make for the improvement of American homes.

"We have too often overlooked the fact that after all the greatest single industry in America is the management of the American home, where 20,000,000 women toil every day of the year; 18,000,000 of these women doing their own work without help. There is no other activity or industry comparable to this, in the numbers employed, the effort devoted to it, or the importance of its products; nor, in the significance of the spiritual forces that develop it.

"It is only a few years ago that this problem of deliberately developing better homes received its first consideration in the establishment of departments of home economics in some of our universities. Since then training in homemaking has become a feature of our educational system, but it should have wider projection.

"The problem of better equipment of the home, from the viewpoint of economy in labor and effort, has received all too little attention. We have attached importance to making better looking homes, to providing for home ownership; but this movement is designed to advance the creation of homes which require less effort in management, of homes equipped in better taste, of homes which leave to women who must manage them a wider opportunity, a greater range of privilege for social and spiritual improvement."

STATES UTILIZE WAR MATERIAL FOR ROADS

Surplus war material which the government refused to sell at junk prices is being used in road construction to great advantage by the states to whom the material is transferred, according to the bureau of public roads of the United States department of agriculture.

At the end of the war there was left unused over a half million pounds of rough castings of spare parts for one of the well-known makes of motor trucks. They were badly rusted and on casual inspection might have been condemned as worthless junk, but it was found that the necessary machine finishing entirely removed all rust and pits. A small offer for the entire lot was made but was not accepted. A few months ago the state highway department of North Carolina accepted a portion of them as part of its share of surplus war material for use in road building. Surplus war machinery was used for finishing the parts for use in trucks also received as surplus war material. The finished parts are worth about 75 cents a pound as compared with an offer of 1 cent a pound for the parts in the rough.

Other states have followed the example of North Carolina and the entire supply has been taken up and will be put to useful service.

Advertise farm products, but produce the goods first.

GATHERED FACTS

It has been authoritatively stated that the expectation of life for men and women who have passed forty has actually decreased and is steadily decreasing.

Mount Everest, for some reason unexplained, has no native name, as most of the gigantic peaks of the Himalayas have, but was named after Sir G. Everest, who was the first director of the Indian survey.

The French government is planning to provide for navigation of the Rhine river above Lyons in connection with harnessing its current to provide electric power.

In France there are 14,000,000 persons who have saving accounts. These accounts amounted in 1913 to 5,818,000,000 francs. This was increased largely during the war.

There are not more than four or five volcano observations in the world, the most important being those of Vesuvius and Kilauea (Hawaii). Professional volcanologists are also very scarce.

Where coal cannot be readily "shot in" a new delivery truck for the coal dealer has a platform which holds baskets while they are being filled and then elevates them to the height of a man's shoulder, from which point they are easily carried off.

France is trying to stimulate flax growing in northern Africa. In other days France imported vast quantities of flax from Russia, but that supply is now shut off.

The knickerbocker club has been organized in Chicago, made up of girls who pledge themselves to discard skirts and to wear knickerbockers on all possible occasions.

Better Health Service

Public Health Is Public Wealth.

These Articles Compiled by the Public Health League of Washington

FLAT FEET

"Flat foot" is a common condition in which there is a weakness and a depression of the arches of the feet. There are two important arches, one extending from the heel forward to the ball on the inner side and the other traversing across the ball of the foot just behind the toes. They are formed by small bones of the foot which are arranged in arch-like ways and bound together by elastic ligaments. Thru the elasticity of the ligaments, the arches give to some extent when the body weight is placed on the foot. We can compare the arches to automobile springs which absorb the jar of the bumpy road. So do the arches absorb the shock of the sharp step and give grace and ease to the carriage.

The ligaments, being elastic, have a limit to their strength and so they are protected by muscles which act quickly and automatically as soon as the ligaments are put on the stretch if these muscles fail to act efficiently thru fatigue or weakness more strain is placed upon the ligaments than they can bear and they stretch and tear. This allows the small bones of the arch to become displaced and the arch sags. The pain accompanying flat foot is usually due to the tearing and stretching of the ligaments. A typical case of "flat feet" could better be called "weak feet." In reality then, flat feet are caused by muscular weakness. Tight cramping shoes prevent the muscles from acting properly. Weakening diseases, such as tuberculosis, influenza or typhoid fever result in flabby muscles. Sedentary occupations or those requiring continual standing allow the muscles to become weak.

Before I go further I want to impress upon my readers, that although nine out of ten cases of flat feet are similar to that described above, there are other types of feet which show flattened arches which are caused by arthritis, tuberculosis, short heel cords, fractures, partial dislocations of the small bones, etc., so it is always advisable to consult your doctor regarding the trouble.

With the proper cooperation of the patient, the majority of flat feet can be cured. The fundamental principle of the treatment is to restore the foot to the normal shape and to develop the proper muscles. The first thing, of course, is to provide proper footwear. This does not necessarily mean ugly, square-toed shoes as many people think. There are just three things to emphasize in regard to shoes for people with painful flat feet:

1. They should be wide enough across the toes so that when the weight is placed on the feet there is no sense of tightness or compression.
2. The last of the shoe should be fairly straight.
3. The shank, or part of the sole just in front of the heel, should be very stiff.

A very flexible shank is acceptable for a healthy foot but not for one with a weak arch. They tire the muscles too rapidly and consequently are undesirable. It is also a fallacy to put girls, and especially women, in low heeled shoes. Most women require heels from one and a half to two inches in height. French heels cannot be too strongly condemned for everyday use. Men should usually wear low heels.

A proper method of walking is next in order. The patient must walk with the feet parallel or even with a slight toeing. He first comes down on the heel, then as he moves forward the weight shifts to the ball of the foot. As this takes place he must roll the foot slightly inward, forcing the weight to the outer side of the foot. With a little practice and attention this will become automatic and he will be surprised how much easier walking becomes. This method also does a great deal to develop the proper muscles for the relief of his trouble. Other exercises of value are as follows:

1. Standing on the bare feet hold them rigidly so that the weight is on the extreme outer side of the feet. Holding this position, rock first raising the heel and then the front part of the foot.
2. In the same position walk several times about the room.
3. Practice gripping a small door knob with the toes.

It must be remembered that muscles are not developed over night and many weeks may be required before these muscles are as strong as they should be.

Now a word about support. It is the usual thing to have the inner border of the sole of the shoe raised about one-fourth of an inch to help the weakened muscles do their work and relieve the fatigue of walking and standing. In severe cases arch supports may be required for a very limited time. In any case they should not be used more than four months. If they are necessary they should be made accurately for the individual foot. Patent arch supports are not dependable because they may not fit and thus do more harm than good.

Every foot is a potential "flat foot" and every one, young or old, can and should profit by the better method of walking and a sensible type of footwear and because there is probably no chronic disorder of the human body which does more to lower the general efficiency than "flat feet."

AMERICAN PATRIOTS' SHRINES DEDICATED

Present Memorial to French Village of Cantigny—Navy Tablet at Gibraltar.

The erection and presentation to the village of Cantigny of a set of memorial fountains and water supply system, by the National Geographic society, forms another unit in the chain of American war memorials in France.

At the conclusion of the war the society had funds donated by members for hospital work. This balance was devoted to the erection of a memorial to American heroes at a suitable place in France. Cantigny, because of its historic significance as the successful beginning of active warfare by the American army, May 28, 1918, was selected as the site by Gen. Pershing. The presentation was made in the presence of representatives of the state and war departments of the United States and a delegation from the American Legion.

It was accepted by the mayor of Cantigny and military and civilian officials of the French republic.

That there can not be too many patriotic shrines in the world, especially for a country which was born and raised by the influence of intense patriotic feeling, is the view of government officials pleased with two shortly to become meccas for Americans.

At Gibraltar a memorial tablet in commemoration of the men of all ratings of the American navy who fell during the war, has just been unveiled. About 3,500 American sailors and marines took part in dedicating the tablet, which is situated in the dockyard. The United States torpedo boat destroyers Hatfield, Goff, Fox, and Barry, with the auxiliary Orion, took part in the unveiling.

Senator Copeland, of New York, chairman of the New York group organized for the purchase of Monticello, the home of Thomas Jefferson, and its presentation to the nation, says that pledges amounting to $100,000 have been received and that upon his returns to New York, after addressing the Georgia legislature, there will be a meeting of those interested in the purchase of the property, when it was expected sufficient funds would be available to take title, complete all phases of its purchase, and endow it.

Copyright by Underwood & Underwood, N. Y.

THE LATEST IN PARISIAN SPORTS

A race between wearers of the new "monowheel" roller skate, at Longchamps, near Paris. It's a good trick if you can do it—good for the doctor business if you can't.

Vegetables

Scalloped Apples.

One quart apples sliced, 1-4 cup shortening, 1-4 cup sugar, 1-4 teaspoon grated nutmeg, 1-2 lemon grated, rind and juice, 2 cups bread crumbs.

Melt butter and stir into crumbs slightly with fork. Cover bottom of buttered baking dish with crumbs and spread over one-half of apples. Sprinkle with one-half of the sugar, nutmeg and lemon juice and rind mixed together. Repeat, cover with remaining crumbs and bake 40 minutes in moderate oven. Cover at first to prevent crumbs browning too rapidly.

Corn, Southern Style.

To one can chopped corn add 2 eggs slightly beaten, 1 teaspoon salt, 1-8 teaspoon peppor and 1 1-2 tablespoons melted butter and 1 pint scalded milk. Turn into a buttered baking dish and bake in slow oven until firm.

Corn Fritters.

Chop 1 can corn, drain and add 1 cup flour, 1 teaspoon baking powder, 2 teaspoons salt, 1-4 teaspoon paprika, then add yolks of eggs beaten until thick, and fold in whites of eggs beaten stiff. Cook in a frying pan in fresh hot shortening. Drain on paper.

Boiled Cabbage With Dressing.

Cook cabbage in salted boiling water. Pour over it the following dressing: 2 egg yolks, 3 tablespoons cream, 2 tablespoons vinegar and 1 tablespoon sugar.

Corn Chowder.

Cut fat salt pork into 1 1-2 inch cubes and fry out. Add 1 sliced onion and cook 5 minutes. Strain fat into stewpan. Parboil 4 cups of potatoes which have been cut in 1-4 inch slices, 5 minutes, drain, add potatoes to fat. Then add 2 cups boiling water, cook until potatoes are soft and add 1 can corn and 4 cups scalded milk. Season with salt and pepper. Add 3 tablespoons butter and 8 broken crackers. Serve hot.

TIPS ON SUCCESS.

Handle the hardest job first each day. Easy ones are pleasures.

Do not be afraid of criticism—criticize yourself often.

Be glad and rejoice in the other fellow's success—study his methods.

Do not be misled by dislikes. Acid ruins the finest fabrics.

Be enthusiastic—it is contagious.

Do not have the notion that success means simply money making.

Be fair, and do at least one decent act every day in the year.

One of the most popular articles for the housewife of today is a dress form and there are many in your neighborhood who have them. Why not you?

Take the heat out of the iron as well as away from yourself by using an electric or gasoline iron.

WORLD'S NEWS BRIEFLY RETOLD

Important News of Both Hemispheres Boiled Down to Last Analysis.

The German government recently turned its attention to the critical food situation, which seemed the chief obstacle to restoration of order.

The smallest salmon catch in recent years is reported in official dispatches from Alaska where canneries are packing less than one-half the 1922 catch.

Creation of a new national park in the Big Horn mountains in northern Wyoming and southern Montana, is under contemplation, it was learned recently.

All the Greeks and Armenians remaining in the interior of Anatolia are being rounded up by the Turkish authorities for deportation, Greek government advices say.

Hornets have forced the cessation of timber operations in the regions around Geary, B. C. The principal camp affected is at Fruitvale which was forced to close down.

Prime Minister Baldwin and Foreign Minister Chamberlain may meet Premier Poincare in Paris in the near future to discuss convoking a new allied conference to discuss reparations, it is believed.

Many lives were lost and great damage to shipping resulted from a disastrous typhoon which recently swept the Hong Kong harbor. The wind reached the highest velocity ever recorded.

Ten persons, including all of a family of five, were drowned August 19 when a 30-foot gasoline launch sank in the Mississippi river near South St. Paul. Not a passenger of the launch survived.

Plasterers' wages of $104 and more a week are causing student ministers and members of other professions to take up the trowel in Evanston, Ill., where work on a new hotel is in progress.

Towns in the Arkansas valley, Colorado, were recently menaced by floods, owing to heavy rains and cloudbursts. Irrigation dams burst and a 27-foot wall of water is said to have headed toward Manzanola.

The gaint navy dirigible ZR-1, largest craft of its kind in the world, under construction at the naval station at Lakehurst, N. J., rose from its cradle within the immense hangar for a few minutes recently.

Actual scrapping of Japanese naval vessels coming under the Washington disarmament and naval limitations treaty will be started immediately, it was recently officially announced by the Japanese government.

Franz Butner, fearing he would have to pay duty on several diamonds he was taking from Mexico to his home in Germany, swallowed several of the gems just before the ship brought him to San Francisco from the southern republic reached there recently.

Sixty years to the day after he saved her and her family from death in the battle at Tubbs Bend, in Kentucky, William Means, a veteran of the 25th Michigan Volunteer infantry, again met Mrs. Laura Sublett near the scene of the action at Kalamazoo.

John Pavlizon, Austrian coal miner, pronounced the outstanding hero of the explosion in Kemmerer Coal company mine No. 1 at Frontier, near Kemmerer, Wyo., was brought to the state mental hospital recently. He was declared insane as a result of his experiences.

William McLaughlin, 8, saved Mrs. Linnea Wolff from burning to death recently in an automobile tourist camp in Oakland, Cal. While adult campers ran about excitedly seeking blankets to extinguish the flames, the boy knocked her down, rolled her on the ground and put out the fire.

A harpoon believed to be over a century old was found in the body of a 60-ton whale killed off Humboldt county, California, recently. It bore the inscription "Bedford, 1826," which was taken to indicate that one of the old New England whaling crews had encountered the monster but had failed to take him.

Suspected of robbing and beating to death Thomas Cushnowav, a Warm Springs Indian, near Toppenish, Jim Lake, Yakima Indian, was recently lodged in the county jail at Yakima.

WASHINGTON NEWS

Prune picking recently began in the Milton-Freewater district, near Walla Walla.

The state has bought a 40-acre tract adjoining the penitentiary grounds near Walla Walla, the land to be used for the state game farm.

About 100 bushels of wheat in the pile on the Will Maurer ranch northwest of Harrington was burned recently. The fire was set from a stationary threshing engine.

With previous attendance records broken by a wide margin, the recent Fourth Annual Merchants' Convention and Market Week will go down in history as the most complete and entertaining event of the kind ever held in Spokane.

New car shops in Hillyard will cost $200,000 and employ 300 men. They will be built by the Western Fruit Express and Fruit Growers' Express at a location to be designated by the Great Northern railroad. It is hoped to have the new shops ready in time for the 1924 crop.

At the first annual meeting of the Potato Growers' association, the report showed a volume of business of $1400. The prices received were from $20 to $25 a ton. This association is a new one, has been organized less than a year, and is working in cooperation with the local merchants.

Engineers of the United States reclamation service, in charge of investigation of the proposed Columbia basin project, will soon examine the lower Spokane river valley, northwest of Spokane to and including the Columbia valley immediately above and below the mouth of the Spokane river.

During September apple shipments from the Wenatchee district are expected to be 2500 cars; October, 8000 cars; November, 2500 cars; December, 750 cars, according to an estimate made by Secretary Bert Baker of the Traffic association. The Great Northern is using 8500 cars as the basis for the car supply in October.

The Yakima valley will produce a total of 22,309 carloads of fruit and vegetables during the present season, according to the estimate of the Yakima Valley Traffic and Credit association. Apples will constitute the major portion of the shipments, as it is estimated that the valley will send out 13,500 carloads this year.

Sure death for morning glory, one of the greatest pests in northwestern wheat fields, has been found, according to tests made by Harry Riffle, a leading rancher of Walla Walla county. Mr. Riffle has made an extended trial of the carbon bisulphide treatment recommended by the State College of California and finds it successful.

Thirty-four different kinds of vegetables have been raised in the garden on the farm of E. P. Jones, near Deer Park. The display of his products at the office of the Mt. Spokane Power company has attracted wide attention as showing what can be done in this section with good care and rainfall such as has been the portion this year.

According to District Horticultural Inspector Frank E. Nielson, whose force has made a preliminary survey of the fruit situation, the final estimate of the fruit crop for the Wenatchee district will have to be increased over the original figures. Indications are, he says, that despite hail losses in a few districts, the crop will be well over 17,000 cars.

Ernest B. Hussey, Seattle engineer, who has been in charge of the water works improvements for the city, announced recently that Seattle men with whom he is associated have obtained water rights from Oregon which will permit diversion of water from the Walla Walla river near Milton. This water will be stored and used to irrigate about 30,000 acres in the valley, he said.

The state minimum wage law for women in industry has not served to keep the wages of women down to the level established by it, according to Delphine M. Johnson, supervisor of women in industry for the department of labor and industries. While the minimum wage fixed by law is $13.20 per week for industrial plants, very few of the employers in the state hold to this level and most of them pay well over it, the average wage being $18.59.

This is the vegetable season, make the best use of it, for they contain many essential elements of food.

The highest possible egg production at the lowest possible cost is a good slogan for poultrymen.

Aged Daughters of Famous Indian Chief Enter Movies

Lucy and Nellie Garry, daughters of Chief Garry of the Spokane Indian tribe, who played an important part in Washington's early history, have become moving picture actresses. Lucy, age 83, and Nellie, age 80, will take leading parts in a picture featuring Indian life which will be filmed at the Minnehaha photoplay studio in Spokane.

The Indians claim the two old

squaws are 102 and 105 years of age, but according to William Lewis, secretary of the Spokane Historical society, they are younger, the Indian method of reckoning usually dating to certain big events.

"Nellie has often told me that she was 13 at the time of the Indian war of 1858 and this would make her age 80 years now," he said. "Her father was born about 1810."

At the time of Governor Stevens' coming to Washington territory in 1853 Chief Garry was raising wheat and had cattle, tea, sugar and other luxuries that many of the white settlers often did without. Later in life he did much toward preventing Indian outbreaks, but through the machinations of unscrupulous settlers he died in poverty.

Today his daughter, Lucy, in the evening of her life, is facing possible poverty through trouble she claims to be having collecting her crop share on a lease of her farm eight miles east of Tekoa—unless her moving picture puts her in the class of the more fortunate movie actresses.

When Nellie Garry speaks of her troubles with the Indian agent and the white rentor on her lands she speaks in a sad tone, carefully explaining every detail.

Neither she nor her sister have only sad moments in their lives. Each use a cane to walk around the hilly campsite, on which a dozen wigwams are erected. But in the cool of the evening when the braves and squaws make merry, the daughters of Chief Garry join in the dancing.

"They are both good dancers," an interpreter said. "They enjoy themselves as much as we do, although they are the oldest women in our camp."

Of the two squaws Nellie, the younger, has gray hair, but Lucy's hair is almost jet black. Nellie has a pathetic look in her eyes, while Lucy's still smile in spite of her wrinkled face.

PIG DISEASES KEEP VET BUSY

Proves Profitable Patient for Veterinarian—Is Subject to Many Diseases.

24,000 LAMBS IN DEAL

Sold From Nevada Range to Idaho Company—Recommend Ground Wheat for Hogs.

"Swine are becoming more and more valuable, and profitable as patients of the veterinarians," said Dr. E. E. Wegner, head of the school of veterinary science at the State College of Washington, recently.

"In sections where swine raising is important, many men do little else but vaccinate for hog cholera and treat other swine diseases. Hog cholera, hemorrhagic septicaemia, influenza, swine plague, necrotic enteritis, erysipelas, internal parasites, lice and mange, abortion, malnutrition, infectious arthritis, rickets, bull-nose, and other necrotic infections are just now receiving attention. The collective value of those animals make them a source of much revenue to the practitioner.

"But few practitioners depend upon one species of animal alone for their practice, as few districts depend upon one kind of livestock, though in certain places one species is more important than the others.

"The demand for good veterinarians is increasing, as all classes of livestock are requiring more and more of this special care. This will continue and increase as livestock becomes more highly developed and as problems in connection with their breeding and care grow more complex.

"The dangers attending in breeding, high production, close housing, artificial care, and multiplication of infections must be met with competently trained men to protect these wealth producers, so often known as the 'mortgage lifters'."

Besides the regular four-year course leading to the degree of Bachelor of Science and Doctor of Veterinary Medicine, the state college offers combined six-year courses leading to degrees in both agriculture and veterinary medicine, not only saving time for those who wish both degrees, but offering a valuable combination for business success upon graduation.

In the improvement of live stock, a movement which is being accelerated by various states and the United States department of agriculture through the better sires, better stock campaign, the sire exerts the greater influence, but, once the grading-up process has been started, the importance of well-bred dams must be recognized. It is only through the use of purebred females that it is possible to preserve and carry on the full value of good sires. A pure-bred sire and a pure-bred dam are necessary to reproduce a pure bred, which maintains an unbroken stream of known blood.

What wheat fed to hogs should be ground to give best results in producing pork, is the contention of Prof. Howard Hackedorn of the State College of Washington. Speaking of tests recently, he said:

"We fed the hogs wheat in ground form. Cracked or rolled wheat would be very satisfactory. Soaked wheat has been fed by some farmers who claim that this is a very good way to feed it. This method, however, is more troublesome. Some of the hard kernels, particularly with the harder varieties of spring wheats, are not masticated thoroughly by the hogs, and hence some method of preparation must be used to gain best results."

A total of 24,000 lambs on summer ranges near Elko, Nevada, have been sold to a Twin Falls, Idaho, company and are to be delivered at the Idaho state line. The price was not made public but was believed to be about ten cents a pound.

Warns Against Galvanized Iron Cooking Utensils

Do not allow food or drink to stand for even a short time in a galvanized iron vessel and do not use such a utensil in making preserves or jellies or as a container for cider or other fruit juices, is a warning issued by officials of the bureau of chemistry, United States department of agriculture. Some of the zinc with which the bucket or utensil is galvanized probably will be dissolved and will not only give the food an unpleasant taste but is very apt to cause sudden and intense illness.

A recent instance of poisoning apparently resulted from the presence of zinc in food. Twelve men at the Guam naval station each drank a bottle of root beer and immediately began vomiting. Chemical examination of the contents of three bottles transmitted to the bureau of chemistry for analysis disclosed the presence of substantial quantities of a salt of zinc in each bottle. It is the opinion of the officials that even one-half the contents of one of the bottles would have caused vomiting. The sale of bottles from this shipment has, of course, been stopped and an investigation started to definitely locate the source of the contamination with zinc.

Experiments carried on by federal chemists with quantities of lemonade, orangeade, milk, carbonated water, Washington City tap water and distilled water held over night in galvanized iron buckets proved that zinc contamination occurred in each case. The officials, therefore, warn against the use of such utensils as containers for food or drink.

Simply dressed means well dressed.

Make Toast Your Breakfast Food

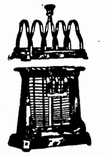
WHET UP YOUR APPETITE
with a slice of
Crisp, Tender Appetising Wheat Bread
TOASTED
to a deep golden brown color—right at the table with a
HOTPOINT ELECTRIC TOASTER

A slice of bread toasted on the breakfast table delights the eye as it takes on that deep golden brown color. It stimulates the appetite—creates hunger as the delightful aroma of toasting bread reaches the nostrils. The desire to eat culminates in CRISP, TENDER, CRUNCHY bites of freshly buttered TOAST, with a rich wheaty flavor that appeals for MORE, until the food hunger is completely satisfied.

In conjunction with the national movement to "Eat More Wheat" and "Make Toast Your Breakfast Food"

We present a SPECIALLY REDUCED PRICE
on the HOTPOINT ELECTRIC TOASTER
DURING MONTH OF SEPTEMBER ONLY

Hotpoint Toaster



September Only

$3.95

Every home should have an Electric Toaster and at this greatly reduced price every home can well afford one.

DON'T DELAY---GET YOUR TOASTER TODAY

WASHINGTON WATER POWER CO.

Arbitrary Power Doomed

John L. Lewis, international president of the United Mine Workers, says that unless the demand for a 20 per cent increase for the cutters and a $2 a day raise for the laborers is granted, mining operations will be suspended September 1.

The American public is getting sick and tired of the annual threat to freeze the people to death if certain demands are not granted. The day is rapidly approaching when the arbitrary power of any organization to make the public suffer in order to enforce its demands will be curbed.

It is safe to predict that the mines will be kept open and the public furnished with coal in spite of the threats to freeze the people if demands of United Mine Workers of America are not complied with. Such power in the hands of any labor organization or mine owners' organization is not to be tolerated in this country.

Concentration is the life of trade.

REPORT ON 1923 SMUT CONTROL DEMONSTRATIONS

(Continued from first page)

per cent in that treated with bluestone and salt. There was an average of 38.6 plants in six feet of copper carb treated row and 26.9 in the wheat treated with bluestone and salt.

On seven farms copper carb was compared with the standard bluestone-salt, lime dip treatment. In this treatment the wheat is first dipped in a solution of one pound of bluestone and one pound of salt to five gallons of water, and then dipped in a lime bath made by slacking lime and putting it in water at the rate of one pound of lime to ten gallons of water. In these comparisons there was 16 per cent of smut where copper carb was used and 13 per cent on the bluestone-salt limebath plots. There were 36.5 plants in six feet of row in the copper carb plots and 30.6 in the others.

Copper carb, bluestone and salt, and bluestone and salt followed by lime bath were compared side by side on four farms with results as follows: Copper carb, smut 24.6 per cent, stand 38; bluestone and salt, smut 15.7 per cent, stand 26.8; bluestone and salt followed by lime bath, smut 18.9 per cent, stand 31.

On four farms copper carb was compared with plots sown with wheat without any treatment whatever for a check. Results were as follows: Copper carb, smut, 11.4 per cent, stand 32.9; check, smut, 21.4 per cent, stand 29.8.

A. C. Linehan, of Genesee, treated the wheat for his field of Fortyfold with one pound of bluestone to five gallons of water. After the wheat was thoroughly dry, he treated several bushels of the bluestone wheat with copper carb. Results in this comparison were as follows: Bluestone, smut 14.3 per cent, stand 22.7; copper carb over bluestone, smut 10.8 per cent, stand 22.

Realizing that there was probably some difference in different grades of copper carbonate. Corona Chemical Company's "Copper Carb" was compared on three farms with Mountain Brand standard copper carbonate with the following results: Copper carb, smut, 27.2 per cent, stand 39.9; Mountain Brand copper carbonate, smut 24.6 per cent; stand 41.8. These tests indicate that there is approximately 10 per cent less smut in plots treated with standard copper carbonate than in those treated with copper carb, and that the stand is a little better on copper carbonate treated plots.

Fifty seven plots were treated with some grade of copper carbonate and compared with the treatments commonly used on the farms of the cooperators. On these farms results were as follows: Copper carbonate, smut 13 per cent, stand 35; unsmut treatments of farmers, smut 10.3 per cent, stand 26.4.

A tabulation of percentages of smut with various treatments at different periods during the fall planting season indicates that copper carbonate may be more effective early and late seedings than on October seedings. This tabulation shows percentages of smut as follows: September seding, copper carbonate 14.6 per cent, farmers usual treatment 13.1 per cent; October 1 to 15, inclusive, copper carbonate 17.6 per cent, other treatments 14.7 per cent; October 16 to 31, inclusive, copper carbonate, 14.5 per cent, other treatments 9.9 per cent; November seeding, copper carbonate, 4.5 per cent, other treatments 5 per cent.

The average number of plants in six feet of row of copper carbonate treated seed on the fifty-seven plots was 35, as against 26.4 with other treatments. They also like that treated with copper carbonate, will run through a drill twelve to fifteen per cent faster than seed that has been treated with bluestone. Therefore, one should keep this in mind in comparing stand. However there is no doubt that wheat treated with copper carbonate will germinate much better than that treated with bluestone or formaldehyde, and stand counts indicated that one should use approximately 25 per cent less seed when using copper carbonate than when using other treatments.

Conclusions

When these demonstrations were started it was realized that one year's results should not be considered conclusive, and arrangements were made to run tests for two or more years. The 1923 results do not justify recommending the use of copper carbonate. Neither do they justify condemning it.

All interested in finding the best treatment for the control of smut should bear in mind that bluestone has been used in this section for approximately forty years, and that farm tests and station experiments have determined the best strength of solution to use. On the other hand, copper carbonate is new in this section and but few carefully planned, extensive tests or comparisons have been made. Results secured at the Washington State Experiment Station, at Pullman, this year indicate that three ounces of copper carbonate will give better control than a smaller amount. In demonstrations to be started this fall in Latah county, the wheat will be treated with the grade of copper carbonate which in this year's tests has given the best results. This grade carried more than fifty per cent of metallic copper and was finely powdered. Tests will be conducted on a number of farms to determine the influence of different amounts of the chemical.

Should further tests show copper carbonate to be as efficient as bluestone in the control of smut, it will without doubt become very popular. It causes no injury to germination, and 25 per cent less seed can be used; wheat treated with copper carbonate will start quicker and grow more vigorously in its early stages than that treated with bluestone or formaldehyde; the treatment is easier to apply than wet dips; and grain treated with copper carbonate may be treated and stored indefinately without injury.

Fair Rates and Wages But no More

With farm products selling below the cost of production, considering that increased wages of railroad employees in like degree increase in rates it is little short of amazing in view of the high wages now being paid, that employes in train and engine service should be talking more pay with whispers of a strike if not granted.

During federal conrol the public had an opportunity to learn something of the wages and working conditions of railroad employes. The public therefore well understands that as a class, railroad employes in engine and train service work less hours and are paid more than any other class of workmen.

Needless to say that such demands will receive little sympathetic support from the public.

Everybody realizes that for the common welfare the railroads should be permitted to earn sufficient revenue to equal a fair interest on their value with a margin for additional facilities proportional to the constantly increasing public needs. Everybody is willing that railroad employes, not alone the "aristocrats," as engine and firemen are frequently called, but all railroad employes shall receive fair compensation.

It was an expression of the public mind in this respect that congress enacted laws and created separate tribunals for the regulation of both—the interstate commerce commission—to determine rates that will yield a fair interest plus the margin for additional facilities; the United States railroad labor board to determine fair wages and working conditions for the employes.

Congress having provided competent tribunals for the systematic regulation of rates and wages, the public expects the railroad and their employes to submit their differences to these tribunals and abide by the result, and in this connection it is well for the railroads and their employes to understand that this is no time for wage increases which have the effect of further burdening the public.

The Jonah

"Now children," said the Sunday school teacher, "I have told you the story of Jonah and the whale, "Willie you may tell me what this story teaches."

"Yes'm," said Willie, the bright-eyed son of the pastor; "it teaches that you can't keep a good man down."

Cause of Appendicitus

When the bowels are constipated, the lower bowels or large intestines become packed with refuse matter, that is made up largely of germs. These germs enter the vermiform appendix and set up an inflammation, which is commonly known as appendicitus. Take Chamberlain's Tablets when needed and keep your bowels regular and you have little to fear from appendicitus.—For sale at Clark's Drug Store.

GOODYEAR Service Station

BEING thicker, the famous Goodyear All-Weather Tread carries you farther than other treads. And it carries you in greater safety, too. The big tough sharp-edged blocks cut deep and grip tight on any surface. They are the best tire insurance against skidding you can buy.

As Goodyear Service Station Dealers we sell and recommend the new Goodyear Cords with the Beveled All-Weather Tread and back them up with standard Goodyear Service

Morscheck Bros.

THE GENESEE NEWS

VOL. XXXV GENESEE, LATAH COUNTY, IDAHO, FRIDAY, SEPTEMBER 7, 1923. NO. 10

ANALYZES CROP TRANSPORTATION SITUATION IN N. W.

Transportation preparedness for handling 1923 crops in the Northwest was analyzed today by J. M. Rapelje, ific Railway, insofar as his company vice president of the Northern Pacis concerned, in a detailed statement issued to operation employees.

Mr. Rapelje's statement says: "Our new crop is now beginning to move and it is natural to look around and see just how much we have accomplished in preparing ourselves to handle this crop.

"This year sees the completion of our automatic block signals from the Twin Cities to Puget Sound. This work started some years ago, has cost the company approximately four million dollars, but it has increased our capacity for moving business and most important of all, it makes our railroad a very safe railroad to travel and work on. Incidentally, we cannot help but feel some pride in the fact that our line is the first Northwestern line to complete its automatic signalling to the coast.

"Next, a word about our track. I want to emphasize the fact that we have been spending this year, as you know, much more money than our revenues have warranted, all with the idea of securing for ourselves, a very strong, well ballasted railway for moving this year's business. My recent trip to the coast convinces me that, on the completion of .the work now under way, we will have no weak spots that will slow up traffic nor cause derailments this fall or winter.

"Locomotives are an essential item in moving crops. On our locomotives, as with our track and our cars, we have been spending far more money than our income warrants, but all with the idea of taking care of people who depend upon us to move what they raise and what they will need to buy during the coming fall and winter. Then also, it sometimes seems uneconomical to purchase a lot of new locomotives, when we will actually need them for only about three months in the fall, and that instead, we should get along with those we have, even if a little delay to traffic resulted. But we have not looked at it in this way, consequently, are now receiving 49 new modern locomotives which will cost us nearly three and a half million dollars.

"Then, with reference to the condition of the 1389 locomotives we now own: On April 1st we had 21.5% of these engines out of service for repairs. By working full forces and by constant crowding of work so that our shops turned out 85 engines in May, our Mechanical Department has now reduced this to 14.8%, taking account of the new engines we are receiving. This reduction of 6.7% means providing ourselves with 94 more engines than if we had followed policy of taking a chance on fewer engines with some little delay to traffic.

"Finally a word on cars. We own at present 45,989 cars. Last fall and winter you will recall some serious trouble because a large proportion of our cars were tied up in congestions in the east, for example, November, when we had only 32,300 cars including foreign cars on our line or about 13,500 short on our ownership. Since November, clearing up of congestions in the east plus extreme efforts to get our equipment returned, has resulted in our having on our line 48,500 cars, or a return of about 11,000 cars in eight months. But when one of our cars returnes it invariably requires more or less repairs, usually of a heavy character, and returning cars brought our out-of-service percentage up to 11.4% on March 1st. Again we took no chances on our patrons suffering by such condition and a great deal of money was spent to repair these unserviceable cars, when actually we could hardly afford to do so. Our percentage is now down to 8.5%. This reduction of 2.9% means providing our patrons with about 1200 more cars than otherwise would have had, had we pursued the opposite policy. Then, in addition to this, we have bought and are now receiving 4570 new cars of different kinds which will cost us over eleven million dollars.

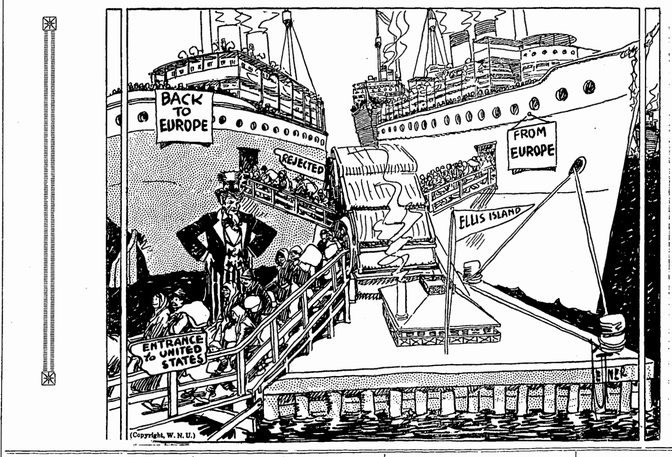
"I come now to the purpose of this letter. Our crops will shortly begin to move and we hope our facilities will be adequate to handle the entire staff must, in a personal way, beg for the cooperation of patrons to load cars to capacity, reduce time of loading and unloading, in addition to making maximum miles per day for every car in transit. At that time, or at any time, in fact, our line of officers with the above facts in mind, are in a position to state, convincingly and positively, that we, as a railway, have done everything which money and energy can do to provide our parons with good safe track and ample cars and locomotives and that we can consistently urge our patrons to do their share."

Taken to Hospital

Mrs. F. E. Lambert was taken to the Gritman hospital Wednesday evening where she will undergo an operation.

Narrow minds have not had wide experience.

Separating the Wheat From the Chaff



"The Old Homestead"

Perhaps one of the very finest plays that was ever produced on the legitimate stage has at last been reproduced on the silver screen—"The Old Homestead," which will be shown at the opera house Saturday night.

Those who have never before attended a picture show should not fail to see this, the greatest human heart-interest story that was ever written. The synopsis of the story follows:

Uncle Josh Whitcomb owns the Old Homestead Farm near Ganzey, New Hampshire. He is the genial patriarch of the surrounding country, beloved by everybody. Eph Holbrook, the richest man in town, holds a mortgage on Josh's farm. Eph's worthless son , Lem, is in love with Rose the village vamp. Josh's son, Reuben, clerks in Holbrook's store. His sweetheart is pretty Ann, Uncle Josh's ward.

Rose comes to Lem and tells him he will have to marry her, and Lem, to provide funds to get her out of town, steals money from his father's store. Reuben is accused of the theft and sent to jail. With Happy Jack, a genial, resourceful tramp, he escapes from the lockup and flees town. Rose disappears at the same time, and Ann is heartbroken, believing Reuben has gone with her.

Soon the mortgage of the Old Homestead falls due, and Eph is determined to collect. Uncle Josh goes to New York to see an old friend who is now millionaire to try and borrow money, but fails. He meets Happy Jack, who tells him that Reuben has Jack, who tells him that Reuben has fled to China. Struck by the old man's despair at this news, Jack determines to find and bring back the boy.

Returning to Ganzey, Josh determines to auction off the Old Homestead. Meantime Lem, growing scared, admits to his father that he stole the money. Eph, honest though he is, starts with him to the Old Homestead to settle with Josh.

A cyclone sweeps the country, tearing everything up by the roots but the Old Homestead. In the midst of it, Happy Jack brings Reuben home—just in time to save Ann from throwing herself in despair over the cliff at Lover's Leap. And everybody is happy.

Ate Dinner—Skipped

That the I. W. W. propaganda disseminator has been at work in Genesee during the present harvest is evident from the fact that a man came to town and took a fellow out to his farm for the purpose of having him help with the harvest. The fellow ate dinner and then "skipped," not waiting to see whether the work was to his liking or not— and during the process of "skipping" he lost his "bible", entitled "Preamble and Constitution of the Industrial Workers of the World," which contains considerable interesting reading to those who are not familiar with the teachings of this organization.

The "bible" may be seen at the News office, but as it is now a part of our library, it will be impossible to allow it to get very far away from home.

Missionary Society to Meet

The missioary society of the Federated churches will hold their first meeting this season at the home of Mrs. Evans on Wednesday, September 12, at 2:30 p. m. An interesting program is being provided and all members are urged to come and bring a friend. This meeting will also be the annual election of officers.

NEWS OF OUR SCHOOL— ENROLLMENT IS LIGHT

Registration of pupils in the various grades of the public school is very light, and falls below the normal enrollment for the first week. There were 106 grade students listed Monday and 62 high school pupils, making a total of 168. Total enrollment last year showed 146 for the grades and 102 for the high school.

The children who are to attend school in the grades this winter in our district should be in school, and should not be allowed to miss a day. Too many failures and retarded students are the direct result of non-attendance. Each student who stays out also helps to hold back the work of the whole school since extra effort and time must be spent with him to place him with his class. The Idaho school law is very plain on this and is generally considered a good law. Grade children will be expected to enroll not later than next Monday morning and those not listed on school records at that time will be called upon to explain their non-attendance and their parents held responsible.

There is no compulsory attendance law for high school students. Their actions in this respect is regulated by the school. On account of the urgent need of harvest hands arrangements have been made to permit high school boys and girls to register any time during the month of September. No student will be permitted to take up his studies for the first semester after October 1 unless he has been in attendance at some other high school. However, every possible effort should be made to enroll before the last of this month and those registering early will have a decided advantage over those coming late. No more school should be missed than is absolutely necessary. All back work must be accounted for when the student begins his duties.

A feeling of satisfaction is evident about the school house and it is believed that an excellent corps of instructors has been secured. Work is progressing nicely. A much needed course in penmanship and spelling has been added to the high school curriculum and all students must take this work. New teachers are fitting nicely into our school and are readily adjusting themselves.

Threshing Half Done

Threshing in the Big Bend and Palouse country is nearly one-half over, with yields running in general about to expectations, according to reports from that section. Although the season is considerably later than last year, satisfactory progress is being made with the machines now in the field.

Palouse wheat will run from 28 to 35 bushels to the acre, according to Walker J. Robinson, of the Washington Wheat Growers' association, who recently made a tour through the district.

Had Car Smash

An automobile accident that might have proven nuch worse, occurred Sunday evening near the C. C. Swenson place, just east of town. It seems that C. H. Spurbeck and members of his family were headed toward their ranch home near the Pine Grove school, and Wm. Schleuter, son of Mrs. Theo. Schleuter, was headed toward town. The cars came together with a "half-nelson" hold, badly damaging both machines, but luckily none of the occupants of either car were hurt.

RUSSIANS CAUSE GERMANY MUCH GRIEF

Germany's international political situation is much affected by the hundreds of thousands of Russians who have either fled to Germany for safety or have gone there voluntarily. Communist leaders throughout Germany frequently are Russians, and the opinion is prevalent that Russian agitators are much more numerous than they really are. Their tactics are similar to those followed in Russia. They are using the same lavish display of placards and printing, the same sort of inflammatory articles in the communist journals that werepravalent in Russia before the red terror spread over that land.

White Russia, that is, non-communistic Russians, are much alarmed by the communist propaganda and excite all the Germans they know by telling them what communism did to Russia.

There is such nervousness now in Munich, Leipzig, Dresden, Berlin, Breslau, Hamburg and other cities having large working population that the explosion of an automobile tire or an unusually loud motor exhaust is mistaken for gunfire, and pedestrians prepare to take shelter.

The communists have talked so much, and the financial situation and food shortage in great centers are so acute, that the re-enactment of Russia's tragedy is greatly feared.

"Anti-fiscism" is the name under which the communistic agitation is moving at present. Placards urging the workingmen to join the "anti-facists" and check the Industrialists and capitalists who are starving working men and their families," are widely posted throughout the German cities.

While the non-bolshevist Russians in Germany probably outnumber the bolshevistic Russians many times, and although few of the bourgeois Russians are engaged in political activities in Germany, they contribute much to the uneasiness in the great cities. Most of them suffered great hardships in Russia and through their newspapers and personal associations they intensify the fear of bolshevism.

Throughout Germany the air is now constantly filled with rumors of impending disaster. One day there are reports that pogroms may be expected from forces on the right. The next day demonstrations from the left are predicted widely by the nervous press, and given wide circulation by the uneasy public.

The Ruhr situation is overshadowed in the large cities of central and eastern Germany by local troubles and expected troubles. Causes of the general upset of affairs in Germany are ignored by the average man, and especially by the average woman. To them, the potato shortage and the lack of fats are the all important subjects of the hour.

The School Election

The school election went off very quietly Tuesday afternoon, although there were a goodly number of votes cast for such a busy season, there being in the neighborhood of 70 votes cast.

For the three-year term John Weber and Rev. Wolff were elected and R. E. Nordby was retained for the one year term. All three are well qualified to fill the positions for which they were chosen and the public will have every reason to believe that the affairs of the Genesee school district will be handled in a business-like and economical manner.

Pig Show at Potlatch

The boys and girls of the Latah-Palouse and Rock Creek pig clubs will show their animals at the Potlatch Pig Club show to be held in Potlatch on Saturday, September 8. This show is financed by Duroc-Jersey swine breeders of Whitman and Latah counties, business concerns of Potlatch, and the Latah County Farm Bureau, cooperating with the National Duroc-Jersey Record Association. O. S. Fletcher, Latah county agent, is managing the Show.

Prizes will be given for sow under one year, sow one year and under two, sow over two years, boar under one year , pen of three barrows, pen of two barrows, and best single barrow. Special prizes will be awarded for the best fitting and showing of swine, judging swine, and for the best pig club record and report.

In speaking of the show, County Agent Fletcher said, "This is the first pig club show to be held in Latah county. The boys and girls in the clubs have some good animals, and they are displaying great enthusiasm in their work and in getting the pigs ready for the show. We hope farmers and business men from all parts of Latah county who are interested in boys and girls, and in good pigs will attend the show.

Parent-Teachers Meeting

The regular monthly meetings of the Parent-Teachers association will be held again this year, the first session being on Monday night, September 17, in the high school assembly room.

Arrangements are being made for the presentation of an interesting program and it is hoped that all who are interested in our schools will attend. Many things of importance to parents and pupils will be taken up and discussed during the school year and it is the duty of every parent, especially, to attend these meetings so they may know just what is being done—and if they have any special greviance or request regarding the school—this is the place to take it up.

There will be a reception to the teachers from 7:30 to 8 o'clock followed by music and an address by Hon. Burton L. French on "Alaska." Mr. French has recently returned from Alaska and an interesting and instructive evening is in store for us.

The program committee are seeking to secure one or two special musical numbers for this meeting. See full program in next weeks News.

Don't miss the first meeting—Monday night, September 17.

Want Corporate Limits Extended

A movement was launched recently in Clarkston, at a meeting of the Chamber of Commerce, when a motion prevailed asking that the council call an election to have the people vote on a proposal of having the corporate limits embrace the territory of school district No. 25.

Associated with the motion is a proposal that the larger municipality then issue bonds for $300,000 for the acquisition of the water system and its enlargement.

Had Scalp Badly Cut

Thomas Parks had the misfortune to fall on a bundle rack, Monday, which he was managing for Walter Herman, and badly lacerating his scalp and being pretty badly bruised about the legs and body. He was taken to the office of Dr. Ehlen where his injuries were dressed. It required several stitches to close the wound in his scalp.

SEMI-LOCAL NEWS CLIPPED FROM EXCHANGES

Heavy Wheat Yield

While in many instances the yield of wheat is falling fat short of expectations, some good yields are reported after threshing. Carl Bohle has the best yield of fall wheat reported so far, 50 bushels to the acre and his spring wheat went 38 bushels. —Colton News-Letter.

Miss Terharr Graduates

Miss Bertha G. Terharr daughter of Mr. and Mrs. Frank Terhaar of Cottonwood, was one of the six young ladies that graduated as trained nurses from the St. Joseph hospital in Lewiston, Thursday evening. This is the second graduating class since this hospital was made an official training school for nurses.—Cottonwood Chronicle.

Phosphorus Starts Fire

Volunteer fire fighters were called to the Lawerence Kloetsch farm north of town last Saturday when a shed on the premises was believed to be on fire. Smoke in great quantities was coming from the building when the alarm was given. Later investigation revealed that water covering prosphorus in a receptacle had evaporated allowing the stuff to burn, causing the smoke. No damage was done.—Unontown Journal.

The Biggest Yet

Not content to make his garden soil produce great things, Jim Lucas has been training his hens along the same line. One day this week he brought to the Progress office a huge egg, which measured 7 5-8 x 9 1-16 inches in size and weighed exactly 4 ounces. Along with it, he had another egg of opposite caliber which weighed only 1 1-2 ounces.—Kamiah Progress.

In Clarkston

All the ignition parts, the storage battery, extra tire and rim, a good camera, coveralls, fishing tackle and a few other things were taken from the Oldsmobile six car of Walfred Peterson while it stood in his garage Sunday night and he and his family slept on the sleeping porch of their home 50 feet away. No clue of the thief or thieves have been found.—Clarkston Republic.

Accepts Call to Pastorate

The congregation of the Norwegian Lutheran church has received word from the Rev. G. Peterson, of Rosholt, Wisconsin, that he will accept the call to the pastorate of the local church, extended him some weeks ago. Rev. Peterson visited Moscow in July, spending some days here, and was most favorably impressed with the community and with the Palouse country climate. He will arrive in Moscow early in November to take up the work. He comes recommended as a preacher of good ability and an excellent man.—Star-Mirror.

Missouri 'Lasses In Idaho

C. T. Lewis, who has a ranch on Texas ridge, stated Tuesday that he had 8 acres of sorghum that will go 70 gallons to the acre. We're not talking about moonshine either—it's real, old-fashioned syrup. Mr. Lewis has been making sorghum experimenting for several years and the quality was of such excellence that he was unable to supply the demand. His sorghum cane this season is the best he has ever had. It is 8 feet tall and big, heavy stalks. Mr. Lewis expects to make five or six hundred gallons of syrup this fall.—Kendrick Gazette.

Must Have Certificates

Deputy Internal Revenue Collector Charles N. Brearly of Lewiston made an official visit to Orofino Friday of last week. He was here particularly to check up on admissions sold at dances, theatres and other places of amusement. Mr. Brearly wished to make clear to the public that lodges, schools, churches and similar organizations which sell admissions to amusements for charitable purposes and the like and are not operating for individual profit, do not have to pay internal revenue tax provided they apply to and receive from the department an exemption certificate. If they do not secure the certificate they are forced under the ruling of the department to pay the tax the same as the theatres and other regular places of amusement. Mr. Brearly advised that it was the policy of the department to issue the exemptions in all worthy cases, but the tax would be collected where the application is not made in advance of exemption.—Clearwater Tribune.

Loses Printing Plant

In the disastrous fire that occurred at Culdisac last week the Culdisac Enterprise was one of the places of business that was destroyed and Editor J. C. Bulen is having his paper published at Grangeville until he can secure a new plant.

The entire newspaper fraternity will sympathize with Mr. Bulen in his loss for when a newspaper office is destroyed there is always a heavy loss.

MY LADY'S MONEY

An Episode in the Life of a Young Girl

By Wilkie Collins

INSTALLMENT NO. 17.

"Are you aware of who Mr. Hardyman really is?" retorted her ladyship. "Or do you judge of his position by the vocation in life which he has perversely chosen to adopt? I can tell you, if you do, that Alfred Hardyman is the younger son of one of the oldest barons in the English peerage, and that his mother is related by marriage to the royal family of Wurtemberg."

Miss Pink received the full shock of this information without receding from her position by a hair's breath.

"An English gentlewoman offers a fit alliance to any man living who seeks her hand in marriage," said Miss Pink. "Isabel's mother (you may not be aware of it) was the daughter of an English clergyman—"

"And Isabel's father was a chemist in a country town," added Lady Lydiard.

"Isabel's father," rejoined Miss Pink, "was attached in a most responsible capacity to the useful and honorable profession of medicine. Isabel is, in the strictest sense of the word, a young gentlewoman. If you contradict that for a single instant, Lady Lydiard, you will oblige me to leave the room."

Those last words produced a result which Miss Pink had not anticipated—they roused Lady Lydiard to assert herself. As usual in such cases, she rose superior to her own eccentricity. Confronting Miss Pink, she now spoke and looked with the gracious courtesy and the unpresuming self-confidence of the order to which she belonged.

"For Isabel's own sake, and for the quieting of my conscience," she answered, "I will say one word more, Miss Pink, before I relieve you of my presence. Considering my age and my opportunities, I may claim to know quite as much as you do of the laws and customs which regulate society in our time. Without contesting your niece's social position, and without the slightest intention of insulting you, I repeat that the rank which Mr. Hardyman inherits makes it simply impossible even for him to think of marrying Isabel. You will do well not to give him any opportunities of meeting with her alone. And you will do better still (seeing that he is so near a neighbor of yours(if you permit Isabel to return to my protection, for a time at least. I will wait to hear from you when you have thought the matter over at your leisure. In the meantime, if I have inadvertently offended you, I ask your pardon—and I wish you good evening."

She bowed and walked to the door. Miss Pink, as resolute as ever in maintaining her pretensions, made an effort to match the great lady on her own ground.

"Before you go, Lady Lydiard, I beg to apologize if I have spoken too warmly on my side," soh said. "Permit me to send for your carriage."

"Thank you, Miss Pink. My carriage is only at the village inn. I shall enjoy a little walk in the cool evening air. Mr. Troy, I have no doubt, will give me his arm." She bowed once more and quietly left the room.

Reaching the little back garden of the villa through an open door at the further end of the hall, Lady Lydiard found Tommie rolling luxuriously on Miss Pink's flower-beds, and Isabel and Mr. Troy in close consultation on the gravel-walk. She spoke to the lawyer first.

"They are baiting the horses at the inn," she said. "I want your arm, Mr. Troy, as far as the village, and, in return, I will take you back to London with me. I have to ask your advice about one or two little matters, and this is a good opportunity."

"With the greatest pleasure, Lady Lydiard. I suppose I must say goodbye to Miss Pink?"

"A word of advice to you, Mr. Troy. Take care how you ruffle Miss Pink's sense of her own importance. Another word for your private ear—Miss Pink is a fool!"

On the lawyer's withdrawal, Lady Lydiard put her arm fondly round Isabel's waist. "What were you and Mr. Troy so busy in talking about?" she asked.

"We were talking, my lady, about tracing the person who stole the money," Isabel answered, rather sadly. "It seems a far more difficult matter than I supposed it to be. I try not to lose patience and hope, but it is a little hard to feel that the appearances are against me, and to wait day after day in vain for the discovery that is to set me right."

"You are a dear good child," said Lady Lydiard, "and you are more precious to me than ever. Don't despair, Isabel. With Mr. Troy's means of inquiring, and with my means of paying, the discovery of the thief can not be much longer delayed. If you don't return to me soon, I shall come back and see you again. Your aunt hates the sight of me; but I don't care two straws for that," remarked her ladyship, showing the undignified side of her character once more. "Listen to me, Isabel. I have no wish to lower your aunt in your estimation, but I feel far more confidence in your good sense than in hers. Mr. Hardyman's business has taken him to France for the present. It is at least possible that you may meet with him on his return. If you do, keep him at a distance, my dear — politely, of course. There! there! you needn't turn red; I am not blaming you; I am only giving you a little good advice. In your position you can not possibly be too careful. Here is Mr. Troy. You must come to the gate with us, Isabel, or we shall never get Tommie away from you. I am only his second favorite; you have the first place in his affections. God bless and prosper you, my child! I wish to Heaven you were going back to London with me! Well, Mr. Troy, how do you like your new wife Miss Pink? Have you offended that terrible "gentlewoman' (hateful word), or has it been all the other way, and has she given you a kiss at parting?"

Mr. Troy smiled mysteriously, and changed the subject. His brief parting interview with the lady of the house was not of a nature to be rashly related. Miss Pink had not only positively assured him that her visitor was the most ill-bred woman she had ever met with, but had further accused Lady Lydiard of shaking her confidence in the aristocracy of her native country. "For the first time in my life," said Miss Pink, "I feel that something is to be said for the republican point of view; and I am not indisposed to admit that the Constitution of the United States has its advantages."

CHAPTER XII.

The conference between Lady Lydiard and Mr. Troy, on the way back to London, led to some practical results.

Hearing from her legal adviser that the inquiry after the missing money was for the moment at a standstill, Lady Lydiard made one of those bold suggestions with which she was accustomed to startle her friends in cases of emergency. She had heard favorable reports of the extraordinary ingenuity of the French police, and she now proposed sending to Paris for assistance, after first consulting her nephew, Mr. Felix Sweetsir. "Felix knows Paris as well as he knows London," she remarked. "He is an idle man, and it is quite likely that he will relieve us of all trouble by taking the matter into his own hands. In any case, he is sure to know who are the right people to address in our present necessity. What do you say?"

Mr. Troy, in reply, expressed his doubts as to the wisdom of employing foreigners in a delicate investigation which required an accurate knowledge of English customs and English character. Waiving this objection, he approved of the idea of consulting her ladyship's nephew. "Mr. Sweetsir is a man of the world," he said. "In putting the case before him, we are sure to have it presented to us from a new point of view." Acting on this favorable expression of opinion, Lady Lydiard wrote to her nephew. On the day after the visit to Miss Pink the proposed council of three was held at Lady Lydiard's house.

Felix, never punctual in keeping an appointment, was even later than usual on the occasion. He made his apologies with his hand pressed on his forehead, and his voice expressive of the languor and discouragement of a suffering man.

(To Be Continued)

WASHINGTON STATE NEWS

Petitions for rehearing in the Tacoma bond election case, which resulted in the knocking out of a $2,400,000 school bond issue in that city, as well as rendering a score of minor issues throughout the state invalid, may be filed in the supreme court by both the city of Tacoma and the state, according to Assistant Attorney General Mark H. Wight.

Traveler: "I often wondered why the English were such tea hounds.

Friend: "Yes?"

Traveler: "Yeah, but I know now. I had some of their coffee."—Awgwan.

"stalled" a girl on Summit street, In Walbridge park I kissed her;
But Lord! I took her home and found
She was my sweetie's sister!

WASHINGTON NEWS

Attorney C. C. Lantry of Spokane was elected district governor of the Kiwanis clubs of the Pacific northwest at the convention which was held recently in Astoria. Walla Walla was chosen as the 1924 convention city.

Prune growers of the Walla Walla, Freewater and southern Idaho regions have to find markets for 3000 cars of fresh fruit within the next few weeks and have called upon the bureau of agricultural economics of the department of agriculture for assistance.

Four Seattle men, Arthur Boose, Dan Diston, Henry Gehric and Mike Doyle, were arrested in Walla Walla for distributing I. W. W. literature and then released. Prosecuting Attorney A. J. Gillis contending that it would be impossible to convict them under the criminal syndicalism law.

Municipal street railway employes of Seattle, having asked one day off in eight, seem to be headed toward a situation even less satisfactory to themselves than the present. Accusing the officers of the railway men's union of bad faith, the city council has not only refused the day off, but has voted unanimously to quit paying the same monthly wages and put them all back on the hourly basis. The men will be paid only when they actually work.

The services of M. D. Armstrong, horticulturist and cover crop specialist, have been obtained for Benton county through the efforts of County Horticulturist Hall. Armstrong will start operations from Prosser on August 30. Fruit men desiring his services will be enabled to join the tour parties, which will be conducted through the larger orchards in this region.

Miles Cannon, field manager for the United States Reclamation service, held a conference in Yakima, with Project Manager J. L. Lytel, and District Counsel H. L. Holgate, of Portland, with a view of outlining the reclamation service's proposed method of turning different projects back to the management of water users, when they are in a position to handle them. Mr. Cannon came to Yakima, following a conference with Dr. Hubert Work, secretary of the interior, in Washington, D. C.

Approximately 300 out-of-town visitors took part in the first annual State Unity day conference, held in Ellensburg, August 23-25, which was called by the Washington State Press association. Thirty-three men, representing practically every industry in the state, spoke to the delegates on matters of state interest.

The Walla Walla county commissioners recently purchased 37 acres of land, valued at $35,000, to be used for county fair purposes. The board stated that the county has $5,000 on hand for fair purposes unused this year, because no fair will be held, and bills will be used to pay off the debts. A one-fifth mill levy, provided in the budget this year, will raise $7500, sufficient to complete the payments.

The water rights of the Columbia Basin project, as involving Washington, Oregon, Idaho and Montana, may be taken in re reiuct to the governors of the four states to appoint a commission for the purpose of drawing up an agreement which can be presented at the next session of the state legislatures for ratification, it was pointed out at a recent meeting of the Columbia Basin committee of the Spokane Chamber of Commerce.

Word has been received from Charles Baker, secretary of the Walla Walla County farm bureau, that 20,000 tons of alfalfa hay, baled and ready for shipment, are being held in the county for more favorable selling conditions. The owners of the hay are members of the new Northwest Hay Growers' association.

The third body recovered following the tragic bridge disaster at Kelso last winter has been identified as that of Mrs. A. C. Huntington, Cowlitz county pioneer. Her husband and son also were drowned, but are unrecovered. There are still 14 bodies known missing as a result of the bridge tragedy.

A decrease in automobile fatalities in this state is noted in figures received by L. D. McArdle, director of efficiency, from the state department of health, which show that 55 were killed in the first six months of this year, as compared with 57 in the first half of 1922 and 92 in the same period in 1921. It is estimated that one-third of the deaths this year were caused at railroad crossings, but it is believed that this proportion will be decreased with the new law compelling motorists to slow up to 12 miles an hour at crossings.

Important News of Both Hemispheres Boiled Down to Last Analysis.

Greeks and Armenians are being deported by the Turkish government, the Greeks into Samsoun and Alepo and the Armenians into Russia. Dispatches describe the Armenians as in pitiable extremities.

The first Indian school in the United States to be operated for Indian children was opened at Minneapolis August 28. Twelve Indian children from Minnesota, Wisconsin, South Dakota and Arizona will be the first pupils.

Official announcement has been made that the scrapping of warships in accord with the Washington treaties, ratifications of which have just been exchanged by the signatory powers, would be carried out immediately by Japan.

Huge drums at the Far Rockaway work shops of the Commercial Cable company began unrolling the 18th cable across the Atlantic last week. The cable will run by way of Nova Scotia and the Azores to Havre, a distance of 4600 miles.

Kate Douglas Wiggin, the American author, died at Harrow, England, Aug. 23. She was often called the "prima donna of literature," and was one of the most accomplished women engaged in literary and philanthropic work in the United States.

The French authorities are reported to have made several large seizures of money from Germany. At Bochum 45,000,000,000 marks were confiscated; at Recklinghausen 12,000,000,000; at Dortmund, $6,000,000,000 and at Dortsfeld 600,000,000.

To avoid confiscation at the French and Belgian frontiers of marks consigned to Cologne, Germans have recently sent large quantities by the British Air Service to Croyden, whence they are dispatched in the next air express to their destination.

General Tilini, president of the commission for delimination of the Greek-Albanian frontier, was assassinated by a party of unknown gunmen who ambushed his motor car on the Santa Quaranta highway.

His chauffeur and aide-de-camp also were killed.

Count Gombel Yamamatis has been selected premier of Japan, succeeding the late Baron Kato, according to official announcement. The selection is a surprise for it had seemed certain Viscount Uchida, minister of foreign affairs in the Kato cabinet, would be the Genro's choice.

Discovery of placer gold reported to run as high as $4 in gold to the pan on the Tokiat river, in Alaska, 60 miles from the Alaska railroad, was the signal for a general stampede from Nenana, Healy and other interior points, according to advices received here. The find was made by Indians.

Unless Germany is placed in a position to float accommodating food credits abroad or to pile up heavy reserves of foreign currencies, her food situation will continue in a state of chronic jeopardy, in the opinion of Food Controller Luther. The shortage of lard and of raw materials from which oleomargarine is manufactured is presenting great difficulties to the food controller, as these materials are chiefly bought abroad and must be paid in foreign moneys.

Governor Kendall of Iowa has left for Honolulu on a 10 weeks' vacation in search of health. The governor said physicians had told him the muscles of his heart had collapsed as a result of nervous strain and overwork. Mrs. Kendall will accompany the governor.

The Washington elm at Cambridge, Mass., is dead. The official demise of the fame three, beneath which Washington took command of the Continental army, is announced by Dr. C. S. Sargent, director of the Arnold arboretum of Harvard university, in a letter to Mayor Edward Q. Quinn of Cambridge.

Used for years as a jumping block in children's games, a large white square stone three feet high, near Kingston road, has been identified as a Roman altar, 2000 years old. The antiquarian, Dr. W. H. Kosteven, who made the discovery, says it is like all early Roman altars, and the depression on top shows where the offerings for the gods were placed. Carved figures, supposed to represent priests, can still be seen on one side.

IDAHO

State inheritance tax amounting to $23,364.60 was received by the state of Idaho from the estate of Eugene R. Day, wealthy Coeur d'Alene mine owner and operator, who died February 11, 1922.

The first move of the Idaho state board of prison commissioners to improve the living conditions of men and women at the state penitentiary was made recently when Dr. F. W. Almond, state medical adviser, and Dr. George Collister, prison physician, started inspection of all prisoners for social diseases.

Authorization has been issued by the forest service headquarters for the fall planting program of 2000 acres to be carried on by the Cabinet forestry officials in the Deep Creek country, Coeur d'Alene forest, across the mountains from Heron, Mont. Several hundred thousand shrubs will be shipped to Heron from the Savenas nurseries at Haugan and will be packed into Deep creek, where the crews will plant them.

Mrs. Alice Wolott arrived at Stites from Ulysses, Idaho, recently to visit friends for a few days. She made the trip of about 200 miles from Ulysses to Stites, horseback, in eleven days. She reports of having a fine trip, but was delayed one and a half days on account of hail storms.

Reports from threshing machines in the Kendrick territory support early predictions of a bumper wheat crop. The biggest yield reported comes from the first grain threshed on American ridge on the Chris Maier place, farmed by Sidney Dicks. A field of summer fallow wheat averaged 65 bushels an acre and his entire crop averaged 50 bushels.

"The reduced grain freight rate applying from Camas prairie points to the Coast will save to the farmers of that district $40,000 to $50,000 on this year's crop," said M. B. Mikkelson, manager of the Prairie Mills company. "I estimate that the points benefitted by the new rate will ship out a minimum of 2,000,000 bushels of wheat. The saving will be direct and immediate, for the farmer will receive just that much more for his wheat."

As a result of a special committee, appointed by the Lewiston Commercial club, who visited Spokane in the interest of the Annual Tri-State Fair and Roundup, a special caravan of Spokane business men will visit the fair during the second day, September 12. This is the first time a special caravan has been organized by Spokane people, but in past years a great many Spokane people have visited the fair.

A fire, starting at 3 o'clock in the morning of August 26, destroyed a large portion of the business section of Culdesac, with an estimated loss of $65,000 to $75,000. Very few insurance policies were held by the property owners. The fire originated in the rear of a hotel building and spread rapidly to the adjoining buildings. Residents recall that Culdesac's previous serious fire occurred August 26, 1917.

NEED COOPERATION AMONG APPLE MEN

Lack of co-operation among northwest apple growers is robbing the northwest of millions of dollars annually, according to John W. Langdou, who recently returned from the International Apple Shippers association's convention in Detroit.

"Apple buyers would be willing to pay any reasonable price asked," declared Mr. Langdon, at a meeting in Walla Walla, "if there were stability of price, but they are always afraid that the apple growers in one section will sell to a competitor at a lower price. The northwest apple growers should agree on which a reasonable price is and set the price themselves.

Potato Flea Beetle at Work.

The potato flea beetle has been exceptionally bad this year in the potato patches of Pacific county, according to word just received from County Agent E. C. Durdle. Five farmers in the county are working under the direction of the county agent to check the beetles. Arsenate if lead is being used in connection with the Bordeaux mixture. Considerable work is being done in the county to produce seed potatoes of U. S. No. 1 grade.

Within five years it is expected that Alaskan apples will be among the fruits on the markets of the world, gauged by experiments being conducted in various parts of the temperate zone of the territory along Turnagain Arm. Several apples have been produced and from the original stock other seedlings will be propagated.

ALL U. S. BEEF USED AT HOME

This Country No Longer Source of Meat Supply for Great Britain.

WORLD HAS LESS SHEEP

Decided Decrease in Numbers Since World War—England's Live-stock Estimate.

Growth of population in the United States to a point at which the domestic market has become large enough to absorb the country's normal beef production is the chief reason why American beef is no longer an important source of supply for Great Britain, says Charles J. Brand, marketing specialist for the department of agriculture, who recently studied the meat trade situation in Europe. Another factor working against an increase in our beef exports, he declares, is the lower cost of beef production in countries like Argentina which are still in the pioneer stage.

The most important factor in Mr. Brand's opinion, is the relatively high cost of beef production in the United States compared with its cost in countries now in the pioneer stage. This fact, he says, has convinced the meat trade of Great Britain that the future will see greater and greater production in Argentina, until the supply from that country overshadows that from any other source. Next in importance as sources of additional supplies are Australia and New Zealand. At the present time the United States is almost exactly self-sufficient in the matter of its beef supply. As the country becomes more industrialized, home consumption will be increased. Whether in that case the livestock grower will have any strong motive to engage in competition for the export trade will be determined, says Mr. Brand, by many factors, among which he cites the possibility of more efficient beef production methods coming into use, the younger age at which beef cattle are now slaughtered, and the relation of the dairy industry to cattle raising generally.

The estimated number of sheep in the world, previous to the "Great World War" 1914 to 1918, was 548,383,000. The estimates for 1921 place the total at 465,895,000. The number listed for the United States is 36,048,000, a loss in eight years of 13,671,000. As there is a decided increase in the market demand for lamb and mutton, there would seem to be no danger of over like number of people starving in the world.

The livestock estimates for England and Wales on August 1, 1923, show a decrease for horses but increases for cattle, sheep and hogs. There were 1,281,000 horses compared with 1,340,000 last year. The number of cattle is estimated at 5,822,000 compared with 5,738,000 last year, sheep 13,831,000 compared with 13,438,000 last year and hogs 2,611,000 compared with 2,299,000 last year.

The number of dead and crippled hogs found on arrival at stockyards is an item worthy of consideration as a factor bearing on the amount of marketable pork to say nothing of the consequent effect in decreasing the farmer's profit on the entire shipment.

During a period of six months in 1922 there were received at 9 of the principal stockyards of the country a total of 28,375 dead hogs and 38,708 in a more or less crippled condition, according to reports obtained through the federal meat inspection service. These figures indicate clearly a waste that is largely unnecessary, most of which can be attributed to carelessness on the part of those handling the animals at points of origin of shipments.

The need for simple yet complete accounting records by livestock shipping associations is emphasized in a new bulletin published by the United States Department of Agriculture entitled "Accounting Records and Business Methods for Live Stock Shipping Associations." The bulletin recommends use of a system outlined that is based on the methods used by shipping associations in various parts of the country and which experience has demonstrated as sound and practical, and capable of being adapted to a wide range of conditions and methods of operation.

The Chorus Girl.

"Tottie won't go out to any lobster parties."

"Why not?"

"She has a two-line part in the new show. It opens in six weeks, so she's got to get down to hard study."

BIG PROFITS AND HIGH FEED BILL GO TOGETHER IN DAIRY

More Feed Brings More Profit in Dairy Farms in Snohomish Association.

FINE BULL GOES SOUTH

Hospital Gets New Herd Sire—Boys Buy Fine Stock—Find Cows Dislike Sunflowers.

If it is lumber you are after, logs are fed to the saw mill. If it is flour that is required, it takes wheat to make it, while if milk is the product, good cows require plenty of feed of the right kind to manufacture the great dairy product.

High feed bills do not necessarily indicate small profits from milk cows. Donald Saunders, tester for the Snohomish County Cow Testing association, gives an example of where high feed bills made high profit returns.

The high herd in the Stillaguamish Valley Cow Testing association for the past year showed an average feed cost per cow in the herd of $140.20, but the average return over cost of feed per cow was $120.36. The lowest record in the same association, was made by a herd whose feed cost averaged $61.02 and the average profit over cost of feed was $44.38.

A recent statement issued by the U. S. dairy division that "as the production of a cow is doubled—profits increase three times," proved true. The high herd produced twice as much butterfat in the year and almost three times the profit over the low herd.

"It is possible," said Mr. Saunders, "the low herd did not have the ability to return a good profit even though the animals had received a generous ration. However, a herd of cows may be likened to a manufacturing concern—the raw material must be utilized in order to produce the finished product."

Hospital Secures Grandson of Prospect.

After searching for some time for a junior herd sire to head the splendid herd of 50 purebred and 100 grades at the Stockton State hospital, Mr. M. J. Foley has chosen one of the finest sons of Carnation Segis Prospect from the Carnation Stock Farms at Seattle. This youngster is almost perfect in conformation, largely white in color and extremely stylish. He promises to develop into a remarkable bull. He represents the ultimate in the Carnation bloodline, being by a son of Prospect, out of a daughter of Matador Segis Walker. His sire's dam not only leads all milk cows of the world with 37,381 lbs. of milk and 1448 lbs. of butter, but has just completed a second record at 10 years of age of over 35,400 lbs. of milk and 1419 lbs. of butter, which gives her two records for milk production greater than any single record of any other cow in the world.

The dam of this young bull is Carnation Matador Hartog, a real show cow, who won first prize at the Pacific International exposition in 1919 as a two-year-old and who followed that with a splendid record made at 27 months of age of 642 lbs. of butter in 10 months. She is a cow which will undoubtedly make another splendid record at maturity. The hospital herd has some splendid daughters of a son of King Korndyke Pontiac 20th, and they expect great results from crossing Sir Segis Hartog Matador on these heifers.

Additional breeding of Guernsey cattle are being secured in Lewis county. C. A. Wingren recently purchased a purebred young bull, Fawndale's Sailor Boy, and plans to secure some registered females. Fawndale's Sailor Boy was dropped December 29, 1920, and is a fourth prize winner at the Pacific International show at Portland. The sire of the animal was Jar Adventurer and his dam Bessie of Antrim. H. B. Bransom and H. J. Temple of Alpha recently bought a young Guernsey registered bull from Mr. Looney, a Jefferson, Ore., breeder.

Seventeen purebred heifers and heifer calves have been purchased by the Junior Dairy club boys of Skagit county. Of these four are Jersey and 13 Holsteins. One boy purchased a purebred heifer who calved before she could be moved and he was offered $100 more than he had paid for her but he would leave the cow and calf on the place. He refused because the cow had three 1,000-pound butter records backing her. Three bred Holstein heifers were among these purchased, each having 600 pounds of butter or over behind them.

In actual yield of milk the cows fed silage at the O. A. C. station ranked as follows: Those fed oats and vetch first, corn next, and sunflower last. Difficulty was found in getting the cows to eat the sunflower silage readily.

Oshkosh Has Model Frog Farm

Out in the suburbs of Oshkosh, Wisconsin,—"South Oshkosh," the section is termed officially—there is in operation what is generally conceded to be the model frog-farm of all the world.

The farm was started with the bringing of a few frogs from the swamps beyond the city; providing these with a bit of a pool, well back in the owner's garden; placing fencing about the yard, to prevent the frogs escaping; and then giving the animals every opportunity to wax strong and fat and breed. Offspring of this first stocking of the frog-farm were allowed to grow to proper size in turn; some were sent to the nearby markets; others were held and then mated with fresh stock from the surrounding countrysides as well.

This farm is enclosed by a high, white-washed board-fence; preventing frogs from escaping, and keeping predatory animals outside the bounds. The farm-plot itself, inside the fence, is one broad meadow of rather scrubby sod; frogs doing better in this than they would upon well-kept lawns.

Back a bit from the entrance to that garden long trenches have been dug in series. These trenches—or "pits," the frog-men call them—are walled about and floored in a gray cement. Pit neighbors pit; in addition, each pit is divided by bits of wall rising just a trifle over its surface into sections, or basins; so that the frogs may travel from basin to basin; fancying themselves traveling from pond to pond as they love to do.

Iron piping parallels most of these pits or crosses them. Apertures in it permit of flushing a pit to whatever height desired; or of rinsing it, when it should be washed. In these pits the farm-frogs live and thrive and multiply.

To the colony of home-bred frogs there are added constantly fresh frogs —new stock—sent in by frog-hunters from the swamps and woods. Like the rest, these thrive splendidly on the minute insect-life in the grass, the earth here, and particularly on the bacteria the water of the many pits provide.

It is reported that the superior size and quality of the frogs' legs produced on the model farm are creating a nation-wide market and the demand is already several jumps ahead of the supply. The frogs sell at twenty-five cents per pound, F. O. B. Oshkosh.

"Where do you bathe?"
"In the spring."
"I asked you where, not when."—Exchange.

Biggs—"That young bride worships her husband, doesn't she?"
Jiggs—"Well, she places burnt offerings before him three times a day."—Exchange.

Three Hours Later

By PEARL AGNES SCHELL,
SPOKANE, WASH.

I was borne away on the wings of night—
To a place of horror, with flickering light;
Each being that peopled this terrible place
Had a fiendish, wicked, and leering face.

One, the leading spirit of all,
Was horribly and grotesquely tall,
With horned head and eyes of fire,
Which glared at me with mad desire.

I groaned aloud in agony—
For where I was had dawned on me,
I felt that surely I should die,
I'd eaten three pieces of hot mince pie.

Copyright by Underwood & Underwood, N. Y.

POOR LITTLE NEW YORK; CHICAGO BEATS HER

This shows the east side of Michigan Blvd. approaching the Michigan Blvd. bridge. Commissioner Winiecki of the Public Service has just completed a check of the number of vehicles that cross the boulevard bridge between 7 A. M. and midnight and finds that it numbers 53,014 against 19,080 from a check made at Fifth Ave. and 42nd St in New York recently.

This proves that traffic on Michigan Blvd. is nearly three times as heavy as that on Fifth Ave. in New York.

BOOK REVIEWS

North of 36

By Emerson Hough, is a Texas trail story in which the cattle men of Texas were trying to get a market for their cattle, in which they were handicapped by unscrupulous politicians directing a band of outlaws.

The narrative relates the experiences of Faisie Lockhart, a young woman, who is penniless as far as money goes, but who has been left with a large ranch and a lot of cattle. She has a crew of loyal men who stay by her regardless of pay. They learn of a market "north of 36." Faisie and her cowmen start north with 4500 cattle. The trip is full of adventure due to the lack of trails, Indians, and outlaws.

Dan McMasters, a young man of superior education and manners, was sheriff of Gonzales. His work took him to many parts of the state and incidentally to the Lockhart ranch. He was able to be of service to the cattle train on its journey north. His actions were not always understood by Faisie and her men. This caused him their friendship. Nevertheless, he was able to help them at different times under cover of darkness. The train reached its destination; the cattle were sold; and McMasters was able to reinstate himself in the good graces of Faisie, who had learned to love him during this time. So when all the scores were evened up they decided to join forces for life. (D. Appleton and Company, $2.00.)

The White Flag

By Gene Stratton-Porter, begins with the lives of four children, each reared in different families and under different conditions.

The outstanding characters are the daughter of the merchant, Mahala Spellman, the banker's son, Junior Moreland, Edith Williams, an orphan with money, living with her aunt and uncle, and Jason Peters, whose parentage is a little uncertain and who lives with the washerwoman of the town, Marcia Peters.

The banker and his son are unscrupulous in their business dealings and cause a great deal of suffering and hardship on a great many families. Through their activities, Mahala Spellman loses both her parents and is thrown on her own resources for a living. She turns dressmaker and milliner; succeeds in making her living and with the help of Jason, who has worked his way up and is part owner of a grocery store, she succeeds in getting located on a farm which was salvaged from the estate of her father.

Through an underhanded trick of Junior Moreland's Mahala is accused of stealing a purse. The struggle she goes through almost costs her her life. Her health is regained on the farm and she is vindicated after some months. The story ends as all stories should with the marriage of Mahala and Jason. (Doubleday, Page & Co., New York, $2.00.)

"Black Buttes"

By Clarence Mulford, is an intensely interesting story of the cattle country in early Western days. The story opens with mystery, which is not solved until the closing chapters. At different times the cattle would stampede during a night's rest and in rounding them up in the morning a great number would be lost and could not be found. The riders would become confused in the Black Buttes and would have to return without the cattle.

A Mr. Duncan, two-gun man, who was with one outfit, was suspected of driving off the cattle during one stampede and after some altercation with the trail boss left the camp.

The story of how he later solved the mystery of the Black Buttes and found his man "Hepburn," for whom he had been searching for ten years and how cleverly weaves in to these dialogues, the habits and natures of the animals that are truly instructive. (E. P. Dutton & Company, New York, $1.50.)

A Parody Sport Book

By Cliff Goldsmith (Professor Happy), is a book of games for the adolescent boys, written in simple language. It is illustrated with pen drawings and has pictures of star athletes, such as Ty Cobb, Bo McMillin, Charles Paddock and others. The games are all original and full of fun and humor. Although the book has some slang in it, it is written in such a way that no offense can be taken. It is a good clean book and believe that it will do a lot of good in bringing about habits of health through play. (American Child Health Association, New York.)

Farmtown Tales

By Mary Wolfe Thompson, is for small boys and girls who love the animals of the farm. This book contains a series of farm animal stories where the animals themselves do the talking. Because it is in dialogue it is in the form that children like best. There is Peter Singlecomb, the chick, Pleetfoot, the colt, Twinklepaw, the cat, and many others. The author is roaming about he found romance, makes this story hold the reader's attention to the end. (Doubleday, Page & Co., New York.)

Special Vegetable Dishes

Potatoes a New Way.

Pare potatoes that are even in shape. Cut in halves length-wise. With potato ball cutter make a cavity in the center of the smooth side and trim so that the potato stands evenly on the rounded side. Sprinkle with salt and paprika and place in baking pan. Bake in hot oven about 30 minutes or until delicately brown and tender.

Corn With Cream.

Cut cooked green corn from cob, To two cups of corn add one and one-half teaspoons salt, one-eighth teaspoon pepper, and cream to moisten. Heat in double boiler and serve.

Baked Corn.

Use left over cooked corn cut from the cob, and if desired add chopped green pepper, red pimento, onion mustard for flavor. To 1 cup corn cut from cob add 3-4 cups milk, 1 egg yolk slightly beaten and 1 egg white beaten stiff. Turn into greased baking dish set in pan of hot water and bake 20 minutes or until firm in a hot oven.

Cantaloupe Salad.

1 pint diced cantaloupe, 1 cup celery cut in small pieces, 1 cup tart apple, 1 cut peach. Mix lightly and serve with dressing made by adding one-half cup of thick sour cream beaten stiff to one cup mayonnaise. This dressing should be used the day it is made.

Creamed Carrots.

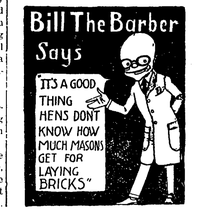
Select tender young carrots, wash, scrape and slice the carrots in rings. Boil in salted water until tender, then drain well. Arrange in serving dish and pour over a medium white sauce to which has been added 1-3 teaspoon mustard.

The mustard adds a distinctive flavor to same which will appeal to many people.

Too Hot for Her Job.

"Do you believe that people follow the same occupation in the next world that they do on earth?"

"My mother-in-law won't. She makes ice cream."—Tid-Bits.



Originator of Famous Yellow Dent Corn Sacrificed a Fortune for An Ideal

"The man who put more millions in the pockets of the farmers of the Corn Belt than any man living," is what James Wilkes Jones, former manager of the National Corn exposition, said of James L. Reid, originator of the famous Reid's Yellow Dent corn, which is grown on more than half the farms in the Corn Belt.

Seventy-seven years ago John Reid, father of James L. Reid, who developed the famous Reid's Yellow Dent corn, in moving his family from Brown county, Ohio, to the prairies of Delevan, Illinois, brought with him several bags of seed corn. It was known as the Gordon Hopkins corn, and had a light reddish, yellow-capped kernel. His brother, Daniel, who had already settled on the prairie, asked him to bring the seed, since the corn in Central Illinois didn't produce as well as the Buckeye product.

Planted late the following spring, the corn did not fully mature. The best of it was saved for seed; but the next year the field had to be replanted with the Little Yellow, a local variety which Daniel Reid did not like so well.

Cross-pollination resulted, and today the variety which has come out of that cross is known as Reid's Yellow Dent, various strains of which are grown on more than half the farms in the Corn Belt. Credit for developing the type really belongs to the son, James L. Reid. James learned about corn early in life. At the age of nine, because of his father's illness, he had to learn to harness a team and to guide a plow. Little by little he assumed responsibility for the farm work. But he always followed the direction of his exacting father; and, being a thoughtful, ambitious lad, soon was the mainstay of the family.

He continued the corn work with enthusiasm. Each year he selected the best ears for seed. In this work he was very exacting because of his desire to develop a better ear of corn than that grown on the farm.

He gradually evolved a nice ear of corn. It was of medium size, of bright yellow color, deep, compact grains, and a small cob of lively red. Fearing that further cross-pollination would interfere with the development of the ear, he gave the neighbors on surrounding farms enough corn to plant their fields. They then quit the varieties they had been accustomed to.

Mr. Reid always gave seed to his neighbors in years of drought or immature corn. Some of these farmers were idlers, but this didn't make any difference. His crib came to be called "Joseph's Crib," by his friends.

The fame of Reid's corn spread over the county. Farmers would come to see it and would walk through the fields to make sure that the ears in the center and at the other end of the rows were just as good as those in front.

Friends urged Mr. Reid to show his corn — they believed it would win prizes. Finally he did show at a few local fairs, taking ribbons. In 1891 he was persuaded to send samples to the corn show at the Illinois State fair. Orange Judd, the famous editor, was judge, and awarded his corn the highest honor. This victory attracted general attention, and two years later two exhibits were sent to the World's Columbian exposition, at Chicago. The history of the corn was printed on cards hung above the exhibits, and it was for the first time called Reid's Yellow Dent.

From this start the corn took hold, and soon became the most popular strain in the central west. A retail seed-corn business grew out of this. It barely covered expenses the first year, the price being $1.50 a bushel. Orders piled in from all sections, and some of the grain found its way to South America, Australia, England, and South Africa.

The demand for seed increased, and Mr. Reid began to look around for a bigger farm. In 1902 he moved to a 2000-acre farm near East Lynn, in Northern Vermilion county. Here he built a large seed house in expectation of a larger trade; but, strange as it may seem, he never could make the business pay. Perhaps the reason for this was that he had too much of the artist in him. He selected all the seed corn so carefully that he seldom had over 300 to 400 bushels to sell. A better business man would have sold most of the corn crop for seed, since the average quality was very high.

But he was always a stickler for principle, and he often said:

"I will never sell for seed an ear of corn which I myself would not use on my own farm."

He would even turn down offers for especially selected seed at $5 to $10 a bushel when his price for average seed was around $2 a bushel.

The ideal ear of corn, to Mr. Reid's way of thinking, was made up of kernels set in distinct rows, 18 to 22 rows per ear. The butts and tips were well rounded, especially the butt, and the kernels deep and shapely, of medium size, gently tapering and of a bright yellow color. The shank of the ear was medium small, clean, and healthy-looking. The cob was small, of lively dark red, refined in appearance, and not coarse or chaffy. The shelled corn had an oily appearance, with long wedge-shaped kernels, having a small per cent of starch in the cap, with a full, bright, healthy germ. The indentation was smooth.

* * *

James L. Reid was an artist. He devoted his entire lifetime to developing a corn that would meet his ideal, an ideal which he never satisfied.

He could have been a rich man if he had chosen to be. He died in 1910, leaving but little property, because he never sold an ear of corn that was not good enough to plant on his own farm.

CANNERIES BUSY ON BARTLETT PEAR CROP

The Libby, McNeill & Libby's cannery, in Yakima, will be busy canning pears for two months, according to Harry Hathaiion, green fruit buyer, who says there are 300 workers daily putting up from 50 to 60 tons of Bartlett's in the cannery. The plant expects to put up better than 3000 tons of pears.

Pears are being purchased at $40 a ton, although the Libby, McNeill & Libby people say they are getting all they want at $30.

The Younglove cannery, of Sunnyside, under the management of F. C. Armstrong, opened the pear season recently with between 90 and 100 workers. The cannery makes a specialty of salad pears.

Solid packed tomatoes will also be used by the cannery, as soon as the fruit comes on the market. A large retort for cooking fruit, a new boiler and a lidding and capping machines are some of the improvements that have been made this year.

Produce Certified Wheat

Walla Walla reports indicate that there will be considerable acreage of certified wheat available in that section this fall, according to an announcement issued by County Agent W. W. Kasten. The certified seed will be sold for 10 cents a bushel above the market price.

Don't advocate giving the devil his due. You might not like your future home.

Felix will be at the opera house Saturday night.

Fair Opens Next Tuesday

The Lewiston-Clarkston Fair and Round-Up will open on next Tuesday, September 11, and reports from Lewiston indicate prospects are favorable for a good record opening. There will be a gigantic street parade and all Lewiston will be closed for the opening occasion.

The fair management has spent several months in the preparation of a program and the success of the efforts will be indicated by the public which pass into the gates on the first day. The fair management has announced its willingness to abide by the decision of the patrons and the statement is made that if good weather prevails next week the public will record the 1923 exposition as being the largest and most sucessful ever held in the Inland Empire.

A Wonderphone will be installed at the grounds so that patrons may know at all times what is happening and the results of the contests.

Attention Threshermen

WE ARE entering into the harvest season this year with a splendid stand of wheat. However, there is considerable smut and the straw will be very heavy. Both of these conditions tend to increase the chances for fire. The commonest cause of fire in a wheat field is a dust or smut explosion in the separator, usually caused by static electricity.

With this in mind, the Northwestern Mutual Fire Association has placed a fire prevention engineer in the field and has supplied its agents with a limited number of wiring sets. These sets can easily be installed on a separator by the owner. Full directions accompany each set. These are given to the threshermen free of charge, on one condition only—and that is that they be properly applied to the separator.

We now have a number of these sets and will be pleased to give them to owners of separators upon application.

Bielenberg-Schooler Post
The American Legion
Meets Each
First and Third
Wednesday at 8 P. M.

Auxilliary

The executive committee of Bielenberg-Schooler post has called a meeting of those interested in reviving the auxilliary to the local post. All those interested are urgently requested to be present at Smolt's at 8 o'clock Monday evening, September 10.

Essay Contest

Each year the American Legion conducts an essay contest for school children throughout the United States. The subject this year is "Why Should America Prohibit Immigration for Five Years?" This contest is open to the school children of private and public schools. First prize is $750, second prize, $500, and third prize, $250. There are prizes in the state—a silver medal and a bronze medal as first and second prizes, respectively. The local Legion post is offering $5 for the best essay in the Genesee district. Time is short and all children are urged to write their essay in the next two weeks. James Winegardner, Americanism officer of the Bielenberg-Schooler post, is in charge of the contest. Full details will be furnished later.

New Adjutant

Following Charles W. Smith's resignation, John J. Hasfurther was selected by the executive committee to succeed Mr. Smith as adjutant of Bielenberg-Schooler post.

Flag Rules

(Continued from last week)

3. When displayed with another flag against a wall from crossed staffs, the flag of the United States should be on the right, the Flag's own right, and its staff should be in front of the staff of the other flag.

4. When a number of flags are grouped and displayed from staffs, the Flag of the United States should be in the center at the highest point of the group.

5. When flag of states or cities or pennants of societies are flown on the same hal-yard with the Flag of the United States, the National Flag should always be at the peak. When flown from adjacent staffs the Flag of the United States should be hoisted first. No flag or pennant should be placed above or to right of the Flag of the United States.

(Continued next week)

International Road Opened

The formal opening of the Spokane-Nelson international highway, which cuts off the distance between the two cities 42 miles, was held at the international boundary line at 12:30 p. m. Wednesday, August 29. The spirit of good fellowship marked the entire celebration. Many prominent members of both the Washington State Good Roads' association and the officials of public works, of British Columbia, participated.

The road, with the exception of a small stretch near the international boundary, is in excellent condition.

The new highway will mean a great deal to Nelson, he reports, as the city has been cut off from all the surrounding country, and the new road will furnish a means of getting to the national highways.

No Substitute Offered

Say what would you think about druggists offering something "just as good" because it pays a better profit, the fact still stands that ninety-nine out of a hundred druggists recommend Chamberlain's Colic and Diarrhoea Remedy, when the best medicine for diarrhoea is asked for, and do so because they know from what their customers say of it, that it can be depended upon. For Sale at Clark's Drug Store.

CHURCH SERVICES

SEVENTH DAY ADVENTIST CHURCH
AVERY ROGERS, S. S. Supt.
Mrs. B. B. CALDWELL, M. V. leader

Sabbath school at 10 o'clock Saturday morning.

Young people's M. V. at 12 o'clock Saturday.

LUTHERAN CHURCH
A. P. WOLFF, Pastor.

English services will be held each Sunday morning at 10:30 o'clock, with the exception of the first Sunday of each month, when German services will be held at the usual hour.

Sunday school at 9:30 a. m.

FEDERATED CHURCHES
REV. JAS. PENDLETON, Minister
(Study at the Parsonage)

Church school at 9:45 a. m.

Morning worship at 11 o'clock.

Young people's meeting at 7:30 p. m.

The church service was well attended last Sunday and all who heard Miss Olson were equally delighted with her beautiful music and charming personality.

The young people's reception to new scholars of the high school has been postponed until after harvest, when more of the boys will be at school.

At the meeting of the Church school workers last Monday evening the general work of the school was carefully gone over and a nominating committee to report at the meeting in October was appointed.

A new feature of the morning service on Sunday will be a short story for the children. Next Sunday it will be "The Face On the Buffalo Nickle." Be sure and bring one to church.

Sermon subject will be, "Jesus Principles for the Labor Situation."

Office Will Be Closed

My office will be closed all next week, beginning Monday, September 10. Dr. R. I. Witty. 10-1x

PERSONAL MENTION

Chas. Scharnhorst was a Genesee visitor Monday from Clarkston.

Mrs. John Friedericks and Miss Fruth were visitors in Colton Tuesday.

Miss Ethel Nelson was a Saturday morning passenger for Spokane for a short visit.

Miss Elsie Marcks has returned to Spokane after a visit with her mother, Mrs. A. Marcks.

W. J. Davee returned to Lewiston Friday afternoon after a two-days visit here with relatives.

Miss Grace Crossett returned Tuesday evening from a few days' visit with friends at Lewiston.

Miss Esther Clark left Tuesday morning for Colton where she entered St. Scholastica's academy.

Ira Fuson returned to Spokane Saturday after spending the summer at the Chas. Spurbeck home.

Mrs. Mina Percy of Portland was a Genesee visitor the first of the week, returning home Thursday.

Orville Gillmore has returned to his home at Whitefish, Montana, after a visit at the Lloyd Spurbeck home.

Mrs. Geo. VanBuskirk and daughter, Senneth, left Saturday morning for Pullman where they will reside.

Wm. Esser arrived Tuesday from Kootenai for a short visit with friends and to look after business matters.

Miss Johanna Dwyer left Sunday morning for Troy where she will teach in one of the rural schools near there.

Mrs. Chas. Geltz and daughter, Verna, went to Lewiston Friday evening for a week-end visit with relatives.

Mr. and Mrs. F. H. Meader left Saturday morning for Los Angeles, California, where they will spend the winter months.

Mrs. J. L. Wiggins returned to Pullman Monday after an extended visit with her daughter, Mrs. C. A. Wood, and family.

Mr. and Mrs. John Cameron and baby son and Miss Lucille Crossett of near Palouse visited at the Isaac Isaksen home Monday.

Dick Vandenburg returned to Spokane Monday afternoon after an over-Sunday visit with his parents, Mr. and Mrs. John Vandenburg.

Mr. and Mrs. Walter Bumpass returned to their home at Harrington, Washington, after a week-end visit at the G. A. Bumpass home.

Miss Mary Cullwell returned to her home at Summers, Montana, the first of the week after a visit with her sister, Mrs. Joe Tobin, and family.

Mrs. W. H. Cook and children returned to their home at Boise after an extended visit with Mrs. Cook's parents, Mr. and Mrs. G. A. Bumpass.

Mrs. Thos. Herman and children returned from a ten-weeks visit with relatives at Humboldt, Nebraska, and other points. Mr. Herman met them in Spokane and returned home with them.

Mrs. Laura Taber returned home to Boise Tuesday, going via Lewiston, after a visit with her sister, Mrs. Robt. Emmett, and family. Mr. and Mrs. Emmett accompanied her as far as Lewiston.

Mrs. John Bramlett returned to her home at Lapwai Friday after a visit with her daughter, Mrs. Arthur Springer, and family. Mrs. Springer accompanied her to Lewiston and spent the day.

Mrs. J. E. Moore and daughter, Norma, were Genesee visitors Friday from Moscow. They took Mrs. Woodward and her daughters back with them. The Woodward family intend to make their home there in the future.

Paul G. Freeman of Yoncalla, Oregon was a business visitor in Genesee this week, leaving for his home on Thursday. Mr. Freeman is very in love with the Genesee section and may return and make this part of the country his home.

F. W. Loncosty arrived home from Dempsey (Shelby), Montana, Saturday, where he has spent the past few months. He states that all the town needs now is an undertaker, the one that was there having fled for fear he might be one of the unfortunates.

Mr. and Mrs. B. H. Jutte left Saturday morning for an extended trip east. They will visit relatives of Mrs. Jutte at Boston. They will also visit New York, Washington, D. C., and many other eastern points of interest returning via Ohio for a visit with Mr. Jutte's relatives.

Mr. and Mrs. F. J. Niemann and son, Fritzie, returned Tuesday morning from a short trip to Harrison, St. Maries, and other places in that section of the country. Mr. Niemann says the roads are fine as far as Tekoa, but from there on, and most of the way back via Bovill, they are simply— Well, they are quite rough.

Felix will be at the opera house Saturday night.

To know how good a cigarette really can be made you must try a

Farmer Not Ruined

We are constantly being shown the dark side of the agricultural situation, with almost never an admission of the possibility for a brighter future. As the Breeders Gazette points out, "Many alleged political friends and other well-paid misleaders of farmers are accustomed, in their verbal and printed pronouncements, to refer to agriculture as a 'ruined industry.' They would have their hearers and readers believe that the present depression is infallibly symptomatic of a deep-seated economic disease which foredooms the ruination of the farming industry."

The same editorial further states: "Any one who is temperamentally inclined toward pessimism can find plenty of woe to feed upon in the agricultural industry, as well as in any other. There is, however, an abundance of hope-inspiring food upon which the critical and informed optimist may feed. It is he—not the pessimist—who declares that calamity has not conquered man; it has made him victorious. The pains which precede ruination or death; they are the organic pangs which accompany the birth of a healthier and stronger farming industry, better equipped than the old to meet new conditions. Agriculture has been 'ruined' on paper and platforms."

Ladies' Caravan Visits Genesee

Some 10 cars containing ladies advertising Colfax's big annual "round-up," La La Palouser, passed through Genesee last Friday afternoon. They had been to Lewiston and other points advertising their big show—and from the amount of noise made and the attention attracted, the show will be a big one. Leave it to the ladies every time.

In Real Estate Business

James Tobin, formerly of Genesee, has embarked in the real estate business at Lewiston with D. H. McGrath under the firm name of McGrath & Co., and will do a general sale, exchange and rental business. Their place of business is 920 Main street and Mr. Tobin will be glad to welcome all Genesee friends to his place of business.

Sold Below Cost

A few pairs of hose left at $1 and $1.25. Aprons and dresses to go below cost. Want to close them out to make room for my fall goods, which will arrive about October 1. Orders filled promptly. Phone 78-1.

HENS WORTH AS MUCH AS HOGS

Poultry Worth Half As Much As Wheat—Turns Waste Into Profit.

In the United States, in 1920, there were 360,000,000 chickens. They produced 1,656,000,000 dozen eggs. The chickens and eggs sold, during the year 1919, brought $1,048,000,000. This was 39 per cent of the total value of all livestock products.

Poultry is worth one-third as much as corn, half as much as wheat, as much as cotton and more than oats. It falls only a little short of being worth as much as hogs.

Ninety per cent of this billion dollars goes to farmers or, rather, to farmers' wives. These good wives spend it for groceries, clothing, lights, washing machines, rugs, pictures, books, phonographs. Take the poultry money out of farm community and the country town merchants would wonder what happened to their business.

Poultry turns waste into profit—waste grain, grass, weed seed, insects and scraps from the table and garden.

A farm without some poultry, a garden, and a little fruit is not a real farm. When farm business is good the poultry and garden products more more than feed the family and leave the money crop clear profit; when farm business is bad, they feed the family and save the day.

Sunflower Seeds.

If the hens are not accustomed to sunflower seeds they will at first refuse them. If so, give them nothing else until they eat them. Do not feed the seeds every day; twice a week is sufficient. The difficulty is in separating the seeds from the heads.

To do this, hang them in a dry place until they are thoroughly cured, then place them on the barn floor and flail them, when they will easily fall off. They may be ground if preferred, and the meal fed in the soft food. The mistake made with sunflower seeds is in feeding them too often, as they are laxative.—Western Fruit.

Plenty of fresh water should always be accessible to the hens. If supplied irregularly they are likely to drink too much at a time. It should not be exposed to the sun's rays in summer or be allowed to freeze in winter if this can be avoided. In very frosty weather it is often worth while to give them slightly warmed water two or three times a day rather than permit them to drink water at the freezing point. A flock of 50 hens in good laying condition will require 4 to 6 quarts of water a day.

Tomatoes Stuffed With Corn.

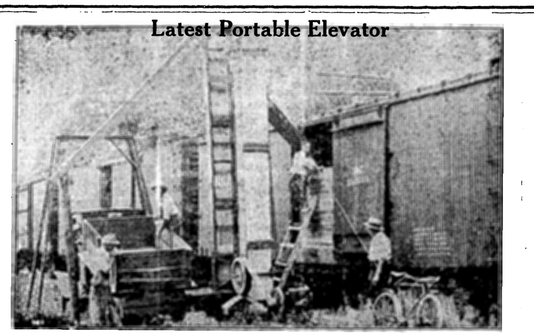
Wipe six medium sized tomatoes. Remove seeds and pulp, fill with a corn filling made as follows:

Take 1-2 green pepper cut in pieces, chopped onion and fry in pan with about 2 teaspoons butter until onion begins to brown. Add about 2 tablespoons flour and 1-2 cup milk, and stir until it boils. Add seasoning and corn, any of the seasonings may be omitted.

Sprinkle the tomato with buttered crumbs and bake in a hot oven until tomatoes are soft, being careful they do not lose their shape. Serve on rounds of buttered toast.

Cull the flock, for boarders who don't pay are expensive.

Latest Portable Elevator



Copyright by Underwood & Underwood, N. Y.

This photo shows the portable elevator used by the up-to-date farmers on the lines of the Rock Island railroad to load their wheat into the cars.

The farmers are doing everything they can to reduce the handling price of their crop since wheat has gone below a dollar.

TIMELY HINTS TO FARMERS

Agricultural Engineering. — Drainage may be placed in seepy hillsides to advantage during the dry weather.

Apiculture.—Treat diseased colonies, and take care not to expose contaminated material.

Clothing.—A fabric foundation pattern of inexpensive material, made from a correctly altered commercial pattern is a great time-saver.

Dairy.—When you buy dairy cattle, buy them subject to a sixty-day or ninety-day re-test for tuberculosis.

Farm Crops.—Since you have picked out the best wheat in your field for seed, thresh it separately after the machine has been thoroughly cleaned.

Farm Management. — The stubble may be profitable on your farm for pasturing. Figure if you can make something off of this material.

Livestock. — Rotate your pasture, keeping your lambs and pigs on fresh feed and ahead of stomach and intestinal parasites.

Plant Pathology.—Rogue seed potato fields every week or ten days in order to eliminate Mosaic and other diseases from the seed for 1924.

Poultry. — Make the laying house bright, airy and attractive for the young pullet. If you don't she may get the blues and refuse to lay.

Horticulture. — Attend the orchard tours if your county or community has one. Visit some of the best orchards and berry fields and learn how the other fellow does it.

NEW MARKETING BULLETIN

Realizing that the proper solution of the farmers' marketing problem is one of the biggest things facing the American farmer, the extension service of the Washington State college is giving real service in this direction, and has issued a bulletin on the subject: Extension Bulletin No. 102, entitled "How We Help Farm Marketing."

It is admirably written, is brief and to the point. Any busy farmer can find time necessary to read it. The following are among the points covered: Assembling; sorting; storing; packaging; processing; financing and shipping.

WHY BEES SWARM

Why bees swarm, says Dallas Lore Sharp in the September issue of Harper's magazine, "is a question as old as bee-keeping. If the bees followed an invariable rule in swarming we could soon discover why; but there are no rules, no laws, no fixed conditions, no two swarming cases exactly the same. You can tell when, if you watch, the question of why do they swarm goes still unanswered.

"The most obvious reason would seem to be the overcrowding of the hive; when the hive boils over with bees they naturally boil out as a swarm. Sometimes they naturally do, and sometimes they naturally do not. I have had them boil over and stick like pitch to the front of the hive all through the honey flow. Lack of ventilation is another popular explanation: hives with small doorways, when unshaded in a July sun, become intolerably hot, and naturally the bees swarm out. And, as naturally again, they stay in and store honey all summer. That ancient rhyme,

> "'A fly is a fly because he flies,
> A flea is a flea because he flees,
> But a bee is a bee because she bees,'

is almost final in questions touching the ultimate things of life and bees. A colony of bees. A colony of bees is perhaps the best regulated society known, and yet, among the honey bees, as nowhere else in nature, the very spirit of Caprice seems to rule."

NEW TYPE OF SULPHUR SPRAY.

A new type of sulphur spray is being tested out on an extensive scale this summer in Oregon. The merits of the new spray lie in its non-caustic property and greater ease of mixing and application. Its control efficiency for peach rot is to be determined by co-operate tests between the experiment station and a large number of peach growers.

Grasshopper Outbreak Checked.

A serious outbreak of grasshoppers near Newport, Wash., was prevented by opportune poisoning with the bran mash. Some 25 farmers in the district which was threatened co-operated with the county in spreading poison when the insects were quite young. The farmers reported that three-fourth of the young grasshoppers were killed with the first application. It is thought that the outbreak would have been as serious as some of the sections in Montana, if it had not been checked in time.

Bee Disease Reduced 15 Per Cent.

As the result of a recent survey and inspection trip made in Whatcom county, it was found there was only 7.6 per cent of diseased colonies of bees. In 1921 there was 40 per cent of Foul brood disease in the county, while last year it showed 22 per cent. Constant work under the direction of B. A. Slocum, extension bee specialist co-operating with the beekeepers of the county have reduced the amount of disease.

American cheese is mighty good cheese;
Cheddar is the rage.
The French make a good fro-mage,
But the Swiss is strong from-age.
—Arkansas Legionnaire.

Alice for the first time saw a cat carrying a kitten by the nape of its neck.

"You ain't fit to be a mother," she cried scathingly. "You ain't hardly fit to be a father!"

"George, you weren't listening to what I said."

"Er—what makes you think that, my love?"

"I asked you if you could let me have $75 and you smiled and said, 'Yes, dearest.'"—O. B. Bulletin.

Trying Out Effect of Topped Strawberries.

A number of farmers near South Bend are working under the direction of M. D. Armstrong, extension specialist in horticulture on the practice of topping their berry bushes immediately after the strawberries have finished yielding. Careful checks have been made on bushes not topped last year with those topped and figures will be given out later if there is an increase in the yield. It is believed by the best strawberry growers that it pays to top the berry bushes as soon as they are through bearing.

Advertise farm products, but produce the goods first.

First Airplane Golf Match

Copyright by Underwood & Underwood, N. Y.

NEWS ITEM:—An airplane golf match was played successfully at the Olympia Country Club in Chicago, which was said to be the first of its kind ever staged.

Carrying eighteen golf balls, nine marked with green ribbons and the other nine by red streamers, the plane took off along the fourth fairway. The pilot then endeavored to drop the ball as near the cup as possible. After he had made his "drive," the referee substituted a regular ball for the one dropped and the players on each side of the team would hole out.

Better Health Service

Public Health Is Public Wealth.

These Articles Compiled by the Public Health League of Washington

HEALTH INSPECTION IN SCHOOLS

Physical inspection of school children should not be regarded as purely a medical question. It is as much an education subject as the teaching of arithmetic. The educator and the physician join hands to insure for each child a maximum of health and vitality. Without this the child is unable to take advantage of and receive the benefits to be derived from the teacher's efforts.

Medical inspection in the United States originated in Boston in 1894. When other cities saw the benefits to be derived from the successful operation of the plan instituted by the Boston school authorities, it was adopted by them and has grown constantly because of the immense benefit it has brought to the children in health, happiness and education, of which many of them would have been deprived had there been no such examinations. This sudden recognition of the imperative necessity for safeguarding the physical welfare of school children grew out of the discovery that compulsory education, under modern city conditions, meant compulsory disease. The health authorities recognize the fact that the schools, unless carefully guarded, will become centers of infection. Those interested in the schools are gradually understanding what it means to have sound professional advice as to whether or not there are any defects that should and could be corrected.

The common defects found among school children are eye, ear, nose, throat and teeth defects. Deformities of various kinds are met with which, if taken early, can be corrected. In the state of Washington goiter is very prevalent and certain forms of this disease are not noticeable to the untrained eye, and if unrecognized it may be a very serious matter to the child in later life.

It has been said that public schools are a public trust. I know of nothing in public life so much so, and every effort must be made to secure for the child a full security while in the schools—as full a security as he would have in his own home. Of what use is an education without health? We could well afford to sacrifice the child's education rather than his health.

A survey made just previous to the world war showed that health protection in the schools was in successful operation and had been for many years in the countries named below:

France began as early as 1833, when it recognized the importance of inspection of the school buildings. Just before the war there were more than 300 physicians inspecting the school children in Paris alone. In Germany, medical inspection started in 1867 and in 1912 there were more than 1600 physicians employed as medical inspectors. In Great Britain inspection began in 1891; in Belgium in 1874; in Norway in 1895; in Sweden in 1863; in Denmark in 1896; in Russia in 1871; in Austria in 1873; in Bulgaria in 1899; in Japan in 1898; in Australia in 1906, and in Canada in 1906. In the United States we did not start until 1894, but since then we have progressed rapidly until now all important cities have medical inspection and this has extended into the country districts where there are a great number of county visiting nurses.

The school nurses are of the greatest importance in connection with school medical inspection. They are able to reach the home in a very satisfactory way and by so doing bring the benefits intended for the child from the school into the home, thus correcting unhealthy home environmental conditions that affect the child's school progress. School health inspection is not and can not be a complete success unless there be a hearty co-operation on the part of the principal and teacher, particularly in this true in connection with contagious diseases. In the school of the future, compulsory education will involve compulsory health.

Mouth breathing means adenoids. Adenoids mean a slow intellect. A throat culture in time saves nine weeks of diphtheria. Strong children must have straight backs. Dental treatment costs less than the extra schooling bad teeth necessitate. Each missing tooth renders useless the corresponding tooth. Ten per cent of our children suffer from malnutrition.

Mice Have Hard Life in Yakima.

Mice have had a hard time to live on many of the farms in the Yakima district, according to a recent survey upon the work being done in the county for their destruction. Six hundred and forty-four orchardists co-operated in a drive to eliminate this rodent. In this campaign directed by County Agent A. E. Lovett, 22,000 pounds of poisoned grain were used on 10,000 acres of land. To poison this grain it requires 1000 pound sot strychnine. It is estimated by the orchardists themselves that the campaign saved them not less than $100,000. One man reported if it had not been for the poison he would have lost 4800 trees, as the mice had a good start.

This is the vegetable season, make the best use of it, for they contain many essential elements of sport.

Pretty Is, As Pretty Does

Did you know that pretty boys develop into the best athletes?

Golden curls and delicate features, supposedly the earmarks of a "sissy" with Young America, are often indications of great athletic ability, according to Teddy Hayes, Jack Dempsey's trainer, who is recognized as one of the foremost athletic authorities in the world.

No more need the little Lord Fauntleroys hesitate to leave their protectionist, a brilliant scholar, a national screen favorite, an acquatic marvel and a wonderful little athlete. Richard has for the past two years been the juvenile swimming champion of the Pacific coast, possessing a number of medals for his prowess in the water and holding a life-saving record for having rescued a 240-pound man in a Red Cross exhibition meet.

"While athletic achievements is principally a matter of consistent training, I believe that if there is such a thing as a gift for physical development it lies with the more attractive children," says the maker of champions. "I have found through experience that the so-called 'pretty' boys make the most dangerous men in the prize ring. And after all, isn't it natural that a person with perfect facial features should also have perfect muscular and organic development?"

ing doorways because of the Shrimp Flynns of the neighborhood for, says Hayes, the good-looking boy is instinctively an athlete and a fighter if he will just give himself a chance.

A good example of his theory is found in Richard Headrick, diminutive movie star, whom Teddy proclaims a perfect specimen of boyhood. A beautiful, almost angelic-looking child, at the age of five he is a talented vio-

STATE DEPARTMENT HELPS WITH FAIR

Department of Agriculture Working on Annual Yakima Exhibition.

In addition to all of the other work which devolves upon it, every division of the state department of agriculture is now doing its full part toward making of the state fair which is held at Yakima, an even greater success than the previous fairs. The department does take a little pride in the fact that so far each successive fair has been an improvement over the preceding one in every way, in extent and variety of exhibits, in the extent and the character of the amusement features offered to the public and in the figures for attendance.

The last is after all, one of the more important features, for it is on the gate receipts that the state fair is compeled to rely for the money with which to finance it. The state appropriations for the support of the fair will do no more than pay the greater part of the cost of the premiums awarded exhibitors. All other expenses have to be met by the earnings of the fair.

So far the earnings and the expenditures have kept a nice balance, with no deficits with which to go back to the legislature. It is the earnest hope of the department that the same result will follow this year. The fair will be the best ever held; the amusement features far better than ever before. It is up to the public to determine what the financial returns will be. That is a matter which depends entirely upon the public attendance at the fair.

The council and the county commissioners will cooperate with the federal government in stamping out bovine tuberculosis at Dayton. The government will send a specialist there to make tests and it is the plan to examine all cattle in the county. Those found diseased will be disposed of and the owners reimbursed at their appraised value. The city and county will provide the government expert an assistant. The work will begin early in September.

Down the Dumb-waiter Shaft

By FREDERICK HART.

© 1921, by McClure Newspaper Syndicate.

"Oh, I think gus stoves are the meanest things!"

Tears stood in pretty Mary Davis' eyes. She had had little enough trouble in her life in the Belladonna apartments, but the gas stove seemed always to be a thing endowed with a malignant, devilish spirit that defied her, try as she would to regulate it. And now, when she had such a nice supper ready to prepare, the thing wouldn't work. It either refused to light at all or exploded with a vicious bang that frightened Mary nearly to death. She stamped her foot.

"I hope you blow up and—and smash yourself to pieces!" she cried, addressing the inanimate cause of her troubles. She knew that it was no good appealing to the janitor—that worthy lurked low in a den where only the boldest tenant dared trend, and Mary had no desire to meet him in argument. She wiped her eyes.

"If I only knew something about stoves," she wailed aloud. "But I don't, and I can't cook any supper, and —and——"

She sank on the bed and gave herself to tears.

A knock on her door startled her. She sprang to her feet, hastily dabbed at her eyes, and opened the door: In the hall stood a young man, diffident, yet smiling.

"I believe you have something wrong with your gas stove," he began.

"Oh, I have—indeed I have! Are you a——" She paused, not sure of the name for men who repaired gas stoves. The young man took her up.

"I'm not—that is to say, I'm not a regular gas-stove expert," he said. "But I've lived in apartments long enough to know something about their little habits and tricks. And I thought I might fix yours." He had entered as he spoke, and Mary looked at him for the first time in clear light. He was handsome, she decided at once, and he had nice eyes and an engaging smile. And surely he had come as opportunely as an angel from heaven!

"There it is," she said, pointing out the horrid object. "I can't do anything with it."

The young man approached the stove without a tremor, as one who has no fear. He twiddled its valves with contemptuous familiarity, trying to light it once or twice. Then he reached into his pocket, extracted a pair of pliers and loosened a jolt or two, poking into pipes with a matchstick. At last he straightened himself.

"I think it'll work all right now," he said. "Let me try it. Have you a match?"

He turned the valve, struck the match she had given him and applied the fire to the burner. A little "pop!" sounded, and the clear blue flame of a perfectly functioning gas range rewarded him. Mary gave a little cry of joy.

"Oh, you are clever!" she cried. "It's all right now, isn't it?" How can I ever thank you?" A chilling thought entered her mind. "Do I—how much is it—does it cost?"

The young man straightened his back, cramped from stooping.

"Well, there's no charge. But if you could let a bit of salt to spare you might let me borrow a pinch," he replied. "I haven't a scrap of salt in my place."

"Of course I'll let you have the salt," she said, hurrying to open a paper bag. "But I wish you'd let me give you something for your trouble."

"It wasn't any trouble—it was a pleasure," replied the young man, and bowed. And then he kept on bowing farther and farther, till he tumbled to the floor and lay still.

Mary kept her head; got water and dabbed it on his forehead and laid him in as easy position. And then she saw what she had not noticed before—that his face was pinched and white and his cheeks were hollow.

At last he opened his eyes.

"I'm—I'm dreadfully sorry!" he stammered. "I don't know what was the matter with me—I just sort of fainted, I guess—I'll go now——"

"You'll do nothing of the sort. Tell me, how long is it since you've eaten?"

"Two days," confessed the young man. "I have a job that will pay me well, but I don't go to work till tomorrow, and I've been living all this week on a loaf of bread. That's what I wanted the salt for—it makes you thirsty and then you drink a lot of water, and then you don't feel so empty."

Mary's hands were flying among the packages.

"You're going to stay and have supper with me," she said calmly. "If it hadn't been for you I wouldn't have been able to cook anything. Now you sit down and let me tend to my cooking."

He obeyed, and as she prepared the meat he told her his story—how he had tried to draw and had struggled on, his money getting lower and lower, till at last he had landed the splendid position that had come almost too late—how pride had prevented his asking for an advance, and he had set himself to sticking it out till he should be paid.

"You're an awful idiot," observed Mary. "But you are the nicest idiot. And tell me——" she remembered at last his opportune appearance.

"My door on the dumbwaiter shaft was open and I heard you," he confessed. "I thought you wouldn't mind if I helped you."

"I should say I didn't mind!" said Mary. "And I'm glad for your sake that you came up. You might have starved to death!"

"I won't starve now," remarked the young man as he attacked the food. "And I—I want to see you again—when I have my job and can pay you back."

Mary blushed. "You can see me again if you want to," she said. "But don't starve yourself for an excuse. You won't need to, you see."

"I see!" cried the young man joyously.

And he evidently did; for it was not many months till he had asked Mary a certain question which had a great deal to do with eating—at the same table; and the answer seemed to be such as to remove fear of starvation—either of the body or of the heart—entirely from him.

PURITAN HUSBAND MALIGNED

There Is Strong Proof That He Was Not Lacking in Sentimentality.

Did those Puritan husbands lack charm or devotion to their women? I find that theory had to reconcile with the fact that so many of them had three wives, writes Stuart P. Sherman in the Atlantic.

Most of us modern men feel that we have charm enough if we can obtain and retain one, now that higher education of women has made them so exacting in their standards and so expensive to maintain.

Now Cotton Mather had three wives, and when he was forty or so, in the short interim between No. 2 and No. 3, he received a proposal of marriage from a girl of twenty, who was, he thought, the wittiest and prettiest girl in the colony. I concluded inevitably that there was something very attractive in Cotton Mather. Call it charm; call it what you will; he possessed that which the Ladies' Home Journal would describe as "What women desire in men."

As a further illustration of the "sullen gloom of their domestic habits," take the case of John Winthrop, the pious Puritan governor of Massachusetts. After a truly religious courtship, he married his wife, about 1618, against the wishes of her friends. We have some letters of the early years of their life together in which he addresses her as "My dear wife," "My sweet wife," and "My dear wife, my chief joy of this world." Well, that is nothing; at first, we all do that.

But ten years later Winthrop prepared to visit New England, without his family, to found a colony. While waiting for his ship to sail, he writes still to his wife, by every possible messenger, merely to tell her that she is his chief joy in all the world; and before he leaves England he arranges with her that, as long as he is away, every week on Tuesday and Friday at five o'clock he and she will think of each other wherever they are, and commune in spirit.

When she has been married ten or twelve years, that is more extraordinary. It shows, I think, romantic feeling equal to that in "Miss Lulu Bett" or "Poor White" or "Moon Calf."

PUYALLUP FAIR TO BE ENTIRELY ROOFED OVER

Western Washington Event Will Maintain Schedule—All Under Cover but Race Track

Although only once in the past five years has there been any considerable rain fall during the first week in October and not once has the Western Washington Fair program been seriously interfered with, the directors of this great annual event in the Puget Sound district, are going right ahead with their plans which when completed mean that the entire institution, excepting the race track will be under cover.

They have very nearly completed this already, for when the debris left by the workmen now engaged in remodeling and enlarging buildings has been cleared away it will be possible for visitors to make the complete round of the exhibits, livestock, agricultural, horticultural, educational, automobile, merchants, manufacturer's and women's, from the starting point at the main gate, in either direction, and back again, without being exposed to the weather for more than two minutes. But two very short gaps will remain.

What is more, the visitors need not all take the same paths in order to be protected. They may, and undoubtedly will, whether it is raining or shining, so distribute themselves through various aisles and buildings that congestion at any point is practically impossible. And if tired of walking and looking they may rest both feet and eyes at any one of a dozen places provided, or seat themselves in the grandstand under cover, and laugh at the rain.

It rained one day during the fair week at Puyallup a few years ago and for twelve months afterwards President Paulhamus and his associates kept reminding each other of what might of happened to their program had that rain continued. Meanwhile a big crew of carpenters were at work and when it was found that there wasn't money enough to put roofs on the buildings started and the situation might be serious if it should rain, they purchased or borrowed great quantities of canvas and threw those over the rafters.

It did not rain at all that year and there were those who were inclined to ridicule the directors for their rather lavish expenditures for protection. Mr. Paulhamus was heard to say one day that he "almost wished it would rain a little so that my fellows would understand why we had to spend this money." It hasn't rained to amount to anything during the fair week any year since, but nevertheless provisions against rain has gone steadily forward. Those canvas roofs, or a majority of them, have been built in permanent form, gaps have been closed, great quantities of cinders—100 carloads will be used this year—have been hauled in and laid along the main lines of traffic, concrete floors have been put in the buildings, and now, with the assurance that there will be a "Fair Today, Rain or Shine" the directors and everybody who knows what the situation is are giving thought to other things than the weather.

"Do you carry any rain insurance?" President W. H. Paulhamus was asked a few days ago and he replied quickly.

"Yes, the only rain insurance that's any good; we've got the fair under cover."

THE CABBAGE PIT.

Fresh cabbage is a valuable addition to the diet during the winter months and every farm garden should grow a supply for winter storage.

A cool, well ventilated, outdoor cellar with shelves about the sides makes an excellent place to keep the heads which are cut from the stalks and placed so they do not touch.

Cabbage will also keep well in pits, piled with the roots up. These pits are constructed much the samo as for potatoes. One of the best and easiest methods of storing cabbage is to pull and place the heads in a long pit with the heads down. The heads are set as close together as they will stand, but are not piled up. For cabbage, the pit is best built on top of the ground, the earth being well rounded up over the cabbage, to a depth of two or three inches so none of the roots show. When stored in this manner, heads can be dug out from the end of the pile without disturbing the rest.

Good drainage is essential and in Western Washington a board covering will help keep the pit from becoming saturated with water. Before storing, keep the cabbage growing until a firm head is formed, but store them before they begin to crack.

NATIONAL HIGHWAYS

Newspaper Association Member No. 2350

The Genesee News has accepted a Newspaper Association Membership in the National Highways Association (Washington, D. C.), with which are affiliated two hundred and two road associations and organizations. It stands, not for any particular road, but for "good roads everywhere," through the establishment of National highways.

The "map device" at the head of this column expresses our interest in roads, your interest in roads. It is the symbol of an association which for twelve years has worked faithfully and hard for the dissemination of road information, which has published thousands of maps, and millions of pamphlets, in the interest of good roads, and which believes that the future civilization of this great country will go forward as fast and no faster than we develop our systems of transportation.

The motor and motor truck have come to stay. The farmer of twenty years ago on an isolated mud-wallow, miscalled a road, who today lives near a hard surface road and drives his car to town and back in an hour where formerly he required a day, knows what roads and cars mean to him. Good roads mean prosperity; they mean progress; they mean education; they mean a full life, worth living; they mean the greatest amount of goods purchased for the least amount of haulage; they mean greater profits from farm produce because they cost less to haul over good roads.

Good roads everywhere mean prosperity and happiness everywhere.

That is why we have become a Newspaper Association member of the association which will eventually produce "good roads everywhere!"

Is Gas Tax "Painless?"

A set of tires costing one hundred and fifty dollars may run for ten thousand miles on average roads. The same set will run double the mileage on improved highways. The average car travels ten thousand miles per year. Therefore, the average tire cost, supposing average size and quality of tires are purchased, is $150 per year on dirt roads and $75 on fine roads.

Ten thousand miles of running, at an average of 15 miles to the gallon, requires 666 2-3 gallons of gas. If gas is taxed 2 cents a gallon, the average runner of ten thousand miles pays $13.33 per year in gas tax. In a state where there are 100,000 automobiles (which is less than the average, California, for instance, has about a million), the net income from the gas tax above outlined, would be $1,333,000.

At twenty-five thousand dollars per mile, that sum will build fifty-three miles of improved highway. If there are a million cars, five hundred and thirty miles of improved highways could be built a year from the tax.

If the tax was 4 cents, 1060 miles a year, respectively, could be built.

Where the roads are unimproved, the 100,000 car owners spend $7,500,000 a year on tires, which they otherwise would save. The million car owners would spend $75,000,000 on tires they otherwise would save.

Proponents of the argument say that a tax on gasoline, spent on roads is the one and only "painless tax."

Road Should Be Finished

A small dog barking loudly, chased madly after a passing express train un a country railroad station platform.

"What makes him run after it?" asked a traveler of the station agent, owner of the dog.

"I dunno," answered the agent, thoughtfully, "but that never bothered me so much as what will he do with it if he ever catches it!"

There are many communities which talk loudly about the need of good roads, the value of good roads, the use of good roads. They talk themselves into a bond issue, or a road tax, and build, one, two, ten miles of good roads. Too often these miles either begin anywhere, or end anywhere; do not connect with any good road at either end. Travelers wonder what they will do with their good roads now they have caught them?

There is no magic in a few miles of paved highways. The farmer who must haul produce through mud to get to a paved highway, and over ruts and stones after leaving it to get to market, experiences no real economy. The economy and benefit of improved highways comes when they are improved for all their length. A chain is no stronger than its weakest link. A regiment is no faster than its slowest soldier. A road, for economy of horse flesh or motor copacity is no more economical than its worst mile.

The North and South highway, which has many unfinished stretches, should be finished as soon as possible, and such recommendation has been made by Governor C. C. Moore.

A Pronounced Success

The uniform success that has attended the use of Chamberlain's Colic and Diarrhoea Remedy in the relief and cure of bowel complaints, both for children and adults, has brought it into almost universal use, so that it is practically without a rival and as everyone who has used it knows, it is without an equal. For Sale at Clark's Drug Store.

Heavy Crop Field Peas

Forty threshing machines running full blast in the Fairfield district give forceful denial to the reports that the recent rains did great damage to the pea crop of that section, according to O. E. Moss, cashier of the Bank of Spokane, who was a business visitor in Spokane recently.

"The crop is running ahead of expectations," said Mr. Moss. "The seed company's representatives, who buy the crop, put in the sacks they supposed would handle the yield this year. Since then, they have had to buy a great many additional sacks, while they estimated the crop at from 35 to 40 bushels to the acre, and it is running from 45 to 50 bushels in many instances."

Better Beware

Be warry of the young lady who is sad and dispirited. It may only be a means to the end.

Read the ads.—keep posted.

MICKIE SAYS—

Urges Veterans to Reinstate

As time passes since the World War, ex-service men of this district realize more and more the value of government insurance, judging from the reinstatement of war insurance policies during the last 12 months, L. C. Jesseph, Seattle, northwest district manager of the United States Veterans' Bureau, announced.

A total of 823 war veterans of Washington, Oregon and Idaho had $3,870,000 of war risk insurance reinstated during the year and $2,412,000 of term insurance was converted into permanent forms of government insurance, it was stated. This is an increase of nearly $100,000 of reinstated insurance over the preceding year.

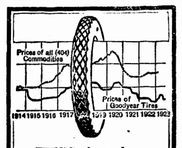
There are still many ex-service people who have failed to take advantage of the opportunity offered by the government to renew their war insurance no matter how long premium payments have lapsed, Mr. Jesseph declared. He urged that all war veterans reinstate their war insurance policies at an early date. Insurance cashiers have been stationed at the Veterans' Bureau offices of Seattle, Portland and Spokane.

Ideal Harvest Weather

The Genesee section is at this time experiencing ideal harvest weather, and the farmers are taking advantage of every minute of it. Machines may be heard in every direction from early morning until late at night, and while the yield is not any better than it should be, yet warehousemen say there are a number of 50-bushel fields—which is not so bad.

Issued Special Edition

The Lewiston Banner of date of August 31, was of 12 pages, most of the reading matter in which was devoted to the Lewiston-Clarkston Fair and Round-Up. It also carried a large amount of advertising of Lewiston merchants. Altogether it was a very creditable paper and was well gotten up, both editorially and typographically.



THIS chart demonstrates that you get more quality for less money when you buy Goodyear Tires. Goodyears sell today for 37% less than in 1920; 30% less than in 1914. And their quality has been steadily improved; their superiority is beyond question. This is a good time to buy Goodyears.

As Goodyear Service Station Dealers we sell and recommend the new Goodyear Cords with the bonded All-Weather Tread and back them up with standard Goodyear Service

THE GENESEE NEWS

VOL. XXXV — GENESEE, LATAH COUNTY, IDAHO, FRIDAY, SEPTEMBER 14, 1923. — NO. 11

OWNERSHIP OF CROP PROBABLY IN COURT

As to who is entitled to the grain grown on the ranch of James M. and Clarence Davis, in the Rimrock section of Nez Perce county, which at this time is a much mooted question, in all probility Judge Wallace N. Scales, presiding judge in the district court of this county, will have to determine, as the way it looks at this time the case will eventually land there.

On last Monday R. M. Ryan caused a warrant for battery to be issued against John Roach, and yesterday Mr. Roach caused warrants to be issued against and arrests made of James Garrett, R. B. Hibbs, James West and R. M. Ryan, alleging that on Sept. 4 these men threatened to enter upon certain premises belonging to the Davis brothers, alleging this land to be under control of himself, and remove certain grain, sacks and other property then under the control of Mr. Roach.

It would seem that the four men for whom warrants had been issued had learned of the fact Wednesday night and came at once to Lewiston. They waited here, according to their attorneys, Lee McCarty and Miles S. Johnson, until noon yesterday and then started on their return to the ranch. While here they called the sheriff's office, it was stated last night, but no arrests were made. Meanwhile Sheriff George Walker and Deputy Charles L. Monroe were on their way to the ranch, leaving here about 7 o'clock in the morning. Upon arriving they found Mr. Roach but not the men for whom they had peace warrants.

The officers started to return about the time the four men named in the warrants were leaving Lewiston, and all met half way up the Lewiston hill. With the exception of Mr. Garrett, who was named merely on account of being hired to haul sacks, the men returned to Lewiston with the sheriff and his deputy. They appeared at the probate court during the noon hour, and when they later presented themselves Judge C. A. Woelflen notified them that the cases had been dismissed by County Attorney Phillips.

It developed that Messrs. Hibbs, West and Garrett had been hired by Mr. Ryan to work on the ranch, he himself finding it impossible to be there much of the time owing to his business at Colfax.

The controversy between Mr. Ryan and Mr. Roach covers a large quantity of grain that is ready to be threshed on the Davis brothers' ranch. Mr. Ryan's attorneys state that their client purchased the seed, employed men to sow it, caused war to be declared on the squirrels and other rodents injurious to crops, and in other ways brought about an improved condition, and that he was putting in the crop last fall no attempt was made to stop him. Davis brothers filed a suit in the district court in this county to quiet title to the property, this now pending, and later Mr. Ryan filed a cross-complaint alleging ownership to the crop. Mr. Roach farms an adjoining piece of land to that upon which the crop now in controversy is growing.

The reason for Mr. Ryan being barred by Mr. Roach from having the grain threshed is that the former claims that Davis brothers are the owners of the grain, and that he is watching after their interests at the request of the brothers, who are said to reside at Pullman.—Lewiston Tribune.

Parent-Teachers Meeting

The first parent-teachers meeting of the fall will be held in the assembly room of the public school on Monday evening, commencing promptly at 7:30 o'clock, and all parents and patrons of the school are urged to be present.

From 7:30 to 8 o'clock there will be a reception to the public school teachers, after which Hon. Burton L. French will deliver a lecture on "Alaska." Mr. French has recently returned from our northern possession and will undoubtedly have something interesting to say regarding that part of the country.

Make arrangements to be there at 7:30, shrarp.

Puttin' One Over on Him

A country man and his wife, who had just come to the city, went into a restaurant. They sat down at the nearest table and had been waiting for quite a while, when the manager came over and said, "Pardon me, but this is a self-serving cafeteria. You'll have to serve yourself." Her husband, muttering to himself, arose and served the table, and when the meal was almost finished, he whispered to his wife, "Mary, I'll tell you what let's do. Let's slip out without washing the dishes."

Competition

"I will go fourth today, along the streets of my capital, and show myself to the populance."

"You'd better stick around the palace today, your majesty," replied the grand keeper of the royal golf togs. "There's a movie star in town and some of your loyal subjects might not know you were out."

Big Events in the Lives of Little Men

The "Thoroughbred" Error

One of the most persistent errors we have ever trailed through countless pages is that of calling purebred animals "thoroughbreds." We do not know why anybody should make such an obvious mistake. Even the lesser dictionaries do it.

The word "thoroughbred" is the name of a well established, widely distributed, old and important breed of horses. The thoroughbred horse is as much a breed as the Cotswold sheep is a breed. It is as much a breed of horses as the Hackney.

To talk about a "thoroughbred Holstein" means as much as to talk about a Percheron Holstein, and is no less absurd and rediculous.

Let us let our imaginations run riot, and picture in our minds' eyes "a thoroughbred cow of approved type."

"A thoroughbred cow of approved type" would step high and be "r'arin' to go." She would be rangy and long legged, and she could run a quarter in 24 seconds with a jockey on her back. But would she say "moo" or "neigh?" We might refer to her for the benefit of the babies as a "whinny cow."

A "thoroughbred" hen ought to have four legs and hatch colts out of her eggs. Perhaps such a hen would set in a mare's nest.

Maybe a razorback hog might be called a "thoroughbred." He is, in action. He has speed and stamina and bottom.

There used to be a magazine in the Northwest called "The Thoroughbred." It wrote of a man it sought to glorify as a "thoroughbred man." No doubt the editor thought it was a compliment. When we read it we gave a horse laugh and wondered if he had red heaves or died of the glanders. Such a man in a restaurant would doubtless call for a bran mash instead of a ham sandwitch.

The word itself has less meaning than "purebred," so why use it so loosely and in such vague and miscellaneous way? It provokes confusion as well as mirth, and denies to a great breed the right to its own proper name. —Western Breeders Journal.

A Farmer's Advice

"I plant and sow what the other fellow doesn't have."

These are the words of Mr. W. E. Baker of Dallas county, Texas, and they express his policy as a farmer. And time has shown that it is good policy and one by which others may profit. If Mr. Baker finds that all available land is best sown to cotton in one year, he immediately puts his land into corn, hay, oats and other feedstuffs. Then in the fall after the others have sown their cotton, he sells his crops to them at a high price, for they must have feedstuffs even though they are quoted at high prices on account of excessive transportation costs.

The wise farmer of the Northwest may profit by the advice of the farmer of the South, and whenever he sees the majority sowing wheat, or any other single crop, he will sow his land to the other produce.

Parents of a Son

Mr. and Mrs. W. C. Jenkins are the proud parents of a baby son, born Friday evening, August 31, at a Moscow hospital. All concerned are reported as doing nicely.

Better Watch Your Step

Be discriminating in the joys of youth, lest they lead to the follies of old age.

WHAT HAPPENED HERE TWENTY YEARS AGO

Genesee is threatened with a moving picture show in the near future.

The Follett and Bee Hive stores have handsome new safes in which to store their valuables.

Joseph Geiger has improved the interior of the brewery by partitioning off a portion of the bar room.

Sunday was a big trade day in town. The rain of Saturday stopped all threshing operations and in consequence all hands were laid off.

While considerabe wheat is being hauled to market few sales are being made. It is apparent that our producers are confident that the prices will go higher.

Meyer Bros. have during this season disposed of a number of push binders and feel confident that they will have a big sale for them next year. Mr. Qualey east of town is very much satisfied with the one he purchased.

Ed Vanouck returned Sunday from south Idaho where he has been holding down a homestead for the past six months. A portion of the time he has been driving stage from Council to the Seven Devils mining district. He says he will return again.

The Genesee schools opened Monday with a big attendance, the increase in enrollment being thirty-six over the same time last year. Following is the enrollment by rooms: Primary, Miss Burdic teacher, 58; second primary. Mrs. Spurbeck, 38; intermediate, Mrs. Cool, 39; grammar, Miss French, 39; grammar, Miss Wilson, 32; high school, Mr. Cobbs, 29; a total of 235.

Monday evening Miss Lulu Brennan quite pleasantly entertained the following guests at her home: Misses Pearl Owen, Anna Deesten, Rachel Biram, Pearl Eddy, Lulu Spears, Clara Hohnon, Edith Newson, Mollie Keane, Mabel Reed, Edna Borg, Mae Herman, Nellie Brant, and Lulu French. Messrs. LeRue Tice, Clarence Jain, Fred Springer, Will Platt, Will Herman, Geo. McMahon, Eli and Arthur Morgan, Tom Keane, Will English, and Reed Klapp. (Of the 24 young people mentioned above, only three are now living in Genesee—Miss Lulu French, (Mrs. W. E. English), W. E. English, and W. M. Herman.)

Sixth To Die As President

President Harding, 29th president of the United States, was the sixth president to die in office, and the third executive from Ohio so to die.

William Henry Harrison was the first to die while president. He died April 4, 1841, at Washington, after serving for one month of his term.

Zachary Taylor died at Washington on July 9, 1850, after serving one year, four months and five days. Abraham Lincoln was shot by an assassin at Ford's theater, Washington, April 14, 1865, dying the next day. He had served four years, one month and 11 days.

James Garfield was shot while in the Pennsylvania station at Washington, July 2, 1881, and died at Elberon, N. J., September 19, 1881. He had served six and a half months.

William McKinley was shot twice, on September 6, 1901, while in the temple of Music at the Pan-American exposition at Buffalo, N. Y. He died eight days later, having served four years, six months and ten days.

President Harding had been chief executive two years, four months and 29 days.

Some people find both pleasure and profit in taking things as they come, until the judge calls a halt.

MRS. MARY ISAKSEN DIES AT COUNTRY HOME

Mrs. Mary Isaksen, a resident of the Genesee section for nearly 30 years, passed away at her home, four miles north of Genesee at 6:30 o'clock Tuesday evening, September 11, 1923, of diabetes, from which she had been a sufferer for the past 12 years. Had she lived until December 15, she would have been 70 years of age.

Mary Larson was born at Veneersborg, Sweden, December 15, 1853, and came to America in 1875, going to Fairholt, Minnesota, where the same year she was married to Abraham Isaksen. To this union 15 children were born, eight of whom survive. They are Mrs. Anna Thorstenson, Mohler, Idaho; Peter Isaksen, Genesee; Mrs. Carrie Hudson, Spokane; Mrs. Lizzie Wilkins, Tacoma, Wash.; Isaak Isaksen, Genesee; Herman Isaksen, Genesee; Mrs. Chas. Bourland, Grangeville; Emma Isaksen, Tacoma, Wash.

Besides her children she is survived by one brother, Andrew Solberg, of Alger, Washington.

Mr. and Mrs. Isaksen resided at Fairholt until 1884, when they came to the Genesee section, settling on the farm where Mrs. Isaksen passed away, and where she has, with the exception of a few years spent at Tacoma, Washington, made her home.

She was a devoted member of the Christian church. She was loved and honored by all who knew her and her neighbors and friends were ever ready to look after her interests during her last illness, of which she was always appreciative.

The funeral will be held this (Friday) afternoon from the home at 1:30 o'clock, when a short service will be held, and from the Norwegian Lutheran church, seven miles north of Genesee, at 2 o'clock, with burial in the cemetery near the church where she will be placed by the side of her husband who preceded her to the Great Beyond by some 15 years. The services will be conducted by the Rev. Mr. Bodine of Troy.

The family wish to extend their heartfelt thanks to the many kind friends and neighbors who so kindly assisted them in any way during the illness and after the death of their mother.

Pullman Region Prosperious

The Pullman region wheat crop will beat the 1,250,000 bushels marketed last year, according to advice from Pullman. The big increase is indicated by a careful check on the number of sacks sold and the estimated average yield, which is being substantiated by yield reports.

A significant fact is noticeable, and that is that all farmers who acknowledge that they will profit this year are in favor of clean, frequently cultivated summer fallow, and they watch their idle lands as carefully as they do their growing crops.

Additional Personals

Miss Lucille Gray left Wednesday morning for Coeur d'Alene, where she will be employed.

W. C. Clark and A. E. Smith returned to their homes at Everett, Wash., Thursday after a visit with Mr. Clark's parents, Mr. and Mrs. C. B. Clark.

Mrs. N. Nelson and baby, and daughter, Ethel, have just returend home from a short trip to Canada. They visited with Mrs. Nelson's brother and family, and friends. They reported a very good time.

Barn Burns

Last Friday just before the noon hour the fire bell was put in motion—the first time for many months—when it was discovered that the barn on Mrs. C. H. DeBow's place, just north of the Herman stores, was on fire. The building was a solid mass of flames before it was discovered and the cause of the blaze is a mystery as no one has lived in the house on the place for several months and it is said that no children have been in the habit of playing there. However, the barn and contents were consumed. The building contained a hack, sleigh, a few bales of straw and other articles belonging to Jas. Montague, who formerly occupied the premises.

Thos. Herman, whose place is just east of the burned building, lost more than $200 worth of pansy plants as well as many perennials and other plants, as did Mrs. W. M. Herman.

It has not been learned whether any insurance was carried or not.

A Nice Show Window

Jack Barnes, local manager for the W. W. P. Co., last week had about as sjiffy a show window as has ever been put up in this little city. He was advertising electrical toasters and in conjunction with the national slogan, "Eat More Wheat" and "Make Toast Your Breakfast Food," had a very neatly decorated show window with several sacks of flour of various brands and showing many loaves of bread and slices of golden brown toast, made upon one of the electric toasters as shown in the window. All in all, it was a very neat and attractive window display.

He is still advertising toasters and displaying window cards (a home-made product) calling attention to the fact that you "should eat more wheat" and "make toast your breakfast food."

"Missing Millions" Scores

The famous Cyclops diamond, worn at the fashionable party by Mrs. James Cantwell and stolen by two clever crooks among the guests, starts a speedy cycle of vivid action in "Missing Millions," a production starring Alice Brady, which will be shown at the opera house Saturday night. An unscrupulous Wall Street broker, a thug, a reformed crook and several unreformed thieves are included among the characters. Injustice, vengeance, looting and fierce fighting follow in rapid and thrilling sequence, culminating in a big problem and a tremendous sacrifice. The picture is based on two of Jack Boyle's "Boston Blackie" stories and included in the strong cast are David Powell and Frank Losee.

Spuds Are Cheap

Growers of Lewiston are receiving $7 a ton for their potatoes and yet at the same time there is a marked scarcity, according to word received in Spokane. Last September the price ranged from 65 to 75 cents, and the supply seemed unlimited. Wholesale dealers say that the quality of potatoes in the region is exceptionally good, probably due to the abundant rains in the spring and early summer.

At St. Mary's Church

There will be but one mass at St. Mary's church next Sunday—at 11 o'clock—conducted by Rev. Fr. Carey of Thorncreek.

Rev. Fr. Godschalx is absent from the city, having been called to Emmett, Idaho, on account of the serious illness of his brother's wife.

SEMI-LOCAL NEWS CLIPPED FROM EXCHANGES

Good Wheat Yields

Two good wheat yields were reported last week, one on American ridge and the other on Bear ridge. Fifty-two bushels to the acre was threshed on the M. V. Thomas place, farmed by Wm. Cox. On the A. Kleth farm on Bear ridge the same yield of fifty-two bushels being threshed. In both instances Jenkins Club wheat was raised.—Kendrick Gazette.

Ku Klux Women Organize

The women of the Ku Klux Klan organized in Lewiston with a large membership last Saturday night, according to a statement made yesterday by the organizer of the work, and on next Saturday evening a similar auxiliary of the klan will be organized among the women of Clarkston. The affairs of the organization are local in aspect, and both the Lewiston and Clarkston branches will operate exclusive of any other.—Lewiston Tribune.

Put Legs on the Wheat

The peak of the price of wheat in any ten year cycle considered occurs in May, when the farmer has none to sell. The bottom occurs in August and September, when he is marketing his crop. The farmers organization suggests that it should be held on the farm and released as demanded by the market, even though money should need to be orrowed against it. Why not market some of it in the form of livestock, since it is the best hog feed known, and thus permanently limit the amount of wheat which shall go on the market?—Kamiah Progress.

We Are, At That

Henry Ford reports that he cleared $54,000,000 in the first four months of the year. No other man in America makes as much money as the flivver king, and no manufacturer makes as large a percentage of gain on business done, yet nobody thinks of calling him a profiteer. With a small fraction of the capital invested that the railroads have, Mr. Ford piles up profits at the expense of the people that aggregate more than all the roads put together make in some years; yet we never talk about regulating him. On the contrary, we figure more or less on making him president so he can have a hand in regulatng our transportation business with a view of saving us some more money. We're an amusing bunch, aren't we?—Yakima Republic.

Federal Officers Seize Stills

Federal officers Frank Marley and Ed. Marsten and their deputy were successful in lining up two stills and a quantity of moonshine and mash, Friday, and placing the owners under arrest.

The first arrest was that of George Nebler, a farmer, living near Genesee, who had a complete still with a large quantity of mash. He was brought to Moscow, and in the absence of the United States Commissioner H. R. Smith, was arraigned before Judge Adrian Nelson. His bond was fixed at $300 and the preliminary hearing set for September 18. A cash bond was furnished.

Herman P. Shodene, a farmer, living near Troy, was found with a complete still, several barrels of mash, and a large quantity of moonshine on hand. He was also arranigned before Judge Nelson. He was given a preliminary hearing and was bound over to the Federal court under $500 bonds.

Both men had evidently been operating on an extensive scale.—Star-Mirror.

Boy and Girl Evade Parents

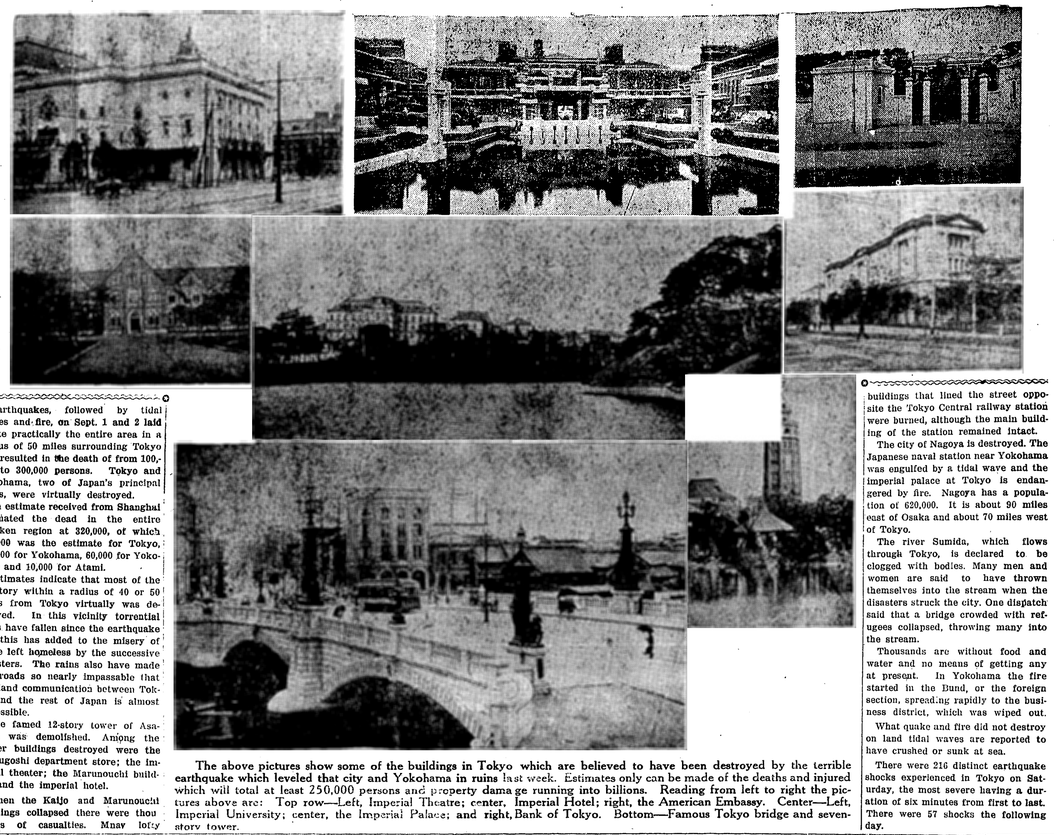
The Latah county sheriff's office is endeavoring to gain some trace of Melvin Nichols, 15, and her cousin, Leon Nichols, Jr., 17, who left the home of the girl's parents, Mr. and Mrs. Elmer Nichols, as an early hour Thursday morning, in an automobile, and have not been heard from since.

The boy, a nephew of Elmer Nichols and son of Leon Nichols, of 1165, Stanton street, Portland, a former Latah county farmer, came up to his uncle to work through harvest. It is understood that he told a few days before he left that he was going back home and would accompany a friend to Portland. Wednesday night, Melvina, who had been helping at the cook house, asked permission to spend the night there with the cook. About 4 o'clock Thursday morning, according to the story told The Star-Mirror, young Nichols arrived with an automobile and was accompanied by the girl, who apparently was waiting for him. The cook notified the parents of the girl, and they, in turn, notified the sheriff's office.

Telephone messages were sent to police officers in surrounding towns, and a wire was sent to the Portland police, but up to the present time no trace of the young couple has been found. They were traveling in a Chevolet car, but the sheriff's office has been unable to learn who the car belonged to.—Star-Mirror.

The young couple was later found by the police in Portland.

Pictures of Some of the Buildings in Japan Destroyed by Earthquake



Earthquakes, followed by tidal waves and fire, on Sept. 1 and 2 laid waste practically the entire area in a radius of 50 miles surrounding Tokyo and resulted in the death of from 100,000 to 300,000 persons. Tokyo and Yokohama, two of Japan's principal cities, were virtually destroyed.

An estimate received from Shanghai estimated the dead in the entire stricken region at 320,000, of which 150,000 was the estimate for Tokyo, 100,000 for Yokohama, 60,000 for Yokosuka and 10,000 for Atami.

Estimates indicate that most of the territory within a radius of 40 or 50 miles from Tokyo virtually was destroyed. In this vicinity torrential rains have fallen since the earthquake and this has added to the misery of those left homeless by the successive disasters. The rains also have made the roads so nearly impassable that overland communication between Tokyo and the rest of Japan is almost impossible.

The famed 12-story tower of Asakusa was demolished. Among the larger buildings destroyed were the Mitsugoshi department store; the imperial theater; the Marunouchi building and the imperial hotel.

When the Kaijo and Marunouchi buildings collapsed there were thousands of casualties. Many lofty buildings that lined the street opposite the Tokyo Central railway station were burned, although the main building of the station remained intact.

The city of Nagoya is destroyed. The Japanese naval station near Yokohama was engulfed by a tidal wave and the imperial palace at Tokyo is endangered by fire. Nagoya has a population of 620,000. It is about 90 miles east of Osaka and about 70 miles west of Tokyo.

The river Sumida, which flows through Tokyo, is declared to be clogged with bodies. Many men and women are said to have thrown themselves into the stream when the disasters struck the city. One dispatch said that a bridge crowded with refugees collapsed, throwing many into the stream.

Thousands are without food and water and no means of getting any at present. In Yokohama the fire started in the Bund, or the foreign section, spreading rapidly to the business district, which was wiped out.

What quake and fire did not destroy on land tidal waves are reported to have crushed or sunk at sea.

There were 216 distinct earthquake shocks experienced in Tokyo on Saturday, the most severe having a duration of six minutes from first to last. There were 57 shocks the following day.

The above pictures show some of the buildings in Tokyo which are believed to have been destroyed by the terrible earthquake which leveled that city and Yokohama in ruins last week. Estimates only can be made of the deaths and injured which will total at least 250,000 persons and property damage running into billions. Reading from left to right the pictures above are: Top row—Left, Imperial Theatre; center, Imperial Hotel; right, the American Embassy. Center—Left, Imperial University; center, the Imperial Palace; and right, Bank of Tokyo. Bottom—Famous Tokyo bridge and seven-story tower.

MY LADY'S MONEY

An Episode in the Life of a Young Girl

By Wilkie Collins

INSTALLMENT NO. 18.

"The beastly English climate is telling on my nerves," said Mr. Sweetair; "the horrid weight of the atmosphere after the exhilarating air of Paris; the intolerable dirt and dullness of London, you know. I was in bed, my dear aunt, when I received your letter. You may imagine the completely demoralized state I was in when I found out the effect which the news of the robbery produced on me. I fell back on my pillow as if I had been shot. Your ladyship should really be a little more careful in communicating these disagreeable surprises to a sensitively organized man. Never mind, my valet is a perfect treasure; he brought me some drops of ether on a lump of sugar. I said 'Alfred' (his name is Alfred), 'put me into my clothes.' Alfred put me in. I assure you, it reminded me of my young days, when I was put into my first pair of trousers. Has Alfred forgotten anything? Have I got my braces on? Have I come out in my shirt-sleeves? Well, dear aunt! well, Mr. Troy! what can I say? what can I do?"

Lady Lydiard, entirely without sympathy for nervous suffering, nodded to the lawyer. "You tell him," she said.

"I believe I speak for her ladyship," Mr. Troy began, "when I say that we should like to hear, in the first place, how the whole case strikes you, Mr. Sweetair."

"Tell it me all over again," said Felix.

Patient Mr. Troy told it all over again, and waited for the result.

"Well?" said Mr. Troy. "Where does the suspicion of robbery rest, in your opinion? You look at the theft of the bank-note with a fresh eye."

"You mentioned a clergyman just now," said Felix. "The man, you know, to whom the money was sent. What was his name?"

"The Reverend Samuel Bradstock."

"You want me to name the person whom I suspect!"

"Yes, if you please," said Mr. Troy.

"I suspect the Reverend Samuel Bradstock," said Felix.

"If you have come here to make stupid jokes," interposed Lady Lydiard, "you had better go back to your bed again. We want a serious opinion."

"You have a serious opinion," Felix coolly rejoined. "I never was more in earnest in my life. Your ladyship is not aware of the first principle to be adopted in cases of suspicion. One proceeds on what I call the exhaustive system of reasoning. Thus: Does suspicion point to the honest servants downstairs? No. To your ladyship's adopted daughter? Appearances are against the poor girl; but you know her better than to trust to appearances. Are you suspicious of Moody? No. Of Hardyman, who was in the room at the time? Ridiculous! And I was in the house at the time too. Do you suspect me? Just so! That idea is ridiculous too. Now let us sum up. Servants, adopted daughter, Moody, Hardyman, Sweetsir—all beyond suspicion. Who is left? The Reverend Samuel Bradstock!"

This ingenious exposition of "the exhaustive system of reasoning" failed to produce any effect on Lady Lydiard. "You are wasting our time," she said, sharply. "You know as well as I do that you are talking nonsense."

"I don't," said Felix. "Taking the gentlemanly professions all around, I know of no men who are so eager to get money, and who have so few scruples about how they get it, as the parsons. Where is there a man in any other profession who perpetually worries you for money? who holds the bag under your nose for money? who sends his clerk round from door to door to beg a few shillings of you, and calls it an 'Easter offering?' The parson does all this. Bradstock is a parson. I put it logically. Bowl me over if you can."

Mr. Troy attempted to "bowl him over," nevertheless. Lady Lydiard wisely interposed.

"When a man persists in talking nonsense," she said, "silence is the best answer; anything else only encourages him." She turned to Felix. "I have a question to ask you," she went on. "You will either give me a serious reply, or wish me good-morning." With this brief preface, she made her inquiry as to the wisdom and possibility of engaging the services of the French police.

Felix took exactly the view of the matter which had been already expressed by Mr. Troy. "Superior in intelligence," he said, "but not superior in courage, to the English police. Capable of performing wonders on their own ground and among their own people. But, my dear aunt, the two most dissimilar nations on the face of the earth are the English and the French. The French police may speak our language, but they are incapable of understanding our national character and our national manners. Set them to work in the city of London, and the English people would remain, from first to last, the same impenetrable mystery to them. In my belief, the London season would be enough of itself to drive them back to Paris in despair. No balls, no concerts, no theaters, not even a museum or a picture gallery open; every shop shut up but the gin-shop, and nothing moving but the church bells and the men who sell the penny lees. Hundreds of Frenchmen come to see me on their first arrival in England. Every man of them rushes back to Paris on the second Saturday of his visit, rather than confront the horrors of a second Sunday in London. However, you can try it, if you like. Send me a written abstract of the case, and I will forward it to one of the official people in the Rue Jerusalem, who will do anything he can to oblige me. Of course," said Felix, turning to Mr. Troy, "some of you have got the number of the lost bank-note. If the thief has tried to pass it in Paris, my man may be of some use to you."

(To Be Continued.)

WORLD'S NEWS BRIEFLY RETOLD

Important News of Both Hemispheres Boiled Down to Last Analysis.

Germany's floating debt August 31 was more than one quadrillion marks, in round figures it was 1,235,067,000,000 marks.

Reports received by way of Vladivostok state that as a result of the submarine convulsions attending the earthquake off Japan, a new island 30 miles long and 15 miles in width has sprung up in the sea off Yokohama.

C. P. Francisous of New York City was re-elected president of the United National association of postoffice clerks at the closing session of the annual convention of the organization. Minneapolis was selected as next year's convention city.

Taxpayers in Long Beach, Cal., are rejoicing over an estimate which placed the value of oil lands owned by the city of Long Beach at nearly $50,000,000. The city's income from oil is expected to largely pay the expences of the municipality.

British Columbia mine officials believe rock slides that killed two men at Nanaimino, B. C., were due to the earthquakes in Japan. Instruments indicate that large areas of land are settling after the shocks which destroyed the Japanese cities.

All missionaries of the Methodist Board of Foreign Missions located in Japan, with members of their families, escaped death in the earthquake, according to a cable message received from Bishop Herbert Welch in Karuizawa, a mountain resort about 80 miles from Tokyo.

The emir Abdullah, ruler of Transjordania, is facing a serious rebellion, led by the sheik of Es Salt. Three thousand Arabs have gathered under the banner of the sheik, who handed the emir an ultimatum demanding that a provisional government be instituted, and that all foreigners be expelled.

Decision to open 42,700 acres of public lands in California and Colorado for homestead entry by former service men was announced recently by the interior department. The tract includes 38,000 acres in Imperial county, California, near the towns of Westmoreland and Divieland and 3700 acres in Montrose and Gunnison counties, Colorado, near Ouray.

A nationwide search, which, if unsuccessful, will be made international, has been started for the recovery of "The Entombment of Christ," an original painting by Guido Reni, master of the Bolognese school, which was stolen recently from the E. B. Crocker art gallery at Sacramento. The little masterpiece, 8 by 10 inches in size, is declared by critics to be almost priceless.

Captain John Donovan, champion diver and hero of the Eastland disaster in 1915, when that ship capsized in the Chicago river with the loss of 812 lives, is dead. At the time of the sinking of the Eastland, which had been chartered for a lake trip and picnic by more than 2000 employees of the Western Electric company, Captain Donovan joined in the rescue work and recovered 148 bodies himself.

Seemingly hemmed in by a cordon of death, generaled by the fatal ravages of black typhoid fever the entire family of Henry Klewe, whose farm is located 11 miles east of Sioux City, is threatened with destruction. Since the advent of the disease a little more than a month ago, the mother, father and eldest son have died, all deaths coming but eight days apart. The remaining five members of the family are in critical condition.

Slight Chance Nowadays.

The Man (having surrendered his seat)—"I beg your pardon!"

The Girl—"I didn't speak!"

The Man—"Sorry, I'm sure. I thought you said 'thank you'!"—The Bystander (London).

The honey season will soon be over so be sure and leave enough to keep the bees over the winter.

TIMELY HINTS TO FARMERS

Agricultural Engineering—Check up the yield of your fiends and note how much drainage has paid.

Apiculture—Remove all supers, both comb and extracting, as storing ceases.

Clothing—Study your own figure requirements and learn to make from your foundation pattern various designs suited to your type.

Dairy—Arrange a cow testing circle and hire some one to test your milk samples and to figure records of butterfat and feed costs.

Farm Crops—Sow enough fall grain of the cleanest type for next year's seed needs.

Farm Management—Figure your spray cost for the season. Separate materials, labor, depreciation of machinery and interest. Consider the labor cost and see if you can decrease this charge.

Horticulture—Do not let the apples become over ripe to gain a little color. (Western) Pick the Bartlett pears before they yellow on the trees. Now is the best time to sow the vetch in the cranberries for cover crop.

Livestock—The use of a high class purebred sire is the beginning of wisdom. Select your new herd boar early. Later you will purchase a "cull."

Plant Pathology—Since there is no seed injury when copper carbonate is used to treat wheat, it will generally be wise to cut down the rate of seeding, depending upon the locality in the state.

Poultry—Get a daily record sheet from your county agent. It is the one way to know whether you are getting adequate returns from your investment and labor.

The shock which devastated Tokyo and its environs was the greatest the Manila seismograph has recorded in 30 years, according to Father Serra, geologist in charge.

Oil tanks in Yokohama are reported to have exploded causing a heavy loss of life.

NOBLEMAN HERDS SHEEP

A nobleman turned sheepherder, Guillermo Cifre de Colonia, son of Spanish aristocracy and Oregon Agricultural College soccer player, has just returned from a year as a ranch hand on an eastern Oregon sheep ranch, getting practical experience to supplement his work at Oregon Agricultural college in animal husbandry.

Cifre has worked on the night shift in a lambing camp for two months at a stretch, trailed bands of sheep over 200 miles of range, ridden horseback at night over 40 miles of precipitous mountain trail on an emergency call, and otherwise studied the sheep business in the school of hard knocks.

IDAHO LEADS BULL CLUBS

First Among Western States in Number of Improvement Associations.

WHEAT BELT GETS COWS

Dairy Herds Increase in Many Counties—Breeders Purchase Purebred Jersey Bulls.

A large number of co-operative bull associations have been organized in Idaho than in all other states east of Colorado, according to J. E. Dorman in charge of the western offices of the United States dairy division, it is shown in a report issued recently by L. W. Fluharty, director of extension, University of Idaho.

"Our report shows that from June 1, 1922, to May 31, 1923, 109 purebred dairy sires have been placed in various communities throughout the state in bull associations," said Mr. Dorman. "As a result, 713 farmers have bulls at the head of their herds whose immediate female ancestry show a production record of 400 or more pounds of butterfat, and many of these sires have female ancestry averaging more than 500 pounds of fat."

A study of a report recently submitted to the United States department of agriculture by the western dairy office at Salt Lake shows that 25 bull associations have been formed in the state during the 12-month period ending May 31, 1923. In these organizations, 109 bulls are registered.

In addition to the newly organized associations, according to the report, Idaho had five operating in the state, with 19 bulls, 650 cows and 144 members.

This remarkable achievement—the forming of so many bull associations within the state during the last year, according to Mr. Fluharty's report, is the culmination of several years' persistent effort to eliminate the scrub sires from the Idaho herds. F. R. Cammack, field dairyman for the University of Idaho college of dairying, has been the leader of this movement during the last five years.

"The association plan of furnishing bull service to the farmers, the report continues, "has made it possible to reduce the number of animals kept for breeding purposes. At present one bull is kept by an average of 6.5 farmers, whereas these men kept three bulls before joining the association. The plan provides for breeding at a nominal cost per cow.

The dairy industry continues to make headway in the provinces of Alberta, 15 more creameries being in operation this year than in 1922. It is estimated that the total creamery butter production will be about 18,000,000 pounds, 3,000,000 pounds more than last year. There is a considerable increase in the acreage of fodder crops, particularly in corn.

More Cows for the Wheat Belt

Waterville, Wash.—Two purebred bulls were placed durinng the month, and five high grade heifers were shipped into Douglas county from the westside of the state. Work is being done among the farmers by county agent F. H. Zentner in the formation of a number of purebred bull clubs. It is the hope of the farmers that by fall they will be able to start these clubs and introduce more purebred stock into the county. There is a marked interest in stock. Besides the dairy cows added to the farms in the county, five purebred sows and one purebred boar were secured for farmers.

New Ayreshire Herd in Mason County

Shelton, Wash.—Two purebred Ayreshire heifers and a purebred bull were purchased and brought into the county recently as the foundation for a new herd. This will make one of the few Ayreshire herds in the state.

From month to month the dairy men of Thurston county are gradually forging to the front with the ownership of better stock. Sixteen purebred Jerseys were brought into the county by A. B. Landeen of Rochester from the Ed Carey sale. Five were sold to E. E. McPherson of Rochester. A young registered Jersey bull calf was sold from the E. Munn and son herd to Mr. Titus. County agent E. B. Stookey is assisting the dairymen of the county in every way possible to make Thurston one of the leading dairy counties of the state.

MANY WAR VETERANS RENEWING INSURANCE

823 in Northwest Reinstate Lapsed Policies in Last Year Amounting to $3,870,000.

As time passes since the World war, ex-service men of this district realize more and more the value of government insurance judging from the reinstatement of war insurance policies during the last 12 months, L. C. Jesseph, Seattle, northwest district manager of the United States Veterans' bureau, announced.

A total of 823 war veterans of Washington, Oregon and Idaho had $3,870,000 of war risk insurance reinstated during the year and $2,412,000 of term insurance was converted into permanent forms of government insurance, it was stated. This is an increase of nearly $100,000 of reinstated insurance over the preceding year.

There are still many ex-service people who have failed to take advantage of the opportunity offered by the government to renew their war insurance no matter how long premium payments have lapsed, Mr. Jesseph declared. He urged that all war veterans reinstate their war insurance policies at an early date. Insurance cashiers have been stationed at the Veterans' bureau offices at Seattle, Portland, and Spokane.

GRAVEL ROADS ARE HARD ON AUTO TIRE

Poor Roads Double Per Mile Cost of Gasoline—Extra Expense 10 Cents Per Mile.

"If we had concrete surfaces to drive upon we could pay a tire tax of 67 per cent and still spend no more money for tires than is required for our present road surfaces," says Highway Engineer H. E. Phelps of the State College of Washington engineering college, discussing the effect road surfaces, poor or good, have on the cost of running autos and hauling loads.

He points out how experiments have proven that a gallon of gasoline is needed to haul one ton 14 miles on earth roads, 21 miles on gravel, and 21 on concrete.

"It is interesting to translate these figures into the cost of gasoline per mile of travel for the average automobile," he continues. "Taking the weight of an automobile as 1.4 tons, with gasoline costing 30c a gallon, each mile of travel would cost 2c for gas on earth roads, a cent and a third on gravel, and only ninety-one hundredths of one cent on concrete. In other words, when the car reaches the end of the concrete and starts down a gravel surface, the extra gasoline required costs as much as a tax of 6 2-3 cents per gallon. And when it reaches the end of the gravel and starts down the average poor earth road, an added cost of 10c per gallon is the traveler's tax caused by the poor road.

"This gasoline tax of 6c to 10c a gallon placed upon us by poor roads is not the only tax we pay to poor roads. Definite figures are lacking but experience on Palouse gravel indicates that such roads are extremely hard on tires. They also place upon us taxes of unknown magnitude because of the added repairs required, and the shorter life of automobiles used upon poor roads as compared with those run on good road surfaces."

Chocolate Fudge Cake.

One half cup shortening, 1 1-2 cups sugar, creamed; add beaten yolks of 4 eggs, and beat, then melt 2 squares bitter chocolate in 4 tablespoons boiling water and add to cake mixture. Stir in alternately 1-2 cup milk and 2 1-2 cups pastry flour to which has been added 2 1-2 teaspoons baking powder. Fold in beaten whites of 4 eggs and bake in a loaf pan in a moderate oven for 35 to 40 minutes. Frost with fudge and nuts.

Never trouble another for what you can do yourself.

Not Knights of Old, Chicago Cops

Copyright by Underwood & Underwood, N. Y.

The thrilling game of Cockade Tilting has been revived in Chicago. Photo shows members of the police force engaged in a sensational game. The policemen are practicing this sport daily in preparation for the big Field Meet they are to stage.

Better Health Service

Public Health Is Public Wealth.

These Articles Compiled by the Public Health League of Washington

SCHOOL HYGIENE.

School hygiene includes:

1. Health supervision of the child.
2. Education of the child in health matters.
3. Proper sanitation of school buildings and grounds.

Medical inspection of schools, if efficient, raises the health standard of the community and aside from the benefits to the children themselves is of primary importance; but of course, the welfare of the children is the chief object of all school hygiene. No child should suffer injury from going to school. A sound, clean child may suffer from contact with an unsound or unclean child. The school should protect the clean child by a change in the unclean or diseased child.

First, all children are carefully examined for contagious or infectious diseases and cleanliness. Those with suspicious symptoms are excluded, unclean children are taken aside and instructed to clean up, reasons being given why the body must be kept clean.

Second, all children are examined for physical defects, such as defects of the eye, ear, nose, throat, teeth, nerves, orthopedic and nutrition, and the parents advised of any disability, so that the defect may be corrected before a serious condition results. Prevention is better than cure. Most diseases are preventable if the right measures are taken in time. It is not only easier and cheaper, but pleasanter to keep a well child well than to make a sick child well.

For instance, one of the essentials of a happy healthy child, is good mastication of food. This depends on chewing the food properly, but this can not be done unless teeth exist and are in proper chewing condition. Many children not only suffer, but are absent from school frequently and carry on their work with difficulty, because of defective teeth. Recent studies emphasize the relation between decayed teeth, rhumatism, chronic joint disease, heart disease and other disorders.

Children are weighed and measured. The undernourished child is being neglected, largely because parents are in the habit of thinking that thinness is a more or less natural condition. They assume that the child will "probably come out all right" and do not realize that, if the child does not get his birthright of a normal gain each year, valuable time is being wasted which can never be recovered. Other defective conditions are sought out and proper remedies suggested.

The second and no less important step is to teach the child good health habits. This instruction begins in the kindergarten and continues through every grade. The essential thing in hygiene is the practice of health habits until they become automatic.

Simple Rules for Good Health.

A full bath twice a week.

Brushing the teeth at least once a day.

Sleeping long hours with windows open.

Drinking as much milk as possible, but no coffee or tea.

Eating some fruit and vegetables every day.

Drinking at least four glasses of water a day.

A bowel movement every morning.

Playing out of doors a part of every day.

Correct posture, sitting and standing.

Clean handkerchiefs to catch coughs and sneezes.

Home visiting by a nurse is indispensible to secure the co-operation of the family. The nurse finds out whether instructions given in school are carried out, and if relief is needed and refers the families to the proper agencies.

Sanitation of school buildings and grounds includes suitable lighting and ventilation, proper heating and seating, sanitary drinking fountains, toilets and towels, and also inspection of lunch room.

If children are to receive the full benefit of school and the taxpayers' money is to be wisely expended, instead of being wasted, the condition of both the pupil and the school room must be kept right.

Gladstone said: "The strength of the nation hangs upon the health of its men and women." And the school children of today are the men and women of tomorrow.

Deviled Food Cake.

(Made with sour milk.)

One-half cup brown sugar, 1-2 cup chocolate and 1-2 cup sour milk. Mix these and place on the stove until chocolate is melted, but do not boil. Cream 1 cup brown sugar and 1 cup shortening and add 2 egg yolks. Add 1-2 cup sour milk in which 1 teaspoon soda has been dissolved. Then add 2 cups flour and 2 teaspoons vanilla. Bake in a moderate oven.

Winter is coming. Don't board any more of the farm animals than you have to. It doesn't pay.

Honesty is the first chapter of the book of wisdom.

JAPANESE INSECTS TO FIGHT FOR U. S.

Entomologists Search for Enemies of Beetles Working Havoc in Eastern States.

American bug hunters are on the warpath in Japan. They are looking for a ferocious insect, the more ferocious the better, and when they find the creature they are going to send him, and as many of his lady and gentlemen friends as possible, straight back to America and turn 'em loose on a beetle that's been eating up crops in parts of the United States.

Seven or eight years ago some fruit trees shipped from Japan to New Jersey contained in the earth about the tree-roots some insect grubs that the plant quarantine inspectors at the American port failed to find. The grubs got by. When they reached New Jersey they became beetles, and applied themselves industriously to propagating their species and eating up everything in sight. They've been doing both things ever since.

The U. S. department of agriculture sent to Japan a couple of its best entomologists. "Since these beetles live in Japan," said the department, "they must have insect enemies in Japan. Because all insects have enemies. So go to Japan. Find another beetle, or a bug or a beast or a bird or something that just naturally hates this first beetle like pizen and tries to kill him on sight. When you find that creature send us all you can get. We'll turn 'em loose on Beetles No. 1, and there'll be a cruel war in New Jersey."

POISON MENACE TO LIVESTOCK

Cockleburs in Pasture Deadly to Stock—Young Plants Only Poisonous.

PORK EXPORTS ARE HEAVY

Great Britain Largest User of Hogs—Issue "Pure Bred Stock" Signs to Breeders.

Live stock running on pasture infested with young cockleburs is liable to be poisoned, investigations by the United States department of agriculture show. This is particularly true of swine, but also cattle and sheep, and especially in the Mississippi valley and Great Plains states. Young pigs up to 2 months of age are more susceptible than other stock, although occasional reports of cocklebur poisoning of other animals have been coming to workers in the pathological division of the bureau of animal industry, where the investigations of stock poisoning by plants are carried on.

There seems to be considerable variation in the quantity of cockleburs necessary to poison, but in general the dose that causes poison is not far from 1 1-2 pounds of the green plant to 100 pounds of animal. Apparently there is little difference between the dose that causes only sickness and the dose that kills.

The symptoms of poisoning are depression, nausea accompanied with vomiting, rapid and weak pulse, and a low temperature. The symptoms appear within 24 hours after the plant is eaten and commonly last only a few hours. Since it is only the young plant, before the formation of leaves, that is poisonous, cases of poisoning may occur at any time when young plants are found.

As an exporter of pork and pork products, the United States is likely to retain its pre-eminence for many years, experts believe. They say, however, that with the rehabilitation of agriculture in Europe, our exports of these commodities, which have been very large in the last few years, will be adjusted to post-war conditions. Average shipments of American pork and pork products to the United Kingdom from 1910 to 1914 were about 450,000,000 pounds.

The ram should always be a purebred. Neither the range flock-master nor the farmer can make any progress in flock improvement, or even keep the flock up to its normal, when using scrub or grade rams. In addition to being purely bred the ram should be an excellent individual.

Self-feeders for their hogs were installed by over 27,000 farmers in 1922 as a result of demonstrations of agricultural extension workers in improved methods of swine management, according to reports to the United States department of agriculture.

Figures just issued by the department of agriculture prove a remarkable growth of the pig club movement in this state and other parts of the country. More than 40,000 boys and girls are raising pigs under club rules. Nearly 12,500 more children are competing in the sow and litter contest, in which a sow and pigs must be kept until the pigs mature.

During July, 172 persons qualified for the official emblem of recognition issued by the United States department of agriculture to persons who use pure-bred sires exclusively for all classes of animals kept. The work is conducted jointly by the various states and by the department. The total number of persons participating at the end of July was 11,705. The department is now distributing a lithographed sign, "Pure-bred Sires Exclusively Used on This Farm," to live-stock owners who enroll in the "Better Sires — Better Stock" campaign and who request the sign. Each sign issued bears a number which identifies the live-stock owner with the nation-wide movement for live-stock improvement.

Business Talks to Young Girls

By Vera Gordon.

I.—Girls Who Would Leave Home.

For the young girl going into business, the first thing that must be decided is—should you leave home. This decision really comes before your choice of vocation for I presume that in entering business you are elaving behind you a very different mode of life. You are forsaking school, or the life of fashionable frivolity or restless idleness. Whatever the atmosphere has been, the chances are that your home environment has had a lot to do with making it. Therefore you must decide whether in starting forth at work you want to begin from your old background, or whether an entirely new one will be most helpful to it.

Your first thought is that by leaving home and having your own rooms, downtown in your own home town, or journeying off to another city, if that is necessary, is going to bring you more liberty. This, you feel, is a tremendous help. You fancy that by having unfettered action tremendous achievement will immediately be yours.

t will, under certain circumstances. First decide if you are an individualist. Do you prefer being alone to being in a crowd of young people? Do you like amusements that appeal only to the few? Are you introspective? If it is the rather contemplative; recluse-like life that makes you most happy, then you can safely plan to live alone and work out your own business destiny.

So much for the mental side of being away from home. But there is another of equal importance—the physocal. Remember that in leaving your old family fireside, you are also leaving those home-cooked breakfasts, which are so essential to a well-balanced business day. Remember, too, that you are leaving that motherly voice that roused you on time to get to the office at nine. You are discarding the kindly attention to your working dresses—the brushing and cleaning, the replacing of soiled frills with thoes of starchy whiteness. Will you be able to do all this for yourself?

And the friendliness, the protection of home. Are you steeled enough with ambition to be able to renounce this? I want to advise all you little girls just starting out in the hard fight of commercialism to question yourselves these things and be honest.

If you find that you are willing to do with discomfort and loneliness and for a while—the while during which you are starting—with very little fun; if you find success in business is worth all these temporary disadvantages, then go to it. Get ready to branch out for yourself. Stand up straight and smile at the world. But before you make your first step, decide what your happiest vocation will be.

I shall try, in my next article, to help you with this decision.

Shipped Car of Hogs

The Farmers Union on Tuesday shipped a car containing 93 hogs to the Spokane market. This is the first time a car has been sent for several weeks. The price is looking up and those who have fat porkers can now get a good price for their "grain on the foot."

Parents of Son

Mr. and Mrs. O. V. Johnson are the parents of a baby boy, born Wednesday, September 12. Both mother and child are reported as doing nicely.

Adams County Leads

According to reports gathered by the extension service of Washington State college, Adams county has a greater number of acres of wheat treated with copper carbonate than any other county in eastern Washington. There has been no doubt by farmers of that county that copper carbonate controls smut, and as a result no machines have been damaged.

To All K. of P.'s

There will be a meeting of the Knights of Pythias lodge next Tuesday night and all members who possibly can are requested to be present. There will be special business.

Public Sale

J. I. Luper, who resides a mile northeast of Colton, announces that on Wednesday, September 19, he will have a public sale of horses, farm machinery and household goods. John Roach will be the auctioneer. 11-1

Bielenberg-Schooler Post The American Legion Meets Each First and Third Wednesday at 8 P. M.

Local Students Try For National Prize

Genesee school children are becoming interested in the National American Legion Essay contest. The local educational institutions are co-operating with the Legion and in a few weeks will announce the winners in the Genesee section.

The American Legion is fulfilling one of its many duties, namely, the promotion of interest in patriotism among the younger generation and the fostering of education, in conducting an essay contest for American school children.

This year a very timely subject has been selected, "Why America Should Prohibit Immigration for Five Years." This is one of the greatest questions up for solution by the session of congress. The American Legion is interested in solving this problem.

The future of the republic, to which the services of the Legion is devoted, depends ultimately, in their entirety, upon the degree of the intelligent interest in public affairs that is manifested by the citizenship of the country. The great patriotic activities of the Legion center largely upon this end—the cultivation of better citizenship—adequately to meet and deal with the problems arising in popular management of national affairs.

The following are the rules governing the second national American Legion essay contest:

Subject: Why America Should Prohibit Immigration for Five Years."

National prizes: First, $750; second $500; third, $250. (To be used for scholarships in colleges indicated by the winners.)

State prizes: First prize in each state will be a silver medal; second prize, a bronze medal; third prize, a certificate of merit.

Rules: All girls and boys between the ages of 12 and 18 years, inclusive, are eligible to enter this contest. Only one essay to a person. Essay will not be over 500 words in length. Only one side of the paper to be used. A margin of one inch must be allowed on either side of the paper. After essay is completed, paper should be neatly folded, not rolled. Spelling, penmanship and neatness will be considered in judging the winner. Age will also be given full consideration.

Pledge: At the end of each essay the following pledge must be signed: "I hereby pledge my word of honor that I have written this essay myself. I am——years old."

Signature, address in full and date must follow."

All essays must be received, for the Genesee vicinity, at the high school by October 5, 1923. Proper judges will be selected to judge the essays.

Additional Prizes

Prizes in addition to the above will be given as follows: The state department of the Legion in Idaho will give prizes of $25, $15 and $10 for the three best essays respectively. The Genesee post will give prizes of $3 and $2, respectively, for the two best essays of the Genesee vicinity.

The golden rule is a good one to follow, but most people object to trailing behind.

No Substitute Offered

Say what would you think about druggists offering something "just as good" because it pays a better profit, the fact still stands that ninety-nine out of a hundred druggists recommend Chamberlain's Colic and Diarrhoea Remedy, when the best medicine for diarrhoea is asked for, and do so because they know from what their customers say of it, that it can be depended upon. For Sale at Clark's Drug Store.

CHURCH SERVICES

SEVENTH DAY ADVENTIST CHURCH
AVERY ROGERS, S. S. Supt.
Mrs. B. B. CALDWELL, M. V. leader

Sabbath school at 10 o'clock Saturday morning.

Young people's M. V. at 12 o'clock Saturday.

LUTHERAN CHURCH
A. F. WOLFF, Pastor.

English services will be held each Sunday morning at 10:30 o'clock, with the exception of the first Sunday of each month, when German services will be held at the usual hour.

Sunday school at 9:30 a. m.

FEDERATED CHURCHES
REV. JAS. PENDLETON Minister
(Study at the Parsonage)

Church School at 9:45 a. m.

Morning worship at 11.

Rev. M. A. Covington of Lewiston, superintendant of the Idaho Children's Home Finding society, will make his annual visit to us on Sunday.

Young peoples society will meet at 7:30 p. m. Hope Michelsen will be the leader of the meeting.

Ladies aid will meet at the Social house at 2:30 p. m. on Wednesday.

Annual meeting of the church will be held Sunday afternoon September 30, at the Social house.

Gate Should be Fixed

The iron gates at the I. O. O. F. cemetery are badly in need of repair. One of the gates has both hinges broken and should be repaired at once. The cemetery, with few exceptions, is in bad condition and some arrangements for at least partial care of the grounds should be made.

The cemetery should by all means belong to the city and a fund created for the care of the grounds. The cost would be small and there are few who own lots there who would not be willing to pay their share of the necessary expense per lot for the purpose of keeping it in shape.

Many Would Fail

And now comes word from Chicago that within the next two or three years drivers of automobiles may have to pass an "intelligence" test before they will be allowed to drive a car.

It is safe to say that there would be many failures if it were put up to some of the drivers met on the road.

Many a wise man knows a few things and makes good gueses at the rest of them.

GRANT CLARK

Attention Threshermen

WE ARE entering into the harvest season this year with a splendid stand of wheat. However, there is considerable smut and the straw will be very heavy. Both of these conditions tend to increase the chances for fire. The commonest cause of fire in a wheat field is a dust or smut explosion in the separator, usually caused by static electricity.

With this in mind, the Northwestern Mutual Fire Association has placed a fire prevention engineer in the field and has supplied its agents with a limited number of wiring sets. These sets can easily be installed on a separator by the owner. Full directions accompany each set. These are given to the threshermen free of charge, on one condition only—and that is that they be properly applied to the separator.

We now have a number of these sets and will be pleased to give them to owners of separators upon application.

PERSONAL MENTION

Tony Halverson was a business visitor in town from Clarkston Saturday.

Mrs. Herbt. Potsch spent Wednesday visiting at the Pat Sweeney home in Uniontown.

Miss Marie Spuler arrived Monday from Pullman for a short visit with Mrs. Fred Shirrod.

Walter Casebolt arrived Sunday from the forest reserve where he has spent the summer months.

Harold Cox returned to his home at Swanville, Minn., after a visit with his aunt, Mrs. Ida Wheeler.

Mr. and Mrs. John Lorang and Mr. and Mrs. Peter Lorang visited in Lewiston Wednesday and Thursday.

G. R. Beckman of Moscow, district manager of the W. W. P. Co., was a business visitor in Genesee Tuesday.

Mrs. Frank Hoorman returned Sunday evening from a Lewiston hospital where she had been for the past two weeks.

W. N. Gibb, arrived Monday from Long Beach, Calif., for a visit with relatives and friends here, and also to look after business matters.

Peter Dallsego left Wednesday morning for McAllister, Oklahoma, for a visit with his sister whom he has not seen for over 30 years.

Mrs. A. Springer returned Thursday from Hunters, Wash., where she spent the past few weeks visiting her daughter, Mrs. Dave Sampson, and family.

Mr. and Mrs. Peter Lorang arrived Friday from Chicago for a visit with Mr. Lorang's parents, Mr. and Mrs. John Lorang. Mr. Lorang is a national bank examiner.

Dr. R. I. Witty left Sunday morning for Boise where he went as delegate from the local Masonic lodge, which convened there on Tuesday, lasting three days.

Mrs. Alma Butterfield of Pullman, arrived in Genesee Thursday from Lewiston where she had been visiting friends. She will spend a few days with her parents, Mr. and Mr. J. Lawson. Mr. Butterfield arrived Saturday from Pullman for a short stay at the Lawson home.

Two Small Separator Fires

Last week while threshing grain in his neighborhood Isaak Isaksen had two small fires in his separator during the same morning. He has a steel machine and by use of fire extinguishers there was little damage done. The grain was from along the road and Mr. Isaksen said the odor of matches was very noticeable in the machine in at least one of the two occasions, showing that they had been "planted" for the purpose of causing trouble to the thresherman. However, the number of machine fires have been few in this section as compared to some other places, especially around Palouse, Washington, where many machines are said to have been destroyed.

Eclipse of Sun

The eclipse of the sun which occurred on Monday from about 11:30 to 1:30, was witnessed by many and the phenomena was very evidently enjoyed. About 70 per cent of the sun was covered by the moon, visible from this section. In the New England states the eclipse showed only about 40 per cent while in Mexico extending northwest along the California coast almost to San Francisco the eclipse was total.

Many smoked glasses were in use here but many of the old timers said they would prefer to look through the old-fashioned glasses that had handles on.

Carl Osmundson Writes

A short letter has been received from Carl Osmundson who not long ago Forded it to Los Angeles with the expectations of making his home there. They are located at 382½ N. Broadway and ask that their copy of the News be sent there.

The letter says, in part:

We are renting a small bungalow and garage for $34 a month so you see rent is much higher here than there. The water here is not nearly as good as Genesee water. Genesee has this beat forty ways for climate. There has been a fog every morning since we have been here. If it was not for the water, California would be a perfect desert. The grass is just as dry and dead here as there in the summer time.

The only thing that we like about California are the opportunities for a working man and that is what we came here for. Carpenters, painters, and mechanics of all kinds get $1 an hour. I made $10 yesterday by contract. There is much work and also many men.

Property here is out of sight. The houses are merely shells, but sell for a fortune. Vacant lots, in a desirable location, sell for $1600 and up. Living is about the same as there.

I suppose that Chas. Jain's are back and have told you all about our first impressions of California.

PRUNING SMALL FRUIT

By C. L. VINCENT

Dept. of Horticulture, State College of Washington

If one is to be successful in the production of the various small fruits, the pruning can not be neglected for even a single season. More and better fruit is the reward for the grower who prunes his raspberries, blackberries, etc., regularly and well according to the best adopted methods. In addition, he will find that the pruned plants will save money for him in that they are easier to spray and to cultivate and that their fruit is more easily harvested.

Nothing is more simple than the pruning of the small fruits, provided a few principles are kept in mind. In pruning the grower should have two aims in mind to accomplish: first, to remove the old canes which are of no more value to the plant; and second, to provide a supply of new shoots for bearing the crop the next season.

RASPBERRY PRUNING.

In order to prune intelligently one ought to know something of the fruiting habit of the plant to be pruned. In common with other brambles, the canes of the red raspberry are biennial in their growth. During the first summer of the life of any cane, its entire energy is devoted to vegetative growth. The fruit buds for subsequent growth are not even set during this summer.

During gthe second summer of the life of the canes, the fruit is borne. The growth starts from over-winter lateral buds. These shoots attain a length of 9 inches to 20 inches, with alternate three-leaflet leaves. Fruit clusters are produced in the axil of these leaves along nearly the entire length of the shoot. The clusters contain from one to three or more fruits in the form of a short receme. Of these the terminal flower opens first and the terminal fruit from it is the first to ripen.

Three Kinds of Pruning.

The work of raspberry pruning is naturally divided into three parts. The first is the pruning given at the time of setting the plant. Pruning at this time may well be considered part of the setting operation. The young plants, if they are good ones which grew the greater part of the preceeding summer under favorable conditions, will have a large fibrous root system and one or two canes of varying length. f the plant has two canes one of the mshould be cut away close to the crown and the other headed back to a length of about eight inches. A very common error made by unskilled growers at planting time is to allow the long cane or even two or more of them to remain in order to obtain a small crop of fruit the first season. Under normal conditions the plants are so weakened by the shock of transplanting that the production of fruit during their first summer in the field reduces the cane growth, which will be the bearing wood for the next year's crop, to such an extent that a heavy loss is incurred by the grower.

Since raspberry canes bear fruit but once, the second pruning consists in removing these fruited canes. Opinion differs as to whether this should be done immediately following harvest or left till spring. Pruning at either time possesses some advantages. Personally I believe this work should be done as soon after harvest as time may be found and the prunest out canes piled and burned at once. Emphasis should be given the necessity of cutting the canes close to the crown of the plant. Various types of tools are used to do this work. Whatever the cype of tool used, care must be taken to avoid unnecessary injury to the growing canes. Burning the canes is one of the most important steps in controlling the crown and cane borers. n this way we are protecting the growing canes for upon their health and vigor depends the next year's crop.

Remove Surplus Canes.

The third step in pruning the red raspberry has to do with the current season's canes or the fruiting wood for next year. This involves two distinct operations. First, surplus new canes must be removed either at the time of cutting out the old canes after harvest or early the next spring. The later time being preferred in most cases especially in places where winter injury is severe. The necessity for the removal of the surplus canes arises because the crown of the plant will always produce more canes than should be allowed to bear fruit, whether the soil be rich or poor. If the excess is not removed the size and total amount of the fruvit is reduced and the plants are materially weakened. It has been found through experimenting that five to eight or 10 canes, depending on moisture supply, vigor of plant and the fertility of the soil, to be the best number to leave to get maximum annual yields.

The last step in pruning these canes consists in heading them back. The average height of the cut back canes in western Washington is about seven feet. This is done in the spring immediately before the canes are placed on the trellis. The height at which they should be headed will depend to a certain extent on the system of trellising used.

CURRANT AND GOOSEBERRY PRUNING.

Of all the small fruits, the currant and the gooseberry are the ones most likely to have their pruning neglected. These fruits must be treated in an entirely different manner from that described fo rthe brambles. The fruit bearing habits for the currant and that of the gooseberry are essentially the same, and are therefore pruned practically in the same manner. Hence they will be treated together.

In the case of the currant, the fruit is borne on three types of wood. First, new canes or suckers, which are of a light gray color having one nodes, come up near the crown of the plant and bear the finest fruit at the base of this wood the following year. Next, a large portion of the fruit is borne on short spurs. These are found on two types of wood; the very old canes from four to five years and older which is indicated by the rough, black back, produces a small amount of fruit on spurs; however the larger portion of the fruit is borne from short spurs on two and three-year-old wood, which are strong vigorous side shoots, that grew the previous season from older wood. Current canes have passed their best fruiting after the third crop.

The goosebery fruits the same aa above only the plant tends to send up fewer suckers, the bush branches more freely, hence is denser, and the length of time.

Annual Pruning.

Systematic annual pruning from time of planting should be followed. If the root system of the currant and gooseberry is extensive it may be reduced somewhat at planting time to make the planting operation easier, but is not necessary. All weak canes should be removed and the strong ones cut back to two or three buds. After the first year of growth the chief item in pruning is to remove canes which have passed their best fruiting and to repalce them with new canes. Whether this is done in the fall or spring makes very little difference. It is important to keep in mind the fact that both these fruits start growth very early in the spring and all pruning should be over by the time growth starts.

In commercial patches it is a good plan to remove a certain number of old canes each year and leave a like number of new canes to replace them. It is customary to leave from eight to 10 canes to a bush and remove all the rest. J. G. Moore of the University of Wisconsin has worked out the following interesting and practical plan for pruning these fruits. He says a three-year pruning plan, leaving six or nine canes to a plant, can be operated as follows: "At the beginning of the second season leave six strong canes. At the beginning of the third season remove two of the canes from the previous season and leave five strong new canes. At the beginning of the fourth season, remove one two-year cane, two one-year canes and leave three new canes. Thereafter the three oldest canes, those in their fourth year, should be removed and three en wcanes left to take their place. This will give a plant composed of three one-year, three two-year and three three-year old canes." If the canes left are two tall they should be cut back from 1-4 to 1-3 of their new growth. Also in removing the extra canes, take out close to the crown, all small, weak, and low growing canes. The fruit on the low growing canes becomes dirty by rain and is therefore unsalable. Dense upright growing plants can be opened up some by removing the new canes at the center.

FEW GRIZZLIES LEFT IN NORTHWEST STATES

Survivors of the many thousands of their family, which once roamed the forests of Washington and Oregon, but 22 grizzly bears remain, according to a census of wild life in the game preserves of the two states completed by the grazing department of the forest service, using reports gathered by forest rangers.

Although the grizzly bears are fast disappearing, the black and brown variety are on the increase, the report discloses. Two thousand mountain goats and 90 mountain sheep still roam the forests of the two states, while 1000 black tail, mule and Columbia white tail deer are increasing in the reserves.

There are nearly 10,000 elk in the two states, while the only antelope located are in the Deschutes and Fremont national forests of Oregon. Despite hunters' reports, no caribou have been discovered in western Washington, the rangers reported.

Devils Food Cake.

Put 1-2 cupful sugar, 1 cup milk and about 2 squares of chocolate in a sauce pan on stove, stir until it boils and then stir occassionaly for 5 minutes. Set aside to cool.

Cream 1-2 cup shortening, 1 cup sugar, add beaten yolkes of 2 eggs and beat, then add 1-2 cup milk alternately with 2 cupfuls flour, 1-2 teaspoon salt, add 1 teaspoon baking soda with 2 tablespoons of boiling water. Add the cooled chocolate mixture and fold in the beaten whites of 2 eggs.

Mix carefully and divide into two large greased and floured layer tins and bake in moderate oven for 25 minutes. Turn to cool and put together with boiled frosting. This cake stays moist and fresh for a week or more.

Spice Cake.

Cream 1-2 cup shortening and 1 1-2 cups sugar, add beaten yolks of 3 eggs and beat. Stir in alternately 1 cup milk and 2 1-2 sifted flour to which has been added 2 1-2 teaspoons baking powder, 1-4 teaspoon salt, 2 teaspoon ground cinnamon, 1-4 teaspoon mace or nutmeg and 1-4 teaspoon cloves. Bake in a loaf pan and ice with chocolate icing.

Sponge Cake.

1 cup sugar (sifted once).
1 heaping cup flour (sifted twice).
2 rounding teaspoons baking powder.
1-2 teaspoon salt.
1-2 cup milk.
2 teaspoons butter.
2 eggs.

Beat eggs stiff, add 1-2 sugar and beat. Add 1-2 flour and beat, then add remaining sugar and flour; beat. Heat milk and butter and add to batter and stir. Let set in gem pans 5 minutes before putting in the oven.

Frost with mocha or powdered sugar frosting and decorate with almonds, cherries or cocoanut.

BOOKS

INTENSIVE FARMING,

By L. C. CORBETT.

The solution of the problem of feeding the increasing population of the United States seems to lie in increased production from the available areas, and in this book Mr. Corbett shows how maximum yields can be produced by intensive farming. Some of the most helpful discussions are: Vegetable growing, frame culture, fruit growing, seed growing, irrigation, animal husbandry, the cropping system as a unit.—(The MacMillan Co., New York, $1.00).

GIRTH CONTROL, by Henry T. Flack.

In this book, Mr. Finch tells fat people how they can become lean and lean people how they can become fat—and at the same time enjoy all the pleasures of eating by simply knowing what they ought to eat. He takes up the different kinds of food, discusses the chemical properties of each, explains why the body needs each one and why it must be combined with other elements. It is written in a good-natured vein with many anecdotes so that the reader may enjoy it. Harper & Brothers, New York, $1.75.

BREAD, By Charles G. Norris.

is a story of one of the thousands of American women who sacrifices the opportunity of the home in order that she may have her independence. This novel begins with the heroine, Jeanette Sturgis, and her sister, Alice. Jeannette enters the business world and Alice marries the ordinary man on a small salary. They have their family and are happy through all the trials that befall them. Jeannette marries a salesman who is of the happy, care free kind.

His indifference to obligations and their inability to get ahead financially causes her to go back to work for her old employer. Jeannette and her husband drift apart. When she finally realizes that she has missed the really big thing in life and seeks her husband again, she finds that he has married and is happy in his new home. She returns to the city filled with grief and misery. E. P. Dutton & Co., New York., $2.00.

THE YELLOW SEVEN,

By Edmund Snell.

A secret society of bandits lived in Borneo and terrorized the law-abiding people of the island. At the head of this band was Chai Hung, one of the cruelest yellow villians ever pictured in Oriental romance. When a victim would receive a card black on one side and yellow on the other dotted in seven places, he knew that he would be the victim of some deadly Oriental devilry unless he could escape.

Chinese Pennington, a young English secret service man was set upon the trail of this gang. The contest of wits and weapons that follows makes a most thrilling narrative. An appealing love theme is woven into this story. (The Century Company, New York, $1.90).

Animal Personalities, by Samuel A. Derieux. (Doubleday Page & Co., New York. $2.00).

Growing Vegetables, by Ralph L. Watts. (Harper & Bros., New York).

A Pocket Bridge Book, by Walter Camp. (Doubleday Page & Co., New York).

The Sky Movies, by Gayiord Johnson. (The MacMillan Co., New York, $1.50).

CEREAL IN FIRELESS COOKER.

In preparing the cereal for the next morning, suggests Miss M. Minerva Lawrence, start the cereal while making preparations for supper. Measure the required quantity of boiling water, using about one-sixth less than the amount when the cereal is to be cooked over a flame. Add salt to taste, bring to boiling point, cook from five to 10 minutes. Place in fireless cooker, leave there for six to eight hours or over night.

BREAD BIG FOOD ITEM IN AVERAGE MAN'S DIET

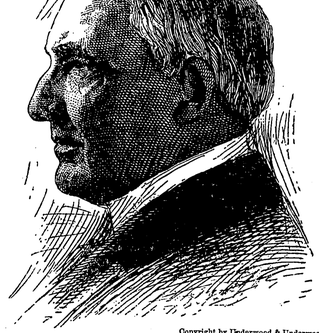
Bread takes a more prominent place than any other single article of food in the diet of the average person. It is usually served at every meal and often is the chief item. This is due, says the bureau of home economics of the United States department of agriculture, to the fact that bread contains certain food materials needed for health, and is inexpensive, wholesome, palatable, and very generally available.

When it sells at 10 cents a pound, bread furnishes body fuel or energy at about 8 cents a thousand calories. There are few common foods that supply fuel in so cheap a form. The man who works hard with his muscles can safely eat a pound or two a day without crowding out of his diet the other things he must have.

Bread is useful not only for fuel but also to some extent as a muscle-building food. Is made from the whole grain, it contributes no inconsiderable amount to the supply of mineral substances needed. Milk supplements it in some ways very well, and a combination of bread and milk is therefore a more nearly complete food than either bread alone or milk alone.

It did not take science to tell our ancestors that bread, milk, and berries make a good supper, but science has confirmed their opinion by proving that the combination provides almost everything needed for health, even to the latest word in dietetics — vitamines.

STAMP TO BE ISSUED AS MEMORIAL TO HARDING



Copyright by Underwood & Underwood, N. Y.

Exclusive photograph of the profile likeness of the late President Harding which will appear on the new Harding 2-cent postage stamp which will be offered for sale for the first time in Marion, Ohio, on September 2. The stamp is being issued as a memorial to the late President, the idea originating with Postmaster General New, a close friend to Mr. Harding. It will be printed in black with the numerals 1865 and 1923, the dates of the birth and death of the late President. The first issue will be 300,000 and the stamp will supersede the regular 2-cent stamp for 60 days.

NEW YORK GIRLS ON LONG WALKING TOUR

Cross-Country Hikers Wear Oxfords on Long Trip—Expect to Reach San Francisco This Month.

Three New York girls, Miss Joyce Shore, Miss Gertrude Silverman and Miss Yvette Ulanov, recently arrived in the state of Washington. The girls are hiking across the continent in "Truwauk" shoes. Their regular traveling is done in oxfords, but they have high-topped shoes for mountain climbing.

The west welcomes all visitors from the east, for the more who come, the less impression will prevail back there that this is the land of the "wild and woolly," the habitat of Indians and barbarians. Strange as it may seem, there still are many residents of the east who are laboring under just such a delusion. Tourists like these young women, who gain an intimate knowledge of the west by hiking along its roads and accepting automobile lifts from the natives, become the best boosters the west can have back in their own home land.

The girls left New York City July 6, and expect to reach San Francisco September 18.

Walnut Maple Cake.

Cream 1-3 cup butter, 1 cup brown sugar, add beaten yolks of 2 eggs and 1-2 cup milk. Add 1 1-3 cups flour, 2 teaspoons baking powder; 1-4 teaspoon salt. Beat and stir in 1 cup floured chopped walnuts and fold in beaten whites of 2 eggs. Bake in loaf pan 45 minutes. Cover with white mountain frosting and sprinkle with chopped nuts.

Did you ever think of a cow testing association as a labor saving device? Well it is, for it shows how to make ten cows do the work of fifteen.

OUTLINE NEW HATCHERY PLAN

Give Requirements to Be Met by Accredited Hatcheries in Washington.

By W. D. BUCHANAN,
Extension Poultry Specialist.

Some poultrymen have lost step. They are waiting for the accredited hatchery to start. It is started, and going so fast that some people will have a hard time to catch up.

Every mail brings a letter or two asking where the writer can find cockerels of the required breeding. Your county agent, if you have one, has a list of twenty-odd breeders who have this kind of stock for sale. Ask him for the list and get busy. Just now the supply is plentiful and the prices moderate. A little later they will be scarce and the prices higher.

Another lot of letters in every mail ask: "How can I get it? To whom should I make application?" Answer: You can get in by deciding to meet the requirements — and by meeting them.

Necessary to Cull Flock.

First, decide how many hens you are going to keep as breeders and then buy, or contract for, enough cockerels to mate with them. You will need at least six for each hundred hens. If you buy at three months of age, and selected carefully, you will need two for every one you wish to mature. If you are careless in selecting, you had better buy three.

This is the first step. Then cull your flock, according to the standards fixed by the state college, or have it culled by some one trained by the college. Now you are ready for business.

If you want your flock, so culled and ready to mate, accredited, send 2 cents for each hen to P. S. Dickey, secretary of the Washington Accredited Hatchery and Breeders' association, Puyallup, and ask to be put on the accredited list. The association will do the rest.

If you want your hatchery accredited, send an additional fee of $2.00 per thousand hatching capacity. If you intend to buy and hatch eggs from outside flocks, send a complete list of all these flocks. When all of these flocks are accredited, your hatchery will be accredited.

Fees to Be Paid.

This is the whole thing in a nut shell. You don't have to wait for an application blank, although these will be ready for distribution later. Simply meet the requirements as above, and state that you are ready to comply with the rules of the association, and in due time a supervisor will visit your farm. If he finds conditions as represented, you will be accredited.

Some counties are asking if they might file through their local secretary. Yes, a hundred, or a thousand, men may so file, provided that the local secretary later file all applications with the state secretary.

In conclusion, let me call your attention to the fact that there is a minimum fee of $5.00 per flock and $10.00 per thousand hatching capacity. These fees cover all flocks up to 250 hens, all hatcheries up to 5000 capacity.

"A hen ordinarily lays about 150 eggs," says Mr. Mitchell, poultry specialist. "A bird of good breeding will lay about 250 eggs in a year, nearly twice as many as are laid by the scrub hen. The most economical way of improving scrub flocks is by putting a purebred rooster at the head of the flock."

Poultrymen of the different communities of Clallam county met at the farm of Nicholas Heuhslein at Agnes for an all-day poultry cull school. Free coffee, sugar and cream were served by the Fernwood Poultry farm. There were two delegates from each of the communities.

Timber Is Problem.

The necessity of providing enough timber to supply the country's future requirements and the nation's inability to use the bulk of its cut-over or burned-over forest lands for agriculture are two problems now confronting the United States, declares the forest service, United States department of agriculture. Reforestation, both natural and artificial, on private and public lands and the full utilization of the farmers' woodlot are two of the main remedies.

Never fear the want of business—he who qualifies himself well in his calling never fails of employment in it.

Never buy what you do not need because it is cheap—it will be dear to you.

THE principle which makes Truwauk so sublimely comfortable is new in shoemaking. It had to be new to allow for the smart lines of this attractive shoe.

HAMPSHIRES 1-2-3-4-5

FOR 5 YEARS IN SUCCESSION Hampshires have won grand championship over all breeds, all ages, and all weights of hogs in the carload lots, at the International Livestock Show, 1918-1919-1920-1921-1922.
FOR 5 YEARS IN SUCCESSION Hampshires have shown the youngest, yet the heaviest spring pigs at this Show.
HAMPSHIRES ARE THE PRACTICAL FARMER'S PRACTICAL HOG, because of—their meat type—their grazing qualities—their activity, health and vigor—their highly developed mother instinct and milking qualities—their early maturity and economical gains—AND BECAUSE THEY ARE RECOGNIZED MARKET TOPPERS.
For information about Hampshires or for names and addresses of breeders near you address,
HAMPSHIRE RECORD ASSOCIATION

Dept. 22—409 Wisconsin Ave. Peoria, Ill.

IDAHO

Bankers, farmers, merchants and men in all industries attended the meeting of the Idaho Wool Growers' association, held in Boise September 10, according to Hugh Sproat, president of the state association. Matters in connection with closed cooperation were discussed.

The long fight that Benewah county has been waging to gain assessment on the Coeur d'Alene and St. Joe Navigation company was won on August 25, when the state equalization board decided that 15 per cent of the Red Collar Line's assessment was to be added to Benewah county's list.

The wheat tonnage handled over the lines of the Camas Prairie railroad, embracing the export portion of the 1923 crop, will be double that of last year, or about 6,000,000 bushels. This forecast was made recently by Robert Hanrahan, superintendent of the Camas Prairie Railroad company.

In answer to the efforts of the Civic Liberties union to obtain the release of I. W. W. held in the Idaho penitentiary, Paul Davis, state commander of the American legion, issued a statement censuring the society. He declared the men whose release is now being sought have been convicted by juries and that they believe in overthrow of the government by force and scrapping of the constitution.

The State Bank of Lamberton has attached approximately 2500 acres north of the Clearwater river, owned by the Western States Lumber company, to secure a debt of $24,188. The land is in the Caribel country, 15 miles north of Kooskia.

University circles in Idaho are saddened by the death of Dr. Charles N. Little, who retired this summer from the deanship of the college of engineering, after 22 years of service on the university faculty. Death came suddenly in Berkeley, Cal., the last day of August, and funeral services were held in Moscow, September 5.

Idaho's state treasury earned $8574 in interest for August, according to the monthly report of D. F. Banks, state treasurer, issued Wednesday. Approximately $5300 of this amount was interest on funds on deposit in state depository banks. About $2000 is interest on funds deposited in the National Park bank of New York.

The large potato surplus which last year proved disastrous to the potato growers of Idaho is not in evidence this season, according to the latest official estimates. The Idaho crop is now estimated at 12,081,000 bushels, against 15,910,000 bushels last year. Even this is 2,000,000 bushels greater than earlier estimates, but it is nearly 25 per cent below the yield of last year.

If you haven't already done so, make a dress form for the daughter before she goes away to school. Keep it at home and she can have the home dressmaker make her frocks while she is miles away.

WASHINGTON NEWS

William Thompson, aged Seattle inventor, is in Wenatchee with an apple-picking device which he claims will revolutionize the picking end of the industry. He says the picker was tried out at Puyallup this summer and was considered a success. The apples are thrown into a hopper and the construction of the invention is such it is said that the apples are not bruised, flowing from the hopper through the tube into the boxes.

A 1000-pound grizzly bear, one of the most destructive stock-killing animals in the state, was killed August 26 by State Hunter Peterson on Homan creek in the Okanogan national park, Okanogan county, according to a letter received by Federal Predatory Animal Inspector Glenn R. Bach. The big bruin had been trailed for a week and when cornered in a thicket by dogs charged the hunter. Three shots were necessary to bring him down, but the first broke his back, the letter stated.

Representatives named by Governor Hart for the state of Washington at the world's dairy congress to be held in Washington, D. C., Philadelphia and Syracuse, October 2 to 10, inclusive, are J. B. Scollard, Chehalis; O. R. McKinney, Tacoma; Dr. A. Macrae Smith, Bellingham; N. C. Sears, Toledo; A. L. Giles, Chinook; A. Kristoferson, Seattle; Ralph Tuttle, Walla Walla, and J. L. Smith of Spokane.

The Mullan Trail association met at Dayton recently, representatives attending from Walla Walla, Waitsburg, Prescott, Starbuck, Ritzville and Dayton. The history of the Mullan trail was related by E. W. Truitt, Lyons Ferry, and other members and decision was made to place appropriate markers on the trail and urge further improvement on the road between Washtucna and Lyons Ferry.

Forest Supervisor A. H. Sylvester has returned from the Cougar creek fire, which he reported under control. The fire covered 50 to 60 acres, which were difficult to reach. It was the hardest fire to fight or get to ever encountered by rangers in the Wenatchee forest, said Mr. Sylvester.

Mr. and Mrs. Stanley R. Evans of Loomis have a priceless relic in the form of a chair used by President William McKinley. The chair, beautifully carved and made of solid Minnesota oak, was presented to the national republican convention at Minneapolis in 1892, where William McKinley presided and occupied the chair. He also occupied the chair after he became president.

Up to August 18 visitors to Rainier National park this season totaled 88,000, and it is expected that the number will reach 100,000 before the season ends. At the park auto camp in Seattle 7700 autos were registered, an increase of 44 per cent over last year.

The city council at Pasco has voted $60,000 to buy the water system of the Pacific Power and Light company.

St. Michael's Episcopal church at Yakima has selected the Rev. Herman L. Page, son of Bishop Page of Spokane, as rector.

Eagles' Mardi Gras celebration will be held at Wenatchee September 26, 27, 28 and 29.

The wheat crop in the Pullman district will total 1,250,000 bushels, compared to 600,000 bushels last year.

Walla Walla reports not less than a million bushels of the new crop of wheat in that district already sold at an average of 90 cents a bushel to the growers.

Up to August 27 prune shipments from Walla Walla district totaled 864 cars and 350 more cars will be shipped.

Last week 850 cars of fruit and vegetables were shipped from the Yakima valley, bringing growers $725,000.

One day last week three lumber cargoes were shipped from Grays harbor, containing over 10,000,000 feet, board measure.

The contract for the $4,000,000 Olympic hotel in Seattle has been signed and work of construction will continue without stop until the structure is ready for business next summer. The contract price of the hotel is $3,200,000, exclusive of steel or furnishings.

Everything is in readiness for the taking of the first scene of "The Spirit of Wenatchee," a motion picture which will tell the story on the silver screen of the growth of the Wenatchee district in the last 20 years.

Saving What You Grow

Prepared by the Extension Service, State College of Washington.

MAKING TOMATOES LAST SIX WEEKS LONGER

There are many sections in the state where the tomato plant is found in the family garden. In some of these sections, great difficulty is experienced in getting tomatoes to ripen before the frosts or rains spoil much of the fruit.

Two methods have been used by the home gardener to help lengthen the tomato eating period. As soon as it is found that the rains or frost are injuring the fruit, they are picked and placed in boxes, placing only one layer in the box. By keeping them in a window in the house or an outbuilding. It is possible to ripen a number of the tomatoes.

Another method which is even better, if there is room, is to pull up the entire vine, leaving all the tomatoes on, and hang up in the barn or woodshed. The basement of the house will do all right providing there is some light.

Vines pulled and hung up with the tomatoes left on will dry up, but nearly all the green tomatoes will ripen. By using this method, ripe tomatoes have been gathered from the vines as late as Thanksgiving. Of course this would not do for a commercial gardener, but in the home garden it is a little trick which will lengthen the tomato season by six weeks.

Nothing is troublesome that we do willingly.

REPORT GRAIN CROP YIELDS IN IDAHO

Find Some Smut in Wheat and Weevil in Peas in Coeur d'Alene District.

Threshing is nearly finished in the districts about Coeur d'Alene, following the rain and wet spell, according to R. N. Irving, Kootenai county agricultural agent.

"The yields have proven very erratic, varying from 16 to 50 bushels. Yowell brothers, near Worley, report Jenkins club winter wheat that yielded 54 bushels. In general the average yield of winter wheat at Worley is 25 bushels.

"Rathdrum prairie winter wheat is yielding 18 bushels—the best crop in the last five or six years. Due to the rank growth of straw, much grain has lodged and a longer time will be required to thresh it. It will take the farmers three weeks longer this year for threshing. A very considerable acreage of spring grains is being cut with binder, header or combine and this year's crop is expected to outyield the crops for the preceding six years by from eight to 20 bushels. Oats which have been threshed yield from 30 to 65 bushels. Some of the best fields are yet to be cut. Field peas have shelled out badly since the rain and a number of farmers are contemplating hogging off the fields in order to save as large a percentage of the crop as possible. Weevil has been reported in several fields as doing considerable damage. Smut has cut down wheat yields from 5 to 15 per cent. Sooty mould, a fungus disease of wheat, has been reported in a majority of fields and it is believed it is cutting the yield 5 per cent."

Northern Pacific
Signals Cross Half the Continent

From St. Paul-Minneapolis, Duluth To North Pacific Coast

ACROSS half the continent—from the Mississippi River and head of the Great Lakes to the North Pacific Coast—the Northern Pacific is installing electric automatic block signals.

This great undertaking is nearing completion. At the close of this year's construction activities, all the main line of the Northern Pacific Railway from St. Paul and Minneapolis to Seattle, Tacoma and Portland will be protected by the most modern type of electrically operated block signals.

In addition the important main track between Duluth-Superior and St. Paul-Minneapolis has the complete standard installation.

Altogether, the Northern Pacific has more than 2800 miles of track safeguarded with automatic block signals. The cost has been more than $4,000,000.

Every possible care is taken to give passengers on the Northern Pacific safe, comfortable, quick and completely satisfactory transportation service. In the last seven years the Northern Pacific has carried 60,000,000 people safely without a single fatal accident among its passengers.

On your next trip over the Northern Pacific watch the block signals. Notice the accuracy of their operation. They are representative of the scientific precision, skill and genius which goes into the operation of the Northern Pacific Ry.

For tickets anywhere see

O. R. SUNDIN, Agent
Genesee, Idaho

In 1923

the principal signal work on the Northern Pacific is being done on the

Pasco Division, between Cheney and Pasco, Wash.—129 miles of track.

Dakota Division, between Mandan and Jamestown, N. Dak.—105 miles of track.

Fargo Division, between Jamestown and Fargo, N. Dak.—150 miles of track.

1922

Christian Endeavor Notes

By Ida Evans

The regular Christian Endeavor will be held Sunday evening, the leader will be Hope Michelson, and the topic will be "Religion and Manners."

The meeting of last Sunday was led by Conrad Caldwell. We had a very interesting meeting, the subject being "Gambling."

A mystery dinner will be given for the executive committee of the C. E. Friday night at 6:30 at the social house. All members of the executive committee are requested to be present.

We do all kinds of printing.

It is difficult to convince anmother of the soundness of your position unless you feel yourself that it is so.

Keep your troubles to yourself. You may soon become tired of them and cast them aside.

Issued Special Edition

The Lewiston Banner of date of August 31, was of 12 pages, most of the reading matter in which was devoted to the Lewiston-Clarkston Fair and Round-Up. It also carried a large amount of advertising of Lewiston merchants. Altogether it was a very creditable paper and was well gotten up, both editorially and typographically.

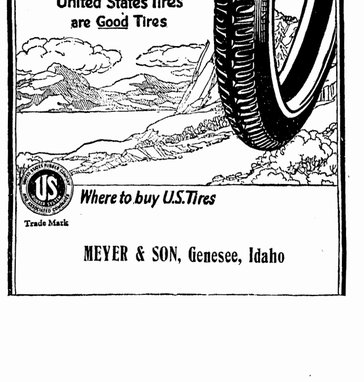
To most everybody 30 x 3½ means USCO

NATURALLY USCO'S could hardly have delivered such money's worth—tire after tire—without making a clean sweep.

It's been a pretty performance every time—no two opinions about *that*.

And no two opinions about what *tire to get again* after a man has once used USCO.

United States Tires are Good Tires



Where to buy U.S. Tires

Trade Mark

MEYER & SON, Genesee, Idaho

Newspaper Association Member No. 2350

Large Bodies Move Slowly

The bigger the body, the slower the movement. The greater the movement must be, the longer it takes to get under way.

The United States is a large body, almost entirely surrounded by good motor cars and poor roads. It is moving slowly, but surely towards a condition when it will have only good roads. The movement is slow because the body is so large, and has so many heads—110,000,000 of them.

Improving our almost three million miles of highways is a huge task. The movement is enormous. Therefore, it takes time to get under way. It is like a monster freight train, starting up a grade requiring many locomotives to begin to travel and slowly getting up speed. But once the train is in motion, it has enormous force for going ahead; one locomotive can keep it moving and it is difficult to stop!

So will it be with our road building program; slowly but surely the movement for better roads than federal aid can give, for more roads than states alone can supply, is gathering momentum. When it gets up speed, nothing can stop it.

Meanwhile the individual who needs a good road and needs it now, must not lose courage. It was said the Panama canal couldn't be built in a generation. It was built in a few short years. At the rate we are at present building Federal aid roads it will take some hundred and fifty or two hundred years to improve our road system. All of us will be very dead before that movement is well started. The answer is to change the movement, to work for, educate for, vote for, national highways, built by and maintained by the national government; give this nation two hundred thousand miles of such roads (which could with ease be built in a period of five years), and the rest of the roads will be improved in even less time, by states, counties, and towns, which will refuse to be kept from the benefits of such a national road system, when all that they need to enjoy it, is to connect it.

Sixteen Million Cars in 1925

Three hundred motor cars were registered in the United States in 1895. In 1925, thirty years after, the number will be in excess of 16,000,000.

This is not a prophecy, but a continuation of a table of registrations. In the ten years from 1913 to date, table of motor car registrations in hundred thousands, reads as follows: 12, 17, 24, 35, 51, 61, 73, 91, 104, 123.

It is hardly prophecy to say that the next two years will show figures of 140 and 160 hundred thousand, or 14,000,000 and 16,000,000 cars registered.

It is inevitable that these cars have more and more good roads to run upon. If this number of wheeled vehicles congest our few hundred thousand miles of good roads, it is obvious that a greater number will compel more and more hard-surface highways.

Opposition to good roads comes from two sources; the ignorance of tax payers, who think that the bond issue or the road tax represents outgo, instead of the means of increased income, and politicians, who desire "pork barrel" national legislation in order to get votes, rather than money to spend upon roads.

Both classes of opposition are slowly but surely being steam rollered out of existence, with the automobile in the role of steam roller.

How many cars in 1935?

MICKIE SAYS—

LAW COVERING FRUITS AND VEGETABLES PLACED ON SALE

While Genesee has only a small amount of fruits and vegetables that go on the market, the following communication from M. L. Dean, director of the bureau of plant industry for Idaho, may be of interest to some and Mr. Dean asks that same be published:

The season of fruit shipping in the State of Idaho is in full swing and as a protection to the producer—the shipper and the consumer—I wish to call attention to Section 2074 of the Idaho Compiled Statutes of 1919.

Section 2074. It shall be unlawful to sell, or offer to sell, or have in one's possession for sale or barter, any fruit which is or has been infected with San Jose scale, apple scab, or the larva or larvae of the coddling moth, or the peach twig borer, and the fact that such fruit bears the marks of the San Jose scale, apple scab, or is wormeaten by the larva or the larvae of the coddling moth or the peach twig borer, shall be deemed conclusive evidence that such fruit is infested within the meaning of this section; and it is hereby made the duty of the department of agriculture through its inspectors to prevent the sale of such infected fruit, and they are hereby given power to seize and destroy such infected fruit whenever they shall find that the same has been packed sold, shipped or offered for sale or is being held in any warehouse, store, salesroom or other place for the purpose of being sold, bartered, shipped or exposed for sale or barter; provided that nothing in this section shall be construed to prevent the utilization of such infected fruit in the manufacture of canned fruit, evaporated or dried products, fruit preserves, jellies, butters, cider, or other fruit by-products within the state as provided in section 2073.

This section outlines the responsibility of the grower, when he tries to place upon the markets any worm, scale infested or diseased fruit.

It plainly shows that such an act is a strict violation of the law, punishable by fine or imprisonment, and that the fruit is subject to seizure and destruction.

The shipper who buys that grade of fruit is subject to the same regulations and takes the fruit at the hazard of its being taken and destroyed whether it is in storage or ready for shipment or whether it is in a single package or a car load. He also is subject to a fine of $25 for the first offense, or imprisonment.

All consumers in Idaho or any other market are entitled to receive good stuff when they pay the market price for it.

The state inspectors of the bureau of plant industry and markets will be constantly in the field and one of their duties will be to examine the fruits and vegetables as they find them in the markets.

Any fruit or vegetable on any market found to be diseased or wormy or scale infested is subject to condemnation and destruction. The selling of such products is a violation of the state law.

A Fair Increase

It has been figured that a pair of rats, breeding uninterruptedly for three years, without deaths will increase the rat kingdom 358,709,482 individuals. The common brown rat breeds from six to ten times each year and produces an average of ten young. The grain eaten and wasted by these pests on many a farm would pay all the annual taxes on the place.

Poison baits containing arsenic, strychnine or barium carbonate are used to advantage. Mix one part barium carbonate or powdered white arsenic to the four parts of bait. Strychnine sulphate crystals inserted in baits are effective. Baits most used for rats are: Ground meats; fish, liver, broken fresh egg, bacon, mixed cantaloupe, melons, apples, sliced tomatoes, toasted bread, cheese and rolled oats.

Why the Silo?

There are several reasons why the silo is of value to the dairyman:

1. Silage keeps young stock thrifty and growing all winter.
2. It produces fat beef more cheaply than does dry feed.
3. It enables cows to produce milk and butter economically
4. Silage is a product that makes palatable food out of stuff that would not otherwise be eaten.
5. It enables a larger number of animals to be maintained on a given number of acres.
6. Where a rainy season destroys exposed fodder, the silo will be found invaluable.
7. It enables the farmer to preserve food which matures at a rainy time of the year when drying would be next to impossible.—Western Farmer.

Good Excuse

Jack and Mary had just been to the grown-up's church for the first time. A day or two afterward they were found in the nursery whispering audibly to each other.

"What are you children doing?" their nurse asked.

"We're playing church," replied Jack.

"But you shouldn't whisper in church," admonished nurse.

"Oh, we're the choir," said Mary.

A Pronounced Success

The uniform success that has attended the use of Chamberlain's Colic and Diarrhoea Remedy in the relief and cure of bowel complaints, both for children and adults, has brought it into almost universal use, so that it is practically without a rival and as everyone who has used it knows, it is without an equal. For Sale at Clark's Drug Store.

To Reorganize Auxiliary

Monday evening, under call of the executive committee of the American Legion, a meeting of representative ladies met for the purpose of reviving the local chapter of the Ladies' Auxiliary.

The action taken consisted of selecting a committee on reorganization. The committee consists of Mrs. T. H. Herman, chairman; Mrs. Harry Schooler and Mrs. Thomas A. Feeney. It is anticipated that within a short time the committee will call a meeting to take definite steps to re-establishment of the auxiliary in Genesee.

Post Meeting

All members of Bielenberg-Schooler post are urgently requested to be present at the next regular meeting of the post to be held Wednesday, September 19, at 8 p. m.

Trustees Sale in Bankruptcy

I will offer at public sale on the Gerard Broemmeling ranch, four miles northeast of Union Town, Wash., at 1:30 p. m. Tuesday, September 18, 1923, the following personal property of Gerard Broemmeling, a bankrupt: Horses, milk cows, stock cattle hogs, harness, wagons, farm implements, one ford car, several tons of bundle wheat hay.

Terms of sale are cash.

S. D. White,
Trustee in bankruptcy, Lewiston, Ida. 11-1

An Explanation

In order to straighten out several wrong impressions as to why I have been late in making evening delivery of milk, this explanation is offered:

I have been working late in the field gathering an abundant supply of winter feed in order to be assured of milk supply that would enable me to properly supply my milk customers, and I can now assure them that I will have an abundant supply of milk and that the evening delivery will be made about 7 o'clock, or earlier, if possible. 11-1 Dr. H. C. Luce.

GOOD YEAR Service Station

THE best footing your car can get on rain-swept streets and slippery hills is the gripping All-Weather Tread of a Goodyear Tire. The high, thick, sharp-edged blocks of that famous tread take a slipless hold and hang on with a wedgelike action that prevents side-slip or skidding.

At Goodyear Service Station Dealers we sell and recommend the new Goodyear Cords with the beveled All-Weather Tread and back them up with standard Goodyear Service

THE GENESEE NEWS

VOL. XXXV — GENESEE, LATAH COUNTY, IDAHO, FRIDAY, SEPTEMBER 21, 1923. — NO. 12

PUBLIC SCHOOL ENROLLMENT GROWS SLOWLY

The opening of the third week of school brings an enrollment of 204 students in the grades and high school of our public school system. There is a total enrollment at the Catholic school of 33 students. Of the 204 in the public schools, 82 are registered for the high school courses and a few more are expected in the next few days. It might be pointed out at this time that the enrollment in the grades is decreasing year by year, and, if the present rate continues, only a few more years will mark the passing of child life from the Genesee community. The reasons for this should form a topic of vital interest to the residents of this community—we shall refrain from mentioning any of them in this column.

Departmental work in the grades is progressing nicely and it is felt by the administration that better progress is being made than under the former system. Suggestions and criticisms from the parents and patrons of the district are solicited at all times. If you have any ideas or comment to make in regard to the school, let us have them. Constructive cooperation will greatly aid us and will strengthen our school and mean that your child will reap a greater reward for the hours spent in the class rooms.

The comparatively large enrollment in the high school shows a real community appreciation of the values of higher education. We have often wondered if you have ever stopped to think how many opportunities are closed to the one who does not complete his or her education in the high school? The day is past when an education is not necessary. The per centage of "self-made men" is swiftly diminishing and the per centage of men with a good education in the "success columns" is advancing by leaps and bounds. The world today wants men and women who are trained and the high school offers a training that is necessary for entrance into nearly all of our professions and skilled occupations. It is the most excellent preparation for the boy or girl who does not wish or cannot afford to go to college.

Here are a few of the many things that one cannot do if he does not hold a certificate of graduation from some standard high school: He cannot enter most of the colleges and universities; he cannot go to a normal or teachers' training school in most of the states; he cannot go to a first class law school; he cannot go to a first class medical college; he cannot enter a first class dental college; he cannot enter a first class school of pharmacy or a first class engineering school and cannot be admitted to the naval school of aviation or the army aviation school. He cannot get a first class position in a news paper office and cannot get a place in any business office with unlimited opportunities for advancement. Most of the larger hospitals are now requiring that all girls entering for nurse training courses be high school graduates. In all cases rewards are paid for knowledge. The high school offers you an opportunity to get a fair start towards success.

The narrow-minded sentiment of former generations, calling for a trifling education in reading, writing and numbers, is giving way to a firm conviction that the school should furnish a broad, liberal, thorough education, such as eliminates in metal and moral culture as well as in manual dexterity. Education means opportunity for increased efficiency, and efficiency can only be acquired by preparation for the exhibitation of it. Here is what the Brooklyn (N. Y.) teachers' association found in investigation as far back as 1909: the average illiterate worker of their city was getting a yearly salery of $500.00; the average boy who had secured an eighth grade education was receiving $1,353.05 by the time he was 30 years of age; and the high school graduate six years after leaving school had an average yearly salery of $1,380.00. Each day spent in high school is worth $25.00 to each pupil, each day spent in college is worth $55.55. This is more than the average boy or girl can earn by leaving school and going to work. Does education pay? It does.

Shipping on Increase

The world's merchant marine, as of June 30, 1923, has increased by 1,128,000 gross tons over the amount recorded for the same date a year ago and by 15,425,000 gross tons over 1914. Sixty-three percent of the increase for the past year appears in the German fleet which increased from 1,783,000 gross tons in 1922 to 2,496,00 gross tons in 1923. In spite of this fact the German merchant marine is still only 52 per cent of its pree-war strength.

These figures give an iden of the tremendous competition there is among the merchant fleets of the world. With less goods being transported and over 15,000,000 gross tons more shipping to haul them, the fight for commercial supremcy on the high seas becomes a fight for existence.

Read the want eds. this week.

On the Concrete

Parent-Teachers Meeting

A very pleasant reception to the teachers of the public school was held in the school building Monday evening from 7:30 to 8 o'clock and they were given a hearty welcome by those present.

After the reception to the teachers the small audience was called to order by Mrs. Lela Jain, after which a very pleasing solo was rendered by Mrs. Ernest Reisner, which was heartily applauded, and she very graciously responded with an encore. She was accompanied by Miss Jain.

Hon. Burton L. French was then introduced and gave a very interesting and instructive talk on what he had seen in Alaska during his trip to that country the forepart of June of this year. Mr. French first gave the itinerary of his trip, showing on a map just where his party had gone. He then very graphically described what he had seen in the "Land of the Midnight Sun." Being able to read a newspaper at midnight without the aid of a light was one of the novelties experienced by him. He gave much infomation about some of the very large placers that exist in that part of the country as well as information about the rivers, mountains, etc., as well as what they produce in that country in the way of stock and grain, garden vegetables and flowers.

He stated that the main livestock in that country is reindeer, of which there are some 250,00, which are herded similar to sheep in this country. There are a few cattle and hogs, as well as chickens, but the numbers of all these are small. The trees inland are of rather small dimensions both as to height and diameter, but there are many beautiful wild flowers of many varieties.

Mr. French's talk was very interesting and it was too bad that there were not more school children there to hear it.

The next regular meeting of the association will be held the third Monday in October.

Plan For Farm Storage

...Inquiries have been made from time to time at the office of County Agent O. S. Fletcher, with regard to whether or not Federal Warehouse receipts could be issued for grain in farm storage.

The county agent has received a letter from the U. S. Department of agriculture, stating that the conclusion arrived at by that department is as follows:

"A plan for farm storage within the law is along the following lines. A number of farmers in a community might form a corporate organization. The various farm storages might then be leased or sold to the corporation. The corporation could then operate the various units as a public warehouse system. When the corporation meets all the requirements of the Act and the regulations, and when it is determined that the various units are suitable for the purposes of the Act, a license will be issued to the corporation to operate the different plants. The corporation, however, would be obliged to operate the different units as public storage places."

First-Class Undertaking Service

The W. J. Herman Company has made arrangements with the Vassar Undertaking company of Lewiston whereby they will handle all cases in that line in a first-class manner at no additional charge for work in this community. Licensed embalmer, auto hearse. Phone your orders to W. J. Herman Company. Phone 6F2. 12-tf

WHAT HAPPENED HERE TWENTY YEARS AGO

Emil Thoma while rustling freight Monday morning met with a painful injury to one of his hands and in consequence has been off duty the remainder of the week.

Alonzo and Ira Hanson closed a deal Friday with Charley Bowman for the purchase of sixty acres of choice land adjoining that of their father. The price paid was $50 per acre.

Miss Edith Mervyn, who had intended to go to the University this year changed her mind and left Saturday for Walla Walla to enter Whitman college. Ilena Wood accompanied her as far as Pullman.

Congressman Burton L. French has been honored by an invitation to stump the state of Ohio in the interests of the republican ticket. We are informed that he will accept the same. The honor comes from the highest party leaders, and is indeed an honor.

Con Steltz is shaking hands with himself over his good crop this season which he had threshed and under cover before the recent rains. With an acreage of 200 or more acres he secured an average yield of 40 bushels to the acre. Sherm Wahl is another farmer east of town who harvested an excellent crop this season.

Mr. and Mrs. George Follett now occupy their new home near the park.

The council held a special session Monday evening to act on a franchise asked for by Moscow parties to construct a telephone system within the corporate limits of Genesee. The same was granted with a few alterations. They will be restricted from using Walnut street to place poles and wires on account of a former franchise granted to T. A. Pipelow to establish an electric light system. One side of the street is now occupied by the Inland people and the other side will of necessity have to be reserved.

Death of Mrs. Thurina Miller

Word has been received by relatives in Genesee of the death on Friday, August 31, of Mrs. Thurina Miller at the home of her son, Ole Miller, in the Lacombe district, Alberta, Canada, at the age of 88 years, death having been due to the general decline of old age.

Mrs. Miller was born in Norway and came to this country in 1865, settling in Wisconsin where, in 1867, she was married to Tennis Miller. To this union five children were born, four daughters and one son, as follows: Mrs. Anna Newel (deceased); Mrs. Lova Crossett (deceased); Mrs. John Mattson of Duhamel, Alta.; Miss Mary Miller (deceased), and Ole Miller of Lacombe, Alta.

In 1876 the family came west and settled on a farm just south of Genesee, which Mrs. Miller still owned at the time of her death. In 1912 she went to Canada with her children, where she resided until the time of her passing.

In addition to the two children surviving there are 12 grandchildren and 10 great-grandchildren.

The remains were taken to Wetaskiwin where the funeral was held from the Presbyterian Church, Sunday afternoon, September 2, Rev. A. L. Elliot officiating, with interment in the family plot at Wetaskiwin.

The grandchildren residing in the States are Mrs. Olie Hagan of Troy, Idaho; Mrs. Isaac Isaksen, Genesee; Miss Grace Crossett, Genesee; Mrs. John Cameron and Miss Lucille Crossett of near Palouse, Washington.

LEWISTON MAYOR SAYS "SHOOT TO KILL"

"In proper cases you are instructed to shoot, and shoot to kill," said Mayor William Thompson of Lewiston in written instructions issued Monday to Chief of Police Eugene Gasser and approved by the city council at a meeting held Monday night, according to news sent out from that city.

The action of the mayor followed the appearance Friday night of three hooded persons at the home of Georgia Cross, a negress, when threats were given her that she must change her conduct. The communication of the mayor conveying the official instructions to the chief of police follows:

"My attention has been called to an unwarranted raid made Friday night on the home of a resident of this city by a band of hooded individuals. Masked people trespassing upon private property or invading the home of any resident of this city must be promptly arrested, held and punished according to law. In case of resistance you are herby instructed to use whatever force is necessary to compel obedience to constitute authority.

"To this end you will assure yourself that all members of your force carry arms at all times and are proficient in their use. In proper cases you are instructed to shoot, and shoot to kill.

"Citizens suspected of crime, under our constitutional guarantees, are entitled to a fair trial. Our government has the sole right to sit in judgment in all cases where a law is violated, and no individual or group of individuals will be permitted to usurp or exercise any part of this authority. An attempt to do so is an infinitely more dangerous assault on our liberties and institutions than any crime thus sought to be corrected.

"A menance of this sort should not be permitted to survive in this community. To this end you will see that all your men are supplied with a copy of these instructions, and have the means and ability to carry them into effect with promptness and precision."

Legion Auxilliary Progressing

The committee in charge of the reorganization of the ladies Auxiliary to the American Legion, is meeting with encouragement on all sides among those eligible to belong.

Mrs. Mark Donaldson, Department Vice-President for Idaho, informed the local committee that the Lewiston Chapter of the auxiliary was to hold a special meeting for the purpose of co-operating with the Genesee organization. Lewiston ladies are making arrangements to visit Genesee and hold a joint meeting. It is anticipated that the Lewiston ladies will arrange to meet with the Genesee Auxiliary on Friday, September 28.

All Freight Records Broken

The week of August 25 was the greatest ever in the history of the nation for loading and transportation of freight by the railroads of the United States. During that week railroads loaded 1,003,932 cars, which exceeds by 51,393 the high record established in the fall of 1920. Up to September 1, the railroads had loaded 5,400,000 more carloads of freight than up to September 1 last year and over 7,000,000 more carloads than during the first eight months of 1921. This clearly shows the tremendous increase in all lines of business in the United States.

"Manslaughter" Saturday Night

Cecil B. DeMille's "Manslaughter," with Thomas Meighan and Leatrice Joy and Lois Wilson in the stellar roles, will be shown at the opera house Saturday night. The picture is an immensly dramatic romance of today, showing up society's jazz life and produced on a scale that exceeds in lavish spectacle anything DeMille has ever done.

Lydia Thorne (Leatrice Joy) is a proud, beautiful young society girl—the leader of her fast Long Island set—who has always had more money and adulation than were good for her. She is selfish and headstrong. Evans (Lois Wilson) Lydia's maid, steals a necklace from her mistress to save her (Evans' baby's life, and Lydia, without investigation, has the girl sent to prison. This is despite the pleading of Dan O'Bannon (Thomas Meighan) the young district attorney of the county, who is secretly in love with Lydia.

Shortly afterward, Lydia, driving her racing car in her usual reckless fashion, crashes into a motorcycle policeman and kills him. O'Bannon, grimly determined to do his duty, prosecutes Lydia for manslaughter and sends her to prison. She is bitter against him. In prison a new light dawns upon Lydia, and she comes out a changed woman—unselfish, eager to help out the poor.

Meantime O'Bannon, regretting having sent the girl to prison, goes steadily downward. At last he has a big chance to get upon his feet again. It is within Lydia's power to spoil this, and at first she determines upon revenge. But in a strongly dramatic scene love proves too strong for her and she comes to O'Bannon's arms.

Porter Sounds Warning

Commissioner E. W. Porter of the state finance and banking department warns the people of Idaho to beware of "Get rich quick" schemes that seem to be flooding the state, attracted, no doubt, by the wave of prosperity which is coming to Idaho this fall.

"From information reaching this office it is evident that numerous promoters of doubtful, dangerous and sometimes fraudulent schemes, are prepared to rush in with high-pressure salesmen," said Commissioner Porter recently." They will come to shear the lambs of prosperity confiding enough to yield to the temptation of "Get rich quick plans."

"This department is exercising deliberate caution in granting permits under the 'Blue Sky' law for the sale but wishes to warn the people that any stock that requires individual solicitation is generally hazardous. Capital is always seeking safe investments and any proposition that is safe and will yield a reasonable profit must be sought. It will not often seek the purchaser. People having funds not immediately needed should consult with careful business men before investing in any proposition not personally known to be safe.

"While the producers of the state with aching muscles are toiling as long as there is light to work to save the results of the year's program, there are cold-eyed men coolly calculating the most efficient methods of separating these industrious people from their money. Those who buy will frequently pay a tragic price for the seductive entertainment of these men. In general it is wasteful in time to listen to their chatter."

It is never amiss to speak of the good qualities of your neighbor. He might return the compliment.

SEMI-LOCAL NEWS CLIPPED FROM EXCHANGES

Burned Fiery Cross

Fair visitors and residents of the city and Lewiston were astonished last night to see a big fiery cross blaze forth on the top of the Lewiston Hill. The cross was near the top on the old road and as it was seen to light up several autos were noticed to leave it and descend the old highway. Inquiry revealed that the phenomena was a result of the activities of the members of the Ku Klux Klan who desired to show fair visitors that the Klan is active ni the two cities.—Clarkston Republic.

Rev. Carrick Transferred

Rev. J. G. Carrick, who has been local pastor of the Methodista church for the past four years, was last week at the annual conference in Spokane, assigned to the charge at Opportunity, a short ways out of Spokane, between that city and Coeur d'Alene. Rev. Carrick and his excellent family have made many friends during their residence in Asotin, and each and every one of them will wish them well in their new location. A minister, Rev. F. F. Boothy, from North Dakota, who had just been admitted to this conference, was given the Asotin pastorate.—Asotin Sentinel.

North Fork Trail Finished

Supervisor Paul A. Wohlen of the Clearwater Forest announces that the North Fork trail, which was started in 1916, was fnished Saturday, by a crew in charge of Charles Peters. The trail is 40 miles long and extends from the Bungalow down river to the McKinnon cabin, 60 miles up the river from Ahsahka. At that place it connects with a portion of the North Fork trail which has been in use for a number of years and which extends from Frank R. Slocum's place in Grangemount to McKinnon's cabin, a distance of 35 miles. The trail was built for the purpose of enabling the Forest Service to supply the region penetrated by the new trail from its supply headquarters at the Bungalow. It eliminates the necessity of packing to the region by way of the trail to Slocum's.—Clearwater Tribune.

Hold Family Reunion

One of those occasions that does not come to every family as late in life as is the case, the Lorang family was enjoyed at the beautiful ranch home of Mr. and Mrs. John Lorang when their ten children gathered at the parental home for a family reunion last Sunday, September 16. Neither is it permitted every father and mother to raise to manhood and womanhood a family of this size—a family that Mr. and Mrs. Lorang should be, and are, duly proud of.

At the noon hour the children, sons-in-law, daughters-in-law and grandchildren to the number of 27 sat down to a bounteous dinner and the occasion was one long to be remembered. It was the first time in four years that the family had all been together, owing to the fact that the eldest son, Jesse Lorang had been in the east most of that time.

The children present were B. J. Lorang and wife of Chicago; B. T. Lorang and daughter, Beatrice of Lewiston; Henry Lorang and wife and two children, residing on the home place; Albert Lorang, wife and three children of Lewiston; Miss Christina Lorang of Lewiston; Mrs. G. P. Whalen and three children, Genesee; Mrs. Raymond Kennedy and husband of Lenville; Miss Martha Lorang of Spokane; Miss Viola and Charles Lorang, at home.

Mrs. B. T. Lorang of Lewiston was unable to be present on account of the arrival of a young daughter in their household, she being at St. Joseph's hospital.

A Light Shower

A light shower fell Saturday night which washed the dust from the trees and vegetation and, while it did not lay the dust to any very great degree, it helped the roads considerably and cleansed and cooled the air. It would be perfectly alright if Jupiter Pluvius would get busy with the water stops.

Genesee Girls to Teach

Four Genesee girls have secured schools for the coming year, as follows: Miss Johanna Dwyer will teach near Deary; Miss Johanna Dwyer will teach near Troy; Miss Amalia Lawen will teach at King Hill, in the southern part of the state, and Miss Viola Weber will teach at Asotin, Washington.

Off for College

The following boys and girls have left for college for the coming year: Those going to the University of Idaho are Walter and Victor Casebolt, Jesse Gray, Orland Mayer, Bernadine Hasfurther and Ruth Wolff.

Those going to W. S. C. are Louis Bershaw and Maxine Ehlen.

Linger Longers to Meet

The Linger Longer club will meet with Mrs. Thos. H. Herman on Wednesday, September 26. A pick-up lunch will be served.

MY LADY'S MONEY

An Episode in the Life of a Young Girl

By Wilkie Collins

INSTALLMENT NO. 19.

"Three of us got the number of the note," answered Mr. Troy, "Miss Isabel Miller, Mr. Moody and myself."

"Very good," said Felix. "Send me the number, with the abstract of the case. Is there anything else I can do toward recovering the money?" he asked, turning to his aunt. "There is one lucky circumstance in connection with this loss, isn't there? It has fallen on a person who is rich enough to take it easy. Good heavens! suppose it had been my loss!"

"It has fallen doubly on me," said Lady Lydiard; "and I am certainly not rich enough to take that easy. The money was destined to a charitable purpose, and I have felt it my duty to pay it again."

Felix rose and approached his aunt's chair with faltering steps, as became a suffering man. He took Lady Lydiard's hand and kissed it with enthusiastic admiration.

"You excellent creature!" he said. "You may not think of it, but you reconcile me to human nature. How generous! how noble! I think I'll go to bed again, Mr. Troy, if you really don't want any more of me. My head feels giddy, and my legs tremble under me. It doesn't matter; I shall feel easier when Alfred has taken me out of my clothes again. God bless you, my dear aunt! I never felt so proud of being related to you as I do today. Good morning, Mr. Troy. Don't forget the abstract of the case, and don't trouble yourself to see me to the door. I dare say I shan't tumble downstairs, and if I do, there's the porter in the hall to pick me up again. Enviable porter! as fat as butter, and as idle as a pig. Au revoir! au revoir!" He kissed his hand and drifted feebly out of the room. Sweetair, one might say, in a state of eclipse; but still the serviceable Sweetair, who was never consulted in vain by the fortunate people privileged to call him friend.

"Is he really ill, do you think?" Mr. Troy asked.

"Not a bit of it," said Lady Lydiard, "I haven't done surprising you yet. You have seen a boy here in a page's livery, I think. Well, he is a good boy, and he has gone home for a week's holiday with his friends. The proper person to supply his place with the boots and shoes and other small employments is, of course, the youngest footman, a lad of only a few years older than himself. What do you think Moody does? Engages a stranger, with the house full of idle man-servants already, to fill the page's place. At intervals this morning I heard them wonderfully merry in the servants' hall—so merry that the noise and laughter found its way upstairs to the breakfast room. I like my servants to be in good spirits, but it certainly did strike me that they were getting beyond reasonable limits. I questioned my maid, and was informed that the noise was all due to the jokes of the strangest old man that ever was seen. In other words, the person whom my steward had taken it on himself to engage in the page's absence. I spoke to Moody on the subject. He answered in an odd, confused way, that he had exercised his discretion to the best of his judgment, and that (if I wished it) he would tell the old man to keep his good spirits under better control. I asked him how he came to hear of the man. He only answered, 'By accident, my lady'; and not one word more could I get out of him, good or bad. Moody engages the servants, as you know; but on every other occasion he has invariably consulted me before an engagement was settled. I really don't feel at all sure about this person who has been so strangely introduced into the house; he may be a drunkard or a thief. I wish you would speak to Moody yourself, Mr. Troy. Do you mind ringing the bell?"

Mr. Troy rose, as a matter of course, and rang the bell.

He was by this time, it is needless to say, convinced that Moody had not only gone back to consult Old Sharon on his own responsibility, but, worse still, had taken the unwarrantable liberty of introducing him as a spy into the house. To communicate this explanation to Lady Lydiard would, in her present humor, be simply to produce the dismissal of the steward from her service. The only other alternative was to ask leave to interrogate Moody privately, and, after duly reproving him, to insist on the departure of Old Sharon as the one condition on which Mr. Troy would consent to keep Lady Lydiard in ignorance of the truth.

"I think I shall manage better with Moody if your ladyship will permit me to see him in private," the lawyer said. "Shall I go downstairs and speak to him in his own room?"

"Why should you trouble yourself to do that?" said her ladyship. "See him here, and I will go into the boudoir."

As she made that reply the footman appeared at the drawing room door.

"Send Moody here," said Lady Lydiard.

The footman's answer, delivered at that moment, assumed an importance which was not expressed in the footman's words. "My lady," he said, "Mr. Moody has gone out."

CHAPTER XIII.

While the strange proceedings of the steward were the subject of consultation between Lady Lydiard and Mr. Troy, Moody was alone in his room, occupied in writing to Isabel. Being unwilling that any eyes but his own should see the address, he had himself posted his letter, the time that he had chosen for leaving the house proving, unfortunately, to be also the time proposed by her ladyship for his interview with the lawyer. In 10 minutes after the footman had reported his absence, Moody returned. It was then too late to present himself in the drawing room. In the interval Mr. Troy had taken his leave, and Moody's position had dropped a degree lower in Lady Lydiard's estimation.

Isabel received her letter by the next morning's post. If any justification of Mr. Troy' suspicions had been needed, the terms in which Moody wrote would have amply supplied it.

"Dear Isabel (I hope I may call you 'Isabel' without offending you in your present trouble)—I have a proposal to make, which, whether you accept it or not, I bed you will keep a secret from every living creature but ourselves. You will understand my request when I add that these lines relate to the matter of tracing the stolen bank note.

"I have been privately in communication with a person in London who is, as I believe, the one person competent to help up in gaining our end. He has already made many inquiries in private. With some of them I am acquainted; the rest he has thus far kept to himself. The person to whom I allude particularly wishes to have half an hour's private conversation with you—in my presence. I am bound to warn you that he is a very strange and very ugly old man, and I can only hope that you will look over his personal appearance in consideration of what he is likely to do for you.

"Can you conveniently meet us at the further end of the row of villas in which your aunt lives, the day after tomorrow, at four o'clock? Let me have one line to say if you will keep the appointment, and if the hour named will suit you. And believe me your devoted friend and servant,

ROBERT MOODY.

The lawyer's warning to her to be careful how she yielded too readily to any proposal of Moody's recurred to Isabel's mind while she read those lines. Being pledged to secrecy she could not consult Mr. Troy—she was left to decide for herself.

(To Be Continued.)

Special Cakes

Cream 3-4 cup shortening with 2 cupfuls sugar. Then add 1 cupful milk, and 5 eggs, one by one, always beating well after adding each egg. Add 3 cupfuls flour sifted with 1 teaspoon baking powder, 1-2 teaspoon salt, then add 1 teaspoon almond extract. Mix and divide into two layer tins which have been greased and bake 20 minutes in a moderate oven. Turn out and spread with butter. Put together with quartered and sweetened peaches and whipped cream and pile some peaches on top.

Jelly Roll.

Beat 3 eggs until light, add 1 cup sugar gradually, 1-2 tablespoon milk, 1 cup flour mixed with 1 teaspoon baking powder and 1-4 teaspoon salt, then add 1 tablespoon melted butter.

Line the bottom of the dripping pan with paper, butter the paper and sides of pan, cover bottom of pan with mixture and spread evenly. Bake 12 minutes in a moderate oven. Take from oven and turn on a paper sprinkled with powdered sugar. Quickly remove paper and trim off a thin strip from sides and ends of the cake. Spread with jelly or jam which has been beaten to consistency to spread easily. Roll the cake, after cake has been rolled wrap in paper that it may better keep its shape. The work must be done quickly or the cake will crack in rolling.

One Egg Cake.

Cream 1-4 cup butter and 1-2 cup sugar and add 1 eggs yolk beaten. Mix and sift 1 1-2 cups flour and 2 1-2 teaspoons baking powder. Add alternately with 1-2 cup milk to first mixture. Bake 30 minutes in a shallow pan. Spread with chocolate frosting or cut the cake in squares and spread with jam; decorate with whipped cream.

Three Egg Angel Food Cake.

Mix well and sift together 1 cup sugar, 1 3-4 cups flour, 1-2 teaspoon cream of tarter, 3 teaspoons baking powder and 1-3 teaspoon salt. Add 2-3 cup scalded milk, very slowly while still warm, beating constantly. Add 1 teaspoon vanilla extract. Mix well and fold in stiffly beaten whites of 3 eggs. Turn into ungreased angel food pan and bake in a slow oven about 45 minutes. Remove from oven, invert pan and let stand until cold. The yolks of the eggs may be used for sunshine cake.

Plain Cake.

Cream 1-2 cup shortening with 1 cup sugar. Add alternately 2-3 cup milk and 2 cups flour to which has been added 3 teaspoons baking powder. Beat and add stiffly beaten whites of 3 eggs. Bake in layers or loaf pan from 20 to 25 minutes in a moderate oven. Ice with pinoche frosting.

Drainage Pays Farmer.

That drainage pays good dividends to the farmer who needs it for his lands was shown in a demonstration conducted near Skamokawa by County Agent F. S. Martin on the farm of William Dawson. A field of 7 1-2 acres yielded 36 tons of mixed hay which before drainage yielded only poor pasture. Oats estimated to yield 100 bushels per acre were growing on part of the land drained. Mr. Dawson stated that it had made his farm and that he had increased the value of his place by $3000 with an investment of less than $800.

Wives Are Sold in the Fiji Islands

for five dollars each!"

"Ugh!"

"Shame, isn't it?"

"Yep," growled the grouchy bachelor, "more profiteering!"—Exchange.

When you have gooseberries to stem, try using the strawberry huller and you will never again use your thumb and finger.

WORLD'S NEWS BRIEFLY RETOLD

Important News of Both Hemispheres Boiled Down to Last Analysis.

Italy, having forced her will upon Greece, now is prepared to take military action, if necessary, to "defend Italian rights" in Fiume, dispatches from Rome and Athens, indicate.

Glass hair and tangerine ears will be the vogue, according to announcement made at the annual convention of hairdressers in New York. "Tangerine" refer to the color, not the shape.

The wedding of Prince Regent Hirohito and Princess Nagako, which was to have taken place in November, may be postponed indefinitely as a result of the earthquake and its accompanying misfortunes, it has been learned.

In accordance with requests said to have been made prior to his death the body of Dr. Fred M. Spiers, said to have served as United States commissioner in Alaska, was wraped in a great coat of Russian sable, furlined boots and a fur cap when it was prepared for burial. The burial robes, it was estimated, were worth $35,000.

Tokyo will remain the capital of Japan despite the disaster that has visited that city, according to a statement by Premier Yamamo and Viscount Goto, minister of home affairs, received by the Hawaii Shinpo from its Tokyo correspondent.

A farmer in Milana, Miss., has been forced to buy stepladders for use in harvesting his corn crop. He says his stalks are 12 feet high and the ears grow in pairs nine feet above the ground.

Construction work is rapidly nearing completion on the great swimming pool being built by San Francisco on the Ocean highway at Boat boulevard, which pool will be one of the largest if not the largest municipal pools in the world. It will be nearly a quarter of a mile long and can accommodate 10,000 swimmers with ease.

The dog family line at the White House will not be broken despite the change in administrations. Laddie Boy will be succeeded by his half brother as the White House dog. President Coolidge today accepted the offer of Mrs. A. B. Calhoun of Atlanta, Ga., of an Airedale dog, reputed to be a half brother of the famous Laddie Boy.

Iowa Judge Fines Himself.

Police Judge J. A. Cunningham of Dubuque, Iowa, found it necessary to enforce the law against himself in municipal court this morning. The judge had parked his car with the tail-light out and it was tagged by a watchful patrolman.

"The court fines himself $1 and costs," the judge announced.

Dr. F. G. Banting, discoverer of the insulin treatment for diabetes, has been insured for $1,000,000, it was announced today. The insurance company issuing the policy refused to disclose from whom they will receive the premium of $18,000 each year, but it was said the Rockefeller foundation, which recently bestowed a life annuity upon Dr. Banting, has guaranteed the payment.

Cutworm Outbreak.

An outbreak of cutworms occurred in the Spokane Valley which was severe in some areas. One five-acre tract of vetch cover crop was entirely defoliated. County Agent O. V. Patton has advised the use of arsenate of lead spray where it was practical to put on, and poison cutworm bait in other places. Both methods gave good results.

Although the crop estimate for the Wenatchee district is officially placed at 17,500 cars, District Horticultural Inspector Franck C. Nielson says that this estimate is conservative and practically every large packer and shipper in the district is of the opinion that the crop will exceed 18,000 cars, while some place it at 20,000.

The Japanese government has appropriated 530,000,000 yen (approximately $250,000,000) for relief work. This decision by the cabinet at Saturday's sitting represents the greatest relief measure in the history of the world disasters.

When making bed sheets put wide hems both at the top and bottom. It may then be reversed, the wear will be evenly distributed and the sheet will wear longer.

WASHINGTON NEWS

The Northern Pacific railroad is handling the largest movement of Washington berries and soft fruits in its history, according to reports compiled in the office of W. C. Showa terdivision superintendent. The berry special, running on passenger train schedule, which started about the middle of June, is still in service, a berry train going east every day. These trains have been running as high as 16 cars to the train.

George J. Cannon of Buckeye, president of the Pacific Northwest Potato Growers' association, and E. R. Bennett of Boise, Idaho, secretary of the association, recently conferred with W. P. Romans, secretary of the annual potato show, held in Spokane, relative to plans for a potato conference in Spokane, November 19-23.

A representative of the Foster Russell Aviation company, of Spokane, recently made arrangements whereby one of the models of the smallest airpanes in the world is to be on display at the 10th annual Stevens County Live Stock show and fair held in Colville, September 19, 20 and 21.

Surveys have been completed and construction crews began work recently on the proposed connection in the Coeur d'Alenes, between the power systems of the Washington Water Power company and the Montana Power company. This connection will permit the sale of as high as 20,000 horsepower of electric current by one company to the other and establish a through power connection from eastern Montana to Puget Sound cities.

At the time of the closing of the 30th annual interstate fair and live stock show, which was held in Spokane, September 3-8, President Griffith believed that the association would be able to pay all expenses and have a balance left for next year's show.

Broadcasting station K F A E at the State College of Washington is back on the air again for the winter, Monday, Wednesday and Friday nights at 9 o'clock. Since additional power (500 watts), entitles the station to higher rating, a new license will be issued, when fans may tune in on a 330-meter wave length. At present it is still on the old wave length, 360 meters.

About 1275 cars of soft fruit went to market from the Yakima valley the last week, 382 being pears, with a value of $936,500; 4545 cars valued at $3,272,400, have been shipped. Peaches totaled 1114 cars, out of an estimated crop of 1200. Tota's on all fruits exceed earlier estimates.

Word has been received from Yakima that the Northwest Hay association, a cooperative growers' organization, of Walla Walla, Kittitas, Benton and Yakima counties, obtained large accessions to its ranks in signing contracts with the United States Development company's members.

The forestry service is assisting in the statewide campaign against the entrance of the white pine blister rust, which has reached Canada and is progressing toward the Idaho forests, according to A. H. Sylvester, supervisor of the Wenatchee forest. Posters with pictures showing the symptoms are being placed in prominent places and any one noticing these symptoms is requested to notify the forest service.

All berry plants shipped into this state must be accompanied by a certificate of inspection showing them to be free of cane gall or strawberry weevil, under an order promulgated by E. L. French, director of agriculture.

The Wenatchee Commercial club and the United States labor office announce that the greatest apple harvest in the history of the Wenatchee and Okanogan valleys will commence about October 1, at which time there will be employment for several thousand men and women in the orchards and warehouses of the district.

Send the Japanese earthquake victims wheat, flour and potatoes, rather than cash, is the substance of a new move started by W. H. Talley, secretary of the Washington Farm Bureau. Mr. Talley has consulted the farm bureau of Walla Walla, Whitman, Lincoln and Spokane counties, as well as the chamber of commerce and reports that they all approve of the move.

The plant of the Columbia Ice & Cold Storage company, of Wenatchee, is turning out 135 tons of ice daily and has 16,000 tons stored in preparation for the apple shipments sent from that district. The company expects to be able to ice an average of 80 refrigerator cars daily.

WESTERN SHEEP GET TOP PRICE

University of Idaho Rams Sell Well in National Sales Competition.

MORE HOGS IN PRUSSIA

German Supply of Pork Larger Than Last Year—3100-Pound Steer Brings $250.

At its first appearance at the annual national ram sales at Salt Lake City, Utah, recently the University of Idaho, with a consignment of 28 head of Rambouillet, Hampshire, Lincoln and Suffolk rams, secured results which rank the flocks developed by the Idaho institution among the best of those developed by any state institution in the nation. The Salt Lake ram sale is perhaps the outstanding sheep event in America, and only the more aggressive state institutions meet with success in competition with the foremost independent breeders.

In competition with about 1800 Rambouillets and 700 Hampshires and proportionately high entries in the other breeds, the university secured satisfactory returns. The 11 Rambouillets sent to the sale averaged $63, five Hampshires averaged $84, 10 Lincolns averaged $48 and the two Suffolks sold for $150 each.

Pork supplies in Germany will be somewhat larger next winter than they were last year owing to a considerable increase in the number of hogs in Prussia, says a report to the department of agriculture from its representative in Berlin. A hog census was taken in Prussia June 31. Although not thoroughly made in the occupied regions, it is believed to indicate the position with fair accuracy. Stocks of hogs for the whole of Prussia were estimated at 9,460,700, compared with 8,683,936 in June, 1922, or an increase of 780,000 head. Although these figures indicate improved meat supply conditions, the need for imported pork and pork products remains large. This is shown by a comparison of the present number of hogs in Prussia with the 15,000,000 head held in 1914. Actual requirements thus point to a continuance of heavy importing, but currency difficulties are seriously restricting the trade. American packers have suffered large losses in Germany from this cause during the last two months, the report says. They have been handicapped both by diminished sales and by losses on consignments due to changes in exchange rates.

The second annual 300-Mile Colorado Endurance Ride, conducted under the supervision of a number of organizations interested in the development of horses with speed and endurance under the saddle, was concluded early in August, and was won by "Norfolk Star," a thoroughbred mare, owned and ridden by Captain H. E. Watkins, Fort Russell, Wyoming. Second place was given to "Nintu," a thoroughbred mare owned and ridden by Lieut. M. M. Corpening, Fort Sill, Okla. The ride this year radiated from the Broadmoor hotel, Colorado Springs, Colo., and consisted of five days' riding of 60 miles each. Each horse carried 225 pounds and in order to acquire a perfect time score should complete each day's ride in 9 hours or 45 hours for the 5 days. Nineteen horses started in this ride, of which seven finished.

"Animals cannot be successfully produced without the aid of scientific knowledge regarding their health," says Dr. E. E. Wegner, dean of the school of veterinary science at the State College of Washington, discussing the present demand for doctors of veterinary medicine. "This is particularly true since the days of intensification of producing qualities. In breeding, rich feeding, lack of exercise, high production, group housing, infected quarters, all have served to reduce the stamina of our animals and intensify the dangers of disease. What will prevent disaster? Specialists who have studied these problems and are capable of advising the livestock producers. The livestock men are anxious for such service and are willing to pay for it."

What is conceded to be the largest steer yet seen in the Winnipeg stock yards was sold during the week. The animal weighed 2,170 pounds and sold for $250, the highest price brought at local yards since the war. The animal which came from a Walnwright, Alberta, ranch stood six feet at the withers and is destined, for a while at least, to be a side show attraction.

The happiest man is he of whom the world says least.

Air Disarmament To Be Considered

American Delegates Will Bring Matter Up Before Convention of Interallied Service Men.

(From the American Legion News Service.)

Indianapolis, Sept. 10.—American delegates to the interallied Veterans' Federation convention, to start September 1 in Brussels, will urge veterans of the allied nations to join the American Legion in proposing to their respective governments that an international conference be called to limit military aircraft armaments to end the present mad race for superiority which threatens the peace of the world.

Alvin Owsley, legion national commander, made this statement before sailing for Europe with the legion's delegation to the federation conference. Members of the legion's delegation to the federation meeting which will represent fifteen million world war fighters are: Col. H. Nelson Jackson, Burlington, Vt., international vice president of the veterans' organization; Brig. Gen. L. R. Gignilliat, Culver, Ind.; Brig. Gen. Roy Hoffman, Oklahoma City; R. E. Condon, New York; Ernest O. Thompson, Amarillo, Texas, and H. H. Polk, Des Moines.

Commander Owsley stated that a necessity for immediate action in the matter of limitation of air armament exists, statistics gathered by the legion show that France has 140 squadrons of military flying machines and intends to have 220 squadrons by the end of 1925. Included in the armament are planes which carry 75-millimeter cannons, planes which can transport six machine guns and their crews, enormous bombers, special fighting ships armored with battleship steel and actual troopships of the air.

England, according to the legion, is France's nearest competitor and in response to suggestions of its statesigts, has voted an extra $250,000,000 to enlarge its air armada. The creation of a separate air force by Italy, with extensive plans for its rapid development into a powerful fighting machine, is taken by the legion as an indication that Italy will enter the international air race. Russia, the report points out, is employing German technicians and is using German machinery to advance toward its air goal announced by Moscow as 10,000 planes.

All members of congress, governors of all states, 1,000 editors, 100 college presidents and a number of prominent citizens have been asked by the legion to express an opinion on the proposal, which would involve the holding of a meeting in Washington, similar to the naval disarmament conference, to be attended by representatives of all leading world powers for the purpose of agreement on reduction of air forces.

One of the first replies came from Senator Henry Cabot Lodge of Massachusetts, chairman of the senate committee on foreign relations, who was a member of the American delegation to the Washington arms conference of 1921 which negotiated the five-power treaty for the reduction of naval forces. Referring to the 1921 conference, Senator Lodge wrote: "It seems to me that this arrest of competition was the most vital object in the work of the conference. I think we ought to have similar limitations in regard to the construction of military or naval aircraft, provided that the agreement for the limitation is international. Nothing could be worse, in my opinion, or more likely to produce war than for one nation alone to disarm or limit armaments. That is a temptation to conflict and to attack upon the unarmed nation. Whatever is done must be done by international agreement. Therefore, I favor your proposal of an international conference."

The American delegates, following the completion of the convention in Belgium expect to travel extensively through France and the war zone region of Europe. They will visit the Ruhr and possibly Holland. During their visit they will be the guests of the King of Belgium, the governments of England, France and Holland, and possibly the King of Italy. While in Belgium they will be received by Cardinal Mercier.

The Interallied Veterans' Federation was formed in Paris from the ranks of world war fighters of the United States, France, the British empire, Italy, Belgium, Czecho-Slovakia, Roumania and Serbia (now Jugo-Slavia). Charles Bertrand of France was elected first vice president of the organization whose object was defined by its constitution "to maintain apart from political tendencies the bonds of fraternal comradeship between allied combatants on the battlefields." Its second world conference was held in New Orleans last fall in conjunction with the legion's national gathering. At this conference a manifesto was adopted summarizing the federation's program for world peace. This included the support of a world court, a proposal for suspension of commercial dealings with nations maintaining large military forces for purposes of aggression, stabilization of exchange rates, suppression of radicalism and other measures.

General approval of the manifesto was granted by a number of prominent students of international affairs to whom it was sent by the legion for consideration, among them was the late President Harding, who said: "I do not subscribe to unconditional agreement in every detail, but as a general enunciation of principle and purposes the manifesto lays down a very wholesome program which gives great promise of promoting peace. I note what you have said concerning the reduction in future peace councils by those who know intimately of the suffering and sacrifices of war. I very much doubt whether it will be practical in a half century to come to have the United States becomingly represented in international councils without some in the delegation who can speak for those who participated in actual warfare."

The legion believes that its proposal for an international air disarmament conference is one of the first steps to be undertaken toward world peace and its delegates will work toward that end at the Brussels conference.

Better Health Service

Public Health Is Public Wealth.

These Articles Compiled by the Public Health League of Washington

IT PAYS TO AID THE EYES.

A little girl, writing an essay on 'Corn' said: "Each ear of corn has many sides." Similarly, each school problem has many sides. One side of the problem of good vision is that it pays to aid the eyes.

A school pupil who can not see the blackboard is handicapped and he handicaps the school as well. His progress is retarded; his school course is prolonged; and the extra time and attention necessitated by prolonging his attendance crowds the rest, who are, in turn, retarded. It has been estimated that one-fifth of the time given to the schools is given to retarded progress. Now, it costs about two hundred dollars to give a pupil a years schooling. Thus the cost to the state from prolonging the attendance of retarded pupils is enormous. And, what is worse, perhaps, is that pupils who are not so handicapped and who are capable of progress are held back and neglected and turned out poorly equipped.

Now, much of the poor vision mentioned is ameuable to treatment. Quite often a simple inexpensive pair of glasses will enable the pupil to see the blackboard very wel. The whole school situation is changed for him. The correction of his poor vision makes a new world for him. One little fellow, on getting his glasses exclaimed: "Why, gee whiz. I can see the leaves on the trees." In the 'twinkling of the eye' he is changed from a discouraged drag on the school, and a drain on the state to a bright and happy scholar.

But a word of warning at this point seems necessary. Parents, seeking aid for their children's eyes, should seek the best aid obtainable. The physician oculist should be consulted, not the optician optometrist. Get the distinction clearly. The oculist is the physician; the optometrist is an optician. The former is prepared to find and correct all the conditions in the case that interfere with good vision. The latter is prepared only to fit glasses. If it is only glasses that are needed, the optometrist may perhaps be sufficient. But what parent can be sure that only glasses are needed? Get the best, then. It will pay you.

All these observations are trite, perhaps, but they are not trivial. They have been said many times before; but it seems necessary to say them again. To the advantage of the pupil; to the advantage of the schools; to the advantage of the state taxpayer it pays to aid the eyes.

WHEAT FARMERS TO DECREASE ACREAGE

Raise 73,000 Acres Less—Washington Acreage Still Above Pre-War Average.

Farmers have reported to the Bureau of Agricultural Economics, U. S. Department of Agriculture, their intention to decrease the acreage of winter wheat in Washington by 73,000 acres in comparison with last year. This is shown on the "Farmers' Intention Survey," just issued.

"Wheat occupied 1,052,000 acres in pre-war times," said Dr. S. B. Nelson, director of the extension service of the state college. "In 1922 there was an increase of 404,000 acres in winter wheat over the period of 1909 to 1913. This year, if the intentions of the farmers reported are followed out, there will be 1,383,000 acres of winter wheat, or still an increase of 331,000 acres over pre-war times.

"In estimating the amount of winter wheat intended to be sown, it has been found that there is an average of 9.8 per cent abandoned, either by not sowing or by not harvesting. Considering this figure of abandonment, there will be 135,000 to deduct from the 1,383,000 acres, or a total winter-wheat acreage of 1,247,000.

"Our average production of winter wheat during the past 24 years has been 25.7 bushels per acre. With the million and a quarter acres planted this fall, it might seem that Washington's winter wheat crop for 1924 would be 31,299,700 bushels.

"The estimate in the July Crop Report show a total of 39,576,000 bushels for the present harvest. If the intentions are carried out by the Washington farmers, next year's crop will be a reduction of over 8,000,000 bushels.

"It is the intention of the 25,000 farmers in the United States who reported to the department of agriculture, to decrease the acreage 15.5 per cent or 7,177,000 acres. If this reduction is made, it will make a total sown acreage this year of about 39,200,000 acres, compared with the 46,379,000 acres actually sown last fall. The average annual sowing in pre-war times amounted to 33,741,000 acres, so it will be seen that if the 15.5 per cent reduction is made, the winter wheat acreage will still be 16 per cent higher than in pre-war times."

By using a dish drainer, mother would soon have a vacation, for it has been found that it saves half an hour per day in a family of four.

A man with scrub cattle is like a builder with bad lumber.

Brighter Future For Agriculture

"Despite the present agricultural depression involving low prices and the liquidation of excessive land values, the longer outlook for American agriculture is distinctly more optimistic," declared Dr. L. C. Gray, economist of the United States department of agriculture, addressing the American Association of Joint Stock Land Banks at Chicago recently.

Dr. Gray based his conclusion on the fact of a steadily increasing population co-incident with a reduction in per capita acreage of crop and pasture lands made necessary by the low quality of the greater part of the area still available for the expansion of our farming area. He pointed out that prospective competition of the three uses—crops, pasture, and forests—for the remaining humid area will soon become much more intense because of the necessity of growing our timber instead of cutting from a stored supply.

Dr. Gray cited statistics to show that the high point in the supply of crop and pasture land in proportion to population was reached several decades ago, and that as population increases in the United States, most of the land that is now devoted to production of surplus crops for foreign consumption will be required to meet domestic demands for food.

Within 30 years, Dr. Gray said, "we are likely to find ourselves on an import basis or at least forced to protect our producers against the exports of other surplus producing nations. Consequently a large section of American farmers will benefit by the transportation differential between the locality of production and the more distant centers of world consumption."

Plasterer at $104 or Professor at $40

The report that plasterers' wages of $104 and more a week are causing student ministers and other professional men to take up the trowel in Evanston, Ill., where work on a new hotel is in progress, has excited much interested comment by educators. Ministers have been indignant that a divine deserted his church for the opportunities to earn more money putting up walls and engineers have been up in arms because a graduate civil engineer is said to have refused a professorship in order to don overalls and work with lime and sand.

"There are much better things in the world than money," said a prominent Washington, D. C., minister, who refused to be quoted in criticism of a brother clergyman. "Men do not seek the ministry for its material rewards. To desert a pulpit because of greater financial reward in plastering or any other occupation, is to quit in the middle of the fight, which does more harm to individual, the nation, and the character than ten times the wages earned could pay for."

That many teachers in schools resign to take up more profitable lines of work is a confessed evil of the American public school system. But it is generally felt that the answer to the problem does not lie in restricting the profits of manual or skilled labor, but in making teaching, the ministry, and other "white-collar jobs" more attractive by a more just scale of salaries.

IDAHO

In accordance with a proclamation issued by Governor C. C. Moore, citizens of Idaho observed September 17, the anniversary of the signing of the United States Constitution, as "Constitution" day.

Contracts for building three grade schools at Coeur d'Alene and installing plumbing and heating equipment have been let by the Coeur d'Alene school board. The contracts total $65,265. The general building contract was awarded to A. W. Barker & Sons of Coeur d'Alene for $51,000 and the plumbing and heating contract to Cope Brothers of Coeur d'Alene for $14,175.

County Commissioner John Amblie of Priest River, reported that the Priest River-Laclede hill road was out of commission. Irrigation water from the Charles Huckleberry farm, on the west side of the hill, he said, had caused a quicksand subsoil to slide downhill, taking out the road.

The session of the War Mothers of North Idaho held at Sandpoint recent.y, resulted in the election of the following officers for the ensuing year: President, Mrs. Margaret Wolfen, Lewiston; first vice president, Mrs. Linna Fairweather, Wallace; second vice president, Mrs. Mary Hadley, Sandpoint; secretary, Mrs. Mary Harford, Wallace; recording secretary, Mrs. Frances Peanott, Sandpoint; treasurer, Mrs. Eva Finstad, Priest River.

With the institution of a four-year course in architecture this fall the University of Idaho becomes the third college in the northwest to grant a degree in architecture. The architectural department is being started under the direction of Rudolph Weaver.

Miniature models of ideal types of Holstein-Friesian cattle, presented to the University of Idaho college of agriculture by the Holstein-Friesian Association of America indicate that Idaho Violet Posch Ormsby, outstanding record winner in the university's Holstein herd, whose blood dominates nearly half of the present herd, was of almost the ideal type.

Lewis county, Idaho, was awarded five out of seven prizes on wheat exhibited at the Spokane Interstate fair.

Due to improved water supply and generally favorable weather, the head lettuce crop in Lewiston Orchards is in first-class shape, according to D. S. Wallace of the Lewiston Valley Head Lettuce association, a recognized authority on agricultural lines in that region.

Two new additions to the University of Idaho faculty have been announced from the office of President A. H. Upham. These two new appointments, one in the department of botany, and one in the department of home economics, fill the faculty roll for the coming college year.

The largest cattle sale of the year at Lewiston has been closed with the decision of James Madden, of the Snake and Salmon river district, to retire from the cattle business and again engage in sheep growing. He has sold his entire band of 700 head to Andrew Nelson of Enterprise, Ore., the reported consideration being $42.50 for yearlings and over.

HE'LL KEEP THIS ONE.

"Uncle, can you keep a secret?" asked little Willie.

"Yes."

"Well, Auntie has eloped with the chauffeur, and they borrowed your motor."

The major at a certain recruit depot was approached one day by a man who had obviously been in the service only long enough to draw his uniform. The rookie failed to salute, but the major, a kindly man in spite of twenty years of army life, overlooked it.

The buck gazed with respectful awe at the string of campaign ribbons across the major's broad chest.

"Gosh!" he remarked, "you must be an old-timer."

"Yes," answered the major pleasantly, "I am."

"Say," began the buck cordially in a whisper, "do you ever drink anything?"

The major was truthful as well as kindly. He admitted that once in a while he took a small nip, and then turned away, as his new-found acquaintance was proving embarrassing.

"Wait," said the hospitable rookie, "I got some here.

This was too much for a kindly disposed major.

"Corporal of the guard!" he bawled.

"Aw," protested the buck, "don't call your friends; there's only enough for two."—Exchange.

Pride costs us more than hunger, thirst and cold.

ALL SPACE FILLED AT WEST SIDE FAIR

Concessions Rush to Get Locations—Expect All Exhibit Buildings to Be Crowded.

Farmers who want to exhibit the best of their products, livestock men who have to carry an extra suit case to move their blue ribbons from place to place, lunch counter men and hotdog and novelty venders are all racing to see who can be first to secure space at the Western Washington fair at Puyallup this year.

The fair does not open until October 1 but the rush is already on.

The first of the large herds to be entered was by the Day & Rothrock company of the Hercules Stock farm, Spokane, which made reservations of space for the fine lot of Shorthorns which will be on the fair circuit this year.

Henry Huff, superintendent of the agricultural and horticultural department, a place he has held for twenty-three years, has accepted entries of five community exhibits and is beginning to wonder where he is going to put all the pumpkins, apples, corn, grains and other farm products which are certain to be offered. His building is one of the largest on the grounds, 70x230 feet.

Enumclaw is going to be a contender for the $50 first prize for community exhibits this year and according to Mr. Huff has an excellent chance of winning. The selection of exhibits will be made by T. A. Garrett, president of the Newaukum Community fair, and Petros Nelson of the Enumclaw Commercial club, from the best shown by the farmers at the Community fair which will be held on the Farmers' picnic grounds near Enumclaw on September 29 and 30, two days before the opening of the fair at Puyallup.

A fruitgrower in Chelan county has sent word that he expects to compete for the prize given for the largest apple at the fair, and Fred Johnson, superintendent of the poultry department, reports that among the first requests for entry blanks were several from British Columbia. Oregon poultry fanciers will be well represented this year, as heretofore, and Oregon stockmen will also send some of their finest cows and bulls to compete for the blue ribbons.

Following the policy of previous years, President W. H. Paulhamus of the fair association, has given concessionaires who treated the public right the opportunity of keeping the same place this year or of renting other or additional booths if others did not wish to return. The result of this policy is that applications for restaurants and similar concessions have accumulated for months past and now, when he is ready to take them up, Mr. Paulhamus finds that practically all concessionaires who were at Puyallup last year want to return and only a very few spaces are open. Because the attendance at the fair has been rapidly increasing, reaching 133,000 last year, and also because the fair will run full seven days this year, October 1 to 7, both inclusive, prices on all concessions have been increased about 25 per cent. But this is not deterring applicants; they don't ask the price; they want to know if they can get a space and how much they must pay down to hold it.

Whatcom Farmers Raising Pure Seed.

As a result of the efforts of county Agent Carroll farmers of Whatcom county will have several tons of pure seed to sell this season. Handschen Barley has proved an excellent crop for the county and seed of this as well as Bluebell peas and Victory oats will be on the market.

The city council of Pasco recently voted unanimously to accept the report of Engineer R. M. Murray on the proposed new water system. The report provided for taking the water from the Columbia river, instead of wells as first contemplated, and for the installation of two pumps, each 1200 gallons capacity, and utilizing one of the old pumps for emergency. Some new mains will be laid, but mots of the old system will be used both for irrigation and domestic water.

Scrub stock multiplies just as fast as purebred, but it never gets the right answer.

Some fairs have passed, but others are coming. Did you exhibit?

Rainy weather will soon be here; let's try and get a cover crop that manure pile so it won't all wash out.

Somebody said don't can fruit, for it will be jealous, but the careful housewife need not worry.

At the present market prices, silage makes the steer grow at a profit.

You can not get lost on a straight road.

Attention Threshermen

WE ARE entering into the harvest season this year with a splendid stand of wheat. However, there is considerable smut and the straw will be very heavy. Both of these conditions tend to increase the chances for fire. The commonest cause of fire in a wheat field is a dust or smut explosion in the separator, usually caused by static electricity.

With this in mind, the Northwestern Mutual Fire Association has placed a fire prevention engineer in the field and has supplied its agents with a limited number of wiring sets. These sets can easily be installed on a separator by the owner. Full directions accompany each set. These are given to the threshermen free of charge, on one condition only—and that is that they be properly applied to the separator.

We now have a number of these sets and will be pleased to give them to owners of separators upon application.

Word from the Jains

A short letter from the Chas. Jain family is to the effect that for the present they are located at Yakima, Wash., and asking that their copy of the News be sent to 112 South Eighth street, in that city. The letter says, in part, "We are located here for the present. Don't know just how long we will be here, but for a few months at least as Chas. has found enough to do to keep him out of mischief. This is a very busy little city and looks far better to us than anything we saw in California."

Yakima must be some busy place if it can keep Charley Jain out of mischief. His many friends here congratulate both he and the city of Yakima on the accomplishment.

Mercury Descends

The mercury on Monday night reached a new low point for this fall, registering 32½ degrees, and as a result vegetation of all kinds on the flat looked like it had been badly dealt with.

Bielenberg-Schooler Post The American Legion Meets Each First and Third Wednesday at 8 P. M.

Legion Observes Constitution Week

Bielenberg-Schooler post of the American Legion is co-operating with other organizations for the proper observance of Constitutional week, September 16 to 22.

The main purpose of the observance is to re-establish the constitution of the United States and the principles and ideals of our government in the minds and hearts of the people.

On Friday afternoon, Attorney Thomas A. Feeney, will speak on the Constitution to the students of the Genesee public schools.

Legion Meeting

The regular meeting of the local Legion post was held on Wednesday evening at the Legion hall. Delegates to the recent convention at Coeur d'Alene gave detailed reports of the activities of the convention. For the meeting of October 3, it is planned to hold an "indoor track meet." The committee in charge refuses to reveal the nature of the competitive events, but promises to have such a varied program that every member will be given an opportunity to show his prowess in some sort of contest.

For the meeting of November 7, a committee is already making plans for a smoker and Dutch lunch.

Essay Contest

James Winegardenr, chairman of the Legion Americanism committee, has the national essay contest well under way among the school children of Genesee. He is desirous of securing the co-operation of the teachers of the rural schools and is requesting each of them to give an assignment of the subject "Why America Should Prohibit Immigration for Five Years," to all students between the ages of 12 and 18 years.

Harvest Dance

A harvest dance will be given in the American Legion hall on Saturday night, September 22, to which the general public is cordially invited. Good music will be furnished.

Notice

Economical conditions demand that the long time account system cease. Years ago the manufacturer extended months of credit to the jobber; the jobber passed it on to the retailer, and he in turn favored his customers.

Today the manufacturer sends a sight draft with the bill-of-lading to the jobber, the jobber extends 10 to 15 days credit to the retailer, and successful retailers all over the country have followed suit.

Experience has proved it is the only fair, sane and consistent method.

On and after October 15, 1923, as a protection to themselves and in a spirit of fairness to all concerned, the undersigned will extend credit **only on a thirty day basis**, by special agreement.

The current month's bills are due and payable on or before the 10th of the following month.

Signed,
Follett Bros. Mercantile Co.
Emmett & Boliou.

No Substitute Offered

Say what would you think about druggists offering something "just as good" because it pays a better profit, the fact still stands that ninety-nine out of a hundred druggists recommend Chamberlain's Colic and Diarrhoea Remedy, when the best medicine for diarrhoea is asked for, and do so because they know from what their customers say of it, that it can be depended upon. For Sale at Clark's Drug Store.

We do all kinds of printing.

Threshing Nearly at End

If the weather man will hold off for just a few more days the threshing in this part of the country will be at an end—or nearly so. The bulk of it is done at this time, but there are a few odd jobs to be taken care of yet. However, the majority of the farmers are ready for rain and most of them are well satisfied with the harvest justfinished. The grain is of good quality and the average yield is from 30 to 35 bushels per acre. Now if they could only get what they should have for each and every bushel threshed this section of the great Palouse would be on Easy street.

Gone to Haiti

Word from Mrs. M. J. Schooler of Berkley, California, is to the effect that her daughter, Miss Ida Schooler, sailed on September 1 for Port au Prince, Haiti, to be gone a year and that she will probably visit Europe before she returns home. Her mission to the foreign land was not stated.

Mrs. Schooler also said that Mr. and Mrs. Chas. Jain and daughter, Miss Olive, had spent a couple of nights at her home during their trip to California.

Wedding Shower

A shower was given at Smolt's confectionery Tuesday night in honor of Miss Isabelle Springer. A mock wedding ceremony was preformed, and a very enjoyable time had by all. The bride-to-be received many beautiful and useful things, among which were silverware and linen. Refreshments of ice cream and cake were served and dancing was indulged in after which congratulations were offered.

Sticky Fingers

A resident in the west part of town reports that last week a pair of ladies' woolen hose and a pair of men's kid gloves were taken from his porch. He says this is not the first time things have been taken from his premises and that it will have to stop or proper steps will be taken to abate the practice.

PERSONAL MENTION

Miss Mae Hummel spent the week-end with friends in Moscow.

Ray Potter left Friday evening for Lewiston to spend the week-end with home folks.

Mrs. Wood Gash left Saturday morning for Coulee City on business and pleasure.

Clarence Doyle and Oscar Nelson left Saturday morning for Spokane for a short stay.

Mrs. Dena VanBuskirk left Saturday morning for Pullman where she will spend the winter.

Mr. and Mrs. Ed Lillyrose and children left Tuesday for Kellogg where they intend to reside.

Lois and Wilson Esser left Saturday morning for Colton after a visit at the Charles Greiser home.

Mrs. Alonzo Hanson and children of Tekoa spent Sunday with her parents Mr. and Mrs. Henry Rees.

Mr. and Mrs. Peter Lorang left Monday morning for Lewiston for a short visit with relatives and friends.

Mrs. Mary Wahl was a Thursday morning passenger for Johnson for a visit with her daughter, Mrs. Ada Maxwell.

Mrs. Hattie Herman was a Friday morning passenger for Spokane for a visit with Mrs. Emma McMahon, who is ill there.

Mrs. O. R. Sundin and children returned to Spokane Sunday, after the week-end spent with Mr. Sundin at the depot.

Mrs. Harry Thatcher and Mr. and Mrs. Gene Jones of Moscow spent Sunday at the Glen Sampson hame. Mrs. Sampson returned to Moscow with them and spent a few days.

Mrs. Al Mayer and little son, Glen, left Saturday morning for Minneapolis, Minnesota, where they will visit relatives. They will also visit at Mora, and Duluth, Minnesota, on the return trip.

Birthday Surprise Party

A very pleasant birthday surprise party was perpetrated on Dave Garrett at his home in the west part of town Wednesday evening when many friends and relatives gathered to help him celebrate his birthday anniversary.

The evening was spent in playing progressive pinochle at which the first prize was awarded to Mrs. John G. Meyer and C. Scharnhorst was awarded the consolation prize. At midnight a very delicious lunch was served by the hostess and at an early hour the guests departed for their homes declaring they had a very delightful evening.

Those present were Mr. and Mrs. C. Flomer, Mr. and Mrs. H. Flomer, Mr. and Mrs. H. Koester, Mr. and Mrs. B. Jutte, Mr. and Mrs. E. Jutte, Mr. and Mrs J. G. Meyer, Miss Henrietta Blum, Miss Laura Blum, Mrs. H. Wessels of California who is visiting at the H. Flomer home, Carl Scharnhorst, and D. Scharnhorst.

Word From the Martins

A few lines from Benj. H. Martin of Los Angeles, formerly of the Follett store, is to the effect that "Things in southern California are still on the boom and generally is seems to be a good place to be in," says Mr. Martin.

Continuing he says "We have a dandy little store and are doing just fine in it. Now we are trying to find one just as good for the Jacksons. They both arrived here hale and hearty and had a fine trip clear through."

Replaced Entrance

The big steel plate at the entrance of the Follett store has been replaced with rough cement, which will make it much safer for those entering that institution in rainy or snowy weather.

Christmas Cards

You may think it a little early to begin to advertise Christmas greeting cards, but we just want to call your attention to the fact that we will this fall have one of the largest and finest assortments of personal Christmas greeting cards that we have ever brought to Genesee. While they have not arrived as yet, they have been ordered and they will be the very newest thing in that line to be had.

Don't place your order elsewhere until you have seen our samples and gotten our very low prices for this beautiful line. As soon as they arrive an announcement will be made in the News, then you can come in and place your order and have them all ready for Christmas time when it comes—and it will be here almost before you know it. It is only a little more than three months away, and none too early to begin to think of the kind and amount of Christmas greeting cards you are going to need.

This year we have added more new type to our large assortment and you will have a nice line to select from.

To know how good a cigarette really can be made you must try a

LUCKY STRIKE "IT'S TOASTED"

New Coyote Club

And now comes Brigadier General Cody (Bufalo Bill) Rader and says that he will not in the future be bound by anything that ex-Captain Fat Sumpson of the coyote club may say or do; that Fat has violated all the rules and regulations of the club by organizing a female contingent and taking them out on the Coyote Club's preserve and scaring all the coyotes out of the country.

General Rader says Fat got up real early the other morning and gave the rest of them the slip and got all the women together that he could muster, armed them with very large caliber rifles and, after securing a lunch, several cushions, and enough fresh meat to feed all the coyotes in the country, sallied forth. That after reaching the chosen field of the Coyote club, Fat proceeded to place the cushions on nice soft rocks for the ladies and took the fresh meat and went down in the canyon and scattered it all the way to where the bombarding party was waiting on their cushions, expecting the coyotes to become so interested in eating the fresh meat that they would walk right up and be slaughtered by the fair shootesses.

General Rader has issued fair and final warning that such conduct is unbecoming a member of the Coyote club and says that Fat's membership card is hereby revoked.

And thus endeth the first chapter of the first "squabble" of the coyote season. (Another chapter will be added later).

"We Killed a Bear"

There was great excitement around the Clark drug store last Friday forenoon when word was telephoned in Mr. Clark that there was a bear runnin' wild out near the Baumgartner place just south of town. Grant got his gattling gun down off the peg, summoned reinforcements in the form of John Vandenburg, and a few others, chartered Ray Edwards' truck, with Ray at the helm, and away they went to the scene of the coming conflict, where it evidently was to be a fight to the death—and it was, only Grant didn't give the little fellow a fair chance to get away. The bear was headed toward him—or nearly so—and he let drive as the animal was galloping for his life, hitting it just in front of the left shoulder. The animal was a brown cub and weighed about 60 or 65 pounds.

Mr. Clark skinned and cut it up into the proper-sized pieces and passed most of it out to his friends, who thoroughly enjoyed the very tender and juicy steaks and roasts. The News family came in for a share which was duly appreciated and enjoyed.

Grant says it isn't worth while to go way up in the Selway country after game when a fellow can stay at home and have it come right up to him.

You are cordially invited to call and see the new patterns of

DISEASED COWS BEING REMOVED

Dairymen Refuse to Keep Herds Found Tubercular—Find Small Number Left.

UTAH BUYS DAIRY STOCK

Second Shipment Leaves Washington —County Agents Instrumental in Improving Herds.

To ascertain the extent to which cattle that have reacted to the tuberculin test are being held as segregated herds in the United States, a recent survey was made through the field offices of the bureau of animal industry, United States department of agriculture.

Data gathered show that there are within the United States only 201 herds containing 2,461 tuberculous cattle permanently maintained for breeding purposes. In addition, there are on 191 premises 447 animals, which on June 30, 1923, were being held temporarily for various reasons. This is a total of only 392 premises on which there are 2,908 head of tuberculous cattle that have been held longer than the usual 30-day period.

Frequent discussion of the problem of retaining diseased cattle after they have reacted to the tuberculin test has led to the belief that the idea might be favorably looked upon by the livestock owners of the United States. The figures quoted above, however, indicate that the progressive American farmer is desirous of totally eradicating the disease at the earliest possible moment, which undoubtedly accounts for the small number of such cattle being held. Prompt slaughter of cattle reacting to the tuberculin test is the prevailing custom in the United States, since the results obtained from holding cattle do not appear to justify the additional labor and expense.

The second shipment of dairy animals was made from western Washington recently to their destination in Weber county, Utah, near Ogden. There were mostly Holsteins in the car, but it included also several Guernseys and Jerseys. They were sold to the Weber County Holstein Breeders' association members and their neighbors for use on their farms to build up the dairy industry in that part of the state. The animals were purchased from the following breeders: Two 6-months-old heifers from Ed Hoem of Snohomish; one yearling bull from Carnation stock farms, King county; two bull calves from Hollywood farms, both sons of Judge Segis; seven Guernsey bulls and one heifer from herds near Astoria, Ore., and six Jersey bulls from the vicinity of Salem, Ore.

Some interesting figures have been compiled by the United States department of agriculture to show what can be made from a definite quantity of milk. Using 100 pounds of milk which tests 4 per cent, it has been found that this quantity will make about 4.8 pounds of butter, 11 pounds of Cheddar cheese, 45 fifteen-ounce cans of condensed milk, 12.5 pounds of wholemilk powder, 8.5 pounds of Swiss cheese, or 23 pounds of Camembert cheese. The exact amounts of these products that can be made from 100 pounds of milk varies with the richness of the milk in fat and other solids. A number of by-products are also formed by the different processes.

Ten head of purebred Guernsey cows and heifers have been added to the herds of two dairymen in Skagit county. Assistance in selecting these animals was given by County Agent C. H. Bergstrom. Also two purebred Guernsey bulls were placed. Both animals have records backing them of 720 pounds of butterfat. The cows and heifers are sired by a bull whose seven nearest dams have records exceeding 700 puonds of butterfat. There were seven Holstein bulls placed with individual dairymen during the past month.

Holstein breeders of Stevens county met at Addy, Wash., and formed the county breeders' association. T. C. Bell, Colville, was elected president; Rolla Fisher, Addy, secretary and leader in placing bulls; Mrs. Joe Reynolds of Meyers Falls was put in charge of Holstein calf club work. The board of directors are T. C. Bell, Paul Schneiter, Rolla Fisher, Howard Winded, and Oliver Leiser. John L. Smith, a Holstein breeder of Spokane, and W. E. Meyer, a field man for the Holstein-Freisan breeders' association, were present and together with County Agent Henry J. Plumb, assisted in the organization.

Two new purebred bulls were placed through the efforts of County Agent W. W. Henry with dairymen in King county during the past month. Warren Wiley of Kent secured a young Jersey bull from H. L. Allen company of Duvall to be used as a club bull in the Sunnyhill community. The dam will make about 500 pounds of butterfat on the cow testing association record. W. J. Orton of Renton, secured a pruebred Guernsey sire from Wallace & Fordyce of Sunnyside. This animal placed fourth in a class of 18 sires at the Pacific International Livestock show last year.

BOOKS

Cooperative Marketing.
By HERMAN STEEN.

This is a complete story told for the first time of the up-to-date "sales department of the farm." It tokens prosperity on a firm foundation. A story of first interest to every householder and student of farm affairs. It is an account of the growth and operation of the great cooperative associations in the United States and Canada. (Doubleday Page & Co., New York, $2.00).

Wild Animal Homesteads.
By ENOS A. MILLS.

This is a series of stories of our wild animals of the West in which Mr. Mills tells us of many strange and unusual facts about the animals that only a naturalist could reveal.

The death of Enos A. Mills in 1922 filled with a sense of deep personal loss the minds of those who knew the nature guide in his books and at home in the western mountains.

Beside Animal Homsteads, he wrote Waiting in the Wilderness and Watched by Wild Animals. (Doubleday Page & Co., New York City).

"The Middle of the Road."
By PHILIP GIBBS.

"The Middle of the Road" may be said to be one of the best examples of sugar-coated pills to be found in contemporary literature. With bold, graphic strokes, it pictures in minute and comprehensive detail the political and economic condition of the people of Europe and America, at the same time weaving in a refreshing love plot and character studies which make the principals stand out clear-cut from the pages.

What makes this picturization of peoples so delightful is the fact that its conclusions seem so fairly drawn from the author's exhaustive investigations.

Only a man of vision capable of sweeping the world's horizon could have pointed out the world significance of events and the leading characteristics of the political whips of France, England and America as Philip Gibbs has done. One can not fail to admire the dauntless courage and virile artistry of the author of "Now It Can Be Told" and, "More That Must Be Told." He's "Jolly well not going to let this old world forget the war" until he feels it never wants another one. In some degree, the novel is a dramatized version of the two other works.

The plot, with its misunderstood husband and unsympathetic wife, reminds us of "If Winter Comes," but it is on a bigger, grander, saner scale. It shows the perils of the "middle of the road" policy to the individual, but likewise the success of the policy for nations. (Doran, New York City, $2.00).

Europe and Elsewhere.
By MARK TWAIN.

This is a new collection of articles by this eminent writer, many hitherto unpublished. The greatest humorist writes of instructions in art, with illustrations by the author. Below are a few quotations taken from this book which will give the reader a better insight into its pages than a formal review:

"My reputation came very suddenly and I tumultuously when I published my own portrait, and it turned my head a little, for indeed there was never anything like it. In a single day I got orders from sixty-two people not to paint their portraits, some of them the most distinguished persons in the country—the President, the cabinet, authors, governors, admirals, candidates for office on the weak side—almost everybody that was anybody, and it would really have turned the head of nearly any beginner to get so much notice and have it come with such a frenzy of cordiality. But I am growing calm and settling down to business now; and pretty soon I shall cease to be flurried, and then when I do a portrait I shall be quite at myself and able on the instant to tell it from the others and pick it out when wanted.

"The next picture is part of an animal, but I do not know the name of it. It is not finished. The front end of it went around a corner before I could get to it. . . .

"The great trouble about painting a whole gallery of portraits at the same time is, that the housemaid comes and dusts, and does not put them back the way they were before, and so when the public flock to the studio and wish to know which is Howells and which is Depew and so on, you have to dissemble, and it is very embarrassing at first. Still, you know they are there, and this knowledge presently gives you more or less confidence, and you say sternly, "This is Howells," and watch the visitor's eye. If you see doubt there, you correct yourself and try another. . . . It is much better to label a portrait when you first paint it, then there is no uncertainty in your mind and you can get beta out of the visitor and win them." (Harper & Brothers, New York, $2.25.)

The First Days of Man.
By FREDERIC ARNOLD KUMMER.

This is the first volume of the earth's story as narrated in very simple language for young readers.

The author tells of how the earth and all the living things upon it began to be put and its proper perspective every fact of a child's world as he discovers it. The woods and outdoors become doubly fascinating to the child who understands and the acquisition of knowledge becomes an easy and delightful game. The other two volumes of this series are "The First Days of Knowledge" and "The First Days of History." (Doran, New York, $2.00).

We never repent of having eaten too little.

Bathing Beauties of the East

Styles in bathing suits, as seen on the popular eastern beaches, range from the simplest one-piece affair to the most elaborate, be-ruffled costume with hat to match. Above are a few of the state champions in a national bathing beauty contest held on the beach at Atlantic City.

NEED MANY OFFICE JOBS FOR VETERANS

Vocational Bureau Asks Co-operation of Employers in Placing Hundreds of Graduates.

Employers of this district who are aiding in the big job of placing in employment injured war veterans who have completed vocational training courses can not lose by giving these deserving men preference, Pacific northwest officials of the United States Veterans' bureau state. Graduate trainees are given try-out periods with prospective employers at the expense of the government, it was announced.

With the peak of training completions in full swing, the Veterans' Bureau finds it harder to secure employment opportunities for bookkeeping and clerical help than any other of the many occupations for which service men are trained. Hundreds of positions must be forthcoming from employers of Washington, Oregon and Idaho during the next four or five months if the situation is to be met successfully, it was stated.

The chamber of commerce of Portland and the Associated industries of the Inland Empire, Spokane, are cooperating actively in this drive for employment opportunities. Each has established an employment service unit to bring the rehabilitated veteran and the employer with a job together.

Employers in sympathy with the veterans' employment program should get in touch with the nearest office of the veterans' bureau either by letter, telephone or personal contact, district and branch offices being located in Seattle, Portland, Spokane and Boise.

MENUS FOR THE WEEK

SATURDAY

Breakfast.
Cantaloupe
Cream of Wheat — Cream and Sugar
Poached Eggs on Toast
Coffee — Milk

Lunch.
Cream of Tomato Soup — Saltines
Potato Cakes — Buttered Carrots
Bread — Butter — Jelly
Concord Grapes

Dinner.
Meat Loaf — Tomato Sauce
Mashed Potatoes — Creamed Lima Beans
Vegetable Salad — Butter — Bread
Peach Cobbler

SUNDAY

Breakfast.
Orange
Dry Cereal — Sugar and Cream
Waffles — Honey — Boiled Ham
Coffee — Cocoa

Dinner.
Roast Lamb with Gravy — Mashed Potatoes
Creamed Cauliflower — Kale — Currant Jelly
Rolls — Butter — Celery
Peach Ice Cream, Cake

Supper.
Soft Cooked Eggs — Irish Brown Potatoes
Bread and Butter — Fruit Salad
Watermelon

MONDAY

Breakfast.
Peaches
Oatmeal — Cream and Sugar
Scrambled Eggs and Bacon — Toast
Coffee — Milk

Lunch.
Cream of Potato Soup — Croutons
Tomato and Cucumber Salad
Whole Wheat Bread — Butter
Apple Sauce — Plain Cookies

Dinner.
Swiss Steak — Creamed Potatoes
Combination Salad — Fried Egg Plant
Bread — Butter — Celery
Watermelon

TUESDAY

Breakfast.
Cantaloupe
Cream of Wheat — Sugar and Cream
Boiled Ham — Toast — Butter
Jelly — Coffee — Milk

Lunch.
Egg and Potato Salad
Scalloped Corn with Bacon
Bread — Tea — Butter
Peaches with Cream

Dinner.
Pot Roast — Brown Potatoes — Gravy
Creamed Carrots — Cold Slaw
Bread — Butter
Apple and Celery Salad — Saltines

WEDNESDAY

Breakfast.
Bananas
Oatmeal — Cream and Sugar
Griddle Cakes — Syrup — Bacon
Coffee — Cocoa

Lunch.

Grapes

Dinner.
Stuffed Spare Ribs — Mashed Potatoes
Cold Slaw — Creamed Carrots — Bread — Butter
Caramel Custard

WASHINGTON CABBAGE SEED IN BIG DEMAND

Cabbage seed valued at more than $7000 has been shipped east during the past week. The shipment, which totalled 5623 pounds, was made through the Skagit Valley Seed Growers' association for distribution in Illinois and Wisconsin. J. C. Walker, seed expert for the Kraut manufacturers' association in these two states, and who made the selections, accompanied the shipment.

The seed is of the finest quality, free from diseases prevalent in these two eastern states, and will be used to restock the cabbage farms there.

Accessories will play a very important role for the coming season and gauntlet cuffs on frocks and suits are in high favor just now.

CUT ASSESSED VALUE OF IDAHO FARM LAND

Last Year's Valuation Reduced Over $6,000,000 by Board of Equalization.

The equalized valuation of lands in Idaho on which the farmer pays taxes is more than $6,000,000 less than it was in 1922, it is announced by Idaho's state board of equalization.

Part of this decrease was made by the board , and the remainder was brought about by the work of the county assessors and the county boards of equalization.

Accurate figures on the state's valuation for this year will not be available for several days, but a brief summary shows that the equalized valuation of all property in the state for 1923 has been decreased approximately $1,250,000. A further decrease of $322,000 on public utility property is to be added to this, making a total reduction in the valuation of all real property in the state of approximately $1,600,000. Last year the state had a valuation of $457,975,586.78.

Decreases by which the farmer benefitted were made by the board on agricultural land, dry land and milk cows. On these three items the reductions amounted to $17,209,481.80. From this amount however, there is to be deducted an increase in the value of irrigated land amounting to $10,309,752.34.

In contrast with the decrease made on farm lands, the figures issued by the board show an increase of more than $1,000,000 in the valuation of sawmills and lumber. Every dollar of this increase was made by the board, and is divided about equally between the mills and lumber. An increase of $817,030 was made in the valuation of sawmills, and $851,341.40 in the valuation of lumber in the sawmill yards.

Business Talks to Young Girls

By Vera Gordon
Who is soon to appear in Samuel Goldwyn's film — "Potash & Perlmutter"

II.—Choosing the Right Vocation.

Before you determine what your vocation is to be, you must decide what your real desire is. Ascertain clearly what you want from your work. If it is merely a few new clothes, or a little money, or a tideover for the slack period between school and possible marriage, then choose a work which does not demand much from you. For really you are quite lazy. Your viewpoint betrays it. And the sad part of it is that there are so many workers like that. Girls depend upon some strange prince, some outside being to come into their lives and transform them. Once in a hundred times, this does happen. But oh, dear girls, this is so seldom. If you are considering business at all, consider it worthily.

You must look at your life as a whole and not as a fragment. Regard your work as your great outlet of expression, as something big and fine, as the means by which you shall win the heights you have dreamed for yourself. The greater career of home-building and the bearing of little children may come to you. I sincerely hope it will. But meanwhile look at your lives as men do theirs. Consider your entire life and business in its relation to it. Be brave enough to figure where you want to be at fifty in the event that you are still alone in the world and have no protection but that of your own achievement. For if love does come in and cut your business career down to only a few years, you will be, nevertheless, glad that while you did work your attitude was that of the girl with definite objective, the girl strong enough for conquest.

Given this attitude, look about at the various vocations. There are some two hundred of them and thanks to the amazing advance women have made in the last 75 years practically all of them are open to you today. Realize this fact.

There is a too great tendency on the part of girls to seek the "white collar" jobs, that is, stenography, typing and other office positions. As a result this field is over-crowded, making its workers underpaid. Office work is often called a "stepping stone" to higher positions. Without doubt it is, but stepping on so crowded a stone makes the competition for your eventual success very fierce and your chances just that much smaller.

Avoid, in fact, all "blind alley" jobs. Seek a line where your individual initiative will count. If you are capable of assuming responsibility, so much teh better. If you work best under direction from a superior, choose work that does not throw you entirely on your own to make good. If you like people, get into a line that gives you a close personal contact and this asset will help you. Selling of insurance, bonds, and securities is at the present offering woman a big field. Space forbids my telling you more now, so watch for my next article.

COLOR APPLES WITH REFLECTED SUNLIGHT

Wenatchee Men Experiment on Methods of Coloring Apples on Shady Side of Tree.

How long will it be before the orchardist will be coloring fruit on the under side of the low hanging branches by the use of reflected sunlight. A highly interesting and unusual experiment along these lines is being conducted by the American Fruit Growers at a ranch near Wenatchee, and the experiment has proven partly successful. Recently about 30 members of the 1923 orchard excursion inspected the trees on which the experiment is being tried. After making a careful check of the trees on which the shaded fruit is allowed to color normally they were firmly convinced that the idea has unlimited possibilities. Under one tree a large square of white beaverboard had been placed at an angle that reflected the afternoon sun up through the low hanging branches of the tree onto the under side of the apples.

The fruit thus exposed to the reflected light showed a distinct shade of color, while the fruit located similarly on the trees and not subject to the reflected light was distinctly and decidedly green. Under other trees slacked lime had been placed and although the reflecting qualities of this material did not appear to be as great as those of the beaverboard, still there was a decided tinge of color on the fruit. In another case clean straw had been put under several trees for the same purpose and even here the shaded fruit seemed to have a slight flush.

AUSTRIANS THREATEN MAGNESITE INDUSTRY

Four Austrian firms have applied for a reduction of 50 per cent in the tariff on magnesite and magnesite industry of Stevens county, which has undergone a hectic career since the ending of the war knocked the bottom out of prices on this mineral and opened the foreign field to importation, is again threatened.

The magnesite industry was put entirely out of business following the war by the importations of Austrian magnesite, which before the war was the world source for this product.

A long and bitter fight, fathered by former United States Senator Miles Poindexter, resulted finally in the passage of a tariff on magnesite of $11.50 a ton on the dead burned product and $6 a ton on the crude product.

This allowed of a gradual resumption of operations in the great magnesite mines of Stevens county, and they are only now getting onto a sound production basis.

WHEAT IS GOOD FEED FOR HENS

Low Price Makes It Valuable as Substitute for Corn in Poultry Rations.

With the price of wheat in several states lower than, or about equal to, the price of corn, poultry specialists point out the desirability of giving wheat an important place in poultry rations. The influence of war-time conservation of wheat is still evident, but there are no longer any economic reasons for conserving wheat or using it solely as a human food. On the other hand, it is so plentiful and cheap in many localities that it is a more economical livestock and poultry feed than corn.

Corn and wheat are the two best grains for poultry and are about equal in value for this purpose, although wheat can be fed alone better than corn, which is inclined to be fattening. Best results are obtained when wheat and corn are combined about equally in egg-laying rations. Following is a good scratch mixture: 1 pound cracked corn, 1 pound wheat, 1 pound oats.

While wheat is an excellent feed for dairy cows and meat animals, it needs to be ground for best results with such stock, whereas poultry relish it and utilize it as whole grain.

The department points out also that wheat at 89 cents per bushel, which was the approximate current price recently in seven middle western states, is $29.66 per ton, which is a lower price than prevails for various other feeds having no greater nutritive value. The department's recommendations for putting wheat back on a prewar basis as a stock feed are reinforced by action alredy taken by some farmers. A co-operative association of Michigan frmers recently published a list of feeds for which wheat could be more economically substituted. This association contends that the local wheat market was below the cost of production and that local wheat would bring more when fed to livestock than when sold on the open market.

CO-OPERATIVE EGG MARKETING.

The farm poultry flock has been made a source of cash income as well as of food for the family by many farm women who have learned from their agricultural extension agents the best methods of poultry management and preparation of products for market. The experience of the women of Fairhaven (Ga.) community, is typical of the work in many states. These farm women, desiring to improve the earnings of their flocks, brought eggs to the weekly meeting of the extension club, where the home-demonstration agent showed them how to grade and pack properly for shipment.

This was continued each week until the members were able to do the work themselves. They then organized to ship their eggs co-operatively, secured as customer a grocery store in a near-by city, and, according to reports to the United States department of agriculture, have been carying on a satisfactory business for more than a year.

New co-operative egg marketing associations organized in 1922, according to reports, handled 490,000 dozen eggs; in 1921 some 400 new organizations handled about 200,000 dozen eggs.

The hen that lays 10 eggs per month eats as much as the one laying 20. Why keep the former one when it is possible to get the latter kind?

Balanced rations for feeding their livestock more satisfactorily and economically were figured, with the assistance of agricultural extension workers, by more than 58,000 farmers in 1922, according to reports to the United States department of agriculture.

An editor was dying, but, when the doctor bent over, placed his ear on his breast and said, "Poor man. Circulation almost gone," the dying editor shouted: "You're a liar! We have the largest circulation in the county!"

Saving What You Grow

Prepared by the Extension Service, State College of Washington.

From Hog to Ham.

The proper time to begin curing pork is when the meat is cool and still fresh, or about 24 to 36 hours after killing. Use a clean, hardwood, molasses or syrup barrel in which to cure the pork. A large stone jar is best, but the cost is high.

Salt, saltpeter, sugar and molasses are the principal preservatives used in curing the pork. A good grade of dairy salt, or salt intended for table use, is reasonably free from impurities and gives the desired penetration in less time than impure salt. Saltpeter is used to hasten the curing of the meat. Use sparingly. Sugar and molasses soften the muscle fibers and improve the flavor.

Place for Curing—A cool, well ventilated cellar, free from rats, is the most desirable place for both brine and dry curing. The smokehouse may be used when curing by the dry salt method, but special attention should be given to the ventilation to prevent excessive dryness. It is best before using any method of curing to rub the surface of the meat with fine salt and allow it to drain, flesh side down, from 6 to 12 hours.

Dry Cured Method—For each 100 pounds of meat use 8 pounds salt; 2 1-2 pounds molasses or syrup made from sugar and applied hot; 2 ounces saltpeter, 3 ounces black pepper and 2 ounces red pepper.

Mix ingredients well. Rub over meat thoroughly and pack it away in a barrel, box or on a table. About the third day break the bulk and repack to insure through contact with the cure mixture, then allow the meat to remain until the cure is completed. This will take two days to cure for for each pound that the individual pieces of meat weigh; for example, a 10-pound ham will take 20 days. When the meat is packed in tight barrels the liquid will aid in curing the heavier pieces of meat, which should be at the bottom. After the meat has cured hang it in the smokehouse without washing.

(Next week—Sweet pickle or brine cured pork.)

Will you need some tonic next winter? Can it now in jars in the form of vegetables.

FIRST SHIPMENT OF MARBLE CHIPS

The Italian Marble Products company has made the first shipment of its product from the new plant during the week. This shipment was of two large cars and went to a concern in Seattle.

Marble in various forms has been shipped from this section for a good many years, and three years ago the manufacture of marble chips, a product used in tarrazzo floors and various other purposes, especially in big public buildings was commenced. This product has found a ready market always, but it was not until a few weeks ago that a plant was gotten in operation with capacity to meet the demand. The daily capacity of the present plan is about three carloads a week.

Pure Seed for Douglas County.

Farmers in Douglas county will have a large supply of pure seed wheat to sow next season. This condition is the result of a campaign for pure seed conducted for the past few seasons. It is estimated that several thousand acres will be sown with pure seed wheat, which will eliminate the loss because of dockage from mixtures.

Irate Customer: "I want my money back for this here corn syrup.

Salesman: "What's wrong with it?"

I. C.: Wrong? Say, I used it fer a week an' my darn corns is sorer than ever!"

SPOKANE, WASHINGTON

This Picture Wins First Prize in Northwest Children's Contest

This picture of little Louise May Pankey, of Selah, Washington, wins a prize of one hundred dollars, because it ranked highest among three thousand amateur photographs submitted in a Northern Pacific Railway contest.

So many fine photographs of healthy, happy children outdoors in the Pacific Northwest were entered in the contest that the judges had a hard time picking the winner. But little Louise May and her friend the fawn made such an appealing picture that they won the award for the child's mother, Mrs. Geo. Pankey, who took the picture.

Some of the selected contest photos will be used in advertising the Pacific Northwest as a wonderful place in which to live. Amateur photographers from Minnesota, North Dakota, Montana, Idaho, Washington and Oregon submitted pictures for the Northern Pacific prize.

LITERALLY ROB FARMERS BY HIGH FREIGHT RATES

Charges that the interstate commerce commission is permitting the railroads "literally to rob the farmers" through the imposition of unreasonable freight rates based on fictitious investment values, was made at the grain rate hearing before Ex-General W. D. Rankin, at Helena, Mont.

The attack of the attorney general of the state came after W. L. Stockton, vice president of the Montana farm bureau, had charged that United States crop reporting statistics showing surplus of wheat do great harm to the farmer and are of value to gamblers on grain exchanges. He alleged that the term "surplus" is more or less of a misnomer for the reason that despite the fact that a surplus is reported from year to year all of the wheat is eventually consumed.

Stockton says that aside from opening up a new avenue of trade and making possible disposal of wheat that cannot be sold in the country, a foreign market is not of value to farmers.

Records for 20 years, he said, show that the farmer never has and never can expect anything in the way of high prices through export of wheat and that exporting wheat must always be associated with low prices. He declared that high prices can be expected only when it is not necessary to export wheat and that while the Pacific coast export differential is welcomed by the farmers it would not benefit them in the way of securing high prices but would enable them to dispose of wheat at low prices which they otherwise could not sell. Except for the foreign outlet, however, he said that prices might be even lower in domestic markets yet whenever it is necessary to export great quantities of wheat, the farmer must be resigned to low prices. He declared that the farmer is not in the position to determine what a fair freight rate is but that they must rely upon the fairness of the interstate commerce commission to protect their interests.

Postal Receipts Increase

Reports of the postoffice department show that postoffice receipts in 50 typical industrial cities for the month of August showed a gain of 8.24 per cent over August, 1922. The August postal receipts in 50 other cities showed a gain of 5.86 per cent over August, 1922, and of 16.66 per cent over August, 1921.

A Pronounced Success

The uniform success that has attended the use of Chamberlain's Colic and Diarrhoea Remedy in the relief and cure of bowel complaints, both for children and adults, has brought it into almost universal use, so that it is practically without a rival and as everyone who has used it knows, it is without an equal. CONSOLIDATED SCHOOLS AND GOOD ROADS

The "little red schoolhouse," good as it is, is not as good as the "big red schoolhouse." States which have experimented in rural districts with the "consolidated" schools (sometimes called "union schools" or "centralized schools") report a great gain in education at little or no increase of cost.

The "consolidated school" takes the place of a half a dozen or more "little red schoolhouses," collects the several teachers, libraries and facilities under one roof, and brings the children to and takes them from such schools via county operated motor busses, horse-drawn vehicles or trolly cars.

The consolidated school flourishes where good roads are. It cannot be established where are only poor roads.

The superintendent of public instruction in the state of Washington sets forth as the advantages of the consolidated school, that it provides a better school plant, i. e., makes possible the erection and maintainance of more modern school buildings and school equipment. It enables the district to increase the teaching staff and to obtani better trained teachers, and gives the rural community the advantages of the uiform graded school. It makes possible the establishment of highschool courses, and, in many instances, enables the rural district to erect a modern highschool building. It provides special work, such as manual training, domestic science, etc., in the rural community, and, finally, the consolidated school increases community interests in community activities by providing a central meeting place under attractive surroundings, making the school the center of the community circle.

A Badly Informed Editor

"I believe in good roads, but I think it's a country matter. Neither the state nor the national government ought to have anything to do with roads."

That statemen was made in all seriousness by an otherwise well-informed and able editor of a small town paper.

In reply he was asked to answer the following questions:

If the county, and not the state, were the sole taxing power, what would become of state schools, state capitals, state developed waterways, state boards of health, state departments of agriculture and state courts?

If the county, and not the state, were the sole administrative unit, what would become of state militia, state police, state hospitalization, state charity, state insane asylums and prisons and state government?

If there is a function for the state to perform, why should the state not concern itself with the welfare of its citizens in the transportation which is so vital to all its other interests?

What would become of traffic, without state legislation? What would become of railroads without state regulation?

Where the state has no control and the counties build the only roads, there is no system! The only states in the Union which have an adequate, logical serviceable system of highways, are those which build, maintain and control the main trunk-line roads by means of a state road commission or board.

What is true of the state and the county, is true of the nation and the state.

Until there is a national highway commission, charged with the creation of a national highway system, the mileage of which will be built and maintained by the national government, there will never be, in this country which needs it so badly, a real interstate system of roads.

The badly informed editor? Oh, he hasn't been able to answer the questions yet!

NORTH IDAHO PIONEER ASSOCIATION REUNION

The annual reunion of the North Idaho Pioneer association will be held at Lewiston, Idaho on September 27, 1923, and citizens of Lewiston are making elaborate preparations to make the affair a success. This annual reunion of Idaho pioneers is unique in that it is more truly typical of old times than any other such gathering. Many other places give shows and pageants and other forms of entertainment, but at this reunion the old pioneers themselves meet together, have their banquets, tell stories, dance the old time dances and sing old songs. At the reunion last year, over four hundred old folks, together with hundreds of the later generations, gathered together for two days at which was pronounced to be the most memorable event in the history of Lewiston.

The reunion is open to every one in the Inland Empire interested in Pioneer affairs, but a special invitation is extended to pioneers of north Idaho and the Inland Empire to attend. All real old pioneers, that is those who came to Idaho as adults prior to the Indian War of 1877, will be entertained free of charge by the City of Lewiston. Citizens of every community are urged to send their old pioneers to the reunion, as it means so much to these old people who will soon be passing on.

The meeting will be held at the splendid new Lewis-Clark hotel; registration will be commenced at 10 o'clock a. m.; business session will be held at 2 o'clock; banquet at 6 o'clock, and old times dance at 9 o'clock. Cars will be provided for any who desire to see the city. Citizens will be in attendance at all times to care for the wants of the visitors.

Invitations are being sent to all pioneers whose names and addresses are known to the committee, but all pioneers and friends are invited. It is the request of the committee that this general invitation be brought to the attention of all pioneers. All persons who plan on attending are urged to communicate at once with Charles Kreas, executive chairman, Lewiston, Idaho. All newspapers are also urged to bring this to the attention of their readers, and assist getting pioneers to attend.

Any person having pioneer relics is also urged to send them to Charles Kreas for the pioneer exhibit, which will be held during the reunion. The relics will be carefully preserved and returned after the reunion.

Boy's and Girl's Clubs

Some 115,000 head of livestock thrived under the latest improved methods of care and feeding in 1922, due to the fact that they were kept by boys and girls who had joined a pig club, a beef club, or a dairy club, the actual care and management of the animals being a major part of club work. There were more than 78,000 of these young stockmen enrolled last year, according to reports to the United States Department of Agriculture, an increase of nearly 10,000 over the enrollment of the year before.

Making Preparations for Xmas

Christmas this year comes on Tuesday. The fact that it so closely follows Sunday is pleasing to everybody except the postal authorities who realize that two holidays so close together means a congestion of mail. For that reason the postal machinery of the government is already being put in motion to handle the Christmas holiday business in order that it may not be unduly delayed.

Willing to Oblige

"I'm sorry, but I really can't find a place for you."

"But, senator, I can't go back to my home town and tell the people there I failed to land a government job."

"In that case I shall pay your railroad fare to some other point."

THOUGH always the highest in quality, Goodyear Tires are never high priced, as this chart shows. See how Goodyear Tire prices for years have kept under the average price level for all commodities. Today, the best tires Goodyear ever built sell for 37% less than in 1920; 30% less than in 1914. This is a good time to buy Goodyears.

As Goodyear Service Station Dealers we sell and recommend the new Goodyear Cords with the beveled All-Weather Tread and back them up with standard Goodyear Service

GENESEE GIRLS MAKE GOOD AT LEWISTON FAIR

The boy's and girl's Junior Extension clubs of Latah county were well represented at the Lewiston-Clarkston Tri-State Fair held in Lewiston last week, and many prizes were won by the club members. County Agent O. S. Fletcher, who has charge of the Junior Extension clubs in the county, has furnished the following summary of the winnings of Latah county boys and girls in the Junior Division of the fair.

In the home economics department all Latah county exhibitors and competitors in this class were members of the Genesee girls' sewing club.

Cotton dress: First, Audra Pleiman; Second, Wilma English; Third Katheryn Casebolt.

Petticoat: First Audra Pleiman; Second, Katheryn Casebolt: Third, Wilma English.

Hand towel:First, Frances Smylie.

Luncheon cloth: First, Wilma English; Second, Audra Pleiman.

Hemmed Patch: First, Frances Smylie.

Napkin: First, Katheryn Casebolt.

General exhibit, second year: First, Audra Pleiman; Second, Wilma English; Third, Katheryn Casebolt.

First place in a special sewing demonstration for team of three was won by the Genesee team, composed of: Lulu Springer, Frances Smylie and Wilma English.

Frances Smylie won first place in a special home making demonstration.

Win Large Sum

Latah county boys and girls won a grand total of $283.25 in the various classes and contests.

Club Members Live in Dormintory

The club members of northern Idaho who took their stock to the Lewiston Fair or who went there to take part in special contests were the guests of the fair association. They were housed in Lewis Hall, the girl's dormitory of the Lewiston Normal school. The boys were in one wing of the building and in charge of Charles Sawyer, local leader of the Latah-Palouse pig club, while the girls were in another wing and in charge of Miss Clara Cowgill, district home demonstration agent of the University extension division.

The entire Junior Department was under the supervision of H. A. Stone, district club agent.

High School Inspector

The state board of education announces that it has made a cooperative arrangement with the University of Idaho, whereby provision is made for a high school inspector who shall do continuous work during the first semester of the year in the inspection and reinspection of all high schools.

The public is familiar with the cooperative plan with the two state normal schools, whereby two rural supervisors under the joint direction of the state superintendent and the president of the normal schools give part time work to inspection of rural schools. The present plan is a similar one.

Beginnihg about October first and with continuous work throughout the first semester, the inspector will inspect on behalf of the board, using Boise as headquarters, all high schools that it is possible to inspect in that period and will report her findings and recommendations directly to the state board for action. In her capacity as inspector, she represents the university in its standards of efficiency and relation to entrance to all the higher institutions of the state and the high schools to each other. During the second semester and the summer school, the inspector will be a member of the faculty of the school of education of the university, giving such courses as may be assigned therein.

Upon the recommendation of the president of the university, Miss Ethel E. Redfield, formerly state superintendent of schools, has been appointed to this important position and will assume her new duties October 1. The great knowledge of the high school situation in this state which Miss Redfield possesses and her long experience as a high school teacher especially fits her for this important duty. Prior to assuming the state superintendency, Miss Redfield had served several years as a high school teacher in her home town, Lewiston, Idaho.

THE GENESEE NEWS

VOL. XXXV — GENESEE, LATAH COUNTY, IDAHO, FRIDAY, SEPTEMBER 28, 1923. — NO. 13

GERMANY YIELDS TO FRANCE IN RUHR

Chancellor Stressman announced at Berlin on Monday that the government had decided to abandon the policy of passive resistance in the Ruhr and Rhineland and had ordered resumption of activities in all lines at once. The governments decision is not made conditional on the previous deportees or the release of imprisoned nationals, these and other disputed points being left to subsequent negotiations with the operating powers.

The chancellor urged the employers to resume operations at their plants and mines immediately and advocated uniformity so as to avoid independent action which might be detrimental to the restoration of economic normalcy in the Ruhr and Rhineland.

300 Leaders Agree to Quit

Three hundred representative spokesmen from the Ruhr and Rhineland discussed passive resistance with Chancellor Stressmann for five hours; then unanimously agreed that further opposition to the Franco-Belgian occupation was futile and that passive resistance as such must be abandoned.

The conference was attended by the representatives of all the political parties, labor organizations, industrialists, civic bodies and governmental and municipal officials connected with the German posts, telegraphs and railway administrations in the occupied zones.

Hugo Stinnes, Fitz Thyssen and other industrial magnates met with labor leaders, railway officials and mine foremen, and the talk between them was plain and to the point.

"In the course of battle it sometimes becomes necessary to surrender or evacuate a fortress because it requires too many men, too much food and too much ammunition," observed Chancellor Stressman. In order to hold the Ruhr and the Rhineland, passive resistance must now be abandoned he declared, as the nation would bleed to death in further attempts to hold out.

Stressman said that as the government was unable to secure amnestry for imprisoned Germans, the unmolested return of those who had been deported and the restoration of German prerogatives within the Ruhr and Rhineland through advance negotiations with the occupying forces, continuation of passive resistance became purposeless and inimical to the internal and foreign situation.

Seek Release of Prisoners

The government's immediate efforts, he declared, would be directed toward obtaining the release of prisoners and residental rights for evicted officials and their families.

There was a rumor in diplomatic circles in Berlin that France had offered the government its good offices in the direction of vouchsafing it a formal adjustment of the Ruhr conflict which would not impose humiliating conditions in the nature of a signed capitulation, or formal admission of responsibility for its policy of passive resistance.

The bid was completely off as regards editorial discussion of the Ruhr situation, prior to the announcement by the chancellor. A majority of the commentators frankly admitted that the government was confronted with the immediate necessity of scrapping passive resistance, not only because of its terrific financial drain, but also for political reasons. It was argued that passive resistance is now of much greater benefit to the French than to the natives, as the French gradually were acquiring a tight grasp on German official organisms and especially with respect to the railway regime.

All the newspapers concurred in the opinion that Germany is entering upon a fateful week—one that is likely to prove the most critical since the founding of the republic.

Player Got Director's Goat

When a player can "get the director's goat,"—that scene must certainly stand as the acme of realism.

It is realated that during the making of "Kick In," coming to the opera house Saturday night, a scene comes up wherein Kathleen Clifford, as a peppery jazz dancer, and Jed Prouty, as a somewhat "squiffed" man about town, engage in a word and action duel with the majority of both emanating from the small but super-energetic Kathleen.

She tore into the retund and cowering Prouty like a juvenile whirlwind; she stamped, she shook her head ,she poundede her fists, she gave him the plush-lined, copper-rivited Dickens! Director Fitzmaurice called "Cut!" and wiped the perspiration from his forehead.

"Gosh!" he ejaculated, She even had me scared for a minute!"

Betty Compson, Bert Lytell and May McAvoy are featured in "Kick In" which Ouida Bergere adapted from the famous stage play by Willard Mack. The supporting cast is of stellar caliber.

Ladies Aid Will Meet

The ladies' aid of the Federated church will be entertained at the Social house on Wednesday, October 3, by Mrs. A. Springer and Mrs. Dereal Springer.

TAX LEVY LOWERED BY COMMISSIONERS

The total 1923 tax levy for the several state and county funds have been fixed by the Latah county board of county commissioners at 13.65 mills, Harry A. Thatcher, clerk of the board, announced today. This is a reduction over the total levy for 1922 of fifteen-hundredths of a mill. The tax levy for the state is 5.2 mills, while the county tax levy totals 8.45 mills.

A special tax of three mills on the dollar of the assessed valuation of all sheep and one-half mill on all cattle, horses, and hogs within the county has been levied for the state predatory animal fund. A two mill tax on the assessed valuation of all sheep for the sheep inspection fund and a half mill tax on the assessed valuation of all cattle for the tuberculosis eradication indemnity fund have also been levied as required by law.

Bridge Tax Levy

The state law levy of 5.2 mills is for the general state tax, general interest and sinking tax, public building tax, state highway redemption for the second, third, and fourth issues, and educational institutions improvements. The county tax levy of 8.45 mills is divided as follows:3.2 mills for current expense; five-tenths of a mill for roads; twenty-five hundredths of a mill for bridges, and 4.5 mills for schools.

The twenty-five hundredths of a mill tax for bridges is the first levy for bridges made in Latah county for several years. This levy was occasioned by the heavy floods in Latah county last spring.

Other Tax Levies

City and village tax levies follow: Genesee, 15 mills; Juliaetta, 20 mills; Kendrick, 15 mills; Troy, 35 mills; Deary, 15 mills, and Bovill, 29 mills. Highway district levies follow: Highway district No. 1, 5.5 mills; highway district No. 2, 7 mills; highway district No. 3, 5.8 mills; highway district No. 4, 12.8 mills; Genesee highway district, 7 mills; Troy highway district, 6.55 mills; Potlatch highway district, 4.3 mills; Princeton-Harvard highway district, 12 mills; Kendrick highway district, 8.5 mills; good road district No. 1, 30 mills.

Common road levies are: Road district No. 1, 2.5 mills; road district No. 26, 2.5 mills.

In the school district levies for the year 1923 a new item appears in the tuition levy in certain districts where there are no high schools and high school students are sent outside the district. The school district levies range from three mills to 30 mills. —Star-Mirror.

Genesee Students Pledged

In the report of the students pledged in the different frats and sororities, appear the following names from Genesee: In the Sigma Nu fraternity appear the names of Jesse Gray and Victor Casebolt.

In the Kappa Alpha Theta sorority list appears the name of Miss Bernadine Hasfurther.

A Correction

In the report given last week of the prizes captured by Genesee girls at the Lewiston fair the name of Frances Smylie was given as one of the special sewing team when it should have been Inez Mayer.

The mistake was made by the writer of the copy furnished The News.

MRS. FRANCES EBEL PASSES AWAY SUDDENLY

Mrs. Frances Ebel, a resident of the Genesee section since 1887, passed away at the home of her son, on the old Ebel ranch, five miles north of town, at 6 o'clock Wednesday morning, September 26, of apoplexy at the ripe old age of 78 years and 12 days.

Frances Wilhelm was born at Potsdam, Germany, September 24, 1845, and came to America July 1, 1887, coming direct to Genesee, where her husband, Chas. Ebel, had preceded her, he having come to America in 1876 and came to Genesee in 1879, settling on the ranch north of town which has since been owned and farmed by the Ebel family and where Mrs. Ebel had resided all these years.

In 1870 she was married to Chas. Ebel at Potsdam, Germany, and to this union three children were born, as follows: Chas. Ebel, Genesee; Max Ebel, Spokane; George Ebel, deseased. In addition to the two sons she leaves 15 grandchildren and one great-grandchild to mourn their loss.

She was a devoted member of the Catholic church and had lived a quiet but useful life and was beloved by all who knew her for her many kindly traits and sunny disposition. She will be greatly missed, not only by her immediate family, but by neighbors and friends as well.

Mrs. Ebel had been to Genesee Tuesday afternoon and was in her usual good health. She arose about 5:30 Wednesday morning and complained of not feeling well and at 6 o'clock she was striken and made the remark that she was going to die and within a very few minutes she had passed away.

The funeral will be held from St. Mary's Catholic church at 9 o'clock this (Friday) morning, conducted by Rev. Fr. L. C. Godschalx, pastor of the church, with interment in the Catholic cemetery.

The pallbearers are John Kluss, Rudolph Kluss, J. W. Mosman, Matt Baumgartner, Chas. Grieser and John Lorang.

Springer-Hastings

Miss Isabelle Springer and Frank Hastings were united in marriage at the home of the bride's parents, Mr. and Mrs. Fred Springer, on Wednesday afternoon at 3 o'clock, Rev. Pendleton officiating. The bride was attended by Miss Selma Roskammer, and the groom by George Anderson. Only the immediate members of the family were in attendance. The bridal couple left immediately ofter the wedding dinner for Spokane for a short stay.

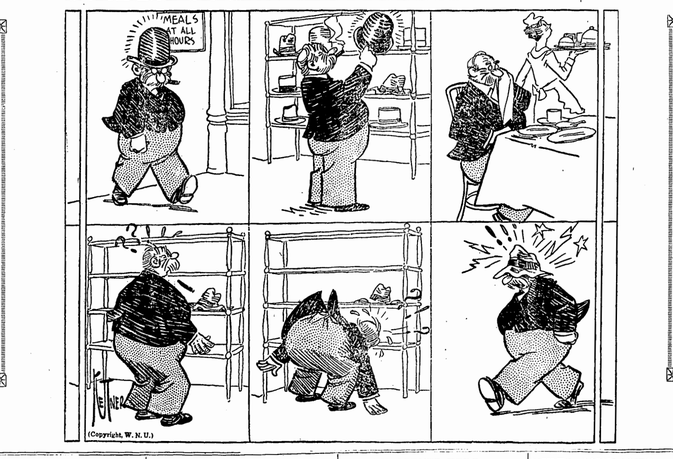
Parks-Post

Miss Charlotte V. Parks and Robert H. Post were united in marriage in the Methodist parsonage, Moscow, on Wednesday, September 26, at 12 o'clock, the Rev. H. O. Perry officiating. Only the immediate families of the bride and groom were present at the ceremony. The newly-weds left immediately after the ceremony for Spokane, Coeur d'Alene and other points for a short honeymoon.

Walter Casebolt Again Honored

In the class officers election held by the students of the University of Idaho last week Walter Casebolt, who had already been honored with the office of treasurer of the student body, was chosen president of the senior class, an honor which he may well be proud of and his many Genesee friends are glad for him.

Our Pet Peeve



WHAT HAPPENED HERE TWENTY YEARS AGO

Timothy hay on the local market the latter part of last week brought as high as $17 a ton.

Wm. Smolt has bargained for the purchase of a soda fountain which he will install in his confectionery store the coming spring.

Harry Thatcher has the East End warehouse practically filled with wheat and will of necessity have to pile some on the outside.

The C. E. Wood company is now running the mill and elevator day and night in order to supply the demand for flour and cleaned seed wheat and to catch up with accumulated orders.

John Alber, for a consideration of $400, has deeded to Henry Flomer lots 7, 8, 9, block 14, in West edition. We understand that in the coming spring Mr. Flomer expects to erect a residence thereon.

A real estate transfer of considerable importance took place yesterday when the Exchange bank purchased from Mrs. Kennedy the corner business block now occupied by F. E. Jacobus with his drug stock. This sale also included the vacant lot adjoining and the residence and lots near the steps. The purchase price was $3,000.

Tuesday, the 22 nd being Mrs. Herman's birthday, the ladies had a genuine surprise for her. Those present were: Mrs. Daggett, Mrs. Kennedy, Mrs. Keane, Mrs. Plank, Mrs. Biram, Mrs. Burr, Mrs. Springer, Mrs. Williamson, Mrs. McMahon, Mrs. Smith, Mrs. Hickman, Mrs. Stryker, Mrs. J. R. Larrabee, Mrs. Brant, Mrs. Conant, Mrs. J. S. Larrabee.

Rev. Pendleton Goes to Oregon

Rev. James N. Pendleton returned to Genesee Monday from a several days' trip to different points in Oregon, reporting that he has decided to accept the pastorate of the Congregational church at Condon, Oregon.

On Sunday, September 16, he preached at the church at Condon, Oregon, and the 23rd, he preached at the church in Beaverton a suberb of Portland. While there he visited the J. H. Brakebill home, where they are prospering. He also visited the home of Robert Foster, another of the Genesee church families. Mr. Foster has been very successful in the two years he has been in the coast city. They have purchased a beautiful home in one of the finest sections of Portland, where they are all very happy. Mabel Bottjer attended the church at Beaverton and inquired about all the young people here. He visited Mitchell's garage, in the St. John district, where D. E. Mitchell, formerly with Meyer's garage of Genesee, is proprietor.

Everything around Portland seems to be booming and everybody is busy and consequently happy.

Club Boy Makes Good

One shorthorn cow for which the youthful purchaser gave his personal note three years ago so that he might feed and care for the animal as a part of his club work, was the means of an Idaho club boy, Frank Hankins, developing marked ability as a stockman. For three years he has cared for and managed his live stock according to the improved methods advocated by his agricultural extension agent, adding to his herd until he now owns eleven head of exceptionally fine pure-bred Shorthorn cattle. His profits for the year 1922, according to reports to the United States Department of Agriculture, were $1,348.

MULES POPULARITY ON FARM INCREASING

The ability of the mule to endure hardship and perform sterling service under adverse conditions has established him as a real asset in American agriculture, says the United States Department of Agriculture, and his importance and popularity as a work animal is attested by his rapidly increasing use. In 1910, the number of mules on farms and ranches was 4,209,769. The number on January 1, 1920, was 5,452,391, an increase during the decade of nearly 30 per cent. Nearly three-fifths of all the mules in use in the United States are found in the nine Cotton Belt states. These states, Texas, Georgia, Oklahoma, Arkansas, Mississippi, Alabama, North Carolina, South Carolina, and Louisiann, had a total of 3,172,797 mules in 1920 as compared with 2,855,257 horses. Texas and Oklahoma were the only Cotton Belt states having more horses than mules.

While the mule is essentially a draft animal, it is widly used for utility purposes, especially in the South. Mules vary in height from 12 hands to 17½ hands and in weight from 600 pounds to 1,600 pounds. They are divided into five general market classes: Draft, farm, sugar, cotton, and mining. Each of these classes agani is graded according to conformation, soundness, quality, condition, and weight, and classified as choice, good, medium, common, or inferior.

The general form and appearance of the mule should closely resemble that of a horse, and in judging mules the same general points of perfection are to be looked for. The nearer the mule approaches the ideal desired in a draft horse the more valuable he is from a market standpoint, department specialists state. The form of the mule should be compact, with a deep body, broad chest, full flanks, short back, and well-sprung ribs. The loins should be broad, short, and thickly muscled; the croup long and level; the hips long, level and muscular; the thighs thick, long and well muscled; and the hind legs well set, with broad, clean-cut hocks and flat, dense bone. The mule should stand on good feet that are well shaped. While style and action may not be so important in a mule as they are in the lighter breeds of horses, these qualities add materially to its value. A smart, alert mule with a long free stride at the walk and a snappy, balanced trot is highly desired.

Birthday Party

A very pleasant birthday party was given at the home of Mr. and Mrs. P. F. Mulalley Sunday evening when a group of young folks gathered to help Paul celebrate his birthday anniversary. The evening was spent in playing games and a good time was reported by all. Refreshments were served.

Winter Is On the Way

It doesn't take many cold spells like the one we had last Saturday night to make one realize that winter is not far away and it makes a fellow wonder what he has done with his summer's salery—especially when the price of coal is near $15 a ton. The mercury dropped to 29 degrees above zero during Saturday night.

Legion Auxiliary Meeting

There will be a meeting of the Auxiliary to the American Legion, in the Legion hall, tonight (Friday), September 28, at 8 o'clock.

Mrs. Mark Donaldson of Lewiston will be in attendance.

SEMI-LOCAL NEWS CLIPPED FROM EXCHANGES

Are Home Again

Mr. and Mrs. L. E. Combs returned Wednesday from their vacation trip, having been gone a month. They motored to Montana, taking in the Yellowstone park, then to the coast and back home. They report an enjoyable vacation.—Colton News-Letter.

Birds Are Scarce

The grouse and pheasant season opened Saturday and hunters have been scouring the hills with more or less success ever since. The birds are not very plentiful, we are told, the wet spring doing much damage to the young ones and cutting off the supply very materially—Kamiah Progress.

"Jim" Rice Re-commissioned

James F. Rice, who for 12 years has served the government as special deputy, has been re-commissioned by the federal authorities as a special officer for the enforcement of the laws relating to the introduction of liquor on the Nez Perce reservation. Mr. Rice has done splendid work, bears honorable scars and has proved fearless in the performance of his duty at all times. Before going into the government service, he was deputy sheriff of Nez Perce county and chief of police of Lewiston.—Lewiston Banner.

Mill is Running

Significent mining news was received frm Elk City in Cottonwood, Monday indicating that gold mining zones of central Idaho are rapidly coming to the front and await only a substantial highway construction to again become contributors of the precious metals whose values have been known for many years.

The stamp mill on the American Eagle mine is reported to be turning out gold in a quantity exceeding all former operations. — Cottonwood Chronicle.

Back From Fishing Trip

M. V. Thomas, George Daugherty and Charles Gallup returned Tuesday from a ten days' fishing trip to the Kelly Creek country above the Bungalow. They went as far as the Bungalow by auto and packed the rest of the journey. Fish were quite plentiful and the party got all they wanted. Mr. Thomas stated that the country tributary to Kelly Creek is isolated because of the big forest fires that burned over there about five years ago. No feed left for any game of any kind.—Kendrick Gazette.

Game Birds are Scarce

Most local sportsmen who went bird hunting on the opening and second day of the season in Clearwater county, report a scarcity of game birds this year. Very few parties got the limit allowed by law and many who have always here-to-fore brought in the limit, came in empty handed except for their guns. The unfavorable wet spring and early summer is held responsible for the scarcity of birds. Only a few hunters report seeing pheasants in flocks, as has been their usual habit when more plentiful. They are not tender eating as usual. —Clearwater Tribune.

Texas Oil at Lewiston

After holding for about two months an option on a tract of land east of Eighteenth street and between the railroad tracks and Main street, with a strip extending from Main street, to allow entrance to their plant when completed, the Texas company, refiners of gasoline and oils sold under the Texaco trade name, yesterday completed the purchase of the land in question and within a very short time will start the erection of a plant that will cost in the neighborhood of $30,000. The company's business will be along wholesale lines only. The Texas company is counted as about third largest producer of petroleum products in the United States.—Lewiston Tribune.

Porter Is Commended

North Idaho members of Governor Moore's official family are receiving much commendation from south Idaho. Not only has our Mark A. Means, commissioner of agriculture, been receiving praise for the work he has been doing, but from editorial endorsements of newspapers of the southern section of the state appears that E. W. Porter of Julietta, state bank commissioner, is making his department very popular with the people of that part of the state and establishing a closer selationship between the banking and agricultural interests of the state.

Mr. Porter, who was ingaged in the banking business a long term of years in this section, where agriculture is the principal industry, places strong emphasis upon the fact that the prosperity of all classes is dependent upon the prosperity of the farmers of the different sections of the state and urges the bankers to give them every possible assistance.—Lewiston Banner.

Poverty makes a lot of men virtuous.

MY LADY'S MONEY

An Episode in the Life of a Young Girl

By Wilkie Collins

INSTALLMENT NO. 20.

No obstacle stood in the way of her free choice of alternatives. After their early dinner at three o'clock, Miss Pink habitually retired to her own room "to meditate," as she expressed it. Her "meditations" invariably ended in a sound sleep of some hours; and during that interval Isabel was at liberty to do as she pleased. After considerable hesitation, her implicit belief in Moody's truth and devotion, assisted by a strong feeling of curiosity to see the companion with whom the steward had associated himself, decided Isabel on consenting to keep the appointment.

Taking up her position beyond the houses, on the day and at the hour mentioned by Moody, she believed herself to be fully prepared for the most unfavorable impression which the most disagreeable of all possible strangers could produce.

But the first appearance of Old Sharon—as dirty as ever, clothed in a long, frowzy, gray overcoat, with his pug-dog at his heels, and his smoke-blackened pipe in his mouth, with a tall white hat on his head, which looked as if it had been picked up in a gutter, a hideous leer in his eyes, a jaunty trip in his walk—took her so completely by surprise that she could only return Moody's friendly greeting by silently pressing his hand. As for Moody's companion, to look at him for a second time was more than she had resolution to do. She kept her eyes fixed on the pug-dog, and with good reason; so far as appearances went, he was indisputably the nobler animal of the two.

Under the circumstances, the interview threatened to begin in a very embarrassing manner. Moody, disheartened by Isabel's silence, made no attempt to set the conversation going; he looked as if he meditated a hasty retreat to the railway station which he had just left. Fortunately he had at his side the right man (for once) in the right place. Old Sharon's effrontery was equal to any emergency.

"I am not a nice-looking old man, my dear, am I?" he said, leering at Isabel with cunning, half-closed eyes. "Bless your heart! you'll soon get used to me. You see, I am the sort of color, as they say at the linen-drapers', that doesn't wash well. It's all through love; upon my life it is! Early in this present century I had my young affections blighted, and I've neglected myself ever since. Disappointment takes different forms, miss, in different men. I don't think I have had heart enough to brush my hair for the last 50 years. She was a magnificent woman, Mr. Moody, and she dropped me like a hot potato. Dreadful! Dreadful! Let us pursue this painful subject no further. Ha! here's a pretty country! Here's a nice blue sky! I admire the country, miss; I see so little of it, you know. Have you any objection to walk along in the fields? The fields, my dear, beneath us! all covered with poetry of nature. Where's the dog? eve, Puggy! Puggy! hunt about, my man, and find some dog-grass. Does his inside good, you know, after a meat diet in London. Lord! how I feel my spirits rising in this fine air! Does my complexion look as the perfect, miss? Will you run a race with me, Mr. Moody, or will you oblige me with a back at leap-frog? I'm not mad, my dear young lady; I'm only merry. I live, you see, in the London stink, and the smell of the hedges and the wild flowers is too much for me at first. It gets into my head, it does. I'm drunk! As I live by bread, I'm drunk on fresh air! Oh! what a jolly day! Oh! how young and innocent I do feel!" Here his innocence got the better of him, and he began to sing, "I wish I was a little fly, in my love's bosom sit I-le!" ullow! here we are on the nice soft grass, and, oh, my gracious, there's a bank running down into a hollow! I can't stand that, you know, Mr. Moody, hold my hat, and take the greatest care of it. Here goes for a roll down the bank!"

He handed his horrible hat to the astonished Moody, laid himself flat on the top of the bank and deliberately rolled down it, exactly as he might have done when he was a boy. The tails of his long gray coat flew madly in the wind; the dog pursued him, jumping over him, and barking with delight; he shouted and screamed in answer to the dog, as he rolled over and over faster and faster; and when he got up on the level ground, and called out cheerfully to his companions standing above him, "I say you two, I feel 20 years younger already!" human gravity could hold out no longer. The sad and silent Moody smiled, and Isabel burst into fits of laughter.

"There," he said, "didn't I tell you you would get used to me, miss? There's a great deal of life left in the old man yet—isn't there? Shy me down my hat, Mr. Moody. And now we'll get to business!" He turned round to the dog still barking at his heels. "Business, Puggy!" he called out, sharply, and Puggy instantly shut his mouth, and said no more.

"Well, now," Old Sharon resumed, when he had joined his friends and had got his breath again, "let's have a little talk about yourself, miss. Has Mr. Moody told you who I am, and what I want with you? Very good. May I offer you my arm? No! You like to be independent, don't you? All right—I don't object. I am an amiable old man, I am. About this Lady Lydiard, now? Suppose you tell me how you first got acquainted with her."

In some surprise at this question, Isabel told her little story. Observing Sharon's face while she was speaking, Moody saw that he was not paying the smallest attention to the narrative. His sharp, shameless black eyes watched the girl's face absently; his gross lips curled upward in a sardonic and self-satisfied smile. He was evidently setting a trap for her of some kind. Without a word of warning—while Isabel was in the middle of a sentence—the trap opened, with the opening of Old Sharon's lips.

"I say!" he burst out, "how came you to seal her ladyship's letter—eh?"

The question was no sort of relation, direct or indirect, to what Isabel happened to be saying at the moment. In the sudden surprise of hearing it, she started and fixed her eyes in astonishment on Sharon's face. The old vagabond chuckled to himself. "Did you see that?" he whispered to Moody. "I beg your pardon, miss," he went on; "I won't interrupt you again. Lord, how interesting it is!—ain't it, Mr. Moody? Please to go on, miss."

But Isabel, though she spoke with perfect sweetness and temper, declined to go on. "I had better tell you, sir, how I came to seal her ladyship's letter," she said. "If I may venture on giving my opinion, that part of my story seems to be the only part of it which relates to your business with me today."

Without further preface she described the circumstances which had led to her assuming the perilous responsibility of sealing the letter. Old Sharon's wandering attention began to wander again; he was evidently occupied in setting another trap. For the second time he interrupted Isabel in the middle of a sentence. Suddenly stopping short, he pointed to some sheep at the further end of the field through which they happened to be passing at the moment.

"There's a pretty sight!" he said. "There are the innocent sheep a-feeding—all following each other as usual; and there's the sly dog waiting behind the gate till the sheep want the services of a dog. Reminds me of Old Sharon and the public." He chuckled over his discovery of the remarkable similarity between the sheep-dog and himself, and the sheep and the public, and then burst upon Isabel with a second question. "I say! didn't you look at the letter before you sealed it?"

"Certainly not," Isabel answered.

"Not even at the address?"

"No."

"Thinking of something else—eh?"

"Very likely," said Isabel.

"Was it your new bonnet, my dear?" Isabel laughed. "Women are not always thinking of their new bonnets," she answered.

Old Sharon, to all appearance, dropped the subject there. He lifted his lean, brown forefinger and pointed again, this time to a house at a short distance from them. "That's a farm house, surely," he said. "I'm thirsty, after my roll down the hill. Do you think, miss, they would give me a drink of milk?"

"I am sure they would," said Isabel, "I know the people. Shall I go and ask them?"

"Thank you, my dear. One word more before you go. About the sealing of that letter: What could you have been thinking of while you were doing it?" He looked hard at her, and took her suddenly by the arm. "Was it your sweetheart?" he asked, in a whisper.

The question instantly reminded Isabel that she had been thinking of Hardyman while she sealed the letter. She blushed as the remembrance crossed her mind. Robert, noticing her embarrassment, spoke sharply to Old Sharon. "You have no right to put such a question to a young lady," he said. "Be a little more careful for the future."

"There! there! don't be hard on me," pleaded the old rogue. "An ugly old man like me may make his innocent little joke—eh, miss? I'm sure your're too sweet tempered to be very angry when I meant no offense. Show me that you bear no malice. Go, like a forgiving young angel, and ask for the milk."

Nobody appealed to Isabel's sweetness of temper in vain. "I will do it with pleasure," she said, and hastened away to the farm house.

CHAPTER XIV.

The instant Isabel was out of hearing, Old Sharon slapped Moody on the shoulder to rouse his attention. "I've got her out of the way," he said; "now listen to me. My business with the young angel is done; I may go back to London."

Moody looked at him in astonishment.

"Lord! how little you know of thieves!" exclaimed Old Sharon. "Why, man alive, I have tried her with two plain tests. If you wanted a proof of her innocence, there it was, as plain as the nose on your face. Did you hear me ask her how she came to seal the letter, just when her mind was running on something else?"

"I heard you," said Moody.

"Did you see how she started and stared at me?"

"I did."

"Well, I can tell you this; if she had stolen the money, she would neither have started nor stared. She would have had her answer ready beforehand in her own mind, in case of accidents. There's only one thing, in my experience, that you can never do with a thief, when the thief happens to be a woman—you can never take her by surprise. Put that remark by in your mind; one day you may find a use for remembering it. Did you see her blush, and look quite hurt in her feelings, pretty dear, when I asked about her sweetheart? Do you think a thief, in her place, would have shown such a face as that? Not she! The thief would have been relieved. The thief would have said to herself, 'All right; the more the old fool talks about sweethearts, the further he is from tracing the robbery to me.' Yes! yes! the ground's cleared now, Master Moody. I've reckoned up the servants: I've questioned Miss Isabel: I've made my inquiries in all the other quarters that may be useful to us—and what's the result? The advice I gave when you and the lawyer first came to me—I hate that fellow!—remains as sound and good advice as ever. I have got the thief in my mind," said Old Sharon, closing his cunning eyes and then opening them again, "as plain as I've got you in my at this minute. No more of that now," he went on, joking round sharply at the path that led to the farm house; "I've and there's barely time to say it before the nice girl comes back. Look here! do you happen to be acquainted with Mr. Honorable Hardyman's valet?"

(To be continued.)

GLACIER NATIONAL PARK TOURIST SEASON

The 1923 tourist season was the heaviest in the entire 10 years' history of Glacier National park, according to the report of Superintendent J. R. Eakin, just made to the government bureau of national parks.

This year's attendance at Glacier park exceeded last year's by nearly 10,000 tourists—about a 40 per cent increase.

Superintendent Eakin's figures show there was a large increase in automobile tourist travel to the park this season. This year 4,954 automobiles, carrying 15,541 tourists entered the gateways of Glacier park, as compared with 2,871 automobiles last year, carrying 9,319 tourists.

BUSY BEE BEATS BURBANK

Pollinizes Plant to Grow Potatoes at Root, Tomatoes on Vine.

The busy little bee is credited with having outburbanked Luther in the development of a plant which produces potatoes at the root and tomatoes on the vine.

Specimens exhibited showed the potatoes large and well developed and the tomatoes below normal size, but well formed.

The gardener by whom the specimens were grown had planted potatoes on one side of his cottage and tomatoes on the other. He credited bees from a near-by hive with having grafted the pollen.

Barley and Clover Produce Well.

Hanchen barley, which was introduced in Pacific county this season, has proved a good producer and it is estimated that a number of acres will be grown next year. A clover demonstration plot established by County Agent Durdle on one of the local farms, shows that the reason for poor stands of clover in the county is the lack of inoculation. In every case where the clover seed was inoculated before planting, good stands resulted.

JONES PRAISES STATE DRY AGENT

SAYS LYLE IS BEST FEDERAL PROHIBITION MAN IN COUNTRY.

That Washington has one of the best state directors in charge of federal prohibition work in the country in Roy C. Lyle was the statement by Senator Wesley L. Jones before a Seattle club recently. His announcement was made upon his return to the state after he had talked with National Prohibition Commissioner Haynes who had just returned from a nation-wide inspection of state offices.

"I believe in the enforcement of the prohibition law, not on y because I am for the law enforcement, but because I am for prohibition," said Senator Jones. "I knew then, and I know now that when Roy Lyle was appointed state federal prohibition director that he had the most difficult

ROY C. LYLE,
State Director of Prohibition for Washington.

job in the state. He has made good. United States Prohibition Commissioner Haynes, after a visit all over the country said to me: "Senator, you have one of the best, if not the best, state prohibition director in the United States." I am proud of his work. I want it to be better. I am back of him to the limit.

"Every officer, county, state and federal, who is brought in touch with this law shou'd and will cooperate with him in its enforcement. He will welcome this, and I know he has tried to bring it about and this has had much to do with his success. Before any man was appointed in this state, United States attorney, United States marshal, collector of customs, collector of internal revenue, commissioner of immigration, or surveyor general, he assured me that regardless of his personal views on prohibition he would cooperate to the utmost in the enforcement of the prohibition law. I hope they have done so. I trust there will be closer and more sincere cooperation during the next two years, if possible, than in the past. If any deputy is winking at or condoning violations of the law, the principle shall be held responsible for such acts and no man will be recommended by me for re-appointment who fails to give the aid he ought to give.

"Each federal official should call his deputies together and demand of them the heartiest cooperation with Roy C. Lyle during the next two years. No special favors should be given and if anything the more prominent, the more influential, and the more respectable the offender is the less consideration should be shown and the more severe the penalty. United States attorneys should, as a rule insist upon prison sentences, and I know there is one United States judge in this state who will follow this rule.".

Eleven Tons of Early Spuds to Acre.

The early potato crop of the Pasco district is practically all harvested. From a recent survey by County Agent Harold Simonds in the Pasco and adjacent districts the maximum yield represented is 11 tons per acre. Other plantings showed good results. It is the plan of the potato growers to have a carload of seed stored in Pasco for the winter so as to be available for the earliest planting next season.

Father and his small son, Willie, were walking through the park one evening when Willie was in an inquisitive mood. "Father, what's a Bohemian?" he asked.

"A Bohemian, my son, is one who believes in free love.—

"Gee, there are lots of Bohemians right here in this park!"

—Sun Dodger.

There are a lot of farmers who have taken their sons into business as partners instead of hired men.

WASHINGTON NEWS

Miss Edith Thornton, Bellingham, was elected president of the county treasurers' association for her third term, the first person to be so honored in the 18 years the treasurers have been organized.

Rebuilding of Camp Lewis with permanent barracks and establishment of an army air base at the post within the near future, is predicted by Major General Charles A. Morton, commander of the Ninth Corps area, who is in Tacoma on his annual trip of inspection.

The Pacific Cranberry exchange which harvests the bulk of the cranberry crop has arranged to finance the growers for the picking of their fruit. With one of the largest crops ever grown in contrast with the small crop of last season, the growers have the additional satisfaction this year of having the finest quality that has been yet seen in the district.

As an incentive to good live stock breeding, Governor Louis F. Hart offered the winner in the Boys' and Girls' club stock judging at the state fair at Yakima a prize Holstein-Friesian bull calf from the herd of the western state hospital at Steilacoom.

Contract calling for the furnishing of from 750,000 to 1,000,000 gray colored facing bricks for the new Olympic community hotel at Seattle has been awarded to the Washington Brick and Lime company of Spokane. The cost will be about $50,000.

Spokane and Portland will be put on an equal freight basis, according to an agreement arrived at between the American Railway Express company and ice cream manufacturers. It was mutually agreed that the Portland rate should be increased to the level of the Spokane rate.

The receipts for the opening day of the Kittitas County fair and rodeo exceeded the total receipts of any previous fair ever held in the county, according to word received from Ellensburg. Ideal Indian summer weather and the intense interest shown by the people accounted for the crowds that jammed every inch of the new grandstand and bleachers.

With about $45,000 left from last year's budget the school board at Walla Walla is considering erecting a two-story brick building to be used for vocational training. The board members said recently that the building, which is badly needed, will not cost more than $20,000, and as money is already on hand, it can be built with no burden to taxpayers.

Power development in the Inland Empire, with the resulting possibilities for selling electrical equipment, has decided the Pacific States Electric company to lease a warehouse at Spokane and bring in stock worth $100,000. This company has an investment of $3,000,000 on the Pacific coast, and some of its branches represent an investment of a half million dollars each.

The annual livestock and farm products exhibit of Oakesdale and that vicinity, will be held October 5 and 6. Preparations are being made for housing the exhibits, and a larger display than ever before is expected in all lines. Many prizes are offered in special classes.

"One of the biggest crops ever raised in the vicinity of Spangle and the northern part of the Palouse country" is the report of this year's wheat yield. Threshing is over, and most of the machines were in the sheds before September 20.

New Cow Testing Plan Works.

A complete check was made by County Agent Harry B. Carrol, of Whatcom county, on the new cow testing association which has just finished the first half of their year's work. It was found that 3 per cent of the 1500 cows being tested were sold for beef; 6 per cent have been sold for dairy purposes and 16 per cent are considered as unprofitable to keep in the herds though another winter. Before disposing of the 16 per cent, a careful check will be made into the history of the individual cow by the cow tester.

Phosphate Proves Beneficial.

Farmers of Grays Harbor county who tried out phosphate on a number of demonstration plots are finding where it was used on spring seeding of clover a good showing is resulting. A complete fertilizer on peas doubled the yield. County Agent Robert Cowan reports that a complete fertilizer on potatoes seemed to increase their resistance to disease enough to keep them practically free.

Aesop's Fable: Never go into the water after a hearty meal, for you'll never find it there.—Cougar's Paw.

WORLD'S NEWS BRIEFLY RETOLD

Important News of Both Hemispheres Boiled Down to Last Analysis.

Gray-haired, small of stature, but with a healthy glow on her tanned cheeks, Mrs. Amanda Chapman, 69, of Miami, Fla., arrived at Niagara Falls after a hike of 1890 miles from Miami by way of Montreal. She was accompanied by her daughter, Irene R. Chapman, 25.

Canada made 147,750,000 pounds of creamery butter in 1922, valued at $51,550,000. This is an increase of 19,000,000 pounds over 1921. The production of cheese in 1922 reached 136,500,000 pounds, worth $22,000,000. The government has been encouraging dairying of recent years.

American commercial participants lead, on a percentage basis, all other foreign exhibitors in the Brazilian Centennial exposition, which officially closed with the presentation of wards by the president of the superior jury of awards.

A new island has appeared about 40 miles south of Yokohama, Japan, where Enoshima stood. The latter island apparently sank, drowning all its population.

Mrs. Robert F. Carr of Chicago lost a string of pearls valued at $10,000 three years ago at a hotel at a health resort at Watkins, N. Y. Recently the gems were forwarded to her. They were found by a gardener trimming a hedge near the hotel.

One of the remarkable and striking natural bridges of the world is the Edwin, in southern Utah, says the Salt Lake Tribune. It is less famous than some others because of its mistaken location, there being no stream of water under it. While the Natural bridge of Virginia boasts of a 90-foot span, this one modestly shows a span of 194 feet.

Discovery of a petrified monked in a new branch of Mammoth cave at Glasgow, Ky., was announced recently. The monkey was found about 200 yards from the main part of the cave. It undoubtedly is prehistoric, according to geologists. The animal was slightly larger than a big house cat.

The Rio Grande is on a tear and several large bridges have gone out as a result. The concrete structure at Eagle's Pass, Texas, gave way and hundreds of American citizens spending the day in Piedras Negras were marooned.

An expedition organized by the National Geographic society and headed by Dr. Neill M. Judd, archaeologist of Washington, has left for Gallup, N. W., to explore the region in southeastern Utah between the San Juan and Colorado rivers. A great portion of this district is said to have never been crossed by white men.

FOOD VALUE OF HONEY.

Honey, like fruits and other foods containing a high percentage of sugar, should be classed as tissue builders. A carbo-hydrate food is one that furnishes energy rather than tissue-building material as does protein.

The sugars contained in honey are cane sugar, grape sugar and fruit sugar, with nearly 75 per cent of them made up of grape and fruit sugars. It is because of this fact that honey is considered by doctors to be a better food than cane sugar. The digestive system is saved work, as the energy is in an available form and is readily absorbed, even by those whose digestion is weak.

Farmers Handle Labor Problems.

Through the efforts of County Agent A. R. Chase and the Ephrata farmers, a committeeman was appointed to handle the labor problem in each town in co-operation with the federal director of employment. A free employment agency was operated in Coulee City, Hartline, Ruff, Warden, Wilson Creek, Neppel, Ephrata and Quincy. A uniform scale of wages was adopted and resulted in a stabilized condition.

A small boy strolled into the drug store and said, "Gimme a nickel's worth of asafetida."

The druggist wrapped it up and gave it to him.

"Charge it," said the boy.

"What name?" asked the druggist.

"Hunnyfunkle," was the answer.

"Is it for nothing," said the druggist, "I wouldn't write 'asafetida' and 'Hunnyfunkle' for a nickle."—Western Christian Advocate.

Doctor—I have to report, sir, that you are the father of triplets.

Politician—Impossible! I'll demand a recount.

PLAN PLENTY OF FUN FOR PUYALLUP FAIR

Management Promises Excitement and Thrills Every Day of Fair Week.

The big pumpkins, the fat cattle and the sleek horses, the poultry, the fruit and all the rest of the farm products will be at the fore at the Western Washington fair, at Puyallup, October 1 to 7. But the fair management realizes that the farmers and the country folk generally want a big, jolly week along with the exhibits and the practical benefits of a fair. Country folks do not have the same opportunities for amusements and a taste of many of the better things of life that their city cousins have and the fair always endeavors to put into its program a few wholesome diversions and amusements.

The big carnival division of the fair will be a merry whirl of fun and thrills and excitement all the while, with its wheels and merry-go-rounds and other old favorites and a number of new and novel features, and also exhibits of the circus arts. The crowds will surge down the old main trails, the barkers will bark and the clowns will cut their capers, the children will laugh and the old folks will enjoy it all just as much as the children—only they won't say so much about it.

The entertainment features are not going to be confined to the carnival division. There will be thrilling running races every afternoon, and some big events each day in the center field, inside the race track. These field events will include the pony express on special days, like Children's day which is Monday, Derby day, and other special days. Then, there is the splendid historical pageant, "The Vision," which will be shown Monday evening and at least one other evening of the week, to be announced.

Among the music features of the fair will be a band in the grandstand and groups of skilled musicians and singers moving from building to building and providing continuous musical programs of popular and classical selections.

The big fair at Puyallup will open a day earlier in fair week this year than has been the custom heretofore. Entry day will be the Saturday preceding fair week, or Saturday, September 29. The fair will open bright and early Monday morning, October 1, and will continue for seven full days or until and including, Sunday night, October 7.

Indignant wife: "I wonder what you would have done if you'd lived when men were first compelled to earn their bread by the sweat of their brows?"

Indolent husband: "I shou'd have opened a store and sold handkerchiefs."

Twang of Clock Spring Leads To Discovery of the Telephone

Unforeseen events have shaped the destinies of men and nations from time immemorial. Dr. Alexander Graham Bell's discovery of the principle of the speaking telephone was not accidental, but rather incidental to one who had already formulated in theory the principle of transmitting speech.

Thomas A. Watson, Bell's assistant in his experimenting and prominent in the pioneering days of the telephone, tells the story of the discovery as follows:

"On the afternoon of June 2, 1875, we were hard at work on the same old job, testing some modification of the instruments. Things were badly out of tune that afternoon in that hot garret, not only the instruments, but, I fancy, my enthusiasm and my temper, though Bell was as energetic as ever. I had charge of the transmitters as usual, setting them speaking one after the other, while Bell was returning the receiver spring one by one, pressing them against his ear as I have described. One of the transmitter springs I was attending to stopped vibrating and I plucked it to start it again. It didn't start and I kept on plucking it, when suddenly I heard a shout from Bell in the next room, and then out he came with a rush, demanding, 'What did you do then? Don't change anything. Let me see!'

"I showed him. It was very simple. The make-and-break points of the transmitter spring I was trying to start had become welded together, so that when I snapped the spring the circuit had remained unbroken while that strip of magnetized steel by its vibration over the pole of its magnet was generating that marvelous conception of Bell's—an current of electricity that varied in intensity precisely as the air was varying in density within hearing distance of that spring. That undulatory current had passed through the connecting wire to the distant receiver which, fortunately, was a mechanism that could transform that current back into an extremely faint echo of the sound of the vibrating spring that had generated it, but what was still more fortunate, the right man had that mechanism at his ear during that fleeting moment, and instantly recognized the transcendent importance of that faint sound thus electrically transmitted. The shout I heard and his excited rush into my room were the result of that recognition. The speaking telephone was born at that moment.

"Bell knew perfectly well that the mechanism that could transmit all the complex vibrations of one sound could do the same for any sound, even that of speech. That experiment showed him that the complex apparatus he had thought would be needed to accomplish that long theoretical use was largely a matter of working out the details. We spent a few hours verifying the discovery, repeating it with all the differently tuned springs we had, and before we parted that night Bell gave me directions for making the first electric speaking telephone."

Topping Strawberry Plants Increase Crop.

A check was made among the strawberry growers of South Bend, who have topped their plants this season, and in one demonstration there had been an increase of 32 per cent in the yield on the rows topped over those not topped.

Poultry

Poultrymen Organize Accredited Hatchery.

Olympia, Wash. — Poultrymen met and formed the Thurston county accredited hatchery. O. B. Gregory of Puget was elected president. The hatchery is based upon the same plan as that of Mason county, County Agent H. E. Drew helping County Agent E. B. Stookey in the plans.

A lot of 50 cockerels were secured for the poultrymen going into the circle. These cockerels were from dams with trapnest records of 250 eggs or more and the sires for five generations back are from dams with records of over 300 eggs. The cockerels were contracted for by seven poultrymen and at a stated average price. The birds were put up at auction and sold only to those having spoken for them. The amount each paid was pro rated according to the bid prices and the actual cost which made an average of $4.88 per bird. The highest bid went to $12.50. These hatcheries located in the various counties of the state and conducted by the poultrymen themselves, are proving of great value to the business. It has enabled many farmers to purchase stock of the highest egg-producing strains at a nominal cost.

Distribute, Eggs Locally.

Newport, Wash.—Local egg production was assisted through the efforts of the county agent and local poultrymen by taking the surplus eggs from this community and shipping to hotels and camps at Metaline Falls. By shipping the surplus the local market has been maintained.

Poultrymen Pass Culling Examination.

Seattle, Wash.—As the result of a two-day poultry school held in King county by the extension poultry specialist, 35 poultrymen attending passed the culling examination and were appointed certified cullers. None of the groups made less than a grade of 90 per cent and one made as high as 99 per cent.

Fowls sometimes pluck feathers from themselves and from each other, which is often caused by too close confinement, by the presence of insect pests, or by improper feeding. When some of the fowls of a flock have formed the habit slightly, a wide range with a change of diet, including a plentiful supply of animal feed, and freedom from insect pests, will usually correct the evil. Above all see that the fowls have plenty of indoorment to exercise. If the habit becomes well formed it is very troublesome and may necessitate the killing of some of the fowls in order to stop it.

To avoid a colorless existence, keep in the pink of condition; do things up brown, treat people white, be well read, and get out on the golf green under the blue occasionally.—Boston Transcript.

CHICAGO HOLDS FIRST "DANCE DERBY"

Copyright by Underwood & Underwood, N. Y.

While thousands looked on, five couples left the post in the first "dance derby" ever held in Chicago. Judges of the Chicago Dancing Masters' Association stood at intervals to see that none got out of step. Those who missed a beat were ruled off the track. This new dance supplants the marathon craze. The five couples made 2500 feet in the remarkable time of 4 minutes, about 105 1-2 feet per second, keeping perfect one-step time.

Photo shows the winning team, Miss Norine Farley and Clarence Stedman.

HOLSTEIN HERD MAKES RECORD

State College Reports High Production for Year From Cows.

FIND RYE VERY GOOD FEED

Adapted to Dry Sections—Issue New Bulletin on Uses for Milk and Dairy Products.

A fine showing has been made by the Holstein herd of the State College of Washington, according to the report of Herdsman J. C. Knott. The nine cows which have just completed official yearly records of production include two mature cows, a 4-year-old, two 3-year-olds, and four 2-year-olds.

The average production of the nine was 17,827.133 lbs. milk, and 617.916 lbs. butterfat, which is 772.395 lbs. butter. Two 7-day records of 17 reported back from the breed association) were made by Pietertje Natsey Belle 2nd, a 9-year-old, and Myra Oakhurst DeKol, 6-year-old. Pietertje produced 710.2 lbs. milk in 7 days and 34.36 lbs. butter, her high day being 109.5 lbs. milk. Myra made 530.7 lbs. milk and 23.42 lbs. butter in the 7 days. Her year's record as a 4-year-old was 21,510.2 lbs. milk and 1,016.275 lbs. butter.

The herd sire, Piebe Hero, is out of Mercedes Laura Ollie that produced 20,063 lbs. milk and 728 lbs. butter in 365 days as a 2-year-old. He was sired by Piebe Laura Ollie Homestead King, who is the sire of May Walker Ollie Homestead, the American champion for butter with a record of 1,523 lbs. butter and 31,610.6 lbs. milk; and also the sire of Piebe Laura Veeman Artis, that produced in 7 days 827.3 lbs. milk and 38 lbs. butter.

Idaho Cow Near Perfect.

Miniature models of ideal types of male and female cattle of the Holstein-Friesian breed, presented to the University of Idaho college of agriculture by the Holstein-Friesian Association of America, indicate that when she was in her prime, Idaho Violet Posch Ormsby, outstanding record winner in the university's Holstein herd, whose blood dominates nearly half of the present herd, was an animal of almost the ideal type. This famous university cow recently completed a record which gives her the distinction of being the highest producer owned by any state institution in America.

Three New Sires for Douglas County.

Waterville, Wash.—Three purebred sires and four grade heifers were secured through the efforts of County Agent Zentner for farmers in Douglas county during the month. Work was accomplished on the organization of bull clubs and a block of five milking Shorthorn sires has been placed for future delivery. These calves will be purchased from the Northwood farm near Seattle.

Rye for Dry Farm Dairies.

Farmers of Adams county are making a success in growing rye for feeding dairy cows in the dry sections of the county. Recently County Agent Donaldson and Extension Dairy Specialist Don G. Magruder visited farmers who were keeping dairy cows and found that good results were being obtained from the feeding of rye in pasture and as hay. In some cases the cows were on rye and Russian thistle pasture and were producing a goodly amount of milk. The rye hay is cut when it is nearly ripe and the farmers state that when in this stage the cows will eat it all. It is well adapted to this section and gives a crop in dry years when wheat is a failure.

Since milk and cream in the various forms in which they are used make up about one-sixth by weight of all the food eaten by the average American family, the farmers' Bulletin, Milk and Its Uses in the Home, recently revised, should provide many useful suggestions to nearly all housewives. It contains information on the composition and food value of milk, the effect of cooking, home pasteurization, the use of skim milk, condensed or evaporated milk, dried milk or milk powder, and various other dairy products. Several pages are devoted to the preparation of different dishes in which milk is commonly used. Copies of this bulletin, which is No. 1359, may be obtained by addressing the Department of Agriculture, Washington, D. C.

Fall City Dairyman Has High Record.

The cow testing report for June shows that 643 cows were tested in King county with an average production of 936 pounds of milk and 36.8 pounds of butterfat. The highest herd average was that of A. E. Moore, Fall City, with 14 grade Guernseys, averaging 1161 pounds of milk and 51.5 pounds of butterfat. There were 226 of the 643 cows which made over 40 pounds of fat each. Mr. Moore also had the highest cow in the association, a grade Guernsey which gave 2007 pounds of milk and 100.4 ponds of butterfat.

BOOKS

The Waddington Cipher.
By WILLIAM JOHNSTON.

This is a new mystery novel of unusual interest.

This novel is being broadcasted in serie. form from station WJZ of the Rad.o Corporation of America and is a new departure in the serialization of fiction. This venture has aroused a great deal of interest and other stations are making requests for permission to broadcast other popular novels. (This novel is published by Doubleday Page and Co., New York price $1.90 net).

Mr. Podd.
By FREEMAN TILDEN.

Mr. Podd is a wealthy Nozzle manufacturer who loves humanity and dreams of universal peace. He charters a ship and sets out on a voyage around the world accompanied by his daughter and eight pilgrims who sympathize with his ideas.

One interesting character is Julius Pickbil.l, the Doughnut King, who has never made a "go" of the restaurant business and who considers himself a failure in life. His fellow islanders agree with him, yet he builds the huts, cooks the food and washes the dishes, clears the ground for the garden, while the rest debate how the island shall be ruled.

There is the Doctor who subsists on leaves and nuts and talks constantly of the Grand Canal, meaning the Esophagus.

The Mayor is elected through the simple trick of cornering all the cigars and then dispensing them.

There is a free-thinking minister, an insurgent poetess, and the efficiency expert.

Mr. Podd's daughter, Willa adds charm to the story.

The Author of this mirthful tale takes full advantage of his opportunities by giving us a spicy story throughout. (The Macmillan company, New York, $2.00).

Lew Tyler's Wives.
By WALLACE IRWIN.

Women often wonder just how much they mean to the lives of the men they marry, and how deeply they touch the hearts of the men they love. In Lew Tyler's wives, Wallace shows us in a very interesting way a human American man, as full of frailty as of charm and the women who loved him, Jessie, Coleen, Virginia. How he loved each of them is told with an understanding which men will envy and women long for. (G. P. Putman's Sons. New York, $2.00).

Cross-Sections.
By JULIAN STREET.

Cross-Sections is a collection of short stories, full of entertainment and it is with a sigh of regret when the end of each story is reached; "The Jazz Baby" is a satire on the younger generation. "The Silk Hat," is a clever study of a certain publisher of chain newspapers—climbing wife, cynical editor-in-chief, political aspirations. The story stops short and leaves the reader in a disappointed frame of mind. There are 11 stories in all. (Doubleday, Page & Co., New York, $2.00).

Tetherstones.
By ETHEL M. DELL.

This is a gripping story from beginning to end. It takes Frances Thorold, the bishop's typist, and projects her, as it were, into every conceivable trying situation from which she emerges unscathed. There are two forces at work—one good and one evil. Good finally triumphs and she is sent by one man who loves her to the other man whom she loves. The story closes so that the reader has a feeling of satisfaction. (Putnam, New York).

The Luck of the Kid.
By RIDGWELL.

This is a tale of pioneer life on the Yukon, Alaska, frontier.

Bill Wilder, the Canadian gold-king is the hero and the reader will follow him breathlessly in his adventures with the fur trappers and gold prospectors. He finds the lost white girl who is "The Kid," daughter of an English missionary who loses his life on the gold trail, and who is reared by the Indian servant who avenges her father's death. The author builds an interesting romance around "The Kid" which terminates in a happy way. (G. P. Putnam's Sons, New York).

First Flapper — "That conductor glared at me as if I hadn't paid my fare."

Second Flapper — "What did you do?"

First Flapper—"I glared back at him as though I had."

Livestock

Twelve rules to follow in shipping hogs to market have been given by C. M. Hubbard, extension livestock specialist.

1. In ordering a car for shipping hogs insist upon getting one that is in good condition and clean.

2. Bed the car with sand, cinders, clay or fine straw.

3. Before loading, wet the bedding and interior of car thoroughly.

4. Give only very light feed of grain before starting to the loading shute.

5. Deliver the hogs at the shipping station in plenty of time to allow them to become rested and cool before loading.

6. Do not load the car more than one hour before train is to depart.

7. Load slowly, avoid excitement, and overheating the animals. Do not beat or bruise.

8. In extreme hot weather do not load to exceed 14,000 pounds fat hogs and 16,000 stock hogs in a standard 36-foot car.

9. Use about 300 pounds of ice on the floor of the car, or suspend in gunny sacks from top of car if the weather is extremely hot.

10. Pen off in a corner animals which persist in causing a disturbance, like all vicious sows, stags and boars.

11. Report inattention or neglect promptly to the superintendent of the division on which your shipment originates.

12. Never throw water directly upon hogs after they become heated. Instead, run it on the floor of car under the hogs.

Suffolks, the breed of sheep introduced into the western states by the University of Idaho college of agriculture, will for the first time form a classtock show at Portland, which is to be held this year from November 3 to November 10.

The university flock, which received its start from a donation of three ewes and one ram, made by the English Suffolk Sheep society has proved very prolific on the university farm, the ewes yielding twin lambs each year. Some surplus rams were recently sent to the national ram sale at Salt Lake, and sold at high prices.

James Laidlaw, a large Idaho sheep owner, in cooperation with the college of agriculture at the present time, determining the adaptibility of the Suffolk rams for producing market lambs when crossed with range ewes.

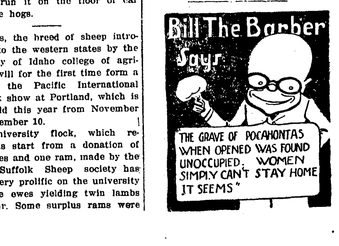
Rapid recovery from the depression which struck it three years ago is being made by the American sheep industry under the stimulus of tariff protection, fairly good prices, and improved credit facilities, say reports to the department of agriculture. Sheepmen generally are optimistic and in good financial shape, and mutton and wool production, though still below normal, is increasing.

Sheep can do without water with less inconvenience than any of our common farm animals. They need it, however, and should have it at regular and frequent intervals in summer. Twice per day is sufficient. Clean and if possible fresh water pays. The flock, if allowed a choice, prefers to graze in early morning and late afternoon and evening, spending the heated periods of the day quietly in a shady place. Shade trees or shades permitting free air circulation suffice for this purpose. Some sort of protection from the sun is necessary, if the flock is to do well.

Some Guke.

There was a young fellow named Guke
For "her" birthday he gave her a buke
She hated to rule and wanted a juke
So she gave the young fellow the buke.

—Medley.



THE GENESEE NEWS

FRIDAY, SEPTEMBER 28, 1923

Oil, Sure!

And now comes word from Clarkston that "oil is sure" at the Swallow's Nest oil well, just south of that city, and great is the excitement thereabouts.

This is about the 'steenth time the same word has been sent out from that city, but as yet no great amount of oil has been sent to the refinery. Either the gun is leaded, the marksmanship very poor, or the target won't hold still—for many shots have been taken at the same subject, with the same result.

Surprise Farewell Party

A surprise farewell party was given for Miss Esther Martinson, Thursday evening at her home. The evening was spent in a social way, as usual. Miss Martinson was presented a picture "The End of the Trail," as a remembrance. Three members were initiated into the "Bumpers." Those present were: Mr. and Mrs. F. H. Thomas, Mr. and Mrs. Ira Hanson, and daughter Rowena, Mr. and Mrs. F. E. Dicus and son Fred, Mr. and Mrs. J. J. Tupker, and son Gene, Mr. and Mrs. Glen Sahpaon and daughters Gertrude and Margaret, Misses Lela Patch, Frances Vaughn, Viola Lorang, May Hummel, Lindy Collins, Edith Winegardner, Hazel Ouse, Mr. Potter, and Jas. Winegardner.

Progressives Will Meet

The Progressive Needleworkers will meet at the home of Mrs. F. H. Thomas on Thursday, October 4. All members are requesetd to be present.

Bielenberg-Schooler Post The American Legion Meets Each First and Third Wednesday at 8 P. M.

The American Legion is at last under full headway for the fall season. The various committees have resumed activity and many pleasant business and social meetings are being planned. With a membership of approximately 70 active legionaires, Genesee post is in as healthy a condition as any post in the State of Idaho.

At the last meeting a full report of the Legion department convention was made. At that time it was planned to conduct an "Indoor Track meet" next Wednesday evening and the committee in charge promises to make the meeting interesting for all who attend.

The committee in charge of the smoker to be held the first Wednesday in November, report that already they are lining up the local "Dempseys and Firpos" for bouts that will take the laurels away from the over-rated champions that the papers tell us about.

Saturday night the Legion conducted its first dance of the fall season and the attendance and the general success promises that the next few months will see some of the finest dancing parties that Genesee has had in many a season.

Essay Contest

The students of the Genesee section are taking o keen interest in the American Legion essay contest and some excellent papers are in prospect. For the information of those engaged in the contest the rules are again repented.

The following are the rules governing the second national American Legion essay contest:

Subject: "Why America Should Prohibit Immigration For Five Years."

National prizes: First, $750; second $500; third, $250. (To be used for scholarships in colleges indicated by the winner.)

State prizes: First prize in each state will be a silver medal; second prize, a bronze medal; third prize, a certificate of merit.

Rules: All girls and boys between the ages of 12 and 18 years, inclusive, are eligible to enter this contest. Only one essay to a person. Essay will not be over 500 words in length. Only one side of paper to be used. A margin of one inch must be allowed on either side of the paper. After essay is completed, paper should be neatly folded, not rolled. Spelling, penmanship and neatness will be considered in judging the winner. Age will also be given consideration.

Pledge: At the end of each essay the following pledge must be signed: "I hereby pledge my word of honor that I have written this essay myself. I am——years old."

Signature, address in full and date must follow.

All essays must be received, for the Genesee vicinity, at the high school by October 5, 1923. Proper judges will be selected to judge the essays.

Additional Prizes

Prizes in addition to the above will be given as follows: The state department of the Legion of Idaho will give prizes of $25, $15 and $10 for the three best essays respectively.

The Genesee post will give prizes of $3 and $2, respectively, for the two best essays in the Genesee vicinity.

Public Sale

Felix Mulalley will hold a public sale of his personal property on Thursday, October 4, at the Christ Lang place, four miles north of Genesee, when he will offer for sale 24 head of horses, six head of cattle and 26 head of hogs as well as a long list of farming implements. A free lunch will be served at noon.

CHURCH SERVICES

SEVENTH DAY ADVENTIST CHURCH
AVERY ROGERS, S. S. Supt.
Mrs. B. B. CALDWELL, M. V. leader

Sabbath school at 10 o'clock Saturday morning.

Young people's M. V. at 12 o'clock Saturday.

LUTHERAN CHURCH
A. F. WOLFF, Pastor.

The annual mission festival will be held in this Church next Sunday. Rev. C. K. Burzlaff of Gifford will preach. English at 10:30 and German at 2 p. m.

Sunday school at 9:30 a. m.

FEDERATED CHURCHES
REV. JAS. PENDLETON, Minister
(Study at the Parsonage)

Sunday, September 30 will be a busy day with the people of the Federated churches. This is the annual promotion day and the promotion day exercises will be held at the regular Sunday School hour. Every pupil and their parents will want to attend this service.

At the 11 o'clock hour Rev. Pendleton will preach his farewell sermon, this being the last Sunday of his three years of service in the Genesee church.

At 2:30 in the afternoon the annual meeting and election of officers will be held in the Social house, at which all the members and supporters of the church is expected to be present.

At 7:30 the Christian Endeavor will elect their officers for the coming six months and these officers will be installed in the office by Rev. Pendleton.

An opportunity will be given for the reception of new church members and the baptism of children at the morning service if Rev. Pendleton is notified before time.

Have Moved to Spokane

The family of Frank Willoughby have moved to Spokane, having sent their household goods by truck on Wednesday. Mr. Willoughby will remain in Genesee for the present, at least. They made the change for the purpose of getting better schooling facilities.

Notice

To Whom It May Concern:

I take this means of placing before the public my situation with reference to a certain lien filed on my crop recently by Burns & Son, the parties who threshed it. Owing to the fact that the men employed by Burns & Son, in said threshing have not been paid and in order to protect myself from paying Burns & Son and being compelled to also pay all laborers who performed work in said threshing I refused to pay Burns & Son until such time as they would secure me from all claims of liens by the men employed by them. Full payment of the claim of Burns & Son has been offered them on no less than four separate occasions, provided they would give some actual assurance that no labor liens would be filed.

Attention Threshermen

WE ARE entering into the harvest season this year with a splendid stand of wheat. However, there is considerable smut and the straw will be very heavy. Both of these conditions tend to increase the chances for fire. The commonest cause of fire in a wheat field is a dust or smut explosion in the separator, usually caused by static electricity.

With this in mind, the Northwestern Mutual Fire Association has placed a fire prevention engineer in the field and has supplied its agents with a limited number of wiring sets. These sets can easily be installed on a separator by the owner. Full directions accompany each set. These are given to the threshermen free of charge, on one condition only—and that is that they be properly applied to the separator.

We now have a number of these sets and will be pleased to give them to owners of separators upon application.

PERSONAL MENTION

Mrs. A. E. Elver arrived Sunday from Coeolalla, Idaho for a short visit, returning Monday.

Mr. and Mrs. George Schlerth and baby left Friday morning for Spokane for a visit with relatives.

Miss Ida Johnson returned to her school work at Colton Monday after the week-end spent at home.

Deputy Sheriff Grant Robins and D. C. Burr were business visitors from Moscow Tuesday forenoon.

R. S. Sullivan and John Kambitsch left Tuesday for Wenatchee where they expect to work in the fruit.

Mrs. Cecil Bumpass and children left Saturday morning for Spokane for a short visit with Mr. Bumpass.

Archie and James Kane left Tuesday morning for Belt, Montana, where they will spend the winter with their father.

Mrs. W. J. Mervyn left Friday morning for Toledo, Ohio, for an indefinate stay with relatives and friends.

Mr. and Mrs. John Kambitsch returned Wednesday from Spokane where they spent a week visiting friends.

Mrs. F. E. Lambert returned to Genesee from a Moscow hospital last Thursday. She is reported as getting along nicely.

Mrs. C. M. Chase, Mr. and Mrs. S. M. Chase and children arrived Friday from Post Falls for a visit at the Casebolt home.

Miss Esther Martinson left Thursday morning for Seattle where she will enter the University of Washington to take a master's degree in Sciences.

Robt. Beechler arrived Friday from Lebanon, Oregon, and is helping Jake Wicks at the Pacific Coast warehouse. Bob is an old-timer when it comes to the art of handling sacks.

Dr. F. B. Evans and children went to Pullman Saturday to meet Mr. Evan's mother, Mrs. Mary Nichols, from Arion Iowa, who will visit with the family for a short time.

Mrs. Frieda Taber and children, accompanied by her brother, John G. Meyer, left Tuesday for Myrtle Point, Oregon, to join her husband, and where she expects to remain for some time.

Rev. A. F. Wolff left Monday for Odessa, Washington, to attend a session of the Spokane district conference of the Lutheran church which convened there Wednesday and Thursday of this week.

Mr. and Mrs. Peter Lorang left Monday morning for their home at Chicago ofter a visit with Mr. Lorang's parents, Mr. and Mrs. John Lorang. Mrs. John Lorang accompanied them to Spokane for a short visit with her daughters, Misses Martha and Christina Lorang.

Chapter II, Coyote Club

Chapter II of the Coyote club: Upon being interviewed by a News reporter Fat Sampson says "Buffalo Bill" Rader is no longer connected with the real Coyote club, but that he has undertaken to get a few recruits from the old club after he had his commission taken from him and reduced to the ranks for "peddling" news that wasn't news—(of course those are not just the words Fat used, but they mean the same.)

Fat says that "Butch" Rader can't shoot, and never could; that only last Sunday he went out with a shotgun and shot more than fifty times (he counted the shells) and didn't even hit a bird, to say nothing of the coyotes he didn't see; that he (Fat) went out at the same time and killed a magpie, a rattlesnake, a blue grouse, and shot a couple of times at a coyote, which he claims is a great record and one that "Buffalo Bill" can't get in sight of. Fat also says that the "female" contingent that "Butsch" was talking so much about can outshoot him at any stage of the game and that the reason he (Butch) got sore was because he wasn't invited to go along.

Chapter III will later be published and will be made up principally of "tragedy" from the looks of things at this time.

Farewell Party

A farewell party was given Monday evening at the home of Mr. and Mrs. Leo. Edwards, in honor of James and Archie Kane, who left Tuesday morning for Belt, Montana, where they will spend the winter. The evening was enjoyably spent with dancing and playing games. Each was presented a gift as a remembrance.

Linger Longers Meet

The Linger Longers had a business meeting at the home of Mrs. Thos. Herman last Wednesday afternoon. A pick-up lunch was served. The next meeting will be at the home of Mrs. F. H. Thomas.

LUCKY STRIKE "IT'S TOASTED"

Protection for Local Game

On Friday evening, September 28, at 7:30 o'clock, there will be a meeting in the American Legion hall of the local sportsmen for the purpose of talking over the advisability of organizing a Genesee Game Protective association. Deputy Warden C. A. Tenwick of Moscow is planning on being present at the meeting and Warden Johnson of Lewiston has been asked to attend, and says he will make it a point to be here.

It is hoped that the meeting will be well attended and that it will result in the better protection of game birds in the Genesee district and a mutual understanding and cooperation between the farmers and hunters in regard to law enforcement. It has been rumored that some of the game laws have been violated in this community and that some hunters have been making a nuisance of themselves by trespassing upon the farms where hunting is prohibited. Such conduct is unsportsmanlike and a discussion of these problems is "in order." Open and closed season on the various birds seems to be a matter of much discussion and difference of opinion. It is planned to make clear at the Friday meeting just what birds are eligible for the hunter's bag and which are not.

Every person interested is invited and expected to attend.

Injured In Auto Accident

Elof Larson, while riding with Mrs. Lilly Larson in a Ford car, driven by Mrs. Larson, was thrown through the windshield and rather severely cut about the head and neck by the broken glass.

The accident happened on the road between the Einer Johnson and Joe Anderson places. Mrs. Larson overtook a truck and sounded her horn but the driver failed to hear it and did not give her room to make a safe passing and the car very evidently skidded in the loose gravel and ran off the end of a blind culvert, the end of which was hidden by weeds, throwing the car into the ditch, but did not overturn. The impact threw Mr. Larson through the windshield with the above result.

The worst cut suffered by the injured man was just under the right ear, which required several stitches to close, Dr. W. H. Ehlen doing the work.

No blame is attached to the driver of the truck by Mrs. Larson. It was just one of those unavoirable accidents that is apt to happen to anyone.

First-Class Undertaking Service

The W. J. Herman Company has made arrangements with the Vassar Undertaking company of Lewiston whereby they will handle all cases in that line in a first-class manner at no additional charge for work in this community. Notice

Economical conditions demand that the long time account system cease. Years ago the manufacturer extended months of credit to the jobber; the jobber passed it on to the retailer, and he in turn favored his customers.

Today the manufacturer sends a sight draft with the bill-of-lading to the jobber, the jobber extends 10 to 15 days credit to the retailer, and successful retailers all over the country have followed suit.

Experience has proved it is the only fair, sane and consistent method.

On and after October 15, 1923, as a protection to themselves and in a spirit of fairness to all concerned, the undersigned will extend credit only on a thirty day basis, by special agreement.

The current month's bills are due and payable on or before the 10th of the following month.

Signed,
Follett Bros. Mercantile Co.

TOO MUCH MONEY WRECKS ROMANCE

Indian Girl Fails to Find Happiness After Oil Is Found on Farm.

SUES BOY FOR DIVORCE

Wichita, Kan.—"Once upon a time," as the story-tellers say, a boy and a girl loved each other and were happy. They lived on scrawny, rock-pitted farms that adjoined each other. From this poor soil the boy's parents and the girl's parents eked out a meager existence.

Ofttimes as the moon bathed the countryside in silver the boy and the girl talked of the future. He told of how some day they would have a modest, but comfortable, little house "in town" with maybe a car to ride in.

Then one day great wealth came to the girl. The restless bit of the oil driller found streams of "liquid gold" on the girl's farm. Over night she was wealthy. Fortune hunters

Ends in Divorce.

came to woo the girl, silk-tongued promoters unfolded Utopian plans. But the girl heard them not. She married the boy and their dreams came true. But—

The other day the girl sued the boy for a divorce.

"Too much money," those who had known them for years commented.

Her Romance Is Ended.

The romance of Exie Fife, wealthy Indian girl of Oklahoma has ended. Across the district court record of Mc. Intosh county is written the last act in the love story of Exie Fife and her girlhood suitor, Berlin Jackson.

In a divorce petition, Exie contends her husband has repeatedly accused her of infidelity and of being intimate with another man, and she further alleges that he never has supported her. Jackson, in his answer, denies he made such accusations and that he had not failed to support her.

While no persons are named in Exie's suit, or her husband's answer, Eufaula smiles cynically and refers to "the other case."

"The other case" is a divorce petition filed by Mrs. Elizabeth Carr against Ollie Carr. The petition, filed shortly before Exie's, charges Carr with cruelty and non-support.

Happiness Engulfed in Oil.

Exie Fife, a full-blooded Creek Indian, first came into prominence a few years ago when oil was discovered on her 160-acre farm in Creek county. There are now a dozen big producing wells on her land, from which she receives a royalty of one-eighth of all the oil produced. The Indian office at Muskogee allows her $750 a month for the expense of her home.

Instead of the modest little home of which they dreamed, the Jackson bungalow is considered the best in that section of Oklahoma. Instead of one car, they have three; and instead of years of happiness and contentment they found discord and discontent.

The golden stream which had brought them wealth and position swept away the happiness which was theirs.

"Too much money."

Stepmother Makes Girl Live in Pigsty Ten Years

El Paso, Tex.—Reared in a pigsty for ten years through the alleged malice of a stepmother, a thirteen year-old girl was found asleep in the pen, located near her home here by detectives.

The child, scarcely the size of a three-year old, could answer only simple questions.

She said that she had lived in the little pen as far back as she can remember, and that her food was always given to her through the bars.

Neighbors told the officers that her food consisted principally of scraps. Some of them have been taking milk to her pen.

The stepmother said the child was put in the pen only to play. The county probation officer took charge of the child.

Left at Altar as Bride Flees in Car

Springfield, Tenn.—It's not always the man who does the deserting at the altar. An eighteen-year-old girl and her lover were married in a church here. Immediately after the ceremony which made them man and wife, the girl went outside the church, climbed into a taxicab, and disappeared. The stunned bridegroom found that his wife had returned to her home—without a word for him.

ROOSTER TRIES TO KILL 18-MONTHS-OLD BABY

Child Is Found in Yard Unconscious With Large Spur Broken Off in Skull.

Frederick, Md.—Attacked by a game rooster when she picked up a chicken while toddling around in the yard, Mary Ellen Hubbard, eighteen-months-old daughter of Mr. and Mrs. George Hubbard, near Creagerstown, is at the City hospital recovering from an operation for the removal of a two-inch spur from the skull at the "suture line."

The operation is one of the most unusual to be performed at the local hospital, for the child was taken to the institution unconscious.

The mother had found the infant lying in the yard with chickens swarming around her. An X-ray examination revealed the spur of the rooster, which had broken off in the skull.

Dr. E. P. Thomas, the operating surgeon, said the spur had penetrated the brain substance and had entered through what is known as the "soft part of the skull." The right side of the head and face of the child is badly lacerated, indicating that the enraged rooster had continued his attacks after the child had become unconscious. The mother heard no screams, and it is thought the child lay in the yard for some time before being found.

When the child recovered consciousness physicians said she probably would recover.

New York Policeman Gets Joker's Ten Dollar Bill

New York.—Patrolman Davis of traffic squad A got the laugh out of a $10 joke and also the $10.

Max Greenberg, twenty-five years old, 127 Orchard street, had nothing to do, at Orchard and Rivington streets, so he dropped a folded $10 bill on the sidewalk to see what would happen.

Benjamin Wasserman, twenty-two years old, 509 Woodward avenue, Brooklyn, came along and picked it up. Greenberg stopped him, explained that the laugh was on Wasserman and asked for the $10 back. There was an argument. Wasserman couldn't see the joke. They clinched.

Patrolman Davis separated the contestants and took them before Magistrate Sweetser in Essex Market court.

"It was a joke. I take back that assault charge," Wasserman said.

"Stout fellow," said Greenberg, or words to that effect.

"What happens to the $10?" asked Assistant District Attorney Henry Alexander.

"Give it to the patrolman," said the magistrate.

River Moved to Recover Body of Drowned Youth

Cisco, Okl.—A river's course has been changed so that a mother might see once more the body of her son. A few days ago the body, that of twelve-year-old Clyde Patnoe, was buried here.

Clyde fell into the Yuba river and was swept over the falls. His body never came up, but engineers of the Pacific Gas and Electric corporation offered to get it. The company authorized their task and all work of harnessing the falls, on which the men had been engaged, was stopped.

It cost them days and nights of ceaseless toil and cost the company $20,000 before, with dynamite and steam shovel, the thousands of tons of earth could be removed and the Yuba's course diverted. Then, welded between jagged rocks at the foot of the falls, the engineers found the boy's crushed body.

Refuses to Aid Children.

Stillwater, Minn.—Because a canoeist refused to give them aid, Emil Bretzell, eleven years old, and his eight-year-old sister, Helen, were drowned in the river here. A man in the canoe shouted that his craft would upset if he tried to save the children, and paddled out of sight. His name is not known.

Stuck in Fence.

Philadelphia.—Dennis O'Connell, ten years old, stuck his head through a picket fence here and was unable to get free. Policemen and the boy's playmates were unable to free him, so an expert from the fire department was called and cut out one of the iron bars.

No Glands for Horses.

New York.—Yrigoyen, one of the most famous race horses in Argentina is dead. He was the victim of a glandoperation. The racer did not work well this season, so his owners ordered a gland transferred from a younger animal. The operation proved fatal.

WOULD MARK GRAVE OF IDAHO PIONEER

Famous Prospector Who Discovered Boise Gold Mines Ambushed by Hostile Indians.

The grave of George Grimes, who added the rich Boise Basin gold fields to the mineral wealth of this state at the cost of his own life, lies unmarked and is in a disgraceful state of disrepair, according to Dr. Francis A. Thomson, dean of the University of Idaho school of mines and director of the state bureau of mines and geology, who recently made a trip over the Boise Basin district accompanied by S. M. Ballard of Placerville, a member of the bureau staff. Dr. Thomson is of the opinion that funds should be provided for the improvement of the grade, which he considers one of the heritages of Idaho.

The story of Grimes is one of the most romantic of the many centering around the heroic deeds of the pioneer prospectors and emigrants and was of such importance that it was featured prominently in "The Light on the Mountains," the pageant of Idaho history which was presented at the university at commencement this spring. Grimes was leader of an intrepid band of prospectors which had been searching in vain for the famous "Blue Bucket" diggings, believed to be somewhere in the Boise basin. Scarcely had they realized their good fortune when Grimes was killed in an attack by a hostile band of Bannacks.

It was late in the summer of 1862 that the band of prospectors, led by Grimes and his companion, Moses Splawn, discovered gold in the upper Boise river county. The party had scarcely reached the scene and made the discovery when the Bannack Indians, opposed to the white men entering their hunting grounds, attacked the party. The account of the attack and the death of Grimes was left by Splawn. Part of follows:

"When we reached the top of the hill it seemed as though 20 guns were fired in our faces. Grimes fell just as we reached the top. His last words were 'Mose, don't let them scalp me.' Thus perished a brave and honorable man at the time when he stood ready to reap his reward. We carried him to a prospect hole and buried him amid silence. He was a comrade and we who had endured dangers together knew not whose turn it would be next."

"It is remarkable that the Grimes grave can be located after so many years," said Dr. Thomson. "It is almost impossible for any one but those familiar with the Basin country to locate the grave. It is in a disgraceful state of disrepair, for the wooden picket fence, erected years ago, is decaying and falling.

"It seems appropriate that in view of the significance of the murder of Grimes to the history of Idaho his grave should be perpetuated and appropriately marked. A simple iron fence with stone corners and either a simple or elaborate shaft would seem fitting.

"The Grimes grave is in what has been named Grimes Pass. It is at an elevation of about 3500 feet and is a beautiful place, with the valley of the Payette on one side and Grimes creek on the other. Cars pass within a stone's throw of the grave on a fine road going down to the power plant of the Boise & Idaho Gold Dredging company on the south fork of the Payette river.

"In recent years two children have been buried alongside the Grimes grave."

Spokane Farmers Change Variety of Wheat.

A number of Spokane county farmers, through the advice of County Agent O. V. Patton, changed their variety of wheat two years ago to Hybrid 128. This wheat has increased in acreage and is giving better results in many communities than other varieties. Farmers using this variety are found in the Spokane Valley, Five Mile Prairie, Half Moon Prairie, Peone and Pleasant Prairie districts.

Prof.: "An optimist is one who believes this is the best of all possible worlds."

Stude: "Yes, sir, and a pessimist is one who realizes it."—Phoenix.

IDAHO

The Kootenai County Bar association is cooperating with the American Bar association in the task of endeavoring "to re-establish the constitution of the United States and the principles and ideals of our government to the minds and hearts of the people.' The members of the Kootenai County Bar association made addresses in schools and mass meetings during Constitution week.

Members of the Lewiston police force have been given instructions by the mayor and city council to become proficient in the use of firearms and "to shoot to kill in proper cases," as the result of recent activities of masked men.

It is believed that Kullyspell house, one of the first houses to be erected along the shores of Lake Pend Oreille, has been discovered, and Professor C. J. Brosnan, head of the American history department at the University of Idaho, has been asked to visit the place, with a view to making a personal examination, and securing any facts which will lead to positive identification.

Changes in the faculty at the University of Idaho this year have been the fewest for any year in the last five. Only 16 resignations were handed in from last year's personnel, as against 18 in 1921, which was the low record up to that time.

"Shipment of immature fruit is responsible for the condition of the markets of the east," said M. L. Dean, director of plant industry at Boise. Mr. Dean says reports from New York show that the prices of apples and prunes are not as high as they should be and quotes New York papers which have said that the immature condition in which northwest fruit has been reaching the markets is responsible for the slump in prices.

Victor Peterson of Grangeville was elected grand master of the Idaho grand lodge of Masons in annual meeting in Boise. Other officers were elected as follows: Frank Knox of Emmett, deputy grand master; William H. Gibson of Boise, senior grand warden; Jay Mason of Idaho Falls, junior grand warden; Clemson Crawford, Boise, grand treasurer; Curtis F. Pike of Boise, grand secretary.

The $15,000 bond issue recently voted for street improvements in Grangeville was sold to Bosworth, Chanute & Co., Denver, Col., on a basis of 5 3-4 per cent annual interest, and a premium of $1.56 a $1000.

The Latah county stock judging team won first place in the contest at the Lewiston-Clarkston fair among boys' and girls' clubs in northern Idaho counties who have not had systematic school training in stock judging. The team was Virgil Thompson, Elmer Seaver and Homer Sawyer of the Latah-Palouse pig club.

Wonderful Birds.

An expedition was sent to one of the southern states of America to observe the recent eclipse of the sun.

The day before the event one of its members said to an old darky belonging to the house where he was staying:

"Tom, if you will watch your chickens tomorow morning you'll find that's all go to roost at 11 o'clock."

Tom was skeptical, but sure enough, at the time predicted the sky darkened and the chickens retired to roost. The negro, amazed beyond measure, sought out the scientist.

Professor," he asked, "how long ago did you know dem chickens would go to roost?"

"About a year ago," he replied with a smile.

"Well if dat don't beat all! Why, perfessor, a year ago dem chickens wa'n't even hatched."

From Rock Dust To Good Farm Soil

How farm soil got its color—black, brown, red—instead of being white as the original rocks were when crushed, is told by A. Floyd Heck, a soils professor at the State College of Washington, talking over the radio broadcaster K P A E one night. Listen in some Monday, Wednesday or Friday night about 9, on a 360 meter wave length.

"In the beginning," he said, "when the little stones or rock particles of the soil were first formed, the soil was probably almost white. If you grind a rock to powder that will be light in color even if the rock was dark. In our great western country we often find pockets of this fine rock dust or rock flour, sometimes called volcanic ash. This is usually very light in color and is made up entirely of rock particles, small stones or dust.

"But, you say, our soils are not white. No, they are usually rather dark, the color coming from the organic matter in the soil. Where does this come from, you ask. Centuries ago, in the beginning of the world, all kinds of herbs and grasses and trees were caused to grow, each yielding seed after its kind. Our present knowledge of creation leads us to believe that these prehistoric plants as well as those all down through the hundreds of centuries of time, have been formed from the dust of the ground by taking from the dust the plant foods which they have needed.

"Nature, as we know, is a process of continuous change. Nothing is permanent. Even the stones are being slowly washed away. So it is with these plants. After they have grown and matured they fall to Mother Earth, who again receives them and covers their remains within her bosom. By this process we are enabled to understand how, as from dust they have come, so to dust they must surely go.

"The remains of these plants which mingle with Mother Earth give the color to our soils. You may be surprised when I tell you that no more than 3 or 4 per cent of the soil is organic matter. And this surprise will be even greater when you stop to consider that nature has been many hundreds of centuries placing this material in our soils for us.

"Notwithstanding the fact that nature has been so long a time at it, and that this small bit of organic matter is by far the most valuable part of the soil, man has removed from the soil in the short space of one farming generation almost a third of its organic matter, thus robbing Mother Earth of her heritage and at the same time one of her most valuable treasures. For this organic matter carries with it the soil nitrogen, the most precious element of plant food when measured in terms of dollars and cents."

MILLIONS OF ACRES CAN BE RECLAIMED

More than 2,000,000 acres of land in the state of Washington can be reclaimed for agricultural purposes through irrigation, according to a study in irrigation in the book on "Resources of the Pacific Northwest," edited by Dean Howard T. Lewis and former Dean Stephen L. Miller, of the University of Washington College of Business Administration.

Washington's water supply is capable of irrigating 3,000,000 acres of land, says William W. Johnston, author of the chapter on irrigation, and only 530,400 acres are now actually being irrigated. Various enterprises, according to Mr. Johnston, are capable of irrigating 100,000 more acres. Chanute & Co., Denver, Col., on a basis of 5 3-4 per cent annual interest, and a premium of $1.56 a $1000.

The Latah county stock judging team won first place in the contest at the Lewiston-Clarkston fair among boys' and girls' clubs in northern Idaho counties who have not had systematic school training in stock judging. The team was Virgil Thompson, Elmer Seaver and Homer Sawyer of the Latah-Palouse pig club.

"Don't know—haven't read the morning papers."—Malteaser.

Pioneer Settlers Crossed Plains Behind Oxen Teams

The scene above is from "The Covered Wagon," the film of the Northwest, and shows the settlers giving thanks to the Creator for their safe arrival. The picture depicts the wagon days of '48 and '50 when many of the state's pioneers crossed the plains over the old Oregon Trail. The background of the story is laid in the old Northwest territory now comprising the states of Washington and Oregon.

Fiftieth Birthday of Typewriter Celebrated

The faithful typewriter is to celebrate its fiftieth birthday this year. This practical instrument, which started life in the small village of Ilion, New York, in 1873, is now used by kings for their personal correspondence, and has helped many an office boy to become a king in the business world. Women, too, give it gratitude, from the Queen of Rumania, who never goes on her royal travels without taking along a writing machine, to the thousands of "queens" of everyday life who have climbed to economic emancipation over its black-and-white keys.

A memorial to Christopher Latham Sholes, inventor of the typewriter, was unveiled by the Herkimer County Historical society on September 12th. It is a bronze tablet attached to a boulder in Typewriter Park, Ilion, N. Y. The inscription upon the tablet is in part as follows:

"In memory of Christopher Latham Sholes, 1818—1890—one of the world's great benefactors—inventor of the first practical typewriter. The product of his genius revolutionized business and brought economic independence to millions of women. The manufacture of this first typewriter began at the works of E. Remington and sons at Ilion, N. Y., September, 1873."

The unveiling ceremonies were a part of the program of the semi-centennial celebration of the invention of the typewriter. Mrs. Lena Lake Forrest, of Detroit, honorary president of the National Federation of Professional and Business Women's clubs, and Mrs. Elizabeth Sears of New York, president of the New York League of Business and Professional Women, were two of the prominent speakers officiating at the unveiling.

The identification of women with this feature of the commemoration is especially fitting, for the last recorded utterances of Sholes was an expression of thankfulness that his invention had proved such a blessing to the women of the world.

Fort Smith, Arkansas, held its own celebration of the 50th anniversary of the invention of the typewriter on the same day as the celebration at Ilion, N. Y.

A long line of ancient models of various typewriters were shown, including the first typewriter brought to Arkansas, in 1876, and which is owned by a Fort Smith newspaper reporter.

Sambo: "Mandy, can I kiss you?"
Mandy: "Piggy Wiggly."
Sambo: "What you all mean?"
Mandy: "Help yo' self."

—Sun Dodger.

Washington Names

Walla Walla.

Walla Walla, meaning running water, is one of the most beautiful Indian names in Washington geography, according to Edmond S. Meany, professor of history at the University of Washington, writing in the Washington West," edited by Dean Howard T. Lewis and former Dean Stephen L. Miller, of the University of Washington College of Business Administration.

The origin of the name Walla Walla is easily ascertained, as it was recorded by the first white men who visited that region, according to Professor Meany. Early forms were: Wollah Wollah, Wollow Wallaws, Wollow Wollah and Woller Woller. In several languages walla means running water, and reduplications of the word diminutizes it so Walla Walla is the small, rapid stream. The words thus first recorded as the name of a tribe of Indians was soon naturally applied to the region occupied by them. In fact, the name was taken by the Indians because it described the land where they lived. Rev. Myron Eells, who devoted his life to work among the Indians, wrote:

"Walla Walla is a Nez Perce and Cayuse word, which means 'running water.' Two meanings of it are given, one being a small stream running into a large one—that is, the Walla Walla emptying into the Columbia another is ripple after ripple. Near the mouth of the river the Northwest Company of Montreal built their Fort Nez Perce in 1818, which has been known as "Old Fort Walla Walla."

The territorial legislature passed an act, approved on April 25, 1854, to organize Walla Walla county. On June 9, 1855, a treaty wac concluded with the "Walla Walla, Cayuses and Umatilla tribes."

Immediately after this Indian war broke out and Fort Walla Walla was established by Lieutenant Colonel Stephen Steptoe. Near the fort grew the city of Walla Walla. Walla Walla was known as Steptoeville, or Wieletpu until on January 11, 1862, Walla Walla was regularly incorporated.

Professor Meany also gives the following information on the origin of the names Waitsburg and Prescott:

Waitsburg was named in honor of Sylvester M. Wait, who built a mill there in 1864. The place was known as "Wait's Mill. A postoffice was secured in 1866 and, at the suggestion of William N. Smith, was called "Delta," in 1868 the people voted to change it to Waitsburg and the postoffice department accepted the change.

Prescott was named in honor of C. H. Prescott, general superintendent of the Oregon Railway & Navigation Co. The town was platted May 12, 1882, and the first settlement on the site was by Rev. H. H. Spalding in 1859.

Farm Woman Test Labor Savers.

Members of the Harmony Economics club of the Lower Wimbah have finished a testing of labor-saving devices. Among the many time savers for the housewife were the fireless cooker, Toledo steamer, long handled dust pan, utility table, dish drainer, pressure cooker, and bread mixer. The "round up" meeting, when all the women reported their results to the home demonstration agent, was held at the home of Mrs. R. R. McKay. All pieces of equipment were reported as giving good results.

An attractive meal, how to plan one which will be nourishing, economical, and appetizing, using the materials grown on the home farm or ordinarily at hand in the farm kitchen, was the interesting problem on which more than 5000 club girls worked in 1922 under the direction of co-operative extension agents. In this study these young home makers prepared, according to reports to the United States department of agriculture, more than 36,000 meals.

Porter (to football man—as a man goes by)—There's your coach.

Player—Sure—but I'm looking for my sleeper.—Chaparral.

GRAPES

Preparing Grapes for Serving.

Put bunches in colander and pour over cold water, drain, chill, and arrange on serving dish. Imperfect grapes, as well as those under-ripe or over-ripe, should be removed. Garnish with grape leaves, if at hand

Grape Frappe.

4 cups water
2 cups sugar
2 cups grape juice
2-3 cup orange juice.
1-4 cup lemon juice.

Make a syrup by boiling water and sugar 15 minutes; add pinapple and lemon juice; cool, strain, add in water, and freeze to a mush, using equal parts ice and salt. If fresh fruit is used, more sugar will be required.

Grape Jelly.

Grapes should be picked over, washed and stems removed before putting into a preserving kettle. Heat to boiling point, mash, and boil 30 minutes; then strain through a coarse strainer and allow juice to drop through a double thickness of cheese cloth or a jelly bag. Measure, bring to boiling point, and boil five minutes; add an equal measure of heated sugar, boil three minutes, skim, and pour into glasses. Place in a sunny window, and let stand 24 hours. Cover and keep in a cool dry place.

Green Grape Jelly.

Grapes should be picked when just beginning to turn. Make the same as grape jelly.

Grape and Apple Butter.

One pint grape pulp, 1 pint of apple pulp, 1 pint sugar. Prepare the fruit pulp by cooking the fruit and passing it through a sieve. Add the sugar and cook the mixture until it is thick or about 20 minutes. Seal it in clean hot jars.

Grape Marmalade.

Pick over, wash, drain and remove stems from grapes. Separate pulp in preserving kettle. Heat to boiling point and cook slowly until seeds separate from pulp; then rub through a hair sieve. Return to kettle with skins, add an equal measure of sugar, and cook slowly 30 minutes, stirring occasionally to prevent burning. Put in a stone par or tumblers and cover with paraffine.

Grape Conserve.

Three pounds seeded grapes, 3 pounds sugar, 1 pound English walnuts broken in small pieces. Mix all the ingredients except the nuts and cook as for jam. Add the nuts when mixture is nearly done. Juice of an orange or peel of half an orange may be added to vary the flavor. Seal in clean hot jars.

Uncooked Grape Jam.

One and one-half cup concord grapes, 2-3 cup sugar, hot water. Wash grapes and remove from stems. Place them in a clean quart jar. Add the sugar. Fill the jar with boiling water and then seal. It requires from six to eight weeks to extract the juice from the grapes. Catawba grapes make a red juice. Wild grapes are also good.

Fresh Grape Relish.

Select bunches of grapes of uniform size and ripeness. They should not be overripe. Without removing the grapes from the stems, pack the bunches closely in clean glass jars, being careful not to crush the fruit. Make a syrup in the proportion of one and one-half cups of white sugar to one cup of white vinegar, boiling it for five minutes. Pour the hot syrup over the grapes to fill the jars and then seal them.

Purple, white and red grapes may be used in this way. They keep their shape and color and are excellent served as a relish or used in garnishing.

Lady: "How much will I have to pay for a pair of silk hose?"

Clerk: "About two dollars."

"Lady: "They come rather high, don't they?"

Clerk: "Yes, but remember, you're a rather tall lady."

—Cougar's Paw.

Saving What You Grow

Prepared by the Extension Service, State College of Washington

Smoking Hams and Bacon.

Smoke helps to preserve the meat and gives a good flavor. The smokehouse can be made of any size and kind of material. If a very small quantity of meat is to be smoked once a year, a barrel or box will answer. If a considerable quantity is to be smoked, then the house should be permanent. A small building can be used if care is taken to confine the fire in an iron kettle to the center of the room. The safest method is to construct a fire pit outside the house and pipe the smoke into the house. If arrangement can not be made to have a fire pit outside the house, it should be built on the floor and a metal sheet used to shield the meat where it is not possible to hang the meat 6 or 7 feet above the fire.

Hardwood is best to smoke the pork though soft wood can be used. Resinous woods should never be used as they give an objectionable flavor to the meat.

Meats which have been cured by the dry-cure method for the proper length of time are ready for smoking. Meats which have been cured by the sweet-pickle or brine method should be removed from the pickle and soaked for half an hour in clean water. If meat has been overcured by remaining in pickle longer than needed, soak for half an hour as recommended and three minutes extra for each day overtime. Rinse after soaking.

Hang the pieces in the smokehouse so they do not touch. Keep the fire going continuously if smoking is to be completed in one operation, holding the temperature as even as possible and not allowing it to go beyond 120 degrees Farenheit. From 36 to 48 hours may produce a satisfactory color, but if it is intended to keep the meat until well aged, longer and slower smoking is desired. During warm weather it is better to start a fire every other day than to heat the meat too much.

The use of "liquid smoke" has become more or less generally practiced in various sections of the state. The federal meat inspection regulations prohibit its use in packing houses.

Protecting the Public

In its campaign against swindlers, especially sellers of worthless stock, the federal government will not only prosecute those it believes to be guilty, but will warn the public when its suspicions are aroused. This was manifested when the Interior department warned the public "to scrutinize offers of stock in so-called platium producing companies proffered by unscrupulous promoters." It was explained that "although the United States, from widely scattered sources, produces only a few hundred ounces of platium a year, certain promoters have made extremely fanciful announcements regarding properties claimed to contain platinum in commercial quantities. These promoters bolster their claims by the display of erroneous assays which in some instances have reported values as high as $25,000 worth of platinum to the ton."

The safest course before investing is to confer with an investment banker and at least give him a chance to look into the situation and give you the benefit of his expert advise. It costs nothing, so why take a chance.

Those who have tried it find that rich relations make poor picking.

State Treasurer Makes Showng

State Treasurer Dan F. Banks may take a pardonable pride in the statistics regarding his office contained in the official report of the state auditor showing the expenditures of all state departments for the first six months of the biennium.

The report places the total expenditures of the state treasurer's office for the first quarter at $6,009.14. This sum is the lowest since he has occupied his office, each year finding a substantial reduction in the cost to the people.

The total expenditures of this office for the corresponding period of the year 1921 were $8,959.73 and for the year 1922, $6,351.39.

The earnings of the office for the first quarter were $41,436.08; for the month of July $8,127.47 and for August $8,573.03.

A Pronounced Success

The uniform success that has attended the use of Chamberlain's Colic and Diarrhoea Remedy in the relief and cure of bowel complaints, both of children and adults, has brought it into almost universal use, so that it is practically without a rival and as everyone who has used it knows, it is without an equal. For Sale at Clark's Drug Store.

We Try to Be Human

In our daily contact with our customers and with all whom we come in contact, whether they are customers or not.

A Smile Costs Nothing and Yields Big Dividends

A cheerful word, warmly spoken, is an asset. Sunshine and warmth produce greater harvests than clouds and ice, whether it be farming or banking.

Kills Eagle In City

Pat Sweeney, whose practiced eye shoots trouble along the high line for the power company occasionally, spotted a bird of unusual size resting on top of the city flag pole on Main street last Sunday evening. He stepped into his home and secured a rifle and from the front porch of his house a block from the flag pole, took a shot at the bird. The first shot went so wild that the bird paid no attention to it and kept looking down into the city auditorium, evidently watching the chickens in the vicinity of the picture show. Pat took better aim and fired another shot. This one hit its mark, striking the bird in the eye. It flopped over but n falling a claws caught and held it in a part of the weather vane on the top of the pole. Another well placed shot loosened its hold and it fell to the ground. It proved to be a bald eagle and its wings measured almost four feet from tip to tip.—Uniontown Journal.

Farewell Gathering

On Monday evening, at the home of Mr. and Mrs. John O. Tuttle, on Riverside street, was given a farewell gathering in honor of Rev. J. G. and Mrs. Carrick. Something like fifty persons were present to enjoy the occasion. During the evening a very pleasing musical program was carried out, which included a number of selections in the form of solos and quartettes, along with some very appropriate readings given by Mrs. Taplin. After a couple of hours of entertainment and conversation, light refreshments were served by the ladies. Before home-going was taken, all joined in wishing Mr. and Mrs. Carrick happiness and success in their new field, to which they expect to go the latter part of this week.—Asotin Sentinel.

Big Bend to Fore

Heavy yields for all kinds of crops in Eastern Washington is being received daily in Spokane. The Walla Walla valley as well as the Colfax region reports that a good growing senson has just ended, having the best crops in years.

The 1923 grain crop produced in the Odessa section of the Big Bend country is proof of the productiveness of the soil. The territory adjacent to Odessa produced in the neighborhood of 2,0000,000 bushels of wheat. Similar reports have been received by officials in Spokane.

Double Service

"My dear, the doctor says a brisk walk before going to bed will cure my insomnia."

"Well," returned his wife, "I'll clear the room so that you may walk, and you may as well take the baby with you."

School Notes

By Estelle Rogers

The Genesee public school, after four weeks, shows the same spirit for work and business that it has in former years, for the student body and class officers have all been elected, and each line of work is progressing nicely.

The total enrollment in the high school at present is 85, there being 19 seniors, 18 juniors, 25 sophomores and 23 freshmen.

The high school associated student officers are as follows: president, Sylvia Johnson; vice-president, Estel Rogers; secretary and treasurer, Hope Michelson.

The class officers who have been chosen for the first semester are:

Senior—president, Alfieda Hampton; vice-president, Agnes Johnson; secretary and treasurer, Eva Qualey.

The junior officers are: president, Leon Danielson; vice-president, Rowena Hanson; secretary and treasurer, Fred Cann.

The sophomores have chosen for their officers: president, Ida Evans; vice-president, Esther Hickman; secretary and treasurer Rosanna Trautman.

The freshmen officers are: president, Wade Mayer; vice-president, Alice Hanson, secretary and treasurer, Cecela Dwyer.

The athletic department is also "up-to-the-minute" with its work, for the officers have been chosen, and the foot ball team is organized. The officers of the association are: president, Alfred Hasfurther; vice-president, Fred Cann; secretary and treasurer, Kenneth Platt; manager, Eugene Tupker; Football captain, George Miller. As the boys are all full of "pep" and enthusasm we are looking for them to "bring home the bacon" a number of times this fall.

A number of the students are already at work on their essay, the title of which is "Why America Should Prohibit Immigration for Five Years." This question is very appropriate for the times. By going into it in earnest the young Americans are beginning to see the seriousness of the problem. It is expected that some very good essays will be turned in, not only from our own schools but also from the district schools, for they may write if they choose.

The contest which has recently taken place in our high school has resulted in complete success. To start with, the student body was divided into two parts. One division was named "Walt," and the other "Ave." The aim of the campaign was to secure subscribers for "The Country Gentlemen," a well known farm paper. Fifty cents out of every dollar received goes to better the departments of our local school, and as we received one hundred thirty-one dollars it means sixty-five dollars for the school's use. It was decided when the contest began that the losing side would give the winners a genuine good time. As the Walts received 58 subscriptions, and the Averies 73, the Walts are going to entertain the Averies this coming Friday night. Arrangements have also been made to give suitable prizes to those who secured the most subscriptions.

Last week the senior class of 1923 presented the high school a beautiful picture of the late President Harding. The picture is very appropriate and was thankfully received by the school.

Monday of this week Attorney Thomas A. Feeney gave a brief address to the high school on the United States constitution, which was enjoyed and appreciated by the students.

Grace Willoughby, who has attended school here for some time, has gone to Spokane with the family. She will continue her school work there in the North Central High school.

Archie Kane left Tuesday for his home in Great Falls, Montana, where he will continue his school work.

Lester Bumpass who has formerly attended school here, has registered in the high school at Mullan, Idaho.

Bernice Bumpass and Adeline Dresher are absent from school this week.

The eighth grade has been writing poetry lately concerning the state of Idaho. As a result some good verses have appeared. The following poem written by Verona Wolff is classed as one of the best:

Idaho

Idaho, the gem of the mountains,
With its forests and richest mines,
Rivers sparkling like fountains,
And its valleys where splendor shines.
Idaho, with fields of Springe white,
Symbols of truth, for which our state stands,—
Long may she live in her days of right,
The best state of the land.

Mike Evits Passes Away

Mike Evits passed away at his home in Clarkston Sunday afternoon at 4:30 o'clock, aged 86 years, following an illness of 10 days. Pneumonia was the direct cause of his death. Mr. Evits formerly resided near Uniontown but had been a resident of Clarkston for the past few years.

His daughter, Mrs. Frank Harris, and a granddaughter, Miss Tierney, who kept house for him, were with him when the end came. In addition to the two mentioned above, Mr. Evits leaves a daughter in California.

THE GENESEE NEWS

VOL. XXXV — GENESEE, LATAH COUNTY, IDAHO, FRIDAY, OCTOBER 5, 1923. — NO. 14

NEWSY NOTES FROM THE COUNTY SEAT

(Clipped from Star-Mirror)

$1800 From Fifteen Acres

F. P. Morgan, who came to Moscow two years ago from Oklahoma, looking for a better place, and finding it, is demonstrating what can be accomplished with a small piece of land in the Palouse country. Mr. Morgan owns a fifteen-acre tract on Orchard avenue, and this year will sell at least $1800 worth of products from the fifteen acres, besides producing practically everything that the family needs for the table. Mr. Morgan is kept fairly busy on the place, but he says he is not overworked, and that his kind of farming suits him lots better than farming on an extensive scale, while his investment is comparatively small.

Mr. Morgan sold his cherry crop from 117 trees of Royal Annes, Bings and Lamberts, for $600, employing but little help to pick the fruit. He sold his berries, of which he grows a considerable variety, for $275 and will have more than two tons of grapes, which will bring a nice sum, to say nothing of the receipts from apples, and other products. He keeps three cows, and has been getting $30 a month for butterfat, and also keeps a few pigs. He is farming intensively, and is producing from his 15 acres the feed for his livestock. He is a real booster for the Moscow section, and offers an example of what may be accomplished on a small acreage.

Recovers Automobile

Sheriff J. J. Keane has something of a penchant for Dodge cars, and recent events has shown that all Dodge cars look alike to the sheriff. The other day he drove his Dodge down town and parked it somewhere on south Main street. When he was ready to return to the court house, he stepped into a likely looking car, without paying much attention to its identifying marks. Everything seemed to be regular, so far as the sheriff was concerned, and he made the grade without any trouble. When he left the car he discovered that the spotlight was missing, and so reported, when he entered his office. A little later a telephone call camein from the United Motor company, notifying the sheriffs office that the company's service car was missing and giving the number, etc.

About this time Deputy Sheriff Grant Robins arrived and arrangements were made to take up the trail of the missing service car. It was then that Mr. Robins noticed something strange about the sheriff's car and suggested that he might not be driving the right car. A glance at the license plate showed that the car bore a dealer's license and right there the search for the missing car ended. While the laugh was on the sheriff, he still contends that the car has a close resemblance to his own Dodge and that he could detect no different in the riding qualities.

The car was returned to its owners and the sheriff's car was found standing in the vicinity, with spotlight intact.

Thus is added one more to the list of misappropriated cars recovered by the sheriff's office.

Youngster Tries To Cash Check

A seven-year-old youngster walked into Tim Sullivan's garage this morning with the reasonable request to cash a $15 check. The check looked good but the age of the youthful financier was against him and the sheriff was called. Investigation showed that the youngster had stolen the check from the home of Tom Mathews yesterday.

When payment of the check was refused, the youngster expressed indignation and said he would take it to the bank.

The young man is known to authorities as an unusually bright and troublesome youngster. Recently he appropriated the keys from 25 automobiles parked in the business district while auto owners walked home. This escapade caused the police department considerable trouble in the returning of the keys to the right owners.

Another activity of the youngster has been to drive a horse and buggy away into the country, unhitch the horse and ride it into town again, leaving the buggy stranded. Authorities also believe that he may be the youngster tha set fire to the barn in the eastern part of the city last

Under examination the youngster has been cool and unabashed. When caught into a contradiction he has denied that he lied but admits that he "must be mistaken." He attends school when he wants to and his attendance is generally prompted by the physical urgings of an older brother.

The young man has had practically no home life in that his mother is forced to spend the entire day from her home. The father, formerly an inerate minister, deserted his wife and the family of young children several years ago.

What action the authorities will take is a question in that the small boy is only seven years of age and therefore not eligible for admittance to the state industrial school at St. Anthony.

Preaches Farewell Sermon

A full church assembled for Rev. Pendleton's final service as pastor of the Federated churches last Sunday. Special music was rendered by Mrs. Bressler. At this service children were presented for Christian baptism and several new members were received into the church. The text was "Fight the Good Fight of Faith." Rev. Pendleton said in part, "I have had a wonderful time in the three years of ministry in this community and I want to express my appreciation for the cordial and loyal support you have given me. Genesee is the garden spot of the Northwest and the only trouble with the town and church lies in the mental attitude of the people. There is just as much talent and money here as anywhere if it could only be consecrated in service to God in an expression for the bounties he is constantly showering on us. Faith in God and a complete surrender to His will can make this community a wonderful place to live in."

During the three years Rev. Pendleton has served the Federated churches he has received 67 new members into the church, conducted 17 funerals, baptized 30 children and officiated at seven weddings.

Do You Need Help?

Pren Moore, poultry specialist of the extension division of the University of Idaho, will be in Latah county October 12 and 13 to assist breeders of poultry in mating their breeding flocks for the coming season. Special attention will be paid to the selection of proper male birds, and farmers will be given advice as to what hens to keep in their breeding pens.

The nature of this work is such that it cannot be done at community meetings, so the work will be personal service on the farms of interested parties. Mr. 'Moore will be taken to the farm where this work is wanted, by County Agent O. S. Fletcher. Culling will not be demonstrated at this time.

All farmers desiring to have the assistance of Mr. Moore in this important matter in poultry improvement, should communicate at once with County Agent Fletcher at Moscow, or with the nearest community poultry project leader, and request that Mr. Moore be brought to their places to help mate their flocks. Requests must be made at once so that proper arrangements may be made for the work.

The project leader for this community is Mrs. Wm. Schlueter.

Roberts' Smoking Record

Theadore Roberts, who plays the character of "Sky Blue" in Thomas Meighan's picture, "If You Believe It, It's So," which will be presented at the opera house Saturday night, says that his record for cigars smoked in one scene was seventy in a picture made several years ago, "M'Liss." In "Old Wives for New" he smoked one cigar through twenty-three scenes. His hardest job smoking was in "Forbidden Fruit," where he had to keep lit on a certain length for a dozen scenes.

"If You Believe It, It's So" is said to provide Tom Meighan with the best role he has had since "The Miracle Man." The part is that of a city crook who goes to the country and meets the girl who changes his life. Pauline Stark is the girl, and, besides Mr. Roberts. The cast includes Charis Ogle, Joseph J. Dowling (the "miracle man"), and Edward Brady.

A "For Sale" ad. will sell your stuff.

HOW MUCH IS AN EDUCATION WORTH NOW?

If times are going to be tough for farmers, there will be fewer farmers by-and-by. Of course it's the poorest, most inefficient farmers who will get the ax first; the efficient ones, those who know what to grow and who have the largest output per acre, will survive. When this weeding-out process is completed, it will be found that the bulk of the efficient farmers had more than the ordinary rural education. By virtue of their schooling, they will survive the ordeal.

The cash value of an education is startingly demonstrated by investigations made in the middle west and east among large numbers of farmers. Assuming the average working life of a farmer to be 40 years, one investigation showed that the amount the agricultural college farmer would receive during this time was $39,000 more than the earnings of the common-school farmer, while a high school education added $21,000 to his labor income. Confirmation of these figures was supplied by the Kansas Agricultural College which ascertained the educational status and the labor income of 1237 farmers to be as follows:

Education of Farmers—	Annual Earnings
Common School	$ 422.00
High School	554.00
College Short Course	859.00
Agricultural College	1452.00

Wisconsin, Iowa, Indiana, Ohio, Illinois and New York arrived at results so similar that the cash value of higher education for farmers has been pretty definitely determined. Perhaps the taxes we pay for the upkeep of our ducational system will seem less burdensome when we know that the outlay produces huge cash returns.

Furthermore, these investigations show that there is need of and room for a vast expansion of higher education in the country districts.—October Sunset.

Putnam-Sommes

Miss Mildren Putnam of Genesee and David Hervert Sommes of Seattle, Washington, were united in marriage at the home of the bride'sc parents, Mr. and Mrs. Ed. Putnam, at noon on Monday, October 1, the ceremony being performed by Rev. James N. Pendleton, pastor of the Genesee Federated church.

The bride was very becomingly attired in a dark blue silk dress and carried a shower bouquet. Only the immediate members of the families of the contracting parties were in attendance at the ceremony. A bountiful wedding dinner was served by the bride's mother immediately after the ceremony.

The bride is the daughter of Mr. and Mrs. Ed. Putnam, ranchers of the Genesee section. The groom is a young man of sterling qualities and is employed by the Holt Manufacturing company at Seattle, where he has been for the past year.

The bridal couple left Tuesday morning for Rainier Valley, a suburb of Seattle, where they will reside.

The News joins the many friends of the young couple in wishing them the very best of everything through life.

Ain't It the Truth?

Anyway, there is some ocnsolation in the fact that when "they" are talking about "you" they are giving someone else a much needed "rest."

WHAT HAPPENED HERE TWENTY YEARS AGO

Dr. Thomas Lorang and wife reached Genesee Wednesday evening from Chicago.

Arthur Morgan, Ilena Wood and Madge Fowler left this morning for Walla Walla to enter Whitman college.

Martin Meyer who has been so seriously ill with fever is gradually recovering and will soon be able to be out.

Monday of this week the enrollment of the Genesee schools had reached 251 and within the next few weeks all of 300 will be enrolled.

An effort will be made to have the various business houses close Sundays, on and after October 11, and week days at the hour of 7 p. m.

George Carbuhn, looking like the breaking up of a hard winter, was in town Tuesday for the first time in two months. He is fast gaining strength from his severe illness.

Saturday was a big day in Genesee, and from early in the morning until late in the evening the streets were lined with teams. Merchants report it as being the greatest trade day of the season.

E. M. Fry, a U. S. geological surveyor, was here this week taking elevations. He finds Genesee to be located 2675 feet above sea level. A mark on which the height has been designated has been placed at the corner of the First Bank and there is a penalty of $250 against disturbing the same.

The Larrabee Co. expects to make extensive improvements about the store building in the near future. The same will be raised to street grade and the interior will be covered with metal ceiling. A balcony will be erected to the rear of the building. A new front will be put in place and the whole structure will receive a general overhauling.

Word From the Fosters

The News has received a few lines from Martin Foster, who left here some time ago and is now located at Guelph, Ontario, which will give his friends here an idea of what he is doing. The letter says in part:

Have been very busy since we arrived here. Got the crops all off and threshed last Saturday—so that finishes that job.

I have bought an apple orchard about five miles from here. Think there will be about 150 barrels of apples on it. They are worth about five dollars a barrel here. I see potatoes are very cheap where you are. They are worth $2.50 a bag here.

There are plenty of black and grey squirrels here; also plenty of beech nuts, hickory and walnuts.

Everybody around here is getting ready to cut corn for silage—in fact, farming here seems to be just one—thing after another, but it's a great life.

Give my regards to all the boys.

Mr. Foster's address is Route 6, Guelph, Ontario, Canada.

Permanent Farm Bureau

Steps taken by the agricultural bureau of the Spokane Chamber of Commerce to have a permanent farm labor bureau maintained by the United States department of labor may result in Spokane having the only federal office of its kind west of the Rocky mountains, according to W. C. Carpenter, director of employment for this state. Mr. Carpenter believes that Spokane's location will aid in securing the bureau.

SEMI-LOCAL NEWS CLIPPED FROM EXCHANGES

Kill Bear Near Troy

There was considerable excitement at the meat market Wednesday when S. R. McKeehan and Ralph Fisher brought in a yearling bear, which they had killed in the White Pine neighborhood. He was of the black variety and weighed 100 pounds. He was ready for the winter, having a hevy coat of hair and being very fat. —Troy News.

Full of Prunes

I. L. Young of Wells Bench was in town Monday exhibiting a twig of Tennant prunes, which was taken from a tree on the W. H. Foust place. The twig was three inches long and had seven large prunes on it. Mr. Young says the tree will average from five to seven prunes to every three inches of producing limbs, which is some tree. Clearwater Tribune.

Will Move To California

Frank Harris who has been farming four miles northeast of Uniontown during the past year, has leased his farm and in a short time will remove to California to reside. He will hold an auction sale of his stock, farm machinery and household goods next Tuesday, Oct. 2. Mr. Roach has been engeged to cry the sale, which will be held at what is known as the Mike Evits farm and Button & Lamdin will act as clerks.—Uniontown Journal.

Few Forest Fires

Few fires have broken out on the Nezperce National forest during the summer, although the season was dry and favorable to fires. Thirty-one fires were reported in the forest and all were soon brought under control. Only serious fire was on Rattlesnake creek, southeast of Dixie, where 1000 acres burned. While the fire season is supposed to end September 15, the forest service still remains a fire-fighting organization on the forest because of dry weather.—Culdisac Enterprise.

Kendrick a Lumber Town

Kendrick is becoming more of a lumbering center every year. This summer erev since the roads were in condition for hauling from Cedar Creek there has been a continuous stream of lumber pouring into Kendrick, the nearest shipping point. The Barnum Lumber & Mill Co. has had charge of loading and shipping this lumber and has kept a crew of men busy all summer loading cars. With a better grade in prospect from Cedar creeg a large volume of lumbering will be carried on in that district, as the problem of transportation to market will be greatly reduced. —Kendrick Gazette.

Corn 13 Feet High

F. G. Nuxoll brought to the Chronicle office, Saturday a stalk of corn raised on his ranch that measures just thirteen feet in height from the roots to the top of the stalk, we are frank to admit it is by far the tallest stalk of corn that we have ever seen and in this opinion we are also joined by everyone who has seen it.

The corn was planted early in May, by Barney Nuxoll, who brought the seed from Illinois and is of the Yellow Dent variety. Mr. Nuxoll, who is visiting with his brothers, stated that he has raised bushels of corn in Illinois but for height none of it had the corn beat that he raised in Idaho.

On the stalk are three ears of corn, the last one being just ten feet from the ground, or in other words the average man would have to have a step ladder to pick the corn from the fodder when in its growing position. No great amount of this corn was planted but what was planted was set 20 inches apart.—Cottonwood Chronicle.

Church Officers Elected

Immediately after the church services at the Federated church, the large audience adjourned to the Social house for the purpose of tendering a farewell reception to Rev. and Mrs. Pendleton. Ninety-three members and attendants of the church were present and a most enjoyable time was spent. On behalf of the church Rev. and Mrs. Pendleton were presented a very beautiful and serviceable quilt, made by the ladies' aid, the presentation speech being made by Dr. F. B. Evans.

Rev. Pendleton left Thursday of this week for his new charge at Condon, Oregon, where his family will follow later.

After the farewell dinner tendered Rev. and Mrs. Pendleton at the Social house the annual election of church officers was held, with the following result: Mrs. Fred Hampton was elected as the new member of the church board, Mrs. Geo. Boliou, clerk of the board, Mrs. Fred Perkins, financial secretary; Dr. F. B. Evans, deacon; Mrs. W. M. Herman, pianist, W. E. English, music committee.

More Hogs Shipped

A car of 85 fat hogs were shipped to the Spokane market Tuesday afternoon by the farmers union.

Sunrise Birthday Party

A very pleasant surprise birthday party was given at the Isaac Isaksen home Saturday night when Mrs. Isaksen invited in a few friends to help him celebrate his birthday anniversary. Pinochle was played during the evening and at midnight a festal, honest-to-goodness birthday dinner was served.

Those in attendance were Mr. and Mrs. F. J. Niemann, Mr. and Mrs. Ira Hanson, Mr. and Mrs. Ray Edwards, Mr. and Mrs. Fred Morscheck, Miss Carrie Shodene and Miss Grace Crossett.

At a late hour word came to the News office that Mr. Isaksen had received many valuable presents. Some of them, perhaps, were not so fine to look at, but very comforting in a time of need, for which, it is understood, he feels duly thankful.

Powdered Milk Factory

Installation of a plant for making powered milk is being recommended to stockholders of the Inland Empire Dairy Producers' association by its directors, according to Charles Wagoner of Post Falls, vice president of the association. The plant as planned will cost $35,000 and will be used for evaporating and powdering skim milk left over after the fat has been separated.

Shows Marked Growth

The engineering college of the University of Idaho this year is showing a marked growth, according to reports received in Spokane. The increase is contributed in part to the acquirement during the summer of a new engineering laboratory, together with a number of new instruments and much equipment.

There's a reason why fortune smiles upon some people. They grab it.

Game Protection Association

The meeting of the Genesee Game Protective association, was held in the Legion hall last Friday evening was well attended. Seventeen local sportsmen were present and Secretary Hulburd of the Moscow Game Protective association acted as chairman until the organization had elected its officers for the term ending March 31, 1924. Deputy State Wardens Johnson of Lewiston and Tenwick of Moscow were present and gave material assistance in the matters of organizing. Mark Donaldson of Lewiston was also present.

Officers of the local association were chosen as follows: Frank Thomas, president; A. C. Linehan, vice-president; Charles Whalen, secretary-treasurer. D. Scharnhorst, John Kries Chas. Greiser, Grant Clark and F. E. Dicus were appointed as a board of directors. All officials of the organization are also members of the board.

The game laws were discussed and as a result some understandings were reached on the open seasons for the various birds. Blue grouse, prairie chicken, native pheasants or ruffer grouse, Chinese or Mongolian pheasants and quail were among the birds upon which there is an open season, according to the law of the state as set forth on the back of licenses. The state game warden has ruled that the Mongolian pheasants are on the non-eligible lists for the whole state and Warden Johnson stated that he would take the matter up directly and let the local sportsmen know at the earliest possible moment.

The meeting was adjourned to meet in the office of W. W. Burr on Friday evening, October 5, 1923.

Union Church Notes

Sunday School 10:00 a. m.

Preaching service 11:00 a. m.

Ladies' Aid Thursday afternoon.

Everybody welcome.

Marriage Licenses

Marriage licenses have been issued to the following:

Ralph Hall, Genesee, and Ruth Hall, Genesee.

Ralph Hall, Genesee, and Ruth Hall, Genesee.

Ralph Hall, Genesee, and Ruth Hall, Genesee.

American Legion Holds State Convention

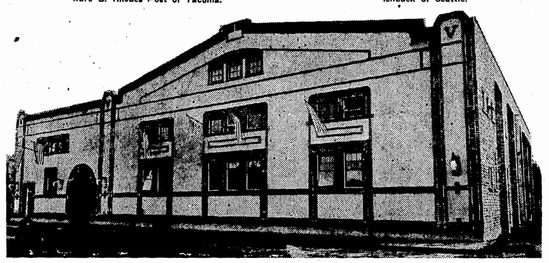
Henry Wise, past state adjutant, who resigned to accept assistant postmastership of Seattle.

Dr. Hinton D. Jonez, newly elected state commander and former head of the Edward B. Rhodes Post of Tacoma.

Past State Commander Lewis B. Schwellenback of Seattle.

Silas R. Holcomb, commander of the Olympia Post.

Virgil Baker, chairman of the Convention Committee.



The American Legion Club Rooms at Olympia, where the convention was held.

Mayor Geo. W. Draham of Olympia, who officially welcomes veterans to Olympia.

Courtesy Olympia Olympian.

Dr. Hinton D. Jonez of Tacoma was unanimously elected state commander of the American Legion at the Fifth Annual Convention at Olympia, succeeding Lewis B. Schwellenback of Seattle.

The other new officers: E. B. Dooley, Colville, state executive committeeman; J. Vincent Roberts, Yakima, state vice commander; C. D. Merritt, Bremerton, sergeant-at-arms; the Rev. Ronald Hilton, Seattle, chaplain, and E. K. Brown, Ellensburg, historian.

Mrs. Walter E. Beals, Seattle, was elected president of the Legion, Auxiliary, Department of Washington, at their convention. Mrs. Kate Simpson of Kent was chosen first vice president and Miss Mary Coulter, Olympia, second vice-president.

Mrs. A. H. McEwan, Tacoma, the retiring president, was chosen state national committeeman; Mrs. Inez Ferguson, Toppenish, treasurer; Mrs. Olga Barrows, Yakima, secretary, re-elected; Mrs. H. H. Basler, Bremerton, chaplain; Mrs. Ellen Miller, Vancouver, historian, and Mrs. B. J. Garnett of Spokane, officer of the day.

Walla Walla was selected as the Legion's 1924 convention city, but not until after a spirited contest with Kelso.

The following district commanders were elected:

First district, Carl Nielson, Seattle; Second, Harold King, Everett; Third, E. H. Faubert, Shelton; Fourth, Dr. David Livingston, Central; Fifth, Alexander Hay, Kelso; Sixth, J. Kelly Depriest, Prosser; Seventh, Col. Paul H. Weyrauch, Walla Walla; Eighth, Dr. R. H. Farley, Spokane; Ninth, G. P. Hastie, Entiat.

Boy Scouts Seek New Magazine Literature

Anonymous Donor Gives $100,000 Fund to Develop Juvenile Stories and Authors

Is there a modern and acceptable substitute for the "Deadwood Dick" tales, the "injun" stories, the blood-and-thunder paper-backs of a generation ago that will be acceptable to both grown-up censors and boy readers? Can the writers of best sellers, backed by modern science and invention, turn out tales that the modern boy will grab and read as eagerly as his grandfather read the lurid but tabooed books and booklets of his day?

These are leading questions to which the executive committee in charge of the publications issued by the Boy Scouts of America propose finding a direct answer. This inquiry has been made possible as a result of a $100,000 gift received from an anonymous source. This fund is to be used initially in developing a wider range of contributions to Boys' Life, the monthly magazine published by the Boy Scouts of America for all boys.

This $100,000 contribution represents a protest against the idea entertained in many quarters that innocuous potboilers are the sort of articles that boys should read. The fund will be used in placing at the disposal of the boy reader of the talent now almost exclusively employed in writing for magazines that are supposedly gotten out for mature readers.

An Educational Move

"The announcement at the annual meeting of the executive committee in charge of Boy Scout publications of a $100,000 gift, to be used in developing the sort of writing output boys need and should have, marks a new epoch in the Boy Scout movement," says James E. West, chief scout executive.

"Everybody who is in any way acquainted with the normal boy knows that he spends considerable time in reading. In the past much of this reading has been done away from home, or it has been done at home secretly. The principal reason for the secrecy has been the fact that the sort of thing that the boy wanted to read was not available or acceptable at home. So the boy began the collection of his own secret private library. The general proposition on the basis of which we are working is that the boy is naturally a constructor—a builder. Moreover, modern science opens up vistas down which a clever writer can travel with the boy reader, encountering thrills enough to satisfy the most exacting juvenile audience.

Want Special Stories.

"The time has gone by when writing for boys was the back-writing. The modern boy spots things worth while instinctively. You cannot fool him about 'Treasure Island,' for example. He knows it is a good book. A perfectly obvious step in connection with the development of 'Boys' Life' is to secure for it writing talent i nevery way equal to the talent that serves magazines designed primarily for grown-ups. We have already arranged with Arthur B. Reeve for a series of Craig Kennedy stories. 'The Radio Detective' is to be the title. For this series modern science will supply the facts, while Reeve and the boys will supply the thrills.

"The expenditure of the $100,000 fund is, in our disposal, as far as a portion of the general public is concerned, represent an experiment. We do not regard it as such. We prefer the view that the expenditure of this fund represents an opportunity to recognize the fact that boys' tastes in reading are basically sound, that the subjects that interest them in one generation may not interest them in the next, and that it is obligatory upon those who would be leaders among boys to evolve a writing output that will be safe from the standpoint of the grown-up and interesting — intensely interesting — from the standpoint of the boy himself. Writing for boys is an occupation that properly challenges the genius of the entire writing fraternity."

Many Insects Valuable In Protecting Crops

How many times have you been seized with a desire to kill an insect? A lot of them are your good friends and the American Nature Association suggests you investigate a little the next time you feel the desire to kill coming on.

Man must be ever alert and on the offensive if he would preserve his home and food stores, his crops, his animals, and his forests from these injurious and destructive pests, writes A. B. Champlain of the Pennsylvania Bureau of Plant Industry in Nature Magazine. This struggle has led most persons to look upon all insects as unmitigated pests and nothing else. The fast is, the majority of insects are beneficial in the wonderful scheme of nature, many kinds serving to hold the destructive ones in check.

Commercially valuable insects and their products are used by many persons in various trades. Bee products —honey and beeswax—are prized in every land. The honey bee and silk worm moth rank first in usefulness, and appear in earliest records.

Used in Industry

Shellac, used for many purposes, is originally a resinous substance secreted by a scale insect which lives on the twigs of various trees in warm climates. Cochineal, a dyestuff of scarlet hue, consists of the dried bodies of female scale insects that live on cacti.

Insects are used as jewelry and ornaments. Beetles with bright metallic colors are made up into tie pins and cuff links; showy insects, especially butterflies and moths, are used in making ornaments such as lockets and pendants, and are worn extensively. Butterfly serving trays are decorative and useful and certain kinds of birds, including domestic fowls, insects are to be accounted as being of especial importance.

Migratory locusts are eaten by the inhabitants in parts of Africa, commonly called white ants, and are said by the natives in certain places in Africa and Australia to have a fine flavor. In Mexico, the eggs of a water bug are scraped from the reeds along streams and made into cakes and eaten. Caterpillars, and in one instance the pupae of moths, were used as food by various tribes of American Indians.

Larvae or grubs, especially those of the larger wood-boring beetles, form an important article of food of the aborigines in some countries. There is no reason why civilized persons should not experiment with insects in various stages as a possible source of food and a means of providing nourishment for supporting life.

A large proportion of insects are concerned chiefly with the killing and eating of their fellow insects. These may be divided into two important groups; predators, which live by hunting and preying upon other insects; and parasites, which live in or on other insects, feeding upon the body fluids of their victims, finally causing their death.

Were it not for these cannibals, which help to maintain a natural balance by checking the abnormal increase of many obnoxious kinds, the destruction of many of our crops would be more continuous and complete and certain species of insects might become so plentiful that they would overrun the earth in a brief time.

In addition to their being a most effective factor of natural control, predacious and parasitic insects have been brought from other countries as a means of combating certain insect pests that had been accidentally introduced.

WASHINGTON NAMES

CAPE ALAVA

That the farthest west projection of the continental portion of the United States is Cape Alava, a rocky point in Clallam County, Washington, is one of the interesting points brought out by Professor Edmond Meany of the University of Washington, writing on the origin of Washington names in the "Washington Historical Quarterly."

Cape Alava was placed on the early Spanish charts as "Punta de Hijosa" and the adjacent indentation was called ::Boca de Alava." The British chart by Kellett in 1847 called it Port Alava and the northern projection was known as Cape Flattery. The one which American charts now show as Cape Flattery being shown as Cape Classet. Recent charts show the larger point as Cape Alava and nearby are shown Flattery rocks, indicating the former confusion.

Umatilla Reef, Professor Meany says, derives its name from the fact that the steamship Umatilla was driven on the reef in a blinding snow storm on February 9, 1884, and was given up as lost. The crew left, but the first officer and two sailors returned in the ship, set the head sails and got her off the reef. She was picked up and towed to Esquimalt.

Point Partridge, a cape on the west central shore of Whidby Island, is long supposed to have derived its name from the number of grouse and pheasants there. More recent researches have shown that Captain Vancouver's brother John had travelled into an English family of that name, and the honor of the name was intended for the family.

Cape Flattery, at the southern entrance of the Strait of Juan de Fuca, was named by Captain James Cook. For Sunday, March 22, 1778, the following entry appears in his journal: "Between the island of rocks and the northern extreme of the land, there appears to be a small opening which flattered us with the hope of finding an harbour there. These however, soon gave us cause for uneasiness, and at last we had reason to think that the opening was closed by low land. On this account I called the point of land to the north of it Cape Flattery."

Point Defiance, in the northwestern part of Pierce County and now embraced in a park of the City of Tacoma, was named by the Wilkes Expedition, 1841. It lies at boundary between Admiralty Inlet and the original Puget Sound. In 1849, Commodore Wilkes published a book, "Western America," in which is found the following: "This narrow pass (The Narrows' seems as if intended by nature to afford every means for the defense of Puget Sound * * * It only entrance to which is through the Narrows, which, if strongly fortified, would bid defiance to any attack and guard its entrance against any force."

Point Greenville, jutting into the Pacific Ocean, in the west central port of Grays Harbor County, was named by Captain George Vancouver on April 28, 1792, in honor of Lord William Wyndham Grenville, who was raised to the peerage just before Vancouver sailed on his memorable voyage. On some maps the name has appeared as "Greenville" or "Granville." The Spaniards had given the point different names. Bruno Heceta, in 1775, called it Punta of the Martyrs" on account of an attack from Indians, and 1792, Gallimo and Valdes called it Punta de la Bastida or "Point of the Bastion," on account of its fort-like appearance.

Skiou or Syue Point, at the southeast entrance of Tulalip Bay, in the west central part of Snohomish County, derives its name from the Indian word for dead body. In primitive times, the point was the site of an Indian cemetery. The place is often called "Dead Man's Point."

DAIRY

Ex-Governor Frank O. Lowden of Illinois, now president of the Holstein-Friesian Association of America, on a recent visit to the Pacific Coast said: "Do you people out here know that Eastern cattle breeders are looking to the West to be the greatest American dairy country of the future?"

* * *

Active development of dairying in Skagit County dates from the year 1902. At that time there were 2,500 milking cows in the county, and were of very ordinary quality. Today after 21 years of development the dairy herds number 18,000 head of purebred and high grade milk cows, and in every milking center there has been built a large manufacturing dairy products plant.

* * *

The Snell Milk & Cream Company of Puyallup has changed hands, the ownership passing to John F. Gehrman, formerly of Lynden, on August 15. Mr. Gehrman is an experienced creamery man, and was at one time employed as buttermaker at the Lynden Co-operative creamery. Later he owned and operated the Ferndale creamery, which he disposed of a short time ago. At Puyallup he will manufacture butter, ice cream and will also wholesale fresh milk.

* * *

Butter for England from Alberta and Saskatchewan by way of British Columbia and the Panama Canal is a trade that will be established if the plans of the Alberta Dairymen's Association are carried out. A rate of $1.50 per hundred pounds has been made on butter from British Columbia ports to Liverpool via the Panama Canal, and arrangements for an initial shipment are now under way.

ACTIVITIES OF GOVERNMENT

If the government would discontinue some of the functions now performed in the interest of relatively small groups of taxpayers and confine its functions solely to activities affecting all the people, it could reduce its annual operating costs by many millions of dollars. There is no doubt of this.

But where would it begin? If, for instance, it decided to begin with the farmer—the imagination is incapable of conjuring up the resentment that would follow. If it were to discontinue some of the research work conducted at its various laboratories, the entire manufacturing community would reverberate with protest. If it were to abandon or curtail its educational work, consumers of America would bring such pressure upon Washington that Congress would debate the subject for weeks.

And so the story goes. The government today is spending thin every year billions of dollars in an attempt to cover a field of activity many times greater than the popular conception of government. Each of its countless activities benefits some group or groups of taxpayers. Many taxpayers in an abstract way believe the federal government is attempting to accomplish too much; but no taxpayer is willing to surrender, without vehement protest, anything he now receives in benefits from the government.—The Budget.

NORTHWEST NEWS

The Pacific Foreign Trade Council will be held in Portland, October 18 and 19, according to announcement of Edward P. Kemmer, secretary, of Tacoma. The organization is the Pacific Coast unit of the National Foreign Trade Council.

More Cars Loaded

Figures compiled by the Railway Age indicate that during the first seven months of 1923 the number of cars loaded was 11.5 per cent greater than during the same period of 1920, a period which had broken all records up to that time. This increase was handled, the Age asserts, with only a small increase in physical facilities, and increased efficiency in operation is credited with the achievement, chiefly.

Off With 'Em

If an inch was cut off the bottom of every Chinaman's shirt it would reduce the price of cotton a cent a pound, it is said. If all gas burners were kept clean from grease and dust it would reduce the gas bill of the nation by millions of dollars and save thousands of tons of coal.

Sherman Rogers, industrial editor of The Outlook, was a Northwest visitor after a trip through Alaska, where he gathered material for a series of articles on the resources of the territory. He announced that he would also write a story for his magazine on the business outlook for Seattle and the Northwest.

A reduction of one-third is reported in milk receipts over that of the flush spring season by the Inland Empire Dairy Products Association. This shortage has caused an increase in the wholesale price for milk at Spokane, so that market will pay the producer $2.90 for September.

Northwest Welcomes First Refugees from Japanese Earthquake

Refugees from Japan, some of them injured and others suffering from the shock of the horror through which they passed, found a sympathetic welcome at the hands of Northwest citizens when they arrived at Seattle recently on the Admiral liner President Jefferson, the first shipload to arrive in this country since the quake. The refugees were cared for by the Red Cross and welfare agencies. The more seriously injured were sent to hospitals, while others were taken care of by friends and relatives. (1) The steamship Jefferson and (insert) Capt. Francis R. Nichols, commander. (2) Two child survivors with their mothers. The two on the right are Mrs. Don Tinling, wife and son of the Admiral Oriental line agent at Yokohama. Mr. Tinling is a former Seattle man and son of a prominent railroad official (3) Mr. and Mrs. E. P. Zell of Yokohama. (4) Mrs. E. P. Zell of Yokohama with (left) Evelyn Peoples, daughter of Mr. and Mrs. H. Peoples of Tokyo and (right) Margaret Lois Dickerson, daughter of H. S. Dickerson, construction engineer of Yokohama. (8) Mr. and Mrs. Enrique C. Espiro of Tokyo. Mr. Espiro was chancellor of the Argentine Embassy to Japan and is returning to South America. Mrs. Civac de Bordes, wife of the Colombian consul at Tokyo. Mr. A. Ponce de Leon, Mexican business man of Tokyo.

WASHINGTON STATE FAIR

Exhibits Not So Numerous, but Quality Good

The 27th annual State Fair of Washington opened on Monday, Sept. 17th, under ideal weather conditions, which continued all through the week. Although the number of exhibits was not so great as in years past, the quality was superior, making it interestingly difficult for the judges to place the ribbons where they justly belonged.

E. L. French, Commissioner of Agriculture for Washington and H P. Vermilye, Secretary of the Fair, were very satisfied with the outcome of all their efforts to make the Fair a success. Everything was in readiness for the judges to commence placing the awards Tuesday. Demonstrations began on Tuesday in the Woman's Building, the program changing four times during the day. Horse-racing started with an excellent card for each day, special acts were featured before the grandstand. Exhibits of agricultural products by nine Counties and seven districts showed the range and varieties that could be produced. A wonderful display of flowers delighted the flower lovers. Eighteen miniature Shetland ponies were brought to the Fair from Wisconsin—an exhibit never before seen here. The exhibit of canned fruits puzzled the judges, as did also the culinary display The poultry exhibit was better than it had ever been. Cattle, horses and hogs showed extra quality.

Director of Agriculture E. L. French decided to retain Secretary H. P. Vermilye and his staff again to handle the Washington State Fair in 1924, believing that much of the success of the last three years is due to retaining the same management. Director French plans to go out after a $100,000 appropriation in 1925, for many new features are needed in buildings, accommodations and beautification of the grounds. This year a State-wide interest was shown in the Fair, 75 County Commissioners and other State officials and delegations were special guests on Thursday. Seattle business houses sent exhibits, and the Seattle Port exhibit was new this year. "All this new interest," Director French says, shows plainly that the Fair is more than a local activity, and the cooperation from County Agents and district horticultural inspectors has helped to create widespread interest among exhibitors from all over the State. At present $45,000 is spent on premiums alone, $5,000 more than the legislative appropriation for the Fair. The shortage is made up from gate receipts. The premium money goes right back into farmers' and stock-breeders' pockets as premiums and is an investment in the State's agricultural future."

Stock judging commenced on Tuesday. Although the animals were not so numerous as in former years, it was the concensus of opinion that the quality was finer, while the competition very keen. In the Holstein classes, judged by Axel Hansen of Minnesota, both awards on grand champion bull and grand champion cow went to Hollywood Farm. Award on senior champion bull went to D. F. Nugent of Granger. In the Guernsey breed, judged by Prof. M. F. Brandt of the Oregon Agricultural College, keen competition developed among the Ferndale herd of Wallace and Fordyce of Sunnyside, the Ruby Dell herd of H. E. Angel & Son of Mabton, and the herd of Roy R. Bush of Outlook. Chicona Lover Bold, bull owned by Wallace & Fordyce, was awarded senior and grand champion. The senior and grand champion cow was Middedale Grace Darling, owned by H. E. Angel & Son. Junior champion bull and junior champion cow went to Wallace & Fordyce.

Northwood Farm's milking Shorthorns had no competition, capturing all the awards.

Congdon & Battle's Aberdeen-Angus had no competition. This is one of the prize herds of America. Queensmere Fourteenth was senior and grand champion bull, and Blackmere Blackbird junior champion bull. Pride of Rosemere was senior and grand champion cow, and Barbara B. C. was junior champion cow.

The Hereford cattle, judged by Frank Kemp of Carleton, Ore., were numerous. Four complete herds entered the show ring. Most of the awards were taken by O. A. Boggs and sons of Dayaland, Alberta, and Herbert Chandler of Baker City, Oregon; some of the ribbons went to Wetherford Bros. of Dayton.

Most of the Jersey championships went to F. M. Sears; Glen Tana Farm of Spokane came in for first and second prizes, as did also Nichols & Plunkett of Ellensburg.

E. W. Van Vassel of Wenatchee had no competition with his Ayrshires, so captured all the awards. Following the stock parade on Thursday, Governor Hart presented the prize calves to the winning judges in the Boys' and Girls' Club Contest. Governor Hart and the three prize winners stood in front of the grandstand upon the race track, for the presentation. The winning judges were: Chester Schlein of Mabton for Guernseys, Margaret Campbell of Spokane for Jerseys, and Homer Monncer of Elma for Holsteins.

Wishing to encourage the raising of purebred livestock in the State, Governor Hart conceived the idea of offering a pure-bred calf from the State's foundation herd of Holsteins at Fort Steilacoom, as a prize to the best girl or boy judge at the State Fair. When this was known other breeders of pure-bred cattle made similar offers. The Waikiki Farms at Spokane offered a Jersey calf for the best judge of Jerseys; and the Gile's Farm at Chinook, Wash., offered a Guernsey calf for the best Guernsey judge. The winners received their prizes gracefully. What made the Holstein prize so valuable to Homer Monncer was, that his prize calf had been awarded the blue ribbon in the junior bull calf class.

The members of the Boys' and Girls' Clubs then sang an original "jingle" of thanks to Governor Hart.

George Wilson of Wilbur judged the horses. H. W. Merritt of Rosalia won grand champion stallion with Forest Prince, and grand champion mare with Martha Washington. R. C. McCroskey had no competition for his 15 splendid Clydesdales. Herbert Krueger showed the only Percheron at the Fair.

Ray J. Fox of Lyons, Ore., judged the swine. The Hampshire swine were the best ever shown at the State Fair. J. M. Fruitts took most of the awards. S. E. Chaffee had senior champion boar. Poland Chinas were well represented.

In the sheep pens were fine specimens of Hampshires, Rambouillets and Shropshires. They were judged by Professor Howard Hackerdown who is head of Animal Husbandry Department, Washington State College.

The poultry building has been greatly improved since last State Fair. The new coops being a special feature of the improvements. These coops are divided with wire netting, allowing visitors to see all birds more readily. All the coops were occupied, which goes to show that raising poultry is a favorite business and pastime. All breeds were well represented. Not for 15 years has the Silver Gray Dorking been seen at this Fair. This is a great favorite in England—its home —on account of the wonderful development of meat on the breast of the fowl—it is especially a table breed. These birds have each five toes. Judge W. Coats judged the poultry.

The County and District Exhibits were very fine. Naches Heights was first in District Exhibits this year. Wapato was a close second. Skagit County lost its first place of last year in the County exhibit contest to Spokane 94—Skagit 92. Spokane had a perfect score on grains, grasses and vegetables. Kitsap had a perfect score except on two items, losing one point on grains and seven on fruits. Lewis County was third with a score of 81. Pierce was fourth with 79. Asotin fifth with 73 points. Benton, Clallam, Jefferson and Kitsap came in the order named. Pierce County was first in attractiveness of display, Spokane second, Lewis third, and Skagit fourth. The others were not placed.

It is impossible to mention specially all the prize exhibits in the different departments, they were so numerous, and of such excellent quality. Speaking generally, the exhibits in the Woman's Building were very good, and interesting. Much could be learned by the housekeeper and home-maker, to make her tasks lighter and home more attractive.

The flower display was unusually good. Bees, as usual, were very interesting, as was also the wild game. At least 55,000 people were admitted to the Fair Grounds,' coming from all parts of the Northwest, and even from New Zealand.

TENDERFEET DISCOVER DUDE COWBOY CHARACTER

"HI" Crawford, beau brummel of the West, has had the tables turned on him by Eastern "tenderfeet," who recently visited Glacier National Park as tourists. One "flash" at this Western "Cowboy Dandy" and these tourists immediately ask, "Who is this Western dude?"

Little wonder! "HI" appears resplendent, attired in $200 chaps made of fine, soft leather and decorated with silver studs. His coat is of buckskin, always slick and sleek, for "HI" keeps it clean with gasoline. An old Indian chief made him a present of this, and he prizes it highly. The beaded vest "HI" wears is a gorgeous creation. This, too, is the gift of an Indian friend. It was worn for more than 30 years by the father of Two Gun White Chief, grand chief of the Blackfeet tribe. With a beautiful multi-colored silk bandana handkerchief swung around his neck and all this rigging topped off by a pair of $40 kid boots, $20 gauntlet gloves and a $50 sombrero, "HI" sure seemingly has earned the subriquet "Cowboy Dude" or anything synonymous anyone would care to substitute.

"HI" is the chief of the Rocky Mountain saddle horse company, and he will tell you his duties consist of assuring "the dudes and ladies" all their trail ponies are gentle creatures, having had the "buckaroo" taken out of them by seasoned riders before they are ever turned into the tourist-horse corral.

J. C. Laurence, manager for the Washington Cooperative Egg & Poultry Association at Winlock, announced that decision had been reached to erect a three-story structure on the association's property at Winlock. It will be the largest building there.

Some 50 bulletins of information are mailed to prospective students by the University of Washington each day throughout the year.

World's News

Readjustment downward of British wages continued during the first six months of 1923, but was less marked than the decrease in wages during the corresponding period of 1922, according to the Bankers Trust Company. The official returns of the British Ministry of Labor disclose that in the first half of the present year 2,679,000 workers had their weekly pay reduced by £385,600. In the same period of last year the weekly pay of 7,150,000 workers was reduced approximately £2,700,000.

Early fall dress business in most of the leading style houses is good, according to David N. Mosessohn, executive chairman of the Associated Dress Industries of America.

Wilson & Co., packers, shipped the largest single shipment of provisions in its history for sale in their branches in England on the recent trip of the steamer Leviathan. Notwithstanding the depreciation in exchange, packers are making larger exports to Europe than a year ago.

New York. — Wholesale counterfeiting of passports for travel to the United States by a group of conspirators about Naples and with confederates residing in New York was disclosed by activities of the Italian police recently, according to the report of the foreign language information service. Tens of thousands have been robbed in this way. Over 50 immigrants with forged passports were found when the steamer Patria landed in New York.

The Chinese government has paid $25,000 to the widow of Charles Coltman, an American citizen who was killed by Chinese sentries at Kalgan December 11th, 1922.

Funeral services for Major Daniel Dee Pullen, of Seattle, Corps of Engineers, were held in the post chapel at Fort Meyer, Va. Interment was in Arlington National Cemetery.

The Far East, especially Japan, is eating more meat than in former years, according to D. A. Cameron and H. E. Powell, representatives of the Australian Meat Council at Sidney, who went to the Philippines to make an investigation with a view of increasing meat shipments to the archipelago.

"There is a growing demand for meat in the Far East," said Mr. Cameron. "The Far East countries cannot supply this demand, and we believe Australia is the logical source of supply. We can furnish approximately 50,000 tons of meat yearly.

Grocers and delicatessen store owners far outnumber any other class of merchants, according to a report issued by the Federal Trade Commission. There are more than 956,000 retailers in the United States, and of this number approximately 335,000 are retail grocers or owners of delicatessen stores. In other words, more than one-third of the retailers in the country are engaged in the distribution of food products. The report also points out that there is one grocer to every 73 families and one jobber to every 56 grocers.

BIG YEAR FOR ROADS

The West experienced in 1922 the greatest road building boom in its history. A total of 7,428.19 miles of new improved highways were completed that year and added to the road systems of the 11 Western States or were under construction on December 31, 1922. The cost of this great public improvement, a survey shows, amounted to $62,035,217.43.

California improved the greatest mileage of roads, having a total of 1,418.1 miles at a cost of $18,574,373.73. Oregon took second rank in mileage constructed with 1,299.4 miles, costing $13,258,371.08, and Colorado was third with 1,236 built at a cost of $5,954,346.69. Although third in mileage, Colorado was outranked in expenditures by Idaho, this state having built or put under construction 680 miles of roads, costing $6,830,000.

Wyoming led her 10 sister states in graded road construction with 531.25 miles of this type, Oregon following with 433.79 miles and California with 427.10. Colorado with 730 constructed the greatest mileage of gravel and crushed rock surfaced highways. Oregon surfaced 647.30 miles with this material, and New Mexico 415.60 miles. Asphaltic concrete found a champion in California, which surfaced 253.40 miles of the state system with "black base." Oregon built 102 miles and Wyoming 18 miles of this type.

A total of 2,645.52 miles, or more than a third of the 7,428.19 miles constructed, were graded roads. Almost half of the 3,457.14 miles of the roads completed or under construction were gravel or crushed rock surfaced. The balance of the construction consisted of hard surfacing.

Blue will return to its position of favor in the color world this fall, says Henri Creanage, the Chenoy fashion authority. The browns now so popular will be deposed, and the lighter shades of blue are due for a greate revival.

October Special

EDISON ELECTRIC AIR HEATER

Special Price FOR October Only **$6.95**

A HANDSOME, light, portable Electric Heater, in brown finish, with a 14-inch bowl, can easily be carried from one room to another. Just the thing for instant heat in the bath room, bed room, or any room in the home.

Get one of the Edison Electric Air Heaters today and connect it to any electric light socket in your home---"It will take the chill out of these chilly days" and it will be a great comfort to every member of the family. It only costs approximately 2.1 cents per hour to operate, on our 3-cent rate.

I have other leading brands of face powders.

I have a good selection of Whitman's candies—the best candy on the market, and it is no higher in price. Why not eat the best?

GRANT CLARK

School Notes
By Estel Rogers

It is human nature to try out anything after it has been perfected to see that it will work. That's what we are going to do this coming Friday afternoon. The football team is going to Colton to play their team. A week from Friday the team will go to Potlatch.

Last Saturday evening the sophomore class met at the home of Ida Evans and spent a very enjoyable evening.

A very good time is reported by everyone who attended the party last Friday night, at which the "Waltz" gave the promised "good time" to the "Averies."

Lucile and Mildred Armstrong of Lebanon, Oregon, were high school visitors last week.

Bernice Rogers is absent from school because of illness.

Anne Tidemann has entered the high school at Reubens, Idaho.

A recent report shows that approximately five hundred dollars' worth of new books have been sold by the school book store this year.

Prize pen and pencils have been ordered for those who received the greatest number of subscriptions in "The Country Gentleman" campaign.

The eighth grade pupils, under the supervision of Mr. Potter, have chosen sides for an arithmetic match. Verona Wolff and Blanch Craft have been elected as captains.

Tom Parks entered school as an eighth grade student last Monday.

The seventh grade will receive the picture of Roosevelt this month for having the best attendance during the month of September, their average being 99.1%.

Watch for Thomas Elmore Lucey under the auspices of the high school, November 1.

Promotion Day Exercises

At the Church school hour Sunday morning the annual Promotion Day exercises were held in the Federated church. The building was well filled and those present earnestly followed the program.

After the announcements had been read and the invocation given the song, "Open the Door for the Children," was sung and the cradle roll was welcomed by Ruth Pendleton and Sonny Evans and the promotion certificates by the cradle roll superintendent, Mrs. Lulu English. The first year beginners were promoted to the primary department. Good-bye to them was given by Burton English and they were welcomed by Jeanette Rader.

The first and second year primary were promoted and the third year class were awarded diplomas to the junior department. Good-bye was said to them by Clifford Hillman and the welcome extended by Zilda Lambert. The good-bye to the juniors promoted to the intermediate department was given by Luther Pendleton and the welcome given on the part of the intermediate department by Sylvia Evans. The junior class then rendered a musical selection after which Wilma Casebolt sang a solo, accompanied by Helen Casebolt.

At the close of the service Rev. Pendleton called to the platform Katheryn Casebolt, Harley English, Leland Emmett, Olin Pendleton and Thomas Dresher and on behalf of the American Recreation and Playground association awarded them bronze buttons for their splendid showing in the physical tests given by the Junior chautauqua given here last June.

Card of Thanks

How Better Than Pills

The question has been asked—In what way are Chamberlain's Tablets superior to the ordinary cathartic and liver pills? Our answer is, they are easier and more pleasant to take and their effect is so gentle that one hardly realizes that it is produced by a medicine. Then, they not only move the bowels but improve the appetite and strengthen the digestion. For sale at Clark's Drug Store.

MEYER & SON, Genesee, Idaho

PERSONAL MENTION

Mr. and Mrs. W. R. Hickman spent Tuesday in Spalding.

W. A. Nixon was a Genesee visitor from Clarkston Saturday.

Mr. and Mrs. Henry Craft were Friday morning passengers for Spokane.

Bill Bailey left Thursday for Berkley, California, where he will spend the winter.

Jesse Gray spent the week-end with home folks, having come over from the U. of I.

O. R. Sundin returned to Genesee Monday after a short visit with his family at Spokane.

Chas. Geltz attended the Dray and Truckmen association meeing at Moscow last Friday night.

Mrs. Alma Butterfield arrived Tuesday from Pullman for a visit with her parents, Mr. and Mrs. John Lawson.

Miss Elizabeth Gamble, who is teaching the Lenville school this term, spent the week-end with Miss Verna Geltz.

Mr. and Mrs. Martin Meyer returned to their home at Colville Sunday after a few days spent here visiting relatives.

Mr. and Mrs. W. J. Davee arrived Tuesday from Lewiston and spent a few days with Mrs. Davee's mother, Mrs. H. M. Warren.

Mrs. W. H. Ehlen was a Thursday morning passenger for Pullman for a visit with her daughter, Maxine, who is attending W. S. C.

Miss Helen Fruth returned to her school work at Colton Monday after spending the week-end with Mr. and Mrs. John Friederichs.

Mr. and Mrs. John Vandenburg left Wednesday morning for Seattle where they will visit with their sons, Harry and Jack, for a few weeks.

Mrs. John Lawson was a Saturday morning passenger for Pullman for a short visit with her daughter, Mrs. Alma Butterfield, and also to attend the fair.

Robley Nation returned to his home at Marshall, Wash., after a visit with his sister, Mrs. Herb. Potsch. Mrs. Potsch accompanied him as far as Pullman.

Mr. and Mrs. Grant Clark and daughter, Esther, attended the forty-first anniversary celebration of Mr. and Mrs. Jas. Robertson at Pullman on Sunday.

Mrs. Anna Rist left Wednesday afternoon of this week, via Lewiston, where she will spend a few days visiting, for her home at Filmore, California, where she will again take up her residence with her daughter, Mrs. Wood.

Mr. and Mrs. E. Salvis and children returned to their home in Tacoma, Wednesday, after a visit with Mrs. Salvis' parents, Mr. and Mrs. Sams. Miss Pearl Sams and Glen Sams accompanied them to Tacoma, where they will spend the winter.

Hold Annual Election

The workers of the Church school met at the Social house Monday for their annual election of officers and teachers. Dr. F. B. Evans, the new superintendent, was elected president; Mrs. Lizzie Bolion, secretary; Leon Follett was re-elected to succeed himself as secretary-treasurer; Mrs. Clara Evans is the new secretary of the workers meetings, Mrs. Leon Follett was re-elected superintendent of the Junior department and Mrs. R. E. Emmett as superintendent of the Elementary department; Mrs. Lulu English was also re-elected cradle-roll superintendent; Mrs. Leslie Casebolt is the new adult superintendent, and Mrs. Dora Etter the new home department superintendent. Helen Casebolt was re-elected pianist for the school at the church and Sylvia Evans for the Junior department. Mrs. B. J. Pleiman, secretary junior and eelementary departments.

Plans were made for several new teachers and an active campaign for making the church school bigger and better than it has ever been before were made. Every parent who has children in the school is urged to come with them and have a part in this program of religious education. The older people, especially the parents, need the study of God's word as much, if not more, than the children.

May Locate at Lewiston

A. Liberati, one of America's foremost musicians and band leaders has sent word to the Lewiston Commercial club that he would like to locate in that city and open a music school. If Mr. Liberati should locate somewhere in the Pacific Northwest, he plans to establish a music settlement.

Law Office Moved

Attorney Thomas A. Feeney, has removed his office to the Smolt building, four doors east of the post office. 14-4

Bielenberg-Schooler Post The American Legion Meets Each First and Third Wednesday at 8 P. M.

Wednesday evening Bielenberg-Schooler post of the American Legion held its regular meeting. The feature of the meeting was an "indoor track meet" under the direction of Thos. H. Herman and Frank Thomas.

The Legion athletes were divided in two teams, one under the leadership of Harry Emerson and the other under Wilson Archibald.

Hand-ball contests, relay races, running broad jump, and Alabama domino race, were some of the features.

Carl Nagel was initiated into the legion and thrilled the members with his demonstration of accurately handling a drill squad.

Armistice Day plans were discussed and a committee composed of Jack Hasfurther, Carl Nagel and Mahlon Follett was appointed to consider what form the Legion activity should take to celebrate the day.

Several speakers brought out the fact that Armistice Day was a day of rejoicing and not a day of gloom. There has been a tendency to make Armistice Day a memorial day, but it was pointed out that Decoration Day serves that purpose.

The committee hopes to conduct a smoker, with other entertaining features, on November 10.

Christian Endeavor Notes

The meeting Sunday evening was led by Marion Mayer. After the opening exercises President Jesse Gray, who had come over from the university for Sunday, took the chair and conducted the semi-annual election of officers with the result that Hope Michelson was elected president; Fred Dicus, vice-president; Ida Evans, secretary; Theodore Parks, treasurer; Wilma Casebolt, corresponding secretary; Marion Mayer, Chairman of Lookout committee, LeRoy Harris of the Prayer meeting, Helen Casebolt the Social and Grace Jain of the Missionery committees.

After the election Rev. Pendleton installed the officers and Jesse Gray then expressed the feelings of the society over the departure of Rev. Pendleton in a few well chosen words full of meaning that was better felt than heard.

First-Class Undertaking Service

The W. J. Herman Company has made arrangements with the Vassar Undertaking company of Lewiston whereby they will handle all cases in that line in a first-class manner at no additional charge for work in this community. Licensed embalmer, auto hearse. Phone your orders to W. J. Herman Company. Phone 6F2. 12-tf

UNDERTAKING AND EMBALMING

Licensed Embalmer *Auto Hearse*

First Class Service Guaranteed

Will Organize Millinery Class

Word received from County Agent Fletcher is to the effect that the district extension worker, Miss Clara Cowgill, will conduct a class in fall millinery in Genesee October 15-16-17. This course is free to those who take the work. The only cost is the material, which many women already have in their homes.

The hats made in the class last spring were valued at from $6 to $15 each. The greatest expense for any one hat was $3.65. You not only get a new hat, but the experience and training to make many more.

Everybody taking the course must be present the morning of the first day; no late comers will be received. The enrollment is limited to 12. Register with Mrs. Pendleton at once. Phone 80-1.

Federated Missionery Society

The members of the missionery society of the Federated churches are requested to meet at the home of Mrs. A. L. Etter on Wednesday, October 10, at 2:30 in the afternoon.

M. Chubb, Sec.

They Thought Alike

Pat had got hurt—not much more than a scratch, it is true—but his employer had visions of being compelled to keep him for life and had adopted the wise course of sending him to a hospital.

After the house surgeon had examined him carefully, he said to the nurse: "As subcutaneous abrasion is not observable, I do not think there is any reason to apprehend tegumental cicatrization of the wound."

Then turning to the patient, he asked quizzically: "What do you think Pat?"

"Sure," said Pat, ye took the very words out of my mouth. That's jist what I was going to say."

Short Undertaking Company

Parlors at Genesee and Moscow. Prompt attention given night or day calls. Embalming and auto equipment furnished all funerals without extra charge. Full line of caskets at both places. At Genesee call George Schlerth at the Genesee Hotel.

"Courtesy and Service" is our motto. We relieve you of every care. 14-tf

Two Weeks' Specials

WE herewith give below a list of articles of useful merchandise---every item of which means a big money-saving opportunity for you.

DRY GOODS SPECIALS

27-inch outing, dark and light, sale price, yard 22c
36-inch amoskeag outing, sale, yard 28c
16-inch extra heavy linen bleached crash toweling, yd. 24c

MY LADY'S MONEY

An Episode in the Life of a Young Girl

By Wilkie Collins

INSTALLMENT 21

Moody's eyes rested on Old Sharon with a searching and doubtful look.

"Mr. Hardyman's valet?" he repeated. "I wasn't prepared to hear Mr. Hardyman's name."

Old Sharon looked at Moody, in his turn, with a flash of sardonic triumph.

"Oho!" he said; "has my good boy learned his lesson? Do you see the thief through my spectacles already?"

"I began to see him," Moody answered, "when you gave us the guinea opinion at your lodgings."

"Will you whisper his name?" asked Old Sharon.

"Not yet. I distrust my own judgment. I'll wait till time proves that you're right."

Old Sharon knitted his shaggy brows and shook his head. "If you only had a little more dash and go in you," he said, "you would be a clever fellow. As it is—" He finished the sentence by snapping his fingers with a grin of contempt. "Let's get to business. Are you going back by the next train along with me, or are you going to stop with the young lady?"

"I will follow you by a later train," Moody answered.

"Then I must give you your instructions at once," Sharon continued. "You get better acquainted with Hardyman's valet. Lend him money if he wants it; stick at nothing to make a bosom-friend of him. I can't do that part of it; my appearance would be against me. You are the man; you are respectable from the top of your hat to the tips of your boots; nobody would suspect you. Don't make objections! Can you fix the valet? Or can't you?"

"I can try," said Moody. "And what then?"

Old Sharon put his gross lips disagreeably close to Moody's ear.

"Your friend the valet can tell you who his master's bankers are," he said; "and he can supply you with a specimen of his master's handwriting."

Moody drew back as suddenly as if his vagabond companion had put a knife at his throat. "You old villain!" he said; "are you tempting me to forgery?"

"You infernal fool!" retorted Old Sharon. "Will you hold that long tongue of yours, and hear what I have to say? You go to Hardyman's bankers, with a note in Hardyman's handwriting (exactly imitated by me) to this effect: 'Mr. H.' presents his compliments to Messrs. So-and-So, and is not quite certain whether a payment of five hundred pounds has been made within the last week to his account. He will be much obliged if Messrs. So-and-So will inform him by a line in reply whether there is such an entry to his credit in their books, and by whom the payment has been made.' You wait for the bankers' answer, and bring it to me. It's just possible that the name you're afraid to whisper may appear in the letter. If it does we've caught our man. Is that forgery, Mr. Middleman Moody? I'll tell you what—if I had lived to be your age, and knew no more of the world than you do, I'd go and hang myself. Steady! here's our charming friend with the milk. Remember your instructions, and don't lose heart if my notion of the payment to the bankers comes to nothing. I know what to do next, in that case—and, what's more, I'll take all the risk and trouble on my own shoulders. O Lord! I'm afraid I shall be obliged to drink the milk, now it's come."

With this apprehension in his mind, he advanced to relieve Isabel of the jug she carried.

"Here's a treat!" he burst out, with an affectation of joy which was completely belied by the expression of his dirty face. "That's something like!" he said, smacking his lips with an air of infinite relief. "I'm homesick already for the soot of my happy childhood and my own dear native mud. The air here is too thin for me, and the sky's too clean; and—O Lord!—when you're used to the roar of the traffic—the 'buses and the cabs and what not—the silence in these parts is downright awful. I'll wish you good evening, miss, and get back to London."

Isabel turned to Moody with disappointment plainly expressed in her face and manner.

"Is that all he has to say?" she asked. "You told me he could help us. You led me to suppose he could find the guilty person."

Sharon heard her. "I could name the guilty person," he answered, "as easily, miss, as I could name you."

"Why don't you do it, then?" Isabel inquired, not very patiently.

She turned away with a frown on her pretty face. Old Sharon followed here. Even his coarse sensibilities appeared to feel the irresistible ascendency of beauty and youth.

"I say!" he began, "we must part friends, you know, or I shall break my heart over it. They have got milk at the farmhouse. Do you think they have got pen, ink, and paper, too?"

Isabel answered, without turning to look at him, "Of course they have."

"And a bit of sealing wax?"

"I dare say."

Old Sharon laid his dirty claws on her shoulder, and forced her to face him as the best means of shaking them off.

"Come along!" he said. "I am going to pacify you with some information in writing."

"Why should you write?" Isabel asked, suspiciously.

"Because I mean to make my own conditions, my dear, before I let you into the secret."

In ten minutes more they were all three in the farmhouse parlor. Old Sharon wrote, enclosed what he had written in an envelope, and sealed it (in the absence of anything better fitted for the purpose) with the mouthpiece of his pipe.

"Now, miss," he said, "you give me your word of honor"—he stopped and looked round at Moody, with a grin—"and you give me yours, that you won't either of you break the seal on this envelope till the explanation of one week from the present day. There are the conditions, Miss Isabel, on which I'll give you your information. If you stop to dispute me, the candle's alight, and I'll burn the letter."

It was useless to contend with him. Isabel and Moody gave him the promise that he required. He handed the sealed envelope to Isabel with a low bow. "When the week's out," he said, "you will own I'm a cleverer fellow than you think me now. Wish you good evening, miss. Come along, Puggy! Farewell to the horrid, clean country, and back again to the nice London stink!"

He nodded to Moody— he leered at Isabel—he chuckled to himself—he left the farmhouse.

Crossing the last field Isabel and Moody entered again on the high-road leading to the row of villas in which Miss Pink lived. The minds of both were preoccupied. Neither of them noticed a gentleman approaching on horseback, at the walking pace of his horse, and he only observed the two foot-passengers when he was close to them.

"Miss Isabel!"

She started, looked up, and discovered—Alfred Hardyman.

"This is a piece of good fortune that I hardly hoped for," said Hardyman, his cool, quiet, dreamy way of speaking quickened, as usual, in Isabel's presence. "I only got back from France this morning, and I called on Lady Lydiard in the hope of seeing you. She was not at home, and you were in the country, and the servants didn't know the address. I could get nothing out of them, except that you were on a visit to a relation." He looked at Moody while he was speaking. "Haven't I seen you before?" he said, carelessly. "Yes; at Lady Lydiard's. You're her steward, are you not? How d'ye do?" Moody, with his eyes on the ground, answered silently by a bow. Hardyman, perfectly indifferent whether Lady Lydiard's steward spoke or not, turned on his saddle, and looked admiringly at Isabel. "I begin to think my luck has turned at last," he went on, with a smile. "I was jogging along to my farm, and despairing of ever meeting Miss Isabel again—and Miss Isabel herself meets me at the roadside! I wonder whether you are as glad to see me as I am to see you? You won't tell me, eh? May I ask you something else?—are you staying in our neighborhood?"

There was no alternative before Isabel but to answer this last question. Hardyman had met her out walking, and had no doubt drawn the inevitable inference, although he was too polite to say so in plain words.

"Yes, sir," she answered, shyly; "I am staying in this neighborhood."

"And how is your relation?" Hardyman inquired, in his easy-matter-of-course way.

Isabel, still resting her hand on Robert's arm, felt it tremble a little as Hardyman made this last inquiry. She cast one appealing look at Moody, and pronounced the distinguished name of Miss Pink.

"Miss Pink?" Hardyman repeated. "Surely I know Miss Pink."

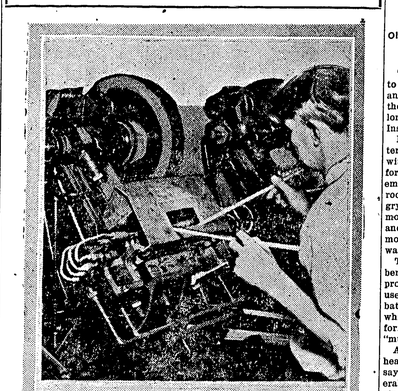
(To be Continued)

During the first six months of this year, all records were smashed for water shipment of lumber from the Northwest mills. An increase of 150,000,000 feet was shown over a like period in 1922. Last year, clearances from Washington and British Columbia totaled 1,634,062,655 feet; this year 1,818,141,281 feet.

"Tomorrow is my birthday, dearie, and I'm going to take a day off."

"Why, darling, you never took off less than a year before."—Everybody's.

Making Electric Light Globes



Taffy-pulling, as an evening's amusement, is one of the fond recollections of our childhood. But in the Chicago manufacturing plant of the Western Electric Company, taffy-pulling is a full-time job for several men. But here the "taffy" is hot glass. These men do their part in making thousands of translucent glass caps for telephone switchboard lamps, in the Hawthorne works of the Western Electric Company.

Better Health Service

PUBLIC HEALTH IS PUBLIC WEALTH

These Articles Compiled by the Public Health League of Washington

VARICOSE VEINS

One of the common complaints that causes much pain and disability, especially among women, is varicose veins of the legs. This trouble is purely a mechanical one; at the outset, some unusual pressure on the veins of the abdomen causes a damming back of the blood. This pressure is very frequently from constipation and the arrangement of the vessels causes the left leg to be affected more frequently. This obstruction leads to the dilatation of the veins with a thinning and weakening wall and as the column of blood from the feet to the heart means a very definite, constant load to carry, the condition tends to grow worse instead of being self-curative as fortunately so many ailments are.

The veins affected are, those running just below the skin and outside of the muscles. It is easily understood that these vessels have very little support from surrounding tissues as have the deeper veins of the leg, where the contracting muscles constantly tend to propel the blood through the veins.

As these superficial veins drain the skin, when a blocking takes place, the blood backs up into the small capillaries of the skin and as the tissue is nourished by the blood stream, it follows that the cells do not get their usual supply of oxygen and other foods; the skin becomes thick and soft, like wet blotting paper; the whole leg gets much larger than it should be and some day a bruise on the shin bone that ordinarily would not be noticed, causes a breaking down of these weakened skin cells and a varicose ulcer is started. These usually expose some fine nerve filaments and this causes the extreme pain often found.

Occasionally these dilated veins rupture and quite a severe bleeding occurs. This, as a rule, is not dangerous to life and slight pressure will stop it, but it causes the patient and relatives great anxiety and fear of its recurrence.

The treatment, of course, is purely mechanical and like all other things medical, it is absolutely devoid of anything mysterious. The common sense idea of relieving the pressure on the enlarged veins would prove to anyone. This allows the circulation to become normal again and the skin and other tissues of leg shrink back to natural size. In the mild cases, rest, lying down, with the affected leg raised on pillows, affords great comfort. Constipation should be overcome, any heart or kidney trouble looked for, and when the patient gets about again, the wearing of an elastic, well fitting stocking, will help greatly.

If an ulcer has formed, or if greatly dilated, curving, veins are present, it may be necessary, after a period of rest, to relieve the condition by operation. In operating on varicose veins, we make use of the fact that there are two sets of veins returning blood from the limbs and that only the superficial set is diseased. We therefore deliberately take out the diseased veins that lie just below the skin and this forces the blood into the deep set of veins that are helped, as before mentioned, by the support of the muscles. The operation is simple but may be extensive—usually heals up in about ten days. If there is an ulcer to skin-graft, it may take longer, but the healing is usually permanent and very satisfactory to the patient.

How the Bee Carries Pollen

Insects are chiefly beneficial as pollenizers of blossoms, and there are but few plants or trees that do not depend to some extent upon them to carry pollen from one flower to another.

Most of our fruits are largely dependent upon insects, writes A. B. Champlain in Nature Magazine and many kinds of crops could not be raised without their assistance.

Flowers are visited by members of all the main groups of insects. Bees are the most important, while flies come next.

Butterflies, the insects of flowers par excellence, feed on their sweet nectar, revel in their delicate perfumes and seem almost like another flower as with dainty wings they flutter and flit among the blossoms.

Insects are attracted to flowers mainly to obtain food (honey or pollen), being guided by the bright colors, perfume and odor-dependent on the taste of the particular insect.

In this way nature provides an indispensable and important means of carrying pollen from the stamens of one plant to the stigma of another, thus insuring cross fertilization, and the production of fruits and seeds.

A bee enters the slipper-shaped lip of an orchid, the pink lady's slipper, in search of honey. It is unable to leave by the same opening. By crawling under the stigma it may escape by one of the two lateral openings at the base of the lip.

As it leaves the flowers it rubs against the anther above, thus dusting its back with pollen. Entering the next flower it leaves some of this pollen on the stigma, in this way effecting a complete cross-pollinization process.

Mr. L. A. Nevin, 3803 Rainier Avenue, Seattle, with his wife and daughter, and the driver of the machine, were held captives in a Sedan, when it overturned and caught fire. Mr. Nevin heroically did his utmost to save all the occupants of the car, succeeding in breaking the windshield and dragging the others out. Mr. Wells, the driver, suffered the only injury. He was taken to the City Hospital, badly cut about the hand and painfully burned about the face and shoulders. The others returned to their home. The machine was practically destroyed before the fire department arrived.

Even The Squeal Of The Pig Is Put To Work

Old Saying That Everything Is Used But the Noise of Porker Now a Back Number

The squeal of the pig has been put to work by the farm labor shortage and the saying that everything of the pig is used but its squeal no longer holds good, says the National Institute of Progressive Farming.

Mr. Pig drinks at automatic waterers and manipulates self-feeders with his snout, which instrument he formerly used to root up pastures and emit loud squeals. He need no longer root the ground or squeal when hungry, the incentive having been removed. A certain amount of time and labor also was eliminated by the more simplified way of feeding and watering.

The consumer, the Institute says, benefits materially with better pork products through the more general use of sanitary concrete "wallows" or baths and automatic "hog oilers," which tend to decrease hog diseases formerly contracted in the traditional "mud-wallow."

Another item which makes for a healthier and more profitable pig, says the Institute, is the more general agvantage taken of the "hogging-down" frop process whereby the hogs are turned into the cornfields and allowed to harvest while feeding themselves. Thousands of acres of grain are harvested in this way instead of carrying feed to penned-up pigs. This also serves to reduce the farm labor problems.

Where the "hogging-down" process is used beans are planted with the corn to permit the pig to harvest a balanced ration to give a finer ham sandwich to the consumer.

WORLD NEWS

Washington.—A letter from Brig.-Gen. C. E. Sawyer, White House physician, expressing the belief that President Harding's "primary illness was not due to eating canned foods," was made public by Frank E. Gorrell, secretary for the National Canners Association, who announced that Dr. C. C. Cooper, diagnostician called in consultation at San Francisco, also was of this opinion.

A highly water resistant blood albumen glue, which can be applied without the use of a hot press, has been invented at the Forest Products laboratory of the department of agriculture, at Madison, Wis. The discovery is of importance to the lumber and furniture interests of the country. The formula has been dedicated by the Forest Products laboratory to the free use of the public.

Shingle interests of the Northwest are combining to fight organized propaganda of patent roofing manufacturers against the use of modern shingles, and have opened an office in Portland to push anti-shingle legislation in Middle Western cities.

MAY FEED COWS ON SAWDUST RATIONS

Fifty sacks of Douglas fir sawdust are being shipped to the Forest Products laboratory, Madison, Wisconsin, by the Duluth-Oregon Lumber Company at Portland, to be used in experiments for production of cattle feed.

Experiments so far conducted by the laboratory indicate that the sawdust of coniferous wood can be converted into wholesome cattle feed, according to W. H. Gibbons of the Forest Service at Portland. A preliminary feeding trail, using a product prepared from Eastern white pine, was conducted in co-operation with the Wisconsin College of Agriculture with favorable results. With the sawdust feed representing about 25 per cent of the ration, the cows gave normal production of milk and showed an appreciable increase in butterfat production. A decided increase in weight was also noted in the period in which they were fed the treated sawdust.

All previous experiments of this character have been done with sawdust from eastern species, Mr. Gibbons said, but now sawdust produced in West Coast mills is to be given a thorough trial by the Forest Service.

Pocketbook Facts

The cost of living is about three-fifths higher now than it was when the war started in 1914, according to the National Industrial Conference Board. It figures on the basis of the requirements for the average American wage-earner with five in a family. In other words, it takes about $1.60 to buy what cost $1.00 in 1914. To counteract this situation, the average person should be getting an income three-fifth higher than before the war. Divide your income by 16 and multiply it by 10, and you'll have your present buying power in terms of the 1914 dollar, for comparison.

Chief Justice Calvin L. Brown, of the Minnesota Supreme Court, was found dead at his home in Minneapolis, on September 24th.

The percentage of land under cultivation in Washington increased from 27.4 in 1910 to 31 per cent in 1920.

Northwest News

Boys' and girls' clubs of Yakima County will be represented at the Pacific International Livestock Show by an exhibit of dairy and beef cattle and hogs. E. C. Scott, county club leader, is now arranging for the exhibit; and he is also organizing a stock judging team to go to the show to compete for prizes.

Frank M. Rothrock, Shorthorn breeder of Sprague, shipped 79 head of fat cattle to the Chicago market, for which he received 9 cents a pound for steers and 8 cents a pound for cows and heifers. The total shipment brought $6,500, which is a little more than would have been realized had they been sold on the Seattle or Portland markets.

T. J. A. Scollard, owner of Broadmeade Farm, Chehalis, was awarded the silver cup offered by M. Burnett, Chehalis jeweler, at the Southwest Washington Fair, for the livestock exhibit winning the most blue ribbons. Mr. Scollard's list included 13 blues awarded on his showing of Aberdeen-Angus. N. C. Sears, the Winlock Jersey breeder, was second with 12 blues.

Stephen B. White of Cloverland, Asotin County, is the winner of the gang plow offered by the John Deere Plow Company to the student of the State College of Washington who made the highest grades in four agricultural subjects the past two years. White was graduated this month from the college, and has gone back to his farm near the Blue Mountains. He was a student of unusual mechanical ability, and proved of material help in the construction of the machine for dry treatment of smut, adopted by many Pacific Northwest farmers.

Silas E. Bunker, federal prohibition agent, with a dry squad, seized 150 gallons of wine from the basement of the Yakima Hotel, in Yakima on September 22nd.

D. O. Lively, once prominent on the Pacific Coast, particularly as manager of the livestock department of the Portland Exposition back in 1905, and later in helping to organize the Pacific International Livestock Exposition, is again returning West as manager of a campaign of development which is to be put on by the Washington State Chamber of Commerce. The campaign is to stimulate better marketing of agricultural products; to increase cooperation between farm and city dwellers; to advance the settlement of unoccupied lands. N. B. Coffman of Chehalis is president of the State Chamber of Commerce, and the plans under way are to use a fund of $100,000 a year during the next three years in this educational and development work.

NORTH PACIFIC LIVESTOCK SHOW

The North Pacific Livestock Show will open its doors at Everett on October 1st for four days' exhibition. This show needs a good start last year. Encouragement enough was given at that time to justify repeating the undertaking again this year, now preparations are going forward for a larger and better exhibit than was shown a year ago.

The citizens of Everett and Snohomish County are very anxious to make the North Pacific in time a second Pacific International, and to that end they are bending every energy. The same officers that guided its destinies last year are still at the helm, and Secretary-Manager T. C. Simmons reports that indications point to a most successful show this month—the dates—October 11 to 14.

Federal Judge Neterer placed the blame for the West Hartland-Government collision, in 1922, on both vessels, denying the petition of the shipping board for limitation and exemption of liabilities of the West Hartland.

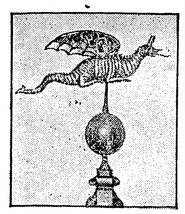
Three dealers were found guilty of selling cigarettes to minors, in Police Judge C. C. Dalton's court, Seattle, on September 24th, and were fined $25.00 each.

Kelso and Longview lately sent many volunteer workers to work on clearing the right-of-way for the Ocean Beach Highway, to connect with the road, graded to the Cowlitz County line by the Wahkiakum people.

Experimental tests to determine the relative merits of wood shingles and other roof coverings were started last month by the Bureau of Standards of the Department of Commerce that will last several months. The results will be eagerly watched by Northwest shingle men in their effort to build up a use of this section's biggest industries.

The largest moonshine plants ever found in Gray's Harbor district by Federal prohibition officers and the county officials were raided lately. Billy Simmons was arrested, he is said to be a partner of Elmer Todd, held in jail in connection with the recent prohibition Agent Harold V. Mooring. All the equipment was confiscated.

Copper Dragon on London Church has its 350th Birthday



THE 350th birthday this month of the old copper dragon on the church of St. Mary-Le-Bow, Cheapside, London has aroused much comment both because of its historic interest and because it marks a renaissance of the copper weather cock in this country, due to the increasing use of the tower in American architecture.

The copper dragon of St. Mary's was put in place in 1573 during the reign of good Queen Bess. From its perch, 221 feet above the pavement, besides rendering service through the storms of centuries, the Cross of St. George on its wing has served as a symbol of the city of London for 350 years.

The dragon is made of sheet copper and is 8 feet, 6 inches long. It has been taken down and regilded four times but the copper has never needed repairs. It is the subject of many legends. One of the most interesting, attributed by many to Mother Shipton, was that if this dragon and the grasshopper from the vane of the Royal Exchange ever met, the streets of London would flow with blood. They were both taken down for regilding in 1820 and did meet. Nothing happened, however.

FORMER IDAHO MAN'S HISTORY IS ATTACKED

Directing criticism at certain histories of the United States proposed for use in Indian schools, Frank Henley, adjutant of the American Legion in Indiana, has succeeded in having the objectionable books removed from the list of texts. Henley's representations, made to the school commissioners, were that the works in question failed to pay proper regard for the historic acts of Americans during the Revolution.

The books named were "A History of the American People," by William Mason West, former professor of history at the University of Idaho, and "An American History," by Dr. David Saville Muzzey.

Henley's statement was made on the basis of reports from A. H. Conner of Idaho, and supplemental remarks by Judge Wallace MacCamant, chairman of the committee on patriotic education of the Sons of the American Revolution. The Indiana man declared West's history made statements about men in public life which stamped the author as "a loose thinker, utterly unfit to mould the elastic and impressionable minds of school children."

Both books were named in a recent report to Mayor Hylan of New York, who barred them from the schools of that city on the ground that they sought to disseminate anti-American and pro-British propaganda.

DECLARES STUDENT HEARS WITH HAND

Northwestern University Professor Says That Protege Distinguishes Words Through the Palms

"Hearing" only with the palm of his hand, John Crane, a sophomore at Northwestern University, has acquired a vocabulary of 23 words since November and now can receive sentences composed of any words in it.

The development of this ability to "hear" with the hand has come through a series of experiments by George Crane, a graduate student and a brother of John, working under the direction of Prof. Robert H. Gault of the department of psychology. The tests are expected to be of great practical value in the teaching of deaf children and may lead to the teaching of deaf mutes to talk, Professor Gault says.

Hears With Finger Signs N

The experiments are also said to prove that Wilhelmina Huegins, the famous deaf girl of Janesville, Wis., actually hears with her finger tips. The case of the Huggins girl had caused a controversy in scientific circles, investigators differing regarding her powers after repeated experiments.

For his experiment, Professor Gault used a 30-foot speaking tube, the ends of which were separated by two walls and a room. About the receiving end of a sound-proof box was made, preventing the voice of the sender from reaching the receiver, whose ears were stuffed with putty and whose head was bandaged as a further precaution.

His Vocabulary

The vocabulary acquired by John Crane includes the words ray, bear, go, did, not, fight, terrify, you, transport, see, forget, donkey, will excite, professor, control, Howard, decide, desire, to, punting, and therefore.

Crane has made marked progress that he is now able to distinguish the songs "America," "Old Black Joe," "Divie," and "There's a Long, Long Trail."

AGED SALVATION ARMY LASSIE REFUSES TO QUIT

NEW YORK. — Commandant Emma Westbrook, the only surviving member of the original contingent of lassies who planted the flag of the Salvation Army in the United States in 1880, has again served notice on her superiors that despite her 43 years of age she will not retire from active service.

This is about the tenth time in as many years that the valiant commandant has refused the beneficent plans of her organization to put her on the inactive list. Although she is nearly 80 years old, she is as alert mentally and physically as the average man or woman of 50. She participates in three street corner meetings each week in Albany, takes an active part in the charitable work of the Salvation Army, and visits New York city for special meetings at frequent intervals.

When the original party of eight came over from England as pioneers at the behest of General William Booth, Commandant Westbrook was the oldest member of the aggregation. The other seven have lived their span and gone to their reward, but the commandant goes vigorously on. Her refusal to quit constitutes the only case of "insubordination" the Salvation Army has ever tolerated.

Commandant Westbrook has been an active "warrior" in the Salvation Army for 45 years. Of this service 43 years have been spent in the United States.

With a budget of $9,236,350, the Colorado State Highway Department embarked early this spring upon a big program of highway construction. Colorado this year has adopted for the first time in certain instances the asphaltic types of pavement that is roads. Road building is now in full swing in a score or more of the counties of the state.

Idaho News

Mark A. Means, State Commissioner of Agriculture, opposes the reduction in their tariff on Canadian cattle, asked for by the American Farm Bureau Federation. Mr. Means' contention is, that cheap hay in Idaho should be used in putting cattle, already in the State, in marketing condition.

As a result of a conference between Senator Borah and Secretary of the Treasury Mellon, the threatened attempt to foreclose mortgages on a large number of Idaho farms, by the Federal Land Bank, at Spokane, has been silenced.

Following the successful example of some of their brother countrymen, who have established themselves in Eastern Idaho, Swiss dairymen from Wisconsin are planning to establish a colony in the Wood River Valley. Idaho is doing much to induce dairymen to settle within her borders.

Will Hayes, district game warden, and three deputies, recently entered the restaurant of Frank Bola, at Pocatello, Idaho, where wild duck was listed on the bill of fare. After ordering a portion each, which was served them, they arrested Mr. Bola, who paid a fine of $25.

Word has been received at Nampa, from Mrs. Carl R. Latham, of Chicago, National Chairman of the women's campaign, that Miss Josephine Payer has been appointed chairman of the Idaho women's committee, assisting Northwestern University, in a $5,050,444 campaign for endowment and new buildings. In 21 other States women chairmen have been appointed.

Miss Grace Young, daughter of Mr. and Mrs. J. B. Young, of Lewiston, recently sailed for Hong Kong, China, where she goes to serve as head nurse in the Missionary Hospital of the Christian church, at Botang. She is a graduate of Mercer Hospital of Denver. Miss Young joined a party of 13 other missionaries that sailed from Seattle on September 23.

At St. Luke's Hospital, Boise, on September 20th, Bert Bachelor, age 19, died from injuries received in an explosion at the Deming mine, near Silver City. His father, Ole M. Bachelor, 50, was killed almost instantaneously in the same explosion. Cause of the explosion was given as a "missed" shot, which was set off when the father, wielding a pick, ignited the powder.

Oscar Dan and Thomas Iverson, well-known livestock men, of Twin Falls, are out on bail, charged with attempting to defraud the United Sates War Finance Corporation, by falsifying their financial statement, in applying for a $10,000 loan. While the application was made in December, 1921, these men have been but recently arrested, under a secret indictment, returned by the Federal grand jury.

The citizens of Lewiston are making great preparations for the annual reunion of the North Idaho Pioneer Association, to be held there on September 27th, 1923. This gathering is always truly typical of old times; the old pioneers meet together, have banquets, tell stories, dance the old time dances and sing old songs. Last year, over 400 old folks gathered together for two days —said to be the most memorable event in the history of Lewiston.

Idaho claims to have organized more co-operative bull associations than any other state in the West between the dates of June 1, 1922, and May 31, 1923, according to J. E. Dorman of the Western office of the United States Dairy Division. During that time 109 purebred dairy bulls were placed in communities throughout the state by these bull associations. Owing to the large number of bulls recently shipped into Idaho from Washington, the number must have been greatly increased during the past three months.

Trees for Roads

The American Tree Association is behind a movement for the planting of trees and shrubbery along New Jersey's good mileage of beautiful winding asphalt roads, according to Russell T. Edwards, director of the association's educational bureau. "The state of New Jersey, and practically every other state for that matter, has good roads and is planning more," said Mr. Edwards recently. "Why not line them with trees and shrubs properly placed? If the people can be turned to tree planting there will be a wide response to forestry programs and highway tree planting. In the states where they have the most trees more trees are being planted."

Giacomo Lauri-Clopi, newest tenor of the Metropolitan Grand Opera Company, of New York, has been phonographically introduced to the public by his song, "La Donna e' Mobile." He also plans to make a nation-wide concert tour.

About a dozen requests for information on the University of Washington's study of Prohibition Agent Harold V. Mooring, who was killed by bootleggers in Seattle, have been received by the committee on publication, which is in charge of the work.

PROMINENT WASHINGTON DAIRY MEN ATTEND WORLD'S DAIRY CONGRESS

J. A. Scollard, president of United Dairymen's Association, and Prof. E. V. Ellington, head of dairying at State College, are two of the accredited delegates from the State of Washington to the World's Dairy Congress, now in session in Eastern cities. The congress held its opening session in Washington City on October 2, and 3, then on to Philadelphia for the 4th, winding up the five days' session at Syracuse, N. Y. on the fifth and sixth, during the National Dairy show.

Mr. Scollard is on the program to discuss "Co-operative Manufacturing and Marketing of Dairy Products."

Prof. Ellington has been honored by selection as one of the secretar-

J. A. SCOLLARD

ies of the congress. Thirty foreign countries have sent delegations to this congress, the first time a World's dairy congress has convened in this country.

While in the East Prof. Ellington will attend the meeting of the Western Dairy Instructors' Association, of which organization he has recently been elected secretary; and he will also represent Washington State at the dedication of the new $600,000 dairy building at Cornell University.

THINKS TURNIPS UNDESIRABLE DAIRY COW FEED

Under the heading, "Dairy Cows Should Not Be Fed Turnips," the California Department of Agriculture, in a recent issue of its News Letter, advises that "feeding turnips to cows as a dairy ration has been found to impart to butter made from the milk of these animals a disagreeable odor and a strong, repulsive taste which is in every way as offensive as butter which has become rancid as a result of bacterial growth; in fact, the development of this flavor is evidently the indirect result of a process of bacterial fermentation commonly known as 'ripening' since butter made from the milk of cows fed on turnips will develop the characteristic foreign flavors even though it is not discernible in the milk itself.

"A recent opinion of the Attorney-General holds: 'If, as a matter of fact, milk from cows which have been fed on turnips is unpalatable to human taste or the butter manufactured therefrom has a disagreeable odor and a repulsive taste, defects not common to butter commonly known as "good" butter, then I think it can safely be said that such milk and the butter manufactured therefrom is "tainted."

"It is undoubtedly within the police power of the state to prohibit the sale of butter as well as the sale of milk, that is unclean or impure.'"

This will be news to many experienced dairymen, who have made a practice of growing and feeding turnips to their cows and considered that they were following a good practice.

This writer has grown and fed hundreds of tons of rutabagas with never a complaint from either cow or customer; having always produced an excellent quality of milk and butter when using them. He has always considered them one of the very best winter feeds, and when fed at milking time, has never detected taint in the milk or products made from this milk.

If fed a short time before milking or during the mid-interval between milking, turnips will undoubtedly impart a disagreeable taint and odor to the milk, but so far as his experience goes, he has never detected an undesirable quality in the butter made from turnip-fed cows, that is so noticeable in the case where potatoes are fed to dairy cows in excessive quantities.

It is the opinion of Northwest Dairyman and Farmer that the California Department of Agriculture is advising against one of the very best crops for winter feeding, for next to mangles it considers rutabagas the most valuable of winter sweetened feeds; and it is most unfortunate that the cost of growing them at the present time prevents their more general use.

One thousand miles of steps are saved each day for the women of Jackson Heights, the garden home apartment development in New York City, the kitchens of which are equipped with Hoosier cabinets, overhead clothes dryers, new height gas ranges, and other modern time-savers.

Late Emerson Hough Called Apostle of the Southwest.

By Boris Bolt

The late Emerson Hough, who wrote only of the adventures he knew by actual experience.

Lived life he described among pioneers, desperadoes and gunmen of Early West.

The late Emerson Hough might well be called "The Apostle of the Southwest", for to him, more than to any other man, is due the fact that we have authentic pictures of its development. Too often have the early West and Southwest been playgrounds for the fancy of authors without real knowledge of their people or conditions. And thus has grown up a lurid literature, stilted and unreal, through which move fabulous heroes and villains blacker than the night.

But Hough lived amid the conditions he describes. At the age of twenty-three he was practising law in the bustling, little cow town of White Oaks, New Mexico. He knew the pioneers, the desperadoes and bad men of the early Southwest. In his new book, "North of 36", he has given us a magnificent and startling picture of the first cattle drive from Texas north to Abilene, Kansas. The herd belongs to a beautiful young girl, Taisie Lockhart, "an orphant", as her rough cow hands call her. She is broke — cannot pay the wages — and when the small herd left her by the pilfering carpetbaggers of reconstruction days in Austin, is her one heritage.

Rudabaugh, an outlaw of vision and state treasurer, who has been stealing funds in Texas, foresees in their great value when the first cattle are driven "North of 36", fears that his plans will be anticipated if the herd wins through to Abilene. He pursues, with his desperadoes, the wild little caravan lead by Taisie through trackless wilderness, over swollen rivers which must be swum by cattle, horses and humans. Had it not been for Dan MacMasters, two-gun sheriff of Gonzales, the secret though misunderstood ally of Taisie Lockhart, the first herd could not have won "North of 36". And, by the way, this MacMasters is as picturesque a character of the frontier as any found in the pages of Bret Harte.

Hough's fame must rest largely upon this truest, most complete and stirring account of the opening of the great Southwest.

A BEAR STORY

Lately, the west side of White River Valley has had the real excitement of a bear chase. A hungry black bear came out of the woods to visit the farms, evidently in search of foods which he would prefer to the berries, with which he had been surfeited. The farm of Guy Caybles was the first one to interest him. It was a bright moonlight night, and when Mr. Caybles saw the bear, he rushed for his rifle, shot at the bear, just grazing his shoulder. The bear hurriedly left, and Mr. Caybles, discovering he had no more cartridges hurried to the house for more. His family accompanied him to take up the chase—the neighbors likewise. They pursued the disabled bear, and catching up with their quarry, the men were surprised that it did not turn on them. He was a good-natured bear, until Mr. Caybles dealt him a blow with the butt of his gun; then the bear turned, under protest, so Mr. Caybles hurriedly despatch his antagonist. Bear steaks were served quite generally for a few days in that vicinity.

"A HOME BANK"

REASONABLE SAVING HELPS US ALL

Notice

Economical conditions demand that the long time account system cease. Years ago the manufacturer extended months of credit to the jobber; the jobber passed it on to the retailer, and he in turn favored his customers.

Today the manufacturer sends a sight draft with the bill-of-lading to the jobber, the jobber extends 10 to 15 days credit to the retailer, and successful retailers all over the country have followed suit.

Experience has proved it is the only fair, sane and consistent method.

On and after October 15, 1923, as a protection to themselves and in a spirit of fairness to all concerned, the undersigned will extend credit only **on a thirty day basis,** by special agreement.

The current month's bills are due and payable on or before the 10th of the following month.

Signed,
Follett Bros. Mercantile Co.
Emmett & Boliou.

"All Dolled Up"

And now comes a dispatch from London, saying smartly dressed women of the future must wear "flare" skirts, modified leg-of-mutton sleeves, well-defines waist-lines, and must make up in "doll" fashion, according to London fashion experts. The "doll" make-up consists of a dash of red on each cheekbone, and another dash in the middle of the forehead. This gives the fair wearer the appearance of a Dutch doll.

Skirts of the coming season, the London fashion judges have decreed, shall be so made that when the wearer walks the skirt will fill out like a balloon, but when she stands still in repose her draperies will enfold her as in a sheaf. The ultra-long skirts, so much in vogue during the last season, will be abandoned. The new circular, "flare" skirts are shorter than those of last year.

Too Efficient

"I understand that you have an efficiency expert over at the place where you work."

"'Have' is wrong, 'had' is the word."

"What was the matter? Was he incompetent?"

"No, he was too darned competent. He discovered that the boss was wasting half our time telling us things we knew better than he did."

MICKIE SAYS—

TOWN CONSENTS TO ITS REMOVAL TO NEW SITE

Idaho Village to Make Way for $12,000,000 Reservoir.

American Falls, Idaho.—This little agricultural community has consented to plans for its removal to a new townsite, as the result of negotiations by representatives of the United States government. The present site, according to plans, will be inundated, together with 83,000 acres surrounding it, to make way for the construction of the gigantic American Falls reservoir.

Authorization of plans to build the reservoir, which will be the largest in the United States and the fourth largest in the world, with a capacity of 1,500,000 acre feet of water, was given at a recent special election in the American Falls irrigation district. The district embraces approximately 500,000 acres. The cost of the project is estimated at $12,000,000.

The immensity of the proposed reservoir may be realized by the statement that it will be among the world's wonders as a means of water storage. There will be only three comparable reservoirs, one on the Euphrates, one on the Nile and the one created by the Gatun dam at Panama, which is not an irrigation project.

The floor of the reservoir will contain 83,000 acres when the project is extended to the full capacity of 3,000,000 acres. All preliminaries have been based on the maximum reservoir.

The estimated cost of $12,000,000 includes all preliminaries, including foundation, moving the town of American Falls, the railroad, etc. The height of the dam for the American Falls townsite unit will be 75 feet. Addition of 20 to 25 feet will double the capacity, or make the reservoir 3,000,000 acre-feet, at the relatively small cost, according to officials, of between $3,000,000 and $4,000,000.

The benefits of the project will extend to all South Idaho, and a general stimulation of business in all lines, notably agriculture, will result, officials say. With an ample water supply to meet all shortages values will be stabilized and a remarkable development is predicted.

Experts Plan to Grow Seeds From Tut's Tomb

New York.—Announcement of a $500,000 institution to be established at Yonkers to bear the same relation to plants and flowers that the Rockefeller institute does to humanity, was contained in a statement from there of the formation of the Thompson Institute for Plant Research, as told by Dr. William Crocker, research director.

Doctor Crocker told how powerful electric lamps are expected to supplement sunlight in growing plants in the institute which Col. William B. Thompson is establishing near his country home, Yonkers.

Experts gathered by Colonel Thompson will plant seeds expected shortly from the tomb of King Tut-Ankh-Amen, recently unearthed at Luxor, Egypt.

To treat plants by electric light, Doctor Crocker said, some greenhouses will be provided with large cranes with powerful electric currents. These lights can be lifted over the houses at night as a supplement to sunlight. Flue gases from the boilers will be scrubbed and purified and the carbon dioxide thus obtained used as atmospheric fertilizer.

Surgeon Says Nerves Cause of Air Crashes

London.—Fear is never responsible for airplane accidents, in the opinion of Maj. H. Greame Anderson, consulting surgeon of the British royal air force. From the confessions of pupils and his own experiences, Doctor Anderson said, he found that fear never asserted itself in the first few flights because the pupils were too occupied. The chief causes of accidents to pilots, he explained, were due to nerve exhaustion, which might develop within even an hour after the beginning of a flight. The pilot then found himself unable to use his mental faculties. Doctor Anderson suggested that some method should be devised whereby in case of fire, the pilot could liberate the cabin, to which a parachute of sufficient strength should be attached to carry it and the passengers safely to earth.

Panama Tolls Increase 20 Per Cent.

Panama.—Commercial traffic through the Panama canal during the fiscal year that ended June 30 showed an increase in tolls of more than 20 per cent over any preceding year. The number of vessels using the waterway was 3,067, and these paid a total of $17,508,100.57 for the privilege.

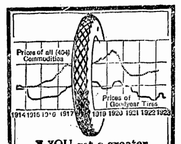
Horse Beats Fast Train in Wild Race

A horse pulling a light delivery wagon raced for three miles ahead of a fast passenger train, near Pittsburgh, Pa., and won.

The horse became frightened when the train left the station and ran on the tracks. The train ran almost full speed, but the animal kept ahead of it. Exhausted, the horse finally ran from the tracks and stopped in a field, where it was recovered by its owner.

Caught Severe Cold

He's been in bed for a week—more stupid than ever. He's sure he caught cold from a bank draft (the first one he ever saw) sent in by a delinquent subscriber.



YOU get a greater value in Goodyear Tires today than ever. As this chart shows, Goodyear Tire prices for years have been kept lower than the average prices for all commodities. Today, Goodyear Tires sell for 37½ less than in 1920; 30% less than in 1914—though the tires have been vastly improved. This is a good time to buy Goodyears.

As Goodyear Service Station Dealers we sell and recommend the new Goodyear Cords with the beveled All-Weather Tread and back them up with standard Goodyear Service

All Have Trouble

The experts tell us that at two years of age the child's head measure and chest measure should be the same. About thirty years later the child begins to have trouble to keep his waist measure down to his chest measure and some men have the same difficulty with their head measure.

A Remarkable Record

Chamberlain's Cough Remedy has a remarkable record. It has been use for colds, croup, and whooping cough for almost half a century and has constantly grown in favor and popularity as its good qualities become better known. It is the standard and main reliance for these diseases in thousands of homes. The facts that it can always be depended upon and is safe and pleasant to take are greatly in its favor when it is wanted for children. For sale at Clark's Drug Store.

The Ed. Caltoux threhsnig machine pulled in last Tuesday. It was about the last machine in this section to complete the season's run. Harvesting is over but loads of sacked grain continue to come into the local warehouses in large numbers every day.—Uniontown Journal.

Kendrick Has Klan

A fair-sized crowd attended the Ku Klux Klan meeting at the New Kendrick theater Thursday night of last week. Rev. Roberts, Christian minister of Lewiston, gave a talk concerning the objects of the organization. It is understood that a number of Kendrick people joined the Klan.—Kendrick Gazette.

Shy On Clothes

It is claimed now that the American people didn't buy enough clothes last year, only 62 hats being sold for every 100 men and only 62 suits for every 100 persons. We will frankly admit that the American people were a little shy on clothing for several years, especially the fair sex, but the change in styles make it certain that more clothes will be worn for a time. —Star-Mirror.

Very Large Peaches

A. P. Brantner this year raised some orange cling peaches on his home grounds, which crowded the 12-inch mark in circumference. Measurements made by the Sentinel reach 11¾ inches, and we have no doubt but that Mr. Brantner had peaches which scored the 12-inch mark. They were some peaches, not only for size, but for color and flavor.—Asotin Sentinel.

Shipping Sheep

Two trainloads of sheep passed through Cottonwood within the last week, a train load consisting of 15 cars passed through town Saturday and another train load consisting of 19 cars was shipped to the markets yesterday. The sheep were brought from their summer range on the forest reserve and loaded on board cars at Grangeville. Some of the sheep are being shipped to the Chicago markets—Cottonwood Chronicle.

Open Season for Big Game

The open season on elk and deer in Clearwater county began Monday and will extend to November 15, inclusive. The bag limit to each person is one of each animal. Several local and transient parties are already out in the famous hunting grounds of the Clearwater.

There is no open season on mountain goats in this county, even though it is implied in the license that there is one.

For the purpose of keeping statities it is requested that all hunters report their kill to the nearest game warden, forest officer or other person whose duty it is to enforce the law. —Clearwater Tribune.

Lettuce Crop Hard Hit

Unfavorable weather conditions — three hot days—have caused serious damage to the head lettuce crop in and around Weiser. No known means of prevention could have warded off the loss to those whose plantings have suffered severely. The condition emphasizes the danger of growing too large a percentage of any one crop, particularly one so sensitive to weather conditions is head lettuce. With little or no activity in the apple market, the damage to the early head lettuce planting is doubly serious, especially in some instances. It is hoped conditions later will even up matters to some extent at least.—Lewiston Banner.

Progressives Meet

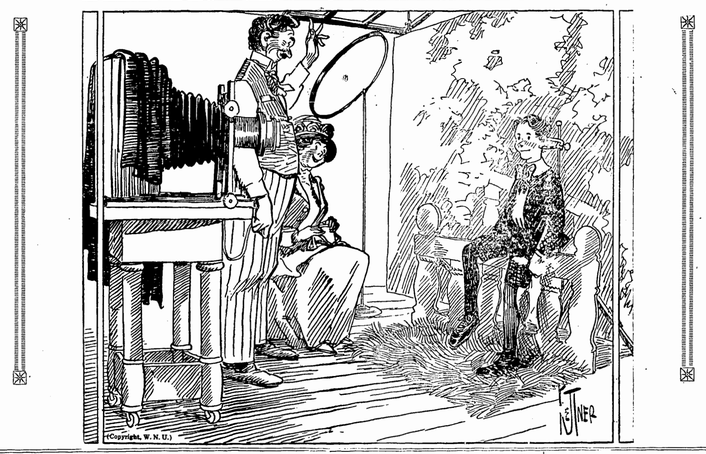
The Progressive Needleworkers' met at the home of Mrs. F. H. Thomas, Thursday afternoon of last week. The afternoon was spent with needlework and social converse, after which a delicious luncheon was served. The invited guests were Mrs. George Follett, Mrs. Leon Follett, Mrs. R. I. Witty, Mrs. Jack Barnes, Mrs. F. J. Niemann, Mrs. Thomas A. Feeney, Mrs. Mahlon Follett, the Misses Neppa Naylor, Francis Vaughn, Lela Patch, Edith Winegardner, Marie Hummel, Lindy Collins, Hazel Ouse.

The Progressives will be entertained at their next meeting by Mrs. R. I. Witty and Mrs. F. C. Shork at the home of Mrs. R. I. Witty.

Preparing to Seed

Farmers are very busy just now preparing for their fall seeding, the recent showers putting the ground in excellent condition for that purpose.

Big Events in the Lives of Little Men



Convicts Killed

On convict was killed and another fatally wounded at the state penitentiary at Walla Walla Sunday morning by Thomas Walton, 40, who leaped from the line emerging from chapel, and drove a knife into the heart of S. P. Burt, 27, his former pal. He fatally wounded George McDonald, 27, Burt's cellmate, and was then knocked down and disarmed by E. P Gregory, prison guard. McDonald died Sunday night.

A first degree murder charge was filed Monday against Walton.

Walton and Burt were old pals. They escaped from San Quentin prison, California, where they were serving first degree murder terms. They got into trouble in Spokane, wounding Officer Cashatt. After being taken to Walla Walla Walton accused Burt of telling McDonald things about him and the killing was the outgrowth of this.

Walton was serving eight to twenty years, Burt five years to life and McDonald two to five years for burglary from King county.

Thomas Walton and S. P. Burt were sent to the penitentiary from Spokane county early last summer. Officer Cashatt was shot and seriously wounded when he gave chase on a motorcycle to Burt who was attempting to abduct a woman employe in a Spokane cafe. She jumped from the automobile and suffered a fractured skull.

A posse was organized but Burt and his pal, Walton, evaded capture until a month later when they were arrested in Des Moines, Iowa, after a running fight with officers. They were taken to Spokane for trial and were convited and sent to prison.

Legion Auxiliary Plans Supper

The reorganization of the American Legion auxiliary is proceeding rapidly. Sufficient members have joined to enable the local chapter to apply for a permanent charter.

A committee of the auxiliary met last Monday evening and formulated plans for assisting Bielenberg-Schooler post of the Legion in its activities.

A pick-up supper was scheduled for Wednesday evening, October 17, at 6:30 at the American Legion hall. The ladies will entertain as guests the members of the local post. All former members of the auxiliary, as well as others eligible to join, are requested to be present.

The committee consists of Mrs. A. H. Potsch, Mrs. Ray Edwards, Miss Marie Hummel, Mrs. Harry Schooler, Mrs. E. L. Phipps, Mrs. Dora Etter, Miss Viola Lorang, Mrs. W. W. Burr, Mrs. T. H. Herman and Mrs. Thomas A. Feeney.

This marks the first activity of the local chapter and it is expected that the auxiliary will take a place in its department standing equal to that of the local Legion post in the Idaho department of the American Legion.

Building New Bungalow

F. W. Loncosty is just completing a new five-room bungalow for Mr. and Mrs. Jas. Cameron on their farm southeast of town.

Stand perfectly still when a woman throws a stone at you. If you dodge you may get hit.

OKLAHOMA AWITS ACTION OF LEGISLATURE

Oklahoma's political civil war was lulled by a calm enveloping both gubernatorial and legislative headquarters on the eve of an extraordinary session of the state assembly called for Thursday by Govenor J. C. Walton.

Govenor Walton said he did not care to see press representatives and his regular Sunday conference with them was cancelled.

Legislative headquarters were likewise quiet. W. D. McBee, who issued a call for a special session of the house several days before the executives' call, has returned to the capital. Other house leaders were not at the headquarters in a downtown hotel.

Convening by proclamation of the govenor just two weeks after being dispersed by military force at his command, the extra session of the legislature is expected to start impeachment proceedings against the executive without delay. Conduct of other state officers will also be investigated, it is announced.

Govenor Walton's call demanded investigation of the Ku Klux Klan in Oklahoma on the basis of testimony given before various military courts since August 16 last.

Martial law, which came upon Tulsa county as a lion on August 14, passed like a lamb in the early hours of Sunday.

The military force, which at one time numbered approximately 500 officers and men, when removed by order of Acting Adjutant General Charles E. McPherren consisted of less than a score of enlisted men and four officers.

Flogging cases unearthed by the Tulsa military commission numbered 127 at the time of the last public statement from the inquiry board, dated September 23. Of 30 informations filed by the military in the county or district courts 14 have reached the stage of preliminary hearing. Because important state witnesses were missing in court hearings five of the 14 cases have been dismissed for want of evidence and two have been indefinately postponed for the same reason. The remaining men have been held for criminal trial on charges of riot.

Farewell Party

A farewell party was given at the Hugo Gehrke home last Sunday in honor of his mother, Mrs. Pauline Gehrke, who left Wednesday for her home in Spokane after spending the past two months here visiting her children. A splendid dinner was served by the hostess after which the afternoon was spent in social converse by the ladies while the men played horse-shoes between showers.

Those present were Mr. and Mrs. D. Nebelsieck and family, Mr. and Mrs. John Flomer and family, Mr. and Mrs. Ed. Gehrke and family, Mr. and Mrs. Hugo Gehrke and family, Mr. and Mrs. Ingle Halverson and family, Mr. and Mrs. Fred Taylor and family, Mr. and Mrs. Gus Rosenau and family, Mr. and Mrs. Chas. Ingle and family and Mrs. Pauline Gehrke, the guest of honor.

We do printing of all kinds.

WHAT HAPPENED HERE TWENTY YEARS AGO

Wm. Ingle and son Charles returned Wednesday from their trip to Arkansas.

Robt. Beechler returned home Saturday from St. Louis to remain during the winter. He expects to again return to that city in the spring.

A pretty wedding took place Wednesday evening at the country home of Mr. and Mrs. A. M. Wardrobe when their daughter, Elizabeth Nova, was united in marriage with Mr. Archie L. Tucker, of Wilbur, Wash., Rev. W. C. Fowler of this city officiating.

Wednesday seemed to be a day of weddings. Miss Lizzie Cunningham, a sister of Mrs. A. A. Haymond, was married on that day to William Hartroff, a son of a prominent farmer near Troy. The wedding took place at the home of the bride's parents and Mr. and Mrs. Haymond were present from here.

A small child of Mr. and Mrs. Nathan Edwards in some manner got possession of a small vial of toothache medicine which contained poison, Monday, and drank the contents. The parents were for a time greatly alarmed and made great haste in getting medical aid. After an emetic had been given the child showed no ill effects of the poison.

Sheriff Keane was here last week in search of some horse thieves. Some weeks ago at Eagle Valley, Oregon, eight valuable horses were stolen and it is positively known that they were in Genesee about two weeks ago. One team from the bunch has been located on the reservation, they having been sold to Martin Williams' son-in-law. An Oregon sheriff arrived Wednesday to work on the case. It is also known that another large bunch of horses stolen in the Okanogan country were recently driven through this section. It stands people in hand to be very cautious when purchasing horses from strangers.

Stovall-Jackson

Miss Gladys Stovall and Harold Jackson, formerly of Genesee, but more recently of Lewiston, motored to Moscow Monday morning and were married at the Methodist parsonage by Rev. H. O. Perry, pastor of that church, the ceremony taking place at 10:30 a. m. They left immediately for Spokane where they expected to spend a few days, and will later go to Walla Walla for a visit with Mrs. Jackson's parents, Mr. and Mrs. I. E. Stovall. They also expect to visit relatives at Dayton, Washington.

The bride is well and favorably known in Genesee, having made her home here for the past three years, but has been in Lewiston for the past few months. The groom is the son of Mr. and Mrs. J. H. Jackson, formerly residents of Genesee for some 20 years, and is known by practically everyone in this section of the country, having lived here since infancy.

The newly-weds have many young friends here who will wish them much joy and prosperity through life and the News heartily joins their well-wishers.

It is understood Mr. and Mrs. Jackson will later go to California to make their home.

At the Opera House

It is not often that screen players are required by the nature of the picture to battle with a devil fish in water twenty feet beneath the surface. And yet that is just what Lila Lee and James Kirkwood, two of the featured players in "Ebb Tide," were forced to do. The result is said to be one of the strongest scenes ever filmed.

Lila Lee the heroine of the story, is escaping from a schooner with James Kirkwood, the hero, when they are attacked by an octopus and dragged beneath the surface. A terrible battle ensues, which ends in the death of the devil fish. Miss Lee said later that the incident was the most thrilling and nerve racking she ever experienced in her screen career.

The battle was photographed by two cameramen hidden in a diving bell and is extremely realistic. Besides the two players Raymond Hatton, George Fawcett, Noah Beery and Jacqueline Logan are featured in the cast. The scenes are laid in the South Seas, and the photography is excellent.

This thrilling picture will be the feature film at the opera house Saturday night—and there'll be a comedy, too, that's worth while.

Gets Deserved Promotion

Jack Barnes on Monday received a communication from the head office of the Washington Water Power company at Spokane informing him that he had been promoted from manager of the Genesee office to that of district agent of that company with headquarters at Wilbur, Washington.

This promotion is a direct acknowledgment of the ability of Mr. Barnes to successfully handle the business of the company and in placing him in a larger field gives him an opportunity to work his way on up with that company and his host of friends here have every confidence that he will successfully do so.

Mr. Barnes has had charge of the Genesee office since 1920 and has been the direct cause of a large increase in the company's business in the local field. He has been with the Washington Water Power since 1914 with the exception of two years spent in the service of his country, part of which time was spent in the front line trenches in France, where no white feathers were shown by him.

Mr. Barnes expects to leave for his new post of duty by the first of November. He will be succeeded here by Vern Beckman of Moscow, an old army "buddy" of Jack's.

Legion Prizes Awarded

The American Legion essay contest ended last Friday. The subject for this essay was "Why America Should Prohibit Immigration for Five Years." The local American Legion offered a first prize of three dollars and a second prize of two dollars. Sylvia Johnson will receive the first prize and Olive Mulalley the second prize. Eva Hampton was given the third prize.

The following people wrote essays which deserve special mention: Fred Dicus, Wilma Casebolt, Katherine McMahon, Eva Qualley, Bertha Gash, Estel Rogers, and Eugene Tupker.

NEWSY NOTES FROM THE COUNTY SEAT

(Clipped from Star-Mirror)

Bad Check Charge

Pete Gozoneih plead guilty before Judge Adrian Nelson of the Latah county probate court Saturday afternoon to a charge of drawing checks without funds. Sentence will be pronounced Monday morning.

Gozoneih was arrested at Lewiston and brought to Moscow late Saturday night by Deputy Sheriff Grant Robins. Gozoneih was charged with issuing a check on the First National bank at Lewiston payable to A. R. Bohman in payment of a heifer purchased at an auction sale at Troy.

Idaho Takes First Score

In the first game of the season the Vandals rolled up a score of 83 to 0 against the College of Idaho eleven on Maclean field Saturday afternoon. The college men from Caldwell were completely outclassed. Coach Mathews made more than 14 substitutions and the team seemed to play better football as the game progressed.

The total of 83 points were rolled up on straight football, Idaho's backfield clipping off gains at will around the ends or through the line.

Sanford, College of Idaho end, suffered a broken leg in the opening minutes of the game.

Big Profit From Pea Crop

Between $9000 and $10,000 has been realized on 137 acres near Moscow, according to announcement of a deal closed on Saturday for the sale of Blue Prussian peas by A. S. Lyon and Guilbert Lyon to N. Williamson. The peas were raised on summer fallow land.

The Lyons raised 2160 sacks of peas on the 137 acres. The peas brought $3.20 a 100 pounds. Delivery was finished today and the contract closed. The peas were machine run and free of weevil. They were shipped to a Philadelphia concern.

Announcement of the deal illustrates the advantage of turning Palouse country land into large profits by raising peas instead of allowing the land to lie idle in summer fallow. The Lyons raised 40 bushels of wheat per acre on the same land. After the land has been planted to peas and the harvest completed the soil is in excellent condition for wheat the next season.

Prepares For Big Meeting

Plans for the entertainment and housing of the more than 700 delegates expected here October 15, 16, and 17 for the forty-first annual convention of the grand lodge of Independent Order of Odd Fellows, the thirty-sixth annual session of the grand encampment, the thirty-second annual session of the Rebekah assembly, and the sixteenth annual session of the department council, Patriarchs Militant, are rapidly nearing completion.

This announcement was made by Judge J. L. Naylor, a member of the general committee in charge with Chris A. Hagan and Hawkin Meigard, mayor of Moscow, as the other members.

All Odd Fellow sessions will be held in the Elk's temple while the Rebekahs will meet in the Masonic temple.

One of the features of the convention will be the "Decoration of Chivalry" and open house at the University of Idaho the afternoon of October 16. A dance and reception will be given the first night, October 15, at the Elks' temple at which addresses will be made by prominent Odd Fellows and Rebekahs.

Claims Bergdoll Returning

Grover Cleveland Bergdoll, fugitive from justice in Germany, intends to return to this country and to serve his sentence for the draft evasion, his mother, Mrs. Emma Bergdoll, declared on her arrival from Germany, where she visited her son.

His return, she said, would have to await the conclusion of court proceedings following the alleged attempt recently to kidnap him when one of the men who tried to get him out of Germany was killed and another badly wounded by bullets fired by Burgdoll.

Tuesdays Meet

The first meeting of the card club was held Tuesday afternoon at the home of Mrs. F. S. Casebolt. The afternoon was spent in playing pinochle, Mrs. R. S. Sullivan winning the honors. The invited guests were Mrs. F. B. Evans, Miss Clubb, Mrs. Jack Barnes, Mrs. F. J. Niemann, Mrs. Thomas A. Feeney, Mrs. R. S. Sullivan, Mrs. A. H. Potsch and Mrs. Mahlon Follett.

State Widely Represented on University Football Squad

(1) Capt. Wayne Hall, of Spokane, end. (2) Les Sherman, quarterback, of Everett. (3) Jack Lillis, Wenatchee, guard. (4) Leo Zell, Port Townsend, halfback. (5) Ken Du Bois, Vancouver, Wash., end. (6) Bull Bellman, Aberdeen, guard.

A resident census review of aspirants for the University of Washington football team shows that a great percentage of the candidates come from the smaller towns of Washington. Last week, at the first frosh turnout, nearly every township in the state was represented. Some of the most valuable men on the varsity squad received their early training in the smaller community high schools.

Leo Zell, halfback, probably the most valuable player on the squad this year, hails from Port Townsend. He came to the University unheralded and unsung as a football player. His long, high punts, however, soon caught the coach's watchful eye..

Vancouver Boy On End

Ken Du Bois, from Vancouver, is making good at the other end position. Hap Miller, former varsity star, tutored him through four years of high school gridiron play in Southwestern Washington.

Les Sherman, a former Sultan boy, is being tried at quarterback this year. He was Bagshaw's star pupil at Everett high school, playing at fullback. He played this same position on a naval station team for two years.

Vern "Bull" Bellman, veteran guard from Aberdeen, is almost a fixture at his post. Bellman was a star in the Southwest Washington league for three years.

Wayne Hall, captain of this year's team, is a Spokane boy. He played quarterback on the W. S. C. frosh eleven, before coming to the state university. He served a season at quarter on the Purple and Gold varsity, but, was switched to end. He will play at that position this year.

Freshman Players

The freshman outlook this year, according to Coach Wayne Sutton, is unusually promising. Among the men turning out the following are attracting the attention of the coaches; Wilbur McGuire, Olympia; Ten Keith, Ridgefield; John Avery, Elma; Vance Holcomb, Kennewick; Elmer Huhta, Hoquiam; Al Schuss, Chehalis; Kerion Reardon, Monroe; Donne Haggerty, Browning.

Ham Hibbard, Ridgefield; A. J. Wright, Snoqualmie; Harold Patton, Cashmere; Harold Shidler, Roose; Cecil Ripley, Arcata; Dwight Paulhamus, Sumner; Kenneth Merritt, Auburn; Paul Bovey, Cherokee; Norman Trezise, Tolt.

"Fat" Campbell, a hefty lineman from Ferndale, looks as if he would be a varsity man before the end of the season. "Heavy" McRae, who comes from Sedro-Woolley, is making a strong bid for a first team position.

Elmer Tesreau, former Chehalis high star, is filling the fullback stall with considerable pre-season success. His brother Louis is out for the same position on the frosh team. He is heavier than his varsity brother, and a better punter, but not quite so fast.

Jack Lillis, from Wenatchee, and Bill Petrie, Clarkston (Wash.) giant, are proving useful on the first string squad. Petrie is expected to be a star this fall.

Coach Bagshaw is strong for the players from small prep schools. The Washington pigskin mentor likes to have his men willing to learn, and the boys know that they all have an equal chance under "Baggie."

The first big game that the University of Washington squad will play will be against the University of Southern California of Los Angeles at Seattle in the Stadium on October 20. The Southerners ranked next to the University of California last year and represented the West at Pasadena on New Years Day. The contest is of especial interest to football fans of the state because Gus Henderson, the Southern coach, formerly handled Broadway High School teams in Seattle.

Northwest News

Arrangements are being made by Mrs. Victor H. Malstrom, president of the Washington State branch of the National Congress of Mothers and Parent-Teacher Associations, for the Parent-Teacher sectional meeting to be held in conjunction with the annual convention of the Washington Education Association October 24, 25, 26, in Seattle.

Game wardens or other officials cannot search automobiles for contraband game, unless the contraband is in plain sight, without a search warrant or a warrant for the arrest of the possessor, Assistant Attorney General E. W. Anderson rules, in an opinion to J. W. Kinney, state supervisor of game and fish.

Washington infant mortality is second lowest among 30 states. The rate is based on the number of deaths of infants under one year old out of every 1,000 births. Washington record is 58.9; Oregon 58.6.

Cities of Washington compared:

	1922	1921	1920
Bellingham	43	63	64
Seattle	49	52	57
Tacoma	58	56	64
Everett	59	60	69
Hoquiam	62	29	56

The Skagit County Farm Bureau has underway the organization of a marketing association to be known as the Puget Sound Hay & Grain Growers Association. If successful this association may in the near future take in other Western Washington counties, even extending its membership to include growers in British Columbia. The new organization will be a non-profit sharing co-operative marketing association without capital stock, to be organized under the new marketing law of the state of Washington.

The old Mount Tacoma Club was merged into a corporation bearing the same name last week. The purpost of the corporation, according to the articles adopted by unanimous vote, among other things, is "to restore and cause to be generally recognized the rightful, aboriginal and historically correct names of mountain peaks and natural objects forming the scenic and historical points of interest in the State of Washington, including the name Mount Tacoma and such other names as have been superseded by alien and less euphonious and appropriate names."

Indications point to a record convention year in the Northwest for 1925, with the Knights Templar centennial and National Educational Association meeting at Seattle, which will attract from 2,000 to 5,000 delegates. An invitation will also be given the National Association of Letter Carriers to meet in the West in 1925.

Port Angeles is experiencing great activity with ocean shipping. Lumber is being shipped in large quantities to Japan, Wilmington, California, Waimeath, San Pedro, Oakland and Honolulu.

One o'clock is the closing hour for dance halls in King County. Complaints have reached the license committee that this ordinance is being disregarded.

Sixty-five traffic accidents were reported in 24 hours in Portland lately, following the first of the season's rains; motorists neglecting necessary precautions against slippery pavements.

Mrs. Henry McCleary, vice-president, general and state regent of the Daughters of the American Revolution, died at 4 o'clock, September 25, at her home at McCleary, near Olympia.

MY LADY'S MONEY

An Episode in the Life of a Young Girl

By Wilkie Collins

(Instalment No. 22)

"I oughtn't to have wanted reminding; but I have so many things to think of at the farm. And I am afraid I must be getting old; my memory isn't as good as it was. I am so glad to have seen you, Miss Isabel. You and your aunt must come and look at my horses. Do you like horses? Are you fond of riding? I have a quiet roan mare that is used to carrying ladies; she would be just the thing for you. Did I beg you to give my best compliments to your aunt? Yes? How well you are looking! our air here agrees with you. I hope I haven't kept you standing too long? I didn't think of it in the pleasure of meeting you. Good-bye, Miss Isabel—good-bye till tomorrow."

He took off his hat to Isabel, nodded to Moody, and pursued his way to the farm.

Isabel looked at her companion. His eyes were still on the ground. Pale, silent, motionless, he waited by her like a dog, until she gave the signal of walking on again towards the house.

"You are not like yourself, Robert," she said. "Why is it? What are you thinking of?"

He was thinking of the bright blush that overspread her face when Hardyman first spoke to her; he was thinking of the invitation to her to see the stud farm, and to ride the roan mare; he was thinking of the utterly powerless position in which he stood towards Isabel and towards the highly born gentleman who admired here. But he kept his doubts and fears to himself. "The train won't wait for me," he said, and held out his hand once more.

"Don't quite forget me," he said, in low, faltering tones, and left her.

Miss Pink met Isabel in the hall. Refreshed by unbroken repose, the ex-schoolmistress was in the happiest frame of mind for the reception of her niece's news.

CHAPTER XVI.

Paying his court to the ex-schoolmistress on the next day, Hardyman made such excellent use of his opportunities that the visit to the stud farm took place on the day after. His own carriage was placed at the disposal of Isabel and her aunt, and his own sister was present to confer special distinction on the reception of Miss Pink.

Miss Pink held forth on education to Mrs. Drumblade in the parlor, while Hardyman and Isabel were on their way to a paddock at the farthest limits of the property.

"I am afraid you are getting a little tired," said Hardyman. "Won't you take my arm?"

Isabel was on her guard; she had not forgotten what Lady Lydiard had said to her. "No thank you, Mr. Hardyman; I am a better walker than you think."

Hardyman continued the conversation in his blunt resolute way. "I wonder whether you will believe me," he asked, "if I tell you that this is one of the happiest days of my life?"

"I should think you were always happy." Isabel cautiously replied, "having such a pretty place to live in as this."

Hardyman met that answer with one of his quietly positive denials. "A man is never happy by himself," he said. "He is happy with a companion. For instance, I am happy with you."

Isabel stopped and looked back. Hardyman's language was becoming a little too explicit. "Surely we have lost Mrs. Drumblade and my aunt?" she said. "I don't see them anywhere."

"You will see them directly; they are only a long way behind." With this assurance, he returned, in his own obstinate way, to his one object in view. "Miss Isabel, I want to ask you a question. I'm not a ladies' man. I speak my mind plainly to everybody—women included. Do you like being here today?"

Isabel's gravity was not proof against this very downright question. "I should be hard to please," she said, laughing, "if I didn't enjoy my visit to the farm."

Hardyman pushed steadily forward through the obstacle of the farm to the question of the farm's master. "You like being here," he repeated. "Do you like me?"

This was serious. Isabel drew back a little and looked at him. He waited with the most unpenetrable gravity for her reply.

"I think you can hardy expect me to answer that question," she said.

"Why not?"

"Our acquaintance has been a very short one, Mr. Hardyman. And if you are so good as to forget the difference between us, I think I ought to remember it."

"What difference?"

"The difference in rank."

Hardyman suddenly stood still, and emphasized his next words by digging his stick into the grass.

"If anything I have said has vexed you," he began, "tell me so plainly, Miss Isabel, and I'll ask your pardon. But don't throw my rank in my face. I cut adrift from all that nonsense when I took my farm and got my living out of the horses. What has a man's rank to do with a man's feelings?" he went on, with another combative dig of his stick. "I am quite serious in asking if you like me, for this good reason, that I like you. Yes, I do. You remember that day when I bled the old lady's dog. Well, I have found out since then that there's a sort of incompleteness in my life which I never suspected before. It's you who have put that idea into my head. You didn't mean it, I dare say, but you have done it all the same. I sat alone here yesterday evening smoking my pipe—and I didn't enjoy it. I breakfast alone this morning—and I didn't enjoy that. I said to myself, She's coming to lunch, that's one comfort—I shall enjoy lunch. That's what I feel, roughly described. I don't suppose I've been five minutes together without thinking of you, now in one way and now in another, since the day when I first saw you. When a man comes to my time of life, and has had my experience, he knows what that means. It means, in plain English, that his heart is set on a woman. You're that woman."

Isabel had thus far made several attempts to interrupt him, without success. But when Hardyman's confession attained its culminating point, she insisted on being heard.

"If you will excuse me, sir," she interposed, gravely, "I think I had better go back to the cottage. My aunt is a stranger here, and she doesn't know where to look for us."

"We don't want your aunt," Hardyman remarked, in his most positive manner.

"We do want here," Isabel rejoined, "I don't venture to say it's wrong in you, Mr. Hardyman, to talk to me as you have just done, but I am quite sure it's wrong in me to listen."

"What can you possibly be thinking of?" he asked.

She gave him no answer; she only looked at him reproachfully, and tried to release herself.

Hardyman held her hand faster than ever.

"I believe you think me an infernal scoundrel," he said. "I can stand a good deal, Miss Isabel, but I can't stand that. How have I failed in respect towards you, if you please? I have told you you're the woman my heart is set on. Well? Isn't it plain what I want of you when I say that? Isabel Miller, I want you to be my wife!"

Isabel's only reply to this extraordinary proposal of marriage was a faint cry of astonishment, followed by a sudden trembling that shook her from head to foot.

Hardyman put his arm around her with a gentleness which his oldest friend would have been surprised to see in him.

Isabel looked up at him timidly.

"In my position, sir," she asked, "have I any right to like you? What would your relations and friends think if I said Yes?"

Hardyman gave her waist a little admonitory squeeze with his arm.

"What! You're at it again? A nice way to answer a man, to call him 'sir,' and to get behind his rank as if it were a place of refuge from him! I hate talking of myself, but you force me to it. Here is my position in the world: I have got an elder brother; he is married and he has a son to succeed him in the title and the property. You understand, so far? Very well? Years ago I shifted my share of the rank (whatever it may be) on to my brother's shoulders. He's a thorough good fellow, and he has carried my dignity for me, without once dropping it, ever since. As for what people may say, they have said it already, from my father and mother downward, in the time when I took to the horses and the farm. If they're the wise people I take them for, they won't be at the trouble of saying it all over again. No, no. Twist it how you may, Miss Isabel, whether I'm single or whether I'm married, I'm plain Alfred Hardyman; and everybody who knows me knows that I go on my own way, and please myself. If you don't like me, it will be the bitterest disappointment I ever had in my life; but say so honestly, all the same."

Where is the woman in Isabel's place who capacity for resistance would not have yielded a little to such an appeal as this?

"I should be an incredible wretch," she replied, warmly, "if I didn't feel the honor you have done me, and feel it gratefully."

"Does that mean you will have me for a husband?" asked downright Hardyman.

(To Be Continued)

One large Seattle department store offers an annual fellowship to graduate students in home economics at the University of Washington. The recipient of the fellowship gives a part of her time to testing textiles for the store.

Large Crowds Gather at Western Washington Fair

Bright Weather Ushers in the 1923 Exhibition Week at Puyallup

"Home of the fair that comes up to expectations, we thank you for your co-operation," thus read the banner that you faced, stretched across the street, as you left Puyallup, after spending a day at the Western Washington Fair, during the week ending October 7.

Certainly the banner states the facts concisely. For completeness of exhibitions and entertainments the Western Washington heads the list of Northwest fairs; and when it comes to attendance, it is at Puyallup that you see the grounds full to overflowing.

This year, opening day, as usual, was given over to the school children of the nearby counties, and it is estimated that fully 20,000 yuongsters from Pierce, King and Thurston counties assembled on the grounds as the guests of President Paulhamus.

Reviewing the exhibits, one was impressed with the splendid showing of farm products seen in Agricultural Hall, where were arranged a number of district and county displays covering every variety of fruit, vegetables and farm crops grown west of the Cascades. Industrial exhibits were as numerous as those of the farm, and particularly interesting were the stalls featuring the industrial displays of the different schools. These displays alone took up one whole building—perhaps 400 feet long.

The Agricultural College and the State Department of Agriculture were well represented with an educational booth, in which were shown the methods of fighting the diseases of both animals and plants; and improved methods of farm and dairy sanitation.

The poultry show—always good—was this year better; Harry H. Collier, who, with William Coats, judged the poultry, said that he had no hesitancy in pronouncing this the largest and best poultry show ever held in the state. He was particularly enthusiastic over the display of Leghorns, stating that never before had there been such a complete classification of the breed.

The livestock show, while most complete, was not so numerous in entries in some breeds as has been seen at this fair in years past. The beef breeds were represented by one good herd, each of Angus and Herefords and two of Shorthorns.

In dairy breeds, the Guernsey led numerically. There were five good herds of these cattle, representing the herds of H. E. Angel, Mabton; A. L. Gile, Chinook; A. O. Johnson and William J. Morris, Buckley; and A. W. Reith, of Astoria, Oregon. The State and County Guernsey Cattle Breeders' Clubs, under the direction of E. L. Westover, had a demonstration herd showing the improvement in quality and production in the herd where a purebred sire was used.

The Medfield herd of Winlock furnished the Jersey show. The Ayrshires were represented by the show herd of E. W. Van Tassell of Wenatchee. Both of these herds have gone through the Northwest circuit and stand at the head of prize-winners of their respective breeds.

The Western State Hospital had the only herd of Holsteins, which was headed by the state's $5,000 Holstein bull, Carnation King Matador Mutual. In Mercedes Prilly of Donneybrook the state had the highest butter record cow on the grounds. She has produced officially nearly 33 pounds of butter in one week.

Dairy breeds—but not of cattle—were seen in the two herds of milking goats, exhibited by M. P. Eggers, Woodinville, and S. B. Davidson, Tacoma. William Bishop judged the cattle.

There were at least six breeds of swine represented, including some very fine Tamworths from Eastern Washington, and a pair of the old spotted Poland Chinas—a breed not often seen at our Northwest fairs, but one that is again becoming popular.

The "Western Washington" specializes on horses, and this year, in addition to a large number of racing and exhibition horses, there were three studs of heavy drafters, well represented with Ruby's Belgians, McCroskey's Clydes and Merrett's Shires. Many fine specimens of these breeds were shown on line and in four and six-horse hitches. And last but not least were the Divan Shetland ponies, all the way from Wisconsin, that furnished no end of amusement for the youngsters.

THE NEWEST BATH

A writer in Physical Culture Magazine of Youth has been discovered. And like many other wonderful discoveries for which people sail the seven seas and seek in all the far quarters of the earth, the rejuvenating fountain may come out of the water pipes in one's own humble and happy little home. All that is needed is a shower arrangement and a day or two off.

The process consists in lying under a shower, not less than seven feet from the body (10 to 14 feet is better) for eight hours. If one can take the eight hours continuously, so much the better, but it can be broken into periods as short as two hours each, though with somewhat less effect. The water is to be as hot as can comfortably be borne, and to come in a fine, soft spray.

Says the discoverer: "One lets the water strike in turn on the neck and sides of the head, the arms, the sides, the chest, various parts of the back, the abdomen, the pelvic region, the legs, and even the soles of the feet."

His idea of what causes the wonderful invigoration and apparent cures of some illnesses is that the aeration of the water as it passes through the air, the oxygen that is in the air striking the skin, has something to do with it. Also, there is the constant friction of the skin, causing, he thinks, mild electric reactions. He is only beginning the scientific investigation as to why so simple a thing produces so great an effect.

It is one of those things that very likely make a tired body and sounds as if it could do no harm, may very likely make a tired body and soul feel reinvigorated, and might have more than the usual healing power of a short bath.

SAVING WILD LIFE

Superintendent Eakin of Glacier National Park is doing all he can to save the wild life of the park. He especially is insistent in keeping the bears in their natural state, and he does not countenance the degradation of these creatures through the feeding of garbage from the various camps. Tourists, of course, are eager to have the bears fed at these camps in this manner so they can get to see them, but Superintendent Eakin would rather have the bears remain on a herbaceous diet and be their natural selves, instead of be fed, hog-like looking animals, which has resulted through refuse feeding in some of the other national parks.

Preparations are being made at Washington, D. C., for the completion of the National Cathedral. Although $4,000,000 has already been contributed only the apse of the great edifice on Mount St. Alban has been completed. It stands today higher than the Washington manument and overlooks the whole city. Recently, however, the Washington chapter of the church decided to push the work on the whole cathedral so that it may be completed within five years.

The National Cathedral, although started during the administration of President McKinley, is really a fulfillment of President Washington's dream of a "church for national purposes" which was provided for in the original plans of L'Enfant for the national capital. From the time that President McKinley attended the first open-air services at the Cathedral every President, scores of cabinet officers and foreign diplomats and thousands of members of the Senate and House have been present on historic occasions at the Cathedral from the ceremonies following the conclusion of the Spanish-American war to the religious services in connection with the Conference on the Limitation of Armaments.

The Cunard Steamship Company has just completed its eighty-third year of activity.

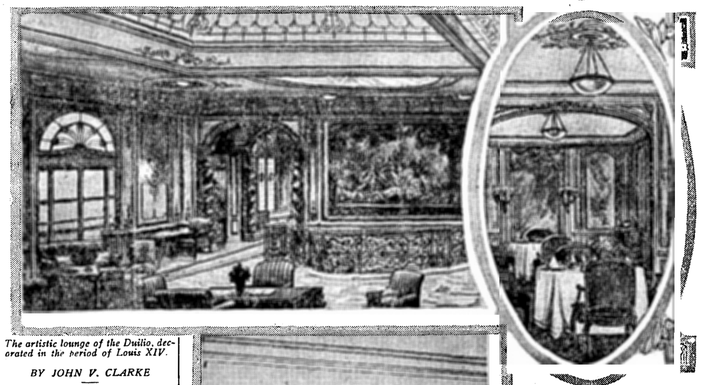
Can This Be Golf!

"Golf consists of exercise and emotion, in parts of one to nine, respectively," says Harry Leon Wilson in his little classic of sports humor, "So this is Golf!" The man in M. L. Blumenthal's picture, who is busy producing a sand storm, is also delivering an oration. In a minute he is going to wrap the shaft of his choicest brassy around the nearest tree. And that is golf!

CREATION FOR THE EVENING MODE

Lace, ribbon and velvet make milady a bouffant evening frock of unusual charm. The foundation is a slender, close fitting slip of the vivid new licence blue velvet. An overskirt of dull gold metallic lace is decorated with loops and bows of narrow blue faille ribbon, while a huge hip bow of wide faille ribbon perches on the right hip.

Italy in New Maritime Plan Sacrifices Size, To Elaborate on Art and Magnificence



The artistic lounge of the Duilio, decorated in the period of Louis XIV.

BY JOHN V. CLARKE

We are prone to think of Italy as the artistic treasure-house of mankind, beautiful as a dream and, somehow, quite as unreal. The hard problems of a material and ugly civilization front most of us. We are become temperamentally suspicious of beauty. We think of it as allied with weakness. Yet the best definition of beauty is, we believe, "the perfect adjustment of parts to the whole" and surely this might also serve as a very good definition for strength.

Modern Italy is strong. Nowhere is this strength more apparent than upon the seas; not in naval armament, but in the growing importance of her merchant and especially her passenger fleet. It is interesting to note that her development of a great passenger fleet has taken quite a different course from that of other great maritime nations. As in naval affairs, the race has been toward greater and greater size, until to possess the largest ships has been a chief talking point of the competing nations.

Italy's New Policy

Up to a certain point Italy strove for size. She built, and builds, very large ships. But she has deliberately switched her efforts to a new direction. Her maritime engineers have come to believe that comfort, luxury, beauty of detail and artistic effect, rather than mere size, represent the enduring values. They have prophesied this as the goal of the future and foresee the time when the monsters of the sea will be obsolete and the standard of excellence will rest with beauty, luxury and comfort.

"The Duilio," to be placed in the American passenger service in November by the Navigazione Generale Italiana, is an example of this change of policy. She is by far the most luxurious liner afloat. The combined efforts of great sculptors, painters, artisans in wood and metal work and interior decorators have made concrete and serviceable a wealth of beauty not excelled upon the seas.

A Double Bedroom on the Duilio With Tapestried Walls

A section of a private dining room in the style of the Regency.

Ancient Art has contributed to the whole, for historic tapestries adorn the great lounge and state cabins. Indeed, the walls of the better first-class cabins are finished in tapestry instead of paper or paint; canopies of beautiful tapestry overhang the beds (for the Duilio besides private baths, has beds instead of berths) harmonizing with the walls, whereon are hung beautiful little studies in oil or water colors by famous artists. The furniture is antique and blends perfectly with the dark circassian walnut of the wood work. In short, the Duilio is a beautiful floating gallery of art.

Explanation of Maritime Success

Much of the Italian success in passenger ships, however, has been through an appeal much more primitive. The Italian cuisine is noted throughout Europe and Italy has sent her greatest cooks to sea to add their art to that of the other masters aboard her ships.

Ancient things have in another way conspired to help the Italian effort upon the seas. No less a person than Tutankahmen has had much to do with this. Americans who were interested in seeing the famous tomb in the Valley of the Kings found that they could make the best connections at Naples, travelling thence on the great liner Esperia, so luxurious as to be an anomaly in those waters. Americans are also selecting the direct route to the Mediterranean, on their way to the beauty and rest of the Riviera, thus voyaging in calmer seas and avoiding railway travel.

All this affords some explanation of the growing maritime achievements of Italy; of her transition in the last decade from a country w se chief interest for the rest of the world lay in the art treasures of her luminous past, to a country, alert and progressive, taking a notable place upon the seas.

WASHINGTON NAMES

Nova Albion

How Sir Francis Drake, the English explorer, gave to Washington and the Pacific Coast the name "Nova Albion" is told by Prof. Edmond S. Meany of the University of Washington in a recent article in the Washington Historical Quarterly on the origin of Washington names.

Prof. Meany writes that the earliest name for the Pacific Coast was "California," applied by the Spaniards in 1535. In June, 1578, Drake changed the name to "Nova Albion." His record says: "Our Generall called this countrey Nova Albion, and that for two causes: the ne in respect to the white bankes and cliffs, which ly towards the sea, and the other, because it might have some affinitie with our Country in name, which sometime was so called."

"On June 4, 1792, Captain George Vancouver celebrated the anniversary of the birth of George III, by taking possession of the regions he had been exploring and by conferring some geographic names. The ceremony took place where the present City of Everett stands and the harbor there he called Possession Sound. The great interior waterway, now known as Puget Sound, he called 'Gulf of Georgia,' and the mainland, 'binding the said gulf, and extending southward to the 45th degree of north latitude,' he called 'New Georgia, in honor of His present majesty.' He recognized Drake's name changed slightly, by referring to the coast under the general name of 'New Albion.'

"The purchase of Louisiana, 1803, was by many thought to include the lands in the Pacific Northwest.

On June 20, 1803, President Jefferson singed his famous instructions for the Lewis and Clark expedition in which he twice refers to the 'Oregon or Columbia.' The explorers contented themselves with charting but one general name for the country, and that in the interior—Columbia Valley.' Oregon, as a name for the great river before it was actually discovered by Captain Robert Gray in 1792 and by him named Columbia, was made to apply in an indefinite way to the country west of the 'Shining' or Rocky Mountains. The area thus named was first restricted by the Florida Treaty, 1819, in which the 42nd parallel of north latitude was made to mark the northern extent of Spanish claims. Treaties by Russia, with the United States and Great Britain, 1824-1825, marked the southern extent of Russian claims at 54 degrees, 40 minutes. By the Treaty of Washington, 1846, joint occupancy of the country with Great Britain was ended by dividing the area at the 49th parallel of north latitude. The Provisional Government in 1841 acted for the inhabitants of the Willamette Valley, but on July 5, 1843, it was enacted that Oregon Territory should be the name.

"On August 14, 1848, an act of Congress was approved by which a Federal organization of Oregon Territory would take the place of Provisional Government. The Oregon settlers north of the Columbia River became ambitious for a separate government. These aspirations were voiced at the Fourth of July celebrations in Olympia in 1851 and 1852, resulting in the Cowlitz and Monticello Conventions where memorials to Congress were adopted. General Joseph Lane, Delegate to Congress from Oregon Territory, acting on the memorial from the Cowlitz Convention, secured the passage of a resolution on Decemeber 6, 1852, asking that the Committee on Territories bring in a bill to divide Oregon by forming a new Territory of the lands north of the Columbia by the name of Columbia Territory. On February 8, 1853, during a debate on the bill, Representative Richard H. Stanton, of Kentucky, moved to amend by striking out the word 'Columbia' and inserting in its place 'Washington,' as an honor for the 'Father of His Country.' The amendment was adopted, the bill was passed and was signed by President Millard Fillmore on March 2, 1853. Vancouver's honor for George III, was thus changed to an honor for the opposing leader in the American Revolution who also bore the name of George.

"The new Territory extended from the Pacific Ocean to the Rocky Mountains, the northern boundary being the 49th parallel, and the southern boundary the Columbia River and the 46th parallel of north latitude. Oregon was admitted to statehood on February 14, 1859, with boundaries as at present. The eastern lands between the 42nd and 46th parallels of north latitude were at that time attached to Washington Territory. Idaho Territory was created by act of Congress dated March 3, 1863, cutting Washington down to the present boundaries.

Queer Word Relatives

The name catbird is attributed by various authorities to the sound by the bird in its cry of alarm, says Nature Magazine. Kinsmen in the vegetable world include catnip and catkin. The former takes its name from the fondness shown for it by members of the cat family. The term "catkin" as applied to the flower axis of the willow and poplar and the staminate flowers of such trees as the chestnut, oak, and hickory, is traced to their resemblance to the tail of the ordinary cat. The "kin" was added to create the diminutive form, as meaning, literally, "the little tail of a cat." Similar explanation is given for the name of the cat-tail.

New Kyne Romance Makes Its Bow

Peter B. Kyne, creator of the inimitable Cappy Ricks, is in California putting the finishing touches on the conclusion of "Never the Twain Shall Meet," his romance of California and the South Seas, which will appear in book form in October. Mr. Kyne will be one of the flock of American authors to invade Europe this fall.

Average rise of wages over the country is 94 per cent, according to computations made by the Associated General Contractors of America.

DAIRY

"Animals cannot be successfully produced without the aid of scientific knowledge regarding their health," says Dr. E. E. Wegner, dean of the School of Veterinary Science at the State College of Washington, discussing the present demand for doctors of veterinary medicine. This is particularly true since the days of intensification of their breeding qualities. In breeding, rich feeding, lack of exercise, high production, group housing, infected quarters, all have served to reduce the stamina of our animals. What will prevent disaster? Specialists who have studied these problems and are capable of advising the livestock producers. The livestock men are anxious for such service and are willing to pay for it."

SAY ALIEN LAW IS MISHANDLED

U. S. Board Members Declare Immigrant's Human Side Is Neglected

NEW YORK.—The human side of immigration must be considered along with its economic aspect, if the problem is to be solved, says a report published by the National Industrial Conference Board on "The Immigration Problem in the United States." Far-reaching changes in the Government's immigration policy are recommended.

"It is clear," the report says "that a wide, comprehensive and humane national immigration policy can not be based exclusively on the consideration of any immediate special or purely economic aspect of the problem, but must be developed out of broad, far-sighted and scientifically grounded views of national and international social and economic progress and human welfare."

The board, after suggesting that inconsistencies arising from the way the present laws are handled should be avoided in the future, says the state and labor departments fail to work in harmony on the immigration problems. No examination is held abroad to determine mental fitness, the selective function being in the hands of steamship companies, the report adds, which undertakes the work "to avoid heavy fines and not from any sense of public duty."

"No enough care is taken to detect mental defectives in ports of entry," the report adds. "Facilities are cramped, and the new law has only added new difficulties."

Owners of Holstein cows will appreciate the explaination given by a lad who escaped from an institution for delinquent negro boys. He worked in a pasture, herding cows. One evening he was missing when the roll was called. After a search he was apprehended and brought before the superintendent.

"How did you make your escape, Mark?" asked the superintendent.

"I jes puts mah arms around de cow's neck," replied the lad, who was black as the ace of spades, "an' goes out as a spot."—Detroit Free Press.

Somebody said don't can fruit for it will be poison, but the careful housewife need not worry.

EDISON ELECTRIC AIR HEATER

October Special

Special Price FOR October Only **$6.95**

A HANDSOME, light, portable Electric Heater, in brown finish, with a 14-inch bowl, can easily be carried from one room to another. Just the thing for instant heat in the bath room, bed room, or any room in the home.

Get one of the Edison Electric Air Heaters today and connect it to any electric light socket in your home---"It will take the chill out of these chilly days" and it will be a great comfort to every member of the family. It only costs approximately 2.1 cents per hour to operate, on our 3-cent rate.

Dr. T. A. Elliot on Saturday shipped a car of hogs to the Spokane market, he accompanying the shipment.

How Better Than Pills

The question has been asked—In what way are Chamberlain's Tablets superior to the ordinary cathartic and liver pills? Our answer is, they are easier and more pleasant to take and their effect is so gentle that one hardly realizes that it is produced by a medicine. Then, they not only move the bowels but improve the appetite and strengthen the digestion. For sale at Clark's Drug Store.

GRANT CLARK

School Notes
By Estel Rogers

According to some of the papers handed in to the instuctors by high school students, it looks as though the authorities adopted a very wise plan when they added spelling and writing to the curriculum. Previous to this year only a limited amount of attention could be given to these important subjects in the high school, but now under the instruction of Miss Marie Hummel they have been made compulsory for all high school students. Following is a list of words taken from three different papers, from which it can be seen how much in need of spelling we are. The first column gives the spelling of the words as they were found on the papers, the second the correct spelling:

mane	name
umbulla	umbrella
of	off
tail	tale
father	farther
frunt	front
funy	funny
marsel	marshal
lieve	leave
hade	had
shriked	shrieked

When the boys came back from Colton last Friday afternoon the report they brought could have been a great deal worse. The game started at 3 o'clock with Genesee receiving the first kick-off. Then followed a line plunge and several other quick and profitable moves, which enabled Vincent Hasfurther to make the first and only touch-down for our team.

The Colton team also went into the game in earnest, but received only one touch-down.

At the close of the game the score stood seven to seven. A good spirit was shown by both teams, which is a very good way to start the season. A large number of students accompanied the team to the scene of battle and did their part to help win the game. Today the team is going to Potlatch to compete with their players.

Our high school is not as large as last year but the number is gradually increasing. This week Lester Hayden and Lewis Bently entered as freshmen and Edith Daugherty as a sophomore.

As soon as a freshman enters high school, he always looks forward to a certain event with anxiety, while the sophomore looks to it with joy. This event is going to take place next Saturday night, at which time the sophomores are going to give the freshmen a thorough initiation into the high school.

Leona and Mildred Daugherty entered school as eighth grade students Monday.

Bill Lucas and Lois Hillman of the third grade are leaving school this week.

Bernice Bumpass has returned to school after two weeks' absence.

Tuesday noon one of our teachers was noticed leaning out of one of the windows of his room and was busily playing a beautiful (?) serenade. We are mentioning no names but it is rumored that this individual is busy practicing the part of Romeo. Who knows?

Hav-a-laf with Lucey, auspices of high school, November 1.

PERSONAL MENTION

Robt. Beechler was a Sunday visitor in Spokane.

T. Driscoll was a Wednesday morning passenger for Spokane.

Mr. and Mrs. William Hordemann were Tuesday visitors in Uniontown.

Mrs. August Bradow of Uniontown spent Tuesday shopping in Genesee.

George Whitcher left Saturday for a visit with his family at Latah, Wash.

Peter G. Kries left Wednesday morning for Kellogg to look up a location.

Henry Halverson left Monday morning for Shelby, Montana, on a short business trip.

Frank Willoughby was a Sunday passenger for Spokane for a visit with his family.

Mike Earls left Wednesday morning for Tacoma for a visit with home folks for a week.

Joe Doyle and Alfred Cann left Monday morning for Portland for a few months stay.

Miss Helen Fruth returned to Colton Monday after a visit at the John Friederichs home.

Mrs. Alma Butterfield, accompanied by William Lawson, returned Saturday morning to Pullman.

J. Rosenstein arrived in Genesee Tuesday afternoon from Seattle and will look after business matters here.

Mrs. H. M. Warren accompanied Mrs. W. J. Davee to Lewiston Friday, where she will spend a few days visiting.

Roy Michealson returned to Spokane Monday morning after a visit with his parents, Mr. and Mrs. Louis Michealson.

William Roskammer and George Anderson were Monday morning passengers for Calgary, Canada, to work in the harvest.

Miss Ethel Nelson left Sunday for Liberty lake, where she is teaching, after a visit with her parents, Mr. and Mrs. N. Nelson.

Miss Ethel McMillan left Saturday morning for Winchester to attend the funeral of her nephew, whose death occurred Friday night.

Mrs. Pauline Gehrke was a Wednesday morning passenger for Spokane after having spent the past two months here with her children.

Mr. and Mrs. W. M. Herman returned Tuesday evening from a few days' buying trip to Spokane. Mr. Herman says things are rather slow in the big city, too.

Mr. and Mrs. John G. Meyer returned last Thursday evening from a several days' trip to Myrtle Point, and Portland, Oregon, going to the former place with his sister, Mrs. G. E. Taber, and children. Mr. and Mrs. Meyer report a splendid trip.

Wilfred and Arthur Cameron left Saturday morning for Seattle where they will spend the winter. Mrs. L. C. Cameron accompanied them as far as Spokane, from which place she went to Mold, Wash., for a visit with her daughter, Mrs. Ed McLean, and husband.

Carl Osmundson and family arrived in Genesee Saturday evening after having spent the past several weeks on a trip to California. Carl says the Golden State may be all right for "them as likes it," but he doesn't care for it. There are thousands of tourists on the road and most of them seem to be headed for California so he thought if they were all going to "the land of sunshine"—where he says there is more fog than anything else—he wanted to be back in God's country where there is plenty of room.

Parent-Teachers' Meeting Postponed

The regular meeting of the Parent-Teachers' association, scheduled for Monday night, October 15, has been postponed until Monday night, October 22, on account of the fact that Mrs. Sargent, of the University of Idaho, who was to have delivered an address, was unable to be present at the meeting as scheduled, hence the postponement.

Everyone interested in the welfare of our public school should be present on Monday night, October 22, as Mrs. Sargent will have something worth while to tell you.

Law Office Moved

Attorney Thomas A. Feeney, has removed his office to the Smolt building, four doors east of the post office. 14-4

"Bullet" Gets Boisterous

The Genesee Bullet, under the guiding hand of Johnny Roberts, that plies between this little city and Pullman almost every day, got boisterous last Thursday night—or, rather, Johnny or some of his men did—and decided to tie-up and spend the night in Genesee.

It seems that on Thursday afternoon of last week while the switch-twisters for the Bullet were doing duty near the stockyards they suddenly took the notion that it might be a good idea to park the engine nearby and spend a few delightful hours in town. It seems, also, that the fellow didn't know just where the gate was to the stockyards, where it was evident he intended to park the engine and the bloomin' thing missed the road and that caused Johnny no end of trouble, so he had to get busy and send for the wrecker to come and put the front end of the Bullett back on the track. And by the time that was done it was time to go to Pullman for breakfast Friday morning.

The next time Johnny wants to put his train in the stock yards for the night we would advise him to call someone that knows the road and where the gate is.

Federated Ladies Aid

Mrs. Frank Qually and Miss Chubb will entertain the ladies aid society of the Federated churches at the home of Mrs. F. B. Evans on Wednesday afternoon, October 17.

All ladies who are interested in the work of the Federated church are cordially invited to attend this meeting.

Linger Longers Meet

The Linger Longers met at the home of Mrs. F. H. Thomas on Wednesday afternoon. The time was spent with needlework and social converse after which a delicious luncheon was served. The invited guests were Mrs. C. P. Whalen, Mrs. Elizabeth Gray and Mrs. Geo. Mochel.

The next meeting will be at the home of Mrs. T. H. Herman on Wednesday, October 31.

Success does not always come to him who waits. The hustler steps in and hogs it.

Short Undertaking Company

Parlors at Genesee and Moscow. Prompt attention given night or day calls. Embalming and auto equipment furnished all funerals without extra charge. Full line of caskets at both places. At Genesee call George Schlerth at the Genesee Hotel.

"Courtesy and Service" is our motto. We relieve you of every care. 14-tf

MEYER & SON

Two Weeks' Specials

WE herewith give below a list of articles of useful merchandise---every item of which means a big money-saving opportunity for you.

DRY GOODS SPECIALS

27-inch outing, dark and light, sale price, yard 22c
36-inch amoskeag outing, sale, yard 28c
16-inch extra heavy linen bleached crash toweling, yd. 24c
30-inch serpentine crepe, sale, yard 30c
36-inch cotton challies, for quilts, sale, yard 19c
Children's black jersey bloomers, sizes 6 to 18 yrs., pair 65c
32-inch devonshire, sale, yard 32c
All 27-inch ginghams, sale, yard 20c

LADIES' SHOES

Ladies' high top French heel shoes, fine quality kid, regular $10 to $14 grade, sale price, pair $3.48
Ladies' white kid shoes, sale price 3.98

MEN'S GOODS SPECIALS

Men's Scout hats, sale price $1.45
Boy Scout hats, regular price $1.75, sale price 1.35
Boys' caps, sale price, each ..... .65
Boys' shoes, sizes 12-2, regular $2 value, sale price 1.58
Boys' shoes, sizes 2½-6, regular price $2.50, sale price 2.15
Men's strong work shoes, regular $2.50 to $2.75 value, sale price 2.23
Men's dress shoes, medium narrow toe, sale price 3.45
Men's sweaters, regular $1.75 value, sale price 1.45

All articles mentioned in this sale are net. No further discount will be given.

Eating What You Save

Prepared by the Extension Service, State College of Washington

Escalloped Tomatoes

Use 3 cups of canned tomatoes or fresh tomatoes cooked. 1 tsp. salt; 1 tbsp. onion juice or few drops onion extract; one-fourth tsp. paprika; 1 cup of toasted graham bread crumbs, or cooked yellow or brown rice and 2 tbsp. butter or other fat.

Cover the bottom of the baking dish with a layer of tomato; add salt, paprika, and toasted bread crumbs or rice. Repeat, having crumbs on top. Bake in hot oven until brown (about 15 minutes). To make toasted bread crumbs, grate bread into fine crumbs, melt fat; toss crumbs in this until well blended.

Tomato and Egg Salad

Remove skin from firm ripe tomatoes. Cut hard boiled eggs through the center, and remove yolks. Mix with salad dressing and refill whites. Turn tomatoes bottom side up and stand refilled whites in the places where part of core was removed. Serve on lettuce leaf with more salad dressing. This is a very pretty salad.

ONE-THIRD AUTOS OF COUNTRY ARE OWNED ON FARMS

State of Washington Has 42,428 Miles of Certified Roads

"One third of all the motor vehicles in the United States are to be found on farms," said Walter P. Chrysler, chairman of the board of directors of the Maxwell Motor Corporation and the Chalmers Motor Company, in New York recently.

"It is estimated that there are today 3,500,000 motor cars and 400,000 motor trucks on our farms. Iowa with nearly 200,000 motor cars and trucks leads, with the following states in the order named: Pennsylvania, Kansas and Nebraska.

Forty Per Cent on Farms

"Forty per cent of all the cars in the South are to be found on farms.

"The National Automobile Chamber of Commerce recently made a survey of trucks on farms and reports from 40 per cent of the counties in the United States showed 138,308 trucks on the farms of those counties. The survey showed that on 256,000 farms in Alabama there were but 2,416 trucks while on 80,415 farms in Iowa there were 7,318 trucks.

"It was also revealed that there were but 223 trucks on 86,560 farms in Kentucky while in Texas there were 4,079 trucks on 86,839 farms.

Washington Figures

"Figures were obtained showing that 2,014 trucks were found on 17,763 farms in Washington, 1,630 trucks on 22,567 farms in Oregon and 1,034 trucks on 32,994 farms in Idaho."

Mr. Chrysler pointed out how the automotive industry has made possible the greatest of all construction industries—road building.

"Washington has 42,428 miles of certified roads, 1,273 miles in its primary systems, 1,697 in its secondary system. Oregon has 41,826 miles of certified roads, 1,177 miles in its primary system and 1,528 in its secondary system. Idaho has 40,200 miles of certified roads, 1,163 miles in its primary system and 1,609 in its secondary system.

"In 1922 Oregon constructed 212 miles of road at a cost of $5,469,765.72; Idaho constructed 208.5 miles costing $3,400,439.26 and Washington built 60.5 miles costing $1,961,389.31. In each instance the Federal Government met about half the cost.

"During the year the state of Florida built but 5.1 miles of roads costing about $35,514.43. Even Rhode Island did better. That state constructed 7.9 miles of roads at a cost of $342,756.29.

"Oregon has 481.2 miles of Federal Aid roads completed, Idaho 424.6 miles and Washington 371.7 miles. Oregon has 105.7 miles of such roads under construction, Idaho 94.4 and Washington 75.2 miles. The roads in Washington under construction will cost $2,669,726.01, in Oregon $1,513,305.25 and in Idaho $1,420,132.77.

Road-Building Equipment

"A study of road building statistics will satisfy anyone that there is a definite relationship between the economic health of a state and its road building program.

"Last year Washington had a total of 210,716 motor cars and trucks; Oregon had 134,125 and Idaho 53,874. Registration revenues during the year gave Washington $3,291,671.70, Oregon $3,340,519.58 and Idaho $812,948.72.

"Of all the states Washington is 18th in the number of cars and trucks registered, Oregon 27th and Idaho 40th.

"A table of numerical increases of registrations during 1922 over 1921 shows Washington 20th, Oregon 30th and Idaho 46th. In a table of percentage increases in registration Washington and Oregon are tied for 27th place with a percentage of 13.7, and Idaho 47th with 5 per cent.

"Washington has a motor vehicle to every 6.5 inhabitants, Oregon to every 5.8 inhabitants and Idaho one to every 8 inhabitants. It is interesting to note that Oregon ranks 7th. Washington 14th and Idaho 17th.

"The effect of the wheat depression can plainly be seen in a study of motor car statistics in the three Pacific Northwest states."

Forest Fires Are Costly to Nation

Everbody is loser when the forests burn, and from five thousand to six thousand fires occur each year in the national forests alone.

Lightning causes from 25 to 30 per cent of the fires. The remaining 70 or 75 per cent are classed as "man-caused" fires, which are set by campers, smokers, railroads, brush burners, sawmills, and incendiaries, according to Charles Lathrop Pack in his "School Book of Forestry." The annual loss from forest fires in the Federal forests varies from a few hundred thousands of dollars in favorable years to several million in particularly bad fire seasons. During the last few years, due to effective fire-fighting methods, the annual losses have been steadily reduced.

The best way of fighting forest fires is to prevent them. The forest officers do their best to reduce the chances for fire outbreak in the Government woodlands. They give away much dead timber that either has fallen or still is standing. Lumbermen who hold contracts to cut timber in the national forests are required to pile and burn all the slashings.

Dry grass is a serious fire menace. That is why grazing is encouraged in the forests. Rangers patrol the principal automobile roads to see that careless campers and tourists have not left burning campfires. Railroads are required to equip their locomotives with spark arresters. They also are obliged to keep their rights-of-way free of material which burns rapidly. Spark arresters are required also on logging engines.

But the individual has the great responsibility, as the figures in Mr. Pack's book easily show. Every man and woman who loves the out of doors should make it their personal business to use the greatest care when in that out of doors they love.

PACKS ROWBOATS MILES OVER ROCKY MOUNTAINS

WASHINGTON, D. C.—Dad Moran, champion packhorse packer of the Rocky Mountains, can throw the 'diamond hitch" over things with which the average Western man would never dream of burdening a horse's back.

Dad packs 'em with everything: stove pipes, tubs, garden tools and 57 varieties of groceries, including eggs. When Dad gets this stuff on the horse's back, it is there have even than any woman ever packed a grip with her personal belongings.

Dad Moran's long suit is packing lumber on horses' backs. This is regarded as a most difficult accomplishment.

Moran's greatest achievement probably was in packing a rowboat 53 miles back from the railway in Glacier National Park to Lake Josephine. He used two horses, building a platform over the backs of both and letting the rowboat rest upon this. This is the first time a rowboat ever was taken into the Rocky Mountain country on horseback, so far as the records of the Bureau of National Parks show.

MAY ENLARGE PARK FOR NEW BUFFALO PRESERVE

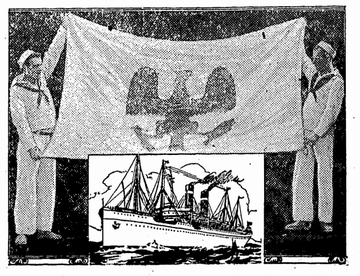
WASHINGTON, D. C.—During its tour of the national parks, last summer, the Senatorial - Congressional Committee drove over and inspected portions of the area in and on the outskirts of Glacier Park, Montana, which they definitely selected as the site for a proposed national buffalo preserve.

If Congress takes favorable action on this project, which now seems likely, about 150 square miles of territory will be added to Glacier National Park in the establishment of this great buffalo range. This strip lies adjacent to the Rocky Mountains east of the present park boundary lines to St. Mary's River and north to the Canadian boundary line, including the Hudson Bay Divide and the Milk River Ridge.

Little more than half a century ago this section was the favorite grazing ground of the American buffalo, which drought drove from the scorched prairies to the grass country in the shadows of the mountains.

This always has the greatest natural buffalo range the Indians knew anywhere upon the American continent, because an even distribution of rainfall continuously kept the grass green. The Congressmen think Uncle Sam may begin putting buffalo back upon the native haunts of their progenitors next year.

PACIFIC COAST TO SEE FAMOUS ENSIGN



Oldest American Steamship Flag in the Atlantic, to be Flown by Panama Pacific Line Ships

HOUSE flags are valued by shipping companies as symbols of business identity, and also for their sentimental associations. Some of the house flags flown by the clipper ships in the days of '49 are now treasured in Eastern homes or museums as souvenirs of an American shipping era now passed. Flags of steamship lines have taken their place.

One of the most famous steamship house flags is that of the American Line, pictured here. It was first flown on the original steamers of that line when they began operations between Philadelphia and Liverpool in 1871, and is the only house flag of an American steamship line that has been continuously in transatlantic service for more than half a century.

In a few weeks this famous ensign of trade and travel will be seen in the Pacific, on the ships of the Panama Pacific Line, which in November reopens a service between California ports and New York, by way of the Panama Canal, which was interrupted by the great war.

Three large ocean liners—the Manchuria, Kroonland and Finland—have been assigned to the new service by the International Mercantile Marine Company, which operates the Panama Pacific Line, and also several transatlantic lines.

As the Manchuria has flown the American Line house flag in transatlantic passenger service since the war, it has been decided to adopt that flag for the Panama Pacific Line. Its roughly outlined blue spread eagle on a white ground, familiar to hosts of Atlantic travelers, will fly over all three of the line's passenger ships, and also over its freighters, the Montauk and Montana. All five ships are of American build, and are worthy of the honored flag they will bring into the Pacific.

The first sailing of the new service from San Francisco will be that of the Kroonland November 8. The Finland will sail November 19, and the Manchuria December 10. First, second, intermediate and third class passengers will be carried, and all three ships have large freight capacity for California products.

Better Health Service

PUBLIC HEALTH IS PUBLIC WEALTH

These Articles Compiled by the Public Health League of Washington

THE TONSIL QUESTION

Shall my child who has had an occasional sore throat have the tonsils and adenoids removed? This question should be met by every parent truly interested in the future health of his children.

To bring the subject to a point, the dogmatic statement is made that every one over the age of five who has had two attacks of sore throat such as to put him in bed should have the tonsils and adenoids removed. By "removed" is meant completely removed, not merely clipped or burned.

The above statement holds good, no matter how small or how pink and normal the surface of the tonsils may look during the period following the attacks of sore throat. Very often only a very small amount of the surface of the tonsil is seen on examining the throat, the major portion of the tonsils being hidden under the other throat tissues.

Original Function Uncertain

Consider first the nature and structure of the tonsils and adenoids and see wherein their danger lies. Their original function is uncertain. They may have been intended to act as filters of disease germs. At any rate they do pick up a lot of disease germs. Continuing the comparison with a filter, you know that a filter becomes dirty and has to be cleansed or its usefulness is lost and it serves no longer to purify but to contaminate further. Unfortunately, we cannot take out and cleanse and replace our tonsils; when they become clogged with disease germs they lead to a formidable array of diseases which cannot be cured till the tonsils are removed because the tonsils are the source of the poison pouring into the blood. These poisons are carried by the blood to distant parts of the body and lead to a great variety of complaints. These are known as the toxic results. They are many and varied and frequently hard to recognize as due to disease of the tonsils.

Among these complaints, acute and chronic rheumatism and "heart trouble" are probably most common. It should be generally known that diseased tonsils are responsible for a large proportion of the cases of rheumatism and of heart disease. This knowledge is gradually getting to the life insurance companies so that the more progressive will not accept a person who has had rheumatism until he has his tonsils removed. The reason for this is that as long as the diseased tonsils remain the person may have further attacks of the rheumatism. Each attack of rheumatism is likely to cause heart disease. Heart disease causes death.

Insurance Problem

It is a business proposition with the insurance companies. They wait until one has had rheumatism to have the tonsils removed. Why wait that long? Why shouldn't they be removed after showing their tendency to disease by two attacks of sore throat?

Among the other toxic symptoms should just be mentioned the intensely painful neuralgic and cases of neuritis which, if not of too long standing, may be benefitted by removal of the tonsils.

Goitre symptoms, such as nervousness, tremor and palpitation, are at times due to infection of the tonsils. Removal of the tonsils is frequently practiced in such cases and in certain cases results in such improvement that no more serious operation on the goitre can be avoided or if still necessary can be done with much less hazard.

Hinders Breathing

Now, consider the mechanical or pressure symptoms of enlarged tonsils and adenoids. Those resulting from massive adenoid growth have become quite well recognized. When the adenoids enlarge they tend to close off the nose from the throat. This leads to mouth breathing, with its associated stupid expression. Further enlargement leads to pressure upon the eustachian tube, with more or less difficulty in hearing, hence the inattention of these children—a further mark of their stupidity. Small wonder they are considered backward in mental development and fail to keep up with their classmates. There is great pleasure for parent, doctor and teacher in noting the rapid mental and physical development in such a child following the removal of the adenoids. The mouth no longer hangs stupidly open. With the improvement in hearing the former dullness changes to interest and as a result progress in school and in social activities rapidly returns to normal.

Pinchot and Prohibition

"The liquor situation is a disgrace to Pennsylvania and to the nation. No serious attempt seems to have been made to enforce the law. I shall do my utmost to drive the saloons out of Pennsylvania. The state police are already at work driving the liquor trucks off the roads. I am a prohibitionist by principle. I believe in prohibition, and this administration will be dry."—Governor Gifford Pinchot of Pennsylvania in McClure's.

Nest on Barn Side

Swallows, on swift flight, cleanse the air of flies and mosquitoes, says Nature Magazine. The eaves or cliff swallows fasten their mud nests to the side of the barn under the eaves, or to the face of cliffs. Tree-swallows nest in holes of rocks, in hollow trees and in bird boxes.

Sofia, the Bulgarian capital, is in the grip of terrorism; passage in and out of the city has been forbidden; numerous communists, including 15 college students, have been executed.

HAVE A CARE WHEN YOU HANDLE FIRE IN WOODS

Like poison ivy, talk of a coal strike and other "annual events," the "forest fire season" is with us again and a statement by the American Tree Association says that the best way to stop forest fires, with their millions of dollars of loss every year, is to prevent them. Campers and tourists as well as hikers are given these suggestions to remember when in the woods:

Be sure your match is out. Break it in two before you throw it away.

Throw pipe ashes and cigar or cigarette stubs in the dust of the road and stamp or pinch out the fire before leaving them. Don't throw them into the brush, leaves, or needles.

Build a small campfire. Build it in the open, not against a tree or log, or near brush. Scrape away the fresh from all around it.

Never leave a campfire, even for a short time, without quenching it with water or earth. Be sure it is out.

Never build bonfires in windy weather or where there is the slightest danger of their escaping from control. Don't make them larger than you need.

If you find a fire, try to put it out. If you can't, get word to the nearest United States forest ranger or state forest warden at once.

WORLD NEWS

Within 36 hours, after the first news of the Japanese earthquake reached this country, the American Red Cross was ready for its relief service. The Japanese relief fund amounted to $9,702,700 on September 25.

Soldiers, digging a well at Sincheng, Honan, China, unearthed remains of what is believed to be a royal personage, surrounded by bronzes, vases, jade ornaments and other relics, valued at $500,000. The skeleton, without a coffin, was preserved by a vermilion preparation, which impregnated the bones. The grave is estimated to date back to 500-1000 years before Christ.

Official French figures, according to the French Information Service of the Bankers' Trust Company, covering the progress of reconstruction of war-devastated regions of France, show that on June 30, 20,000 of the 22,900 communes had been partly rebuilt; 590,000 houses out of 741,993 demolished, had also been reconstructed; and 7,845,000 acres of land had been restored to cultivation out of 8,250,000 acres ravaged by the German invasion.

A report issued by the British Ministry of Agriculture shows that in the four years following the close of the war, 13,560 applicants were provided with land under the government plan of setting up British ex-service men on small agricultural holdings. The acreage taken over by the service veterans was 268,407 acres. According to the Ministry's figures, as received by the Bankers Trust Company of New York, only 5.5 per cent of the men who received holdings have abandoned their farm undertakings. The report indicates that a large proportion of the ex-service farmers have been efficiently cultivating their land and increasing their head of livestock.

BEES SETTLE IN HIVE OF INDUSTRY

Leave it to the busy bee to settle in a hive of industry. Work in the cable reel manufacturing department at the Hawthorne works, Western Electric Company, Chicago, ceased temporarily recently when a swarm of bees took possession of one of the nail kegs right in the middle of the shop floor. John Waszkiewicz, a laborer at the works, who has a way about him as far as bees are concerned, is shown here moving the unique hive to a less congested location.

Wenatchee is shipping a trainload of apples a day. A trial shipment is to be sent to South America.

Idaho News

Idaho wheat yield is estimated by the United States Department of Agriculture to be 28,000,000 bushels.

Community and church organizations all over the state are busy getting ready for the many activities during the winter.

The Wendell cheese factory received 6,000 pounds of milk on one day just recently. Increasing business makes the farmer think well of the dairying business in this community.

Splendid wheat yields and corn crops are reported from many Idaho counties this year, the yield per acre will average considerably more than any previous year.

The University of Idaho geologists have completed extensive survey of oil structure in Eastern Idaho, with indications for oil extremely flattering.

A large crowd witnessed the closing performances at the thirteenth annual Kamiah Fair. It is estimated that over 3,000 persons jammed the stands and side lines to witness the program.

It is hoped that the Boy Scout drive at Lewiston has proved a great success, and that the funds received will be sufficient for all needs for the ensuing year.

October 10, 11 and 12 were the dates set for the fair at Grangeville. It promises to be the best fair ever, and the management has put forth every effort to make the exhibits and entertainments eclipse anything of former years.

After inspecting a number of fields where strawberry root weevils were found to have been injuring the plants, County Horticulturist Harry Isaman will not permit the plants to be shipped out of Clarkston. Many growers are not aware of the state requirement that all plants to be shipped out of the state must be officially inspected.

The American Order, Daughters of Sacajawea, and the American Indian Association, jointly asked Governor C. C. Moore of Boise, to proclaim an American Indian day in Idaho. The Indians are claiming national recognition; more than 17,000 Indians were in the world war; 10 were awarded the croix de guerre; 150 were decorated for bravery, and 10,000 in the American Red Cross.

The Idaho Power Company has erected a fine fountain at the west end of Malad bridge, on the old Oregon Trail, four miles north of Hagerman. The fountain is housed in a massive lava rock structure of beautiful design, from which flows a constant stream of pure water. A triangular plot of ground, leveled and fenced, adds much to the beauty of the spot.

William J. Cox, inspector of agriculture in Northern Idaho, and J. C. Jansen, inspector of agriculture in Southern Idaho, are very busy inspecting lettuce and apple shipments. They may require several assistants, as the crop is very heavy. All those selling or buying produce should understand fully the inspection requirements.

The head lettuce harvest is drawing very close, the plants are in excellent condition in some districts, while in others they are not so good. Iceberg lettuce is bringing $4 a crate in New York, and it is thought probable that the Lewiston Orchards lettuce will bring $5 a crate owing to its superior quality.

Miss Elizabeth Russum, state superintendent of schools, believes that a better corps of instructors should be placed in the elementary schools of the state if the university and normal schools are to receive students who are fitted for higher education.

The Farmers' Co-operative Creamery Company of Payette will manufacture more than 1,000,000 pounds of butter this year. It is now shipping one carload of butter each week to Los Angeles, besides taking care of the trade in Payette and nearby towns.

Idaho ranks twenty-seventh among the 39 states and provinces represented on the honor roll of breeders, just issued by the Holstein-Friesian Association of America, for high production of cows during the testing year. The Holstein cows of the University of Idaho and of T. J. Killen distinguished themselves in the test.

James Nifong, a resident of Moscow for 43 years, died at his home in that city at the age of 91 years, 1 month and 15 days. He is survived by eight children and 15 grandchildren.

The sawmill of the old Seattle Lumber Company is being torn down. The plant was a big factor in the lumber trade of the Northwest; it was built in 1899, but became landlocked when the fill was made for Elliott Avenue.

Housing Shortage Aid Need of This Country

In a review of housing conditions in Europe and the United States submitted to the President by Willard Reed Messenger, of New York, suggestion is made as to ways in which more and better homes may be provided by a variation of methods followed abroad.

Mr. Messenger was a delegate from the United States to the International City and Town Planning Conference recently held at Gothenburg, Sweden, in addition to which he visited most of the principal European countries studying especially the subject of town planning and housing.

Give Home Subsidies

After stating that many foreign countries are rendering housing assistance by making loans at two and one-half per cent interest and in England in the form of a subsidy, Mr. Messenger says:

"As a result of this co-operation on the part of national and municipal governments, it was pleasing to see the splendid progress which has been made, for instance, at Christiania, since the war, and this progress is still continuing. Similar results have been attained in Sweden, while the progress at Amsterdam is especially notable in providing not only a large number of new apartment homes, but structures of excellent design. England is busily working to catch up with the demand in many of the larger cities, such as London, Manchester, where through government financial cooperation new homes are constantly being made available.

Want Help Here

"It probably is not expedient nor necessary for the United States Government or for local governments here to participate financially in providing housing facilities, but I do feel that if men of large fortunes and the administrators of large estates would devote part of their resources for the relief of housing shortage, they could still receive a fair return and reasonable security and at the same time assist in upbuilding the nation, not only physically but socially and morally.

"Your public appeal for the general adoption of such a policy would, in my judgment, be an action for great public, national good. As a business undertaking it is sound and conservative and some estates, wealthy corporations and individuals at the present time, fortunately for following such a policy, but I am obliged to say that this policy is by no means general through the United States. In fact the difficulties are so great in some localities that co-operation on the part of chambers of commerce is contemplated in order to provide funds for housing relief."

Responding to Mr. Messenger's communication, President Coolidge states that the "information that it contains as to the progress of the world movement for better homes is indeed gratifying." The President adds that he has been glad to lend his name to the better homes movement in America.

American Army Below Strength

Ex-Army Officer Says Only 30,000 Men Are Ready for Action

"If a military emergency should develop suddenly under present conditions we would have difficulty in mobilizing within a month even 30,000 men out of the army of 125,000 authorized by Congress.

"Over one-third of the mobile combat regiments now on the rolls of the regular army consist of but one officer and two men each!

"In all that army today there is but one infantry regiment fit to engage in combat under conditions of modern warfare. That is the Twenty-ninth Infantry, now on demonstration duty at Fort Bennings, Georgia.

"Cavalry and field artillery are as badly off. They are under-officered, under-manned, under-trained and under-horsed.

"In the opinion of well-informed military leaders, it would take us six months, at least, to mobilize 1,000,000 men. From a military standpoint we are, to all intents and purposes, actually defenseless today against any sudden attack in which our ability to mobilize quickly would mean a victory."

These startling revelations of Uncle Sam's present unpreparedness are made in McClure's by Herbert B. Mayer, late lieutenant of infantry in the Regular Army. To tell this story of what he terms "our present grave national peril," he recently gave up his commission and the promise of a career in the Army. His statements, he announces, have all been checked by some of the highest officers in the army today, and are based in addition on confidential reports, charts and other documents of the most unimpeachable authority.

From these authorities Mr. Mayer shows that of our magnificent fighting force of two million citizens we now have left only a wrecked fragment, unfit to take the field against any modern army.

"The Army List for 1923, he says, "carries the numerical designations of 105 regiments of infantry, cavalry and field artillery. Of these, 37 are 'inactive.' This means that they have been demobilized save for one officer and two men each, in charge of the records of the old organizations."

CHAS. J. DEAN, M.D 2ND AND MORRISON PORTLAND, OREGON MENTION THIS PAPER WHEN WRITING

World's News

Secretary of War Weeks announced on Sept. 24th, the sale of the Gorgas plant and other government improvements on the land of the Alabama Power Company, at Muscle Shoals, to the Alabama Power Company. The sale price agreed was $3,472,485.

Great interest and surprise were evinced by James B. Inglis, the lord mayor of York, England, and Mrs. Inglis, when they stayed for a few hours in Seattle, on their way home, via San Francisco and New York. The surprise was occasioned when they learned how young a city Seattle was; and to hear of the rapid development of the state afforded them great interest. "We have an official message from the people of Old York to the citizens of our young American namesake," said the lord mayor. In their luggage they carry the 300-year-old mayoress's chain, worn by all York's mayoresses, and a replica of the lord mayor's chain, two strands of which are 500 years old.

The earthquake in Persia still continues nearly every day, according to word from Tashkend. Numerous shocks have been felt up to the frontier of Turkestan.

J. H. Wickham, aged 70, celebrated his birthday by playing 70 holes of golf over the Hyperion Club links at Des Moines, Iowa.

There will be a shortage of lilies in the United States next spring, as virtually the entire stock of bulbs in Japan has been destroyed by the earthquake and fire.

United States navy seaplanes won first and second places in the international seaplane race for the Schneider cup at Cowes, England, the world's chief naval air trophy.

The official itinerary of David Lloyd George's American tour is as follows: October 5, New York; 6 to 8, Montreal; 9, Ottawa; 10 and 11, Toronto and Niagara Falls; 12 and 13, Winnipeg; 16, Minneapolis; 16 and 17, Chicago; 18, Springfield, Ill.; 19, St. Louis; 20, Louisville; 23, Indianapolis; 24, Cleveland; 24, Pittsburgh; 25, Washington, D. C.; 27, Richmond, Va.; 31, Philadelphia; Nov. 2, New York.

A delegation of women's clubs was informed by Hiram Johnson in Los Angeles that "the proposed anti-child labor constitutional amendment will receive the almost unanimous approval of the coming Congress and then will be speedily ratified by the states."

The Polish Countess Cecilia Potopkaka, whose maiden name was Koscluska, and believed to be a descendant of the American revolutionary hero, has been sentenced to death for espionage, on behalf of Poland, in the alleged betrayal of 15 Polish communists to the Polish government.

After a long, long fight, the ladies of Canada have at last convinced the Canadian railways that the ladies should have equal rights with men, and so the Canadian National continental trains leave Vancouver, B. C., with a "ladies only" smoking compartment attached to the sleeper.

The German "middle class" is fast dying out; they are almost starving, finding it impossible to follow their professions, even to eke out a daily miserable existence. A wonderful home for the aged in Charlottenburg, opened in 1915, richly endowed, has been obliged to close its doors.

George Frame died recently in Sacramento, having passed the last seven years of his life penniless and ill at the county hospital. He was a writer and newspaper man, and once a political leader in California. He is said to have been the only newspaper man surviving who accompanied Coxey's army on its famous march.

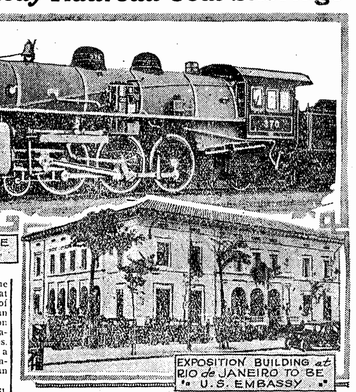
The pageant "Wayfarer" had only nominal success during the two weeks it was showing in Los Angeles. The weather was atrocious, only five nights of good weather, the rest rainy and cold. The play was staged in the Coliseum stadium at Los Angeles.

Passive resistance in the Ruhr concelled by Germany has ceased. The German premiers approved the decision of the government and declared the readiness of their states to defend the unity of the reich. However, there is still much unrest in the occupied territory.

Error in judgment of the navigating officers, presumed on the basis of their own reckonings, taken from the speed of the propellers, that the rocks had been passed, is alleged, was the cause of the destruction of the destroyers on the rocks off Point Arguello, part of the squadron on its way to San Diego, in command of Captain Watson. The hearing of testimony is still continuing.

Corks in mucilage and cement bottles won't stick if a little glycerine is rubber over them.

Brazil Buys American Fuel Savers To Remedy Railroad Coal Shortage



ONE of the outcomes of the recent world exhibition at Rio de Janeiro in honor of the 100th Anniversary of Brazilian independence was a further action by the Brazilian government in favor of American manufactures. The American exhibition was a large one and signalized the increasing penetration of American goods into South America.

The Central Railroad of Brazil, which is owned by the government, has 539 locomotives, 500 of which are American. One, having been built by the American Locomotive Company for exhibit, was purchased by the government before it left the shops here.

Owing to the scarcity and low grade of native Brazilian coal, the fuel situation there is serious. The locomotive purchased is of the Pacific type designed to burn the Brazilian lignite coal, which is a low grade fuel. In order to create economies, it was necessary to design the engine with special reference to heat saving, and to equip it with American fuel savers. It is expected that this engine will make a record for economical operation as in addition to having a superheater, it is equipped with a Worthington feed water heater, which makes use of what would otherwise be waste heat from the furnace to raise the temperature of the water before it enters the boiler and so save coal.

It is anticipated that important trade results will follow the opportunity given to American firms to show their products at this Centennial. Brazilian-American relations being still further cemented by the trip of Secretary of State Hughes on an American battleship to express personally the best wishes of the United States to her sister republic in the South.

ACCIDENT SUGGESTIONS

By JOHN W. ROBERTS, Counsel Automobile Club of Wash.

Job, in his agony, wailed: "Oh, that mine adversary had written a book!"

After an accident the ambulance chaser, with his "lean and hungry look" exclaims: "I hope the driver of the machine has talked."

If you have an accident, keep your mouth shut. You must, of course, give your name, and the number of your car, and there is no objection to stating that you do not consider that you are in any way to blame. But don't talk about how or why the accident occurred, and never, in the midst of the excitement incident to an accident, admit liability. If it should develop later that you are liable, you can admit it without prejudice to your case. You may be admitted it, it is very difficult afterwards to recall the admission. There will be plenty of people standing around to swear they heard you make it.

I am dictating this just after a conference with a man from California, who was driving on one of our roads, and unfortunately struck a pedestrian, who is seriously injured. He at once told the friends of the injured that he was insured, and that he would take care of everything, etc. On returning to Seattle he wired to his insurance company in California, only to learn that the man has no liability insurance, but his obligation is now out in a case where I do not believe he was in any way to blame.

Many people cannot understand why they should not talk. There are several reasons. One is that usually after an important or serious accident a party involved is in no condition to talk, and I have in many instances where, in the excitement, persons made statements against themselves that were entirely wrong. In one case a driver after striking a man, said: "My brakes did not work." Yet by actual measurement he stopped the car in less than ten feet.

Another reason is that bystanders, in the excitement, misconstrue what is said, place their own construction upon it, and then go into court and give damaging testimony.

Housebreaker (to householder)—Hold me! If I'm found, I'm lost!—Exchange.

PLANTING TREES

More than a year ago Wythe Williams, writing from Paris of Clemenceau whose home he had visited on the sea coast, told this story of the old man:

"But I love it," he said. "I love this place. I am of it. If one says one loves a woman, well, that is all; one can add nothing. It is like that when I say that I love this place where I was born."

He pointed to the forest. "I have watched that forest grow—these great pines. Eighty years ago there was not a single tree there." He stopped and picked a little flower from the sands—a delicate flower, with exquisite perfume. "See, that grows here," he said, handing it to me. "It is called 'the pink of the dunes.' And there are immortelles too." He pointed about him. "And the heather—and over there by the house, you see, I am raising a plantation of pines from the sand."

He stopped speaking for a moment, then continued with one of the few touches of solemnity that I have ever heard from him. "I am almost 80; but what if I die a year from now—or a month from now? I am going to give myself the pleasure of planting trees, to see that they take root and grow."

Small Kitchens

The idea of the large kitchen is passing. A small, compact kitchen, well ventilated and lighted, where electricity and gas are ready servants, is not only less fatiguing but goes far towards promoting health and happiness.

RIBBON AND GLUE MAKE CHIC HAT

Duvetyn, metal-edged ribbon and glue are used in making this charming small hat. Orn inexpensive untrimmed shape may be purchased and cut into four sections as in Fig. 1. Each section is bound with grosgrain or faille ribbon, which is held neatly to the surface by the application of liquid glue (Fig. 2). These sections should be joined by neat stitches on the under side.

A rolled brim of the same material is ornamented with metal-edged ribbon twisted into such designs as Figs. 3 and 4, and attached to the brim with liquid glue.

Always remember to apply the liquid glue sparingly and to use only the best quality.

Wheat Still Coming In

While much of the grain has been brought to the warehouses and elevators there are still thousands of bushels on the farms yet to be hauled. The warehouses have been working almost day and night for the past several weeks, receiving and shipping grain—and the end is not yet. It is estimated that the Genesee section produced one of the largest crops this year that has ever been raised here.

Fits Many Cases

We passed a gasoline station the other day, says an exchange, where a wife was instructing her perspiring husband as to how much air the tires on their car, or possibly her car, should carry. After the proper amount of air had been forced into each tire, the man got in, took the wheel, and the wife, who occupied the rear seat, drove off. It might be added that the case is not an isolated one.

Tidemann-Dibble

Miss Selma Tidemann of Genesee and Clyde Dibble of Kellogg were united in marriage on Saturday, October 6, at Wallace.

The bride is a daughter of S. M. Tidemann and has lived near Genesee all her life. She is a graduate of the Genesee High school and a graduate nurse from St. Lukes' hospital, Spokane. She has been doing nurse work at Kellogg for some time. The groom is engaged in the lumbering contract business at Kellogg. He served in the World War as a sargeant.

The newly-weds arrived in Genesee Tuesday from Wallace for a visit with the bride's father, after which they will return to Kellogg where they will make their home.

The News joins their many friends in extending congratulations.

Might Get Hard Fall

It's all right to be in the hands of your "friends" providing they don't let you "fall" too hard.

Notice

Economical conditions demand that the long time account system cease. Years ago the manufacturer extended months of credit to the jobber; the jobber passed it on to the retailer, and he in turn favored his customers.

Today the manufacturer sends a sight draft with the bill-of-lading to the jobber, the jobber extends 10 to 15 days credit to the retailer, and successful retailers all over the country have followed suit.

Experience has proved it is the only fair, sane and consistent method.

On and after October 15, 1923, as a protection to themselves and in a spirit of fairness to all concerned, the undersigned will extend credit only **on a thirty day basis,** by special agreement.

The current month's bills are due and payable on or before the 10th of the following month.

Signed,
Follett Bros. Mercantile Co.
Emmett & Boliou.

Statement of Ownership, Management, Etc., Required by the Act of Congress of Aug. 24, 1911

Of the Genesee News, published weekly at Genesee, Idaho, for October 1, 1923.

State of Idaho, County of Latah—ss. Before me, a notary public in and for the state and county aforesaid, personally appeared P. C. McCreary, who, being duly sworn acording to law, deposes and says that he is the owner and publisher of the Genesee News and that the following is, to the best of his knowledge and belief, a true statement of the ownership, management, etc., of the aforesaid publication for the date shown in the above caption, required by the Act of August 24, 1912, embodied in section 443, Postal Laws and Regulations.

That the name and address of the publisher and owner is Genesee, Idaho.

That the owner is P. C. McCreary, Genesee, Idaho.

That the known bondholders, mortgagees, and other security holders owning and holding one per cent or more of total amount of bonds, mortgages, or other securities are: None.

P. C. McCreary.

Sworn and subscribed before me this 8th day of October, 1923.

C. P. Whalen,
Notary Public.

Caught Severe Cold

He's been in bed for a week—more stupid than ever. He's sure he caught cold from a bank draft (the first one he ever saw) sent in by a delinquent subscriber.

LOOK ahead to Winter, with its wet, snowy or icy streets and roads, and when you buy a tire now, get the Goodyear Cord with the All-Weather Tread. That tread is famous the world over for slipless, gripping traction and for long, economical wear.

VOL. XXXV — GENESEE, LATAH COUNTY, IDAHO, FRIDAY, OCTOBER 19, 1923. — NO. 16

PUBLIC SCHOOL NOTES —THE PRIZE ESSAYS

By Estel Rogers

The person who said "variety is the spice of life" surely told a long story in a nut shell, for the high school is putting variety into its work with a scheme that has proven successful. At various times during the year a member of the faculty or some outsider will give a short talk to the student body. Last Wednesday noon Superintendent Thomas, who was the first to speak to the school, gave us some very good instruction regarding our everyday manners and hospitality toward one another. This instruction is surely very fitting and proper because we occasionally become slack in these things and need a reminder.

The football game, played between Genesee and Potlatch last Friday, came out in favor of Potlatch. The boys went into the game with vim, but it seemed as though luck was against them during the first half of the game. The Potlatch team made all their scores in the first half, and we made ours in the last forward pass and touchdown and struggled hard, the score stood 12 to 26 in favor of Potlatch at the end of the game.

This coming Saturday the team is going to Lewiston to compete with their second team, and the next Friday Lewiston's team will come here.

Monday of this week a motion was carried by the high school student body to send a bouquet of flowers to Bernice Rogers, who is in a Lewiston hospital recovering from an operation.

A good time is reported by every one who attended the freshmen initiation last Saturday night. The sophomores pride themselves on giving the report that the upperclassmen received no portion of the "eats." A seemingly correct rumor is abroad that the juniors and seniors did get a hand-out. Who's right?

The primary department is already preparing for Hallowe'en. They have decorated their rooms and are expecting to give a short program.

Ila Daugherty entered as a sixth grade student last week.

The second meeting of the Parent Teachers' association will be held at the school building on Monday, October 22 at 8 o'clock. The following program will be given:

Community singing.

Piano Solo—Mrs. Jack Barnes.

Double Quartet—Mrs. W. W. Burr, Mrs. Arthur Springer, Mrs. R. I. Witty, Mrs. Fred Hampton, Mrs. F. K. Bressler, Mrs. Milton Rader, Mrs. Robt. Emmett and Miss Edith Winegardner.

Mrs. Sargant, an instructor in the department of modern languages at the University of Idaho, will give an address.

Mrs. Wm. Hordemann will give a piano solo if she can arrange to be present at the meeting.

Following are the first and second prize essays from our high school in the American Legion contest on the subject, "Why America Should Prohibit Immigration for Five Years":

(By Sylvia Johnson)

An America for Americans cannot exist unless we safeguard ourselves from further influxes of such individuals as have been coming into our country through our immigration policy. The prohibition of immigration for five years will give us a chance to develop our national life in such a way that it will give the largest contribution to humanity. America has been considered as a melting pot into which all the other countries could put their socially unfit members. Many of these people are criminals, defectives, or paupers. What does this mean to our country? It means a larger number of crimes and a greater extent of pauperism.

The standards of the American working man cannot be maintanied with our immense immigration. Because immigrants are unskilled workers they will work for longer hours and lower wages. Immigrant labor is not cheap, however, when we consider that it is replacing our American skilled labor, and causing the vital problem of unemployment to arise. The manufacturer gets this cheap labor in order to produce his articles cheaper, but this does not mean that he sells the goods cheaper. He thinks only of the profit to be obtained. Is it just to place profit above patriotism, which is being done in this case?

In general, immigrants are clannish and tend to form colonies of their own race in which their customs and languages are maintained. Almost seven millions of our foreign population can neither read nor write the English language. If we do not want America to repeat the clash of nations and races which is destroying the peace of Europe, we must see that our country is not transplanted by her people.

Again, people of other countries are not accustomed to self-government and have failed when they have tried it. They are, therefore, incapable of adapting themselves to our form of governing They are not fit to vote intelligently and are often under some party control. Because foreigners are clannish and unassimilated their sympathies are not in the country in which they are working, but away in the country with the people of their homes. Russians have hailed America as the land most ripe for a Bolshevik revolution. Thus, it is of the utmost importance that the doors should remain absolutely shut to such political propogandists who believe in revolution.

Through our immigration policy we are shaping the character of the future population of our country. People coming to our country at present usually belong to a different race from ours. Most of these have shown incapacity for self-government. The character of the people is largely determined by its inherited traits, and the character of a nation depends upon the character of its people. We are debasing the heredity of our people by letting other inferior races mix with them. The immigrants of today will become part of the American people of the future, and even though we may partly "Americanize" them, they will partly alienize us. Now is the time to form the future of our country, and in order to do this we will have to take the step of prohibiting immigration for five years so as to be undisturbed by undesirable influences which tend to break down rather than restore. This must be done if the "Stars and Stripes" are to remain forever.

Sylvia Johnson.

(By Olive Mulalley)

The subject of immigration is becoming more important and more threatening every moment that it goes unheeded. Should we feel flattered that seemingly the whole world wants to come to America? Will we take the outcasts or misfits of the other nations without a murmur or protest? Hords of immigrants are coming to Cuba, Mexico, Central and South America, and even Canada, as fast as boats will carry them, intending to enter the United States later by any possible means.

In a Polish newspaper the assertion is made that they, the Poles, pride themselves on having a Polish judge here and there, and another Polish paper says there is plenty of work for another one-hundred-million aliens in the United States. An Italian paper called for organization and also a rapid increase in births among Italians here, as their greatest need.

There is no longer a labor shortage anywhere, and those who prophesied that there would not be enough men left after the war, and that newspapers and governments would be encouraging the birth rate, are entirely wrong. On the contrary the world has not been encouraging new arrivals and strangers. It seems there are enough people everywhere, and some places are over-crowded.

We must get control of the aliens as we have control of our American citizens or they will soon control us. Europeans seem to think—Germany for the Germans, Russia for the Russians, Austria for the Austrians, Hungary for the Hungarians, and America for them all. They welcome with open arms, the Americans with well-filled purses, but not those who would obtain work there. Yet we are constantly bumping elbows with foreigners who boast about the large sums of money they have sent back to their aunts and uncles. Will we allow this? How long will America hold the high place of honor, or wealth, and greatness as of today, if her wealth is sent out of the country, her honor is divided among all nationalities, and her greatness is so diminished as to make her unable to control the antagonistic elements with which our nation is being overrun.

It is hinted that the employer favors immigration because alien labor is cheap. But is it not cheap in the long run? The war has given us proof that a large group of foreigners is not a strength but a weakness to our country. Their feelings are with their foreign homes, not with the land that is giving them their bread. They organize and form threatening groups, capable of turning against the republic they have joined, and of rendering great aid to their Fatherland. If these trouble-brewers intend to settle down, become one of us, and advance the welfare of our land instead of plotting for her downfall, good enough. But if

(Continued on last page)

WHAT HAPPENED HERE TWENTY YEARS AGO

Nearly all the stores were closed Sunday.

John Kempf has decorated the exterior of his residence with paint.

W. E. Gage has just finished painting and improving his residence in Krum's addition.

Mark Rosenstein left Wednesday morning for Portland where he will again enter school.

Agent Smith informs us that only forty tickets were sold this year to parties visiting the Spokane fair.

At a recent meeting of the school board George Mochel was chosen president and Herman Nebelseick secretary.

Mrs. C. F. Burr left Thursday morning for Couer d'Alene to attend the state meeting of the Rebekah organization as a representative of the local lodge.

W. H. Glidden was a visitor in the city Saturday while enroute to Lewiston. He informed us that he has leased his farm near Cornwall and had taken a position with the American Harrow company. During the past summer agents disposed of a car load of these harrows in this section and Mr. Glidden states that ten cars were sold to be delivered at Lewiston.

"The Pride of Palomar"

A thrilling struggle of a gritty young American against almost insuperable odds is the keynote of "The Pride of Palomar." The theme of the picture, which was adapted from Peter B. Kyne's novel of the same name, is a powerful one and woven into the story is a delightful love thread. This involves on the part of the girl great sacrifice, for she is cast between the two persons she loves most in the world, who are fighting one another. These are her father and her sweetheart, and it is absorbing to see how she solves her problem. There is plenty of lively action and a large splash of humor near the end when Don Mike stages a stunt against the enemy that leavs a spectator gasping in astonishment at the audacity of it. Frank Borzage, director of "Humoresque," produced the picture. The all star cast leaves little to be desired.

This is one of the best pictures that has ever been shown in Genesee—and Saturday night is the time.

People Not All Broke

According to the report sent out by a Spokane banking institution, the people of the United States are not all broke—but there is no telling how soon many of them will be—accoring to the following figures:

Automobile production during August included 349 thousand cars and trucks compared with 327 thousand the month before and less than 273 thousand a year ago, the increase over a year ago being 28%.

Gasoline production during July was 637 million gallons compared with 570 million gallons a year ago, the increase being 12%. Gasoline stocks on the first of August were 1,165 million gallons compared with 773 million gallons a year ago, the increase in storage stocks during the year being 51%.

White Sox Again Champions

The White Sox again are Chicago city champions. Beating the National league Cubs 4 to 3 in 10 innings, Friday the Americans won the series 4 games to 2. Two fumbles and a wild throw by George Grantham gave the Sox the championship. The first fumble came in the ninth inning in which the Sox scored twice and knotted the count while the second fumble and the wild peg came in the tenth and allowed the Sox' winning run to score.

It was the eighth city championship the Sox have won from the Cubs, who earned the title three times. The National leaguers won their last title last year, the first time in 13 years.

Bar Weed-Scented Males

The 500 beauty specialists in convention at Chicago have come to these conclusions:

They don't want male trade. A tobacco impregnated man would wreck the dainty atmosphere of a beauty parlor. He is too coarse for treatment.

Women card players are the best customers, especially of manicurists.

Cold cream should be used back of the ears and neck, for these come in for scrunity in theaters.

The really correct face, for this season, according to Dr. Nellie Cooper of Baton Rouge, La., national president, is an alabaster-like mask, with a poker face done in shades of dull white. The color relief, if such it be, is a brilliant rouge on the lips.

I. O. O. F. AND REBEKAH STATE OFFICERS ELECTED

At the annual session of the Odd Fellows and Rebekah lodges, held at Moscow Monday, Tuesday and Wednesday of this week, the following state officers were elected for the ensuing year:

Odd Fellows—James A. Bybee of Driggs, grand patriarch of the grand encampment of Idaho; Guy W. Shillpington of Rupert, grand high priest; W. A. Lansberry of Ashton, grand senior warden; John Peters of Pocatello, grand junior warden; Presley F. Horne of Caldwell, grand scribe; A. E. Gibson of Caldwell, grand treasurer; R. T. Owens of Malad, grand representative for one year term; Montie B. Guinn of Boise, grand representative for a two-year term. Mr. Guinn holds over as grand representative in that he was elected last year.

Geo. Follett, Geo. Mochel and Geo. Boliou represented the local lodge at their sessions.

Rebekahs—Mrs. Pearl McClung of Boise, president. Other officers are Mrs. Maud V. Morgareidge, Moscow, vice president; Mrs. Beulah Hattabaugh, Grangeville, Warden; Mrs. Frances Crosson, Boise, secretary; Mrs. Sarah Pemberton, Caldwell, treasurer; Mrs. Lillian Lanktree, Emmett, member of the Odd Fellows' home board; Mrs. Hattie L. Fry, Cottonwood, representative to the Association of Rebekah Assemblies; Mrs. Leafy Simpson, Boise, alternate to the Association of the Rebekah Assemblies.

Miss Ruth Martinson represented the local lodge at the sessions.

Legion Auxiliary Held Meeting

For the purpose of organizing an auxiliary of the American Legion the women eligible to membership planned and carried out a joint meeting on Wednesday evening, October 17. The ladies had as their guests the members of the American Legion and five members of the Moscow chapter. A splendid supper was served, plates being laid for 45.

Frank H. Thomas acted as toastmaster and also gave some splendid ideas on the necessity for strong organization of a Woman's Auxiliary to co-operate with the Legion. The following were called upon and gave many valuable suggestions as to the activities of chartered posts: Mesdames Witcher, McConnell, sr.; McConnell, jr.; Roe and Parkhurst, all of Moscow. Thomas A. Feeney, the local Legion commander, and Mrs. Feeney were also called upon and made some interesting remarks. Following the supper the American Legion and the Auxiliary held their respective meetings.

The Auxiliary feel that their efforts have not been in vain for a chapter has been organized with a membership of 14 active members.

With Mrs. Feeney acting as temporary chairman, many social events were planned for the winter, the first of these to be a Hallowe'en card party on Wednesday evening, October 31.

A special meeting of the Auxiliary members and anyone desiring to join will be held Thursday evening, October 25, at 8 o'clock.

Big White Pine Sale

Sale of 170 acres of white pine timber on the west branch of the Priest river in the Kaniksu forest, close to the Washington-Idaho line, to the Humbird Lumber company of Idaho for what is said to be a record price of $60,000, has been made public. The sale will net the government $315 an acre for stumpage with an average of 32,500 feet of timber to the acre which will require an additional $50 an acre paid for the disposal of slash piling and burning.

Public Sales

E. S. Sams, residing on the old Follett place, near Pine Grove school house, will hold a public sale of livestock, and farming implements and some household goods on Friday, October 19. A free lunch will be served at noon.

Ben Jain, residing on the J. J. Keane farm, eight miles north of Genesee, will offer at public auction, on Saturday, October 20, his horses, cattle and farming implemetns. A free luch will be served at noon.

Held on Two Booze Charges

Jim Montana, arrested by federal agents at Potlatch on a liquor in possession charge, was charged by Prosecuting Attorney Frank L. Moore with maintaining a nuisance. Montana will also face a felony charge in that he has twice been convicted of prohibition law violations. Bond was fixed at $600 and he was held on the federal charge to answer before Judge Frank S. Dietrich at Moscow in November.

Surprise Party

The Jas. Nelson farm home, a few miles north of town, was the scene of a very pleasant gathering last Sunday. While Mr. and Mrs. Nelson reside at Lewiston, they had been very graciously invited to take dinner with a former neighbor, near their ranch, and had accepted the invitation. On their way to take advantage of the dinner invitation Mr. Nelson stopped at his farm to look after some stock. In the meantime a neighbor or two had "accidentally" dropped in to chat a while—and the chatting lasted so long that Mr. and Mrs. Nelson began to fear that they would be late in filling their dinner engagement. However, time passed and more neighbors gathered and it finally dawned upon the uninformed hosts that the neighbors were going to stay at the Nelson ranch and spend the day. Huge baskets of eatables were brought by the self-invited guests and at the noon hour some 50 neighbors and friends seated themselves at one of those dinners that only an occasion of that kind can bring out.

During the afternoon the men contented themselves with pitching horseshoes while the women spent the time socially. A splendid time is reported.

Mr. Nelson has leased his farm to Isaac Isaksen for a term of years and he will remove to the Nelson farm within the next few weeks.

Mr. and Mrs. Nelson were presented a half dozen salad forks as a remembrance.

Those present were Mr. and Mrs. Sam Lange and family, Mr. and Mrs. Henry Hanson and family, Mr. and Mrs. Wm. Borgan, Mr. and Mrs. Arthur Hove, and family, Mr. and Mrs. Archie Tegland and family, Mr. and Mrs. Arnold Olson and family, Mr. and Mrs. Fred Hove, Mr. and Mrs. Ben Sather and family, Mr. and Mrs. M. Gunderson, Mr. and Mrs. Nels Lande and son, Mr. and Mrs. Isadc Isaksen and son, and Ole and Nels Flamoe,

This is one of the best improved farms in the entire Palouse country and Mr. Nelson has always kept it in such a manner as to make it attractive.

Get Offer For Idaho Apples

Members of the Canyon County Apple Growers' association Monday evening will probably decide as to the disposition of the 1923 pool, aggregating between 500 and 600 cars of Jonathans, Delicious, Rome Beauties, Winter Bananas and other varities. Dan Wuille & Co., Inc., perhaps the largest firm of exporters from this country to England, through the United States manager, A. E. Woolpert, will present his firm's proposition to take the entire pool.

Mr. Woolpert offered to take the entire crop on a reasonable commission and export them to England, selling them there for the highest mar ket price.

Idaho growers, Mr. Woolpert asserted, are largely to blame for the lack of reputation their apples have shown in competition with those of other sections. Almost exclusive shipment in bulk will no longer suffice, he added, if the Idaho fruit is to go into the market alongside that of other districts which is carefully graded, wrapped and packed in attractive containers.

Had Large Bean Crop

Julius Giese, one of the prosperous farmers of Fix Ridge, was a Genesee visitor Monday. Mr. Geise stated that he had a fine bean crop this year and that he received a good price for same, in addition to the several hundred acres of grain raised by him.

Mr. Giese believes in diversified farming and says that he believes every farmer should have a few cows, pigs and chickens. He has about hundred head of hogs at this time, some 27 or 28 cows and many dozens of chickens—all of which help to keep money in the "till."

He farms several hundred acres and has work the year 'round.

Attend S. S. Convention

Several auto loads of people went from Genesee to attend the Sunday School convention at Potlatch last Sunday, among whom were Misses Wilma Casebolt, Grace Jain and Ida Evans who sang during the program. They were accompanied by Miss Helen Casebolt, who presided at the piano.

Wood Cash of Genesee was appointed a member of the nominating committee. By a unanimous vote Genesee was chosen as the meeting place for the Latah County Sunday School convention for 1924.

Operated On for Appendicitus

Miss Bernice Rogers was operated on for appendicitis last Friday afternoon at St. Joseph's hospital, Lewiston. She was doing nicely at last report.

SEMI-LOCAL NEWS CLIPPED FROM EXCHANGES

All Suffer Alike

It seems that the least rain will put the lighting system out of commission. What's wrong? It would seem to be cheaper in the long run, and it is known that it would give the customers more satisfaction if the system were put in shape to withstand weather conditions.—Colton News-Letter.

Heavy Bean Yields

The best bean yields this fall were reported on Little Bear ridge. Eight sacks were a common occurance and a prominent farmer of the ridge stated that he believed the average was in the neighborhood of 6½ or7 sacks for the whole ridge.—Kendrick Gazette.

Ship Seven Loads

Seven loads of livestock were shipped from the local station Tuesday morning. In the shipment were five carloads of cattle for Spokane, two carloads of feeders for Pomeroy, Wash., and one carload sheep for Armour and Company, Spokane. The entire shipment was handled by John Baer who bought them from Salmon river stockmen.—Cottonwood Chronicle.

Party Gets Elk

John Grasser, Pat Allen, John Snyder, Ed Crossland, Albert Snyder and Milt Snyder returned from a big game hunt last week and were successful in getting several elk. They were killed in the Weistas country. It is said that the head secured by Mr. Grasser is one of, if not the finest specimen ever brought out of the Clearwater.—Clearwater Tribune.

Will Repair Bridge

Officials, representatives of Idaho and Washington, met Wednesday at the Commercial club rooms to discuss the condition of the Lewiston-Clarkston interstate bridge. It was agreed by all present that the bridge was in immediate need of repairs, both for economy's sake and for the public safety. The conference resulted in the decision to start immediate necessary repairs, which will cost about $5,000, this to be divided between the two states, and an appeal will be made to the legislatures of both states for funds to make the bridge permanently safe.—Lewiston Banner.

To Get Dairy Stock

Several farmers of this section have announced their intention of bringing in some high class dairy stock next spring. Some will get calves, others cows. The trend toward dairying is growing stronger. Statistics show that this is one line of agriculture that is not overdone. The demand for dairy products is always ahead of the supply and the tariff on butter keeps the price of butterfat up. With ten good cows the farmer can make more money than he can on a quarter section of wheat under present conditions. Those farmers who are gradually getting together a bunch of dairy cows have seen the light and are on the road to prosperity.—Deary Press.

Culdisac Hunters Return

Edward Davis, W. R. Shores and W. I. McPhearson have returned from a 20-day hunt in the Selway country, bringing with them three elks, two deer and an exceptional collection of elk's teeth, these being of a coloring that makes them particularly valuable.

The hunters report seeing a bear and a cougar. Fish was abundant throughout their stay in the woods. A week ago yesterday they experienced a snowstorm that caused them to wander about lost all day. The snow was 16 inches deep where they were.

Will Organize Bowling Club

A bowling club is in process of organization for the coming winter's sport, using the K. of P. alleys. The alleys are to be leveled, sanded and polished and they should then be in as good condition as any alleys in the country.

Everyone is eligible, no matter how good or how poor you may be at the game. You are guaranteed a good time. Great sport was had last winter.

If you are interested, see Bill Burr for particulars.

Entertain at Dinner

Mr. and Mrs. J. W. Patterson and son, Harold, motored to Genesee Sunday and were guests of Mr. and Mrs. M. K. Smith at dinner. Other guests at the Smith home were Mr. and Mrs. Ivan L. Osterhout and son Donald, of Colfax, and Mr. and Mrs. Farley Smith and family from southern Idaho.—Star-Mirror.

MY LADY'S MONEY

An Episode in the Life of a Young Girl

By Wilkie Collins

(Installment No 23)

Isabel instantly protested against this misrepresentation of what she had really said. "Oh, Mr. Hardyman, you quite mistake me!"

She drew herself away from him—resolutely, not angrily. Before she could make a third attempt to place the subject in its right light before him, the luncheon bell rang at the cottage, and a servant appeared, evidently sent to look for them.

"Don't forget tomorrow," Hardyman whispered, confidentially. "I'll call early, and then go on to London and get the ring."

CHAPTER XVII.

A week passed. Moody (longing to to see Isabel) still waited in vain for news from France. He has just decided to delay his visit to South Morden no longer, when the errand boy employed by Sharon brought him this message: "The old 'un's at home, and waitin' to see yer."

Sharon's news was not of an encouraging character. He had met with serious difficulties, and had spent the last farthing of Moody's money in attempting to overcome them.

One discovery of importance he had certainly made. He had secured a horse in France at the high reserved price of twelve thousand francs — being four hundred and eighty pounds in English money—and he had paid with an English bank-note. The seller (a French horse dealer resident in Brussels) had returned to Belgium immediately on completing the negotiation. Sharon had ascertained his address, and had written to him at Brussels, enclosing the number of the lost bank-note. In two days he had received an answer informing him that the horse-dealer had been called to England by the illness of a relative, and that he had hitherto failed to send any address to which the letters could be forwarded. Hearing this, and having exhausted his funds, Sharon had returned to London. It now rested with Moody to decide whether the course of the inquiry should follow the horse-dealer next. There was the cash account, showing how the money had been spent. And there was Sharon, with his pipe in his mouth and his dog on his lap, waiting for orders.

Moody wisely took time to consider before he committed himself to a decision. In the meanwhile he ventured to recommend a new course of proceeding which Sharon's report had suggested to his mind.

"It seems to me," he said, "that we have taken the roundabout way of getting to our end in view, when the straight road lay before us. If Mr. Hardyman has passed the stolen note, you know as well as I do that he has passed it innocently. Instead of wasting time and money in trying to trace a stranger, why not tell Mr. Hardyman what has happened, and ask him to give us the number of the note? You can't think of everything, I know, but it does seem strange that this idea didn't occur to you before you went to France."

"Mr. Moody," said Old Sharon, "I shall have to cut your acquaintance. You are a man without faith; I don't like you. As if I hadn't thought of Hardyman weeks since!" he excitedly claimed, contemptuously. "Are you really soft enough to suppose that a gentleman in his position would talk about his money affairs to me? You know mighty little of him if you do. A fortnight since I sent one of my men (most respectably dressed) to hang about his farm, and see what information he could pick up. My man became painfully acquainted with the toe of a boot. It was thick, sir; and it was Hardyman's."

"I will run the risk of the boot," Moody replied, in his quiet way.

"And put the question to Hardyman?"

"Yes."

"Very good," said Sharon. "If you get your answer from his tongue instead of his boot, the case is at an end—unless I have made a complete mess of it. Look here, Moody! If you want to do me a good turn, tell the lawyer that the guinea opinion was the right one. Let him know that he was the fool, not you, when he buttoned up his pockets and refused to trust me. And, I say!" pursued Old Sharon, relapsing into his customary impudence, "you're in love, you know, invite me to the wedding. I'll make a sacrifice: I'll brush my hair and wash my face in honor of the occasion."

Returning to his lodgings, Moody found two love letters waiting on the table. One of them bore the South Morden postmark. He opened that letter first.

It was written by Miss Pink. The first lines contained an urgent entreaty to keep the circumstances connected with the loss of the five hundred pounds the strictest secret from every one in general, and from Hardyman in particular. The reasons assigned for making the strange request were next expressed in these terms: "My niece Isabel is, I am happy to inform you, engaged to be married to Mr. Hardyman. If the slightest hint reached him of her having been associated, no matter how cruelly and unjustly, with a suspicion of theft, the marriage would be broken off, and the result to herself and to everybody connected with her would be disgrace for the rest of our lives."

On the blank space at the foot of the page a few words were added Isabel's writing: "Whatever changes there may be in my life, your place in my heart is one that no other person can fill; it is the place of my dearest friend. Pray write and tell me that you are not distressed and not angry. My one anxiety is that you should remember what I have always told you about the state of my own feelings. My one wish is that you will still let me love you and value you as I might have loved and valued a brother."

The letter dropped from Moody's hand. Not a word, not even a sigh, passed his lips. In tearless silence he submitted to the pang that wrung him—in tearless silence he contemplated the wreck of his life.

CHAPTER XIX

The narrative returns to South Morden, and follows the events which attended Isabel's marriage engagement.

To say that Miss Pink, inflated by triumph, rose, morally speaking, from the earth, and floated among the clouds, is to indicate faintly the effect produced on the ex-schoolmistress when her niece first informed her of what had happened at the farm. Attacked on one side by her aunt and on the other by Hardyman, and feebly defended, at the best, by her own doubts and misgivings, Isabel ended in surrendering at discretion.

Miss Pink wrote of the engagement to Moody first, reserving to a later day the superior pleasure of informing Lady Lydiard of the very event which that audacious woman had declared to be impossible. To her aunt's surprise, just as she was about to close the envelope, Isabel stepped forward, and consistently requested leave to add a postscript to the very letter which she had refused to write! Miss Pink was not even permitted to see the postscript. Isabel secured the envelope the moment she laid down her pen, and retired to her room with a headache (which was genuine in disguise) for the rest of the day.

Hardyman was not a man who yielded easily, even in trifles. In the present case his dearest interests were concerned in inducing Isabel to reconsider her decision. He was still vainly trying to shake her resolution when the afternoon post brought a letter for Miss Pink, which introduced a new element of disturbance into the discussion. The letter was nothing less than Lady Lydiard's reply to the written announcement of Isabel's engagement, dispatched on the previous day by Miss Pink.

Her ladyship's answer was a surprisingly short one. It only contained these lines:

"Lady Lydiard begs to acknowledge the receipt of Miss Pink's letter of questing that she will say nothing to Mr. Hardyman of the loss of a bank-note in her house, and assigning as a reason that Miss Isabel Miller is engaged to be married to Mr. Hardyman, and might be prejudiced in his estimation if the facts were made known. Miss Pink may make her mind easy. Lady Lydiard has not the slightest intention of taking Mr. Hardyman into her confidence on the subject of her domestic affairs. With regard to the proposed marriage, Lady Lydiard casts no doubt on Miss Pink's perfect sincerity and good faith; but, at the same time, she positively declines to believe that Mr. Hardyman means to make Miss Isabel Miller his wife." Lady L. will yield to the evidence of a properly attested certificate—and to nothing else."

A folded piece of paper, directed to Isabel, dropped out of this characteristic letter as Miss Pink turned from the first page to the second. Lady Lydiard addressed her adopted daughter in these words:

"I say on the point of leaving home to visit you again, when I received your aunt's letter. My poor deluded child, no words can tell how distressed I am about you. You are already sacrificed to the folly of the most foolish woman living. For God's sake, take care you do not fall a victim next to the designs of a profligate man! Come to me instantly, Isabel, and I promise to take care of you!"

(To Be Continued)

Northwest News

Francis Million, deputy superintendent of the federal employment office in Yakima, believes that 1,000 men will be needed until the apple crop is all boxed. There is a great demand now for apple pickers, packers and warehouse workers.

One of the "Original Americans" on the Tulalip reservation, named William Shelton, exhibited a statue at the Sammamish Valley County Fair. It is carved in wood. He has also carved several totem poles, one of which has been set up in Everett.

More than 1,000 farms are under cultivation on Vashon and Maury islands, where bulbs, vegetables, fruit and chickens are produced in great quantities and sent east and to England. The climate is particularly adapted to the raising of these products. Dairy farming stabilizes the commercial conditions.

John Edwards, 27, while washing windows at the Frye Hotel, fell down four stories, and still lives to tell the tale, although he has a dislocated elbow, fracture of a small bone in his foot, and finger bruises. The accident was due to the breaking of a safety-belt.

The two tourist camps of Bellingham have not only paid their expenses this summer, but a balance of between three and four hundred dollars remain. A fee of 50 cents was charged for each car remaining overnight. About 3,000 cars parked in the camps for one or more nights.

E. J. Vickney, of the University of Washington, will deliver the chief address in the program which will be given in Norway Hall, Seattle, to commemorate the discovery of America in the year 1,000, by Leif Ericson. This discovery was not followed by colonization, so Christopher Columbus must still continue to receive the glory of the discovery.

The raw milk dealers of Seattle won their fight against Commissioner of Health Dr. H. M. Read and Chief of Police Severyns in Judge Smith's court. Judge Smith held that the dealers were entitled to the court's protection in the distribution of their milk, finding that the commissioner, in enforcing the rules governing dairies and milk distribution, had permitted discrimination against raw milk dealers.

Alaska Week will be held in Seattle from October 28 to 25. October 18 is 55th anniversary of the raising of the American flag at Sitka, following the purchase of the territory from Russia. During the week there will be a display of exhibits on the ground floor of the White-Henry-Stuart building, showing the progress made by Alaska since its purchase by America. Alaska Week is to be made an annual affair.

Grant Smith, of Seattle, constructing contractor for the new Olympic, Seattle's $4,000,000 community hotel, one of the outstanding builders of the United States, succumbed in a St. Paul hospital to a stroke of apoplexy, with which he was seized on a passenger train, while on his way to Seattle from New York. His wife, a bride of two months, left on the first train out of Seattle for St. Paul after receiving the telegram stating that her husband had been stricken with apoplexy. Mr. Smith was returning to Seattle after making a tour of the East, where he was interested in many projects, and was hurrying home to direct the work on the Olympic when the end came.

Ezra Meeker, the trail blazer of '54, wants the commissioners of King and Pierce counties to authorize a preliminary survey of the old Naches Pass. He says that the old pioneer route would make the distance from Walla Walla to Seattle 287 miles, which would swell the tourist tide to Seattle by many thousands each summer by shortening distances.

A 22-months-old baby girl spent 24 hours in the woods back of Port Angeles, nude, in a drizzle of rain, and was found alive and well after a night all alone. Two hundred people joined in the frantic effort to locate the baby. She left home about 3 P. M. one day and was found at 4 P. M. the next day.

The Cascade Creamery Company of Yakima was found guilty in six charges of falsifying milk and cream tests by State Dairy Inspector Fred Stewart. The company was fined $600 by Justice of the Peace B. F. Young.

When the war ended, 43 wooden hulls were consigned to the safe harbor of Lake Union, sold by the Shipping Board afterwards to private interest. This number has gradually been reduced, until now there are only 37 hulls boats; the 38th has been fitted up as a floating home for the Seattle Camp Fire Girls, a gift from Captain F. W. Keen, retired mariner. Reports have it that several more deals are in prospect for other of these hulls, which are considered among the strongest and best-built wooden carriers ever built.

College Girl Dairy Expert

Miss Adah Elizabeth Proctor was a girl raised in the city who was threatened with tuberculosis. She was told she had to be out of doors, and when she entered the State College of Washington she took up the study of agriculture to be able to be outside and help her in the fight against the disease. Last spring she was the only woman in a class of 50 to graduate from the agricultural college. She is interested in Holstein cattle and has decided to make the raising of purebred animals her life work. The bull is Segis Pontiac Acme, herd sire of the college Holsteins.

Better Health Service

PUBLIC HEALTH IS PUBLIC WEALTH

These Articles Compiled by the Public Health League of Washington

OSTRICHISM IN DISEASE

The ostrich fools himself, of course, when he sticks his head into the sand. But people in disease also like to fool themselves. They like to pretend security in the presence of even the gravest danger. Indeed, the graver the danger the greater the pretense, as in cancer, tuberculosis and the like.

How often the mother will say: "Now, doctor, if you find anything seriously the matter with daughter, don't tell me; and, above all, don't tell her. It will simply frighten her to death." We imagine that ignorance will excuse the law. We go on the principle that "what you don't know won't hurt you."

Fear vs. Disease

And we make a fetish of fear. We fear that to fear disease will cause the disease. Often the patient will say: "Oh, no, doctor, I will not entertain that thought." As though entertaining the thought would introduce the disease. Or as though banishing the thought would banish the disease. The ostrich is not more foolish.

Or we still seek security in bravado. We still beat the tom-tom. When the plague swept Europe the streets of Paris were thronged with gaily dressed men and women singing and dancing and shouting defiance to the plague. And the plague swept on. How often today a patient will say to the doctor: "Oh, get out. I am not going to be sick. If I were to go to bed this thing would get me; but I am not going to bed. I will show you." In tuberculosis the patient often laughs to the last.

And often the physician will compound the felony. Often the physician will call a cataract "an opacity," or a cancer "a malignancy"—using words, as Goldsmith put it, "to obscure the sense." He can treat children more successfully than he can treat adults; he can treat animals better than he can treat men; for the former are not to be prostrated by cowardice. So he jollies the human herd along, catering to their cowardice.

Face It With Caution

This attitude of mind, this compromise with truth, this failure to face the facts, is not seen in business, in war, in any of the other stresses of life. In them the dangers are ferreted out and faced. In them we seek to forestall trouble. We need to learn that in health, also, "eternal vigilance" is "a price." We should face disease as we face the wild beast—with caution, candor, coolness and courage.

Be as sensible, then, in disease as you are in war, and for the same reason. Refuse to permit your cowardice to stick your head into the sand.

DAIRY

The daily amount of milk and cream received at the Lynden plant of the Whatcom County Dairymen's Association came near reaching the 200,000-pound mark at the peak of the season this year, when the receipts for a single day showed 194,000 pounds of milk and 2,000 pounds of cream weighed in.

The steady growth in the business being done by the Winlock Cooperative Creamery is shown in the report of butter manufactured during the first six months of this year, which was 225,728 pounds, or 18,000 pounds more butter than was produced during the corresponding period of 1922. The association's new plant, being erected at a cost of $10,000, will soon be ready for occupancy.

SHORT COURSE OF PRACTICAL DAIRYING

Announcement is made by the Idaho university college of agriculture of the short courses in practical commercial dairying and practical agriculture. The courses are open to men of 17 years or over who have had an eighth grade education or its equivalent. The most benefit will be received by those who have had experience in dairying or farming although this is not a necessary entrance requirement.

The course in practical commercial dairying is offered from October 29, 1923, to March 28, 1924. This course is divided into two terms, the first ending January 15. It is the only course of its kind in the West and offers an opportunity for young men to secure training in dairying in a short period of time.

The work in dairying includes actual practice in the manufacture of dairy products as well as a study of the fundamental priciples involved in practical dairying.

Classes in cheesemaking, ice cream making, market milk, testing, dairy engineering and dairy practice are offered for the first semester; and buttermaking, factory management, milk production, dairy bacteriology, dairy calculations and the scoring of dairy products are offered in the second semester.

Young men who have been unable to register in the four-year courses in the college of agriculture may register in the short course which is offered from October 29 of this year to February 29, 1923. Studies in farm crops, farm horticulture, elements of dairying, poultry raising and the feeding and care of livestock will be available for the year 1923-24. Further information may be obtained by communicating with the college of agriculture of the university.

Expenses in both courses are small and no tuition or laboratory fees are charged, offering a course which appeals particularly to young men who have not the necessary funds or time to enroll for the full year course.

FRENCH WHEAT CROP

France's wheat crop, including supplies available from French countries, is estimated to be more than sufficient to supply next year's requirements. According to figures received by the Bankers Trust Company for its French information service, the actual yield of France's wheat acreage this year is 79,000,000 quintals (approximately 290,000,000 bushels). In addition 4,000,000 quintals (about 14,700,000 bushels) are available from French colonies. The total wheat requirements of France are about 80,000,000 quintals (roughly 293,000,000 bushels) annually, so that the yield this year indicates that France will not be required to import wheat next year.

Rastus—I hear dey done found de bones of Columbus.

Enoch—Sho, I never knew he was a gamblin' man.—Everybody's.

Plant some shrubs and perennials in the fall. Larkspur makes a good background.

PLAN DEVELOPMENT OF AMERICAN DYES

Army Authorities Want to Place the Country Free of Foreign Products

Appointment of a committee to work with the United States Army in conducting a sweeping competition of American dyes is announced by the American Chemical Society.

The army, it was stated, is seeking a domestic dye to make all olive drab look alike. The faded and bleached cotton of many hues now worn by General Pershing's men will be replaced by a garb uniform in color.

Test Four Dyes

The task of the committee, Dr. Matthews said, is to reach conclusions as to the relative fastness and acceptability of four classes of dyes. Cotton cloth to be dyed in New England will be converted into uniforms, which will be worn by four companies of American soldiers in the tropics. Each company will wear uniforms colored with a different dye, affording a test of the ability of each dye to withstand army usage under trying conditions of climate.

"If sulphur dyes can be made acceptable to the war department, these dyes will do," said Dr. Matthews. "If not, the army can fall back on mineral or vat dyes. If vat dyes are too expensive, resort can be had to mineral dyes, as in England. Alizarine might be used in connection with mineral dyes, but this requires a mordant.

"The committee of the American Chemical Society has met with Quartermaster-General Ballinger and with the dyestuff manufacturers to discuss what dyes are available in this country for dyeing the new olive drab uniform. Before the war, the old olive drab uniform dyed well because the vat colors came from Germany. Vat colors are now available here. Olive drab is a modification of khaki. Sulphur during the war did not give very fast shades.

There are four ways out: First, the use of vat colors, which will do, but are expensive; second, the use of mineral colors, the objection to which is that they make the goods hard, sewing being difficult; fourth, sulphur colors, which, it is held, have been improved since the war, and possibly are now available as being fast enough for army purposes.

"It has been decided to have a trial of these dyes. About eight or nine hundred yards of material, practically a whole bake, will be dyed under the direction of this committee. When dyed, this cloth will be made up into uniforms and worn by soldiers somewhere in the tropics, possibly Panama. The committee is giving full opportunity to manufacturers to demonstrate the work of their products. There is a great difference of opinion among them, and the trial will give all the benefit of the doubt. The olive drab now being dyed will be worn by four companies of American soldiers, thus affording each color a thorough test lasting about two months.

"The dyeing will be done in Rhode Island, Massachusetts and New Hampshire mills, the government supplying the goods and the mills supplying the dyes. The committee will endeavor to establish standard laundry methods to avoid mistreatment of uniforms by soldiers. The soldiers, using bleaching powder and other devices, try to get the color out of their uniforms as soon as possible so that they will not look like rookies."

Professor Happy's Health Maxims

Arguments for changing "Drink More Milk" week into a year-around aggressive campaign will be demonstrated by the American Child Health Association in a manner which is expected to be of interest to every delegate who attends the World's Dairy Congress in Washington and Philadelphia in October. This association merging two big groups of child health conservation specialists under the leadership of Herbert Hoover, will present facts and figures to prove the benefits of such a campaign.

One of the speakers at the congress will be Miss Sally Lucas Jean, director of the health education division of the association, who was active in the first International Health Educational Conference at San Francisco—a series of meetings which brought together leading health and educational authorities of 30 countries.

Among the leading arguments to be presented by the association will be the improved physical condition of 3,000 school pupils in one Chicago junior high school, where the milk consumption increased tenfold and where the weight of the pupils showed a remarkable gain. Other findings, almost as important, will be reported from other parts of the country where "Professor Happy" and the nutritional experts of the association have introduced the "Health Game" to teach children fundamental health practices.

One of "Professor Happy's Health Maxims" is: "There is no pot of gold at the end of the rainbow. It's a pail of milk!"

Earthquakes still continue in Japan. Shocks have also been felt recently in Quebec and Persia.

No Ping-Pong Players, These Chicago Baseball Girls

As a result of their use of regulation baseball and standard equipment, instead of sticking to indoor baseball apparatus, as is usually the custom with the Babe Ruths of the fairer sex, the baseball girls of the Hawthorne Works of the Western Electric Company at Chicago have been able to overcome most of the ping-pong characteristics that usually hamper women's teams. Many of them bid fair to outshine their brothers at the game. The star of the squad is Miss Josephine Hoffman, who has clouted six homers since the season opened.

Baseball has proved so popular with the girls at the works, that the athletic management has been forced to organize more than a dozen nines to take care of all the fair sex who want to cavort about the three Hawthorne diamonds.

The Hawthorne girls are now seeking games with women's baseball teams at the other large industrial plants about Chicago. If they can get enough of the other companies interested in the possibility of adopting baseball as a sport for their women employees they intend to foster the organization of a regular Chicago industrial women's league.

TREES FOR HARDING

Washington.—There is a famous Lincoln highway, a Leo highway, and a Roosevelt highway. It is now proposed by Charles Lathrop Pack that there should be a Harding highway, to be lined with shade trees.

He points to the fact that President Harding was a lover and planter of trees, hence the appropriateness of a tree-embowered highway in his honor. It has been suggested that the Cannon Ball trail be changed to the Harding trail, for Mr. Harding was nominated in Chicago and died in California, hence his career would be measured by such a trail.

Aside from the desirability of commemorating President Harding by a great highway, the idea of having it lined with trees, as it runs from the Mississippi to the Pacific Ocean, appeals both to the esthetic and the utilitarian. The culture of forestry is one of the prime needs of America. Within a fortnight of his death President Harding had decided the Alaska dispute as to the control of its forests in favor of the conservationists, thus showing his sympathy in the protection of trees.

"Seattle allures—its fame endures"—is the slogan chosen for the Community Trophy by the judges. The prize was a bill fold, containing $300 in currency, which was given to the author—Harry M. Waitchw. All must learn this slogan, and use it generously. What boosts Seattle will boost the state.

Cure Found for Sterility

Doctors Herbert M. Evans and Katherine Bishop of the University of California announced on September 26, that they had found a new vitamin, known as Vitamin X, which may prove a cure for sterility. The vitamin was isolated by treating wheat with ether. This vitamin is also contained in the yolks of eggs and in meat—particularly in meat taken from near the lawbone. Experiments have been made on white mice. and guinea pigs, which have first appeared sterile, but have become fertile after a diet including this new vitamin. Research has been going on for 20 years in this particular experiment, which has resulted in this interesting discovery.

RIBBON TRIMS FLAPPER MODE

An evening gown of pleated chiffon achieves individuality by means of the fan shapes given to the chiffon and the rows and bows of ribbon which decorate the front of the gown from neck to hem. This frock was designed for the new flapper who puts up her hair and wears long dresses.

Washington's National Dairy Champions

1. Tillamook Daisy Butter King De Kol, Grand Champion Holstein Cow of United States. 2. Carnation Matador Adelina Segis, Junior Champion Holstein. C. Carnation Stock Farms at Carnation, Wash. 4. Get of Sire of Matador Segis Walker, famous Holstein Sire.

Washington Holsteins cover Eastern fair circuit, returning with 46 blue ribbons and 14 championships. The first show was at the Wisconsin State Fair. There were about 400 Holsteins on exhibition and all of the classes were well filled. Here Carnation won eight firsts and one championship. At this show we had first aged cow on Tillamook Daisy Butter King De Kol, first prize 3-year-old on Carnation Matador Starlight, first prize junior yearling heifer on Segis Matador Bonnell, first prize senior heifer calf on Carnation Matador Adelina Segis, first prize aged herd, first prize dairy herd, first prize get of sire, and first prize produce of dam.

From there on to the Indiana State Fair at Indianapolis. Here, in good competition, Carnation won first on aged cow, first on 3-year-old, first and second senior yearling heifers, first and second junior yearling heifer, first and second senior calf, first and second junior calf, first graded herd, first young herd, third calf herd, first produce of dam, first get of sire. One of the most interesting things at this show was the interest displayed in Tillamook Daisy Butter King De Kol because very few parties here had ever before seen a 30,000-pound cow, let alone one that had produced 32,000 pounds as a 4-year-old.

On to the Illinois State Fair at Springfield. This show, while not large in numbers, brought together probably as good quality as any show of the year, for it included the Hargrove & Arnold herd from Iowa and the Wisconsin state herd, which is an exceptionally strong herd all the way through. At this show the winnings were split up a great deal among the exhibitors, Carnation winning four firsts on aged cow, senior heifer calf, junior yearling heifer, and produce of dam. Keen interest was shown in the Holstein shown from the Pacific Coast.

From here the herd went to Trenton, N. J. Carnation won first aged cow; first 3-year-old; first junior yearling heifer, first senior heifer calf and first produce of dam. Naturally, at this show very keen interest was shown in the animals that were on exhibition from a point as distant as Seattle.

From here the herd went to the National Dairy Show, where they have just been shown and we have only advice by wire stating that this herd was the largest winner at the show, capturing four first place and both junior, senior and grand championships in the females. Tillamook Daisy Butter King De Kol was first aged cow; first junior yearling heifer; Carnation Matador Adelina Segis, senior heifer calf, was first and junior champion. Carnation also won first on produce of dam and breeder's young herd.

The conclusion gathered at Louisville, Carnation winnings here were practically the same as at Indiana.

On to the Illinois State Fair at Springfield. This show, while not large in numbers, brought together probably as good quality as any show of the year, for

WASHINGTON NAMES

Grays Harbor

Bullinch Harbor was one of the earliest names given to Grays Harbor, the body of water which indents the Washington coast, and from which one of the state's important counties was named, according to Professor Edmond S. Meany, of the University of Washington. The information is contained in the book on Washington names by Professor Meany, which is about to be published at the University.

On May 7, 1792, Captain Robert Gray, the American explorer, discovered the harbor which he called Bullinch Harbor, according to Professor Meany. This was in honor of one of the owners of Captain Gray's ship, the Columbia. In October of the same year, Vancouver, the English explorer, sent his lieutenant, Joseph Whidbey, to survey the new harbor. They called it Grays Harbor, and as their charts were published, while the American charts were not, the name prevailed. The Spaniards of that same year—Gallano and Valdez —helped to establish that name by charting it "Puerto de Gray." John Work, of the Hudson's Bay Company, called it "Chihalis Bay" in 1824. David Douglas called it "Whitbey Harbor" in 1825. Even American maps sometimes showed the name as "Whidbey Harbor."

Regarding names of cities and towns in Grays Harbor County, Professor Meany gives the following account:

Aberdeen was platted by Samuel Benn in 1884 on his homestead. Benn was born in New York City and in 1856 he came to San Francisco. Three years later he moved to Washington Territory and settled on the Chehalis River. There are two sources claimed for the name of the city. John J. Carney says it arose from the fact that the Aberdeen Packing Company of Ilwaco established a cannery in early days on the Benn homestead. Hawthorne's "His-James Stewart, who, before her marriage in 1868, was Miss Joan Bitory of Washington" declares that the name was suggested by Mrs. Kellan of Aberdeen, Scotland. She and her husband moved to Washington Territory in 1874.

Elma was named by the patriotic citizens of the place in honor of Elmer Brown, the Union soldier who was killed in the streets of Baltimore and was thought to be the first man killed in the Civil War. The first idea was to call the town "Elmer," but the spelling was changed to its present form.

Hoquiam, it is said, derives its name from the Indian word Ho-quimpts, meaning hungry for wood, so-called on account of the great amount of driftwood at the river's mouth.

The first settler of Montesano, county seat of Grays Harbor County, was Isaiah L. Scammon, who came from Maine by way of California, arriving in 1852. When the county of Chehalis, later changed to Grays Harbor, was created, April 14, 1854, the Washington Territorial Legislature located the county seat "at the house of D. K. Welden." On January 28, 1860, it was relocated "at the place of J. L. Scammons." Mrs. Lorinda Scammons, wife of the pioneer, was very religious and wished to call the place "Mount Zion." At the little frontier council Samuel James, pioneer of Mound Prairie, suggested that Montesano had a more pleasant sound and about the same meaning. The suggestion was approved, and soon afterward a post-office was secured with the same name. A few years late, S. H. Williams, son-in-law of S. S. Ford, and one of the party shipwrecked on Queen Charlotte Island, enslaved by the Haidah Indians, ransomed and rescued by other pioneers, bought 16 acres on Medcalf Prairie and recorded his plat of "Montesano." The Chehalis River and a mile and a half of swampy road lay between the two places. A townsite war resulted. The empty county seat remained at the Scammon place, but population and business flowed to the prairie town. The people of the county voted in 1886 to move the county seat and the Scammon place became known as South Montesano.

SWISS ROADS LOSE

The report of the government-owned and government-operated Swiss railways for 1922, shows a deficit of 45,515,697 Swiss francs, which is roughly $9,102,735.

The railway system today is 1,800 miles in length, has 36,000 employes and consists of five privately-built lines which were paying 6 per cent on therl preferred stick when taken over by the government in 1901, 1902 and 1903. The Gothard line was actually paying 7 per cent and the Central railroad 5 per cent. The people of Switzerland believed, however, that unified railroad control would mean more economical operation and therefore reduced passenger and freight rates and the roads were purchased by the government for 1,183,004,889 francs ($236,005,000), and the amortization period was to soxer 60 years. Only 38,000,000 francs ($7,600,000) have been amortized, however, so the period has been extended to 100 years.

Eating What You Save

Prepared by the Extension Service, State College of Washington

Onions and Corn

Onions are desirable for their mineral content, and should not be left out of the diet. They have a considerable amount of vitamine B and C. In the cooking of onions, if you don't want your neighbor to know what you are having for dinner, pare them under cold water, as this will absorb some of the odor. When cooking on the stove, place in a large quantity of water in an uncovered vessel.

Escalloped Onions

Peel and slice large onions in one-quarter slices and boil until tender. Fill baking dish with layer of onions and toasted bread crumbs; add salt, paprika and butter by tossing the toasted crumbs into melted butter. Cover with one cup of white sauce; sprinkle with buttered bread crumbs; place on grate in oven until crumbs are brown (about 15 minutes). Note: One cup of chopped corn or other meal may be added.

Stuffed Onions

Boil for 45 minutes without peeling, in salted water; drain, skin and remove center. Chop the center with an equal amount of cooked chicken (cold) and add enough grated bread crumbs to make the required quantity of stuffing. Season with salt, pepper, fill with onion, and wrap in butter paper, twisting the ends. Bake for an hour, take off the paper and serve with cream or brown sauce. Nuts may be used instead of chicken.

Green Corn Custard

Where green corn is still available this makes a splendid dish. Use 1½ tbsp. cornmeal, ¼ cup cold milk, 1 cup scalded milk, 1 tbsp. green pepper chopped fine; ½ tsp. salt, 1 tbsp. butter, 1 cup corn pulp (generous measure), canned or fresh, 1 egg well beaten.

Stir the corn meal with the cold milk and cook in hot milk (over hot water). Stir until mixture thickens, then remove from fire and add the other ingredients; mix thoroughly and turn into a baking dish set in a pan of hot water and bake in moderate oven until center is firm. Serve hot as vegetable with meat or as a main dish at luncheon.

World's News

Reports from Hungary state that wheat taken from the tomb of King Tutankhamen and planted on a farm near Buda-Pest, has harvested an excellent quality of grain.

An unexpected run of silver salmon, following the unprecedented run of humpbucks in Puget Sound, this year, will increase the fishermen's receipts $2,500,000, the Washington State Fisheries Board announced lately.

The Canadian Pacific Railway, just recently, is believed to have made a world's record for grain trains. A train of 126 carloads of wheat, one mile in length, was operated over the line from Stouglon to Arcola. The cars contained 185,000 bushels of wheat.

The British Columbia Government contributed $45,000 toward Japanese relief work. This sum will be used entirely for the purchase of lumber, thus making a gift to the Japanese Government of 1,750,000,000 feet of dimension lumber and 1,000,000 shingles.

After battling through one of the worst storms in its history, the giant liner "Leviathan" lately reached Southampton in a much battered condition. The waves at one time went over the top decks of the vessel.

The Federal Grand Jury at Valdez, Alaska, in a report made recently, declared that a large quantity of narcotics is smuggled to employes of the salmon canning industry on Bristol Bay, Southwestern Alaska. Chinese foremen and bosses handle narcotics, the report charges.

Mrs. Clare Louise Carter, of Farnham, England, was found dead beside a discharged shotgun at her home. She lost two sons, of high rank, one a colonel, the other a torpedo-boat commander, during the war, and she had never recovered from grief.

Exports from the Hawaiian Islands to the United States, for the fiscal year ending June, 1923, amounted to $96,159,742, as compared with $68,335,073 during the preceding 12 months; while imports from the United States to Hawaii amounted to 60,795,799, against $51,681,621 during the same period last year. Building throughout the territory during the first six months of the present year almost doubled that of any previous six months' period in the history of the country.

Thousands of girls in Germany, who have been thrown out of work by the closing of factories, shops and stores, are now wishing to return to domestic service, from which centers they have been ignoring ever since the war. Now they are willing to work as cooks or housemaids for about one dollar's worth of marks a month.

The Canadian Province of Ontario commenced developing its hydro-electric power under public ownership a few years ago, with a 10,000-horsepower plant, at a rate of 12 cents per kilowatt hour. Economic management and low rates have increased business to such an extent that a new plant, increasing the capacity to 1,000,000 horsepower, is now being built, and the rate charged is 3 cents per kilowatt hour.

A wonderful tenor voice has been discovered in New York, in the East Side tenement district, belonging to Mike Angelo Raginni, 29. For years his beautiful voice has delighted the neighborhood. He has sailed for Italy, being financed by his neighbors, who have formed a stock company, selling shares in it for $25 each. This will afford Raginni a year's expenses in a Roman finishing school, where it is hoped he will develop a voice that will equal if not excel that of the immortal Caruso.

Princess Anastasia of Greece, wife of Prince Christopher of Greece, is dead. Before marrying the Prince, Princess Anastasia was the widow of the "Tin Plate King," William B. Leeds. She died in London and was buried in New York. Her estate of thirty millions of dollars has been divided among her relatives. Minor bequests were made to her son, William B. Leeds, and his wife, Princess Xenia of Russia, and to a niece, Nancy Stuart Greene; the residue of the estate was left in trust, the income to be equally divided between Margaret Stuart Greene, of Montclair, N. J., a sister, and Prince Christopher, at whose death the fortune will revert to Princess Anastasia's relatives in America.

The Oregon and Idaho Dairy Loan Company, with a capital stock of $500,000, has been formed in Portland. The officers are: Ex-Congressman C. N. McArthur, of Oregon; A. L. Gile, Guernsey breeder, Chinook, Wash.; Dr. W. T. Phy, Holstein breeder, Hot Lake, Ore., and Claude McCulloch, Portland. The purpose of the new company is to loan money and discount dairy livestock paper through the Federal intermediate credit system.

CHURCH SERVICES

SEVENTH DAY ADVENTIST CHURCH
AVERY ROGERS, S. S. Supt.
Mrs. B. B. CALDWELL, M. V. leader

Sabbath school at 10 o'clock Saturday morning.

Young people's M. V. at 12 o'clock Saturday.

LUTHERAN CHURCH
A. F. WOLFF, Pastor.

English services will be held each Sunday morning at 10:30 o'clock, with the exception of the first Sunday of each month, when German services will be held at the usual hour. Sunday school at 9:30 a. m.

FEDERATED CHURCHES

Church school at 9:45 a. m.
Church meeting at 11 o'clock.

Set your mark high in the world and then climb up to it. It won't come down.

Yes, we have no real dance Hallowe'en, but we will have a card party in the American Legion hall. 1

How Better Than Pills

The question has been asked—In what way are Chamberlain's Tablets superior to the ordinary cathartic and liver pills? Our answer is, they are easier and more pleasant to take and their effect is so gentle that one hardly realizes that it is produced by a medicine. Then, they not only move the bowels but improve the appetite and strengthen the digestion. For sale at Clark's Drug Store.

RUBBER GOODS

Water bottles, fresh stock—guaranteed. Something you don't get from the mail-order houses.

DENNISON'S CREPE AND SHELF PAPER

My prices are right. I have spent the past five Sundays in as many neighboring towns, comparing prices, so you will not have to tell me the prices—for I know them.

Patronize your home merchant—if you can do as well. Who helps pay the taxes to keep the high school going, and good roads? "We do not miss the water until the well goes dry." The high school is an asset to all—not a liability.

GRANT CLARK

Blue Bird Club Meets

On Tuesday, October 2, the ladies of the Blue Bird club met at the home of Mrs. Arthur Hampton. The afternoon was spent in making plans for the coming year. Refreshments were served by Mrs. Loren Bumpass and Mrs. Cecil Bumpass.

On Tuesday, October 16, the club met at the home of Mrs. Sam Lange. After the business meeting the following program was given:

Song—Ladies quartet.
Reading— Mrs. Wm. Borgan.
Monologue—Mrs. Arthur Hove.
Piano solo— Miss Nora Hanson.
Reading— Mrs. John Lindrud.
Reading—Mrs. Henry Hanson.
Recitation—Mrs. Charles Odeborg.

After the program, refreshments were served by the hostess.

The next meeting of the club will be with Mrs. Jesse Borgan on October 30.

Must Dim Lights

Just a little warning to Genesee motorists who visit Lewston, it might be a good idea for them to know that an edict has been posted that all auto lights must be dimmed and that glaring lights will lead to arrest. The Tribune says that diffused lenses be employed or that dimmers be used. If you would be on the safe side it might be well to remember this fact.

Apron Party a Success

The apron party given by the ladies aid of the Federated churches last Friday evening proved a social success. A large crowd was in attendance and a large sum of money was realized. The ladies did much to make it a success and their work was duly appreciated.

Linger Longers to Meet

The Linger Longers will meet at the home of Mrs. Jim Magee on Wednesday, October 24.

Hallowe'en Fair

The Ghosts invite the general public to a Hallowe'en fair, to be given at the Aurora school house, Distri t No. 15, on October 26. Supper will be served and a short program given. Also fortune telling and a number of Hallowe'en features. 19-2

Notice

Dr. S. A. Roe, eye, ear, nose and throat specialist of Lewiston, Idaho, desires to announce that he has removed his office from the New Idaho Trust Bldg., over Beach's Store, to the new Breier Bldg., Rooms 315-317, where he will continue his practice as before. 16-2

If Interested In French

Mrs. Wm. Hordemann would like to have an evening circle of students for French conversation only or for Grammar and conversation.

Short Undertaking Company

Parlors at Genesee and Moscow. Prompt attention given night or day calls. Embalming and auto equipment furnished all funerals without extra charge. Full line of caskets at both places. At Genesee call George Schlerth at the Genesee Hotel.

PERSONAL MENTION

A. Springer left Friday morning for Spokane for a short stay.

Mrs. A. Binker left Monday morning for her home in Spokane.

Mrs. Ben Mochel left Tuesday morning for Spokane for a visit with relatives.

Mr. and Mrs. W. W. Burr and Mrs. G. E. Sampson spent Thursday in Lewiston.

Mr. and Mrs. W. A. Nixon and daughter were Genesee visitors on Saturday.

Miss Esther Clark returned to Colton Monday after the week-end with home folks.

Mrs. Ray Edwards left Monday for Moscow where she went to attend the Rebekah grand lodge.

Miss Nellie Fitzgerald arrived Saturday from Portland for a visit at the Thomas Dwyer home.

Stewart Savage returned to his home in Pullman Tuesday, after a visit at the Dr. Ehlen home.

Miss Helen Fruth returned to Colton to resume her school duties after a visit at the John Freidericks home.

Mr. and Mrs. C. H. Jackson came up from Lewiston and visited with friends in Genesee Tuesday and Wednesday.

Mrs. Geo. Gannon and little son, Don, arrived Saturday for a visit with Mrs. Gannon's parents, Mr. and Mrs. F. K. Bressler.

Mrs. Cresswell of Emmett, Idaho, and daughter, Miss Viola, and Walter Casebolt were entertained at the Casebolt home Wednesday evening.

Mr. and Mrs. M. Gunderson arrived Saturday from Mt. Vernon, Wash., for a visit with their nieces, Mrs. Nels Lande, and Mrs. Jas. Nelson.

Miss Ruth Martinson attended Rebekah grand lodge at Moscow, Monday Tuesday and Wednesday, she having been a delegate of the local Rebekah lodge.

Mrs. Dave Spurbeck left Saturday morning for Bremerton, Wash., where she will visit until Mr. Spurbeck arrives. They intend to reside there.

Mr. and Mrs. Edwin Smolt and family arrived from Lewiston Sunday and spent the day with Mr. Smolt's parents, Mr. and Mrs. Wm. Smolt.

Mrs. L. C. Rogers returned Tuesday evening from Lewiston, where she had been with her daughter, Bernice, who underwent an operation for appendicitis.

Verne Beckman came over from Moscow Monday evening to take charge of the W. W. P. office, which he will have charge of after Jack Barnes leaves.

Mr. and Mrs. John Vandenburg returned Tuesday from Seattle where they visited their sons, Harry and Jack. Dick accompanied them from Spokane for a short visit with his parents.

Mr. and Mrs. Henry Broenneke left last Thursday evening for Moscow for a short visit with Mrs. Broenneke's mother, Mrs. V. Hasfurther, before going to Los Angeles, where they expect to make their home.

Will Hold Bazaar

The ladies aid of the Federated church will hold a bazaar on Friday, November 2. Watch for particulars.

Income Property for Farm

Will trade a beautiful 3-story brick apartment house in Spokane, near business section, very modern, some apartments having fireplaces, monthly income about $400, mortgage $10,000; wants Palouse farm; will not assume more than $10,000. J. W. Wolfe, (Real Estate & Loans.) 301 Breier Bldg., Lewiston, Idaho. 16-1

Will Give Card Party

The Genesee Women's Auxiliary to the American Legion invites the general public to a Hallowe'en card party, to be given in the Legion hall, Wednesday evening, October 31. Admission, 25 cents. 16-1

Law Office Moved

Attorney Thomas A. Feeney, has removed his office to the Smolt building, four doors east of the post office. 14-4

The young fellow who marries a poor girl is fortunate. She will help him get along in the world.

By making your selection now you will be assured of getting just the kind you want.

IN ADDITION TO THE REASONABLE PRICES QUOTED, WE GIVE A DISCOUNT OF FIVE PER CENT FOR CASH

Follett Bros. Mercantile Co.

WOULD CUT RATES BY RAIL ECONOMY

NEW YORK.—"Direct savings in excess of $92,000,000, equivalent to a general freight reduction of 2.3%, could have been effected during the past year if the railroads had pooled their freight equipment in meeting transportation needs," declared N. D. Ballantine, formerly superintendent of transportation of the Union Pacific Railroad, and of American military railroads in France, in an address before the Traffic Club here.

The statement regarding the savings possible by means of car pooling, said Mr. Ballantine, was based upon the figures issued by the railroads themselves. These railroad figures were used by Mr. Ballantine in supporting his plea for the adoption of a national plan for the pooling of freight equipment. Such a program, he said, was the only way of efficiently and economically meeting the unprecedented traffic demands now being made upon the carriers.

Voluntary cooperative attempts to effect economies had failed, Mr. Ballantine continued. He pointed out that the constant unpenalized violation of car service rules, together with the losses due to excessive hauling of empty cars, with the inability of the roads to maintain proper standards of repair on freight equipment, had brought about a condition of "demoralization" with no prospect of genuine relief in the immediate future. During the first five months of 1923, Mr. Ballantine showed, cost of empty car haulage reached a million dollars daily.

"The greatest need at the present time," declared Mr. Ballantine, "is for a coordinating agency in possession of information to determine what class or amount of equipment is really necessary to best serve the interests of the country as a whole.

"Each road now has only its own needs in mind, and proceeds to meet its own requirements regardless of the general net effect, while some weaker but no less vital link in the national transportation machine, unable to thus look out for itself, blocks and delays traffic for a whole group of other carriers.

"During the past seven years American railroads have added to their investment in road and equipment more than $4,000,000,000, or an increase of 22 per cent, spent on the basis of individual and not collective requirements. Yet the traffic requirements of that period, expressed in loaded car miles, are still below the peak year of 1916.

ROOFS OF COPPER TO REPLACE TILE IN REBUILDING RUINED JAPANESE CITIES

APPARENTLY America is to have a most important part in the rebuilding of the devastated Japanese cities. American engineering skill is being sought, to make the reconstruction work both modern and permanent. Already sources understood to represent the Japanese government have made inquiries of the Copper and Brass Research Association as to the best sort of construction, particularly as applied to roofs, that will make the new cities fireproof and as near as possible earthquake proof.

Except for the present modern buildings in Tokio and Yokohama, all the Japanese houses are roofed entirely with large, hand-made clay tiles. These make a heavy roof which, in time of earthquake, supported on light walls, collapses causing heavy casualties in the houses and also outside when the tiles cascade into the streets. The weight of the Japanese tile roofs has been the cause of the loss of thousands of lives during the recent quake.

It is understood that the Japanese government has already issued an order forbidding the use of heavy roofing material and is trying to get the best fireproof, quake proof, light roofing there is. It is with this in mind that their experts have had their attention drawn to the possibilities of copper roofing because of its light weight and resistance to fire, their investigations showing the further advantages of pleasing appearance, high salvage rate and indestructibility.

Japan needs roofing in large quantities and copper which is light is finding an added argument with the experts because of the high trans-Pacific freight rates.

Tokio, like many other Japanese cities, stands on an alluvial plain with a soft, muddy bottom. The hard pan is from 50 to 60 feet down. Originally a nation of floor-living people, the Japanese have been in a few years hurled into civilization that demands big office structures and permanent buildings of all kinds. Wood, bamboo and paper are being abandoned as building materials. The present catastrophe has convinced them that the weighty tile, although a perfect protection against weather, must give place to something else that has fireresisting qualities, is permanent and also is light.

Experiments made recently showed that shingle tile weighs from 1200 to 1800 lbs. per 100 sq. feet, while copper weighs only from 84 to 100 lbs. So the tile now used in Japan weighs from 12 to 18 times as much as copper. It also necessitates on big buildings that much stronger and heavier walls which are a costly problem on a soil where all real weight must be supported upon wooden spiles.

Another thing that has turned all eyes toward American engineering methods is the fact that the American-built structures best withstood the recent quake. The Imperial Hotel at Tokio, which did not collapse, although right in the heart of the devastation, is American-built and has a copper roof, as have many other buildings there that have been erected after the best American engineering practice.

Idaho News

On the market just now at Twin Falls is the second crop of strawberries. They come from Blue Lakes and are not in the least damaged by the recent frost.

"There are only 29 miles out of 455 miles between Boise and Spokane that are not of highway dimensions and conditions," says Otto M. Jones, secretary of the Idaho State Automobile Association.

The Boy Scout patron leaders of Boise, at the close of their third annual conference, had a grand supper at the Owyhee Jungle. Several good speakers made the supper "a feast of reason and a flow of soul," so that everyone thoroughly enjoyed the evening.

On October 13 and 14 at the Boise Barracks will be held the fall Gymkhana and Horse Show. Horse sports and games of polo will be held each afternoon. There will also be running races, jumping contests, relay races, mounted wrestling contests and many other features.

At a meeting in Boise recently of the board of directors of the Idaho Anti-Tuberculosis Association, C. A. Barton was re-elected president. The board discussed the future conduct of the association and outlined a tentative plan of campaign toward continuing the work for the eradication of tuberculosis.

Walter W. Skuse, agricultural agent of Nezperce County, has sent in his resignation to the clerk of the board of county commissioners after a service of more than seven years. Mr. Skuse's resignation is to take effect on January 1; he wishes to engage in the business of farm implements, under the name of Skuse Moline Company.

Men from 16 states have been enrolled in the Idaho University School of Forestry during the last week. Many come from the Eastern Coast states, as well as from the Southern States and Washington, D. C. The school has exceptional advantages for training foresters and lumbermen, as it is within a short distance of heavy forests and large lumber camps.

Lettuce harvesting has begun in earnest. There were grave doubts a short time ago as to the development of the plants, owing to the prolonged dry weather; but gentle rains of last week came just in time to save the situation, although the early plantings have run into a seed condition, causing much loss—about 25 to 30 per cent of the crop.

In the honor roll issued by the Holstein-Friesian Association of America, of breeders that have distinguished themselves as owners of high producing cows of this breed, made in tests during the past year, Idaho ranks twenty-seventh among 39 states and provinces. This is a creditable rating for a state that is just getting fairly started in dairy cattle breeding.

Sixtieth Plan for Peace

Edward Bok's peace prize, whereby the American public presents the best practicable scheme for America's participation in world peace will receive a $100,000 prize, is the sixtieth proposal of its kind to be brought forward in 617 years.

Dante, Erasmus, Benjamin Franklin, William Penn, Grant—these are just a few of the great historical figures who have pleaded for peace.

Franklin, by suggesting "a compact of nations," sowed the seed of the present League of Nations idea. But as far back as the fourteenth century an effort to obtain "the harmony of Kingdoms" was made.

The 60 plans include only what students of international affairs consider serious and well-thought-out schemes for peace. According to one writer, the world was never in a more receptive mood for the peace idea; this, he says, accounts for the universally favorable reception of the great Bok award.

GAS BUSINESS GROWS

The manufactured gas utilities of the country are not only selling the greatest volume of gas in their history but sales of gas-burning appliances are showing corresponding increases.

According to reports filed with the American Gas Association, more than $40,000,000 worth of appliances will be sold to the public in 1923 by gas companies alone, exclusive of sales made by dealers who do not report to the association. This means that for the 9,200,000 meters in service, more than four dollars per meter will be spent this year in gas company salesrooms for ranges, water heaters and other appliances.
