VOL. XXXVII

GENESEE, LATAH COUNTY, IDAHO, FRIDAY, JANUARY 1, 1925

NO. 27

## HAPPY NEW YEAR

### HOW AND WHERE GENESEE PEOPLE SPENT CHRISTMAS

If you didn't enjoy yourself on Christmas Day in this section of the country, it is very evident that your neighbors did, as indicated below:

Mr. and Mrs. Walter Jain had as guests on Christmas Day Mr. and Mrs. James Magee and family, Mr. and Mrs. Ben Jain and family, Mr. and Mrs. Lou Jain, Mr. and Mrs. Clarence Jain of Moscow, Don and Grace Jain, and Miss Mary Lanphear.

Mr. and Mrs. T. H. Herman and family, Mrs. Hattie Herman and Miss Floy Hummel of Spokane had Christmas dinner at the W. M. Herman home.

Mr. and Mrs. Geo. Follett entertained Mr. and Mrs. Leon Follett and Jack Barnes, Jr., of Wilbur, Mr. and Mrs. Mahlon Folett and Dorothy, and Mrs. Klapp of Spokane.

Mr. and Mrs. Fred Perkins entertained Billie Mannering and Mr. and Mrs. Ralph Sullivan and Emma Lou of Moscow.

Mr. and Mrs. Vern Beckman had as guests Mr. and Mrs. Fred Dicus and Fred, and Mr. and Mrs. Winegardner and Alice of Lewiston.

Mr. and Mrs. Chas. Herman had as guests Mr. and Mrs. Raymond Trautman.

Mr. and Mrs. Otto Stucker entertained Mr. and Mrs. Sam Stucker and Clarence Hoffman.

Mr. and Mrs. Geo. Baumgartner entertained Mr. and Mrs. Geo. Baumgartner and family on Christmas Day.

Mr. and Mrs. Chester Mochel and family of Palouse were guests of Mr. and Mrs. B. F. Mochel on Christmas Day.

Mr. and Mrs. Paul Cann entertained Mr. and Mrs. Carl Osmundson and family, Fred Cann and Alfred Pierce of Moscow and Ora Roderick of Helmer.

Mr. and Mrs. August Johnson entertained Mr. and Mrs. A. S. Hillman and family of Potlatch, Mr. and Mrs. J. A. Hunchbach, and Mr. and Mrs. T. F. Kimberling and family of Moscow, Mr. and Mrs. Albert Peterson and son, Lenus Peterson and Frank Driscoll.

Mr. and Mrs. Dick Green and family, Mr. and Mrs. James Qualey and family and Raymond Peterson of Spokane spent Christmas at the Frank Qualey home.

Mr. and Mrs. Joe Hasfurther entertained Mr. and Mrs. Clifford Olson and son, Mr. and Mrs. Dale Lanphier and daughter, Miss Gertrude Sampson and Jack Hasfurther of Spokane.

Mr. and Mrs. Thomas Dwyer had as guests on Christmas Day, Mr. and Mrs. Joe Schleuter and Misses Johanna and Kathryn Dwyer.

Mr. and Mrs. Eli Thyfault entertained Mr. and Mrs. Arthur O'Connor and son of Moscow, Mr. and Mrs. Jim Looper of Lewiston, Albert Konen and P. J. Konen.

Mr. and Mrs. John Vandenburg entertained Miss Lillian Hardman, Jack Vandenburg of Orofino, Mrs. Emery Vandenburg and P. C. McCreary.

Mr. and Mrs. Roy Evans, Mr. and Mrs. J. J. Tupker and son Eugene, spent Christmas Day at the Frank Hoorman home.

Mr. and Mrs. Edgar Evans entertained Mr. and Mrs. Henry Halverson and A. W. Beachler.

Mr. and Mrs. John Loraug and daughters, Misses Viola and Martha of Spokane, Mr. and Mrs. Ray Kennedy and Donald of Moscow, spent Christmas Day at the C. P. Whalen home.

Mr. and Mrs. Martin Liberg entertained Mr. and Mrs. Lars Liberg and Miss Bonnie Oliver of Clarkston on Christmas Day.

Mr. and Mrs. Joe Grieser had as guests Mr. and Mrs. Wm. Mosman and family.

Mr. and Mrs. Carl Erikson entertained Mr. and Mrs. Ed Erikson and family and Harold Hallman.

Mr. and Mrs. Oscar Nordby and family, Mr. and Mrs. R. E. Nordby and family, Mrs. Lilly Larson and family, spent Christmas Day at the J. E. Nordby home in Moscow.

Mr. and Mrs. Ray Edwards entertained Mr. and Mrs. Nate Edwards and son, Hartzel, of Lewiston, Mrs.

Eliza Gray, Lucille and Jesse Gray of Moscow.

Mr. and Mrs. Herman Brommeling, Mr. and Mrs. Frank Brommeling and family, Mrs. Rose Hansman and daughter of Canada and Miss Mamie Krier were guests at the John Krier home Christmas Day.

Mr. and Mrs. F. S. Casebolt had as guests Mr. Russell, Dr. Leavitt, Guy Wicks, Victor Casebolt of Wilbur and Helen and Wilma of Moscow.

Rev. and Mrs. N. E. Beach and Clifford Lundt spent Christmas Day at the Harry Beach home.

Mr. and Mrs. Ben Pleiman entertained Mr. and Mrs. Geo. Carbuhn of Lewiston and Marvin Hickman.

Mr. and Mrs. Hampton entertained Mr. and Mrs. Floyd Pinkerton and children of Athena, Ore., Mr. and Mrs. Oliver Woodley and family, Mr. and Mrs. Sumner Stucker and son, Miss Adda Mathews, Butler Mathews and Miss Alfrida Hampton.

Mr. and Mrs. P. A. Parks entertained Harvey Perks and Theodore Parks of Spokane.

Mr. and Mrs. Art Hove entertained Mr. and Mrs. W. O. Borgen and daughter, Nels Flamoe and family and Mrs. Henry Hanson and daughter, Alice.

Mr. and Mrs. Sam Lange entertained Mr. and Mrs. Arthur Tegland and family, Mr. and Mrs. Arnold Olson and family, Mr. and Mrs. Herman Isaksen, and family.

Mr. and Mrs. Nels Lande spent Christmas Day at the C. Gordon home in Clarkston and spent the rest of the week with Mr. and Mrs. Martin Schei.

Mr. and Mrs. Chas. Geltz and family spent Christmas Day with Mr. and Mrs. Harry Edwards in Lewiston, Mrs. Geltz and Verna remaining over until Tuesday.

Mr. and Mrs. Glenn Sampson entertained Mr. and Mrs. F. C. Shork and Miss Bernadine Hasfurther, and Mr. and Mrs. W. M. Herman in the evening.

Mrs. Nell Haymond and daughters, Mary and Elizabeth, Mr. and Mrs. Harold Haymond, Mr. and Mrs. Art Linehan and family, Mr. and Mrs. Hary Condell and family of Moscow, and Will and Jack Cunningham were guests at the Mary Cunningham home Christmas Day.

Mr. and Mrs. Ira Hanson entertained Mr. and Mrs. Fay Dickie of Colfax, J. C. Hanson, and Alonzo Grief.

Mr. and Mrs. Chas. Grieser entertained Mr. and Mrs. Carl Grieser and family, Mr. and Mrs. Theodore Johann, and family, and Mr. and Mrs. Lloyd Ried, of Kamiah.

Mr. and Mrs. Al Mayer had as guests Mr. and Mrs. Marion Mayer of Kellogg and Orland Mayer of Potlatch.

Mr. and Mrs. John G. Meyer, Paul Stinson, Rev. and Mrs. Wolff and daughters, Verona and Ruth, Mrs. C. H. Meyer, and Knute Uhr spent Christmas day at the John Meyer home.

Mr. and Mrs. Einer Johnson and family, Mr. and Mrs. Jesse Borgan and family and Lars Johnson spent Christmas Day at the Andrew Erickson home in Moscow.

Mr. and Mrs. Wm. Schleuter entertained Mr. and Mrs. Henry Morscheck and son, Junior, Mr. and Mrs. Antone Kambitch and family and Mr. and Mrs. Albert Carbuhn and W. H. Payne.

Mr. and Mrs. Wm. Emerson had as guests on Christmas Day Mr. and Mrs. Jesse Bowers, Mr. Bowers' mother of Palouse and Frank Snelling.

Mr. and Mrs. Carl Flomer entertained Mr. and Mrs. Henry Flomer and family.

Mr. and Mrs. Frank Girard, Mrs. F. K. Bressler, G. N. Hollister, and D. L. Bressler spent Christmas Day at the Geo. Gannon home in Pullman.

**Smallest Known Bird**  
A humming bird found in Central American is said to be the smallest known bird. It is not much larger than a blue-bottle fly.

Some men are always kind to their wives. It's the safest way.

### YOUNG FARMERS CONFERENCE, SPOKANE, JAN. 29-30

R. E. Nordby has again been named a member of the executive committee which is sponsoring the third annual young farmers' convention to be held in Spokane on January 29 and 30. Other Idaho representatives on this committee are County Agent R. N. Irving, Coeur d'Alene, and W. H. Wicks, Sandpoint. Twenty-seven other prominent young men from all districts of the Inland Empire comprise this committee.

The purpose of the young farmers' convention is to encourage a group analysis of mutual farm problems. At previous conferences it has been demonstrated that the composite knowledge of attendants is sufficient to answer nearly every question that comes up. There are no set speeches at the convention and no advance program.

A list of subjects for consideration is made by the farmers themselves, at the beginning of the conference. This year, the committee has recommended an opening general meeting on the morning of January 29, followed by regional sections for the discussion of peculiar local problems. A wheat section and cut-over section will be of particular interest to Idaho farmers.

On the night of January 29, the annual young farmers' banquet will be held, followed in the morning by sectional meetings. A final general meeting will terminate the conference, when important topics will be summarized. Farmers of all ages are invited to attend the convention and participate in all its activities. There are no charges other than those personally incurred for the trip to Spokane and the banquet ticket. Farm women are particularly invited and a special conference will be held for them providing there is enough interest.

The Idaho Farmer and the Washington Farmer, which originated the young farmers' convention idea, is acting as sponsoring and publicity agent, with the assistance of the directing committee. The managing editor of these publications is this week sending out the following personal inquiry to Latah county farmers:

"What are the three or four most important farm problems now facing you on your own farm?"

Answers are being mailed to the office of the Idaho Farmer, Review building, Spokane, where they will be compiled for study at the coming conference.

Mr. Nordby was influential in taking a good Latah county delegation to Spokane last year and this year is endeavoring to increase the number of attendants.

Advertisers appreciate your trade.

### MRS. JOHN ALBER DIES SUD- DENLY FROM HEART FAILURE

The many friends and neighbors of Mrs. John Alber were shocked almost beyond belief Tuesday morning when the news was passed around that she had passed away early Tuesday morning, the immediate cause of death being heart failure.

Mrs. Alber had been in her usual health and had been down town as late as 6 o'clock Monday evening; had gone home, and partook of a hearty supper and had retired about 10 o'clock and nothing was known of her illness until early morning when it was discovered that she was not well, and within a few minutes she had passed away, death occurring about 1:30 Tuesday morning.

Elizabeth Herrington was born August 25, 1873, at Kinmare, County Kerry, Ireland, making her 50 years, four months and five days of age at the time of her passing.

Deceased came to this country with her parents when 10 years of age, the family settling at Manchester, New Hampshire. She came west in 1900, and on February 3, 1901, was married to John Alber at Lewiston. They came to Genesee and settled, where they have since resided. Mr. Alber being employed as a farm hand during that time.

To this union three daughters were born: Susan, Florence and Edna, who, with the bereaved husband, survive. She also leaves two brothers, Philip and Tim Herrington, who reside at Manchester, N. H.

Mrs. Alber was a faithful member of the Catholic church and abided by its teachings. She had many friends who will be grieved at her passing.

The funeral was held from the Catholic church Wednesday morning, high mass being said at 9 o'clock, with burial in the Catholic cemetery.

The pallbearers were John Weber, Jas. Montague, John Friederichs, Andrew Hasfurther, John Cunningham and John Broemmeling.

We wish to extend our sincere thanks to the many kind friends and neighbors who so willingly aided us in our late bereavement.

John Alber and Daughters.

### Flowers in Bloom

Word comes from Asotin, Grangeville, Moscow and other points to the effect that flowers of various kinds are still in bloom and very nice bouquets have been picked from the yards of private homes.

Well, these boasted "warm climate" towns have nothing on Genesee for there are still many flowers in full bloom—pansies, calendulas, snapdragons, etc.—and we don't claim to be in the Banana Belt either—nor are we going to allow California to swipe all the glory of having flowers in the winter time.

### A Green Christmas

Genesee had to celebrate Christmas this year without snow, the weather being balmy and one could go around comfortably without a top-coat, the grass is still quite green in places and, taken all in all, it was more like a very pleasant Easter day than Christmas.

A few inches of snow had fallen a few days before Christmas and everyone seemed to be happy in the fact that we were going to have a white Christmas, but old Sol got busy and spoiled the whole thing and Santa had to come in a Ford.

This has been the mildest winter, to date, that has been experienced here for many years, the low point of mercury having been 27 degrees above zero on the hill, and a little lower on the flats.

While we may have that "long, cold, hard winter," but if we do, it will have to be on the other end of the proper time. Of course, if we should happen to have those three winters all together, it will make it rather long.

The mild weather has been conducive to much fog thus far this fall and winter season and on Sunday it was almost impossible to see across the streets so dense was the fog, making car driving uncertain and dangerous as it was impossible to see during the day for any distance ahead, and still worse at night. Some two or three cars have been ditched, but no damage has been reported.

### Forgot to Bring His "Heavies"

A news dispatch from New York says that an Eskimo's illusions as to the idealness of New York as a winter resort was badly shattered the other day.

"Eet is cold," was the first comment today of Robert Mayokowk of Alaska and points north upon his arrival. He shivered and remarked regretfully that he had left his Eskimo equivalent for heavy underwear in Alaska under misrepresentations.

Mayokowk had agreed to chaperon a herd of reindeer to the United States with his friend, Barry Keown, an Alaskan miner, but nothing had been said about bringing the other requisites of comfortable Eskimo life.

Tomorrow, if it isn't too cold, he plans to see two things he has wanted to see all his life—battleships and camels.

### Going to Try and "Sell Idaho"

A movement is on foot to "sell Idaho to Idahoans." That is fine, but here is hoping that it will not pan out like the scheme of one Rev. F. W. Fisher of Boise, who visited this and other sections of Idaho during 1921 and promoted what he called the "Idaho Development Association," selling certificates at \$10.00 per, for the purpose of selling Idaho to the world, he said. There are now quite a few of those same certificates held in Genesee and other points in Idaho that could be bought for considerably below the stated face value.

Idaho has many scenic wonders and should be well advertised, but the plan must be started upon a firm basis and handled by men who are interested in the state and are not seeking personal advertising.

### Some Outside Weather

Newspaper dispatches of Monday carried headlines that said:

Freeze to death in New York. Freeze kills twelve in icy Chicago. Shiver in south.

From 5 to 27 below zero reported in many New England towns.

Five below at Boston. Frost King rules in Michigan. Frigid at Washington.

Cold fatal in Wisconsin. Zero at St. Paul. Ten below in Montana towns.

Twenty-four below in Canada. Frozen tight in Iowa.

And—27 above at Genesee.

The man who depends upon excuses stamps himself as one.

### PEOPLE OF U. S. TO HAVE HARD TIME FOR FEW YEARS

According to an article published in the Moscow Star-Mirror, this section is to be hard hit during the next three years, according to Virgil R. D. Kirkham of the U. of I. and weather prophet.

The Star-Mirror had it that we were to have three years of winter, "without a ray of sunshine." Prof. Kirkham says they misquoted him; that it may not be quite as bad as that, but that things pointed to the fact that we might have three winters without any growing season in between. Of course that isn't quite so bad.

Prof. Kirkham says: "It has been observed and is definitely known that the quantity of heat coming from the sun varies from four to five percent in a year's time and that these variations coincide with the occurrence of 'sun spots'. There are cycles of sun spots, and once in every 286 years they seem to come to a point where all the depressions in the cycle come together and we get a double or a triple result. This is the time when we get the cold weather."

It is pointed out that "In the Scandinavian 'saga' there are traces of the three winters with no trace of summer in between, when the entire race was nearly wiped out; there have been records of such recurrences in the continent, and numerous legends of plagues. All these occurred in periods of 286 years—and the next period is due beginning 1926 and 1927, when the northern and southern latitudes of the world may not see the summer for three years."

And on Sunday the "Scandal section" of the Spokesman-Review contained a long-winded article by the Rev. A. W. Brooks, B. D., vicar of the Epiphany guild of America, and says that terrible things are going to happen to nearly everybody in the world and he tells what the stars say is going to happen to those who were unfortunate enough to be born under a certain star—and since there are a great many stars, its going to keep one busy dodging.

The learned reverend gentlemen says "The year 1926 will be a period that will severely try the souls of men. It will begin an era lasting through 1932, which will go down in history as that significant period spoken of in the Bible as the time when 'every man's hand will be against his neighbor.' It will be marked by catastrophes caused by the forces of nature."

And then along comes another guy and says that the second coming of Christ is due during the holidays.

If the spirit of the devine world teacher which theosophists believe occupied the body of Jesus Christ nearly 2000 years ago, manifests itself again during the holiday season, as has been predicted, in the body of Krishna Murti, a 28-year-old school teacher, members of the Order of the Star in the East are determined not to become excited or hysterical.

Members of the order, of whom there are several thousand in California, are tense with suppressed excitement over the expected development. They believe that the word that Christ's spirit has returned will be the most momentous announcement of recent centuries.

Many dates have been set for this momentous event for the past several years, but as yet all the prognosticators have missed the date.

But, laying all jokes aside, don't you think this good old world of ours is going to be in a heck of a fix if all these things happen at the same time?

They say that a prophet is not without honor except in his own country—or something like that. Believe it or not.

### Entertained Rebekahs

The members of the Rebekah lodge were very pleasantly entertained at dinner on Tuesday by Mrs. Fred Perkins at her country home.

Since half a lie is as bad as a whole one, why tell either?

ENTERED AT THE POST OFFICE AT GENESSEE AS

CHURCH NOTICES

St. John's Lutheran Church  
Rev. A. F. Wolff, Pastor  
Sunday school at 9:30 a. m.  
English services will be held each  
Sunday morning at 10:30 o'clock,  
with the exception of the first Sun-  
day of each month, when German ser-  
vices will be held at the usual hour.

Congregational Church  
Paul W. Sprague, Preacher  
Mrs. W. M. Herman, organist.  
W. E. English, choir director.  
Sunday school, 9:45 a. m. Mrs. Ar-  
thur Hampton, superintendent.  
Morning worship, 11 o'clock.  
Young People's meeting, 7 p. m.

Christian Church  
Bible school at 9:45 a. m.  
Preaching services at 11 a. m.  
Meetings under Evangelist Jacobs' di-  
rection. Theme, "The Supremacy of  
the Unseen."  
Evening services at 7:30. Subject,  
"The Four Greatest Fools in Gene-  
see."  
Special songs and Bible studies.  
Baptismal services may be arrang-  
ed for any hour by applying to the  
pastor.

Genesee Valley Lutheran Church  
Rev. Carl A. Peterson, Pastor  
Sunday, January 3. Young People's  
Luther League at 7:30.

Hotel Changes Hands Again  
The local hotel has again passed  
into new hands, W. G. Ericson, who  
has owned that hotel for the past  
year, having on Saturday last traded  
the property to Jesse C. Campbell of  
Spokane for Spokane property of  
about the same size as the local ho-  
tel building, the property acquired by  
Mr. Ericson having two store build-  
ings below and four four-room apart-  
ments above, located on Sherman  
street, within the mile circle.

Christmas at the Christian Church  
The Christmas program at the  
Christian church was greatly appre-  
ciated by the large audience. The  
Bible school extended a vote of thanks  
to the committees on decoration and  
program.

The children were trained by Mrs.  
Harvey Beach and Miss Genevieve  
Hampton and no pause or mistake  
was noticeable.  
The part taken by Santa Claus was  
enjoyed by all, but who it will  
never be known. Suffice to say that  
he brought rich treats and great joy  
to young and old.

The Revival Meetings  
The special meetings being held at  
the Christian church are continuing.  
Many new members are being re-  
ceived and interest deepening. Evange-  
list Jacobs is preaching convincing ser-  
mons and the song service, under Pas-  
tor Beach, is inspirational. Special  
songs are often rendered by Mr. Beach  
or other local talent.  
People are attending from several  
miles in the country.

Will Entertain Linger Longers  
Mrs. Gus Ficken will entertain the  
Linger Longers on Wednesday, Janu-  
ary 6.

DOINGS AT THE CON-  
GREGATIONAL CHURCH

Jingling sleighbells and blazing  
Christmas tree lights, coupled with  
the inevitable "treat," gladdened the  
hearts of the kiddies who were gath-  
ered at the Congregational church  
last Thursday evening. The occasion  
was the annual Christmas tree pro-  
gram, which is presented by the Sun-  
day school for the benefit of its pat-  
rons.

The children earned their treat, too,  
if the completeness of their program  
is any indication of the amount of  
work put in on it. Every one of the  
exercises and recitations were deliv-  
ered with that seriousness which gives  
body to a performance, plus an ease  
of presentation which could be the re-  
sult of nothing but constant drill. The  
audience was delighted also with the  
many charming mistakes that were  
made by the embarrassment of ap-  
pearing before the large group of  
strangers.

Of especial merit was the rendition  
of solos by older people of the school.  
"The Birthday of the King," by Jesse  
Gray; "When Christ Was Born," by  
Miss Lillian Hardman, and Pietra  
Yon's "Gesu Bambino," by Miss Es-  
ther Martinson. All were presented  
with a flawlessness of technique and  
originality of interpretation which  
merited the hearty applause received.  
After the program George Pollett  
on behalf of the church, took the op-  
portunity to present the pastor with a  
handsome gift. Last of all, Santa  
Claus came bounding into the room  
to the delight of his youthful devo-  
tees, bearing his message of good-  
cheer to all and his present of candy  
to the Sunday school pupils.  
The benediction was pronounced,  
and all left, feeling that the program  
had prepared the way splendidly for  
the joyful day which was to follow.

College Students Welcomed  
Recognition of the young people  
who have returned to the city for their  
vacation was made at a special service  
held at the Congregational church  
last Sunday morning. The parts in  
the opening service were taken by the  
young people themselves: Jesse Gray  
repeating the call; Orland Mayer pro-  
nouncing the invocation, announcing  
the hymns and receiving the offering;  
Jesse Gray reading the Old Testament  
lesson; Wilma Casbolt conducting  
the responsive reading, and Fred Carr  
reading from the New Testament.

The children's sermon was given by  
Grace Jain, who succeeded splendidly  
in the difficult task of holding the at-  
tention of the kiddies throughout.  
The musical numbers were rendered  
by Helen Casbolt and Grace Jain,  
who played the prelude and the offe-  
ratory, respectively. The offering was  
collected by Roy Harris and Fred Di-  
cus.

All the young people did their parts  
with a finesse and appropriate dig-  
nity which is naturally expected of  
those trained by Mr. Pendleton.  
The regular parts in the service,  
such as the responses and the hymns  
were taken by the regular members  
of the choir.

Radio Interference Stopped  
The telephone ringer at the local  
office has been causing radio fans no  
end of trouble for the past several  
months, and especially this fall, but  
that trouble is now almost a thing of  
the past, the interference having been  
reduced to the minimum by Morscheck  
Brothers, who secured coils and at-  
tached them to the ringer to stop the  
vibrations from leaving the instru-  
ment. The expense was small and the  
radio fans will divide the cost—and  
it's worth it.

Notice of Annual Meeting  
The annual meeting of the Latah  
County Farmers Mutual Fire Insur-  
ance Co. will be held in the company's  
office, at Troy, Idaho, January 12,  
1926, at 1 o'clock p. m., to elect three  
directors for a term of three years,  
and to transact such other business  
as may come before the meeting.

J. H. VEDVIG, Secretary  
Dated at Troy, Idaho, this 28th day  
of December, 1925.  
Can you play pinocle? Then come  
to the card party, K. C. hall, Tuesday  
evening, Jan. 5.

Word from the Sick

Mrs. Minnie Springer is confined to  
her bed with bronchial pneumonia.  
Mrs. Freeman, living in the north  
part of town, has been quite ill with  
flu.

Ben Mochel has been quite ill with  
stomach trouble for the past several  
days.  
Antone Borger, who has been quite  
ill in Moscow, was reported a little  
better this week.

The son and daughter of Mr. and  
Mrs. Arthur Hove have scarlet fever  
in light form. The home has been  
quarantined.  
Word from Mrs. Carrie Platt, who  
was taken to Lewiston last week suf-  
fering with a tumor, is to the effect  
that she is in very bad condition.

Word was received from Mrs. Nels  
Flamoe, who recently underwent an  
operation at a Portland hospital for  
poitrite, to the effect that she is getting  
along as well as could be expected  
and would soon be able to be taken  
home.  
A Birthday Party  
A very pretty little birthday party  
was given at the home of Mr. and  
Mrs. D. W. Abernethy on Wednesday  
evening, December 23, from 4:30 to  
7:30, in honor of their son, Kenneth.  
Games were played until 6, when  
the youngsters were taken to the din-  
ing room where a dainty four-course  
dinner was served, the last course  
being the birthday cake and ice cream,  
the cake being lighted by eight cand-  
les, making a very pretty sight when  
the lights had been turned out, which  
the children enjoyed very much. Ken-  
neth received several nice presents.  
Those present were Ruth Alice Van-  
cough, Jeanette and Eunice Rader,  
Mildred Curran, Gail Sampson, How-  
ard Blume, Donald Springer, Bert  
Wishard, Tommy Herman, Ormand  
Hickman, Danny and Kenneth Abernethy.  
Mrs. Abernethy was assisted in enter-  
taining the youngsters by Miss Anna  
Castle.

Cushing Sells Interest  
The firm of Hagan & Cushing, Mos-  
cow, is no more. Geo. H. Cushing hav-  
ing sold his interest in the Hagan &  
Cushing Packing company to Alfred  
Hagan, son of C. A. Hagan and Hagan  
and son will continue the business.  
While young Hagan is not well  
known in this section, his father,  
State Senator C. A. Hagan, is well  
and favorably known and will un-  
doubtedly be able to do the same  
amount of good in this section as  
heretofore. The Hagan & Cushing  
meats are also "well and favorably  
known" here and enjoy their share of  
the local consumers' trade.

Card Club Will Meet  
The card club will be entertained  
on Tuesday, January 5, by Mrs. Carl  
Erikson.

You'll have a good time at the card  
party, K. C. hall, Tuesday night, Jan-  
uary 5.

Greetings  
To You, Our Friends:  
Who have so generously contrib-  
uted of your kindness, and for  
your faith in us, we sincerely thank  
you. May the New Year be one of  
happiness, health and success for  
you.  
Emmett & Boliou

In Doing Nicely  
Mrs. Ben Frank, who suffered a  
broken right leg some three weeks  
ago, is getting along nicely and has  
had the cast removed from the in-  
jured limb.

Legends of "Sleepy Hollow"  
Isaac Isakken hauled three loads of  
hogs to town Tuesday.  
Sleepy Hollow extends best wishes  
for a Happy New Year.  
Irvin and Tony Ebel left for Spo-  
kane Tuesday after a few days at  
home. Sleepy Hollow school is having  
new beaver board ceiling put in this  
week.  
Frank Klemm enjoyed Saturday  
evening at the Ebel home playing pin-  
ocle.  
George Ebel returned to the Her-  
man ranch after spending the holi-  
days at home.  
The crowd that attended the Christ-  
mas program at the Sleepy Hollow  
school reported a very good time.  
Mr. and Mrs. John Kuss and family  
spent Christmas in Clarkston visiting  
relatives, returning home Monday.  
Christmas was very quietly spent  
in the Hollow. Everybody stayed  
at home and enjoyed a Merry Christ-  
mas.  
Frank Klemm was batching a few  
days last week and looks very ill  
these days. Everybody is hoping for a quick  
recovery. This happened at the John  
Kuss home. Al is look-  
ing fine and says he is feeling good.  
He has a position with the Liggett and  
Meyers Tobacco company.  
Mr. and Mrs. N. Edwards left Mon-  
day morning for Paywall, Wash.,  
where they will visit Mr. and Mrs.  
Peter Steltz and other former Gene-  
see residents and will later go to Mil-  
ton, Washington, for a visit with their  
daughter, Mrs. Felix Mulalley, and  
family, and will talk in other coast  
points before returning home.

Had Good Trade  
Local merchants report that they  
are very well satisfied with the Christ-  
mas trade accorded them, saying that  
it was the best that they had for  
several years.

Winter Short Course  
The winter short course in practical  
agriculture, offered by the University  
of Idaho especially for farmers, opens  
on Monday, January 4, at the new an-  
nounced. Monday will be coupled with  
registration and classes will begin on  
Tuesday.  
The first term closed December 19.  
The second eight weeks course, while  
a continuation of first "semester" is  
arranged independent of it for those  
who could not come in the fall.  
The second term curriculum for the  
first year short course students fol-  
lows: Farm horticulture, grain crops,  
breed types of livestock, milk produc-  
tion, plant diseases, farm shop, veg-  
etable gardening.  
For those who are taking the second  
year's work the term gives the follow-  
ing course: Feeds and feeding, live-  
stock management, farm management,  
poultry production, irrigation, farm  
electricity, advanced dairy stock judg-  
ing, farm tractors, rural law.

Neetsfoot Oil  
Why not use Neetsfoot oil to oil  
your harness? It is more efficient  
at practically the same cost as oil  
that is generally sold for harness oil.  
All of those I sold to last year for a  
trial, are well satisfied and are buy-  
ing enough to oil all their harness  
this year.

Graham of Colfax spent Sunday at the  
Chas. Grieser home.  
Harold Hampton, who has been vis-  
iting relatives at Harrington, Wash.,  
returned home Christmas Day.  
Mr. and Mrs. Arthur Mayer and  
daughter, Beverly, spent Saturday  
evening at the Al Mayer home.  
Miss Floy Hummel came down from  
Spokane to spend Christmas with  
Mr. and Mrs. T. H. Herman and family.  
Wood Gash came over from Pot-  
latch and spent Christmas with his  
family, returning Monday morning.  
Miss Marie Weller returned to her  
home at San Francisco Tuesday,  
after a visit at the Fred Nagel home.  
Mr. and Mrs. Arthur Hampton left  
Tuesday morning for St. John, Wash.,  
for a visit with Mrs. Hampton's sister.  
Mrs. A. T. Peterson arrived Tues-  
day from Spokane for a visit with  
her brother, Frank Qualey and fam-  
ily.  
Cecil Gray and Albert Lee of Spo-  
kane spent Christmas at the Ray Ed-  
wards home, returning to Spokane on  
Sunday.  
P. V. Dahl returned to his home in  
Moscow Sunday after having spent  
Christmas with his sister, Mrs. O. H.  
Nordby, and family.  
Mrs. Burfield and daughter  
arrived Wednesday from Crystal, Ida-  
ho for a visit with her parents, Mr.  
and Mrs. John Lawson.  
Mrs. Eliza Gray and daughter,  
Lucille, left Saturday morning for  
Orofino for a visit with Mrs. Gray's  
mother who resides there.  
Miss Mary Wardrobe arrived Tues-  
day of last week and will spend the  
holidays with her mother, Mrs. A. M.  
Wardrobe, and other relatives.  
Mr. and Mrs. Harold Hammond ar-  
rived on Thursday of last week from  
Boise and are encamped on the Hay-  
mond farm just north of town.  
Mrs. F. R. Blackburn and children  
arrived Monday from Cottonwood for  
a visit with her mother, Mrs. A. M.  
Wardrobe and brothers and sisters.  
Mr. and Mrs. Isaac Isakken and son,  
Lowell, spent the week-end with Mrs.  
Isakken's sister, Mrs. Oll Hagen and  
family at Troy, returning home Mon-  
day.  
Mrs. John Vandenberg and son,  
Jack, and Miss Lillian Hardman left  
Saturday for Spokane for a short  
visit with Mr. and Mrs. R. L. Vanden-  
burg.  
Mary Montague, who is teaching  
in the public schools at Burke, ar-  
rived last Thursday evening to spend  
Christmas with her father, James  
Montague.  
Victor Casbolt came over from  
Wilbur, Washington, and spent  
Christmas with his parents, Mr. and  
Mrs. F. S. Casbolt, returning to Wil-  
bur Saturday.  
Mr. and Mrs. Isaac Isakken and  
Lowell returned Monday morning from  
Troy, where they have been for a  
short visit with Mrs. Isakken's sister,  
Mrs. Oll Hagen, and family.  
Mrs. W. J. Dorchester of Wetaki-  
win, Canada, sister of Mrs. W. R.  
Hickman, arrived Friday for a short  
visit here with her mother, Mrs. Car-  
rie Platt, who has been quite ill.  
Mr. and Mrs. Al Burth of Boise  
and Mr. and Mrs. Chas. Jain came up  
from Lewiston and spent Wednesday  
at the Walter Jain home. Al is look-  
ing fine and says he is feeling good.  
He has a position with the Liggett and  
Meyers Tobacco company.  
Mr. and Mrs. N. Edwards left Mon-  
day morning for Paywall, Wash.,  
where they will visit Mr. and Mrs.  
Peter Steltz and other former Gene-  
see residents and will later go to Mil-  
ton, Washington, for a visit with their  
daughter, Mrs. Felix Mulalley, and  
family, and will talk in other coast  
points before returning home.

Summit News  
Mrs. M. S. Wilson was on the sick  
list last week.  
Ashley Taylor spent Saturday with  
Elmer Taylor.  
Cleo Taylor was a Saturday visitor  
at Lester Hayden's.  
Mr. and Mrs. Frank Green motored  
to Moscow Saturday.  
Charles and Jesse Coverdale spent  
Sunday at Hugo Gehrke's.  
Jack Coverdale spent Christmas  
day at the Ed Taylor home.  
Mr. and Mrs. Martin Grieser visited  
at the Chas. Grieser home Monday.  
Mrs. Ed Taylor spent Saturday at  
the home of her brother, W. H. Payne.  
Edna and Alice Green spent Sun-  
day at the home of Ernest Peterson.  
Frank and Lloyd Wilson spent  
Saturday evening at the Jas. Qualey  
home.  
Mr. and Mrs. F. W. Qualey spent  
Sunday with Mr. and Mrs. Dick  
Green.  
Charles and Jesse Coverdale, with  
the aid of Fred and Ed Taylor and  
Hugo Gehrke, butchered several hogs  
Monday.  
H. A. Reisenauer and family of  
Colton spent Friday at the H. Bielen-  
berg home.  
Floyd, Irene and Chester Qualey  
visited the Frank Green home Sun-  
day.  
Mr. and Mrs. M. Reisenauer and  
children were Sunday guests of Mrs.  
Theo. Schlueter.  
Wilson Esser left Tuesday morning  
for Colton where he will visit with his  
brother, Charles, during vacation.  
Bill Gray spent Friday evening at  
Coverdale's. Charles Coverdale pro-  
ved to be the best card player this  
time.  
Mrs. Theo. Schlueter and children,  
Henry and Mary, were Christmas  
dinner guests at the M. Reisenauer  
home.  
Chester, Irene and Lloyd Qualey and  
Raymond Peterson spent Saturday  
and Sunday at the James Qualey  
home.  
Mr. and Mrs. Chas. Grieser and  
family visited at the home of Chas.  
Grieser, sr., and family, Thursday and  
Friday.  
Mr. and Mrs. Herman Bielenberg  
spent Christmas Day with Mrs. Bielen-  
berg's parents, Mr. and Mrs. Roth  
of Lewiston.  
Raymond Peterson of Spokane ar-  
rived in Genesee Monday and spent  
Christmas vacation at the home of  
his uncle F. W. Qualey and family.  
Mr. and Mrs. Leo Miller had as  
Christmas dinner guests Mr. and  
Mrs. F. Brazier and son Glenn, Mr.  
and Mrs. F. Miller and family and A.  
Boutcher.  
Mr. and Mrs. F. W. Qualey had as  
dinner guests Christmas Day Mr. and  
Mrs. James Qualey and family, Mr.  
and Mrs. Dick Green and children and  
Raymond Peterson.  
Mr. and Mrs. Herman Bielenberg  
and Martha, Agnes and Alfred Roth  
motored from Lewiston Sunday after-  
noon to spend the day at the home of  
Mr. and Mrs. H. Bielenberg.  
B. H. Bielenberg of Moscow and  
Nick Bielenberg of Uniontown ar-  
rived Thursday to spend Christmas  
with their parents, Mr. and Mrs. H. Bielen-  
berg—both returning to Moscow  
Monday.  
Ernest Peterson, Amanda Johnson,  
Mr. and Mrs. Elmer Johnson, Mr. and  
Mrs. F. O. Green and family, Mr. and  
Mrs. W. H. Rader and children, Er-  
nest and Agnes, spent Christmas  
Day at the O. F. Rader home.  
The Christmas program given by  
Miss May Kuntz at the Summit school  
was a great success. After the pro-  
gram Old Santa Claus appeared on the  
scene with a full-filled pack and not  
one was forgotten.  
The following were guests at the  
H. Bielenberg home Saturday evening:  
Mr. and Mrs. Joe Schlueter,  
Katherine, Johanna and Cecelia Dwyer,  
Henry Schlueter, Mr. and Mrs.  
Joe Trautman and daughter, Dorothy.

Rimrock News  
(Received too late for publication  
last week.)  
Gus Gamble is in Moscow, visiting  
his parents.  
Lew Jain was visiting at the Clear-  
water ranch.  
Gus Benschler was a visitor at Arch-  
ibald's last week—and the radio was  
kept busy.  
Mr. and Mrs. Roy Evans and Jesse  
Bowers and family had Sunday dinner  
at Frank Snelling's.  
Roy Hansen is working the roads  
in the Curran neighborhood—and it is  
surely appreciated by all.  
Bill Henry has been making the  
rounds on Rimrock the last two weeks.  
Everybody is glad to see Bill around.  
Ole Archibald is kept busy making  
head cheese and cleaning pig's feet.  
Well, butchering only comes once a  
year.  
The Clearwater ranch lost several  
sheep when a bunch of dogs got into  
them. We have more dogs on Rim-  
rock than Genesee. Let's clean up  
Rimrockers and a little excitement  
when "gun play" was pulled off last  
week, but no one was hurt. Everybody  
is mum. Boys, don't do it; it is bad  
business.

This Week  
Jessie Kane spent a few days with  
Russell, Gerald and Wanda McKinzie  
motored to Cullacoe Thursday to  
spend Christmas with Mr. and Mrs.  
Gibbs, Mrs. Morscheck's parents. They  
returned Saturday evening.  
Mr. and Mrs. Fred Shirod had as  
Christmas dinner guests Mr. and Mrs.  
Perry Shirod, Mr. and Mrs. Tony  
Shirod and Charlotte, of Clarkston,  
Mr. and Mrs. Rose White and W. G. Shirod  
of Uniontown, Mr. and Mrs. Lawrence  
Vestel and son, Mrs. Johanna Christen-  
son, Mr. and Mrs. Roy Fish and  
Stanley Shirod.  
Mr. and Mrs. E. M. Becker has as  
guests on Christmas day Mr. and Mrs.  
J. P. Michaelson and Hazel, Mr. and  
Mrs. McConnel and Mildred, Kathryn  
and Bernadette McConnell of the Lew-  
iston Orchards, Mrs. W. A. Nixon and  
Grace of Clarkston, Mr. and Mrs.  
Peter Dallasego and Erma and Ar-  
minta and Dwight, Stanton and Mar-  
garet Becker.  
A birthday party was given at the  
home of Mr. and Mrs. Roy Fish Sun-  
day in honor of Mrs. Lawrence Vestel  
and W. G. Shirod. Those present  
were Mr. and Mrs. Tony Shirod, Mr.  
and Mrs. Perry Shirod, Mrs. Rose  
White, W. G. Shirod of Uniontown,  
Mr. and Mrs. Lawrence Vestel and  
son, Mrs. Christenson, Mr. and Mrs.  
Eli Thyauff and children, Stanley  
Shirod and Albert Konen.  
Most men are great in one way or  
another, but the public does not know  
the one from the other.

# The Fighting Ranger

By F. J. McCONNELL and GEORGE W. PYPER  
(Copyright 1925)

(Continued from last week)  
CHAPTER 21  
Dynamite  
Taggart broke in upon the group of cowboys clustered around Doc Willets back of the barn facing the corral.  
"There's no time to lose," he cried. "You boys rustle that bunch of steers across the river while Doc and I frame up a little joke on the girl." The cowboys rose, grinning, and made for their horses.  
"Leave me your lariats, Andy," Taggart shouted to one of them.  
The man tossed him his rope. Then all mounted their horses and rode off.  
Taggart tore open his shirt collar, ripped one of his sleeves, and humped up his clothes.  
"Now, then Doc," he said to the laughing Willets, handing him the lariats. "Take this and come in here with me."  
They both entered the barn. A few minutes later Willets came out alone.  
Willets mounted his horse, and rode over to the range where the cowboys were rounding up the steers, to sup- plying the prime steers, the pick of the Marshall herd, and showing them across the stream at the western edge of the ranch. One group started a few of the cattle up the bank of the stream into a small canyon, at Willets' orders.  
"Just to lead 'em off the track," he explained to Buck. "They'll pick up that trail and think they all went that way. They won't dream the animals are across the river."  
Slowly they began to force the main herd of steers to swim across the stream, the cowboys hastening them by swimming their horses alongside and whooping wildly.  
Mary was the first to recover her sense of time and reality, and break the spell of their afternoon love idyl. She suddenly tore herself from the arms of Terence, who had forgotten that there was anyone but Mary and anything but love in the whole world, and cried:  
"Terence, how long we've been here. I wonder what's keeping Mr. Taggart."  
This recalled abruptly from dream- land, Terence jumped up, and seeing the uneasiness in Mary's face, said:  
"Let's go see."  
They stepped out the door, and to their amazement, the entire ranch, which had been bustling with activity

CHAPTER 22  
The Flight to Treasure Trove  
At the sound of the blast, Koml who was riding not far off, spurred his horse and dashed to the scene. He arrived at about the same moment as Taggart and his aides, and kept himself under cover of the brush where he could watch. While Taggart, Willets and the others bent over the unconscious form of Mary, Buck McLeod went off toward the spot where Terence had last been seen.  
He returned excitedly to Taggart with a piece of parchment upon which was part of a crudely drawn map.  
"I found this in his coat," he said. Taggart looked at the map with wide eyes.  
At that moment they heard a loud buzzing sound in the sky, and looking up saw an airplane approaching, descending toward them.  
"Back, take the map and beat it to the Diablo Trail as fast as you can go," Taggart ordered. "I'll meet you there in an hour—come on men, let's get out of the way. We can't let anyone know we had anything to do with this blast."  
As they started riding for cover, Taggart asks Willets hoarsely:  
"Think they'll live, Doc?" and added after a second, "Hope the girls do."  
The plane maneuvered, found a landing place, and dropped to earth close by where Mary lay. Bud Higgins jumped out. They found Koml who had come out of his cover, bending over her.  
"She's lucky, she lives, not bad hurt," chided the old Indian.  
Up above them Terence was recovering consciousness. Fortune had been kind to him also, and the slide of shale and rock had only stunned him. His first thought as he recovered his senses was of Mary. He ran down from the ridge and found her, coming under the ministrations of Koml, Miguel and Bud.  
"Mary, are you all right?" Terence asked with trembling voice.  
A smile quivered on her lips as her eyes opened into his, bending over her. She reached for his hand, and pressed it. In a few moments she sat up, quite recovered.  
Koml touched Terence on the elbow.  
"Bad man Buck—he go your pocket—take something—fast go away—"

CHAPTER 23  
The Flight to Treasure Trove  
At the sound of the blast, Koml who was riding not far off, spurred his horse and dashed to the scene. He arrived at about the same moment as Taggart and his aides, and kept himself under cover of the brush where he could watch. While Taggart, Willets and the others bent over the unconscious form of Mary, Buck McLeod went off toward the spot where Terence had last been seen.  
He returned excitedly to Taggart with a piece of parchment upon which was part of a crudely drawn map.  
"I found this in his coat," he said. Taggart looked at the map with wide eyes.

"Mary, are you all right?" Terence asked with trembling voice.  
A smile quivered on her lips as her eyes opened into his, bending over her. She reached for his hand, and pressed it. In a few moments she sat up, quite recovered.  
Koml touched Terence on the elbow.  
"Bad man Buck—he go your pocket—take something—fast go away—"

## CHILDREN CRY FOR

### Fletcher's CASTORIA

MOTHER—Fletcher's Castoria is especially prepared to relieve infants in arms and children of all ages of Constipation, Diarrhea, Wind Colic, and Flatulency; also, Feverishness arising therefrom, and, by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep.

To avoid imitations, always look for the signature of *Wm. C. Fletcher*. Absolutely Harmless—No Opium. Physicians everywhere recommend it.

## Leviathan's Commander a Radio Fan

CAPT. HERBERT H. HARTLEY

In the few hours he is privileged to remain off the bridge or in pursuit of his other responsibilities at sea as the presiding genius of America's greatest vessel, Capt. Herbert H. Hartley delights to "listen in" on the radio. While crossing the Atlantic Cap. Hartley hears not only the principal American broadcasters but also

stations in several European countries. "Mid-ocean" is a desirable location for the radio fan and the enthusiast to whom Capt. Hartley speaks of his success in reception do not conceal their envy. Cap. Hartley informs Joseph D. R. Freed, president of the Freed-Elesmann Radio Corporation, that many passengers are taking sets along for listening in at sea.

His men remained stock still. "Do you hear?" yelled Taggart angrily, with an oath.  
Still the men remained motionless, and Buck McLeod answered:  
"It's too late—we'd be blown to pieces ourselves if we go up there now."  
Watching, they saw Terence on his horse mounting to the top of the ledge while Mary waited just below. They saw him reach the summit and look down into the pool, then saw his arms extended to Mary, and pointed down into the pool where he had discovered the cattle. They saw Mary wade back and—  
BOOO-O-OOM!!!

The blast was off. The air was filled with broken boulders, rocks, chips, stone dust and smoke. Tons of debris were sliding into the gap which had served as entrance to the pothole.

CHAPTER 12  
The Flight to Treasure Trove  
At the sound of the blast, Koml who was riding not far off, spurred his horse and dashed to the scene. He arrived at about the same moment as Taggart and his aides, and kept himself under cover of the brush where he could watch. While Taggart, Willets and the others bent over the unconscious form of Mary, Buck McLeod went off toward the spot where Terence had last been seen.  
He returned excitedly to Taggart with a piece of parchment upon which was part of a crudely drawn map.  
"I found this in his coat," he said. Taggart looked at the map with wide eyes.  
At that moment they heard a loud buzzing sound in the sky, and looking up saw an airplane approaching, descending toward them.  
"Back, take the map and beat it to the Diablo Trail as fast as you can go," Taggart ordered. "I'll meet you there in an hour—come on men, let's get out of the way. We can't let anyone know we had anything to do with this blast."  
As they started riding for cover, Taggart asks Willets hoarsely:  
"Think they'll live, Doc?" and added after a second, "Hope the girls do."  
The plane maneuvered, found a landing place, and dropped to earth close by where Mary lay. Bud Higgins jumped out. They found Koml who had come out of his cover, bending over her.  
"She's lucky, she lives, not bad hurt," chided the old Indian.  
Up above them Terence was recovering consciousness. Fortune had been kind to him also, and the slide of shale and rock had only stunned him. His first thought as he recovered his senses was of Mary. He ran down from the ridge and found her, coming under the ministrations of Koml, Miguel and Bud.  
"Mary, are you all right?" Terence asked with trembling voice.  
A smile quivered on her lips as her eyes opened into his, bending over her. She reached for his hand, and pressed it. In a few moments she sat up, quite recovered.  
Koml touched Terence on the elbow.  
"Bad man Buck—he go your pocket—take something—fast go away—"

CHAPTER 13  
The Flight to Treasure Trove  
At the sound of the blast, Koml who was riding not far off, spurred his horse and dashed to the scene. Koml touched Terence on the elbow.  
"Bad man Buck—he go your pocket—take something—fast go away—"

## IT HAS LASTED

Spokane People Must Believe Such Convincing Testimony as Mrs. Trull's.

No one in Spokane who suffers backache, headaches, dizziness, rheumatic pains or distressing urinary ills can afford to ignore this twice-told story of a Spokane resident. It is confirmed testimony, telling of lasting benefit from Doan's Pills—a stimulant diuretic to the kidneys. It's evidence that no man or woman in Spokane can doubt.  
Mrs. James Trull, S. 323 Pittsburg St., Spokane, says: "It was all I could do to stand the severe pains that cut through me when I awoke. Dizzy spells were constant. My kidneys were extremely out of order, and nervousness caused many a sleepless night. Doan's Pills from Margitroy's Drug Store cured me." (Statement given October 23, 1922.) On February 20, 1924, Mrs. Trull added: "The cure Doan's effected has been a lasting one."

## Washington Shingle Men Urge Tariff

BELLINGHAM—Bellingham shingle producers say that the duty on shingles proposed by Congressmen L. H. Hadley and Albert Johnson would help to stem the tide of Canadian shingles that United States producers have had to face since the omission of the tariff from the Fordney bill. E. E. Scott, sales manager for the Whatcombs Falls Mill company, declares that a duty would save the manufacturers. President R. H. Siemens of the Siemon Lumber Company honored the United States producers of the Bloeled Donovan Lumber Mills say that a tariff on shingles would prove beneficial to Washington manufacturers.

## Thirty-two on Staff Gem of the Mountains

Thirty-two students form the editorial staff of the twenty-fourth issue of the Gem of the Mountains, Idaho University's year-book, according to announcement by Herbert Karlsen, editor. This year's Gem will be larger than previous editions. It will include 400 pages exclusive of the opening section and feature sections. For the first time in history four color process plates will be used.  
The editorial staff, Editor-in-chief, Herbert E. Karlsen; Nampa, assistant editor, Clair Kilborn; Emmet; art staff, Kenneth Cook, Gespese, and Evelyn Malne, Burke; athletic editor, Martel Archibald, Boise, and Fred Allen, Lester, Wash., and Ruth White, Lewiston, associates; senior editor, Ruth Beattie, Boise; junior editor, Rose Pruess; faculty; associate editors, Dorothy Darling, Boise, and Gertrude Gould, Blackfoot; editor organization staff, Bertha Church, Boise; associates, Dorothy Ethard, Lewiston, Frank Wyman, Boise, and Wilfred Cook, Gooding; debate editor, Arthur Peavy; Twin Falls; associate editor, Lael Simmons, Burley; society editor, Winifred LaFont, Nampa; associate editor, Doris Squibb, Spokane; associate editor, Everett Erickson, Brevett, Wash.; associates, Aylene Honeywell, Orofino; snapshot editor, Leon Weir, Boise; Twin Falls; associate editor, Humphrey, Twin Falls, and William August, Bryan, O.; editor of photographic staff, Paul Atwood, Lewiston; associates, C. N. Teed, Kuna; editors of humor staff, Wallace Brown, Lewiston, and Gordon Hockaday, Rupert; associates, Mandell Wain, Spokane, and Ralph Ardreich, Moscow.

In the last ten years the number of telephones in the state of Louisiana has jumped from about 55,000 to about 110,000.  
Out-of-town people like Jack White's Fry Tavern Cafeteria because it's so homelike and the food is like they get at home. Try it next time you visit Spokane. —Ad.

properly," said Mary, looking at the trail, in the general vicinity of the supposed hiding place of the Indian treasure.  
Mary and Terence jumped out.  
"Miguel and I'll beat it back to the ranch to get a report for Mr. Marshall on whether they've caught the rustlers," said Bud. "Be here at 6 o'clock, and I'll return and pick you up."  
They waited awhile and the plane ascended to the sky again.  
"Why that's on part of Dad's ranch

CHAPTER 15

## ALL-STAR FOOTBALL TEAMS FOR 1925 FROM IDAHO HIGH SCHOOLS ANNOUNCED

By Les Robinson, special sports writer for the University of Idaho Press Service.

Position	First Team	Second Team	Third Team
End	Christenson, Pirih	Daniss, Nampa	Juno, Coeur d'Alene
Tackle	Diehl, Filer	Barton, Lewiston	Moore, Boise
Guard	Ricks, Nampa	Lockyer, Firth	Shurtiff, Pocatello
Center	Christians, Kellogg	Palmer, Filer	Horton, Caldwell
Quarterback	Grasburg, Parma	Brownington, Firth	West, Kellogg
End	Millett, Twin Falls	Thornhill, Kellogg	Yanick, Boise
Quarterback	Toone, Gooding	Frazier, Moscow	O'Connor, Caldwell
Halfback	Jensen, Firth	Potter, Lewiston	Thomas, Pocatello
Halfback	Hull, Kellogg	Davidson, Boise	Berg, Firth
Fullback	Garry, Nampa	Brumback, Parma	Lyons, Moscow

### HONORABLE MENTION

Ends—Lowley, Gooding; Allen, Weiser Institute; Atkinson, Filer; Dickerson, Roswell; Evans, Pocatello; Dooley, Lewiston; Kelso, St. Maries. Tackles—Marker, Coeur d'Alene; Moore, Moscow; McIntyre, Idaho Falls; Bronneke, Pocatello; Platt, Caldwell; Rosenbaum, Gooding. Guards—Orlandina, Kellogg; Terrill, Idaho Falls; Argott, Wallace; Nickerson, Boise; Green, Wilder, Caroy, Coeur d'Alene; Minsett, Lewiston; Centers—Glase, Boise; Frabin, Twin Falls; Morbeck, Coeur d'Alene; Hayes, Lewiston. Quarterbacks—Kohl, Lewiston; Justus, Boise; Best, Coeur d'Alene; Lakey, Parma; Barrett, Pocatello. Halfbacks—Rutledge, Caldwell; Smith, Jerome; Norby, Rupert; White, Lewiston; Sargent, St. Maries; Halverson, Moscow; Young, Firth; Erickson, Coeur d'Alene; Lyons, Payette; Morley, Idaho Falls; Williams, Malad. Fullbacks—Hughes, Kellogg; Firth, Barnes, Lewiston; Nelson, Idaho Falls; Gross, Pocatello; McMahon, Wallace; Arago, Boise.

Another Filer man has been shifted in the line to complete the set of guards. Villers, regular Filer tackle, with 220 pounds of brown gain in at one pound with D. Ricks, of Nampa, the Bulldogs' best lineman and the choice of every south Idaho coach. Both are outstanding performers. Ricks is a demon on breaking through the line, smearing plays and blocking gets into play well. Villers, ordinarily a tackle, is exceptional on offensive, and it is almost impossible to make yardage over him. He would be an outstanding player anywhere on the line.

## Former Political Leader In Idaho Dies in Texas

BOISE.—Stephen D. Taylor, former chairman of the state Republican central committee, who had been seriously ill at his home at Fort Worth, Tex., died there early in December. This word was received in Boise by Bartlett Sinclair of the state attorney's office.  
News of his death was contained in a letter from Mrs. W. R. Eddy, a daughter who lives in Spokane. The body will be brought to Boise.  
Each passing year finds the Coeur d'Alene Hotel richer in memories of pleasant associations with men and women of the Great Northwest. It will be our aim in 1925, as in former years, to be worthy of an ever-increasing patronage. The Coeur d'Alene Hotel, "The Hotel With a Personality," —Ad.

## 21 Idaho Freshmen Get Grid Numerals

UNIVERSITY OF IDAHO, Moscow. —Twenty-one Idaho freshmen have won their football numerals, according to Coach David MacMillan. While there are no outstanding players on this year's fresh squad, the team as a whole displayed a good brand of first-year football.  
Probably the most important contribution the freshman squad will make to the Idaho varsity next year will be Cecil Brown of Boise, a left-footed punter who has played a consistent game this fall. Other promising candidates for next year's varsity include Titus Cornell, Pocatello; Rodney Ross and Donald Axell, Spokane; John Armitage, Nampa; Ted Nelson, Moscow.  
Freshman numerals for 1925 are as follows: Titus Cornell, Pocatello; Smith, Idaho Falls; Max Rawlings, Leon Payson, Cecil Brown and James Haffer, Boise; Arthur Cheyne, St. Maries; Rodney Ross and Donald Axell, Spokane; Virgil Estes, Lyle; Drury, Oliver Hill and Ted Nelson, Moscow; George Hont, Kootenai; John Armitage, Nampa; Henry Spence, Chilo; John Norman, Wallace; James Ard Gallaigher, Lewiston; Howard O'Brien, Coeur d'Alene; Neal Anderson, Kennewick.

## Idaho Power Companies Get \$70,229 Rebates

BOISE.—Rebates granted power companies in Idaho on their 1925 taxes total \$70,229, the state auditor's office reported. Under Section 106 of the 1921 session laws, rebates are allowed on all equipment used exclusively for power furnished in pumping water to irrigated sections.  
The three companies sharing in this cut in taxes are the Idaho Power Company, the Utah Power & Light Company and the Washington Water Power Company.  
The long, heavy, reddish crest gives the moderately sized, rich green plumaged greenwood quail a distinguished appearance, says Nature Magazine. In its native haunts, from Slam to Borneo and Java, it is a lover of the tropical forest up to an altitude of 4,000 feet, and seldom visits the open country.

## Grand Champion at the "National"

Raleigh's Oxford Thistle, first prize mature cow and grand champion Jersey female at the 1925 National Dairy Show at Indianapolis. Her name is in the form of a registered trademark on the arrow, spear, and dug-out canoe to aid him in his hunting and fishing. There is a wide gap between these elements and the highly specialized instruments of modern production, and the same principle governs the use of both. Capital increases the productivity of land and labor. The American people are often called extravagant, and yet they produce every year far more wealth than they consume. As a result our nation is steadily growing richer—that is, general well-being is increasing. And here is another important fact for us to remember. Because we have saved in the past and have this large stock of stored-up wealth, we now have more goods available for our immediate satisfaction. In other words, because our capital is so large, we are able to produce more, to consume more, and also to save more than ever.

CHAPTER 17  
The Flight to Treasure Trove  
At the sound of the blast, Koml who was riding not far off, spurred his horse and dashed to the scene. He arrived at about the same moment as Taggart and his aides, and kept himself under cover of the brush where he could watch. While Taggart, Willets and the others bent over the unconscious form of Mary, Buck McLeod went off toward the spot where Terence had last been seen.  
He returned excitedly to Taggart with a piece of parchment upon which was part of a crudely drawn map.  
"I found this in his coat," he said. Taggart looked at the map with wide eyes.  
At that moment they heard a loud buzzing sound in the sky, and looking up saw an airplane approaching, descending toward them.  
"Back, take the map and beat it to the Diablo Trail as fast as you can go," Taggart ordered. "I'll meet you there in an hour—come on men, let's get out of the way. We can't let anyone know we had anything to do with this blast."  
As they started riding for cover, Taggart asks Willets hoarsely:  
"Think they'll live, Doc?" and added after a second, "Hope the girls do."  
The plane maneuvered, found a landing place, and dropped to earth close by where Mary lay. Bud Higgins jumped out. They found Koml who had come out of his cover, bending over her.  
"She's lucky, she lives, not bad hurt," chided the old Indian.  
Up above them Terence was recovering consciousness. Fortune had been kind to him also, and the slide of shale and rock had only stunned him. His first thought as he recovered his senses was of Mary. He ran down from the ridge and found her, coming under the ministrations of Koml, Miguel and Bud.  
"Mary, are you all right?" Terence asked with trembling voice.  
A smile quivered on her lips as her eyes opened into his, bending over her. She reached for his hand, and pressed it. In a few moments she sat up, quite recovered.  
Koml touched Terence on the elbow.  
"Bad man Buck—he go your pocket—take something—fast go away—"

## Pony Operates Famous Radio Set

At the national radio exposition "Black Bear" Corporation in his "radio exploration" tour of the United States and Canada, during which he "listened" at the scenic centers of the continent.  
The set was on exhibition at the Chicago Radio Show and "Black Bear" was the only set of the kind in the use of blocks, and he also tuned in on a number of receivers.  
Here he is shown operating with his mouth the dial of the set which is credited with a record log of stations, 406 in all, used by Eric Palmer of Freed-Elesmann Radio Corporation.

## VESSELS IN FOREIGN TRADE ON INCREASE

INCREASE in the number of privately-owned American vessels engaged in overseas foreign trade from 117 to 134 during the period from July 1, 1925, to October 1, 1925, is indicated by the current issue of the quarterly survey of the status of the American Merchant Marine fleet, prepared by the Bureau of Research of the Shipping Board. It is further noted that during the same period the number of vessels employed in coastwise traffic increased from 671 to 682. During the same period two vessels were transferred to Great Lake service, one was sold to a foreign purchaser, five were scrapped, and three were lost through disaster, a total decrease of 11 ships. The net increase of 16 brings the total number of privately-owned steam and motor vessels of 1,000 gross tons and over to 1,109, with a total gross tonnage of 5,281,626 tons, of which 91 per cent was in active service October 1. The government-owned fleet on October 1, the report shows, consisted of 1,188 steam and motor vessels of 5,770,971 gross tons, about 30 per cent of which was in active service on that date.

## Odd Quail in Borneo

The long, heavy, reddish crest gives the moderately sized, rich green plumaged greenwood quail a distinguished appearance, says Nature Magazine. In its native haunts, from Slam to Borneo and Java, it is a lover of the tropical forest up to an altitude of 4,000 feet, and seldom visits the open country.

## Ourselfs and Industry Saving and Capital

We have seen how wealth is produced, let us now see how it is used. If we make a list of the various articles in every one of our homes, we will find that many are employed for the immediate and direct satisfaction of our wants, while others are employed to create more wealth. The first group is sometimes called consumers' goods and the second group producers' goods.  
The goods that we eat, the clothes that we wear, and the homes that we live in are consumers' goods, while the tools or machinery with which we work, the stocks of goods that we sell, the factories, mines, or factories where we produce our goods, the latter satisfy our wants only in so far as they create more wealth. In this way alone can either an individual or a nation become wealthy. The American people are often called extravagant, and yet they produce every year far more wealth than they consume. As a result our nation is steadily growing richer—that is, general well-being is increasing. And here is another important fact for us to remember. Because we have saved in the past and have this large stock of stored-up wealth, we now have more goods available for our immediate satisfaction. In other words, because our capital is so large, we are able to produce more, to consume more, and also to save more than ever.

## Rare Swans, Killed in Idaho, Are Shipped East

IDAHO FALLS, Idaho. —Three trumpeter swans, killed by hunters and left on the shores of a lake in the Snake River a short time ago, are of a rare species and have been ordered sent to Washington, D. C., by the federal government. The United States Biological Survey has been trying for a number of years to find where the birds breed, but has failed.

## Washington Farm Situation For December

By R. N. Miller and R. M. Turner  
Apples  
An apple crop of unusual quality is being marketed but the total production is fifteen million boxes less than last year and is less than was expected.  
Pears, while favorable, have reacted to first reports by commercial reporting agencies, indicating a larger crop than was later harvested; second, a slow early demand, and third, heavy marketing which was necessary on account of the drought and extreme heat. Because of the latter conditions apples ripened quickly this fall, but were necessarily left on the trees as long as possible to increase their color.  
These growers who keep their orchards in good shape and who had sufficient irrigating water to mature the yield have had an excellent quality of produce, and will no doubt secure good prices.  
Oil wraps are now universally used and are demanded by buying agencies, but farmers are taking a good deal of interest in a machine that processes the apple with paraffin oil instead of wax, unnecessary. Such treatment promises even greater advantage than oil paper and is done at a lower cost.

Wheat  
Latest United States reports on wheat show that our crop is around one hundred and seventy-five million bushels less than last year, but that we will export from fifty million bushels more for the fall months total less than one-third of the normal exports.  
Some foreign countries report favorable yields and favorable weather but Argentina, India and Australia report a drought. Canada reports show great loss from early rains and snow, but have harvested a good crop. The recent upturn of wheat prices may be the result of the reports of unseasonable weather in the southern hemisphere and a revival of European buying which, due to the good crop there, has been unusually dull.

## Poultry

The peak of egg prices are usually reached in November, and we soon can expect slightly lowered prices, although they are likely to be profitable up into the early part of February. A high production should be maintained through this winter period by care in watching the comfort of the birds and the provision of an ample supply of green feed.  
The turkey crop in this state is almost normal, although much shorter than usual in the Middle West.

## Idaho's Basketball Prospects Look Good

UNIVERSITY OF IDAHO, Moscow. —Varsity basketball practice is under way at Idaho and a big squad of candidates, including four letter men, is starting the season's grid under Coach David MacMillan. Eight letter men will be available as a nucleus for the 1926 Vandal quintet. Pre-season prospects look rosy.  
Only two men have been first from the 1924-25 squad—Penwell, Irard, and Greene, Granger. To balance the loss of Coach MacMillan will have tried veterans in Romer, Nodros, Miles and Canine, forwards; Erickson and Nelson, centers; Lamphere and Fields, guards. A host of last year's freshman hoopers including Freyer, Dawald, Kyle and Chaney, and later Canine and Jacoby, are also turning out.

### A FEW WHYS AND WHEREFORES

Everything seems to have gone into the jazz age now, even our court martials.

It seems that it requires a good vocabulary to become a successful aerial expert.

Just 18,081 state laws were added in 1925 which makes lawbreaking easier than ever.

France seems to be proceeding on the theory that a cabinet a day keeps the collector away.

The more money we lend over in Europe the more popular we are not going to be over there.

Miami recently had a rain which flooded the whole town. Will California papers please copy?

Sherman said that war was hell and it would be interesting to know his opinion of war debts and peace treaties.

About the only safe thing to predict about the coal strike is that the price will go up when the strike is finally settled.

Probably we could get up more interest in the league court if it would move its headquarters from the Hague to Miami.

All sorts of remedies have been suggested for the crime wave. Why not try convicting the criminals? That might help some.

If Mr. Ferguson is impeached alongside of Mr. Ferguson in Texas, we wonder which one of the family will run for governor next?

Anyhow there is one big advantage about going into the league through the back door. We might get a chance to look into the ice box.

The basketball season is now on and basketball has one big advantage over football. The yell leapers don't have so much room to jump about in.

Nobody has yet explained why, if the League of Nations can prevent war, it was necessary to hold that Locarno conference for the same purpose.

The propagandists in this country have done everything they could for the League on nations except write a song about it. "Meet me at Geneva, Eva?"

A street sweeper in Budapest drank a quart of wine, ran wild and wounded seven people. He must have bought it from an American bootlegger over there on a vacation.

A rare series of letters written by Benjamin Franklin brought \$2,900 in an auction sale recently. But a lot of modern epistles bring more than that in breach of promise suits every day.

### Relic of Saxon Days

THE New Year begins precisely at midnight, and almost everywhere nowadays sees the New Year in general festivities and many good resolutions, which are promptly forgotten on January 2.

The festivities marking this occasion, says Hereward Carrington, scientist and author, are very ancient, and in old Saxon days it was the custom to make a bowl of spiced ale, which was passed around with the exclamation "Wasshael," which meant "to your health!" Hence the origin of the Wassail, or Wassail bowl.

We now keep New Year on January the first; but the Chinese, Jews, Turks and many others do not observe it on the same day. The Chinese, for example, do not always so observed it; the Romans began the year with the March equinox. The later Teutonic nations for a long time continued counting the year from the beginning of the year from March 25.

It was only in 1563, that France changed the time of the beginning of the year to January 1. In 1700 Scotland made the same change, and England only did so in 1752, when the Gregorian system was adopted there. It will thus be seen that the New Year, observed on January 1, is relatively new, though we are accustomed to think that it dates back from time immemorial.

It was Julius Caesar, in the calendar, who first reformed the calendar—aided by the Egyptian astronomer Soligenes. He made it a few minutes longer, and a second correction was necessary. Pope Gregory made certain changes in 1582, A. D., and additional minor changes were made later on from the "old style" to the "new style" calendar. We now employ the new style.

After the French revolution France decided to set up an entirely new order of things, and a new calendar was made. The Christian era was wiped out, and was replaced by the "French era," beginning September 22, 1792. Instead of our week of seven days, a week of ten days was established—in accordance with the decimal system—the tenth day being set aside for rest.

Instead of the mythological names of the months, others deduced from the prevailing seasons of the year were substituted. Everything was to be based upon reason. The names of the months were changed to "Temple of Reason," "Mme. Momoer, the young and beautiful wife of a Jacobin printer, was chosen to represent "Reason." And so it went.

The months were chosen and given French names which were thought to be characteristic of them. Thus, autumn had a vintage month, a foggy month and a sleety month. Winter, a snowy month, a rainy month and a windy month. Spring, a budding month, a flowery month and a pasture month. Summer, a harvest month, a hot month and a fruit month.

Each month began somewhere between the 15th and the 22nd—excepting, of course, the first month, which began on the 1st of the year. The first month of the autumn trio began on September 22, and lasted until October 21, etc.

## FLOUR EXPORTS FOR 1925 BELOW MARK SET IN 1924

Exports of Flour During First Half of 1925 Below 1924—Shipments to Mediterranean and Baltic Countries Show Relative Increase

The rate of exportation prevailing for the first six months of 1925 for the country at large indicates an appreciable falling off in our foreign trade in flour as compared with that of 1924, according to a report from J. A. LeClere, Foodstuffs Division, Bureau of Foreign and Domestic Commerce, received at the District Office of the Bureau in Seattle, 515 Lowman Building.

The combined exports from New York, New Orleans, Portland and Washington, amounted to nearly 80 per cent of the total flour shipments of 1924 and of the first six months of 1925. New York has, however, relatively more flour this year than last, while the Pacific ports have lost correspondingly.

Through the port of New York, however, 290,000 barrels were exported to the United Kingdom, 295,000 to the Mediterranean countries, and 629,000 to the Baltic countries during the first half of 1925, compared with only 515,000, 540,000 and 731,000 barrels, respectively, for the 12 months of 1924. This constitutes a record for the bright spots of our foreign trade in flour.

New York was the only port which during the first half of 1925 exported relatively more flour than during 1924. The New Orleans, Portland and Washington districts shipped the most serious losses. The losses from Philadelphia and Galveston were small. In the case of the Pacific ports, however, it is more than likely that during the second half of 1925 much larger amounts of flour will be shipped than were exported from January to June, 1925. This constitutes a record for the bright spots of our foreign trade in flour.

More flour, relatively speaking, was shipped to the Mediterranean countries and to the Baltic countries of Europe during January to June, 1925, than during 1924. The total amount of European countries less flour has been shipped. The ports of New York and Oregon were the only ones which sustained an increased trade with Europe. Every one of the United States ports except Portland has had a relatively smaller trade with the countries of central and western Europe this year than last.

The countries bordering on the Mediterranean get the bulk of their American flour from the New York customs district. Less than 50 per cent of the shipments to the United Kingdom and less than 30 per cent of those to central and western Europe are from the port of New York. More flour has been exported to this part of Europe from New Orleans than from any other port. The Baltic countries, however, look to New York for about 75 per cent of their requirements of American flour.

The total exports to Asia from January to June were less than one-fourth of those of the past year, over 97 per cent of the shipments being from Washington and Oregon districts.

The exports to northern Africa have been relatively larger than in 1924. New York supplying about 75 per cent of the shipments. The exports to West and South Africa were, however, less than last year. New York was the only port shipping flour to West and South Africa during January to June, 1925.

The countries of South America bordering on the Atlantic coast took 482,000 barrels of flour during January to June, over 85 per cent of which was shipped via New York, New Orleans being second with 10 per cent. To the Pacific countries of South America, however, only 94,000 barrels were exported, two-thirds of which went from Washington, Portland and San Francisco, the first named supplying much the larger amount, New Orleans and New York together sup-

### SINGLE QUARANTINE INSPECTION URGED

Abolition of the dual quarantine inspection of ships coming from the Orient and calling in both Canada and United States ports is the object of a campaign begun by the Foreign Trade Department of the Seattle Chamber of Commerce and favorably considered by both Victoria and Vancouver shipping men. It is asked that Canadian and United States inspectors inspect the ships simultaneously, avoiding the delays that occur when vessels are first inspected at William Head, B. C., by the Canadian authorities and then at Port Townsend by United States health officers. A letter from the Foreign Trade Department of the Seattle Chamber of Commerce explains how the dual quarantine inspection could be done away with and also points out the disadvantages of the present system. The letter follows:

"Passengers coming on the Admiral Oriental Line vessels have to undergo two inspections, one by the United States authorities and one by the Canadian authorities. The reason for this is that no vessels can call at a Canadian or American port while inbound from the Orient without undergoing inspection. Admiral Oriental Line vessels usually call at Victoria for their passengers and cargo and passengers for that port. The masters of these vessels arrange their schedule in order to arrive off William Head, B. C., early in the morning. All passengers must get up at 6 o'clock and be in the social hall at 7, then about 8 o'clock the American officers go through the same procedure as the Canadian officers, which means about four hours of the passengers' time is consumed in anticipation and the actual process of inspection. The Canadian health inspectors and the United States inspectors could board the vessel at the same time, go over the records of the ship's physician, cook, the passengers and crew and accept one another's report."

When the tank steamer Dayton moored at Smith Cove terminal No. 40 here the first part of December, she brought the first cargo of crude oil for Seattle's new million-dollar refinery which will be in actual operation next month.

The Dayton is the first Seattle-owned tanker to arrive here and she brought a cargo of 50,000 barrels of crude and immediately started pumping the first shipment into the huge new storage tanks recently completed by the Olympic Calpet Refining Co., a Seattle and Washington corporation in which many local men are interested. H. F. Alexander is president.

The Dayton was loaded at San Pedro and came north under the command of Capt. Carl Lundquist, formerly with the Admiralty Line. She was originally the British tank steamship Harport and was built at Shields, England, in 1907. The vessel is 370 feet long and of 60 feet beam. She is to transport crude oil exclusively between Southern California and Seattle for the Olympic Calpet Refining Co. The company plans to rename the Dayton the Steamship Olympic for her next voyage. Present plans are that three trips a month will be made.

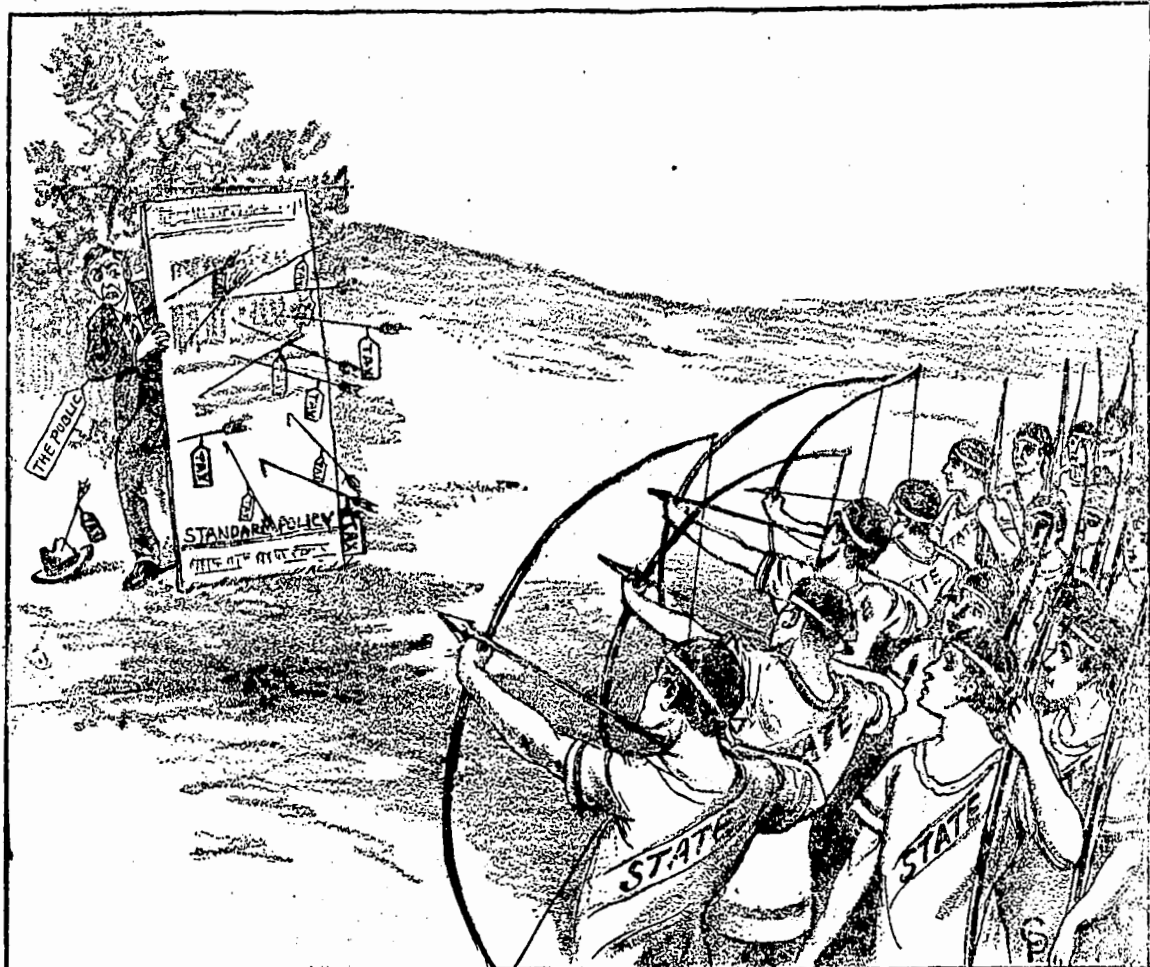

The refinery is the only one on the Pacific Coast north of San Francisco and is a great marine asset to Seattle. The company has contracts with oil interests in the South that insure them of a definite source of supply.

C. W. Chandler, well-known in Pacific Coast oil circles, is general manager and treasurer of the company. For the past year and a half he has been vice-president of the California Petroleum corporation with supervision over both sales and purchases. Other officers of the company are: C. P. Ritter, president, Olympic Refining Co., Los Angeles, vice-president; J. L. Carman Jr., secretary.

Now testing association records show that the herd of Woodhouse Brothers at Wiley City in the Abutment Valley has paid its owners an average of \$80.00 per head above expenses, so far this year. There were 26 cows in the herd up to the time the brothers dissolved partnership a short time ago, when the herd was divided.

The J. R. Morton herd of registered Jerseys was recently dispersed at public auction sale near Morton. The herd brought a total return of \$2,565. J. Moore of Lincoln Creek topped the sale when he paid \$300 for the cow Cherry Grove's Lass. Fifteen of the cows sold averaged \$171 a head. The two-year-old heifer Juliet's Golden Fawn was second in price, going to K. J. Ward of Centralia at \$295. The larger part of the cattle sold will remain in Lewis County.

## They're Hitting the Public, Too

Drawn by Curtis Perry.

### Moves To Save Public \$30,000,000

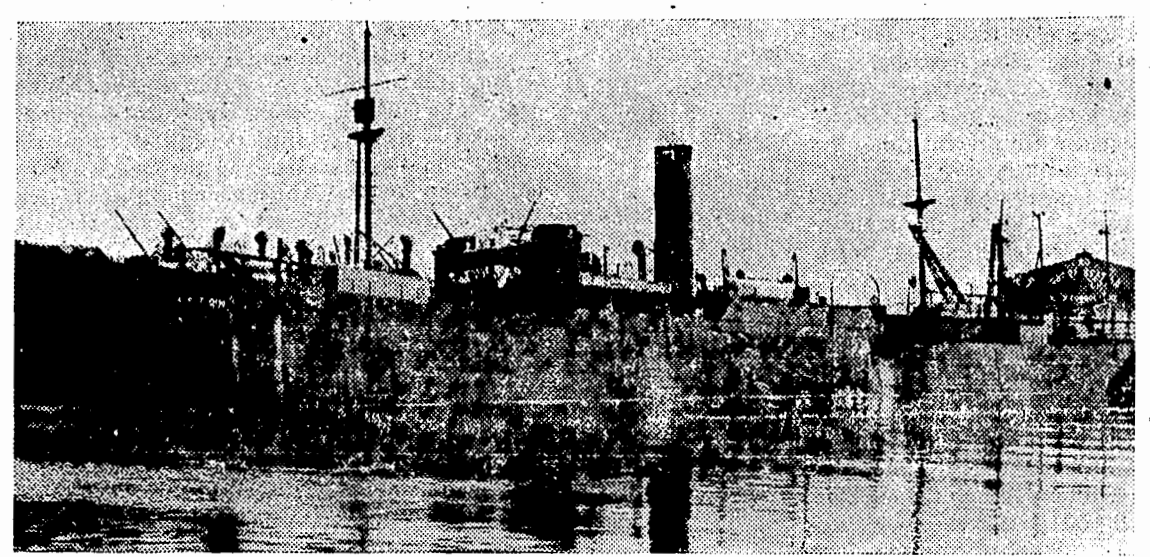

While the income tax fight continues at Washington, The National Board of Fire Underwriters, according to W. E. Maloney, general manager, has begun a campaign against the special taxes levied by the different states upon fire insurance, which amount to about \$30,000,000 annually. In addition to the usual corporation income tax, this sum, it is stated, must necessarily be added to the cost of protection to policyholders, which means the general public.

Besides the regular corporate taxes, it is pointed out, the companies are required to contribute for special levies, fire marshal bureaus, fire departments and relief funds, agents' and brokers' fees, retaliatory taxes and several other levies.

In Ohio, it is found, the fire marshal's office is supported by a tax of 1/2 of 1% of the gross premiums received, although his duties include the supervision of hotels and restaurants. Thus the fire marshal is required, says Mr. Maloney, to see that hotel guests are accorded the full protection of the law governing the length of bed-spreads—a matter which, underwriters hold, is scarcely within the field of fire insurance.

In Kansas, it is recorded, every insurance company is assessed fifty dollars for the public school fund. "In fact," says the Board, "95% of the monies collected from policyholders in 'hidden' taxes is spent for purposes having not the remotest connection with insurance."

## NORTHWEST'S FIRST TANKER ARRIVES HERALDING NEW INDUSTRY

Cut courtesy of Seattle Post-Intelligencer

Besides H. F. Alexander, C. P. Ritter and C. W. Chandler, the directors are Jacques Vinmont, chairman of the executive committee of the California Petroleum Corporation, and partner in Blair & Co., bankers; C. E. Olmstead, vice-president, California Petroleum Corporation; R. Stanley Dale, president, Dollar Steamship Co., other leaders among the stockholders are M. A. Arnold, Seattle banker; Chester Thorne, Tacoma capitalist; Joshua Green, president, Puget Sound Navigation Co.; Herbert Fleishacker, San Francisco financier, and J. L. Carman of Tacoma.

Twenty-six tanks have been erected at Smith's Cove for storage as well as two stills for refining purposes. The plant will have a capacity of 10,000 barrels of crude oil per day. The plant will produce a high grade of gasoline under the name of Olympic gasoline.

## DAIRY

The Intermountain Cooperative Creameries recently filed articles of incorporation with the secretary of state in Idaho. The organization, formed under the cooperative marketing act, comprises the Farmers' Cooperative Creamery, Payette; Nampa Cooperative Creamery Co., Nampa, and the Boise Valley Cooperative Creamery Co., Boise. W. G. Wagner is secretary-treasurer and general manager of the new corporation.

The Gooding, Idaho, cooperative creamery recently awarded a contract for an \$8000 creamery building to E. V. Howard. Work will be commenced at once so that the building will be in readiness to receive the spring rush of milk. Dairying in Idaho is progressing very rapidly. During the past, attention has been largely directed to cheese making in that state, but at the present time butter is becoming a strong rival to the cheese factory.

Willard Turner of Nampa, Idaho, was in Washington last month gathering up two or three carloads of Guernseys. Mr. Turner represents dairymen and breeders of Southern Idaho, and he was assisted in selecting the cattle by H. R. Taylor, secretary of the Washington County Cattle Breeders' Club. In this district the Washington county continues the Washington state will soon be "sold short on the breed."

An alfalfa demonstration held on a new seeding in Mason County shows it to be almost entirely freed of weeds by fall plowing and thorough working in the spring before planting. This method placed the ground in good shape and the alfalfa responded very readily. It was harvested twice the first year it was planted and shows a very fine stand.

The Kraft Cheese Company along with other extensive creamery and cheese factory interests being consolidated in Idaho, has recently purchased the interests of the Burton Creamery Co. in Star Valley. The creamery will be continued under the name of Burton Creamery Co., retaining all old employees, the only apparent change being that J. L. Kraft becomes president in the place of Robt. I. Burton, retiring.

Fur farming in the United States and Alaska is steadily developing and certain phases of the industry are becoming a permanent addition to agricultural production. For the year 1924 there were approximately 2000 fur farmers in the United States and Alaska, the majority of them were raising silver and blue foxes. The total investment in the business is somewhere between \$15,000,000 and \$18,000,000, reports the United States Department of Agriculture.

The Lewis County Jersey Cattle Breeders' Association held its annual meeting recently at which time officers for the ensuing year were chosen. James McCash was elected president; Grant Gleason, vice-president, and A. E. Pines, secretary-treasurer. John Bunker was chosen to fill the place on the board of directors made vacant by the death of Harry O. Leonard. Much promotion activity was planned by the officers for the coming year.

A direct appropriation by the national congress of \$812,822.59 supplemented by an additional \$98,799.72 from the 25 per cent road and school fund, makes \$911,622.31 available during the fiscal year of 1925, for forest roads and trails, to be spent in the State of Washington by the federal forest service. This is over a half million dollars more than was available this year for the same purpose.

## FARM WRITER URGES INCREASE OF U. S. TAX ON UNCOLORED OLEOMARGARINE

I wonder if the dairyman and the farmer and others interested in the agricultural prosperity of the West are awake to the need of continuing the fight to protect the dairy industry from the unfair competition of oleomargarine, writes J. E. Neasey in the Washington Farmer.

I wonder if these people, whose prosperity is dependent upon the dairy cow, are awake to the fact that the powerful interests that are fattening off of the manufacture and sale of oleomargarine in competition with butter, are working all of the time to get a firmer hold on the butter market and to secure legislation favorable to the increased production, sale and consumption of this counterfeit of butter?

I recently learned that the oleomargarine interests that succeeded in defeating legislation to protect dairying in so many states, including Idaho, Washington and Oregon, has succeeded in getting the National Association of Retail Grocers to pass a resolution demanding that all taxes be removed from oleomargarine and that it be permitted to be sold in the open market in competition with butter, with no tax or other restrictions, and that the tax of 10 cents a pound for colored oleomargarine be removed.

Gets a Tip  
I got a "tip" that such a resolution had been passed by the National Association of Retail Grocers and I wrote to H. C. Balsiger, secretary of the association, whose headquarters are Kansas City, and requested a copy of the resolution, which he sent to me.

I wrote to A. M. Loomis, secretary of the National Dairy Association, at Washington, D. C., and informed him of what I had learned. Mr. Loomis was surprised to get this information, as he had heard nothing of it.

So quietly has this work of securing indorsement for the contemplated onslaught on the dairy industry through congress been carried on that the press had not learned it.

Mr. Loomis replied that "this is only another indication of the increasing activity of the oleo interest and ought to put every friend of the dairy industry on his guard."

What Would It Mean?  
I wonder if the dairy interests realize what such a move, if successful, carried out, would mean to the dairy industry? It would mean that the United States would be flooded with a cheap imitation of butter, made to the dairy industry? It would mean that the United States would be flooded with a cheap imitation of butter, made from coconut oil, imported daily from the Philippines and islands, where it has been shown it can be manufactured, placed in cartons and sold at retail for 13 cents a pound, and manufacturer, wholesaler and retailer would make a handsome profit. That would mean the death knell of the dairy industry provided people would buy and eat this stuff.

Those who have seen oleomargarine know that it is white as lard and would not be eaten if placed on the table in that condition.

The federal government provides a tax of 10 cents a pound for colored oleomargarine, while uncolored margarine is taxed at 5 cents a pound, a differential of 5 cents a pound between colored and uncolored.

As stated above, the stuff would not be eaten to any considerable extent if it were placed on the table in its uncolored state.

So to avoid payment of the tax on colored oleomargarine and yet sell the stuff, a little piece of coloring that can be mixed with the snow white stances and give it the color of butter is placed in a small envelope, on the outside of which directions for mixing it are printed, and this is "given" to the purchaser of a pound of oleomargarine.

Twice American Falls Project  
The dam and reservoir at American Falls, has there been built, would have averted these tragedies and other tragedies due to shortage of water on some of the irrigated districts further down. But it would cost about \$10,000,000 to build this dam and reservoir and impound sufficient water to irrigate these lands.

The government did not have the money to carry on the work.

There are other irrigation projects in Idaho that suffered the same fate from the same cause. The Black Canyon dam, at Emmett, in Gem County, was a dream for many years and that dream held hundreds of men and women on desert claims "waiting for water." But the Black Canyon dam and reservoir would cost several million dollars, and the government did not have the money.

And yet the oleomargarine manufacturers defrauded the government, by the simple trick of selling uncolored oleomargarine and giving the coloring to the purchaser, out of \$1,246,362, or enough to have built and equipped all of the proposed irrigation projects in Idaho.

What Would It Mean to Washington?  
What is described as the biggest irrigation project ever planned in the United States lies almost wholly in the Columbia Basin project. It would irrigate nearly 2,000,000 or fertile lands in Eastern Washington—lands that would produce millions of dollars in crops every year, whereas, without irrigation, crops are uncertain and many farms have been abandoned because of this uncertainty. Just as they have in Idaho. The cost was placed at \$19,350,000.

Let us see how long it would take for the tax on oleomargarine to pay for this project—if the government, instead of the oleomargarine manufacturers, got it. It would require less than nine years to pay for the Columbia Basin project. The oleomargarine manufacturers colored all of their margarine and paid the 10 cents a pound tax on it, and the people could take that sum for completing the Columbia Basin project. The "dodging" of this tax on colored oleomargarine means something to the people at Washington, does it not?

What Would It Mean to Oregon?  
I am not as conversant with Oregon as I am with Idaho and Washington, but I know there are a number of irrigation projects that were "turned down" by Secretary Work and Commissioner Mead because there are no funds available to put them through.

Colored Oleomargarine  
The Agricultural Yearbook for 1923 shows that in the fiscal year ending June 30 there was made in the United States a total of 2,850,000 pounds of colored oleomargarine. It is supposed that the tax of 10 cents a pound was paid on this, and that would mean \$28,500,000 paid in taxes on the colored imitation of butter.

If this petition, which is to be presented to congress, succeeds in getting all taxes removed from oleomargarine, we may look for the manufacture of this product to be greatly increased, for it will then be colored and made to more closely resemble butter, of which it is a counterfeit, and the markets will be flooded with it. Men, women and girls will be employed to go from house to house, canvassing and urging the use of this substance. The manufacturers and salesman of oleomargarine will be given a standing of semi-respectability, for they will not have to dodge the law with a trick, as at present, and the dairy industry will receive a blow from which it will be difficult to recover.

The average man and woman will not grasp what this vast sum means simply reading the figures. It takes no longer to say "twenty-one million" than "twenty-one thousand," but there is a vast difference. Let us analyze those figures and see what they would mean to the people of

SELLING BY TELEPHONE  
A flour salesman in Chicago recently sold \$7000 worth of flour by making 126 telephone calls. The calls were all to places in small towns which would not otherwise have been visited.

## Canada's Titled Farmers Till the Fertile Prairies

LADY RODNEY AS BIRTH WITH THE SHEPHERDS

LEO RODNEY FEEDING HIS PIGS IN SASKATCHEWAN, CANADA

Western Canada is becoming very popular with lords and ladies of high degree. From England, France, from Denmark, and from Hungary—to say nothing of those who "break out" as farm hands on a neighboring ranch until they felt that they knew something of the prairies of Alberta and Saskatchewan to prosper on farms or ranches.

Everyone knows, of course, that the Prince of Wales has a large ranch in Alberta, stocked with thoroughbred cattle, sheep and pigs. But everyone does not know that along the shores of the Saskatchewan River at Fort Saskatchewan a twelve room house of graceful architecture and modern throughout has been built on a ranch covering a thousand acres where Lord and Lady Rodney, England, is another pupil.

Rodney's little son John, although only eight years of age, helps his father round the farm and bids fair to being an experienced farmer before he is out of his teens.

One of France's wealthiest noblemen, the handsome Duc de Nemours, who attended the annual ride of the Royal Riders of the Canadian Rockies this summer, was so fascinated with the country round Banff and the Yoho Valley that he is reported to have bought some property and intends to return again next summer. Prince Eric of Denmark, whose marriage to one of Canada's best known society girls was an event much heralded, has expressed his intention of following the example of Lady Farquhar, of London, England, is another pupil.

High Honor for a Washington Boy  
Leadership in community upbuilding has won for Francis Smith, 18-year-old farm girl of Blaine County, Oklahoma, the distinction of being declared the most outstanding member of leadership in the farm boys and girls' clubs throughout the country for 1925. As winner of the second annual national leadership contest, she was awarded the Moses Leadership Trophy, offered by Horace A. Moses of Springfield, Mass., at the boys and girls' club congress in session at the International Livestock Exposition, Chicago.

Honorable mention in the competition was given Kenneth Hinchaw, 19-year-old member of Kilkittick County, Washington, who has been a prime factor in an efficient club for eight years, has been instrumental in improving the livestock of the county and has taken a leading part in developing organizations of both junior and adult livestock growers of Kilkittick County.

Washington's club boys and girls are making red records as leaders, for last year Helen Brown of the Sunset community in Spokane County placed second in this same contest.

Kenneth has been a club member for ten years, sending in a report each year. His club work has netted him a labor return of \$2901.71. His work has been principally with livestock. Club work has brought a splendid record of influence to adults in Kilkittick County.

Kenneth has been state champion in rabbit, garden and sheep club work. He has exhibited products for ten successive years. His achievements in the work include high point winner in judging at the Pacific International Livestock show in 1922, winner of swine showmanship there in 1924; coach of judging and demonstration teams for four years and an active club leader in 1924.

With two other boys, Kenneth showed a large Northwest fair in 1923. The county commissioners of Kilkittick County made an appropriation of \$180 to aid in this project. No adult accompanied the car or made any arrangements for shipping, showing, etc.

When the boys returned from the fair circuit, club members held a county livestock show, of which Kenneth was manager. Exhibits were made by both adults and club members. The boys awarded \$212 in premiums, raising the money by gate and grandstand receipts.

The club instigated the organization of the Kilkittick County Livestock Association in 1923. Kenneth has been a member of the board of directors, and secretary-treasurer of this association.

He arranged the Extension program

## King of the Ballyhoo

RUSSIAN WOMEN SAID TO HOLD GOOD JOBS  
WASHINGTON—Women are rapidly becoming an increasing influence in the political life of the soviet republic, according to figures received here by the Russian Information Bureau. Nearly 50,000 women hold public office in elective bodies in that country, the report shows.

Several women have already attained posts of major importance. The following are listed: Mme. Lenin (Krupskaya), chairman of the department of political education; Mme. Kollontai, ambassador to Norway; Mme. Kameneva, chairman for culture relations; Mme. Trotsky, chairman for the preservation of art museums; Mme. Blizenko, chairman of the cooperative institute.

Within three years the percentage of women members in soviet political bodies has increased from none in the rural areas to about 70 per cent, and in the cities from 8 to 18 per cent.

In France 95 per cent of the telephone exchanges are closed on Sundays.

## 1925 Breaks Record for Building Construction

NEW YORK.—The greatest building year in history has just drawn to a close without evidence of a let-up in the boom. The trend since 1924 has been so definitely upward as to indicate that the country has accepted a new standard in building construction. Engineering News-Record reports, "Total construction for the year 1925 will approximate \$7,490,000,000, breaking all records in the annals of the construction industry. Of this total, \$1,890,000,000 represents construction other than buildings and half of this amount, large engineering construction projects, including roads. The 270,000 individual buildings in the 1925 program total \$5,610,000,000. Of these buildings, 231,000 are residential, valued at \$2,040,000,000. The figures indicate that the boom is confined to buildings. Construction other than buildings has been going forward at much the same rate as in 1924."

Total construction in the United States according to Engineering News-Record's calculations, from 1925 to 1925, was as follows:

1920	\$3,611,000,000
1921	3,569,000,000
1922	4,927,000,000
1923	5,483,000,000
1924	6,012,000,000
1925	7,490,000,000

Study of the various factors that determine new construction indicates another big year ahead. Buildings contemplated amount to \$5,000,000,000. Another billion and a half in contracts may be expected for construction other than buildings. Construction conditions look particularly favorable in the South, where 10 per cent of the big work of the country is in improvement. It also is looked for in the vast region between the Mississippi and the Mountain states.

There are three possible deterrents to be watched: (1) lightning in the money rate; (2) decline in volume of bond sales for public work; (3) abandonment of contemplated engineering construction (not buildings) than a year ago.

Douglas Fir Shipments To Orient on Decrease  
Exports of Douglas fir lumber to Japan during the first 10 months of 1925 were about half that of the corresponding shipment last year, the amounts for 1925 and 1924 being respectively 112,104 M feet and 222,394 M feet, according to figures issued by Axel H. Oxholm, chief of the Lumber Division of the Bureau of Foreign and Domestic Commerce.

A decline of about one-third took place in exports to China in 1925 over 1924, 86,059 M feet and 96,246 M feet being the respective amounts. A notable increase occurred in the shipments to the United Kingdom, 30,603 M feet and to other European destinations 23,864 M feet, the corresponding figures in the 1924 period being only 16,794 M feet and 5774 M feet, respectively. Shipments to Australia amounted to \$118 M feet in the first 10 months of 1925, compared with 68,861 M feet in the corresponding 1924 period, while those to South America also registered an increase.

Frequently we hear of some misguided deaf person taking an aeroplane flight to cure his deafness. Aviators have long known that often in flight their ears seem to "pop open" and the hearing increases. Mountain climbers often say that when they have attained a certain height the "head seems more open."

But what deaf people do not know is that this seeming improvement is only a "seeming"—temporary in character and deceptive.

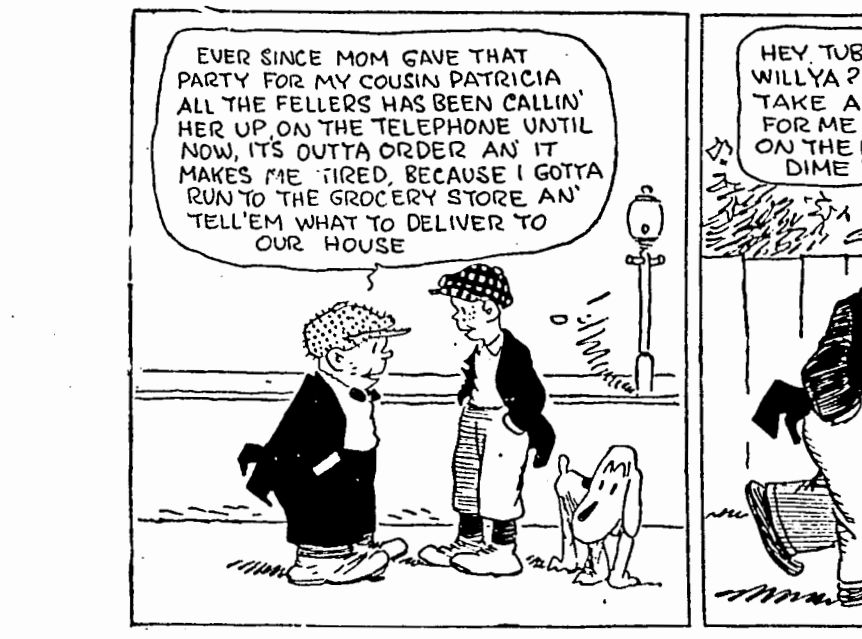

The reason is simple. Beyond the ear-drum there is an air chamber connected with the back of the nose by a small tube. At one point the walls of this tube come in contact, slightly closing the tube. If the tube is small bubble of air is forced every time one swallows or yawns, opening the tube for an instant. But air is composed partly of oxygen, which is slowly absorbed by the blood vessels in the walls of the air chamber, thus lessening the volume in the tube. In time the bubble of air is forced up the tube. If the walls of the tube are swollen or thickened, swallowing may not be forceful enough to force the tube open and the deafness will be permanent.

Here is where the aeroplane enters—for as you ascend the atmosphere becomes rarer, and the air in the air chamber swells, pushing the drum-head back into its place. If the swelling continues, it will force some of the air down the tube to the nose again, thus restoring the hearing momentarily, and the slated joyrider returns to earth stating that his hearing is restored. Soon it is found that the deafness has returned; but the misinformation is not corrected and soon another deaf person attempts to regain his hearing by an aeroplane flight.

The deaf person who discovers that high altitude helps his hearing should live in a high altitude, for of course he cannot remain in the air in an aeroplane. Even then they will have to live in such a manner that they will not have "catarrhal thickening" of the mucous membrane lining the Eustachian tube. For unless air can be forced readily up the tube, the hearing will be impaired.

Try your local merchant first.

**CHURCH NOTICES**

**St. John's Lutheran Church**  
Rev. A. F. Wolff, Pastor  
Sunday school at 9:30 a. m.  
English services will be held each  
Sunday morning at 10:30 o'clock,  
with the exception of the first Sunday  
of each month, when German ser-  
vices will be held at the usual hour.

**Congregational Church**  
Paul W. Sprague, Preacher  
Mrs. W. M. Herman, organist.  
W. E. English, choir director.  
Sunday school, 9:45 a. m. Mrs. Ar-  
thur Hampton, superintendent.  
Morning worship, 11 o'clock.  
Young People's meeting, 7 p. m.

**Christian Church**  
N. E. Beach, Pastor  
Bible school at 9:45. We strive to  
instruct all ages with competent  
teachers.

Preaching at 11 a. m. Subject,  
"The Drag Net."  
Preaching at 7:30 p. m. Subject,  
"The Cross between the Gardens."  
This is a sermon in tableau and song.  
Five gardens will be seen by colored  
lights, thus enabling the audience to  
better retain in memory the teaching  
of the theme. All are welcome.  
A reception will be given the 25  
new members who joined the church  
during the special meetings, on Thurs-  
day night. The social committee has  
arranged an interesting evening of  
games and social betterment.

**Genesee Valley Lutheran Church**  
Rev. Gerh. A. Peterson, Pastor  
Saturday, January 9, 2 p. m. Con-  
firmant instruction.  
Sunday, January 10, at 10 a. m.  
Sunday school and Bible classes.  
Nurse services in the parish hall.  
At 11 a. m. English worship with  
holy communion.  
A cordial invitation to worship at  
these services.

This country is full of great men,  
and many of them are often full.

**Summit News**  
Mr. and Mrs. Ed Taylor and family  
motored to Moscow Wednesday even-  
ing.  
Mrs. Peterson of Spokane spent  
several days last week visiting at the  
James Quayle home.  
Mr. and Mrs. Chas. Grieser and  
children and Wilson Bauer spent Sun-  
day at the Frank Green home.  
Mr. and Mrs. Albert Beckman and  
family spent New Year's Day at the  
home of the Coverdale brothers.  
Mr. and Mrs. Frank Green and  
children spent Wednesday evening at  
the home of Mr. and Mrs.  
Chas. Grieser, Jr.

Frank Wilson returned to Pullman  
Sunday after a two-weeks vacation  
spent at the home of his parents, Mr.  
and Mrs. M. S. Wilson.  
Mr. and Mrs. Dick Green, Mr. and  
Mrs. Lars Liberg, Irene Quayle and  
Edna Green attended the basket  
social given at the Schaffer school,  
Thursday night.

Those that spent New Year's Day  
at the James Quayle home were Mr.  
and Mrs. F. W. Quayle and family,  
Mr. and Mrs. Dick Green and family,  
Mr. John Peterson and son, Raymond,  
of Spokane.  
Ernest Quayle, Lloyd Wilson, Edna  
Green, Mrs. Dick Green and children,  
Mrs. Peterson and son Raymond spent  
Wednesday and Thursday at the F.  
W. Quayle home.

An all day meeting of the Pep club  
members and families was held at  
the home of Mrs. Frank Quayle on  
Wednesday, December 30. The day  
was spent in the making of a quilt  
for Mrs. Dick Green. At 2 o'clock  
the eats were brought forth and every-  
one seemed to enjoy themselves for  
the next hour, at least. The next  
meeting will be with Mrs. Chas. Her-  
man, January 13.

**Card Club Entertained**  
The card club was very pleasantly  
entertained Tuesday afternoon by Mrs.  
Carl Erikson, when pinocle was played  
at six tables, Mrs. Gibson winning the  
honors.

The invited guests were Mrs. Joh-  
anna Christensen, Mrs. Fred Shirrod,  
Mrs. Gibson, Miss Maggie Bottler,  
Mrs. Frank Hoorman, Mrs. Arthur  
Springer, Mrs. Mahlon Follett, Mrs.  
E. W. Vanouck, Miss Mary Sampson,  
Mrs. Otto Kretschmer, Mrs. Viggil  
Sampson, Mrs. Henry Halverson, Mrs.  
George Post and Mrs. V. A. Beckman.

When love goes out of the door  
foolishness generally goes with it.

**Pine Grove News**  
A. Butzian made a business trip to  
Lewiston Monday.  
Mrs. Henry Whitted has been on  
the sick list this week.  
Miss Swanson returned Sunday  
after spending the holidays in Mos-  
cow and Lewiston.  
Mr. and Mrs. Wm. Freeburn and  
family spent Christmas Day at the  
Spurbeck home.  
Mr. and Mrs. Fred Miller and family  
and Mr. and Mrs. Fred Brazier, and  
son, Glen had Christmas dinner with  
Mr. and Mrs. Lee Miller.  
Pearl Lambert and daughters  
Dorothy and Bernice returned home  
Sunday after spending the holidays  
visiting relatives and friends at  
Camas, Wash., and Portland, Oregon.  
A community dinner was enjoyed at  
the Pine Grove school house New  
Year's Day. In the evening an oyster  
feed was given by a group of young  
people from Gray Eagle and Pine  
Grove.

Skating was enjoyed on the Free-  
burn pond Sunday and Monday. The  
ice was slightly covered with snow,  
but we were lucky in having some ex-  
perienced snow-shooters, no brooms  
being necessary either. But the rain  
seems to be the best broom of them  
all.

**Legends of "Sleepy Hollow"**  
John Kluss spent Saturday in Mos-  
cow.  
Joe Grieser was a business shopper  
in town Saturday.  
Mr. and Mrs. Ebel spent Thursday  
evening at the home of John Kluss.  
Mr. and Mrs. Joe Grieser spent New  
Year's Day at the home of John  
Kluss.

Mrs. Andrew Klemm is helping her  
daughter-in-law, Mrs. Jack Kamnitz,  
this week.  
Mr. and Mrs. R. F. Kluss spent  
New Year's Day at the home of Henry  
Manderfeld.

Mrs. J. W. Mosman and children,  
May and Ormand, spent Friday night  
at the home of Mr. and Mrs. Ebel,  
listening to the radio.

**We Have a few Patterns of Wall Paper which we are closing out at 15c Double Roll to make room for Our New Spring Stock Herman's**

**Rimrock News**  
John Roach, Mildred and Lee, were  
Lewiston visitors Monday.  
Ernest Gage spent Monday even-  
ing at the Peter Dallasego home.  
Jessie Kane returned home from  
Mr. and Mrs. Huffman's Saturday.  
Leland Emmett spent Tuesday and  
Wednesday at the E. M. Becker home.  
Dwight Becker left Saturday morn-  
ing for Spokane to attend North-west-  
ern Business college.  
Mr. and Mrs. Barney Meyer and La-  
Vern and Geraldine were guests of Mr.  
and Mrs. Lee Miller.  
School began Monday at the Ingie  
school after a two-weeks vacation.  
W. A. Nixon of Clarkston, who sev-  
eral days ago underwent an operation  
at a Spokane hospital, is getting along  
nicely.  
Mr. and Mrs. Clyde Meyer and  
Bobby were dinner guests Sunday at  
the home of Mr. and Mrs. Peter Dal-  
lasego.  
George and Robert Roskammer  
killed a snake the 26th day of Decem-  
ber, while digging a post-hole on their  
home place.  
A dance and basket social was given  
at the Schaffer school house Thursday  
evening. A large crowd was in at-  
tendance and many baskets were sold.  
Mr. and Mrs. W. J. Baumgartner  
and children and A. W. Beacher were  
entertained at the home of Mr. and  
Mrs. Peter Dallasego on New Year's  
Day.  
Mr. and Mrs. George Baumgartner  
had as New Year's guests Mr. and  
Mrs. Henry Broenneke and children,  
Mrs. Dick Green, Mrs. Wm. Freeburn  
and Wilfred Hasfurter, all of Mos-  
cow.  
Mr. and Mrs. W. J. Baumgartner  
and children and Peter Dallasego and  
Erma motored to Lewiston Monday.  
Mrs. Baumgartner and the children  
and Erma remaining over for a few  
days' visit.  
Mr. and Mrs. Johnny Kries had as  
New Year's guests, Mr. and Mrs. Robert  
McGarvey and children, Joshua  
Hall, Herman Broemmeling, Mr. and  
Mrs. Claud Harpole, Mrs. Art. Hans-  
kan and Gladys.  
Mr. and Mrs. Martin Liberg had as  
guests on New Year's, Mr. and Mrs.  
George McMillen and daughters, Eliza-  
beth, Gladys and Dora of Pullman,  
Mr. and Mrs. William Bell and daugh-  
ter, Emma Jean, of Bend, Oregon, and  
Conrad Bell of St. Maries.  
Mr. and Mrs. L. D. Roskammer had  
as guests on New Year's, Mr. and Mrs.  
Fred Shirrod, Mrs. Johanna Christen-  
son, Mr. and Mrs. Harry Emerson,  
Mr. and Mrs. W. H. Rosenau and chil-  
dren, Martha Luders of Lewiston, Jim  
Keane, Billy Edwards and William  
Roskammer and Stanley Shirrod.

**Potatoes to Tennessee**  
A car of Genesee potatoes will go  
out the first of the week for Tennessee.  
It has also been stated that a car will  
leave about the same time for Hon-  
olulua—indicating that the people both  
east and west know good spuds when  
they see them—and there is a fair  
chance on buying them even when they  
read about them.  
The Genesee non-irrigated potatoes  
are becoming internationally known  
and were quoted on the Chicago market  
at \$1 per hundred higher than were  
western potatoes. When you say "Idaho  
potatoes" it means all there is in  
the best of potato flavor, and when you  
say "Genesee non-irrigated potatoes,"  
it means the last word in the aristoc-  
ratic spud vocabulary.

"Mother, you're the bestes' cook in  
the whole world!"

What gives a mother greater pleasure than to make the kiddies  
happy with the goodies she prepares for them.  
And how simple it is with a Monarch range in your kitchen!  
A Monarch oven is ready for any kind of baking in remarkably  
quick time—and with such little fuel.  
A hot oven—a slow oven—a range that gives any service the oc-  
casion demands, and continues to do so for years to come.  
To insure such service, the Monarch is built of unbreakable mal-  
leable iron, so it can be riveted—the only way to avoid air leaks  
that cause fuel to waste and cooking failures.  
There is no economy in using the old range even if it can be made  
to do another year. Visit our stove display today and let us explain the  
many advantages and exclusive features of the Monarch range.

**Has further Hardware**

**PUBLIC SCHOOL NOTES**  
OF MUCH INTEREST  
(Continued from first page)

perfect attendance in this room on  
Monday.

A general review was made of most  
of the subjects in both grades over  
some of the work to be taken up be-  
fore vacation.  
The fifth grade has begun the study  
of Australia in geography. The pu-  
pils are making outline maps for seat-  
work.  
Denny Gordon and Lucille Wishard  
were absent on Tuesday.

**Third and Fourth Grades**  
School work has resumed after the  
holidays with good interest. Everyone  
was present Monday morning and  
ready for work.

Since our Christmas activities are  
over we are now going to concentrate  
our efforts on some really good, hard  
school work.

We have inspection every morning  
for clean hands, clean face and neck;  
clean teeth; and well combed hair.

The fourth grade is divided into two  
teams, the "A's" and the "B's". They  
have a health chore baseball game.  
The "A's" won the last game.

Our room was awarded the hono-  
rary picture for having the most per-  
fect attendance last month.

**First and Second Grades**  
We have now completed four  
months of school and our attendance  
the past month has been the best we  
have had.

The following pupils were neither  
tardy nor absent during the month:  
Betty Lou Burr, Raymond Cameron,  
James Dresher, Neva Erickson,  
Charlotte Foster, Elbert Hollings-  
worth, Paul Osmundson, Clara Mil-  
ler, Louise Wishard, Margaret  
Springer, Genevieve, Genevieve,  
Grant Longstadt, Glen Mayer, Morley  
Platt, Donald Rader, Emma L. Van-  
ouck, Howard Nesbitt, Burton Eng-  
lish, Winifred Dean and Viola McAl-  
lister.

Wilda Ericson and Raymond Cam-  
eron have left the first grade. Wilda  
will attend school at Spokane and  
Raymond at Troy.

**Stolen Goods Are Recovered**  
The goods taken from the Follett  
Mercantile company's store here on  
the night of November 3, 1925, have  
been recovered by Sheriff Chas. Hat-  
field and returned to the owners,  
the lot having been found in the  
woods near Princeton Saturday night.  
While somewhat damaged, the goods,  
consisting of two leather coats, five  
pairs of shoes, several pairs of pants,  
blazer shirts, wool and dress shirts,  
socks and gloves, are in fair condition  
and while a small loss will be suffered  
the store is indeed glad to get the  
goods back.

After the store had been robbed it  
was very evident that the robbers had  
headed for Spokane and that the  
Summerfield and returned to the  
various tractors and tractor engines.  
Several tractors will be dismantled  
and examined under skillful super-  
vision. Two days will be devoted to the  
automobile.

Such work as soldering, habitting,  
brazing, case hardening and the use  
of taps and dies will be taken up.  
Special emphasis is to be laid on  
valve timing and ignition systems.  
Further information may be secured  
from the department of Agricultural  
Engineering, U. of I., Moscow.

**Member U. of I. Rifle Team**  
Frederick Baumgartner has been  
named on the University of Idaho  
rifle team, according to Lieut. C. H.  
Hart, jr., in charge of the team. Mr.  
Baumgartner is a member of the Idaho  
unit of R. O. T. C. and will be  
eligible for commission in the regu-  
lar army reserve upon completion of  
four years' work with the corps.

Forty-five men were named on the  
team, but after the end of this week's  
practice the squad will be cut to 30.  
The first intercollegiate contest will  
be against Washington State college,  
January 11. The teams will shoot on  
their own ranges and the scores will  
be exchanged by telegraph for com-  
parison to determine the winning  
team.

At the close of the school year, the  
seven high scorers on the Idaho  
team will be awarded medals, inscribed  
with the winner's name and his score  
ranking on the team.

**Dance Was Success**  
The New Years dance given by the  
Knights of Pythias in the American  
 Legion hall, was a decided success from  
every angle. A large crowd was in  
attendance, dancing beginning at 9  
o'clock and ending at 2 a. m., and all  
seemed to have a splendid time. The  
crowd present was estimated at 200.  
Lunch was served at 11:30 by mem-  
bers of the Rebekah lodge—and every-  
one knows what that meant.

**Congregational Aid**  
The ladies aid of the Congregational  
church will meet with Mrs. F. S. Case-  
bolt on Wednesday, January 13. She  
will be assisted in entertaining by  
Mrs. Al Mayer.

**American Legion Dance**  
A social dance will be given in the  
American Legion hall on Friday night,  
January 15. Allen's orchestra will ar-  
range the music. Everybody invited.

**ANOTHER COYOTE CLUB—**  
**TWO PELTS BROUGHT IN**

Word was brought to the News of-  
fice by special courier Wednesday  
evening that a new Coyote club had  
been organized and that they at once  
got busy and brought in the pelts.

It seems that word had reached the  
regions to the north of town that  
coyotes were becoming a menace to  
the country to the south of Genesee—  
that there were numbers of the large,  
vicious variety inhabiting that section  
—so Sam Lange, Oscar Danielson, Vic,  
Danielson and Norman Flameo—all  
being brave men—scoured up their  
old flint locks and went out in quest  
of the wary animals, Wednesday af-  
ternoon, and that as a result they  
brought in two pelts. They said they  
could easily have killed more but they  
didn't want to take all of them away  
from the other members of the hunt-  
ers who sometimes range in that sec-  
tion of the country.

Brigadier General Buffalo Bill Rader  
and Private Fat Sampson of the  
Genesee Coyote club have been telling  
very interesting tales of how wild and ter-  
rific the coyotes to the south of town  
are—which is how it be the reason they  
were afraid to go after them.  
And Captain Lundt of the Rimrock  
Coyote club has also said that it was  
very dangerous to be out in that sec-  
tion alone as the coyotes were going  
around in droves of one and two, mak-  
ing it decidedly dangerous.

Later—General Rader is all worked  
up over the report that Lange and his  
bunch of mighty hunters had invaded  
their coyote party, saying that the  
cow creekers have no business think-  
ing around in the coyote country, that  
he and Fat Sampson have been work-  
ing all summer and fell trying to tame  
them so they could get up to them—  
and then to have all their plans upset  
—well, he says it is a fit case for the  
humane society and that he is think-  
ing very seriously of reporting them  
to the authorities.

From all indications the rivalry be-  
tween the three coyote clubs will be  
keen and the outcome is awaited by a  
nervous public. It has been hinted  
that there may be possible "blood  
shed."

**Two Weeks Tractor Course**  
The annual two weeks tractor short  
course will be held this year from  
February 1 to 13 according to an an-  
nouncement today from the college of  
agriculture.

Announcements of the course in-  
dicate that it will be similar to the  
curriculum of previous years except  
that the character of the instruction  
now will be somewhat more elaborate.  
Seven tractors, five of them new  
models loaned by the manufacturers,  
will be used and representatives of  
soy and grain, and operation of the  
second week to give a field  
demonstration. An oil company rep-  
resentative will also attend.

Instruction will include illustrated  
lectures, demonstrations, and labora-  
tory work will be given on the com-  
position Sheriff Summerfield, after  
having secured a description of the  
men from Gus Fickens, who had seen  
them here, he went to Spokane and  
within a few days had them in the  
toils.

The two men who did the "job" here  
were E. M. Clark and Ralph Bicker,  
the latter a deserter from the army  
and the former on parole from the  
reformatory and they were returned  
to the army and state, respectively.  
Bicker will serve five years in the  
reformatory.

The men were members of a gang  
thieves that had been robbing stores  
and garages in different parts of Idaho  
and Sheriff Summerfield and his  
deputies have virtually wiped them  
out—so far as being in a position to  
rob concerned, and he is to be com-  
plimented and commended on his  
splendid work.

After the meeting a feed was served  
which was attended by the wives,  
families and friends of the members.

**Some Fog**  
The fog was so thick Thursday  
morning that it was reported that  
Covey Elinch "shofer" for this  
section of the highway, had to get the  
snow plow out to open it up so traf-  
fic could be handled with safety.  
One fellow said the fog caved in on  
the back end of the caterpillar and  
nearly put it out of business—and he  
isn't a member of any of the coyote  
clubs, either.

**PERSONALS**  
Dwight Becker has gone to Spokane  
to enter Northwestern Business col-  
lege.  
T. Driscoll and daughter, Miss  
Edna, have gone to California for the  
winter.  
W. W. Gray left Tuesday for Cal-  
ifornia where he will spend the re-  
minder of the winter.  
Miss Margaret Sampson left Mon-  
day for Lewiston where she has en-  
tered Lewiston Business College.  
Albert Anderson left Wednesday  
for Spokane where he will again be  
a student at Northwestern Business  
college.  
Mr. and Mrs. Chas. Westensee left  
for their home in Colville Sunday  
after having spent a few days here  
visiting friends and relatives.  
Rev. N. E. Beach returned Tuesday  
from Kendrick where he had been cal-  
led to conduct funeral services for  
Mrs. Mattie Palm, and old-time friend  
of the Beachs.  
Mr. and Mrs. Joe Hasfurter left  
Tuesday for a visit at coast points  
after which they will continue their  
journey to California where they will  
spend the "winter".

**Dance at Danielson School**  
There will be a dance at the Dan-  
ielson school house tonight (Friday,  
January 8). Everybody is invited to  
come. 28-1

Were the "Berrys"  
Colonel Berry was the camp com-  
mandant and his wife and two daugh-  
ters, returning from town, were re-  
fused admission to the camp by the  
sentry, who was a rookie. Arguments  
were of no avail and at last one daugh-  
ter said haughtily: "Don't you know  
us—we're the Berrys." "I don't care  
if you're the snake's hips, you gotta  
stay out," replied the sentry.

**DRESS GOODS SALE**

For the next two weeks we will place on sale our entire line of wool-  
en and silk dress material at big money saving values. This is a  
money saving opportunity on stylish, seasonable materials which are  
very useful.

**SILKS**

40 inch flat crepe, regular price \$3.00. Sale price.....	\$2.45
40 inch Canton crepe, sale price.....	\$3.35
All 26 inch chiffon taffetas, sale price.....	\$2.15
36 inch black satin, sale price.....	\$1.95
54 inch silk knit material for princess slips, sale price.....	\$1.78
36 inch silk tubing for vests, sale price.....	\$1.38
40 inch Crepe de chine, sale price.....	\$1.73
36 inch messalines, sale price.....	\$1.68

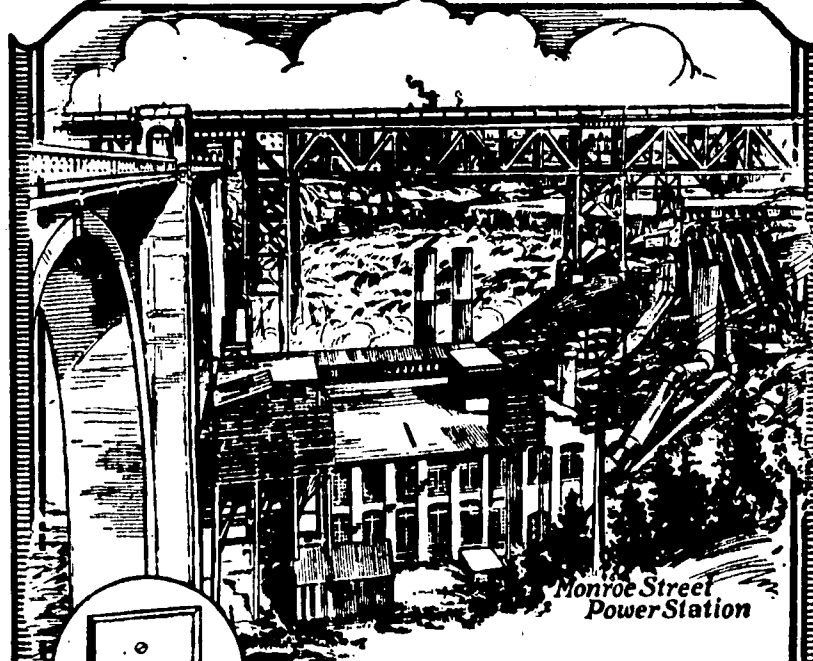

**WOOL DRESS GOODS**

36 inch all wool serge, sale price.....	\$1.10
56 inch poirett twill, sale price.....	\$3.88
56 inch stripe poirett twill, sale price.....	\$3.48
56 inch french flannel, sale price.....	\$2.98
54 inch stripe flannel, sale price.....	\$2.68
56 inch heavy plaid flannel, sale price.....	\$2.95
54 inch heavy check flannel, sale price.....	\$1.98
56 inch wool tweed, sale price.....	\$1.98

MANY OTHER MATERIALS WILL BE ON SALE AT GREATLY  
REDUCED PRICES

**SHOES**  
ALL WOMEN'S AND CHILDREN'S SHOES GO ON SALE AT A  
DISCOUNT OF 10%

**Follett Mercantile Co.**

**"White Coal"**

**SURGING WATER** about the  
hydro-electric station inspired one  
man to describe the current gener-  
ated as "White Coal." Delivered to  
the consumer through small wires,  
this "fuel" insures cleanliness, con-  
venience and continuous service.

¶ The Monroe Street installation is  
the oldest power plant of the seven  
hydro-electric stations which are  
pouring their energy into the system  
of this company. The water falls  
72 feet through the penstocks to  
give the generators an installed ca-  
pacity of 11,800 horsepower. Built  
in 1890, this station is still at work,  
insuring instant current when you  
push the button to enjoy Electric Service.

You Are Invited To Visit This Plant

Washington and Idaho

**CLASSIFIED**

**REPRESENTATIVE WANTED**  
LADY or GENTLEMAN representative for the sale of a "new" work in the world or part time. Franchised territory. Electric Turkish bath by attaching to electric plug. No plumbing. No heat. Write to: "Electrotherm," 1111 Broadway, New York, N. Y.

**MISCELLANEOUS**  
NEW POISONING METHODS—KILL flies instantly. "Fly Killer," 1111 Broadway, New York, N. Y.

**ECONOMY EYE SAVING XMAS**  
presents. 12 years old turn night into day in 30 seconds with diamond quality jewel lamps and lanterns. Costs less than 10¢. "Economy," 1111 Broadway, New York, N. Y.

**NURSERY STOCK**—ALL KINDS: apples, cherries, plums, peaches, grapes, etc. Write to: "Nursery," 1111 Broadway, New York, N. Y.

**CASH for dental gold, platinum, silver, diamonds, mounted points, false teeth, dentures, etc.** Write to: "Dental," 1111 Broadway, New York, N. Y.

**HELP WANTED**  
LEARN the Barber Trade. Barber are in demand and pay you a small amount while learning. Small shop. Write to: "Moller Barber College," 1111 Broadway, New York, N. Y.

**Killing the Farmers' Friends**

"When an Iowa farmer complained that the game department killed two birds, examined their crops, and found 200 cutworms—and no corn," says Western Farm Life. "Almost without exception, when the scientists investigate such cases, they find the same result. We often owe our crops to the feathered police that keep down the bugs, insects and worms. With continuing slaughter of every form of bird life, the insect loss will be heavier and farm work harder. The nation could train an army of riflemen in a comparatively short time, but it couldn't in a century restore the bird armies that are the farmers' allies in raising food to feed the country."

**Out-of-town people like Jack White's Tri Tavern** because it's so homelike and the food is like they get at home. Try it next time you are in Spokane. —Adv.

Keep your dollars home where you can watch them.

**PRESENT LEVEL OF PROSPERITY WILL CONTINUE, SAYS HERBERT HOOVER**

Any business forecast must be simply an appraisal of the forces in motion at home and abroad, for and against progress. All signs indicate that it will remain our optimism with a sprinkling of caution we shall continue our high level of prosperity over 1926.

The United States has produced and consumed more goods in 1925 in proportion to population than ever before in its history. Our standard of living has therefore been the highest in our history and is of course the highest in the world. The improvement, however, has been greater in the urban centers than in agricultural communities.

The dominant favorable factor in our outlook is our increased productivity, due to fundamental and continuing forces—such as the accumulation of education, the advancement of science and skill, and elimination of waste. Other favorable indications on the immediate horizon are that the stocks of commodities are moderate there is employment for practically everyone; real wages are at a high level; savings are the largest in history and capital is therefore abundant; and the whole machinery of production and distribution is operating at a higher degree of efficiency than ever before.

The most remarkable thing about the foreign trade of the United States is that, after making allowances for the higher level of prices, both exports and imports are much greater than before the war, in contrast with the quantitative decrease in the trade of the other foreign countries. According to British calculations the exports of that country were in physical volume nearly 25 per cent less in 1925 than before the war, and Germany's exports have fallen off still more.

In finance, the year has been characterized by steady and comparatively easy money conditions, the issuance of a large volume of both domestic and foreign securities, and by an extraordinary rise in the prices of stocks accompanied by marked speculation on the New York Stock Exchange. This fever of speculation is also widespread in real estate and unless our financial policies are guided with courage and wisdom, this speculation may yet reflect into the commodity markets, thereby reversing the cautious buying policies of recent years.

The construction industries have played a very large part in the high business activity of the past three years. The volume of construction has been unprecedented during the past year with consequent great activity in the construction-material industries, iron, steel, lumber, cement, etc. Contrary to normal expectations the increased demand has not increased prices, for there has been a slight reduction in building costs due in a large measure to the gradual lengthening of the building season. The increasing Federal, state, and municipal public works programs for next year, particularly in view of the continuing demand for heavy construction. While it might be thought that the war deficiency in housing has been overcome, yet the high real wage in industry creates a demand for better housing and this condition, combined with the migration to suburbs due to the motor, promises to continue as long as employment remains general.

We could hardly expect so exceptional a construction activity to repeat itself, but there will be a large volume in any event. The textile and shoe industries as a whole are running at high levels of production, although the tendency in some branches of these industries to develop more rapidly in the South and West is affecting New England and readjustment of her economic relationships. The automobile and tire industries will record an unprecedented output. The coal industry shows increased production despite the anthracite strike and the production of all other minerals has increased.

In transportation, our railways are giving the best service in our history and are recovering in average earnings to near the Interstate Commerce Commission standard of earnings of five and three-fourths per cent. There is some improvement from the acute depression in the shipping world; and progress has been made in plans for internal waterway improvement. The electrification of the country has made further great strides during the year toward central generation and interconnection. There has been some pyramiding of

power holding companies, much criticized within the electrical industry itself, but the solid progress of the industry is marked by the extension of use of electricity with all its economies in production of goods and saving of labor. Furthermore, taking the country as a whole, there has been a reduction in rates for power and light indicating that the public is securing benefits from the economies introduced in production of electricity.

Our foreign trade in 1925 has been exceptionally satisfactory. Both exports and imports have risen materially, the former reflecting an increase in agricultural exports and the latter reflecting the large demand for foreign raw materials and tropical food-stuffs. Exports will total about \$4,000,000,000 or about 7% more than in 1924. Our imports will amount to about \$4,200,000,000 or approximately 17% more than in 1924. Roughly, one-half of this increase in both exports and imports is attributable to greater quantities exported, and the remainder to advance in prices. The major explanation of our favorable trade balance is, of course, to be found in the continued heavy investment of American capital abroad; in essence we are lending foreigners the where-with-all to buy goods from us, or are sending goods to convey our investments abroad. It is probable that the final figures will show that our foreign investments during the year by more than a billion dollars.

The most remarkable thing about the foreign trade of the United States is that, after making allowances for the higher level of prices, both exports and imports are much greater than before the war, in contrast with the quantitative decrease in the trade of the other foreign countries. According to British calculations the exports of that country were in physical volume nearly 25 per cent less in 1925 than before the war, and Germany's exports have fallen off still more.

At PUNCHAL, first stop of the Empress of France on its Mediterranean cruise, there are dozens of shops where this embroidery is sold. The natives also make intricately woven baskets and reed furniture, but furniture is not easy to carry round on a cruise, and even baskets are somewhat cumbersome, although there is scarcely any limit to the amount of luggage long suffering steamship companies allow their passengers. It is in the narrow streets of PUNCHAL, with small, round topped stones laid in geometrical designs, that the tourist usually makes his purchases. Sometimes if luck is with you, you may be able to buy an exquisite piece of handwork from a pretty woman embroidering in her fragrant garden. But if you are a bachelor, remembering the fate of Columbus and beware the fair maids of Madeira. It is not even necessary to set foot on the soil of Madeira to buy the tempting native products, for hundreds of small boats, with natives vociferously displaying their wares, come dancing over the waves to meet the cruise steamers. But the prices are not so reasonable and the handwork not so fine as in the shops along the narrow, queerly paved streets. Then, too, it would be a pity to miss a ride in the peculiar toboggan sleds which are the chief means of transportation down PUNCHAL's big mountain. Terreira da Lueta.

**Shopping at the Madeira Islands**

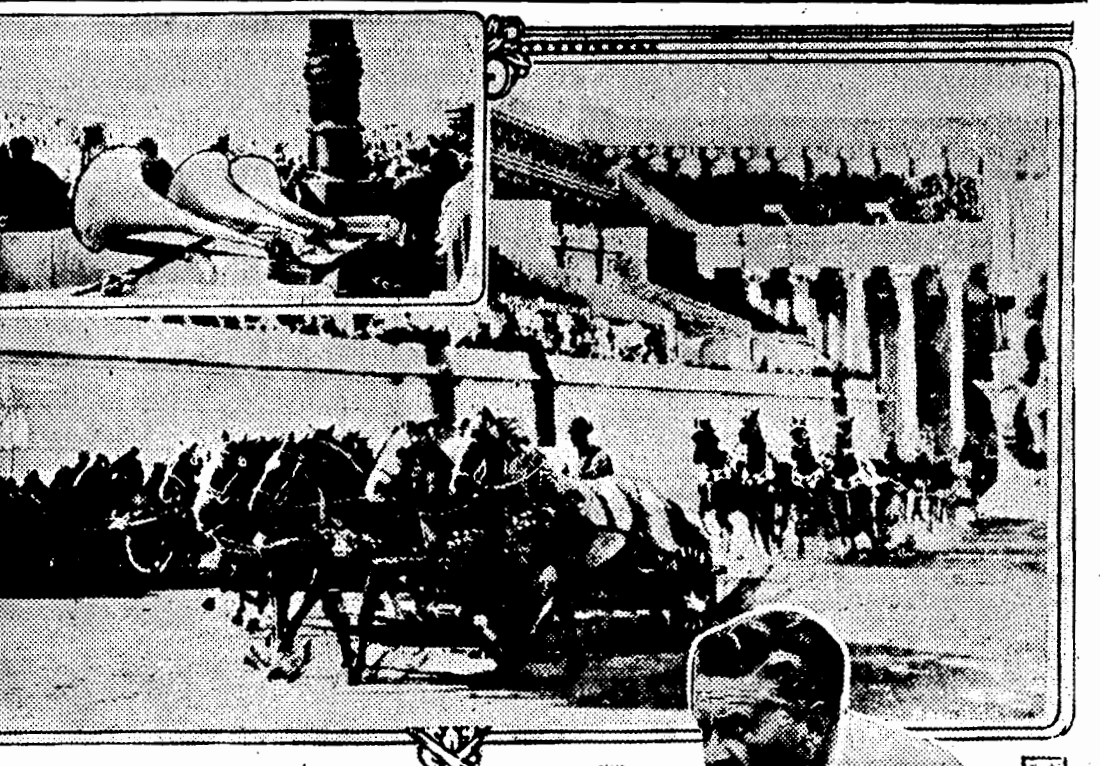

STATUE OF ZARCO, FUNCHAL. EMPRESS OF FRANCE, IN MADEIRA BAY

To buy, or not to buy—that is the question. This a simple question to answer at the Madeira Islands, where cruise boats usually make their first stop, because everyone knows the fineness of the embroidery which have done as well to advertise the pretty little islands where Columbus chose his wife! The difficulty is, which piece of the thousands displayed should be selected. Madeira lace comes in many varieties, from the simple, plain, and if you have tiny friends or petite nieces at home you will find it a most desirable little baby dress or the sheerest linen and daintiest embroidery.

Adopt New System for Dairy Club Meetings  
The Sunnyside-Outlet Dairy Club in Yakima County has adopted a new plan to make the regular meetings interesting. Each club member is held responsible for giving a paper on some F. M. Yockey, club leader, reports subject relating to dairy. After success and the plan will be used in the paper is given, each member is held responsible to give his opinion of the topic under discussion. Thus each subject chosen by another member, is kept your dollars home where you can watch them.

**One Man's Voice Directs 10,000 Players**

Fred Niblo directs the Chariot Race in "Ben Hur." Concealed horns carry his voice to the entire scene.

Accurate direction of ten thousand players in a tumultuous moving picture scene is exceedingly simple. But it is simple only because all the apparently insuperable obstacles are overcome through the application of a Public Address System. The largest moving picture set yet built has been made the background of the Antioch Circus episode and the culminating chariot race in which a dozen drivers with teams of four horses each take part. The management of such a sound project in which a dozen drivers with teams of four horses each take part. The management of such a sound project in which a dozen drivers with teams of four horses each take part.

"Ben-Hur" is being produced by Metro-Goldwyn-Mayer under the direction of Fred Niblo. The set and every piece of equipment is arranged a central directing tower, where a microphone was placed. A special assistant, Charles F. Siale, repeated every direction into the microphone; his words were led to vacuum tube amplifiers controlled by Western Electric engineers, and were issued from sound projectors concealed in every part of the widespread scene. Each sound projector covered completely a radius of three hundred square feet. Directions for players were not in the form of a script, but the grandstand were issued from horns hidden beneath the ledges of the stand and turned outward so that the chariot drivers could hear plainly. In this way Mr. Niblo had at his finger tips absolute control of every part of the set and every player. Even with the roar of the racing chariots and the natural and rehearsed cheers and cries of the throngs, the loud speakers were always heard. A special audience of leaders in the rose to a height of more than three hundred feet. Fifteen thousand feet of wire were used to link the various sound projectors, and forty-two cameras, with staff working time, were all able to hear clearly at all times. Such auxiliary departments as the stables, costume department, commissary and others were also kept directly informed by means of the system. A troop of fifty-four cavalrymen and horses was loaned by the United States Army to act as extra riders and these men took part in the picture as the Roman Imperial Mounted Guard. As a technical adviser a group of former army officers was present, among them Lieut. Col. E. R. Ball, retired.

**PRESIDENT'S AGENT RECOMMENDS DIVISION**

H. G. DALTON of Cleveland, Ohio, whom President Coolidge appointed as agent before the Shipping Board controversy, recently submitted his report to the President, recommending the complete separation of the Fleet Corporation from the Shipping Board. Mr. Dalton suggested that the head of the Fleet Corporation be entrusted with the operation of the government merchant fleet under a board of directors including the secretaries of War, Navy and Commerce, the postmaster-general, and perhaps three regional representatives from the Atlantic, Pacific and Gulf States, who would serve at the pleasure of the President. This plan would leave the Shipping Board as a semi-judicial, regulatory body, without administrative powers. Mr. Dalton was appointed by the President on September 30 to make the study, as his personal representative, of the controversy between the Shipping Board and Admiral Leigh C. Palmer, president of the Fleet Corporation. Subsequently, Admiral Palmer was shorn of his powers and then offered a minor post, which he rejected. The recommendations of Mr. Dalton, forward largely to those put forward by Secretary Hoover in a recent address before the Merchant Marine Commission in Congress, and the Commerce of the United States, and are generally understood to be in line with deductions tentatively drawn by the administration on the shipping situation. It has developed meanwhile that a proposed one-man control of the Fleet Corporation would meet sharp opposition in the Senate from those advocating the present regional plan of representation on the Shipping Board and its maintenance as an independent government agency with the administration of the merchant fleet under its direction. Under the Dalton plan cooperation of the War, Navy, Commerce and Postoffice Departments in the management of the Fleet Corporation would be utilized in determining among other things the types of ships to be maintained in the different routes. The Commerce Department also would be consulted particularly about trade routes to be established and maintained, and the Navy Department's advice would be especially considered on questions concerning the naval reserve. Mr. Dalton made it clear that he favored private operation of the merchant fleet which carrying of surplus ships particularly about trade routes and suggested consolidation of a number of services as an economic measure, while removal of the restrictions forbidding the railroads to own and operate ships in international trade, he believed also would be helpful.

**Hot Lunches for School Children**  
UNIVERSITY OF IDAHO, Moscow. Nutrition groups in various parts of Idaho are planning to send at least one hot dish for school lunches, according to Miss Marian Hepworth, state home demonstration leader.

The P.T.A. nutrition class at Post Falls has taken the lead and has made definite arrangements providing for employment of one of their own members, Mrs. S. E. Bennett will prepare one hot dish for school meal each day. It is time, Miss Hepworth believes, for many groups and individuals to begin thinking about the plan as a large factor in aiding school children to meet requirements made in their daily curriculum. "The school lunch dish," she says, "does not need to be a burden to anyone but may be prepared as suggested by the Post Falls P.T.A., or where there is no one in immediate charge and the school equipment does not make provision for it, the hot dish may be planned at home by the women, alternating from day to day, and re-heated at school.

"The following dishes are suggested: cream soups, scalloped vegetables, or cocoa. The warm dish on noon may be a large factor in maintaining health standards and in keeping school children properly nourished."

Recently 12 cars of beet seed, grown in the Skagit Valley, were shipped by a Mount Vernon firm to the Eastern market. This shipment is, according to the Argus, the largest single shipment of beet seed ever dispatched from the valley. The Skagit Valley is famous as a garden seed growing center. The school lunch dish," she says, "does not need to be a burden to anyone but may be prepared as suggested by the Post Falls P.T.A., or where there is no one in immediate charge and the school equipment does not make provision for it, the hot dish may be planned at home by the women, alternating from day to day, and re-heated at school.

Recently 12 cars of beet seed, grown in the Skagit Valley, were shipped by a Mount Vernon firm to the Eastern market. This shipment is, according to the Argus, the largest single shipment of beet seed ever dispatched from the valley. The Skagit Valley is famous as a garden seed growing center. The school lunch dish," she says, "does not need to be a burden to anyone but may be prepared as suggested by the Post Falls P.T.A., or where there is no one in immediate charge and the school equipment does not make provision for it, the hot dish may be planned at home by the women, alternating from day to day, and re-heated at school.

## Security, Protection, Independence, Happiness

Every man, woman and child should have a savings account in some bank. It brings a sense of Security, Protection and Independence that means added Happiness to all.

It is your duty to start today. The size of your first deposit is of minor importance—the big thing is to plan to add to it regularly.

Our part is to get you started right and then add a 4 per cent interest to your deposits every six months.

4% on Savings

# A BUSINESS OF YOUR OWN

Somewhere in the back of your head have you the idea of owning a business of your own some day?

**Your Great Need is Capital!**

There are two ways you can get it—and a bank account has to do with both of them: Save and deposit money and you will soon accumulate the necessary amount of funds. You will also build up a credit that will aid you very materially in carrying on a business.

*Your business will be appreciated.*

C. P. WHALEN, Cashier

## A LITTLE TALK ON THRIFT

At this time of the year much attention, and rightly so, is being given to the subject of charity in our various cities and towns. Campaigns and drives are everywhere in progress for those who are in distress.

In this commercial age, it is well that these softening and mellowing factors are brought into our daily life. In the rush of business and other activities it is natural to grow thoughtless of those who are in need of help and no community ever will go amiss in giving attention to philanthropic activities.

It is not out of keeping with the occasion, however, to bear in mind that much of the poverty and want in the world is due to lack of thrift, and that the spending of time and money on thrift education is an excellent way of preventing human suffering.

An ancient savant, discoursing on the subject of philanthropy, wrote that by aiding a man "so that he may earn an honest living and not be forced to the dreadful alternative of holding out his hand for charity—this is the highest step and the summit of charity's golden ladder."

Encouragement in the practice of thrift is the best way to "anticipate charity by preventing poverty."

There always will be those who through accident, illness or some other misfortune or their own folly are dependent upon the alms of others. But, just as a large percentage of fires, illness and accidents can be prevented, so a very large part of dependency on charity is preventable.

To alleviate suffering and penury is an act worthy of the highest commendation. "The quality of mercy is not strained, it droppeth as the gentle rain from heaven upon the place blest."

But to forestall poverty by inspiring thrift is even more praiseworthy. It is better to prevent suffering than merely to alleviate it.

**Christmas Eve Bread**  
According to an old superstition, bread baked on Christmas Eve will never become moldy.

**Notice of Annual Meeting**  
The annual meeting of the Latah County Farmers Mutual Fire Insurance Co. will be held in the company's office, at Troy, Idaho, January 12, 1926, at 1 o'clock p. m., and at 2 o'clock p. m. of the 13th, 14th and 15th of January, 1926, at 2 o'clock p. m. of said day, at the court room of said court, at the court house in the county of Latah, and be appointed as the time and place for proving the will of said Jennie Paulson, deceased, and for hearing the application of Elmer M. Paulson for the issuance to him of letters testamentary, when and where any person interested may appear and contest the same.

Dated this 19th day of December, 1925.

ADRIAN NELSON,  
Probate Judge.  
H. R. Smith, Moscow, Idaho,  
Attorney for Petitioner.

**Notice for Publication of Time Appointed for Proving Will, Etc.**  
In the Probate Court of the County of Latah, State of Idaho.  
In the Matter of the Estate of Jennie Paulson, Deceased.

Pursuant to an order of said Probate court, made on the 19th day of December, 1925, notice is hereby given that Thursday, the 14th day of January, 1926, at 2 o'clock p. m. of said day, at the court room of said court, at the court house in the county of Latah, shall be appointed as the time and place for proving the will of said Jennie Paulson, deceased, and for hearing the application of Elmer M. Paulson for the issuance to him of letters testamentary, when and where any person interested may appear and contest the same.

Dated this 19th day of December, 1925.

ADRIAN NELSON,  
Probate Judge.  
H. R. Smith, Moscow, Idaho,  
Attorney for Petitioner.

# The Ministry of Song

by O. Lawrence Hawthorne

Do not deny your little ones  
The blessed ministry of song.  
The days of childhood are so brief  
And after years are often long,  
Sweet memories of long ago,  
And in our hearts we live again  
Those happy times we used to know.

The songs my mother sang to me,  
The songs I sang in later years,  
So closely bind me to my youth  
I find it hard to check the tears  
When now I hear their soft refrain.  
How fine that sentiment that clings  
In wistful loyalty to home  
And memories that music brings!

**Hall's Catarrh Medicine**  
Those who are in a "run-down" condition will notice that Catarrh bothers them much more than when they are in good health. This fact proves that while Catarrh is a local disease, it is greatly influenced by constitutional conditions.

HALL'S CATARRH MEDICINE is a combined treatment, both local and internal, and is successful in the treatment of Catarrh for over forty years.

Prepared by Dr. J. Cheney & Co., Toledo, Ohio.

# THE GENESEE NEWS

VOL. XXXVII GENESEE, LATAH COUNTY, IDAHO, FRIDAY, JANUARY 15, 1926 NO. 29

**THE GREAT STATE OF IDAHO AND HER RESOURCES**

Idaho produced more than \$6,000,000 worth of clover and alfalfa seed in 1924 when she took 50% of all the prizes offered at the international seed show held in Chicago, in competition with all the rest of the United States and Canada, and for the past five years in succession she has averaged 45% of all the prizes offered at this seed show. She produced 1800 cars of seed peas and beans valued at \$8,126,500 in 1924.

Idaho ships 17,000 cars of potatoes annually and the Idaho Russett potato sells for the highest price of any potato on the American market. She has more than 70,000 acres of orchard from which more than 10,000 cars of the choicest fruits are shipped annually. She produces annually more than 2,000,000 tons of the finest alfalfa grown in the west, which yields from 4 to 6 tons per acre.

The climate of Idaho is ideal, the mean temperature of the state being 5% degrees warmer than that of the state of Ohio, with no floods or severe storms. A cyclone is unknown in Idaho.

Idaho has 3,000,000 acres of school land which sells at a minimum price of \$10.00 per acre on 40 year time. She has more fine school houses and more modern homes for a given population than any other state in the union. The infant mortality is hardly one-half as great in the state of Idaho as in the nation.

Idaho has 2,500,000 sheep, producing annually 20,000,000 lbs. of high grade wool. She has eight sugar factories producing annually 200,000,000 lbs. of sugar. Within the past five years she has constructed 64 cheese factories and a milk condenser, and has made greater progress in the dairy industry than any other state in the Union. Her dairy products now bring in a return of \$1,000,000 per month and within ten years she will be America's heaviest exporter of dairy products. Livestock of all kinds do exceptionally well in Idaho. The absence of flies, the uniform climate, the never failing supply of pure mountain water and abundance of high grade alfalfa hay with its high mineral content makes the livestock industry very profitable.

Idaho lies at the west entrance of the Yellowstone National Park, the nation's greatest playground, which is visited annually by 140,000 tourists, who enjoy the wonders of this great state over more than 1600 miles of highway, including state highway, Yellowstone highway, Park to Falls highway, North and South highway, Old Oregon Trail, Utah Montana highway, and lesser highways, having more miles paved and graveled highway per capita than any other state in the Union.

The scenic wonders of Idaho are unsurpassed in the world. The great Shoshone Falls where the mighty Snake in a solid crevasse leaps over a sheer precipice 212 feet to the abyss below, is 46 feet higher than Niagara. The canyon of the Snake is 1000 feet deeper than the canyon of the Colorado. From the brink of the picturesque canyon of the Salmon more than a mile in depth, one beholds that ribbon-like stream as it winds its way to the sea, while nearby are the craters of the moon, that volcanic phenomena, with their yawning chasms to deep and black as the bottomless pit. The majestic Sawtooth Range, the pride of America, the Bitter Root, Teton and Clearwater Ranges, lifting their hoary heads to an elevation of more than 13,000 feet, with their snow-crowned heads glittering in the summer sunshine, standing like giant sentinels guarding the fertile valleys below, and beckoning to you to come and enjoy the wonders of nature under God's great open canopy where there is health, wealth and happiness for you.

**FARM WOMEN WANT A CONFERENCE TOO**

This is the information voluminously given to the directing committee of the Young Farmers' conference, and accordingly a women's division was decided on late last week. It will be held in conjunction with the regular Young Farmers' meeting in the Davenport hotel, Spokane, on Friday and Saturday, January 29 and 30. And from present indications, the men's section will have to go some to outshine it.

Some of the questions already suggested for discussion at the Women's conference are:

1. How can a woman on the farm earn "extra money"?
2. How can farm women systematize their work to enjoy more time for self-improvement and recreation?
3. How can the family ration be properly balanced during the winter when fresh vegetables are not available as in summer?

A score more questions of a pertinent nature will also be brought to the conference, where efforts will be made to answer them with the aid of group analysis. The Women's conference will be conducted similarly to the Young Farmers' conference, inasmuch as there will be no addresses, no speeches and no lectures by specialists or spellbinders. Farm women will simply bring their most vital problems. They will be considered by the conference and an answer threshed out.

A conference leader will assist in tabulating recommendations. The success of this type of meeting has already been credibly demonstrated by the two previous Young Farmers' conferences in Spokane. So far as it is known though, no similar regional conference for farm women has ever been held in the West.

Both the Young Farmers' conference and the Women's convention will open with a general assembly for everyone in the Davenport hotel on Friday morning, January 29, at 9:30. That noon, attending farm women will go in a body to a complimentary luncheon provided by the Inland Empire relations committee of the Spokane Chamber of Commerce. Spokane county farm women will act as impromptu hostesses to this luncheon from other counties. This luncheon itself will be one feature of the conference, being a practical illustration of a "balanced" meal.

Following the luncheon, which is served without cost, the main women's conference will open, taking up nearly all of Friday afternoon and continuing on Saturday. Ample time will be allowed, however, for participation in the regular Young Farmers' discussions too, and also for a proposed tour through a candy and cookie plant or establishment.

Both men and women are especially invited to attend the annual Young Farmers' banquet at the Davenport hotel on the first night of the conference, January 29. Many surprise features, probably including an old fashioned dance, are being planned for banquet entertainment. The banquet dinner is the only feature of the conference for which a charge is made to those who attend the two-day conference.

Come and bring your problems.

Not What It Seemed  
Foreign notices that are not in English, but read as though they were, sometimes prove misleading to the unskilled observer. For example, there is the case of a certain lady who looked out of her window in a Scandinavian hotel and saw the notice on a building opposite: "Dam Bad Rum" this seemed a queer way of advertising one's wares, but really indicated that the place provided baths for ladies.

Some people can't stand prosperity because they never have a chance.

**THE SEVENTH AND EIGHTH GRADE EXAMINATIONS FOR THE MID-YEAR COME AT THE SAME TIME THAT THE HIGH SCHOOL SEMESTER EXAMINATIONS COME. Mrs. Herman will give the grade tests again. Pupils who have made an average of 90 or better in any subject for the first semester are exempt from the second semester examinations. This is a custom that most high schools follow and serves as an incentive for pupils to do better work. The high school paper, "The Clarion," will be published again this year, beginning with the January issue. This is a monthly paper and five issues will be published this year. The paper will be used as a literary expression of the student body. The subscription price is 35 cents. If any one wishes to subscribe he may do so by seeing Lawrence Kraut and remitting the price.**

Several high school students were out of classes Monday and Tuesday of this week. This absence was due almost entirely to illness. As a rule the attendance has been getting better as school continues.

**Basketball**  
Genesee won three out of four games last week. The second team won from Untonwath High school, 17-11. The first team won from Cotton H. S. 41-17.

Friday night the boys won a hard-fought game from Cottonwood, 20-18. The Cottonwood boys were good clean sports and their home town should be proud of them. In a preliminary game a pick-up team from the H. S. squad lost to a basketball club from Moscow, by a score of 17-10.

Saturday night Genesee suffered her first defeat of the week, losing to the fast Nezperce team, 31-22.

In a preliminary game the Girls' H. S. team lost to Clarkston by five points. The girls are to be congratulated on the fine team they have and the showing they made. Clarkston is supposed to be one of the best teams in the district and they were barely able to defeat our team.

Let all get behind the teams the rest of the year. The boys are going to Lapwai Saturday night and they are going down to the reservation to win.

**Seventh and Eighth Grades**  
Most of the pupils in our room have a perfect attendance record for this week, Lester Craft being the only exception to this rule.

Both classes have been doing review work this week. Eighth grade pupils will take their state examination in history Wednesday afternoon. Seventh grade pupils will write their geography examination Friday afternoon.

Those pupils who were in the eighth grade last year will be permitted to write the examination in all eighth-grade subjects this week.

**Fifth and Sixth Grades**  
The following pupils were neither tardy nor absent the fourth month of school: Hazel Foster, Thomas Dresher, Arwin Nardby, Dewey Dresher, Lucille Wishard, Fern Erickson, Glenn McAllister, Grace Curran, George Blaine, Floyd Hepper, Dolores McAllister.

Written examinations in most of the subjects of both grades are being taken this week.

Adeline Dresher is out of school on account of illness.

**Congregational Aid**  
The meeting of the Congregational ladies aid will be held at the home of Mrs. Casbolt on Wednesday afternoon, January 27, it having been postponed from Wednesday of this week on account of the funeral of Mrs. Carrie Platt.

you, your children and generations to come.

**Third and Fourth Grades**  
Our room began the new year right by having a perfect attendance during all the last week.

The pupils of our grades are busy taking semester examinations these days.

(Continued on next page)

**Bank Elects Officers**  
The regular annual meeting of the stockholders of the Genesee Exchange Bank was held in the bank building Tuesday night, when the following were again chosen as directors: T. Driscoll, D. L. Bressler, Dr. W. H. Ehlen, Leon Follett and Joe N. Has-further.

The old officers were also chosen, as follows: T. Driscoll, president; D. L. Bressler, vice-president; Carl Nagel as cashier.

American Legion Dance  
You are asked not to forget the dance in the Legion hall tonight (Friday, January 15). Allen's orchestra will furnish the jazz.

**Weather Still Mild**  
Weather in the Genesee section has put in another "mild week", the coldest part recorded for the week being 22 above zero Wednesday night, the highest point reached during the week was on Wednesday, when the mercury climbed to 52 and the sun shone all day.

If this is the beginning of the three-year winter, we are certainly getting an easy start.

**No Coyotes Brought In**  
It was rumored that several would be coyote hunters called forth Monday with the expectation of bringing in some coyote pelts, but it is said that none were obtained. Just who the hunters were could not be ascertained, but Private Pat Sampson and General Rader said they were not among them.

**MRS. CARRIE PLATT, GENESEE PIONEER, DIES AT LEWISTON**

Mrs. Carrie Platt, one of the early pioneers of the Genesee country, passed away at Lewiston, Monday, January 11, 1926, at the age of 72 years, the immediate cause of death being cancer.

Caroline Harris, daughter of John and Mary Harris, was born November 23, 1854, at Mineral Point, Wisconsin. On November 6, 1875, she was married to Edward Thomas Platt and left with him to make her home near Le Mars, Iowa. In 1878 the family moved to Dakota, locating near Sioux Falls. In 1881 they moved to Genesee, where she had since made her home.

After pioneering in three states they saw Genesee grow from a frontier town to a thriving village.

Thomas Platt preceded his wife to the Great Beyond, passing away March 13, 1910.

Mrs. Platt was a faithful Christian wife and mother. In her early life she united with the Wesleyan Methodist church in Wisconsin.

During the early days her home was the stopping place for ministers of all denominations, who held services in this part of the country.

She united with the Congregational church of this place 22 years ago and for many years was a faithful worker as attendant until her illness prevented.

She was a loving mother, a kind friend and besides her own family leaves a wide circle of friends who mourn her passing.

She had been a patient sufferer for many months, and for the past seven weeks had been confined to her bed.

On December 14 she was taken to Lewiston for treatment, but continued to fail and passed away at the home of her niece, Mrs. W. S. Stoddard, on Monday morning at 10 o'clock, surrounded by her loved ones. She died in the Christian faith, holding to the promise given.

She leaves to mourn their loss her four children, John A. Platt of Genesee, Mrs. Laura Dorchester of Westkiwi, Alberta, Mrs. Susie Hickman of Genesee and Wm. T. Platt of Boise; a sister, Mrs. Edith Day of Spokane, two brothers, 20 grandchildren and a number of nephews and nieces.

Funeral services were held from the Congregational church Wednesday afternoon, January 13, at 2 o'clock, conducted by the pastor, Rev. Paul Sprague, and interment was in the I. O. O. F. cemetery. The floral offerings were numerous and very beautiful.

David and Marvin Hickman, Thomas, Kenneth and Jack Platt and Leonard Dorchester, grandsons of deceased, acted as pallbearers.

Those attending the funeral from out of town were P. Madden, Mrs. Florence Jackson of Lewiston; Mrs. Chas. Ingle of Pullman, George Hall of Clarkston, Mr. and Mrs. W. E. Stoddard and daughter, Vera, of Lewiston, George McMahon of Pullman, Miss Gladys Larrabee of Pullman, Mrs. Edith Day of Spokane.

We wish to extend our sincere gratitude and thanks to the kind friends of both Lewiston and Genesee for their assistance and for the beautiful floral offerings.

John A. Platt and Family,  
Mrs. Laura Dorchester,  
Wm. Hickman and Family,  
Sue T. Platt.

**COMMISSIONER PORTER WARNS AGAINST INVESTMENTS**

The following communication has been received from E. W. Porter, state commissioner of finance, and should be read by everyone who has any idea of investing in any kind of enterprise—and then they should consult their banker before entering into any agreement or sending away their hard earned cash. The following is self-explanatory:

The United Investment company is broadcasting its proposition to sell units of interest in shares of stock of the Ford Motor Company of Canada, Ltd. These units of interest consist each of one one-hundredth part of one share of the Ford Motor Company of Canada, Ltd. The par value of which is \$100. The book value of this stock is about \$371.00 per share, and by this method used the United Investment company is selling it for \$1000. Market quotations indicate that it is selling for considerably more than its book value. Quotations on December 31, 1925 were \$622.00 per share. This would still leave a profit to the United Investment company of \$378.00 per share.

This stock has paid dividends of \$10.00 per share during '23 and '24. It is not known what dividends for this year will be. If \$10 per share, as in previous years, is paid, investors who buy these units at \$10 each, thereby paying for the share at the rate of \$1,000 per share, cannot hope to get more than 1% on such an investment.

The literature of the United Investment company states that these trustee certificates representing one one-hundredth of a share of the Ford Company of Canada, Ltd., stock are issued by Numero, Trustee, St. Paul, Minnesota. Just who Mr. Numero is, is unknown, but it is to be inferred that he holds the real stock against which the units of interest are to be issued. The usual extravagant coloring as to magic values which may result are employed.

A letter from the Ford Motor Company of Canada disclaims responsibility for the United Investment company and recommends against the purchase of fractional shares, the prices at which they are sold being so disproportionately in excess of the market value.

Japan Current Probably Lost Again  
And now comes an Alaskan fisherman down to Seattle and makes the statement that they have had no winter there to amount to anything and that the Japan current has probably gone astray again.

It was reported right after the great earthquake in Japan that the current had been changed, on account of the weather appearing unusually warm about that time. But what was the matter with the thing last winter when we had about ten days of zero weather and below, if that is the cause of our present warm weather?

It is generally believed among Alaskans that the earthquake caused a change in the direction of the Japan current. Shousthang said, "Habits of the fish have changed and climate conditions have altered. This winter for the first time since 1902, there hasn't been any snow. The days are sunny, with the temperature ranging around 45 and 50 degrees."

**Store Burned at Juliatta**  
Alexander's store here with all contents was destroyed by a fire of unknown origin early Wednesday morning. The fire was discovered about 3 o'clock and by 4:30 the building, with its entire contents of dry goods and groceries, was in ashes. The fire had gained such headway when discovered that it was impossible to gain entrance in an attempt to save any goods. The loss on building and contents is fully \$25,000 with only \$15,000 insurance.

The fire started near the front door of

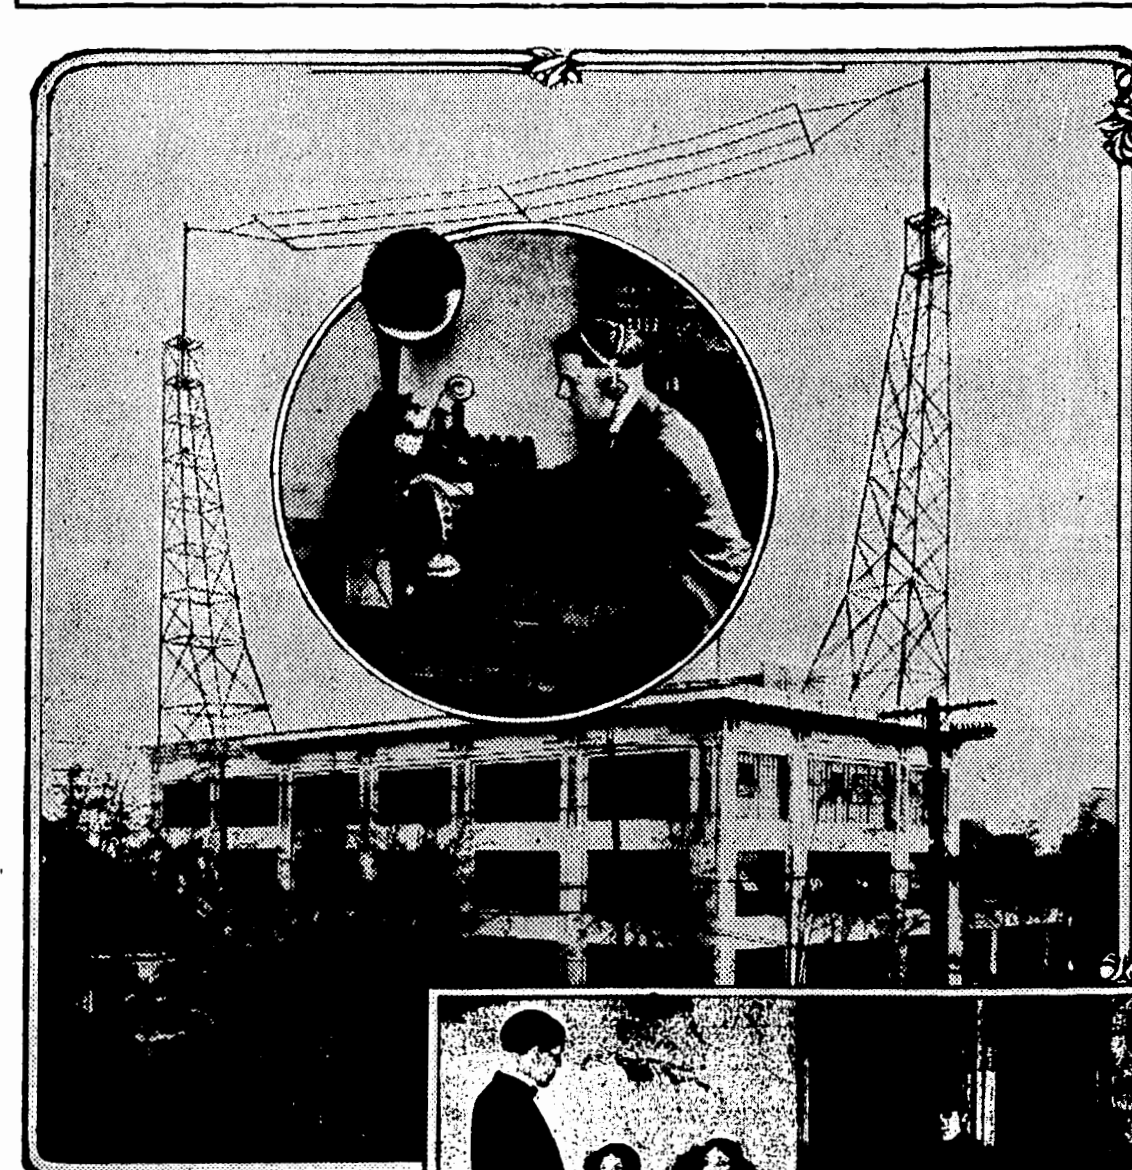

### CAN A NOISE BE LOCKED UP?

WASHINGTON. — Can a noise be locked up? Yes, and furthermore a street car's clangor can be confined to the street and the blare of the saxophone in the apartment above can be imprisoned there, reports the National Bureau of Standards at Washington, D. C., which has just finished experiments in preventing noises of a big city from disturbing the quiet of its homes and apartments.

"Noise can be kept out of a room, just as well as a snowstorm can," reported Dr. Paul S. Heyl, chief of the bureau's sound laboratory. "The main difference is that to keep out noise the stouter the wall, the better, while to ward off noise the flimsier the wall the better."

To prove publicly that he can play traffic policeman to a speeding sound, Dr. Heyl had a partition which he promised would be "soundproof" built between two adjoining ballrooms of the Mayflower Hotel at Washington.

### Broadcasting Stations You Have Heard—KFI

From the comfortable beauty of the reception room, a visitor to station KFI looks through a glass window into the studio where radio artists are performing. The studio is one of the most beautiful in the country. Three windows are fitted with delicate glass, behind which are tinted floods giving the effect of gorgeous moonlight. There is not a corner which the artistic hand has neglected. A large open fireplace is so attractive that it is said that performers would almost prefer to sit before it than to broadcast.

KFI is the broadcasting station of East C. Anthony, Inc., distributor of Packard Motor Cars for the whole state of California. It is situated in Los Angeles.

Mr. Anthony has found a means of expressing, through KFI, a practical application of artistic taste and to prove that the commercial

### DAIRY

EIGHTY-TWO Holsteins have recently left Chehalis for Mexico. These cattle were selected by E. A. Donaldson, secretary of the Lewis County Holstein Club, for H. H. Clark of Chehalis. Mr. Clark's activities in starting a mammoth dairy establishment in Mexico was commented on editorially in the November issue of Northwest Dairyman and Farmer; and in keeping with our prediction, Mr. Clark is not confining his requirements to just one cow to breed. It will take a lot of cows to fill his requirements if he goes on with his reported plans. Other Holstein buyers have recently been in Washington looking for good grade and purebred cows, so indications are very good for a brisk spring trade in dairy cows to go South.

Thomas J. Owens' Fritch Herd of Holsteins was the subject of a front page story in a recent issue of the Dairy Times of Japan. We did not read the story but recognized the pictures of several of the good cattle that Mr. Owens has bred and developed, including a good picture of the young bull Fritch Pebe Yeoman, sold by Mr. Owens at the 1923 Pacific International Holstein sale for \$2000 to go to Japan. The picture shows the bull as he appears today at the head of one of the leading Holstein herds in Japan. Many good Washington Holsteins have found their way across the Pacific, and with the continued development of dairying in that country, there is every reason to believe that many more will follow.

Dairymen in the vicinity of Oakville and Montesano recently held meetings to discuss the heifer calf proposition and to agree on prices that should be charged for heifers. A few days old from good dairy cows, and sired by purebred dairy bulls. The final conclusions arrived at, following discussions, was that a uniform price of \$10 at the farm or \$13 created f. o. b. station would be the price to ask for heifer calves from cows with not less than 225-pound cow testing association records, providing said calves were sired by registered bulls of the recognized dairy breeds. An active trade has recently sprung up for good heifer calves with cow testing record backing, and the dairymen have come to the conclusion that it is best to have a uniform marketing price for the calves.

The recent outbreak of "foot and mouth" disease in Texas has been practically arrested, so that state can again be considered free of the disease. This last outbreak necessitated the destruction of 21,263 cattle, 1,452 sheep, 419 swine and 274 goats. The United States method of slaughtering suspects and those that have been exposed to the disease, while drastic, seems to be the really only effective way of handling these outbreaks. Perhaps some day the pathology of the disease will be understood, when a more economical way of control may be found.

Carnation Milk Farms have recently purchased two very fine young Holstein cows from Henry Bouchard of Bucoda. Mr. Bouchard is the milk and butter cow, Linden Clara Paama. One of the cow purchased by Carnation is Linden Dale Model Fobes, a daughter of "Paama," the other being Pauline Molee Independence. Both cows show high production in cow testing association work.

These figures show that, in addition to the examination of babies and young children at the child-health conferences, maternity and infancy activities during 1924 and 1925 included the holding of 9669 prenatal conferences attended by approximately 75,000 women, classes for midwives with a total attendance of approximately 40,000, the holding of mothers' classes with an attendance of more than 162,000 mothers, and the organization of over 6000 "little mothers' classes. The number of child-health centers established was 1706; the number of prenatal centers, 245.

Although centers are for "well babies," the report states, defects are frequently found which require correction before the child is free to gain a maximum of physical fitness. Defects most frequently encountered are refractive errors in the eyes, naso-pharyngeal growths and abnormalities, orthopedic defects, glandular enlargements or insufficiencies, dental caries, malnutrition (always a large percentage in every group). Children are always referred to family physicians for the correction of these defects. If there is a physician. A few states have arranged for clinics at which defects may be corrected by a staff physician or a specialist. Some states furnished estimates of defects corrected during 1924, ranging usually from 20 to 40 per cent.

### GROWTH OF CHAIN STORE DOES NOT SPELL DOOM OF RETAIL, SAYS CREDIT LEADER

Despite the increase of the chain store and mail order business, J. H. Tregoe, Executive Manager of the National Association of Credit Men, believes that the small retailer will gain in merchandising virility in the future. At present he calculates that one out of ten retail merchants succeeds.

"Obsolescence is the price of progress," Mr. Tregoe said in his statement. "It is folly to expend money and time for the sale of goods and utilities which have passed their day and have been supplanted by something better. However, I cannot believe that even in the rapid movements of modern commerce, the place of the merchant, better known as the middle man, has been superseded. The merchant in the earliest days of commerce played an important part in distribution and he was an economy in getting goods produced in one region for consumers located elsewhere.

"The middle man is, undoubtedly, having rough sledding these days. In the retail field there has grown up a form of competition that adds difficulty to the entrepreneur who is seeking to satisfy the needs of individual consumers. The whole atmosphere of business is constantly charged with problems. There is often too keen a desire to avoid these difficulties in the hope that the one immediately concerned will provide the solution."

Mr. Tregoe points out that recent observations, regarding the retail store, indicate that its average life is 7.57 years. These observers find that the dry goods, furniture and clothing stores have the shortest life, while hardware, grocery and shoe stores have much longer lives.

"It is interesting to observe from various business researchers that those retail stores which have the longest lives have the smallest average profits. Besides this, those stores which have the most rapid turn-over in their stocks are not necessarily those which have the longest life. Hardware and shoe stores which have the longest lives of any retail stores have the lowest rate of turn-over.

"One surveyor of the situation believes that dead stocks have a lot to do with the unhealthy condition in retail stores. In the National Association of Credit Men's adjustment and bankruptcy work this condition often arises and trustees and bankruptcy officers find themselves with large amounts of dead stock which while they cost originally a large sum, represented very little actual assets. This is a situation that needs the man. It should be part of his business to see to it that the retail stores, whether about 1,000,000, shall be healthy outlets for manufacturers' and wholesalers' goods. The credit man too often encourages weak retailers to start again in business, which they are unfitted for.

"It has been found that there is approximately a retail store for every 24 families; a grocery store for every 61 families; and a drug store for about every 43 families. While the credit man encourages these numbers in the retail business, he is weakening his front line trenches from which he must get his goods over the top.

"We shall have to give re-consideration to the question of quick turn-over and to encourage people through credit, entering the retail field. These mushroom stores too often terminate business through forced sales, bankruptcy or the loss and waste of original investment, usually too small. By a more careful study of retail merchandising and a review of the whole situation, the credit man can do a large share toward wholesome merchandising."

There are about as many telephones in the state of Washington as in the whole of Austria and Belgium put together.

Fresh fruit and vegetables, eggs and dairy products are needed to supply vitamins in the diet.

### NEW FRATERNITY HOUSE AT MOSCOW

Exterior work on this beautiful new fraternity home is now practically complete and it will be occupied during the holidays, according to present plans. Approximately 40 men will be accommodated in the building.

The structure is old English—the late Tudor period—in design. An old English garden is to be built back of the house and walnut furniture of the Tudor period will form harmonizing effects with the building, both within and without.

Special features of design and construction include spiral chimneys, steel casements for all windows, antique leaded glass in lower front windows, and special clay shingles. The brick was specially ordered and was laid in peculiar "Dutch bond" style which gives a criss-cross parallel effect.

The Phi Gamma Delta home is the second new fraternity house to be occupied this year. The \$70,000 home of Beta Theta Pi was formally opened recently. Pi Sigma Rho, local sorority, is also established in a new \$35,000 dwelling this fall.

American table apples will find a better market than usual this winter in France, says American Consul A. D. Cameron. Paris, France, in a report received at the Seattle office of the Bureau of Foreign and Domestic Commerce. This market, however, the consul's report continues, will possibly be not enough to justify direct consignment to French commission houses.

For a time prices of cider apples in Normandy and Brittany were bolstered up by an abnormal demand from Germany. Then on October 1 the new duties of 60 marks per ton caused almost complete cessation of exports. The German buyers left the market and prices fell sharply.

The name cockroach comes from the Spanish cockroach, says Nature Magazine. He fights his own relatives so that only one species is apt to infest a given section at the same time. This is comfort in that.

### GOLDENDALE BOY OF 19 WINS SECOND PLACE IN NATIONAL LEADERSHIP CONTEST

Kenneth Hnshaw, a 19-year-old club member and leader of Goldendale, has been awarded the outstanding honor of placing second in the Moses Trophy leadership contest, in which boys and girls from every state in the Union are eligible to compete. First place was won by Francis Smith of Oklahoma who received a trip to the National Club Congress at Chicago.

Washington's club boys and girls are making fine records as leaders, for last year Helen Brown of the Sunset community in Spokane County, placed second in this same contest. Kenneth has been a club member for ten years, sending in a report each year. His club work has netted him a labor return of \$290.71. His work has been principally with livestock, and he has brought a splendid spread of influence to adults in Klickitat County.

Kenneth has been state champion in rabbit, garden and sheep club work. He has exhibited products for ten successive years. His achievements in the work include point winner in judging at the Pacific International Livestock show in 1922; winner of swine showmanship there in 1924; coach of judging and demonstration teams for four years and an active club leader in 1924.

He is three club boys, Kenneth showed a pair of purebred Irish setters, seven large Northwestern fair in 1923. The county commissioners of Klickitat County made an appropriation of \$180 to aid in this project. No adult accompanied the car or made any arrangements for shipping, showing, etc. When the boys returned from the fair circuit, club members held a county livestock show, of which Kenneth was manager. Exhibits were made by both adults and club members. The boys awarded \$212 in premiums, raising the money by gate and grandstand receipts.

The club instigated the organization of the Klickitat County Livestock Association in 1923. Kenneth has been a member of the board of directors, and secretary-treasurer of this association.

He arranged the extension program for the community in 1924. It included a livestock tour and meetings conducted by four State College specialists, with attendance from 35 to 150. He handled the State College exhibit at the 1925 county fair. This was usually accompanied by a specialist. At only 19 years of age, he is an official judge of all livestock classes in which he was not competing at the 1925 county fair. Kenneth has been commissioned by a large number of farmers to buy livestock for them for breeding purposes.

One hundred farms in Klickitat County have been influenced in their livestock practices as a result of club work in the community. Kenneth has been the mahatma of the club for its entire life, and much credit is due him for the accomplishments there.

### WHAT WOMEN ARE THINKING

By Ruth Hale, President, Lucy Stone League.

I do stoutly believe that marriage as the institution, which we now have, is a mundane arrangement, none too brilliantly done. I believe that it needs a continuing revision. It is social instrument, and must meet the actualities of its social times.

It is very difficult to talk about divorce without first talking about marriage, and, once launched upon marriage, it is very difficult to get back to divorce.

Although this is to be an advocacy of divorce, it will be an impatient advocacy, as of one who believes that no matter how valuable it may be as an emergency measure, it is still no more than that. Divorce has made marriage flexible, debatable.

I admit that the conception of our marriage as a divinely sanctioned thing is a pleasant one. He would indeed be niggardly who did not glow at the thought of such a handsome compliment from God. But I am hotly against the conception, not merely because I believe it to be thoroughly false, but because I believe it to be hindering.

There is a kind of marriage, which it does not yet have divine sanction, does, I think, at least engage a divine friendliness. It is that kind wherein two people have found in each other a psychological and spiritual shelter—that without which neither man nor woman can live fully nor happily—which each will give freely. It can not be created by statute, neither can it be taken away. Where it exists, it is incorruptible.

Adopt "Big Sister" Plan.

An upper-class adviser will be provided for each freshman girl entering the University of Idaho, according to plans definitely formed by the Associated Women Students. The "big

### WHAT MARRIAGES SHOULD BE

By Ruth Hale, President, Lucy Stone League.

I do stoutly believe that marriage as the institution, which we now have, is a mundane arrangement, none too brilliantly done. I believe that it needs a continuing revision. It is social instrument, and must meet the actualities of its social times.

It is very difficult to talk about divorce without first talking about marriage, and, once launched upon marriage, it is very difficult to get back to divorce.

Although this is to be an advocacy of divorce, it will be an impatient advocacy, as of one who believes that no matter how valuable it may be as an emergency measure, it is still no more than that. Divorce has made marriage flexible, debatable.

I admit that the conception of our marriage as a divinely sanctioned thing is a pleasant one. He would indeed be niggardly who did not glow at the thought of such a handsome compliment from God. But I am hotly against the conception, not merely because I believe it to be thoroughly false, but because I believe it to be hindering.

There is a kind of marriage, which it does not yet have divine sanction, does, I think, at least engage a divine friendliness. It is that kind wherein two people have found in each other a psychological and spiritual shelter—that without which neither man nor woman can live fully nor happily—which each will give freely. It can not be created by statute, neither can it be taken away. Where it exists, it is incorruptible.

### TEST CREAM SEPARATORS

By Ruth Hale, President, Lucy Stone League.

Reports from more than 700 cow testers in charge of cow testing associations in 30 odd states from California and Washington to Vermont and Virginia reveal that one of the biggest leaks on the average dairy farm is poor skimming by out-of-date "orphan" cream separators that leave part of the cream. Hundreds of official testers report losses running into thousands of dollars annually when they first get to work in a newly organized association. It is hard to run a separator by hand at the proper speed to get all the cream regardless of how good the machine may be. In the first place, only new machines should be purchased and they should be bought from the local dealer, who is on the job to represent manufacturers who turn out good equipment and stand back of it with reputations and service.

Fable  
"Let me see," said Johnny, "that's four baths I've taken this week and it's only Wednesday."

**Summit News**  
Mrs. Frank Green (the Summit correspondent) is at the Inland hospital at Moscow, where on Saturday last she underwent a major operation. At last report she was getting along as well as might be expected.

The Summit Pop club postponed its regular meeting this week, which was to have been held at the home of Mrs. C. N. Herman, on account of the death of Mr. Herman's father, in Oregon. The club will meet with Mrs. Mikko Reisenauer on Thursday, January 21.

Read all the ads. this week.

**WHAT HAPPENED HERE TWENTY YEARS AGO**

H. H. Manderfield left Monday of this week for Irigoien, Oregon. After a brief stop he will journey on to Medford, Oregon. Mr. Manderfield some months ago disposed of his farm near this place and is now in search of a new location.

Wednesday evening a number of users of electric light met at the office of C. F. Burr, the object of the meeting being to protest against the present rate of 18 cents per kilowatt hour, and a committee of three was appointed to take the matter up with the company.

The marriage of Miss Mary Cunningham and Harry Condel, which took place at the Cunningham home, near Troy, last week, was attended by Mr. and Mrs. A. Hammond, Mr. and Mrs. John Magee and Mr. and Mrs. M. Driscoll of this place. In the evening following the wedding, a big dance took place, which a number of the young people of this community attended.

Miss Jennie Whitted, an estimable young lady of the Little Pottlach section, and Albert Becken, in a popular and prosperous young farmer living east of town, were married Monday of this week at the home of the bride's parents, Mr. and Mrs. Al Whitted, the ceremony being performed by Rev. A. Durrie of Kendrick. They will go at once to housekeeping on one of the Wahl farms east of town. A number of friends wish them a long and happy married life.

**CHURCH NOTICES**

**St. John's Lutheran Church**  
Rev. A. F. Wolff, Pastor  
Sunday school at 9:30 a. m.  
English services will be held each Sunday morning at 10:30 o'clock, with the exception of the first Sunday of each month, when German services will be held at the usual hour.

**Congregational Church**  
Paul W. Sprague, Preacher  
Mrs. W. M. Herman, organist.  
W. E. Euclah, choir director.  
Sunday school, 9:45 a. m. Mrs. Arthur Hampton, superintendent.  
Morning worship, 11 o'clock.  
Young People's meeting, 7 p. m.

**Christian Church**  
N. E. Beach, Pastor  
Bible school at 9:45 a. m.  
Preaching, 11 a. m. by Elder J. T. Crot of Moscow. Subject, "Salvation, Its Four Fold Aspect."  
Christian Endeavor at 6:30. Subject, "Ideals," with Miss Genevieve Hampton leader. Preaching at 7:30. Subject "Seven Reasons Why I Believe Jesus to be the Christ."  
We invite all, especially the stranger, to all services.

Rev. N. E. Beach, pastor of the Christian church will leave Friday evening for Yarnhill, Oregon where he will conduct a series of revival meetings. This appointment was made last summer before he was called to the local work.

Elder J. T. Crot of Moscow will preach every Sunday morning and evening during his absence. Mr. Crot is an able speaker and an splendid Bible student and was well liked when he spoke here a short time ago.

A Christian Endeavor Society was organized last Sunday evening as an auxiliary to the Christian Church, with about 20 charter members. Clarence Aherin was chosen president; Ruby Beach, secretary; Mildred Beach, secretary; Elvon Hampton, treasurer; Genevieve Hampton, chairman of the prayer meeting committee; Audrey Pleiman, chairman lookout committee, and Francis Smylie, chairman of the social committee.

The hour for the prayer meeting was set at 6:30 each Sunday evening.

**Genesee Valley Lutheran Church**  
Rev. Gerh. A. Peterson, Pastor  
Saturday, 2 p. m. Confirmation instruction in the parish hall.  
Sunday, January 17, 7:30 p. m. Luther League. "Great Ideas That Have Spurred People to Action." Leader, Jesse Borgen.  
All are cordially invited to attend.

**RCA - Its meaning to the Radio Public**

Five years ago the now familiar RCA monogram was an idea. Today it is truly the hallmark of radio. It is the symbol that represents the highest type of technical achievement in the two basic endeavors of the Radio Corporation: (1) broadcast transmission and reception, and (2) international and marine radio communication service.

**THERE THE SYMBOL TOOK ROOT**

But back in 1900 when radio was a new science just finding its first great application in saving lives at sea—back in those days before a national institution of broadcasting had been predicted by the most daring visionary—there the RCA symbol-took root.

While it has taken but five years to acquaint the public with the mark RCA, long before the advent of broadcasting was being laid by the same men who today are a part of the RCA. It has been no overnight miracle. Service to the public is the goal by which each step has been guided.

**OVER ONE MILLION RADIOLAS**

In the production of broadcast apparatus, RCA has rendered a service to the American public second to none in superiority and scope. Over one million Radiolas have been accepted by purchasers as their first choice of performance and quality. In the remarkable results achieved by the Super-Heterodyne, the engineers of the Radio Corporation of America are confident that the highest obtainable basic circuit development has been reached.

**PERMANENCY AND PROTECTION**

Moreover, it is believed that present Radiolas are sufficiently dependable in every respect of sensitivity, selectivity, ease of operation and quality or reproduction to serve the owner for many years after purchase. This factor of permanency lends a stability to the entire line of Radiolas that means a real trading assurance and protection to the RCA owner.

**EVERLASTING RESEARCH**

When more efficient radio products are possible, they will be found, as in the past, under the trademark of RCA, for behind Radiolas, Radiotrons and RCA accessories stand the world famous laboratories of the General Electric Company, the Westinghouse Electric & Manufacturing Company and the Wireless Specialty Apparatus Company. Here, day in and day out, leading scientists work constantly that refinements in the art of broadcasting may be enjoyed by an exacting public; that faster and more economical radiogram service may ever be available to international commerce; that reliable communication and thus greater safety of life at sea may be possible for the American merchant marine.

**A NEST EGGS IS WORTH WHILE**

No one ever regretted that he saved his money. A bank book showing a credit, whether it be a few dollars or a fortune, is one of the most satisfactory things in the world to possess. It bears evidence of a will to succeed and is the finest kind of passport to success.

Start now to save something each week—even if it's only the smallest amount. Interest at 4 per cent insures its growth and you'll be amazed how swiftly it increases.

**Legends of "Sleepy Hollow"**

Mr. and Mrs. Jess Borgen were Moscow visitors Saturday.

John Johann was a business visitor in town one day last week.

Mr. and Mrs. John Kluss spent Saturday and Sunday in Spokane.

Mrs. Chas. Ebel and Bruno motored to Moscow Saturday on business.

J. W. Moeman and Bruno Ebel helped R. F. Kluss butcher Wednesday.

Miss Viola O. Wilson has arrived in Sleepy Hollow to take charge of the "high" school.

May Moeman returned to Moscow last week after a holiday vacation spent at home.

Mrs. W. O. Borgen is in Moscow taking care of Anton Borgen, who is in very poor health.

Mrs. H. Baumgartner spent a few days at the home of John Kluss, returning to Clarkston Sunday.

Frank Kluss had the misfortune to walk home one day last week when his Ford refused to go past the John Kluss ranch.

Joe Grieser is the champ butcher of Sleepy Hollow. Last week he assisted Chris Broenneke two days at the Albert Grieser place and two days for himself.

Henry Lorang is trying to round up some coyotes in the night time. He thinks he can drive them into his traps. We all wish him good luck, but we'd hate to lose all that good sleep.

**Pine Grove News**

Joe Doyle spent the week-end at Spurbeck's.

Wm. Freeburn and family spent Sunday at the Sam's home.

Glen Brasier is taking the eighth grade exams in Genesee this week.

The "Wabblers" had a skating party and a hot dog roast Thursday night.

The young folks of this district are enjoying skating on the Spurbeck pond.

Mr. and Mrs. Tom Weatherbe of Fix Ridge spent Sunday at the Fred Miller home.

Page hanging was the main diet at the Freeburn home the past week.

Marguerite Spurbeck, Pearl Lambert, Joe Doyle and Tom Johnson took dinner at the Wm. Freeburn home Friday.

Monday was butchering day at the Spurbeck ranch. Guessing on one hog was a go, and Pearl Lambert happened to miss it the farthest. So its treats for the crowd from that direction.

A bunch of young folks from Pine Grove and Grey Eagle, otherwise known as the "Wabblers," went for a hike in the Platt canyon Sunday. After walking up a good appetite, they took dinner with Harry Perks and Bob Parks. A good time was reported by all.

**Entertained Linger Longers**

The country home of Mr. and Mrs. Jas. Magee was the scene of a very pleasant party Tuesday evening when the members of the "Linger Longers" and their husbands and a few invited guests met at the Magee home to spend the evening.

Pinoche was the game of the evening and was played at seven tables. Mrs. Milton Rader won the ladies' honors while Eli Thyfault carried off that of the men. Mrs. Thyfault and Roy Evans were awarded the consolation prizes.

A splendid "banquet" was served at midnight.

Mrs. Magee was assisted in entertaining by Mrs. Frank Hoorman and Mrs. George Post.

**Palouse Land at Public Auction**

387 1/2 acres of the best Palouse land, about one-half in summer fallow, five miles Southwest of Moscow, Idaho, will be sold at public auction at ten o'clock a. m. in front of the Courthouse door at Colfax, Washington, on Saturday, January 30th, 1926, in order to distribute the T. N. Crow estate. Land can be shown at any time. For particulars write or see A. H. Overstrom personally at Moscow, Idaho.

**Notice to All Knights of Pythias**

Please be at lodge next Tuesday evening. There is important business to be cared for. A lunch will be served by Dinty Moore and Jiggs. 29-1

**PERSONALS**

Mrs. Peter Dallesago was called to Clarkston Tuesday on account of the illness and death of a friend.

Mrs. Carl Erikson and Mrs. Arthur Springer returned Friday from a few days spent visiting at Spokane.

Fred Dicou has returned to his studies at the U. of I. after having been detained at home by sickness.

Mrs. Nels Flammoc has returned home from Portland, where she underwent an operation for goiter. She is getting along very nicely.

D. F. Hallahan of Moscow, special supreme agent for the Knights of Columbus, was in Genesee and addressed the local lodge last Friday night.

Claud Harpole returned home the first of the week from Lewiston where he had been undergoing a "swirling over" he having had his tonsils removed and other minor troubles corrected.

Ed. Peterson came up from Clarkston Monday afternoon to spend a few days at the farm. He says he is feeling pretty good these days and Mrs. Peterson is getting along nicely, although she has not fully regained her strength.

Mrs. Harry Schooler and children and Mrs. Dick Nebelsieck returned home Monday from a several days' visit at Nysman, Oregon, with Mrs. Schooler's sisters, Mrs. Conrad Martin and Mrs. C. M. Beaumont and families. They also attended the marriage of Miss Bernice Martin on New Years day. And to make things more interesting little Miss Genevieve Schooler had the misfortune to break an arm the next day after their arrival.

**The Vandenburgs in Business**

Recently Emery Vandenburg bought and took over the management of a pool hall and confectionary establishment at Palouse, Washington, and he and Mrs. Vandenburg are now located there.

Last Friday at noon, Jack Vandenburg took over the Milk Shake factory at Moscow, located in the Purity Creamery building, which has been operated for the past year by R. S. Sullivan.

The place will be known in the future as "Van's Place" and an advertisement states that the place will be open from 6:45 a. m. until midnight each day.

The many friends of both Emery and Jack wish them well in their new ventures.

R. S. Sullivan, who formerly operated the Milk Shake factory, and Ed. Halverson have bought the Bon Ton confectionary store at Moscow and have taken charge of the same.

**Death of George Coverdale**

The Coverdale brothers received a phone message Tuesday evening that their brother, George Coverdale, had passed away at his home near Yakima.

Jack Coverdale had been over there for the past week and Jess left Wednesday morning for Yakima.

No particulars are obtainable as it was not known here that he had been ill, or what might have been the cause of his death.

**New Auto Licenses**

A few of the new 1926 auto license plates have made their appearance in Genesee. They are orange and black—the background being orange and the figures black, making a very neat plate.

According to word sent out from Boise the new plates should be on cars by February 1 and Mr. Jeter states that "Persons operating motor vehicles without 1926 license plates after the first day of February will be subject to arrest and prosecution."

**Farmer's Union Meeting**

A meeting of the Farmers union will be held in the American Legion hall, Saturday afternoon, January 16, at 1:30.

Jess Borgen, Secretary.

**Another Card Party**

The ladies of St. Mary's church will give another of their card parties in the K. C. hall Thursday night, January 21. If you are not there we will lose you a good time and we your company. 29-1

RADIO

Los Angeles, March 26.—The progress of radio in an advanced state of development, reviewed the findings of a survey on the significance of low internal resistance...

Shopping for Shawls in Shanghai

IN ORIENTAL MARKET

"If I do not buy anything else, I am certain to buy at least one of these wonderful Oriental shawls with the bright embroidery and the blue fringe."

"The results of this study showed that when the internal resistance of the B battery increased above a certain value in a two-tube amplifier, a noticeable volume drop occurred in the detector plate circuit."

"The output of a two-tube audio amplifier after passing through the load speaker must return through the common B battery, which is usually 90 to 125."

"It was also found by this investigating laboratory that with most radio-amplifiers this B battery distortion would occur when the internal resistance of the detector B battery amounted to as little as 15 ohms."

"One remedy for this type of audio distortion is a separate detector B battery. However, it is possible to construct a B battery which will not have a high internal resistance, in which case no separate detector B battery is necessary."

"A dark woman, like a dark horse, often wins," writes Hazel Hanson Cades, in the Woman's Home Companion. "But the odds are always against her. It's a hard job to back romance or live down old reputations."

"Blondes are usually considered dangerous, in a nice way. But if you'll take a look at my melodramas you'll find a dark woman, every time. There are many brunettes—petite and ponderous, fiery-tempered or sweetly smiling—admirable. Each with her life to live and her powder to match to her nose. And it is not desirable or fair to expect that every brunette should seek adventure, wrapped in a Spanish shawl. There are, among them, a good many 'stitch girls.' No man here is not meant to be a dreamer. And are not—"

Signs at Railroad Crossings. A road sign painter suggests the following signs for railroad crossings: "Come ahead, You're important." "Try our engines. They satisfy." "Don't stop. Nobody will miss you." "Take a chance. You can get hit by a train only once."—Motor Camper & Tourist.

The Way to Permanent Pastures

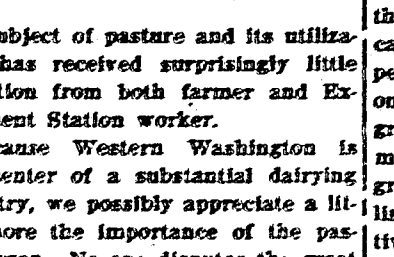

M. E. McCollam, Agronomist, Western Experiment Station, Pullman, Wash.

WHEN we stop to think about it, nothing seems a more logical step toward advancement of our agriculture than improving our grasslands. Pastures occupy over half the land area of the country and contribute nearly as much to the sustenance of our livestock as all crops combined, yet plants such as the best grasses, white clover and reynoldsia, meadow grass have come in naturally and are established here. A reasonable amount of care and management is all that is needed to encourage these grasses to yield a horizontal crop. How often, though, are these stands plowed up and destroyed for the purpose of seeding short-lived plants such as red clover and Italian ryegrass, or some other crop not as profitable to the dairyman as the original sod might have been? The result is lost money and effort, and instead of a good permanent pasture, an unproductive area of meadow and weeds.

While there are places where the best permanent pasture plants appear naturally, there are other localities where the natural grass cover is practically worthless, even if cared for and properly managed. It is here that the plow could be used to advantage and the proper grasses seeded. These statements lead us to the conclusion that it is highly important to know the grasses in our pastures, and right here is where the big step in pasture improvement can be made. The future of our permanent pastures depends largely on a knowledge of the best pasture grasses and their possibilities. These statements lead us to the conclusion that it is highly important to know the grasses in our pastures, and right here is where the big step in pasture improvement can be made.

"The subject of pasture and its utilization has received surprisingly little attention from both farmer and Experiment Station worker. Because Western Washington is the center of a substantial dairying industry, we possibly appreciate a little more the importance of the pasture crop. No one disputes the great value of pasture as a feed for dairy cattle. Not only is it an excellent succulent feed, but it is cheaply produced as well. Surely, this fact should be recognized as a rare combination. And the dairyman must recognize it, too, for the sooner the cattle can be turned on grass in the spring the better he likes it, and if the cows can be kept on pasture through November, all concerned are still more pleased."

It is a regrettable fact, though, that this great asset of the dairy farm, while utilized to the limit, is seldom cared for. About all the attention an average piece of grassland gets is some repair work on the fence and a few drenchings in the summer because the pasture has dried up. The wonder is that we get as much as we do from the grass. It is only because Western Washington is naturally adapted to the production of grass that our pastures yield anything at all—except not because of the care and cultivation received. The humid sections of Europe are comparable in many ways to Western Washington, and when we reflect that the capacity of their grasslands is fully double the capacity of ours, we begin to realize that we are by no means expert in the art of grazing. A little observation will soon make apparent the great opportunity there is in this section of the country for pasture production. We could have the best pastures in the world. Because of suitable climate features, a long grazing season is ours. Some of the finest of permanent pasture

M. E. McCollam

of the subject of pasture and its utilization has received surprisingly little attention from both farmer and Experiment Station worker. Because Western Washington is the center of a substantial dairying industry, we possibly appreciate a little more the importance of the pasture crop. No one disputes the great value of pasture as a feed for dairy cattle. Not only is it an excellent succulent feed, but it is cheaply produced as well. Surely, this fact should be recognized as a rare combination. And the dairyman must recognize it, too, for the sooner the cattle can be turned on grass in the spring the better he likes it, and if the cows can be kept on pasture through November, all concerned are still more pleased."

Certainly no one line of endeavor will contribute more to the development of our dairying on a sound basis than improving our grasslands, thereby increasing the grazing capacity for livestock and lengthening the season during which they may feed upon this excellent crop. PREDICT EGG INDUSTRY WILL SUPERCEDE LUMBER. ABERDEEN.—Prediction that the poultry and egg industry would sometime replace the lumber business on Grays Harbor was voiced by J. L. Mollitor, manager of the Grays Harbor unit of the Washington Cooperative Egg and Poultry Association. His reasons include the ideal soil for poultry raising, the abundance of green feed the year around, and the delivery of mail to and from Alaska more than 200 per cent during 1925, he said, and predicted a steady increase during 1926. "The egg and the hen will someday take the place of the hand saw on Grays Harbor," he said.

Try your local merchant first. Have pigs in thrifty growing condition before cold weather begins.

DAIRY

C. O. Young, former extension man for the Canadian Milk Producers' Co., has been incorporated in the Seattle Milk Producers' Association, but the past year or more engaged in re-organizing a dairy herd in the vicinity of Hilo, Hawaii. He returned to the States for a short while and to gather up more cows for the Island trade. Mr. Young returned on his return trip to the Islands on November 21 on the steamer Lathrop, on which he was skipper of the boat of Gussmeyer.

In a discussion on the side of Mount Spokane, north of Lake Norman, David Fullerton has surrounded himself with a herd of 50 milking cows from the mill of which he is manufacturing a good quality of cheese. He claims this is the only good cheese butter made in the Northwest, and that he only makes it during the winter months to produce an amount of the cheese which will be marketed in the Northwest. This year dairy has been going on for three years, and since commencing the manufacture of cheese Mr. Fullerton has experienced an ever-growing demand for his product.

At a meeting of the directors of the Spokane Interstate Fair Association, held last month, ways and means were discussed with the hope of devising some plan of putting the fair on a paying basis. The question of discontinuing the fair at Spokane was also broached, but no action was taken on either question. Before adjourning Mr. Griffith, the president, was instructed to consult with managers of successful fairs throughout the Northwest as to their system of managing their fairs without outside financial assistance.

R. C. McCroby, Garfield, the man who breeds and exhibits splendid Chryseides, is also an extensive potato grower. This year he has harvested and marketed 6,000 sacks of merchantable potatoes; and at the recent meeting of the Pacific Northwest Potato Growers' Association, held at Spokane during the week of the potato show, was elected president of the association. This association has for its purpose the promotion of the interests of potato growers of the four Northwestern states, and British Columbia.

Sheep Men Interested in Tour. About thirty interested sheep owners attended a tour held in Snohomish County early this fall. The purpose of the tour was to acquaint stock owners with the best methods of handling sheep. Pops were made at four places to illustrate actual methods, then an illustrated lecture was given by Thomas S. Griffith of Spokane, owner of Glen Tanna herd of Jerseys, presented the Pleasant Prairie calf with a registered Jersey calf to be sold to aid in starting a community library fund. The calf was sold at a school fair and brought \$50. This amount added to the proceeds of other features of the fair brought the net returns for the library fund up to \$251. The calf was bought by F. E. Murray, Route 6, Spokane.

Sara Ann Duplicate Freshens Again. C. S. Potter, proprietor of Lomondview Farm, Ogden, Utah, the home of Sara Ann Duplicate \$6853, grand champion at the recent Pacific International Exposition, was a caller at the Dairyman and Farmer office on the 19th of last month. Mr. Potter reported that they got "Sara Ann" home just in time to make her son a full-fledged Mormon when he entered this world on November 16th, a day or so after his dam's return from the Pacific International. Mr. Potter says that he has already refused an offer of \$2,000 for this calf, which he considers one of the best bred sons of the breed, for in addition to being a son of the "divine Sara" he is by Sir Peterette Lyons Ormsby, which makes him a grandson of Sir Peterette Ormsby Merced 37th, the great California Holstein sire that was sacrificed a year ago, while just in his prime, during the foot and mouth scourge in California. He has 74 A. O. daughters, 12 above 30 pounds in seven days, and 13 with yearly records exceeding 100 pounds of butter. "Thirty-seventh" was without doubt the best son of old Sir Peterette Ormsby Merced. "Father of the Ormsbys," his descendants are noted in both official record making and in showing performance.

On the Tallapoosa river in Alabama, the Alabama River Company is constructing the world's greatest artificial lake, which will have a capacity of 230,000,000,000 gallons of water. It will be known as the Cherokee Falls Lake, will have a short line of more than 700 miles and will cover 10,000 acres. It will be electrically operated to care for the industrial purposes of the state—American industries.

World's Largest Lake. On the Tallapoosa river in Alabama, the Alabama River Company is constructing the world's greatest artificial lake, which will have a capacity of 230,000,000,000 gallons of water. It will be known as the Cherokee Falls Lake, will have a short line of more than 700 miles and will cover 10,000 acres. It will be electrically operated to care for the industrial purposes of the state—American industries.

Respite Gained on Alaska Mail Edict. The protests of the Seattle Chamber of Commerce, various business organizations in Alaska and steamship companies against the proposal of postal authorities to substitute the delivery of mail to and from Alaska as freight, has resulted in a temporary victory. Postmaster-General Harry S. New has ordered that the present service be continued until March 31, 1926. Suspicion. Chaperone—Where have you been? Future Chaperone—Out motorizing with John. Did I do wrong? Chaperone—I don't know, but I suspect so.—Motor Camper & Tourist. Be a home-town boaster.

Writers' Guild to Finance All-American Books, Plays

MRS. CHARLES STINCHFIELD

NEW YORK.—The Writers' Guild has been incorporated with a view to financing a series of intelligent interest in the literary and dramatic value of American historical material and to "write and finance" the publication of American novels by American authors.

The Guild's committee of judges has chosen for its first publication "The Star of the Alamo," an historical romance of the period when the House struck and split into the majority and minority groups. In the jam resulting from the legislative conflict, numerous bills in which widespread interest was shown were lost. Notable among these was the automobile code, which died in the Senate Wednesday night, when the time for consideration of bills was ended. The bill designed to supplement the direct primary law, which passed the House with a big vote, also died in the Senate.

Minority Rule Exemplified. For fifty-nine of the sixty days of its life the assembly was in open, aggressive warfare with Governor Hartley and for fifty-nine days a group of thirty-two to thirty-four House members kept at bay the overwhelming anti-administration majority of both branches. During that period rule by the minority was strikingly exemplified. While unable, in a positive way, to accomplish anything of itself, this group's opponents on putting on the statute books anything disapproved by the executive.

After death had removed from the House chamber one member of the administration forces and illness another, the majority broke through on Wednesday, the fifty-ninth day, for the first time had the power to exercise its own will. It did so when it changed the House rules, overrode the speaker, and brought back from the Senate and repassed the two measures which mean so much to the higher educational institutions of the state—the millage and capital outlay bills.

Maneuver Sets Precedent. The unusual tactics resorted to, while held by the highest authority to be perfectly legal and parliamentary sound, were admittedly drastic, but unquestionably have set a precedent. The leaders of the "no majority" faction believed the financial situation of the five higher educational institutions was an end which justified steamroller tactics if it could not be accomplished otherwise. Therefore, when once it had the two-thirds necessary to prevail, it drove forward. Just as the school row marked the closing day of this extraordinary session, the Banker reclamation bill, stripping the director of conservation and development of authority in such matters and directing immediate entrance into a contract with the United States government pledging the state to the settlement of the Kittitas High Line Irrigation Project, featured the opening two weeks last November. The minority organization supporting Governor Hartley had, however, its full membership in those days and when the Banker bill was voted all efforts of the majority to garner the required two-thirds of the House to eliminate from the statutes laws of this nature and also those which are conflicting and contradictory. This work will be continued and other repeated measures taken up at the next session.

Many Constructive Measures. While many of the bills passed are not of statewide importance, they are of considerable importance to various communities which they affect. The legislature enacted a larger number of constructive measures. Among them were bills designed to prevent the defaulting of local improvement district bonds, promotion of reforestation, cutting of red tape and expediting court procedure. One of the most important measures of a local nature was the one enabling the signing of the Kittitas reclamation project contract. It also was the bill around which one of the most bitter fights of the session centered, and was the rock upon which the House struck and split into the majority and minority groups.

In the jam resulting from the legislative conflict, numerous bills in which widespread interest was shown were lost. Notable among these was the automobile code, which died in the Senate Wednesday night, when the time for consideration of bills was ended. The bill designed to supplement the direct primary law, which passed the House with a big vote, also died in the Senate. Several commissions were named by the legislature to investigate matters of vital importance in the state and of the greatest importance to the people of the next session. Among them were commissions to investigate reclamation, state timber and educational institutions. SPECIAL SESSION OF LEGISLATURE PASSES 229 BILLS OF 586 INTRODUCED

OLYMPIA.—In its special session 60 days just ended, the state legislature passed 229 bills of the 586 introduced in both branches, and failed to enact 357 which were before it for consideration. Of 324 bills introduced in the House, 128 were passed, while 255 bills introduced in the Senate, 101 were approved by both houses.

Up to the last week Governor Hartley vetoed 16 bills. About half this number were repassed over his veto. Outstanding among them were the two financial bills for the educational institutions, enacted into law a few days ago after the vetoes had once been satisfied in the House. They were reconsidered and passed after both branches had voted to amend the joint rules to make this possible. Among the bills passed were nearly two score which repeal obsolete and unconstitutional laws. A move was started by the legislature last winter to eliminate from the statutes laws of this nature and also those which are conflicting and contradictory. This work will be continued and other repeated measures taken up at the next session.

Beauty Spot of Florida Planned at Temple Terrace

TAMPA, Fla.—Tampa, which has grown more rapidly than any other city in Florida, and is now the largest city in the state, has just annexed Temple Terrace, considered one of the residential beauty spots of the West Coast.

In the way of general laws, subject to executive approval, the legislature gave the city of Seattle a budget law along the lines indicated by Councilman E. L. Bialo; a civil service pension system, after it is approved by the people; means to finance the proposed Denny Hill regrade without inflicting upon property owners; paved the way for Seattle to build tunnels for rapid transit; enacted necessary statutes to take care of Seattle's sewerage problems, and made possible the acquisition of the area demanded by the United States government for the Sand Point aviation field, and voted four additional superior judges for King County.

It established a Western Washington industrial school for feeble-minded, appropriated \$100,000 for a new women's industrial home and appropriated \$200,000 for state participation in the Sequoia centennial Exposition at Philadelphia this year. Other Bills Await Approval. To this list of measures must yet be added the reforestation bills, which include protection for growing timber and a new tax system for land used only for growing forests; the old-age pension, sponsored by the Fraternal Order of Eagles; the licensing of real estate brokers, and the bill which prohibits legislators or members of their families from holding state jobs.

On the negative side of the calendar appear such defeated measures as: Bills pertaining to checking the development of the highway system, a new plan for the redistribution of the motor vehicle license money, and the motor code. The latter was defeated by dilatory tactics in the Senate on the last night for the consideration of House bills. Other rejected proposals include: A constitutional amendment to reclassify property for taxation; the advisory constitution bill; the new revenue and taxation code; six-year terms for county commissioners; a constitutional amendatory bill to allow the reading of the Bible, without

comment in the public schools; the boxing and race-track measures; one-day-off-in-eight for street railway men; amendment to the initiative and referendum act, which would require designation of registration officers or circulators of petitions; direct repeal of the primary law; four-year registration for cities; authorizing cities to regulate telephone rates; empowering cities to acquire telephone systems by condemnation; the judges' retirement pension bill. Those interested in better qualified practitioners of the healing arts made a hard fight for the basic science bill, which would have required a preliminary examination in the fundamentals of hygiene and physiology. Both branches passed the measure, but it was vetoed by Governor Hartley. The Senate promptly repassed it, but the House sustained the governor by the narrow margin of three votes.

Another Thriving Business Suspends Operations. "WHACK! I WON'T DO IT AGAIN. I'VE HONESTLY WON'T WHACK!"

Copyright by United Features Syndicate, Inc.

By WINNE

"Consider the progress already made in lightening the burden of mother and maid. Dish-washing, that bane of the housewife's existence, is no longer drudgery, thanks to the electrical dish-washing machine. The weekly washing-day, which used almost to break mother's back, is now less trying on her body and beauty. Ironing, too, is now easier, thanks to Edison and his fellow inventors. Our grandmothers had to putter with oil lamps, filling them, cleaning them, restoring wicks, wiping the lamp chimneys. Today the mere pressing of a button does the whole job and does it infinitely better.

"In our home we have dispensed entirely with the ice-man and have always on hand an abundant supply of clean, clear chunks of ice, while the food in our icebox is kept in distinctly better condition since we installed an electric refrigerator.

"Sister doesn't have to bother heating her curling tongs in a coal fire over a gas jet. The breakfast toast is made while you wait, electrically. No longer are backs bent until they ache pushing and pulling a broom. The vacuum cleaner attends to that and to other dusting and cleaning duties.

"From the factory and the freestone our electrical geniuses will turn their talents to the farm. Already progress has been made. But the era of electricity on the farm, on the land, in the orchard, in the garden, has only begun to dawn. It is safe to say that by means of every back-breaking species of work on the soil will be lighted by electricity.

"Not only has electricity multiplied our industrial productivity, not only has electricity removed drudgery from the daily life in the home, not only is electricity destined to work miracles in providing food, fruits and flowers at all seasons of the year, not only has electricity enriched our means of amusements and recreation, but electricity has made it possible for all of us to become on speaking terms, through the telephone and the radio. Also, electricity is performing an incomparably valuable mission in making it safe for you and me to travel by sea, by land and in the air.

"Yes, electricity is making life easier and saving time for us all. Are we employing profitably the time thus saved? And how will we employ the still greater amount of time electricity will save for us in the future?"

Congress Votes Million For Northwest States. WASHINGTON.—Appropriations for reclamation carried by the Interior Department bill, as reported to the House, were all approved by that the Senate in the form indicated, body. This insures their going to the Senate in the form indicated with the following figures for projects in the State of Washington: Okanogan, \$85,000; Yakima, \$294,000; Kittitas, unexpended balance of former appropriations, aggregating almost \$750,000.

No battle of consequence was staged over the land settlement and other limitations attached to new projects, but on a point of order, the proviso giving the secretary of the interior until June 30 of next year to extend time for payment of operation and maintenance charges and to contract with an irrigation district for payment of unpaid charges within such period of years as the secretary may find necessary was stricken out. Western Senators have been conferring within the last few days upon a policy to be pursued when the House bill comes over to them and have decided to press for radical revision of the measure with reference to limitations which, they say, have the effect of postponing new projects indefinitely.

A Sure Sign. "The automobile certainly is replacing the horse," remarked the man when he found a piece of a tire in the sausage—Johns Hopkins Black & Blue Jay, in Motor Camper & Tourist.

# RADIO

Lee de Forest, "Father of Radio," in advising amateur radio users on set operation, reviewed the findings of a survey on the significance of low internal resistance batteries prepared by W. A. Brannon, research engineer for the Ray-O-Vac battery manufacturers. He emphasized the paramount importance of this feature as "essential to the obtaining of perfect reception." Dr. de Forest said:

"All radio engineers are continually striving to perfect audio amplification in radio receivers to a point where audio frequencies can be heard in their natural tone, without 'blasting' or distortion. To this end numerous improvements have been made in audio transformers and loud speakers, many of which are extremely refined and may correct only a small part of the distortion which occurs, for example, in a two-tube audio amplifier, yet each improvement introduced adds to the production cost of the radio receiver."

"Many set manufacturers now see the solution to this problem in the B batteries. As long as two years ago it was noted that some makes of B batteries produced howling and distortion whereas other makes would work the set without 'blasting.' The possibility that the B batteries were contributing more to this studio distortion than other factors which required expensive refinements in apparatus for their correction, caused a well-known radio research laboratory to undertake an extensive study of the effect of B battery resistance in audio circuits."

"The results of this study showed that when the internal resistance of the B battery increased above a certain value in a two-tube amplifier, a sufficient voltage drop occurred in the detector B battery to cause marked variations in the detector plate circuit."

"The output of a two-tube audio amplifier after passing through the common B battery, which is usually 30 to 35. This output current is a pulsating direct current and it encounters the internal resistance of the detector tube B battery it suffers a resistance drop. Due to the pulsating character of this audio circuit current, the voltage produced in this resistance drop is continually changing and these changes are reflected in the detector plate circuit, which is completed to the audio amplifier through the first radio transformer. Through this coupling the changes are amplified through the amplifier tubes until they reach high values and at certain audio frequencies will produce tremendous amplification and the well-known regenerative howl."

"It was also found by this investigating laboratory that with most radio amplifiers this B battery distortion would occur when the internal resistance of the detector B battery amounted to as little as 15 ohms, though it was also observed that different audio frequencies were amplified more at certain B battery resistance than at others."

"One remedy for this type of audio distortion is a separate detector B battery. However, it is possible to construct a B battery which will not have a high internal resistance, in which case no separate detector B battery is necessary to avoid distortion due to internal B battery resistance, provided to more than 22 1/2 volts of B battery is used on the detector tube. Many set makers, having discovered the improvement in amplification gained by the use of these low resistance B batteries are now recommending their use with reception sets in preference to high resistance batteries."

"A dark woman, like a dark horse often wins," writes Hazel Rowson Cades, in the Woman's Home Companion. "But the odds are always against her. It's a hard job to buck romance or live down old reputations."

"Blondes are usually considered dangerous, in a nice way. But if you'll take a look at your melodramas you'll find a dark woman, every time. There are many brunettes—petite and ponderous, ivory-tinted or swarthy, amiable or adventurous. Each with her life to live and her power to match to her nose. And it is not desirable or fair to expect that every brunette should seek adventure, wrapped in a Spanish shawl. There are, among them, a good many 'stylish stouts.' I'm sure they do not mean to be dangerous. And are not."

# Shopping for Shawls in Shanghai

IN ORIENTAL ARRAY

"If I do not buy anything else, I am certainly going to buy one of these wonderful Oriental shawls with the bright embroidery and the long fringe." So declared one of the youngest, prettiest and most vivacious girls boarding the Empress of Scotland, flagship of the Canadian Pacific fleet, which left recently on her cruise round the world.

It would be reasonably safe to wager that nine out of ten of the women taking the cruise made the same resolve before they started round the world, and by the time the tenth sea the wonderful display of the soft heavy silk shawls flung gracefully before them in the shops of Shanghai and

Canton, she, too, will succumb and buy the heaviest, finest fringed one of all the collection! Particularly if she is one who appreciates a bargain, for thirty-five dollars will buy in Shanghai what seventy dollars could not touch in this country. And every girl knows that a beautiful shawl to wear at the opera—yellow or red, or at least embroidered with red and blue if she is a brunette, white with lustrous pale gold embroidery if she is fair, adds a most luxurious touch to her evening gown.

Other curious and beautiful objects can be purchased in Shanghai. Yards and yards of exquisite hand made flax linens, and at prices most worthy of the two or three lengths large enough to cover a "bebe" table costs only five dollars. So

if the passenger has not already bought as much flax as she can afford in Nice and Naples, she will buy at least enough to use for her bride's party.

And jade! And carved ivory, so exquisitely wrought that it is hard to believe that the wrinkled hands of the old Chinaman sitting with another piece in his hand ready for his skill to turn it into a thing of priceless beauty, could ever have carved it so delicately. And the silk shops of Shanghai, filled with a riotous assortment of colors and weaves—brocades for the matron, shimmering satins for the debutante—dazzle the bewildered shopper until she must get up to buy two or three lengths because it is so hard to decide which is lovelier.

# The Way to Permanent Pastures

M. E. McCollam, Agronomist, Western Experiment Station, Puyallup.

WHEN we stop to think about it, nothing seems a more logical step toward advancement of our agriculture than improving our grasslands. Pasture occupies over half the land area of the country and contributes nearly as much to the sustenance of our livestock as all crops combined, yet

plants, such as the bent grasses, white clover and rough-stalked meadow grass have come in naturally and are established here. A reasonable amount of care and management is all that is needed to encourage these grasses to yield a bountiful crop. How often, though, are these stands plowed up and destroyed for the purpose of seeding short-lived plants such as red clover and Italian ryegrass, or some other crop not so profitable to the dairyman as the original sod might have been! The result is lost money and effort, and instead of a good permanent pasture, an unproductive area of mesquite and weeds.

While there are places where the best permanent pasture plants appear naturally, there are other localities where the natural grass cover is practically worthless, even if cared for and properly managed. It is here that the plow could be used to advantage and the proper tame grasses seeded. These statements lead us to the conclusion that it is highly important to know the grasses in our pastures, and right here is where the big step in pasture improvement can be made. The future of our permanent pastures depends largely on a knowledge of the best pasture grasses and their possibilities. We must conserve and care for these grasses where we have them established, and seed the more productive tame grasses where the present grass cover is worthless.

This subject of pasture will be discussed in more detail by the writer in a series of articles in this periodical. The purpose of the first article has been to emphasize the significance of pasture, its present but neglected place in our farming, and the great possibilities still un-realized by the users of grasslands in Western Washington.

Certainly no one line of endeavor will contribute more to the development of our dairying on a sound basis than improving our grasslands, thereby increasing their grazing capacity for livestock and increasing the season during which they may feed upon this excellent crop.

**PREDICT EGG INDUSTRY WILL SUPERCEDE LUMBER**

**ABRIDGMENT**—Prediction that the poultry and egg industry would some time replace the lumber business in Grays Harbor was received by L. J. Muller, manager of the Grays Harbor unit of the Washington Cooperative Egg and Poultry Association. His reasons include the ideal soil for poultry raising, the abundance of green feed the year around, and the rain. The egg business increased more than 200 per cent during 1923, he said, and predicted a steady increase during 1924.

"The egg and the hen will some day take the place of the band saw on Grays Harbor," he said.

**Signs at Railroad Crossings**

A road sign painter suggests the following signs for railroad crossings:

"Come ahead. You're unimportant."

"Try our engines. They satisfy."

"Don't stop. Nobody will miss you."

"Take a chance. You can get hit by a train only once."—Motor Camper & Tourist.

# DAIRY

C. O. Young, former extension man for the Carnation Milk Products Co., Seattle, and later fieldman for the Seattle Milk Shippers' Association, but for the past year more engaged in developing a dairy herd in the vicinity of Honolulu, Hawaiian Islands, recently returned to the States for a short visit, and to gather up more cows for the island trade. Mr. Young started on his return trip to the Islands on November 20 on the steamer Lurline, on which he was shipping 60 head of Guerneys.

In a clearing on the side of Mount Spokane, north of Lake Newman, David Fullerton has surrounded himself with a herd of 50 milking goats from the milk of which he is manufacturing a good quality of cheese. He claims his is to be the only goat cheese being made in the Northwest, and that he only undertook the manufacture of this product on account of the inaccessibility of his place to market the milk. This goat dairy has been going on for three years, and since commencing the manufacture of cheese, Mr. Fullerton has experienced an ever-growing demand for his product.

At a meeting of the directors of the Spokane Interstate Fair Association, held last month, ways and means were discussed with the hope of devising some plan of putting the fair on a paying basis. The question of discontinuing the fair at Spokane was also broached, but no action was taken on either question. Before adjourning Mr. Griffith, the president, was instructed to consult with managers of successful fairs throughout the Northwest as to their system of managing their fairs without outside financial assistance.

R. C. McCrosky, Garfield, the man who breeds and exhibits splendid Clydesdales, is also an extensive potato grower. This year he harvested and marketed 6,000 sacks of merchantable potatoes; and at the recent meeting of the Pacific Northwest Potato Growers' Association, held at Spokane during the week of the potato show, was elected president of the association. This association has for its purpose the promotion of the interests of potato growers of the four Northwestern states, and British Columbia.

**Sheep Men Interested in Tour**

About thirty interested sheep owners attended a tour held in Snohomish County early this fall. The purpose of the tour was to acquaint flock owners with the best methods of handling sheep. Stops were made at four places to illustrate actual methods of sheep raising.

Thomas S. Griffith of Spokane, owner of Glen Tanna herd of Jerseys, presented the Pleasant Prairie school with a registered Jersey bull calf to be sold to aid in starting a community library fund. The calf was sold to a school for \$80. This amount added to the proceeds of other features of the fair brought the net returns for the library fund up to \$351. The calf was bought by F. E. Murray, Route 6, Spokane.

**Sara Ann Duplicate Freshens Agam**

C. S. Potter, proprietor of Lomand Valley Farm, Ogdan, Utah, the home of Sara Ann Duplicate 668853, grand champion Holstein calf at the recent Pacific International Exposition, was a caller at the Dairyman and Farmer office on the 19th of last month. Mr. Potter reported that they got "Sara Ann" home just in time to make her son a full-fledged Mormon when he entered this world on November 16th, a day or so after his dam's return from the Pacific International Exposition. Mr. Potter says that he has already refused an offer of \$2,000 for this calf, which he considers one of the best bred sons of the breed, for in addition to being a son of the "divine Sara" he is by Sir Pieterte Lyons Ormsby, which makes him a grand-son of Sir Pieterte Ormsby Mercedes 37th, the great California Holstein sire that was sacrificed a year ago, while just in his prime, during the foot and mouth scourge in California. He has 74 A. R. O. daughters, 12 above 30 pounds in seven days, and 15 with yearly records exceeding 100 pounds in weight. "Thirty-seven" was without doubt the best son of old Sir Pieterte Ormsby Mercedes. "Father of the Ormsbys," his descendants are noted in both official record making and in show-ring performance.

**MCCORMICK BID IS HIGH FOR VESSELS**

Advices from Washington, D. C., last Thursday stated that the Charles McCormick Lumber Co., San Francisco, which operates the McCormick Steamship Co., has the highest bid for the combination cargo-passenger government-owned vessel of the Pacific-Argetine line, operating between the Pacific Coast and the Atlantic Coast of South America. Its bid was \$49,000 for each ship.

**RESPIRE GAINED ON ALASKA MAIL EDICT**

The protests of the Seattle Chamber of Commerce, various business organizations in Alaska and steamship companies against the proposal of postal authorities to substitute the delivery of mail to and from Alaska as freight, has resulted in a temporary victory. Postmaster-General Harry S. New has ordered that the present service be continued until March 31, 1926.

# Writers' Guild to Finance All-American Books, Plays

**MRS. CHARLES STINCHFIELD**

**NEW YORK**—The Writers' Guild has been incorporated to finance the publication of American novels by American authors.

The Guild's committee of judges has chosen for its first publication "The Star of the Alamo," an historical romance of the period when "The West" and with a plot that carries down the Ohio and Mississippi rivers into Texas, through the most lurid phases of that state's history in the days of Santa Anna and the Alamo.

# Only a Meal!

"Oh, Mother! Jennie was at school today all broken out with chickenpox and she sits just behind me," breathlessly reported Mary, who had that morning returned to school after having had the measles.

"But, Mary," inquired her mother, "you're not a chickenpox sufferer, are you?"

"No, Mother," she said and she took the spoon she held in her hand and she told her little brother that he, too, had the measles. "But, Mother," she said, "I know it would be dangerous for her to take cold and would not allow her to go out."

"Yes, Mother, but she told me and I saw the spots. She kept them covered up so the teacher could not see them—and she told me her little brother had it, too, and her mother said she would have to come to school because she could not be bothered taking care of two sick children. Mother, will I get chickenpox and have to stay out again?"

"And the mother's heart was heavy as she thought of the other woman who had had the measles, and her other children to the danger of sickness, for Mary's mother was an intelligent woman and knew how unnecessary it was for children to contract contagious diseases if only ordinary care were used, and that if each sick child were isolated these diseases could quickly be eliminated. But she knew how many mothers disregard quarantine regulations and carelessly spread contagion. In fact, when Mary had been ill, a neighbor had walked into the house with her two children to expose them so they would have measles, and she got it over with." Then Mary's mother thought of the little playmates who were still suffering, and might always suffer, from infected ears and eyes or heart troubles, following attacks of measles. And she wondered how mothers could so recklessly risk the health of their own and others' children.

**WORLD'S LARGEST LAKE**

On the Tallapoosa river in Alabama the Alabama Power Company is constructing the world's greatest artificial lake, which will have a capacity of 520,000,000 gallons of water.

It will be known as the Cherokee Bluffs Lake, will have a short line of more than 700 miles and will cover 40,000 acres. It will generate electricity to care for the industrial progress of the state—American Industries.

# SPECIAL SESSION OF LEGISLATURE PASSES 229 BILLS OF 536 INTRODUCED

OLYMPIA—In its special session 60 days just ended, the state legislature passed 229 bills of the 536 introduced in both branches, and failed to enact 357 which were before it for consideration. Of 324 bills introduced in the House, 128 were passed, while 202 bills introduced in the Senate, 161 were approved by both houses.

Up to the last week Governor Hartley vetoed 16 bills. About half this number were re-passed over his veto. Outstanding among them were the two financial bills for the educational institutions, enacted into law a few days ago after the vetoes had once been sustained in the House. They were reconsidered and passed after both branches had voted to amend the joint rules to make this possible. Among the bills passed were nearly two score which repeal obsolete and unconstitutional laws. A move was started by the House to amend the constitution to eliminate the statutes laws of this nature and also those which are conflicting and contradictory. This work will be continued and other repeal measures taken up at the next session.

**Many Constructive Measures.**

While many of the bills passed are not of statewide importance, they are of considerable importance to various communities which they affect. The legislature enacted a larger number of constructive measures. Among them were bills designed to prevent the defaulting of local improvement district bonds, promotion of reforestation, cutting of red tape and expediting court procedure. One of the most important measures of a local nature was the one enabling the signing of the Kittitas reclamation project contract. It also was the bill around which one of the most bitter fights of the session centered, and was the rock upon which the House struck and split into the majority and minority groups.

In the jam resulting from the legislative conflict, numerous bills in which widespread interest was shown were lost. Notable among these was the automobile code, which died in the Senate Wednesday night, when the time for consideration of bills was exhausted. The bill designed to supplement the direct primary law, which passed the House with a big vote, also died in the Senate.

Several commissions were named by the legislature to investigate matters of vital importance in the state and to make specific recommendations to the next session. Among them were commissions to investigate reclamation, state timber and educational institutions.

**Minority Rule Exemplified.**

For fifty-nine of the sixty days of its life the assembly was in open, aggressive warfare with Governor Hartley and for fifty-nine days a group of thirty-six to thirty-four House members kept at bay the overwhelming anti-administration majority of both branches.

During that period rule by the minority was strikingly exemplified. While unable, in a positive way, to accomplish anything of itself, this bloc effectively put upon the governor's opponents the pressure of the statute books anything disapproved by the executive.

After death had removed from the House chamber one member of the administration forces and illness among the majority broke through last Wednesday, the fifty-ninth day, and the bill designed to provide for the exercise of its own will. It did so when it changed the House rules, overrode the speaker, and brought back from the Senate and re-passed the two measures which mean so much to the state—the millage and capital outlay bills.

**Maneuver Tactics Resorted to.**

The unusual tactics practiced to while held by the highest authority to be perfectly legal and parliamentary sound, were admittedly drastic, but unquestionably have set a precedent. The leaders of the House majority organization believed the financial ad-

# Beauty Spot of Florida Planned at Temple Terrace

**TAMPA, Fla.**—Tampa, which has grown more rapidly than any other city in Florida, and is now the largest city in the state, has just annexed Temple Terrace, considered one of the residential beauty spots of the West Coast.

# "ELECTRICITY EMANCIPATING HUMAN RACE FROM SLAVERY," SAYS FAMOUS EDITOR

**Industries** has increased from 65,000 per million inhabitants to 121,000. What has made this 85 per cent increase possible?

"Also, what do these movements signify?"

"They mean that fifty years ago a much larger proportion of the people of this country had to be employed to raise food for us and that we could not spare nearly as many workers as we now can spare to produce comforts and luxuries for us."

Mr. Forbes was introduced to the radio audience by Arthur Williams, vice-president of the New York Edison Company, as "a great teacher, a wise counsellor, and an admirable inspiration for ambitious American youth." Mr. Forbes' address followed: "Have you a little vegetable garden or a little flower garden in your cellar?"

"Not yet, but probably soon."

"Electricity in making this possible, it is being abundantly proved at the Boyce Thompson Institute for Research established in Yonkers by the examiner whose name it bears."

"America has only half as many farm laborers today as there were fifty years ago. Then there were 75,000 farm laborers for every million population. Now there are only 37,500. The number of farmers has decreased from 77,000 to 57,000 per million population."

"Meanwhile, the number of workers in manufacturing and mechanical industries has increased from 65,000 per million inhabitants to 121,000. What has made this 85 per cent increase possible?"

"Electricity is emancipating the human race from slavery. Already electricity linked to machinery is performing many of this nation's chores, and will tomorrow and the next day perform nearly all of them—20,000 electrical appliances and devices will be exhibited at next week's electrical show in New York."

"Electricity's greatest achievements in the past have been in the broad field of industry—in mining, in manufacturing, in metallurgy, in transportation, in transmission, in public utility. Electricity wedded to machinery has done more than anything else to place the United States in the very forefront of the industrial nations of the world."

"The electric people are now turning more of their attention from the mine, the factory and the furnace to the pen, the ballpoint and the typewriter."

These interested in being better qualified practitioners of the healing arts made a hard fight for the basic science bill, which would have required a preliminary examination in the fundamentals of hygiene and physiology. Both branches passed the measure, but it was vetoed by Governor Hartley. The Senate promptly re-passed it, but the House sustained the governor by the narrow margin of three votes.

**Other Bills Await Approval.**

It established a Western Washington industrial school for feeble-minded, appropriated \$100,000 for a new women's industrial home and appropriated \$200,000 for state participation in the Sesquiennial Exposition at Philadelphia this year.

To this list of measures must yet be added the reforestation bills, which include protection for growing timber and a new tax system for land suitable only for growing forests; the old-age pension, sponsored by the Fraternal Order of Eagles; the licensing of real estate brokers, and the bill which prohibits legislators or members of their families from holding state jobs.

On the negative side of the calendar appear such defeated measures as:

Bills pertaining to checking the development of the highway system, a new plan for the redistribution of the motor vehicle license money, and the motor code. The latter was defeated by dilatory tactics in the Senate on the last night for the consideration of House bills.

Other rejected proposals include: A constitutional amendment to reclassify property for taxation; the advisory convention bill; the new revenue and taxation code; six-year terms for county commissioners; a constitutional amendatory bill to allow the reading of the Bible, without

**Charm of Temple Terrace** epitomize the delights of Florida; it is a cleared recent visitor. "Its site on the highest ground in the picturesque region about Tampa bay is only eight miles away by asphalt road."

"All the sunshine and loveliness of Florida have gone into making this town 'Florida's masterpiece.'"

**Electricity Emancipating the Human Race from Slavery.**

Industries has increased from 65,000 per million inhabitants to 121,000. What has made this 85 per cent increase possible?

WHACK! I WON'T DO IT AGAIN, MOM. OWCH! HONEST I WON'T WHACK

**THE GENEESE NEWS**

Genesee, Idaho  
 Entered at the post office at Genesee as second-class mail matter  
 P. C. McCREARY, PUBLISHER  
 Subscription price, strictly in advance, \$2.00  
 FRIDAY, JANUARY 22, 1926

**Entertained Tuesdays**  
 The Card club was very pleasantly entertained at the home of Mrs. Fred K. Bressler Tuesday afternoon, when pinocle was played at three tables. The honors of the afternoon going to Mrs. W. M. Herman.

The invited guests were Mrs. Mahlon Follett and Mrs. V. A. Beckman. The next meeting will be held with Mrs. W. M. Herman in two weeks.

Many a chap who thought he loved at first sight has been entirely cured when he took another look.

**Twenty Years Ago**  
 Mr. and Mrs. Chas. Kraut are the proud parents of a son, born Friday of last week.  
 Chas. Gelz made final proof on a piece of Steptoe canyon land at Colfax the first of the week.  
 Edwin Smoltz, Clarence Quayle and Clarence Christenson will represent the Genesee High School in the debate which is to take place between the Moscow and Genesee high schools, February 10. The question for debate is "Resolved, That a federal commission will be given authority to regulate railroad rates." Genesee will take the affirmative side of the question.

**Buya Moscow Property**  
 Paul Cann has bought a residence property in Moscow and expects to shortly remove to that city, where he and Mrs. Cann will remain the rest of the winter at least.

**GET-TOGETHER MEETING AT CONGREGATIONAL CHURCH**  
 A most delightful pick-up lunch was given at the Congregational church last Monday evening under the auspices of the Sunday school. After a large number had been served in the basement the group retired to the auditorium where a program varying from an operatic selection by a ladies' quartette composed of Miss Hardman, Miss Oller, Mrs. Smiley, and Mrs. A. Beckman, to a burlesque debate on the subject "Resolved: That We Should Pity Our Grandchildren" by Messrs. Wicks, Thurston, Leavitt and Sprague, was given to the manifold delight of the audience.

Other numbers on the program were a violin solo by Dr. Thurston, a piano solo by Wilma English, a soprano solo, "Just A-wearyin' for You," by Miss Hardman, who sang as an encore Dudley Rock's "Absent."

In the debate the affirmative team, composed of Dr. Leavitt and Mr. Wicks won a unanimous decision over Dr. Thurston and Rev. Sprague, who upheld the negative. As a token of their victory, Fred Casebolt, the presiding officer, presented Dr. Leavitt with a beautiful doll. The judges were Miss Helen Hardman, Edith Anderson and Jessie Keeler. The meeting then adjourned with everyone, except perhaps the debaters, agreeing that a most pleasing program had been enjoyed.

**Among the Sick**  
 Mrs. Minnie Springer, who has been quite ill for the past several weeks, is again able to be up and around.  
 Mrs. G. A. Bumpass, who has been confined to her bed with pneumonia, for the past several days, is getting along nicely.  
 "Grandma" Kambsch is still quite ill at her home just west of town.  
 G. A. Bumpass, whose condition has been serious for the past several weeks, seems to be gradually growing weaker. All the children have been summoned to his bedside.

Mrs. Frank Green, who underwent a major operation at Moscow hospital last week, is getting along as well as can be expected and her friends expect her ultimate recovery.

**K. of P. Doings**  
 The Knights of Pythias installed their new officers on last Tuesday evening after which a good lunch was served. The lunch was served by the master hand of (Jiggs) Ed. Vanouck. After the lunch the members retired to the lodge chambers where games and music provided the evenings entertainment.

Speeches were made by the new officers. R. E. Emmet, made an especially interesting one on the subject "How much does any one get out of a lodge?" An unusually large number of members attended. We hope to see this attendance continued for the rest of the season.

**Farm Loan Association Meeting**  
 A meeting of the Lewiston district of the National Farm Loan association will be held at Lewiston on Monday, January 25, at the Lewis-Clark hotel, to which all interested are cordially invited.

This meeting is of especial interest to farmers as a very interesting and instructive program has been arranged.

**What is a Cow?**  
 The cow is a female quadruped with an alto voice and a countenance in which there is no guile. She collaborates with the pump in the production of a liquid called milk, provides the filter for hank and last is skinned by those who have benefitted, as mortals commonly are.  
 The young cow is called a calf and is used in the manufacture of chicken salad.  
 The cow's tail is mounted aft and has a universal joint. It is used to disturb marauding flies and the tassel on the end has unique educational value. Persons who milk cows and come in contact with the tassel have vocabularies of peculiarly impressive force.  
 The cow has two stomachs. The one on the ground floor is used as a warehouse and has no other function. When this one is filled, the cow retires to a quiet place where her ill manners will occasion no comment and devotes herself to belching. The raw material thus conveyed for the second time to the interior of her face is pulverized and delivered to the auxiliary stomach, where it is converted into cow.

The cow has no upper plate. All her teeth are parked in the lower part of her face. This arrangement was perfected by an efficiency expert. As a result, she bites up and gums down.  
 The male cow is called a bull and is lassoed along the Colorado, fought south of the Rio Grande, and shot in the vicinity of the Potomac.  
 A slice of cow is worth 4 cents in the cow, 14 cents in the hands of the packers, 35 cents at the meat market, and \$2.40 in the restaurants that specialize in atmosphere.—Floater.

**CHURCH NOTICES**

**St. John's Lutheran Church**  
 Rev. A. F. Wolf, Pastor  
 Sunday school at 9:30 a. m.  
 English services will be held each Sunday morning at 10:30 o'clock, with the exception of the first Sunday of each month, when German services will be held at the usual hour.

**Christian Church**  
 N. E. Beach, Pastor  
 Bible school at 9:45 a. m.  
 Communion and preaching service at 11 a. m.

C. E. meets at 6:30 p. m. with Miss Audrey Pitman as leader.  
 Evening service at 7:30 p. m.  
 J. L. Croot of Moscow will preach at both morning and evening services.

**Genesee Valley Lutheran Church**  
 Rev. Gerh. A. Peterson, Pastor  
 Sunday, January 24, 10 a. m. Sunday school and Bible classes. At which hour Mrs. N. E. Beach will also meet. We will endeavor to commence promptly at the hour set in order to be ready by the time the morning service begins.  
 At 11 a. m. Worship. Short services in the Norse and English. Bring along your hymn books.  
 A cordial welcome to friends and strangers to worship with us.

**Congregational Church**  
 Paul W. Sprague, Preacher  
 Mrs. W. H. Harman, organist.  
 W. E. English, choir director.  
 Sunday school, 9:45 a. m. Mrs. Arthur Hampton, superintendent.  
 Morning worship, 11 o'clock.  
 Young People's meeting, 7 p. m.  
 A service of unusual interest and worth is being planned for the forum service which will be held next Sunday evening at 7:30. The speaker is Prof. T. S. Kerr of the University of Idaho. His subject is the "Statement of Social Ideals," which was adopted by the National Council of Congregational Churches, October 24, 1925. All who are interested in the practical applications of the teachings of Jesus to our present day life are cordially invited to attend.

The "Statement of Social Ideals" is not a creed which binds all of the churches or all of the people to any one set of beliefs. It is an outline composed by experts and sanctioned by the leading men of the church, telling what they conceive to be the Christian attitude toward social questions. If you are interested in such modern problems as universal education, industrial relations, racial, religious and international affairs you will find an hour spent at the forum an excellent investment.  
 At the morning service the pastor will discuss the social teachings of Jesus.

A writer asks what has become of the old fashioned cook? She started a fire with gasoline.

**RCA - Its meaning to the Radio Public**

Five years ago the now familiar RCA monogram was an idea. Today it is truly the hallmark of radio. It is the symbol that represents the highest type of technical achievement in the two basic endeavors of the Radio Corporation: (1) broadcast transmission and reception, and (2) international and marine radio communication service.

**THERE THE SYMBOL TOOK ROOT**  
 But back in 1920 when radio was a new science just finding its first great application in saving lives at sea—back in those days before a national institution of broadcasting had been predicted by the most daring visionary—there the RCA symbol took root.

While it has taken but five years to acquaint the public with the mark RCA, long before the advent of broadcasting, the foundation for constant commercial and technical development was being laid by the same men who today are a part of the RCA. It has been no overnight miracle. Service to the public is the goal by which each step has been guided.

**OVER ONE MILLION RADIOLAS**  
 In the production of broadcast apparatus, RCA has rendered a service to the American public second to none in superiority and scope. Over one million Radiolas have been accepted by purchasers as their first choice of performance and quality. In the remarkable results achieved by the Super-Heterodyne, the engineers of the Radio Corporation of America are confident that the highest obtainable basic circuit development has been reached.

**PERMANENCY AND PROTECTION**  
 Moreover, it is believed that present Radiolas are sufficiently dependable in every respect of sensitivity, selectivity, ease of operation and quality or reproduction to serve the owner for many years after purchase. This factor of permanency lends a stability to the entire line of Radiolas that means a real trading assurance and protection to the RCA owner.

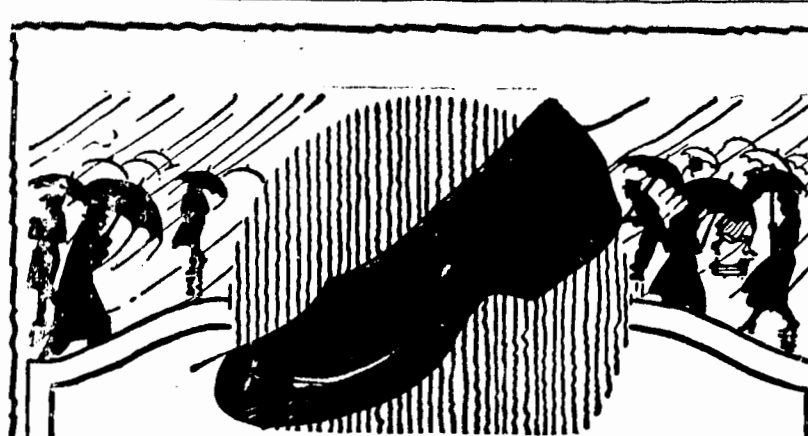

**EVERLASTING RESEARCH**  
 When more efficient radio products are possible, they will be found, as in the past, under the trademark of RCA, for behind Radiolas, Radiotrons and RCA accessories stand the world famous laboratories of the General Electric Company, the Westinghouse Electric & Manufacturing Company and the Wireless Specialty Apparatus Company. Here, day in and day out, leading scientists work constantly that refinements in the art of broadcasting may be enjoyed by an exacting public; that faster and more economical radiogram service may ever be available to international commerce; that reliable communication and thus greater safety of life at sea may be possible for the American merchant marine.

**True Service**  
 PUTTING the forces of nature to work at the power plant has brought Electricity—the universal servant—to the homes and workshops of rich and poor alike. Here is true service, indeed.  
 The Post Falls dam, gates and power station are located on the Spokane river at Post Falls, Idaho, 25 miles east of Spokane. Here is a picturesque station, the main gates on the north channel being shown above. The water falls 50 feet at the power station where five generators have an installed capacity of 15,000 horsepower. It was built in 1906 and is one of seven stations which respond instantly when you push the button to enjoy Electric Service.

**JOHN ROACH**  
 Official Floor Manager Rimrockers' Ball, Genesee, January 29.  
 Our staff photographer tried hard to get a new copy of John's "physog" but was unable to do so. However, John himself admits that the accompanying picture is a true likeness, so what more could a fellow ask?  
 He says he will guarantee everyone who attends a good time.

**PERSONALS**  
 Mrs. Edith Day, a sister of the late Mrs. Carrie Platt, returned to her home at Spokane Tuesday morning.  
 Mrs. Wesley Dorchester and son left Tuesday for their home at Wetaskiwin, Canada, after having visited relatives here since Christmas.  
 Mrs. Elzie Carter of Boise arrived Wednesday for a visit with her father, G. N. Hollister, and sister, Mrs. Fred K. Bressler. She expects to remain about ten days.

**Pine Grove News**  
 Earl Freeburn spent Sunday with Glen Brazier.  
 Stella Whitted visited with Luzena Jones Sunday night.  
 Marguerite Spurbek was a Moscow shopper last Thursday.  
 Miss Swanson spent Tuesday evening at the Fred Miller home.  
 Mr. and Mrs. Roy Sweet and family spent Sunday with Oliver Clark's.  
 Mrs. Fred Miller had Sunday dinner at the Henry Whitted home.  
 Pearl Lambert and daughters took Sunday dinner with Mr. and Mrs. R. F. Lambert.  
 Hot lunches are now being served at the Pine Grove school. Soup, the diet which is best enjoyed by the children.

The Pine Grove Sewing club spent an enjoyable meeting with Mrs. Roy Sweet last Thursday. A most delicious lunch was served by the hostess.  
 Marguerite Spurbek, Miss Swanson, Joe Doyle and Jack Gehrke represented the "Wabblers" at the party given Friday evening at the Ed. Gehrke home. Many were present from nearby districts and every one reported an "extra-ordinarily good time." A delightful lunch, which spoke for itself, was served by the hostess.  
 The same Pine Grovers attended the party given Saturday at the Dick and Nebelschick home. And were here as delightfully entertained as on the previous night.

**"Summer" Snowed Under**  
 While the mercury is still standing at a point around freezing, on the average, the Snow Man got busy Wednesday and Thursday and covered the ever-present signs of summer that have been manifest thus far this winter season, to a depth of about eight inches.  
 While most people are not overly fond of snow, this one seems to be particularly welcome and it has been many a long day since the first sled of the season made its appearance on the twenty-first day of January, as was the case this year.

There has been several dates set by the old-timers as to just when a similar winter had been experienced here, but suffice it to say that it has been unusually warm and pleasant and everyone has enjoyed it, but as this is the time for winter, people have begun to wish for it—but none are anxious for zero weather.

**Progressives Meet**  
 The Progressive club was very pleasantly entertained by Mrs. Fred Nagel on Thursday of this week. A delicious four-course dinner was served at 1:30 o'clock after which officers were elected for the ensuing year, those elected being Mrs. Viola Tupker, president; Mrs. Ed W. Vanouck, vice president; Mrs. Nellie Hayden, secretary and treasurer.  
 The next meeting will be held in two weeks.

(Continued from Last Week)

**CHAPTER 17**  
The Trial of John Marshall

It had been a terrible week for  
Mary. Terence had not returned,  
her faith in him was unshaken, but  
her heart was heavy with fears that  
he had been killed in an accident, or  
subdued in a degree as the prosecutor  
had scored, the prosecutor  
resumed:

"The State rests its case in your  
hands, gentlemen, with the demand  
that the defendant expiate his crime  
by the death penalty."

The tense excitement in the room  
subsided in a degree as the prosecu-  
tor took his seat, and the gray-headed  
judge arose and droned out his  
charge to the jury, summing up the  
points on both sides in a dispassionate,  
drawing voice.

A deputy touched Taggart on the  
elbow.

"You're wanted outside a minute,"  
Mr. Taggart.

Taggart went out in the hall. It  
was Stella Montrose who was waiting  
for him. He whispered with her in  
a corner at the end of the corridor.

"I've waited long enough," Stella  
told him. "Come across with the rest  
of that money—or I'll stop the show  
—NOW."

Her expression was determined.  
Taggart was alarmed.

"Sh-h-h. I've already told you the  
bank gave O'Rourke a cashier's check  
for \$20,000," he said. "That, with the  
\$5,000 cash I already slipped you will  
make the total we agreed on."

"Well, but give it to me," Stella  
insisted.

"Wait," whispered Taggart. "The  
check's no good until Marshall's girl  
endorses it. I've told her O'Rourke  
beat it over the border. We've got  
to play this right. Just bide your  
time. Marshall is doomed. When I  
get his ransom I'll let you in on the  
game. Don't worry—I'll treat you  
right."

"Well, you better," Stella said, and  
they parted.

The judge finished his charge to  
the jury as Taggart re-entered the  
courtroom. The jurors filed out, and  
the judge dismounted from the bench.  
A buzz of conversation filled the  
courtroom as the recess began.

Mary's arm rested comfortingly on  
her father's shoulder. He stared be-  
fore him, silent. Taggart approached.  
"I have done our best," he said.  
"I am hopeful, very hopeful."

After an hour of dreadful suspense  
for Mary and her father, word was  
sent from the jury room that a ver-  
dict had been reached. The judge  
mounted to the bench, rapped for  
order, and remained standing as the  
jurors filed in to their box in the  
courtroom.

"Mr. Foreman, will you announce  
the finding of this jury?" the judge  
droned.

An ominous hush fell upon the  
courtroom. The spectators all leaned  
forward in their seats breathless and  
John Marshall gripped his chair and  
waited, rigid and livid. Mary, pale,  
pressed against him, and stroked his  
hand.

The foreman of the jury arose and  
spoke, slowly chopping out his words:  
"Your Honor, the jury finds the  
defendant, John Marshall, guilty—"

The muttered awe that thrilled  
through the courtroom at the word  
"guilty" almost drowned out his last  
words. The judge bent his gaze upon  
the rostrum. Marshall had sunk back  
in his chair in utter despair. Mary  
rose, her hands clenched, her face  
filled with wild terror.

"Of the murder of Black Ben-  
well," the foreman's voice concluded.  
Whispering voices buzzed through  
the room. Mary, her head at first  
swimming with defiance, in her over-  
wrought state about to fly into the  
face of the judge and jury scream-  
ing, suddenly subsided, and fell  
swoning into Taggart's arms.

The judge was rapping for order,  
and silence once more filled the room.  
"You have heard the verdict of the  
jury," he was droning. "The court  
will pronounce sentence upon the  
prisoner two weeks from today, and  
until that time the case is ad-  
judged."

canyon cabin where they imprisoned  
him.

He had been constantly on the  
alert for opportunities to escape, but  
they kept a double armed guard  
over him, night and day.

"He's a tough customer—we can't  
take any chances on him," Buck told  
his gang.

One day after the trial, Buck re-  
turned to the canyon, after a confer-  
ence with Taggart at the Pico Bar,  
in a large motor car.

"The boss says rush him across into  
Mexico, as far out of the way as pos-  
sible," he explained.

Covering him with their guns, they  
forced Terence, whose hands were  
tightly bound, into the car. One of  
them sat on each side of him; Buck  
took the wheel. He seized the clutch,  
threw the car into gear, and they  
started off down the road at high  
speed.

Buck was a reckless driver. He  
kept accelerating the speed of the car  
to its utmost. Snorting and racing  
furiously, they approached the old  
wooden bridge across the River. The  
warning sign at the bridge approach  
read, "Danger—Speed limit over  
bridges eight miles per hour."

Buck did not heed the sign. He was  
going at more than sixty miles an  
hour, and kept right on. The shabby  
wooden bridge trembled and groaned  
as the heavy car plunged onto it at  
that velocity. As the car reached the  
middle there was a sound of snap-  
ping timbers, a crash. The old wood-  
en structure collapsed, dropping the  
car into the water below.

"There was one nearby, watching,  
who saw the accident. It was Komi,  
the old Yaqui chief.

He saw the men struggling in the  
water, each man for himself, to dis-  
entangle themselves from the wreck-  
age. Then he saw three of them,  
swimming desperately for the shore.

In the midst of the circling ripples,  
left by the plunge of the automobile,  
he suddenly saw a fourth head rise  
to the surface, sputtering, then sink  
again.

Komi ran to the end of the remains  
of the bridge, watched for this head  
to rise again, then dove in and swam  
directly to the spot. Just as the head  
rose to the surface for the third time  
Komi reached the drowning man and  
caught him by the hair.

He recognized the man as Terence.  
Komi started swimming for the shore,  
dragging Terence after him. Buck  
and his comrades had reached shore,  
and were standing on the bank,  
watching and waiting. They ran up  
as Komi pulled in and laid Terence's  
limp body on the ground.

"Dead," he cried, as the men ap-  
proached him. "Me too late." He  
pointed at Terence's bound hands.  
"His hands tied—can't swim. Him  
drown."

There was no breath stirring in  
Terence's breast. He lay motionless.  
Buck approached, kicked him with his  
foot, to turn him over. The limp  
body rolled over, and lay still.

Komi spoke again:

"Leave him body with Komi,  
please," he said. "His father  
Komi's friend—Komi bury him—  
where his father sleeps."

"No harm in that, I guess," Buck  
said grimly, turning to his fellows.  
"He won't trouble us no more now.  
You birds beat it back to camp. I'm  
streaking for the Spear Ranch. I've  
phones Taggart that O'Rourke's  
croaked."

The dripping men separated, Buck  
going his own way in a different di-  
rection.

Komi watched carefully till all van-  
ished from sight. Then he bent over  
Terence's body, cut the rope which  
bound his hands, worked his arms vig-  
orously, then bent over and listened to  
his heart.

"Maybe yet," he muttered, "may-  
be yet him live."

With renewed zest he started  
respiration.

At the end of a half hour Terence  
was still in a faint. The old In-  
dian kept up the resuscitatory mo-  
tions, faithfully and frantically in the  
dim hope of still bringing him to life.

(To Be Continued)

**Twelve Power Sites On Snake River in Idaho**

Maps showing the results of sur-  
veys made by engineers of the De-  
partment of the Interior to determine  
the water power available on Snake  
River, Idaho, have been published by  
the Geographical Survey.

The work included a survey of the bed  
and banks of the stream and the ad-  
jacent country from Lewiston, Idaho,  
to Huntington, Oregon, a distance of  
187 miles, as well as detailed surveys  
of five dam sites. In this distance  
the fall of the river is 1,324 feet,  
which makes possible the develop-  
ment of more than a million horse-  
power. The work done included also  
a survey of the divide between Snake  
and Salmon rivers, an area consist-  
ing of 20 square miles.

**15 Undeveloped Power Sites**

In connection with this survey a  
study of the possible water power  
sites on Snake River was made by  
W. G. Hoyt, who found 15 undeveloped  
power sites at which, with the present  
flow, 1,430,000 horsepower can be  
developed for 50 per cent of the  
time and 861,000 horsepower for  
90 per cent of the time. With regu-  
lated flow and complete irrigation de-  
velopment 1,080,000 horsepower can  
be developed for 50 per cent of the  
time and 750,000 horsepower for 90  
per cent of the time.

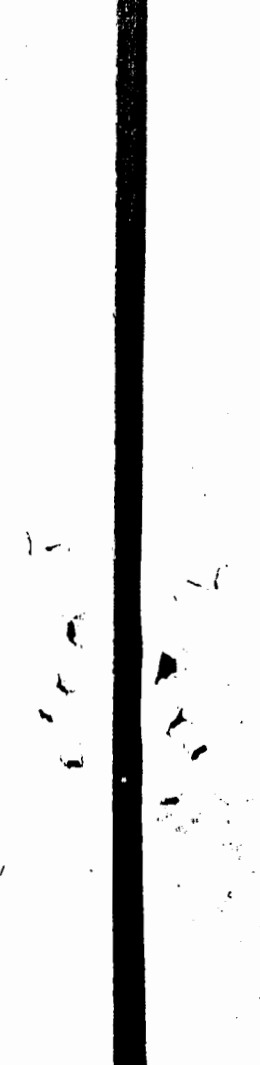

One of the projects considered in-  
cludes a diversion dam on Salmon  
River, a tunnel to Snake River. As  
this project would make possible the  
development at one plant at 910,000  
horsepower for 50 per cent of the  
time and 636,000 horsepower for 90  
per cent of the time, the site is one  
of the largest yet undeveloped in the  
country. Under a nation-wide super-  
power network that has been pro-  
posed and discussed by prominent en-  
gineers the energy made available at  
this site would be fed into a trunk  
line extending between Salt Lake  
City and Spokane, which would radi-  
ate power eastward to the Mississippi  
Valley and westward to the Pacific  
Coast. The only site already de-  
veloped of this stretch of the river  
is a 12,400 horsepower plant near  
Copperfield, Ore.

**COLOR IT NEW WITH "DIAMOND DYES"**

Just Dip to Tint or Boil to Dye

Each 15-cent pack-  
age contains direc-  
tions so simple any  
woman can tint soft,  
delicate shades or  
dye rich, permanent  
colors in lingerie,  
silks, ribbons, skirts,  
waists, dresses,  
coats, stockings,  
sweaters, draperies, coverings, hang-  
ings—everything.

Day Diamond Dyes—no other kind  
—and tell your druggist whether the  
material you wish to color is wool or  
silk, or whether it is linen, cotton or  
mixed goods.

**IDAHO PANHANDLE TESTS ALL CATTLE TO ERADICATE BOVINE TUBERCULOSIS**

An important new center of activity  
in the nation-wide campaign to eradi-  
cate bovine tuberculosis in Northern  
Idaho. Three counties are engaged  
in an active, systematic drive to free  
the extensive cattle industry there  
from the menace of the disease.

According to reports received by  
veterinary officials of the United  
States Department of Agriculture  
from Dr. W. A. Sullivan, federal in-  
spector in charge of the work in  
Idaho, the extent of tuberculous in-  
fection among cattle in that district is  
believed to be extremely small. In  
fact the first week's work, during  
which 1,775 cattle were tested, dis-  
closed no reactors whatever. Depart-  
ment officials place stress on the desir-  
ability and economy of cleaning up  
the disease under such conditions,  
thereby stamping out any sources of  
infection before it has spread.

Excellent cooperation from cattle  
owners and county officials is aiding  
the four veterinary inspectors—two  
federal and two state—in making the  
tests without difficulty or delay. The  
board of commissioners in each of the  
counties—Kootenai, Bonner and  
Boundary—has appropriated sufficient  
funds to employ a team of inspectors  
to assist in the drive; the funds also  
provide for transportation and drivers  
for the official veterinarians who con-  
duct the work. Following the comple-  
tion of tuberculin testing in the Pan-

**ACROSS AMERICA BY MOTOR BOAT**

World's Longest Fresh-Water Cruise Completed in an Eighteen-foot Boat Powered by Only Two Small Outboard Motors.

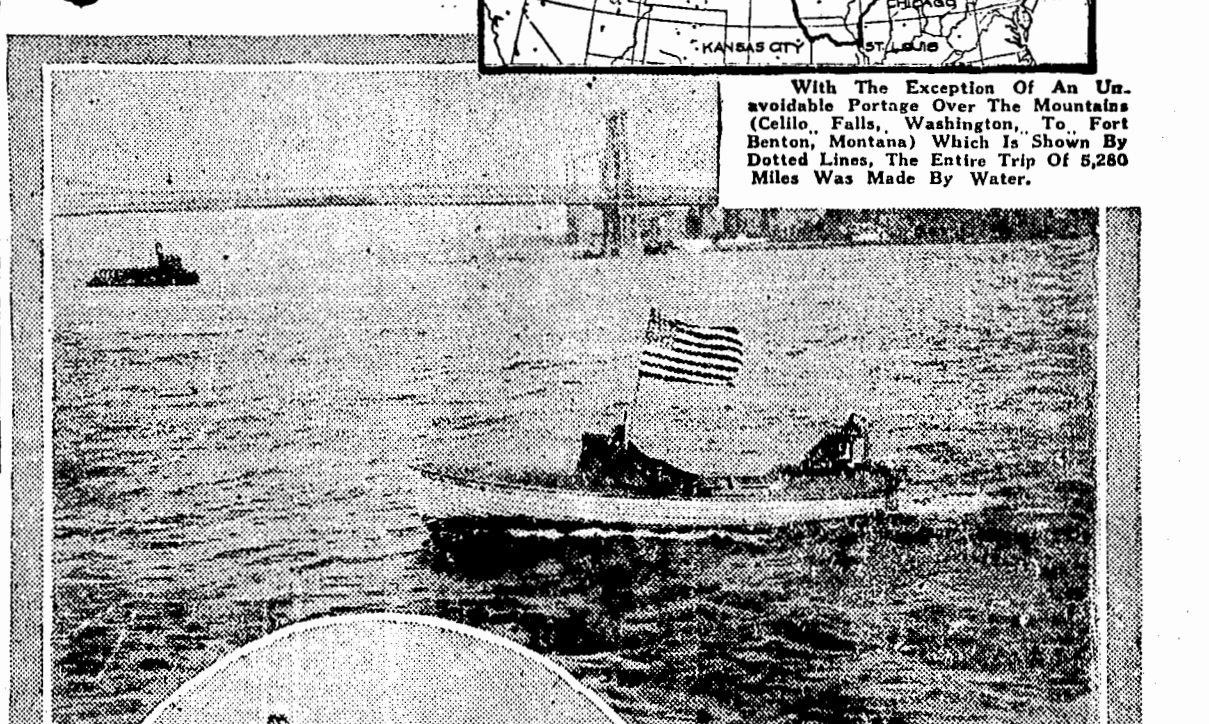

**CHRISTOPHER COLUMBUS**  
sought a water route through  
America to the Pacific Ocean.  
He failed. So, too, did Hudson,  
Champlain, and others. Not until the  
year 1925 has the American continent  
at its widest extent been crossed by  
boat, and the credit goes to a small  
craft—an eighteen-foot boat not much  
larger than one uses on an unexciting  
fishing expedition, and powered with  
two of the same popular outboard  
motors which put-put on thousands  
of lakes and rivers.

The lone jaunt of 5,200 miles was  
made by three Los Angeles men—  
Captain John Edwin Hoag, writer;  
Frank Wilson, News Reel photographer,  
and Val Woodbury, business man  
and former naval officer. With the  
true grit which marks the affairs of  
his River, the boat was driven from  
the bay of their craft this slogan,  
"Hell, Heaven or Hoboken." The  
boat was driven through the "trans-  
continental," and was lowered into the  
Columbia River at Astoria, Oregon,  
for the start of its record-making  
trip on May 20. On Sunday after-  
noon, October 4, it was docked in  
New York City after successfully  
completing its longest voyage ever  
completed in fresh water.

Every bit of the journey, with the  
exception of four hundred miles over  
the Continental Divide, was made on  
water. The trip was not without its  
misadventures, but these were  
borne without complaint from  
"Captain" Hoag, who also accompanied  
the expedition.

The "Transcontinental" was con-  
structed especially for the attempt to  
cross the continent. In spite of the  
fact that a three-foot flood stage of  
water was encountered in the Colum-  
bia River, the boat was driven from  
the mouth of the river at the Pacific  
Ocean up to Cellis Falls, Washington.  
Over this portion of the journey  
many swift and dangerous rapids  
were successfully negotiated.

The eastward journey was then re-  
sumed down the Missouri River for  
2,880 miles without mishap, passing  
through or touching seven states and  
finally entering the Mississippi.  
After a run down the Mississippi  
as far as St. Louis, the boat was  
driven up the "Father of Waters" to  
the mouth of the Illinois River. Pro-  
ceeding up the Illinois as far as the  
town of Ottawa, the travellers en-  
tered the Illinois and Michigan Canal  
and followed that to Joliet, Illinois.  
From there the distance to Lake  
Michigan was made through the Chi-  
cago Drainage Canal. Having reached  
Chicago and the Great Lakes, more  
than half the journey was completed.  
Once in Lake Michigan, the craft was  
taken up the west shore of the Lake  
to Milwaukee and then across the lake  
to Manistee, Mich. The men then  
continued up the eastern shore of the  
lake as far as the Straits of Mackinac.  
They had already accomplished the  
journey from the Pacific to New York

**Fair Trade League Hits Anthracite Men**

**NEW YORK**—The American Fair  
Trade League, composed of 300 man-  
ufacturers' trade associations, has  
issued a statement declaring that its  
investigation of complaints that an-  
thracite coal is being adulterated and  
"misbranded," indicated widespread  
violations of the laws of several  
states. The statement said the in-  
vestigation "confirmed charges recent-  
ly made by John L. Lewis, president  
of the United States Mine Workers,  
to the effect that anthracite mine  
owners were milking the public by  
a re-sizing plan forced upon dealers."

**IDAHO HAS AN INSPIRING PROJECT**

Amazing developments have  
brought amazing changes to the In-  
land Empire. But the achievement  
of greater things is not a pipe dream  
for this region. Reclamation of the  
lands under the Columbia basin pro-  
ject is one of the big transformations  
that are coming.

A letter from United States Senator  
Gooding of Idaho to the Lewiston  
Commercial Club outlines another in-  
spiring development. The Snake  
River, for a great country waterway,  
should be developed for its course  
through Idaho, roars and fumes in  
many falls and cataracts through a  
wild and broken country. Through  
that region it flows today almost as  
savagely as it was 114 years ago, when  
the expedition of Astor, Leavenworth  
and Chauncey set out to descend it  
in small boats to the Columbia. For  
a century and longer these cataracts  
have been a liability, but the day is  
coming when they will be converted  
into an immensely valuable asset.

**Better Conditions In Pacific Northwest**

**SPokane**—The farmer of Idaho,  
Washington, Montana and Oregon is  
sharing moderately in the prospects  
for a general betterment of economic  
conditions, although he is far from  
riding on a wave of prosperity, said  
George C. Jewett, president of the  
Spokane Federal Land Bank.

"A better outlook for the farmer  
is particularly reflected," Mr. Jewett  
said, "in a better financial condition  
this fall, an increase in inquiries and  
sales of farm property and in a ten-  
dency toward diversification. He is  
still under the pressure of heavy in-  
debted obligations, but he is making  
inroads on these, and should be on a  
firmer basis next year.

"Of unusual interest is the fact that  
we are receiving a great many more  
inquiries for farm lands, and making  
more sales than a year ago. It is  
safe to predict a good land move-  
ment in the spring.

"The crops have been generally good  
and experienced perhaps the best year  
of any of the Northwestern States."

**"Transcontinental" on arrival in New York, Williamsburg Bridge in Background.**

State, but they were not through. In  
114 days of motor boat travel, they  
had passed through fourteen states  
and two Canadian provinces, through  
rivers, great lakes and canals.

Proceeding down the St. Lawrence  
River, they stopped off for a while  
at Montreal, and embarked again for  
the little town of Sorel, Quebec; fifty  
miles further down the stream. Here  
they entered the little Richelieu River  
and steered their course up this stream  
into Lake Champlain. From the lake  
through the Champlain Canal to the  
Hudson River, and down that water-  
way New York City was then but a  
matter of days. It was October 4  
when they arrived in the metropolis  
to receive an enthusiastic greeting.

The adventure of these three men  
and their dog through the course of  
a little more than eighteen weeks  
would fill several volumes. They  
traveled through every kind of weather  
from near tornadoes in Montana to  
the roughest of water on the Great  
Lakes. Several times they were close  
to losing their boat and their outfit.

Again in Lake Michigan "Captain"  
Hoag and his friends were overtaken  
by a severe lake storm that turned  
the water into a turbulent sea. Each  
confessed afterward that they had  
little hope of ever seeing shore again  
when the storm began to sweep the  
lake. But they made their way, partly  
through their own efforts, and partly  
through being driven by the storm, into  
shore near the little town of Leland,  
Michigan.

Each passing year finds the Cour  
d'Alene Hotel richer in memories of  
pleasant associations with men and  
women of the Great Northwest. It  
will be our aim in 1926, as in former  
years, to be worthy of an ever-increasing  
patronage. The Cour d'Alene  
Hotel, "The Hotel With a Personality."

**Marketing Problem of Northwest Being Studied**

Special study of the problem of the  
terminal marketing of fruits of the  
Northwest is being made this year at  
the University of Chicago by E. F.  
Dammmer, who last year was pro-  
fessor of economics at the Washington  
State College, and who will return  
to the institution next year following  
the year of advanced study of econ-  
omics.

The call is in with a special study  
of the marketing of apples, which is  
being made by State College experts at  
the present time, and which will con-  
tinue over next year.

Mr. Dammmer recently communi-  
cated with the college about his present  
study in the marketing study, stating  
that he had spent some time in  
New York doing special research.

**Pullman Man Heads Home Study Committee**

Dr. Frank F. Nalder, head of the  
division of general extension of the  
Washington State College, recently  
received an appointment from John J.  
Tigert, head of the United States Bu-  
reau of Education, as chairman of the  
State Committee on Home Study in  
this state.

At a meeting of the National Com-  
mission on Home Education, held last  
summer, it was decided that the best  
way to promote home reading was  
through the organization of state  
committees. Following this decision,  
Commissioner Tigert began the ap-  
pointment of the persons to head the  
various state committees.

Dr. Nalder announces that he has  
made the initial steps in the forming  
of his committee, and that it will in  
all probability be comprised of a rep-  
resentative from each county, capable

**Japanese Beauty Adds New Talent To Her List Of Accomplishments**

ONE of the most interesting  
figures in May Ninomiya, a lovely  
little Japanese girl who although  
born in the United States, is a  
perfect type of Oriental beauty.

As assistant to the editor of Film  
Fun Miss Ninomiya is well known  
to readers of the motion picture  
magazine.

To her other accomplishments  
she adds that of a model, and  
characteristic of her race, Miss  
Ninomiya is a delightful hostess  
who enjoys nothing more than of-  
fering the hospitality of her home  
to her friends.

She takes a great deal of pride  
in the fact that she is skilled in  
culinary affairs and often makes  
the most delectable little surprises  
for her guests.

Rich foods have no place on the  
menu of this clever little person  
who substitutes for rich desserts  
dishes that are delicate and at-  
tractive in appearance and have  
definite food value.

Gelatin dishes are usually the  
solution of her dessert problem and  
she finds them easy to make and  
her guests find them easy to eat.  
One of her favorite recipes is given.

**HISTORY OF PACIFIC COAST SHIPPING LINES**  
**McCormick Steamship Company**

ONE of the most powerful shipping  
corporations under the American  
flag is the McCormick Steamship Com-  
pany which operates total of 72 vessels  
in the coastwise trade and acts as  
general agent on the Pacific Coast  
for the Munson Steamship Line of  
New York, which operates between  
95 and 110 carriers of large capacity  
in various trades.

The McCormick Company has an  
interesting history, for it is but a  
comparatively few years ago that  
Charles R. McCormick and Sidney  
M. Hauptman, his business associate  
in his ventures since 1903, estab-  
lished themselves in a modest com-  
mission lumber business in San  
Francisco. Mr. McCormick and Mr.  
Hauptman gradually associated with  
themselves some of the largest in-  
terests on the Pacific Coast. The  
history of the growth and develop-  
ment of the interests they represent  
has been one of unbroken success.

In the organization of the McCor-  
mick shipping business an independent  
company was formed, the capital  
being subscribed by the two men,  
their associates and friends. A  
schooner was built and launched from  
the Bendixen Shipyards in Eureka,  
Calif., which was leased for the con-  
struction of the vessel. That was in  
1912. Later the McCormick Steam-  
ship Company was organized as an  
operating corporation, not only for  
the vessels of the McCormick inter-  
ests but also for those of other com-  
panies.

As soon as the organization of the  
coastwise McCormick services had  
been perfected, the company was  
readily purchased by the American Sea-  
board. The result was the organiza-  
tion of the Munson-McCormick Line  
with a fleet of ships plying in the

**Why I Am Taking Agriculture**

# MISSING ISSUE

Date JAN. 29, 1926

VOL. 37 NO. 31

(FIRST AND LAST  
PAGES MISSING)

## Ex-Winder of Phonographs Sells Millions the News

ERICH BRANDEIS

NEW YORK—A job packing corner faces at \$3 a week was the best that Erich Brandeis B. A. could obtain in New York when he landed as an immigrant from Germany more than fifteen years ago.

Although he was, he says, "the only B. A. in that factory," he lost the job in a week because he was too slow. His next job, winding demonstration phonographs in a department store, he lost in three days. He was "too fresh."

Today Erich Brandeis is recognized as one of the most successful newspaper and magazine circulation builders in America. He maps sales campaigns for 16 periodicals having an aggregate annual circulation of 153,000,000 copies.

In the meantime he has traveled the seven seas as a steamship steward; served as a reporter in San Francisco; wrote for national weekly and monthly magazines; produced three successful vaudeville plays; was co-author of a book telling how to be a successful physician; designed a thousand art posters for newsstands, street cars and billboards, became president of a well-known publishing syndicate; and was listed in "Who's Who."

## Whatcom County Expects Over Million Chickens

BELLINGHAM.—Whatcom County last week began the hatching of approximately 1,000,000 chickens when the hatcheries of the Whatcom County Cooperative Hatcheries and the Poultrymen's Hatchery began operating. This year's hatch will be much larger than that of 1925.

The advance sales have been heavy. One hatchery reports its advance business 100 per cent heavier than in 1925 at this time of the year. Another hatchery says its advance sales total 300,000. Many of its orders came from Wyoming.

Hatcheries will operate this year at Bellingham, Lynden and Blaine.

Your dollars come back to you if they are spent at home.

## ADVISORY COUNCIL FOR FOREST EXPERIMENT STATION

Secretary of Agriculture Jardine has just invited seventeen representative lumbermen and foresters of Washington and Oregon to compose an Advisory Council for the Pacific Northwest Forest Experiment Station, according to Director T. T. Munger of this station.

This is in line with the policy of the Department of Agriculture to have the industries themselves take part in planning and reviewing the work which the bureaus are doing. This council will advise Director T. T. Munger as to the current program of forest investigations, and help to correlate the forest research projects which various agencies are carrying on. A wide range of interests is represented including those particularly concerned with the perpetuation of the forest industries through reforestation.

The council will contain several lumbermen and loggers, representatives of the lumber trade associations, including the pulp and paper associations, the deans of the forest schools, foresters in private employ and members of the state forestry departments. The international border has been crossed and the British Columbia Forest Service asked to have a representative on this council for the forest problems of that province are similar to those of Washington and Oregon, and should be worked upon jointly.

Those who have been asked to serve are:

- A. C. Dixon, Booth-Kelly Lbr. Co., Eugene, Ore.
- E. S. Collins, Ostrander Railway & Timber Co., Portland, Ore.
- R. W. Vinnege, North Bend Timber Co., North Bend, Wash.
- Russell Hawkins, Whitney Co., Garibaldi, Ore.
- Frank H. Lamb, Wynooche Timber Co., Hoquiam, Wash.
- R. D. Moore, Shevlin-Hixon Lbr. Co., Bend, Ore.
- Louis Block, Crown-Willamette Paper Co., San Francisco, Calif.
- D. T. Mason, Mason and Stevens,

## Oil "Closure" Evidence Found by Mines Bureau

UNIVERSITY OF IDAHO, Moscow.—Considerable evidence of "closure" in the geological formation of the Horseshoe Creek area in Teton County, which enhances possibility of oil occurrence, is afforded by the recent gas gusher at the well of the Teton Valley Land and Leasing Company, according to a press bulletin issued by the state bureau of mines and geology under the direction of Dr. Francis A. Thomson, secretary. The bulletin and accompanying map of the region under consideration were prepared by Professor Virgil R. D. Kirkham, one of the geologists of the bureau staff.

Several shallow veins have been drilled in this area, the deepest from which came the gas gusher last October, penetrating 1,075 feet, according to the bulletin.

"About 1,050 feet of frontier formation, which occurs in many Rocky Mountain oil districts and produces oil wherever it is present, lies on the eastmost anticline of the Horseshoe Creek area," the bulletin continues. "The famous Wall Creek sands in Wyoming occur in this formation, and it produces natural gas flow at two horizons at the easternmost anticline on Horseshoe Creek.

"The well being drilled on this anticline is located at the highest known point on the structure. It is not impossible that oil may be produced from the gas sands by drilling farther down the flanks of the fold, although, of course, none may be present in the sands. The Aspen formation which underlies the Frontier is entirely uncut on both anticlines and produces commercial oil in many Wyoming and Montana fields, where it is known as the Mowry formation. It is believed that this formation has been slightly penetrated by the drill on Horseshoe Creek on the eastern fold.

"Drilling to a depth of 4,000 feet should penetrate this formation in fold. The thickness of this formation will probably preclude the exploration of any underlying Cretaceous formations. Although making by lava has prevented the certain determination of the existence or absence of closure in these fold, persuasive evidence of its presence is afforded by the presence of copious gas flow with sustained pressure from the well on the eastern fold. This gas would surely not have been trapped had the structure not been sealed.

"The accompanying gas gusher at the Tieton Company's well became ignited and the consequent fire destroyed the outfit. However, it has since been replaced by a larger Standard cable tool rig which is capable of making a fair test of the structure. Drilling operations at the former site are again being resumed."

## A BIRTHDAY ON THE TRAIN

"Goody—goody—birthday cake!" Thus was the appearance of the big birthday cake with which the birthday of the Los Angeles Limited was celebrated greeted by children traveling on the train. It took two waiters to carry the huge 100-pound cake with its twenty lighted candles into the car. The twentieth birthday of their crack train was observed in this manner by the Union Pacific and Chicago & Northwestern Railroads. The cake was cut up and served to dining car passengers with the compliments of the railroads.

Children and grown-ups whose birthday fell on December 17 and who were traveling on the Los Angeles Limited anywhere between Chicago and Los Angeles in either direction were afforded the unusual opportunity of celebrating their natal day along with that of the train on which they were riding. For the crack transcontinental fliers' birthday was celebrated with a party, invitations, birthday cake and candles "n everything!"

For the past score of years the famous trains have been roaring across the continent between the two great cities, but like every other train in the country, they have never had a birthday party. This oversight was corrected when officials of the parent railroads, the Union Pacific and Chicago & Northwestern arranged the birthday cakes in recognition of the start of the careers of their twin daughters on December 17, 1905, when one of the infant trains left its cradle in Los Angeles for Chicago and its sister train bearing the same name left Chicago for Los Angeles.

The "girls" have grown from infants to youth in those twenty years. In their growth from babyhood, they have been leaders in the development of passenger train equipment. They have graduated from the grade school where

they were known as "through sleeper trains" and are now in the "standard pullman" finishing school. The character of their escorts, the locomotives, has changed, too. While the first engines that pulled them were the finest of their day, they were but callow youths alongside the "Red Granges" of locomotivedom today, the giant Union Pacific "sport model" engines with which the sister trains are now keeping company.

On the observation car of each train is a drum-head marker bearing its name in white letters on a red background, and illuminated from within by electric lights. This marker was copied in the birthday cake, which is round with red frosting, and has the words "Los Angeles Limited" raised from its surface in white letters. And the cake is illuminated with twenty candles instead of the electric lights. Each cake occupied a place of honor on a specially reserved side table in each dining car.

Approximately seven hundred invitations to travelers on the trains were issued, telling them of the birthday date and asking each to have a slice of the birthday cake, with the compliments of the railroad companies. The cutting and serving of the big cakes was left to the passengers themselves.

## NORTHWEST MEN PROPOSED FOR VACANCY ON SHIPPING POST

INTEREST is being shown all along the Pacific Coast in the contest being waged over the appointment of a Shipping Board commissioner from the Northwest, to succeed Bert E. Haney of Oregon.

Senator Wesley L. Jones of Washington and J. J. Underwood, a representative of the Seattle Chamber of Commerce, called at the White House January 2 and urged upon the President that Puget Sound be given recognition in the appointment of a Shipping Board commissioner from the Northwest. Senator Jones and Mr. Underwood spoke especially in behalf of Harry Y. Saint, who formerly was connected with the Seattle Chamber of Commerce and who is now chairman of the Stevedoring and Terminal committee of the Shipping Board Emergency Fleet Corporation.

Senator Jones told the President that the appointment should go to the State of Washington, independent of political considerations. He pointed out the importance of Seattle which now handles the greatest Shipping Board tonnage of any port on the Pacific Coast.

Although he expressed the hope that conditions would permit the appointment of Mr. Saint, Senator Jones suggested that if it was necessary to choose a Democrat, the place should go to Warren L. Gazzam of Seattle. It is reported that there is a possibility of another vacancy on the Shipping Board in the near future and the retirement of a Republican member from the East may make possible the selection of two Republicans from the Pacific Coast. President Coolidge would welcome the opportunity to name two Republicans from the West Coast. It is believed that one of the Pacific Coast appointments is virtually settled insofar as the President is concerned. Philip S. Teller, a San Francisco Republican, recommended by united California interests, has been summoned to the White House for a personal interview with the President. This is regarded as tantamount to appointment unless something unexpected happens. The appointment of Mr. Teller

would require the selection of a Democrat from the North Pacific Coast, provided the rumored additional vacancy does not appear.

The question is what Democrat will be selected? Senator McNary has presented the name of Marshall N. Dana as the choice of Oregon business interests, and Senator Jones has presented the name of Warren L. Gazzam of Seattle. Mr. Dana is opposed by organization Democrats in Oregon on the ground that they were not consulted. Mr. Gazzam has the active opposition of Senator Dill, Democrat on the ground that he is not qualified and is not regular in his democracy. The result of the conference at the White House between Senator Jones, Mr. Underwood and President Coolidge, was not made known, and brought no definite word from the President. Mr. Coolidge listened to what the gentlemen from Washington had to say, and probably will take plenty of time to make up his mind.

## Finnish Lumber Outlook

While lumber stocks are low in Finland, prices continue weak, and the market outlook for the coming season is very uncertain reports Assistant Trade Commissioner E. A. Kehic, Helsingfors, Finland, under date of November 30, to the Bureau of Foreign and Domestic Commerce.

Finnish lumber sales amounted to 1,851,300 M feet at the end of October, 1925; lumber exports for the ten months aggregated 7,738,440 M feet. Ten months' exports of unsawn goods at 120,000,000 cubic feet exceed previous records; and plywood exports, reacting to good demand, attained to the total of 34,000 tons for the 10 months. Plywood exports for October amounted to 4000 tons.

Nearly 400 officials and employees of the Northern Pacific railway attended a banquet at Tacoma, Wash., in honor of W. C. Albee, superintendent of the Tacoma division, who retired January 1 after 52 years of railroad service.

Be a home-town booster.

## W. S. C. Grad to Make Rural Power Survey

Constructing 393 miles of line extensions in rural communities and thereby extending the benefits and advantages of electric service to 4,148 new customers, all previous records for farm electrification in the territory served were broken by the Puget Sound Power & Light Company during the year 1925.

Pointing out that practically the entire Olympic Peninsula had been added to the service area of the company at the close of the year, a report issued predicted the construction of at least 500 miles of rural extensions during the present year together with a vastly greater application of electricity to all farm activities in territory already served.

"This is a problem which we have now taken up in earnest," said Henry J. Gille sales manager, "and not only are we cooperating in every possible way with the engineers and experts of the state college and other institutions in the state-wide survey of this matter, but have appointed an expert of our own, John C. Scott, a graduate of the department of animal husbandry of Washington State College who has had a wide experience in this field, for the sole purpose of conferring with farmers, dairymen, poultrymen, horticulturists and others in our territory on all problems that involve the use of electricity. As far as we know this is the first time that such an expert has been engaged by any electric company in the United States for this purpose. Naturally, we hope that this service will be of inestimable value to the agricultural interests of Western Washington."

An exceedingly interesting talk on the subject of rural electrification was made at the same meeting by Professor L. L. Smith, of the state college, who, together with Henry L. Garver, has devoted the past year to a survey of this subject in every part of Washington.

Pointing out that, in the main, the problem of rural electrification was one of distribution rather than of production, Professor Smith recounted the result survey of rural distribution lines which had been made both East and West of the mountains.

"In collecting data on this subject," said Professor Smith, "we found it advisable to divide the state into three main sections since farming conditions in each of them differed very materially. Thus, we examined representative lines in the Eastern portion of the state, the central irrigated district and in the district west of the Cascade mountains. In the western district, lines were examined at Lynden, Bellingham, Mt. Vernon, Bellingham, Mt. Vernon, Buckley, Puyallup, Vancouver and other points, an effort being made to select lines carrying a heavy load together with a line in each district carrying a light load."

Dealing with the application of electricity to the poultry industry, Professor Smith pointed out that so far the investigation along this line had indicated four main uses. These were electric lighting, incubation, brooding and power although opinion still differed as to methods by which the best results were obtained. "In any event," said Professor Smith, "whether one man can take care of 2,000, 3,000 or 3,500 hens will depend largely on his future use of time and labor-saving devices."

Professor Smith dealt with the electric factor in dairying, silo-filling, hoisting, irrigation, home and yard lighting as well as with its application to domestic purposes on the farm.

Pointing out that as yet only a start had been made, he announced that during the present year it was the intention to gather data in so far as possible on the following subjects of special interest of residents of the west side of the state:

- Irrigation of berry districts.
- Value of the ultra violet ray in the poultry business.
- Irrigation of summer feed for poultry and for home garden stuff.
- Development of a small power unit for use on poultry farms.
- Extending the use of carrier devices to permit the filling of silos with a smaller motor.
- Artificial curing of hay by means of circulation of heated air.
- Issuance of a circular on dimming devices and wiring for same for poultry houses.
- Centralization of power requirements on dairy and grain farms.
- Cost data on water pumping for the farmstead and its relation to insurance.
- Study of power requirements for prune drying.
- Preliminary work on development of small electric tractor for cultivating small fields of irrigated land.
- Fitting up a farm shop on each line with a shaft and electric motor to operate drill, blower, grinder, saw, etc.
- Study of the application of household appliances to the farm.
- Study of electric fly extermination for milk-houses, etc.
- Development of motion picture

## Keeping Clean Hands In Dirty Work

MANY men who clean and grease their own cars are annoyed by the condition of their hands after this dirty job is finished. It is so difficult to clean such grimy hands that sometimes the dirt, which is deeply ground into the creases, has to be left to wear off. This type of dirt is unusually persistent and once it is firmly attached to the skin it is almost impossible to remove. It is easier to prevent than to remove it.

A very simple method of protection for the hands consists in coating them with a layer of soap before starting to work. Wet the hands thoroughly, partially dry them, and then rub a cake of soap over the entire surface especially covering the nails. With all the crevices filled with soap the dirt will not be able to penetrate so deeply, but will adhere to the soap and will wash off quite easily.

This method does away with the necessity for using harsh and abrasive soaps or scouring powders, which are so hard on the hands. For soaping the hands just use the regular toilet soap found in the bathroom.

When the time comes to wash up, simply dip the hands in warm water, and work up a lather with the soap which is already there. After removing the worst of the dirt and grease, wash the hands as usual with more soap and warm water.

## Value of Washington Farms Shows Decline

WASHINGTON.—Revised data on farms in the State of Washington, made public by the Bureau of the Census, give a total of 73,267 farms, comprising 12,608,234 acres, with land alone valued at \$584,356,164 and buildings at \$142,503,983.

This shows a small shrinkage in acreage and a large drop in values when compared with 1920 figures, which were: Number of farms, 66,282; comprising 13,244,720 acres; land alone valued at \$797,651,020, and buildings at \$122,741,321.

The average value of land and improvements is \$9,921 a farm or \$57.65 an acre, against \$13,885 a farm and \$69.49 an acre in 1920.

The average acreage in a farm is 172.1 acres now, 199.8 acres then.

## CONSTRUCTION OF A \$300,000 Ferryboat

ryboat which will contain an elaborately furnished moving picture theater with seating capacity of 1000 persons, is planned by the Puget Sound Navigation Company, according to an announcement made by Joshua Green, president of the company. Lee & Brinton, Seattle naval architects, are preparing plans for the vessel and bids for her construction will be requested in the near future. The new ferryboat is being designed with a motion picture theater as the principal feature of her plans and specifications. There will be an elevated stage, an orchestra pit, boxes and a beautifully furnished foyer. The new vessel will be virtually a motion picture theater afloat. She will be operated in the various ferry routes served by the Puget Sound Navigation Company, but probably will start her service between Seattle and Bremerton. The vessel will be 200 feet long and 48 feet beam, and if present plans carry, will be built of steel. She will have a total capacity of 1500 passengers and will be able to carry 100 automobiles. The vessel will be able to maintain a speed of 13½ knots. It is expected to have her ready for service at the opening of the heavy travel on Puget Sound next summer.

Cost of Defective Vision. The strain of modern life is not without its effect on the younger generation, for approximately 2,000,000 school children in the United States are retarded in their studies through defective vision. The members of this great army of youthful students are from one to two years behind in their school work, making a cost to the taxpayers of \$130,000,000 additional each year. The total retardation from all sources is estimated at \$390,000,000 a year.—Thrift Magazine.

Development of fair exhibits. When available the results of these experiments will be made public as soon as possible.

**Entertained Sunday Evening**  
Ronald Gertz and his sister, Miss Verna, entertained at their home Sunday evening, Miss Wright of Astoria, Miss Wolf and Miss Stookey of Lewiston, Miss Lemons of Clarkston, Miss Becker of Genesee, Claude Edwards, Ralph Gordon and Hartzel Edwards of Lewiston. The evening was spent in eating and having a general good time.

**Hogs Shipped**  
On Tuesday, January 25, the Genesee Union Warehouse company shipped 170 head of very fine porkers. One of the finest lots that has yet been shipped.

**Pinechle Party**  
A very pleasant pinechle party was given Friday evening at the home of Mr. and Mrs. Peter Dallesago. Pinechle was played until a late hour when refreshments, consisting of sandwiches, pickles, apple salad, cake and coffee were served. Everyone reported having a good time.

Those present were Mr. and Mrs. W. J. Baumgartner and children, Mr. and Mrs. Roy Evans, Mr. and Mrs. W. H. Rosenau and children, Mr. and Mrs. Harry Emerson, Mr. and Mrs. L. D. Roskammer, Mr. and Mrs. Fred Shirrod, Mr. and Mrs. E. M. Becker, Mrs. Barkley, Mr. and Mrs. Peter Dallesago, Margaret Becker, Araminta Dallasego, George and Robert Roskammer, Stanley Shirrod and Erna Dallasego.

**How Are Your Eyes**  
Do your glasses require changing or adjusting? Dr. A. E. Jones, specialist, will be at the Genesee Hotel, Thursday, February 18. We ask you when in Spokane to the finest lots that has yet been shipped.

**Coasting Accident**  
Wilma English is suffering with a badly sprained left ankle and foot as a result of a coasting accident which happened Tuesday evening when she and Inez Mayer were coasting down the long hill from the Congregational church to the east, crossing the main street, the highway and the railroad track, colliding with a warehouse just east of the railroad track. Inez escaped without injury but Wilma did not fare so well. She was rendered unconscious from striking her head and suffered a badly sprained ankle and foot, as stated above.

While this is one of the best coasting hills in the town, yet it is a decidedly dangerous one—not because the girls happened to collide with a warehouse, but because it crosses the town's main street, the highway and the railroad track.

While the main street can be guarded, it is impossible to entirely do away with risks on the highway. A car may round the bend at the warehouse at about the same time a sled may leave the top of the hill. It is impossible for either one to see the other on account of obstructing buildings. Again, it would be next to impossible to stop a strange car, the occupants of which might not understand the meaning of the attempt and "step on the gas" as is often the case, and the result might prove disastrous to both coaster and car in case they should collide. The place is decidedly dangerous.

**CHURCH NOTICES**  
St. John's Lutheran Church  
Rev. A. F. Wolff, Pastor  
Sunday school at 9:30 a. m.  
English services will be held each Sunday morning at 10:30 o'clock, with the exception of the first Sunday of each month, when German services will be held at the usual hour.

**Christian Church**  
N. E. Beach, Pastor  
Bible school at 9:45.  
Communion and morning worship at 11 o'clock.  
C. E. at 6:30 p. m. Clarence Aherin, president.  
Evening message at 7:30.  
Both services will be in charge of J. F. Croot of Moscow, who is giving some very helpful sermons.

A missionary society has been organized and officers elected, as follows: Mrs. N. E. Beach, president; Mrs. F. B. Hampton, vice president; Mrs. D. W. Hamrin, secretary; Mrs. H. T. Smith, treasurer.

The first regular meeting will be held Tuesday, February 2, at 2:30 p. m. at the home of Mrs. F. B. Hampton. The subject presented will be, "Our Missionary Work in Jamaica and Porto Rico."

This is guest day and a general invitation is extended.

**Congregational Church**  
Paul W. Sprague, Preacher  
W. E. English, choir director.  
Sunday school 9:45 a. m. Mrs. Arthur Hampton, superintendent.  
Morning worship, 11 o'clock.  
Young People's meeting, 7 p. m.  
At 7:30 Sunday evening a forum service will be held at which questions suggested by members of the congregation will be discussed. The nature of the service is indicated by the following questions, which are among those already submitted:

- (1) Why public prayer?
- (2) Should the Bible be read in the public schools?
- (3) What is the meaning of the phrase, "Lead us not into temptation," in the Lord's Prayer?
- (4) What is the significance of baptism?
- (5) What is the holy spirit?

**The Ladies**  
Of St. Mary's church will give a card party, K. C. hall, Wednesday night, February 3. You're invited to be present. 31-1

Balloon trousers are now in general use but the high altitude record is held by skirts.

**PERSONALS**  
Lenus Peterson was a Friday passenger for Spokane.  
T. A. Elliott returned Saturday from Spokane where he had accompanied a carload of lambos last week.  
Mrs. E. T. Jacobs returned to Lewiston Monday after a visit with her sister, Mrs. Fred K. Bressler.  
Miss Mayme Krier came up from Lewiston and spent the week-end with her parents, Mr. and Mrs. John Krier.  
Mrs. Thomas A. Feeney of Moscow, arrived Sunday for a visit with Mrs. C. P. Whalen and other Genesee friends.  
Mr. and Mrs. Herman Krier came over from Palouse and spent Sunday with Mr. Krier's parents, Mr. and Mrs. John P. Krier.  
Henry Hanson returned Tuesday from a several weeks' visit with relatives and old-time friends in Wisconsin and other eastern points.  
Mrs. Geo. Gannon and little son, Donald, returned to their home at Pullman Thursday morning after a few days' visit with her mother, Mrs. Fred K. Bressler.  
Mr. and Mrs. Nate Edwards returned Tuesday from a visit with their daughter, Mrs. Felix Mulalley, and family at Milton, Oregon, and at Seattle and coast points.  
Mr. and Mrs. Claud Harpole left last Friday for Eugene and other points in Oregon, where they expect to spend a few weeks in hope of the climate bettering Mr. Harpole's health.

Miss Elizabeth Walle returned from Lewiston after having had a month's vacation and during which time she had her tonsils removed, and is now again with Mrs. Matt Baumgartner.  
Mr. and Mrs. A. Mayer and little son Glen returned to the Blue mountains, 14 miles southwest of Pomeroy, last Sunday and had dinner with Mr. and Mrs. A. J. Fitz and family. Mrs. Fitz accompanied them back to Genesee to look after property interests and to visit old-time friends.  
Miss Elizabeth Walle has arranged about six miles near the top of the mountains, where they were rough and the snow about six inches deep.

**The Dance Program**  
Three dances are scheduled for Genesee in the near future, as follows:  
Tonight (Friday, January 29) the big Rimrockers' ball will be held in the American Legion hall and the general public is cordially invited to attend.  
On Friday night, February 5, the local high school students will give a hard time dance in the Legion hall. Allen's orchestra will furnish the music.

On Friday night, February 12, the annual Cow Creeker's "bawl" will be held in the Legion hall, and you are cordially invited to come and bring all your friends.  
**Invents Static Eliminator**  
R. A. Sturgis, a Spokane switchman, has invented an arrangement for the elimination of static in radio sets and has already sold the invention for \$100.00 and expects to get \$150,000 from royalties. It is said to be a simple contrivance and one that can be sold for \$10.00—and who, that owns a radio set, wouldn't give \$10 to be free from that troublesome static that spoils what might otherwise be a splendid evening's entertainment?  
Here's hoping that the invention is soon on the market and that a shipment will reach Genesee soon!

**Don't Pass the Buck**  
In a nearby city a judge recently sentenced a man to pay a nominal fine and ordered him to leave the city. It simply meant that this undesirable citizen was shifted to another community, where as a stranger he could continue to cause trouble. If this man was not fit to live in one community he is not fit to live in any other. He should be kept where he is known and punished according to the seriousness of his violation of the law. Shifting responsibility is a poor way to enforce the law.—Kendrick Gazette.

**Farmers Union to Give Dinner**  
The Farmers union will give a big dinner in the American Legion hall on Saturday, February 6, when members of the union and their families will hold a good old fashioned get-together meeting and f course one of "cominy up", which will be served at 1 o'clock.  
At this time the feasibility of a cold storage plant for Genesee will be discussed at length and all members are asked to be present.

(Continued from first page)  
made and decorated large folded envelopes in which to keep their various handwork specimens.  
The girls in the first and second grades are gathering material with which to construct and furnish small cardboard doll houses. The boys will construct a farm yard scene. This is a project for the handwork class and will include paper folding and cutting, drawing, coloring, weaving and other forms of handwork.

**Pine Grove News**  
Miss Kuntz spent the week-end in Lewiston.  
Dick Green was a visitor in Lewiston today.  
Mrs. M. S. Wilson was a Lewiston visitor last week.  
Florence Bielenberg is spending a few days visiting in Lewiston.  
Joe Green left Monday for Weiser, Idaho, to visit his daughters living there.  
Mr. and Mrs. Colin Wilson were visitors at the Leo Miller home last Friday.  
Mr. and Mrs. Mike Reisenauer and children spent Monday shopping in Uniontown.

Alvin Alexander has been kept busy entertaining all his visitors with his new radio set.  
Miss Kuntz attended the K. C. card party with Mr. and Mrs. Mike Reisenauer on Thursday.  
Mrs. Amanda Johnson was among the sick the first of last week, but is getting along nicely again.  
Frank Qualey arrived home Saturday from Spokane, where he has been visiting the past two weeks.

Ernest Qualey is the proud owner of another coyote, making the second one he has caught this season.  
Arthur Johnson, son of Mrs. Johnson, came home Thursday from Bend, Oregon, for an extended visit with home folks.  
Mrs. Mattie Bellevs returned to her home Friday morning after a week's visit with her brothers, Frank and Dick Green.

Mr. and Mrs. Frank Qualey had as guests Sunday Mr. and Mrs. Dick Green and family, Clarence Peterson and Robert Erickson.  
Frank Green and daughter Edna spent Saturday and Monday in Moscow visiting with Mrs. Green, who is getting along nicely.  
The Pep club met with Mrs. Mike Reisenauer on Thursday of last week and a very delightful time was spent. The next meeting will be with Mrs. Carl Grieser, January 28.

**Equal to Local Coyote Club**  
And now a number of the would-be "pole explorers" have a hot discussion on as to who, if anyone, "found" the north pole. The main dispute seems to be between Amundson, Steffenson, and Dr. "Amias" Cook, now sojourning in the federal "hotel" at Atlanta, a guest of Uncle Sam.  
In the first place, the pole has never been advertised as "lost". And in the next place, if Doc Cook found it, as he says he did, why didn't he cut his initials on it so that Admiral Peary could have seen them when he arrived there?  
The fact is that these explorers are inclined to be too much like the local coyote clubs. They all tell what they have done, but few pellets have ever been shown to substantiate their claims. In the meantime, more coyotes are reported this winter than have been hereabouts for several seasons, showing that they are on the increase instead of the decrease.

Brigadier General Rader explains this "phenomena" or mystery, by saying that in the local club last year and had not been put after them so far this winter. He is preparing himself for membership in Doc Cook's Annias club.  
There are at least three would-be coyote organizations in existence in the Genesee section—"Buffalo Bill" Rader's high-handed organization, Cliff Lundt's Rimrockers and Sam Lang's Cow Creekers. And it seems that it is now up to some one, who can shoot, to go out and bring in the pelts.

**Another "Touch" of Winter**  
The Genesee section experienced another slight touch of winter Monday night when the mercury took a sudden drop and did not stop until it had reached a point eight degrees above zero—the coldest point reached so far this winter—and Tuesday morning the mercury had ascended to 22 degrees above zero. Again on Tuesday night it reached 14 above and on Wednesday morning it was 18 above.  
There is now about six inches of snow left on the ground and sleighing is very good, especially on the country roads. The highway has the snow pretty well cut and mixed with gravel, but it is fine for cars.

It is a notable fact that not one inch of snow has been announced thus far this winter of the mercury reaching the zero point west of the Rockies—an unusual incident. And the coldest point previously reached here was 17 above.

CHAPTER 19
Agonizing News
Stella Montrose sat across the
table in Taggart's office and listened
intently.

"If Buck and the boys have put
O'Rourke out of the way, as I in-
structed them," Taggart was saying,
"we are safe, for he won't be able
to testify that Mary didn't cash that
check herself."

"As Stella was about to reply, there
was a knock on the door, and Tag-
gart motioned her to be silent.

"Come in,"
The door opened, admitting Mary,
accompanied by Bud Hughes. Bud
started in open-mouthed astonishment
at Stella. Her face, too, lighted up
with recognition at the sight of him.

"Why is Stella," he exclaimed.
"Stella Montrose," he ran for-
ward and greeted her warmly.

"Bud Hughes," she cried, taking his
hand. "I never have known you—
I had thought you were dead."

"He sneezed her hand again, desire
to beat in his brain as he looked long-
ingly at her.

"Yes, I know," Mary answered,
"and I do appreciate your help, Mr.
Taggart."

"The ringing of the telephone in-
terrupted her. Taggart seized the in-
strument and answered. After listen-
ing a moment, his face became tense
with surprise, and apparent shock,
and he exclaimed:

"Good God, is that true?"
"Indeed he was exulting, but he
concealed his elation and affected a
calm air. Mary, eyed him with
curious expectancy. After listening
a minute or two more he hung up the
receiver, and turned to her. Stella
was now listening intently also.

"Taggart hesitated, thinking, and
finally said slowly:
"Mary—that was—Komi, the old
Yagor chief, has been trying to
talk you with word that—that—"

"He paused that the full effect of his
words might burst upon her—"that
O'Rourke is dead!" he finally con-
cluded.

"Mary, stunned, wild-eyed, unable
and unwilling to believe her ears,
shook her head from her chair and stared
at Taggart.

"Dead!" she repeated as in a trance.
"Terence O'Rourke—dead."

"Uncomprehendingly she stared be-
fore her, a tragic figure. Taggart
supported her in his arms, and tried
to explain. Suddenly the full signifi-
cance of her words came to her in a
flash. Uttering a pitiful cry she col-
lapsed in a dead swoon.

"Taggart, reclining her into a chair,
signaled to Stella, who had been
taking in the scene with interested
eyes and ears, to bring water.

"Stella applied a wet handkerchief to
Mary's forehead, both she revived, both
Stella and Taggart tried to console
her with effected sympathy. Mary,
ignoring their words, again realized
what Taggart had told her, and broke
into agonized sobbing. Finally, con-
trolling herself with difficulty and at-
tempting to regain her poise, she
looked at Taggart with tear-filled
eyes, and faltered:

"What shall I do? I have no, now
—no one—but you."

"Taggart's eyes gleamed covetously,
and he put his arm around the strick-
en girl and tried to comfort her.
Secretly he was gloating in the satis-
faction that he was now the sole
friend she could turn to.

"I'm sorry, for your sake, that this
has happened, Mary," he lied. "But
you will find that I am a friend you
can rely upon, and as you know, I
am only too glad to do everything in
my power for you."

"Mary finally sat up, still weeping,
trying to compose herself.

"I am stunned, overwhelmed—
there are so many things," she said.
"Daddy in prison—Terence dead—the
ranch slipping from us—my money
gone—oh, it seems so hopeless. I don't
know what to do."

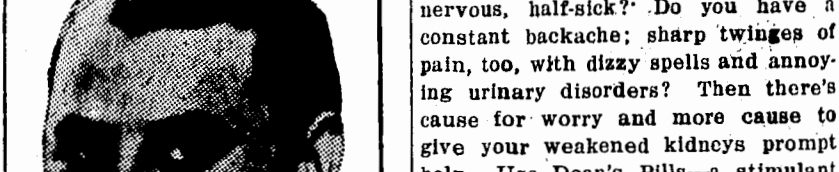

"Come, come, Mary," Taggart said
solicitously. "You're uneasy all un-
strung now. Go to the Bar M with
Bud—and Stella here. She'll be a com-
panion and comfort to you—Stella's
a good friend and will look after you
till you feel more yourself."

"Stella slipped her arm around Mary
and said:
"Yes, yes, I shall be only too glad
to do anything I can."

"Mary thanked them all, and finally
arose. Supported by Taggart and
Stella, while Bud ran ahead to get
the horses ready. Mary was helped
to the door and out in the street.
They put her on a horse, and Bud and
Stella, mounting, rode one on each
side of her, while Taggart waving
adieu, watched them off on the way
to the ranch.

"Returning to his office Taggart
hastened to the phone, and called the
Spear Ranch.

Supervisor of Income Tax
Resigns Post at Washington
Spokane Folks Should Find the Cause
and Correct it.

SIDNEY ALEXANDER

WASHINGTON, D. C. — After
having investigated and decided
correct income tax cases involving
millions of dollars, Sidney
Alexander, supervising agent-
at-large for the Bureau of Internal
Revenue, has tendered his resignation
of office and will enter private
practice as a tax consultant.

Hereafter, when Mr. Alexander
appears before his former con-
tress in important cases of in-
come tax it will be as counsel for
the defense rather than the prosecu-
tor.

He is a native of Washington
and, although not yet 40 years old,
is considered one of the ablest re-
spondents in the income tax serv-
ice, having served successfully as in-
vestigator, special auditor, head of
the Technical Division, chief of
the National Economic Advice De-
partment and supervising agent-at-
large.

"Buck McLeod," he demanded into
the phone. "Hello, Buck?—listen,
Buck, got your gang and pull another
raid on the Bar M—tonight—and this
time get every steer on the ranch.
When you get there watch for a note
from Stella—she'll frame how to go
about things without too much fuss."

CHAPTER 20
Idaho Bill Joins Up
Hanging up the telephone receiver,
Buck McLeod strode swiftly out of
the Spear Ranch house, mounted
his horse and galloped off.

"From a clump of bushes where he
had been waiting a mysterious look-
ing renegade type of man in rough
clothes, and a slouch hat, watched
Buck riding off. When he seemed at
a safe distance the stranger emerged
from his hiding place, leading his
horse. He mounted, and followed
steadily.

Buck rode up into the hills to the
nest where his gang was encamped,
the stranger trailing him cautiously.
The lookout on guard waiting alert,
recognized Buck, and passed him in.

"We're makin' another raid on the
Bar M tonight," Buck called as he
came up to the men, sitting on the
ground, smoking and playing cards.

"This combination of equipment and
teaching staff gives facilities for train-
ing in dairy manufacture that are not
exceeded in any college or university.

BEAUTIFY IT WITH
"DIAMOND DYES"
Just Dip to Tint or Boil
to Dye

Each 15-cent pack-
age contains direc-
tions so simple any
woman can tint soft,
delicate shades of
dye rich, permanent
colors in lingerie,
silk, ribbons, skirts,
coats, dresses,
sweaters, draperies, coverings, hang-
ings—everything!

Buy Diamond Dyes—no other kind
—and tell your druggist whether the
material you wish to color is wool or
silk, or whether it is linen, cotton or
mixed goods.

Life Insurance Record
Made in United States
NEW YORK.—New life insurance
in the United States during the last
year totaled \$15,000,000,000, exceeding
the previous high record of 1924 by
\$4,000,000,000, according to an esti-
mate forwarded to the Department of
Commerce by the Association of Life
Insurance Presidents.

The association includes forty-five
leading insurance companies which
have in force 31 per cent of the \$71-
000,000,000 coverage now in force in
all United States legal reserve com-
panies.

A comforting air of relaxation and
hospitality—a sense of security and
well-being—yet within a block of Spo-
kane's busiest streets. The Oscar
Albion Hotel, "The Hotel With a Per-
sonality."

Oiled and greased boots mean dry
feet and better health.

THE GENESEE NEWS
VOL. XXXVII
GENESEE, LATAH COUNTY, IDAHO, FRIDAY, FEBRUARY 5, 1926
NO. 32

PUBLIC SCHOOL NOTES
OF MUCH INTEREST

According to the new ruling of the
state board of education, the entrance
requirements to the University of
Idaho will be raised. Heretofore all
graduates of any accredited high
school in the state were admitted
without question. Under the present
ruling graduates will also be required
to have an average one step higher
than the passing grade in two-thirds
of their subjects. This means that,
as in the Genesee High school, when
the passing grade is 75, students will
be required to make a grade of 75 plus
one-fourth the difference between 75
and 100. This makes a grade of about
82 in ten out of the fifteen units re-
quired for admittance to the univer-
sity. All graduates are admitted on
probation unless grades reach this
standard.

The students of the Genesee High
school have been advised of this rul-
ing and they are determined that this
shall not effect them.

The high school paper was not put
out until Tuesday of this week. Trou-
ble with the machine caused the de-
lay.

Seventh and Eighth Grades
The following pupils have been ab-
sent from school during the past week
because of illness: Jack Platt, Lulu
Springer, Edith Craft and John Hick-
man.

Adrian Foster, who took the recent
eighth-grade examination in all sub-
jects in which she had not formerly
made a satisfactory grade, has earned
her eighth grade diploma. Adrian
was the only pupil in class who had
covered all eighth grade subjects in
class work.

The members of the eighth grade
arithmetic class are just beginning
the study of extracting the square
root of a given number. They have
been preparing problems for each
other by squaring any number which
they may have in mind. This is
proving to be an interesting game and
also furnishing needed practice.

Fifth and Sixth Grades
The following pupils were neither
tardy nor absent the fifth week of
the month: Bert Ward, Thomas
Sanford, Marie Springer, Susie Dresh-
er, Kenneth Aherin, Edgar Stucker,
Melva Curran, Ruth Alice Vanouck,
Glenn Harris, Donald Springer, How-
ard Blume, Marjorie Nebelsieck and
Jennette Rader.

Our grades gave a program of song
to the fifth, sixth, seventh and eighth
grades last Friday morning.

The third grade is making booklets
illustrating "Alice in Wonderland."

The fourth grade has made a good
start in long division now and are
taking quite an interest in it.

Perfect spellers this last week are:
Ambrose Foster, Marjorie Nebelsieck,
Glenn Harris and Ormand Hickman.

First and Second Grades
Friday ended the fifth month of
school. Work is progressing nicely in
our room, but the attendance record
dropped quite a little below that of
last month. We hope to make up for
it during the coming month.

The birthday of Lincoln and St.
Valentine are the two first important
birthdays in February which we will
observe in our room.

We have begun the construction of
Little League cabin to illustrate the early
home life of Abraham Lincoln.

We are also making valentines for
the Valentine box which we expect to
have.

Some people say that trouble multi-
plies itself, but we are not inquisitive
enough to try it.

THE BOWLING BUGS—TEAM
NO. 3 STILL IN THE LEAD

This fine spring-like weather has
produced an added incentive for the
"bowling bugs" to get busy with in-
creased vigor and the games are being
driven for all they are worth, in "reg-
ulars, specials, singles, doubles," and
various other combinations in order to
try and decide "who's who" among
the "bugs."

Don Bressler has stepped out in the
lead in individuals and otherwise but
there are a few who threaten to "take
his measure." It is reported that
there will be a return match be-
tween Loncosty, Beckman, Burr and
Bressler which will show different re-
sults from the one chalked up below.

Mr. Bressler says he is not so sure
about that as some of the challengers
seem to be.

Ole Flanoe has donned his war
paint and issues a challenge to any
man for a single game. Now here's
your chance, Mr. Goodbowler, to take
on some one who will give you a "run
for your money."

The following scores have been
chalked up since last week:

Regular Games
H. Morsch...142 143 133—411
H. Schooler...120 158 143—421

# MARKETS OF THE WEEK

## LUMBER

**F**IRST effects of the curtailment program are expected to show in the Atlantic trade. The West Coast has held strong at \$19 for February, despite the heavy transit diversions from Florida, and concessions to a half dollar higher for February and possibly to \$20 for March are being made by numerous local operators in that trade. Domestic intercoastal space is strong at \$15 for February, but a number of British tramp bottoms are now offering for loading at Vancouver in February.

Curtailment alone, it is now agreed, has saved the domestic market. Florida's fall down on purchases and diversions to the North Atlantic were sufficient to unsettle the prices from Key West to Portland, Me., for ten days to two weeks. It is not positively known just how much lumber or the number of cargoes that were shifted in this way, but it is commonly reported that they were heavy. The volume was enough to throw the east coast \$3 to \$5 off, to cause Atlantic buyers to get out of the space market and to stop inquiry for cargoes.

Some of the mills are already asking \$20 for fir schedules, confident that the surplus transits now on the east coast will shortly be absorbed, leaving an active unutilized demand.

Reports of transit surplus at New York and Jersey are not lacking. They come from reliable sources. Atlantic lumber futures are very light.

Buying for Los Angeles in worked common 2x4's is very difficult at \$16. Where this size is bought exclusively it is necessary to pay \$15.50, with best sales prices a. s. t. San Pedro at \$22. If 2x4's are taken in a mixed order mills will accept business at \$16 to \$18.50. Some sales of random rough 2x4's have been made the past week at \$16. During the past week, for the first time probably in several years, twelve coastwise lumber carriers have been laid up because of inability to get lumber cargoes. Transit offerings at San Pedro are reported this week at 15,000,000 to 20,000,000 feet, but in view of the light sales for the month this is not regarded as a weakening factor.

**T**HERE is much confusion over the situation in Florida. It is generally believed, however, that the emergency for building material has now been passed and that selling that is done on the basis of firm contracts in transit will yield better returns. Coastwise vessels that have been engaged in the Florida lumber haul for three or four months will have completed their charters by Feb. 1 and it is expected that some will return to the coastwise trade. Delay in getting lumber have spent good money for lumber have stored it, unable to find ready buyers.

It is generally felt that there will be no more repeat cargoes for the small vessels that have been making regular trips between West Coast lumber ports to Florida. Delay in getting lumber have spent good money for lumber have stored it, unable to find ready buyers.

bles and merch. Japanese lumber space is firm for January and part of February, held principally on the Douglas fir crowd on the c. l. f. plan of selling.

Oskaka is buying 3,500,000 feet of 60 and 75-foot piling. Prices for the long length with butts in 19 to 23 inches are \$40 per stick and the short ones \$23.50 c. l. f. Shipment of the Oskaka piling is to be made between May 1 and December 1.

Australia is in this market for shooks, to be delivered from May 1 onward. Merch base for February-March is \$16 with independent mills, against \$17 with the organized export group. Conference steamship lines are booked up solid on space for January at \$14 and \$14.50, but March offers the fact of dropping out at \$13.50. Japan has been buying long.

**C**URTAILMENT by the mills is being pointed out by wholesalers to their eastern clients as a reason for the present stronger market, and the probability of continued reductions through next month are conceded.

Average prices paid for common dimension are \$3 off list on mixed and \$2.50 off on straight cars, with drop siding at list to \$1 over. Drop siding is in slow demand. Country yards are quiet, the seasonal trade being on the replacement basis.

While the retrenchment program is in full swing, wholesalers have been offered some bargains although the mills do not seem anxious for business. No. 2 and better, or B&B ceiling, has sold as low as \$25 direct to the trade. The trade reports that it is offered all the dimension it wants in straight cars at \$3.50 and \$3 in mixed from the mills direct.

Minnesota and Wisconsin cities are in the market. Minneapolis says the February-March demand will be good.

time when best authorities on the other side claim that requirements are large and are yet to be anticipated, frankly baffled the bull contingent and led to an unsettled situation market-wise. May wheat is selling at a premium over May in Liverpool, something almost unheard of in grain history. Offerings of new crop Argentine wheat are increasing according to reports. Southern hemisphere ports are receiving large quantities of grain from the interior and offerings to European importers have been indirectly the cause of eastness abroad. The movement of the Argentine crop this year is late but Europe can apparently afford to wait for the grain. Her purchases of Canadian wheat and flour have been fairly large but not of sufficient volume to enhance values for any length of time.

There is no doubt that the unmistakable stability of the domestic situation is steadying world markets. The movement of grain from the farms is declining from day to day and stocks at important terminals are being lowered. Cash wheat in the Southwest is selling at five to six cents over the Chicago parity. In the Northwest milling wheat rests in strong hands. Duluth stocks are largely durum and country advices have it that producers are holding. This condition is expected to continue for the balance of the crop season. Canada has plenty of what for export and after the first rush of Argentine wheat is over there is little doubt that foreigners will commence to show more interest in Canadian grain.

The extent of the Southern hemisphere surplus are yet to be ascertained. At least the trade is uncertain over the Argentine surplus. Reliable reports have been received almost daily the last week, the bulk of which have placed the Argentine surplus at less than 100,000,000 bushels. The Australian surplus is placed at 65,000,000 bushels or about 50,000,000 bushels less than last year. With surplus grain smaller than last year at this time and with Europe behind in her purchases the chances are that there will be only temporary pressure of the cash article at this time as the first rush of Argentine wheat is on.

Exports of domestic wheat are on the up to the middle of January according to the figures given out by the Department of Commerce were in excess of 63,000,000 bushels. Last fall the do-

ministic trade was unable to figure out how we could possibly spare more than 50,000,000 bushels. High prices may have forced economies in other portions of the world, but not at home to any appreciable extent.

Speculative leadership in the wheat pit is lacking at the moment but the supply situation here will gradually develop buying power. Experts state that there are 287,000,000 bushels of wheat available east of the Rockies for six months starting January 1. Population east of Denver is 105,000,000. Consumption in this time would total normally 260,000,000 bushels. Seed requirements for the spring are 20,000,000 bushels. This indicates an inroad of 13,000,000 bushels into the carry-over without allowing for any exportations. The figures are amazing. The West Coast has some wheat, but relative prices are prohibitive at this time in getting it far East. Price cuts little figure at home. Our people will eat wheat bread if obtainable. At \$3 wheat would be cheaper than meats, fruits, canned goods are today.

**PRODUCE**

**T**HE potato market is beginning to show signs of a break up. Whether prices have gone so high that consumers do not care to buy as usual is not known, but at any rate wholesalers are afraid to take them on at \$60 to \$65 per ton at Yakima Valley shipping points.

The potato market this season has been one of the spectacular stories of merchandising in which has been comprised many of the dominant emotions. In normal seasons, a Yakima Valley grower who got \$30 per ton as an average shock hands with himself.

This season he has averaged better than \$50 and many hundreds of tons sold earlier in the season, when speculative opportunities were at their height, for \$60. The high price was due to a known shortage in the national crop of 75,000 carloads, a huge and unusual shortage. Growers who paid high prices for spuds for the table can blame the government crop reports, which carried the information about the crop shortage from month to month. Not once in a decade are such prices warranted, for this is a big potato-growing nation and failures like the present are rare, but the summer, drought and burned out condition of the spud yield put the finishing touches on a market that had already been skyrocketed. Any outsider who didn't know a spud from an onion might have made the big money by speculating up to Jan. 1. Now, the opportunity has passed.

Conscientious creamery men of Seattle who have fought over a period of 25 years to sell consumers on the idea of using only top grade butter at the cheapest in the long run have been unable to make the sale. The surplus. Low costs of delivering Portland butter to the Seattle retailers and oil substitutes which lay on the human stomach like a brick on the sidewalk took away much of their legitimate trade. Consumers had set their minds on buying best butter at 50 to 55 cents per pound, but when the cost of the butter compared with other articles for the table and for wear are pitted with the diminished purchasing power of the dollar it is seen that butter costs less than any other staple possibly with the exception of eggs.

Viewing a disastrous loss on storage eggs for the season, North Coast jobbers are studying with some apprehension the coming storage season. Whether to store at all against a known heavy lay of fresh eggs, or the problem of the home, is the question. If low prices are paid producers will suffer, but it begins to look as though not more than current prices will be paid to ranchers, and many producers today are not getting the actual cost of food out of eggs they are selling.

**NEW LINE ORGANIZED BY PORTLAND FIRMS**

The Oriental Navigation Corporation and the Forest Transport Corporation, controlling seven vessels, have organized a new intercoastal service to be operated from Philadelphia by the Quaker Line under a formal charter with the California Steamship Co. at Los Angeles and San Francisco. The Columbia Pacific Shipping Co., Portland, Ore., will be the general Pacific Coast agent.

**Balloon Tires**

Motorists (as car goes over cliff)—Thank goodness I've got balloon tires! They should land me safely.—Motor Camper & Tourist.

**Italy Fruit Crop**

Summer and fall apples, pears and figs in Italy have been very abundant and of good quality and flavor, reports Consul J. B. Jackson, Bagnoregio, Italy, to the Foodstuffs Divisions of the Bureau of Foreign and Domestic Commerce. All expectations for a good crop in this district have been amply fulfilled reports the consul.

Your dollars come back to you if they are spent at home.

## CARELESS NIGHT PARKING IS REAL ROAD MENACE

**T**HE congested condition of most highways these days is times accentuated by failure of the motorist to use care in selecting his parking place. This is especially true at night. It is a disconcerting experience to make a sharp turn around a blind corner and find yourself heading down on the tail-light of a parked automobile. Still more confusing is it to have a pair of bright headlights suddenly burst upon you as you

In the absence of other lighting facilities, careless motorists sometimes make their repairs with their headlights as the source of illumination. This is a most dangerous practice, the moving figures before the headlights adding to the confusion. A more satisfactory and convenient light for roadside repairs, which causes no confusion to the drivers of passing cars, is a flashlight. This enables you to have the light where you want it and where you need it. It makes it unnecessary to wheel the tire to the front of the car and back again for inspection. Nor do you have to fumble with the jack and hunt for rim nuts in the dark.

Some flashlight cases are equipped with clips, so that they can be attached to the belt. This leaves both hands free, with plenty of illumination for repair work. The flashlight also comes in handy when backing across a narrow road so as to avoid the ditch, and in leaving the car in a dark garage after the car is put up for the night.

Whenever a car is parked, parking lights should be turned on. Occasionally roadside mishaps may be a stop necessary at a point which is certain to cause inconvenience to other motorists, and many collisions have been caused by a blinding headlight glare from a parked car.

**FRIDAY, FEBRUARY 5, 1926**

**A Correction**

In writing the notice of the death of the late G. A. Bumpass last week we neglected to state that all of the 12 children were at the bedside of their father when the end came. The name of Mrs. Hanley Meader was also omitted from the list of children in the notice, hence this correction. These little errors will creep in occasionally but we are always more than willing to make any necessary corrections. All the children who came from a distance have returned to their homes with the exception of Mrs. Meader, who with her husband and baby, will leave for their home in Los Angeles on Sunday.

**Mrs. Herman Entertains**

The Tuesday club was delightfully entertained at the home of Mrs. W. M. Herman February 2, when pinocchle was played at seven tables. The honors of the afternoon were won by Mrs. Carl Erickson, who presented a beautiful piece of cut glass. The invited guests were Mesdames Harry Scholler, Carl Erickson, Arthur Springer, V. A. Beckman, Milton Rader, Frank Hoorman, Mahlon Follett, Gibson, Johanna Christenson, Fred Shirrod, Harry Emerson, Elmer Vanouck, Harold Haymond, T. H. Herman, Ray Edwards. The next meeting of the club will be with Mrs. Frank Hoorman on February 16.

**How Are Your Eyes**

Do your glasses require changing or adjusting? Dr. A. E. Jones, specialist, will be at the Genesee Hotel, Thursday, February 18. We ask you when in Spokane to please call at our office, 315 Exchange Bank Building. 31-3

**CHURCH NOTICES**

**St. John's Lutheran Church**  
 Rev. A. F. Wolff, Pastor  
 Sunday school at 9:30 a. m. English services will be held each Sunday morning at 10:30 o'clock, with the exception of the first Sunday of each month, when German services will be held at the usual hour.

**Christian Church**  
 N. E. Beach, Pastor  
 Bible school at 9:45. Morning service at 11. Sermon subject, "Is Christianity a Failure?" C. E. at 6:30. Ruby Roach, leader. Evening service at 7:30. Subject, "Ambition." This sermon is especially for young people and all are invited to attend.  
 J. T. Croot of Moscow will have charge of the services.

**Congregational Church**  
 Paul W. Sprague, Preacher  
 Mrs. W. M. Herman, organist.  
 W. E. English, choir director.  
 Sunday school, 9:45 a. m. Mrs. Arthur Hampton, superintendent. Morning worship, 11 o'clock. Young People's meeting, 7 p. m.

**Genesee Valley Lutheran Church**  
 Rev. Gerh. A. Peterson, Pastor  
 Saturday, 2 p. m. Confirmation instruction.  
 Sunday, February 7, 10 a. m. Sunday school. All Bible classes will meet.  
 11 a. m. Worship, with Norse and English sermons.  
 A cordial welcome to these services.

**Weather and Roads**  
 February came in like a "lamb" all right, and is on a parity with the rest of the "winter" that has passed. While there is still some snow on the ground, it is fast disappearing and the weather is as balmy as spring. The roads are in fair condition and the highway is as good as could be expected at this season of the year. While they are sloppy and small holes are beginning to make their appearance, on the whole they are in good traveling condition. Robins and meadow larks are beginning their "spring songs" and other birds of various kinds are beginning to put in their appearance and make their presence known by their song, and, on the whole, people have begun to feel and act somewhat like the birds in everything but flying.

**COMING**

Dr. A. E. Jones, Specialist

"There's a reason, JONES' GLASSES SATISFY." Dr. Jones have had years of office experience, and maintain the largest, best equipped office in the center of Spokane. If others have failed do not be discouraged, come to us. We specialize in fitting and treating difficult cases. We make trips East and keep up with the times. For years Dr. A. E. Jones was president and Dr. Mae B. Jones dean of the oldest optical college in the Northwest. Let us make you look younger and see better with Jones' Glasses. See Dr. Jones and buy direct (we have no agents). We do not charge you twice for one pair of glasses, but make any change we find necessary free, at the office or in the next 60 days. We offer superior service and better glasses at reasonable prices. CALL AT HOTEL GENESSEE, THURSDAY, FEBRUARY 18.

**Announcement**

**McCormick-Deering Primrose Owners**

ON TUESDAY, FEBRUARY 9, there will be at our store a factory cream separator expert who will, free of cost to you, make any repairs that might be necessary on your cream separator, providing you bring in your machine complete. If your machine is perfect, come anyway and have a little talk with him. It will be of great benefit to you. Everybody welcome. Remember the date.

**Dollars Flow In Rich Cream When a McCormick-Deering Separates the Milk**

Unless you have handled the dairy end of your farm business on a rich cream basis you cannot possibly realize the convenience and profit this plan offers. With a McCormick-Deering Primrose Ball-Bearing Cream Separator on your farm you can separate the milk quickly, feed the skim milk to calves, hogs, or chickens, and put the cream into a can ready for shipment to the creamery. The Primrose turns easy and it gets all the butterfat down to the last drop. The McCormick-Deering Primrose will do these things for you every day in the year for many years, and it will do them for a very small initial outlay of money. If you are interested in increasing your dairy profits, call on the local McCormick-Deering dealer and he will show you how easily you can put a McCormick-Deering Primrose to work on your farm.

**A NESTEGGIS WORTH WHILE**  
 No one ever regretted that he saved his money. A bank book showing a credit, whether it be a few dollars or a fortune, is one of the most satisfactory things in the world to possess. It bears evidence of a will to succeed and is the finest kind of passport to success. Start now to save something each week—even if it's only the smallest amount. Interest at 4 per cent insures its growth and you'll be amazed how swiftly it increases.

 J. Kluss returned home from Clarkston for a few days.  
 I. Isaksen trucked two loads of hogs to town for J. Kluss, Tuesday evening.  
 Mr. and Mrs. Joe Grieser and family were busy shoppers in town Saturday.  
 J. W. Mosman had the "spring ambition" last week, he hauled one load of straw.  
 Miss Nola Wilson spent Saturday in Lewiston at the home of Dolly Baumgartner.  
 Andrew Klemm butchered 12 hogs this week—all the neighbors were cordially invited to help.  
 Frank Klemm is looking rather sick these days. We all sympathize with him, because we realize what it is to batch.  
 Sleepy Holow was wide awake last Friday, when they all turned out for the Rimrockers' ball. Everybody reported a good time.  
 Mrs. R. F. Kluss entertained the Thorn Creek Altar society, Tuesday, Mrs. J. W. Mosman and Mrs. C. F. Ebel were invited guests.  
 Bruno and George Ebel, accompanied by Miss Nola Wilson and Irene Ebel, "Dodged" to Slickpo Sunday to see their sisters and brothers who are attending school there.  
 Mr. and Mrs. John Kluss and family moved to Clarkston temporarily where Mrs. Kluss underwent an operation. Miss Nola is staying at the home of R. F. Kluss.  
 Ernest Geselchen and Hank Kamlich returned from California last week. We understand why they came back so soon. Their slogan must be "There's no place like the Hollow."  
 Sister M. Angela, daughter of Mr. and Mrs. Chas. F. Ebel, returned to the Ursuline Academy in Moscow after spending two years at the novitiate in Beacon, New York. Mr. and Mrs. Chas. Ebel and family motored to Moscow Monday to see her.

**Emmett & Boliou**

**Man-Made Falls**

ONLY those who have visited the Little Falls power station appreciate the beauty of the man-made falls built there to give a 74 foot drop to the water of the Spokane river for the generation of power. A steel tower line from this station brings the precious energy to the city of Spokane, and the surrounding territory. Within the building, with its four great generators, the floor sparkles with cleanliness, a symbol of the cleanliness of Electric Service.  
 When you push the electric button within your home, store or factory, you receive an instantaneous response from this and six other hydro-electric stations of this Public Service Company.

**The Washington Water Power Co.**  
 Serving 45,000 customers in sixteen counties of Washington and Idaho

**PERSONALS**

Mrs. M. E. Muhlitz went to Lewiston Monday to spend the week with her mother, Mrs. J. E. McAllister. John Vandenburg drove to Palouse Sunday and visited for a short time with his son, Emery Vandenburg, and wife.  
 Mrs. F. K. Bressler returned Tuesday from Lewiston after spending a week with her sister, Mrs. E. T. Jacobs and family.  
 Jake Wicks returned to Moscow on Monday noon after having spent a short time here visiting his son, Guy Wicks, and friends.  
 Mrs. N. Visby of Amber, Washington, is visiting at the Henry Hanson home. Mrs. Visby was formerly a resident of Genesee but left here some 20 years ago.  
 Miss Gretchen Smith returned to Lewiston Monday morning after having spent the week-end with her parents, Mr. and Mrs. H. T. Smith. Miss Smith is attending the Lewiston Business college.  
 Jess and John Coverdale returned Wednesday of last week from Yakima after having attended the funeral of their sister-in-law, Mrs. George Coverdale. They were accompanied home by their brother George and his son Harold who will make an extended visit here.

**Reserves the Right**  
 The News has been criticized from some quarters for failing to "print all the news" that is sent in and in reply will say that while we want all the news that we can get, from both country and town, we reserve the right to edit all such copy. We do not aim to "cut out" anything that is real news and the one that takes exception to our right will find that we do not leave out anything that is real news.  
 We welcome a little foolishness now and then, but it is always best to refrain from any too pointed personalities which might come under the head of "foolishness" and yet strike deeped than we care to do.  
**Parents of Baby Daughter**  
 Mr. and Mrs. Wm. Freeburn, living near Pine Grove, are the proud parents of a baby daughter, born Monday afternoon. Weight, 8 1/4 pounds. Mother and baby are reported as doing nicely.  
**Arab Proved Human Fish**  
 On April 13, 1887, an Arab pearl diver remained under seven fathoms of water for 109 seconds.

**Will Read Over Radio**  
 Word from Victor Shaw to the Herman families is to the effect that he will read one of his first short stories over the radio from the Boise High school studio, Thursday evening, February 4.  
 Mr. Shaw has written many stories for the Saturday Evening Post which have been greatly enjoyed by the readers of that publication and no doubt his reading will be no less interesting. If you have a radio, try to listen in.  
 Read the ads.—keep posted.

**Summit News**

Mrs. M. E. Muhlitz was a week-end visitor in Lewiston.  
 Mrs. Sumner Stucker was a Moscow visitor Saturday.  
 Ed. Taylor was a Friday visitor at Coverdale brothers.  
 Cleo Taylor was a Monday visitor at Lester Hayden's.  
 Mr. and Mrs. Sumner Stucker were visitors in Moscow Monday.  
 Mr. Hodgins spent Sunday evening at the Frank Quayle home.  
 Mrs. Leon Peterson arrived Friday from Spokane to spend a few days with relatives and friends.  
 Mrs. Leon Peterson returned to Spokane Monday, Mrs. Dick Green taking her as far as Moscow.  
 Mr. and Mrs. Elmer Johnson and Arthur Johnson were in Moscow Friday visiting Mrs. Frank Green.  
 Frank Green spent Saturday in Moscow visiting with Mrs. Green, who has been ill at the Inland hospital.  
 Amanda Johnson left Friday from Moscow on the Inland for Spokane to visit her daughter, Mrs. E. G. Newell, and family.  
 Mrs. M. S. Wilson, Mrs. Leo Miller, Mrs. Frank Quayle and Mrs. Dick Green spent Tuesday visiting at the E. B. Hampton home.  
 A very pleasant evening was spent at the H. Bielenberg home the other evening when a number of their friends gathered to spend the evening.  
 The Summit Pop club met with Mrs. Chas. Grieser and a good time was had by all. The next meeting will be held with Mrs. Kretschmer or Mrs. Schueter.  
 Mr. and Mrs. Hugo Gehrke and Walter Gehrke, Fred Taylor, Frank Stackpole and Charles Coverdale were Tuesday evening visitors at the Ed. Taylor home.  
 Jack and Jesse Coverdale arrived home from Yakima after having attended the funeral of Mrs. Geo. Coverdale. Their brother, George, and his son, Harold, accompanied them home for an extended stay.  
 A very pleasant time was spent the home of Mr. and Mrs. Frank Quayle when a number of friends gathered to help celebrate Mrs. Quayle's and Ernest's birthday anniversaries and a good time was had by all present.  
 Frank Green was a visitor in Moscow Monday, having gone there to bring Mrs. Green home. She has been in a hospital there for the past three weeks. The Pop club wishes to state that they are delighted that Mrs. Green is again able to be at home.

**Pine Grove News**  
 Miss Luzena Jones had Sunday dinner with Bernice Lambert.  
 Mr. and Mrs. Roy Sweet and family visited at Oliver Clark's last Sunday.  
 Mr. and Mrs. Henry Whitted and family spent Sunday at the Jas. Cameron home.  
 The young people of this district are busy practicing for a play, which will be put on the latter part of the month.  
 The Sewing club spent an enjoyable all-day meeting with Mrs. Ben Palmer last Thursday. A delicious dinner was served at noon.  
 A 9 1/2-pound daughter arrived at the Wm. Freeburn home February 1. Mrs. Hastler is caring for mother and daughter, who are getting along nicely.  
 There will be a community supper given at the Pine Grove school house February 13, at 6 o'clock. Stunts and games will be enjoyed after supper. Everyone is requested to bring a valentine and join in the fun.  
 There has been quite a turn-out at Sunday school these last two Sundays and we're sure that the number will be increased from now on, for sides have been chosen, the purpose of which is to see which side has the most points for present members at the end of the month. The losing side will have the privilege of treating the winners. We're betting on the Red Birds.

(Continued from Last Week)
CHAPTER 21
Stella Waxes Sentimental

"And so now, with father in prison, Mr. O'Rourke dead, and \$100,000 due the bank, there is only Mr. Taggart, the boys, myself, and that herd out there to save us from utter ruin," Mary recounted tearfully. She had been recounting her story from the beginning when her father first fled into exile, to Stella, who had gained her entire confidence.

"Well, don't worry dear, it will all come out all right," said Stella sympathetically, coming over and sitting beside Mary in the piano bench, caressing her in a motherly fashion, and whispering her tears. "Come, child—won't you play some more music for me—it will rest your tired head." Mary turned to the piano, and her fingers stroked the keys lightly, bringing forth sad, wistful notes.

"It's a song my father loved," she said, "my mother used to sing it to him here—years ago." "It's lovely," said Stella with a sentimental air. "It stirs sweet memories in me."

Mary stopped. Then from beneath the window of the room stole the notes of a guitar, gently strummed, and a voice lifted in the words of a Spanish serenade.

"What a romantic night," said Stella, listening and going to the window with Mary. The sun was setting. They saw the serenade—it was Miguel.

Suddenly Bud Hughes came up, made a wry face, and menacing Miguel with his feet, chased him from the window.

"Yes, but see how reality boots romance out of life," said Mary laughing. "But there was a time when Bud too, was romantic," said Stella. "How well I remember—"

She was interrupted by the entrance of Bud himself. He was resplendent in natty new clothes, his boots shining, his hair plastered down, and his head shaved completely. He smiled and winked to Stella to call attention to the transformation.

"The steers are all in the corral, Miss Mary—ready for tomorrow's drive," Bud reported. "I wish I could look like old times, Bud," cried Stella.

He looked at her wistfully, and said, "With I felt like old times." Mary gave Bud his instructions. Stella lingered near the open window, leaned out, and saw sneaking up Bud McLeod. She furiously took a prepared note from her waist, and casually dropped it out the window.

Buck, leaping, catching it, read, in a hasty glance: "After tonight when I drop my handkerchief the way will be clear." Then, unobserved, he sneaked back the way he had come, and disappeared.

Stella's acted sentimental mood continued that evening after she and Mary had finished dinner. "What a wonderful night it is," she exclaimed, coming to Mary. "It reminds me of so much—you know, Mary, it was just such a night as this that Bud—Mr. Hughes—and I quit the circus. The moon was—"

Mary, smiling, lifted a coquettishly reproving finger, and said, "Stella, Stella—I think you're in love with your memories. And—my want—you'll find Bud down at the ranch gate on watch—in the moonlight, too. We have to keep a watch on, because we've had so much trouble with rustlers."

"Please explain yourself, sir, or I'll have to shoot," threatened Mary. "Mary, Mary," said Idaho Bill, and his voice changed to one that was familiar to her. "Don't you know me?"

"Mary, Mary," said Idaho Bill, and his voice changed to one that was familiar to her. "Don't you know me?" "Terence O'Rourke!"

"The same, alias Idaho Bill, cattle rustler," Terence replied, rushing toward her and unfolding her in his arms. "After a kiss which more than reassured Mary completely of his identity, he said, "That old Komi sure did a good job on disguising me when even my own Mary doesn't recognize me."

Soap and Sewing

NEEDLES and thread, thimbles and scissors, all present themselves in the foreground of our thoughts when sewing is mentioned—but soap is never even considered as part of the sewing equipment.

Once you have used soap on the surface of a fine material you will never be without a piece in your sewing basket.

To rub over the neatly creased hem in new table linen, soap is invaluable. The needle will slip through so much more readily than before the soap was applied.

A moistened bar of soap rubbed on the surface of a fine material in which buttonholes or eyelets have to be made, will save fraying at the edge of the cut.

A white cake of soap is of course most suitable for general sewing of all kinds as it will not discolor the fabric.

The firing of shots outside continued. "But we must do something to stop them now and save the herd," said Terence. "They're going to open the corral and run the steers off. Quick, I must go out and do what I can to prevent that."

He started off, Mary, clutching her gun with one hand, and clinging to his arm with the other, cried, "I'm going with you."

"No, no, Mary," he said, "Stay here. The world will be thrown off. He tried to dart out alone. "I shall, I shall," she insisted, following him. There was no time for argument, and Mary was not to be dissuaded.

They slipped out through the back of the house and toward the corral. "If you wouldn't do this, Mary," he said, "you can't hold the fort alone, she answered, and I can shoot as straight as any man."

CHAPTER 23.
Stampede and Battle
While Buck and the main body of his men kept the rustlers engaged by gunfire up front, two "goats" slipped away in the darkness and back to the corral gates.

As Mary and Terence came up the fenced lane into which the corral opened they were suddenly stricken with horror as a sound of many hoofs pawing the ground broke upon their ears, and they saw the stampeding herd rushing out from the corral toward them.

"We're too late," Terence cried in dismay. "They've already opened the gates." "What can we do," screamed Mary.

"They were trapped between the two fences of the lane, and in a moment the steers would be upon them. They could only run back the lane ahead of the steers—but they would never be able to outrun the herd. They would surely be trampled to death. The steers running never-theless, as there was no alternative.

Suddenly they tripped and stumbled. They found they had rolled into a small ditch crossing the lane. Mary started up. Terence held her back. "Lie still—flat on the bottom," he cried. "This may save us. It's our only hope."

The thundering feet had reached them. The steers were leaping the ditch. Their hoofs passed through the air close overhead dangerously close to Terence and Mary, but did not touch them.

"I hope they're all sure-footed cutters," laughed Terence, trying to inject a note of humor into their precarious situation to cheer Mary. Such thoughts come even in the face of death. "If none of them slip we'll be safe."

UNIVERSITY OF WASHINGTON STADIUM PAID FOR AND NOW PROPERTY OF STATE

The University of Washington Stadium is paid for. When on January 19, Darwin Meisner, graduate manager of the Associated Students of the University of Washington, delivered funds to a Seattle bank which retained the last outstanding bonds against the structure, an important chapter in the history of the University of Washington was closed.

The stadium's construction and financing cost the University of Washington student body approximately \$565,000. Of that total only \$1400 represents donations. Plaque sales, building funds, Stadium attractions, football receipts, and the 1924 and 1925 Pasadena games have been the principal sources of revenue for the stadium.

DEAF CAN HEAR IN NEW THEATRE
Amplifying System Removes Barrier

Impaired Hearing No Bar to Enjoyment of Theatre Guild's Plays as Handicap Is Overcome

One of the first handicaps encountered by the deaf is that of hearing. It is always been the loss of social entertainment such as the theatre. Impaired hearing has been more a hindrance to the individual to lead a somewhat solitary life, cut off from the arts and recreations of music and drama.

One of the big reasons why the business of the A. S. U. W. now totals over \$300,000 annually is the Stadium. During the summer people from all over the country attended such events as the "Waxfater," the Denishaw, and the Schumann-Heink, and the clubs of national reputation.

In the future, when the demand comes the Stadium will be increased in size by the erection of a super-structure. This addition will be in accordance with the University plan of architecture and will provide for a balcony and an overhead covering. When finally completed the Stadium will stand as a real achievement and a tribute to the effort money and brains that made it possible.

more stock, furnish better feed and will supply forage for a longer period than will the same area under one fence. This improvement can be made now on comparatively inexpensive time.

2. Wherever the rainfall is in excess of what the soil can hold, there is always danger unless care is given in controlling the flood water. The excess water may cut ditches or may flood some of the low spots and drown out the crops. Where it starts to wash, some filling and leveling, and staking brush or straw, will help to check the flow, so that the soil will gradually fill in and hold. After a while, a permanent seeding can be made and the difficulty is under control.

The low wet spots, in the absence of tile, should be drained by means of open furrows or ditches to save the soil from becoming water-logged or from draining fast down crops. These ductive parts of the farm, but wet portions are usually the most profitable during the cropping season, and would have to be classed as odds and ends. During the winter months, they become a matter of importance, and the good progressive farmer gives them the attention they deserve.

J. G. Gruver and Theo. Parsons have been elected commissioners of the Port of Kalama, Wash.

Statistics compiled by the United States Shipping Board show that one-fifth of the ship tonnage of the entire world is made up of vessels with passenger accommodations. According to the research bureau of the governmental shipping body, the world's passenger ship tonnage totals 12,275,000 gross tons, and numbers 2,109 vessels, flying the flags of 33 nations, and possesses total accommodations for approximately 1,000,000 passengers.

This bureau also claims that the steamship Leviathan, of 53,950 tons, is the largest vessel in the world—a claim that from time to time has been disputed by those who assert that the White Star Line steamship Majestic, a British vessel, is the larger. The Leviathan, however, is the only American ship of over 25,000 tons, while Great Britain boasts of eight ships, Germany and Holland each have one such vessel.

According to the statistics the United States can boast of only vessels out of a passenger fleet of 297 which are in overseas or offshore service. Great Britain has 774 vessels of this class in overseas trade; France has 204 such vessels; Japan, 184; Italy, 123; Holland, 103; Germany, 76; Spain, 52; Brazil, 51; and Denmark, 37 such vessels. Bulgaria and Iceland are credited with having one passenger carrier each in overseas service.

Strange Romance of Business Began With \$400 Mortgage on Homestead

Pictureque photo of electrical employees taken a half century ago

A FOUR HUNDRED DOLLAR mortgage on an old homestead; the partnership of an ambitious young student of telegraphy and a college professor whose inventive mind turned to electricity; a small electrical shop in Cleveland; out of all these elements of romance a business started which today returns to the names of the first partners.

Bliss, the professor, left his classes at Oberlin, and Enos M. Barton, the young telegrapher, raised four hundred dollars on his mother's home, in order to found the firm of Gray & Barton. The growth of the business in electrical supplies carried on by the Western Electric Company has been set apart from the company's telephone manufac-

turing department under the Gray-Bar name. Physical separation of the two was completed in 1923, and the growing importance of an independent supply business apart from telephone manufacture has led to the new company.

Tree Conservationist Gives Land to U. of W.

A demonstration forest of a million and a half foot of timber on the Rainier National Park Highway, to serve as a "show window" of the science of forestry, and as a field laboratory in the study of forest pathology, has been given to the College of Forestry of the University of Washington, by Dr. Charles Lathrop Pack, of Lakewood, New Jersey, President of the American Tree Association, according to announcement by President Henry Suzzillo.

The tract is located at La Granda, Washington, adjoining the highway. This is the third gift of the kind made by Dr. Pack during the last few months, similar gifts having been made to the New York State College of Forestry at Syracuse and to Yale University.

The purpose of this gift, according to Dean Hugo Winklerwood of the College of Forestry, is to further general interest in reforestation through a public demonstration of scientific forestry, and as a field laboratory for the College of Forestry.

"The tract selected will serve this purpose admirably," Dean Winklerwood said. "It is located on one of the principal traveled highways of the west and has a frontage on the highway of approximately one mile, presenting to the view of the passing public an area of second growth timber, one of virgin Douglas fir forest, and one that has been logged and burned over. Each of these areas will require different treatment and all are plainly visible from the highway."

"The purpose of this gift, according to Dean Hugo Winklerwood of the College of Forestry, is to further general interest in reforestation through a public demonstration of scientific forestry, and as a field laboratory for the College of Forestry.

"The tract selected will serve this purpose admirably," Dean Winklerwood said. "It is located on one of the principal traveled highways of the west and has a frontage on the highway of approximately one mile, presenting to the view of the passing public an area of second growth timber, one of virgin Douglas fir forest, and one that has been logged and burned over. Each of these areas will require different treatment and all are plainly visible from the highway."

"It is a new idea in advertising a big national problem," he declared. "In its plan of development the College of Forestry will show the various problems involved in the handling of Douglas fir forests. Everything from the nursery practice, planting, and the problems of natural regeneration to the handling of second growth forests for continuous production will be illustrated. Properly placed with the forest, it will attract widespread public interest. This is particularly true in the State of Washington where the last stands of the nation's virgin forests are now being rapidly exhausted and where the skening of public forests has become an ever-present need." To those who may be able to visit the tract from time to time the development of the forest should arouse a sustained interest that will grow from year to year. The University will maintain a ranger on the ground during the summer months to act as fire guard and as guide to conduct visitors over the ground.

"It is particularly significant that a western forest school has been selected for this gift and shows that Dr. Pack's interests in forestry are as broad as the entire country. A practical forester himself, he has early recognized the need of bringing the problem before the people and he has been a forceful leader in forestry for many years. He first studied forestry as a boy in the Black Forest of Germany in 1878.

"Dr. Pack formerly was president of the National Conservation Congress, later President of the American Forestry Association, and is now president of the American Tree Association with headquarters at Washington, D. C. Through all these organizations he has not only given the most energetic support but has also assisted freely through generous financial aid. Two years ago he established a fund for an annual prize essay at the University of Washington and made other gifts to other institutions for furthering the work in forestry."

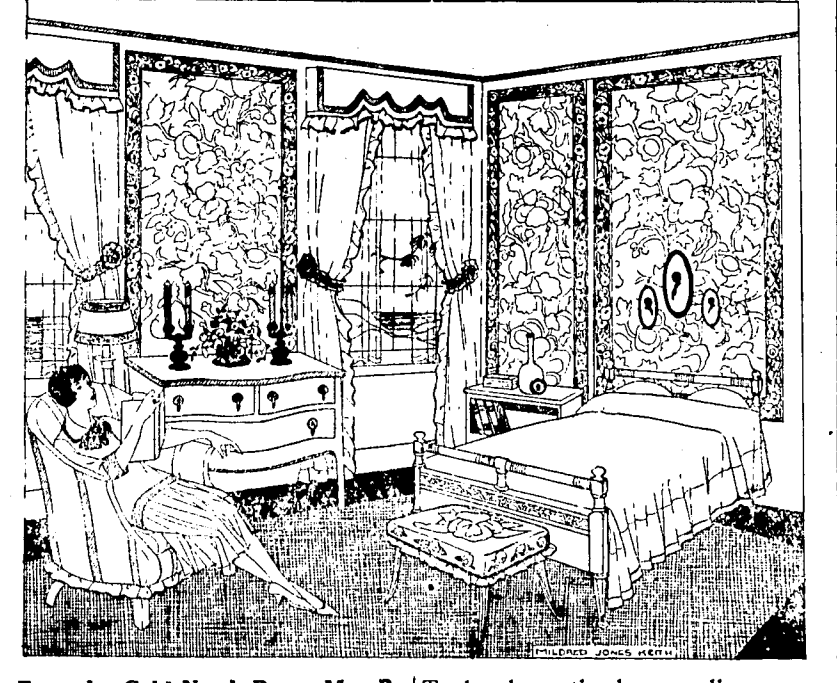

The gift of the demonstration forest comes in part from the Charles Lathrop Pack Forestry Trust, which was established a short time ago for the purpose of disseminating knowledge of forestry practice throughout the country.

Other officers declared were: Vice-President, W. H. Felgenson of Portland, J. G. McFoe of Spokane; treasurer, Arthur Gerber, re-elected; new members of the board to serve for the year ending June 30, 1926, were: Mr. McFoe, J. S. Christie of Seattle, Guy Atkinson of Portland and Mr. Gruntlett. The board will name the secretary, the understanding being that H. V. Bogert of Seattle is slated for the position.

The North Bed Room

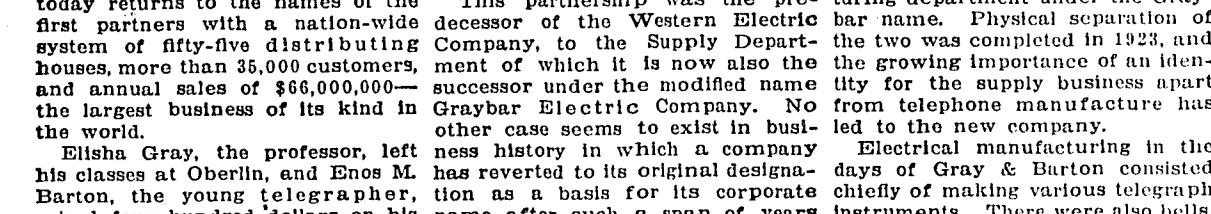

Even the Cold North Room May Be Delightful If You Use the Right Wallpaper.

By Agnes Rose

EVERY home has a north side and the unfortunate possessor of the north bed room does not realize his possibilities and suffers in silence, gloom and dreariness, that are quite unnecessary. Cheer is a matter of color, and a warm sunny room is delightful because the sunshine brings out all the yellow quality in the colors used, and strengthens those which have no yellow in them. Therefore in a north room we have to use artificial sunshine, that is yellow, in our furnishings, or combinations of yellow with another color such as rose or red, making apricot and orange. If this is done carefully the room will give a semblance of warmth, and the warm colors made every bit of light reflect yellow or some form of it, and instead of being dulled by the walls, the most charming one in the house.

# MARKETS OF THE WEEK

## PRODUCE

**DISTRIBUTIVE** conditions in the potato market show that spot values have begun to crack. It is not denied that the shortage of the national crop of the five year average is 75,000 carloads, or 50,000 million bushels. This should, and did open the way for double the usual prices to growers, with good profits to dealers, the consumer obviously paying the bills of all from the hills to the grocer who delivers at the family rear door. The shortage is estimated on the average per capita of consumption, established after years of experience. Spot statistics have arrived nicely at how many pounds each American will require in a year.

But there has come a late realization by consumers, without any concerted or cohesive effort, that potatoes are costing too much money and so, by slow stages the use of spuds on the family table, in hotels, cafes and restaurants has been reduced. Average consumption over the nation through January has not exceeded 50 per cent of normal. It has been a consumers' strike without a leader. This, then, places the potato in exactly the position it would be if the crop was at a surplus. Dealers are beginning to duck for cover and to clean up. Yakima valley growers are stubborn about selling, thereby inviting a loss. They can still get \$5 to \$10 per ton over the average, but are hoping for another major price return.

The deplorable chapter in the egg market for the season of 1925-26 is closing. Losses due to mild winter which has been an actual financial detriment to this section have for the soft pedal on the market, and are staggering in the Puget Sound egg industry. The same spring temperatures that causes consumers to feel an abhorrence for eggs has made the hen lay more and the producer has been pinched between the two economic fires.

Since early fall eggs have been the cheapest food commodity in market. They have replaced beef and pork to such an extent that packers and butchers have voiced serious complaint. Families that were forced to stint themselves because of high winter egg prices have fed them in plenty to the kiddies. Perhaps, considering the body politic as a whole, this is as well, even though the producer has lost a fortune in the effort.

Seattle is being supplied with what many regard as the highest grade of butter made in the United States by leading city creameries. One of these brands, in the market for 23 years, is named in an advertisement in another column.

## LUMBER

THERE is some uncertainty as regards the effect of the curtailment of production which has been in effect with West Coast mills since Dec. 26. Several of the mills, complaining that their cost of production increased when they reduced their capacity to one shift are preparing to resume operations next week. Some have already done so, but it is admitted that curtailment also saved the domestic mill a fortune. Trans-Pacific is selling today at New York and Jersey for less than they can be bought for plus freight, on the West Coast. New York is denying all interest in futures and claims to have enough lumber on hand to take care of its requirements.

It is also stated that the market is at the peak. The Inland Empire white pine mills of eastern Washington and Idaho, taking advantage of the stiffening of fir prices by the curtailment, is shipping dry dimension into the middle west and there has been some price increase because of high winter freight, on the West Coast. New York is denying all interest in futures and claims to have enough lumber on hand to take care of its requirements.

## WHEAT

PERSISTENT drought underlying the domestic situation remains the steady influence in the world trend. Until recently the market has been a drab affair because of increased pressure of Southern hemisphere new crops and lack of normal foreign demand, but the situation at home has exerted itself, checked the decline and developed a healthier market. Advances were difficult to maintain, however, because of the moderate amount of general speculative interest.

Foreign news according to the best of authorities are large, and are not anticipated except for immediate purposes. The exportable surplus of the Argentine has been lowered from time to time and the surplus of Australia this year is about half of last year's amount. Indications are that sooner or later Europe will have to come to Canada for large amounts of grain that still remains in that country. Our prices continue appreciably above the world parity. This is the result of the close adjustment of supply to demand in the United States.

The visible supply last week experienced a sharp reduction, and the trade believes that within another month the visible will be under the 40,000,000 bushel mark. The movement from the farms is dwindling irregularly, and is considerably short of last year. Farm reserves are estimated to be materially short of this time last year, especially over the Winter belt. In the Spring area farmers still possess fair amounts, but the grain apparently rests in strong hands, and there is no desire to ship freely. Stocks of wheat at terminals in the Northwest are expected to be lowered steadily from now on. Some betterment in the flour business has been noted at Minneapolis the last few days. In Chicago contract stocks of wheat are 662,000 bushels, a remarkably small amount for this time of year, and it is claimed that half of this grain is of high grade quality and will not be available for delivery in May. The nearby month from time to time becomes easily congested, especially the dips, and this reflects the belief that there is a strong long interest that does not intend to be shaken.

## WHEAT

Cash wheat premiums in all domestic markets command strong premiums over futures, and this condition is expected to continue. No. 2 hard wheat here is selling 3 1/2c over the May, and No. 1 hard 3 1/4c over. In the South-east premiums are stronger, relative to the Chicago basis.

The cash market in Winnipeg has strengthened despite the large amounts of wheat in the Canadian visible. No. 1 Northern in Minneapolis is now selling at 1c under the May, compared with 3c under a short time ago.

When Europe will commence to bid more eagerly for her distant needs is difficult to ascertain, but that condition on the other side is at least narrow as evidenced by the fact that despite heavier world shipments the last few weeks disappearance of the ocean supply was in step with the clearances, and stocks in the United Kingdom remain moderate. Foreign fir logs are steady at \$15, \$19 and \$25 at nearly all West Coast points.

**COUNTRY** yard inquiry is light. Shippers declare the middle western retailers have not been sold on the idea of curtailment and its effects as well as the mills and are holding off. It seems to be a settled fact that the "spring" and "fall" buying of former years has given way permanently to the replacement idea due to competition and fast time enroute offered by the railways for the business.

Buying at the mills is very difficult. Stocks yards are not building up stocks despite the fact that yards and sheds are almost at pile bottoms. There are no stocks at the mills.

The market today is \$3.50 off list on two-inch dimension lengths of 20 feet and shorter to wholesalers in mixed or straight grades. In the country yards are inquiring for straight chengo reports a weak market. There is much complaint from middle western shippers as to slow delivery by the mills. Minneapolis has begun to insist upon better footwork. That mill also states that the market is at the peak. The Inland Empire white pine mills of eastern Washington and Idaho, taking advantage of the stiffening of fir prices by the curtailment, is shipping dry dimension into the middle west and there has been some price increase because of high winter freight, on the West Coast. New York is denying all interest in futures and claims to have enough lumber on hand to take care of its requirements.

## WHEAT

Practically ceased. One part cargo from Puget Sound has been turned over to a firm to do a \$3 commission at the best prices it will bring. There are 17,750,000 feet of transits on the San Pedro docks today. Best prices on worked 2x4 common are \$22, with a rare \$22.50 appearing. Buying is easier at this end with trades at \$15.50 for 1x6 and 2x6 and \$16 for 2x4.

A break in intercoastal space would probably be followed by a mill increase to one-half the amount. This would prevent a decline in the market at once. Tramp bottoms sold at Vancouver at less than the going price would not react on this market for 60 days, it is believed. There is a tendency on the part of shippers to keep out of futures, and there has been more lumber buying ahead of space reservations in the Atlantic trade than for several months.

Fir logs are steady at \$15, \$19 and \$25 at nearly all West Coast points.

Have you ever seen a big ocean liner like the Empress of Scotland starting away from New York on a 30,000-mile voyage around the world? This photo shows her doing the first yard of this wonderful journey down stream in the Hudson River, or North River, as it is commonly called. She has just backed out of her pier with all her flags and pennants flying; in the confetti tape tying her to shore and to the pier is the Empress of Scotland. The ship will arrive in Haifa in time to take the passengers to Bethlehem for Christmas Eve celebrations in the Holy Land. Passengers will have one of the most interesting trips that they will have on the present trip of the Empress of Scotland. Christmas Day will be spent in Jerusalem, and New Year's Eve in Cairo. Four full days will be devoted to a visit in Peking, China, and China. Arthur through the Gulf of Liao-tung to Chinwangtao.

# Empress of Scotland Does First Yard of 30,000 Miles

LEAVING NEW YORK ON A WORLD CRUISE, THE EMPRESS OF SCOTLAND.

Should production of Philippine-grown hemp be halted or seriously obstructed, the effect upon world commerce and industry would be disastrous. The United States would suffer most because nearly 50 per cent of the total annual production is exported to this country. Practically all of the world's rubber cordage is made from Manila hemp.

As in the case of rubber, it is important as a measure of economic safety that we should have a large part of our hemp supply raised under our own flag.

Harvesting operations in the great American grain fields would also feel the effect of interference with the hemp supply from the Philippines. Binder twine used in harvesting averages about 15 per cent of Manila hemp.

Few people are aware of the fact that musa textilis, to give Manila hemp its botanical name, is a true species of banana. Its stalks, when stripped of their pulpy contents, yield a long, white, glossy, tough fiber which forms the basis of Manila hemp, the premier "hard fiber" of the world.

The Philippines Islands appear to have a natural monopoly in this fiber. Attempts to grow it have been made in various other parts of the world, but thus far without success. The plant has been grown to maturity wherever planted, but the resulting fiber has lacked strength, and particularly the salt-water-resisting qualities that characterize the Philippine-grown plant. For example, the Island of Borneo is separated from the southern Philippines by less than a hundred miles of sea, yet the British could not raise hemp there that came anywhere near the standard of true Manila fiber.

While Manila hemp fiber was known to the Spaniards who originally settled in the Philippines and was probably used on the great galleons that plied the trans-Pacific trade between Mexico and the Philippines in the seventeenth and eighteenth centuries, its uses did not become known to the world at large until 1848.

The first authentic record of exportation of Philippine hemp is dated 1818 and shows the departure of 41 tons, or 330 bales. In 1820, Lieutenant John White, U. S. N., brought a sample to Salem, Mass., and four years later the manufacture of Manila hemp into rope on a commercial scale began in New England.

In 1849-50 an effort was made in Congress to supply the Navy with American-grown, "water-retted" hemp. The Navy then needed 700 tons a year. The man who took the contract defaulted after furnishing 50 tons.

## PHILIPPINE HEMP IMPORTATION TO UNITED STATES INDUSTRY

Should production of Philippine-grown hemp be halted or seriously obstructed, the effect upon world commerce and industry would be disastrous. The United States would suffer most because nearly 50 per cent of the total annual production is exported to this country. Practically all of the world's rubber cordage is made from Manila hemp.

## DATES OF WORLD TRAGEDIES

The saxophone was invented in 1846.

Jazz started in 1915.

"Yes, we have no Bananas," was written in 1923.

There are more than twenty-five wires in the state of Montana as there are miles of railway lines.

Don't let animals go thirsty.

# Urges Farmers to Back National Organization

National organization movement among farmers is slowly dying, says Farm and Fireside. The farmers are letting it die because they are too stupid to see the wisdom of keeping it alive. The do not realize that a permanent national organization gives them a national voice with which to demand the square deal from business and government to which they are entitled; and that without this voice they are dumb and helpless.

Business, labor, and finance are shrewdly and thoroughly organized and will continue to be so.

In letting their national movement die the farmers are inviting business, labor, government, and finance to step on their faces. It is too much of an effort of human nature that they will not do so.

The farmers are letting the national movement die because times are a little better for the moment; because some of the men they trusted have proved unworthy; because failure of their organizations have fallen by the wayside.

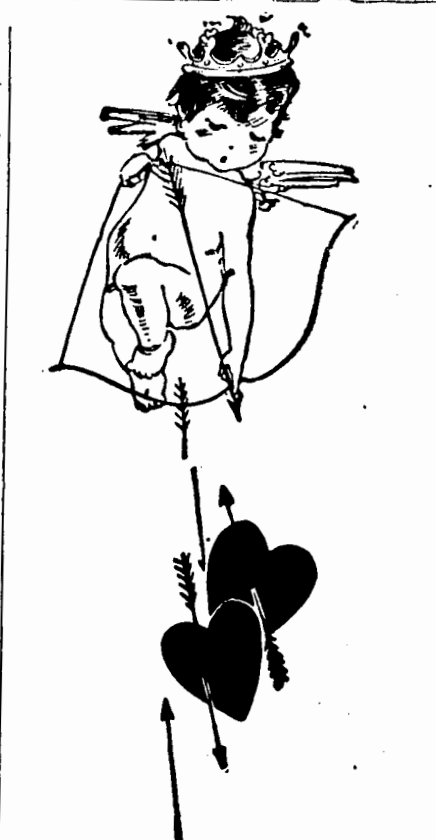

Those are all bad reasons for letting the movement die. The purpose of national organization is not to deal with temporary emergencies. Its great mission is to let the world constantly know that farmers stand together. That knowledge alone would gain them respect and fair treatment as nothing else can.

Local and sectional farm organizations are faring a little better but their functions are different. At that there isn't the interest in it that there should be.

Local organization is the root, sectional organization the trunk of the tree of national organization.

Why let this tree die at the top when it could and should be so fruitful?

We hold no brief for or against any existing farm organization. The organization itself is the creature of the farmers. If it is weak, it is the farmers' job to kill or strengthen it. If its guiding lights are dim, put them out and substitute brighter ones. The power is in the farmer, not in the organization; and that organization will never be any stronger than the individual farmer's faith in it.

## ON SMALL TOWN PAPER IS BEST PLACE TO LEARN JOURNALISM SAYS PUBLISHER

Adolph S. Ochs, controlling genius of the New York Times, said a good many good things and true things in his speech a few days ago to the students of the Pulitzer School of Journalism. For the most part his discourse pictured the work of newspaper men in their various functions, and contained much of general and specific information for the young men and women setting out to get journalism in the short cut.

As Mr. Ochs dwelt on idealism in the various phases of newspaper work, ranging from news to editorials and editorials to advertising, and delineated the essentials of a really good newspaper man, the students mayhap got a glimpse of a steeper and more thorny road to the attainment of first rate craftsmanship in journalism than they had been wont to fancy when the doors of college journalism were flung open to them.

The best thing Mr. Ochs said in his speech was his advice to students to go into a small town newspaper office and learn journalism in all its tiring rewards.

## ECONOMIC SURVEY OF IDAHO AGRICULTURE

A study of Idaho agriculture to develop a long time production and marketing program for farmers in that state started February 1 under a cooperative project by the United States Department of Agriculture, the Idaho State Department of Agriculture, and the University of Idaho.

The principal agricultural commodities produced in Idaho are to be studied in their relation to present market outlets, and to the possibility of widening the markets for these commodities. An important phase of the investigation will be the extent to which Idaho growers may satisfy market demands which are now met by products from competing areas.

A comprehensive study is to be made of production and marketing costs, combinations of farm enterprises in the various Idaho producing areas, and the possibility of improving agricultural methods to yield more satisfactory returns to farmers for labor and farm investments. Reports on each phase of the work will be released as soon as the investigations are completed.

Look: Do Not Touch

There are some flowers so wonderfully gifted by nature that their beauty is a great handicap in this class being the lady's slippers, among the most gorgeous of our wild flowers and for that reason among the most eagerly sought, says Nature Magazine. The lady's slipper is used rapidly exterminated by flower vendors and wanton collectors, until it is now among the rarest of wild flowers.

Safety rules aren't founded on theory alone. Back of each one is an injury. Don't make another rule and hogs together in a small pasture.

# Valentine's Day

For back in folk and village customs the festival of February 14th originated. No one knows its true significance. The Valentine festival appears to be a day of fun, dedicated to the little fellow with the bow and arrow whom we call Don Cupid. Today the holiday is almost obsolete, but at one time it ranked with Christmas and the New Year in importance.

The do not realize that a permanent national organization gives them a national voice with which to demand the square deal from business and government to which they are entitled; and that without this voice they are dumb and helpless.

Business, labor, and finance are shrewdly and thoroughly organized and will continue to be so.

In letting their national movement die the farmers are inviting business, labor, government, and finance to step on their faces. It is too much of an effort of human nature that they will not do so.

The farmers are letting the national movement die because times are a little better for the moment; because some of the men they trusted have proved unworthy; because failure of their organizations have fallen by the wayside.

Those are all bad reasons for letting the movement die. The purpose of national organization is not to deal with temporary emergencies. Its great mission is to let the world constantly know that farmers stand together. That knowledge alone would gain them respect and fair treatment as nothing else can.

Local and sectional farm organizations are faring a little better but their functions are different. At that there isn't the interest in it that there should be.

Local organization is the root, sectional organization the trunk of the tree of national organization.

Why let this tree die at the top when it could and should be so fruitful?

We hold no brief for or against any existing farm organization. The organization itself is the creature of the farmers. If it is weak, it is the farmers' job to kill or strengthen it. If its guiding lights are dim, put them out and substitute brighter ones. The power is in the farmer, not in the organization; and that organization will never be any stronger than the individual farmer's faith in it.

# Nation's Art Treasures Enriched

LEOPOLD STOKOWSKI REWARDS THE "SWAN" WITH INTERESTED AFFECTION.

EVEN in the midst of wedding preparations Leopold Stokowski, famous conductor of the Philadelphia Orchestra, found time to examine and become enthused over the most famous violin collection in America—that of Rodman Wanamaker, just brought from Italy to this country where it will be permanently held. "The collection is a wonderful addition to the nation's art treasures," said Mr. Stokowski. "The chief instrument in the collection is the 'Swan', the last violin made by Stradivari, in 1737, the year of his death—and the most famous of his violins. Other noted instruments are a Montagnani violin; two violas, a Goffrini and a Guadagnini; two cellos, a Teccler and a Ruger; three other Stradivari, the Joachim-1710, the Dancica-1710 and La Chesnay-1687. They will be used in concerts at the Wanamaker auditorium in New York and Philadelphia. The collection is valued at a quarter of a million dollars.

Stokowski has been conductor of the Philadelphia Orchestra since 1912. Largely through his efforts the orchestra has achieved pre-eminence in the musical world.

Stokowski's marriage, on Monday, January 11th, to Miss Evangeline Brewster Johnson of New York City, came at a great surprise to all but a few of his intimate friends.

## UNITED STATES INCREASES TRADE WITH LATIN AMERICA DURING YEAR 1925

Estimate of trade of the United States with Latin America for 1925, based on figures for the 11 months ended November, indicate totals of about \$865,000,000 for exports and \$1,058,788,000 in 1924, according to J. R. McKee, Latin American Division, Department of Commerce. These figures do not include shipments to and from Porto Rico and the Virgin Islands, which will bring the total of shipments to Latin America up to about \$930,000,000. This is a gain of about 12 per cent in exports and a loss of a little over 2 per cent in imports. The loss in imports was largely due to the gain in price of hides and more than offset the gain brought about by high coffee prices.

On the export side losses are shown for the Barbados, Bermuda, Cuba and Peru, and gains for every other country or possession. Stated in percentages, the gain ranges from about 4.4 for Mexico up to 25 for Argentina, for Brazil, 41 for Venezuela and 42 for Colombia. In value, gains were about 27 1/2 million dollars for Argentina, 21 1/2 for Brazil, 12 for Colombia, 7 1/2 for Venezuela, 6 1/2 for Chile, 6 1/2 for Mexico and Central America, 1 1/2 for Uruguay and nearly a million each for Ecuador and Jamaica. Losses were about 1 1/2 million dollars for Cuba, 1 1/2 for Peru and small amounts for the Barbados and Bermuda.

Most of the commodities which make up the bulk of our exports to Latin America show satisfactory gains over 1924 figures. Percentages of gains indicated for some of these are: Fish, 31; leather and leather goods, 16; flour, 34; other cereals, 30 (notwithstanding large loss in rice); cotton seed oil, 32; leaf tobacco, 20; petroleum products, 11; iron and steel (excepting machinery), 9; locomotives, 16; sewing machines, 37; adding machines, 42; typewriters, 30; printing presses, 120; automobiles, 72; automobile tires, 33; freight cars, 36; naval stores, 60; moving picture films, 18, and phonographs, 21. Slight increases are also indicated for lumber, paper, cement and copper wire. Losses indicated are about 22 per cent for dairy products, 7 for coal, and 2 for cotton goods.

On the import side, sugar shows a loss of 39 per cent in value and an increase of 2 1/2 in volume, while on the other hand coffee shows an increase of about 14 in value against a decrease of 13 in volume. Rubber shows an increase of about 174 in value and 16 in volume; bananas 34 in value and 16 in volume, and wool 128 in value and 48 in volume. Other increases indicated are 14 per cent for hides and skins, 35 for cacao, 47 for cattle and 13 for nitrate. The only losses other than sugar were in flax seed, iron ore and crude copper and ore.

**Ease the Work of The Farmer's Wife**

"The farmer's wife who pumps and carries water for the house walks twelve miles to the pump every year, pumps 50 tons of water and walks 24 miles to get it into the house," declares the Westmoreland, Kan., Recorder, in summarizing the results of a study of the old farm pump.

"The moral of which is," comments E. B. Kelley, noted Kansas columnist, "that water should be pumped into the house with an electric motor or other mechanical means."

"Think what an amount of hoing in the garden a farmer's wife could do with that 24 hours!"

On Wheels

Crawford—During your motor trip over the country I suppose you ran across many one-horse towns?

Crabshaw—Yes, but I was never in a place where there was only one car.

—Jas. O'Connell in Motor Camper and Tourist.

# To Make A Desk Out Of A Table

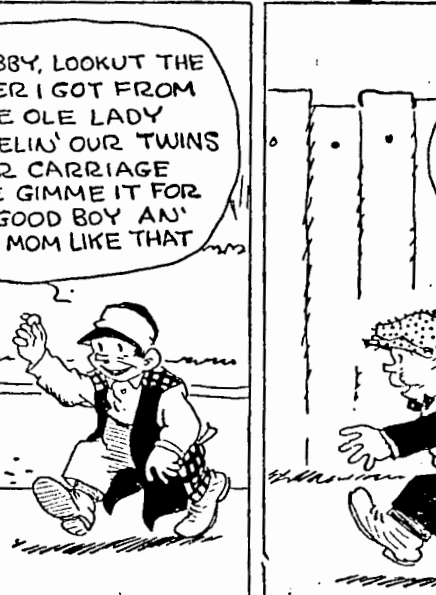

MOST desk sets nowadays are made with the thought that the owner has a full-fledged desk to be made into a desk. It will adhere to a table in which to keep pens and pencils. The two quarter-circle boxes are more than ornamental. They are handy substitutes for the drawer space which is lacking in most of that topped tables. In one you can keep an inkwell and stamps. The other will hold unanswered letters and receipted bills.

The desk set illustrated here is covered with dull blue brocade trimmed with antique silver braided ribbon. Silver paper to line the top and cover the shelves, a silvery gray into a cardboard and liquid strike the fancy.

**W. M. Post Out Again**  
Word from W. M. Post of Harrison, who a few months ago suffered the loss of a portion of one of his feet, is again able to be out, saying he went down town last Friday for the first time, but that he is not yet discharged from the hospital.

**Is Convalescing**  
Mrs. E. M. Becker, who has been quite ill, is reported as being well on the way to recovery at this time.

**Sure, You'll Have a Good Time**  
If you go to the card party at the K. C. hall, Monday night, February 15. Everyone invited.

**About the Highway**  
Now that the "soft" weather has set in, it behooves everyone to watch their loads and see to it that they do not go over the posted weight of 5,000 pounds. As long as judgment is used in this respect, loads to 5,000 will be allowed, but should the weight of the car and load exceed that amount and do damage to the highway, the owner of the car will be asked to contribute to the state fund in the shape of a fine.

The ladies aid will meet with Mrs. Annie Danielson on Thursday, February 18.

**Another Indication of Spring**  
Deary has begun talking about the celebration of the Fourth of July.

**Again Sounds Warning**  
E. W. Porter, state commissioner of finance, again sounds a warning to prospective buyers of stock of any kind. A careful perusal of the following may serve you better than you know:

Regardless of whether or not companies have permits to sell stock in Idaho, agents must have licenses and persons found selling stock without first being licensed are liable to arrest and such punishment as the law provides for its violation. The first inquiry of one approached with an investment proposition should be as to whether the solicitor or salesman is duly licensed and he should be requested to exhibit the license. All agents who are licensed are provided with a license and required to carry it with them when transacting business. This is very important, since even legitimate stock may be so improperly sold as to constitute a fraud against the purchaser. Misrepresentations and distortion of the facts may be used in such a manner as to constitute a fraud.

A very careful inquiry is attempted to be made into previous records and characters of persons before they are issued a license.

It is very much to the interest of the public that unlicensed persons attempting to sell stock or securities of any kind should be apprehended. If such are found, a report should at once be made to the county attorney of the county in which the unauthorized agent is transacting business.

Bankers and others coming in contact with the public in this manner should carefully give such instructions to their clients relative to this matter as will enable them to protect themselves against unscrupulous and unlicensed salesmen.

**Shower for Carrie Mae Hickman**  
A most delightful party was given at the R. C. Kleweno home Saturday night, February 6, in honor of Miss Carrie Mae Hickman, who is soon to become the bride of Walter Kleweno. The rooms were artistically decorated in accordance with the valentine season.

The event was in the nature of a miscellaneous shower for Miss Hickman, she receiving many beautiful and useful presents.

One of the amusing features of the evening's entertainment was a mock wedding, given by the friends present.

There were some 40 or 50 guests and each one embroidered a tea towel for the bride-to-be, the lady doing the best work was to receive a prize, which was awarded to Mrs. B. J. Fleiman.

After spending a pleasant evening a delicious lunch was served by the hostess.

**The Latest Need**  
Now is the time for somebody to step up and invent a permanent shave.

**Chopped Left Thumb Off**  
Fred Zimmerman of Crescent suffered a very painful accident last Friday evening. He was splitting wood and severed the left thumb close to the hand. He was brought to Kendrick for medical attention.—Kendrick Gazette.

The News man has long contended that "mere man" has no business whatever splitting wood or kindling. It is very evident that they are much more awkward with axes than are women, for every once in a while one reads of a man having an accident such as the one mentioned above.

But who ever heard of a woman severing a thumb or finger while splitting wood? No one, of course, which shows conclusively that they should be allowed to do all such work.

**Had Plenty of Trouble**  
An eastern editor said a man got in trouble by marrying two wives. A western editor says many men have done the same thing by marrying one. A northern editor says that many of his friends found trouble by merely promising to marry, without going any further, and a southern editor says a friend of his was bothered enough when he was simply found in company with another man's wife.

**Will Give Card Party**  
The ladies of St. Mary's church will give another of their card parties, in the K. C. hall, Monday night, February 15. Don't miss it. 33-1

**Very Pleasant Birthday Party**  
A very pleasant birthday party was given at the home of Mr. and Mrs. Carl Erikson Wednesday evening in honor of Mr. Erikson's birthday anniversary when a few friends were invited to spend the evening. Pinocle was played at four tables and of course delicious eats were served during the evening.

The invited guests were Mr. and Mrs. Frank Hoorman, Mr. and Mrs. Arthur Springer, Mr. and Mrs. Gus Fickens, Mr. and Mrs. Lars Liberg, Mr. and Mrs. Henry Halverson, Mrs. Warren, Miss Keeler, Florence Rader, Margaret Rader, Nels Liberg and Harold Hallman.

**Tree for Spring Planting**  
The University of Idaho has prepared their list of shade and forest trees for spring planting. It carries the usual list and the prices are practically the same as in former years. You can secure one of these lists of trees and the prices by addressing the School of Forestry, University of Idaho, Moscow, Idaho.

**Chance Void of Sense**  
Chance is a word void of sense; nothing can exist without a cause.—Voltaire.

**Hard Times Dance**  
The hard times dance given by the Genesee High school Friday night was a decided success. Over 100 tickets were sold and everyone present reported having a fine time. Walt Allen and his singing band furnished splendid music.

**Most of the Genesee students** who are attending the university had a few days at home at the close of the first semester. Those who were at home were Grace Jain, Wilma and Hele Caselott, Alvina Hanson, Fred Cann, Eugene Tupker, Fred Dicus and Kenneth Platt.

**Sam Alexander returned Monday** from a seven-week visit with his folks at Lenore City, Tenn. He brought with him (or shipped at about the same time he left) three 'pussoms as a present to E. E. Stout. Mr. Stout says he is going to let John Loran have one of the animals for his "zoo" and that he is going to keep the other two. If you have never seen one of the "grinners," better go and take a look at them at the cream station.

**Word has been received from Lester Hayden, Jr., of Mansfield, Wash.,** by his parents, Mr. and Mrs. L. C. Hayden, that there was a foot of snow in the Big Bend. Also that he had just finished his first semester of school at that place as an honor student with a 94% standing. He was a student of Genesee High two years ago.

**Tree for Spring Planting**  
The University of Idaho has prepared their list of shade and forest trees for spring planting. It carries the usual list and the prices are practically the same as in former years. You can secure one of these lists of trees and the prices by addressing the School of Forestry, University of Idaho, Moscow, Idaho.

**PERSONALS**  
Miss Louise Donnelly of Spokane is visiting with the Jain families.  
Frank Wilson, a student at W. S. C., spent the week-end with his parents, Mr. and Mrs. M. S. Wilson.  
Mrs. Ira Hanson went to Coifax, Wash., Tuesday for a visit with Mrs. Dickey.  
Rev. Paul Sprague and Dr. Thurston motored to Spokane Sunday afternoon, returning home Monday evening.  
Miss Wilma Burton of Emmett, who is attending the U. of I., spent the week-end with Miss Rowena Hanson.  
Mr. and Mrs. Claud Harpole arrived home Wednesday from points in Oregon where they have spent the past few weeks.  
Misses Mayme Krier and Alfrida Hampton, who are attending the Lewiston normal, spent the week-end with home folks.  
Miss Esther Clark, who is attending the Colton academy, spent the week-end with her parents, Mr. and Mrs. Grant Clark.  
Mrs. Al. Butterfield and baby left for their home at Pocatello Wednesday after a six-weeks visit with her parents, Mr. and Mrs. John Lawson.  
Mrs. A. J. Fitz, who had spent the past two weeks here visiting and looking after property interests, left Sunday for her home near Pomeroy, Washington.  
Dr. and Mrs. W. H. Ehlen left last week for California, where they will spend a few weeks visiting and enjoying the sunshine that is said to exist in that state.  
Miss Mary Sampson, who has been visiting her grandmother, Mrs. Minnie Springer, for the past several weeks, left for her home at Hunters, Washington, Sunday.  
M. B. Yeaman, publisher of the Times-Register at Idaho Falls, accompanied by Victor Hugo of Moscow, were visitors in Genesee for a short time Monday on their way from Moscow to Lewiston.  
Mabel Hanson of Salt Lake City, Utah, is a guest of her sister, Mrs. Irvin Manderfeld, and husband, on her return home from a trip as far east as Chicago. She expects to remain about a week.  
Mr. and Mrs. Joe Tobin and children returned to their farm home here Sunday. Mr. Tobin having regained his health after having been ill at the home of his parents in Clarkston for the past two weeks.  
Most of the Genesee students who are attending the university had a few days at home at the close of the first semester. Those who were at home were Grace Jain, Wilma and Hele Caselott, Alvina Hanson, Fred Cann, Eugene Tupker, Fred Dicus and Kenneth Platt.  
Sam Alexander returned Monday from a seven-week visit with his folks at Lenore City, Tenn. He brought with him (or shipped at about the same time he left) three 'pussoms as a present to E. E. Stout. If you have never seen one of the "grinners," better go and take a look at them at the cream station.

**Blame the Moon**  
And now it has been discovered that radio static is caused by the moon, according to a "bug" who claims to know. We have heard about "moonshine" causing a great deal of disturbance, but we didn't know it had anything to do with the reception of radio, especially where the listener-in didn't look on it too long.

**The Cow Creepers' Bawl**  
Tonight (Friday, February 12) the big Cow Creepers' Bawl will take place and you are cordially invited to be on hand and have one of those times that you seldom have an opportunity to enjoy.

**Real Estate Moving**  
The Deaconess hospital of Spokane has sold their 160-acre farm near Pullman to Wm. Hett, a local farmer, at \$82,500 an acre, and Ben Clark has sold his 160-acre farm between Pullman and Palouse, but the consideration is not given out. G. F. Shirrod, realtor, represented both buyer and seller in each deal and made the two sales within the last three weeks.

**Undergoes Operation**  
Genesee friends have received word from Mrs. Ida Wheeler to the effect that she underwent quite a serious operation recently at Fresno, Calif., hospital for a tumorous growth. She was said to be getting along nicely at the time of writing.

**Were You There?**  
If not, you don't want to miss the big card party to be given by the ladies of St. Mary's church, in the K. C. hall, Monday night, February 15. You'll have a good time. 33-1

A LITTLE TALK ON THRIFT

(By S. W. Strain, President American Society for Thrift.) The statement that this is the age of specialization may seem trite, yet embodies one of the most important phases of modern progress. Those who have succeeded have done so because they did some particular thing in a very skillful manner. It is within the meaning of thrift to concentrate one's time and energies where they will produce the best results and it is just about as thrifless to scatter your mental forces as it is to scatter your money.

Celebrate Silver Wedding Anniversary

The Nels Flamoe home, just east of town, was on Wednesday the scene of a very pleasant event when more than 100 of their neighbors, friends and relatives gathered to help them celebrate their silver wedding anniversary, the guests coming all the way from Clarkston to Moscow to take part in the festivities.

SMALLER MOTORS FOR FAMILY CARS

The annual five hundred mile automobile races on the Indianapolis motor speedway for thirteen years have offered drivers of passenger cars a forecast of mechanical improvements to come.

The approaching season will be no exception, for it will mark another reduction in the size of engines. The test will be made on May 31, when creches of no more than 91½ cubic inches piston displacement will take part in the fourteenth annual race.

It will mark the sixth time the size of piston displacement has been decreased, and if the test afforded by the 500-mile grid vindicates the belief of motor experts, the average owner will reap benefits of speed, stamina and economy in the passenger cars of coming years.

The first 500-mile race won in 1911 by Ray Harroun of Indianapolis, was open to cars of 400 cubic inches piston displacement. There were forty starters, but only seven were running when the Indianapolis driver got the checkered flag. The average speed was 74.59 miles per hour, at that time considered remarkable.

The first race in 1913, when the limit was raised at 450 cubic inches piston displacement. Jules Goux, French driver, won at 75.92 miles an hour. Rene Thomas, another Frenchman, won in 1914 when the same displacement was permitted, averaging 82.47.

In 1915, 300-inch motors were used for the first time. The veteran Ralph DePalma lead the field, hurrying his new car over the distance at 89.84 miles per hour. The same piston displacement was continued through 1916 when Dario Resta won over a 300-mile course at 83.26 miles an hour, and 1919 when Howard Wilcox, of Indianapolis traveled 500 miles at 88.06 miles an hour to win. There were no races in 1917 and 1918 because of the 82.47.

The piston displacement was cut to 183 cubic inches in 1920 and stayed at this figure through the next two years. Gaston Chevrolet won in 1920, averaging 88.5 miles; Tommy Murray in 1921 with 89.62 miles and Jim Murphy in 1922 at 94.48 miles an hour.

The motor world gasped when it was announced that beginning with the 1923 classic and continuing for three years, the racing cars would be limited to a piston displacement of 122 cubic inches maximum. There were many "I told you so's" when several cars broke down and the winner averaged but 90.95 miles per hour.

The engineers were vindicated in 1924, however, when Joe Boyer and L. C. Corum, taking turns at the wheel, won the winning machine over the finish line at an average of 98.23 miles an hour.

Peter DePaolo capped the remarkable performance of tiny motors last May when he won at the rate of 101 miles an hour. In shorter contests several drivers have obtained a 140 mile speed or better.

Conquer Clearwater Wilds Almost primitive are the methods being used by Twoby Brothers' company in their construction of a standard gauge railway in the great white pine region between Orofino and Pierce City, Idaho, and beyond. It can be no other than primitive, for the rugged canyon and its vertical waldy denary machinery with which Twoby Brothers have built other railroads.

"Fifteen camps have been established through 41 miles and 900 men are breaking rock," said James Twoby at the Deaconet, Friday. "The work will be finished before the time scheduled, which is in the summer of 1927. Five small steam shovels are on the job and advancing from each end. Some idea of the narrowness of the canyon and the small but vigorous stream may be gathered from the statement that the construction of 50 bridges in 10 miles is required.

"Material for the work and food for the men are brought in by pack train, snowshoes and toboggan." M. S. Boss, the general superintendent, obtained much training in such construction in Canada," said Mr. Twoby. "So far as we have heard, no one has lived in the Orofino creek canyon and no one has entered it but timber cutters and hunters," said Mr. Boss. "The altitude varies from 900 to 3500 feet between Orofino and the lofty hill overlooking the canyon and nearly all growing space from the creek bank into the hills for many miles is occupied by forest. Built a steel road a mile long with a 35 per cent grade for use in bringing in supplies and passed four days in walking over the line, fording the creek 25 times in three days."—Spokesman-Review.

NEW MARKET BE CREATED BY ERECTION OF BIG MILL

A new market is being developed for the farmers of the central Idaho country or some other Idaho in the event the central Idaho farmers do not take advantage of the opportunity offered. The market will extend to every activity in which central Idaho farmers are engaged but if any one is paying any attention to preparing to profit by the opening, that person is keeping very quiet about the matter.

This market will be for timothy and other hay, oats and other horse feed, fruits, vegetables, poultry and poultry products, milk, butter and even cattle, horses, sheep and hogs because if they cannot market their beef, mutton and pork direct, they can market through the meat supplying agencies that hold the contracts.

The market will be provided by the Clearwater Timber company in its gigantic operations in the Clearwater timber district and there will be quite a movement by the company in that district before the close of the present year, according to the Lewiston Tribune.

In the first place the company has a large problem in the construction of logging railroads that will be extended from the timber road, now being constructed by the Northern Pacific, to the districts from which the timber company secures its logs to keep busy the big saws and finishing plants to be installed at Lewiston. There will be another big problem in the matter of installing the logging camps where men in large numbers will be comfortably housed and fed while engaged in cutting the logs for the big mills. Many of these camps will be in almost inaccessible places and it is not unlikely that there will be big packing contracts to keep some of these camps supplied with the large stores of provisions needed for the camp operations.

The actual logging operations will doubtless employ every agency known to what may be termed the logging profession. There will be the latest methods and the latest equipment where it can be installed and operated to advantage but there will also be the old-fashioned methods of canyons where the logger must almost go back to the ox-team to get the logs on the ski-ways or river for movement to the mill. All logging operations in rough or mountainous sections have these problems and it is the larger or main operations, the larger will be the inaccessible operations.

Those familiar with the Clearwater timber district, the character of the country along the North Fork, the plans of the Clearwater Timber company for large operations along the river, know there will be a demand for a large number of horses to handle certain phases of the logging and to carry in the supplies to the camps not served by railroad or wagon road. They know how much hay and how much oats these horses will require, they know how many men will be necessary in a district of this kind to get a minimum of 200 million feet of logs to Lewiston each year and they know how much of what the farmer grows that will be needed to keep these men fit and contented. They see a wonderful opportunity for the farmers of central Idaho country and the farmers wives of this same district to inaugurate innovations in their farming operations and make a fine profit from those activities that have been little rewarded in past years. They know there will be a demand each year for so many horses to keep the camps supplied and they see a chance for some very profitable breeding of heavy horses for the logging camps and medium weight horses for the pack outfits.

There is no uncertainty of the market, there is no uncertainty of the company and its agents to be able to buy what is needed. It is only a question of who will awaken to this opportunity and prepare to meet the new and very promising market.

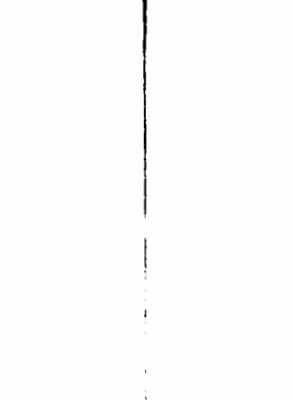

Among the Sick Thos. Ingle and son, Lester, who were quite ill with flu last week, are able to be out again. Mrs. John Lorang is quite ill at her home north of town.

Akin to Lying Flattering of others, and boasting of ourselves may be referred to as lying; the one to please others, and puff them up with self-conceit, the one to gain more honor than is due to ourselves.

The Springs Club The Springs club held a very pleasant meeting at the home of Mrs. Henry Flomer on Thursday of last week when a business session was held. A very delicious luncheon was served by the hostess.

A Correction Mrs. Vivian Wilson, daughter of Mr. and Mrs. S. E. Gordon, is the mother of a son, born on February 7, at the Gordon home.

PRETTY WEDDING AT HICKMAN HOME LAST SUNDAY

A very pretty wedding took place Sunday, February 14, at 12:30 p. m. at the home of Mr. and Mrs. W. R. Hickman, when their daughter, Carrie Mae, became the bride of Walter P. Kleweno.

The wedding party took their places under a bower of evergreens, white wedding bells and pink primroses. The impressive and beautiful ring service of the Congregational church, of which the bride is a member, was read during the ceremony. The bride and groom were given away by her father. Seated as guests of honor during the ceremony were Mrs. John Wiecks, grandmother of the groom, and Mrs. Mattie Herman, great-aunt of the bride.

The bride was charming in a gown of Crepe Louise of ashes of roses and carried a shower bouquet of roses and white freesias, while her sister, Miss Harriet, who was maid of honor, was attired in a gown of white crepe de chine, carried a bouquet of pink and white tulips. The groom, in conventional black, was attended by his brother, R. C. Kleweno.

After the service a buffet luncheon was served to the guests, the table being centered with a large white bride's cake. Mrs. W. M. Herman, Mrs. F. H. Herman, Miss Florence Kleweno and Miss Grace Jain served.

A table laden with beautiful gifts showed the esteem in which the young people were held. Only relatives and a few intimate friends of the families were present. The guests were Mrs. John Wiecks, Mr. and Mrs. G. Wilson, Mr. and Mrs. B. Huntley of Endicot, Wash., Mr. and Mrs. J. P. Kleweno and daughters, Florence and Martha and sons R. C. and Arthur, Mrs. Emma McMahon of Spokane, Geo. T. McMahon and family of Pullman, Meryl Miller of Lewiston, Mr. and Mrs. W. E. Stoddard and son, Ellsworth of Lewiston, Mrs. Mattie Herman, Mr. and Mrs. W. M. Herman, Miss Audrey Pieman, Mr. and Mrs. T. H. Herman, Mrs. Virgil Sampson, Miss Grace Jain, Misses Mary, Frances and Lorene Platt, and the Hickman family.

The young people will begin house-keeping on the old Mulaley farm, north of town. Miss Hickman was born and raised in Genevieve. She graduated from the local high school with the class of '22, attended the Lewiston Normal and has taught the grades of school in this county. She has a splendid, happy personality which endears her to all her friends.

The groom is the son of Mr. and Mrs. J. P. Kleweno, who hold extensive farm interests here, and is a well-known, honorable young man. He was educated at W. S. C. and the Columbia Law School at Portland.

The News joins the host of friends of the young couple in extending best wishes for a long and happy wedded life.

Among the Sick Thos. Ingle and son, Lester, who were quite ill with flu last week, are able to be out again. Mrs. John Lorang is quite ill at her home north of town.

SUDDEN DEATH OF JOHN LORANG CAUSES SADNESS

The almost beyond belief Tuesday evening when word reached town that John Lorang had died very suddenly at his home north of town, death having occurred at some time between 5 and 6 o'clock.

Mr. Lorang was one of the oldest and best known farmers of the Genevieve section and genuine regret and grief is felt at his passing.

Mr. Lorang had been in his usual health during the day, had eaten his meals and had gone to the barn to do his evening chores about 6 o'clock and staying longer than his wife thought he ought to, she became alarmed and called her daughter, Mrs. C. P. Whalen and stated that she was somewhat worried about Mr. Lorang's non-appearance and was told to call some of the neighbors and have them come over their son, Henry Lorang, and family, who lived nearby, not being at home, and the hired man having left earlier in the evening. Mrs. Lorang was there alone so she called J. A. and W. O. Borgen and they, with Steve Mustoe and Ed. and Steve Kamstev, went over and went to the barn, where they found Mr. Lorang, who had been engaged in feeding his stock, and from indications he had felt the attack coming on and had stuck the pitchfork he had been using in the hay and had very evidently lain down on the hay and had passed quietly away. There was no sign of a struggle or pain, he lying as peacefully as if he had just gone to sleep.

The children were at once notified and all who were in nearby town came at once. One son at Pueblo, Colo., and one at New York City are expected to arrive Saturday or Sunday.

Unless arrangements are changed the funeral will probably be held on Monday. Full particulars of Mr. Lorang's useful and well-spent life will be given next week.

"Ma" Ferguson Proclaims And yet they say "rebellion" is dead in the South—The three chapters of the Daughters of the Confederacy in Houston, Texas, took umbrage at Governor Miriam A. Ferguson's proclamation asking Texas to celebrate the birthday of Abraham Lincoln.

In a signed statement the Jefferson Davis, Robert E. Lee and Cran M. Roberts chapters said that history "had failed to record a single instance which might inspire gratitude from the south or in which Lincoln was not perfidious to the south.

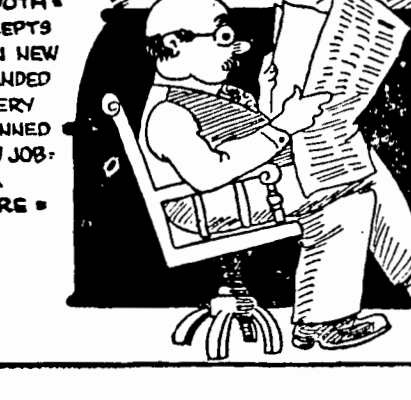

"When each month of the year brings illustrious birthdays to the liking of Texas, what could have been the governor's object in asking all loyal citizens of Texas' to celebrate in October the birthday of Theodore Roosevelt and now suggests that it would be 'grateful and worthy' to clothe the state department in honor of Abraham Lincoln.

"If we do not protest, no doubt John Brown and Harriet Beecher Stowe will be up for celebration."

The Springs Club The Springs club held a very pleasant meeting at the home of Mrs. Henry Flomer on Thursday of last week when a business session was held. A very delicious luncheon was served by the hostess.

A Correction Mrs. Vivian Wilson, daughter of Mr. and Mrs. S. E. Gordon, is the mother of a son, born on February 7, at the Gordon home.

BRESSLER HIGH MAN IN BOWLING MATCH

In last Sunday's free-for-all bowling match D. T. Bressler came out in the lead with a good margin. He got away with good scores in the first half and kept his lead throughout. He also made the highest score bowled, which was 220. After the game was over he invited the boys to lunch at Smolt's, which invitation was eagerly accepted as some of the "bugs" did not have time to eat during the night.

There will be another special game for all teams to enter, with handicap, which will start about the first of next week. We have received entry blanks for the Spokane tournament, which will be held at Spokane, as well as blanks for the Northwest tournament, to be held at Tacoma, Wash. Any team wishing to enter these tournaments will please notify the manager of the club and he will take care of details.

The following are the results of Sunday's special games, the figures given being the total pins for 10 games:

Table with 2 columns: Name and Score. Mahlon Follett 1709, Lonocsty 1687, Beckman 1676, H. Morsecheck 1624, Burr 1623, Edwards 1608, D. Wardrobe 1605, Geltz 1534, Scholer 1478, G. Morsecheck (8 games) 1071

The following is the score for the regular games:

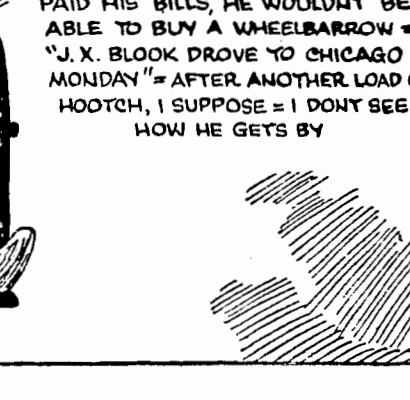

Table with 2 columns: Name and Score. Moerscheck 120 120 320-360, A. Wardrobe 141 136 31-408, Hickman 150 124 124-398, Scholer 120 120 120-360, Fickens 120 120 120-360, Shork 701 670 665 2036, Nagel 154 138 148-438, Olson 123 89 105-317, Isakson 122 131 104-359, Burr 536 477 476 1499, Bressler 165 148 148-461, Geltz 128 140 192-460, Currin 181 177 174-538, M. Pollett 138 138 160-436, Lonocsty 766 705 833 2394, Beckman 188 181 176-545, Edwards 182 150 150-462, Flamoe 162 170 157-508, D. Wardrobe 169 136 173-478, Burr 871 787 843 2501

Following are the scores of the special doubles: Burr 155 150 160, Bressler 163 201 168, Lonocsty 318 356 328 1002, Beckman 174 172 188, O. Flamoe 308 360 355 1028, D. Wardrobe 124 223 167, Currin 290 413 328 1031, Geltz 180 152 170, Lonocsty 191 145 172, Burr 371 297 342 1010

The Pre-Lenten Dance The last dance to be held in Genevieve before Lent, was given Tuesday night, February 16, by the Genevieve High School. Allie's orchestra furnished the music and everyone present enjoyed a fine time.

The money taken in at this dance was reported to the Athletic association.

PUBLIC SCHOOL NOTES OF MUCH INTEREST

On Friday afternoon of this week the school will give patriotic exercises in the different rooms. This date is chosen to combine the birthdays of Washington and Lincoln. The program in the high school is in charge of a committee. Talks and poems in honor of both Lincoln and Washington will be given.

It has become a common practice in the high school to employ news writing in some form. The Genevieve High school publishes a monthly paper. This paper is not printed, but is mimeographed instead. In one way this is a disadvantage as the paper cannot look as "newspaperly." The advantage lies in the fact that the actual experience of putting the paper out is given to the students. The Clarion will appear again in a short time.

Seventh and Eighth Grades To determine what pupil will represent the class at a preliminary spelling contest which will occur here at our school Friday, March 12, each class in our room is having a spelling match every Friday afternoon. Sides or teams have been chosen in each class and the contestants will be announced as captains of the seventh grade teams and Arthur Flomer and Lela Castle acting as captains of the eighth grade teams. In the spelling matches held last Friday afternoon the team of which Ida is captain missed about 100 words of words. Possibly they gained some inspiration from their captain, who has not misspelled a word in any spelling lesson or spelling test given this term of school.

Fifth and Sixth Grades The pupils in this room have begun to prepare for the spelling contest which is to be held soon. The fifth graders have a spelling contest every day as a part of their regular lesson. This is to determine which pupil is the best speller as only one pupil from each grade is allowed to take part in the final contest.

The pupils of the fifth grade have finished their geography and have begun to study hygiene instead. The sixth grade had a very interesting debate in language last Friday.

Third and Fourth Grades St. Valentine's day was observed in our room last Friday by distributing the valentines from our valentine box, in which there were a great many very pretty ones. We had a spelling match last Friday, the third grade standing the fourth grade and spelling third grade words. The third graders won.

We are planning a short program, to be given Friday afternoon in memory of Washington and Lincoln. Jeanette Rader was absent from school Tuesday on account of illness.

First and Second Grades Friday the valentine box was opened and the many valentines distributed. A postman and two helpers were appointed to distribute them. Each child received many pretty valentines. The second grade pupils are busy this week memorizing "America" and "The Flag."

The first grade is working on a dramatization of "The Bremen Band." The ladies aid of the Congregational church will meet at the home of Mrs. W. R. Hickman on Wednesday, February 24. Mrs. W. E. English will assist Mrs. Hickman in entertaining. All members are urged to be present.

The widow of a field marshal of the British army is entitled to a life pension of \$1,600 a year.

FRIDAY, FEBRUARY 19, 1926

**Victor Shawe Honored**

Friends of Victor Shawe will be pleased to learn that he has received the appointment of secretary to Governor C. C. Moore of Idaho and has entered upon his duties. Mr. Shawe recently purchased a home in Boise where he and his family are now living.

Readers of the Saturday evening Post are familiar with Mr. Shawe's stories, which appear in that publication from time to time.

**Has Issued Flower Catalogue**

The News has just finished and delivered 500 flower and seed catalogues to T. H. Herman, advertising Her- man's Hardy Gardens.

Mr. Herman has worked up a nice trade in the plant, bulb and seed business and his territory is gradually extending until he now covers many of the near-by towns where he sells many thousands of plants annually.

It is not necessary to go out of town to get your flower or vegetable plants or seeds. Herman handles all kinds and will be glad to get you any particular variety he may not have on hand.

Get one of his catalogues and look it over.

**Another Sign of Spring**

A story is being circulated that a gasoline shortage is in sight and that the price will advance.

**We Should Worry!**

The astonishing word comes from London that "the earth is constantly growing hotter and in some 30,000,000 to 50,000,000 years it will liquify completely." Maybe that accounts for the present warm weather we have been having in the Genesee section so far this winter; who can tell? Anyway, at the finish of this time the learned professor, who is so long on figures, says that because of the earth's crust becomes hotter it will eventually cause the continents to "crack" and will sink into a submerged beneath molten lava.

Just how the learned gentleman arrived at the conclusion that only one-tenth of the world's crust would be spared is problematical—but he must have worked it out in fractions or he wouldn't have had any left.

**Idaho Legion Still In Lead**

The state of Idaho is still in the lead for the national membership trophy which is to be awarded the department having the highest percentage of its 1925 membership renewed by March 1, according to Lester F. Albert, department adjutant.

Latest reports from national headquarters indicate very little change in the relative standing of the leading contestants for this cup. Idaho, with a percentage of 73, is followed by West Virginia with 64 per cent, Kansas with 63 per cent and Florida with 62 per cent. As leaders swing into the final stretch, they are bending every effort to place their state at the head of the list, as it is an honor eagerly sought by the department.

**Christian Endeavor Rally**

Eleven members of the C. E. Society of the Congregational church, accompanied by Guy Wicks, drove to Moscow, Saturday, February 13, to attend a district rally of the Christian Endeavors.

Meetings were held at the U. of I. auditorium and the Presbyterian church. The young people reported a fine time.

After attending an enjoyable and profitable meeting a banquet was served for them.

The C. E. wishes to thank R. E. Emmett and Al Mayer for the use of their cars for the trip.

**At the "3 C." Food Sale**

Dicus' drug store, February 20, you can buy chickens, cake and candy. 25-12

**CHURCH NOTICES**

**St. John's Lutheran Church**  
Rev. A. F. Wolff, Pastor  
Sunday school at 9:30 a. m.  
English services will be held each Sunday morning at 10 o'clock with the exception of the first Sunday of each month, when German services will be held at the usual hour.

**Christian Church**  
N. E. Beach, Pastor  
Bible school at 9:45.  
Preaching at 11 a. m. Subject, "Sunrise, Noon, Sunset"—a meditation sermon.  
C. E. at 6:30 p. m. All young people invited. Elvin Hampton, leader.

This society had 21 delegates to hear Dr. Ira Landrich at Lewiston Sunday morning. The lecture was greatly enjoyed as well as the social and lunch which was given by the Lewiston society to all visiting delegates.

At 7:30 Sunday evening the sermon subject will be, "Gossip, Dancing and Card Playing—Is it Worth the Worth?" The young people had a jolly time at the Valentine party Saturday evening.

The kitchen shower Tuesday evening was a success in every way. Many useful articles were received, and the program was voted the best of its kind by the large and appreciative audience.

Edward Roderick and Al. Springer donated cupboards and table for the kitchen, the lumber having been given by the Standard Lumber company.

**Congregational Church**  
Paul W. Sprague, Preacher  
Mrs. W. M. Herman, organist.  
W. E. English, choir director.  
Sunday school, 9:45 a. m. Mrs. Arthur Hampton, superintendent.  
Morning worship, 11 o'clock.  
Young people's meeting, 7 p. m.

**"Genesee on the Map"**

Saturday two cars went to Moscow containing delegates to the rally held there, from the Congregational Senior Endeavor. There were 12 delegates from the Endeavor alone, besides the church. There would have been more had it not been for illness preventing one of the cars from going and was the cause of several having to remain at home. But even at that the Endeavor will be well represented at the Whitman-Latah rally which will be installed for the Congregational church here some time soon.

The honored guests at the rally were Miss Louella S. Dyer, national field secretary for the Christian Endeavor of America, and Dr. Ira Landrich.

Miss Dyer was surprised to see such a large group from Genesee. She said "Genesee is here," and Rev. Snoddy of the Presbyterian church at Moscow said "Genesee is always here."

Some time soon a group of pleased officers from Moscow are coming over to visit and help us put on a real meeting, but as yet no date has been set.

Don't forget Endeavor Sunday night at 7 o'clock. Pearl Perkins is the leader. Everybody come and help us enjoy the meeting.

**So It's Not Reformed**

It is the young who want to reform the world, but don't know how; and it is the old who know how, but are too indifferent to do it.—Exchange.

**Will Give Play**

The Congregational church announces that they will give a play on Friday night, April 9—the Friday evening following Easter Sunday. The best local talent will be in the cast and the best singers in the town will take part.

**Will Give Play**

**A NESTEGG IS WORTH WHILE**

No one ever regretted that he saved his money. A bank book showing a credit, whether it be a few dollars or a fortune, is one of the most satisfactory things in the world to possess. It bears evidence of a will to succeed and is the finest kind of passport to success.

Start now to save something each week—even if it's only the smallest amount. Interest at 4 per cent insures its growth and you'll be amazed how swiftly it increases.

**First Bank of Genesee**  
A. E. CLARKE, Pres. N. S. VOLLMER-HOPKINS, V. P.  
C. P. WHALEN, Cashier

**Rebekahs Install**

At the regular meeting of the Rebekah lodge, held Wednesday evening of this week, the following officers were installed for the ensuing term:

Ruth Martinson, noble grand; Irene Muttley, vice grand; Lulu English, recording secretary; Metta Herman, financial secretary; Sarah Mochel, treasurer; Anna Hanson, R. S. to N. G.; Ruth Perkins, L. S. to W. G.; Ethel Anderson, R. S. to V. G.; Lillian Hardman, L. S. to V. G.; Katherine Steltz, chaplain; Ruby Osmundson, warden; Helen Sanford, conductor; Gertrude Sampson, inside guard; Maurine Swanson, outside guard; Edith Smylie, musician.

**Linger Longers Entertained**

The Linger Longers were pleasantly entertained at the home of Mrs. T. H. Herman on Wednesday, February 17. Everyone had a very enjoyable time. The invited guests were Mrs. Doreen Springer, Mrs. Clyde Meyer, Mrs. Elmer Vanouck, Mrs. W. M. Herman, Mrs. Harold Haymond, Mrs. Nellie Haymond, Mrs. Walter Kleweno and Mrs. C. E. Vandenberg of Palouse, Wash.

**Will Give St. Pat Party**

The Pythian Sisters have announced that they will give their annual St. Patrick's party on the evening of that notable day. They ask that you mark the date on your calendar and reserve it.

**3 C. Food Sale**

Cake, candy, chickens—at Dicus' drug store, February 20, 2 p. m. 33-1x

**Dr. Levitt will be out of town Monday, February 22. The dental office will be open for telephone calls and appointments. 34-1**

**Please Return Our Harness Oiler Herman's**

**FORGET YOUR FEET**

There's no need of forcing your feet on your mind. You can gain freedom through the use of Nyal's Esem Foot Powder. It will prevent all foot troubles if applied in time and will afford relief if used after the suffering begins.

There's a world of foot comfort in one 25-cent package.

**Emmett & Boliou**

**River Power**

ALTHOUGH the lower Spokane falls have been harnessed for 35 years, the upper falls were not developed by this company until 1922. A diversion dam with gates was built to direct the water through the south channel to a new power station near Post street.

One huge generator there has an installed capacity of 13,400 horsepower, which is an important industrial development along the banks of the river in the heart of Spokane. When you push the electric button in your home, store or factory you receive instant service from this and six other plants of this company.

**The Washington Water Power Co.**  
Serving 45,000 customers in sixteen counties of Washington and Idaho  
A24

**PERSONALS**

Mr. and Mrs. Isaac Isaksen left Wednesday noon for Spokane for a few days stay.

Mrs. Emery Vandenberg came over from Palouse Monday afternoon and is spending a few days here visiting relatives.

Master Don Gannon of Pullman spent a few days with his grandmother, Mrs. F. K. Bressler, the first of the week.

Mrs. D. E. Thomas returned home Sunday after spending a few days with her daughter, Miss Grace Thomas, at Lewiston.

Jack Vandenberg came over from Moscow Monday evening for a short visit with his parents, Mr. and Mrs. John Vandenberg.

Will Platt, who has been visiting relatives and friends here for the past several weeks, returned to his home on Salmon river last Thursday. Mr. Platt's little son, Morley, accompanied him home.

Mr. and Mrs. John Geselchen arrived home Wednesday afternoon from a several weeks' overland trip to California points. Mr. Geselchen says the roads are in fine condition and that he drove Henry home all the way in high gear.

**Musical Entertainment**

The following musical entertainment will be given by the littlest pupils of Mrs. Wm. Hordeemann, in the Genesee Hotel theater, Thursday night, February 25, commencing at 8 o'clock.

Opening—Dancing School, M. Arnold  
Welcome by Helen Beach

Whatever kind of a roast you have in mind for dinner, you will find us able to supply it from our ample assortment of high quality meats.  
Phone your orders and we will deliver promptly.  
Prompt Attention Phone 33-1

**Pine Grove News**

Mr. and Mrs. Wm. Freeburn  
Clayton Hume spent Thursday night with Marguerite Spurbuck.

A play, "Deacon Dubbs," will be given at the Pine Grove school house, Friday night, February 26, at 8 o'clock, unless otherwise notified in next week's paper, as one of the characters is now ill. Watch next week's paper!

A valentine box was enjoyed Friday afternoon by the pupils of the Pine Grove school. After the valentines were distributed Mrs. Roy Sweet treated the school to valentines in the shape of cookies, which pleased the taste as well as the eye.

The community supper was well attended Saturday, there being about 50 present. The school room and tables were beautifully decorated with hearts and keyholes. A large birthday cake, covered with candy hearts, was served in honor of the club's fifth anniversary. A valentine grab box and stunts were enjoyed after supper.

**Grey Eagle News**

Mrs. O. W. Harms is on the sick list this week.

Matt and George Wahl were Lewiston visitors Saturday.

Mrs. Eli Morgan was a business visitor at Lewiston Saturday.

Leonard Dochester left Tuesday for the Salmon river country.

Robert Parks went to Lewiston Friday and had his tonsils removed.

Jake Herman helped with butchering at Chas. Schooler's Tuesday.

Mr. and Mrs. Pledger of Lewiston are visiting at the Chas. Schooler home.

A number of the children were absent from school this week on account of illness.

Mr. and Mrs. Theo. Ingle and Lester Ingle have been quite ill but are now improving.

Fred Smith and wife and baby of Klamath Falls, Oregon, have been visiting at the Lester Gray home this week.

**Bimrock News**

The Archibald boys have a new Studebaker sedan.

The children of the Ingle school had a valentine box Monday.

Some baby chicks were hatched on the Romrock the twelfth of February.

Mrs. Barkley attended the teachers' meeting held in Lewiston Friday and Saturday.

Erma and Araminta Dallasego spent the week-end at the W. J. Baumgartner home.

Mr. and Mrs. Barney Meyer and Le Vern and Geraldine have been visiting Mr. Meyer's mother, Mrs. J. W. Morris, at Medical Lake.

Mr. and Mrs. W. J. Baumgartner had as guests Sunday Mr. and Mrs. Peter Dallasego, Mr. and Mrs. Martin Alberg, Jam. Archibald, Erma and Araminta Dallasego.

**Entertained Card Club**

Mrs. Frank Hoorman delightfully entertained the Card club at her pretty home on Tuesday afternoon, when pleasant conversation followed at seven tables. The honors of the afternoon were won by Mrs. W. W. Burr and the consolation was given to Mrs. Ray Edwards.

Besides club members the invited guests present were Mrs. M. E. Mush- litz, Mrs. Gibson, Mrs. Christenson, Mrs. E. W. Vanouck, Mrs. Arthur Springer, Mrs. Harry Schooler, Mrs. Geo. Post, Mrs. T. H. Herman, Mrs. Clyde Meyer, Mrs. Ray Edwards, Mrs. Mahlon Follett, Mrs. V. A. Beckman, Mrs. Carl Erikson, Mrs. Harold Haymond, and Mrs. Roy Evans.

The next meeting of the club will be with Mrs. Fred Nagel on March 2.

**Progressives Entertained**

The Progressive club spent a very pleasant afternoon at the home of Mrs. F. S. Casbolt, Thursday, February 11. The time was spent with work and social conversation. At 5 o'clock a delicious luncheon was served by the hostess, assisted by her daughter, Kathryn.

The next meeting of the club will be at the home of Mrs. Glenn Sampson at a 1 o'clock luncheon.

**MORSCHHECK BROTHERS**

**River Power**

ALTHOUGH the lower Spokane falls have been harnessed for 35 years, the upper falls were not developed by this company until 1922. A diversion dam with gates was built to direct the water through the south channel to a new power station near Post street.

One huge generator there has an installed capacity of 13,400 horsepower, which is an important industrial development along the banks of the river in the heart of Spokane. When you push the electric button in your home, store or factory you receive instant service from this and six other plants of this company.

figure out how to trail this man Buck, and get the secret of the topaz. Then all will be clear sailing."

He pondered, and said: "Mary, you rest here tonight—but I am going to take the trail of Buck—this very night."

In the days when statements are so large an extent the basis of credit extensions, it is well to pause and consider the causes making for false financial statements.

The first is the deliberate intent to defraud creditors. A certain percentage, fortunately small, of human beings are criminally inclined, and until we discover a more effective method of treating such individuals nothing but the full penalty of the law must be applied.

The second motive is the fear of losing a large sum of money. Next to the greater number of false financial statements find their origin in this motive. Most false statements are issued not with the purpose of defrauding but with a view to obtaining credits essential to the continuance of the business.

Who is to blame for this condition? To some extent, the merchant, but to quite a degree, credit men themselves are to blame because of lack of discretion on their part.

Admitted that profits are the life of business, absence of profits, or even a loss, does not necessarily mean the death of a business. Credit men have been so imbued with the idea that profits are essential that they frown and look askance at a merchant who does not show a gain.

Problem of Forester Part of Forester's Job UNIVERSITY OF IDAHO, Moscow.

By application of scientific management to forest areas, the Idaho lumber industry could be increased by 50 per cent and yet made permanent, although even in the Gem state, new is being cut faster than it is growing.

These minor wood-using industries, the speaker pointed out, "employ much more labor in proportion to the wood consumed than does the manufacture of lumber, as the latter is accomplished by power machinery and the relatively small amount of man power is necessary. On the other hand a large amount of hand labor is required in the manufacture of wood-articles. France, for example, a country whose forest area is not much greater than that of Idaho, employs more than 700,000 people in her minor wood-using industries, not to mention the people employed in the manufacture of lumber, paper pulp, and the naval stores.

These minor wood-using industries, the speaker pointed out, "employ much more labor in proportion to the wood consumed than does the manufacture of lumber, as the latter is accomplished by power machinery and the relatively small amount of man power is necessary. Who Is Responsible for the False Financial Statements

By SAMUEL BERTCHER

Observation has taught the customer to realize all this. Debtors have been so educated to the whim of the credit men in this respect that by several years and had established a good credit. When the statement came in showing this low credit man who had been extending the largest line of credit decided to "pull out."

The first is the deliberate intent to defraud creditors. A certain percentage, fortunately small, of human beings are criminally inclined, and until we discover a more effective method of treating such individuals nothing but the full penalty of the law must be applied.

The second motive is the fear of losing a large sum of money. Next to the greater number of false financial statements find their origin in this motive. Most false statements are issued not with the purpose of defrauding but with a view to obtaining credits essential to the continuance of the business.

Who is to blame for this condition? To some extent, the merchant, but to quite a degree, credit men themselves are to blame because of lack of discretion on their part.

Admitted that profits are the life of business, absence of profits, or even a loss, does not necessarily mean the death of a business. Credit men have been so imbued with the idea that profits are essential that they frown and look askance at a merchant who does not show a gain.

Washington's Birthday

I am sure "the father of his country" would be most astonished if he were to know how often his birthday is made the "rison d'être" for all sorts of parties and entertainments.

Certainly February 22 is one of the most popular dates in the social calendar. There are fancy dress affairs allowing one to wear hair becoming powder and wigs, and giving the men a chance to wear scarlet satin breeches and sky blue coats if they choose, with lace ruffles at throat and wrists and a general display of gorgeousness.

Perhaps the chance to wear a sword is the attraction with more men than the opportunity for bright clothes.

Invitations for a February 22 party might read something like this: Help us celebrate with fun. The birthday of George Washington.

They might be printed on cards cut like a cocked hat, or decorated with little flags.

Finishing the Army. A good game to start the party with would be finding the Continental Army. A box or little lead continental soldiers, each with a card attached telling whether he is a general, colonel, private, etc., are hidden all about one of the rooms.

Who gets the alarm before the Battle of Lexington? 12. What British general surrendered to Washington? Washington's Birthday Cake.

A very decorative cake for such a party is made by creaming together one more often than in that word, beating well 4 eggs and adding them. Then mix and sift 2 1/2 teaspoons of baking powder, 1/8 level teaspoon of salt, 2 1/2 cups of sifted flour, and add them alternately with 3/4 cup milk, a little at a time, to the other mix.

Chopping the Cherry Tree A variation of the old donkey's tail game is played by pinning on the wall a sheet with a cherry tree painted on it, and letting the blindfolded guests pin their paper hats on the tree.

Give consideration to the statement which shows a loss. All is not gold that glitters!

THIS LUCY STONE LEAGUER IS A "MA"

Miss Elsie Hill, militant feminist, chairman of the executive council of the national women's party and strong advocate of the equality of the sexes, even to marriage without any change in the name of the woman in the contract, recently, according to a telegram received by her sister, Mrs. Helen Hill Weed of Wilson Point, South Norwalk, Conn., says the New York World because the mother of a six-pound daughter at the Columbian Hospital for Women's Washington, D. C.

Miss Hill was married on Christmas eve, 1921, to Professor Albert Levitt, and started teaching and her women friends by declaring that while she would take the professor she wouldn't take his name.

So she remained Elsie Hill, and while the child will be known as Elsie Hill Levitt, her mother will still be Elsie Hill. The latter is a Vassar graduate and a daughter of the late Ebenezer J. Hill of Norwalk, Conn., who for 20 years was a member of congress.

The daughter inherited her father's penchant for politics, and for years has been a leading figure in the fight for equal rights for men and women. She went to jail with others of her sex for picketing the White House during the Wilson administration. Her marriage to Professor Levitt was in secret. After the ceremony

she resumed her political work and her husband returned to his instruction in the law school of the University of North Dakota at Fargo, N. D.

The bride declared she had established too great an enviable reputation as Elsie Hill to have it merged by marriage. She and her husband lived apart until the following June, when they met and spent a vacation at the country home of Miss Hill at Rocklet, Conn.

Eugene H. Bramhall, who has served as Idaho state bacteriologist for two years, resigned February 1 to assume a similar position in Utah, with headquarters at Salt Lake City. Bramhall graduated from the University of Idaho in 1923 and was an assistant in the University laboratory during that summer. Charles C. Prosty, assistant University bacteriologist, will act in Mr. Bramhall's place at Boise until a successor is appointed.

Electric Plow An electric plow, operated by an electric motor and not requiring an attendant, is being experimented with at the College of Agriculture, Ames, Iowa.

Salvador Reduces Consular Fees The consular fee for certifying bills of lading to Salvador has been changed from \$10 per set to \$1 gold per set for each \$500 or fraction thereof, of the value of the merchandise as shown by the consular invoice, but in no case shall the fee exceed \$10, by a decree effective November 30, 1925, according to information from Consul W. J. McArthur, San Salvador, distributed by the Foreign Tariffs Division of the Bureau of Foreign and Domestic Commerce. This change is due to protests from small importers against the former fee of \$10 irrespective of the quantity or value of the goods.

I. U. Leases Land for Reclamation Research

The leasing of 50 acres of land from H. C. Helm, of Caldwell, on which to conduct research in reclamation of alkali lands, has been announced by the college of agriculture of the University of Idaho. The lease is for five years with the provision that it may be renewed for another five years.

J. C. Marr, who has been making irrigation investigations for the United States department of agriculture for 15 years, will devote his entire time to the project as a representative of the U. S. D. A. division of agricultural engineering. The University departments of agricultural engineering, agricultural chemistry, and agronomy will cooperate in the investigation.

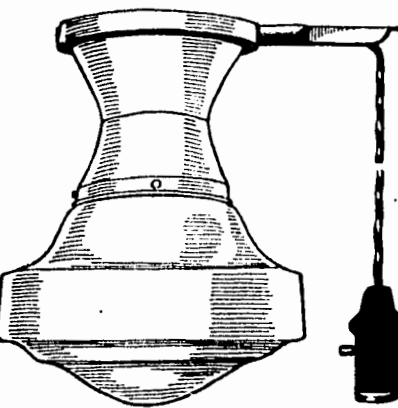

It has been found through investigation that certain types of soils impregnated with black alkali are very difficult to bring back into profitable production after drainage. There is a lack of this soil in Idaho but quantities are found in the Payette and Boise valleys and in the Gem irrigation district.

Preliminary work on the Caldwell tract has been under way for a year.

YOUR LAST CHANCE PAY NOTHING DOWN FOR PERFECT ILLUMINATION IN YOUR KITCHEN

Step into the kitchen this evening — turn on the light, then look around.

Is it dimly lighted? Are the corners dark and shadowy?

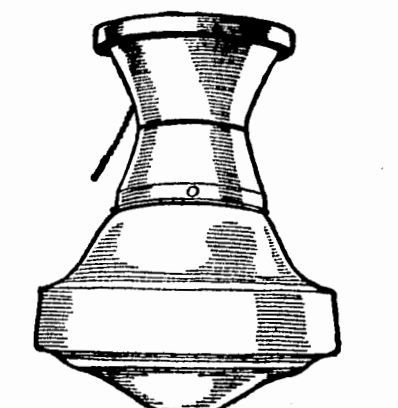

It was just for such kitchens as yours and most of your friends' and neighbors' kitchens, too, that these new Daylite Kitchen Units were designed.

For just a few more days these attractive, all-white lighting fixtures will be installed in your kitchen without any down payment — just pay for this unit at the rate of 75 cents a month with your light bill.

This picture shows the Daylite Kitchen Unit completely installed, including convenience outlet and switch, at—

\$8.50

Nothing down—Just pay for it at the rate of 75c a month with your light bill.

This is the new Daylite Kitchen Unit installed complete, without convenience outlet and switch, at—

\$7.50

Not one cent down—76c a month with your light bill.

SALE

\$18 Westinghouse Electric Waffle Irons Going at - - \$11.85

85c Down --- and \$1.00 a month with your light bill

Waffles cooked in a Westinghouse Electric Waffle Iron have a deliciousness all their own.

Especially for February, "Waffle month," we secured a large quantity of these attractively designed waffle irons to sell at a low price.

Just as pictured—open and close automatically when handle is lifted and lowered—complete with long connection cord and handy tray. While the supply lasts these regular \$18.00 Westinghouse Electric Waffle Irons will sell at— \$11.85

The Washington Water Power Co.

Save the Old Roads Twenty-three thousand miles of highway were built to grade, or surfaced on state systems in 1924, according to Bureau of Public Roads of the U. S. department of Agriculture.

With new surveys being added to the state systems yearly and with maintenance bills mounting on our present road systems, it is highly essential that old macadam and gravel roads be salvaged by applying a waterproof surface which will utilize the material already compacted by years of travel.

Michigan has successfully saved some of its main traveling highways by applying an asphaltic wearing surface which can be built up as time and traffic conditions require, thus saving practically the whole road investment.

Lauds W. W. P. Co. January 8, the Washington Water Power Company made voluntary rate reductions affecting light and power consumers of 16 counties in Idaho and Washington. These reductions will aggregate more than \$200,000 annually.

The rate reduction was entirely voluntary on the part of the company which, through operating economies and the wide spread use of electricity in the territory it serves, as well as because of confidence in the territory.

The Weather and the Roads While the weather has been warm here during the past week, there has been a mixture that would suit the most exacting as to weather conditions.

Card Party Success The last card party before the Lenten season was held in the K. C. hall Monday night, given by the ladies of St. Mary's church.

Read 'Em Out Loud! Now that the United States has tentatively entered the world court, this is the tribunal before which any case involving America will come.

WEDNESDAY'S MARKETS Table with columns for Wheat, Hogs, Produce, Eggs, etc.

SUMMONS In the District Court of the Second Judicial District of the State of Idaho, in and for the County of Latah.

Zena Trowbridge Collins, Plaintiff, vs. W. W. Baker, William W. Baker, L. D. Woodard, Mrs. L. D. Woodard, his wife, S. C. Rosenberg, Mrs. S. C. Rosenberg, his wife, Samuel C. Rosenberg, S. C. Rosenberg, Eliza Jane Garrison, Fred Garrison, Lillian Martin, Jessie Nizer and T. D. Woodard, being all of the heirs at law of Joseph M. Garrison, deceased; C. A. Gilbert and Mrs. C. A. Gilbert, also all of the unknown owners of or claimants to Lots Seven (7) and Eight (8) and Twelve and one-half (12 1/2) feet off the North side of Lot Six (6), Block Seven (7) of Park Addition to the Town of Moscow, Idaho, according to the recorded plat thereof, all in Moscow, Idaho, Defendants.

The State of Idaho Sends Greeting to W. W. Baker, William W. Baker, L. D. Woodard, Mrs. L. D. Woodard, his wife, S. C. Rosenberg, Mrs. S. C. Rosenberg, his wife, Samuel C. Rosenberg, S. C. Rosenberg, Eliza Jane Garrison, Fred Garrison, Lillian Martin, Jessie Nizer and T. D. Woodard, being all of the heirs at law of Joseph M. Garrison, deceased; C. A. Gilbert and Mrs. C. A. Gilbert, also all of the unknown owners of or claimants to Lots Seven (7) and Eight (8) and Twelve and one-half (12 1/2) feet off the North side of Lot Six (6), Block Seven (7) of Park Addition to the Town of Moscow, Idaho, according to the recorded plat thereof, all in Moscow, Idaho, Defendants.

The complainant avers that the plaintiff is the owner in fee, and in the possession of, and entitled to the possession of the said premises, and that the defendants, without right, claim some title or interest therein, adverse to plaintiff.

That the prayer of the complaint is that the defendant be adjudged to convey to the plaintiff the premises described in the complaint, and that the plaintiff have her title quieted as her sole separate property and estate.

That it be further ordered, adjudged and decreed that the defendant be and is adjudged to pay to the plaintiff the costs and expenses of this action, and that the plaintiff have her title quieted as her sole separate property and estate.

That the defendant, Samuel C. Rosenberg, and the defendant, S. Rosenberg, were and are one and the same identical person.

That the person mentioned in the complaint as Arthur J. Hollingsberg and the person mentioned in the complaint as Joseph M. Garrison, were and are one and the same identical person.

That it be further ordered, adjudged and decreed that certain mortgage dated June 1, 1892, and recorded in Book 11 of Real Mortgages at page 40 of the records of Real Mortgages of Latah County, State of Idaho, together with the debt thereby secured, has been fully paid, satisfied and discharged, other than of record.

That certain real mortgage dated June 1, 1892, and recorded in Book 12 of Real Mortgages at page 557 of the records of Real Mortgages of Latah County, Idaho, together with the debt thereby secured, has been fully paid, satisfied and discharged, other than of record, and that the assignment of the said two mentioned mortgages to Joseph M. Garrison, for the purpose of full payment of them, and each of them;

That it be further decreed that the defendants, C. A. Gilbert and Mrs. C. A. Gilbert, were and are one and the same identical person.

And you are hereby directed to appear and answer the said complaint within 30 days of the service of this summons, if served within said Judicial District, and within forty days if served elsewhere. And you are further notified that unless you so appear and answer said complaint within the time herein specified, the plaintiff will take judgment against you as prayed in said complaint.

Witness my hand and the seal of the District Court of the Second Judicial District of the State of Idaho, in and for Latah County, this 8th day of December, A. D. 1925.

Hall's Catarrh Medicine Those who are in a "run-down" condition will notice that Catarrh bothers them much more than they are in good health. This fact proves that Catarrh is influenced by constitutional weakness. Combined Treatment MEDICINE is a cure and has been successful in the treatment of Catarrh for over forty years. Sold by all Druggists. F. J. Cheney & Co., Toledo, Ohio.

FUNERAL OF JOHN LORANG HELD MONDAY MORNING

The funeral of John Lorang, whose sudden death was chronicled last week, was held from St. Mary's Catholic church on Monday, February 22, at 10 o'clock, with a solemn requiem high mass, conducted by Rev. Father Gotschalk, assisted by Rev. Father Gordon of Clarkston, Wash., and Rev. Father Wurtzberger of Moscow, with interment in the family plot in St. Mary's cemetery. The day of his being placed in his final resting place was his birthday anniversary, at which time he would have been 68 years of age, had he survived.

John Lorang was born on a farm near Johnsonburg, Wisconsin, February 22, 1858, where he spent his early childhood. At the age of about 17 he went to the lumber works in Wisconsin and Michigan. Through hard manual labor and thrift, he succeeded in accumulating, during the following few years, what was considered at that time a small fortune—a few hundred dollars.

On February 19, 1884, he married Mary Anna Geselchen, and two weeks later Mr. and Mrs. Lorang started on their journey west on one of the first immigrant trains across the Rocky mountains to the state of Washington. Upon arrival at Riparian, Washington, their trip was continued by boat to Lewiston, Idaho, and from there by wagon to Colton, Washington, where they arrived on March 21 of the same year.

Several years ago the writer of this sketch suggested to Mr. Lorang that if he wished to leave an unperishable monument to his memory, as well as to leave something of a most educational value to present and future generations, that the eggs of our state birds would be a fine idea if he would leave, by will, his entire collection of curios to the State University of Idaho at Moscow. He said he had been giving much consideration to that suggestion, already, but whether this was carried out the writer does not know.

Among the larger divisions of Mr. Lorang's collection, mention may be made of the eggs of numerous birds from the entire world, and including the humming bird. The eggs of the mammoth ostrich and that of the smallest member of the feathered creatures were to be seen side by side, for better contrast. Not only land birds' eggs, but many of the rivers and seas were represented—and many of the birds themselves were there, as well as their nests.

In the display of coins, hundreds of rare and unique kinds, such as would be sure to stir the covetousness of any numismatist in the land, were to be seen. The collection, were most interesting.

Sea shells of vast numbers and varieties, with their delicate colorings; the shells of the coral insects as well as many other articles of intense interest to the favored visitor whose privilege it was to inspect them, but too numerous to list here, constituted objects of interest such as would cause to become an enthusiast even a man of very dull comprehension.

In Mr. Lorang's garden, or park, he had gathered and preserved for the pleasure of his friends and visitors—and all his visitors at once became his friends—several varieties of oak, hickory, ash, sycamore, bass wood or Linden, elms, nut trees, haws, persimmon, sassafras, and scores of other varieties such as grace the forests, which which are rarely to be met with in this country.

Nearly every wild shrub and flowering plant to be found within the state, and many of the unusual or rare ones only, of course—were to be seen and admired.

Mr. Lorang had made collections for and exchanged with the Smithsonian Institute many rare specimens of animals and birds. In fact, the United States government had issued special authority to Mr. Lorang to take any animal or bird anywhere at any time or in any place—well knowing that he would never abuse the privilege.

The Lorang farm is one of the show places of the Palouse country. Mr.

LOWER FOREIGN MARKETS WEAKEN DOMESTIC MARKET

The continued small European demand, together with a sharp decline in the Argentine markets was the principal weakening factor in the domestic wheat market during the week ending February 20, according to the Weekly Grain Market Review of the United States department of agriculture. Rather heavy offerings of corn, a large percentage of which still contained excessive moisture, weakened the market for corn and other feed grains.

European buyers continued to take only sufficient wheat for their immediate needs because of the slack demand for flour and the accumulation of mill offal in important consuming countries. The limited demand for wheat was particularly reflected in Argentina where prices at the principal markets declined about eight cents per bushel. While prices for most classes of United States wheat are well above an export basis, the weakness in the foreign market caused some decline in the domestic future markets.

Cash wheat did not follow the full decline in the future markets and premiums for the various classes were generally slightly higher. Receipts of spring wheat were slightly larger than for the previous week and were sufficient for the current demand.

The movement of winter wheat fell off materially during the week as the weather was less favorable and lower prices. Milling demand was more active and premiums for hard winter wheat were advanced 1/2 cent per bushel.

The market for soft winter wheat continued dull. While the decline in price practically eliminated the shipment of wheat from the Pacific Northwest to the central western markets, the supply already received has been sufficient to reduce premiums sharply. Prices of all wheats in the Pacific Northwest have declined sharply, but selling as low as \$1.47 per bushel during the week in the Portland, Oregon, market. Export demand from that territory has been small and only sales of small parcels to Europe and the Orient have been confined. The new crop is reported by exceptionally good condition in the Pacific Northwest and conditions over the wheat belt as a whole are generally favorable. Sections of the soft winter wheat belt in Ohio, Indiana, and Illinois have suffered some winter killing, particularly in the late sown fields.

The corn market was weak with wheat but the principal factor was the increased offerings, a large percentage of which were still in poor condition because of the high moisture content. The oats market was not changed materially during the week. The demand continued fairly active and while stocks were being decreasing slowly they are still sufficiently large to be depressing factors in the market. Very little improvement in the market can be expected until the stocks are reduced unless prices of other grains advance materially.

Christian Endeavorers Entertained The Christian Endeavorers of the Congregational church and Rev. Paul Sprague spent a very pleasant evening at the home of Miss Ruth Martinson last Friday evening. The rooms were very prettily decorated in honor of Washington's birthday.

The evening was spent in playing games, singing and listening to the radio. In one of the games played there was a prize to be given to the winner. The prize was a cherry pie and was awarded to James Bowker.

Let the evening a delicious lunch was served. There were thirty guests and every one reported a splendid time.

Many Attend Game Genesee was well represented at the Lewiston high school "zyx" Friday evening of last week when the Genesee high school basketball team met the Kendrick H. S. basketball team. The game resulting in a victory for the home team.

Has Fine Collection If there is one thing about another that Genesee is blessed (3) with, it is our dogs. At a nicked a head a dog catcher should be able to make good wages for some time.

Is Ill With Flu Ormond Mosman, son of Mr. and Mrs. J. W. Mosman, has been quite ill with flu during the past week.

WHAT HAPPENED HERE TWENTY YEARS AGO

Born to Mr. and Mrs. Frank Lawton, on Monday of this week, a son. Seats for the home talent play, "A Family Affair," are selling fast. The cast of characters includes Geo. McMahon, Thomas Keane, Robt. Emmett, Mrs. Thos. H. Brewer, Miss Cora Hodgins and "Carrie Nation."

W. H. Gage recently received from the St. Louis fair management a bronze medal for a box of Wolf River apples displayed at the fair.

A daughter was born to Mr. and Mrs. W. H. Gage on Saturday of last week.

Our spring like weather still continues. Grass is about so high, trees are budding and garden making—in a small way—is in progress, and it seems reasonable to believe that springtime, Gentle Annie, is here.

The marriage of Dietrich Nebelsiek and Miss Olga Gehrke took place Tuesday of this week at 11 a. m., at the German Lutheran church in this city, Rev. G. S. A. Erich officiating. The ceremony was a private one, only the immediate relatives of the contracting parties being present.

Following the ceremony the newly-married were tendered a reception at the home of the groom's parents, Mr. and Mrs. H. Nebelsiek. In the afternoon the happy couple drove to the Nebelsiek farm west of town, where they will reside, and at once began housekeeping. The same evening neighbors of the surrounding country gathered at the Nebelsiek home and made things merry until an early hour. The groom is a young man who has reached his majority in this community, is industrious, and is bound to succeed in life. The bride, the second oldest daughter of Mr. and Mrs. John E. Gehrke, has been a resident here for about three years and enjoys a very favorable acquaintance.

Electric Refrigerator The Electro-Kold household refrigerating plant, now being sold throughout the Inland Empire by the Washington Water Power company, has gained great favor in the Okanogan valley, where some 25 of the machines are in use, according to the following news story which appeared in the Brewster Herald of February 12.

"In view of the ice shortage in Brewster, Pateros and Bridgeport ice-users are investigating the Electro-Kold machines that are being installed in a number of places by the Washington Water Power company. Several of these machines are now in use in this place as well as other places and nothing but praise is given by those who have them in use."

"It is believed that twenty or more of the electric ice plants will be installed before the warm weather sets in."

"In view of the fact that spring is about here and with a very slight chance of getting natural ice, it is very likely that the Washington Water Power company will install a number of the new ice machines in the near future."

Many Attend Game Genesee was well represented at the Lewiston high school "zyx" Friday evening of last week when the Genesee high school basketball team met the Kendrick H. S. basketball team. The game resulting in a victory for the home team.

Has Fine Collection If there is one thing about another that Genesee is blessed (3) with, it is our dogs. At a nicked a head a dog catcher should be able to make good wages for some time.

Is Ill With Flu Ormond Mosman, son of Mr. and Mrs. J. W. Mosman, has been quite ill with flu during the past week.

MISS DAUGHERTY BECOMES BRIDE OF WM. HEINRICH

A quiet home wedding took place at the home of Mr. and Mrs. S. A. Daugherty on Sunday, February 21, when their daughter, La Vera M., became the bride of Wm. Heinrich.

The bride was charming in a gown of georgette of ashes of roses and carried a bouquet of pink roses and white freesias.

After the ceremony a wedding dinner was served by the bride's mother to the guests, the table being centered with a large bride's cake.

After the dinner the young couple left for an extended honeymoon trip in their car. They will be gone about a month and will visit Portland and Lebanon, Oregon, Boise, and other places along their way.

Only relatives and a few intimate friends of the family were present at the ceremony.

Mr. and Mrs. Heinrich will be at home to their friends after March 31.

"Spring" Weather Continues While a few "crepe hangers" contend that we still have plenty of time for a real cold snap and some winter weather, the possibilities are rather remote. While the weather continues warm to the north of us, there is little danger of a "long, hard winter."

Of course there is plenty of time yet for a freeze and some snow, but it is hardly probable that it will start in at this late date and give us very much of it.

Many weather has arrived considerably ahead of the date set on the calendar, for we have been having a little bit of all kinds during the past week—and some days there has been plenty of all of it. However, the grain has come through the winter in good shape thus far and if things do not change very materially for the worse, there will be a good crop here again this coming fall.

Country roads are settling and traveling is becoming easier. The highways are in good condition.

K. P. Go to Moscow Last Monday night about 20 K. P. went to Moscow to attend the K. P. doings—and an especially good time was reported by Ray, Bill and Stub. The Knights plan on going again in the near future.

All members of the K. P. lodge are asked not to forget the annual banquet, to be held in their hall tonight (Friday, February 26). This is their annual celebration of the founding of the order and is always a momentous occasion for members of that order. Reading, Lincoln's Spangley address, by G. M. Erickson. Song, "The Star Spangled Banner," by both classes.

Reading, Lincoln's Spangley address, by G. M. Erickson. Song, "Glen Vernon Bells," by room.

Quotations from "Washington's Rules of Conduct" were given by various members of the class, with Eloise Emmett acting as leader and calling upon pupils to respond with a quotation when various topics were mentioned.

His Fosters' spelling team had the fewest number of misspelled words again this week. Do not be alarmed if eighth grade pupils are found sighting over rulers or other measuring devices this week. They will, no doubt, just be estimating the height of a tree or building.

PUBLIC SCHOOL NOTES OF MUCH INTEREST

The Genesee public schools, in the private personnel of the school board, last week purchased the opera house, in which the high school will hold its basketball games, programs and dances.

Because the district already is in debt, this building could not be bought with school district funds, without holding a special bond election. This was thought inadvisable, not only because of the cost and trouble of a special election, but because the district is already bonded for \$18,000.

On first thought it may seem foolish to some that the board decided to buy this particular building. But when we stop to consider, however, that the schools must have some place to hold athletic contests and plays, and that this is the only available place, the plan, after all, seems very sensible. The rent paid for this building each year made the use of it almost prohibitive; yet, what was the school to do?

The board paid \$1350 for the building, and it will take approximately \$1,000 to equip it in good shape. The equipment will consist of a new heating system, new floor, showers, and necessary stage equipment. This will mean that more and better plays can be given, and that the young people of this community will have a place to go for good, clean, supervised recreation.

The outlying districts should be just as much interested and ready to help this undertaking along as our own district. The boys and girls who attend school in Genesee will have access to the building when the person in charge is there. The athletic teams, which Genesee is always interested in should improve, because this means a clean and wholesome place in which to play.

With the building was purchased a moving picture machine, which will be used to give good shows at opportune times.

We hope to pay for this building and equipment by popular subscription. Every person in this entire community—not only this district—is urged to contribute toward paying for this hall. This is a community affair; the entire country around Genesee will benefit, because this building will be used for the wholesome recreation of the people. Let's get behind this drive and contribute all we can.

Seventh and Eighth Grades To commemorate the birthdays of Washington and Lincoln, the seventh and eighth grade classes gave a short, impromptu program Friday afternoon which consisted of the following numbers:

Song, "The Star Spangled Banner," by both classes. Reading, Lincoln's Spangley address, by G. M. Erickson. Song, "Glen Vernon Bells," by room.

Quotations from "Washington's Rules of Conduct" were given by various members of the class, with Eloise Emmett acting as leader and calling upon pupils to respond with a quotation when various topics were mentioned.

His Fosters' spelling team had the fewest number of misspelled words again this week. Do not be alarmed if eighth grade pupils are found sighting over rulers or other measuring devices this week. They will, no doubt, just be estimating the height of a tree or building.

Fifth and Sixth Grades Michael Dwyer entered school last week, which makes our enrollment 20 now. He is in the sixth grade. Several pupils have been absent this week, due to illness. Among those absent were Arvin Norby and Hazel Craft.

## FOREIGN DEBT SETTLEMENTS

### Progress Made in Funding of Debts to United States

Debt-funding agreements providing for the funding of \$3,383,411,668.93, principal amount of obligations of foreign governments held by the United States Treasury have been concluded with the Governments of Belgium, Czechoslovakia, Estonia, Finland, Great Britain, Hungary, Italy, Latvia, Lithuania, Poland and Rumania. The following is a summary of the agreements made with each country:

**Belgium**  
The indebtedness is divided into two classes—that incurred prior to November 11, 1918, the Pre-Armistice debt, and that incurred subsequent to November 11, 1918, the Post-Armistice debt.  
(a) The amount of the Pre-Armistice debt to be funded is \$1,770,000, which is the principal amount of the obligations of Belgium received by the United States for cash advances made prior to November 11, 1918.  
(b) The amount of the Post-Armistice debt to be funded after allowing for certain cash payments made or to be made by Belgium is \$246,000,000, computed as follows:

Principal of obligations for cash advanced	\$175,420,808.68
Accrued and unpaid interest at 4 1/2% per annum to Dec. 15, 1922	\$21,441,491.56
Principal of obligations for war material sold on credit	\$29,818,923.39
Accrued and unpaid interest at 4 1/2% per annum to Dec. 15, 1922	\$41,352.24
Total indebtedness as of Dec. 15, 1922	\$223,655,592.97
Accrued interest thereon at 4 1/2% per annum from Dec. 15, 1922, to June 15, 1925	\$17,494,169.47
Total indebtedness as of June 15, 1925	\$241,149,762.44
Deduct:	
Payments on account of interest received between Dec. 15, 1922, and June 15, 1925, on obligations for war material sold on credit	\$4,442,346.30
Principal payment of \$172.01 made August 7, 1923, together with interest thereon at 8% per annum to June 15, 1925	181.58
Total	\$4,442,527.78
Net indebtedness as of June 15, 1925	\$236,707,234.66
To be paid in cash upon execution of agreement	\$1,234.66
Total indebtedness to be funded into bonds	\$235,472,599.99

For the Pre-Armistice debt thus to be funded, Belgium will issue to the United States at par bonds bearing no interest in the aggregate principal amount of \$1,770,000, dated June 15, 1925, and maturing serially on each June 15 in the succeeding years for 62 years. In her case, very liberal interest arrangements have been made. For the first five years, beginning in 1926, a flat payment of \$5,000,000 per annum will cover installments of both principal and interest. From 1930 to 1940 interest at the rate of one-eighth of one per cent will be paid. For the next 10 years the rate will be one-quarter of one per cent per annum rising by one-quarter of one per cent each ten years to 1 per cent in 1970 and to 2 per cent in 1980.

For the Post-Armistice debt Belgium will issue to the United States at par bonds in the aggregate principal amount of \$246,000,000 dated June 15, 1925, and maturing serially on each June 15 in the succeeding years for 62 years. Interest of these bonds is payable semi-annually at the rate of 3 per cent during the first 10 years and 3 1/2 per cent thereafter.

**Czechoslovakia**  
The American Commission accepted the offer of \$115,000,000 as the capital sum due as of June 15, 1925, and a funding of the debt has been agreed upon on the following terms:

(a) The principal to be paid over a period of 62 years, with interest at rates of 3 per cent for the first 10 years and 3 1/2 per cent thereafter, payable semi-annually.  
(b) During the 18 years the total annual amount to be paid is fixed at \$3,000,000 yearly, and the balance of each annuity at the above interest rates is funded over the remaining 44 years.

**Estonia**  
The amount of the indebtedness to be funded is \$12,830,000, computed as follows:

Principal amount of obligations to be funded	\$13,593,145.00
Credit allowed for sinking of the mine in Baltic Sea	1,592,522.54
Interest accrued and unpaid thereon to Dec. 15, 1922, at the rate of 4 1/2% per annum	\$12,666,222.15
Total principal and interest accrued and unpaid as of Dec. 15, 1922	\$13,831,441.88
To be paid in cash by Estonia upon execution of agreement	1,441.88
Total indebtedness to be funded into bonds	\$13,830,000.00

Estonia will issue to the United States at par as of December 15, 1922, bonds in the aggregate principal amount of \$13,830,000, dated December 15, 1922, and maturing serially on each December 15 in the succeeding years for 62 years. Interest is payable semi-annually at the rate of 3 per cent for the first 10 years and 3 1/2 per cent thereafter.

**Finland**  
The amount of the indebtedness funded, after allowing for cash payments made or to be made by Finland, is \$9,000,000, computed as follows:

Principal amount of obligations to be funded	\$8,281,926.17
Interest accrued thereon from June 30, 1919, to December 15, 1922, at the rate of 4 1/2% per annum	\$1,027,389.10
Less—Payment in cash made by Finland March 8, 1923, on account of interest	300,000.00
Total principal and interest, accrued and unpaid, as of Dec. 15, 1922	9,009,315.27
To be paid in cash by Finland, May 1, 1923	9,315.27
Total indebtedness to be funded into bonds	\$9,000,000.00

To provide for the repayment of the debt thus funded, Finland issued to the United States at par, as of December 15, 1922, bonds in the aggregate principal amount of \$9,000,000, dated December 15, 1922, and maturing serially on each December 15 in succeeding years for 62 years. Rates of interest are the same as for Estonia.

**Great Britain**  
The total amount of indebtedness funded is \$4,600,000,000, computed as follows:

Principal amount to demand obligation to be lowered	\$4,674,318,358.44
Interest accrued thereon from May 31, 1919, to December 15, 1922, at the rate of 4 1/2% per annum	\$229,336,106.99
Less—Payments made by Great Britain on 10th October and 15th November, 1922, on account of interest	\$90,000,000.00
Total	\$4,813,654,465.43
Less—Payments made by Great Britain on 10th October and 15th November, 1922, on account of interest	\$100,226,370.69
Total principal and interest, accrued and unpaid, as of Dec. 15, 1922	\$4,713,428,094.74
To be paid in cash by Great Britain, 15th March, 1923	4,128,083.74
Total indebtedness to be funded into bonds of Great Britain	\$4,609,300,011.00

Bonds in the principal amount of \$4,600,000,000 are dated December 15, 1922, and mature serially December 15 each year until 1985. Interest is fixed at 3 per cent for the

**Rumania**  
The debt-funding agreement with Rumania was only reached on December 1. Rumania's original indebtedness amounted to \$36,183,944. Interest on this amount has been calculated as in recent settlements, making the principal of the debt to be funded as of June 15, 1925, \$44,590,000. The Rumanian Government agreed to repay the principal of the funded debt over a period of 62 years with interest at 3 per cent a year for the first ten years and 3 1/2 per cent a year thereafter.

**Ratified Agreements**  
Debt funding agreements with the following countries have already been ratified by Congress: Finland, Great Britain, Hungary, Lithuania, Poland.

**Unfunded Debts**  
The following countries have reached no agreement for funding their debts to the United States: Armenia, Austria, Cuba, France, Greece, Liberia, Nicaragua, Russia, and Yugoslavia.

The total net principal amount of Armenia's obligations to the United States is \$11,959,917.49. There is no Armenian government.

Austria's obligations amount to \$24,056,708.92. The time of payment of principal and interest of the Austrian debt was extended until June 1, 1943.

Cuba's debt amounts to \$10,000,000. France's obligations amount to \$3,340,516,043.72. The

## Psychologists Solve Beverage Mystery

**Boston Tea Party, Say Students of the Mind, Laid Basis for Present Popularity of Coffee in United States**

RECENTLY published statistics show that the people of the United States are drinking more coffee than ever before in any amount that requires over twelve pounds per person per annum for its preparation. Where dwell a people of the same racial stocks and of as high a standard of living, the consumption is only one pound per person per annum. In England, where customs and standards of living are not very different from our own, the consumption per person is even less.

Why is it that the American drinks so much more coffee than the Canadian or Englishman? Because he likes it better? But why does he like it better? The palates of the citizens of all these countries are much the same. There must be something aside from the taste to account for this difference.

Way is it that the American drinks so much more coffee than the Canadian or Englishman? Because he likes it better? But why does he like it better? The palates of the citizens of all these countries are much the same. There must be something aside from the taste to account for this difference.

There is, the psychologists say, but if we are to find the answer we must turn back the pages of history 152 years.

**A Protest Against Tyranny**  
On the night of December 16, 1773, a group of Boston men, disguised as Indians, boarded the ships of the East India Company lying in Boston Harbor, and threw their cargoes of tea into the sea as a protest against the unjust taxation measures and oppression of the mother country. This—the Boston Tea Party—was one of the most dramatic of the many dramatic events leading up to the Revolution.

A few months later the Sons of Liberty, assembled in the Merchants' Exchange, New York, heard that two tea ships had arrived in the harbor—one turned away from Boston, the other coming direct from England. The Nancy, from Boston, was met by a protesting delegation; and, headed by the warning master turned out to sea. The master of the London, the other tea ship, elected to stay. His tea found a resting place in the bottom of New York Harbor.

Constant Improvements in Treating Bean  
However, the satisfaction the American of today derives from his cup of coffee is by no means dependent upon events occurring before the Revolution. Those

the indebtedness will probably be paid in cash during the present fiscal year.

Nicaragua's indebtedness, amounts to \$84,090.23. Payments are being made from time to time on account of the obligations held by the United States.

Russia's obligations amount to \$192,601,297.37. There is no government in Russia recognized by the United States.

Yugoslavia's obligations amount to \$51,037,886.39. It is expected that Yugoslavia will send to the United States in the course of the next few months a commission to negotiate a settlement, although no formal advice to this effect have as yet been received.

**BISCUITS WITH SWEET MILK OR SOUR**  
When a housewife finds herself with a tin of condensed milk, biscuits, or cake, or cookies, that calls for sour milk and soda she has only sweet milk and baking powder on hand, or vice versa, the following rule may be used for substituting, says the United States Department of Agriculture:

When proportions are given in terms of sweet milk and baking powder, an equal quantity of sour milk may be substituted and enough soda used approximately to neutralize the acid, or a scant half teaspoon for each cup of sour milk. In the case of thin watters, the acid and sour milk generally furnish enough leavening, but for thick batters or doughs baking powder is usually needed in addition.

When sweet milk is to be used in place of sour, baking powder is substituted for all of the soda in the proportion of 4 teaspoons of baking powder for 1 teaspoon of soda if no other acid ingredient such as molasses is used. If such an acid ingredient is used, as in gingerbread, some soda is required.

**Tree Witness Chinese.**  
Application from China for membership in the American Tree Association has been received at Washington from Clara Husted Wolfe and Jesse B. Wolfe, graduates of Oberlin College, who planted trees in memory of Oberlin. The applications were the first to be signed in Chinese by the witness to the tree planting.

**Try your local merchant first.**

**Tom Sharkey Tries A Come Back**  
The 1925 wheat harvest aggregated 39,500,000 metric quintals as against 38,839,390 in 1924. India's crop showed an excess of 534,320 metric quintals being 5,163,510 as against 4,629,190 metric quintals in the preceding year while the potato crop was 6,956,840 metric quintals less than in 1924 (14,645,340 metric quintals as against 15,602,180 metric quintals). Forage of all kinds has been abundant, natural meadows alone giving a

## OF INTEREST TO WOMEN

Spring brings with it the opportunity for the housewife to exercise her ingenuity in providing her household with vegetable substitutes for the ordinary meat dishes. Here, for example, is a lima bean loaf. Use one cup of dried lima beans. Put to soak over night. In the morning drain and cook in boiling water slowly until the beans are tender, but have not lost their shape. Drain them in an enameled ware colander. Melt butter and add to it one and one-half cups of bread crumbs. The crumbs should be taken from the soft part of the bread, not from the crust. Add one tablespoonful of chopped parsley and one-quarter of a teaspoonful of powdered sage; also one and one-quarter teaspoonful of salt. Beat three eggs and mix with the beans. Stir in the bread crumb mixture. Have ready an enameled ware breadpan well buttered. This will turn out quite solid and can be sliced as one would waffle loaf.

and not nearly as good preserved as the first growth. Enameled ware, because of its acid proof qualities, will not darken the color of the rhubarb, nor can it be affected by the sharp acid of the vegetable.

Here is a good dessert for the warm days of Spring. Mix four tablespoonfuls of cornstarch with a little cold milk until it is a smooth paste. Heat one quart of milk in an enameled ware double boiler, stirring in butter and into that stir two and one-half cups of bread crumbs. The crumbs should be taken from the soft part of the bread, not from the crust. Add one tablespoonful of chopped parsley and one-quarter of a teaspoonful of powdered sage; also one and one-quarter teaspoonful of salt. Beat three eggs and mix with the beans. Stir in the bread crumb mixture. Have ready an enameled ware breadpan well buttered. This will turn out quite solid and can be sliced as one would waffle loaf.

The appearance of rhubarb in her garden reminds the housewife that she must see about her enameled ware preserving kettle—the only utensil she can use in cooking rhubarb.

If the housewife means to preserve rhubarb for winter use, she should use it when it first comes out. We are all apt to think of the rhubarb at first as a fresh vegetable to be eaten at once and to leave the preserving until we have grown tired of the stewed form. The later-grown rhubarb is harder, much more acid

**STATE COLLEGE ISSUES FARM LIFE BULLETIN**  
"Some Better Things in Farm Life in Washington" is the title of a new bulletin from the experiment station press of the State College. The bulletin deals with the agricultural setting for farm life in Washington, the types of homes in the state, rural communities, rural schools, churches, and farmers' organizations.

"We are now well agreed that farm life" must be measured by the kind of homes, communities, schools, churches, farmers' organizations and opportunities for association and recreation that rural people have," says Dr. Fred R. Yoder, author of the bulletin, who visited a large number of the progressive communities in the state and gave careful study to what is going on in them.

**52,000 Farmers Write to W. S. C. During Year**  
The immense scope of the activities of the agricultural department and the extension service at the State College is shown by the fact that more than 52,000 letters a year from farmers, their wives and others interested in agriculture, are answered by them.

The extension service alone wrote more than 16,000 such letters last year, some as India, Egypt, New South Wales and other remote parts of the world. A total of 36,015 letters were answered by agricultural agents during 1925 and the extension service sent bulletins covering such subjects as home economics and agriculture to all parts of the globe.

**Old Sailor—Yes, mum, that's a man-o-war.**  
Lady—How interesting! And what is that little one just in front?  
Old Sailor—Oh, that's just a tug.  
Lady—Oh, yes, of course, tug-boat.

**Crop and General Conditions Map February 7, 1926**  
Expectation of good business this spring comes from the fact that retail trade in nearly all parts of the United States has placed large orders in advance for spring and summer merchandise. The general map shows conditions favorable for the spring trade and further improvement is expected and that activity will keep the industry under full headway.

Builders will go through at least the first six months of this year without any serious decrease. Lumber mills and many other manufacturers have heavy advance orders, and building new cottages and that activity will keep the industry under full headway.

## TUBBY

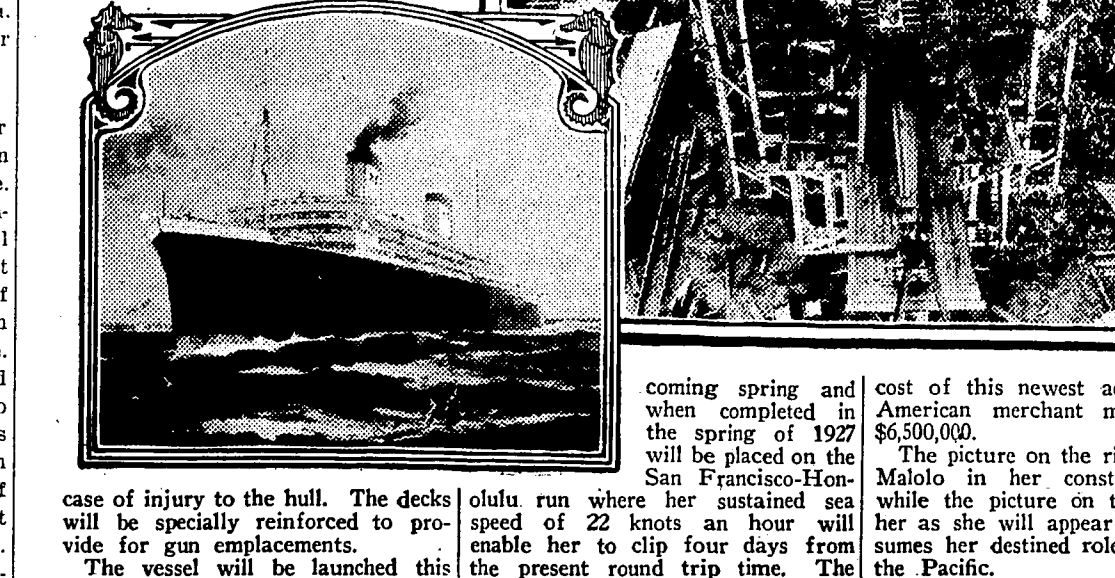

## THE BIGGEST YET

**Construction Of Giant Steamship Adds New Chapter To Annals Of U. S. Shipbuilding**

WITH a displacement of 22,000 tons, a length of 382 feet, and a beam of 83 feet, the S/S Malolo, now under construction in a Philadelphia shipyard, will be the largest and speediest high-powered passenger steamship ever built in the United States.

In the design of the Malolo all the requirements have been met for the conversion of the ship into an auxiliary cruiser or troop transport in time of national emergency. An extra number of water-tight bulkheads will be installed to provide an unusually wide margin of safety in

coming spring and when completed in the spring of 1927 will be placed on the San Francisco-Honolulu run where her sustained speed will be especially important to provide for gun placements. The vessel will be launched this

**TWO COUGAR KITTENS GIVEN TO W. S. C.**

Two cougar kittens are to be brought to the Cougar school, the State College of Washington within the next few days; real live cougars with claws and snarls and hair and everything.

The kittens were captured recently according to Dr. Glenn R. Bach, head of the Predatory Animal Control, U. S. Biological Survey of Olympia, Or. Bach visited the college of veterinar-

**Milk Products Valuable As Food for Poultry**  
The efficiency and value of milk and milk products as food for poultry is rapidly being realized, according to L. W. Casell, assistant professor of the poultry department at the State College of Washington.

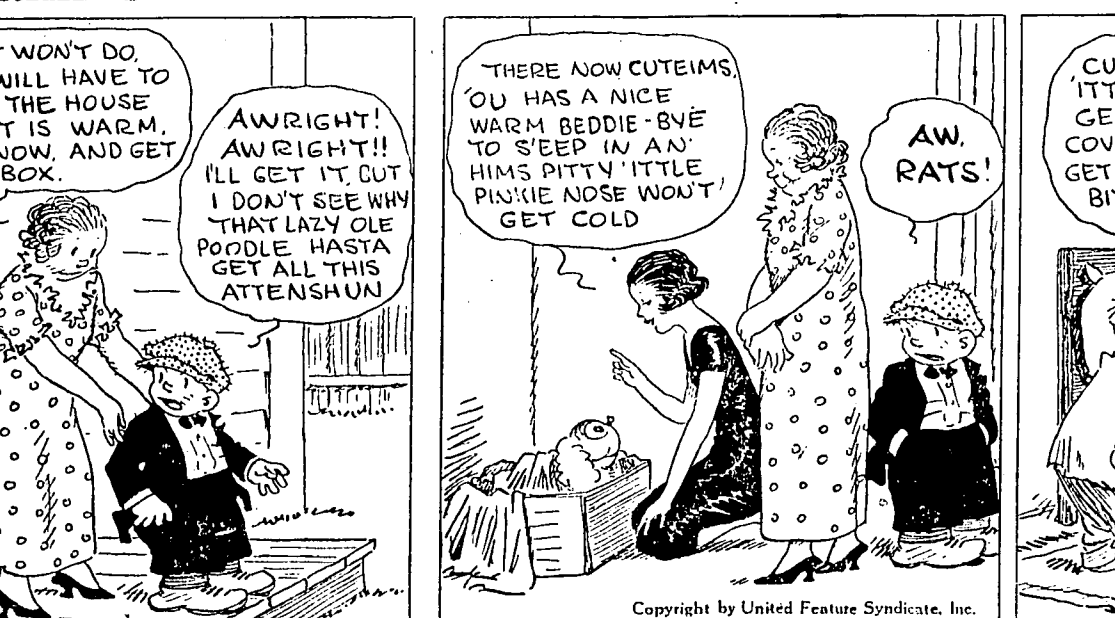

In many poultry districts where a constant and economical supply can be obtained, the poultryman can use milk in one of its commercial forms as it is sold upon the market; notably skim milk powder, dried buttermilk and condensed or semi-solid buttermilk.

It is fully appreciated by most poultrymen that the common and economical grains and by-products which are used in making up our poultry rations are poor in the essential nutrient, called protein, which is necessary for the building of tissue and muscles as well as the production of eggs. To enable the fowl to grow and lay it becomes necessary to supplement our grain rations with additional protein material and all experimental data shows that this protein material should be from an animal source to produce the most efficient production and growth.

All milk products are excellent sources for the necessary mineral elements which maintain an important relation to all vital processes and enter into the composition of tissue and fluids of the body. Vitamins which are necessary in the diet to prevent deficiency diseases are found in milk to a great extent, which means that milk and its products act as a protective food.

The rugged, stretchy, growthy, fast-growing, heavy-bodied, deep-bodied, big-type hog is best for pork-production purposes.

## Hank Comes in for Some Extra Attention. By WINNER

## Pineapple Pulp Good Feed for Dairy Cattle

Cows eat pineapple pulp with great relish and with apparently no bad effects. A preliminary test was recently conducted by E. V. Billington, head of the department of dairy husbandry at the State College, to determine the value of pineapple pulp as a source of succulence for dairy cattle.

Pineapple pulp, or bran as it is sometimes called, is a by-product of the pineapple canning industry and is composed of the cores and portions of the outer coats. During the test chemical analyses were made of samples of pineapple pulp, beet pulp, sunflower silage and corn silage.

The results of the feeding of pulp and sunflower silage seemed to indicate that there was no material effect upon the milk flow and fat production. As far as palatability was concerned the cows ate pineapple pulp with a greater relish after they had a few tastes of it. At no time during this test was there either pineapple or sunflower silage left in the manger.

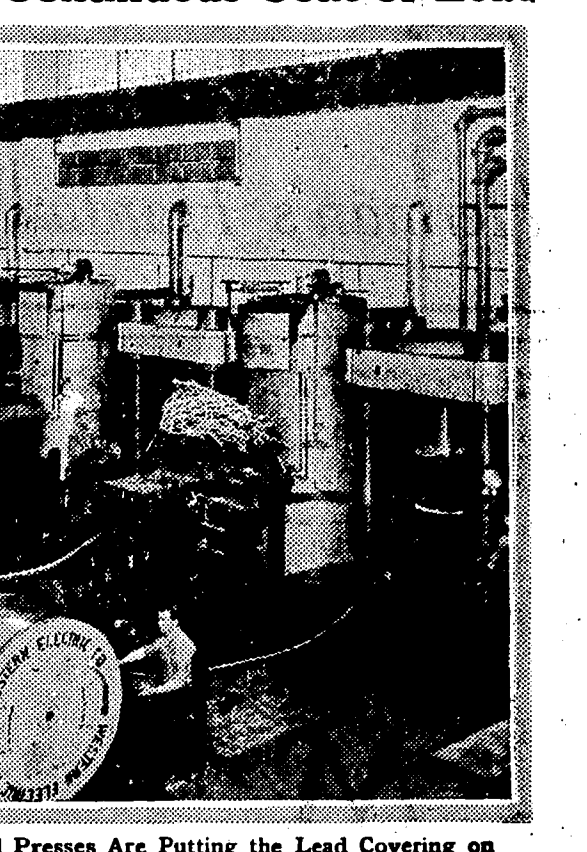

Further work is being projected with the pineapple pulp.

## Called Most Beautiful

The slowly maturing flower or lady slipper is considered by many to be not only the handsomest of the Cypripediums, but the most beautiful of all our native wild flowers, says Nature Magazine. This exquisite blossom is of the purest white with the exception of a glaucous lip that is stained with brilliant pink-purple.

The feeding of too much grain, especially corn, is very apt to cause the cows to take on flesh rapidly, and produce a sluggish condition of the system.

## Hydraulic Press Protects Cable With Continuous Coat of Lead

These Giant Lead Presses Are Putting the Lead Covering on Telephone Cable.

There is a story about an aged king who used to worry over the problem of how apples got inside apple dumplings. This is nothing compared to the problem of how telephone cable gets inside its lead covering.

There is no mystery, however, even to this question of the telephone cable of the Western Electric Company at Chicago, or the new plant at Kearny, New Jersey, just outside New York. First, of course, the core of the cable is made, first by insulating copper wires with paper and twisting them into pairs, and then by stranding the pairs together in a highly accurate and (to the outsider) a highly complicated manner.

The core is then dried in vacuum ovens heated to about 250 degrees Fahrenheit until the moisture in the paper insulation has been driven out. The presence of an appreciable amount of moisture in the paper insulation renders the cable useless.

When the core has been thoroughly dried it is put through the last manufacturing process, that of applying the lead. The sheath is composed of an alloy of lead with approximately 1% antimony, and is applied by a lead press or sheathing machine, which is essentially a machine for making lead pipe. A hydraulic press working at enormous pressure forces the sheath metal between the tapered end of a hollow core tube and a die ring, thus forming the pipe. The sheath metal temperature is about 50 degrees Fahrenheit, at which it is in a plastic state, but it is not hot enough to damage the paper on the core in the short time to which the paper may be exposed to that temperature. The end of the cable core to be covered is passed through the hollow core tube and into the pipe. The pipe fits the core snugly, and draws it through the lead press as additional pipe of sheath is extruded. The core is then protected by a continuous tube of sheath metal which must be free from cracks or other imperfections as the smallest hole through the sheath would be ruinous to the cable by allowing the entrance of moisture. The completed cable is then thoroughly cleaned, dried it is put through the last manufacturing process, that of applying the lead. The sheath is composed of an

**PERSONALS**

John Tobin a Benedic  
According to announcement, Miss Tillie Weber of Clarkston and John A. Tobin of Genesee were united in marriage at the home of the bride's mother, in Clarkston, on Thursday, February 18.  
Miss Weber is the daughter of Mrs. Barthol Weber, formerly of Uniontown and is well and favorably known in both Uniontown and Clarkston. Mr. Tobin formerly lived on the Tobin ranch, just north of town, but has been engaged in the road contracting business with his father, Jas. Tobin, for the past few years.  
The young couple left for Pasco, Wash., immediately after the ceremony where Mr. Tobin is engaged in road construction work.

The Blue Bird Club  
The Blue Bird club was very delightfully entertained Tuesday afternoon by Mrs. Chas. Odenberg at her country home north of town. The time was spent in a social way and a delicious luncheon was served by the hostess.  
The invited guests were Mrs. Dillef Smith and Mrs. Harry England.  
The next meeting will be held at the home of Mrs. Henry Hanson on March 9.

Another Sign of Spring  
Lewiston is talking of celebrating the Fourth of July.

**THE FIGHTING RANGER**

By F. J. McCONNELL and GEORGE W. PYPER  
(Copyright 1925—)

Continued from last week.

CHAPTER 30  
Double-Crossing Double Crossers

For some time past Buck McLeod had been a disgruntled man, with a growing suspicion that Taggart was ready to drop him, unrewarded for his services, the moment he had finished his use for him. His discontent had reached its apex when Taggart had elevated "Idaho Bill" to chief of the gang after their fight in the rangers' camp.

Buck returned to the room where his men were guarding the three prisoners, now securely bound and helpless. He called them all into a corner. They held a whispered consultation.

"So I hear him sayin' to her, as they goes out, 'I have a little plan,' he says, 'I have a little plan, we'll go to Pico now and talk it over.' He says, 'Buck told me, and waited to watch their reactions.'"

They all gazed stupefiedly.

"Well, boys," continued Buck, "it looks to me like he's layin' to put some raw deal over on us. See? He'll leave us here watchin' the prisoners, while he and her goes out and gets the raw deal. Then when they're alone they'll beat it, and we'll still be here watchin'. He'll leave us here watchin' till all's gone and the sheriff and a posse and we'll be the ones as gets run in, while he's got far away with everything in sight. Does you think he's playin' a square game with us?"

The men muttered expressions of distrust, mingled with oaths.

"Well, then, boys, I see you're on a mild with me," Buck went on in a low voice. "Now then, I've got a little game to go. When the pie's all 'sposin' to be done, the silest ourselves!"

"Atta boy, Buck," one of the men yelled.

"Shut up," growled Buck, pointing to the prisoners, and continued in a low voice, "An' as to watchin', I'll watch Taggart from now on. Eh, what?"

All signified their eager agreement.

"C'mon then," Buck said, "We'll take the upper trail to Pico, and get there about as soon as he does, and find out what he's gonna be up to."

The men inspected the ponds and gages of the three prisoners, tightening them up in spots, and filed out of the room.

Buck left his men at the Pico Bar to await his return while he did some spying alone. He went to Taggart's office, crept cautiously to the door, switched through the keyhole, and listened.

"We's got to act quicky," Taggart was saying.

"Why not start tonight?" Stella demanded.

"Because—because Taggart's one thing missin', Taggart replied with a shrug. "The secret of the topaz. The map is useless without that. He fondled his topaz watch charm.

"I've got the topaz itself—here," he continued. "I don't yet know how to use it. I've got to find that out first." He paused, then went on: "I have long suspected—for reasons of my own—that Buck McLeod is the man who knows the secret of the topaz. I'll see him in the morning, and make him kick in."

"And if he won't?" said Stella.

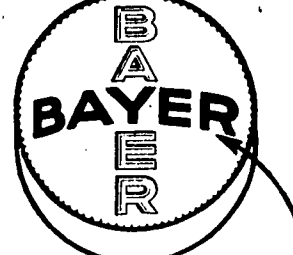

"He will," laughed Taggart. "We'll offer him a good slice of the award. We have both the map and the topaz—he has only the secret of the topaz alone—it won't pay him to keep it secret."

"But if he wants too much for it?"

**Bayer Aspirin**

**Proved Safe**

Take without Fear as Told in "Bayer" Package

**Does not affect the Heart.**

Unless you use the "Bayer Cross" on package or on tablets you are not getting the genuine Bayer Aspirin proved safe by millions and prescribed by physicians over twenty years for

Colds	Headache
Nervitis	Lumbago
Toothache	Rheumatism
Neuralgia	Rain, Pain

Each unbroken "Bayer" package contains twelve tablets cost few cents. Drugists also sell bottles of 24 and 100.

shall we do next? Since that's what he is, he'll probably have the ranch taken from us to satisfy the notes—his very friendly with Banker Dawson.

"We must find the treasure at once," said Terence. "That will save everything. It's lucky I made this copy of the map."

He pondered.

"All we need now is the secret of the topaz," he said. "And to get that, I must run down this man Buck. I'll take his trail at once—this very night. And I'm not coming back until I get my man! Just before they left—remember—Buck said something about going to Pico. Guess that's his first destination."

"We're going with you," Mary announced determinedly.

"Yes," chimed in Bud, "you can't tell—you may need help."

CHAPTER 31  
Buck Wins the First Lap.

It was past midnight. Except for Terence, Mary and Bud, riding up and down the street aimlessly, and talking in low voices, the streets of Pico were deserted. They had found no trace of Buck, nor any clue to follow.

Suddenly the street was flooded with the glare of automobile headlights.

"Look out!" cried Terence, and they pulled their horses to the edge of the road just in time to avoid being struck by the madly racing car. In the fleeting instant that the machine was passing them Terence caught a glimpse of the two tense faces in the front seat.

"Did you see who was in it?" he cried excitedly. "It was Buck, and that Montrose woman. Come, quick, we must get a car and follow."

They spurred their horses down the street, stopped at the public garage, awakened the reluctant man in charge, and hired a machine. Terence, jumping to the wheel. Mary and Bud leaped in beside him, and they sped off in the direction in which the other machine had vanished.

There was a tremendous pounding on the door of the sheriff's office.

"I've been robbed—I've been robbed," cried a voice.

The sheriff, half-dressed, came to the door. He found Taggart in an excited rage, his face white and nerve-racked.

"They broke into my house, attacked me while I slept, and robbed me," cried Taggart. "My topaz and some valuable papers are missing. They were priceless. Quick, get a posse. I think I know who it is, and I know just about where they would go."

"All right, all right—control your self, man," the sheriff answered, noting Taggart's almost hysterical excitement. "Give me time to get dressed and do some telephoning to get the posse together. Wait here."

He darted back into the house, and left Taggart in front of the door.

"Did you see who was in it?" he cried excitedly. "It was Buck, and that Montrose woman. Come, quick, we must get a car and follow."

They spurred their horses down the street, stopped at the public garage, awakened the reluctant man in charge, and hired a machine. Terence, jumping to the wheel. Mary and Bud leaped in beside him, and they sped off in the direction in which the other machine had vanished.

There was a tremendous pounding on the door of the sheriff's office.

**"DIAMOND DYES"**

COLOR THINGS NEW

Just Dip to Tint or Boil to Dye

Each 15-cent package contains directions so simple any woman can use to color in delicate shades of dye rich, permanent colors in lingerie, skirts, waists, dresses, coats, stockings, sweaters, draperies, coverings, hangings—everything!

Buy Diamond Dyes—no other kind—and tell your dyer whether the material you wish to color is wool or silk, or whether it is linen, cotton or mixed goods.

**ALL WORN OUT**

So Was Mrs. Elder, Who Tells Her Experience

Are you tired all the time; worried night and day? Does your back ache and what you do? Do you suffer dizziness, headaches, rheumatic twinges or distressing urinary disorders? You have good cause, then, to be alarmed about your kidneys. Do as Mrs. Howard has an interesting collection of names of all Salmon River voyagers, and their fifteen-year journey across the topaz country, and the hills adjacent to the ranch, as well as the distinction of killing two bears and other wild animals.

Our first communication with the outside world after leaving Salmon River, was at Riggins, which we reached on the evening of the seventh day. Three hazardous rapids, which do not compare, however, with dozens the boat had already passed, were crossed immediately below Riggins. The state highway parallels the river for twenty miles out of Riggins, and at each rapid, auto parties would receive warnings of our danger, stop long enough to see us reach the top of the rapids in safety, and continue on their way.

On the eighth day, in the Black Canyon, about sixty miles from Riggins, we found the stupendous and beautiful Snow Hole, a fall of nearly twelve feet, taking its name from the whirlpool below it, which resembles a large field of madly whirling snow. The descent over this fall and the rapids below it is extremely hazardous. We shot some very heavy rapids, and the water took us comparable to the hundreds we had already crossed, but the Snow Hole was supreme in grandeur and beauty.

We entered Snake River on the ninth day, and at four o'clock in the afternoon of August 10th, reached Lewiston.

Raw silk and silk goods valued at \$244,535.131 were received at Seattle from the Orient during 1925, compared with \$213,646,877 in 1924, according to figures released by Port Warden Paul Edwards.

**For Chapped Hands**

**DURING** cold weather when children's hands get all rough, red and cracked from exposure, washing with soap and water becomes even more unpopular than usual.

And it is no wonder that howls of protest accompany every paring of the nails. "Wash those dirty hands well," for the action of water on the broken skin causes real pain. After the first washing, the hands are too sore to dry thoroughly and the chapping is only increased.

A method of cleansing which is very soothing and at the same time effective is this one which is well known in country districts where chapped hands are a common occurrence.

First soak the hands in a basin of warm oatmeal water. To prepare the solution, mix one part of oatmeal (rolled oats) with cold water; allow it to stand, with occasional stirring, for 5-10 minutes. Add enough of this liquid to a basin of warm water to make it quite milky in appearance.

After the hands are soothed and the dirt loosened by this soaking, wash them thoroughly with warm water and dried thoroughly.

The whole operation is accomplished in comparative comfort and a step is made in the direction of healing the raw places instead of causing further chapping.

**Boschee's Syrup**

Has Been Relieving Coughs for 59 Years

Carry a bottle in your car and always keep it in the house. 30c and 90c at all drug stores.

**PILETS**

The Cause of Your Ill Health  
If you have Pilets or other Rectal or Colon Disorders—there is the cause of your nervousness, lack of vitality, stomach trouble, general physical and mental incapacity. I can help you win back your health by positively curing your PILETS and a WRITING for reasons of my own—that Buck McLeod is the man who knows the secret of the topaz. I'll see him in the morning, and make him kick in."

"And if he won't?" said Stella.

"He will," laughed Taggart. "We'll offer him a good slice of the award. We have both the map and the topaz—he has only the secret of the topaz alone—it won't pay him to keep it secret."

"But if he wants too much for it?"

**CHILDREN CRY FOR**

**Fletcher's CASTORIA**

MOTHER—Fletcher's Castoria is especially prepared to relieve Infants in arms and Children all ages of Constipation, Flatulency, Wind Colic and Diarrhea; allaying Feverishness arising therefrom, and, by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep.

To avoid imitations, always look for the signature of *Dr. J. C. Hathorn* Absolutely Harmless—No Opium. Physicians everywhere recommend it.

When Stella arrived at the hotel Buck was waiting at the door. He slouched up to her and said:

"Say, I want to see you—private."

He indicated a corner of the lobby where they could talk unheard. After they had seated themselves, he began:

"I jes happened to be passing Taggart's office, and overheard the little confab you two were havin'."

He paused and watched her face. She showed surprise, but affected an air of calm, and simply replied, "Yes?"

After a moment's silence, Buck said sneeringly,

"So you're fallin' for his stuff, too, eh?" Then, after a pause, he grabbed her hand and went on, "Looks here—his gonna pull the same game on you. He's gonna double-cross us both if he can. Why, he told me he was usin' you only 'cause you came in handy. When he's through with ye he'll do the same to you as he thinks he's gonna do to me."

Stella smiled.

"I thought of all that," she said. "But he's not the only smart one."

"You bet he ain't," Buck said. "I know what the topaz means. But he ain't never gonna learn it from me. And I'm gonna get my hands on that map—and that topaz—and then—"

Stella, who was smiling more broadly, interrupted, saying,

"I figured he might pull some game on me, like he was on you, so I didn't take any chances—look!"

From her handbag she drew the two pieces of the map.

They both gazed.

"And the topaz?" asked Buck.

"Well, I couldn't get away with that," Stella replied. "But he doesn't know to use it, and without this—he's helpless."

Buck's eyes gleamed excitedly.

"Look here," he said, "I'll get the topaz—tonight—and we'll go 60-50. We'll beat him at his own game. Are ye?"

"I'm on," said Stella, and they shook hands on the agreement.

The Bar M. ranch hands who had been watching the stolen story, rode in at sunset after a fruitless quest.

Riding up to their quarters, they found the door barred from the outside, and heard heavy pounding against it from within.

They opened it, and found Smitty, Mike and Barney, the three cowboys who had been left on watch, trying to break their way out.

"Some hellish queer things goin' on around here since you boys been out," said Smitty. "First this strange woman who's been livin' here rides in alone. A little later Miss Marshall and her boy friend come in, then Taggart. And then—who should happen but these here rustlers come back, bringin' the stolen steers with 'em. One gang of 'em jumps us, and locks us in here, while the rest of 'em runs the cattle back into the corral where they belongs. Now what do ye make of that? Since then, everything's been quiet, and you sees for yourself there ain't a soul in sight now."

"We better hop up to the ranch watch," suggested Barney, "and see just who's who."

The boys all went for the ranch house, lickety-split, and entering found Mary, Terence and Bud bound and gagged. They released them and Terence made a brief explanation of what had happened. The boys received instructions for guarding the ranch, and left.

"Well, Mary, I guess you're convinced," said Terence and Mary. "Yes, Terence," she smiled, half-apologetically for not having agreed with him at first. "But what

Magellan is considered one of the world's greatest navigators and explorers; a Magellan of today is Harry Guleke, who, thirty-two years ago, conceived the idea that successful trips could be made down the Salmon River from Salmon City, Idaho. Before this, several parties had undertaken the trip, most of them meeting with death, and none escaping without accident.

Mrs. N. E. Elder, E. 2424 Pacific Ave., says: "My kidneys were weak and acted too freely. I had dizziness a good deal when it seemed like many specks flickered before my eyes and blurred my sight. I had other symptoms of kidney trouble, too, so I started using Doan's Pills. Doan's completely cured me and I have had no return of the ailment."

ELECTRO-KOLD SIMPLICITY

Electro-Kold in its complete assembly contains over one hundred less parts than any other widely sold make on the market.

ELECTRO-KOLD HAS A FROST TANK

A frost tank is used instead of the open expansion coil system. By surrounding the expansion coils with a non-freezing solution (calcium chloride or alcohol), more even temperatures are maintained with less starting and stopping of the compressor.

FROST TANK COMPARTMENT

Electro-Kold has a sharp freezing compartment in the frost tank covered with an insulated flanged copper door, instead of a drawer arrangement for the ice trays.

"Where Quality Counts" C. E. BOLLES, Propr. MOSCOW, IDAHO

Of Interest to Students The many school pupils, most of whom donated toward the restoration of "Old Ironsides" to life, again will be pleased to learn that that famous old vessel will again sail the briny deep, according to a recent news dispatch sent out from Washington, D. C., as follows:

Doesn't Always Follow To be engaged in opposing wrong affairs, under the conditions of our mental constitution, but a slender guarantee of being right.—Gladstone.

Rupture Shield Expert Coming to MOSCOW

THURSDAY AND FRIDAY MARCH 11 AND 12 MOSCOW HOTEL From 10 a. m. to 6 p. m. Evenings by Appointment TWO DAYS ONLY No Charge for Consultation

Mr. C. F. Redlich, the successful expert, says: "The Perfect Retention Shields," hold the rupture perfectly, no matter how long it has existed and still small; it will save no end of trouble, pain and expense in the future if you now take advantage of this opportunity.

WARNING: Never wear old-fashioned trusses or elastic bands, with chafing, filthy leg straps, with worthless guarantees and medicines, sold by mail. They never cure the rupture and the right place, thereby making it worse and expose the wearer to often fatal strangulation necessitating immediate operation. Let me explain this personally; it costs you nothing. 85% of all children, according to statistics, are afflicted with hernias if fitted with the right kind of sanitary appliance.

Coming United Doctors

The Doctor who has charge of the State of Washington is A SPECIALIST in Chronic Diseases and Clinical Medicine

Will Be at DAVENPORT HOTEL Spokane, Wednesday, Thursday and Friday March 3 - 4 - 5 COZY NOOK HOTEL Palouse, Wash. Saturday, March 6 Office Hours, 9 a. m. to 3 p. m. No Charge for Consultation

Hall's Catarrh Medicine Those who are in a "run-down" condition will notice that Catarrh bothers them health. This fact proves the fact that Catarrh is a local disease, is greatly influenced by constitutional conditions. Combined Treatment, both local and general, has been successful in the treatment of Catarrh for over forty years. F. J. Cheney & Co., Toledo, Ohio.

GRAIN GRADING TO BE DONE AT UNIVERSITY

Establishment at the university of a grain grading laboratory where farmers and dealers can secure federal grades on lots of grain they are offering for sale, is announced by Dean E. J. Idings of the college of agriculture. The new laboratory will be opened about April 1.

Prof. H. W. Hulbert, university agronomist, has been appointed licensed inspector to work under the general direction of the bureau of economics, United States department of agriculture. The Moscow office will be under the supervision of B. W. Whitlock, in charge of Pacific coast headquarters of grain supervision at Portland.

Certificates will be issued on wheat, shelled corn, oats, and rye. Carload shipments, or smaller lots if desired, by the grower or dealer, will be graded. A nominal charge will be made to cover the cost of securing samples and making tests. For sampling and inspecting carload lots the fee will be \$1 and for smaller lots, 25 cents will be charged. Expense of travel to outside points will be extra.

The road to be surfaced is known as the Blaine road and some four miles of road will be spread, starting at a point some six miles north of Genesee and extending almost to the foot of Paradise hill. This road has been graded for more than two years and should have been surfaced long ago.

The Syringa Club The Syringa club held a very pleasant meeting at the home of Mrs. John C. Meyer Thursday afternoon of last week. The time was spent socially and a very delicious luncheon was served by the hostess. Mrs. Jesse Borgen was an invited guest and was also made a member of the club.

Mr. and Mrs. Paul Heppner Will hold Public Sale Mr. and Mrs. Claude Harpole will hold a public sale of their farming equipment at their place, two miles south of Genesee, on Friday, March 5, commencing at 1 o'clock sharp, when the following farm material will be sold: Four head of horses, 13 head of hogs, harness, farm machinery, hay, roots, spuds, chickens, etc.

Mr. and Mrs. Martin Hasfurther returned on Friday of last week from Rochester, Minn., where they had gone some weeks ago and where Mrs. Hasfurther underwent a surgical operation at Mayo Bros. hospital. She is reported as getting along nicely.

Visit Masonic Lodge Wednesday evening Fred Perkins, Frank Willoughby, M. A. Russell, Carl Nagel and Tom Foster drove to Colton, Idaho, and visited the Masonic lodge where they witnessed work in the third degree.

Congregational Ladies Aid The ladies aid of the Congregational church will meet next Wednesday, March 10, at the home of Mrs. W. M. Herman.

Still Using 1925 Licenses There are still a few cars coming into Genesee bearing 1925 license plates. The time limit, was on February 1, and this may serve as a warning to those who are taking chances. The law gives any police officer the right to arrest any violator of the license law, without a warrant, and it might save them the price of a license.

WHEAT MARKET SUFFERS FURTHER DECLINE

Continued weakness in the foreign wheat markets, together with the favorable progress of the winter wheat crop in the United States, weakened the domestic wheat markets and caused further price declines during the week ending February 27, according to the Weekly Grain Market Review of the United States department of agriculture.

While much of the wheat being exported from Argentina continued to be of poor quality and trade estimates were that only about half of the exportable surplus would be of good milling wheat, foreign demand continued of small volume and European importers were not inclined to take wheat in more than sufficient quantities for their current needs.

LEGENDS OF "SLEEPY HOLLOW"

John Kluss is on the sick list this week. Frank Klemm and Bruno Ebel drug roads Monday.

Some "flu" cases have been reported in the Hollow, Ormond Mosman and Joe Griesser were "victims."

Mr. and Mrs. John Geselchen have returned from California, where they spent the winter with their son Charles.

Miss Irene Ebel of Lewiston and Harry Daniels of Northampton, England, were guests at the C. F. Ebel home Sunday.

Mr. and Mrs. John Geselchen have returned from California, where they spent the winter with their son Charles.

Miss Swane spent the week-end at Moscow. Marvin Miller visited Sunday night with Glen Jones.

Mr. and Mrs. Pinion and family of Genesee spent Saturday night and Sunday at Roy Swets.

The Community Sewing club spent an enjoyable all-day session at Mrs. Henry Whitted's last Thursday.

Mr. and Mrs. Fred Brantner, Mrs. R. F. Lambert, Mr. and Mrs. William Freeburn and children, Joe Doyle and A. Butzjen took Sunday dinner at the C. H. Spurbuck home.

Art. Hissman and his daughter, Gladys, left Wednesday of this week for their home at Cadogan, Alberta, after having spent the winter here with relatives.

KNIGHTS OF PYTHIAS CELEBRATE ANNIVERSARY

The annual celebration of the Knights of Pythias was held in their Castle hall last Friday night, when a large crowd of Knights and their families, with a few invited friends, assembled to celebrate the anniversary of the founding of the order.

A splendid banquet served to put all in the right humor for further enjoyment, after which a short program was offered.

Veteran jewels were presented to four brothers, who had been members of the order at least 25 years. Those receiving jewels were Harry Thatchler, P. E. Dieus, Ira Hanson and Pat Mulvaney.

The K. P. orchestra furnished music and the remainder of the evening was devoted to dancing, which all seemed to enjoy.

Star Jones put on work in the rank of page at its last meeting and will confer the rank of equire at its next meeting, March 9.

Mr. and Mrs. John Geselchen have returned from California, where they spent the winter with their son Charles.

Miss Swane spent the week-end at Moscow. Marvin Miller visited Sunday night with Glen Jones.

Mr. and Mrs. Pinion and family of Genesee spent Saturday night and Sunday at Roy Swets.

Post Wednesday. The afternoon was spent socially and at 4 o'clock a lovely luncheon was served. The only invited guest, besides the members, was Mrs. Roy Evans. Federal Match Company Bids The Federal Match Company has bid \$335,000 for state timber in Clearwater county.

## Draperies For Figured Walls

The increasing use of decorative walls combined with figured draperies presents no great problem.

By Agnes Rose

There is a popular fallacy that figured walls require plain curtains and the home decorator who takes no chances in her use of mixed designs never attempts their combination. However, like the lives of all people who never take chances, her room is flat and uninteresting. Today there are few plain surfaces in decoration. The vogue for design has reached the pinnacle of good taste and even the most conservative woman is filling her home with lovely rich colors and beautiful patterns.

The sharp contrast between a gay floral pattern on the wall and a plain green or blue material, for instance, in the window drapery is too abrupt to fit into our present conception of beauty. It is too strong a spot of plain unrelieved color and for the sake of the woman who hesitates to use her own judgment in selecting anything but plain colors for curtains, we have listed a few of the most attractive alternatives.

For instance, in one lovely bedroom, soft yellow voile curtains with two rows of fine green stripes were used. These gave a charming sense of contrast and yet were delicate and unobtrusive. Needless to say these colors were the main one of the window paper but their use made the window a treatment much more interesting than one color could have done.

In a Sun-room we reverse the process, a gay figured chintz was found to be more attractive against a mixed design never attempted against a plain wall. The spots of strong color in the chintz did not clash, her room is flat and uninteresting. Today there are few plain surfaces in decoration. The vogue for design has reached the pinnacle of good taste and even the most conservative woman is filling her home with lovely rich colors and beautiful patterns.

The sharp contrast between a gay floral pattern on the wall and a plain green or blue material, for instance, in the window drapery is too abrupt to fit into our present conception of beauty. It is too strong a spot of plain unrelieved color and for the sake of the woman who hesitates to use her own judgment in selecting anything but plain colors for curtains, we have listed a few of the most attractive alternatives.

For instance, in one lovely bedroom, soft yellow voile curtains with two rows of fine green stripes were used. These gave a charming sense of contrast and yet were delicate and unobtrusive. Needless to say these colors were the main one of the window paper but their use made the window a treatment much more interesting than one color could have done.

## Culture Distribution Widespread in State

WASHINGTON STATE COLLEGE, Pullman.—In cooperation with the department of farm crops at the State College of Washington pure cultures for seed inoculation for 13,637 acres were distributed throughout the state to 2,887 farmers from July 1, 1924 to June 30, 1925 according to S. C. Vandocavey, experiment station bacteriologist, who supervised the work.

An increased demand for vinegared cultures from people not only in the state but in the surrounding states, has taken place, according to Vandocavey. These increases he says are naturally relative to a correspondence between the information on seed inoculation and vinegared making.

Because of the fact that soil nitrification is of such great value in Washington wheat land that it may be a limiting factor in crop yields, it is important that more research be carried on to discover the possibilities and limitation of the nitrifying group of bacteria.

With the completion of the new dairy manufacturing building, Troy Hall, investigations of this work will be carried on concerning the methods of grading market milk.

**FOREIGN TRADE MEET FOR SAN FRANCISCO**

William Pigott of Seattle, president of the Pacific Foreign Trade Council, has announced March 4, 5, and 6 for the holding of a fourth annual convention of the body at San Francisco. The Executive Department of the Seattle Chamber of Commerce is acting as Washington headquarters for the coming convention and taking charge of securing proper representation from the Pacific coast.

An invitation has been extended Dr. Julius Klein, director of the Bureau of Foreign and Domestic Commerce of the Department of Commerce, to attend and take part in the program.

Transportation companies have announced special rates of fare and one-half for the round trip to delegates, applicable to all states west of the Rocky Mountains as well as British Columbia.

**HINTS ON FEEDING YOUNG CHICKS**

By W. D. BUCHANAN  
Extension Poultry Specialist.

Nature provides the young chick with its first meal. Either she was afraid to trust man or she didn't know that man was to be around at feeding time. At all events she stores up the body of the chick, enough delicious egg yolk to last it three days.

Man's first job is to give nature a chance. His duty for three days is to keep the chick quiet and comfortable. It chills it, or overheats it or keeps it in a tight room, or under any conditions where it can find something to swallow, he is likely to ruin the chick.

But man should be ready to feed as soon as the hour comes. He should be fully equipped with drinking fountains, and with boards or plates or platters on which to give them their first feed. When they are 60 hours old they should be given fresh butter-milk or sour skim milk. This should be followed immediately with chicken starter grain and a little grit. The milk should be kept constantly before them. The chick grain should be kept, fed on plates or boards so that all of the chicks can see and reach the feed, should be left before them 15 minutes.

The best practice is to give them nothing but milk to drink and nothing but the fine grain to eat for the first four feeding days. The grain is fed five times a day, the first day on the boards or platters, the second and all succeeding days in short cut litter one to two inches deep.

Beginning on the eighth day of the chick's life, the grain feed is fed three times a day only, morning, noon and night. Mash is fed twice a day, in the middle of the forenoon and afternoon. The amount of mash is what they will clean up in 15 minutes on the eighth day, and gradually increased to what they will clean up in ninety minutes on the twenty-first day.

**Pen Women Plant Tree**

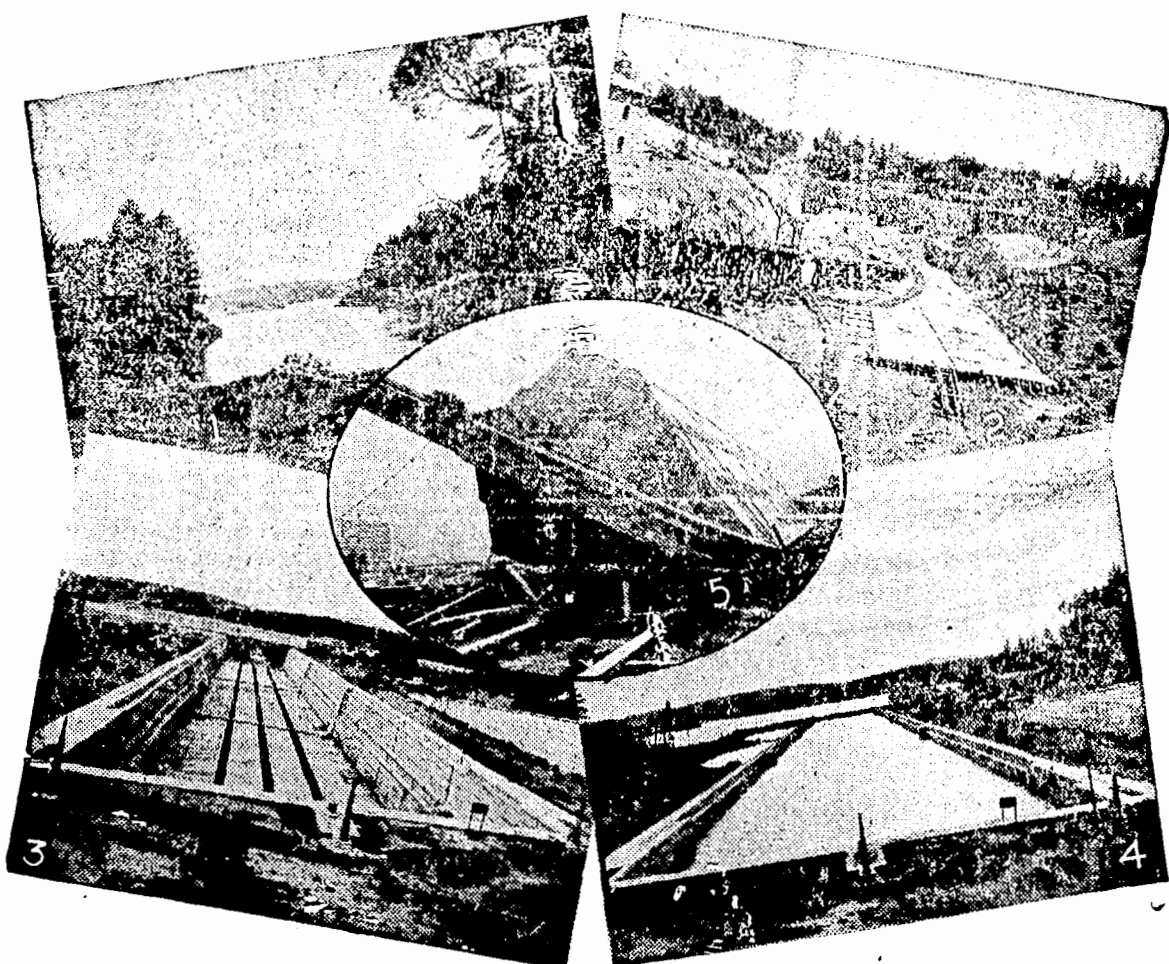

A memorial tree for Edwin Morris, the poet, has been planted in the yard of the former home of Edwin Markham at San Jose, says the American Tree Association. Mrs. Bertha Marguerite Rice was chairman of the committee and Mrs. Frona Eunice Jewett, culture, president of the San Francisco branch of the League of American Pen Women, spoke.

"Time to get to work!" shouted the hard-working farmer as he shook the bird man at 3 A. M.

"I don't care so much for myself," grumbled Jones as he rolled out, "but I would like for my brood to get a little rest."—Farm and Fireside.

Your dollars come back to you if they are spent at home.

## CANADA'S GIANT DRYDOCK

1. Skinner's Cove, Esquimalt, Site of Canada's Greatest Drydock. 2. Constructing Canada's \$6,000,000 Drydock. 3. One of the 1,000-ton Drydock Gates, Made by Yarrows Limited, at Esquimalt, Victoria, B.C. 4. Canada's Giant Drydock Filled. 5. One of the 1,000-ton Drydock Gates, Made by Yarrows Limited, at Esquimalt, Victoria, B.C.

**DURING** the Great War the Dominion Government of Canada decided that, for strategic and mercantile reasons, it was necessary to have a drydock on the Pacific Coast big enough to take the largest ship afloat. After a very careful survey and consideration, Victoria was chosen as the obvious site; and the building of a huge drydock in Esquimalt Harbour, Victoria, was commenced in 1921. This giant basin, hewn out of the living rock, has cost approximately \$6,000,000 and measures 1,150 feet long, 149 feet in width at the top, 126 feet at the bottom; its depth is 49 feet 5 inches, with 40 feet of water on sills at high water. The dock will take any ship afloat, or, if desired, can be divided into two sections of 400 feet and 750 feet respectively. It is filled with concrete, with granite coping at the top, granite keel and bilge block seats, and is equipped with four caisson berths of granite.

To make ready for this dock it was necessary to excavate 11,000 cubic yards of dredging, 41,000 cubic yards of earth excavation, and 350,000 cubic yards of rock excavation, while in the construction of the dock there was used 103,000 cubic yards of concrete, 105,000 cubic feet of granite, 36,000 lbs. wrought-iron, 141,000 lbs. of steel, 40,000 lineal feet of piping of various kinds, 1,800 tons of cast-iron, and approximately 2,600 tons of steel were used on the occasions.

The dock is to be finished this year. There is only one larger dock in the world, and that is the Commonwealth, at Boston, Mass., which is 23 feet longer.

The dock will be operated electrically. There are three 54-inch main pumps and two 22-inch auxiliary pumps, which empty the dock in 40 hours. The water is pumped out into the sea through a 600-foot tunnel measuring 9 feet by 14 feet.

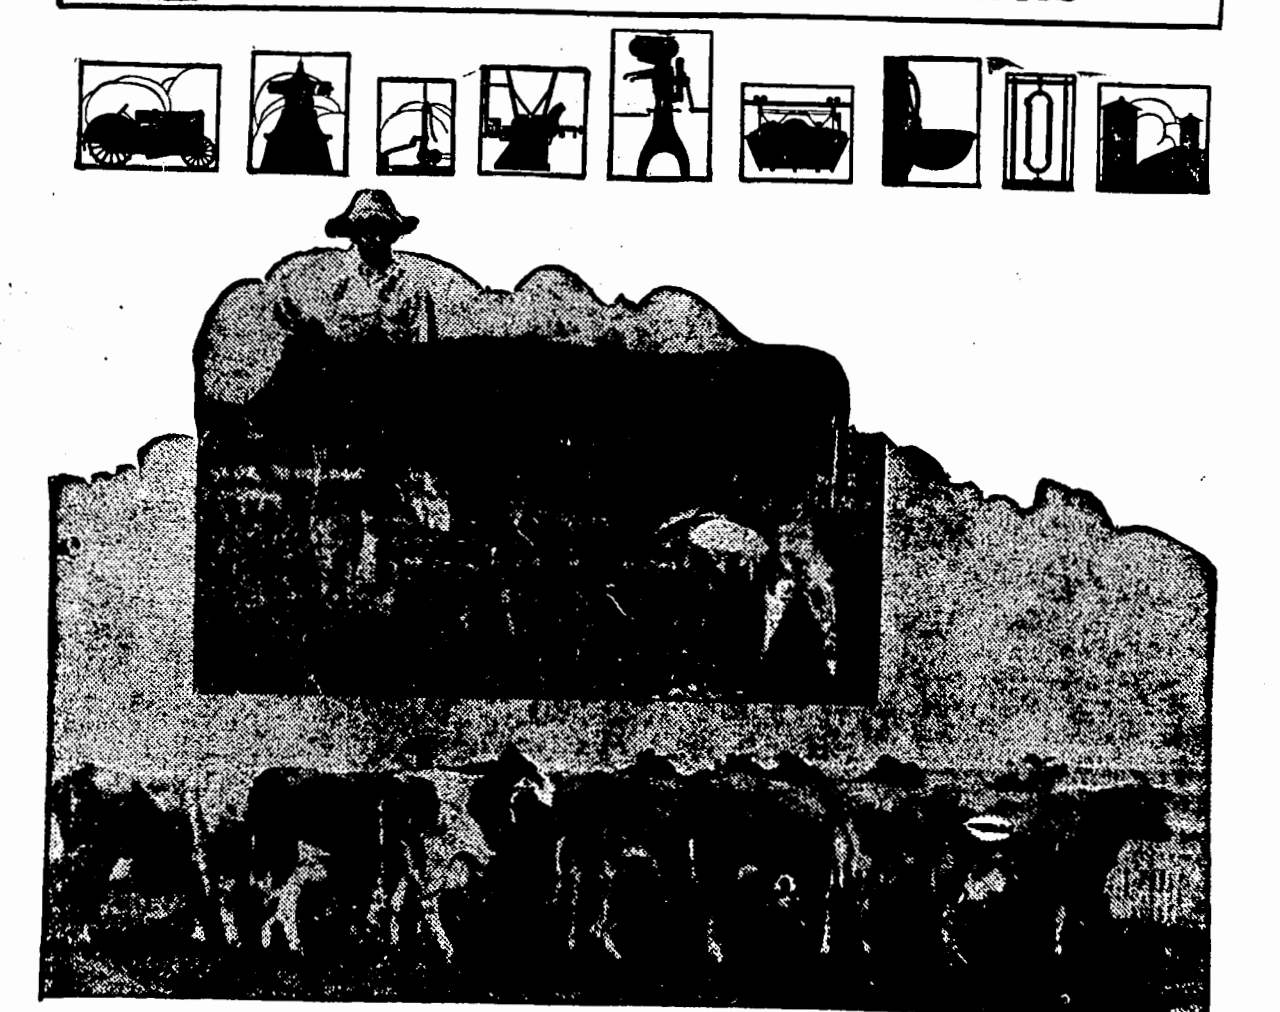

When filled, the dock contains 42,000,000 gallons of water. The dock gates, which weigh 150 tons apiece, were constructed by Yarrows, Ltd., Esquimalt, Victoria.

**TO GROW SLENDER**

Ask husband to refrain from saying it with chocolates and instead to hand you a lemon. To reduce one should cut down on calories, and limit are up with lemons.

Here in this elegant city reclines The Master Mind of Electric Signs. His dreams were ever of madder squirms And gaudier colors for bigger works To cast in the face of heaven . . . . . When He dimmed the stars he was happy then! Say it with printer's ink.

## COW TESTING INCREASING FARM PROFITS

**INDIANAPOLIS, Ind.**—Twenty-three years ago, Richard Riggs started to farm a "poor run-down" farm in southwest Indiana. He was a "renter." A few weeks ago he was the center of attraction at the National Dairy Exposition. He had won the only gold medal for a herd averaging 600 pounds of butterfat in a year. Things had changed during the 23 years. The cow testing association founded by Riggs and put his herds through the "up-lifting process," just as it is doing with some 50,000 herds in close to 20 states at the present time. In other words, business methods of increasing profit by increasing production per cow, while eliminating man labor and cutting the cost of feed.

The cow testing associations are gaining in numbers. Says the Research Department of the National Association of Farm Equipment Manufacturers: "Minnesota, Wisconsin and Michigan are making the most rapid gains, though North Dakota, Nebraska, Iowa, Illinois, Indiana, Pennsylvania, New York, Vermont, Maryland, Virginia, North Carolina, Oregon, Montana and Colorado are progressing."

In the larger picture, champion "C. T. A." cows at the last National Dairy Exposition are seen herding.

Most of these farms were found to be prospering in the modern era time and farm saving herd. Many farms had tractors, sanitary barn equipment, gas engines, cream separators, milking machines, feed grinders, milking machines, cream separators, etc., indicating the place of these pieces of equipment in developing the great cow testing association herds.

## New Dust Treatment For Wheat Efficient

A reminder that it is time to treat seed wheat is sent out by plant pathologists of the University of Idaho Experiment Station.

The copper carbonate dust method of seed treatment is now recommended by Prof. C. W. Hungerford, plant pathologist, as being the most generally satisfactory. The method has been thoroughly tested by the station, both in experimental plots and in cooperation with a large number of farmers, and when properly applied was found to be as effective in stinking smut control as either the bluestone or formaldehyde methods.

This new dust method has certain distinct advantages, some of which are mentioned by Professor Hungerford as follows: It causes no injury to germination and less seed can be used; more treated with copper carbonate will start quicker and grow more vigorously in early stages than when treated with bluestone or formaldehyde; it is easier to apply; grain may be treated and stored indefinitely without injury.

The treatment consists in thoroughly mixing two or three ounces of the copper carbonate dust with each bushel of wheat. Several machines for applying the dust are on the market but many growers use a homemade apparatus—a cement mixer or barrel churn—with satisfactory results. Tests have shown that slightly better control is usually secured when the treatment is applied with a power driven, continuous treating machine than when it is applied with a barrel churn.

Two ounces of copper carbonate to the bushel is usually sufficient for spring wheat and in regions where the soil does not become infested with smut spores, for winter wheat. For winter wheat where soil infestations take place and for all wheat which is badly smutted, three ounces are recommended.

These recommendations assume that the dust contains at least 50 per cent copper and is sufficiently fine to pass through a 200 mesh sieve. If the dusted brands of copper carbonate, which contains less than 50 per cent copper, are used, three or four ounces per bushel should be applied.

Three important precautions are emphasized. "First," Professor Hungerford says, "avoid inhaling copper carbonate—treat where there is free circulation of air; second, do not feed treated grain to livestock; third, use as clean seed as can be obtained."

## Farm Electrical Survey Undertaken by W. S. C.

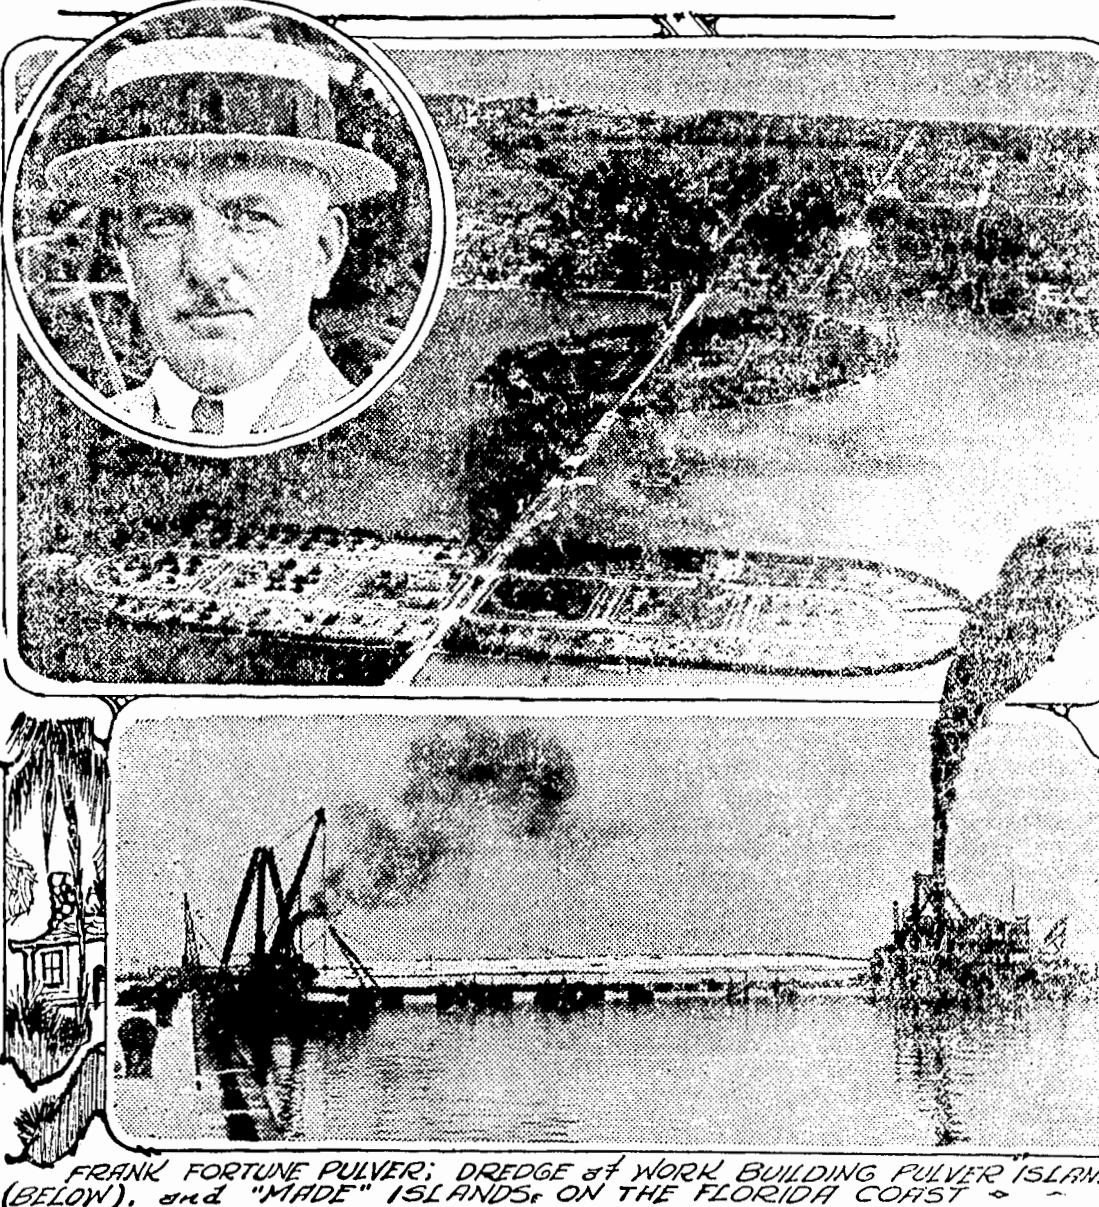

An extensive and detailed survey of how farmers are now using and may use electricity in their homes and work is being undertaken by the Washington Committee on the Relation of Electricity to Agriculture. Prof. L. J. Smith of the State College, secretary of the committee, did field work along this line during the summer months.

This investigation is part of a five-year program outlined by the committee, and Harry L. Garver, field investigator, will work this year on six particular subjects on rural electrification to be studied from a state-wide standpoint, and on a number of regional subjects to be covered in the eastern, central and western portions of the state. He will report to the committee extensive data, costs and observations. His work is done under the direction of the agricultural and engineering faculty of the State College.

Through this survey it is hoped to develop the most practical and economical methods of making electricity pay for itself and the necessary extension of lines to rural homes.

A new \$62,000 tugboat for the Victoria Tug Company was launched last month in Victoria. It is powered with Diesel engine, the first of that kind to be launched in Victoria.

## Man-Made Islands Rise Like Magic on Florida's Coast

FRANK FORTUNE PALMER, DREDGE MAN WHO'S BUILDING PALMER ISLANDS (BELOW), and "MADRID" ISLANDS ON THE FLORIDA COAST.

Out of the shallow waters of Boca Ciega Bay near St. Augustine, Fla., a marine engineering project is under way that is attracting attention of dredging companies nationally. Aided by giant dredges, "sand suckers," three man-made islands are taking form. Back of the project is Frank Fortune Palmer, retired millionaire. The new islands are being made in a shallow part of the bay. At low tide, the islands are high and dry. Here the big dredges are taking sand from the sea bottom and adding to the islands. Soon, sea wall builders will pour heavy concrete retaining banks all around the three islands. Docks will be built for yachts and houseboats. The islands and the mainland will be linked by a wide causeway and paved boulevard.

## IDAHO FARM CALENDAR

**POULTRY**  
R. T. Parkhurst.

The incubator should be placed where there is an even temperature, satisfactory ventilation, and an abundance of moisture. An incubator cellar built two-thirds below the ground is best as it is less susceptible to changes. Kitchens or rooms that are hot in the daytime and cold at night, should be avoided. The best temperature for an incubator cellar is around 65 degrees F.

**NEW FACTORIES AID WASHINGTON PAYROLL**

Nine new factories were opened in January in the State of Washington, chief among which was the plant of the Olympic Calnet Refining Company of Seattle. This new industry adds \$30,000 to the monthly payroll of the Queen City, and represents an investment of more than \$1,000,000.

**PLANT DISEASE**  
C. W. Hungerford.

It is very important that all grain be treated, whether sown in the spring or in the fall. It is not always possible to tell whether grain is smutted by the appearance of the seed. Seed from a crop free from smut may become infected in threshing or by other means. The safest method is to treat all seed before planting.

**IN THE HOME**  
Marian E. Hepworth.

If there is a question with anyone as to the safety of canned greens, such as spinach, beet tops, etc., they can be brined satisfactorily. One pound of brined vegetable serves seven.

**AGRICULTURAL ECONOMICS**  
G. L. Sulerud.

To help farmers in planning their production programs the U. S. Department of Agriculture issues The Agricultural Outlook in February and the Intentions of Farmers to Plant in March, each. It is hoped that many together.

By Arthur Brisbane.  
(In the Seattle Post-Intelligencer.)  
Development of telephones is the test of civilization, of which one great task is to bring the human race closer together.

## SOAP BUBBLES INVESTMENTS

By HARRY DANIELS in Thrift Magazine.

Someone is authority for the statement that a fool is born every minute. Now hold that happy thought for just a second or two. There are 60 minutes in every hour, 24 hours in every day, or a gross national production of 525,600 fools a year. It is from this source that the billion dollar a year loss in soap-bubble investments comes in this country, so that the actual cost of being a fool and remaining so consistently through life amounts to just about \$1,902.60.

In the selection of investments it is surprising how careless many persons are at times. For example, all stock is divided by financial experts into four general groups or classifications, as follows: red, blue, green and yellow. There is, of course, some pink stock being offered to the public, but this is the exception that proves the rule.

Yet how few of us ever stop long enough to look into this important side of the investment problem. All we want to know is how much the dividends or profits are going to be. When we are told that a particular stock will double in value every morning before breakfast or that if all the dividends of such and such a company were placed end to end they would reach all the way from here to the federal penitentiary at Leavenworth, Kans., we are satisfied.

A shrewd Ohio investor we recently heard of had the right idea. He insisted that every share of stock he purchased must be peacock green with a yellow seal on it.

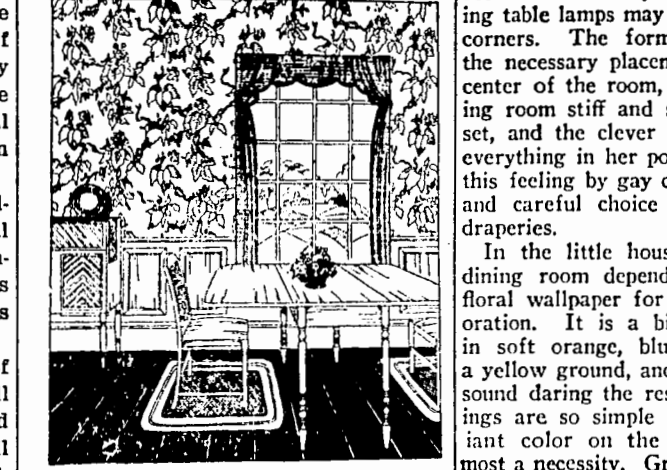

When the president of the corporation was indicted and three of the directors drank carbolic acid and blew out their brains with what many believed was suicidal intent, some thinking Thomases thought the investor's stock would be entirely worthless. But such was not the case, for, having selected only stock of one color, he was able to use every single share of it in repapering the company's kitchen.

Manifestly the careful security buyer should not be influenced too much by the great scenic beauty of his stock. He should find out something about the assets of the company. Take, for illustration, in the case of a ten million dollar corporation, he should try to find out exactly how many chairs, umbrella racks and cuspidors constitute its assets.

A friend of ours who has almost completed his quota of \$1,902.60, bought some oil stock not long ago on the strength of a letter sent out by the company that its assets consisted of six good producing wells. At the inquest it was discovered that the assets referred to were six producing ink wells.

Truly the poet had cried in his joy "America thy name is opportunity." To illustrate the truth of this beautiful sentiment, an opportunity only a short while since was the Kingsley Navigation Co. of Vancouver, B. C., has opened its own offices at San Francisco, with J. L. Hunter, general agent, in charge.

## Make The Dining Room Cheerful

Color Needed to Relieve the Conventional Formality of the Dining Room.

If there is one room in the house that should have special attention, it is the Dining Room. A gloomy, or even an uninteresting dining room is more depressing than are other rooms where fluffy cushions, or glowing table lamps may brighten the dark corners. The formal furniture and the necessary placement of it in the center of the room, makes every dining room stiff and severe at the outset, and the clever home maker does everything in her power to counteract this feeling by gay color on the walls, and careful choice of materials for draperies.

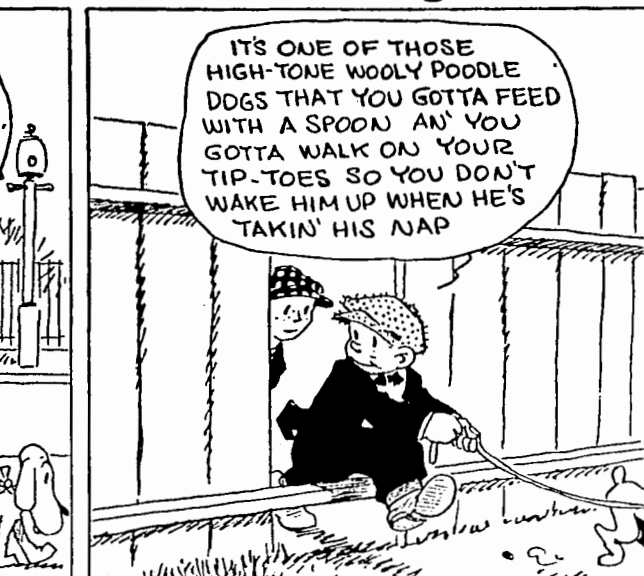

In the little house illustrated, the dining room depends entirely on its floral wallpaper for interest and decoration. It is a big flowing design in soft orange, blue, and green on a yellow ground, and though this may sound during the rest of the furnishings are so simple that the brilliant color on the walls seems almost a necessity. Green painted furniture and a very soft orange in the curtains brought the rest of the room into harmony, and the effect of space and the decorative value that the wallpaper gives to the four small walls makes the room a charming place in which to gather at meal time.

Do not allow the dining room to be without color. It needs sparkle and cheer, and should radiate happiness and comfort as a proper setting for dainty dinners.

**Plan to Attend "The Old Covered Wagon"**  
SERVICE SUNDAY, MARCH 7—AT THE CHRISTIAN CHURCH 7:30 P. M.

"Mother's old songs" will be sung and the pastor will read "Sleep, Old Pioneer." Prizes will be given to the oldest persons present and to the person present who has been a resident of the Genesee country the longest.

**REIN PROMISES REAL TREAT FOR GENESSEE MUSIC LOVERS**

Genesee music lovers are looking forward to a real treat in the appearance of Nils Rein, famous violinist, who will give a concert at the Genesee Valley Lutheran church, Saturday evening, March 6.

Mr. Rein recently appeared at Colorado Springs and the Colorado Springs Gazette and Telegraph has the following to say regarding his program:

"Rein is an artist of rare refinement and real ability, who presented a program skillfully compiled, containing all the requirements of a well balanced musical ration. It was a program thoroughly worthy in every respect."

"At all times his tone was exquisite, clean cut, limpid, flowing, never by any chance—even in the heaviest passages—turgid and dull. He is a past master of harmonics; he can play with scintillating brilliance, or a calm, soothing legato; he has impetuosity and repose; his rhythms are fascinating; in fact, his technical equipment is complete."

"Nor is that greater element lacking—sympathy and understanding. His is not a veneer of virtuosity. Beneath the brilliance there is a soul and it is this element that makes his playing so uniquely interesting. It is rarely that one hears an artist with such a peculiarly attractive style, possessing such marvelous appeal. Some of the most touted violinists in the world do not have it, and Rein is to be complimented for having preserved his soul qualities in the face of the demands of technique."

"Miss Norma Rogelle, the assisting artist, is a tower of strength as an accompanist. Her work is ideal and absolutely adequate. She also reveals attractive qualities as a soloist."

Just what does the phrase "civilized warfare" mean?—Boston Globe

**CHURCH NOTICES**

**St. John's Lutheran Church**  
Rev. A. F. Wolf, Pastor  
Sunday school at 9:30 a. m.  
English services will be held each Sunday morning at 10:30 o'clock, with the exception of the first Sunday of each month, when German services will be held at the usual hour.

**Christian Church**  
N. E. Beach, Pastor  
Bible school at 9:45.

**Emmett & Boliou**

**Harnessed!**

FIFTEEN years ago only a few rapids appeared in a bend of the Spokane river, 40 miles below Spokane, where today stands the Long Lake dam and power station, a nationally-known development.

Here your Electric Service company placed this power station in operation in 1915. Long Lake, 23 miles long, was created and its power was harnessed to supply electric light and power to the Inland Empire. Power from this station pulls the "Milwaukee" trains over the Cascades.

The water plunges 172 feet into the turbines to give four generators an installed capacity at the station of 94,000 horsepower. This great plant and six others respond instantly when you push the electric button within your home, store or factory. That is Electric Service.

You Are Invited To Visit This Plant

**Fashion Show and Dance**

Lewis-Clark hotel, March 10. 35-2x

**WALL PAPER 1926**

A Little Lesson on—

GOOD WALL PAPER

Good wall paper is not a pleasing pattern alone—it is a combination of pattern and stock—and the kind of stock the pattern is printed on has a lot to do with the wear and service you get.

Cheap wall paper is printed on dirty gray-brown, muddy colored stock. Generally it is made from old rags, newspapers and other refuse. It seldom ever looks bright and new, even when just hung. Much mail-order paper is of this kind.

Good wall paper is printed on clean cream stock! It looks fresh and bright and keeps this nice appearance. It lasts longer because it has tough wood fiber in it. It is made from spruce pulp. When you buy this kind of wall paper you get real value for your money. It saves redecorating because it lasts longer.

WE SELL ONLY GOOD WALL PAPER! NEWEST STYLES IN STOCK NOW!

**Engagement Announced**

The engagement of Miss Florence Kleweno, daughter of Mr. and Mrs. J. P. Kleweno of Genesee to Beryl Miller, Pullman, was announced in Pullman last Friday evening.

Miss Kleweno is a graduate of Cheney Normal school and is now attending the University of Idaho, being a Junior there. She is majoring in music and is a member of Sigma Alpha Iota, national music honorary sorority.

Mr. Miller is from La Grande, Oregon, and is a senior at Washington State college and has been prominent in campus activities. He is a member of Sigma Tau, an honorary engineering fraternity, and of Crimston Circle.

Last year he served on the "Big Five" committee for Campus day. He is affiliated with Alpha Tau Omega fraternity.

The wedding will take place in the early summer.

**NOTICE**

At a regular adjourned meeting of the Board of Trustees of Independent School District No. 2, Genesee, Idaho, held February 15, 1926, a meeting of the qualified voters of Independent School District No. 2, was called for Saturday, March 6, 1926, at 2 p. m. to decide the following question, to-wit: Shall a 6-mill levy, in addition to the 5-mill levy that can legally be made by the Board of Trustees, be assessed against the taxable property of the district, for general school purposes?

1. Explanatory information of the district, \$569,930.00.

2. Estimated amount necessary to raise for fiscal year 1926-1927, \$14,575.00.

3. Approximate amount possible to raise from all sources with authorized 8-mill levy, \$10,900.00.

4. Approximate amount proposed additional 6-mill levy will raise, \$3,400.00.

5. Approximate total from all sources, with addition 6-mill levy, \$14,300.00.

Meeting to be held at school building at 2 o'clock, March 6, 1926.

Qualified voters at this meeting must have the following qualifications:

1. Electors within the meaning of Article VI, Section 2, of the Constitution of the State of Idaho.

2. Residents of the district at time of election and also in addition, must possess one of the two following qualifications:

1. Parents or guardian of a child or children under twenty-one years of age.

2. A person who pays taxes within the district and the husband or wife of such tax-payer.

By order of the Board of Trustees of Independent School District No. 2, 35-2 ROBERT EMMETT, Clerk.

# "Wife Saver" Opportunity

### THOR Electric Washer-- Saves Her Health, Youth and Time -- Presenting a Specialized Way of Buying a Wonderful THOR Electric Washer for Your Home.

Homes that use our electric service--fathers and husbands--are ready to enlist with you in making wash day one of the pleasant days of each week.

Let's begin by banishing the old wash tub and wash board along with all their unpleasant memories.

The Thor cylinder electric washer comes to do all the family washing, to do it better, quicker and more satisfactory than it has ever been done before.

It comes to preserve youth, health and happiness in the home--and beginning Monday is presented in the most unique specialized sale that we have introduced in years.

## \$4.75 DOWN

### The Most Outstanding Electric Washer Value In The World

Here we have "Thor 25"--the most popular electric washer ever built. Hundreds and hundreds are serving Spokane homes and have been for years. Thor 25 may be had with metal or smooth hard maple reversing revolving cylinder. Also safety "atolag" and all metal swinging wringer. **Cash price \$145.00** **Term price \$155.00** \$5.75 pail or 25 pounds of Hurley Washing Machine Soap FREE

## "THOR 32"

### Electric Washer With Its Luminoid Cylinder

This is the famous "Thor 32", an all-quality electric washer. Here are some of its features:

A new luminoid cylinder--smooth, light in weight, strong and durable. Does not attract or hold soap, grease or scum--always bright, clean and sanitary.

All-metal, ball-bearing swinging wringer.

Safety wringer release.

Atolag--exclusive Thor safety device for protection of motor and fuses. In this sale you can buy this, America's best washer, at--

## \$4.75 Down

### Hurley Superior Oscillator Electric Washer

It is an all-metal washer with copper tub. Equipped with all-metal eight-position swinging wringer and soft cushion rolls that wring clothes dry and never break the buttons. Motor and all moving parts are enclosed. Washes clothes carefully, quickly and thoroughly. The only all-metal, high type, copper tub electric washer on the market at this low price. Fully guaranteed by the Hurley Co., same people who manufacture the mighty Thor.

In this sale you can buy the Hurley Superior Oscillator Electric Washer for \$105.00, at--

## \$4.75 Down

### FREE---With Each Electric Washer---FREE

25-POUND PAIL OF HURLEY WASHING MACHINE SOAP

This soap is made expressly for use in Thor electric washing machines. Its quality is unexcelled. With every Thor electric washer purchased in this sale we present the purchaser with a full 25-pound pail of Hurley Soap--valued at \$5.75. This supply should last you for two whole years. In other words, you pay only \$4.75 down on your electric washer and we give you outright \$5.75 worth of soap--or a premium worth one dollar more than your initial payment on the electric washer.

## Thor Automatic Electric Ironer

Also Presented at \$4.75 This Sale

Now the sale is completed--all Thor products are included--even the new Thor automatic ironer. Does all your ironing in just a short time while you sit comfortably on a chair and guide the clothes through. Absolutely automatic.

No extra wiring necessary--attach to any convenient outlet.

For a short time only the Thor Automatic Electric Ironer can be purchased at--

## \$4.75 Down

DEMONSTRATION MADE IN YOUR OWN HOME

At your request we will send a new Thor electric automatic ironer out to your home. Here you can give it a thorough test, do your ironing--see how easy it is to operate--and what beautiful ironing it does without any work whatsoever on your part.

## The Washington Water Power Co.

### NOTICE OF SALE OF REAL ESTATE BY LATAH COUNTY FOR MARCH 15, 1926

NOTICE IS HEREBY GIVEN that in, under and by virtue of an order of sale and resolution made by the Board of County Commissioners of Latah county, Idaho, on Wednesday, January 27, 1926, hereinafter described lots, pieces and parcels of land, situated in the County of Latah and State of Idaho, will be sold by the sheriff of said county at public auction, at the front door of the county clerk's office, in the city of Moscow, Idaho, on Monday, the 15th day of March, A. D. 1926, at 2 o'clock p. m. of said day, or at such time or on the day to which the sale may be postponed or adjourned, to the highest bidder, for cash, subject to all delinquent state and county taxes, which property is held by Latah county, under and by virtue of tax deeds, and is known and described as follows, to-wit:

Southwest quarter of the northeast quarter; southeast quarter of the northeast quarter of section 28, township 42 north, range 3 West Boise Meridian.

# THE GENESEE NEWS

VOL. XXXVII GENESEE, LATAH COUNTY, IDAHO, FRIDAY, MARCH 12, 1926 NO. 37

### PUBLIC SCHOOL NOTES OF MUCH INTEREST

Miss Goldie Drake, north Idaho rural supervisor, visited the Genesee grade school Monday and Tuesday of this week. Although her work is with the rural schools she was here preparing for a rural teachers' meeting, to be held at the Genesee school on Friday, April 16. Teachers from Nezperce and Latah counties will observe the work done by Genesee teachers. Miss Drake will also do some demonstration teaching.

The morning session will be devoted to teaching and the afternoon will be devoted to general discussions. Problems relating to the teacher and the pupil will be discussed.

Miss Drake informs us that she expects from 25 to 30 rural teachers at this meeting.

The school participated in the American Legion national essay contest. The subject of the essay was to be a flag creed for the United States. Most of the grades made very good essays and all deserved praise. The three that were given prizes were Lorene Platt, first; Luella Freeman, second; and Cecilia Dwyer, third.

The Patriot's Flag Creed

Lorene Platt

I believe in the flag of the United States as an emblem of a Union; established upon the foundation of liberty, equality, justice and humanity; a bond which has cemented these States since 1776. One which always in time of need has sacrificed her men for a cause which was just, and, by the support of her citizens, has united the States into one of the strongest and most respected unions of the world.

I therefore believe that we, as individual citizens, should love and support her in time of war and peace, and should put forth our greatest efforts to keep her, the one thing next to God, sacred in all citizens' hearts.

Old Glory Forever Luella Freeman

We, the children of America, will honor and cherish the flag of this nation. Years of toil, years of sacrifice have made our home "The America," and we in honor of those who struggled here to save the nation that we so love and cherish, will do our best to uphold our flag, which stands for the freedom that those great men and women gave us.

We hereby pledge ourselves to Our Country and to the Stars and Stripes which will wave above this nation under God forever.

The Flag Creed of the United States Cecilia Dwyer

I believe in the United States Flag, the emblem of the three great principles: First, Liberty--liberty of thought and expression of thought, and, lastly, liberty of jurisdiction. Second, Sacrifice--the Flag stands for the country, for which all its people are willing to sacrifice their lives, as our brave boys have done so many--like when there were calls for help. And, third, Democracy. The United States stands before the whole world as an example of equality and justice, bravery and prosperity; a country in which its citizenship is considered one of the highest privileges that can be granted to its people.

Next to God, I will hold my flag, the symbol of freedom and fidelity, the beacon light of all nations.

### Seventh and Eighth Grades

In the spelling match that occurred last Friday afternoon in our room, Ida Foster the team had the fewest number of misspelled words. Ida, herself, has not missed any words and is likely to represent us in the preliminary contest, which occurs here the last of the week. The person who will represent the eighth grade class has not yet been decided.

### Grey Eagle News

Mrs. Robert Gray is reported on the sick list. Lorene Platt was a country visitor this week-end.

Elkie Wahl is again attending school at Grey Eagle.

Roy Huffman and family are moving to town this week.

Lester Ingle was absent from school Tuesday of this week.

George Wahl went to help the Gamble brothers the first of this week.

Jim Cameron and all his family were here for a week or so, but is quite well again.

Mr. and Mrs. Jake Herman spent Sunday at the James Cameron home.

Lester Gray and family were Sunday visitors at the J. P. Herman home.

Delpha Cameron has been quite ill for the past week, but is improving at present.

Mr. and Mrs. Roy Huffman and little daughter were dinner guests at the Harms' home Saturday.

Jim Cameron and Allison Scubfield spent Monday evening at the O. W. Harms home.

There was no school Monday as Miss Sloan, the teacher, was ill at her home near Lewiston.

Mr. and Mrs. Parks have been on the sick list the past week, but were improving at last report.

Lewelyn Berah was absent from school last week, and Doris Harms was absent Thursday because of illness.

Glady and Mable Harms, Robert Parks and Harry Perks spent Sunday evening at the J. C. Cameron home.

Several Grey Eagle "blue birds" and "red birds" were seen at school at Pine Grove last Sunday and afterwards flew to the canyon where they enjoyed a picnic lunch.

Summit News

Loyce Esser left for Wallace Tuesday, where he has work.

Miss James Qualey visited Mrs. J. Resenbo, who is quite ill, Saturday.

Cody Rader and family visited at the home of Ernest Peterson Sunday.

Mr. and Mrs. Colin Wilson and sons spent Sunday with Mr. and Mrs. Dick Green.

Mr. and Mrs. Leo Miller and Mrs. M. Reisenauer were Moscow visitors Tuesday.

Grandpa Wilson, who has been quite ill for some time, is somewhat improved.

Mr. and Mrs. F. O. Green and children spent Sunday at the Mike Reisenauer home.

Ralph Stucker, who has been on the sick list for the past three weeks, is again able to be up and about.

Mr. and Mrs. F. O. Rader, accompanied by Mrs. O. Rader and daughter, Jeanette, were Moscow visitors Friday.

Miss Kuntz, accompanied by three of her pupils, Chester Green, Irene and Loyd Qualey, spent the week-end at her home in Clifton.

### Russell Got "Bumped"

M. A. Russell, the general chauffeur on the Genesee Bullet, left Monday evening for Lewiston, where he will take a switch engine in the Lewiston yards. He was "bumped" by Roy Huffman from Spokane, who will in future sit at the throttle of the test-kettle at the head of our beloved Bullet.

Mr. Russell has been on this run for the past year or so and has made many friends here who were sorry to see a dog to the country and keeping it there for a time will not exempt it from tax when you return to town.

If you value your dog at \$2 or \$5, pay the price; if not, get rid of it, or it will be the painful duty of the city marshal to do it for you.

Harpole to Oregon

Mr. and Mrs. Claud Harpole left Saturday afternoon for their car for Eugene, Oregon, where they will go into the poultry business.

There will also be piano solos.

**Entertained at Dinner**  
Mr. and Mrs. Art. Hove entertained a dinner guests last Sunday, Mr. and Mrs. Henry Hanson and family, Mr. and Mrs. Wm. Borgen and family and Mr. and Mrs. Neia Lande.

**THURSDAY, APRIL 1**

**WILL BE**

**De Laval**

**Service Day**

**Bring in your De Laval**

We urge that every De Laval user bring his complete separator to our store for a careful inspection, which will be made free of charge. Should any part need to be replaced, due to unusual wear or accident, this will be done, the only charge being for the price of the new parts used—no charge for service.

A De Laval Representative will be with us to assist in this important work. Bring in your Separator complete on the date mentioned and get the benefit of his advice on the care and operation of your separator as well as the free service. It is our wish and that of the De Laval Company that every De Laval Separator give the best satisfaction at the least cost, and we urge you to take advantage of this free and useful service.

**Save Her Health, Youth and Time**

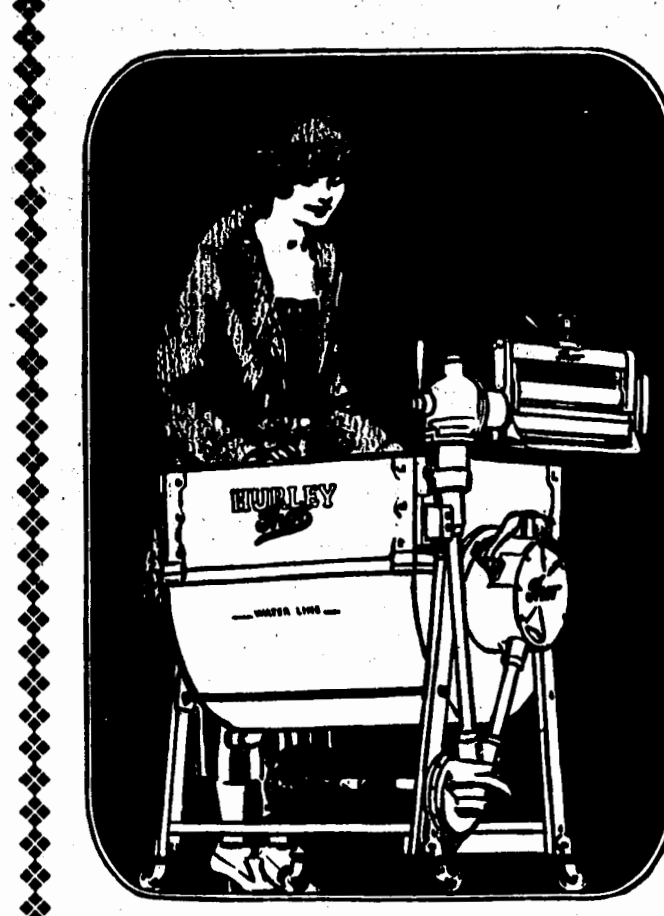

**HERE IS YOUR OPPORTUNITY**

**Thor Electric Washers and Ironers**

**Special Terms for a Short While Only**

**\$4.75 DOWN**

**25 Pounds Hurley Washing Machine Soap FREE**

**PERSONALS**

Mr. and Mrs. F. C. Shork spent several days in Spokane the first of the week.

Mr. and Mrs. F. E. Dicus spent Sunday in Moscow visiting their son, Fred, Jr.

Misses Helen and Wilma Casebolt, U. of I. students, spent the week-end with home folks.

Mr. and Mrs. W. W. Burr left Saturday to spend a short time visiting relatives in Spokane.

Miss Mayme Krier, who is attending the Lewiston normal, spent the week-end with her parents.

Miss Kathryn Bowden, a student at the U. of I., spent the week-end at the U. of I. Casebolt home.

Victor Casebolt and Jack Barnes drove over from Wilbur Saturday and spent Sunday with relatives here.

Mrs. Nellie Hayward spent several days of last week in Moscow visiting her sister, Mrs. A. C. Linehan, who has been quite ill.

Mr. and Mrs. W. M. Herman and Mr. and Mrs. Ira Hanson spent Sunday at the home of Mr. and Mrs. Eli Hickman at Spalding.

Miss Maurine Swanson, assistant at the local postoffice, returned today from spending a ten-day vacation at here home and in Lewiston visiting.

Mr. and Mrs. John Weber returned Tuesday from an extended visit in the East, visiting St. Louis, Mo., and other places in that section. They report a very enjoyable trip.

Dr. W. H. Ehlen returned home Monday evening from a several weeks' visit in California. Mrs. Ehlen stopped in Seattle, where she will spend several weeks with her daughter, Miss Maxine, who is attending the U. of W.

**Seed Inspection**

A very thorough inspection of the seed dealers establishments will be made during March and April, says C. B. Nelson, state seed commissioner. It is the plan to see that all seed sold shall be suitable for seeding purposes, as determined by the state seed law. Each dealer is responsible for seed sold or exhibited for sale and it must not only come within the requirements of the law so far as purity is concerned, but must also be properly labeled when exposed for sale. The above requirements also apply to farmers who sell clover and alfalfa seed in the state for seeding purposes.

Dealers or inspectors who are not entirely familiar with the law should secure copies from either the state seed laboratory, Boise, or from the branch state seed laboratory at Moscow.

Any agricultural seed offered for sale to be properly labeled or the bags will be condemned by the inspector until the labels are attached. The type of tag required by law may be obtained from the laboratories for 40 cents per 100. These are being furnished at cost for the convenience of the trade.

**Another Sign of Spring**

Baseball practice, marbles, jumping ropes, bluebirds and flowers.

**First Daffodils**

The News man doesn't want to brag at all, but we'll bet a lead nicker to a barrel of moonshine that we have the very first daffodils in bloom in this section of the country—that is, out-of-doors. The flowers have been out of doors all the time and several of them have been in full bloom since Sunday, March 7. Can you beat it?

The Kendrick Gazette will probably claim something bigger and better and earlier for the Polatch county.

**Resolution of Respect**

Whereas, The author of Life and Death has been pleased to call from amongst us, Brother John Lorang, one of the charter members of Genesee Council 1554, Knights of Columbus, and always an active and loyal member of church and council.

Be It Resolved, That we, the undersigned officers in the name of Genesee Council Number 1554, Knights of Columbus, extend our deepest sympathy to the bereaved family, assuring them that our grief is second only to theirs, and that our brother's memory will remain ever sweet and wholesome to those who had the privilege of his generous friendship.

Also Resolved, That these resolutions be spread upon the minutes of the council and published in the local paper and a copy be given to the bereaved family.

Joe N. Hasfurther,  
Rev. L. C. Godschaal,  
Otto Kretschmer,  
Committee.

**De Laval Day Changed**

Thursday, April 1, will be De Laval service day at Herman's, instead of April 5, as announced. See ad. elsewhere in this paper.

A Compelling Story of the Romantic West
THE FIGHTING RANGER
By F. J. McCONNELL and GEORGE W. PYPFER
(Copyright 1925—)

Continued from last week.
CHAPTER 34
Revelation
Mary, watching the sky from the speeding automobile, uttered a shriek of horror as she saw the two planes shoot ahead for each other, crash, and locked together, start dropping, a mass of shattered, smoking debris. "They'll all be killed," she screamed.

"At the letter 'D,'" he muttered. He followed the trail indicated by the map, and finally stumbled upon the narrow winding passage between the rocks leading to the cave. On he strode, into the cave. He found Buck, lifting and dropping handfuls of the treasure, still gloating with misery joy over the piles of marvelous gems and glittering gold. As Terence appeared, he gave a cry like a trapped animal, then whipped out his gun. Terence made a leap for him and knocked it out of his hand. The men rolled about in the treasure in a mad rough-and-tumble.

"Her plane broke away as we neared ground, and fell under us," explained Terence. "I saved Bud and I—but she, poor fellow, is in a terrible shape." They all bent over the injured woman. She was recovering consciousness, but was writing in great agony from her injuries. "I guess—the game's up—I guess I'm done for," she quavered. "Stella Monroe, why have you been aiding the enemies of the Marshalls?" Terence asked.

"The love of adventure—and riches promised as a reward—'Taggart'—the suffering woman muttered. "But the treasure is on the Marshall land—these men are wolves—merciless pirates robbing Mary of her one chance to save her father and his ranch," said Terence. Mary's arm encircled Stella, and she was trying to assuage her suffering by propositioning her.

"Forgive me—if you can," she murmured. Muttering her strength, she went on with an effort: "It is not too late. The treasure is in a hidden cave near the trail that winds up the face of Sierra Diablo. The secret of its location was written on a tiny slip of paper—concealed in the topaz—the topaz that Buck McLeod stole from Taggart. That was the secret Terence drew from his pocket the copy of the map he had made. "Here, can you show us where on this copy of the map?" he asked. "There, at the letter 'D'—that is the cave, said Stella pointing. "McLeod is waiting for me there now—for me to bring back his gang—" The woman fell back in a swoon. "She has overstrained herself," said Mary sympathetically. "We must get her to a hospital at once."

"Poor Bud had been watching the scene with pain, torn between his loyalty to the Marshalls and Terence, and his love and sympathy for Stella. They carried Stella to the car. "Rush her to Pico for medical aid," yelled Terence. "Then bring the aircraft and a posse to Sierra Diablo with all possible speed." "But aren't you coming with us?" Mary asked. "I'm going to the cave of the Yak-quis," Terence answered. "I have sworn to get Buck McLeod—alone!" They tried to dissuade him from his solitary, dangerous mission, but their pleas were unavailing. He was determined. Mary made Stella as comfortable as possible in the car, taking

her place beside her to care for her, the others boarded the machine, and Terence watched them off on their way. Then he strode off for his lone man hunt. After a hike of more than two hours, Terence came to the base of Sierra Diablo. He took out his map, studied it. "At the letter 'D,'" he muttered. He followed the trail indicated by the map, and finally stumbled upon the narrow winding passage between the rocks leading to the cave. On he strode, into the cave. He found Buck, lifting and dropping handfuls of the treasure, still gloating with misery joy over the piles of marvelous gems and glittering gold. As Terence appeared, he gave a cry like a trapped animal, then whipped out his gun. Terence made a leap for him and knocked it out of his hand. The men rolled about in the treasure in a mad rough-and-tumble.

"I've locked you before, and I'm going to lock you again—with my bare hands," Terence threatened, as they lay, temporarily separated, after a whirlwind of wild blows. The two men jumped at each other, and the combat was on in earnest. Buck, realizing he was no match for Terence, and in fear, was maneuvering for a break to the entrance and escape. But Terence blocked the way. At each attempt Buck made to run for it he was met by a row of hard knuckles which sent him flying back into the cave. Buck gave up that alley of escape finally, and retreated back into the cave. Terence followed. He was dazed and started by the untold heaps of glittering treasure that lay about him, so far surpassing even his wildest expectations, but he kept his mind nevertheless to the business at hand. "And it was this Sinclair—the same man—as killed Black Benwell. But old Marshall was driven from his ranch, hunted for years, and finally convicted for it. Sinclair fired the shot from hiding while Marshall and Benwell grappled—just when Marshall's gun barked by accident. Sinclair treated Marshall's ranch—for the treasure he knew was on it." "Who is this Sinclair?" Terence demanded. "Where is he?" Buck snarled, with hate: "The snake—he changed his name—an's looks. The double-crosser. He is—"

Buck paused. Terence's hand, clenching his throat, tightened, menacingly. "Speak—quick—who is he?" he demanded. "He's—Topaz Taggart!" (To be Continued)

Years of service to the travelling public have made us expert in making you feel at home. Unobtrusive service by courteous employees at the Coeur d'Alene Hotel, Spokane. "The Hotel With a Personality." —Adv.

When Maples Turn. The latter part of September or early October will generally see the red maples clothed in scarlet, says the American Tree Association. The wood of the red maple is very heavy, close-grained, easily worked, and not very strong. It is used in considerable quantities in the manufacture of furniture, wooden ware, flooring, and gunstocks.

Every stop the royal Princesses make is at little towns which have their own distinguishing quaintness. Alert Bak brings immediately to mind the grotesquely carved and painted totem poles. The trip from Vancouver divides naturally into two parts. From Vancouver to Ketchikan the channels are narrow with heavy timber right down to the water's edge, with numberless coves and straits and narrow troughs running up into the mountains, for miles from Ketchikan the stretches of waterways are wider with glaciers and rugged mountains with waterfalls tumbling here and there. The atmosphere is not a fresh and blood creature's but a fairer presence. Although when the daylight steamship "Princess Louise" next evening's charming sister "Princess Alaskan" are outlined against a background

of snow-capped, rose, sun-tipped mountains whose reflection gleams in the swift flowing waters of the narrow channels, they look like beautiful shans from fairland. Get Insurance First Says State Director

If you intend to build a barn or paint a house or dig a well and hire somebody to help you, it would be advisable to let the Department of Labor and Industries all about it when work starts. There is trouble just around the corner for the man who hires help for construction work he is doing about his own place. If an employee should fall off a ladder, smash a finger or otherwise injure himself he will post rights to a state doctor for medical aid and will file for personal injuries and the resultant compensation for lost time. If the employer has not notified the department that he has employed men in hazardous occupations and sent in his medical aid and industrial insurance premiums the department is obliged, by law, to speak harshly and impose a fine. To be in first-class standing with the department one should estimate the total amount of his payroll for the home repair work to be done by hired labor, send in 2 per cent of the total payroll for industrial insurance and add 4 cents a day for medical aid fees.

Back Lame and Achy? The Advice of This Spokane Resident Should Help You to Get Well. Do you suffer nagging backache? Feel dizzy, nervous and depressed? Are the kidney secretions irregularly breaking your rest? Weak kidneys give warning. You have backache; rheumatic twinges. You feel weak, tired, all wrong-out. Head the warning. Don't delay! Use Doan's Pills—a stimulant diuretic to the kidneys. Your neighbors recommend Doan's. Here is a Spokane case. David Carlson, carpenter, N 7 Maple St., says: "My back was sore, stiff and lame and there was a hurting in the small of it. Stooping caused the sharp pains to dig in deeper. The kidney secretions were scanty and unnatural. A couple boxes of Doan's Pills rid me of the complaint and I have had no return of it."

Orange Trifle 1 tablespoon Gelatine 1/2 cup Cold Water 1/2 cup Boiling Water 1 cup Sugar 1 cup Orange Juice 1 cup Orange Juice 1 tablespoon Lemon Juice 1 pint Heavy Cream Soak gelatine five minutes in cold water, dissolve in boiling water, add sugar, orange juice, grated rind and lemon juice and strain. Pour one-half the mixture into a shallow pan, dip in cold water, and chill. Set bowl containing remaining mixture in pan of ice water and stir constantly, until mixture begins to thicken; then fold in heavy cream, beaten until stiff. Turn into a ring mold, first dipped in cold water, and chill. Remove mixture from ring mold to serving dish and garnish with glazed cherries, cut to represent flowers, and angelica cut to represent leaves and stems. Fill center with first part removed from pan and cut in cubes.

Unless you see the "Bayer Cross" on package or on tablets you are not getting the genuine Bayer Aspirin proved safe by millions and prescribed by physicians over twenty years for Colds, Headache, Neuritis, Lumbago, Toothache, Rheumatism, Neuralgia, Pain, Pain. Each unbroken "Bayer" double-cross contains proven directions. Handy boxes of twelve tablets cost few cents. Drugists also sell bottles of 24 and 100.

Bayer Aspirin Proved Safe Take without Fear as Told in "Bayer" Package Does not affect the Heart

Automobile Men Boost for Lola Pass Highway WALLA WALLA—Representatives of the Independent Gas & Oil Dealers' Association of the Blue Mountain of Eastern Washington, Oregon and Central Idaho, meeting here last night, passed a resolution calling upon the senators and representatives from the three states to use all proper measures to secure appropriations for completion of the Lewis and Clark Highway through Lola Pass.

U. S. Gobs to Form Band A band composed of red rolling stock sailor lads, such as the 19 members of the Philadelphia Navy Yard Band who will be part of U. S. Navy Band being organized in Washington for performances at the Sesqui-Centennial International Exposition opening in Philadelphia on June 1. Besides the Philadelphia contingent, its members will be enlisted from the U. S. S. Texas, the U. S. S. Arkansas, and other navy bands.

Nurmi May Run at Sesqui Nurmi, the crack distance runner of Finland, who was a sensation in this country a few seasons ago, will be invited to participate in the National Amateur Track and Field Championships of the United States by the Sesqui-Centennial Games Committee, it has been announced. These events will be held at the Sesqui-Centennial Exposition on June 25, 26 and 28.

Chorus of 3,000 to Sing Associated Glee Clubs of America, the largest of its kind in the country, has accepted the invitation of the Sesqui-Centennial Music Committee to present a characteristic program of part songs in a concert to be given at the Exposition in November. The chorus of 3,000 male voices will be chosen from among professional and non-professional groups.

Here Lies a Farmer. His work is done. Earth he tilled by the light of the sun. The peace of the stars was his of nights; He lived according to his lights—Farm and Fireside.

PERFECTION PLASTER WALLBOARD for artistic interior For walls and ceilings there is no material that better lends itself to artistic treatment than "PERFECTION" Plaster Wallboard. The surface is especially adapted for the use of paint, wallpaper or calcimine, and our latest product, "Perfection" Sand-Tone Finish, produces the rough tinted surface now so popular.

Ask your local dealer for sample and further information, or write to WESTERN WALLBOARD CO. 4500 9th Ave. So. Seattle

Displays Her Decorative Instinct In Desserts As Well As Paintings

A CAREER as a successful "Decorative Display Artist" would seem to be enough to keep one woman busy, but Sara Whitney Olds finds time to play with her two-year-old boy, and sometimes even to cook dainties for him. When she does indulge in this culinary recreation she usually chooses a gelatine recipe, for she knows that gelatine is rich in the growth-producing element of lysine, and is therefore particularly good for children.

Mrs. Olds paints in oils on saith and other materials, and her subjects range from a miniature to a stage curtain. Naturally she takes full advantage of the decorative possibilities in the gelatine type of molded dessert, and the finished effect is enjoyed as much for its aesthetic appearance as for its undoubted deliciousness.

Mrs. Olds is shown preparing Orange Trifle, which she makes as follows: 2 tablespoons Gelatine 1/2 cup Cold Water 1/2 cup Boiling Water 1 cup Sugar 1 cup Orange Juice 1 cup Orange Juice 1 tablespoon Lemon Juice 1 pint Heavy Cream Soak gelatine five minutes in cold water, dissolve in boiling water, add sugar, orange juice, grated rind and lemon juice and strain. Pour one-half the mixture into a shallow pan, dip in cold water, and chill. Set bowl containing remaining mixture in pan of ice water and stir constantly, until mixture begins to thicken; then fold in heavy cream, beaten until stiff. Turn into a ring mold, first dipped in cold water, and chill. Remove mixture from ring mold to serving dish and garnish with glazed cherries, cut to represent flowers, and angelica cut to represent leaves and stems. Fill center with first part removed from pan and cut in cubes.

IDAHO RIFLEMAN STARTS WELL In the first stage of the Ninth Corps area rifle match the Idaho team scored a score of 1892 out of a possible 2,000, according to information given out by Charles H. Hart, Jr., in charge of practice. The second stage is being fired now and the third and final stage will be fired next week.

"The shooting this year is far above that of 1925," said Lieutenant Hart. "If the other stages are shot as well as the first, Idaho should win the match."

McCORMICK SELECTS NEW LINE AGENTS

WITH agencies selected throughout South America, the McCormick Company has completed arrangements for the operation of the Pacific-Argentine-Brazil Line, purchased recently from the Shipping Board. O. H. Eisenberg, director of the line, has been named as the new agent for the McCormick Company, with headquarters in Seattle, who returned recently from San Francisco where he conferred with McCormick officials, announced that the Munson Steamship Line has been appointed general agent in Buenos Aires for the Pacific-Argentine-Brazil Line. The Munson Line has been in the general cargo business with South America for many years and was selected by the Shipping Board at the close of the World War to develop passenger trade with that part of the world. The Munson interests are the owners of the four fast passenger liners, American Legion, Southern Cross, Pan-American and Western World, plying from New York to ports on the East Coast of South America.

Mr. Eisenberg said that the Federal Express Company, well known in South America as steamship agent, has been designated as the representative of the McCormick Company in Rio de Janeiro. At Montevideo, Christopherson Brothers will act as general agents for the new owners of the Pacific-Argentine-Brazil Line. The firm of Dodero Brothers, Ltd., has been appointed agent at Bahia Blanca. The Archer Coal Depot Company at Trinidad and Gardner, Austin & Co., at Bridgetown, Barbados, have been designated as agents to look after the interests of the McCormick Steamship Company at Lower Caribbean ports.

"We feel that we are very fortunate to obtain the services of these reliable and well established companies to represent the interests of the McCormick Steamship Company in their respective areas," said Mr. Eisenberg. "It is our desire to establish the very highest type of transportation from the ports of the Pacific Coast to the countries on the East Coast of South America. We will have the

The BULL'S EYE

Editor and General Manager WILL ROGERS

News Taken from the Daily Papers

A headline in the paper says "In their war China won't fight on rainy days." They don't mind getting shot, but they won't get wet.

Imagine a sign as you start to enter China: "RAIN. NO WAR TODAY." If that was the custom in this country, we could prevent all wars by announcing that all the fighting must be done in Portland, Oregon.

Another paper asks, "Where does a Florida Real Estate man go in the summer?" He goes to California to his all-the-year-round home.

A newspaper asks "Why does a President of a concern always talk at the Company's banquets?" It's an incentive to the workers, who say, "If that's all he knows I may be President some day."

Another paper suggests, "The cheapest way to enforce Prohibition is to have everyone that drinks watched." Who is going to do the watching?

An article in a Business Man's magazine inquires, "What business in this country has the largest turnover?" Cucumbers for supper have the largest turnover, with Fords a close second.

The Congressional Record speaking editorially, says, "Bull Durham is the best Tobacco that ever entered these States halls."

There will be another piece in this paper soon. Watch for it.

HALL'S CATARRH MEDICINE has been used successfully in the treatment of Catarrh.
HALL'S CATARRH MEDICINE consists of an Ointment which quickly relieves by local application, and a fluid which is of real benefit to the system. Our columns are open at all times for the furthering of anything that will help the

MOSCOW COMMERCE BODY FAVORS COUNTY AGENT

At a meeting of the Moscow Chamber of Commerce, in conjunction with farmers of the Moscow district, held some time ago, the question of obtaining the services of a county agent was taken up and discussed at length with the result that a committee consisting of Rosa Adams, S. Heckathorn and Geo. N. Lamphere was appointed to take the matter up with the county commissioners, which they did, and the report was rejected.

The report submitted by the committee to the commissioners follows: "Why is Latah county failing to take advantage of the opportunity afforded to employ a county agent?" is the very natural inquiry of the committee appointed to interview the county commissioners with reference to an appropriation for an agent. It appears to the committee that the county is standing on the sidelines and watching the procession pass by. Other counties are going ahead in agricultural improvement work and are taking advantage of special federal and state service available for farmers, while our own county is showing no interest. The county farmer, therefore, that an agricultural agent is not employed in this county means a loss to its farmers and business interests.

"We have been wondering whether Latah county is to get any of the government money for the improvement of the college authorities we find that already through the activities of the county agent, Kootenai county has ordered three carloads, or on the road three carloads totaling 95,000 pounds; Bonner county, through the cooperation of the county agent, has ordered farmers and farm organizations, has ordered four carloads, or a total of 86,300 pounds. These two counties, where aggressive county agents are employed, have ordered a total of 161,800 pounds of pyralin. In these counties, at the conservative estimate of saving 8 cents a pound, there has been saved a total of \$14,544.00, or about three times the annual cost of county agents for these two counties. It was further found that the college that numerous requests for the powder have been received from various parts of Latah county and information has been freely supplied to the farmers as to the method of getting it. It seems that there is no public agent to take the leadership in assembling the orders and going through the necessary detailed operations of various descriptions and in the county on a carload basis. There seems to be little probability, therefore, that Latah county will get any of the cheap powder this year.

"We also regret the fact that there was no one to take the leadership in organizing the squirrel control campaign to get county-wide destruction of squirrels. Furthermore, the saving to the farmers of from \$1 to \$1.50 an ounce on strychnine made each week, to make the required 140,000 miles by the time they reach New York. Drop about 100,000 miles would still make the girls travel a bit—at an average of about 194 miles per week, seven days a week each week since they left home, for approximately 28 weeks.

Verily, the Ford are a wonderful machine.
Country Correspondence
The News would like very much to have a correspondent in the Rimrock and Cow Creek neighborhoods. There is much good news to be obtained in both of these live communities and they should be represented among the list of country correspondents. Other communities that we know what is being done in your neighborhood. Probably
The lion and the lamb had just lain down together. "As for me," remarked the lion, "I should like to be called at 7:30 in the morning." Said the lamb: "Don't bother to call me; I'll probably get up when the lion does."
—Detroit Free Press.

Bow Wow!
In her suit for divorce a Los Angeles woman complained that her husband had bought an automobile for his pet dog in which she was forbidden to ride.

WHAT HAPPENED HERE TWENTY YEARS AGO

J. P. Michaelson and family arrived here Tuesday from Plainville, Minn., to make this section their home. Mr. Michaelson some months ago having purchased the Kempf farm south of town.

The following ladies paid a surprise visit to Mrs. Phipps at Uniontown Monday, going down on the morning train and returning in the evening: Mrs. J. L. Conant, Mrs. C. F. Burr, Mrs. J. S. Larrabee, Mrs. Wm. McMahon, Mrs. E. T. Platt, Mrs. W. R. Hickman and Mrs. W. E. Smith. The occasion was the birthday anniversary of Mrs. Phipps.

The groundhog theorists certainly have had an inning this week. Not for 35 years has such weather at this season of the year been experienced on the Pacific coast as the weather here has been during the past week. The storm opened Saturday afternoon with a cold wind from the east. Residents retired Saturday night little realizing that the night would be one of the coldest of the winter and few precautions were taken against the freezing of water pipes, house plants, etc. As a result, Sunday morning found a sad state of affairs. Fully one-third of the users of city water in the town had frozen and burst pipes. Sunday night snow began falling and continuing until Wednesday morning, fully eight inches covering the ground, making fairly good sleighing. In the Genesee territory it is believed that very little damage has been done to winter wheat and as fruit trees were not very far advanced it is not believed that the crop will be materially affected.

In some sections the wind of Saturday night attained a velocity of 50 to 40 miles per hour and on the coast as high as 60 miles. In some sections stock had been turned out to range and a considerable loss will result.
Sounds "Fishy"
The following news item appeared in the Lewiston Daily Tribune of Saturday morning:
"On Long Trip—Four young ladies arrived in the city yesterday driving a 1914 model Ford touring car, now being on the return from a trip over the United States that will have covered them 140,000 miles upon arriving at New York, from whence they started on Sept. 1, last year, according to their statements."
Sounds rather "fishy" to a fellow who has an intimate acquaintance with Ford agents and who has seen the composite got on an extra 100,000 miles or else the girls had been on a fishing trip to California or Florida.

Figure it out. Allowing 3,000, the distance from Lewiston to New York, the girls having been out 28 weeks, or thereabouts, would have to travel 4,892 miles a month, or about 700 miles per day, seven days each week, to make the required 140,000 miles by the time they reach New York. Drop about 100,000 miles would still make the girls travel a bit—at an average of about 194 miles per week, seven days a week each week since they left home, for approximately 28 weeks.

Verily, the Ford are a wonderful machine.
Country Correspondence
The News would like very much to have a correspondent in the Rimrock and Cow Creek neighborhoods. There is much good news to be obtained in both of these live communities and they should be represented among the list of country correspondents. Other communities that we know what is being done in your neighborhood. We will guarantee that more than 75 per cent of the people in either of these communities read what the people around Pine Grove, Summit, Grey Eagle and "Sleepy Hollow" are doing and are interested in it.

PUBLIC SCHOOL NOTES OF MUCH INTEREST

Spelling Contest
The preliminary spelling contest will be held at the Genesee school building at 2 o'clock Saturday afternoon, March 20. Pupils from each school are entitled to enter the preliminary contest at the center that is easiest to reach. Each school will have a try-out in each division. There are six divisions, each grade from the third to the eighth (inclusive) constitutes a division. Words from all divisions will be taken from the New World spellers. The six divisions (one from each division) missing the least number of words (oral and written) will be the contestants at the county contest.

The contest will consist of both oral and written words; 25 words to each pupil for oral spelling and 50 words to each pupil for written spelling. The county contest will be held at Moscow. The winners from each grade from each center are eligible to enter the county contest. County contest, first prize, \$5.00; second prize, \$2.00. Inter-county first prize, \$10.00. Words to be written and read by each student has been issued twenty-five hundred dollars. The purpose of this study is to teach the student how to watch the rise and fall of market quotations.

Seventh and Eighth Grades
Our attendance has improved during the past week. There is room for further improvement, however. Lester Putnam, who is absent from school, is reported to have the mumps.
Ida Foster will represent the seventh grade in the preliminary contest, which is to be held here next Saturday. The eighth grade class will be represented by Lela Cesta. Those pupils winning in the preliminary contest will go to Moscow to participate in the county contest the 27th of this month.

Fifth and Sixth Grades
Dolores McAllister will represent the sixth grade and Adeline Dreher will represent the fifth grade in the preliminary spelling contest to be held Saturday afternoon.
We have 100% attendance in this room again. Our students are well and happy. Most of the pupils in this room have finished writing the drills for the Palmer Method awards. The fifth graders are writing for the Palmer Method button and the sixth graders are writing for the merit button.

Third and Fourth Grades
Gaynell Hanson, Florence Dean and George Dean are back in school again after a period of absence.
Thomas Sanford and Howard Hanson, who have been quite ill, are still absent from school.
A new pupil, Annabell Huffman, daughter of Mrs. Gray Eagle, who entered the third grade Monday.

The third and fourth grades held their spelling contest try-outs and by elimination Ruth Alice Vanouck has been found to be the best speller in the fourth grade, and Richard Gardner in the third grade.

TOBIN FARM HOME IS DESTROYED BY FIRE

The farm home on the Tobin ranch, about a mile north of town, was completely destroyed by fire last Thursday evening (March 11), with insurance covering the property in question.

The fire bell was rung last Thursday evening and in a short time a large crowd was on hand to see where the fire might be and when it was announced that the farm home of Mr. and Mrs. Joe Tobin was on fire many autos were in readiness and a good-sized crowd was soon at the Tobin ranch but in the meantime the fire had gained such headway that nothing toward saving the house could be done. Mr. and Mrs. Tobin had been in Genesee and were on their way home when the fire started but they did not get to the ranch until they reached there some half-way home from town, when they discovered their home was on fire, and double haste was made.

A young girl was staying at the Tobin home and had started the fire by turning on the gas stove and getting supper and it seems that she had gathered up some greasy rags that had been used around the gasoline engine in the pump house adjoining the residence and had put them in the stove, causing the flames to shoot upward and over the chimney, where they ran down the wall, covering quickly caught fire and within a very few minutes the entire room was enveloped in flames. The girl took the children to safety and called Wm. Roskammer and Joe Doyle, who were at that time at work around the barn, but they could do little to save anything, and very little was saved from the home.

The farm buildings had been insured in the Latah County Farmers' Mutual Fire Insurance company, with \$2,000 on the house and \$1,000 on the contents, but it seems that the policies had expired on March 9 and the fire occurred on March 11. Nels Lande, local representative of the insurance company, had called Mr. Tobin's attention to the date of expiration and Mr. Tobin had made trip or two to the insurance company, but as he was in Genesee to try and locate the policies, one of them having been taken out by his father, Jas. Tobin, and supposedly at Clarkston. But it seems they were unable to locate the policies at once and in the meantime the fire occurred. It is believed that the insurance in rather an unsettled condition, but it was evidently Mr. Tobin's intention to renew his policies or he would not have made any effort to locate them.

Among the Sick
Mrs. Louis Rogers is ill at her home with flu.
Mrs. Otto Stucker is confined to her home with flu.
Mrs. Minnie Springer is much improved and is again able to sit up.
Mrs. John Sullivan was quite ill with flu last week, but is considerably improved at this time.
Mrs. Clara Wood, who has been quite ill for the past two weeks, is still confined to her bed last week with the flu.

Mrs. E. W. Vanouck, who was confined to her bed last week with the flu, is again able to be around the house.
Chris. Hanson, son of Mr. and Mrs. John Hanson, suffered a slight relapse Wednesday night but no lasting serious results are anticipated.

The St. Patrick's Dance
The dance given by the high school in the American Legion hall Wednesday night was very well attended and much enjoyed by those in attendance.
Two dances in Lewiston took quite a number from here, especially the Elk's dance, of which order there are a number of members here.

Underwent Operation
Mrs. Herman Broemmeling underwent quite a serious operation at her home on Wednesday, Dr. W. H. Ehlen and Dr. W. A. Burg of Uniontown doing the work.

SEMI-LOCAL NEWS CLIPPED FROM EXCHANGES

Will Get Eye Full
A scientist is now constructing a telescope that will bring the moon within ten miles of the earth. If the man in the moon is still looking, he'll get an eye full.—Press (Deary).

Finishing Surfacing This Week
Engineer E. M. Boech came up from Julietta Wednesday of this week on a business. He stated that the surfacing of the Julietta streets would be finished by the last of this week.—Kendrick Gazette (Mar. 12).

Has Sprained Ankle
Phil Schooler was brought to Orofino Tuesday for medical attention. He is round on crutches as the result of a severely sprained ankle, which will incapacitate him for some time. Phil is chairman on the N. P. engineering crew at the American mine.—Tribune (Orofino).

Predict Early Harvest
The past week has brought much moisture to this section. There have been several fine rains which have thoroughly saturated the ground, providing an abundance of moisture which is welcomed by the farmers. Owing to the mild weather conditions which have prevailed throughout the winter, fall-sown grain is in splendid condition and has made fine growth. An early harvest is predicted by many.—Caldesac Enterprise.

Funeral of Genesee Pioneer
The funeral service for John Hjelm, pioneer resident of the Genesee district, who passed away at the home of a nephew at Astoria, Oregon, where he had made his home for some time, was held Thursday afternoon from the Genesee Valley Lutheran church, Rev. G. A. Peterson, pastor of the church, conducting the service. Mr. Hjelm was past 80 years of age.—Star-Mirror.

Can't Fill It
The railroad fill at Camp 6 is causing the section crew considerable trouble right now. It settles and slides a little every day. Trains are still passing over it, but in the most careful manner possible. The spreading of the fill began after the earthquake of last summer and has continued ever since, while hundreds of tons of dirt have been dumped in to keep the track up to proper level. The final solution may be either fancy or giving the railroad people no end of trouble.—Latah County Press (Deary).

She Had Speed
"The stenographer we require," ran the ad, "must be absolutely accurate, and must have human intelligence. If you are not a crackerjack, don't bother us."
One who answered the ad. wrote that she noted their requirements and continued: "Your advertisement appeared strangely—stronger than prepared matters. I have searched Eirup, Airpore Ely and Hoboken in quest of someone who could use my talents to advantage. When it comes to this chin music proposition, I have never found man, woman nor distasteful who could get to first base on either fancy or fact, giving me a write shorthand so fast that I have to use a specially prepared pencil with a platinum point and a water-tough attachment, a note pad of asbestos, ruled with sulphuric acid and stitched with catgut. I run with my cutout open at all speeds, and am, in fact, a guaranteed, double hydraulic welded, drop-forged and oil-tempered specimen of human lightning on a perfect 36 frame, ground to one-thousandth of an inch.

"If you would avail yourself of the opportunity of a lifetime, write me, but unless you are fully prepared to pay the tariff for such service, I can't bother me, as I am so nervous I can't stand still long enough to have my dresses fitted."
She got the job.
—Wall Street Journal.

HENRY REES, GENESSEE PIONEER, DIES SUDDENLY

The Genesee community was shocked Tuesday morning, March 16, when the news was spread that Henry Rees, a pioneer of this section, had been found dead in bed that morning, when he was called for breakfast, about 8 o'clock.

Mr. Rees had long been a sufferer with rheumatism and it was a task for him to walk any distance at a time, but he was a patient sufferer—never complaining—and none knew what he endured. He contracted a severe cold while visiting his daughters at Tokon last fall and recently had had the flu, but at the time of his passing he was seemingly no worse than he had previously been. The immediate cause of death was apoplexy. Had he lived a little more than two months longer he would have been 77 years of age, but he and his faithful wife have enjoyed almost 54 years of life together—a privilege granted to few people. While his passing will be deeply mourned, he was granted a stay of more than the allotted time of three score years and ten on this earth.

Henry Rees was born on a farm near Clarkmoss, Oregon, June 22, 1849. He grew to young manhood in that section, going from there to the Willamette valley, Oregon, where he worked for a few years and later going to Walla Walla, Wash., where he had the flu, but at the time of his passing he was seemingly no worse than he had previously been. The immediate cause of death was apoplexy. Had he lived a little more than two months longer he would have been 77 years of age, but he and his faithful wife have enjoyed almost 54 years of life together—a privilege granted to few people. While his passing will be deeply mourned, he was granted a stay of more than the allotted time of three score years and ten on this earth.

Henry Rees was born on a farm near Clarkmoss, Oregon, June 22, 1849. He grew to young manhood in that section, going from there to the Willamette valley, Oregon, where he worked for a few years and later going to Walla Walla, Wash., where he had the flu, but at the time of his passing he was seemingly no worse than he had previously been. The immediate cause of death was apoplexy. Had he lived a little more than two months longer he would have been 77 years of age, but he and his faithful wife have enjoyed almost 54 years of life together—a privilege granted to few people. While his passing will be deeply mourned, he was granted a stay of more than the allotted time of three score years and ten on this earth.

While Mr. Rees was not a member of any lodge nor made profession of any particular creed, yet he was a man beloved by all whom he knew—and his friends were numbered by his acquaintances. He was a loving husband and an indulgent father. While his activities were necessarily limited by his infirmities for many years, his patience and endurance might well be emulated by others.

Funeral services were held Thursday afternoon at 2 o'clock from the Christian church, Rev. N. E. Beach, pastor of the church, officiating. Burial was made in the I. O. O. F. cemetery.

The pallbearers were Jas. Hanson, Sim Curran, Geo. Mochel, Jas. Montague, John Meyer and Ed. Roderick. One daughter, Mrs. Peterson, was unable to be present at the funeral on account of illness in her family.

We wish to extend our sincere gratitude and thanks for the many kind acts and for the assistance of our friends and neighbors during our hour of trouble and we also wish to extend our thanks for the many floral tributes. We are duly appreciative of all your kindness.
Mrs. H. Rees and Family.

Death of Father
M. Hennes, father of Mrs. Victor Hasfurth, passed away Monday night at the home of Mrs. Hasfurth, in Moscow, aged 84 years.

Mr. Hennes was a resident of Clarkston, where he resided for many years, but when he became ill, his daughter took him to her Moscow home because of the poor health of Mrs. Hennes, so he could receive proper attention. He is survived by two or three week old children.

No particulars are available at this time other than that the body will be brought here for burial.

Expressive
He was only four and one of those diseases children have had left him weak and spiritless. Learning his little head against his mother's arm he said woefully, "Oh, mamma I feel just like a broken toy."

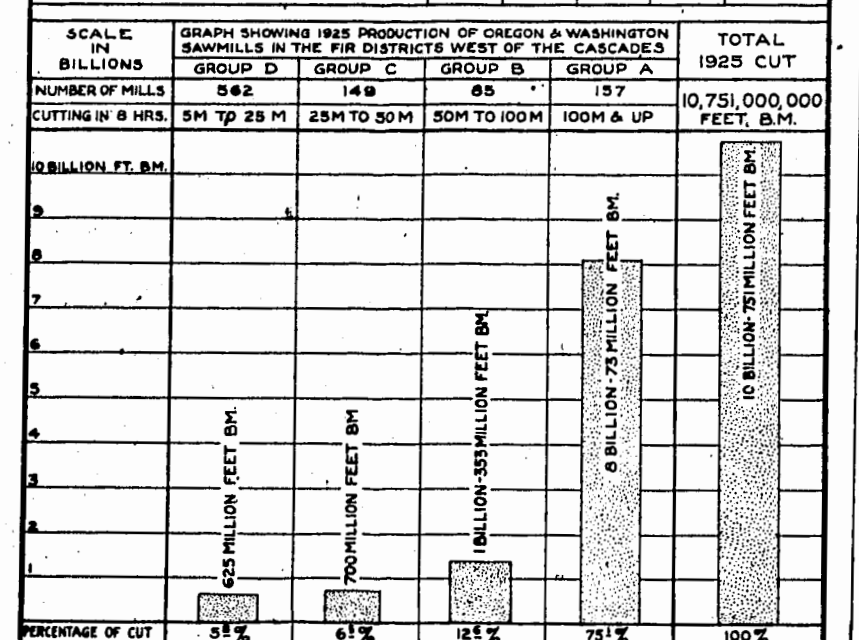

**WESTERN OREGON AND WASHINGTON  
PRODUCED HALF OF U. S. SOFTWOOD IN 1925**

**SURVEY 1925 PRODUCTION  
OREGON AND WASHINGTON SAWMILLS  
FIR DISTRICTS WEST OF CASCADE MOUNTAINS**

SURVEY MADE AND GRAPH PREPARED BY LEONARD L. LINDGREN, MEMBER OF THE FORESTRY DIVISION, U. S. GEOLOGICAL SURVEY

DISTRICTS	NUMBER OF SAWMILLS	NUMBER OF EMPLOYEES	NUMBER OF MILL CUTTING IN HOURS	TOTAL NUMBER OF MILL FEET
1. SOUTHERN OREGON FIR DISTRICT	69	16	8	102
2. NORTHERN OREGON FIR DISTRICT	208	37	12	116
3. WASHINGTON FIR DISTRICT	96	33	18	29
4. SOUTHERN WASHINGTON FIR DISTRICT	33	16	6	22
5. SOUTHERN WASHINGTON FIR DISTRICT	8	3	4	13
6. TACOMA & VICINITY	40	14	13	35
7. PUGET SOUND-SEATTLE & VICINITY	39	13	9	25
8. NORTHERN PUGET SOUND-DIRECT MILLING	69	12	10	25
<b>TOTAL</b>	<b>562</b>	<b>149</b>	<b>85</b>	<b>157</b>

Statistics have estimated that 23,000,000,000 feet of softwood lumber was produced in the United States during 1925. Comparing this national total with the figures for the fir districts of Washington and Oregon, as compiled by the Four L, would indicate that close to 50 per cent of the softwood cut in this country last year was produced west of the Cascade Mountains in the two states named.

Included with the fir lumber produced in the Pacific Slope districts of the two states were large quantities of cedar, larch, hemlock, and spruce.

**TREATING POTATOES WITH HOT SOLUTIONS**

As it is well known by up-to-date potato growers, when cold solutions are used to treat potatoes, it requires a dip of from an hour to an hour and a half. This method takes considerable time and in order to overcome this loss of time methods have been perfected by which the length of dips can be reduced to two to five minutes.

In giving the farmers of Washington the hot formaldehyde and the hot methods of treatment, certain principles must be observed.

It is necessary always to treat the potatoes and keep them damp for 24 to 48 hours previous to using the sort of treatment recommended.

The hot formaldehyde treatment was perfected by the Iowa experiment station, and it is now in general use throughout the Mississippi Valley where potatoes are grown. It consists of making a solution of two parts of standard strength formaldehyde in 30 gallons of water.

Potatoes are then immersed in this solution after it has been heated up to between 118 and 121 degrees Fahrenheit. The potatoes are left in this solution for two minutes, after which they are taken out and put in piles six to eight inches deep and covered for two hours.

The hot formaldehyde method has the following advantages:

1. It saves time.
2. The strength of the solution does not diminish while being used as a treating solution.
3. It has the disadvantage that it requires that some sort of a Dutch oven be built for heating the solution.

Where a tractor is available the exhaust steam can be used to heat the solutions. As high as a thousand bushels of potatoes can be treated in one day by two men with proper equipment.

The hot corrosive sublimate solution is used extensively in New York State. It consists of dissolving four ounces of corrosive sublimate in hot water and putting this in 15 gallons of cold water. The solution is then heated up to from 111 to 113 degrees Fahrenheit, and the potatoes dipped in this solution for five minutes. They are then taken out and dried at once.

In using the hot corrosive sublimate method, the usual precautions in the use of this chemical must be observed. Both of these hot treating solutions are equally as effective as the cold solution. There must be, however, a little care used in keeping the temperature constant. For this reason it is necessary that the operator use a floating thermometer.

At the present time another new dip is being perfected, in which the potatoes can be dipped and immediately taken out, but it is in the experimental stage and is not to be given out for a year or two.

Prof.—And now, gentlemen, we get X equals zero. Vote from rest—Ge, all that work for nothin'—Sour Owl.

**MERCILESS WIND STORM WRECKS TOMB OF INDIANS ON MONTANA PRAIRIE MOUND**

A whirlwind recently wrecked the tomb of two Blackfoot Indian chiefs, Flat Tail and Drags His Robes, in the Two Medicine Valley of Glacier National Park, Montana.

Photograph shows how the rough board coffins were blown off their cupped mound and the bone remains of the braves ruthlessly strewn about the ground.

These Indians were laid to rest in this mound in November of 1903. Indian Agent Campbell of the Glacier National Park Reservation, will dispatch Indian police to the scene to pick up the scattered remains of the two chiefs and place them to mound, permanent rest beneath the ground.

**Oil Sprays Have Not Lost Favor**

Oil sprays appear to be in as great favor now as they were two years ago, says Claude Wakeland, experiment station entomologist for the University of Idaho.

"Certainly it is not true," Mr. Wakeland declares, "that in Southern Idaho the home-mixed sprays are causing abandonment of the use of oil. It is that they were used little last season because, due to extremely cold winter preceding, scale control was necessary in but few localities. For the same reason oil probably will not be used as extensively this season as in 1923 but this is not indicative that oils are looked upon with ill favor. Data collected concerning injury caused by oil sprays indicated that as much damage has been done by the commercial product as by the home prepared.

"Since oils were first used for control of insects on fruit trees many years ago there has been much talk about advisability of its use because of reported injuries to trees. It is true that there have been many cases of injury, some of them severe, but it is equally true that damage has usually resulted from improper preparation or careless use of oil emulsion. The Idaho Agricultural Experiment Station is not recommending the use of oil sprays to the exclusion of others nor condemning their use generally, but is endeavoring to determine the facts and to interpret them in a manner that will be of aid to horticulturists of the state.

"Free oil is injurious to fruit trees and when oil is spoken of as a spray it is always implied that it is used in the form of an emulsion. There is an extremely small amount of free oil in a properly prepared emulsion. Commercially prepared oils are made according to many different formulas and the formulas are frequently changing. Some have soap emulsifiers which render their use with hard water troublesome and dangerous. Where commercial oils are used it is necessary for the purchaser, when he must use hard water, to learn from the manufacturer whether the product can be used with such water.

"When home mixed emulsions are prepared the mixing must be done strictly according to directions. They may be used with hard water if they are prepared with calcium caseinate emulsifier but when soap is used the same difficulty is experienced as with the commercial product."

Ohio, famous for the beauty and perfection of her roads, is fast creating a reputation for safe highways. Under the direction of the State Department of Highways, numerous installations of the new Hi-Way guard are under way at dangerous spots on many of the important routes of motor vehicle travel. The guard is a heavy wire link fence about two feet wide and has already saved many lives. Frank A. Daum, state highway engineer, reports three accidents at a bridge approach on the Blanchard River near Findlay, Ohio, in which the occupants of the cars were saved by the guard within a week after it was erected.

**Chocolate Stains—Removing Them**

It is very easy to remove chocolate and cocoa stains from any fabric which is not affected by the action of water.

If the garment or material is washable, simply tub it in a lukewarm suds as you would if it were merely soiled.

If for any reason it seems desirable to remove the stain without washing the garment, it can be done successfully in most cases.

Place the soiled spot on a flat surface with a very soft absorbent piece of cloth, such as Turkish toweling, between the fabric and the surface. Have ready a basin of lukewarm ivory suds as well as a second basin of clear water. With a soft cloth dipped in the suds, rub lightly all around the stain, finally reaching the cocoa or chocolate spot itself. Continue until the stain is completely removed.

Then wash the fabric with clear water, being careful to rub lightly as large an area as possible so that there will be no danger of a ring left on the fabric where it was wet. Rub lightly with a dry cloth until almost dry. Then use a piece of fresh cloth underneath the fabric, press on the wrong side with a moderately hot iron.

**HISTORY OF PACIFIC COAST SHIPPING LINES  
General Steamship Corporation**

REPRESENTING the most varied service of any organization with offices in Seattle, the General Steamship Corporation ranks as one of the greatest assets to shipping and overseas commerce on the Pacific Coast. This corporation offers regular berth services to nearly every country in the shipping world. It is agent for Wingo & Co., of Oslo, Norway, which has a fleet of Norwegian steamships and motorships linking Pacific Coast ports with those of the West Coast of South America. The corporation also represents the Transatlantic Steamship Company of Gothenburg, Sweden, which maintains a fortnightly service between the Pacific Coast and Australian ports with a fleet of Swedish steamships and motorships. In the Pacific Coast-European service, the General Steamship Corporation acts as agent for the Compagnie Generale Transatlantique (French Line), with bimonthly sailings with French steamships. In the Mediterranean service this corporation acts as agent for the Navigazione Litorale Triestina of Trieste, Italy, which maintains a regular service with Italian ships from Europe to Pacific Coast ports. In the route between the Pacific Coast and the East Coast of South America the General Steamship Corporation maintains a regular service with the United States Appalaches' stores in Seattle. His son was raised in an atmosphere of shipping and overseas commerce and advanced to one of the most important positions in shipping on the Coast. Mr. Brown, Jr., has been receiving congratulations on the arrival of a young son at his home in Seattle. The little stranger put in his appearance January 28.

Europe the French Line has, the year around, a service with through bills of lading to the principal ports in the West Indies and to the South American ports of Colombia, Venezuela, and the Guianas. During the coffee season, which is between December and May, inclusive, the French Line also follows the Puget Sound route to Central American ports to shippers of flour, lumber, salmon and other commodities, the vessels carry, without exception, lost money this year.

This bad situation has arisen, Mr. Mayer says, chiefly because Russia has been dumping large stocks of timber on the western European market at sacrificial prices. Most of it comes out via Archangel, and it is, therefore, difficult to estimate the quantity involved. Manchester, now crowded coffee-house, one port over, is reported to have stocks on hand sufficient for six months' average demand, a condition which bodes ill for Latvian exporters, since most of its timber is usually sent to that port.

The Southern Pacific Company's lines has compiled the remarkable record of operating six consecutive years without fatality to a passenger in a steam train accident. Since November 30, 1913, more than 260 million passengers were carried safely in the most crowded passenger coaches, equivalent to cars more than twice the population of the United States forty miles.

**Latvian Lumber**

"The Latvian timber situation appears hopeless," says Commercial Attaché C. J. Mayer, Riga, in a report to the Bureau of Foreign and Domestic Commerce of the Department of Commerce. Sawmills are working only about 10 per cent of capacity. Stocks in lumber yards are reduced to a minimum. "Mushroom" companies which sprang up after the war are rapidly being driven to the wall, and even the old and well-established companies have, without exception, lost money this year.

This bad situation has arisen, Mr. Mayer says, chiefly because Russia has been dumping large stocks of timber on the western European market at sacrificial prices. Most of it comes out via Archangel, and it is, therefore, difficult to estimate the quantity involved. Manchester, now crowded coffee-house, one port over, is reported to have stocks on hand sufficient for six months' average demand, a condition which bodes ill for Latvian exporters, since most of its timber is usually sent to that port.

**LOOK INTO YOUR COFFEE CUP!**

**Those Who Look With Imagination See a World-Wide Panorama of Customs and Elaborate Ceremonials**

LOOK steadily into your coffee cup. What do you see? Do you see a golden rod rising from a faint cloud of steam? Look still more closely. Give your imagination free rein. See now what strange shapes are taken by the steam as it swirls into clearly defined forms.

Before your eyes an African savage in the heart of the jungle reaches for a bunch of bananas with a fat. In an Arabian Khashwah beside a furnace formed of square blocks of granite, sits a black slave whose occupation is to brew coffee for his master's guests. On the sidewalk before a Viennese cafe a well dressed business man sips his coffee and reads his paper.

Before the Dawn of History

Coffee was used as a beverage in Abyssinia before the dawn of history. The Twentieth Century has seen it become the national drink of America. But in its long and circuitous travels from Abyssinia to the shores of the Western World, coffee has visited many lands, and the people of each of these lands have developed characteristic methods of preparing the coffee drink in the coffee houses of the East is an elaborate affair. Ground coffee is put into a small uncovered brass not with a long handle. Then it is boiled to a froth three times on a charcoal burner, with but to dehydrate it with cream is an unheard of sacrifice. When the coffee is ready it is poured into an after-dinner coffee cup or miniature bowl and served with a tray with a glass of water to be drunk before the coffee.

**European Coffee Cafes**

Coffee as it is drunk in Europe is prepared in a manner very similar to that in vogue in the United States, but a large proportion of the coffee drinking in continental countries takes place in front of them.

Before the war Vienna was famous as the "City of Coffee." The cafes were filled after the noon meal when busy men took their coffee and smoked. They were filled a second time around

**In a Turkish Coffee House.**

The preparation of the coffee drunk in the coffee houses of the East is an elaborate affair. Ground coffee is put into a small uncovered brass not with a long handle. Then it is boiled to a froth three times on a charcoal burner, with but to dehydrate it with cream is an unheard of sacrifice. When the coffee is ready it is poured into an after-dinner coffee cup or miniature bowl and served with a tray with a glass of water to be drunk before the coffee.

**American Improvements**

One of the most important of these improvements is the method of roasting. The old machines roasted the article in large quantities, but the more modern method of roasting, coffee is roasted in small quantities through perforated revolving drums over purveying constant ventilation and purifying circulation of fresh air prevents their absorption by the small quantities at a time but the operation is continuous, the total output is far greater than by the old method.

It is such improvements in treatment, and the consequent improvement in the quality of the coffee roasted on the table, that has made, most aside from the inherent virtue of the berry, to make coffee and the world's most universal beverage. The domain of Coffee—the United States as a realm on which the sun never sets.

**INCREASE OF POPULATION IMPORTANT TO DAIRY INDUSTRY OF NORTHWEST**

With the population of the Pacific Coast States and Idaho increasing for the next five years at the present rate, 150,000 additional dairy cows will be required to provide dairy products for the incoming people. That this is the first of a series of economic conferences which the State College of Washington is arranging for various types of Washington agriculture. The college is making no recommendations, but is looking to the men actively engaged in the industry to assist in this part of the program. The experience of representative men interested in dairying is sought at this conference.

Forage growers also have a direct interest in this conference. At present Whatcom, King, Pierce, Snohomish and Spokane counties each spend more than \$1,000,000 for feed. Yakima County sells \$5,000,000 worth of hay annually, and Kittitas County sells \$1,000,000 worth. Studies show that counties having 5,000 dairy cows or more are the same ones which have less than three and a half acres of pasture per animal unit. Thus the feed problem is a timely one to the dairy industry.

These facts are brought out in data prepared for the Economic Conference on Dairying and Forage Crops, which will be held in the Chamber of Commerce Auditorium, Seattle, March 15 and 16.

**Thayer Yellow Dent Corn Declared Best**

The little early Thayer Yellow Dent corn produced more grain during the last four years under irrigation in the Yakima Valley and during the last year in the Palouse country than the longer season varieties. This was found in tests with eight varieties conducted by H. P. Singleton at the Irrigation Branch Station at Prosser and in tests with eight varieties at the experimental station at the State College of Washington conducted by Dr. E. F. Gains of the Farm Crops Department.

Other varieties tried at Prosser were: Silver King, Johnson Co. White, Indent, Local (Red) type, Windus Yellow Dent and varieties tried at Pullman were Windus White Dent, Idaho Yellow Dent, Rusters White Dent, Northwestern Dent, Pride of the North, Minnesota 13 and Redts Dent.

While the test at the State College is but for a single year, it was so

**Five European Earwig In Jefferson County**

PORT TOWNSEND—A few European earwigs have been discovered in Jefferson County near Hadlock, Port Warden and Port Townsend. A fight is being instituted against the pest immediately to try to stop its spread. Male and female specimens have been mounted and put on display in a pharmacy and a slide has been prepared to show at theatres, in order that they may recognize the pest when they see it. Traying is being recommended now, with poisoning and spraying to come in the proper season.

**I Wearied Of My Family's Jibes**

How a Bit of Home-Made Humor Corrected A Really Distressing Situation For One Housewife.

By Catherine Bourne

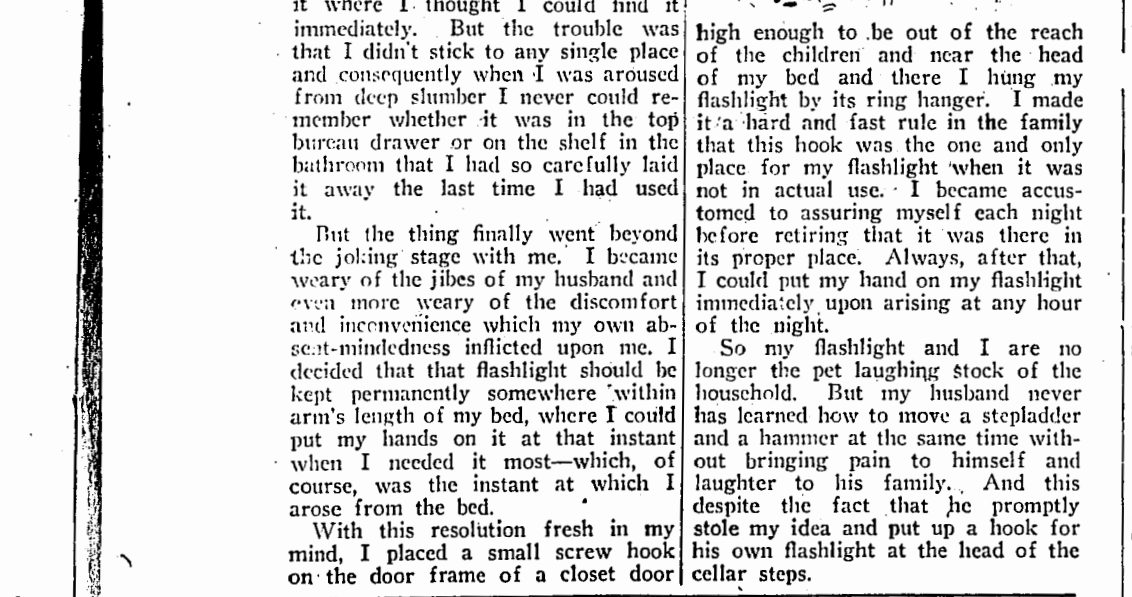

THERE used to be two stock jokes in our little household. One was that my husband, after hanging a picture or replacing a broken curtain-holder, invariably placed his hands on the top of the steepladder, descended and then dropped the hammer on his head as he moved the ladder.

The other was that always, when I was obliged to get up in the dead of night to give the baby his bottle or to find something in the medicine chest that would quiet the croupy coughing of one of the children, I used from half a dozen to a dozen matches searching for my flashlight which I had last hidden my flashlight.

There was a period when that frantic and ridiculous search for my flashlight was an almost nightly occurrence. Always I had carefully put it where I thought I could find it immediately. But it troubles me that I didn't stick to any single place and consequently when I was aroused from deep slumber I never could remember whether it was in the toy bureau drawer or on the shelf in the bathroom that I had so carefully laid it away the last time I had used it.

But the thing finally went beyond the joking stage with me. I became weary of the jibes of my husband and even more weary of the discomfort and inconvenience which my own absent-mindedness inflicted upon me. I decided that that flashlight should be kept permanently somewhere 'within arm's length of my bed, where I could put my hands on it at that instant when I needed it most—which, of course, was the instant at which I arose from the bed to get my flashlight.

With this resolution fresh in my mind, I placed a small screw hook on the door frame of a closet door

**Over-Civilization Chief Menace To Nation, Says Famous Author**

Our civilization carries within it the seeds of its own destruction, thinks Harold Bell Wright, most popular living novelist. In a recent interview Mr. Wright declared a love of luxury and the falling away from the stern ideals of the nation's founders.

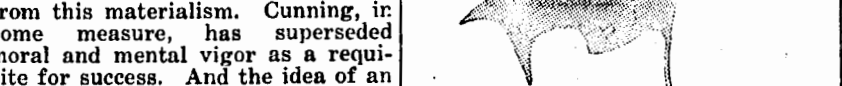

"The bitter necessities of their lives, their struggles for existence with nature and with savage enemies, developed physical qualities of endurance and strength which brought with them their moral counterparts. There was no place for the weakling; the dishonest and the degenerate were given short shrift. The physically and morally unfit perished in that early struggle. In the main it was the men of purpose and strong will who survived; who became the nation's founders.

"Today all that is changed. Our vast material development is reducing life to softness. Its prices are quite as high for the will as for the strong.

"Two main effects have flowed from this materialism. Cunning, in some measure, has superseded moral and mental vigor as a requisite for success. And the idea of an exacting but benevolent God has been cast out of the everyday consciousness of the race. Material developments, large cities and building, wealth and interest in the city, give men the illusion of security, of self-sufficiency. It is only in the face of catastrophes, such as earthquake, flood or fire that they realize it is an illusion. The ideal of the home is less real since men no longer have to fight to preserve it. The conception of the family as a unit has been lost. The sense of duty has ceased to be a menace. Concerning the moral health of nations, it seems that nothing fails like success.

"What the remedy for this condition? The claiming of our inheritance by the fathers and grandfathers and the pioneers and we are the sons of our fathers. Let us in the same qualities which they evoked in them. This inheritance is the underlying theme of my last book, 'A Son of His Father.' We must realize this inheritance; dwell upon it in our thoughts and consciously act upon it.

"Have we lost a national sense of 'It would seem not.' Mr. Wright answered, smiling, 'If there is any significance in the number of messages of approval I received when the book was published. People in every part of the country sent me greeting cards. They had caught the plan for a reclaiming of our heritage. The idea of the book. And on these greeting cards, the names of the fathers and grandfathers were approved and encouraged. This was a deep pleasure to me. The next best thing to having a message is to know that that message has struck home.'

Harold Bell Wright

**Better Homes in Idaho Is Object of Five-Year Study of Power Use on Farms**

"Better Homes in Idaho" is the purpose of a five-year project just started by the Home Demonstration Service of the Extension Division, Miss Marian E. Hopworth, state leader, has returned from a two months' stay in South Idaho, where she saw the movement get actively under way.

"Home improvement" groups have already organized in more than a dozen communities. According to the program, one or more groups in each community will be used for demonstration purposes. Specialists will work in these homes with a view to beautification, providing additional conveniences, and other means of improvement. Problems and undertakings are grouped into three main categories for help will be worked on cooperatively.

The home demonstration service will be assisted by R. R. Bennett, extension horticulturist, and M. R. Lewis, University agricultural engineer. Mr. Bennett will aid with the landscaping and associated phases of the work, and Mr. Lewis will act as advisor on problems of electrification, water supply and related questions.

Six groups are functioning in Bannock County, two in Washington County and one each in Gem, Canyon, Twin Falls, Kootenai, Lewis, Nez Perce, and Latah counties. The groups meet monthly or semi-monthly for programs, lessons and discussions.

**Ripple of Wolf Travel Grows Wilder and Wider**

Gradually the ripple grows. The Cunard-Anchor Line is the first to recognize the popularity and universality of Scotland and England, sailing from New York on the steamships California and Transylvania, in May and June.

Itineraries of two, three and four weeks' sojourn are provided, and afforded opportunity to play on 48 courses, including such as St. Andrews, Mullrind, Glenageary, North Berwick, Turnberry, Prestwick, Sandwick, Warriston, Heath, Stoke Poges, Sunningdale and others.

**Providence—Charles V. Logwood, co-inventor with Lee de Forest of the Audion and creator of the Audion-amplifier and one of the world's leading radio-physicists, demonstrated an interesting and important new theory and eliminates many devices heretofore deemed essential, and is said by radio engineers to be the most powerful and highly selective five-tube receiver to be placed on the market. Mr. Logwood is chief research engineer of the Electrical Products Company here.**

**Disasters of Woods Successfully Treated**

Successful sterilization by heat and preservative treatments to kill disease in woods is described in an article by Dr. Ernest E. Hubert, head of the forest products department in Idaho school of forestry. The article written last year by Doctor Hubert, at Madison, Wisconsin, has been reprinted in the interests of forestry.

Results of experiments conducted by the author proved, according to the report "that it is perfectly possible to sterilize wood in the kiln by steaming and by proper temperatures in connection with preservative treatments. It is such wood is then properly stored in dry, well ventilated piles protected from all moisture except that absorbed from the air, there is every reason to believe that the stock will remain bright and sound."

Seventeen varieties of woods infected with more than 19 kinds of rots and diseases were used in the experiments in air drying kilns during about two years. The work was carried on in cooperation with the United States forest products laboratory at Madison, where Doctor Hubert was formerly assistant pathologist in the bureau of plant industry. Tests using infected woods involved experiments in air drying, kiln drying, steaming, and pressure treatments. It was found that many rot organisms remained dormant in dry wood from five to nine years, and were then capable of reviving and causing rapid decay.

"Sterilization by heat is a well-known process with examples in many everyday activities," continues the article. "Most of the kiln drying and steaming processes now in use serve the double purpose of seasoning and sterilizing the wood. Frequent ties, poles, posts and mine-bridge and building timbers of various kinds contain certain active decay organisms before treatment which are capable of reviving under favorable conditions. Sterilization would not only greatly reduce the chances of loss from such sources but would make it possible to utilize for less exacting purposes material containing a limited amount of incipient decay."

"Steaming and steam heating are the common methods of applying heat in most commercial operations involving the use of wood products. Electricity has been effectively used in some cases. Pressure treatment tests show that a 20-pound pressure will kill the fungus within 7 1/2 inch ties in two hours.

"Experiments conducted by leading investigators in Europe and this country indicate that a moisture content considerably above the fiber saturation point—25 per cent or more or oven dry weight—is required for the best development of certain fungi in standing timber. Other topics will be studied from a state-wide viewpoint.

In the western part of the state special attention will be given to the use of the ultra-violet ray for chicks, the development of the use of a small power unit on the larger poultry farms, irrigation for summer feed for poultry and for garden stuff and irrigation in the berry district.

Four Canadian Government Marine steamers, the Canadian Farmer, Canadian Observer, Canadian Rover and Canadian Conqueror, are being converted into oil burners at the Prince Rupert Dry Dock and Shipyard plant.

**Grain Grading to Be Done at University**

UNIVERSITY OF IDAHO, Moscow. —Establishment at the university of a grain laboratory where farmers and dealers can secure federal grades on lots of grain they are offering for sale, is announced by Dean E. J. Findings of the college of agriculture. The new laboratory will be opened about April 1.

Prof. H. W. Hulbert, university agronomist, has been appointed in-charge of the laboratory. He is also in-charge of the general direction of the bureau of economics, United States Department of Agriculture. The Moscow office will be under the supervision of B. W. Whitlock, in charge of Pacific Coast headquarters of grain supervision at Portland.

Certificates will be issued on wheat, shelled corn, oats and rye. Carload shipments or smaller lots if desired by the grower or dealer, will be graded, nominal charge will be made to cover cost of securing samples and handling. Dealers may get certificates on grain going into interstate shipment instead of taking a chance on the grade given the grain at distant points.

The laboratory will be completely equipped with the latest approved apparatus. Dealers may get grades on grain other than wheat. C. B. Ahlson, state seed commissioner, with offices at Boise, is a licensed wheat inspector.

**My City**

By SARA TEASDALE

I crossed the ferry at early evening. The winter night fell black and cold; I saw my city loving before me, Fantastic, lovely, pierced with gold. Towers were stretched to the height of heaven, With lights in chains of yellow and blue— Oh, didn't love forgotten cities, Nineveh, Carthage, as we love you? —Glad Housekeeping.

**LATEST CONTRIBUTION TO RADIO ART**

Providence—Charles V. Logwood, co-inventor with Lee de Forest of the Audion and creator of the Audion-amplifier and one of the world's leading radio-physicists, demonstrated an interesting and important new theory and eliminates many devices heretofore deemed essential, and is said by radio engineers to be the most powerful and highly selective five-tube receiver to be placed on the market. **CHURCH NOTICES**

**St. John's Lutheran Church**  
Rev. A. F. Wolff, Pastor  
Sunday school at 9:30 a. m.  
English services will be held each Sunday morning at 10:30 o'clock, with the exception of the first Sunday of each month, when German services will be held at the usual hour.

**Christian Church**  
N. E. Bench, Pastor  
Bible school at 9:45.  
Preaching at 11. Subject, "The Story of Love." All are asked to read the Book of Ruth.  
Christian Endeavor at 6:30 o'clock.  
Evening service at 7:30. Subject, God's O. K. Mark Fixed in the Rocks of Archeology." A special for this service.

The Bible school was well pleased that Grandpa Wilson was able to be present last Sunday and deposit his missionary money in the world bank. He also made some helpful remarks on his eightieth birthday anniversary.

**Congregational Church**  
Paul W. Sprague, Preacher  
Mrs. W. M. Herman, organist.  
W. E. English, choir director.  
Sunday school, 9:45 a. m. Mrs. Arthur Hampton, superintendent.  
Morning worship, 11 o'clock.  
Young People's meeting, 7 p. m.

**Genesee Valley Lutheran Church**  
Rev. Gerh. A. Peterson, Pastor  
Sunday, March 21, at 10 a. m. Sunday school. Both Norse and English Bible classes will meet.

At 11 a. m. Morning worship. Norse and English sermons.  
The choir rehearses on Wednesday evening at 7:30.  
Friends and strangers cordially invited to all services and meetings.

**Will Give Play at Pine Grove**  
"Deacon Dubba," a rural comedy drama in three acts, to be given at the Pine Grove school house, Friday, March 26, at 8 o'clock, prompt.

Persons in the play:  
Deacon Dubba, from Sorgum Center, West Virginy..... Jack Gehrick  
Amos Coleman, his nephew, a young lawyer..... Jas. Nebelick  
Rawdon Grayson, a wolf in sheep's clothing..... Harry Perks  
Major McNutt, auctioneer and justice-of-peace..... Heber Harms  
Deuteronomy Jones, a country product..... Tom Parks  
Rose Raleigh, the brave little school ma'am..... Maude Sloan  
Miss Philippa Popover, with both eyes on the Deacon..... Pearl Lambert  
Emily Dale, the richest girl in town..... Gladys Harms  
Trixie Coleman, full of mischief..... Marguerite Spuebeck  
Yvonne Yenson, the hired girl from Sweden..... Ebba Swanson.  
Admission 25 and 35 cents.

**The Syringa Club**  
The Syringa club was very pleasantly entertained on Thursday afternoon of last week by Mrs. Paul Heppner and a very cordial welcome was given the president, Mrs. John Weber, who had just recently returned from two-months visit to eastern points and she gave a very interesting account of her trip.

A delicious luncheon was served by the hostess during the afternoon.  
The invited guests were Mrs. W. Flower and her mother, Mrs. Sarbeck, of Walla Walla.

The next meeting of the club will be held at the country home of Mrs. Jesse Borgen on March 25.

**Get Acquainted for a Dollar**  
Send \$1.00 for a special five-months subscription to SUNSET—the West's great national magazine—the clean, up-to-date monthly for the whole family. Spare-time agonies wasted. Address No. 460 Fourth St., San Francisco, Calif.

**SEED PLANTS**

A complete line of flower, garden and field seed.

We will have everything in the plant line at the proper season. Cabbage is up—tomatoes are coming fine.

Pansy plants are ready to plant out now. Field grown perennial plants stand transplanting better now. Let us help you with your garden problems.

**Herman's Seed Store**

**"Ego" Bubble "Busted"**  
Last week the News man was all swelled up over the fact that he had a few measly little daffodils in bloom in the lee of his house and had nerve enough to claim they were the first ones out—all of which goes to show that a fellow don't always know. Since the announcement was made there have been many who claimed to have flowers in bloom for the past several weeks. That may be true, but we were speaking exclusively of daffodils—and yet we were called on that. It seems there are times "when news ain't news."

**Sell Shortorns**  
Nordby Brothers last week took two young bulls to Spokane to the Short-horn sale and the animals brought \$310.00—one bringing \$175.00 and the other \$135.00.  
It doesn't cost any more to raise a good animal than it does a scrub—nor as much, according to stock men.

**Cattle in Forests**  
The ranges of the national forests supported about 2,000,000 head of cattle and 7,000,000 head of sheep, not counting calves and lambs, in the current year.

**The City Meat Market**  
**ORDER A ROAST TODAY**

Whatever kind of a roast you have in mind for dinner, you will find us able to supply it from our ample assortment of high quality meats.

Phone your orders and we will deliver promptly.

**Prompt Attention Phone 33-1**

**FIELD SEEDS**

For This Season

We have sweet clover, alfalfa and timothy. Good clean, pure, seed. We also have a large assortment of garden seed of all kinds.

Place your order for field seeds now as prices look upward.

**Hasfurther Hardware**

**New Corticello Silks**

An express shipment of beautiful new print crepes, changeable taffetas, silk broadcloth, satin crepes, flat crepes, etc. have just been placed in stock.

Corticello silks are a recognized quality wherever silks are sold.

Dozens of patterns to choose from and we know our price to be right on this class of goods.

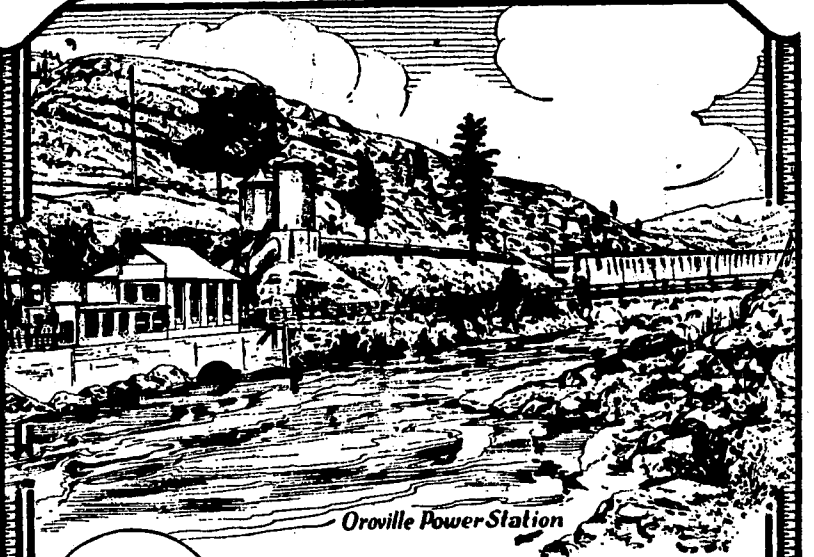

Printed crepes ..... \$2.75 to \$3.25 per yard  
Taffetas ..... 2.50 to 3.00 per yard  
Satin crepes ..... 3.50 to 4.50 per yard  
Crepe eldora ..... 3.00 to 3.25 per yard  
Silk broadcloth ..... 2.50 to 2.75 per yard

**Peter Pan and Percal Prints**

New patterns in Peter Pan and Percal are coming in every few days.

We can please you in these beautiful new popular dress materials.

**Emmett & Boliou**

**Up North!**

BUILT in the rugged, rocky canyon of the Similkameen river a few miles below the Canadian boundary, the Oroville power station was the sixth plant to be acquired and operated by this Electric Service company. A beautiful crescent dam diverts the water through two penstocks to the power station, where the generators have a capacity of 4300 horsepower. The water drops 82 feet.

Electric power from this station is carried to the communities and towns, orchards and industries of the Okanogan valley, which are growing rapidly with the assistance of this dependable Electric Service.

You Are Invited To Visit This Plant

**The Washington Water Power Co.**  
Serving 45,000 customers in sixteen counties of Washington and Idaho

**W. H. RADER**  
AT THE CITY MEAT MARKET

**Word from Mrs. Schooler**  
Friends have received word from Mrs. M. J. Schooler, who resides in Oakland, Calif., recently, in which there are some paragraphs of interest to Genesee people, among which is the announcement of the marriage of her daughter, Miss Ida, to Edward Pawley, at Port au Prince, Haiti, which occurred some weeks ago. Mr. Pawley is a business man with interests at Port au Prince and Miami, Florida, at which latter place the young people will make their home after the completion of Ida's school term on the island, where she has been superintendent of the American school for the past two years. Maggie Schooler has been with her sister at Port au Prince since last July and will return home to Oakland this coming summer.

Mrs. Schooler stated that she and "Benny" had been down to Los Angeles for a visit with relatives and old-time friends and while there they saw W. N. Gibb and family, J. Roentgen, W. W. Gray, Mr. and Mrs. J. H. Jackson, Mr. and Mrs. Benj. Martin, Mr. and Mrs. Harold Jackson, Mr. and Mrs. Meader, Lizzie Bolou, Dr. and Mrs. Tuomy and family and others from Genesee, and that they are all seemingly happy and enjoying life to the fullest. She said they left Los Angeles at 7 a. m. and drove to Berkeley, arriving at their own home at 10:10 that evening, a distance of 480 miles—an average of nearly 37 miles per hour for 13 hours.

She also said "If you ever get KFRG, San Francisco, on the radio, listen in, for you may hear a familiar voice as Rupert Kempf often sings for them. He also sings in one of the big Catholic churches in Oakland every Sunday. He has a very fine voice and is in training all the time."

Genesee friends are always glad to hear from the "exiles" in Calif. Merit the columns of the News and we are always more than glad to be able to publish extracts from letters from them.

**PERSONALS**

Mr. and Mrs. C. L. Jain of Moscow spent Sunday visiting at the home of Mr. and Mrs. W. E. English.

Miss Genevieve and Pat Wicks of Moscow, spent the week-end visiting Miss Katherine Casebolt and other friends.

Rovena Hanson, Grace Jain, Wilma and Helen Casebolt and Eugene Tupper, students of the U. of I., spent the week-end with their parents.

Mrs. Art. Mayer and daughter Beverly, of Troy, spent several days of last week visiting at the Al. Mayer home. Mrs. Mayer was accompanied home by Miss Bernadine Hasfurther.

Mr. and Mrs. Leon Follett drove to Spokane last Thursday for a business trip. They were accompanied by their daughter Mrs. Jack Barnes and her son, Jack, who went on to their home in Wilbur. They returned to Genesee Saturday.

**Modernizes Country Home**  
Mr. and Mrs. Arthur Hampton are now enjoying all the comforts of a modern home, they having just finished installing a water system in their country home, some three miles north of town.

The water is pumped from a well by a gasoline engine to a 60-gallon galvanized iron tank in the attic of the house and to this is attached all the necessary distributing pipes, giving them hot and cold water in kitchen, bath, etc., making a very complete and comfortable country home—one of the nicest in this section of the country.

**More Fine Weather**  
The fine weather has continued for another week and farmers are beginning to get their machinery ready for spring work. Some plowing has been done on the rim south of town, but it is most too wet in other sections.

Just enough rain has been falling to keep things mused up a bit, but it is what will make the grain crop look like a million dollars—and it certainly is looking that way now.

And no wonder the price of gas has gone up—from the number of cars that are making tests of John D.'s product. The roads are crowded, especially the Lewiston Hill highway, which is a wonderful sight at this season of the year, when everything is coming into green and bloom. The picture from the top of the hill can never be forgotten, whether it has been seen once or hundreds of times—and it never grows old.

**Card Club Entertained**  
The card club met at the beautiful home of Mrs. Ira Hanson Tuesday afternoon. Pinochle was played at five tables. The honors of the afternoon were won by Mrs. W. E. English and the consolation was given to Mrs. Harold Haymon.

Besides members, the invited guests were: Mrs. Gibson, Mrs. Mahlon Follett, Mrs. Harry Schooler, Mrs. Ray Edwards, Mrs. T. H. Herman, Mrs. James Magee, Mrs. Harry Emerson, Mrs. Carl Erickson, Mrs. Milton Rader, Mrs. M. E. Musher, Mrs. Harold Haymond, Mrs. Frank Hoorman, Mrs. Arthur Springer, Mrs. Elmer Vanouck and Mrs. V. A. Beckman.

**Will Give Recital**  
The Lewiston piano and violin pupils of Mrs. Wm. Hordemann will give a recital in the Genesee Hotel theater on Tuesday night, March 23, to which the general public is invited. Admission, adults, 35 cents; children, 20 cents.

**Black Cyclone**

REX, the wild horse in "Black Cyclone," the most amazing drama you have ever seen. The whole picture is one thrill after another.

Stealthy, like thieves in the night, prying upon the man who lay sleeping. But this man was his friend—had saved his life—the life of a wild horse that knew no master; had never tasted the lash. But Black Cyclone watched and waited, then with hoofs of death, plunged into their tawny mist to repay the debt he owed this man.

A picture—novel, imaginative, heart-dripping—filled with romance, adventure, loyalty and devotion that will keep you spell-bound, and hold you with its magic.

We do not believe a better picture for young or old has ever been shown in Genesee.

SATURDAY AND SUNDAY NIGHTS, MARCH 20 AND 21  
CHILDREN, 20c 8 P. M. ADULTS, 35c

**Genesee Hotel Theater**  
ED. G. BOWKER, Manager

**K. P.'s Initiative**  
The Knights of Pythias held a very interesting meeting Tuesday night. There was a large attendance and the work was done in the third degree. Music, singing and smoking took up considerable time after the lodge work had been attended to and a general social time was had.

**Congregational Aid**  
The ladies aid of the Congregational church will meet at the home of Mrs. Geo. Follett on Wednesday, March 24. The hostess will be assisted in entertaining by Mrs. Fred Perkins. All members are requested to be present as final preparations will be made for the big Easter bazaar.

**The Moropus**  
Moropus, a fossil animal which once lived in what is now Nebraska, was about the size of a modern camel, had a neck like a horse, back and tail like a tapir, legs like a rhinoceros, but had claws instead of hoofs.

**NEW STOCK**

of

**9 x 12 Congolium Rugs**

at \$17.50

**HERMAN'S**

**You need not wear faded overalls**

**OSHKOSH B'GOSH Overalls**

Do not fade no matter how often they're washed. That's guaranteed! Also, they're the only genuine Mill-Shrunk overalls. So when you want a real overall—union made, husky, no-fade and mill-shrunk—bang your fist on the counter and insist on—

**OSHKOSH B'GOSH**

**Follett Merchantile Co.**

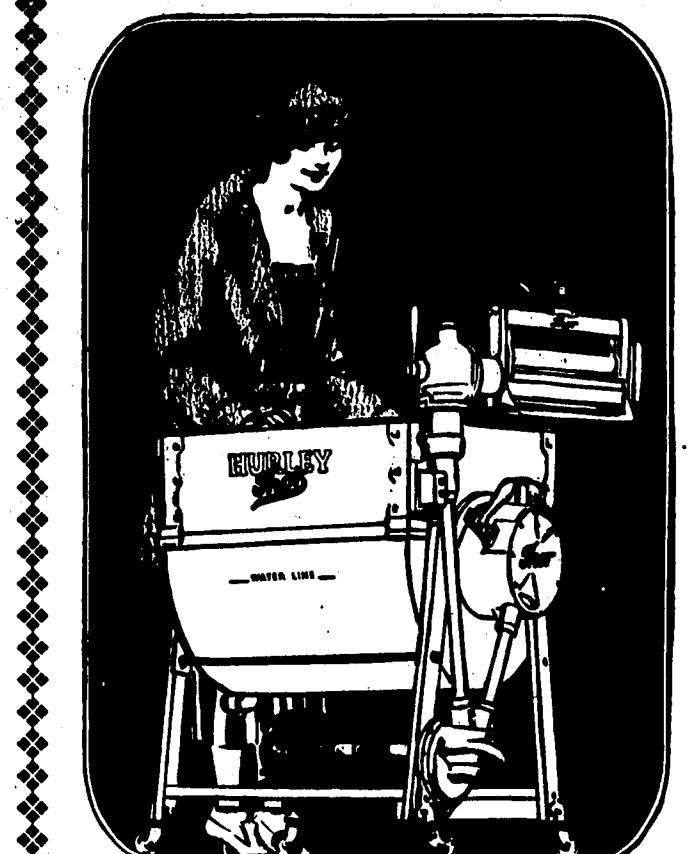

**Save Her Health, Youth and Time**

**HERE IS YOUR OPPORTUNITY**

**Thor Electric Washers and Ironers**

Special Terms for a Short While Only

**25 Pounds Hurley Washing Machine Soap FREE**

That the wonderful Thor Electric washer washes clothes perfectly clean at an operating cost of only a penny an hour is a fact that is known to every one.

These accomplishments are, of course, appreciated—and have been responsible for Thor popularity throughout the nation.

The Thor Electric washer renders another service that we little think of.

It conserves the health, youth and strength of all our wives and mothers.

It is this idea that most husbands and fathers have in mind when they provide Thor Electric washers and automatic ironers for so many happy homes.

**Your Old Electric Washer Taken as Part Payment on a New Thor**

Free! Free! Free!

With every Thor Electric Washer bought during this sale we present the purchaser with a 25-pound pail of Hurley Washington Machine Soap, valued at \$5.75. This supply should last you two whole years.

Call at the electric shop personally, or telephone 79F2.

THE FIGHTING RANGER
A Compelling Story of the Romantic West
By F. J. McCONNELL and GEORGE W. PYPER
(Copyright 1925—)

Continued from last week.
All listened in amazement, as Terence went on:

"He drove John Marshall from the Bar M, and persecuted his daughter in the hope of possessing the Yaqui treasure found on it.

"You saw, with the same lust for this gold, he—killed my father.

"And it was Taggart—Spade Sinclair—who murdered Black Benwell. This girl's father, John Marshall, is innocent!"

"It's a lie—it's a lie!" Taggart was shrieking.

"No! It ain't—I saw you do both the killings," yelled Buck McLeod. "An' if you think I'm not got' to turn state's evidence now and try to save some of my own hide—you double-crossin' cur, after the way you figured it for himself by enlisting the aid of the sheriff. On the other hand, he began to feel that perhaps he had made a mistake—he was beginning to have a premonition that something would happen to queer his game. He was becoming more and more sure that his own desire to break up the party, and he wanted to break away from the sheriff's party, and flee. He was even ready to forsake all hope of the treasure, and would have been content to simply escape, if he could only find a reasonable excuse for quitting the party."

"The men at the head of the posse shouted, and spurred their horses. Ahead of them they saw a group of Taggart's men. They started in pursuit. Taggart hung behind, then turned back and ran with them. He had scarcely started when he was blocked by a racing automobile. It was the ranger's car with Mary, Bud, and Jack. Taggart turned white with rage and fear as he confronted them. Bud and Jack drew their guns on him, forced him to halt, turned about and ran with them. The horseman the sheriff's posse had gone in pursuit of proved to be Buck's gang of rustlers, belatedly on their way to join their leader. As the car came up, the men of the posse had them all covered with guns, and secured them."

Further down the road two men were coming toward them on foot. One cringed before the other, who had him covered with a revolver. The posse, with their prisoners, were waiting the arrival of these two. "Sheriff, make these men let me go," Taggart cried, almost hysterical, covering at bay under the revolvers of Bud and Jack. "What right have they to hold me up—what's the idea here?"

"The two figures on foot, now running came up. The one behind with the revolver, hearing Taggart's miserable whine, shouted:

"Hold that man Taggart, sheriff—he's the man you want above all."

"It was Terence, marching his prisoner, Buck, before him.

"Taggart shivered—forgot—MURDERER—Spade Sinclair, who calls himself Topaz Taggart."

"There's your arch-criminal, sheriff—robber—forget—MURDERER—Spade Sinclair, who calls himself Topaz Taggart."

"We'll be awfully sorry to lose you, Bud, but of course we want you to be happy."

"As they came up to the porch of the ranch house, Mary asked:

"Oh, say, Bud, is Daddy in?"

"Yes, he's in there," Bud replied.

"Well, listen," Mary whispered into his ear. Bud's eyes grew big, and he said to the men in charge of the party:

"What's he crying, 'Daddy you mean it?'"

Terence stood smiling embarrassedly and nodded his head, and Mary said: "Yes, really," and sunk back into Terence's waiting arms.

"Well, I'll be blowed!" said Bud, the great benevolent smile on his face growing wider. "Sure, I'll tell him—glad to tell him."

As he stalked into the house, Terence rocked Mary in his arms, and bent his head toward her face till the man's eyes were close to hers, and she became irresistible, and his own were drawn against them.

"Terence, that's the eighty-seventh time today," she protested, but her eyes sparkled with happiness.

"And not the last either," said Terence with an enchanted smile.

Just then Marshall was sitting at his desk, working over the ranch accounts, straightening them out after his long gabfession and the manipulations of Taggart. He had been a free man, back as boss of his own outfit, for two weeks now.

"Mr. Marshall," said Ben, entering, "Mrs. O'Rourke wants to see you."

"Who?" asked Marshall, looking up from his books.

"Mrs. O'Rourke, sir."

"And who is Mrs. O'Rourke?" Marshall asked, puzzled. "I don't know any such person."

"Oh, yes you do, pardon me, sir,"

BEAUTIFY IT WITH "DIAMOND DYES"
Just Dip to Tint or Boil to Dye

Each 15-cent package contains directions so simple any woman can tint soft, delicate shades or dye rich, permanent colors in lingerie, silks, ribbons, satins, waists, dresses, coats, stockings, sweaters, draperies, coverings, hangings—everything!

Buy Diamond Dyes—no other kind—and tell your druggist whether the material you wish to color is wool or silk, or whether it is linen, cotton or mixed goods.

Present Age Best and Happiest In History, Says Famous Author

This is the best period in all history, in the opinion of Joseph C. Lincoln, genial author of Cape Cod stories. "The average man of today has luxuries and opportunities undreamed of by our immediate ancestors and utterly inconceivable in any earlier age," said Mr. Lincoln in a recent interview in New York City.

"The tendency to talk about the 'good old days' is so much evidence of those days. It is so much easier to fill the vague past with all sorts of imagined virtues and advantages than to see and grasp the splendid opportunities of the present. If an admirer of the past could set time back, he would speedily be cured of a contempt for the present."

"But isn't our civilization purely material?" we asked.

"Certainly not," replied the author of "Cape Cod." "It was entirely material, but it could not endure. Our material development has been great but its reason and proclaimed object is service and the concomitant of service is unselfishness."

"Consider the vast increase in industrial responsibility. A slip of some subordinate in a great corporation may mean the throwing out of gear of its whole complex machine; the loss of many thousands of dollars, and perhaps even of life. And the individual's sense of his responsibility has also increased. If he had not, we should have been helpless to develop as we have. It is his responsibility in a great organization that in a country store. And the striking thing is that errors seldom occur in big business. But we all know how the country store used to be run."

"And the reason for this increased efficiency?" we asked.

"Men are becoming more conscientious, in his opinion to the contrary," said Mr. Lincoln. "Our spiritual growth has kept pace with our material development. We are a better people today than at any time in our previous history."

"This optimistic view of the most human and optimistic of authors, is the very keynote of Lincoln's latest novel, 'The Big Mogg'."

"The rock-ribbed 'Big Man' of a little place, contemptuous of his unsuccessful relatives, proud of his own possessions and success, fights a losing battle against the warm, human heart of the modern world, and especially against youth and love. In the end the Big Mogg realizes that he is really helpless; that he must love his neighbor, just because his neighbors expect it. People have simply ruined the hermit business. You 'cannot maintain a grinch in these times,' chuckled Mr. Lincoln. 'Why, even the ancient and honorable profession of Hermit has been abandoned. There was a time when you could find at least one hermit on every country road. But it can't be done today. I have tried to be a hermit at times but it's really impossible. Imagine a hermit getting hundreds of greeting cards on holidays, on his birthdays or on occasions when he is indiscreet enough to write a letter today than at any time in our previous history.'"

In the end the Big Mogg realizes that he is really helpless; that he must love his neighbor, just because his neighbors expect it. People have simply ruined the hermit business. You 'cannot maintain a grinch in these times,' chuckled Mr. Lincoln. 'Why, even the ancient and honorable profession of Hermit has been abandoned. There was a time when you could find at least one hermit on every country road. But it can't be done today. I have tried to be a hermit at times but it's really impossible. Imagine a hermit getting hundreds of greeting cards on holidays, on his birthdays or on occasions when he is indiscreet enough to write a letter today than at any time in our previous history.'"

"The rock-ribbed 'Big Man' of a little place, contemptuous of his unsuccessful relatives, proud of his own possessions and success, fights a losing battle against the warm, human heart of the modern world, and especially against youth and love. In the end the Big Mogg realizes that he is really helpless; that he must love his neighbor, just because his neighbors expect it. People have simply ruined the hermit business. You 'cannot maintain a grinch in these times,' chuckled Mr. Lincoln. 'Why, even the ancient and honorable profession of Hermit has been abandoned. IT HAS LASTED

Seattle People Must Believe Such Convincing Testimony as Mrs. Luark's

No one in Seattle who suffers backache, headaches, dizziness, rheumatic pains or distressing urinary ills can afford to ignore this two-week trial of a Seattle resident. It is confirmed testimony, telling of lasting benefit from Doan's...

Mrs. Susie Luark, 940 Harney St., Georgetown, Seattle, says: "I couldn't get rid of the stiffness and lameness in my back. Housework made me feel dull, steady pains in my back still...

RELATION OF SPINE TO DISEASE

The spine of the human being bears the same relation to the body that the steel girder does to high building. This very important part of our skeletal structure is the main support of the body in maintaining an upright position...

It is a well-known fact to medical men that most minor ailments will be cured by Mother Nature. She is given a fair opportunity. This happens whether the individual makes the care of a physician, or is a member of one of the cults...

CARRYING COAL IS PART TRAINING OF JIMMY CHARTERIS, HALF-MILE CHAMPION

Hard work is part of the training of Jimmy Charteris, national intercollegiate half-mile champion of the University of Washington.

Over 88 per cent of the students at the state university are earning all or part of their money to attend school, according to Darwin Nesheim, graduate manager. During March over 100 students earned a part of their expenses selling coal in Seattle.

PORT WARDEN ORDERS PATROL OF DUWAMISH

Col. Paul Edwards, port warden of Seattle, has ordered a continuous patrol of the Duwamish river to prevent traffic being obstructed by fishermen spreading nets and traps into channels. This work was previously handled by the state department of fisheries but practically abandoned under the Hartley regime.

Camp Fire Girls' Summer Camps To Accommodate Fifteen Thousand

For some 15,000 parents, at least the problem of where to send daughter for her vacation is solved. Within the next few days or weeks nearly one hundred camps, with capacity of from 25 to 100 girls, will open under the leadership of Camp Fire Girls.

SZECHS THIRTY THRIFT

To encourage Thrift may save banks in Czechoslovakia give to each new pupil in the elementary schools a passbook with a financial credit of one krona—Thrift Magazine.

BENEFITS OF HOME OWNING

A few pointers as to the importance of owning your own home for profit first. If the tenant is comfortable, well and good. He must ask the landlord for all repairs, and since the landlord is in the business for profit, the tenant must put up with the dirty walls, leaky roofs, broken furnaces, etc., until such time as the landlord may see fit to loosen his purse.

New Library Service Planned at Pullman

As an aid to the small town club women who write in to the library extension department bewailing the lack of resources their towns afford...

FERRY LINES WORRY OVER DOCKAGE BILLS

In the old Puget Sound steamboating days wharfage charges were so common that every shipper paid them. So, the Department of Public Works of Washington has discovered, when the steamship lines were rebuilt to serve as automobile ferries...

**No Plow is Better than its Bottom**  
 —just as no knife is better than its blade or as no gun is better than its barrel. John Deere plows—the kind we handle—are famous everywhere because of the quality in their bottoms.  
**John Deere Plow Bottoms**  
 are made of the best material for the purpose.  
 They are designed by men who have spent a lifetime in studying soil conditions and building plows to meet them.  
 There are shapes and styles to suit every soil condition.  
 When you select a John Deere plow, equipped with bottoms built for your kind of soil, you can always be sure of good scouring, long wear and thorough seed beds.  
 Next time you are in the store let us show you how John Deere bottoms are made—how they are shaped just right for good work and light draft; how perfectly they are reinforced at points of greatest wear; how the unbreakable, unsharable steel frog gives to moldboard, share and landside soil, you can always be sure the strongest support possible.  
 You are sure to appreciate the quality in John Deere Plows with genuine John Deere bottoms.  
**Morschek Bros.**

 AT THE CITY MEAT MARKET

**PERSONALS**  
 Miss Elsie Simpson of Troy spent the week-end visiting Miss Frances Smylie.  
 Miss Julia Hasfurther, who has been doing nurse work in Moscow, is home on a visit to her folks.  
 Grace Jain, Fred Dicus, Fred Cann and Jesse Gray, U. of I. students, spent the week-end with home folks.  
 Mrs. Lenna Cook returned to Lewiston Tuesday evening after a visit with her mother, Mrs. G. A. Bumpass. Mr. and Mrs. Wm. Smolt returned home Monday after spending a couple of weeks in Spokane visiting relatives.  
 Mr. and Mrs. E. Corbin of Vancouver, Wash., are visiting with Mrs. Corbin's mother, Mrs. Maud Freeman.  
 Mrs. D. B. Eronson and Miss Manette Gravelle went to Spokane Monday where they expect to spend the week.  
 Miss Manette Gravelle of Minneapolis, Minn., is making an extended visit with her sister, Mrs. D. B. Eronson.  
 Wood Gash, who is employed by the Potlatch Lumber company, at Potlatch, spent the week-end with his family.  
 Mr. and Mrs. D. C. Burr and family and Mrs. H. A. Thatcher of Moscow spent Sunday visiting at the W. W. Burr home.  
 Miss Christina Lorang of Spokane came down Monday and will spend a couple of months with her mother, Mrs. John Lorang.  
 Miss Elsie Waldrop of Parma, who is a student at the U. of I., came over with Rowena Hanson and spent the week-end at the Hanson home.  
 Mrs. Mrs. O. H. Nardley and family, who have been living in Mrs. Meader's house for the past few months, have moved to their country home.  
 Mr. and Mrs. Guy O. Brown, who have been occupying the Larrabee house during the winter, moved to their country home the first of the week.  
 Mrs. F. E. Erickson of Orofino arrived Friday of last week for a visit with her parents, Mr. and Mrs. A. Kern, and her sister, Mrs. Chas. Kraut and family.  
 Mr. and Mrs. Walter Bumpass and little daughter of Spokane spent several days of last week here visiting Mr. Bumpass' mother, Mrs. G. A. Bumpass, and other relatives.  
 G. F. Shirod was in town from Pullman Saturday and stated that he had just sold the 160-acre farm of Miss Wilma Brown, near Uniontown, for \$12,000 cash to John Schlee.  
 Mrs. T. D. Garrett and children arrived last week for a visit with her father, D. Scharnhorst, and her sister, Mrs. Chas. Mouch and other relatives. The Garrets now reside in Spokane.  
 Francis Ure returned home last Saturday after having spent the past winter in California and visiting with Mr. and Mrs. G. E. Taber at Marshfield, Oregon. He was accompanied home by his sister, Miss Inger, who had been visiting at the Taber home.  
 Wm. Post, who has been employed by a lumber company at Harrison, and who was injured several months ago, arrived in Genesee last week for a visit with his son, George Post, and wife. He is still using crutches on account of having lost his left foot in the mill and says it will be about four months before he will be able to use an artificial one.  
 Miss Sophia Kambitsch, who is now employed as a stenographer for the Potlatch Lumber company at Elk River, returned to this village Monday after having spent a few days visiting her parents, Mr. and Mrs. John Kambitsch. Miss Kambitsch was for many years one of Genesee's telephone operators and her many friends here are more than glad to learn that she is doing so nicely.

**Altar Society Meets**  
 The Altar society of St. Mary's church was very pleasantly entertained last Tuesday at the country home of Mrs. John Krier.  
 After a short business meeting a miscellaneous basket shower was given by the members and friends for Mrs. Joe Tobin who recently lost all her necessities in a fire that destroyed the Tobin home.  
 At 4 o'clock a delicious luncheon was served by the hostess.

**The Blue Bird Club**  
 The Blue Bird club was very delightfully entertained Tuesday afternoon by Mrs. Archie Tegland at her country home. The usual work of the club and social converse made the afternoon pass quickly. Mrs. John Howe was the only invited guest.  
 A fine luncheon was served by the hostess during the afternoon.  
 The next meeting will be held at the home of Mrs. Albert Peterson on April 6.

**GENESEE HOTEL THEATER**  
 Saturday night at 8 p. m.

803 Broadcasting Stations

There are 803 radio broadcasting stations in the world, of which number nearly two-third are in the United States.

A census made by the department of commerce, which has jurisdiction over commercial radio in this country, showed that there are now 833 licensed broadcasters in the United States, as against only 270 stations for the remainder of the world.

Through a gradual weeding out process of stations which were operating only intermittently and for no particular reason, the number in this country is decreasing.

Canada, with 52 broadcasting stations, stands second to the United States. The recent radio boom in Spain has placed the country in third place with 22 broadcasting stations, while the United Kingdom and France have 20 and 19 stations respectively.

The Salvation Army maintains more than 3,000 stations in India.

Legends of "Sleepy Hollow"

Marie Kluss spent the week-end at her home. R. F. Kluss was a Moscow visitor last Friday.

Matt Baumgartner and family were in Lewiston Saturday. Chas. Ebel and Bruno, went to Moscow to see the opera, Rigolds.

Mr. and Mrs. Henry Lorang visited in Lewiston one day last week. Spring work has started in Sleepy Hollow, so we'll all be busy now.

Joe Bielenberg was a visitor at the Matt Baumgartner home Sunday. Lester Wishard is back in the Hollow after an absence of a few days.

Miss Elizabeth Welle went to Untonwont to attend the funeral of her aunt, Eva Fuchs.

May Moaman of Moscow spent the week-end at the home of her parents, Mr. and Mrs. J. W. Moaman.

Irene Ebel and Ella Armful of Lewiston spent Saturday and Sunday at the home of Mr. and Mrs. Chas. Ebel.

"We seen where the Pine Grove section has sprung. They seen 71 different kinds of birds. We know it is spring here because we see all the early birds ante."

Mr. and Mrs. Matt Baumgartner, Misses Elizabeth Baumgartner, Irene Ebel, Ella Armful, Nola Wilson, Ella Greif, Fern Herman, Madeline Herman, Elizabeth Welle and Sir Ichabod Crane were Sunday visitors at the Herr Von Charley Ebel-home.

Do Not Dump Trash Along Highway Complaint is being made that there is much trash and tin cans being dumped along the state highway, and the road authorities and residents are taking exceptions to such practice.

At Sea Old Maid—I suppose you have been in the navy so long you are accustomed to sea legs? Middle—"Lady, I wasn't even lookin'."

Summit News

Mrs. Theo Schleuter and children, Henry and Mary, spent Sunday at the Miller home.

Grandma Kern called on Mable Green Tuesday, presenting her a beautiful bunch of hyacinths.

Mr. and Mrs. Chas. Grieser and family visited at the home of their son, Carl Grieser, and family Sunday.

Mr. and Mrs. Wood Gash were Sunday visitors at the M. S. Wilson home.

Wilson Easac has been absent from school on account of illness.

Mrs. Frank Green and children and Mrs. W. H. Gage of Caldwell, spent Sunday with Mrs. O. H. Rader and family.

Mr. and Mrs. Dick Green, accompanied by F. O. Green, Thos. Green of Prosser, Wash., and W. A. Green of Goldendale, Wash., motored to Lewiston Sunday.

Louise Mae Johnson, the little daughter of Mr. and Mrs. Elmer Johnson, was taken to the hospital, made her appearance for the first time in the Summit district Sunday.

Mrs. Ed. Erickson of Orofino arrived at the home of her parents, Mr. and Mrs. A. Kern, Friday for a few days visit, also to visit her sister, Mrs. Chas. Kraus and family.

Gray Eagle News Harry Perks was a Moscow visitor this week-end.

Mrs. F. A. Parks, Bob and Tom were Genesee visitors Friday.

Miss Maud Sloan went to her home near Lewiston the last of week.

Mr. and Mrs. Herman Isaaksen were visitors at the Peter Isaaksen home Sunday.

Francis and Jack Platt were visitors at the Platt ranch in the canyon this week-end.

Elsie Wahl, Theo, Tom and Bob Parks were Sunday visitors at the Harms' home.

The BULL'S EYE

Editor and General Manager WILL ROSSO

You Can't Smoke History

A fellow from Carolina wants to know where I get the idea that "Bull" Durham and George Washington come from the same state.

Now thanks, Sir, for your good-natured suggestion. If I knew History I wouldn't be able to write "Bull" Durham Ads. I would be a College Professor, get everything right, and get nothing for it.

Writing Ads that will be remembered is a queer game. This is an Ad, not a History. I selected Ads over History on account of the pay.

P.S. You notice I named in this article the WRONG Carolina. That's so North Carolina will get some business and South Carolina will get some because I made North Carolina. A true South-erner never forgets.

Notice to Delinquent Stockholders Office of Rapid River Mining & Milling Co., Ltd.

Notice is hereby given that there is delinquent upon the following described stock on account of an assessment, No. 26, levied on the 7th day of January, 1926, of three mills per share, the several amounts being set opposite the names of the respective shareholders, as follows: to-wit:

John Krier 600 3.00 John Knapp 3,500 31.50 M. W. Meyer 2,500 22.50 John Nisbet 1,600 14.40 Harry Schooler 3,000 27.00 J. R. Wells 500 4.50 Ed. Wahl 2,500 22.50

And inasmuch as the law so many shares of each parcel of such stock as may be necessary, will be sold at the office of the company of the city of Genesee, Idaho, on the 5th day of April, 1926, at the hour of 2 o'clock P. M. of said date, to pay the delinquent assessment, together with the costs of advertising and the expense of sale.

J. G. MEYER, Secretary-Treasurer Rapid River Mining & Milling Co., Ltd.

Will Open Beauty Shop Mrs. David B. Enomon wishes to announce that "The Peacock" Beauty Shop will be opened for all nature of beauty work in the very near future.

Doctor's Easy Marks? The average physician is notoriously an easy mark for the stock swindler. To offset this condition, an organization of physicians, surgeons and dentists has been formed which will investigate all investments offered to doctors. This organization will also give the deadbeat who seeks to avoid paying for professional services.

Forests in Peril Sixty-five per cent of the 219,000,000 acres of forest in private hands are entirely without fire prevention regulations.

PUBLIC SCHOOL NOTES OF MUCH INTEREST

On Wednesday afternoon, March 17, the music pupils of Mrs. Wm. M. Herman gave a recital in the high school assembly room on Thursday afternoon, April 1, as follows:

Trío—The Witches Frigate, Russell Helen Flammoe, Theres Miller Bertha Gash

At Twilight—Ludwig Kellerman, Op. 15 At Twilight—Theres Miller Duet—Moonlight Reverie, M. Viola Allen Katherine Casebolt and Lorene Platt

Seventh and Eighth Grades Our attendance record would have been perfect for the past two weeks except for absences caused by Glen Erickson and Jack Platt.

Fifth and Sixth Grades The sixth grade has finished the study of Idaho geography and is to start the study of Europe.

Third and Fourth Grades Howard Hanson is back in school after a month's illness.

Our grades will soon have their penmanship drills ready to send in to the Palmer company for acceptance.

First and Second Grades The pupils in our room have been making Easter decorations.

Funeral services were held at 1 p. m. from the Smith & Co. undertaking parlors, Spokane, Rev. Nestor of that city officiating and burial was made in Riverside Park cemetery.

Will Go to Holland Rev. Fr. C. Godschalk will leave on Tuesday, April 6, for New York where he will board a steamer for an extended visit to his native land—Holland—where he will spend the next six months visiting his brothers and sisters and old time friends.

Birth Day Dinner A very delightful birthday dinner party was given Tuesday evening in honor of Henry Moschick's birthday anniversary at the Morscheck home on Church Hill.

Ed. Purdy's Philos From what you can observe in the way of clothes, it ain't hard to know why they call 'em "coming out parties."

DEATH OF MRS. I. ROSSEBO OCCURRED SUNDAY, MARCH 28

The beloved wife of Ingvald Rossebo passed away at 8 a. m. on the morning of Palm Sunday, March 28, at her home, four miles north of Genesee. The end came peacefully, following a lingering illness, due to cancer, which at times had entailed the intensest suffering.

Mrs. Rossebo (nee Ragnilde Lee) was born May 25, 1877, of the parents Mr. and Mrs. Gonsel Lee. She lived in her home community until her marriage to Ingvald Rossebo, February 18, 1898. For a time they lived at different places in the west, but returned and resided at St. Paul, Minnesota, and later at Lake Preston, So. Dakota.

She had been an active member of the Genesee Valley Lutheran church, serving for many years as superintendent of the Sunday school and later as secretary of the Ladies' aid. She was also deeply interested in foreign missions and held at one time an office in the Circuit Women's Missionary Federation. However, when death approached, none of the things of earth sufficed, but alone the redeeming grace of Christ. She found especial comfort in the hymn, "Jesus Thy blood and righteousness, my beauty are, my glorious dress."

She reached the age of 48 years and 10 months. Besides her immediate family there remain to mourn her departure two sisters, Mrs. G. A. Johnson, New York City and Mrs. John Olin, Seattle, So. Dakota, and four brothers, Ben, John and Rasmus Lee of Story City, Iowa and Goodman Lee of Estherville, Iowa.

The funeral was held Wednesday afternoon from the Genesee Valley Lutheran church, Rev. Gerh. A. Peterson, pastor of the church officiating, with interment in the cemetery near the church.

We wish to express our sincere thanks to all friends for all kindness and sympathy during the illness and death of our beloved wife and mother.

Ingvald Rossebo, Helmer Rossebo, Levo Rossebo, Arthur Rossebo.

Work will be started immediately by the Washington Water Power company on the construction of the hydro-electric project at Chelan, according to the announcement of M. W. Birkett, vice-president and general manager of the electric service company. The federal permit, allowing the company to go ahead with the development, was authorized several days ago.

The plans call for the dam to be located near the outlet of Lake Chelan, while the power house will be placed between the dam and the Columbia river. The first unit to be installed will be approximately 30,000 horsepower," said Mr. Birkett. "The eventual possible development will be 125,000 horsepower."

The Chelan river is four miles in length, from Lake Chelan to the Columbia river and in this short distance the river falls 400 feet.

At a wedding anniversary of a wealthy young farmer, one of the guests noticed a somewhat lonely looking and rather shabby attired man in a corner of the room, and walked over to him.

"I was introduced to you," he said, "but I did not catch your name." "My name," replied the other, "is Burton."

"Oh, then, you are a relative of our host?" "Yes," rejoined the "poor relation," "I am his cousin, one hundred thousand dollars removed."

And Better Too He—"When do you make your appearance?" "Flapper—"Oh, I don't make it. It's too much trouble—and besides—one can buy it much cheaper at any drug store."

What shall I do? Ruth.

What's in a Name?

The Chamois Goat is almost as extinct as the Dodo but the name still clings. Most of the so-called Chamois Skins are really carefully selected and dressed lamb, sheep and goat skins. This, however does not render them less valuable.

We have an excellent line of Chamois in a variety of sizes, grades, etc.

If you need one for toilet use, for fancy work, for household use, or for your automobile—you will find it here and at a price that will please you.

Stage Coach Mail  
 A committee to further the interests of the stage-coach mail which will be sent to Pasco from towns from Spokane to Pocatello, was in Genesee Monday completing arrangements for a relay team to take the coach from Genesee to Lewiston, via Uniontown.  
 The stage coach started from Spokane on Wednesday afternoon about 4 o'clock, going to Spangle, where it spent the night, leaving Thursday morning for Plaza, stopping at the towns en route, spent the night at Palouse. Leaving Palouse early Friday morning the coach will arrive in Genesee that evening and will spend the night here, leaving early Saturday morning for Lewiston, with Sim Currin's steeds drawing the famous old coach.  
 The coach to be used is said to be one of the old-time frontier affairs that shows bullet marks of the old hold-up days. That in itself will be worth seeing. "Doc" Davis, old-time prize-winning fiddler, will accompany the coach and will entertain the people at the towns visited.  
 If you have mail that you would like to send on the old coach, you can do so by making the request at the postoffice.  
 It is said it will take the stage coach 5 1/2 days to make the trip from Spokane to Pasco while one of the new mail-carrying airplanes will make the same trip in 90 minutes.

2. A temperature of from 8 to 12 degrees lower than ice and never varies over 2 degrees.
3. A dry, crisp cold is produced since all moisture collects on the frost tank.
4. The refrigerator is always sanitary, no clogged drains, no drip pan to empty. Food compartment is always clean, and odors of different foods will not intermingle.
5. Food spoilage is eliminated as a dry crisp cold keeps food in condition for weeks.
6. Pure ice cakes are always available.
7. Frozen dessert can be had at all times.

Electro-Kold is automatic in operation. No care, no worry. Economical in operation. A guaranteed product.

**U. S. Mail by Stagecoach!**  
 Friday Evening, April 2, 1926  
 HISTORIC COACH WILL PICK UP YOUR MAIL FOR PASCO  
 Reminiscent of stirring pioneer times, will be the 5 1/2-day trip of a real bullet-marked stage coach from Spokane to Pasco, via our city. In sharp contrast will be the 90-minute trip of planes also bearing Spokane-Pasco mail Tuesday morning.  
 The stage coach party, which we are soon to welcome, invites us to include letters of greeting to Pasco friends with their own "stage coach mail." Use regular two-cent postage; postmaster will hold mail for the coach if requested.

**The Syringa Club**  
 The Syringa club held a very interesting meeting at the country home of Mrs. Jesse Borgen and all enjoyed themselves in a social way. A very delicious luncheon was served by the hostess at 5 o'clock.  
 The next meeting of the club will be at the home of Mrs. John Weber on April 8. Every member is urged to be present.

**Cattle Are Tuberculin Free**  
 The dairy herd of John P. Krier was last week tested by an authorized government veterinarian and his cattle were all found to be absolutely free from tuberculosis, thus assuring disease free milk for his customers.  
 Women are forbidden, by act of the British parliament, to go down mines as engineers.

**No Plow is Better than its Bottom**  
 —just as no knife is better than its blade or no gun is better than its barrel. John Deere plows—the kind we handle—are famous everywhere because of the quality in their bottoms.  
**John Deere Plow Bottoms**  
 are made of the best material for the purpose.  
 They are designed by men who have spent a lifetime in studying soil conditions and building plows to meet them.  
 There are shapes and styles to suit every soil condition.  
 When you select a John Deere plow, equipped with bottoms built for your kind of soil, you can always be sure of good scouring, long wear and thorough seed beds.  
 Next time you are in the store let us show you how John Deere bottoms are made—how they are shaped "just right" for good work and light draft; how perfectly they are reinforced at points of greatest wear; how the unbreakable, unbendable steel frog gives to moldboard, share and landside the strongest support possible.  
 You are sure to appreciate the quality in John Deere Plows with genuine John Deere bottoms.

**PERSONALS**  
 Mrs. P. F. Mullaney returned home Tuesday after spending a week in Lewiston.  
 W. W. Gray returned home Monday after having spent the winter in California.  
 Miss Irene Mullaney and Mrs. Ray Edwards were Moscow visitors Monday afternoon.  
 Mrs. D. B. Eronson and sister, Miss Manette Gravelle, returned Saturday after spending a week in Spokane. Vincent Hasfarther, who is attending the Lewiston Business college, spent the week-end with home folks.  
 Walt Payne returned the latter part of last week from California where he has been spending the "cold" weather.  
 Miss Eve Hampton, who is attending the U. of I., spent the week-end visiting her parents, Mr. Mrs. Arthur Hampton.  
 Mr. and Mrs. Herman Krier and Mrs. Krier's mother, Mrs. Goodman, of Palouse, visited at the John Krier home over Sunday.  
 Misses Agnes and Sylvia Johnson, who are teaching near Palouse, spent the week-end with their parents, Mr. and Mrs. Eimer Johnson.  
 Mrs. Henry Hanson and Mrs. Arthur Howe went to Spokane last Friday. They were joined by Mr. Hanson Sunday who accompanied them home.  
 Misses Germain Gimbel, Cleo Decker, Glenn Cooper and Mrs. C. L. Jain accompanied Miss Grace Jain home Sunday, where they spent the day.  
 Mrs. Fred K. Bressler returned to her home Tuesday after spending three weeks in Pullman with her daughter, Mrs. Geo. Gannon, and family.  
 Miss Wilma Burton and Rowena Hanson spent the week-end at the Hanson home. Saturday evening they entertained several other U. of I. students at a dancing party.  
 Steve Broemmeling arrived Monday from Coogan, Alta., Canada, for a two-weeks visit with relatives and friends. He says they have had fine winter weather in his part of Canada.  
 Mr. and Mrs. G. E. Taber and little daughter arrived last Friday from their home in Marshfield, Oregon, for a visit with Mrs. Taber's parents, Mr. and Mrs. John Meyer, and other relatives and friends. They will return home the latter part of this week.  
 Mrs. Arthur Mayer and little daughter, Beverly, of Troy spent Sunday at the home of her grandparents, Mr. and Mrs. R. F. Lambert, and Mr. and Mrs. Al. Mayer. She brought news of her mother, Mrs. F. E. Lambert of Deer Park, Wash., that she is greatly improved and would soon be able to be up again.  
 "The Peacock"  
 "The Peacock" is the name of a new beauty parlor which will be opened for business on Monday, April 5, where the ladies may have their wants in this line taken care of right at home. The business is owned by Mrs. D. B. Eronson and the work will be in the immediate charge of her sister, Miss Manette Gravelle of Minneapolis, Minn.  
 Mrs. Eronson has purchased from Miss Pauline Steltz her building on Main street, where "The Peacock" parlor will be conducted. She invites all the ladies to call on her opening date—April 5.  
 Blonde Bess Opines  
 "When the boss refers to 'circumstances not under his control'—I just know he is thinking of his wife!"

**Genesee Weather**  
 When one reads of the terrible winter weather they are having east of the Rocky mountains, as far as Texas, it makes one glad they are living in a country where there has been very little winter thus far—and where the spring has already officially begun.  
 The weather has been balmy for the most part and trees of all kinds are coming into leaf and some have made garden and many cabbage plants have been put out. There has been some moisture during the past few days—just enough to make everything look decidedly green and spring-like.  
 Farmers are busy in their fields and spring work has generally begun in earnest.  
**Losses Horse**  
 Last Thursday evening about 6 o'clock, as Pat Mullaney, who had been dragging the road, was making his way toward home he had the misfortune to lose one of his horses.  
 Mr. Mullaney was about in front of the Milton Rader residence, on West Main street, when he met John Weber, who was driving home in his car, and was going in the opposite direction from Mr. Mullaney. The sun was shining in Mr. Weber's eyes so brightly that he failed to see the team and accidentally ran into one of the horses, breaking one of its forelegs and it was necessary to shoot the animal.  
**After Lenten-Dance**  
 On Friday night, April 9, the American Legion will give an after-Lenten dance in their hall, to which the general public is invited. The music will be furnished by Allen's orchestra. This will be your first opportunity to loosen up your muscle bound dancing apparatus after Lent.  
**Have Moved to Ranch**  
 Mr. and Mrs. Isaac Isaksen have moved to their ranch after having spent a portion of the winter in town in order that their son, Lowell might have the advantages of the Genesee public school.  
**Yep—Total Loss**  
 Smithers: "Sam Shofet has just been run over by a train. Not a thing left."

# THE GENEESEE NEWS

GENESEE, LATAH COUNTY, IDAHO, FRIDAY, APRIL 9, 1926

NO. 41

## 7 REASONS why it is

Complete with dusting tools

- 1 For the first time, it makes possible "Positive Agitation."
- 2 In the ordinary cleaning time, it beats out and sweeps up an average of 101% more dirt.
- 3 It is an even greater rug saver; Hoover cleaner rugs wear years longer.
- 4 It is virtually service-proof, requiring no oiling.
- 5 50% stronger suction makes dusting tools more efficient.
- 6 Its dust- and germ-proof bag is now washable.
- 7 Many new features insure greater operating ease.

See The Greater Hoover today! Let us demonstrate it in your home, by cleaning one of your rugs—free!

For repairs on your old Hoover, leave your order with us.

## Has further Hardware

**Good Word for Winter**  
Take winter as you find him, and he turns out to be a thoroughly honest fellow, with no nonsense in him and tolerating none in you, which is a great comfort in the long run—Low, all.

**Protecting Orchards**  
The most efficient and economical method of protecting orchards and tender vegetation against frost is to heat the lower layers of the air by burning some sort of cheap fuel.

## SAVING MONEY

The old saying, "Money Saved is Money Earned," is even more true today than when it was first uttered. And the young man or woman who would like to get ahead in the world, who wants to be financially independent at some time in life, can find no more certain way to accomplish it than to start a Savings Account with this bank—and start it NOW.

## First Bank of Genesee

A. E. CLARKE, Pres. N. S. VOLLMER-HOPKINS, V. P.  
C. P. WHALEN, Cashier

"Where Quality Counts"  
C. E. Bolles, Propr. Moscow, Idaho

**Legends of "Sleepy Hollow"**  
Chas. Ebel made a trip to Palouse Tuesday.  
Jens Borgen was in Moscow one day last week.  
Joe Griesser was a Moscow visitor Wednesday.  
Isaac Isaksen was a busy man in town Saturday.  
Mrs. and Mrs. John Johann were in town Wednesday.  
Bruno had some new headlights installed Saturday.  
Frederick Baumgartner was home for the week-end.  
Andrew Klemm was a business visitor in town last week.  
Miss Christina Lorang of Spokane is home for a few months.  
Albert Griesser and Harold Klemm were in town Sunday night.  
Mr. and Mrs. W. O. Borgen were in the city of Cor Creek Sunday.  
A good time was had Sunday at the lake. Boat riding was the main event. John Kluss hauled a load of grain from town Tuesday in his new truck.  
Chris. Broenneke took his family to Moscow in his "4" wheels and no break-car.  
Elizabeth Welle was in Lewiston a few days last week having some dental work done.  
Albert Griesser was in Colton Sunday at the home of his parents, Mr. and Mrs. Frank Griesser.  
J. W. Mosman and family motored to Moscow Saturday. Their daughter, May, accompanied them home.  
The chaperone of Sleepy Hollow came home rather late Sunday night. We almost had to need for him.  
Just because we live in Sleepy Hollow is no reason to believe that we'll break our thumb and fingers yelling fire.  
Ed. and Steve Kamblitch motored to town Sunday to eat a meal from mother's table nothing eating a meal mother cooked.  
Mrs. R. F. Klus, Mrs. John Geselchen and Mrs. John Kluss attended the meeting at the home of Mrs. Chas. Warneke on Thursday.  
Mrs. W. C. Wilson, who is not much improved at this time.  
The pep club was very delightfully entertained on Thursday of last week by Mrs. Leo Miller. The afternoon was spent in various ways. Miss Kuntz acted as fortune teller. At precisely the right time a very delicious luncheon was served by the hostess and a very enjoyable time was had by all. The next meeting will be with Mrs. F. B. Hampton on April 8.

**Blue Hen State**  
Delaware got its name of the Blue Hen state during the revolution, and one of its officers of its "Game Cock Regiment" maintained that a true game cock must be the offspring of a blue hen.

**Coet of Looking Pretty**  
The annual sales of talcum powder, cold cream, lipsticks and toilet powder amount to \$750,000,000, or about \$15 for every woman in America.

**Government Aid for Idaho**  
Idaho will receive \$936,589 from the federal government during the year beginning July 1, 1926, for federal highway construction, according to an announcement by William M. Jardine, secretary of agriculture, Tuesday of last week, says the Star-Mirror.

**Hittemiss Make Knuff**—What do you think of Jones' car?  
Stuff—Well—much more printable language than he does.

**Summit News**  
Cleo Taylor spent Sunday with Nellie Hayden.  
Ruth Jacobs of Lewiston spent the week-end visiting Eas Swanson.  
Mr. and Mrs. Jas. Ellis and family took Sunday dinner with the Fred Miller family.

**Blond Bess Opines**  
Believe me Ruth, there are a lot of people in this land who are complete masters of the touch system—and they ain't stenographers, either

**Coming United Doctors**  
The doctor who has charge of the State of Washington is a SPECIALIST in Chronic Diseases and Clinical Medicine  
Will be at DAVENPORT HOTEL, Spokane, Wednesday, Thursday and Friday April 14-15-16  
COZY NOOK HOTEL, Palouse, Wash. Saturday, April 17  
Office Hours, 9 a. m. to 3 p. m.  
No Charge for Consultation  
The doctor is a graduate in medicine and surgery licensed in the State of Washington. He visits professionally the important towns and cities, and offers free consultation to all, except the expense of treatment when desired.  
He treats Chronic Diseases of long standing and has to his credit many wonderful results in catarrh, ulcers of the stomach, diseases of gall bladder, bowels, blood and skin, nervous disorders and diseases of heart, kidney, and bladder, bed wetting, rheumatism, sciatica, leg ulcers, varicose veins, rectal ailments and chronic constipation.  
If you have been ill for any length of time and do not get better, call on the doctor, as improper measures rather than disease are often the cause of your long standing illness.  
Special attention is given to each case, and an earnest effort made to attain the best possible results.  
Remember the above date and that the doctor specializes in Chronic Diseases.  
Laboratory: 335-336-337 Boston Block, Minneapolis, Minn. 40-2x  
Notice to Creditors  
Estate of John Lorang, Deceased  
Notice is hereby given by the undersigned, executrix of the estate of John Lorang, deceased, to the creditors and all persons having claims against the said deceased, to exhibit them with the necessary vouchers within ten months after the 28th day of March, 1926, the first publication of this notice, to the said executrix at the First Bank of Genesee, the same being the place for the transaction of the business of said estate, in Latah county, State of Idaho.  
MARY A. LORANG, Executrix  
Dated at Moscow, Idaho, March 22, 1926.  
Notice to Delinquent Stockholders  
Office of Rapid River Mining & Milling Co., Ltd.  
Greatest Gold Mine, March 26, 1926.  
Notice is hereby given that there is delinquent upon the following described stock account an assessment No. 26, levied on the 7th day of January, 1926, of three mills per share, the several amounts being set opposite the names of the respective shareholders, as follows, to-wit:  
J. D. James ..... 1,000 \$ 3.00

**Singing Fish**  
The sapo fish, which lives under stones near the shore, is often called the singing fish on account of a peculiar humming noise that is made by its air bladder. Sapo is a Southern American name for various toadfishes, especially for the singing variety which is found along the California coast.

**Omgosh Doc**  
"My friend," said the doctor, "you are suffering from a chronic complaint."  
"Sh—h! I know it, but please leave your voice," whispered the patient, "she's in the next room."

**PUBLIC SCHOOL NOTES OF MUCH INTEREST**  
On Tuesday, April 13, the rural Genesee public school under the direction of Miss Goldie Drake, state rural supervisor, Miss Drake will be in Genesee all day Monday to make final preparation for the meeting. It is expected that from 15 to 25 rural teachers will be in attendance as the meeting is for both New Pines and Latah county teachers. Genesee teachers and Miss Drake will be demonstrated teaching. The afternoon will be devoted to round table discussions of the various teaching problems that arise in one or more rural schools.  
Superintendent Muehlitz left the middle of this week to attend the meeting of the Inland Empire Teachers' association at Spokane.  
The senior class play, "Home Ties," is progressing very nicely at this time and the public is assured a good, clean play that is full of fun and common sense. This play is coached by Mr. Wicks and Edwin Smolt, so the public is assured a well coached cast. The play will be given Wednesday evening, April 14, in the opera house.  
Don't forget the mask ball to be given Friday night, April 16. All will be there with all its orchestra and, as stated before, no one will be allowed to dance who is not masked until after the unmasking hour.

**Economics and Citizenship**  
It is the policy of most schools these days to put a course of economics in the school system. This course is gaining more and more in popularity as time shows the result. The main object of such a course is to train in citizenship; train boys and girls to know what some of our great problems of today are.  
Unless we give our students some foundation in economic law, we are failing to fit them to meet the duties of citizenship. It is the duty of the citizen to know the principles of economics; to know what some of our great problems of today are.  
The pupils in our classes are bringing in many book reports at this time. Some of the reports show that we have readers of discrimination.  
Miss Kuntz of the Summit school visited our room Tuesday.

**Seventh and Eighth Grades**  
The pupils in our classes are bringing in many book reports at this time. Some of the reports show that we have readers of discrimination.  
Miss Kuntz of the Summit school visited our room Tuesday.

**Fifth and Sixth Grades**  
The fifth and sixth grades made a blackboard border in handwork last Friday.  
This room was awarded the picture of Theodore Roosevelt this month for having the highest percent of attendance.  
Daisy Dean is back in school after being absent for more than a week.  
The sixth grade has finished Idaho geography and is taking up South America.

**Third and Fourth Grades**  
Our room had perfect attendance during the last week and we are glad that our attendance is getting back to normal.  
We made Easter decorations last Friday. This week we are going to make some appropriate to April.  
Those perfect in spelling last week are Richard Gordon, Donald Springer, Melva Curran, Dan Abern, Eunice Rador, Ormand Hickman and Eva Jones.  
Miss Kuntz visited in our room Tuesday forenoon.

**First and Second Grades**  
Last Friday afternoon the pupils in our room enjoyed an Easter egg hunt. A great deal of enthusiasm has been worked up in the first and second grade spelling classes. They have started a contest to determine which class has the best speller. This is decided each day by the class having the greatest number of perfect lessons. The contest will last one month.  
Barbara Huffman is again in school after a week's absence, due to illness.

**Honor Old Stage Driver**  
The old-time stage coach, which was carrying mail from Spokane to Pasco, to arrive at the latter place in time for the celebration of the opening of the air mail route between Pasco and Elko, Nevada, arrived in Genesee last Friday evening about 6 o'clock, driver, holding the "ribbons." The party was met at the post office by a large crowd, among which were many old-timers who had known Mr. Warren in the olden days and who greeted him with a hearty welcome.  
After the horses had been cared for the stage coach party were taken to Smolt's where they were entertained by a committee of old-timers, covered being laid for 14, including the stage coach party. After the inner man had been cared for and former days talked over at some length, the party adjourned to the American Legion hall where an old-time dance was given in honor of the event. The music was furnished by old-time local fiddler who accompanied the stage coach party.  
The hall was decorated in one corner by an old-time bar and the necessary equipment (so far as appearances were concerned) but the old-time kick was absent. The music was all that could be desired and those taking part in the dance enjoyed themselves to the utmost. Among those who were again made young by the event were Colonel G. N. Hollister and Jas. Haney, who surprised many in the way they "tripped" the light fantastic.  
Although the event was much enjoyed by young and old and gave the younger generation an opportunity to see how they did things many years ago.  
The stage coach left Genesee Saturday morning about 6:30 via Uniontown for Lewiston, with Jim Curran's teams on the tongue. Curran's horses were used as far as the Collins place, at the head of the Lewiston grade, when John Roach's horses were put on the coach for Lewiston.

**Bernadine Hasfurther to go Abroad**  
Miss Bernadine Hasfurther will go to Spokane Friday morning, leaving there Saturday for New York. She will go to Europe as a companion to Miss Ruth McDonald of Spokane. The ladies will leave New York April 17, on the Andania, and sail for Paris. They expect to visit friends and also the noted and picturesque places in Italy, Belgium, Holland, Germany, Sweden, Denmark and England.  
Returning home they plan to leave Liverpool July 2, sailing for Quebec making the return journey through Canada.  
Miss Hasfurther will have many interesting things to tell when she returns home.

**Camp Fire Girls Held Meeting**  
The Camp Fire Girls met at the home of their guardian, Mrs. Vern Beckman, Monday evening after school. Election of officers was held and the following were chosen for the ensuing term: Pearl Perkins, president; Mildred Roach, vice-president; Angie Cate, secretary; Frances Smith, treasurer; Inez Mayer, scribe; Audrey Pleiman, song leader.  
This is the first meeting to be held after school, because of other activities they have changed the time of meeting.  
The next meeting will again be held at the home of their guardian, Mrs. Beckman.

**Chickens and Gardens**  
There has been some considerable discussion in various parts of town as to whether one could raise chickens and garden in the same plot. Some are equally sure it cannot be done. Any way, if there is one thing above another that will cause ill feeling between neighbors, it is one's chickens pasturing in the other's garden.  
If you have chickens running loose, just try planting a garden and allowing the full range and see how it works out—then think of your neighbor's garden—and then keep your chickens at home.

**Among the Sick**  
A. H. Potech is confined to his home with the flu.  
Henry Craft has been confined to his home with the flu.  
Mrs. Wm. Smo, who has been ill with the flu, is again able to be out. Mrs. Clara T. Wood, who has been seriously ill with pneumonia, is reported as being much better.  
Little Tommy Sanford, who has been seriously ill with pneumonia for the past several weeks, was again operated on Wednesday morning. He is said to be slightly improved.

**WM. P. WILSON PASSES AWAY AT HOME OF SON**  
Wm. P. Wilson, father of M. S. Wilson, passed away at the home of his son, M. S. Wilson, Monday, April 5, about 11 o'clock, from a complication of diseases consequent to old age.  
Wm. P. Wilson was born in Iowa March 9, 1846, where he grew to manhood. On December 9, 1889, he was married to Sarah P. Hodge. To this union three children were born, M. S., Rhoda Ann, and Gelson Thomas Wilson. On August 17, 1880, the wife died after passing away. On July 8, 1883, he was married to Burdell Green. To this union were born six children, Roy, Ernest, Mable, Edith, Rose and Lena.  
When about 17 years of age, Mr. Wilson became a member of the Christian church, of which organization he was a faithful member and held the plains to Idaho in a covered wagon. After living in Idaho for about 25 years he moved to Portland, Oregon, where he resided until 1924, after which he came to Genesee to reside with his son, Milton S. Wilson, where he passed away.  
The funeral was held from the Christian church Wednesday afternoon, Rev. N. E. Beach, pastor of the church, who took for his text, Matthew 11:15—"Precious in the sight of the Lord is the death of his saints," Rev. Beach paying high tribute to the life and character of Mr. Wilson, who had always led an exemplary life.  
Mr. and Mrs. Harry C. Beach sang a duet, "Beautiful Life of Somebody," and a quartet composed of Miss Francis Smylie, Mr. and Mrs. Harry C. Beach and Rev. N. E. Beach sang "We Gather Over There" and "Shall We Gather at the River."  
The floral offerings of friends and relatives were very beautiful and there were many of them. Burial was made in the I. O. O. F. cemetery.  
The pallbearers were D. W. Abern, H. Smith, E. J. Pleiman, Wm. Bozett, Ed. Roderick and F. B. Hampton.

**We wish to extend our sincerest thanks to the friends who so kindly assisted during the illness of our father and brother.**  
The Wilson Children and Brother.

**American Legion Convention**  
Plans for the eighth annual convention of the Department of Idaho, American Legion, are rapidly taking form, according to Lester F. Albert of Boise, department adjutant.  
The convention dates have not been definitely set, but it will probably be held during the last week in August. The final date will depend on the conveniences of National Commander John R. McQuigg, who expects to be present in person.  
"I expect to proceed to Lewiston," says Mr. Albert, "at an early date for a conference with Post Commander Robert D. Leeper and Chairman E. J. Todd, at which time the details for the convention will be worked out."  
Commander Leeper and Department Commander Oscar W. Worthine have entered into a contract which provides a business basis for convention plans.  
Those expecting to be well supplied with distinguished guests are extending invitations to such notables as Vice President and Legionary Daws, Judge Kennesaw Mountain E. McQuigg, former National Commander John R. McQuigg, and Governor Charles Rev. Sprague and Orland Mayer. The meeting was successfully conducted by Grace Jane, after which a delicious breakfast was served in the church basement.

**Will Hold Food Sale**  
The Blue Bird club will hold a food sale at the Follett store, Genesee, Saturday afternoon, April 10 (tomorrow). The proceeds of this sale will go for charitable work as this is the sole mission of this organization, which should receive the hearty support of all.  
Don't forget the place and date.

**Altar Society Entertained**  
The Altar society was delightfully entertained last Tuesday at the country home of Mrs. John Weber. There was a short business meeting, the rest of the afternoon being spent in social converse. At 4 o'clock a delicious luncheon was served by the hostess.

**Monday Bunch Entertained**  
The Monday Bunch and their husbands were pleasantly entertained at a dinner Monday evening at the home of Mrs. M. S. Casbolt. Mrs. Casbolt, who is the daughter-in-law, Mrs. Walter Casbolt, of Seattle.

**SEMI-LOCAL NEWS CLIPPED FROM EXCHANGES**

**Arrow Road Ready**  
The steam shovel finished work on the Arrow road yesterday. There is a little team work yet to be done and then the grade will be ready for surfacing.—Julietta Record.

**Mirror Man is Modest**  
Now we read from the pen of someone who favors the short skirt, that we have seen as moral as bare noses. We have seen a question, but we have seen covered up and the same applies to the knees that we might have seen if we hadn't been too modest to look.—Star-Mirror.

**\$8,000 Worth of Stock**  
Two hundred and sixty-eight head of hogs were delivered here Monday for which the farmers received \$12,000, a hundred weight. A carload of beef cattle was also shipped by Goffe Eckert to the Spokane market. The hogs and cattle brought approximately \$5,500 of outside money into the community.—Cottonwood Chronicle.

**Postoffice Be Discontinued**  
Postmaster Rogers has received notice from the postal department that the Slackspoo postoffice will be discontinued April 18, at 7:30 p. m. and all mail will be carried by the fact that Rural Route No. 3 will be established on May 1 and will serve most all the patrons of the Slackspoo postoffice. The establishment of the department a few weeks ago when it was announced that the order would enter into effect May 1—Caldesia Enterprise.

**No Closed Season This Year**  
The county game commission, after a careful consultation and considering the proposition from all angles a few days ago decided to maintain a closed season on trout fishing during 1926, whereas for the past two years the season has been closed during the months of April and May. Therefore the fishing license on any one can do all the trout fishing he wants to in the streams of Asotin county in April and May as can be enjoyed during any other time of the year. This will likely mean that many fishing licenses will be taken out by those who take advantage of a big outdoor recreation along Asotin creek, George creek, Ten Mile and Alpowa creeks. And some may even go over long before automobiles can get over the divide back of Cloverland.—Asotin Sentinel.

**State President Visits**  
Mrs. Beulah Hattabaugh, president of the Rebekah state assembly, visited officially the local Rebekah lodge Tuesday. A very interesting and profitable meeting was held in the afternoon. Fifteen Rebekahs from Star Lodge, Moscow, attended the meeting. Mrs. Hattabaugh's address occupied most of the afternoon. Others who gave talks were Past President Maude V. Horgoridge, Past President Rita Holmes and Grand Warden, Senator C. A. Casbolt.  
Mrs. Walter Casbolt of Emmett Lodge No. 32, who is visiting in town, attended the meeting.  
At 10 o'clock dinner was served at the Genesee Hotel, which was beautifully decorated with potted plants and cut flowers. A dainty place card marked each guest's plate.  
After the dinner, Mrs. Hattabaugh, accompanied by the Moscow Rebekahs, went to Moscow for an evening session.  
Mrs. Fred Perkins, Miss Ruth Martinson, Mrs. W. W. Burr and Mrs. Vera Beckman represented the Genesee lodge at Moscow.

**To Give Concert**  
Spokane College concert orchestra will give a concert at the Genesee Valley Lutheran church on Sunday, April 18, at 7:30 p. m. and all orchestra was here last year hearing them were very well pleased with the music. This year there are more members in the orchestra, so it undoubtedly is much better than last year.  
Besides the numbers given by the orchestra there will be special ones rendered by Leon Peterson, director of the orchestra, Henry Howard, tenor, Ruth Rooney, pianist and Anita Hupe, cellist.  
Leon Peterson is well known here for his musical ability and as a very good director.

**Death of Mrs. Scroggin**  
Mrs. Amelia Scroggin, sister of the late Fred K. Bressler, passed away at her home in Spokane Wednesday afternoon, April 7, about 5 o'clock, at the age of 70 years, as a result of a severe attack of pneumonia.  
Mrs. Scroggin was well known in Genesee, having been a resident here for many years, but left here some 20 years ago for Spokane, where the family has resided.  
Mrs. F. K. B. Bressler left Thursday morning for Spokane and her son, D. L. Bressler, went to that city this (Friday) morning to attend the funeral.

**Want to Start a Show?**  
If you are in the mood for starting a medicine show, or something of that sort, you will have the opportunity of buying almost a complete outfit tomorrow afternoon, when the old eastern college of high standing in that city of its seniors at 48 eggs in 41 long before automobiles can get over the divide back of Cloverland.—Asotin Sentinel.

**Two-legged Kind**  
James E. Posito ate two dozen grapes in 15 minutes, February 24, 1926, according to the Spokane Record. Not pictures in the Spokane Record. And now comes word from the eastern college of high standing in that city of its seniors at 48 eggs in 41 long before automobiles can get over the divide back of Cloverland.—Asotin Sentinel.

**Easter Sunrise Meeting**  
A very pretty meeting was held on Sunday morning at 8 o'clock by the C. E. of the Congregational church. The main features of the meeting were the interesting talks which were given by Rev. Sprague and Orland Mayer. The meeting was successfully conducted by Grace Jane, after which a delicious breakfast was served in the church basement.

**Easter Cantata Pleases Large Audience**  
(Contributed)  
An audience that filled the Congregational church to capacity last Sunday evening paid tribute to the musicianship of the local choir as evidenced in the rendition of Carri B. Adams' Easter cantata, "The Resurrection Story." The dramatic intensity of the music, as well as the skill manifested in its performance, was attested by the unwavering attention on the part of the hearers, who sat motionless through the hour and twenty minutes of the concert.  
The program was begun with the triumphant chorus, "Rejoice, the Lord is Risen!" which was attacked, not only with the gusto demanded by the composition, but with an accuracy of pitch and delicacy of phrasing which rarely are found in volunteer organizations.  
The initial notes of rejoicing sounded by the introduction of "O Come and Mourn," by the choir, was characterized by its harmony. It was during this number that the audience became most fully aware of the perfect blend of the organization, and the complete solos of the voices. The incidental solos of this number all were well taken, but special commendation is due Mr. English and Mrs. Lonosty for their flawless rendition of more than ordinary difficult solos. The fourth number, "Near the Cross Was Mary Weeping," the audience was given a real treat by being privileged to hear Mrs. Sprague's rich contralto voice in solo. Although the range of the selection was not great, it permitted the audience to appreciate the upper register of the voice, the lower notes were sung with a richness and power that evidenced a most unusual talent. The last number in Part One, "Thou Sore Oppressed," was dominated by Mrs. Emmett's interpretation of the incidental contralto solo. The beautiful words, "Thou, sore oppressed, the Sabbath rest In thy grave art keeping: All thy labor now is done, And now it is all thy weeping," for the soloist's soft, tranquil voice.  
Part Two, which set forth an interpretation of "The Victory," was, if anything, richer in color and more brilliant in execution than was Part One. The opening number, "Awake, Glad Soul, Awake," was delightfully rendered by Mrs. Burr, Mrs. Beckman and Mr. Wilson. The two upper voices followed through the stirring theme, singing it, not only with complete accuracy, but with a brilliance of phrasing that delighted the audience and delighted the audience of Mrs. Wilson's sonorous, and all but bottomless, voice enabled him to supply a firm support, his sustained low tones giving the "religioso" motive, which was necessary to the success of the lighter upper parts.  
The soprano solo, "Christ, the Lord is Risen Again," was effectively rendered by Miss Hardman, whose lyric voice gave her a facility in singing the more rapid passages that marked her as a versatile soloist of real ability. "Whosoever Believeh Shall Live," a difficult tenor recitative, was rendered with power and expression by Mrs. Shork, a resonant voice giving which in which the choir again gave evidence of the thorough practice it had received.  
Too much credit for the success of the program cannot be given to Mr. English, the director, and Mrs. Heer, the accompanist. For although each was flawless, it is only these "behind the scenes" who appreciate their tireless efforts in calling and conducting the many rehearsals which made the program a success.

**Will Open Ford Garage**  
The Keyes Motor company of Lewiston has taken a lease on the Miller garage building and will immediately put in a stock of Ford cars and trucks and will also put in complete garage equipment and gas station, according to a statement made by E. E. Miller.

**They May Be**  
Word has been received by relatives that Mrs. Mary Blume, who underwent an operation at Portland recently, is improving very satisfactorily.

**They May Be**  
Those who have reached a point where they don't expect to get rich may be serene judges of the world's affairs.

**Birthday Surprise**

The Springs club members planned and carried out a very pleasant birthday surprise last Thursday evening when they invited their husbands to join them in celebrating the birthday anniversary of Mrs. Henry Flomer. At about 7 o'clock in the evening the party gathered at the Flomer home and brought with them well-filled baskets. A very delicious dinner was served, Mrs. Flomer being taken completely by surprise.

The sons and daughters-in-law presented Mrs. Flomer many very pretty and useful gifts while the Springs club gave her a set of dishes.

**Will Give Comic Opera**  
 The music students of Mrs. Wm. Hordemann will at some time during the next month give the comic opera "The Mikado."

**Piano Tuning**  
 I will be in Geneese about the middle of April. Leave orders for piano tuning with F. W. Loncosty.

**Had Real Snowstorm**  
 The Geneese section was visited by a sure-nuff snowstorm last Friday when flakes fell as large as dollars (bills) almost, which lasted for several minutes, but they disappeared as soon as they hit the ground. The day was not disagreeable only for a portion of the time, and as for Easter Sunday, it was about as fine as could have been asked for and while the fashion parade was not quite as large as that of Broadway, Noo Yawk, it was nevertheless imposing to a degree.

**Card Club Will Meet**  
 The Card club will meet next Tuesday afternoon at the home of Mrs. Milton Rader.

**The Blue Bird Club**  
 The Blue Bird Club met at the home of Mrs. August Johnson Tuesday afternoon. The time was very profitably spent cutting aprons and sewing for the children's home at Lewiston. A very delicious luncheon was served by the hostess about 4 o'clock.  
 The invited guests were Mrs. Arthur Olson and Mrs. Wm. Emerson.  
 The next meeting of the club will be held in two weeks at a place yet to be decided upon.  
 The club will hold a food sale at the Pollett store, Geneese, on Saturday afternoon of this week. The proceeds of this sale go for charitable work and the sale should be well patronized.  
**Even Renters**  
 Ahe putting out Stark Nursery trees. They mature and bear in two years. See Lester Hayden. 41-1x

**Once Over—Twice Disked**

We have a disc harrow that you will appreciate as a first class seed bed-maker. With it you can disk the ground the entire width of the harrow twice in one trip over the field. The front section is out-throw, the rear in-throw—the ground is left level and completely pulverized.

**JOHN DEERE**  
**Double-Action Disc Harrow**

The John Deere is an extra strong disc harrow, and will stand the strains of unusually severe conditions. The main frames, levers and racks are steel, and the gang frames are double bars, so well braced that they have twice the strength of the ordinary harrow.

A separate lever for each gang makes adjusting easy for all conditions, and the front section has a third spring-pressure lever which makes it possible to force the harrow to disk at equal depth its entire width in depressions and over ridges.

The rear section can be detached, making a single-action harrow, or by securing the hitch that we can furnish, you can use this John Deere Double-Action Disc Harrow with your tractor.

Ask us to show you our line of disc harrows the next time you are in town, and remember, we handle a complete line of farm implements.

**JOHN DEERE FEATURES**  
 Spring-pressure lever—Independent gangs—All-steel main frame—Double bar, riveted gang frames—Convenient grease cups—Oscillating spring steel scrapers

**Ladies' Shoe Department**

Our ladies' shoe department now contains a large assortment of stylish new pumps and oxfords in the new satins, kids and patents.

**New Dry Goods**

We have just received a new shipment of Rayon Crepes and English prints, also new silk scarfs.

**Follett Mercantile Co.**

### HOW MUCH ARE THE RAILWAYS EARNING?

The subject of railway earnings is one of unusual interest at present because of the western rate advance case and the fact that the net operating income being earned by the railways as a whole is showing substantial increases. The Railway Age publishes in a recent issue an editorial entitled "How Much Are the Railways Earning?" in which it says:

"The total amount of net operating income earned in the first eight months of this year was larger than the amount earned in the corresponding months of any previous year. The only real measure of the prosperity of an industry, however, is the percentage earned on its property investment, or its valuation. There was no valuation before the war and therefore to get a satisfactory measure of the present prosperity of the roads it is necessary to compare the return now being earned on the property investment with the return earned by them on it prior to the war.

"In 1916 the net operating income of the railways was the largest in history, and yielded a return of 5.9 per cent on the property investment. Since that year, however, the investment in the Class I roads has increased from \$17,637,000,000 to about \$33,855,000,000, or almost \$16,000,000,000. In consequence of this increase in investment the return earned in the first eight months of this year was at the annual rate of only 4.65 per cent.

"The investment in railroad property in the 7 1/2 years ending with 1917 and immediately preceding government operation averaged about \$17,761,000,000, while in the years since 1918 it has averaged approximately \$25,178,000,000. The average net operating income earned annually in the 7 1/2 years before government operation was \$569,790,500 and yielded an average annual return on property investment of 4.9 per cent. The return earned in these years proved inadequate that the annual investment made in improvements and new facilities declined from more than \$1,000,000,000 in 1911 to less than \$250,000,000 in 1916.

"The average annual rate at which net operating income has been earned since January 1, 1921, and down to and including August, 1925, has been 974,587,000, which has yielded an annual average return of 3.94 per cent on property investment.

### TO PERPETUATE ALL SPORTS IN STAINED GLASS AT CATHEDRAL

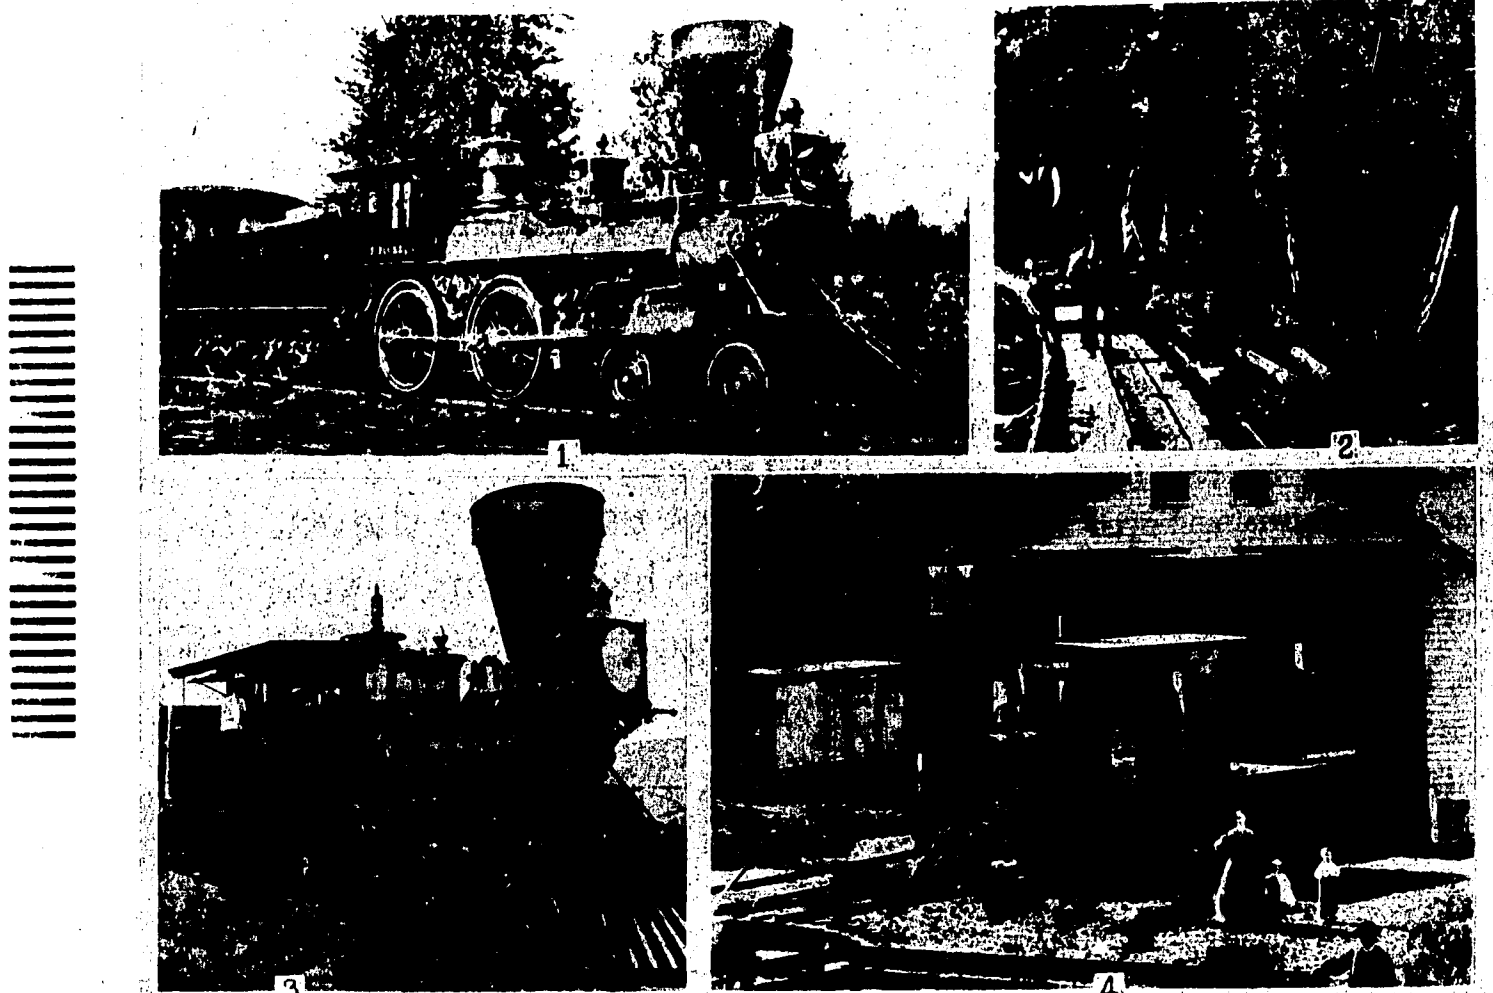

NEW YORK.—A design depicting an angel crowning a victor with laurel, and including groups of athletes, was submitted recently for the stained glass window in the sports bay of the Cathedral of St. John the Divine. The design, made by Ralph Adams Cram, architect of the cathedral, will be subject to revision by the committee representing amateur sports.

Two large panels are included in the design. One shows figures symbolic of polo, golf, tennis, and baseball as major, with gymnastics, yachting, bowling and billiards as minor sports. The other shows horse racing, rowing, track and field and football as major sports, with skating, hockey, soccer, fencing, wrestling, pole vaulting, boxing, rhapsodizing, and motorboating as minor sports.

There is an average every day in the city of St. Louis more than 1,250,000 long distance calls and 3,333 long distance calls. The average daily number of suburban calls is 17,413.

"That man says a dishonest dollar never passed through his hands," answered Senator Starnum; "he's always held on to it."—Washington Star.

### EARLY DAY LOCOMOTIVES

1. Danforth & Cooke (1825) Locomotive J. S. Runkel. 2. Earliest Union Pacific locomotive. 3. Danforth & Cooke (1822) Locomotive O. F. Bradford. 4. The second Vulcan Iron Works engine (1822).

By FRANK MCGILL

IN THESE days of colossal locomotives, far outclassing the last generation's "moguls" and "battleships" of the rail, it may be interesting to view the first locomotives to be employed on the oldest section of the Union Pacific System, the Oregon Steam Navigation Company's railroads.

In 1858 the first track was laid on the future Union Pacific line, between Bonneville and Cascade Locks, Oregon. The track, as well as the equipment, was put in service on the Bonneville-Cascade Locks line, whose wooden rails were in this account faced with strap iron. The "Oregon Pony" which fortunately has been preserved, though evidently altered in some respects, has 6-inch by 12-inch cylinders, and 34-inch wheels, and its total weight is 9,700 pounds.

The Oregon Pony of Early Days

handle, the "Oregon Pony" locomotive, built by Vulcan Iron Works of San Francisco, was put in service on the Bonneville-Cascade Locks line, whose wooden rails were in this account faced with strap iron. The "Oregon Pony" which fortunately has been preserved, though evidently altered in some respects, has 6-inch by 12-inch cylinders, and 34-inch wheels, and its total weight is 9,700 pounds.

Two large panels are included in the design. One shows figures symbolic of polo, golf, tennis, and baseball as major, with gymnastics, yachting, bowling and billiards as minor sports. The other shows horse racing, rowing, track and field and football as major sports, with skating, hockey, soccer, fencing, wrestling, pole vaulting, boxing, rhapsodizing, and motorboating as minor sports.

These was the first locomotive used north of the California line and west of the Missouri River. It is now the property of the State of Oregon, but has never received any attention from the state legislative body since the state acquired title.

Shortly following the Oregon Pony, there were built for the Oregon Steam Navigation Co., by the same manufacturer, a pair of large locomotives of the same type. One of these was used in the earliest operation of the iron railed portage railroad on the Washington side of the Columbia opposite Bonneville and Cascade Locks, and the other on the line of similar construction between The Dalles and Celilo, which is today part of our main line; both of these lines were opened for traffic on April 20, 1863, but the engines were received from the Vulcan Iron Works during the preceding autumn in time to be used in track-laying and bridge construction. These two locomotives were in 1869-1870 sold to the Oregon and California Railroad where they ended their days.

A second pair of locomotives having single drivers but in general appearance resembling the equipment of the present day, were built for the O. S. N. Co.'s railroads by Danforth, Cooke & Co. of Paterson, N. J., in 1862; they reached the scene of their operations

in 1865 more power being required on the two portage lines (still the only railroads in the Pacific Northwest), two more locomotives were ordered from Danforth, Cooke & Co. These engines were received via Cape Horn in sailing vessels, like the others, arriving in June, 1866, and were named "J. S. Ruckel" after the then president of the O. S. N. Co., and "S. G. Reed" after the vice-president. These locomotives, and two other identical ones bought in 1877 and 1878 and named the "R. R. Thompson" and the "J. W. Sprague," after officers of the company, had eight wheels and 12-inch by 22-inch cylinders and ran until the late eighties.

It was the opinion of the superintendent that let the engine be carried a somewhat better finish than the others. All feeds used were home grown, and are common in many sections of Southeastern Idaho. Good quality alfalfa hay was used. The alfalfa which was clean was fed by-product of the seed producing industry of the Aberdeen Springfield country. Beet pulp was secured from the sugar factory at Blackfoot.

Feeds given the four lots and respective weights at the close of the experiment follow:

Lot No. 1—Alfalfa hay and barley, 24.64 pounds.

Lot No. 2—Alfalfa hay, barley and screenings, 25.94 pounds.

Lot No. 3—Alfalfa hay, barley, and one pound per head daily of beet pulp, 27.57.

Lot No. 4—Alfalfa hay, barley, and two pounds per head daily sugar beet pulp, 27.77 pounds.

All the lambs have been shipped to Chicago for slaughter and when the carcasses are dressed and packed for quality the exportment will be complete. E. H. Rhinehart, extension animal husbandman.

The Northern Pacific has replaced the former Olympia-Centralia train, consisting of an engine and three cars with a new gasoline-electric car. The new coach is one of the latest developments having a twelve cylinder gas engine driving the electric generator which is the direct motor power. Besides a passenger capacity of fifty, it has large compartments for baggage and express.

### American Catholics Building New City For Greek Refugees

Outside of Athens, Greece, a new city is rising, symbolizing for Greek and Russian refugees a new life in a kinder world on the Pacific. They are American Catholics to the orphaned and destitute Greeks and Russians of the Near East. The work of building the new city is progressing steadily, under the care of Monsignor R. Barry-Doyle, head of the Catholic Near East Welfare Association, of 247 Park Avenue, New York City.

Nearby, in Athens itself, the Association has established a great orphanage, a secondary school for boys and girls, a convent for sisters and a seminary for young priests. But the new city, rising on the outskirts of Athens, to shelter the forlorn and destitute of every race and creed, remains the most striking achievement of Christian relief work made possible by the Near East and in America, has been decorated by nearly every one of the Allied Powers for service on the battlefields of the World War.

To him belongs the unique distinction of having served on battlefields as far apart as France and Mesopotamia, Belgium and East Africa, Italy and Egypt. He served in the Last Crusade, as the Palestine campaign has been called, and lived for several months in the Great Desert of Sinai. His intimate knowledge of the East and of the awful conditions succeeding the World War, led Monsignor Barry-Doyle to found the Catholic Near East Welfare Association as the best means of saving the thousands of helpless women and children from death by starvation and disease.

"The task of rescuing the stricken East has only begun," said the Monsignor speaking recently in New York City. "But the whole of Christendom seems awakening to its importance. The masses of children are running the country, hungry, naked and half wild. Remember that it is through the children that eventually Christianity, Peace and Prosperity will come to Russia."

Monsignor R. Barry-Doyle

in upon us every day. They cheer us on in a task that sometimes seems too heavy to bear. People of many different religious denominations send us greetings as well as substantial aid.

"We are building a town in Greece for the refugees of all faiths. They are, in the main, hard and skillful workers and, if given a chance, will add greatly to the prosperity of Greece. Once the refugee problem is solved Greece will take on a new lease of national life. It is even possible that some of her past glory will return. But schools are urgently needed, not only in Greece but also in Russia. There, hordes of children are running the country, hungry, naked and half wild. Remember that it is through the children that eventually Christianity, Peace and Prosperity will come to Russia."

### WRITER DISCUSSES ABILITY OF AUTO DRIVERS TO PAY AFTER ACCIDENTS

More than one-half of the 1,125,000 private owners of automobiles would be unable to meet a judgment exceeding \$1,000. Yet the motor death toll each year is approximately 20,000. There are about 1,000,000 accidents each year, and one accident in every seven results in claims against the car-owner for over \$1,000.

These are some of the facts stated by Herbert L. Towle in "The Outlook. He raises the question, "How is the public to be protected against irresponsible automobile drivers?"

"If we cannot prevent accidents," he writes, "let us at least see that they are paid for, is the argument; all motorists share the burden. Some fifty-seven bills were presented on that subject before the 1925 legislature of twenty-six states.

"Only two bills passed—the best, probably, of two very different types. The Massachusetts law goes into effect January 1, 1927. It requires every owner to carry either liability insurance in the minimum amount of \$5,000 for one person hurt or killed and \$10,000 for personal injuries in any one accident, or a surety bond in the same amount or to deposit \$5,000 in cash or securities with the state treasurer. Careful provisions are made to protect the claims of injured persons from defeat through lapse or cancellation of policies.

"The Connecticut law, effective January 1st, is very different. It is aimed less at compelling insurance than at making careless driving unattractive. It applies only to owners of (a) drunken driving, (b) reckless driving, or (c) running away after an accident; or who shall have caused either (d) personal injury or (e) property damage to the amount

of \$100. Such a motorist may be required by the commissioner to prove his own financial responsibility. He may do this: (a) by liability insurance in \$10,000 for personal injury and \$1,000 for property damage; (b) by a surety bond for the same amounts; (c) by depositing with the state treasurer such a sum as the commissioner may determine. Failing any of these, no registration or driving privilege in the state as a non-resident will be revoked.

Mr. Towle states his own solution of the problem as follows:

"First, the State single traffic accident. (Violations not resulting in accidents, and perhaps minor accidents, would be handled by magistrates' courts.)

"Second, a system of records in the motor vehicle department, to which all courts and insurance companies would report.

"Third, a law that failure to meet an accident judgment shall forfeit the offenders' registration and driving license temporarily or permanently at the commissioner's option.

"Fourth, a law empowering the commissioner to require an owner convicted of specified offenses to show financial ability in at least \$5,000, \$10,000, \$15,000, against any future accident. If insurance is taken, the policy must be at least five per cent deductible, and the insured required to deposit cash or securities for his share.

"Fifth, the commissioner would have his present power to suspend or revoke registrations and licenses. But he would be less often used. Instead of giving Tom an indefinite suspension under liberty or a grievance, we have started him on the way to being a law-abiding citizen."

"Sixth, a law that failure to meet an accident judgment shall forfeit the offenders' registration and driving license temporarily or permanently at the commissioner's option.

"Fourth, a law empowering the commissioner to require an owner convicted of specified offenses to show financial ability in at least \$5,000, \$10,000, \$15,000, against any future accident. If insurance is taken, the policy must be at least five per cent deductible, and the insured required to deposit cash or securities for his share.

"Fifth, the commissioner would have his present power to suspend or revoke registrations and licenses. But he would be less often used. Instead of giving Tom an indefinite suspension under liberty or a grievance, we have started him on the way to being a law-abiding citizen."

"Sixth, a law that failure to meet an accident judgment shall forfeit the offenders' registration and driving license temporarily or permanently at the commissioner's option.

"Fourth, a law empowering the commissioner to require an owner convicted of specified offenses to show financial ability in at least \$5,000, \$10,000, \$15,000, against any future accident. If insurance is taken, the policy must be at least five per cent deductible, and the insured required to deposit cash or securities for his share.

"Fifth, the commissioner would have his present power to suspend or revoke registrations and licenses. But he would be less often used. Instead of giving Tom an indefinite suspension under liberty or a grievance, we have started him on the way to being a law-abiding citizen."

"Sixth, a law that failure to meet an accident judgment shall forfeit the offenders' registration and driving license temporarily or permanently at the commissioner's option.

"Fourth, a law empowering the commissioner to require an owner convicted of specified offenses to show financial ability in at least \$5,000, \$10,000, \$15,000, against any future accident. ### FINEST OF INDIAN TYPES

Chief Turtle of the Glacier National Park Reservation selected by American portrait artists as one of the finest Indian types of the Red Race. He is a full-blood Blackfoot and a man of rare intelligence considering the educational opportunities he missed in his lifetime. He is a model Indian more than "looks" and his adventures of erstwhile happy hunting days are romantic enough to entitle him to a place in books. Turtle comes of a long line of "bow and arrow hunting braves."

"Mother, you're the bestes' cook in the whole world!"

What gives a mother greater pleasure than to make the kiddies happy with the goodies she prepares for them?

And how simple it is with a MONARCH Range in your kitchen. A MONARCH oven is ready for any kind of baking in remarkably quick time—and with such little fuel.

To insure such service, the MONARCH is built of unbreakable malleable iron, so it can be riveted—the only way to avoid air-leaks that cause fuel waste and cooking failures.

There is no economy in using the old range even if it can be made to do another year. Visit our stove display today and let us explain the many advantages and exclusive features of the MONARCH Range.

Must Watch Their Talk Dumb Dan Abroad

Franch telephone subscribers who become angry with the operators may be suspended for two days from use of the service, according to a degree issued by the ministry of posts and telegraphs.

To Make a Fence that Will Stand Use Coast Red Cedar Posts Sold by Genesee Union Warehouse Co.

The Beauty of Silver Plate

The greater enjoyment, both to you and your guests, that comes from a dinner served from Silver Plate is well worth the moderate cost.

Our display is ample to allow choosing just what you prefer.

Corner Drug and Jewelry Store "Where Quality Counts" C. E. Bolles, Prop. Moscow, Idaho

Legends of "Sleepy Hollow" R. F. Kluss was in Moscow Saturday. R. F. Kluss dragged the roads Tuesday.

Jess Borgen was a Moscow visitor Saturday. Henry Lorang and family were in town Sunday.

Mrs. Lorang is spending a few days at Walla Walla. Paul Johann was home from Lapwai Easter Sunday.

William Broemmeling was at the Isaac Isakson home Sunday. Edgar Grieser, son of Mr. and Mrs. Joe Grieser, is on the sick list.

Vigil Klemm came up from Lewiston and spent Easter at home. Frederick Baumgartner was at home Easter Sunday from the U. of I.

Mr. and Mrs. J. W. Mosman were business visitors in Moscow Saturday. John Geselchen and Matt Baumgartner motored to Moscow Saturday.

Miss Mary Mosman of Moscow spent Easter Sunday with her parents. Mr. and Mrs. John Kluss and Miss Nola Wilson motored to Moscow Saturday.

Miss Marie Kluss, who is attending school in Clarkston, spent Easter at home. Leslie Wishard was at home for Easter, returning to the Hollow Sunday night.

Miss Leona Broemmeling is spending her vacation at the home of Chris Broenneke. Mrs. Chas. Ebel and Mrs. J. W. Mosman attended the meeting at the home of Mrs. John Weber.

The old-time small coach passed through the Hollow Friday—and we all felt proud of the honor. Miss Rose Curran, who is now staying at the Isaac Isakson home, spent Easter with her parents in town.

Mr. and Mrs. Chas. Ebel motored to Slickpoo Monday to visit their daughter, Sister Catherine, and sons Roy and Charles. Mr. and Mrs. R. F. Kluss motored to Clarkston Easter Sunday and spent the day at the home of Mr. and Mrs. Theodore Kluss.

We were listening to the broadcasting station the other day and we heard that Lester Broenneke will be a private mailcarrier. Matt Baumgartner and family, accompanied by Miss Elizabeth Wells, motored to Lewiston Wednesday. Miss Wells remained in Lewiston for a few days' visit.

Bruno, Frances and George Ebel and Miss Fern Herman motored to Lewiston Saturday. Miss Irene Ebel accompanied them home to spend Easter with home folks. Anthony Ebel, who is attending Gonzaga, Spokane, arrived Thursday to spend Easter at the home of his parents, Mr. and Mrs. Chas. Ebel, returning to Spokane Sunday evening.

Mr. Emma Jackaha, Mr. and Mrs. John Jackaha and family, Mrs. Gus Birchmier, Mr. and Mrs. Elmer Roth and family, all of Moscow, were Easter visitors at the home of Mr. and Mrs. J. W. Mosman. Walter C. Ebel, who is on board the U. S. S. Cincinnati, has steamed to Cuba from their winter maneuvers in the Canal Zone. From Cuba they will go to New York. Walter enjoys reading the local news.

A large delegation from the Hollow was in Moscow Saturday to attend the highway commission's meeting, for the purpose of getting a highway started through Sleepy Hollow. We are now assured of the road. Mr. and Mrs. Henry Baumgartner and Miss Rosalia Baumgartner of Clarkston, Frank Klemm of Sleepy Hollow, Miss Nola Wilson of White Bird, Hilda Greif of Uniontown, Bruno Ebel of Sleepy Hollow were Easter Sunday visitors at the home of Mr. and Mrs. John Kluss.

Pine Grove News Mary Platt spent Tuesday with Mrs. Wm. Freeburn. Mr. and Mrs. Frank Jones and family spent Sunday evening at the Berne Brigham home. Don't forget the play "Denison Dubbs" is to be given at Julietta, Saturday, April 10. A marshmallow roast was enjoyed over a huge bonfire by the Pine Grove pupils last Wednesday.

Elmer Lambert of Bingham, Utah is spending the week with his uncle and aunt, Mr. and Mrs. R. F. Lambert. There were 70 people who took Easter dinner at the school house last Sunday. The program and eats were enjoyed by all. Friday was general house-cleaning day at the Pine Grove school. In the afternoon the pupils raked the yard, and the ladies scrubbed and oiled the school-house floor and put up clean curtains.

Catarrhal Deafness is often caused by an inflamed condition of the Eustachian tube. When this tube is inflamed you have a running ear, and the hearing is impaired. Unless the inflammation can be removed, your hearing will be destroyed forever. HALEY CATARRH MEDICINE will do what we claim for it—rid your system of Catarrh or Deafness caused by colds. Sold by all druggists for over 40 years. J. C. Haley & Co., Toledo, Ohio.

The BULL'S EYE Editor and General Manager WILL ROGERS

"Bull" Durham advised that the bull was up for a fight and was coming. Watch for them.

Congress No. 1

I went to Washington the other day. I visited "The House of Representatives," they were in session. What I mean by being in session, the bill was up for debate and they were arguing on "Better Golf courses for the medium salaried man." I suppose if the World Court bill had been up, they would have been talking on "Shall America park obligor or parallel."

Well, then I went over to the Senate. They had adjourned, so I felt that America was not having such a bad day at that. We were only 50 percent inefficient THAT DAY.

You know we all joke and kid about Congress, but we can't improve on them. No matter who we elect, he is just as bad as the one he replaced. So with all their faults we love 'em. They are as good as the people who vote to put them there, and they are 10 times better than the ones who don't vote at all. They are like "Bull" Durham, they are not perfect, but they are the best in their line.

Will Rogers P.S. There will be another piece in this paper soon. Look for it.

Crops of Japan The principal crops of Japan in the order of their importance are rice, barley, rye, wheat, tobacco and clover. This year the rice crop is by far the largest, being nearly 60 per cent of the whole.

Notice to Creditors Estate of John Lorang, Deceased Notice is hereby given by the undersigned, executrix of the estate of John Lorang, deceased, of the creditors of, and all persons having claims against the said deceased, to exhibit them with the necessary vouchers within ten months after the 20th day of March, 1926, the first public meeting of the creditors of said estate, to be held at the First Bank of Genesee, the same being the place for the settlement of the business of said estate, in Latah county, State of Idaho.

MARY A. LORANG, Executrix. Dated at Moscow, Idaho, March 22, 1926.

CHURCH NOTICES St. John's Lutheran Church Rev. A. F. Wolf, Pastor Sunday school at 9:30 a. m. English services will be held each Sunday morning at 10:30 o'clock with the exception of the first Sunday of each month, when German services will be held at the usual hour.

Christian Church N. E. Beach, Pastor Bible school at 9:45. Now is a splendid time to enter the school. The quarter starts with the study of Creation. You have said, "I am going to." Now is an opportune time. Preaching at 11 o'clock. Subject: "Snap Shot Pictures of Our Savior." Christian Endeavor meets at 7 p. m. Preaching and song service at 8 p. m. The theme is chosen to follow Easter thoughts: "The First Gospel Sermon and the Fruitage."

Congregational Church Paul W. Sprague, Preacher Mrs. W. H. Herman, Organist. W. E. English, director of Sunday school, 9:45 a. m. Mr. Arthur Hampton, superintendent. Morning worship, 11 o'clock. Young People's meeting, 7 p. m.

Summit News Eva Qualey spent the week end with home folks. Jess Coverdale called on Ed. Taylor Monday. Bill Gray managed to pay Genesee a visit Monday. Frank Stackpole was a Sunday caller at the Ed. Taylor home. Mr. and Mrs. Elmer Johnson were Uniontown visitors Monday. Mr. and Mrs. Joseph Schleuter spent Sunday at the Theo. Dwyer home. Mr. and Mrs. M. Reissenauer spent Sunday with Theo. Schleuter. A. J. Reissenauer and family of Colton spent Sunday at the H. Beilenberg home. Henry and Monte Oberg visited their father, M. Oberg, who is quite ill, Monday. Mr. and Mrs. Frank Qualey and family visited at the James Qualey home Sunday. Mr. and Mrs. Dick Green, Mrs. F. W. Qualey and son Lloyd, were Moscow visitors Wednesday. Mr. and Mrs. Dick Green and children and Cleo Taylor spent Friday night at the F. W. Qualey home. Mr. and Mrs. Sumner Stucker and son Ralph, Frank Hampton and Edna Green were Moscow visitors Saturday. Mr. and Mrs. F. O. Green had as Sunday visitors Mr. and Mrs. O. F. Rader and family and Mr. and Mrs. Dick Green. Florence Beilenberg arrived home Saturday from Lewiston where she has been taking medical treatments for the past eight weeks. A sad affair occurred in this neighborhood last Saturday when a Tin Lizzie refused to go home for the first time in fourteen years. When examining the poor creature it was found the main artery had disappeared. Sad but true.

SOME TIMES OF INTEREST IN THE BUSINESS WORLD Although business as a whole is proceeding in an orderly manner, certain changes have been of such proportions as to command the attention of the business world. Sensational price fluctuations on the stock exchanges, material gains in dividend disbursements over a year ago, the shifting of the international trade balance against us to the amount of 56 million dollars in two months, net gold imports of 38 million dollars for the same months and a growing scarcity of meats, as shown by shrinking storage stocks and smaller marketings, are all factors to be reckoned with in the making of business calculations for the current year. Wheat, oats, barley and rye on farms on the first of March totaled 737 million bushels as compared with 707 million bushels a year ago while corn totaled 1,819 million bushels compared with 759 million bushels a year ago. Wheat in country mills and elevators totaled 75 million bushels compared with 68 million bushels a year ago. During 1925 the number of meat animals on farms decreased, the only gain being a small increase in sheep and lambs. The value of meat animals on farms made a good gain for the year. The number of horses decreased and the number of mules increased. The greatest gain in farm value per head was made by swine, milk cows and heifers. The total value of livestock on farms in the leading producing states places Iowa in the lead, with Texas second, Illinois third, Minnesota fourth, Nebraska fifth, with Wisconsin, Missouri, Kansas, Ohio and New York following in the order named. Automobile production during February is reported at 365 thousand passenger cars and trucks compared with 301 thousand the previous month and 275 thousand a year ago, this month's figure including American models made in Canada. It should be noted that preliminary reports on motor car production are usually high. Manufacturing programs for 1926 plan an output of 4,500 thousand passenger cars and trucks, which would exceed the 1925 production. Money in circulation on the first of March totaled 4,814 million dollars as compared with 4,740 million dollars a month before and 4,904 million dollars a year ago. The total stock of money in the United States was 8,331 million dollars compared with 8,323 million dollars a month before and 8,399 million dollars a year ago. Gasoline production for January was 949 million gallons compared with 839 million gallons a year ago, an increase of 13%. Domestic consumption was 720 million gallons compared with 690 million gallons a year ago, an increase of 20%. Stocks of February 1 were 1,749 million gallons compared with 1,453 million gallons a year ago, an increase of 20%. Hard road building on county highways for the calendar year 1925 will probably exceed one billion dollars in outlay, a total of 1,800 million dollars being now available for construction and maintenance of rural roads. The states, coupled with federal aid, will grade or surface a total of 30 thousand miles and will maintain 235 thousand miles. Work seldom bothers a lazy man; he doesn't do enough.

Grey Eagle News Matt. Wahl was a Julietta visitor one day last week. Joe Wahl was home last week after several weeks' absence. Pearl Springer visited with Allison Stubbfield last Sunday. Mr. and Mrs. Robert Gray visited Mrs. Gray's parents Sunday. J. C. Cameron and family were visitors at Thos. Ingli's on Sunday. Mr. and Mrs. Ed. McLean of Mold, Wash., are visiting with relatives here. Mr. and Mrs. I. Isakson and family visited at the Herman Isakson home Sunday. M. A. Rosenstein, F. S. Caselott and Otto Stucker were country visitors on Tuesday. Frances, Mary, Lorene and Jack Platt spent Sunday with their folks in the canyon. Marguerite Spurbeck, Mabel, Heber, Gladys and Doris, Elsie Wahl and Harry Perks were visitors at the P. A. Parks home Sunday evening. Joe Schooler, Llewellyn and Jerome Bernshaw ate dinner at the Isakson home on Friday and helped Alfred celebrate his ninth birthday anniversary. There was no school last week except on Monday morning and there was none on Monday and Tuesday of this week on account of the illness and death of Miss Sloan's father last week. The "Red" and "Blue" birds from this community who partook of the Pine Grove school last Sunday, enjoyed it very much (especially the candy).

Pine Grove News Marguerite Spurbeck spent Sunday at the Parks home. Mr. and Mrs. Fred Brazier motored to Lewiston Monday. Miss Swanson and Jack Gehrke spent Sunday at Moscow. Tom Johnson of Lewiston is visiting at the Spurbeck home. Mr. and Mrs. Sherman Oylear and family of Asotin, visited with Fred Miller's Sunday. There was no school Tuesday as Miss Swanson attended the Rural Teacher's meeting at Genesee. The "Red Birds," winners of the Sunday school contest, were treated by Lewiston Monday. Miss Kuntz and her boys enjoyed the cats and are now ready for another such treat.

Baseball Game Sunday A baseball club has been organized in Genesee, with Henry Morschack as manager, but instead of joining the Valley League of Lewiston, they will play independent ball, as will Uniontown and several other clubs in this immediate vicinity. Many of Genesee's old-time players will be on the diamond and a good team will be selected for the season. A practice game will be held on the local diamond immediately following the high school game and all players are asked to please be on the job. The town team will play Uniontown-Colton team Sunday afternoon at Colton and will play Pullman here Saturday afternoon, April 25. Genesee will play all home boys.

Blonde Bees Opines "I may be a little older than I was last year, but I haven't reached that dotting old age of using up my beauty clay making mud pies."

Genesee Exchange Bank at Genesee, in the State of Idaho, at the close of business December 31, 1925. Fifth and Sixth Grades The following pupils were awarded merit buttons by the Palmer company on papers submitted: Grace Curran, George Blume, Fern Erickson, Richard Harris, Simon Curran, Floyd Hoppper. The following pupils were awarded the Palmer Method button: Thomas Drescher, Daley Dean, Lucille Wishard, Adeline Drescher, Hazel Foster, Hazel Craft, Dolores McAllister. Four pupils in the room failed to meet the requirements for awards. The fifth graders are memorizing "Casablanca" in reading. Richard Gordon, Susie Drescher, Ormond Hickman, Melva Curran, Donald Springer, Howard Blume, Marjorie Nebelslack and Eunice Rader were awarded a quarter-day holiday last Friday for being neither tardy nor absent during the past six-week period. Mrs. Virgil Sampson visited our grades last Friday. Friday for being neither tardy nor absent during the past six weeks: Betty Lou Burr, James Drescher, Cleora Miller, Gordon Foster, Grant Loncasty, Genevieve Harris, Donald Rader and Viola McAllister.

First and Second Grades Cleora Miller was absent from school Wednesday. Genevieve Harris was absent from school Friday. The following people received their quarter-day holiday for being neither tardy nor absent during the past six weeks: Betty Lou Burr, James Drescher, Cleora Miller, Gordon Foster, Grant Loncasty, Genevieve Harris, Donald Rader and Viola McAllister.

Public School Notes of Much Interest The annual senior play, entitled "Home Ties," was given in the opera house Wednesday evening. This play will be given again Saturday afternoon at 3 o'clock. This play promises to be one of the best plays given here for some time and you are missing a real treat if you don't come. The dance for the benefit of the athletic association will be given Friday night. Prof. Allen and his entire band will be here to play "The Blue" masquerade dance, and a good time is assured. Masks will be sold at the door and must be worn until time for unmasking. You don't have to wear a foolish costume to come—you will have a good time anyway. Teachers Meet Twenty-two rural and grade teachers assembled at the Genesee Public Schools Tuesday for a demonstration meeting which lasted throughout the day. The meeting was held under the auspices of Miss Goldie Drake, state rural supervisor from the Lewiston State normal. The forenoon was devoted exclusively to the demonstration of actual classroom work, the meeting opening in the first and second grade room with appropriate exercises after which the rural supervisor from the Lewiston State normal. The forenoon was devoted exclusively to the demonstration of actual classroom work, the meeting opening in the first and second grade room with appropriate exercises after which the rural supervisor from the Lewiston State normal. The forenoon was devoted exclusively to the demonstration of actual classroom work, the meeting opening in the first and second grade room with appropriate exercises after which the rural supervisor from the Lewiston State normal.

WED AT CHRISTMAS TIME KEPT IT A SECRET The following very interesting news item was clipped from the Lewiston Press, Dated April 9, 1926, published at Deary, and will be of much interest and a great surprise to the many friends of Miss Dwyer in this locality, where she was born and raised: Miss Catherine Dwyer, who has taught school at Avon for the past two years, and Ernest Swenson, of Dony, were married at Fort Orchard, Washington last Christmas. They kept their marriage a profound secret until last Thursday when some friend found an account of it in a coast paper and told about it. Last Friday night a big party of friends and well-wishers gathered at the Hilary Nelson home, where the bride boards and finding them both present, tendered them a big "shiver" which lost none of its zest because of being a few months late. The bride's folks live at Genesee. She has proved herself a very capable teacher, and will continue in that profession, her intention being to attend summer school at Lewiston Normal this year. The groom, who is a son of Mrs. Carl Johnson, is a local boy well liked by everyone. Here's wishing the happy couple a long, happy and prosperous matrimonial voyage. Mrs. Swenson is the daughter of Mr. and Mrs. Thos. Dwyer, prominent farmers living a few miles southeast of Genesee. The newly-weds will receive the hearty congratulations of the entire Genesee section, where the bride is well and favorably known. The Camp Fire Girls The Camp Fire Girls met at the home of their guardian, Mrs. Vern Beckman, Monday evening after school. The "weather bureau" of that organization predicted excellent weather for Monday, April 19, so they did the thing common for this time of the year—they planned a hike for that date. The outdoors of the hike is to be the best they ever had. In preparation for camping this summer and for future hikes, the following girls are prepared to describe and explain the following fires to the Trapper's or hunter's fires—Francis Smith, Theresa Miller. Trapper's stone fire—Inez Mayer, Florence Rader. Reflector baking fire—Pearl Perkins, Angie Castle. Camp cross fire—Audrey Pleiman, Mildred Ross. Harriet Hickman is also prepared to report the council fire. Their next meeting will be very short one, held before they take their hike. The Senior Class Play The senior class play, "Home Ties," given in the opera house Wednesday night, was one of the best from all standpoints, ever given here. Of course all home talent played. The play was given in the opera house, but the one given Wednesday night was up to the usual standard, regardless of the fact that many of the participants had never before taken part in a play. The parts were all well taken and it would be hard to say if one was better than the other—for it was all good and was thoroughly enjoyed by the large audience that filled the hall to capacity, as was evidenced by the long and frequent applause. The high school orchestra, which furnished music for the occasion, did well and their efforts were also appreciated, as was the duet sung by Frances Smylie and Elvon Hampton during the evening. The play will be repeated tomorrow (Saturday) afternoon so that those who failed to see it Wednesday night may have an opportunity to do so. The curtain will go up at 3 o'clock. The average man likes to dwell upon the faults of others. It enables him to forget his own. Of the decorations our grades have made for the room this week. First and Second Grades Cleora Miller was absent from school Wednesday. Genevieve Harris was absent from school Friday. The following people received their quarter-day holiday for being neither tardy nor absent during the past six weeks: Betty Lou Burr, James Drescher, Cleora Miller, Gordon Foster, Grant Loncasty, Genevieve Harris, Donald Rader and Viola McAllister.

Legends of "Sleepy Hollow" Mr. and Mrs. Chas. Ebel motored to Lewiston Tuesday. Mr. and Mrs. John Kluss and family and Miss Nola Wilson visited at the home of Peter Kasper near Joel. Mr. and Mrs. John Geselchen were at Thorn Creek Sunday. Mr. Rudd is working for Wm. Borgen. Miss Hilda Greif spent Sunday at the home of her aunt, Mrs. Edwin Smolt. Mrs. Chas. Ebel, Geo. Ebel and Miss Hilda Greif were Moscow visitors Saturday. Hugo Manderfeld was working for Rudolph Kluss a few days last week. Miss Nola Wilson attended the teachers' meeting in Genesee Tuesday. Miss Elizabeth Welle has returned from Lewiston, where she had been staying for a few days. Geo. Ebel spent Sunday at the Chas. Herman home. The dance last Friday night in Genesee was well attended by Sleepy Hollow young folks. Andrew Klumm and son, Frank, were in town Monday on business. Bill Broemmeling was at the Isakson home Sunday, April 12, and not on Easter Sunday, as we had it last week. Our mistake, Bill. All errors gladly corrected. Mr. and Mrs. Klewen were at the Isakson home Sunday. "Show me the way to go home—I'm lost and want to go to bed," Les Wishard was singing this out in Joe Grieser's field last Wednesday. The driver of the Hudson is said to have been breaking the laws of the state of Washington by having only one light. Then why was it an unavoidable accident? There are 100 chances to one that the accident would never have happened if he had had two lights. It isn't the "nut" on the steering wheel that causes the trouble—it is the one behind it. And no matter how cautiously one may drive, they are liable to meet one of these irresponsibles on the wrong side of the road—they seem to think they are the only ones who have any right to it. If every driver would use ordinary caution and keep on their own side of the road, there would be small reason for an accident of any kind. Of course glaring headlights are another cause that must be reckoned with—but the driver of the car that has such lights is not to blame. It is the manufacturer of the car who puts them on without the proper focusing. Uniform, or any other kind of light laws are no good unless they are enforced, and the proper place to begin enforcing them is at the factory where the cars are made. Death of Mrs. Fred Lambert The sad news of the death of Mrs. Fred Lambert reached Genesee early Thursday morning, stating that she had passed away at her home at Deer Park, Wash., late Wednesday evening. Mrs. Lambert had a light stroke a few weeks ago and was suffering from the road to recovery and the news of her untimely death will be a shock to her many friends in this community. Further particulars will be given next week. Because a person likes you is no indication that he is willing to lend you money.

TRAFFIC LAW AND RULES OF ROAD NOT MUCH GOOD That traffic laws and rules of the road are not much good, has been evidenced on more than one occasion—not only in Idaho, but in other states as well. There are glaring examples of their inefficiency and the utter disregard of such laws by many motorists. The laws of this state are very explicit—not only regarding speed, but the question of lights and use of the highway. One can scarcely ever go out for a drive after dark that they do not meet from one to a much higher number of cars that either have only one light or one very bright one over the other. On the bright one generally blinding everyone who meets it. This is against the laws of the state of Idaho, but these kind of lights are very plentiful and no arrests are made for such violation. Of course the road hog is ever present and the reckless driver is a menace that always has to be reckoned with, especially on the hills of the lower valley. Only a short time ago a disastrous wreck occurred not far below Clarkston when a Hudson super and a Ford came together because the driver of the Hudson is alleged to have had only one light and it was impossible for the driver of the Ford to tell which side it was on until they were too close together to avoid a crash. The Ford escaped with slight damage but the car was killed—and at the coroner's inquest the jury returned a verdict of "unavoidable accident." The driver of the Hudson is said to have been breaking the laws of the state of Washington by having only one light. Then why was it an unavoidable accident? There are 100 chances to one that the accident would never have happened if he had had two lights. It isn't the "nut" on the steering wheel that causes the trouble—it is the one behind it. And no matter how cautiously one may drive, they are liable to meet one of these irresponsibles on the wrong side of the road—they seem to think they are the only ones who have any right to it. If every driver would use ordinary caution and keep on their own side of the road, there would be small reason for an accident of any kind. Of course glaring headlights are another cause that must be reckoned with—but the driver of the car that has such lights is not to blame. It is the manufacturer of the car who puts them on without the proper focusing. Uniform, or any other kind of light laws are no good unless they are enforced, and the proper place to begin enforcing them is at the factory where the cars are made.

Much Grain Held Here According to estimates of warehousemen there is yet about 40 percent of last year's grain crop in the hands of the growers and there is very little moving at this time, they evidently holding for a higher price. No hogs have been shipped from this section for the past three weeks. The farmers are all very busy with their spring farm work and they are paying little attention to anything except their farm work. The fall-sown grain is in excellent condition and some of the spring-sown grain is up and growing nicely, so, taking everything into consideration, it looks good for another plentiful year for the farmers of this section, regardless of the fact that the papers are full of long-winded articles about the "suffering" farmer and his deplorable condition. Of course there are sections of the country where the farmers have not fared as well as they have here, but so far as this section of the country is concerned, the majority of them have begun to see their way clear and with continued good crops and fair prices the Genesee section will be abreast of the best of them.

—TAKING A GOOD LOOK —AT OURSELVES Every One of Us Carries a "Price Tag" —that tells the world the use we have made —of our time —of our efforts —of our ambitions —whether loss or gain. —Wear a "marked up price tag by the opening and building of a substantial bank account right here. —We'll furnish —the co-operation —where you need it. —and as you need it.

This complete equipment—installed and ready for immediate use—for a short while only—  
**\$9.75 Down**

**THE WASHINGTON WATER POWER COMPANY**

**Once Over—Twice Disked**  
We have a disc harrow that you will appreciate as a first class seed bed-maker. With it you can disk the ground the entire width of the harrow twice in one trip over the field. The front section is out-throw, the rear in-throw—the ground is left level and completely pulverized.

**JOHN DEERE Double-Action Disc Harrow**  
The John Deere is an extra strong disc harrow, and will stand the strains of unusually severe conditions. The main frames, levers and racks are steel, and the gang frames are double bars, so well braced that they have twice the strength of the ordinary harrow. A separate lever for each gang makes angling easy for all conditions, and the front section has a third spring-pressure lever which makes it possible to force the harrow to disk at equal depth its entire width in depressions and over ridges.  
The rear section can be detached, making a single-action harrow, or by securing the hitch that we can furnish, you can use this John Deere Double-Action Disc Harrow with your tractor.  
Ask us to show you our line of disc harrows the next time you are in town, and remember, we handle a complete line of farm implements.

**JOHN DEERE FEATURES**  
Spring-pressure lever— independent gang.  
All-steel main frame.  
Double bar, riveted gang frames.  
Convenient grease cups.  
Oscillating spring steel scrapers.

**Morscheck Brothers**

**PERSONALS**  
George Follett, John Platt and W. E. English were business visitors at Potlatch Monday.  
Mr. Bowker returned last Thursday after spending several days with his family at Spokane.  
Misses Ethel Anderson and Lillian Hardman spent the week-end with relatives and friends at Moscow.  
Miss Olive Sather, who is attending school at Moscow, spent several days of last week visiting Genesee friends.  
Miss Harriet Evans returned to her home at Dover, Idaho, Saturday after spending a week with Genesee friends.  
Mrs. Chas. Geltz and daughter, Verna, spent several days of last week visiting with relatives in Lewiston.  
Mr. and Mrs. John Dunbar of Moscow, parents of Mrs. W. M. Herman, visited at the Herman home last Tuesday.  
Albert Anderson, who has been attending the Northwestern Business College at Spokane for several months returned home Tuesday evening.  
Miss Esther Hickman spent the week-end with Miss Minnie Clark at Juliaetta. She was accompanied home by Miss Clark, who spent a few days here.  
Mr. and Mrs. Geo. Raymond returned to Spokane Saturday after spending several days at the George Follett home. Mr. Raymond and Mrs. Follett are brother and sister.  
Mr. and Mrs. Leon Follett returned Friday for a visit at Spokane and Wilbur, Wash. They were accompanied home by their little grandson, Jack Barnes, Jr., who will spend some time here.  
Mr. and Mrs. Ed. McLean of Mold, Wash., arrived Monday afternoon for a visit with Mrs. McLean's mother, Mrs. Al. Springer and family and Mr. McLean's sister, Mrs. Wood Gash, and daughter, Bertha.  
Dr. W. H. Ehlen went to Spokane Tuesday, returning home Wednesday evening. He was accompanied home by Mrs. Ehlen, who spent several weeks with their daughter, Miss Maxine, who is attending the University of Washington, at Seattle. Mrs. Ehlen

# The Case Combine

## Some of the Features Which Save Time, Labor And Grain

The thresher can be leveled to thresh on 50% grade. A single canvas conveys grain from the header to feeder house, which results in a saving of grain shattered in heading. The header platform is adjustable to cut four to 36 inches above the ground. Ample size of feeder to accommodate the tallest wheat or rye heads without clogging. The cylinder is mounted on self-aligning ball bearings. Is very easy running; requires oiling not often than once a week. Teeth are spaced 2 inches apart with fine teeth tracking.

There are three complete grain separators in this machine. The first and largest separation takes place just back of cylinder. Even distribution of grain over the cleaner is obtained by the use of a distributing auger, which maintains an even flow of grain on the cleaner sives, assuring better cleaning of grain.

A heavy duty four-cylinder tractor motor is furnished with the Case Combine. Positive lubrication is obtained by a pressure feed. The governor maintains proper speed of motor regardless of load. A unit control from the operator platform accelerates the same time the clutch is engaged. When clutch is again disengaged, motor is again slowed down automatically.

### Wilson-Tierney Nuptials

Miss Estu Wilson of Uniontown and Thomas Tierney of Kellogg were married Wednesday afternoon at 2 o'clock at the Nick Wagner fountain on the North and South highway, Rev. N. E. Beach performing the ceremony.

It seems that the young folks had gotten their license at Lewiston and thought to get married in Washington, but since that could not be done, they did the next best thing, they had the knot tied near the Idaho-Washington line.

The bride is the daughter of Mr. and Mrs. W. M. Wilson of Uniontown and the groom is a son of Jerome Tierney of Clarkston.

After a short wedding trip they will be at home in Kellogg, where Mr. Tierney is engaged in mining.

### The Syringa Club

A very pleasant meeting of the Syringa club was held at the country home of Mrs. John Weber, Wednesday afternoon when needlework occupied the time of the ladies. At 6 o'clock a very delicious luncheon was served by the hostess.

Besides the members, the invited guests were Mrs. Geo. Schmidt daughter of the hostess, and baby, Miss Bernadette Weber, Miss Inge Ulre, Mrs. Wm. Flomer and little son, Mrs. Surbeck of Walla Walla and Mrs. Carl Flomer and little son.

The next meeting will be held at home of Mrs. Violet Heppner, at which time Mrs. Carl Flomer will be added to the membership list.

## 6 1/2% Cumulative Preferred Stock

RESUMING its program of Customer-Ownership, your Electric Service company takes pleasure in announcing 15,000 shares of 6 1/2% Cumulative Preferred Stock (par value, \$100 per share) which is now offered to customers of this electric light and power system. This Preferred Stock is non-assessable, exempt from the normal Federal income tax and has the same voting power per share as the Common Stock.

Subscriptions will be received subject to delivery on May 26 or as soon thereafter as it is possible for the Company to prepare properly and issue the Stock Certificates.

### Electrify Your Savings!

This popular offering is available to our 46,000 customers and may be purchased either in cash or through our liberal partial-payment plan. An initial payment of \$5 per share and subsequent payments of \$5 per share each month until the stock is fully paid will make you a "partner" in this home public utility.

A telephone or personal call at our nearest office will bring our representative to you who will be glad to explain in detail the price, terms and provisions of this Preferred Stock, without obligation to yourself. Mail the coupon below for sales by correspondence.

## The Washington Water Power Co.

The Washington Water Power Co. SPOKANE, WASH.

Please send me, without obligation, full details regarding your 6 1/2% Cumulative Preferred Stock.

### FRED MEYER DESCRIBES BIG CALIFORNIA OIL FIRES

The News has received a letter from Fred Meyer, son of Mr. and Mrs. John Meyer of Genesee, and who is employed by the Union Oil Company of California, at Pomona, describing the big oil fires that have been raging there for many days and which have entailed millions of dollars' loss.

Mr. Meyer's letter follows: "No doubt you have read in the papers about the two terrible fires we have had here in California and I thought I would take this opportunity to tell you a little about them."

Both fires were oil fires and were losses to the company for which I work, the "Union Oil Company of California". The one at San Luis Obispo, was the largest tank farm in the world, and besides killing two people the loss is estimated at \$20,000,000.

These two fires were a part of a rainstorm we have had here, and old timers say its the worst rain they have had since 1880. One traveling man told me during the rainstorm that when he left Los Angeles one morning he saw pianos and furniture floating down some of the lowland streets, so I guess that Idaho is not the only place that has rain.

Judging from your comments on our weather up there, I think you are enjoying better weather than we are.

W. W. P. News

In only ten days time more than a thousand shares of the new 6 1/2% per cent cumulative preferred stock of the Washington Water Power company were sold in the rural districts served by the company, according to advices from W. H. Ude, director of public relations. In both Spokane and the rural districts a total of 940 shares of the stock were sold to bona fide electric consuming customers and employees of the company.

"In the suburban districts a total of 138 persons subscribed for shares of this stock," said Mr. Ude. "They subscribed for a total of 1081 shares. In both Spokane and the outside districts shares of this stock were subscribed for by 787 persons. In the sale of this stock a total of \$516,000 was paid in cash."

The customer-ownership sale was resumed April 7 and the response of all points of the territory has been very gratifying, indicating the eagerness of our customers to become stockholders in this company. This preferred stock is being sold at par, \$100, and is limited to 25 shares to a customer. It may be bought for cash or on the partial payment plan at \$5 per share per month, the latter plan being a splendid opportunity for investing savings. Interest at the rate of 6 1/2% per cent per annum will be paid on partial payments. Dividends on this stock are payable four times a year. At present we have left for sale slightly more than 5000 shares of the 15,000 shares authorized for sale at this time."

### Entertained at Dinner

A very pleasant day was spent last Sunday at the country home of Mr. and Mrs. James Magee. The guests present for dinner were:

Mr. and Mrs. C. E. Vandenberg of Palouse, Mr. and Mrs. John Vandenberg, Mr. and Mrs. Walter Jain, Mr. and Mrs. Ben Jain, Mr. and Mrs. Lou Jain, Will Cunningham and Sig Tidemann.

### Simkins System

Jones: "Bill Simkins, conductor on the trucker, has a great cash system."

Decker: "So?—I haven't heard about it."

Jones: "Wall Simkins collects quite a few cash fares on his daily trips. To determine just who the money belongs to he flips a coin. If it's heads, he puts it in the left pocket. If it's tails, he puts it in the right pocket—and if it lands on the bellcord and balances there—it goes to the company."

### DONATIONS TO GYM FUND —MORE MONEY IS NEEDED

Some effort has been made recently in getting donations toward the gym fund and those who have been approached have nearly all given what they thought they could afford to give, but the sum total is still quite small and all who are in any way interested in the public school should feel that when they give toward a gymnasium they are doing a real good for the school children of all ages and the district. Genesee has long needed a gymnasium, and while it will be necessary to make considerable improvement on the opera house, which members of the school board purchased individually for the school district, it can very easily be made over into a room that will be of lasting benefit to the district.

Following are the names of the donors to date and the amount each has given toward the fund. It is not a check company and will not be in the hands of individuals, but under the control of the school trustees and will be used for school and community purposes:

### Pine Grove News

The Sewing club spent an enjoyable afternoon with Mrs. Fred Miller last Thursday. A delicious luncheon was served by the hostess.

Mrs. Roy Sweet returned home from Lewiston with Dorothy last Saturday, they having gone down to see the doctor.

Mrs. Sams and daughter, Theresa, were called to the coast to Mrs. Sams' daughter, who is ill, due to complications of the flu.

The Jones family visited with Berne Brighams last Sunday.

Mr. and Mrs. Fred Brazier, Joe Doyle and Marguerite Spurbek had Sunday dinner with Mrs. Wm. Freeman.

Mr. and Mrs. Fredburn went to Forrest, Idaho, to work on his ranch.

Pearl Lambert and daughters spent Sunday at the R. F. Lambert home.

The seventh and eighth graders, Clyde Sweet, Marvin Miller, Eldon Miller and Glen Brazier, took state examinations at Genesee last week.

At the school election held last Saturday Mrs. Henry Held, Mrs. Whitted and Frank Jones were elected to the school board.

Miss Swanson spent the week-end with her sister in Clarkston.

A new contest, car racing, has been started at Sunday school. All who come next Sunday will be taken on a ride to Spokane.

Bernice Lambert has been absent from school on account of illness.

Jack Gerike spent Sunday in Lewiston.

### Penalty for Violation of Road Laws

Practically everyone who owns and operates a motor car, or even drives a horse-drawn wagon, should know the rules of the road, but very few seem to think that there is a penalty attached for the violation thereof, but there is, and the following is quoted, just as a reminder and perhaps a deterrent from violations of the road laws, and in view of the fact that many accidents have happened recently, especially on the hills surrounding the Lewiston country, this warning should be borne in mind:

(Chapter 39, 1923, Session Laws)

Any person or persons violating the provisions of this act shall be guilty of a misdemeanor, and upon conviction thereof shall be punished by a fine of not more than \$300 or imprisonment in the county jail for not more than six months.

### Don't Understand Ice

Ostriches do not seem to understand the slipperiness of ice and sometimes fall and break their legs if allowed access to frozen ponds.

### Jul Like This

Anna while in school one day was asked to name the most interesting teacher in a haughty manner. Said: "I really must ban Anna."

### BASEBALL SEASON IS ON —GENESEE WON FIRST GAME

The baseball season for Genesee has opened in good shape and the local town team, recently organized, has been whipping into shape at a rapid pace and bid fair to give their opponents during the season reason to know they have played with a real team. Hank Morsechek '15 is the local manager and he says he has one of the best all-around teams that has been gotten together here for some time.

Morsechek took his aggregation to Lewiston and played the strong Uniontown-Colton consolidated team, winning from them by a score of 9-4, which shows that the boys are right up on their toes and ready to go. There was clean outfielding but Uniontown-Colton made more costly errors than did our team, which made very few and those made were at times when they did little harm.

Genesee also outbatted their opponents.

The battery for Genesee was L. Gray and L. Schartzbar, pitchers and Alfred Olsen, catcher.

The local diamond is in good shape and the game with Pullman next Sunday should be a good one.

Pullman is coming with a team that will make the local boys sit up and take notice. It is what they will get and that is what they will get.

The team is headed by Buck Bailey, catcher. He is assistant football coach at Pullman, captain of the Olympic club football team for two years; captain of the All-West team that played Red Grange last fall. A catcher in the Texas league. Jerry Jones, pitcher. Two years varsity pitching at University of Illinois. Winkler first; Corcoran, second; Mitchell, ss; Johnson, third; Miller, Cummins and Berne, outfield.

If you are looking for something good in the baseball line, don't miss this, expected to be one of the best games of the season.

### Summit News

Mr. and Mrs. Dick Green and children visited at the F. W. Qualey home Sunday.

Mrs. Schleuter and daughter, Mary, spent several days this week at the M. Reisenauer home.

Frank Green and family and Cliff Sampson of Lewiston spent Sunday at the Oscar Rader home.

Mr. and Mrs. Elmer Johnson were Sunday visitors at the Wm. Rader home.

Miss Kuntz spent the week-end at Lewiston.

Mr. and Mrs. Chas. Grieser and family were Sunday guests at the Martin Grieser home.

Mrs. M. Reisenauer entertained the Altar society at her ranch home Tuesday. A fine time was reported.

Grandpa Kern had Sunday dinner at the Chas. Kraut home.

Mrs. Walter Lackey of Cottage Grove, Oregon, returned to her home Friday after a few weeks stay at the M. S. Wilson home. Mr. and Mrs. Wilson accompanied her as far as Lewiston.

Mrs. James Qualey and family, Mr. and Mrs. F. W. Qualey and family and Mr. and Mrs. Dick Green attended the musical concert at the Genesee Valley Lutheran church Sunday evening. The orchestra was conducted by Leon Peterson, a nephew of F. W. Qualey.

### Grey Eagle News

Frances and Lorene Platt spent Sunday with their folks at the Canyon ranch.

John Platt is taking his band of sheep to Potlatch this week.

Gladys, Doris and Heber Harms and Harry Parks were Moscow and Pullman visitors on Sunday.

Tom says the "street cars" are getting too thick for him in Genesee.

Lester Gray had the misfortune to lose his best cow by drowning, just recently.

Thos. Ingle and family motored to Lewiston the first of week.

The seventh grade pupils of this district took their examinations in physiology and geography in Genesee Friday.

Mrs. Michelson has been visiting her daughter, Mrs. Robt. Gray.

Clarence Hoffman was a visitor at P. A. Parks' Sunday evening.

Gladys Harms is helping Mrs. R. F. Lambert this week.

This vicinity was visited by severe storm Sunday evening—thunder and lightning!

The crops out this way are looking fine, according to reports.

Don't Understand Ice

Ostriches do not seem to understand the slipperiness of ice and sometimes fall and break their legs if allowed access to frozen ponds.

Jul Like This

Anna while in school one day was asked to name the most interesting teacher in a haughty manner. Said: "I really must ban Anna."

### WHAT HAPPENED HERE TWENTY YEARS AGO

### This Week

Mrs. H. Heppner left Moscow for a visit with relatives at Wilmod, S. D., the former home of the family.

Messrs. Vandenberg, Nixon and Johann returned the first of the week from their visit to the Oregon timber country, Mr. and Mrs. Burdick and Mrs. Nordby having stopped at Weston for a short visit. All of the party except Mr. Vandenberg and Mrs. Burdick made their return to Genesee Sunday was an ideal day in Genesee (April 14)—warm, spring-like and agreeable. New hats, new gowns and "lemonade" suits were very much in evidence, practically the entire population having turned to morning church services or to enjoy a buggyride or promenade.

The News is pleased to announce that a new brick block, 150x70 feet, is to be constructed on the site now occupied by the Biram livery stable and the hallings and the rush of water by T. Driscoll, owner of 100 feet on the corner and Stuber and Hall owned the 50 feet adjoining. The livery stable building has been sold to Ezra Sheldon, who will at an early date move the building to his ground in the eastern part of town and put it in position on a portion of the ground now occupied by his other stable. Of the new building the Driscoll portion will be the first constructed and will contain three rooms, one 40x70 on the west corner, the second 35x70 and the third 25x70. The corner room will be occupied by Mr. Driscoll with his stock of hardware, the second room has been leased for a term of years to Jacob Rosenstein, who will occupy same with his stock of general merchandise, and the third room has been leased to J. H. Greaves & Son, who will move their drug store to that location.

### Death of John Matson

The death of John Matson, a former resident of the Genesee section, occurred at the home of his daughter, Mrs. M. S. Munden at Sunny Brook, Alberta, on Tuesday, April 13, of all the same date the reading for that day was 63. The maximum temperature for Wednesday night was also very high—67—whereas a year ago it was 42. This condition of weather was very general over the entire northern part of the country.

Asotin County Grain is Fine as Always

Mr. and Mrs. Frank Clift returned Friday from a trip to Spokane. Mr. Clift says all growing grain between the top of the Lewiston hill and Spokane certainly looks fine, but he never saw anything during that entire distance that will compare with the fields of the Asotin flat, which he declares are the best he has ever seen them, and he has spent practically his entire life in Asotin county and knows good wheat when he sees it—Asotin Sentinel.

### Camp Fire Girls

The Camp Fire Girls met for a short session after school Monday evening.

Pearl Perkins has completed all the honors for the Wood Gathers rank and Audrey Pleiman has committed all the memory work for that rank.

About 5:30 that evening the girls and their guardian, Mrs. Vern Beckman, together with Misses Ruth Martinson, Lillian Hardman, Ethel Anderson, Jessie Keeler, Mamie Oiler, Violet Qualey and Mrs. Warner as their guests, started on their anticipated hike.

Each hiker carried some dish for the supper menu. It was wondered on the way out why some of the girls carried their dishes so carefully, but it was discovered upon arrival at their destination that some of the dishes were hot.

After eating a regular camp supper and roasting some marshmallows and marshmallows, the girls and their teachers had favored the girls with some very pretty and clever songs, the return journey was undertaken.

The next meeting will be held next Monday evening after school at the home of Mrs. Beckman.

### Tells Time by His Beard

A farmer in west Wales says he has never worn a watch in his life. In the daytime he can tell the time to within half an hour by the sun (even when the weather is cloudy), and at night he can tell it by the feel of his beard growth within an hour.

### Aviation Taught in Schools

As part of a plan to advance the study of designing and utilizing the commercial airplane New York university's college has engineering has established courses in aeronautical engineering and industrial aviation.

### Ford Garage Open for Business

The new Ford garage, conducted as a branch of the Keyes Motor company, Ford agents at Lewiston, was opened for business last week in the Miller garage building, just east of the First Bank of Genesee.

They have installed a gasoline pump and will stock oils and tires and have a complete line of Ford parts on hand.

Walter Emerson will have charge of the mechanical end of the business. He has been in the Ford business for the past eight years and is therefore no amateur at handling the mechanical part of the business.

### SEMI-LOCAL NEWS CLIPPED FROM EXCHANGES

### Fined for Killing Deer

Andy Forgarty, Nez Perce Indian, was fined \$100 in the probate court at Lewiston Wednesday for killing deer out of season.—Tribune (Orino)

### Crops Look Good at Deary

The farmer is mighty busy these days, putting in the crops. A big bean acreage will be planted. Fall wheat never looked finer. As the alfalfa fields grow older many report that they didn't start alfalfa meadows years and years ago. The Grimm variety, with its "grass" root and fine growing stalks, seems best adapted to this section.—Latah County Press (Deary)

### Tammany Oil Well

With the drill at the Tammany oil well penetrating nine feet of shale on Tuesday and five feet on Wednesday of last week, showing of crude oil in the ballings and in the rush of water now pouring out of the hole, continued to improve, it was reported by Patrick Gibbons, local geologist.

The bit is cutting through a steel gray shale, a real oil shale, according to Mr. Gibbons. The drill is now down to the position where the oil is reported to have improved with each foot. The six feet penetrated on Monday and the nine feet on Tuesday were soft and at a temperature of 91 and 92. The five feet of the drill went down Wednesday was harder, of the substance of a cap, but the temperature was 93 degrees and the oil showing stronger. Mr. Gibbons states—Clarkston Republic.

### Seventh and Eighth Grades

The eighth grade class spent Wednesday, Thursday and Friday of last week writing answers to county examinations. The seventh grade class wrote the county examinations on the subjects of geography and physiology, Friday. There were 69 pupils here to take the examinations Friday, which necessitated the use of the high school assembly room for that purpose as no other room in the building would accommodate so large a number.

Our attendance for the past week has been very good, Burford Rogers has been absent and Jack Platt being the only pupil to come late.

### Fifth and Sixth Grades

Those pupils excused for a quarter day holiday were:

Floyd Heppner, George Blume, Grace Currie, Dewey Drescher Thomas Drescher, Edwin Nordby, Lucille Wishard, Richard Harris.

The sixth graders are writing business letters to get a number of different types of free advertising materials to be used in geography.

Some of the pupils who failed to meet the requirements for awards in penmanship are writing the drills for another trial.

The fifth graders are having some interesting debates in language.

### Third and Fourth Grades

We are having perfect attendance in our room again! Everybody is here every day except Thomas Sanford who, we hear, is nicely recovering from his serious illness.

The fourth grade arithmetic class is taking up work in fractions now. They will soon complete their work for this year.

The third grade are just finishing their language work for the year and are now planning to make nature-study booklets during the period.

Glenna Harris, Melvin Currin, Marie Springer and Gwynell Hanson were the perfect spellers from our room this week.

### First and Second Grades

The first and second grades are still working on their spelling contest to determine which grade has the best spellers. So far the first grade have been keeping in the lead.

The children in our room have been very interested in studying child life in Japan. They have prepared a sand table illustration of a Japanese village.

### Ford Garage Open for Business

The new Ford garage, conducted as a branch of the Keyes Motor company, Ford agents at Lewiston, was opened for business last week in the Miller garage building, just east of the First Bank of Genesee.

They have installed a gasoline pump and will stock oils and tires and have a complete line of Ford parts on hand.

Walter Emerson will have charge of the mechanical end of the business. He has been in the Ford business for the past eight years and is therefore no amateur at handling the mechanical part of the business.

### Public School Notes of Much Interest

The high school dance given last Friday night at the American Legion hall was decidedly a success. A good crowd was present, and the music was fine.

The big event, as far as the seniors are concerned, is over. Last Monday the seniors disappeared on their annual "sneak." Despite the many threats of the juniors, no casualties have been reported in the senior class, and the departing and home coming were uneventful. To put a final climax on the day, all the members of the class held a banquet at the Majestic in Lewiston. Although Tuesday some of the seniors evidenced a need for sleep, they are all happy with the way the "sneak" turned out.

Wednesday, April 20, the high school enjoyed hearing a speaker from the university who talked on the importance of conserving and utilizing our forests. This is an annual custom at the high school on Arbor day and is very instructive and beneficial.

The Genesee high school baseball team won a hard-fought game from Moscow high last Friday afternoon, the game being played on the local diamond. Bunting was heavy on both sides, each team making a home run. The final score stood 16-13 in

Engineers J. L. Ford and W. E. Johnson of the Washington Water Power company are shown in the above pictures working on the annual snow survey, from which calculations are made of the amount of water to expect for hydro-electric purposes. At the upper left they are shown locating the bearing trees. The upper center scene shows them dropping stakes, these stakes are located at exactly the same point each year. In the picture at the upper right, Engineer Johnson, left is shown kneeling by the snow sampler pipe which is shoved six feet down to the ground. The scales which weigh the snow giving its equivalent in inches of water is attached to the pole in the middle of the picture. The lower left scene shows the snow sampler, full of snow, being weighed. Engineer Ford is shown standing atop one of their headquarters cabins high up on one of Idaho's peaks. One of the gigantic locomotives of the electrified Chicago, Milwaukee and St. Paul railway is shown at the lower right, at Avery, Idaho. This locomotive is operated by electric power generated from water power furnished by the snow seen in these pictures.

#### ANNUAL SNOW SURVEY MADE BY W. W. P. CO.

"For men may come and men may go, but I go on forever."  
This is the song of the river, as sung by Tenyson; it is the song of the rivers of the west, among them the turbulent Spokane, which rolls its irregular course from Lake Coeur d'Alene along reflecting lanes of quiet waters, by lashing rapids and roaring waterfalls, to join the mighty Columbia, pressing along to the Pacific.

Just as the farmer depends upon water, in the form of rainfall or irrigation, for his very existence, so does the hydro-electric industry which supplies electric service to the farms and towns of the Inland Empire depend upon water for power to turn the giant turbines and generators. The Spokane river system of the Washington Water Power company, comprising six stations which generate 187,300 horsepower, depends upon the Spokane river—which is thus the vital force behind the power for our lights and motors, for the wheels of our industries and even for the giant locomotives of the Chicago, Milwaukee and St. Paul railway.

When comes the Spokane river and what is behind its perpetual flow? To some extent the river is indebted to rainfall for its water, but if rainfall were its only source the river would dry some seasons of the year. In the last analysis it is found that the power behind the river is the annual snowfall on the watersheds of the three upper rivers which contribute to the Spokane. These rivers are the St. Joe, the St. Maries and the Coeur d'Alene, all of which flow into Lake Coeur d'Alene, which is the natural storage reservoir at the head of the Spokane river.

The electric service industry must look ahead. It is necessary that some information be gathered early in each year for the purpose of determining to some extent the amount of water which may be expected for water power. The electric service company is not the only one interested in this data, it is valuable also to irrigation districts, mining camps and the forestry service.

In order to gather the necessary information, a "snow survey" is made. The snow survey is an annual undertaking and the courses over which the survey is made are the same each year, having been laid out originally in 1920. There are nine of the courses, ranging in altitude from 3,000 feet to 6,200 feet, at various points on the watersheds of the St. Joe, St. Maries and Coeur d'Alene rivers.

A snow survey calls for fast, hard work as the entire territory must be covered in the shortest possible time so that conditions at all points will be similar. The courses are scattered, being located at representative points throughout the entire drainage basin. Some of the courses are a day's hike on snowshoes, from the railroad and require spending a night or two in a cabin. These cabins are stocked the previous fall with blankets and canned goods.

#### water held in the snow and the forecasting of the amount of water held in the snow and the forecasting of the amount of water which will come down from this supply at various times. The immediate effect of the snow meltage is the spring runoff. This causes the spring flood of the rivers and much of this spring flood is excess water and unusable. Of the water which comes from the snow, some disappears by evaporation and a certain quantity percolates into the ground.

Lewiston's Traffic Rules  
The following, taken from the Lewiston Tribune of April 9, may be of interest to Genesee people—and may save them some annoyance by its perusal:  
Lewiston's new 30-minute parking ordinance went into effect April 9, with the placing of signs at the curbs along Main street. From Snake River avenue to Ninth street cars may be parked only 30 minutes. Strict enforcement of the new ruling will follow.

The new signs are placed on the curbs at intervals along the street and they may be read easily by all motorists. They are of sheet metal and very durable. The wording is drilled in with white lead and red, "30 minutes parking between 7 a. m. and 6 p. m. No parking between 1 and 6 a. m."

According to Chief of Police Eugene Gasser, the officers of the police department will strictly enforce this new 30-minute parking law. He has strict orders from the mayor and council to do so and when the deadline for strict enforcement arrives all cars will be tagged by the officers and all violators will be required to report in police court and be subject to fine. Failure to report will call for double penalty, after the offenders have been hailed into court.

Other provisions of the new traffic ordinance which the officers will enforce rigidly include the turning rules and the parking on the back streets. The full reverse turn may be made at only three places from Snake River avenue to Ninth street. These are at First street, Fifth street and at Ninth street. At Second, Third, Fourth, Seventh, Eighth and New Sixth streets only the half turn may be made.

Parking on the back streets is permitted but the cars must be put into the curb at an angle of 35 degrees. White lines will be drawn at intervals to designate this angle. The areas where no parking will be permitted under any consideration are Seventh, Eighth and Ninth streets from Main to D streets.

#### MISS REDFIELD FAVORS STATE EDUCATIONAL TAX

Striking inequalities of educational opportunity in various parts of Idaho, inequalities which can perhaps be remedied only by the levying of a state-wide tax for general educational purposes, are being carefully studied by Miss Ethel E. Redfield, commissioner of education, with the view of offering definite recommendations to the state board of education at an early date, according to an announcement which has just been made from the board offices in the state capitol building.

"If we recognize, as I think we must," said Miss Redfield, "that the state is primarily responsible for the education of every child within its borders, we are forced to the conclusion that there can be no defence of a system which provides abundant funds for the schooling of Willie Smith, but cruelly neglects his little neighbor Johnny Jones, who lives in an adjoining, but poverty-stricken district."  
"Funds for primary educational purposes now come from three sources: first, from a general county levy which produces a minimum of \$15 per census child; second, from the interest upon federal endowment funds, and third, from special taxes imposed by the local school district. It is, of course, generally known that the heaviest burden falls upon the local district and it is here that inequalities make themselves manifest."

"I am thinking now of a certain county in which two rural school districts lie side by side. One of them includes such a substantial proportion of that particular county's taxable property that, with minimum levies, it is able to provide splendidly adequate educational facilities for its children, but the boundaries of the adjoining district have been so drawn that, even by levying the absolute maximum permitted by law, it can pay only the most meager salaries to its teachers and cannot keep its schools in operation for the minimum length of school term set by the law."  
"We have compulsory education laws in Idaho, but such laws are made bitterly farcical by the condition of some of our school districts in the more sparsely settled counties. Something must be done. Perhaps a state-wide tax for general educational purposes is the only possible solution of the problem."

"Levying of a state tax does not necessarily involve the raising of new revenue, but it does mean that the state will be contributor to the cost of public education and it should mean the equalizing of educational opportunities in certain of our less fortunate school districts. What the exact amount of a state-wide levy should be is a matter which can be determined only after the most careful and painstaking study of this entire situation."

#### Twenty Years Ago

A son was born to Mr. and Mrs. Paul Cann Monday morning of this week.  
A party consisting of Mrs. J. C. Nordby, Mr. and Mrs. F. F. Burdick, Peter Johann, John Halverson and Wm. Nixon left Saturday for Oregon, expecting to file on timber claims.  
During the week it has been definitely decided by the promoters of the armory-opera house to accept the proposition of L. K. Krum, and the lot adjoining the opera house will be purchased and the building erected thereon. The company will be incorporated with a capital of \$4900 and the membership of the same will be as follows: J. J. Mulalley, president; Wm. Herman, vice-president; G. T. McMahon, secretary; Dan Burr, treasurer; Robt. Emmett, Tom Keane, J. K. Bell, Wm. Burr, F. A. Harris, E. F. Ball, Elmer Vanouder and Wm. Robertson. Plans for the building have been prepared and are now on file with the secretary. It is expected that actual work will be commenced within a few weeks.

Geo. Mochel last week disposed of his property in the western part of town, consisting of a residence and 8 acres of ground, to Wm. Hordemann, father of Mrs. E. Miller, and for many years a resident of Thorn Creek section. The consideration was \$2000 and immediate possession is to be given. The Mochel family will continue to reside in Genesee and for the present will lease a place of residence.

#### Air Mail Cancelled

After all the furor and celebration regarding the opening of the air mail route from Pasco to Elko, Nevada, just a short time ago, the contract has been cancelled because the government has reached its destination during the initial trips. The government cancelled the contracts for the reason that they said insufficient preparations had been made and the planes in poor condition. But look at the fun they had and the advertising Felix Warren, veteran stage driver received. It was good advertising for Felix as it is understood that he is seeking a contract with a movie corporation to take part in western pictures. It was rather an expensive venture for Uncle Sam but it afforded much pleasure to many people, and since it "doesn't cost anything," why not?

#### Thirty Ounces the Limit

The following important news item, from London, England, under date of April 12, will be of much interest to those who care to follow Dame Fashion as far as she will go, and especially to those who are figuring on having "coming out parties":  
A maximum of 30 ounces of clothing in a state-wide levy should be permitted to wear this summer, if they follow the edicts of fashion experts at the annual fashion exhibition. The 30 ounces will be apportioned as follows: Seven ounces for a frock; six ounces for underclothing; one ounce for stockings, and 16 ounces for shoes. Rolled stockings will be the vogue. The English eye specialists should do a thriving business during the summer months, at any rate.

#### REDS BUSY ALL OVER WESTERN HEMISPHERE

Communism is steadily at work, not only in the United States but in the Philippines, and South America as well, according to the National Republic, which in its current issue says:  
"As evidence of the well-financed condition of the Moscow controlled communist party in the United States, 150,000 pieces of literature in seventeen languages were used in advertising the Lenin memorial meeting held at the Auditorium, Chicago.  
Over 17,000 two-color posters were displayed, and communist speakers visited all sections of the city. More motor cars were used in staging a street parade of communists immediately before the meeting than are used by all the workers of Russia, other than those holding government jobs and riding in government automobiles. Eight thousand people attended this meeting and cheered the doctrines of red revolution."

#### Largest Swimming Pool

San Francisco has a new swimming pool which is said to be the largest in the world. It is 1,000 feet long and 100 feet wide, except for a center portion which is 300 feet wide to provide for a racing course across the pool. The depth varies from 3 to 14 feet and the cost of the pool was \$80,000.

#### Quite Modern

About 1882 Marcel Deprez, a French engineer and pioneer electrician, succeeded in transmitting electric power by telegraph wire between Munich and Miesbach, thirty-five miles. This is considered the first successful experiment in long-distance transmission.

The man who sees himself as others see him gets an eye full.

#### Statement of Ownership, Management, Etc., Required by Act of Congress of Aug. 24, 1912

Of the Genesee News, published weekly at Genesee, Idaho, for April 1, 1926. State of Idaho—County of Latah—As before me, a notary public in and for the state and county aforesaid, personally appeared P. C. McCreary, who, having been duly sworn according to the law, deposes and says that he is the owner and publisher of the Genesee News and that the following is, to the best of his knowledge and belief, a true statement of the ownership, management, etc., of the aforesaid publication for the date shown in the above caption, required by the Act of August 24, 1912, embodied in section 449, Postal laws and regulations, to-wit:  
That the name and address of the publisher, editor, managing editor, and business manager is P. C. McCreary, Genesee, Idaho.  
That the owner is P. C. McCreary, Genesee, Idaho.  
That the known bondholders, mortgages and other securities are: None.  
P. C. McCreary, Owner and Publisher.  
Subscribed and sworn to before me this 16th day of April, 1926.  
D. L. Bressler, Notary Public.

## Men's and Boys' Furnishings

- Young men's dress hats, latest shapes with fancy bands .....\$5.00

#### Linger Longers Entertained

The Linger Longer club was delightfully entertained last Friday at the home of Mr. and Mrs. Milton Rader. The afternoon was spent in social converse and sewing. At 5 o'clock a delicious luncheon was served by the hostess. The ory invited guests were Mrs. Will Flomer, Mrs. Art. Springer and Mrs. Will Rader.

#### "Spring Dance"

A "Spring Dance" will be given in the American Legion hall tonight (Friday, April 23) to which the general public is invited. The dance is under the auspices of the junior class of the Genesee high school—and you'll have a good time if you go. The Arcadians will furnish the music—and they will have seven pieces to play the jazz.

### The John Deere Spreader Stands Comparisons

Put the John Deere Spreader, the spreader with the beater on the axle, alongside of any other kind and compare them point for point. You will quickly notice these distinctive John Deere advantages.

Easier on you. It is only 36 inches from the ground to the top of the box—from 6 to 10 inches lower than others—saves about half the work of loading because the manure is in the box before the hard part of lifting the manure comes.  
Easier on your horses. The high drive wheels on the John Deere materially lighten the draft on the horse. The beater is on the axle where they can't get out of line to cause extra wear, binding and breakage.  
Lasts longer—has only about half the parts ordinarily required. All of the main working parts are on the axle where they can't get out of line to cause extra wear, binding and breakage.  
Measured by the years of satisfactory service it gives, and the cost per load of manure it will spread for you, the John Deere is the lowest-priced spreader you can buy.

We have a John Deere set up on our floor for your inspection.

#### PERSONALS

Paul Cann was a Genesee visitor from Moscow Wednesday.  
Fred Cann and Jessie Gray, U. of I. students spent the week-end with friends.  
Geo Morscheck and A. H. Potach were business visitors in Lewiston Monday afternoon.  
Mr. and Mrs. H. C. Potach of Lewiston were Sunday visitors at the A. H. Potach home Sunday.  
Mr. and Mrs. Will Herman drove to Spokane for a few days' visit, returning home Monday evening.  
Mrs. F. K. Bressler returned last Saturday after a several day's visit with her sister in Lewiston.  
Mrs. Ira Hanson returned Sunday after a trip to Portland and short visit with Mrs. Fay Dickey at Coeur d'Alene.  
Mrs. H. Hossie and children, from near Moscow, are visiting at the home of her mother, Mrs. Annie Danielson. Misses Agnes and Sylvia Johnson, who are teaching near Palouse, Wash. spent the week-end with home folks.  
Mrs. Wm. Esser and little granddaughter arrived from Coeur d'Alene Monday afternoon for a short visit and took look after property interests.  
Mr. and Mrs. F. Griffith of Spokane former Genesee residents, passed through Genesee last Saturday and visited a short time with friends. They were on their way home from Lewiston.  
Mrs. Con Steltz returned home Saturday after a ten-day visit with her grand-daughter, Miss Kathryn McMahon, at Orofino and her brother at Kootenai.  
Mr. and Mrs. Wm. Nixon of Clarkston were visitors Saturday. They attended the play "Home Ties" given by the High School, and enjoyed it very much.  
J. E. McAllister and family, E. McAllister and family, and Ray Reman, wife and son of Lewiston and Ivan Muhlitz and family and W. L. Chaney and wife of Troy were week-end visitors at the M. E. Muhlitz home.  
Mrs. R. F. Lambert returned Saturday from Deer Park where she had gone to attend the funeral of her daughter-in-law, Mrs. F. E. Lambert. She accompanied Mr. and Mrs. Arthur Mayer of Troy, who also went to Deer

Park to attend the funeral. Mrs. Lambert being Mrs. Mayer's mother.  
Mrs. Peter Krier, Mrs. Mayme Krier and Mr. and Mrs. S. O. Tannahill and Alexander Mallerich spent Sunday with Mr. and Mrs. John Krier. Steve Broemmeling and Mrs. Arthur Hansman left last week for their homes at Cadogan, Alberta, Canada, after a few months' visit with relatives and friends here.  
Mr. and Mrs. C. E. Vandenberg returned to their home at Palouse, Wash. Sunday evening after a visit here with relatives. Mrs. Vandenberg came over the middle of the week and Mr. Vandenberg came over Sunday and spent the day. His father, John Vandenberg, went to Palouse Saturday and brought Emery over Sunday.  
Just received a new line of women's and children's hats; also new undergarment samples, put out by Harford Frock Co. Mrs. L. C. Hayden, Agent. 43-1x

**Birthday Surprise**  
Saturday evening a number of friends pleasantly surprised Mr. and Mrs. V. A. Beckman, the occasion being the birthday anniversary of both Mr. and Mrs. Beckman.  
The rooms were artistically decorated in many spring flowers. In the center of the table was a large angel-fool cake. The guests presented Mr. and Mrs. Beckman with tokens of remembrance. No one knows the exact age of the recipients but their birthdays being on the same day, we think they are "twins". The guests present were: Mr. and Mrs. W. W. Burr, Mr. and Mrs. Mahlon Follett, Mr. and Mrs. Harry Schooler and families and Miss Ruth Martinson.  
Blonde Bees Opines

## Garden Notes

Start planting Gladiolus bulbs now, and plant every two weeks for succession of bloom.  
The seed of most annuals can be planted outside now where they are to bloom.  
Early cabbage and cauliflower plants are ready to go outside.  
Get a Planet Jr. seeder and put that garden in shape in one half the time.

## HERMAN'S

## NEW DRESS GOODS

We have just received from the eastern market a beautiful assortment of dress materials, including figured Georgette Crepe and Crepe de Chine figured cotton and silk Crepes, beautiful Rayons.  
All of above-mentioned materials are sold in individual dress patterns.  
We are also showing a large variety of patterns in English prints, also English broadcloths in a splendid assortment of patterns.  
Many other new materials have just been added to our piece goods department, including Indian Head in all widths, Window Crepes, Jap Crepes, Everfast suitings, Gingham and Percales.

## Ladies' Ready to Wear Department

In this department will be found a splendid new line of Rayon and Lingette Princess Slips, Bloomers and Vests.  
ALSO MORE NEW HOSE IN OUR HOSIERY DEPARTMENT.  
Follett Mercantile Co.

## Fashion Counsel Is Alert To New Ideas In Food Too

A fashion counsel to one of the leading silk hosiery manufacturers, Jessie Brucker Menin keeps a weather eye open for tendencies in changing silhouettes, new shades, and other new wrinkles of fashion.

However, she is also alive to new things in the world of the home. Now that scientists have recently announced that fat can be gotten alone or in combination with other foods, should have an important place in every menu because it perhaps the easiest protein to digest and protects the body from extreme tissue waste, Mrs. Menin finds a wide variety of different ways in which to include fat in her menu.

For the afternoon tea she often serves sandwiches with a fruit gelatin filling, made according to the following recipe which she has named—

- 1 teaspoonful granulated Gelatin
  - 1/2 cupful Orange Juice
  - 1/4 tablespoonful Juice from Oranges Peel
  - A few grains of Salt
  - 1 cupful Syrup (white)
- Directions: Soak gelatin in the strained orange juice for ten minutes. Set cup containing this in cooling water. When gelatin is dissolved remove cup from hot water and stir in syrup, salt and the liquid from the orange peel. Put in cool place until it congeals or reaches a "spreadable" consistency.
- Make the orange peel liquid by shaving off the yellow rind of 1/4 orange (do not use the inner white part), add 1/4 cupful cold water, cover and boil ten minutes. Drain and use the liquid as directed above.

## Fungi Attack Wood From Three Angles

Studies have shown that in a surprisingly large number of cases decay-producing fungi affect the chemical and mechanical as well as the physical properties of wood, according to Dr. E. E. Hubert, head of the department of forest products in the school of forestry, University of Idaho.

"We already knew," he says, "that wood was weakened by decay but we have just recently discovered how common it is for the brown rot to develop early stages of decay which are practically invisible and which weaken the wood to an alarming extent. The presence of early decay may change the physical properties of wood so that a piece of green infected lumber may not come out of a kiln without showing serious collapse in the areas containing decay."

"The chemical properties of wood are also affected by the presence of decay. The fact that we have white and brown rot is proof of this. We also find that decay so change the chemical structure of wood that the yields of distillation products derived from rotted wood stored over long periods, are often seriously affected."

"The organisms that cause heart-rot in living trees are in many cases capable of continuing their destructive action upon the wood in the log, pile, the lumber, timber, or other product cut from the tree as long as growth conditions are favorable. To go a step further and show what a really difficult problem it is to deal with fungi in wood rots, it may be stated that after fungus has been dormant in a rotted timber stored in the dry air of a laboratory for more than eight years, it is still capable of reviving and continuing its decay action, upon the addition of sufficient moisture. Many of the wood rot and stain organisms have been found to revive after long periods of drying. More than ten years after being dried, a need for a new treatment for certain periods of time has been found to be an effective method of sterilizing all infected wood up to four inches of thickness. This means that with a proper heat treatment either in a kiln, steam box or in connection with preservative treatment the fungi in wood can be killed and if the seasoned stock is properly protected from moisture to prevent re-infection there is every reason to believe that the stock will remain the same."

## Reward for 40 Years Service

To a former office-boy goes the distinction of receiving the first "Service Medal" given by the largest electrical merchandising company in the world, Leo M. Dunn, vice-president in charge of merchandising and accounting of the Graybar Electric Company, was the recipient of this honor yesterday upon completion of forty years continuous service.

Mr. Dunn has had an interesting business career, representing as it does advancement from an office-boy position to vice-presidency of this, the largest company of its kind in the world. He started work in March, 1896, as an office-boy, he was thirteen years old. At the age of nineteen he had his first supervisory job.

## THE UNIVERSITY OF WASHINGTON AND ITS PRESIDENT

By CARL H. GETZ

DR. HENRY SUZZALLO

If a line were drawn midway north and south and another east and west subdividing the United States into four parts, a great domain about which the country knows little would be revealed—the real American Northwest.

If any one of the numerous American institutions located in that quarter of the nation could be taken as an interpreter of the pace and people it would be the University of Washington, at Seattle. While it is one of the great American state universities—the second largest west of the Mississippi River—it is not a great institution merely because of numbers or the degree of specialization in its schools or the quality of its teaching of the established curricula. It is a great institution because of its unique qualities, the product of an interpretation of what its own country needs in leadership.

At first sight the University of Washington might appear to be like most of the endowed universities, certainly like most of the larger state universities. But it is far from being a traditional copy of Harvard or Michigan. It has no medical school, no law school, and for the present does not aspire to have either these nor several other stock schools which make other institutions great. But it does have a school of fisheries, dealing with fish husbandry and the preservation of sea foods, for outside the Straits of Juan de Fuca lies one of the greatest fishing grounds in the world.

These two facts suggest that the University is different from others, and it is. Closer scrutiny indicates that a different policy is at work there. Even the schools for professional training which are found elsewhere at Washington are given a different prominence and a changed slant for the university always aspires to render a service from its own strategic position to an empire just around it. One of its great schools is that of forestry, but the forestry school is not a traditional training in forestry management but is but one strand. Logging engineering here was first made a profession, and an equal emphasis was placed on milling and marketing, two important factors in the Northwest's lumber industry, on which the country must now chiefly rely for its supply of building timber.

Another of its great schools—the College of Business Administration—has the largest faculty in the west of the United States. Its faculty is made up of men who have led in the world trade of the Pacific and its connection with the world. It has the largest registration in maritime commerce of any school of business of the country.

Thus the spirit which omits traditional forms or changes them to add new schools and types of instruction, has made the University of Washington quite different from any other. Washington is a social adaptation, not a tradition; but the whole tradition of university science and art has been brought to bear on a service which the institution can best render.

Again, it is not merely a state university for Washington. It has a wider scope. Because it has dared to face particular problems regardless of tradition, it attracts students who are not of the state. It has a reputation for its fisheries, its public management of fisheries in that country being under direction of the navy. The sons of some of China's wealthiest merchants have been sent to Washington to learn business methods, because of its institutional sympathy toward the Orient. Two of its faculty have just completed long sojourns in Asia, to gain a long time contact with its problems and institutions—one with trade and industry and the other with its culture and customs.

Unlike other institutions which have a genius for departing toward new adjustments, the University of Washington clings just as tenaciously to the old, where the value of the old is enduring, as it looks at China not merely with the eyes of trade, but with the eyes of history and culture. It looks on its own specialized training as merely one function in the making of a man. One after another of its humanistic professions has had its entrance requirements so changed that a solid basis in liberal training is provided, thus correcting the tendency of the western American to get at his practical job at once. The institution is western in the truest sense, but it is also eastern in the best American sense, believing in a cultured as well as an efficient leadership, in breadth as well as specialization.

from Stanford University in 1899; his master's degree from Columbia in 1905. In 1918 the University of California conferred the degree of LL.D. upon him.

Dr. Suzzallo is a fellow of the American Association for the Advancement of Science, a member of the Division of State Relations of the National Research Council, member of the Advisory Council of the Institute of International Education, corresponding member to the Royal Society of Literature, England; member of the National Institute of Social Science; member editorial council, The Annals, American Academy of Political and Social Science; trustee of the Carnegie Foundation for the Advancement of Teaching and editor of the Hall of Fame. He is the editor of the 58 volumes, Riverside Educational Monographs and editor six volumes, Houghton Mifflin Company's professional library. He is the author of "Teaching of Spelling" and the "Teaching of Primary Arithmetic." He is co-author of "Washington for the Soldier, Artist, and Peasant" and "Pearson-Suzzallo Essentials of Spelling."

Dr. Suzzallo has been president of the University of Washington since 1915. He is recognized nationally as one of the great educators of America.

### JAIL SENTENCE APPEALED

Appeal is being taken by the American Civil Liberties Union and the International Labor Defense against the six months' jail sentence imposed upon Rudolph Sosick of Camden, N. J., in March for "loitering on the street." Sosick is distributing Workers Party handbills attacking proposed military legislation. When he refused to speak after six hours of grilling by police, he was sentenced without trial or counsel. He has been released on \$500 bail furnished by the International Labor Defense.

### FIFTY YEARS OF PUBLIC SERVICE

The first transcontinental telephone line was established from New York to San Francisco only eleven years ago, by way of Chicago and Denver.

A second transcontinental line has recently been completed from Los Angeles through Texas to New Orleans, with lateral lines connecting at San Francisco with the first continental line; from El Paso to Denver and from Fort Worth to Chicago, as well as with existing lines from New Orleans north.

"It has a thousand and one ramifications and I have not thought of going into it, and I have not the ability to tell you men, all active in the electrical world and industry, where you come in on it because your industry is in every part of it; there is no way of separating it from the whole economic life of the nation. But every time you make a new tie around the nation, every time there is any new facility of distribution of electric power, every time any improvement in manufacture comes to you, it means that you have added something to the national insurance."

Rehabilitation of the old Port Townsend Southern Railroad is planned by the Charles R. McCormick Lumber Company which bought the railroad in October. The road extends from Junction, on Discovery Bay, to Quilcene, on Hood Canal. The Port Townsend Southern is one of the pioneer railroads of the state and was built as the first link in a line that was projected to extend south through the Olympic Peninsula to a connection with one of the transcontinental systems and make the Port Townsend transcontinental railroad terminus. Track was laid only to Quilcene by the railroad carried local freight and passenger traffic for many years. It has not been in operation in recent years.

The McCormick Lumber Company has called for bids on March 15 to rebuild fifteen and a half miles of the road bed, reconstruct seventeen bridges, laying some new steel and replacing old ties. No estimate of the cost has been made public.

### Sparkling Curtain Pull

This sparkling crystal curtain pull is an interesting to make as it is novel and decorative. Choose your own decorative motif. A sturdy is often most effective. Get two medium sized water-tight boxes. Put your decorative motif crystals, or stones, in one of the boxes. Put your two crystals and bind them together with adhesive tape around the edges. Now you are ready to decorate. You will use ribbon and the best quality of liquid glue. Double the quantity of glue and use it between the boxes at about two inches long. Glue an inch of each end between the adhesive tape. Now firmly to the binding, first shirred by drawing a thread in between the boxes at a conference of the ribbon pull together with they leave the dies. This makes an ingenious little room decoration that will be greatly appreciated.

## PREPARING INDUSTRY FOR USE DURING WAR

After describing the important part that the electrical public utilities in the New York Metropolitan area are scheduled to play in the War Department's program of "industrial preparation" as an insurance against war, Colonel MacNider, Assistant Secretary of War Department declared in an address before the New York Electrical League here: "The stronger our voice is going to be, the stronger our voice is going to be in the councils of the world. It means that we can insure ourselves against any aggression. It is a frank declaration that we want peace and that we intend to have it—insurance of peace, insurance against war."

"Our major effort," Colonel MacNider said, speaking to 200 electrical executives of the light and power companies, the electric equipment manufacturers and the electrical contractors and other important branch of the electrical industry in the Metropolitan area, "is the industrial mobilization planning for emergency—something which we hope will never be called in action but which we feel which we have been instructed must be erected and erected as fast, as efficiently as possible, with such facilities as we have. Certainly, it is the result of a very bitter lesson, this command that has been taught with a vengeance in the great war that no nation, no matter how richly blessed with natural resources, with expert and willing labor, with untold ready funds, with every facility for rapid manufacture, should wait until it is suddenly plunged into war to do its thinking and planning for such an emergency."

Speaking of the plan to allocate assignments for the manufacture of the war requirements of the War Department in the event of an emergency, Colonel MacNider said: "You can see how necessary it is that we have every component that comes into that picture all coordinated together, so that when the bell rings again, if it ever does, it will mean that the manufacturer can go to his safe, take out his superintendant, call in his foremen, pull out his plans, his specifications, his dies, his castings, whatever is necessary for him to have to meet his part of the program, and start to work instantly, should the Congress, representing the people, declare the emergency is upon us."

The bureau reported that during September, the last month of the Soviet fiscal year, industrial production advanced to 82 per cent of the monthly rate for 1913 and that despite the 1921 famine the population of 139,000,000 increased by about 8,000,000 from 1920 to 1925.

Last year's railway mileage was listed as about 3,000 miles greater than pre-war, while co-operative organizations for monthly labor, Herbert Long is president of the organization. Other officers elected at the organization meeting held this week are: James D. Agnew, historical vice president; John D. Case, social vice-president; Otto F. Peterson, public recognition vice-president; E. E. Caveney, general welfare vice-president; E. B. Tager, treasurer, and J. H. Wickham, secretary. The board of control consists of the officers and Jess B. Hawley and Cecil Weeks.

It is generally understood that as membership in the organization grows the present officers will be replaced by permanent officers representative of all parts of Idaho. Meetings will be held annually by the "Sons of Idaho" on the second Monday in January. Annual dues are fixed at \$2. Last year when the Oregon Short Line railway was built, will be invited to honorary membership, and those who have shown great interest in the state will be asked to join as associate members. All males 21 years of age or over, born within the boundaries of the state, are eligible to membership.

### GROWTH OF RUSSIA SHOWN

The Russian Soviet "is moving forward rapidly in an economic sense," the Russian Information Bureau announces in making public a commercial handbook which it termed "the first complete statistical summary" of that country.

The bureau reported that during September, the last month of the Soviet fiscal year, industrial production advanced to 82 per cent of the monthly rate for 1913 and that despite the 1921 famine the population of 139,000,000 increased by about 8,000,000 from 1920 to 1925.

Last year's railway mileage was listed as about 3,000 miles greater than pre-war, while co-operative organizations for monthly labor, Herbert Long is president of the organization. Other officers elected at the organization meeting held this week are: James D. Agnew, historical vice president; John D. Case, social vice-president; Otto F. Peterson, public recognition vice-president; E. E. Caveney, general welfare vice-president; E. B. Tager, treasurer, and J. H. Wickham, secretary. The board of control consists of the officers and Jess B. Hawley and Cecil Weeks.

It is generally understood that as membership in the organization grows the present officers will be replaced by permanent officers representative of all parts of Idaho. Meetings will be held annually by the "Sons of Idaho" on the second Monday in January. Annual dues are fixed at \$2. Last year when the Oregon Short Line railway was built, will be invited to honorary membership, and those who have shown great interest in the state will be asked to join as associate members. All males 21 years of age or over, born within the boundaries of the state, are eligible to membership.

### "SONS OF IDAHO" ARE ORGANIZED

BOISE, Idaho.—There has been organization in this state with headquarters in this city the "Sons of Idaho," in which all native-born sons of Idaho are eligible for membership. Herbert Long is president of the organization. Other officers elected at the organization meeting held this week are: James D. Agnew, historical vice president; John D. Case, social vice-president; Otto F. Peterson, public recognition vice-president; E. E. Caveney, general welfare vice-president; E. B. Tager, treasurer, and J. H. Wickham, secretary. The board of control consists of the officers and Jess B. Hawley and Cecil Weeks.

It is generally understood that as membership in the organization grows the present officers will be replaced by permanent officers representative of all parts of Idaho. Meetings will be held annually by the "Sons of Idaho" on the second Monday in January. Annual dues are fixed at \$2. Last year when the Oregon Short Line railway was built, will be invited to honorary membership, and those who have shown great interest in the state will be asked to join as associate members. All males 21 years of age or over, born within the boundaries of the state, are eligible to membership.

### Many Idaho Students Are Self-Supporting

UNIVERSITY OF IDAHO, Moscow.—More than half of the students attending the University of Idaho are totally or partially self-supporting according to figures submitted to George Oliver, student Y. M. C. A. secretary. When asked answering a questionnaire, 81, or 52 per cent are either earning all or part of their way through college.

Of this number 550 are totally and 311 are partially self-supporting. Thus 33 per cent are paying all their college expenses at college and 67 per cent are paying part of them. The figures show that 784 students are dependent upon allowances from home. Of these 452 are women and 332 are men.

Thirty percent of the 653 women answering the questionnaires are totally or partially self-supporting and 65 percent of the 1,002 men are earning part of their college expenses. Totals for men and women follow:

Men—totally, self-supporting, 430; partially self-supporting 230; not self-supporting, 322.

Women—totally self-supporting, 120; partially self-supporting 51; not self-supporting 452.

H. L. Tabke was last month named as the first manager of the Longview Public Port. He started his duties March 15. He was engaged by the port commission at a salary of \$250 a month. Tabke formerly was manager of the Port of Astoria and later engaged in shipping in Honolulu and San Francisco.

The new docks of the port at the foot of Oregon way were formally opened April 15. These will supplant the temporary commercial dock operated by the Longview-Portland and Northern Railway Co. and all the cargo formerly handled by the road will be handled over the new municipal docks, which will have features for handling the largest ocean-going carriers.

## UNCROWNED KING OF A HAPPY VALLEY

ONE OF LIEUT. GOV. BRUCE'S INDIAN FRIENDS

Robert Randolph Bruce has recently been appointed Lieut. Governor of British Columbia, as representative of King George in that province of Canada. Like many another successful Canadian, he came from Scotland, about thirty years ago, bringing with him a flock of sheep, a tall hat and a bundle of introductory letters. He was the son of the minister of the Windermere valley in British Columbia, where he has made his home for some years. Mining interests first took him back to the door, "T. J." called after him, which has sprung the emerald Happy Valley. The village of Windermere, on the eastern side of Lake Windermere, was the first to be settled, and here Mr. Bruce settled. He built bungalow and planted a garden, and a garden which seems to be as near the top as any Canadian could ever be. And today is a riot of exquisite flowers, a regular flower show for those visitors at the Canadian Pacific flower show camp opened a year or so ago, a short distance along the lake shore from the Bruce estate. Not only did this indefatigable gardener plant lovely flowers in his garden, but realizing the difficulty of keeping miners at their jobs, he planted fresh vegetables in sufficient quantities to feed his men to a diet of fresh vegetables instead of a diet of tin cans. His ores are mined with never a strike.

### Yakima Honey Quality Boosted by Professor

"Some of the finest honey I have ever seen came from the Yakima Valley in Washington," stated R. L. Webster, recently appointed Professor of Entomology at Washington State College.

"Honey is graded largely by its color. Even though the good flavor is no less important, a lighter color honey is given preference, providing the quality is desirable. Honey producers grade their product in at least five groups: water white, light amber, amber and dark.

"The flavor of Washington honey depends upon its source, which will vary in the Eastern and Western part of the state. On the west side white clover and fireweed honey are the most common, while east of the mountains alfalfa and sweet clover are the main sources of nectar. Honey from all three of these sources is considered of high quality.

"Honey production is a minor industry of no small importance in the state. There are no less than 10,000 beekeepers in Washington, producing approximately 5 million pounds of honey. Interest in honey production has been stimulated and the actual yield of honey per colony of bees greatly increased because of the work in beekeeping accomplished through the State College of Washington.

### Don't Take Chances; Know What You Sow

Farmers who buy small seeds from their neighbors should make use of the state seed laboratory to be sure that they obtain high quality seed, cautions H. W. Hulbert, agronomist of the University of Idaho. "Wheat pests," he says, "are commonly scattered from farm to farm through such farmer-farmer sales.

"A farmer may unknowingly sell seed infected with dodder, barchora, or other serious weeds," says Professor Hulbert. "The sure way to buy seed is to know what you sow. Secure a test from either the state seed laboratory, State House, Boise, or the branch laboratory at Moscow. The tests are made free to farmers.

### State College Once Had Only 29 Students

Growth from a student enrollment of 29 to one of over 3,000 is the record of the State College of Washington since the college first opened its doors to students in 1892, according to Dean E. Wegner of the institution. Dean Wegner, head of the Veterinary Department, gave the history of the college from its founding to the present day in a Founder's Day talk before the student body March 30.

The first building was called "the curb" and was a four-room brick structure standing on the site of the present modern buildings on the campus, and a new dormitory and men's gymnasium will shortly be constructed.

Donna Teresa Dolores Della Villa Franca is about to appear in her celebrated trapeze act. Voice from the gallery—Be careful, now, Biddy, hurt yourself, you'd break yer old mother's heart.—Pearson's Weekly (London).

An unspotted town is one where nobody ducks at the sound of a blowout.

## For Better Health

PUBLIC HEALTH IS PUBLIC WEALTH  
IN WASHINGTON

ON "TURNING FORTY"

On turning forty most of us are entitled to have a sigh of relief over our escape from the dangers of childhood, adolescence, and early adult life. But, as a matter of fact, we rarely give it a thought, for at forty in the midst of life, in our prime, and fully occupied with our business, our home, and our families, and have no time to spend contemplating past or future dangers. Hint, on crossing the divide, it behooves us to "stop, look and listen," for the summit affords an excellent opportunity to determine what we have come through, how we are, and whither we are going. The downward path, no matter how gentle the slope, is beset with new dangers. In reality, in descending, we face an entirely new set of diseases, a law of nature that deteriorates as follows maturity. Vascular, nervous and other changes attack us, and induce degenerative processes which ultimately lead to our undoing. These degenerative changes are likely to be silent, insidious, and we are too preoccupied to note or heed trifling changes. Rarely do they occasion great discomfort, inconvenience or actual pain in the beginning. So the early stages are passed by unnoticed, merely our reserves are encroached on, and years of useful life. Too often we proceed on our heedless path, until "pulled up short" by some catastrophe, such as a stroke, a nervous breakdown, an attack of heart failure or of angina pectoris. These are really stages of a more serious nature than one, since they may frequently be averted if we heed such warnings as numbness, tingling or weakness in an extremity, if we pay sufficient attention to insomnia or fatigue, or give due consideration to the shortness of breath or slight discomfort experienced over the heart during physical stress. So, if you are "turning forty," a careful physical examination by your physician now may yield better health and add years to your life.

Pullman Loses to Genesee

In a baseball battle royal last Sunday, Genesee cleaned up on Pullman to the score of 6-8. In the fore part of the game it looked very much as though it were Pullman's game, as Genesee's pitcher had developed a very sore arm and was not able to put the proper English on the ball, however, in the first part of the fourth inning Genesee changed mound men and it became a different story.

Next Sunday Genesee will play the Garfield team at Garfield. Garfield will play at Genesee on Monday, May 7 to 8. The boys will need plenty of support from the side lines, so be there if you possibly can.

Flower Vandalism

People who have taken the pains to raise flowers for their own use are complaining that they are being destroyed and stolen. Stealing flowers is had enough, but when they are deliberately pulled up by the roots and thrown away, it is vandalism of the worst kind and no light punishment should be meted out to the perpetrators of such acts.

There are ten chances to one where people have plenty of flowers that if they were asked for a few they would be freely given. So if you must have flowers and have none of your own, just go and ask the owners for a bouquet—they would much prefer to give them away than to have them stolen.

Third and Fourth Grades

The following pupils were neither absent nor tardy last month: Florence Dean, Bertie Wishard, Thomas Herman, Marie Springer, Richard Gordon, Susie Dresher, Ormond Hickman, Edgar Stucker, Melva Currin, Ruth Alice Vanouck, Donald Springer, Howard Blume, Eva Jones, Ambrose Foster, Marjorie Nebelsick, Eunice Rader, and Gail Sampson.

First and Second Grades

The spelling contest between the first and second grades ended Friday. The first grade won the contest. The second grade still believe they are going to try the same contest again.

Fifth and Sixth Grades

The fifth graders are studying the forestry prints that were distributed in this room. The sixth graders have received a number of booklets on different subjects in answer to their business letters written in last magazine.

Card Club Entertained

The card club was delightfully entertained by Mrs. Gibson Tuesday afternoon. Pinochle was played at six tables. The honors were awarded to Mrs. Harry Schooler.

Parents of a Daughter

Mr. and Mrs. Martin Libberg are the proud parents of a baby daughter, born Sunday, April 18. Mother and baby are doing nicely.

Summit News

Cleo Taylor has been on the sick list for several days. Mrs. E. F. Lambert visited Sunday at the Mike Reisenauer home.

After an eight months term of school at Lenville, Eva Qualey returned home Tuesday. Margaret Reisenauer, who has been quite ill for several days, is somewhat improved at this time.

Gray Eagle News

J. C. Cameron and family were Sunday visitors at the Sherm Wahl home.

The pupils of Gray Eagle school were awarded the rank of wood gatherers on Sunday at Friday afternoon in Genesee. The program consisted of songs, readings, recitations and drill by the older pupils.

Legends of "Sleepy Hollow"

Mr. and Mrs. Chas. Ebel were visitors in Lewiston Saturday. Many of Sleepy Hollow inhabitants attended the dance Friday night.

Time to Get Busy

It is reported that the coyotes are killing the ranchers' sheep and that coyotes have made an attack on Harley Smith's dog, nearly finishing it.

Linger Longers Meet

The Linger Longers were pleasantly entertained Wednesday at the country home of Mrs. Jas. Magee. Social converse and needlework busied the ladies during the afternoon.

Bridge Party

A very pleasant time was spent at the home of Mrs. F. S. Casebolt last Saturday evening. The party was given in honor of Mr. and Mrs. Walter Casebolt of Seattle, who are spending a few weeks here.

Parents of a Daughter

Mr. and Mrs. Martin Libberg are the proud parents of a baby daughter, born Sunday, April 18. Mother and baby are doing nicely.

Pine Grove News

Warren Brigham had dinner with Roy Sweet's last Sunday. Mrs. E. F. Lambert visited Sunday with Mrs. C. H. Spurbeck.

The Sunday school last Sunday had the pleasure of hearing Alfred Brigham, son of Warren Brigham, sing several beautiful selections.

Camp Fire Girls Meet

The Camp Fire Girls met at the home of Pearl Perkins Tuesday evening at 7:30. At about 8 o'clock they went up to what was left of Mr. Perkins' orchard to help him complete the work of disposing of it and to join in the fun.

At this council fire Pearl Perkins was awarded the rank of wood gatherer and other girls were given their beads for honors.

Endeavors Have Visitors

The Congregational Endeavors had as their guests Sunday evening, the Senior Endeavors from the Christian church at Moscow and the Endeavors from the Genesee Christian church.

Installs New Ice Machine

Edwards & Son last week installed a new ice and refrigeration machine in their pool hall, which does away entirely with the use of artificial or natural ice around their fountain and is too far from his work and he bought the Kempf property in order that he might be near his blacksmith shop.

A Birthday Surprise

The Basketball girls of the Genesee High gave their coach, Miss Jessie Keeler, a surprise party Wednesday evening, the occasion being her birthday anniversary.

Lively games, including a guessing game, in which Alice Hanson won the prize sped the hours. The games were followed by most delightful refreshments which proved that they have some skill in the culinary art as well as in basketball.

Crop Prospects Good

Weather conditions lately have been ideal for farming in the Potlatch. The recent shower was a benefit to crops in general and the fine weather following gives the farmer an opportunity to continue their work in the field.

Potato King Bays Farm

The real estate firm of Ochsner & Emick concluded Wednesday one of the biggest land deals that was ever put over on the prairie, when they sold the John Stillman farm of 1280 acres to Frank Wright for the consideration of \$128,000.

Grows Strawberries in Barrel

Dr. Frank P. Lint has a new and unique method of growing strawberries, requiring no work after they are planted, no stooping to pick the berries or cultivation of any kind.

Installs New Ice Machine

Edwards & Son last week installed a new ice and refrigeration machine in their pool hall, which does away entirely with the use of artificial or natural ice around their fountain and is too far from his work and he bought the Kempf property in order that he might be near his blacksmith shop.

The real estate firm of Ochsner & Emick concluded Wednesday one of the biggest land deals that was ever put over on the prairie, when they sold the John Stillman farm of 1280 acres to Frank Wright for the consideration of \$128,000.

Grows Strawberries in Barrel

Dr. Frank P. Lint has a new and unique method of growing strawberries, requiring no work after they are planted, no stooping to pick the berries or cultivation of any kind.

Installs New Ice Machine

Edwards & Son last week installed a new ice and refrigeration machine in their pool hall, which does away entirely with the use of artificial or natural ice around their fountain and is too far from his work and he bought the Kempf property in order that he might be near his blacksmith shop.

# Winter Plattsburg Surveys Puget Sound Marine Facilities for War Use

By CAPT. H. W. L. NIEMEYER, Q. M. Res., Secretary, Seattle Winter Plattsburg  
(Reprinted by Courtesy of Railway & Marine News)

EARLY in 1932 Colonel Walter A. Dempsey, Q. M. Res., conceived the idea that, since summer Plattsburgs were held for officers of the line, why not hold Winter Plattsburgs for Quartermaster Officers. The Quartermaster Corps, is the business end of the military establishment, in fact during times of stress, the largest business in the nation, it therefore must have the highest type of business executives to manage its personnel and then in order to accomplish this accepted fact, a closer relationship must exist and a better understanding of the needs and requirements of the military establishment and just how it functions.

The Quartermaster Corps is charged with the supply of virtually everything the army uses except firearms of any kind, explosives and some technical articles for the Medical, Engineer and Air branches secondarily, with the transportation of the nations armed forces by land and by sea and third, with the housing of men and animals.

Preparedness must ever be the watchword for this branch of the government for it is called upon not only in time of war, but in numerous other circumstances of stress, earthquake, conflagration, tidal waves, flood, and similar catastrophes.

So well did Col. Dempsey present his plan to the late Quartermaster General, Major General William H. Hart, that the plan was first tried out in New York City the winter of 1925. A month later it was held in Chicago, 1924 Col. Dempsey was sent on a tour of the principle cities of the country and organized some twenty-four Winter Plattsburg groups in as many cities, among them being New York, Chicago, Washington, D. C., Buffalo, Cincinnati, Seattle, Denver, San Francisco, Portland, Los Angeles, Salt Lake City, Atlanta, Cleveland and other places.

Seattle was awarded first place for registration and attendance for cities of her class and first place without reference also or class for the work undertaken and accomplished. Seattle's registration was 314 that year, and for the season of 1925-1926 has exceeded the 500 mark. We are informed that the Winter Plattsburg idea has been extended to some forty principle cities and bids fair to remain an important factor in the preparedness undertakings of the Army.

**Business Men Control.**  
The course lasts six months, from November to May, meets twice a month. There are no fees or charges to either the members or the government. It operates under and by authority of the Quartermaster General of the Army, is nominally supervised by a regular army officer but actually conducted by its elected officers thus

planning and study the structure of each Winter Plattsburg group comprises the office of Assistant Secretary of War, Quartermaster General, the Chief of Supply, Construction, Rail, Water, Motor and Animal Transportation, Remount, Administration and Personnel, General Depot Quartermaster, Field Army Corps, Division and Camp Quartermasters, an advisory staff to the Assistant Secretary of War, a President and Secretary and a representative of the regular army who serves as the military instructor. The various chiefs and officers including the military instructor form the planning board.

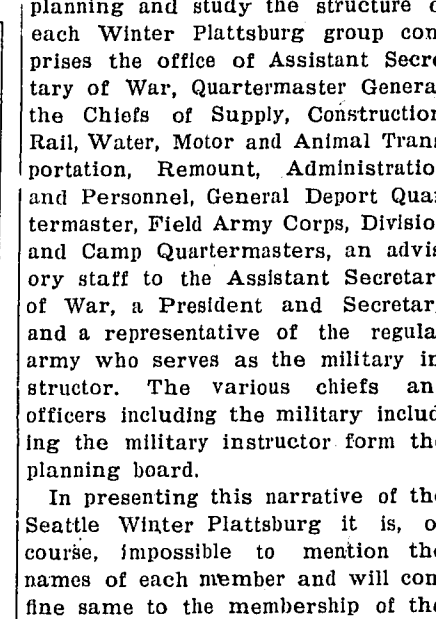

In presenting this narrative of the Seattle Winter Plattsburg it is, of course, impossible to mention the names of each member and will confine same to the membership of the planning board treating the sessions of 1924-1925 and 1925-1926 as one.

Those listed include many of the leaders in the business and professional life of the Pacific Northwest:

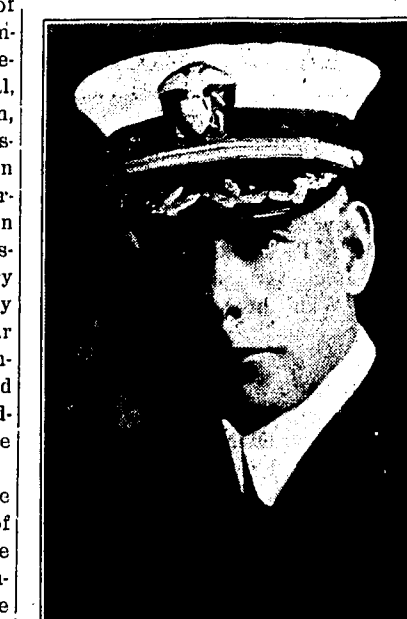

Nathan Eckstein, President, Schwabacker Bros. & Co., Inc., as the Assistant Secretary of War is the head of the Seattle Winter Plattsburg and Chairman of the Planning Board. Other leaders include Major Frank McDermott, Q. M. Res.; Major J. F. Douglas, Q. M. Res.; W. L. Rhodes, A. S. Downey, A. F. Haines, C. E. Roberts, W. H. Olin, the late I. B. Richards, G. A. Lauer, J. J. Lawson, H. J. Dobbs, E. K. Worthington, E. G. Hofmann, Major W. B. Brinton, Q. M. Res.; Major H. D. Hodgson, Q. M. Res.; J. W. Spangler, O. D. Fisher, C. D. Garfield, Wylie Hemphill, Colonel

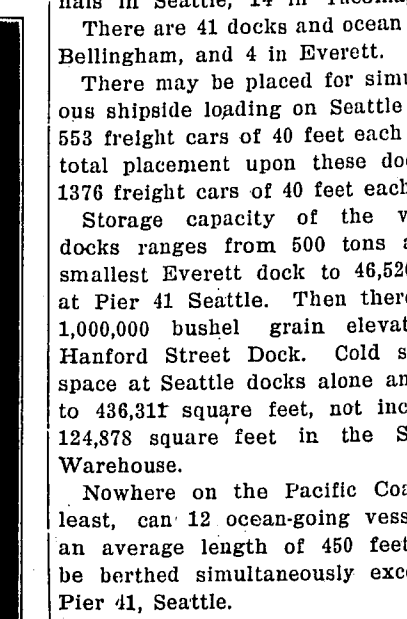

Capt. Niemeyer, the author, is Secretary and Assistant Chief of Staff, Seattle Winter Plattsburg, with a wartime assignment of Transportation Officer, Seattle Intermediate Depot. In private life he is editor and publisher of the Bainbridge Island Review.

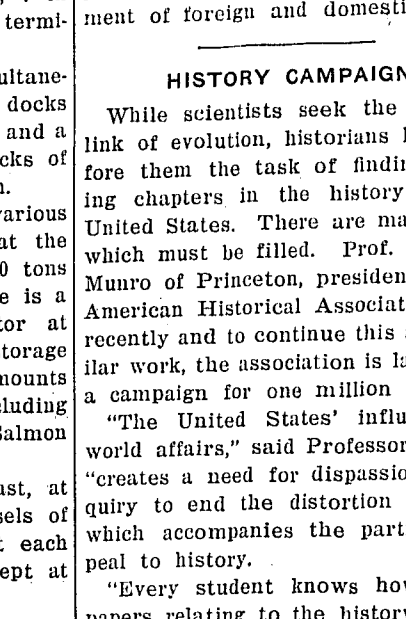

Nathan Eckstein, President, Schwabacker Bros. & Co., Inc., as the Assistant Secretary of War is the head of the Seattle Winter Plattsburg and Chairman of the Planning Board.

Major Frank McDermott, Q. M. Res., is one of the leaders in the business and professional life of the Pacific Northwest.

Major J. F. Douglas, Q. M. Res., is one of the leaders in the business and professional life of the Pacific Northwest.

These are some of the members of the planning board.

Lee Root, Executive Assistant, Chief of Water Transportation, 1924-25; Howard A. Hanson, Major A. A. Oles, Eng. Res.; Lieut. Col. Chas. A. Alden, Q. M. Res.; Commander R. C. Brennan, Captain C. V. Jackson, Q. M. Res.; Capt. J. R. Ludwigs, V. C.; Capt. D. R. Raymond, Q. M. Res., and the writer. This group then molded the research efforts of the Seattle Winter Plattsburg and laid the foundation for a projected water transportation requirement presenting the tremendous facilities of the Port of Seattle and the other Puget Sound ports of prominence.

One of the most active in the work was Col. Howard Hanson, a staff member for two years, who took considerable interest. A series of problems were projected ranging from a movement of approximately 80,000 men and animals with impediments to Alaska, to an expeditionary force of a full army of 300,000 men and impediments to some point 5,000 miles from Seattle near the 30th Meridian north latitude.

There was then required a statement of Seattle advantages or disadvantages as compared with the other

ports in the Puget Sound area may be evoked. The plan is progressing from year to year so that the hypothetical war is never lost or won necessitating a continual planning, very much like allowing a free reign in the solving of a military business problem by Reserve Officers and businessmen by practical, economical and well established business methods.

In order then to carry out this plan a hypothetical war situation is created which meets with success and reverses as often as the problem becomes an ever changing one, bringing out the best that is in everyone attending, familiarizing them with the governmental requirements without stifling the imagination by any hard and fast rules: in other words taking and making use of all our existing resources of supply, materials, shipping, city planning commission, or the Chamber of Commerce, or the various transportation clubs, or manufacturers' associations, trade or labor organizations yet differing from them in that, Winter Plattsburg must function as a complete business machine, therefore attracting to it from all of these various organizations the best available timber in thinking, practical men of large affairs, civic spirited and patriotic.

The great World War taught us that the languages of the various governmental agencies, of which the War Department is one, must speak the same language, so to speak, so that confusion and misunderstanding, resultant waste and misdirected effort be eliminated. Winter Plattsburg then becomes an educational effort that educates both those in and those out of the military establishment in business usage and planning profitable to the nation as a whole, there being no sound reason why governmental agencies should have an all together different set of specifications covering the common necessities of commercial life. Winter Plattsburg, therefore, possesses merit of a high order.

In order that each city may enjoy the greatest latitude in beneficial

available Pacific ports for the expeditious handling of this enormous tonnage, assuming that sufficient ships were allocated to handle as much of this movement as is allotted to each port of importance on Puget Sound. It was necessary for the water and rail divisions to work together, but this article will only deal with the marine side of the problem, leaving the rail movement for a future article.

Before presenting the findings or solution it is only fair to state who the gentlemen were that tackled the job. A. F. Haines, Vice-President of the Admiral Oriental Line, is Chief of Water Transportation, with Lee Root as his executive assistant, others being Capt. Eric Froberg, T. S. Wald, A. W. Shipman, J. W. Armstrong, A. I. Moser, W. H. Bluerock, Ralph Chatham, W. F. Varnell, Capt. Robt. W. Shears, Chas. Kracke, Wm. Davies, Paul Kolstad, Col. Paul Edwards, B. S. Armstrong, W. M. Miner, B. Painsalls, J. D. Gilmore, Carl Strait, Henry Gates, Capt. Robt. D. McGilivray, J. Jacobson, J. C. Cherry, L. J. Lawson, H. W. Hall, J. F. Grunbock, P. C. Hinkern, R. G. Beatty, John Ambler and R. A. Miller.

The solution shows that the facilities of the ports of Seattle, Tacoma, Bellingham and Everett, can accommodate for simultaneous loading of vessels of an average length of 450 feet, at Seattle 100 vessels, at Tacoma 40 vessels, at Bellingham 9 vessels, and at Everett 6 vessels or a total of 155 large ocean going vessels that may be docked at one time on Puget Sound. In addition thereto there are some eight or ten docks which can accommodate ocean going vessels that were left out on account of the limited land transportation facilities.

Interesting information gathered shows that: "The depth of water at low tide varies from 30 to 50 feet.

There are five coal bunkers in Seattle with a total capacity of 60,000 tons with a delivery rate of approximately 3,000 tons an hour as practically all of the ocean-going ships used in the problem have a steaming radius of 10,000 miles. We find that with the addition of a couple of oil tankers this armada of 200 vessels, with a total capacity of 300,000 men and 800,000 tons cargo can be completely loaded and fueled in ten days' time and that this rate of dispatch can be kept up for an indefinite period.

Seattle's shipping record for 1919 was 67 steel steamships and 32 wooden vessels or a grand total of 99 ocean carriers of 716,750 tons or nearly two vessels a week.

It can readily be seen from the foregoing that to plan an orderly and progressive transportation movement

of this magnitude can only be productive of an accurate knowledge of the requirements and conditions of the Puget Sound ports and extending valuable, not only in planning for the national defense, but also of equal importance to the commercial development of foreign and domestic trade.

There are 41 docks and ocean terminals in Seattle, 14 in Tacoma, 7 in Bellingham, and 4 in Everett.

There may be placed for simultaneous shipside loading on Seattle docks 553 freight cars of 40 feet each and a total placement upon these docks of 1376 freight cars of 40 feet each.

Storage capacity of the various docks ranges from 500 tons at the smallest Everett dock to 45,520 tons at Pier 41 Seattle. Then there is a 1,000,000 bushel grain elevator at Hanford Street Dock. Cold storage space at Seattle docks alone amounts to 436,311 square feet, not including 124,878 square feet in the Salmon Warehouse.

Nowhere on the Pacific Coast, at least, can 12 ocean-going vessels of an average length of 450 feet each be berthed simultaneously except at Pier 41, Seattle.

To undertake the listing of all the different kinds of machinery on these docks would resolve itself into a tiresome statistical study all of which, however, it was necessary to take into consideration in the solution of the problems, suffice to say that this loading and unloading machinery varies from a 225 H. P. traveling crane to a 100 ton sheave and pulley system, and includes cranes, portable elevators, trucks, etc.

Among the floating equipment we find some 134 barges varying from 400 to 4,400 tons each dead weight tonnage, 48 tugs varying in length from 35 to 182 feet each with power

of this magnitude can only be productive of an accurate knowledge of the requirements and conditions of the Puget Sound ports and extending valuable, not only in planning for the national defense, but also of equal importance to the commercial development of foreign and domestic trade.

**Tommy Sanford Out Again**  
 Little Tommy Sanford, son of Mrs. Helen Sanford, who has been ill with pneumonia for so many weeks, is so far recovered as to be able to come up town Monday. Although he is still weak, he is getting along nicely.  
 The little fellow was in bed for 45 days and his life was despaired of many times. It was necessary to tap his right lung some four or five times, and all his little friends, and the older ones, will be glad to learn that he is doing so nicely.

"Common sense" is misnamed. It is not so common.

**CHURCH NOTICES**

**St. John's Lutheran Church**  
 Rev. A. F. Wolff, Pastor  
 Sunday school at 9:30 a. m.  
 English services will be held each Sunday morning at 10:30 o'clock, with the exception of the first Sunday of each month, when German services will be held at the usual hour.

**Christian Church**  
 N. E. Bosch, Pastor  
 Bible school at 9:45.  
 Communion and Worship at 11 o'clock. Subject, "The Humanity of Jesus."

This service will be followed by the transportation of the congregation for the monthly get-together and business meeting. If the weather and roads are unsuitable the meeting will be held in the church basement.

The C. E. and Church service for the evening hour will be postponed as the service will be held at the picnic grounds in the afternoon.  
 The regular monthly Missionary meeting will be at the home of Mrs. Harry Beach, Tuesday, May 4, at 2:30 p. m. Those wishing transportation will meet at the Hayden store at 2 o'clock. The program promises to be very interesting with Mrs. Ben Pleiman as leader.

**Congregational Church**  
 Paul W. Sprague, Preacher  
 Mrs. W. M. Herman, organist.  
 W. E. English, choir director.  
 Sunday school, 9:45 a. m. Mrs. Arthur Hampton, superintendent.  
 Morning worship, 11 o'clock.  
 Young People's meeting, 7 p. m.

**Genesee Valley Lutheran Church**  
 Rev. G. A. Peterson, Pastor  
 Sunday, May 2, at 10 a. m. Sunday school and Bible classes in Parish house.

Norse services will be held in the church at this hour.  
 At 11 o'clock, morning services.  
 A cordial welcome to all these services.

A concert will be given in the church by Prof. Nyval and the U. of I. stringed quarter in the near future. Watch for date.

**The John Deere Spreader Stands Comparisons**

Put the John Deere Spreader, the spreader with the beater on the axle, alongside of any other kind and compare them point for point. You will quickly notice these distinctive John Deere advantages.

**Easier on you.** It is only 36 inches from the ground to the top of the box—from 6 to 10 inches lower than others—saves about half the work of loading because the manure is in the box before the hard part of lifting the manure comes.

**Easier on your horses.** The high drive wheels on the John Deere materially lighten the draft from 4 to 8 inches higher than others. The manure on the John Deere endless apron is rolled back to the beater on 48 roller bearings. If you were going to move a ton weight the easiest way you wouldn't drag it—you would put rollers under this load. This is another draft-reducing advantage.

**Does better work.** It isn't necessary to pile the John Deere spreader with manure high in the center to get on a load; consequently, the spread is even the entire width. The beater is low to the ground—manure is not thrown high in the air for side winds to catch it and cause drifting.

The revolving rake, a patented feature, prevents bunches—hit-and-miss spreading is done away with.

Lasts longer—has only about half the parts ordinarily required. All of the main working parts are on the axle where they can't get out of line to cause extra wear, binding and breakage.

Measured by the years of satisfactory service it gives, and the cost per load of manure it will spread for you, the John Deere is the lowest-priced spreader you can buy.

We have a John Deere set up on our floor for your inspection.

## The BULL'S EYE

Editor and General Manager  
WILL ROGERS

### Congress No. 2

Statistics have proven that only one-half of one per cent of the speeches made in Congress are listened to. A great many Congressmen speak IN, but not TO, Congress. But every speech is published in the record. They send the records back home to show "What they told 'em up there in Washington." Now the people back home think Congress heard their "Lem" tell 'em this.

Now, here is my scheme to stop speech making. A Bill reading as follows: "Congressional Record must not only contain speech, but number and get his Eastern name who listened to speech, and why." For instance: "Congressman Post Hole arose to a point of information and spoke at length on, 'Is Locarno a town, or is it a Treaty?' Length of speech, without waiting for applause, Gout (Rep. N. Y.): 'Unable to get out.' Sixty-fourty (Dem. N. J.): 'Case of reciprocity, he listened to mine.' Low-brow (Rep. Mass.): 'I was asleep, even the good speeches haven't woke me up.'

Now I claim that will stop some speech making. The minute it gets back home that "Lemmie" is talking to himself up there, "Lemmie" will stop talking.

You know why they won't listen to anybody up there? They have gone out to smoke, they've gone out to smoke? Why, "Bull" Durham, of course. IT'S BETTER THAN ANY SPEECH EVER MADE.

Will Rogers

P.S. There will be another piece in this paper soon. Look for it.

Charles Ray in "Dynamite Smith" A story so big, powerful and gripping that it lifts you out of yourself and sweeps you into a tumult of emotions. If you don't cry, gasp and thrill you cannot be moved.

News and Fables Comedy

### SUNDAY NIGHT, MAY 2, 1926

"The Danger Signal"

A thundering drama of railroad life. Two trains madly dashing toward each other, a runaway locomotive, a passenger train on the same track, it's the greatest thrill ever filmed. Out dashed a daring, foolhardy on a motorcycle.

Comedy and Sportlight

Two shows that are thrillers, don't miss them.

GENESSEE HOTEL THEATER

Ed. G. Bowker, Manager

We wish to thank our patrons for the excellent support given our shows. If you saw "Over the Hill" Sunday night you should be a better man or woman, better boy or girl.

We are trying to get good clean shows, educational, interesting and laughable.

### More Potlatch Eggs

The Kendrick Gazette has again come out with "the biggest egg on earth" (the only kind they raise on the Potlatch) and challenge the News to produce one as large. He claims that an egg measuring eight inches around the largest way, and laid by a Flemish Giant hen, was brought to the Gazette office the other day. And he also says that one of the bankers on the thriving little burg has a hen that had to sit on common hen's eggs for 27 days to make them hatch.

In the first place, it is very evident that the Gazette had been drinking Little Potlatch water, for some of the bankers on the thriving little burg has a hen that had to sit on common hen's eggs for 27 days to make them hatch.

# 6 1/2% Cumulative Preferred Stock

CUSTOMER-OWNERSHIP of the public utilities is one of the most striking developments in the investment field of recent years. Your own Electric Service company has adopted a similar program, which is now being resumed throughout the territory we serve.

1 To our 46,000 customers in the Inland Empire, we are pleased to announce an offering of 15,000 shares of 6 1/2% Cumulative Preferred Stock, now available to customers and employees only of this company.

2 To the hundreds of stockholders who became our "partners" in the past few years, this new offering will be an important announcement. To the thousands of men and women who now enjoy our service without participating in our earnings, we renew the invitation to become a stockholder in their home electric light and power system.

3 A personal or telephone call, or the coupon below, will bring you full and detailed information on this popular utility investment.

### PUBLIC SCHOOL NOTES OF MUCH INTEREST

Plans are being completed for commencement week beginning Sunday, May 16, and ending Friday, May 21. There are twenty-one seniors, sixteen girls and five boys, all of whom will probably be graduated. The members of this class are: Angie Castle, Gladys Johnson, Verna Gertz, Margaret Becker, Fern Herman, Agnes Sweeney, Cecelia Dwyer, Bertha Gash, Lester Bumpass, Helena Dwyer, Rosanna Troutman, Harold Hallman, Florence Kraut, Rosalia Trautman, Lawrence Kraut, Esther Hickman, Mary Mulalley, Ronald Gertz, Frances Platt, Ethel Qualey and LeRoy Harris.

The baccalaureate services will be given Sunday, May 16, at the Lutheran church. This service will be in charge of Rev. A. F. Wolff.

On Wednesday evening, May 19, class day exercise will be held at the opera house. Commencement exercises will be held Friday evening at the opera house.

The evening will be held by Dean Ivan Crawford, head of the school of engineering, University of Idaho. Mrs. Herman will have charge of the music. The valedictory will be given by Margaret Becker and the salutatory by Cecelia Dwyer.

A community play will be given on Monday night, May 17, in the opera house, for the benefit of the High School Athletic association. The title of the play is "Her Husband's Wife" and the cast is made up of the following: Miss Lillian Herman, Miss Ruth Martinson, Miss Jessie Keeler, Edwin Smolt, Don Bressler and Guy Wicks. Rev. Paul Sprague is coaching and directing the play, which promises to be an unusually good one, being a fine comedy, and the community is assured of a splendid evening's entertainment. Further announcement will be made later.

### Christian Missionary Society

The missionary society of the Christian church met this week at the country home of Mrs. Harry Beach, with Mrs. B. J. Pleiman as leader.

The meeting opened by singing "He Leadeth Me," and prayer by Mrs. N. E. Beach. Scripture reading was from Mark 11-9.

Rollcall showed 19 members and nine visitors present, two of the visitors being from Lewiston—Mrs. Carbahn and Mrs. Gillette.

Short talks were given on "The Neglected Continent" by Mrs. Hollingsworth, Mrs. Curran, Mrs. Smith and Mrs. Stucker.

Mrs. Hayden gave a talk on "What and Where Is Paraguay?"

A talk on "Our Missionary Work in Paraguay" was given by Mrs. N. E. Beach.

Hidden answers were answered and four new members were added. The meeting was closed by repeating the missionary benediction, after which delicious refreshments were served by the hostesses.

The next meeting will be at the home of Mrs. Harley Smith, June 1, with Mrs. Harry Beach, leader.

### N. S. Highway Improvements

The North and South Idaho highway is gradually nearing completion and within another year it is hoped the entire distance will be finished between here and Boise.

A 7-mile section of grading along the north and south highway between Riggs and Pollock will be advertised about June 15. This will leave only 2.5 miles unimproved road between Boise and Lewiston. The estimated cost will be \$110,000.

Seven mile section of north and south highway south of Lucile will be completed by June 18. A new bridge across Salmon river is projected next year near Riggs.

### Has Injured Foot

Ed. Vanouck is "favoring" a very sore left foot which he injured Tuesday noon by running a pitchfork tine into the joint of the third toe. While it is very painful, it is not thought any serious results will follow as the time was clean and bright.

### Pine Grove News

Ed. Vanouck is working this week for C. H. Spurbuck.

Clyde Armstrong spent Monday night with Whittier's.

Mrs. William Freeburn visited at school last Thursday.

Jack Gehlke is spending the week in Spokane visiting with his mother.

Pearl Lambert stayed Tuesday night with Mrs. Wm. Freeburn and family.

The Sewing club enjoyed a meeting with Mrs. Roy Sweet last Thursday.

A most delicious lunch was served by the hostesses.

Mrs. Herman had planned a little birthday party for Louis and Louise at the Jenkins home, according to Jenkins' information, and it was as much a surprise for them as Louis and Louise. Anyway, the self-invited guests brought well filled baskets and a picnic dinner was spread beneath the shade trees and a very pleasant time was the result.

Those present were Henry Koster and family, Rev. and Mrs. Wolff and Verona, Mr. and Mrs. Frank Slater of Moscow, Mr. and Mrs. Henry Herman, Jr., and children, Walter Herman and family, Louis Herman, Louise Scharnhorst, Mrs. Dora Nebelsick, Mrs. Harry Scholler and children, Mr. and Mrs. Frank Willoughby, Miss Viola Hestgen, Viola, Verona and Mildred Rosena.

### Ball Game Sunday

Genessee ball fans are to see another good game of ball on the home diamond Sunday afternoon, commencing at 2:30 sharp, when the Uniontown team will visit here.

For a game with the local boys, Scharnhorst will start the game for Genessee, which means that things will start with a "bang" and you'll want to see what the result will be.

While Genessee was defeated at Gardiner last Sunday by a score of 9-4, it does not follow that the same thing can be done every time and Sunday's game promises to be one of the very best played so far this season.

The Uniontown-Colton consolidation defeated Moscow by a score of 9-4, and defeated Potlatch by a 6-5 score. It's bound to be a good game and you can't afford to miss it. Show the boys you are behind them by being in your place at 2:30.

### Gray Eagle News

O. W. Harms took a load of hogs to town Tuesday.

Harry Parks was a Lewiston visitor on Sunday.

Theo Parks visited with Doris Harms Sunday evening.

The nice little shower was enjoyed by "most" everyone on Tuesday.

Tom Ingles was visitors at the J. C. Cameron home Sunday evening.

Tom Parks went to Lewiston last Wednesday evening, where he will stay indefinitely.

George Wahl had the misfortune to have one of his arms broken Monday. He was kicked by a horse, so we understand.

Mr. and Mrs. Robert Stubblefield and nephew, Mr. Brennan, from Grangeville visited with Mr. Stubblefield's brother, Fanchu, on Sunday.

The community dinner at the Grey Eagle school last Sunday was very much enjoyed by about 80 people. After dinner baseball and horse shoe games were indulged in.

### The Springs Club

A very pleasant meeting of the Springs club was held on Thursday of last week with Miss Violet Heppner at the home of her mother, Mrs. Paul Hopper. The afternoon was spent with needlework and in practicing the club song, "The Springs." They also decided to hold a food and needlework sale on Saturday, May 29, at the Hasfurther Hardware store, commencing at 2 o'clock.

At 5 o'clock a nice luncheon was served by the hostesses.

The next meeting of the club will be with Mrs. E. Reichner on Thursday, May 13.

### The Blue Bird Club

The Blue Bird club held a very pleasant social session at the home of Mrs. Oliver Woodley Tuesday afternoon. No particular work was done at this meeting owing to the fact that many of the members were present on account of inclement weather. A splendid luncheon was served by the hostesses at 4 o'clock.

The next meeting of the club will be held at the home of Mrs. Wm. Borgen, May 18.

### Rebekah Party

The Rebekahs are always alive and last Monday evening they enjoyed a pleasant time at the country home of Mrs. Eliza Gray.

With well filled baskets they motored out about 6 o'clock, and after supper, spent the evening in a social way. Miss Hardman, who expects to leave when school closes, was an honor guest and a beautiful vase was given her by the Rebekahs.

### Altar Society Entertained

The Altar society of St. Mary's church was delightfully entertained at the country home of Mrs. Martin Hasfurther last Tuesday. After a short business meeting the remainder of the afternoon was spent with fancy work and in social converse.

At 4:30 a delicious luncheon was served by the hostess.

It's Different Now

Oldtimer—"In love huh!—and I suppose you go around and serenade your lady-fair at midnight?"

Youth—"No — dawgonit — that's what is breaking my heart. She ain't ever home at that hour."

### Word From Flora Alber

Word has been received from Miss Susan Alber, who accompanied her sister, Miss Flora, to Hot Lake, Oregon, a few weeks ago, for the purpose of undergoing an operation at the Hot Lake sanitarium in the hope of effecting a cure, or at least bettering her present physical condition, to the effect that an operation had been performed on April 26 by Dr. Phy, head of the sanitarium, but that the relief expected had not been obtained and it is possible that another operation will be performed at a later date.

The many friends of Miss Alber and of the family sincerely hope for the best and that she may be given permanent relief.

Mrs. Elizabeth Odberg  
Henry Odberg,  
Ellis Odberg,  
Louis Odberg.

Legion Elects Delegates

At the meeting of the American Legion Wednesday night delegates to the district convention of Idaho district No. 2, to be held at Elk River on Saturday, May 8, were chosen as follows: Cornelius Swenney and Nels Liberg, with Harry Scholler and Roy Hanson as alternates.

### Idaho Weather and Crops

Following is the summary of Idaho weather and crops for the week ending April 28:

North Idaho: The weather was unsettled and warm during the first half of the week, but during the latter half it was fair and cool. Light local frosts occurred on Friday and Saturday morning, but no damage resulted. Farm work is progressing rapidly, being somewhat advanced for the season. Spring seeding is about completed and soil is now being prepared for planting. Pastures for summer fallow is under way. Orchardists are applying the calyx spray. The fruit outlook continues good, but cherries are falling more than usual. Pastures are in fine condition and stock are thriving. Gardens are coming on well, though the greatly improved by a soaking rain.

Southwest Idaho: The weather of the past week was in the main favorable for farm work. Crop growth was only slightly retarded by the cool weather obtaining on Friday and Saturday when heavy frosts were general and freezing temperatures were reported in some exposed localities. Prunes in some young orchards of the Parma and Fruitland districts suffered a little frost damage, but the bulk of the commercial crop escaped unharmed. Early seed grain is doing nicely. Much corn has been planted and the early planted is coming up to good stands. Pastures are improving and all stock are doing well. Alfalfa is making rapid growth.

Southeast Idaho: Warm days and cool nights prevailed during most of the week. Except for a few scattered showers in the north, the week passed without rain. Light to heavy frosts occurred but they did no damage. Winter wheat is mostly in good condition, although some winter killing is reported in the northern counties. Spring wheat, oats and barley are being planted. Early seeded grain is coming up well. Best planting has been completed in some sections and planted seed is coming up. Alfalfa is making good growth. Early planted potatoes are coming up. Late potatoes are being planted. The range is excellent and livestock are doing well.

### Are Now Genessee Residents

Mr. and Mrs. Walter Emerson have come from Lewiston and are now residents of Genessee, occupying the former Fred Follett residence. Mr. and Mrs. Emerson and family are welcome additions to our little city.

Mr. Emerson has charge of the new Ford garage, which was recently opened under the name of Genessee Motors and is a branch of the Keyes Motor company of Lewiston.

### Progressives Entertained

The Progressives were delightfully entertained Thursday at a 1 o'clock luncheon by Mrs. Laura Phipps at the home of her daughter, Mrs. W. W. Burr.

The afternoon was pleasantly spent in sewing and social converse.

The next meeting will be with Mrs. F. K. Bressler on May 20.

### Altar Society Entertained

The Altar society of St. Mary's church was delightfully entertained at the country home of Mrs. Martin Hasfurther last Tuesday. After a short business meeting the remainder of the afternoon was spent with fancy work and in social converse.

At 4:30 a delicious luncheon was served by the hostess.

# Sir Guy Gaunt and his Schooner "Four Winds"

READY for a voyage around the world via Hawaii and the Orient, the auxiliary-powered schooner Four Winds, with her owner Rear Admiral Sir Guy Gaunt, retired, of the British navy, and a party of friends aboard, is moored in Lake Union.

The Four Winds formerly was the four-masted sailing schooner Eric. She was purchased in Seattle by Sir Guy from J. B. Shields, and taken to the Canadian naval base at Esquimalt, B. C., where she was reconstructed. She came to Seattle to test her two Fairbanks-Morse engines that are auxiliary to the sailing equipment of the vessel.

The Four Winds has accommodations for six guests. She has an elaborately furnished living room of which a huge fireplace is a feature. The owner's quarters are below deck. The Four Winds carries a crew of 19 men, all Chinese, who were recruited in the Orient. Sir Guy is both commander and owner of the vessel.

The Four Winds will remain in Hawaii until the close of the racing season and then proceed to the Mediterranean, arriving there at the high tide of the winter season along the Riviera. Sir Guy, a titled Briton, is distinguished by having been the only admiral in the Royal Navy since Nelson's day who was raised from the enlisted ranks. He first sailed as a boy of fourteen in a windjammer and ended his sea service after winning distinction in Great Britain's navy during the World War.

The Four Winds is being sailed under the Blue Ensign of the British Naval Reserve, and is of British registry, being a member of the Royal Thames Yacht Club. The Admiral's personal flag bears the symbol of a gray goose.

The Four Winds under the name of Eric was launched from the yards of Hall Brothers in Port Blackley in 1888. She formerly was owned by the Burns-Phillip Company of San Francisco.

## W. S. C. Computes Cost of Poor Roads to Taxes

WASHINGTON STATE COLLEGE, Pullman.—Some startling figures computed in terms of the wear on automobile tires are revealed in a recent bulletin compiled by the engineering department of the State College. The bulletin is the second progress report on the relation of road surfaces to automobile tires.

The bulletin gives the rates at which tires wear away on different types of roads. According to H. J. Dana, chief investigator of the problem, citizens of the state spend many millions a year on automobile tires, and this factor alone makes good roads a financial necessity.

The fortunate thing about most of the features of lost civilization is that they are lost.

## New England Thirt Hit by American Tree Association

Charles Lathrop Park of the American Tree Association remarks that in one essential New England lacks thrift in a most astonishing degree. There are, he says, more than 10,000,000 idle acres in the New England States which could be growing trees while that part of the country is paying \$4,000,000 a year in freight for lumber it requires. This part of the country grows only 12 per cent of the lumber it uses.

William Van Wyck, admiralty lawyer, of the New York firm of Mackin, Brown and Van Wyck, was a Pacific Coast visitor last month accompanied by Mrs. Van Wyck. His trip West was in connection with legal matters pertaining to shipping concerns he represented. While in Seattle he was shown over the city by W. T. Isted, prominent freight appraiser and insurance adjuster.

## Increased Demand for Idaho Seed Forecast

"Demand for Idaho grown seed should be even better in the future than it has been in the past, but in order to maintain or to increase the demand and the margin now paid, present seed standards must be maintained and improved. This can be accomplished only through the efforts of the growers themselves."

The paragraph is quoted from a new University of Idaho Experiment Station bulletin on "Alfalfa Seed Production in Southern Idaho." The bulletin, which has just come off the press and is now available, was prepared by A. E. McClymonds, superintendent of the Aberdeen substation.

Consumption of alfalfa seed in the United States," says the author, "has increased considerably in the last few years. The alfalfa hay acreage is increasing at the rate of from one to five million acres a year. This demand for seed to provide for the increased acreage and the maintenance of the area already devoted to alfalfa production will provide a steady market for seed in the future."

"During the last few years the demand for hardy strains of alfalfa has been increasing. Only hardy strains withstand satisfactorily the severe winter weather of the northern States. Southern Idaho is particularly adapted to the production of hardy strains of alfalfa seed. The severe winters characteristic of the section maintain the hardness of the strains and the summer weather is conducive to the production of high yields. For this reason it is recommended that in seed producing sections every farm each year should have some acreage devoted to the production of alfalfa seed.

The conclusions and the information given in the publication are substantiated by experiments in alfalfa seed production on the Aberdeen substation and on observations made throughout surrounding sections. The author's aim is to supply the information necessary to the profitable production of alfalfa seed in southern Idaho.

## New England Clubwomen Back "Made-in-U. S. A." Movement

Exposition and Fashion Show of American Made Laces in Boston, April 7 and 8.

The women of New England are again giving concrete evidence of their historic patriotism. They are heartily backing the "Made-in-U. S. A." movement and doing their best to overcome the fetish of the foreign label and stimulate patronage of home-made products by Americans.

Mrs. Bird, who is well-known not only in New England but also throughout the country as a member of President Harding's Advisory Committee to the Conference on Limitation of the Women's Republic in the Boston Exposition and Fashion Show, which will be opened by Governor Fuller and addressed by Mayor Nichols of Boston.

State Auditor C. W. Clason of Washington has issued warrant for \$150,000 in payment of a block of Port of Port Angeles bonds purchased by the state. Another block of \$100,000 remains for delivery.

The Puget Sound Navigation Company on April 10 started ferry service between Vancouver Island and Anacortes for the spring and summer. The ferry Puget will operate on a single round trip schedule each day until May 29 when the ferry City of Angeles will be placed in service on a triangle run between Sidney, B. C., Anacortes and Bellingham, giving two round trips daily between Anacortes and Sidney and one daily round trip on the Sidney-Bellingham route.

The ferry Olympic, which operates between Victoria and Port Angeles, is scheduled to commence service June 12, but that date may be advanced if tourist conditions warrant.

On May 12 the Canadian Pacific Ferry Motor Prisoners will be commissioned in the Nanaimo-Vancouver run.

Last year's ferry traffic set a new record for travel between Canadian and United States points on Puget Sound and officials of ferry lines expect a greater travel in 1926.

A marine way and shipbuilding plant is nearing completion in Tacoma for the Foss Launch and Tug Company. It is located on the middle waterway near the old outfitting dock of the United States Shipping Board. Mr. Foss announces that shipbuilding plant will be used for the company's needs only, except for emergency cases.

The value of the home vegetable garden cannot be entirely reckoned in dollars for it provides vegetables both fresher and fuller flavored than are often to be found on the market. Then the added pleasure and health found in growing almost as good as an application of fertilizer. A poor soil well worked is often better than good ground carelessly handled.

Vegetables to be grown will vary somewhat with the climate, soil and taste of the owner, but every garden should contain a variety which will be worth something for each month of the year. Too frequently the garden serves but for a few months in the spring and early summer. Even small gardens will produce a large variety by succession cropping such as using beans or tomatoes to follow spinach or radishes on the same ground.

From the standard vegetables something can be used in each month of the year, either fresh, stored or canned. Leaf vegetables, as spinach, lettuce and cabbage. Bulb and root crops, as onions, beets, carrots and parsnips. Plant beans and peas in hammocks in the open until the weather is settled and warm. The cucumber, pumpkin, squash, and corn all need more room and may have to be left out of the real small garden.

For one willing to give more special attention, vegetables like cauliflower, sprouts, peppers, egg plant, melons, salicy and ground cherries are good. Vegetables will supply vitamins, salts and minerals, all essential to health. The garden produces several times the food per square foot that any field or farm crops do. A few homes can afford to be without a garden in 1926.

## Would Regulate Public Accountants

Senator Bernard Dowling and Assemblyman Eberly Hutchison are among the public accountants who have been in practice three years or more the coveted degree of C. P. A. (certified public accountant), while at the same time not denying the fact that the right to make out and present federal and state income returns, (and other practice of accountants) not having to do with reports that are prepared for the purpose of credit.) It is believed that the passage of the Hutchinson-Dowling Bill will be of great benefit to the public, the commercial community and the accountants of the state. Under its provisions every public accountant must possess the degree of C. P. A. and be licensed by the board created by the regents, Penalties are provided for infractions of this law and negligence in securing licenses. Accountants of other states known to practice in New York under temporary license provisions.

The bill has the endorsement of Dr. A. S. Downing, Director of Professional Education, at the University of the State of New York, and the approval of both houses of the legislature.

It is believed that the Hutchinson-Dowling bill meets the ideals of the leading public accountants of the State and protects the profession from the invasion of a qualified accountant. It also grants to all public accountants who have been in practice three years or more the coveted degree of C. P. A. (certified public accountant), while at the same time not denying the fact that the right to make out and present federal and state income returns, (and other practice of accountants) not having to do with reports that are prepared for the purpose of credit.) It is believed that the passage of the Hutchinson-Dowling Bill will be of great benefit to the public, the commercial community and the accountants of the state. Under its provisions every public accountant must possess the degree of C. P. A. and be licensed by the board created by the regents, Penalties are provided for infractions of this law and negligence in securing licenses. Accountants of other states known to practice in New York under temporary license provisions.

The bill has the endorsement of Dr. A. S. Downing, Director of Professional Education, at the University of the State of New York, and the approval of both houses of the legislature.

## For Better Health

PAIN AND FEAR

Are you afraid of an operation? Most people are. Perhaps you are afraid that you will be hurt—afraid of pain?

Pain has been one of the most valuable agents in the preservation of the race as well as the individual. It has taught us that we must not touch hot stoves, put fingers in cog wheels, drink boiling hot liquid, allow sand or foreign bodies to remain in our eyes or fish bones in our throats.

We regret that pain is not the universal danger signal of all things harmful to us. One of the greatest causes of death beyond middle life is cancer and unfortunately pain is not an early symptom.

If overeating and intoxication produced pain instead of sleepiness our race today would be a very different one and the individuals would be ages ahead of the present state, physically. It took ages to find out what different pains meant and to realize that different pains are danger signals of internal disorders or derangements of inner machinery—conditions which can be corrected if these danger signals are heeded and the proper diagnosis followed.

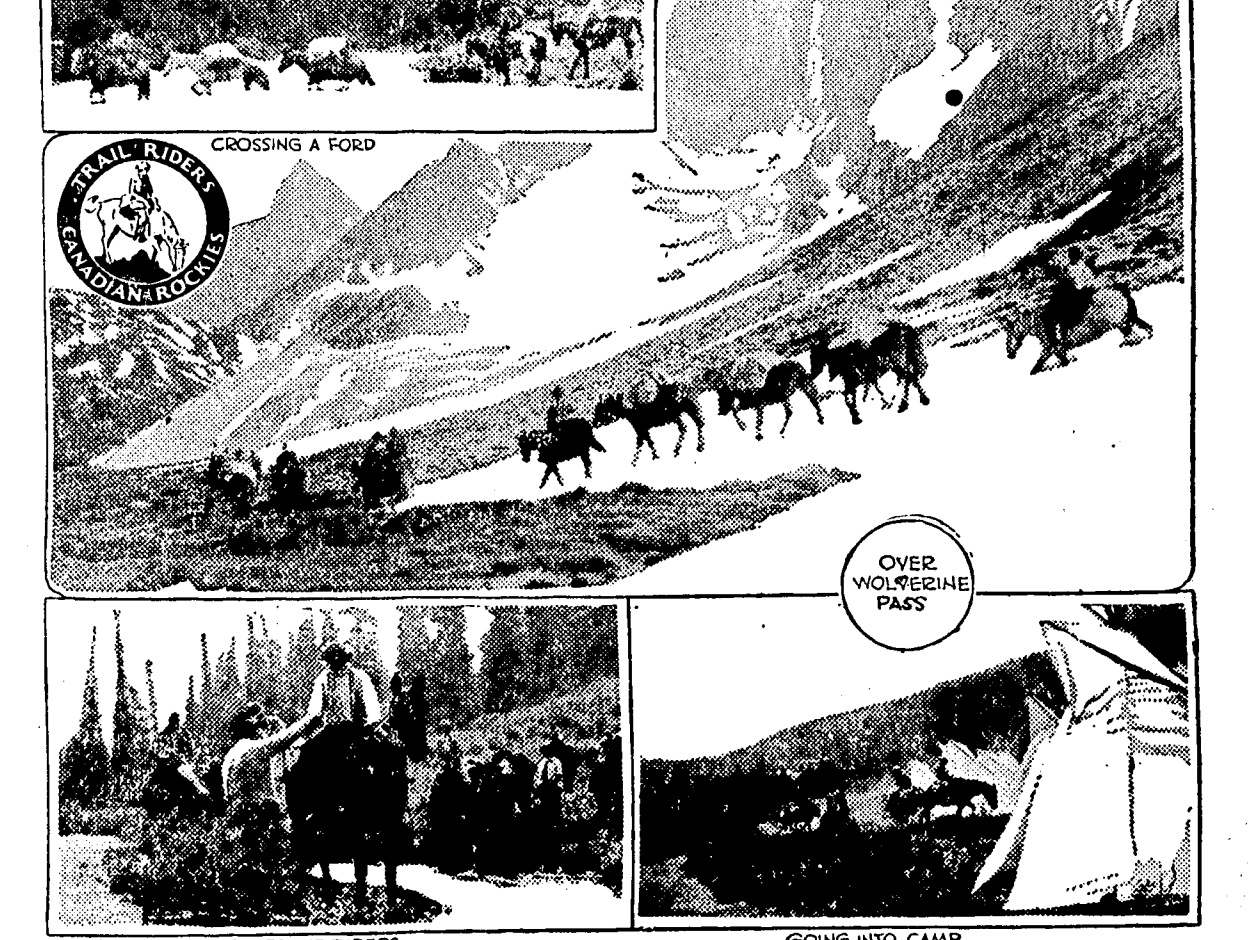

Appendicitis still ranks high as the cause of death—because of slow response—of seeking expert attention after the first warning pains.

Pain may be your greatest friend—in that it is a warning signal—it may be faint or excruciating. It does demand that you find out what ails you.

Now in answer to the opening question "Are you afraid of an operation?" If that fear is of pain, put your mind at rest for you will feel no pain. Anesthesia has made operations absolutely painless. Fight that vague instinct, fear of pain—which has been handed down to us for thousands of generations—because it may have an operation to save your life or to prolong or make your future life more comfortable, try to abolish fear from your mind.

Like worry it only breeds trouble and never helps.

## Two Official Rides This Year for Canada's Trail Riders

Cross country riding in the Canadian Rockies has become so popular that this summer the Trail Riders of the Canadian Rockies, an association with members from all parts of the world, has organized two such rides. One will be a three day trip for those who have not had much experience of the saddle on rocky western mountain trails; one will be a five day trip for fairly hardy riders who do not object to covering twenty miles a day.

The two parties will start out one from a point near Banff and the other from Lake Louise, in the latter part of July and will be covered by the official chart of the Trail Riders.

Many of the Trail Riders are well known in the world. Last year they spent the last night in camp and held a grand Fowling East competition in the Parnassus Valley on a broad level bench commanding a view of the group of mountains enclosing Lake Louise. As this camp will be only seven miles away from the Chateau Lake Louise those who do not even three days' time to spare for riding will be able to gather over in time for the final pow-wow. There are 704 miles of trails in the mountains of the Canadian Rockies, and among the most ardent riders of the Trail Riders are in Banff, Charles D. Walcott, secretary of the British Columbia and Washington, is the honorary president of the Trail Riders and Mrs. Vaus Walcott, his wife, is one of its most enthusiastic feminine supporters. Other Trail Riders are Indian chiefs, cowboys and quites out novelists, scientists, mountaineers, climbers and soldiers. Last year Field Marshal Earl Haig, our own Murray Gibbon, Montreal novelist, and Reginald Townsend, editor of the Country Life, conceived the idea of the organization and put it on its feet. Other British Columbia members are the Hon. Robert Randolph Bruce, newly appointed Lieutenant Governor of British Columbia, and among the most ardent riders, Dr. Charles D. Walcott, secretary of the British Columbia and Washington, is the honorary president of the Trail Riders and Mrs. Vaus Walcott, his wife, is one of its most enthusiastic feminine supporters. Other Trail Riders are Indian chiefs, cowboys and quites out novelists, scientists, mountaineers, climbers and soldiers. ## PLANTS NOW READY

Early cabbage and cauliflower.  
We are shipping pansies every day and they will soon be closed up. Home folks, have you got yours?  
Last call for Gladiolus bulbs.

**Herman's Hardy Gardens**

Heavy Fog  
The Genesee section was visited by a dense fog early Thursday morning—one that almost made a fog-horn necessary if one happened to be out real early.  
About dawn the roofs of buildings were white with frost, but is not believed that any particular damage was done. This followed a good installment of that "million-dollar" rain.

## Announcement To the Public

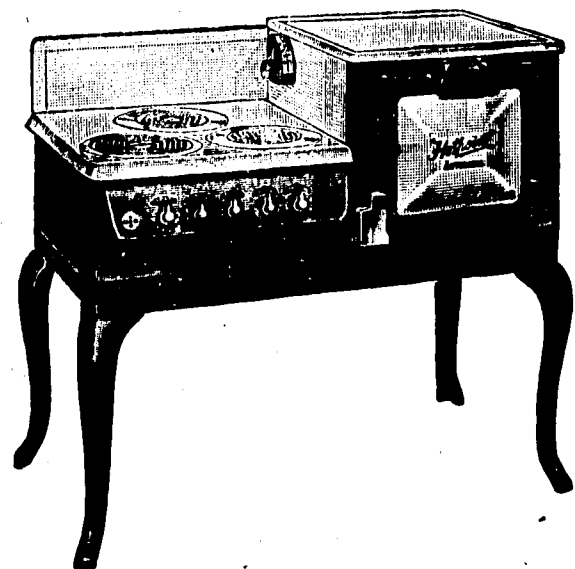

We wish to announce that we have charge of the Continental Oil Co. station at Genesee. We will deliver gas, oil and grease to your place at regular tank wagon price of 24 1-2c a gallon. Barrels will also be filled at our pump or station at 24 1-2c.

We also wish to announce that we are selling one of the best oils in America, "Mobile" at western oil prices.

In view of the fact that our products are second to none, and are representing the only oil company that is paying local taxes, we solicit your business.

**MORSCHER BROTHERS**

## The New Hotpoint "Colonial" Electric Range

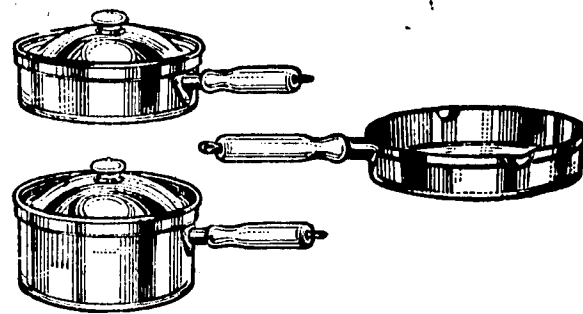

**\$9.75  
DOWN**

The new Colonial has had an enthusiastic reception.

Women appreciate the smart, stylish appearance of this new Hotpoint. They like the snowy white enamel cooking top, oven front and splashers—also the automatic heat control.

The new Colonial will sell at a reduced price and \$9.75 down for only a few more days. Ranges installed in the order of purchase.

A COMPLETE ELECTRIC KITCHEN—READY FOR USE AT \$9.75 DOWN

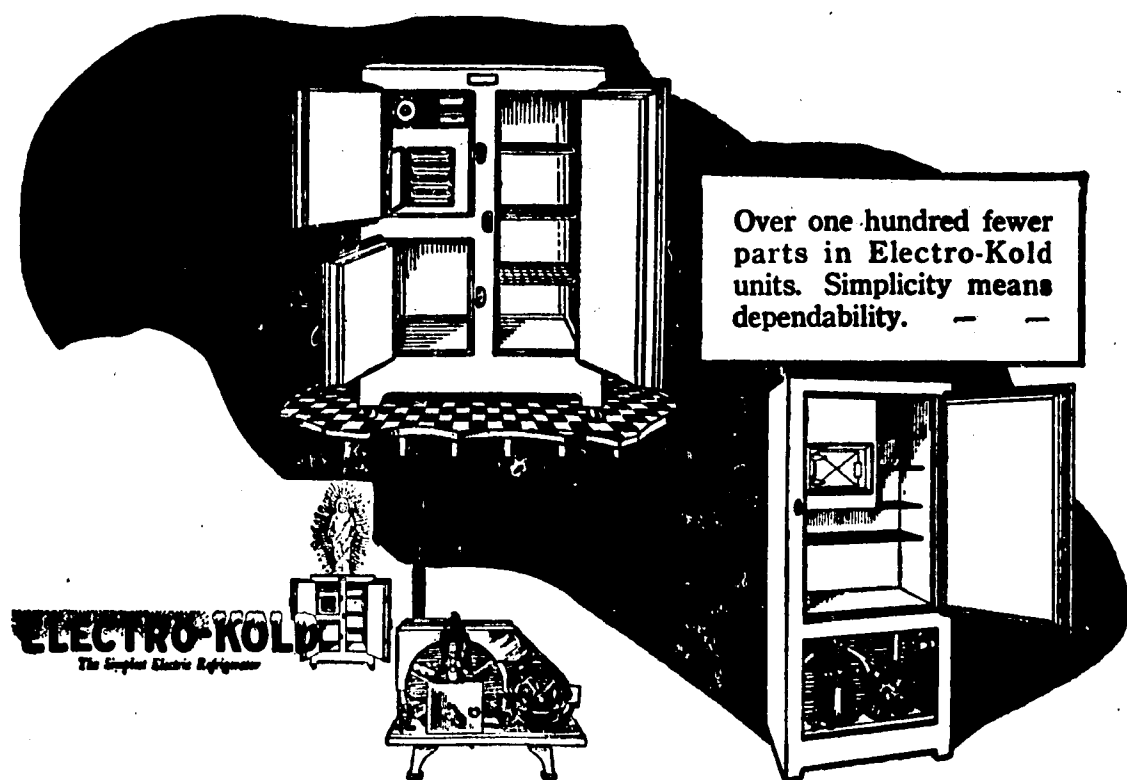

New "colonial" Model Hotpoint electric range. All necessary range and water heater wiring. Electric water heater.

Fiberform cover for your water tank. Then we present you with a \$12.00 set of electric range aluminum cooking utensils.

This represents a complete electric kitchen—at \$9.75 down—the remainder in monthly payments with your light bill.

## ELECTRO-KOLD

Over one hundred fewer parts in Electro-Kold units. Simplicity means dependability.

Electro-Kold cold is colder than ice.  
Electro-Kold cold is cheaper than ice.  
Electro-Kold cold is cleaner than ice.  
Get your Electro-Kold in now before hot weather begins.

### CHURCH NOTICES

**St. John's Lutheran Church**  
Rev. A. F. Wolf, Pastor  
Sunday school at 9:30 a. m.  
English services will be held each Sunday morning at 10:30 o'clock, with the exception of the first Sunday of each month, when German services will be held at the usual hour.

**Christian Church**  
N. E. Beach, Pastor  
Bible school at 9:45.  
Mother's day service at 11 a. m. "God's Greatest Woman." Doxology: "O God, to Thee we lift our voice, Help us to honor Mother's name; May we in Thee always rejoice And strive to dedicate her fame."

Special song, "Mother's prayer."  
Congregational hymn, "Faith of Our Mothers."  
Please bring words found elsewhere in these columns.

You are requested to wear a flower in memory of mother.

Ten autos and two trucks conveyed the crowd to Cold spring after the close of last Sunday's morning worship. A bountiful dinner was enjoyed together after which devotional service was held and the reports of work done and future plans discussed.

The C. E. society decided to postpone the Sunday evening meetings at the close of the public school year. The congregation voted to extend the pastor a vacation in the way of asking no evening service during the months of June, July and August. He will visit some places during the summer Sunday afternoons and evenings. He will aid in the Children's day program at Silcot school house on June 13.

You are invited to enjoy Mother's day with us next Sunday.

**Genesee Valley Lutheran Church**  
Rev. Gerh. A. Peterson, Pastor  
The Young People's Luther league will convene at 8 o'clock, when the following program will be given:

Scripture and prayer by Rev. Peter-Hymn.

Reading of text.  
Hymn.

Piano duet by Myrtle Larson and Bernice Nordby.  
Topic discussion, led by Oscar Danielson.

Solo by Gladys Johnson.  
Remarks by Rev. Peterson.  
Hymn.

Business meeting.  
Society news by Bernice Nordby.

**Congregational Church**  
Paul W. Sprague, Preacher  
Mrs. W. M. Herman, organist.  
W. E. English, choir director.  
Sunday school, 9:45 a. m. Mrs. Arthur Hampton, superintendent.  
Morning worship, 11 o'clock.  
Young People's meeting, 7 p. m.

### ORONITE

Oronite products of the Standard Oil Co., which stands behind me on all of their goods I sell, and what I claim for them.

The house-fly spray is as good, if not better, than any other used for the same purpose—and in this way you get more for your money. The spray not only puts them under an anesthesia—the operation is successful—it kills them.

Poultry house spray not only kills the lice, but it kills the mites. It will retain its deadly effect for months on the walls. The insecticide is incorporated in oil that holds it in suspension. It kills the lice while the chicken sleeps.

In bulk—bring your container.

GRANT CLARK

### Will Give Comic Opera

An announcement of great interest is made to the effect that Mrs. Antonie Hordemann will give three performances of the light opera "Mikado" the end of May.

For this occasion the best artistic skill obtainable has been secured, and as a guarantee of the success of the undertaking the fact that Prof. Gottfried Herbst, formerly of Washington State college, now of the Herbst School of Music, Spokane, has consented to assume the musical leadership, is sufficient.

Professional soloists from Spokane have also been engaged, and the chorus and ballet are being trained to take their places beside them.

The opera is well known as one of the most pleasing, musically, as well as being full of comedy, and will undoubtedly be heralded with great enthusiasm.

Further announcement will be made soon.

For That "Tired Feeling" So Common In The Spring

The lazy feeling which comes over us in the spring is often joked about, but the condition which causes it is a serious matter. It indicates a derangement of the blood and nervous system. People can't help feeling lazy and worn out when impure blood is poisoning the system and paralyzes activity. Even when the tired feeling isn't very perceptible, it is well to take a good spring remedy. We sell all of the good

Blood Remedies, Tonics, Etc.

### PERSONALS

John Peasley of Toppish, Wash., was a Genesee visitor Saturday.

Mr. and Mrs. A. G. Mayer of Troy spent Wednesday at the Al. Mayer home.

Mr. and Mrs. Herman A. Johnson and little daughter of Troy were Genesee visitors Monday.

Mrs. Nellie Haymond returned home Thursday after spending a few days visiting in Moscow.

Misses Gertrude and Margaret Sampson spent Sunday in Moscow, guests of Mrs. Harry Thatcher.

Mrs. F. K. Bressler went to Lewiston Wednesday to spend a few days with her sister, Mrs. E. T. Jacobs.

Mr. and Mrs. Will Herman, Esther Hickman and William Van Horn spent last Sunday at Winchester picnicking.

Geo. Boliou left Monday afternoon for Kimberly, in the southern part of the state, for a visit with his mother, who is considerably past 80 years of age.

Elder F. M. Burg, dean of the school of theology of Walla Walla college, and daughter, Miss Tressa, spent the week-end at the L. C. Rogers home.

Miss Kathryn Casebolt spent the week-end in Moscow visiting her sisters, Helen and Wilma Casebolt, who are attending the U. of I., and with Emma Lou Sullivan.

Rev. and Mrs. W. A. Sprague of Yakima, Wash., arrived Monday evening to spend a few days with their son, Rev. Paul Sprague, returning to their home Thursday.

Mr. and Mrs. A. E. Allen left for Spokane Saturday where they will make their home. Mr. Allen has been brakeman on the Genesee branch for a few months and will still be employed by the Northern Pacific R. R. Co. at Spokane.

F. S. Casebolt drove to Spokane last Saturday, returning Tuesday with Mrs. Casebolt, who had been visiting there for a week. Mr. Casebolt was accompanied to Spokane by Mr. and Mrs. Walter Casebolt who had been here for several weeks. Walter will have a few days of surveying in Spokane.

ane, after which he will return to his home in Seattle.

Mr. and Mrs. Leon Pollett spent last Sunday at Asotin with Mr. and Mrs. Sanders. Mrs. Sanders is a niece of Mrs. Pollett. Mr. and Mrs. McGrew of Walla Walla met the Polletts at Asotin and picnicked with them. Mrs. Pollett and Mr. McGrew are sister and brother.

T. O. Green, field representative of the Lewiston Tribune, was a Genesee visitor on Thursday of last week. Mr. Green said he had visited practically every section of the country and found things in splendid condition. Crops and fruits seem to be O. K. and while some of the wheat and barley had been nipped a little by frost he considered it a good thing in most instances as it was growing entirely too fast for this early in the spring.

### Will Hold Food Sale

**Genesee Christian Church**

Let your own heart dictate to your soul why you should attend. Wear a flower and bring these words:

"Faith of our Mothers, lavish faith,  
In cradle song and bedtime prayer,  
In nursery love and fraternal lore,  
Thy presence still pervades the air;  
"Faith of our Mothers, living faith,  
We will be true to thee till death.

"Faith of our Mothers, lavish faith,  
The fount of childhood's trust and grace,  
O, may thy consecration prove  
The well-spring of a nobler race;  
"Faith of our Mothers, lavish faith,  
We will be true to thee till death.

"Faith of our Mothers, guiding faith  
For youthful longing—youthful doubt,  
How blurred our vision, blind our way  
Thy providential care without;  
"Faith of our Mothers, guiding faith,  
We will be true to thee till death.

"Faith of our Mothers, Christian faith,  
In truth beyond our man-made creed,  
Still serve the home and save the church,  
And breathe thy spirit through our deeds;  
"Faith of our Mothers, Christian faith,  
We will be true to thee till death.

## To Get Rid of that Squirrel Use

American Cyanamid Company's

**Calcium Cyanide**

Sold by

**Genesee Union Warehouse Co.**

The unpainted house is a constant prey to rot and rust. Every moment that you delay you increase the damage that is being done. Don't put it off any longer—apply a coat or two of J. & D. house paint, as well as shingle stain—a paint that has been known for over 30 years. It has wonderful durability for covering and lasting.

— SOLD BY —

**HAS FURTHER  
HARDWARE**

THE GIRLIG

By DOUGLAS MACK

"GENTLEMEN!" was the sarcastic greeting of the telegram, "this will make you acquainted with Bimbo Jones, blacksmith by trade and ball player by instinct..."

"Always was," Mac snaps. "Always puttin' something over on the owners and me. Who ever heard of a elephant playin' in the big leagues?"

"That's why I'm goin' to work fast. If he eats like he looks, we need six world's series to let the stockholders break even. You lead him out—feed him, baled hay, I imagine—see if old Bimboley can get a suit ready by game time..."

"Baseball scouts and prohibition," Mac gives vent to his feelings, "are birds of a feather."

"You're funny," remarks Bimbo, and I give up tryin' to hurt his feelings. As he walks toward center field...

"When do I start?" says the only cool man in the crowd. "Oh, you mean to play ball? Why, we generally play durin' the day. At night the lightin' ain't no good, and I won't need any light to hit these pitchers you leaguers go to."

"I'll gamble you bought a farm with the winnin'," Mac responds, warm in his subject. "No, I bought some cigars and give 'em to that freak crowd of yours."

Race Bettors Attacked

By State Grange Heads

W. A. LINKLATER, President, Puget Sound Fair

MONTEFASANO—Intimating that the recent removal of Prof. W. A. Linklater as manager of the Western Washington experiment station in Puyallup was brought about, at least in part, by his opposition to the control of county fairs by the "part man" horse racing gambling interests...

To Be Circulated. The resolution, signed by John H. Taylor and C. B. Sherwood as committee members, is being circulated at once throughout the granges of the state.

"Whereas, the resolution read: 'The Western Washington experiment station is an institution highly esteemed by the farmer and in the past by the development of the dairy, poultry and agricultural industries to a degree not equaled by another station in the United States...'"

"Whereas, there is grave fear that this, in connection with the suspension of the station bulletins, is but the beginning of steps to reduce his station to a very inferior position and thus cripple its efficiency in the name of economy..."

"Whereas, the State College and its experiment stations are designated to benefit the agricultural interests of this state and not to be used as a foothold for scheming politicians..."

Stop That Cough
Bocher's Syrup—the old reliable family remedy that has been in use for 60 years. Loosens and brings up the phlegm and eases the dryness and irritation. At all druggists. 30c and 50c. If you cannot get it, write to G. C. GREEN, INC., Woodbury, N. J.

HISTORY OF PACIFIC COAST SHIPPING LINES

Matson Navigation Company

KEEPING pace with the development of Hawaii, the Matson Navigation Company, organized 25 years ago, now operates a fine fleet of ocean carriers from Seattle and San Francisco to the Islands. The history of this shipping corporation is the story of the life of Captain William Matson, founder of the Matson Navigation Company and the accomplishments of his associates.

On February 9 of this year the Matson Company celebrated the twenty-fifth anniversary of its organization and recalled memories of its founder, a descendant of the Vikings. From a 200-ton sailing vessel the little Emma Claudin, the Matson Line has grown to a fleet of 15 steamships including the new express liner Malolo, which is Hawaiian for "Flying Fish."

As Captain Matson's interest grew in the business and he obtained other vessels, The Enterprise, purchased in 1902, was Captain Matson's first steamship. The Larline was the first steamship built to his order and was ready for service in 1908.

ARRANGEMENTS have been completed by the Pacific Steamship Company for the operation of the steamship Dorothy Alexander, widely known as a coastwise liner, in the service during the coming summer tourist season.

Beginning with a sailing from Seattle June 19, the vessel is scheduled to make six round trip voyages to South eastern Alaska, cruising as far as Sitka, Kodiak, and calling on route at Ketchikan, Taku Glacier, Juneau and Wrangell.

The service of the Dorothy Alexander will augment that maintained in this route by the Alexander line with the steamships Admiral Rogers and Queen. Because of the size of the Dorothy, she virtually will double the company's passenger carrying capacity in this route.

Mr. Alexander said that the operation of the Dorothy Alexander in the Southeastern Alaska service would attract nearly 1,000 additional tourists during the tourist season. These tourists will be in addition to the passengers the line will handle on its regular excursion vessels, which already are well booked for the coming season.

The Dorothy Alexander is at present on the Atlantic, where she has been operating in the coastwise service under charter to the Clyde Line. She is due on this coast the latter part of May. The H. F. Alexander, which also has been in service on the East Coast, is scheduled to leave New York for Seattle May 13.

Seattle Man to Head Y. M. C. A. at Pullman
WASHINGTON STATE COLLEGE, Pullman—George Cole, Seattle, said to be one of the most capable Y. M. C. A. workers of the state, will take up his duties as the new secretary of the State College branch of the association July 1.

Whatcom County Sets New Record for Eggs

BELLINGHAM—More eggs were shipped out of Whatcom County last week than in any other week in the history of the Washington Cooperative Eggs & Poultry Association.

The new secretary succeeds Paul Phillips, who resigned a short time ago to go to Europe, where he has charge of a large government ranch in Armenia.

The Vigilant Tugboat Company of Seattle, was recently incorporated by C. C. Croft and W. A. Barber. Capital stock was listed at \$15,000.

Apples Growners Plan Publicity Campaign

YAKIMA—Two resolutions of importance to the Northwest boxed apple industry were passed here last week unanimously by apple growers and shippers attending the state grade and pack conference.

As the psycho-analyst would say, we are in the midst of a new and mysterious era. It is the radio, the automobile, the bootlegger, jazz, the canals of Mars, Rudolph Valentino or boldness? It may be due to any or all of these causes.

Advertising and putting out better grades of apples will mean more money for all and protect the immense orchard investment which now is seriously jeopardized, declared Fred Eberle, general manager of the Yakima Horticultural Union.

After full discussion, with the exception of allowing Newtons to have two strings in the fancy grade, the extra fancy and fancy grades stand as they are. "C" grade remains as it is with the exception that red, striped or partial red varieties must contain color characteristic of the variety.

Besides these three grades there shall be "combination extra fancy and fancy," when extra fancy and fancy are packed together; and "combination fancy and C grade," when fancy and C grade are packed together, but each must have at least 25 per cent of the higher grade.

The amount of tolerance was raised 5 per cent to include packing, but the state regulations regarding this was left to the discretion of the horticultural department.

No cherry grades were adopted at this meeting, but tentative grades were furnished by Harold W. Samson of the federal bureau of agricultural economics, similar to those he furnished the Wenatchee growers, and while it will not be obligatory for the growers to follow them this season, it will afford a guide for future action, Mr. Barnes stated.

Canned Nuts
Do you know that nuts can now be purchased in cans? This means that they are fresh for they are put up in the air-tight containers as soon as they have been packed.

The nuts are delicious, warmed in a saucepan with a little butter. A can of nuts makes a pleasant "surprise" gift to hold water every room of a friend who is going on a trip.

Oshkosh B'GOSH... This ticket depicts the Double Dyed Denim...

This competitive test proved Double Dyed Denim fast color.

If only every overall wear might have seen this test made! The superiority of Double Dyed Denim was proven in a most startling manner.

Samples of denim woven at different mills were sewed together. One of these samples was the Double Dyed Denim. The entire strip was soiled with dirt and grease. Then it was sent to the laundry.

Powerful chemicals were used to take out the dirt and grease. Again and again this process was repeated. Illustrated at the left you see the result.

Some of the pieces were almost white; others a dirty gray; one showed a pale blue. Standing out in striking contrast was the Double Dyed Denim. It came through tough and strong as ever and a wonderful bright blue.

Double Dyed Denim is made only into Oshkosh B'Gosh Overalls. It was originated and is controlled by the Oshkosh Overall Company. Try a pair. That's all we ask. They must make good or we will.

Oshkosh Overall Company, Oshkosh, Wis. U.S.A. Welland, Ont., Can.

Legend is Old There are several stories in regard to what is meant by "the cackling of the geese that saved Rome." One is that it refers to the cackling of the geese on Capitoline hill during the Sabine uprising, which aroused the Sabine women so that they ran out between fathers and sons, who were bent on killing each other, and brought peace. This legend relates to the time of Romulus. Read all the ads. this week.

WHY Firestone TIRE DEALERS Serve You Better

We represent one of the world's largest and most efficient tire makers—Firestone. We sell and service the most economical tires made—Firestone Gum-Dipped Cords—the only tires on the market with every fiber of every cord saturated and insulated with rubber. These famous tires have given—and are giving—unheard of mileage on the largest taxicab, bus and truck fleets in the world. They are also giving unheard of mileage to hundreds of thousands of car owners.

We offer you our facilities and experience in aligning your wheels, mounting your tires, checking them for air pressure, inspecting them and making repairs when necessary by the latest Firestone methods of repairing, thus enabling you to get full mileage from your tires. Equip your car with these wonderful Gum-Dipped tires. WE WILL TAKE YOUR OLD TIRES IN TRADE, giving you a liberal allowance for unused mileage.

Table with columns for tire sizes and prices. Includes 'HIGH PRESSURE CORDS' and 'OVER-SIZE BALLOONS'.

Grow Your Own Lilies If people only realized how easily water lilies can be grown in the garden, the flowers would be as familiar as astors or sweet peas, says Nature Magazine. Even the tiniest garden has all the requisites, and lilies have been grown successfully on the roofs of city skyscrapers. A tub or tight half barrel of water, a little good soil and sunshine are all that the gardener needs for a modest attempt.

WHAT HAPPENED HERE TWENTY YEARS AGO T. Driscoll has let the contract for the erection of his brick block to Geo. Steltz and work on the same will be commenced at the earliest possible date.

Legends of "Sleepy Hollow" May Mosman spent the week-end with home folks. Mr. and Mrs. Elmer Palson spent Sunday at the C. F. Ebel home.

Gray Eagle News Miss Sloan was a Lewiston visitor this week-end. Helen Harms was quite ill with sore throat Wednesday morning.

Backing His Conviction. A lawyer in New York City wrote his brother who is head of a New York state country bank, in regard to the use of government printed envelopes by the bank. He said: "I know their convenience and doubtless they are cheaper, but in these days when the various classes of industry and business realize the necessity of fighting against the further encroachment of the government and state into business, it is rather inconsistent for a bank or any other business, to encourage government competition with its own citizens. So far as the envelopes are concerned, the government is in the business tax free; and if it can manufacture and distribute envelopes in competition with private enterprise, which must pay taxes to maintain government, there is no good reason why it should not invade other fields of business. Each industrial function taken over in the name of the government adds an increased tax burden on the private citizen and property owner. I think that when the present supply of government envelopes is exhausted we should purchase our envelopes from a private printer who pays taxes to maintain our government, even if it makes us lick our own stamps and causes us to pay a little more for the printing. Think it over."—Manufacturer.

Her Husband's Wife. "Her Husband's Wife" will be at the local opera house Monday night, May 17, in all her glory, and all the bald-heads—and others—are cordially invited to come to the opera house at that time and meet her and her friends. She will be presented by a cast of characters that comprises the best local talent of the town and you are absolutely guaranteed a laugh a second for the first hour—and after that it gets worse—that is, the laughing does. If you happen to sit on one of those "tilty" chairs better sit back pretty well for your bound to lean forward, and you know the result is sometimes disastrous.

Judgment of Women I have been beloved by the four women whose love was the most comfort to me. My mother, sister, my wife and my daughter. I have had the better part and it will not be taken from me; for I often fancy that the judgments which will be passed upon us in the valley of Jehoshaphat will be neither more nor less than those of women, considered by the Almighty.—Ernest Renan

Why Not Divorce Insurance? In these days when there is insurance against pretty near everything, why wouldn't insurance against divorce be a good thing? We mean insurance for the old folks, that pay so much a month after Mary and her husband are divorced and she comes trailing home with little Johnny and Susie for the old folks to look after.—Idaho Post.

Wisdom of the Sages "If you're not satisfied with you're lot—build a house on it."

On Friday afternoon of this week at 2 o'clock, the patrons are invited to view some of the work that has been done during the school year. The demonstration will not consist of all the work done during the school year but that which is displayed will be a sample. The grade school exhibit will be given in their respective rooms while the high school exhibit will be on the basement floor of the school building. This exhibit is not given as a school fair but merely as a chance to show the patrons a small sample of the kind of work done.

On Wednesday night the class day exercises will be given at the high school opera house. This will consist of the class will, class prophecy, class history, class poem and class songs. Contrary to what some schools, these exercises will not be according to grades made. This exercise will be of about an hour's duration.

Thursday the annual high school picnic will be given. The place chosen for this year is Idler's Rest. Friday night, as announced, will be the commencement exercises. Dean Ivan C. Crawford, the principal speaker of the evening, is a good speaker and will bring an excellent message to all. The music for this occasion will be in charge of Mrs. W. M. Herman.

Seventh and Eighth Grades We have spent most of the week reviewing the various subjects. Final examinations will be given in all eighth grade subjects on Wednesday, Thursday and Friday of this week and also in the seventh grade subjects of geography and physiology.

Fifth and Sixth Grades The sixth grades are making nature booklets for language. They consist of pictures of flowers with a complete description given of each. We have received some very interesting booklets in answer to the business letters written by both the fifth and sixth graders. They take up the art of writing, life in Belgium, how salt is made, and the making of rubber articles.

Third and Fourth Grades The fourth grade will have soon finished the raffia mats which they have been making. The third grade have been illustrating some of Edward Lear's poems. Final exams given in our room this week.

First and Second Grades The second grade pupils have been writing picture study compositions. They are now studying the picture "Spring." The first and second grade pupils are weaving raffia mats for busy work.

MUSIC STUDENTS WILL GIVE RECITAL TUESDAY EVENING The music students of Mrs. W. M. Herman will give a recital in the Congregational church Tuesday evening, May 18, commencing at 8 o'clock. Following is the program: Trio—Poet and Peasant Overture... Franz V. Suppe... Evelyn Flameo, Bernice Nordby, Kathryn Casbolt, Della Mazurka... Carl Wilhelm Kern Op. 527 Fern Erickson Silvered Mists... Chas. Kuertner Bertha Gash An Album Leaf... Julius Devaux Op. 38 Let's Castle The Prancing Pony... Mari Paldi Arwin Nordby Ladies' Quartet... Thome Op. 29 Musical Reading... Pipes of Pan... Lulu Jones Downing Esther Hickman Evelyn Flameo at the piano A Little Flower... Cora W. Jenkins Virginia Miller (a) Reverie... F. Atherton (b) Falling Waters... J. L. Truax Helen Flameo Shepherd Boy... G. D. Wilson Lorene Platt

Summit News Mrs. James Qualey and children motored to Lewiston Friday. Mrs. Carl Grieser and children spent Tuesday with Mrs. Chas. Grieser. Mr. and Mrs. Joe Schleuter spent Sunday at the Thos. Dwyer home. Mr. and Mrs. M. S. Wilson called on Mr. and Mrs. Leo Miller last Sunday. Mrs. Dick Green and children spent the week-end at the F. W. Qualey home. Mr. and Mrs. Martin Grieser were Sunday guests of Mr. and Mrs. Chas. Grieser. W. J. Holmes of Buhl spent several days last week at the F. B. Hampton home. B. H. Bielenberg of Moscow spent Sunday at the home of his parents, Mr. and Mrs. H. Bielenberg. Mr. and Mrs. M. Reissenauer and children had Sunday dinner with Mrs. Theo. Schleuter and daughter. There will be a program and entertainment at the Summit school Friday evening, May 14, commencing at 8 o'clock. Mr. and Mrs. Elmer Johnson and little daughter and Mr. and Mrs. F. O. Green and children spent Sunday at the Wm. Rader home. Joe Bielenberg and sister Florence accompanied by Mr. and Mrs. Raymond Troutman and Mrs. Joe Troutman were Lewiston visitors Friday. Miss Alfrida Hampton and friend, Miss Blanch Stewart of Kootenai, who are attending the Lewiston normal, spent the week end at the F. B. Hampton home. Mr. and Mrs. James Qualey and family, Nels Liberg, Lewick Jain, Edna Green, Mr. and Mrs. Dick Green and children, were Sunday guests at the F. W. Qualey home. Mr. and Mrs. F. B. Hampton had as Sunday dinner guests Mr. and Mrs. Oliver Woodley and children, Miss Blanch Stewart of Kootenai, Mrs. Woodley and Miss Alfrida Hampton. Mr. and Mrs. Ed. Erickson and children of Orofino spent Friday night at the home of Mrs. Erickson's sister, Mrs. Chas. Kraut, returning to their home Saturday. Mrs. Kraut and children accompanied them as far as Lewiston. Mr. and Mrs. F. B. Hampton, Butler Mathews, Miss Adda Mathews and W. J. Holmes of Buhl, motored to Lewiston Thursday where Miss Mathews and Mr. Holmes were united in marriage at the Baptist parsonage by Rev. McHarness. The "Pop club" met with Mrs. Jas. Qualey Thursday and a very enjoyable afternoon was spent. During the afternoon ice cream and cake were served by the hostess assisted by her daughter Eva and Mrs. Jos. Schleuter. The next meeting will be with Mrs. Chas. Herman in three weeks.

Card Club Entertained The Card club was very delightfully entertained Tuesday at the home of Mrs. Harry Scholler. Pinochle was played at six tables. The honors were won by Mrs. T. H. Herman and the consolation was awarded to Mrs. V. A. Beckman. Besides club members the guests present were Mrs. Clyde Meyer, Mrs. Milton Rader, Mrs. Elmer Vanouck, Mrs. Gibson, Mrs. James Magee, Mrs. Harriet Raymond, Mrs. Carl Erickson, Mrs. Kretschmer, Mrs. T. H. Herman, Mrs. Mahlon Follett, Mrs. Frank Hoorman, Mrs. Ray Edwards and Miss Maggie Botter. At 5 o'clock a dainty luncheon was served by the hostess. The club will meet with Mrs. C. P. Whalen, May 25.

The "Mikado" The forthcoming production of "The Mikado" on Friday evening, May 28, promises to be one of the most pretentious ever attempted locally. Soloists and musicians from Spokane are expected to take leading roles, and rehearsals are now being conducted both here and in Spokane, under the direction of Mrs. Hordemann, here, and Prof. Gottfried Herbst there. A full rehearsal of the soloists with the orchestra will be held next week at Spokane, and, if present indications are correct, we can look forward to a musical and theatrical treat such as has seldom been the good fortune of Genesee to witness.

Dr. Jones to Return Dr. A. E. Jones, the Spokane optician who makes this territory every 60 days, was in Genesee Monday and reported a very satisfactory business. He will be here in June, the date to be announced later. Dr. Jones has been in Spokane for the past 12 years and is conceded to be one of the best opticians in that city.

Poor Gal He: You are as beautiful as a great white lily. She: "And true to form—usually have a dead one holding me."

Junior-Senior Banquet Held Saturday Evening A very delightful banquet was served by the Junior class of the high school in honor of the seniors last Saturday evening at 6 o'clock. A delicious three-course dinner was served. The room was beautifully decorated in the senior class colors, pink and green. The center piece on the large table was a small stairway, representing the four classes of the high school—freshman, sophomore, junior and senior—of the high school. At the top step was placed a diploma, indicating that these four steps were necessary to attain the desired parchment. The class motto is "Don't stare up the steps, but step up the stairs." The tables were artistically decorated with pink and green candles marked the place of each guest. The favors were small nut baskets in the senior class colors. Margaret Becker, Wade Mayer and Harold Hallman. Altogether it was a very happy occasion and comes but once in a lifetime, in the same capacity, to those so vitally interested in its success.

Has Further Knops Miss Julia Hasfurter, daughter of Mr. and Mrs. Andrew Hasfurter of Genesee and Frank Knops of Uniontown were united in marriage by Probate Judge C. A. Woolfin at Lewiston on Friday, April 30. Mr. Knops is a young farmer of the Uniontown section and has been farming with his uncle, A. Striebel, near that place. The young folks went to the coast on a honeymoon trip after which they will be at home to their friends on the farm.

Summit News Mrs. James Qualey and children motored to Lewiston Friday. Mrs. Carl Grieser and children spent Tuesday with Mrs. Chas. Grieser. Mr. and Mrs. Joe Schleuter spent Sunday at the Thos. Dwyer home. Mr. and Mrs. M. S. Wilson called on Mr. and Mrs. Leo Miller last Sunday. Mrs. Dick Green and children spent the week-end at the F. W. Qualey home. Mr. and Mrs. Martin Grieser were Sunday guests of Mr. and Mrs. Chas. Grieser. W. J. Holmes of Buhl spent several days last week at the F. B. Hampton home. B. H. ## No Governorship For Mine

My good old friend the Governor of Oklahoma was in to see me at the theatre the other night. I had just had humorous mention as a candidate for that position, as they wanted to revive the Populist Party with me as the Standard Bearer.

Well, the Governor showed me what had happened to a friend of his who had been defeated for Governor in our state, so he discouraged me. I won't accuse him of doing it purposely, but he did. His friend's campaign expenditures were as follows:

"I kissed 6,000 babies; helped 42 voters thrash wheat; shook hands with the entire State; smoked 3,000 sacks of 'Bull' Durham; cut 22 cords of wood; helped brand 8,000 calves; spayed 4,000 of them; was sprinkled 8 times in Methodist Churches; totally immersed in cold water in muddy creeks three times by the Baptists; went to confession in every Catholic Town; paid dues to 11 Synagogues; charter member of the Holy-Rollers; listened to 800 get-together Kiwanis, Lions, and Rotary speeches; bought truck and pillow slip in every Klux Klan in the State; and then I was defeated.

"Bull" Durham was my sole satisfaction not only during, but after election. It is the only thing that stayed with me."

*The Rogers*

P.S. There will be another piece in this paper soon. Look for it.

1926 Wool and Sheep  
1926 wool clip is being contracted as low as 82 cents; though most of it goes at a higher price. The winter was so mild and inexpensive for the handling of sheep, that a lower price than has prevailed for some years past might be anticipated and endured. Losses have been practically non-existent; the cost of winter feed has been low. Lower prices have naturally followed lower costs of production, so that the industry has suffered no exceptional hardship, even at the low sales price. The spring lamb crop is probably the best for many years, and the shortage of cattle and hogs should make mutton a good price all the year.

Descriptive  
There is imagination in the howler just reported to us: "Rhubarb," wrote a youngster, "is a kind of celery gone bloodshot."

SEMI-LOCAL NEWS CLIPPED FROM EXCHANGES  
Be Light Cherry Crop  
The cherry crop on the uplands will be exceeding light this year, as the frost killed most of the blossoms.—Colton News-Letter.

1926 Egg Record Broken  
Last week the Gazette published a story about a big hen's egg but since the Havens of American Ridge has entered a White Orpington egg, all other eggs have faded into insignificance. The hen has been named the "Orpington Optimist." The egg measured 9 by 6 1/2 inches. The Genesee News will get into this class.—Kenrick Gazette.

Crop Conditions Good  
Crop conditions generally in the Lewiston country are good. While so far is expressed by cherry growers, particularly in Clarkston, that the trees are sloughing too heavily to leave a good crop, orchards growers and those up the Clearwater generally believe the crop will be a heavy one. Peaches and all soft fruit promise a heavy yield.

Early lettuce was somewhat damaged by heat this week, but not severely. A. A. Seaborg has harvested around 150 crates from his acreage north of the Clearwater and reports the crop in good shape in spite of the heat. Reports from Clarkston are not quite so good.—Lewiston Banner.

Has Traffic Cop  
Theodore Goekner, of Cottonwood, was appointed traffic officer of Idaho county by Sheriff Herwin Rothwell last Friday and will assume his new duties Saturday, May 1.

The appointment was made possible when the county commissioners, in session two weeks ago gave Sheriff Rothwell authority to appoint a special deputy whose duty will be to patrol the highways in Idaho county in an endeavor to stop speeding and reckless driving which is becoming more and more prevalent, especially speeding.

Wednesday, Mr. Goekner returned from Spokane with a new motorcycle which the county purchased for the traffic officer. The machine is specially built and equipped for a speed cop. We noticed the speedometer is capable of registering 100 miles an hour.

Mr. Goekner will patrol the North and South highway from Whitebird to Lawyears canyon creek.—Cottonwood Chronicle.

Will Build Missing Link  
According to a statement made to the Palouse chamber of commerce Wednesday by R. L. Smith, chairman of the highway committee, it seems certain that the road between Palouse and the connection with the North and South highway, a distance of about five miles will be built this summer. Mr. Smith said that the Whitman and Latah county authorities are working together in an effort to have the link completed between the North and South highway in Idaho and the eastern division of the Inland Empire highway at Palouse.

Mr. Smith states that a difficulty is being experienced in locating a rock quarry from which suitable rock could be procured. The quarry at Ringo turned out to be "nigger heads" and unfit for use and another quarry proved to be too shallow and did not have a sufficient quantity of rock to justify opening it up and installing the machinery. Rock can be obtained at Palouse for that end of the haul, but the haul would be too long to use on the Idaho end.

A deal has been made by the Latah county commissioners to secure a small tract of land from the Bradrick farm for a cutoff, to avoid a low place on the present road.

This link will shorten the road materially between Moscow and Spokane, and will be of great convenience to the people of both Latah and Whitman counties, the road traversing as it does, a rich farming district, and also connecting two great state highways.—Star-Mirror.

Grade Crossings and Autos  
Last year, autoists killed one and ran over five other South Pacific crossing flagmen; they crashed through 390 lowered crossing gates. Almost as many autos ran into the trains as were struck by the engines; some into the middle or even into the tail end of the trains. But grade crossings were responsible for only 10 per cent of all auto accidents.

Fool-proof viaducts might eliminate all grade crossing accidents. But the records show such driving recklessness, that the remedy does not seem to lie in a suicidal business tax for overhead crossings to prevent reckless drivers from killing themselves at railroad tracks, when 9 out of 10 do it some other way.

Blonde Bess Opines  
"Talk may be cheap, as is sometimes said—but not when you're sassing a traffic cop."

## Northern Pacific Opens Modern Commissary

1—At a cost of \$200,000, the Northern Pacific Railway recently completed this new commissary in St. Paul. Railroad men agree that it is the most complete plant of its kind in America.

2—In this automatically controlled refrigerator is prepared the meat that goes into the Northern Pacific dining cars. Nothing has been left undone to make this room as sanitary as science can provide.

3—From great electric ovens, with 100 square feet of baking area, come the toothsome delicacies that satiate the hunger of the traveler. The very latest ideas are incorporated in the various devices used in this light and airy room.

N. S. Highway Not Open  
The North and South highway expected to be closed for the balance of the month of May, according to the opinion of highway officials, who say that the shovels will be operating on narrow grades and cuts until the job is completed. It was expected the shovel work might be completed by May 15, but engineer MacGreedy, in charge of the work, notified the local highway office that the road is closed indefinitely.

For about a week prior to May 2, travel was impossible through the canyon, but it was so difficult for cars to get through the construction work that is made known and motorists were not encouraged to make the trip. One gasoline shovel is now engaged in making a heavy cut at Marble point and this will take a couple of weeks or more to finish. The work through the canyon is found to be more difficult than expected and for this reason is taking longer time than anticipated. When completed the Latah sector of 3.63 miles, which is now holding up the road, will be standard, whereas before three very bad short grades and much narrow bad road made travel very slow and difficult.—Lewiston Tribune.

# Firestone TIRE DEALERS and Save You Money

We have the tires and the tubes that are delivering thousands of extra miles—**Firestone Gum-Dipped Tires**  
Every fiber of every cord is saturated and insulated with rubber.  
Used by the operators of the biggest taxicab, motorbus and truck fleets. These big buyers measure mileage and demand Most Miles Per Dollar.  
**Firestone Steam-Welded Tubes**  
Steam-Welding vulcanizes the splice in live steam—a special Firestone process—assuring an air-tight tube, so important to the life of your tire.  
You, too, can get the extra mileage, economy and comfort now enjoyed by the big transportation leaders and by hundreds of thousands of satisfied motorists, by equipping your car with these wonderful Gum-Dipped Tires and Steam-Welded Tubes.  
**WE TAKE YOUR OLD TIRES IN TRADE** and give liberal allowance for unused mileage. Come and see us.

AWRIGHT, MOM, I'LL LET HIM CHOOSE THE ONE HE WANTS.  
SEE THESE TWO APPLES, ADONIS? YOU CAN HAVE THE LITTLE ONE. SO YOU BETTER CHOOSE THAT ONE.

## THE GIRLIG

By DOUGLAS MACK  
(Continued from Last Week)

The first man up in Grassy. He fuses around and gets Colton in the hole. About this time Mac comes to. "Say," he yelled at the infield, "call that dumbbell in a ways."  
Sure enough Bimbo is still obeyin' orders. He is out by the flagpole. The infield startin' yellin', and Welch and Burns talks excitedly in the sign language, but Bimbo ignores them.  
"Damn," I muttered, "why did I tell him to go way out there."  
"Play ball," Mac suddenly yelled, and the game gives it up. Nick winds up and shoots or through. The enemy's lead-off man did his stuff to the criples: a Texas leaguer pops out toward center. At least everybody agreed it as such. At the flagpole an ocean liner was gettin' into action. Welch and Burns, desperate, started cross-jobs, so as to speak. Still the hulk in center kept on runnin'—runnin'—his eyes watchin' that teasin', whirlin' flyball.

"Drop 'em," cried Mac, leapin' into the open. "they'll be killed!"  
We got 'em stopped, but nothin' even slowed Bimbo Jones. He was runnin' now like the wind, only he was easier to see. He dived, rolled ten feet, and came up with the apple. "I'm not so sure," I remarks, a funny feelin' comin' over me, "that Pep Carson is ready to join the cooks." Mac can't talk. He drops onto the bench.  
"Who's the speed merchant?" fifteen thousand begin to ask.  
The announcer hadn't done his stuff. "Tall 'em!" says Mac abruptly. I runs out and grabs the megaphone. "Bimbo Jones playin' center," I hurls through it.  
"Come on, Bimbo Jones!" is encouraged by fifteen thousand throats. He does, right to the dugout, like as if there ain't no game.  
"Go back!" Mac hisses.  
"But," Bimbo pants, lookin' from Mac to me, "I don't think it's necessary to stop you sep. I—"  
"Play wherever you want," Mac almost sobbed. Bimbo trotted back, to where he caught the last one. Colton was so upset he gives Jennings a groover. The end of the big bat gives it a ride toward the flagpole. Bimbo Jones got into action. Bimbo got to runnin'. Bimbo leaped at the clods. . . . Bimbo snagged the ball! I couldn't hear good, but I believe the fans was promisin' him the keys to the city.

He batted in Blake's position, second innin', and drove the first fade-away Collins' throw over the right field screen. I finally got my eyes off that fat slob driftin' unceremoniously, I guess you'd call it, past all the bases, and looked at Blake. He was cryin'.  
In a week any effort to yank Bimbo from the lineup would have brought on violence. Where the big fellow got his speed from nobody could imagine. He seemed to start slow, but he manages to get there, and every other time up he punches that ball where nobody's airt.  
"Look at him," shouts Mac one day, while Bimbo is slidin' into second on what oughta been a single, "if we could get some of that fat off him he'd be a livin' streak."  
Bimbo could sure extinguish the results of a god cook's efforts. Eat! Mac alive, he used more fuel than a two-six gas field. I speaks to Mac about it; Mac don't mumble his answer at all.  
"It's against all the laws of athletic averages, I know, but it seems favorable for team average. If we win today, we're third. I can hear a bee buzzin', Jim, and it's music, but I don't wanta get stung, so just feed Bimbo all his tummy insists on."  
"Sure," I agrees, my palms itchin'. "I've been coachin' with the Redlogs ever since my arm and old age made me quitte. I can't get any equal sufferin', and—well the weather. You know how it goes.  
She is awful big—she must weigh 150—and broad-shouldered. In addition she is homely—takes after her father and almost makes it a score. I think like that I can't drag my thoughts away from cream muffins and blackberry jam. But fifteen years is some handicap.  
O nthe other hand, Ophelia ain't bein' bothered much by handsome scallywags seekin' her father's permission. One night on the veranda I tries to steal second.  
"Ophie," I always calls her that, "seem that you cook for me anyhow, did you ever think—"  
I was caught off the bag and I knew it. She acts as though she's reluctant to touch me out.  
"What is it, Jimmy?"  
"I makes a dive for the bag."  
"Will you marry me, Ophie?" Well, the matter wasn't settled, but she didn't run away. I'm not sure; it may be that I kissed her.  
Mac takes the blow like a man. You see I up and told him I loves Ophie.  
"If we don't win the rag, and you manage to steal my little girl," he shoots at me, "my cup of sorrow will be full!"  
I sets out with new hope to stir the gang up. I worked hardest over Bimbo Jones. I goaded him past the 400 up his end till he have his rations cut down. He took it serious and kept on eatin' and hittin'. We rammed clear into second place.  
Ophelia got to attendin' some of the games. Everything goes all right 'til one day I spots Bimbo eyein' her after she had stood up to root.  
"Get your mind on the game," I admonishes.  
We start a road trip late in July and Bimbo's battin' average got to showin' off. Naturally the rest of the

BEAUTIFY IT WITH  
"DIAMOND DYES"  
Just Dip to Tint or Boil to Dye  
Each 15-cent package contains directions so simple any woman can tint soft, delicate shades of dye rich, permanent colors in lingerie, silks, ribbons, skirts, waists, dresses, sweaters, draperies, coverings, hangings—everything!  
Buy Diamond Dyes—no other kind—and tell your druggist whether the material you wish to color is wool or silk, or whether it is linen, cotton or mixed goods.

Calves Need Grain—  
Grass Alone Harmful  
At this time of year when farmers are anxious to get as much stock as possible out on grass in order to eliminate work, it is a too-common practice to take four or five months' old calves off milk feed and turn them out with the rest of the herd, with no other but pasture food, says F. W. Atkeson, dairy husbandman for the University of Idaho.  
These calves, Professor Atkeson says, are not old enough to develop properly on such bulky feed as grass and usually develop extremely large barrels, becoming what is commonly known as pot-bellied. They seem to get larger and larger in the barrel and do not make normal growth.  
"Calves less than seven or eight months of age," he says, "should get a little grain, especially in the early spring when grass is very succulent. If skim milk is available it is well to milk feed until they are six months of age."  
Such feeding, he points out, may be done very easily by hiding calf stanchions in the fence line. Plenty of good fresh water and salt should be before the calves at all times, and some shade should be provided to protect them from the hot sun.

Be a home-town booster.

PREFERENCE  
Of all the cars you see on the streets, two-thirds are equipped with Champions. This outstanding preference is every evidence that Champion is the better spark plug.

Does not affect the Heart  
BAYER

 FRIDAY, MAY 14, 1926

**Mathews-Holmes Nuptials**  
 Miss Adda Mathews of Genesee and  
 W. J. Holmes of Buhl were united in  
 marriage Thursday afternoon, May 6,  
 by Rev. McHarness, pastor of the  
 Baptist church at Lewiston.  
 The wedding was a very quiet affair  
 there being present only immediate rel-  
 atives and close friends of the bride  
 and groom.  
 After the wedding ceremony the  
 newly-weds motored to the southern  
 part of the state for a visit with  
 friends. They will make their home  
 at Buhl, where Mr. Holmes is engaged  
 in farming.  
 Mrs. Holmes is a sister of Mrs. F.  
 B. Hampton and is well and favorably  
 known here and will be greatly missed  
 in church and social work.  
 The News joins their many well-  
 wishers for a long and happy wedded  
 life.

**"That Million-Dollar Rain"**  
 There is very little question but  
 that the splendid rain which fell in  
 this section last week will add close  
 to a million dollars to the wheat crop  
 and if nothing untoward happens to  
 cut it short, there should be one of  
 those "bumper" crops that we have  
 in these parts every once in a while,  
 or oftener. The grain never looked  
 finer and the prospects are indeed  
 good.

**New Arrivals**  
 Mr. and Mrs. George Miller are the  
 parents of a son, born Sunday even-  
 ing, May 9. Both mother and son are  
 getting along nicely.  
 Mr. and Mrs. Theodore Cameron  
 are the parents of a baby girl, born  
 Thursday morning, May 13. Mother  
 and babe are doing nicely.

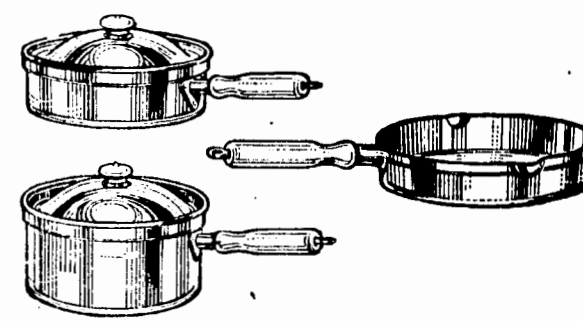

**The New Hotpoint "Colonial"  
 Electric Range**

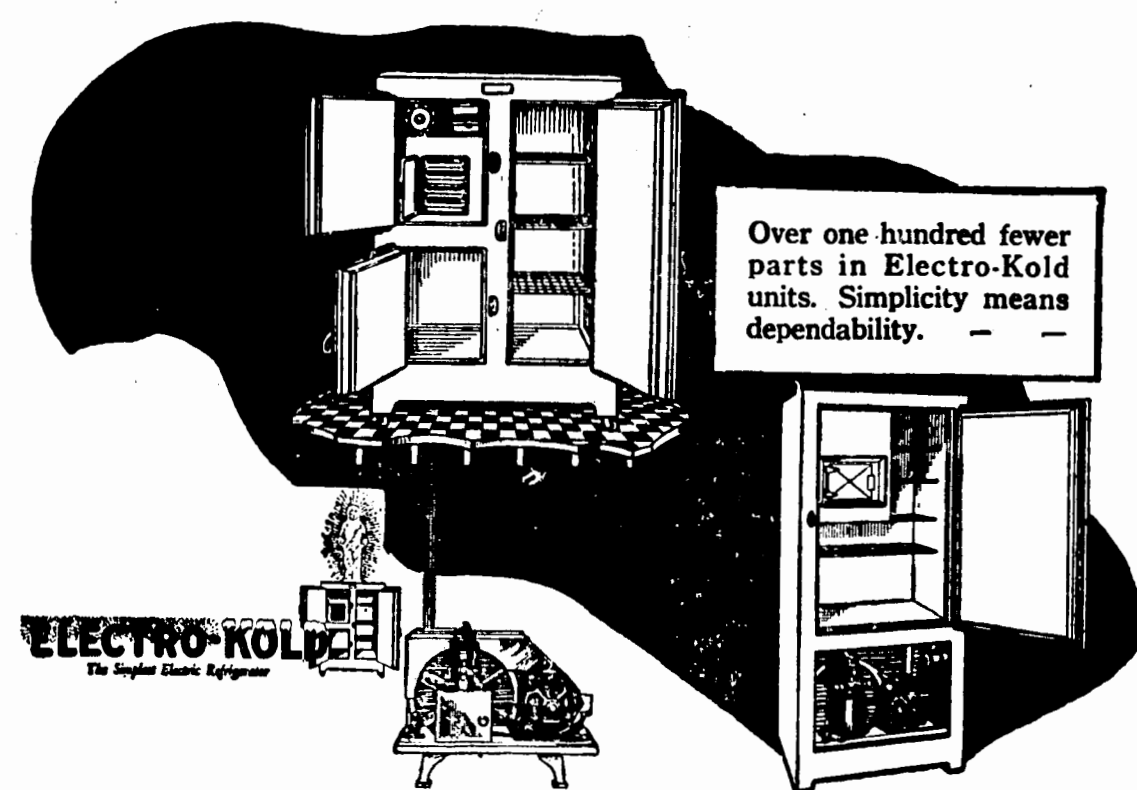

**\$9.75  
 DOWN**

The new Colonial has had an enthusiastic reception.  
 Women appreciate the smart, stylish appearance of this new Hotpoint. They like the snowy white enamel cooking top, oven front and splashers—also the automatic heat control.  
 The new Colonial will sell at a reduced price and \$9.75 down for only a few more days. Ranges installed in the order of purchase.

**A COMPLETE ELECTRIC KITCHEN—READY FOR USE AT \$9.75 DOWN**  
 New "colonial" Model Hotpoint electric range. All necessary range and water heater wiring. Electric water heater.  
 Fiberglass cover for your water tank.  
 Then we present you with a \$12.00 set of electric range aluminum cooking utensils.  
 This represents a complete electric kitchen—at \$9.75 down—the remainder in monthly payments with your light bill.

**ELECTRO-KOLD**

**CHURCH NOTICES**

**St. John's Lutheran Church**  
 Rev. A. F. Wolf, Pastor  
 Sunday school at 9:30 a. m.  
 English services will be held each Sunday morning at 10:30 o'clock, with the exception of the first Sunday of each month, when German services will be held at the usual hour.

**Christian Church**  
 N. E. Beach, Pastor  
 Bible school at 9:45.  
 Our aim for 1900 by Children's day, the first Sunday in June, seems assured. Another class room is being prepared for the new class, soon to be organized.  
 The sermon subject for Sunday morning at 11 o'clock is "The Picture of Christ as Immanuel."  
 The congregation voted no evening service so all could attend the baccalaureate service at the Lutheran church at 8 p. m.  
 The Christian Endeavorers will meet at 7 p. m. in the last meeting of the summer. The officers ask every member to make a special effort to be present.  
 Pastor Beach will continue his lectures on Church History, explained from a large chart, on Sunday evening, May 23, at 8 p. m. A good audience were deeply interested last Sunday night.

**Congregational Church**  
 Paul W. Sprague, Preacher  
 Mrs. W. M. Herman, organist.  
 W. E. English, choir director.  
 Sunday school, 9:45 a. m. Mrs. Arthur Hampton, superintendent.  
 Morning worship, 11 o'clock.  
 Young People's meeting, 7 p. m.

**Baccalaureate Services**  
 Baccalaureate services will be held in the Genesee Lutheran church Sunday evening at 8 o'clock. Rev. A. F. Wolf will deliver the sermon.  
 The following is the program:  
 Organ—March.  
 Song by choir.  
 Prayer.  
 Scripture reading.  
 Organ selection by Ruth Wolf.  
 Sermon.  
 Song by choir.

**Legion Will Give Dance**  
 The American Legion will give a dance in their hall on Friday night, May 21, to which the general public is invited.  
 Music will be furnished by Melz' orchestra of Spokane. 46-1

**Will Attend Convention**  
 The Young People's Luther League convention is being held in Spokane this week—Thursday, Friday and Saturday and Sunday. The delegates from the Genesee Valley church are Alice Hanson and Helmer Rossebo.  
 Rev. Ylvisaker will be the speaker for Sunday. He served as army chaplain and since the World war has been doing European relief work.  
 R. E. Nordby will prepare a paper on "The Financial Side of the League."

**Gets a "Snooter"**  
 Walt Jain was one of the attendants at the ball game last Sunday—and if you ask him he will tell you he is painfully aware of the fact—and he happened to be sitting just aft of the home plate in the grandstand. During the game a foul ball found a hole in the netting in front of the grandstand and it also found Walt's nose and upper lip and it left an ugly wound and caused Walt much pain and attention from the ladies who volunteered to aid him in his distress. The lick was a hard one and might easily have been much worse.  
 However, in future Walt will be very careful which side he is "rooting" for.

**Radical price reduction and FREE attachments for a limited time**

Was \$42 with attachments now same cleaner \$37.95

**FREE Full set of \$7.50 attachments**  
 Exactly the same Bee-Vac which has been selling for \$42 with attachments—the finest Bee-Vac ever built—and may justly be considered among the finest, most efficient and dependable electric cleaners on the market.  
 Now, for a limited time, you buy it at only \$37.95, with full set of \$7.50 attachments FREE.  
 This amazing value is made possible by volume production and selling economies, combined with notable manufacturing savings.  
 You must act quickly. Call or telephone at once!

**PERSONALS**

Albert Gray arrived from Mullan last week and will spend the summer here.  
 Miss Pearl Perkins spent the week-end with Miss Emma Lou Sullivan at Moscow.  
 Mr. and Mrs. F. J. Niemann and children of Polatch visited at the W. W. Burr home Sunday.  
 Miss Grace Willoughby of Spokane visited last Sunday with her parents, Mr. and Mrs. Frank Willoughby.  
 Miss Alice Wingardner of Lewiston is visiting at the home of her sister, Mrs. V. A. Beckman, and husband, Joe Decker of Moscow, a brother-in-law of Mrs. Leon Follett, visited at the Follett home Saturday and Sunday.  
 Harry Hanson of Seattle arrived Monday for a visit with his parents, Mr. and Mrs. Henry Hanson, and other relatives.  
 Miss Oma Castle and Miss Bernice Randall of Moscow spent Saturday and Sunday with Oma's parents, Mr. and Mrs. Carl Erikson.  
 Miss Esther Clark returned to her school at Colton Monday, after spending the week-end with her parents, Mr. and Mrs. Grant Clark.  
 Mrs. Louella Durham of Spokane left Tuesday for her home after spending a few days with her niece, Mrs. W. M. Herman, and husband, Miss Rowena Hanson and Miss Wilma Burton, who are attending the U. of I., spent the week-end with Rowena's parents, Mr. and Mrs. Ira Hanson.  
 Mrs. John Klapp of Spokane, who has been spending a couple of months visiting in Lewiston, is visiting with Mr. and Mrs. Geo. Follett for a few days.  
 Misses Eva Hampton, Grace Jain, Wilma and Helen Casebolt, and Fred Dicus and Jesse Gray, students of the U. of I., spent the week-end with home folks.  
 Mr. and Mrs. Del. Rogers and family of Walla Walla left Monday for their home after a few days visit with relatives and friends. The Rogers are former Genesee residents.  
 Miss Kathryn McMahon, who is attending the Lewiston normal, and Miss Hanson of Orofino spent the week-end with Kathryn's grandparents, Mr. and Mrs. Con. Steltz.  
 Misses Alice Hanson and Gladys Johnson and Albert Anderson, Oscar Danielson and Norman Flammoe motored to Spokane Thursday to attend the Young People's Luther League convention.  
 Mrs. John Meyer returned home Saturday after a few days visit at Portland. She was accompanied home by her daughter, Miss Henrietta, who is doing nurse work at Marshfield, Oregon, and who will spend a month here with home folks.

**GENESEE AGAIN DEFEATS UNIONTOWN-COLTON TEAM**

Another scalp was added to the quite long string now hanging from the belts of the Genesee ball-tossers, who again defeated the strong Uniontown-Colton team last Sunday on the home lot by a score of 8-5.  
 The game was clean throughout and the absence of real "crabbing" was quite noticeable—entirely different from what is used to be in years gone by.  
 Louie Scharnhorst was in the box for Genesee and pitched the entire game, and was apparently as strong the last inning as he was the first and he carried the game in a way that showed he was master of the situation. The support was good and all the players are to be complimented on their playing.  
 The Uniontown-Colton boys showed themselves to be gentlemen in every way and good clean sports.  
 During the game each side scored 10 hits and Genesee made three errors while Uniontown-Colton made but one.  
 Next Sunday's game will be played on the local diamond when the strong Polatch team will come here to cross bats with the local aggregation. As everyone knows, Polatch has always had a splendid team and this year's turn-out is said to equal those of times gone. Come out and see.

**Miss Hardman Honored**

A very pretty shower was given in honor of Miss Lillian Hardman by the high school girls Wednesday evening at the Henry Hanson home.  
 The main feature of the evening was a mock wedding. Miss Oiler acted as bride, Florence Rader as groom, Miss Keeler as the minister, Ruby Roach mother of the bride, Theresa Miller as best man, Audrey Pleiman bridesmaid, Esther Hickman flower girl and Wilma English played the usual wedding march, "Here Comes the Bride!"  
 After the wedding ceremony was "performed" Miss Hardman was given many beautiful and useful gifts by those present and other friends.  
 At 6:30 a delicious luncheon was served, which was enjoyed by all.

**It's Possible**

## DISABLED VETERANS MAKE V. F. W. BUDDY POPPIES

Raymond Towle and William Andrews, disabled ex-service men, patients in U. S. Veterans Hospital No. 81, making V. F. W. Buddy Poppies for 1926 poppy sale of Veterans of Foreign Wars.

"CARRYING ON." That is the keynote of the spirit in which, throughout the United States, disabled and needy ex-service men, crippled heroes of Chateau Thierry and the Argonne, and the Verdun, are working these days to make the thousands of scarlet Buddy Poppies for country-wide use in the sixth annual National Poppy Sale of the Veterans of Foreign Wars during the week of Memorial Day.

Many of the poppy makers who "carry on" so cheerfully are under hospital treatment. Among them are men who cannot be rehabilitated by the Veterans' Bureau because their disability was not contemplated by the War Risk and Vocational Training laws when passed and who are designated by the government as "non-feasible." To these men in particular the poppy making not only offers a means of livelihood which the majority, because of their condition, would be helpless to earn in their former occupations but in addition helps to renew their self-confidence and rebuild their morale.

Among the most active of the war-disabled workers are the patients in U. S. Veterans Hospital No. 81, who under the direction of the Occupational Therapy Department of the Hospital are actively doing their bit to put the Buddy Poppy quota "over the top." Other Buddy Poppies for the New York Sale are being made in specially equipped poppy-factory workrooms. In other states Buddy Poppies are similarly made.

## THE RUNNING SORE EAR

If a bug crawled into your ear would you plug it with cotton to get the bug out? Certainly not. Then why plug the running sore ear? It might be as all right if the cotton were removed as soon as it became soiled; but it is usually kept in the ear until it becomes a dirty plug that prevents the pus from running out. We often treat a boil the same way—after it has broken we apply a cotton which prevents it from "running."

Many seem to think that unless we plug the ears we will catch cold in them. That is as effective as locking the stable after the horse has been stolen.

Plainly, a running ear should be permitted to discharge as fast as the secretions gather. Nothing should interfere with the pus getting out, or it will well up in the ear tissues and soak back into the bones and ear cavities, where it will remain as in a sponge.

Sometimes we are indiscreet enough to pour sweet-oil into the ear. In a short time the oil becomes rancid and forms a plug worse than cotton—one that can't be pulled out of the ear. Physicians do not now use gauze dressings in the ears as often as they formerly did because patients will not remove them when they should.

Nor should we interfere with the drainage of a running ear by lying on the other side, for this holds the pus in the ear as in a cup, forcing it into the cavities behind the ear, where it is difficult to remove.

One who has a running ear should lie with that ear open and lowered; nothing should be thrust into it; the secretions should be permitted to drain out as fast as they form—caught on a piece of sterile cloth; and if the canal from the ear to the nose is open, the patient should lie face down part of the time to enable the pus to drain through the nose while it can do so. If the running ear persists, send for the physician; for only a trained medical man can properly cleanse and treat a running sore ear.

## COLOR OF THE MOMENT NEEDED FOR MODELS

Captain H. Ledyard Towle, color expert, in his studio.

With the general dependence of the automobile engine in any of the various price classes, and the continued effort toward an appearance of speed and grace in body lines, there remains little to improve upon, in a radical way, in the present day motor car—except their exterior and interior finish, says Capt. H. Ledyard Towle, Duco color expert. The gradual addition of dash clocks, cigar lighters, smoking and vanity sets, to the normal interior equipment of the "large production" sedan or touring car is simply a temporary solution of a very important sales problem.

Color, inside and out, has been slowly but surely creeping into the automobile industry—and the wise manufacturers to whom black or dark blue was once safe, sane and sensible, are now boldly stepping forward to leading positions in the new era of color harmonies.

Recent automobile salons throughout the country have added indications that the automobile can be made to take on the colors of the rainbow and yet remain dignified and beautiful.

Color with reference to the automobile and its sales appeal should be divided into three broad classes—its relation to the body lines of the car, its relation to the country-wide sales appeal, and its relation to the fashions and moods of the moment.

The juxtaposition of one color to another on a car is of the utmost importance. It may be desirable to

make the model appear longer or bigger all over, or very rich in appearance. To achieve any of these things is a problem and should be approached most carefully.

An analysis of the types of buyer for each particular model is also important. The sedan with its family appeal; the brougham for households which demand an additional touch of style; the coach for those who prefer a large enclosed car at less expense; the coupe for business, or as it of times the case, the young married couple's first car; the touring for the summer explorer and the family pick-up; and the roadster which has the appeal of dashing romance, a dash along moonlit roads—a dash of color at the country club.

"Of all the thousands of colors and tones which can be had, it is the color of the moment which should be used in planning the scheme for the new model. And how can this color be determined?"

By a close study of the fashions, the silks and other materials which come to the famous silk houses of the Donets Basin. As a result of this competition, a number of colorists in South Wales, Northeastern, and Scottish districts closed down.

The small and medium-sized carriers have been deprived of a large proportion to the employment offered by the coal trade, and the competition for the limited cargo carrying rates to decline to new postwar records, many being under the levels ruling in 1913.

Grain shipments to the United Kingdom have contributed even more than coal towards the severe depression. Early in the year the high price of American and Canadian grain

caused a check in European buying. This resulted in a downward movement of rates during the summer, and a considerable amount of tonnage sailed for the River Plate in anticipation of the grain season there. The harvest in Argentina proved smaller than in 1924, so that shippers held out for price advances, which Europe would not pay, so once again homeward rates suffered.

Australia has been the exception, however, as the Australian grain movement was handicapped. Some improvement occurred in other markets, such as Cuban sugar, and nitrates, but even here the surplus tonnage diverted from the River Plate tended to force rates down. Nearly all other homeward freights were dull for the most part, with gradual improvement toward the close of the year. Pit props and pit wood freights were exceedingly dull on account of the depressed coal trade. Oil shipments suffered as a result of increased tanker tonnage. The depressed state of the iron and steel trade caused a falling off in outward shipments, as did the depressed textile shipments.

As stated before, the future prospects for British shipping are problematical. A decided improvement in the grain trade of the country and a solution of the coal difficulties however will do much towards causing a rift in the cloud of uncertainty which at present overshadows the industry.

Idaho Jurist Is Urged For Federal Jurisdiction

WASHINGTON. — Representative Smith of Idaho asked President Coolidge to appoint Federal Judge Dietrich of Idaho to the Ninth Circuit Court of Appeals vacated by the retirement of Judge McCamant.

Thirty-five state agricultural experiment stations are now co-operating in an effort to find out what makes quality and palatability in meat. It was announced by the National Live Stock and Meat Board, which is sponsor of the national experimental work.

The study is termed one of the greatest projects of the sort ever undertaken. It also is being supported by the United States Department of Agriculture and the American Society of Animal Production.

Say, Bill, whenever I go to Spokane I never miss getting some of those handy meals at the Tray Tavern on Howard Street just north of Riverside Avenue.—Adv.

Marion Nixon Does Not Disdain To Indulge In Culinary Pastimes

APRIL 1, 1925, 312 vessels with a net tonnage of 393,062 were laid up. On July 1, 430 vessels aggregating 777,179 net tons were idle. To bring about this condition, certain factors operating adversely upon shipping caused the layup of homeward-bound vessels.

Outward freights from the United Kingdom depend more upon coal than any other commodity. During 1925, in fact, freights on outward coal and homeward grain have tended to react on each other more than ever before.

Such condition naturally reacts unfavorably on the freight market, and the early disruption of outward coal and homeward grain shipments caused a complete collapse by the middle of the year.

As stated before, the future prospects for British shipping are problematical. A decided improvement in the grain trade of the country and a solution of the coal difficulties however will do much towards causing a rift in the cloud of uncertainty which at present overshadows the industry.

CLASSIFIED

MALE HELP WANTED

WILL HOLLYWOOD give me a chance? Rent photo, personal description, Fredrick Paul, 1211 N. Harrison, Hollywood, Cal.

PET STOCK

RABBITS FOR SALE—Chinchilla, Blue Grey, Steel and Black Flemish Giant, Long Eared, White, Silver, Blue, White and French Silver. All from prize winning and pedigree stock. Write: Win-slow, 1810 9th Ave., S. E. Fuyallup, Wash.

HELP WANTED

LEARN the Barber Trade. Barbers are now in demand, and we can teach you how to cut and style hair. Small tuition fee. Call or write, MULLER BARBER COLLEGE, 223 Occidental Ave., Seattle, 1513 Pacific Ave., Tacoma.

REAL ESTATE

CUT-OVER and developed lands, 15 to 25 miles northeast Spokane, on paved highway; extra good soil, spring water, grow grain, vegetables, hay, fruits, feed, wood ranches. 100 to 200 acres, 10 years' timber; 6 per cent interest, free title. Write: W. L. Deak, 3, Elk, Wash.

MISCELLANEOUS

SUPERFINE hair, motes, warts, etc., removed electrically. Call: Guyton, 1541 1st Ave., Seattle, 1513 Pacific Ave., Tacoma.

CASH paid for dental gold, false teeth, discarded jewelry, diamonds, platinum and Magneto Parts. Mall, Florida Gold Refining Co., 51 W. Adams, Jacksonville, Fla.

MARRY MANY RICH PARTICULARS FREE. P. Morrison, L. 3023 W. Holden St., Seattle.

Salem, Oregon, Debaters Win From Salem, Mass.

High school debating teams of Salem, Mass., and Salem, Oregon, debated at Salem, Oregon, recently on the subject:

"Resolved that the child labor amendment as submitted by Congress should be ratified."

The Oregonians upheld the negative and were awarded the judges' votes by a 2 to 1 vote. The Massachusetts team was sent West in the interest of the tercentary celebration being held there this year.

Felix Isman tells an amusing story of the psychology of gamblers. Two men went to a gambling-house and played for some hours. When they left, one berated the other: "Why didn't you do as I told you? You wouldn't have lost."

"But," said the other, "you lost just as much as I did." "Yes, I did, but mine lasted longer than yours."—The Outlook.

Stop That Cough

with Boschee's Syrup—the old reliable family remedy that has been in use for 40 years. Loosens and brings up the phlegm and eases the dryness and irritation. At all druggists. 30c and 90c. If you cannot get it, write to G. C. GREEN, INC., Woodbury, N. J.

Because it is BEST

PERFECTION PAPER WALLBOARD. Break a sample of PERFECTION and you will find a perfect bond between the outside paper surfaces and the quarter-inch plaster coat on an important consideration.

Test it also for proof qualities and you'll understand its every increasing use.

Sample and further information gladly supplied by your local dealer, or the makers.

WESTERN WALLBOARD CO., 4500 9th Ave., Seattle.

Children Cry for

Fletcher's CASTORIA. Mother—Fletcher's Castoria is especially prepared to relieve infants in arms and children all ages of Constipation, Flatulency, Wind Colic and Diarrhea; allaying Feverishness arising therefrom, and, by regulating the Stomach and Bowels, aids the assimilation of Food; giving natural sleep.

To avoid imitations, always look for the signature of Dr. J. C. Fletcher. Absolutely Harmless—No Opium. Physicians everywhere recommend it.

THE GIRLIGIG

By DOUGLAS MACK

(Continued from Last Week) We got back home two games to the merry. Mac is so happy he lets the boys go to a picture show.

The second day we afe home—early in August—Blimbo is attracted by a little dame all lit up in lavender, and cherin' a play he made. She keeps it up, and so does Blimbo. It ain't long 'til he has slipped her a note.

That night two of the boys see the dame bein' towed up Euclid Avenue by Blimbo Jones like a rowboat fastened to a barge, Potts explained.

"Maybe he'll play even harder now," argues Mac. He did, too, for about a week. Every day that doll comes out to cheer. The first sign of trouble comes when Blimbo strikes out in the ninth against a second stringer.

The next day he misjudged a stray. Next innin' he tried to pilfer a bag and it was a mule. He runs like a truck in a low gear.

"What in blazes?" says Mac. "Loss of sleep," chimes in a half dozen wise guys. Blimbo becomes a center of interest.

"Lovestick or some natural trouble, he's sick," cut in O'Neil, who boards with Blimbo. "He ain't been right for three or four days." Blimbo comes to the dugout.

"Don't you wanta get into the muck?" May says. "I can't get away with it all the time," Blimbo comes back, peevish.

"He looks sick," Mac whappers to me. "That boob ain't eatin' or sleepin'." To heck with that dame.

Sunday O'Neil springs a bomb. "He's quit the boardin' house," he tells us.

"Eatin' lady-fingers with that blue-vein' ball club wrecker, I suppose," Mac wails.

The team begins to slump and keeps it up. Mac gets desperate. He sends me out to trail Blimbo and see what he is doin'.

Mac was right to a degree. Blimbo was eatin' with the dame, but he ain't eatin' lady-fingers—he ain't eatin' much of anything.

I laid awake all night tryin' to figure it out. Love—I thought of it again—made me eat more. I puts the fiddle up to Mac.

"Don't you see?" says Mac, wise. "He's soft for the dame, but when one finally overlooks his hip make-up he just goes batty. He's forgot he has an appetite."

"What'll we do?" I wants to know. "Follow them some more. Find out what you can."

"I thought you knew what the trouble is." "Follow 'em, I said!" hesses Mac. I obeyed. I sneaked into one of them places for females where they spell it 'shoppe', and gets the next booth to them.

"He ain't bother me anymore," tells the waiter when he has sneaked in with a dark spot on a plate that reminded me of chicken, "I am writin' a play and I want be alone."

Soon as the curtains is dropped, I am, too. To my knees, listenin'. There ain't no excitement for a time but a quiet splash, like a healthy man lapping thin soup. Finally it ceases.

"It's no use, Connie," I hear him plead, "I gotta eat. I'm starved. I want big steak."

"Listen, Jim"—I almost give myself away—"you don't want to spoil your color, you've made. Limit your calories, exercise a lot, and it don't take long to reduce. Your excess weight will leave faster after an other week. The Corrected Eating Course says so."

I tried hard not to collapse. "But my playin' is affected," the big boob mutters.

"That"—her ready answer chills me—"is to be expected. You are weakened temporarily. The course says it cannot be avoided. But that will soon pass away; you will return to normal."

Oh, Daddy, when in Seattle bring home some Bolids good bread and pastry. 1414 3rd Ave.—Adv.

WILLIAM PRIESS—RADIO INVENTOR

Shown above is William H. Priess, father of the reflex principle in America and his "straight edge receiver." Mr. Priess is an outstanding figure in the radio industry as a successful manufacturer but his greatest achievements have been as an inventor. He is shown installing a Ray-O-Vac battery.

same tube. Priess in his new straight nine circuit employs six stages of radio frequency amplification with a detector tube and two stages of audio frequency amplification. This feat of extensive amplification of radio frequency has been deemed almost impossible of attainment because of difficulty in balancing the additional stages of radio amplification so perfectly as to prevent undue oscillation and heterodyning.

The reflex principle is a creation of radio and audio frequency in the same tube. Priess in his new straight nine circuit employs six stages of radio frequency amplification with a detector tube and two stages of audio frequency amplification. This feat of extensive amplification of radio frequency has been deemed almost impossible of attainment because of difficulty in balancing the additional stages of radio amplification so perfectly as to prevent undue oscillation and heterodyning.

The newspapers recently told of something about Nickel Plate. Vanderbilt got excited over the "double break of rail," as he termed it. At that time limited trains were an experiment and it was understood the roads were all sick of them. But no road dared quit unless all did. At this point in the interview Sherman, according to his recent recital of the affair, said to Commodore Vanderbilt: "How about the limited trains, Mr. Vanderbilt—are you running them for the accommodation of the public?"

"The public be damned," he burst out, "we are running them because we have to."

Quick to see the news value of this startling statement, the reporters sent queries to prominent newspapers throughout the country.

"An awful roar there was the next day," Sherman said. "Vanderbilt promptly and emphatically denied the 'Public Be Dammed.' Various papers wired us and we were kept busy sticking to our story."

Moral: Be careful what you say to a reporter.—Thrift Magazine.

Report Shows Savings In Labor Department OLYMPIA—Pointing to the reversion of an unused balance of \$40,001.65 to the general fund from the appropriation for operation of the department of labor and industries last year as evidence that the department is reducing its operating expenses and predicting that reductions this year will reach 20 1/2 per cent below the last year of the prior administration, Claire Bowman, director, has submitted a financial statement to Governor Hartley, who made the figures public.

The reversion was made from the appropriation of \$325,000 allowed by the 1925 legislature for the conduct of the department for a single year, and is compared in Bowman's letter with an appropriation of \$234,212.50 per year by the 1923 legislature, for the succeeding two years. Bowman's statement does not show any reversion made by the department to the general fund at the end of the 1923-25 biennium.

Did you know that pork and beef were often receivable for taxes during early settlement of America?

THE management of a theater in a middle Western city has solved one of the problems of both the theater and the theatergoer.

Frequently in every theater managers come to the box offices for someone in the audience. Usually interrupt the performance long enough to make an announcement through the stage or wait until the curtain ends the act.

This enterprising Western theater owner, however, has adopted a plan which is better than either of the older methods. He has made an electrically illuminated and portable signboard and with this contrivance an attendant simply steps from the wings to the stage, flashes the message direct to the person wanted and that ends it.

The sign is made of a shallow square box with a stenciled face. The words "Wanted at the Office" are stencilled in the permanent, fixed portion of the face. The name of the person wanted can be stenciled quickly on a small slip of paper and the sign is then thrown directly into a box and in rear of the stenciled face.

The accompanying photograph shows the contrivance in action.

"DIAMOND DYES"

COLOR THINGS NEW

Just Dip to Tint or Boil to Dye

Each 15-cent package contains directions so simple any woman can tint soft, delicate shades or dye rich, permanent colors in lingerie, silks, ribbons, skirts, waists, dresses, coats, stockings, sweaters, draperies, coverings, hangings—everything!

Buy Diamond Dyes—no other kind—and tell your druggist whether the material you wish to color is wool or silk, or whether it is linen, cotton or mixed goods.

Appropriations for Harbors Announced

Allotment of \$1,328,000 to Washington and Oregon harbor and river improvements for the next fiscal year but out of appropriations made by the war department bill has been announced by Secretary of War Davis.

The Oregon allotments are as follows: Coos Bay, \$545,000; Columbia and lower Willamette rivers below Portland and Vancouver, \$300,000; Tillamook Bay and bay, \$135,000; Yaquina and harbor, \$54,000; Coquille River, \$8,000; Coos River, \$2,000; Siuslaw River, \$25,000; Snake River, \$1,000; Clatskanie River, \$5,000; Willamette River above Portland and Yamhill River, \$21,000.

Allotments for the state of Washington were: Seattle harbor, \$20,000; Puget Sound and tributary waters, \$24,000; Grand Pacific and bar entrance, \$185,000; Willapa River and harbor, \$1,000, and Skamokawa Creek, \$2,000.

One of the most valuable compendiums of shipping information published in the United States is the Fireman's Fund Register, a copy of which was received at this office from Frank G. Taylor, manager of the North Pacific Coast branch of this concern.

This handy book lists the dimensions, time of building and all important information pertaining to all manner of vessels owned on the Pacific Coast of the United States.

Towage rates and compulsory pilotage regulations are also listed, as well as a complete description of the regulations governing traversing the Panama Canal. Another chapter is devoted to listing the largest carrying capacity of various vessels owned and operated on the Pacific Coast. Taylor announces that he is prepared to supply a copy of the Register to any one interested without charge.

Song Writer Gets Inspiration from Dead Husband for Melody

Dorothy Terris Declares Picture Put Words Into Her Head

New York City—Inspiration which she declares came to her from her dead husband caused Dorothy Terris, famous song writer, recently to pick up again her life work of song writing, after she had been unable to compose a line since her husband's death a year and a half ago.

The song which Miss Terris has just completed is called "Sing Me Love's Lullaby." "Dear Old Girl," "Blue Bell" and many others.

"I Never Knew How Wonderful You Were Until I Lost You, Wonderful One" is sacred to me because I know in my own heart that Teddy will me to write it," Miss Terris explains. "My hope is that it will cause other women to realize what it means to have a companion who always understands and is always there to share joy or sorrow.

"Perhaps our work drew my husband and me closer together than we otherwise could have been, but since his death, it has continually seemed to me as if life were no longer worth living. I couldn't work and while I used

to turn out several songs a year, the best I could do was to finish up some themes already nearly completed before Teddy's illness.

"Then one Sunday morning before I started to church, I found myself looking at my husband's picture and whispering softly the title of the song I have just written. I am sure that he put it into my mind and I feel now that I can go on better with life, knowing that he is still watching over me."

Miss Terris wrote "Wonderful One" as a tribute to her husband during his lifetime. Others of her songs are: "Three O'Clock in The Morning," "Love's Lady," "Moonlight Memories," "Just Like A Rose," "Hawaiian Lullaby," and "Southern Rose."

Watch Everett Experiment. Telephone engineers throughout the country will watch the Everett experiment, through telechronometers, of measured service, the Washington department of public works has learned. This is a theory among engineers that some form of metered service will eventually be adopted and the Everett experiment will go a long way toward directing new lines of research. In a smaller way other telephone interests are experimenting and all the patents on devices for measuring service are jealously guarded to protect what ever will prove to be the correct principle.

Insurance and Thrift. One way to judge of the growing standards of thrift in America is by insurance figures. The 52 leading companies, which hold 93 per cent of all funds of all legal reserve insurance institutions, have grown in resources in the last 14 years from \$1,164,492,000 to \$1,500,000,000—an amount equal to about \$100 for each inhabitant.

During the last year the increase was over one billion dollars. Of this fund 40 1/2 was invested in real estate mortgages in 1925.

Insurance loans on city property more than doubled during the last five years, reaching \$2,345,674,000 last October. Investments in farm loans at the same time totaled \$1,871,000,000 or more than twice that amount in six years before.—Thrift Magazine.

SENTINEL OF SAFETY AWARDS ANNOUNCED. First winners of the "Sentinels of Safety" bronze trophy to be awarded annually to mines and quarries exhibiting the smallest loss of time from accidents in proportion to the total time worked during the year, have been announced by the Commerce Department.

Secretary of Commerce Hoover, in congratulatory letters to the winners, visualized the economic benefits, both to producers and consumers of coal, ore and stone, from the nation-wide effort to prevent accidents.

The Upper Lehigh Mine, Upper Lehigh Pa., operated by the Hazelbrook Coal Company, was the winner in the anthracite group.

Number Six Mine of the United States Coal & Coke Company, at Gary, W. Va., won the bituminous group.

In the underground metal mining group, the zinc and lead mine of the New York Mining Company, at Picher, Okla., was adjudged the winner.

The Lower Gypsum Mine, United States Gypsum Company, Gypsum, Ohio, won in the group of underground mines producing nonmetallic minerals.

In the quarry and open pit mine group, the Security Quarry, North American Cement Corporation, Security, Mo., topped all others. Honorable mention went to the quarry operated by the city of Los Angeles Harbor Department on Catalina Island, Cal.

# Firestone TIRE DEALERS

## Serve You Better

### We Are Tire Specialists

Our experience and equipment help you get the most mileage, comfort and safety from tires.

Gum-Dipping—the only known method of insulating every fiber of every cord with rubber—gives the strongest construction possible. And the special Steam-Welding process makes Firestone tubes both leak-proof and long-wearing—further increasing the life of the tire.

The proof is demonstrated by the biggest taxicab and bus fleets—by race champions and in everyday service of hundreds of thousands of motorists.

Let us see that your tires are properly mounted, inflated and cared for.

We repair your tires, when necessary, by the new and better Firestone method.

Equip your car with these famous Gum-Dipped Cords and Steam-Welded Tubes. *We will take your old tires in trade, giving you liberal allowance for unused mileage.*

#### We Also Sell and Service Oldfield Tires and Tubes

These well-known tires are built in the economical Firestone factories and carry the standard guarantee.

We offer them at these low prices.

#### IDAHO POTATOES TO HAVE STANDARD CONTAINERS

A communication from the Commissioner of Agriculture of the state of Idaho, states that he has called a meeting for the purpose of ascertaining if the growers and packers want a legal container for the grade and classification of farm products.

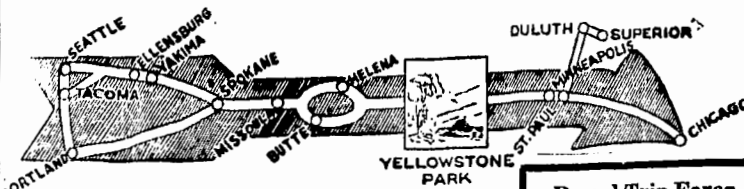

This action is being taken up to determine the quality, purity and price, along with the name of the growers; the name of the packer and nature of the content and for the purpose of preventing deception as to the content of the container.

This conference is called in response to requests from various sections of the state with relation to fixing of a recognized container (legal) to be used in connection with the shipment of Idaho potatoes of the higher grade.

Idaho potatoes have an enviable position in all markets where they are known and it is believed that the higher grade produced should be shipped in a container which of itself would be a trademark of quality in whatever market it may be found. The reputation of the Idaho potato has been built up by dealers who have placed in the ordinary containers high grade products but it unfortunately is true that this situation has been taken advantage of and dealers have placed in the ordinary branded sacks potatoes that were of such a grade and quality as to reflect on the reputation of our product. Hence, in response to these requests and in order that these conditions may be corrected so that the high grade product going out of the state may be placed in a recognized legal package, in such a way that the reputation of the state will not be jeopardized, this conference is called for a general discussion by growers and dealers from all sections of the state.

Special problems that will come up for discussion are Idaho grades for both table and seed potatoes, brands

## HERMAN'S

#### A Lesson In Einstein

How does anyone know that there are only 12 men in the world who understand Professor Einstein's theory of relativity, unless he happens to be one of the 12? Even then we doubt it. The throng has the same right to claim complete understanding.

It is all so simple, Einstein says time, distance, size, etc. are measured as if at all, only in their relation to similar or like factors. Hence, intrinsically, there are no such things as time, distance, size, and the like.

There is, in fact, nothing new under the sun, but there are new ways of looking and thinking. Everyone knows that a marble is small compared with a football, and large compared with a grain of mustard seed; that an hour is short compared with a lifetime, and long when reckoned with the toothache. Even thought is relative.

Then comes the questions: Are marbles small or large? Are hours long or short? The answer is, they are

both and neither, they are "yes" and "no". It all depends on the point of view and the period of reckoning—the "relativity" of thought. Taken alone, without comparison with any other thing a marble is neither large nor small: it is just a marble, if it is anything.

The width of a lake or a river is difficult to judge with the eye because the sheer expanse of water gives no guideposts of measurement. Then we measure the distance across the lake and find that it is five miles "wide."

But is that wide or narrow? It is wide as some lakes go and narrow for others. Then is the lake wide or narrow? We don't know. Ask Einstein.

## Commencement Time

Graduation time is almost here again. The largest class in the history of the Genesee high school is preparing for its graduation program.

Each member of the class has friends who will no doubt desire to honor their achievement with suitable gifts.

We now have in stock a splendid line of gift goods suitable for the young man and young lady graduates.

For the young lady graduate we have just received a splendid assortment of new Rayon silk garments including bloomers, slips, silk vests, step-ins and silk hosiery. Also novelty handkerchiefs and puff boxes.

For the young man we have a splendid new line of ties, fancy socks, silk garters and other useful gifts.

Also new pumps and oxfords in our shoe department.

## "Quality"

Is the Key to Economy

In buying drugs and other drug store goods, you should bear in mind that quality is the true test of cheapness.

Inferior goods are dear at any price. We make quality the first consideration when we buy—and if you buy from us you may be sure of getting the purest, freshest and most potent drugs that the market affords.

We buy drug sundries and other goods just as carefully as we buy drugs.

LET US BE YOUR REGULAR DRUGGISTS

Corner Drug and Jewelry Store

### Another Installment

Sunday night this vicinity was visited by a gift from Jupiter Pluvius—rain having fallen for several hours.

These rains are usually referred to as worth a million dollars, we think this one probably even jumped over that mark and is worth at least a million and a half dollars. If Jup is only on the job again about the middle of June the farmers will be assured of a crop.

### Recruiting Officer Here

Captain Paul T. Hogge of the 4th Infantry Regiment was in town Tuesday. The Captain was trying to get recruits for the C.M.T.C. to be held at Fort George Wright at Spokane this next month. He told the news man while here that Arthur P. Meweno of the Genesee country had volunteered to serve Uncle Sam for a month, going from Moscow.

### A Big Egg

Mrs. Roy Sweet brought to the News office the other day an egg which she thought might cause the Kendrick Gazette to sit up and take notice—but not so, as the size was only 8 3/8 x 7 3/4 inches while the Gazette claims one 6 7/8 x 9 inches. Those "Flemish Giant" pullets over there are sure world-beaters, according to the Gazette, and at any rate.

### Return from California.

Mrs. Magee and daughter Margaret and Mrs. E. Bates returned from Los Angeles Friday, May 15, after spending the winter in California.

### Not Matters of Choice

Enforcement of law and obedience to law, by the very nature of our institutions, are not matters of choice in this republic, but the expression of a moral requirement of living in accordance with the truth. They are clothed with a spiritual significance in which is revealed the life or death of the American ideal of self-government.—Calvin Coolidge.

### Food and Needlework Sale

The Springs club's food and needlework sale will be held at the Hasfurther Hardware store on Saturday, May 29, commencing at 2 o'clock. 47-1

### ORONITE

If you had to sleep in a bed with mites, lice and bed bugs every night, would you feel like work after being chewed on all night. No you would not. If so why do you expect so much of the hens. Get a can of oronite; use it freely and make both you and the hens happy. No lice, more eggs, more money and less feed.  
Oronite house fly spray, I will guarantee to be the best on the market. It kills any place and they stay dead.

## Genesee High Graduates, of '26

Summit School Picnic (Contributed)  
Oh! What's more fun than a picnic with eats all on the ground, Bugs in the butter, ants in the cream, And the flies all buzzing around proper.  
They come on horses four by four, Until they reached the selected spot, Lo, and behold the butter all melted, And the Lemonade was boiling hot.  
The cups, they too were missing, The plates left behind,  
The big old gracie stirring spoon Was all that we could find  
Ashley our speaker ran around like a live haystack,  
He stubbed his toes over Chester and jumped over Rapphael's back.  
They thought they would celebrate proper,  
But the rain came pouring down.  
They all began to sputter and some began to frown.  
Where the rats had—had a time  
And this is where our story ends,  
Cause we can't find more words to rhyme.  
Composed by Summit School Picnickers.

Friday night the Seniors gathered in the opera house to say a farewell to the school year and the high school. Rev. Beach gave the Invocation and then in view of the fact that many of them will no doubt enter our University next year, Dean Crawford of the engineering faculty of the University of Idaho gave them a splendid talk on the value and the usefulness of an education and how a good many successful men gathered an education and never saw the inside doors of a university.

Mr. Moshitz, superintendent of the Genesee schools presented the class to the Board of Education who seemed to be well pleased with them for the effort they had made in making their education complete.  
Rev. Wolff presented the diploma, gave them a talk on the factor of the square deal. The class then parted never to meet again as students of the Genesee High school.  
The order of the program was as follows:  
Processional Duet by Bernice Nordby and Evelyn Johnson.  
Invocation by Rev. Beach.  
Salutatory by Cecelia Dwyer.  
Solo, "In the Garden of my Heart," by Miss Lillian Hardman.  
Address by Dean Crawford.  
Ladies Quartet "Only a Smile, J. S. Zamechinsky, Mrs. W. W. Burr, Mrs. Milton Rader, Miss Lillian Hardman, Mrs. Vern Beckman.  
Valedictory by Margaret Becker.  
Solo by Mrs. W. W. Burr.  
Presentation of Class to School Board by M. E. Moshitz.  
Presentation of Diplomas by Rev. Wolff.  
Benediction by Mr. Gash.

Death of Miss Florence Alber  
Florence Alber, daughter of John Alber passed away at her home, Sunday morning May 23, at 3:30 o'clock. Miss Alber has been ill for a period of two years, during which time she has been constantly confined to her bed. She was given the best of medical attention, but her condition grew steadily worse until Sunday when she passed away.

Florence Alber was born at Genesee, Idaho, Nov. 25, 1903. She attended the Genesee schools and graduated in 1923 from the Genesee High School, after which she attended the Lewiston State Normal School during 1923 and 1924.

Miss Alber is survived by her father John Alber, and two sisters Susan and Edna her mother having preceded her to the Great Beyond a few months ago. Here was a pleasing disposition, and was loved by all who knew her.

The funeral was held Tuesday morning at 9 o'clock in the St. Mary's Catholic Church, Father Schneider officiating.

The pallbearers were, Lawrence Kraut, Elwin Hasfurther, Pat Weber, Joe Bielenberg, Stanton Becker and Steve Kambitch.

Speed Limit on Lewiston Hill.  
According to the Kamiah Progress they have placed a speed limit on the Kamiah Hill Highway. This was done in accordance with an order of Commissioner Hall of the state Bureau of Highways. There are other grades affected by this ruling among them being the Lewiston Hill Highway. The new speed limit has been placed at 25 miles an hour and we will say that we don't think it makes any difference whether you are going up into the wild one and the one not so wild. One of the points that will be enforced is the keeping to the right around turns, this is to be as much of an offense as too fast driving.

The Progress further states that Idaho county has employed a special officer. We hope that the other counties will see fit to follow their lead.

## Summit School Picnic (Contributed)

Hardman-Vanderburg Wedding  
The Pi Sigma Rho house was the scene of a beautiful wedding at one o'clock Sunday, when Miss Lillian Hardman an alumna of Pi Sigma Rho, became the bride of Jack R. Vanderburg. The bride has been at Genesee for the past two years; the groom is of Moscow. The Reverend Paul Sprague officiated, using the Episcopalian service and a double-ring ceremony. The reception rooms were a profusion of flowers. An improvised altar made by banking the fireplace with lattice interwoven with pine roses and iris, was most effective.  
The bride party proceeded down the stairs, which was garlanded with flowers, under an archway of flower wreaths, held by two girls.  
After the ceremony the bride party was served at a delightfully appointed table. The other guests were served buffet style.  
Attending the bride were: Miss Lephia Decker, maid of honor; the bridesmaids, Doris Squibb, Inez Gensinger, Alice Waldrop, and Alice Stamm; little Betty Hatfield was the ringbearer. The best man was Emory Vanderburg, the groom's brother.  
Only the relatives and the intimate friends of the couple were included in the guest list. Those who were Mr. John Vanderburg, Mrs. M. and Mrs. Emory Vanderburg, Mrs. N. Williamson, Mrs. F. K. Bressler, Mr. Don Bressler, all of Genesee; Miss Evelyn Clifton of Seattle, Mill Lilliar Hedger of Spokane; Miss Ethel Anderson, Miss Beatrice Day, Mr. Charles Deal, and Mr. Louis Asker, all of Moscow.—Argranat (U. of I.)

## Good Enough For All

A fervent prayer of citizenship well might be, "God keep the schools of America American."  
As yet, notwithstanding insidious effort to promulgate peace propaganda in the public schools, they have remained distinctly and distinctively patriotic American.  
Peace essays, debates and peace culture are well enough, provided they do not tend to weaken the spirit of patriotism. But this spirit never will be weakened if the sentiments of an Iowa school miss of seventeen years become embodied in the consciousness of American youth. Her creed is good enough for all of us. Here it is:  
"I believe in the flag of the United States—the living emblem of our great republic.  
It symbolizes the freedom, equality, justice and humanity for which our forefathers sacrificed their lives and personal property.  
"I believe in that which shields us and will continue to do so until earth and time shall be no more.  
Here is pure patriotism, intelligent national understanding, faith in the all-inclusive symbolism of the national standard.  
It is a faith that should make and found the gravestones at the foundations of the Constitution.  
It is a ringing challenge to the bolshavism and the Bolshevism of America.  
It is the voice of America, speaking from the lips of American youth.  
It suggests a summons to the manhood of America, to flout and defy all the cohorts of internationalism.  
It proves that patriotism still rings true in the public schools of America. It is not the phrase of bombast or bluster, nor of militarism, but the fine, free, confident expression of confidence in and fidelity to all that America should mean to the millions who are sheltered under the protecting folds of its incomparable banner.

## Another Victory for Genesee

Genesee was again victorious in the ball game played here last Sunday. The game, instead of being the fast game that was predicted proved to be ragged in the extreme and a walk away for the Genesee boys and nearly ended in a footrace.  
Moscow seemed to be playing in hard luck all through the game and were unable to either field the ball or to hit it, the game ending a score of 17 to 5.

## Play Pullman Next

Next Sunday the local team will meet Buck Bailey and his gang on the home field. Both teams have lost but one game this year and it is hoped that they will have a successful term of school ended at the Pine Grove School last Thursday. A program and picnic dinner was enjoyed by all present.  
Mrs. Tom Johnson was delightfully surprised last Tuesday by the ladies of the community, when they arrived and showered her with many beautiful and useful gifts.

## Pine Grove News

C. H. Spurbeck and A. Butzjen made a business trip to Lewiston Saturday. Leo Miller's visited at Fred Braiders' Sunday evening.  
Mrs. Wm. Freeburn and children spent Sunday at Spurbeck's.  
Miss Sweeney and Jack Gehrke picnicked at Hugo Gehrke's Sunday.  
Mr. Wm. Freeburn returned home from Forrest Monday.  
A successful term of school ended at the Pine Grove School last Thursday. A program and picnic dinner was enjoyed by all present.  
Mrs. Tom Johnson was delightfully surprised last Tuesday by the ladies of the community, when they arrived and showered her with many beautiful and useful gifts.

## War Insurance

The Senate has passed a bill to extend for six months after next July 2nd, the time for the conversion of war risk insurance policies, and to authorize a new converted five year level premium term policy.

## Observe Memorial Day Sunday

While Monday has been officially declared Memorial Day, the local Post of the American Legion will decorate the graves of Veterans of all wars, on Sunday, May 30.  
On account of rain last Sunday we were unable to do our bit cleaning up the uncare for graves, so we will do it Sunday morning May 30. All Legion members and ex-service men please be at our hall at nine sharp, bring your tools with you.  
Every block we will again go to the cemetery to place wreaths and flags on all Veterans graves. This is a sacred duty passed on to us by the G. A. R., whose members are so few and also to honor our own comrades who have left us.  
Every Legion member and ex-service man in the community are urged to be on hand Sunday.  
The Campfire girls under the direction of Miss Ruth Martenson, will conduct the sale of poppies Saturday and Sunday.  
These poppies are made by the disabled soldiers in our own state hospital at Boise, so in buying them you are not only remembering the war heroes who have passed on but you are helping those who are suffering in the hospitals.  
—Eileenberg-Schooler Post No. 58.

## Gene Without a Trace

Seventy soldiers bonus claimants vanished without leaving a trace during the five years the state has been paying adjusted compensation to veterans of the World War, the bonus division reported to Auditor C. W. Clausen in a report which was finally closed last month.  
The claims were filed by Washington men but who at some stage of the correspondence with the auditor's office dropped out of sight. Letters sent asking the completion or correction of applications were unanswered; tracer letters sent by registered mail brought no response and efforts to locate the claimants through veteran organizations failed. Scarcely any trace of the seventy was lost though intermittently up to the time the office closed records were made to find the claimants.  
Then it was decided the men either decided they did not want the money or filed claims in other states. There is a definite adjustment of some sort in all other instances.  
This state (Washington) average about \$197, the highest sum paid being \$465 and the lowest \$15, the auditor's records show that one veteran put through a claim for 83 cents. This was all he had coming after settling the John Kluss home Thursday.  
What has all this to do with thrift? It is very much to do with it; be cause those who set out to practice thrift have already won half the battle against bad habits.  
There is no surer way of developing a system of life that is upbuilding and progressive than by practicing thrift. You are not doing anything that are tearing down your health. On the contrary you are spending your money, your time and your energies along lines that will be of the best to you.  
But these are practices that should not be just of the hour or of the day. They must be systematic, habitual and therefore permanent.  
The saving of one dollar in itself does not amount to so much. What really counts is the saving of one dollar regularly every month, every week or every day.  
It is the regularity of the practice not the amount involved that is helpful.  
Learn to cultivate thrift, not for the mere saving of money, but as a habit that shall stabilize your entire system of living.

## Leaves for Vacation

P. C. McCreary, publisher of the Genesee News and son, William along with their housekeeper, Mrs. Lena Coffman, left Saturday morning for Spokane to spend the week end. Mr. McCreary and William returned Sunday evening and left for the east Monday morning, via Lewiston, Walla Walla and Pendleton, from where they will go to Haynes, Oregon, to visit Hugh McCall former cashier of the First Bank of Genesee.  
They will go to Huntington, Oregon to visit a brother-in-law and from there to Salt Lake City, Denver and to Colorado Springs to see a brother. Their eastern route will include Kansas City, St. Louis and Chicago, where they have many relatives, who have not seen for many years.  
In the Balkans the mothers rally around to raise their boys to be soldiers.—Des Moines Register.

## Card of Thanks

We wish to thank our friends for the many kindnesses during the illness and at the death of our beloved sister and daughter.  
John Alber and Daughters.

## Memorial Day Proclamation

State of Idaho, Executive Department, Boise, Idaho  
America remembers heroic sacrifices and deeds of valor. By the designation of special anniversary days it is the custom of our Nation to commemorate the outstanding events of its history, or as a tribute to the memory of particular citizens who by their nobility and patriotism have upheld the honor and glory of their country.  
Among these days one of the most significant is May 30th, which is a day as an occasion for tangible remembrance of all the deceased soldiers and sailors of the United States who gave their lives in the service of this country.  
Combining memories of the past with hopes for the future, it is a day for grateful recollection as well as solemn dedication to patriotic ideals. Gratitude to those who gave all that this Nation might endure should bear with it the pledge to "carry on."  
This year the thirtieth of May occurs on Sunday and in such case the following day usually observed as the legal holiday.  
NOW, THEREFORE, I, C. C. Moore Governor of the State of Idaho, by authority vested in me by law, do hereby proclaim Monday, May thirtieth, nineteen hundred and twenty-six, and a holiday throughout the State of Idaho. I earnestly request and urge the people of this commonwealth to observe the day in the spirit for which it was established, by devoting the hours therefore to exercise and deeds that, befitting remembrance of those who have passed on from the earthly battle for preservation of home and country.  
Given under my hand and the Great Seal of the State of Idaho, this tenth day of May, in the year of our Lord one thousand nine hundred and twenty-six, and of the Independence of the United States of America the one hundred and fiftieth.  
C. C. MOORE, Governor.

## The Weather

North Idaho: The weather of the week was generally fair, except that it became somewhat unsettled during Thursday night and Friday when light rain fell. Temperatures were below normal much of the time. All grains, pastures, and garden truck made rapid growth following the rains of last week. Corn is coming up to a good stand in the early sections, but is growing slowly owing to the cold nights. Wheat continues to look good and promises a heavy crop and the same thing is true of all fruit trees and berries.  
Southwest Idaho: Seasonable weather obtained throughout the week. There was abundant sunshine and only scattered showers occurred. Vegetation made good growth and crop progress was generally satisfactory, particularly in the irrigated districts. Garden and truck crops are making a good recovery from frost damage. Alfalfa is growing nicely and will soon be ready for first cutting. In fact, harvest has begun in some early districts. Wheat is doing well. Range feed is abundant and cattle and sheep are in good condition. The commercial fruit crop continues very promising.  
Southeast Idaho: The weather was cool early in the week, but it warmed up later. Moderate to heavy rains were reported in scattered localities, but water in rivers and creeks is reported low. Winter wheat is doing well. Spring wheat, oats, and barley are doing well in the south, in the north they are just being planted. The same thing is true of potatoes. Alfalfa is making good growth. Fruit is reported not seriously damaged by frost of last week. The range is good to excellent.

## Gray Eagle News

J. C. Cameron and family were Genesee visitors on Monday afternoon. They spent Sunday afternoon and night with the Harms family.  
Frances Platt was a Tuesday afternoon visitor at Harms'.  
Grandma Wahl went to Thomas Ingle's on Tuesday.  
Sherman Wahl's went to Moscow on Tuesday afternoon.  
Miss Sloan visited at Fred Bershavs on Tuesday evening.  
Several folks from this community saw the big ball game in town on Sunday.  
Harley English, Thomas Wahl, Allison and Emmett Stubblied spent Saturday night at the Wahl cabin in the canyon.

**THE GENESEE NEWS**  
Genesee, Idaho

Engagement Announced  
The engagement of Miss Helen Casbolt and Dr. N. M. Leavitt was announced Friday evening, at the Pi Sigma Rho Sorority house of which Helen is a member. A delicious three-course dinner was served at 6:30. The favors were artistically made of blue crepe paper sacks, with a small black cat in each one, on a small piece of paper was written "The cat's out of the bag, and Helen and Doc are to be married the 20th of June."

**"Idiotical"**  
If we could come as near editing a paper as Will Rogers we would not have to ask anyone for the news. As it is you must tell the News or it is not news.  
Just among the average fellows that try to put a paper over, they can not see and hear every thing, so if you don't see your name in our columns' don't scold, we didn't know it, that's all.

When you buy tires from us you get everything any mail-order house can give-you plus SERVICE.  
**Morscheck Brothers**  
Genesee, Idaho

**The Albert Lea Kitchenkook**

The Kitchenkook is not an oil stove nor is it a gasoline stove in the usual sense and it should not be confused with ordinary oil or gasoline stoves for it is entirely different in construction and principle of operation; far superior in speed, cleanliness, safety and economy.  
The Kitchenkook is a gas stove. It places the convenience of city gas service at the disposal of every home no matter where it is located. It has all the desirable features of city gas with greater speed at lower operating cost.  
It makes and burns its own gas from gasoline, producing a clear blue flame free of smoke soot and odor, not only while the stove is new but permanently.

**Deer Seen Near Moscow**  
Two deer a buck and a doe, were seen seven and one half miles north of Moscow near the North and South highway, a few days ago by J. H. Haselme, farmer of the district and former highway commissioner.  
The two deer appeared in excellent condition, and came quite close to the road and were approximately three quarters of a mile from any timber. It is said that deer have been seen several times in this region. Several years back it will be remembered that one of the local sportsmen killed a deer on the old Church place more than 12 miles from any timber or mountains.

**Gone to Shelby**  
Mr. Henry Halvorson and Boyd Erikson left Wednesday for Shelby, Montana to look after business interests. Mrs. Halvorson and Angie Castle accompanied them as far as Moscow returning to Genesee Wednesday evening.

**Faculty of Genesee Schools for Next Year**  
For the next school year there will be few changes in the faculty, the following having been selected as instructors for 1928 and 1927.  
M. E. Mushitz as Supt. and Mathematics, Guy Wickes, science and athletics, Miss Ethel Anderson commercial instructor, Miss Ruth Wolff history, english and music, Miss Jessie Kester 7 & 8 grades, Miss Emma Scheltzle, 5 & 6, Miss Mary Weaver 3 & 4, Miss Violet Qualey, 1 & 2, and Mr. Tupper as instructor in manual training.

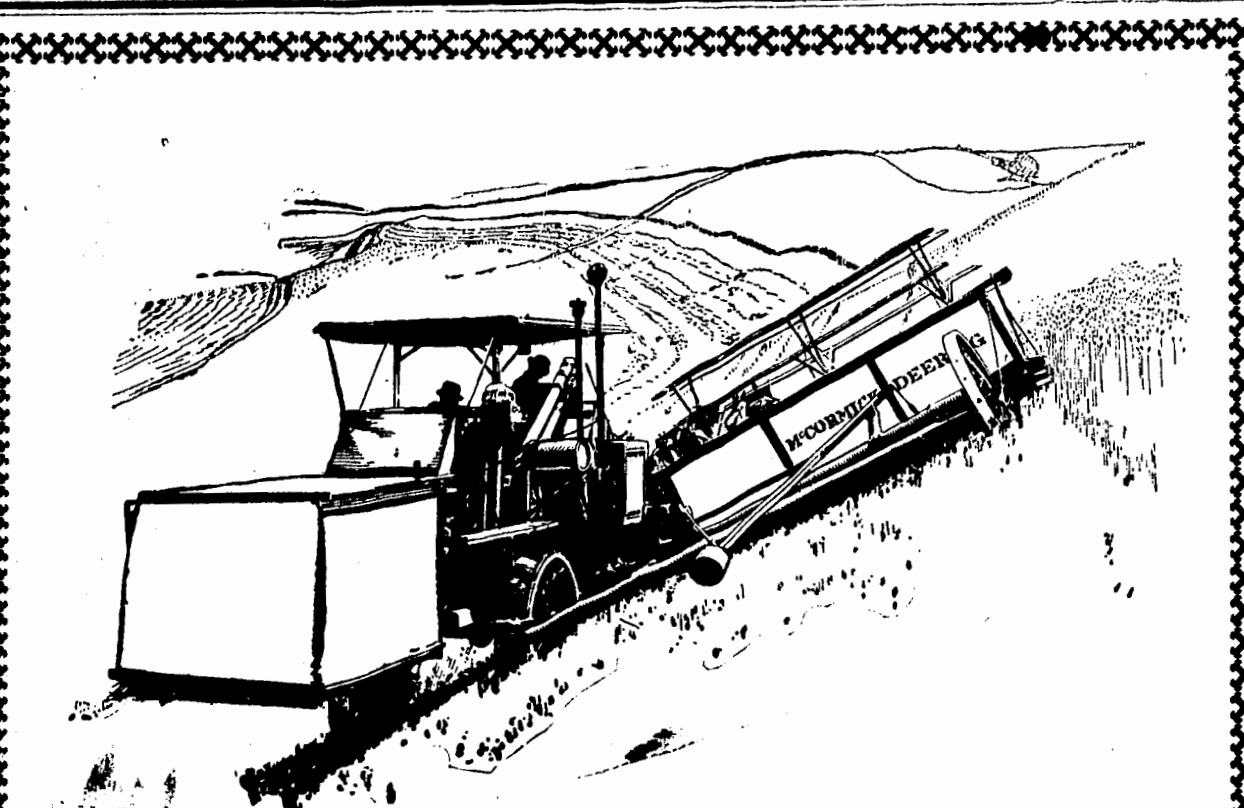

**She Meant Well**  
An old lady walked into the Judge's office.  
"Are you the judge of Reprobates?" she inquired.  
"I am the judge of probate," he replied with a smile.  
"Well, that's it, I expect," answered the old lady. "You see," she went on confidentially, "My husband detected and left several little infidels and I want to be their executioner." —Ex-Trade with advertisers.

**In Arkansas**  
An automobile tourist was stepping on the gas in a long, straight lane when suddenly a man appeared directly in front of his car. Applying the breaks he was just able to stop.  
"For heaven's sake, where did you come from?"  
Stranger: "I'm sorry—but do you know that's the fifth time I've fallen outta my cotton patch this morning."  
The House has modified its rules to lessen the power of the bloc heads. —Philadelphia Record.

**Card Club Entertained**  
The Card Club was delightfully entertained last Tuesday by Mrs. C. P. Whalen. Pinochle was played at five tables. The honors were awarded to Mrs. Carl Erikson and the consolation to Mrs. F. C. Shork.  
Besides the club members the invited guest were: Mrs. Elmer Vanouck, Mrs. Frank Horman, Mrs. Roy Evans, Mrs. James Magee, Mrs. T. H. Herman, Mrs. Gibson, Mrs. Carl Erikson, and Mrs. T. A. Feeney of Moscow.  
Mrs. V. A. Beckman has invited the club to meet at her home Tuesday, June 8.

**Fair Question**  
He: "What do you think of trail marriages?"  
She: "Not so bad—but who gets the radio set when the split-up comes?"

## Specially Built For Hillside Harvesting

1. Can be used with equal success on hillside or level fields.
2. A real 2-man machine. Bagging platform, centrally located, well balanced, men work close together.
3. Header platform is parallel to ground at all times. No grain skipped.
4. Operates equally well up hill or down.
5. Cylinder, 24" long, runs on self-aligning, end-bearing rollers.
6. Five square feet of grate surface beneath cylinder and main beater provides for immediate separation of 80 to 90 per cent of grain at the cylinder.
7. Wide separator (44") permits straw to spread thinly over straw racks for thorough separation.
8. Air blast of shoe fan is distributed evenly over entire area of shoe screen, whether machine is going up or down hill.
9. Reclining device in addition to shoe—similar in action to fanning mill. Cleans grain thoroughly.
10. Power operated leveling device. The operator merely moves a clutch lever—the power does the rest.
11. Screens are automatically leveled when going up and down hill.
12. All bearings supported on brackets attached to the frame not to sheet metal siding.
13. Auxiliary engine same as used in Harvester trucks and tractors. Ball bearing crankshaft.
14. All drive chains are short. Double roller chain and cut steel sprockets on cylinder drive.

WE NOW HAVE A SAMPLE MACHINE FOR DISPLAY. WE WILL BE GLAD TO SHOW YOU THE MANY ADVANTAGES YOU HAVE WITH A

**Birthday Surprise**  
The Syringa club members planned and carried out a very pleasant birthday surprise last week on May 19. Taking their husbands with them, they gathered at Mrs. Paul Heppner's to celebrate her birthday anniversary. The party gathered at 7 o'clock in the evening, and brought with them some well filled baskets and a dainty repast was served.

After the lunch, the members of the Syringas presented Mrs. P. Heppner two pieces of beautiful hand painted china. With best wishes for many happy returns of the day the guests departed.

The needle work and foodstuffs will commence at 2 o'clock Saturday at Hasfurther's Hardware Store.

**New Gas-pump Light**  
Saturday, the Genesee Motors added an improvement to their gasoline service when they had the W. W. P. Co. install a light on their new gasoline pump. This light is not alone for advertising purposes but aid in the matter of giving correct service after the sun has set.

U. of I. Commencement to be June 5 to 7  
The University and Moscow are planning to handle one of the largest number of people who ever attended the commencement exercises held at the U. of I.

Railroad fares have been reduced and with the highways in good condition they are expecting a record crowd.

The University is offering its 31st Annual Commencement on June 5 to 7.

Alumni reunions of four of the classes will be held, the classes of '01, '11, '16 and '21 holding them.

The Class Play "Homespun," will be presented by The Curtin the honorary dramatic fraternity on Saturday evening the 5th of June.

**Surprise Miss Oiler**  
Miss Minnie Oiler, who has been teaching in the Public Schools, was pleasantly surprised last Thursday evening. The teachers and the choir members of the Congregational church and several other guests gave her a shower at the home of Amelia Rader. The feature of the evening was a four-act play given by several of the guests present. The play dealt with married life and was very cleverly acted.

A dainty lunch of ice cream and cake was served.

Mr. and Mrs. Sam Lange, Mrs. Henry Hanson and Mrs. Will Borgen made a business trip to Ferdinand and Grangeville last Monday.

North-South Highway Open  
According to a statement by District Highway Engineer Oxley, the Idaho North and South highway is now open for automobile traffic. The highway is reported to be in very good condition except for short stretches that are under construction.—Kendrick Gazette.

"Where Quality Counts"

C. E. BOLLES, Prop. MOSCOW, IDAHO

**Grade School enjoy Picnics.**  
Last Friday, being the last day of this school year, the pupils of the eight grades spent the day picnicking. The seventh and eighth grades accompanied by their teacher, Mrs. Warner, picnicked at Cold Springs. The fifth and sixth grades with their teacher, Miss Keeler, spent the day at Sullivan's grove.

The first four grades with Miss Oiler and Miss Qualey and several of the pupils' mothers pleasantly spent the day at the Rock Quarry. Each and every one reported a splendid time on their picnics.

**Picnicked at Felton's Mill**  
The Genesee High school students spent a very pleasant day last Thursday at Felton's Mill, about five miles from Troy. The picnickers accompanied by Mr. Muhlitz and Mr. Wicks as chaperons, left Genesee at 9 o'clock that morning.

After reaching their destination most of their time was occupied in playing tag on the floating logs. By 12 o'clock everyone enjoyed a delicious picnic dinner. Some time during the afternoon or evening each person came slowly home.

**Eighth Grade Exercises**  
The graduating exercises of the 8th grade were held Thursday afternoon in the high school auditorium. The program was as follows:  
Song—America the Beautiful—by Eighth Grade.  
Class History—Eloise Emmett.  
Class Prophecy—Leila Castle.  
Song—Class.  
Address—Rev. Sprague.  
Class Will—Vance McCarty.  
Farewell Song.

**Twenty Years Ago**  
G. N. Hollister and Mrs. T. J. Keane have been down in Oregon this week in search of timber.  
A son was born to Mr and Mrs. Nels Flamoe Saturday Morning.  
Robt. McGregor and Will Burr expect to leave today for the Thunder Mountain mining district after a visit of several weeks in civilization.  
The Sanford Evans family has returned from Clarkston and are again residing on their farm south of town.

**Experience**  
Junior: "It's a great life if you don't weaken."  
Senior: "Yep—but if you weaken just a little—it's greater."

## R. C. BEACH CO.

LEWISTON, IDAHO

**IDAHO MAY CROP REPORT**  
Due to the open winter and favorable conditions this spring, only 2.5 per cent, or 11,550 acres, of Idaho's winter wheat acreage will not be harvested, according to the United States Department of Agriculture, division of crop and livestock estimates, Boise. With the exception of 1919, this is the smallest percentage winter-killed since 1915. In 1919, 2 per cent of the acreage was winter-killed; in 1925, 17.5 per cent, and the average for the past ten years is 6.3 per cent. The area remaining for harvest this year totals 466,000 acres. Last year 427,000 acres were harvested.

The growing crop had a May 1 condition of 97 per cent of normal, which is the highest since 1921, and compares with 81 per cent a year ago. Assuming average variations to prevail until harvest, a 97 per cent condition indicates a production of 9,551,000 bushels. Last year, an exceptional acre-yield of 27 bushels produced 10,962,000 bushels, on a smaller acreage. The ten-year average, 1916-25, harvested crop is 8,639,000 bushels.

The 3,000 acres of rye remaining for harvest indicate a production of 49,470 bushels, based on a condition of 97 per cent. Production in 1925 was 69,000 bushels, and the ten-year average, 116,000 bushels.

It is estimated that 672,030 tons of hay are on farms, carried over from last year's large crop of 3,537,000 tons. A year ago only 198,000 tons remained on farms. Hay requirements the past feeding season were comparatively light because of the mild winter.

This year's hay crop is starting out with very favorable prospects. Alfalfa and clover have made excellent growth and the first crop will be cut earlier than usual. Tame hay has a condition 98 per cent of normal, compared with 90 per cent a year ago, and a ten-year average of 94 per cent.

Fully 88 per cent of the mowing usually done by May 1 has been completed this year, against 83 per cent completed last May. Spring planting is 80 per cent completed, compared with 75 per cent completed up to May 1, 1925.

In the eleven western states the season is earlier than normal, which in practically all other states it is later.

Only 5.6 per cent of the nation's winter wheat acreage was winter-killed compared with the 10-year average abandonment of 13 per cent. The 37,005,000 acres remaining for harvest is 18.3 per cent more than the acreage harvested in 1925. A May 1 condition of 84 per cent is unusually good, since it was 77 a year ago, and 83.6 the 10-year average for May 1. The May 1 forecast indicates a 548,908,000-bushel crop. Production last year was 398,486,000 bushels, and the 10-year average is 557,687,000 bushels.

## Spring Tonic

"SPRING FEVER" is the term facetiously applied to that tired feeling which we all get when the first mild days succeed a long winter. It is a general letting-down of the energy which have been kept up by the cold. We feel lazy and unambitious, and our appetites flag.

Yet, during this period of readjustment of the human system to the change in temperature, it is essential to keep up the strength and vitality. The body needs, in particular, a fresh supply of iron. It becomes the problem of the housewife to serve such foods as will not only tempt the appetites of her family, but re-energize their systems.

Children, too, suffer from this general "letting down" in the early spring. Formerly, herb-tea and certain medicines were administered as "spring tonics," but nowadays it is considered more effective to eat foods rich in iron, than to dose with medicines. It is a general letting-down of the energy which have been kept up by the cold. We feel lazy and unambitious, and our appetites flag.

All green vegetables, such as spinach, cabbage (sauerkraut), asparagus, Brussels sprouts and lettuce are rich in iron and vitamins. So are carrots, green peas, and green beans. They are additionally valuable as system-cleaners. As most of these vegetables may be had, regardless of the season, by buying them in tins, we need not wait for our spring tonic. Rhubarb is another excellent tonic, because of its refreshing and appetizing "tang," also, may be purchased in cans, when the fresh is unavailable. It is particularly good for us in the springtime.

**St. Andrews-by-the-Sea** in sunny New Brunswick, is a paradise for yachtsmen, fishermen, golfers tennis enthusiasts, and even for those whose idea of a summer vacation is lazing about on a hotel veranda, eating and dancing and occasionally strolling through fragrant woods.

For golfers, there is a championship eighteen hole course at the Algonquin, a course of nine holes for beginners and ladies, and a charmingly situated casino where tea is served every afternoon to golfers and other guests.

Yachtsmen, too, are in their glory. The quaint old world village of St. Andrews hugs the shore of the St. Croix River, with Passamaquoddy Bay on the other side, bordered by estates whose cardinals and green lawns run down to the water's edge.

St. Andrews-by-the-Sea is easy access. Motoring up through Maine to New Brunswick, the roads are excellent and for those who have not the time or inclination to follow the winding shore roads, there are trains to McAdam where connection is made with the Canadian Pacific Railway. Many visitors choose to visit New Brunswick while the Algonquin is open from June 26 to September 7, crossing over the Bay of Fundy afterwards to take in Nova Scotia during apple harvesting.

Robert Gaskell of Chatham County has been using a milking machine for seven years. He did not like it at first but he soon found that he was using too much vacuum and that he was not keeping the machine clean.

One of the greatest drawbacks to the milking machine has been that the salesman, in trying to make a sale, has often tried to make the prospect think that practically no time at all is required in caring for the machine. So, if the sale is made, the machine is not given proper care and consequently does not give satisfaction.

Otto Tamm of King County has used one for about eight years. Every five months or so he determines the field inspection and for this reason it is necessary to use certified or other high grade seed that has been inspected by specialists in plant disease control. We are fast coming to the idea that 98 per cent of the work of certified potatoes is pathological rather than horticultural.

Virus diseases cause a decided reduction in yield which varies according to the type of disease. One characteristic which usually accompanies virus diseased tubers is a very fine varietal type. Washington potato growers should use care in buying extra type seed unless there is a certification back of it, for within that beautiful potato may be lurking the virus of disease. "Beauty is only skin deep" is true in this case, for behind that fine skin on the nice type potato usually lurks the virus causing these diseases.

Let us examine some results where good disease free seed is used as compared with seed that is full of the virus trouble. In 1921 the Extension Service established a demonstration in Walla Walla to compare the use of ordinary seed with disease free seed. In 1925, the end of the fifth year, the poor diseased seed had averaged 99 bushels per acre as compared with the yield of 205 sacks per acre where disease free seed was used. This is an increase of 113 per cent. Not only was the yield increased but the marketability of the potato was increased by the use of good seed.

In a two-year demonstration in the southeastern part of Pacific County, Washington, one of our cooperators rogued part of his field in 1925. This year a comparison was made in yield between the local seed from which the disease had not been removed, the local seed in which the disease had partly been removed and the yield with certified seed where practically all of the disease had been removed. From one thousand foot row the common seed produced 633 pounds as against 833 pounds, or an increase of 56 per cent, where the disease had partly been removed; and 1,236 pounds from certified seed, or an increase of 132 per cent, where most of the disease had been removed. As the amount of disease was decreased the percentage of marketable tubers increased.

Farmers are warned not to plant too many potatoes in 1926. The high price of 1925 is going to stimulate the planting of a large acreage in 1926, which usually results in extremely low prices due to over-production.

In view of results with good seed

## Milking Machines are Successful

By Don G. Magruder, Extension Dairy Specialist, Washington State College

Milking machines are past the experimental stage. Several different kinds have been used successfully in the state of Washington for eight or ten years. While many farmers, trying machines have discarded them, there are enough men who have used them successfully for from five to ten years to prove that they can be used successfully.

W. J. Knutson of Skagit County has used a milking machine for about ten years on a large herd and has never had any serious trouble with it. He noticed that the same unit must be used every milking on any certain cow. If one unit is used one time and another unit is used the next time, a cow will fall off in her milk.

Evidently there is a slight difference in the working of the units used on this farm and, since a cow is affected by any sudden change, this causes her to fall off in her milk. This seems a small matter and many men would have discarded the machine before they found out the requirements for operating it successfully.

H. E. Hall of Stevens County has used a milking machine successfully for some time. On this farm the milk from each cow is weighed at every milking and it was noticed that practically every cow increased in her production practically every milking for the first two weeks after the machine was started.

It was noted that the lands of the milker had not been in good condition for a while before the machine was started. But there are many men milking who are not good milkers and do not do as good work as a machine will do.

About the easiest money made on a farm is obtained by weighing the milk of each cow at every milking. It enables the owners to feed according to production and to detect approaching sickness in a cow quicker than in any other way. Then by these weights the annual production of the cow may be obtained.

And any one buying a milking machine should buy one which has single units so that one cow is milked into a pail. Then it is very easy to weigh the milk by pouring it from the pail into a bucket into which the cow is stripped before the milk is weighed.

E. W. Van Tassel of Chelan County has been using a milking machine on his herd of registered Ayrshires quite satisfactorily for two years. He uses the small type machine which has only one single unit. It cost him about \$250. He says that milking one cow at a time suits his condition very well because it gives the milker time to strip the cow, to weigh the milk, to carry the milk to the cooler and sometimes to attend to some small matter which needs attention.

## Spring Tonic

"SPRING FEVER" is the term facetiously applied to that tired feeling which we all get when the first mild days succeed a long winter. It is a general letting-down of the energy which have been kept up by the cold. We feel lazy and unambitious, and our appetites flag.

Yet, during this period of readjustment of the human system to the change in temperature, it is essential to keep up the strength and vitality. The body needs, in particular, a fresh supply of iron. It becomes the problem of the housewife to serve such foods as will not only tempt the appetites of her family, but re-energize their systems.

Children, too, suffer from this general "letting down" in the early spring. Formerly, herb-tea and certain medicines were administered as "spring tonics," but nowadays it is considered more effective to eat foods rich in iron, than to dose with medicines. It is a general letting-down of the energy which have been kept up by the cold. We feel lazy and unambitious, and our appetites flag.

All green vegetables, such as spinach, cabbage (sauerkraut), asparagus, Brussels sprouts and lettuce are rich in iron and vitamins. So are carrots, green peas, and green beans. They are additionally valuable as system-cleaners. As most of these vegetables may be had, regardless of the season, by buying them in tins, we need not wait for our spring tonic. Rhubarb is another excellent tonic, because of its refreshing and appetizing "tang," also, may be purchased in cans, when the fresh is unavailable. It is particularly good for us in the springtime.

**Humor Saves the Situation**

During the late World War, the officers of the Allied Armies maintained it was Humor that saved the soldiers from losing heart and giving up in despair. No matter how serious the situation, especially among the British and American troops, the doughboy would usually joke and make light of even terrible catastrophes. A typical humorous story is told of a poor fellow in the hospital, who had been badly wounded in the head. "No, madam," mumbled the soldier, "my foot and the bandages slipped up."

A sense of humor is a great gift. It not only helps the one who possesses it, but helps all who come under its influence. A great banquet was being given in London to a party of influential men; the conversation was interesting and the food seemed to take second place in the notice of the guests. English plum pudding was one of the courses. One of the diners, in earnest discussion over some question, inadvertently took quite a large mouthful of the pudding which was piping hot. With an agonized look around at the rest of the guests he dropped the offending pudding from his mouth on to his plate, then looked calmly round at the surprised company and said calmly, "Some fools would have swallowed that." The social blunder was turned into an opportunity for uproarious laughter, the guests thoroughly enjoying the diversion, and instead of being overcome with mortification the offender was the hero of the dinner party—all because he saw the humor in the episode—and so did the other guests—in his remark.

**What Kind of Potato Seed Are You Going to Plant?**

By George L. Zundel, Extension Specialist in Plant Diseases, State College of Washington

At this season of the year the question that is uppermost in the minds of Washington potato growers is, what kind of seed shall I plant, this year? Too frequently farmers fail to realize that it always pays to secure the best seed available even though they have to plant a smaller acreage.

In selecting seed the purchaser wants to know what constitutes good seed. Good potato seed is fairly true to type of the specific variety, somewhat smooth, not fully matured and free from fungus diseases on the exterior. The disease question is the most important one to consider.

If potatoes have been grown in rather clay soil and are therefore somewhat misshapen it will not necessarily exclude them from the class of good seed. If potatoes are raised in sand or other loose types of soil and have a good variety shape they are not necessarily good seed. Very much disease is present. While we do not want the fungus diseases, such as rhizoctonia and scab, the most of the virus diseases such as mosaic, leaf roll, spindle tube, etc. These diseases can only be determined by field inspection and for this reason it is necessary to use certified or other high grade seed that has been inspected by specialists in plant disease control. We are fast coming to the idea that 98 per cent of the work of certified potatoes is pathological rather than horticultural.

Virus diseases cause a decided reduction in yield which varies according to the type of disease. One characteristic which usually accompanies virus diseased tubers is a very fine varietal type. Washington potato growers should use care in buying extra type seed unless there is a certification back of it, for within that beautiful potato may be lurking the virus of disease. "Beauty is only skin deep" is true in this case, for behind that fine skin on the nice type potato usually lurks the virus causing these diseases.

Let us examine some results where good disease free seed is used as compared with seed that is full of the virus trouble. In 1921 the Extension Service established a demonstration in Walla Walla to compare the use of ordinary seed with disease free seed. In 1925, the end of the fifth year, the poor diseased seed had averaged 99 bushels per acre as compared with the yield of 205 sacks per acre where disease free seed was used. This is an increase of 113 per cent. Not only was the yield increased but the marketability of the potato was increased by the use of good seed.

In a two-year demonstration in the southeastern part of Pacific County, Washington, one of our cooperators rogued part of his field in 1925. This year a comparison was made in yield between the local seed from which the disease had not been removed, the local seed in which the disease had partly been removed and the yield with certified seed where practically all of the disease had been removed. From one thousand foot row the common seed produced 633 pounds as against 833 pounds, or an increase of 56 per cent, where the disease had partly been removed; and 1,236 pounds from certified seed, or an increase of 132 per cent, where most of the disease had been removed. As the amount of disease was decreased the percentage of marketable tubers increased.

Farmers are warned not to plant too many potatoes in 1926. The high price of 1925 is going to stimulate the planting of a large acreage in 1926, which usually results in extremely low prices due to over-production.

In view of results with good seed

## Plum Pudding Up To Date

IN England, the plum pudding is such an institution that no winter holiday is complete without it, and it is certainly a most acceptable finishing touch to a holiday dinner.

But alas, mixing a plum pudding is complicated, and its cooking takes from five to twenty-five hours. When the same fire that heated the house had been cooking plum pudding was not so great an extravagance of time, money and labor, but today, few housewives find it practical or pleasant to make. Fortunately we can keep the tradition by buying our pudding in the can, ready to heat and add hard sauce.

## Printing That Pleases

### Swimming Pool

The Swimming Pool opens to all comers June 1st. The Williamson Natatorium, Moscow Idaho will open the season under the same management as last year. A lot of improvements have been made which places the plunge amongst the top knockers of the U. S. Open daily from 10 to 9 P. M. except Mondays. The game modest prices as last year—Spectators Free. Come and enjoy your pool and ours—for Williamson built it for you. The Williamson Natatorium, West 6th St. Moscow, Idaho.

### Trade-In

Why go many of us trade our car in and take a great loss is not because the service is not in the car but it doesn't look good. From the lack of proper care and lack of materials. I have eighteen to twenty-four shammies and large move sponges \$1.00, both for \$2.50. Also pieced sponges at \$1.00. Don't forget your tickets; on every .50 purchase you get a Free Ticket on a Mandolin-Guitar.

"The Ancient Highway"  
New Serial and Novel  
By  
James Oliver Curwood  
A Romance of the Canadian North Woods

with  
**Jack Holt**  
Noah Berry, Greta Nilsen  
and other great artists

"The Ancient Highway" famous International-Comopolitan serial is James Oliver Curwood's greatest work. It is a typical example of a picture with a ready-made audience waiting for it. Public approval is already stamped on it, and it becomes another important event of the screen to every theatre. "The Ancient Highway," gets its name from the fact that much of the stirring adventure takes place on a famous road known as "the ancient highway." It will be directed by the man who made "North of 36."

Miss Bertha Gash left Monday for Spokane where she will visit a few days with friends.

### Mrs. W. A. Nixon Missing

Mrs. W. A. Nixon, who wandered away from her home, while suffering from a mental aberration, some time Friday night or early Saturday morning, it is believed to have drowned herself a note having been left her husband to the effect that she was going to the river.

Copy of the note, as submitted by Chief G. Wood, is as follows:  
"I am quitting—gone to the river. I can't live and that is why. Is Coming, Coming for Thee." Are better off without me. All gone—I am sorry.

The foregoing was found by Mr. Nixon about 8:30 yesterday morning after he cooked his breakfast and returned from feeding the chickens and doing other chores. The note was left on a built-in feature in the dining room where Mrs. Nixon had been sitting, sewing, early in the evening.

When Mr. Nixon discovered his wife had disappeared, he notified F. H. Oliver across the street, and searched the river bank from the Clarkston beach to the Lewiston-Clarkston interstate bridge but found no evidence that would lead them to believe that she had gone to the river at that point.

When they returned home Chief Wood was notified and he conducted a searching party all day but failed to find any clue on which to work.

Mr. Nixon believes his wife was wearing a brown house dress, a wide ring on the third finger of her left hand and a clasp ring, bearing the date of '91. She did not take her hat or any of her wraps. The glasses which she wore when sewing or reading were left on the table where she had been working.

The bed in which she usually slept indicated that someone had been lying on it during the night, although Mr. Nixon said his wife would have had to pass through his room, which he does not believe she did during the night or it would have awakened him.

She has not been in the best of health since Mr. Nixon underwent an operation several months ago, having labored under a severe nervous strain during the time he was ill, although she talked in the usual way up to the time Mr. Nixon retired, nothing of an unusual nature having been noticed.

She was a member of the P. E. O., Unity club, Presbyterian church, and the Presbyterian ladies' aid.

She has lived in Clarkston 10 years, having moved here from near Genesee, Idaho, in the highest esteem by all who know her and hopes are being entertained by her many friends that she will be found unharmed during the next day or two.

Mr. Nixon is offering a \$100 reward for any information that will lead to his wife's recovery.

Chief Wood stated last night that he expects to drag Snake river in the vicinity of the Clarkston beach today in hopes that the body will be recovered in case that she has drowned.

—Sunday Lewiston Tribune.

### Where the Teachers will spend their Vacation

Supt and Mrs. Mushitz will spend most of their summer vacation in Genesee.

Mr. Quiley left Monday morning for Cour d'Alone where he expects to play baseball with the Lake team.

Miss Ethel Anderson left for her home in Moscow Saturday morning. She expects to attend the U. of I. part of the summer.

Mrs. Warner who taught the seventh and eighth grades left Saturday for Parma, Idaho. Later she will go to Lincoln, Nebraska, where she expects to make her home with her mother.

Miss Jessie Keeler left Saturday for her home at Grangeville. En route she stopped at Lewiston for a short visit.

Miss Minnie Oiler left Saturday for Moscow where she will spend a few weeks with her parents.

Miss Violet Qualey will spend her vacation at the country home of her parents, east of town.

### Notice to Creditors

Estate of Anton Hanson, Deceased.

Notice is hereby given by the undersigned, executor of the estate of Anton Hanson, deceased, to the creditors of, and all persons having claims against the said deceased, to exhibit them with the necessary vouchers within four months after May 14, 1926, the first publication of this notice, to the said executor at the office of J. H. Forney, Moscow, the same being the place for the transaction of the business of said estate, in Latah county, State of Idaho.

HANS HANSON, Executor.

### Gray Eagle News

Miss Sloan left on Saturday for her home at Lewiston Orchard.

Mr. Oli Hagen and family from Troy visited at Peter Isaksons' on Sunday.

Thelma Michelson is staying with her sister Mrs. R. A. Gage.

Lula Springer and Wilfred Cameron visited at J. C. Cameron's home on Sunday.

Mrs. Roy Huffman and daughters Anabelle and Barbara visited with friends in the community last week.

Peter Isakson and family left here Tuesday for St. Maries where they will visit friends.

Robert Parks motored to Spokane on Thursday and returned Friday accompanied by his mother, Theodor.

The Pullman organization played what might be termed air-tight ball; and as a team, could be called no one hitters and fielders. It is the fastest ball team that Genesee has met this season.

### Potlatch Next

The Genesee team will go to Potlatch next Sunday to meet the potlatch organization. Potlatch was defeated on her home team's local field by a narrow margin. That ain't all. They played real football and always have had the reputation of being one of the fastest teams in the country. The boys need your support so be there and help them win.

### Christian Missionary Society

The society met at the home of Mrs. Harley Smith with Mrs. Harry Beach as leader. Roll call was answered by 16 members and 9 visitors present. Mrs. Harley Smith was elected delegate for the Inland Empire convention to be held in Spokane June 21.

The following officers were elected and installed: Mrs. N. E. Beach, president, Mrs. Sim Currin, vice president, Mrs. D. W. Aherin, secretary, Mrs. Smith as Treasurer, Mrs. D. Springer as his Secretary, Mrs. Ben M. S. Wilson, program, Mrs. E. Holingsworth, social com. Services were then held and the benediction pronounced, after which refreshments were served by the hostess assisted by Mrs. Brown.

The next meeting will be held with Mrs. Frank Qualey the second Tuesday in July.

### Care of Children

Somebody is always discovering the constant between the excellent care we take of our livestock and the neglect to which our children are subjected. Man's inhumanity to children compared with his tenderness toward hogs, and countless welfare workers mourn.

And well it may. When we think of all the thousand of little pigs tucked in between freshly ironed sheets every night by fond fathers, while little children are left to pick out a soft spot in the earth to lie upon, it almost makes us weep too. And the mothers—you can fairly see them standing over the hot stove preparing savory ham and eggs, hot cakes and doughnuts and cookies of the little calves and colts, while their own offspring are turned out to graze the green from the surface of a pasture. How they can do it passes comprehension, but they must. You can prevent it, by any uplifter who makes a specialty of children.

What the situation calls for is undoubtedly a corps of government inspectors who will go about telling people how to care for their young ones. Then probably we shall reach the millennium where it will be the hogs and cattle who are subjected to the torture of reading, writing spelling, arithmetic and geography while the little children are stuffed with corn and hustled off to the packing houses when they are ripe and the market is right. And when our horse breaks his leg we'll send him to a hospital, but if the same thing happens to the baby we'll shoot the darling— which to do forty-eight weeks more or less which to do your Christmas shopping.

### Night Life in New York

When John Bentley failed both in making money in New York and in winning Sally, the girl of his heart, he went west, made a fortune, and married somebody else. He retains a grudge against New York, however, and has always forbidden his son Ronald to ever go there. Ronald therefore, is useless in business and is continually pausing in the old home town red. After Ronald has an escapade with a one-night-stand actress named Carrie, old Bentley decides that the only cure for the boy is to give him a firming at Broadway. So he gets Sally's husband, Mr. Workman, to give his son a job and to see that he gets into as much trouble as possible so that he quickly sickens of New York.

### Altar Society Entertained

The Altar Society spent a very pleasant afternoon last Tuesday at the home of Mrs. John Broemmeling. After a short business meeting the ladies' time was occupied in sewing. At 5 o'clock a delicious luncheon was served by the hostess.

The French government seems to be trying every plan possible to pay its debts except raising the money to do it.

### Pullman Wins

In a closely contested game of baseball Pullman won the second game of the season which Genesee has lost. Garfield having won the first time Genesee was defeated. The game was intensely exciting from the first to the last as it might have been easily either sides ball game until after the last half of the ninth inning. The Pullman boys were lucky in placing most of their hits where the fielders were not and it seemed like when Genesee hit the ball it went into Pullman's fielder's glove. One error was made that cost Genesee several scores: other than one no errors were made that cost the local boys much.

The Pullman organization played what might be termed air-tight ball; and as a team, could be called no one hitters and fielders. It is the fastest ball team that Genesee has met this season.

### Sunday School Convention

Delegates from the different Sunday Schools of Latah County held an all day session at the Congregational Church, Wednesday June 2. A large attendance in attendance, delegates being present from Moscow, Troy, Julianna, Kendrick Potlatch and other small communities. Very profitable and interesting meetings were held in the forenoon and afternoon. At noon a basket dinner was enjoyed.

Dean Ed Edge of the University of Idaho presided at the meetings. Talks were given by different delegates, the two main speakers were: Mr. A. M. Locker, Secretary of Christian Education and Mr. A. J. Mecke, Director of Religious Education.

The Congregational Church is very proud of their Sunday School. They rank third to the highest in the county having a large number of pupils. At 5 o'clock the meeting adjourned.

### Kendrick Loses to Genesee

Monday afternoon the local ball team met Kendrick here and defeated them to a score of 9 to 8.

It seemed like sort of a ragged baseball game from the start as in the first inning Kendrick ran in four scores and it sure looked as though they had the game on ice. However along in the middle of the game Genesee started out in scoring and did not quit until they had the game nearly clinched, and when Louis started to turning em loose down the old alley Kendrick discovered they had a hole in their bat, couldn't find em that's all.

An accident happened in the seventh by either one or no one knew what its consequences would be. Two of the players: Cecil Gray and Clyde Myer, both star infielders, were trying to field a very difficult ball, and were the same distance from it when they started, the coach was not heard by either one of them, and they ran in each other headlong. Cecil sustained two very bad cuts one above and below his left eye, several stitches were taken to close the wounds. At this time he is reported to be getting along quite well.

Clyde was less fortunate, sustaining a very bad cut on the chin and was knocked unconscious. Monday night he was still in a dazed condition and it was thought that possibly he might have an injury to the neck or spine. Clyde was taken to the hospital at Lewiston for a thorough examination and his many friends are all wishing the best for him, hoping that the doctors can set him on his feet again in a day or two.

### Additional Personal

Wesley Coover, of Bucoda, Wn. arrived Monday for an extended visit with his sister Mrs. Walter Miller.

Miss Lula Springer left Wednesday for Spokane, where she will visit her sister, Mrs. Frank Hastings.

Rosena Hanson, Fran Sullivan, Fredicus and Dick Bean all U. of I. students spent the Star Mirror of the F. E. Dicus home.

Miss Inez Mayer and Zilda Lambert returned Thursday after spending several days the Frank Lambert home.

Mr. Schick of Moscow, former editor of the Star Mirror of that place was in town Wednesday, Mr. Schick has recently sold out his interest to M. Lamphere of Moscow.

Dr. F. H. Thurston of this place was in town packing his office equipment for shipment to Boise, Idaho. The Doctor is taking over another doctor's practice for some time at that place. Dr. Thurston has expressed himself as well pleased with the Genesee people and expects to return sometime in the future.

### Deligate to Eastern Stars

Mrs. Henry Craft leaves Saturday for Idaho Falls to attend the Grand Chapter of the order of the East-stars, as a delegate from the Genesee Chapter.

### New Chevrolet Arrive

Morschek Brothers, local Chevrolet dealers received four new Chevrolet trucks Tuesday. These trucks are all sold and for local delivery.

### Gone Fishing

Mr. and Mrs. Dale Lamphere and children and Mr. and Mrs. Cliff Olson and son, started for the North Fork of the Clearwater river Tuesday on a fishing trip. They expect to be home Friday.

If love wasn't blind the lover might see the dog before it was too late.

### Picnic

A picnic dinner was given at the home of Mr. and Mrs. Peter Dallesago Sunday. Those present brought well filled baskets, and a delicious dinner was served at one o'clock. Everyone enjoying a good time.

Those present were Mr. and Mrs. J. P. Mielson and Hazel and Mr. and Mrs. William Curtis of the Lewiston Orchard, Mr. W. A. Nixon and Grace of Clarkston, Mrs. Helphrey and Billy of Curlew, Wash., Mr. and Mrs. E. M. Becker and Stanton also Mr. and Mrs. Peter Dallesago and Emma and Minta.

THE FEMININE TOUCH

By LOWELL OTUS REESE

WE were a picturesque group I sup-
pose, a loting on Ab Linder's
porch, waiting for the stage to come
from Chuckawalla. We were far
removed from all womankind; and
when men lack the appraising eye of
the opposite sex they become lax in
their habits, careless of moral and
sartorial punctiliousness. But we
men of Stovellid did not realize this.
We were accustomed to ourselves as
we were.

"Wonder what's keepin' Poker
Terribone?" said Uncle Tommy
Saddler. He squinted toward the lower
end of the street where the Chuckawalla
stage road made a narrow break in
the low brush. "I hope he ain't got
careless and lost the mail bag."

"I hope he ain't lost the mail man-
ager of the hotel," said Daddy Burris.
"If we don't get a good manager, we'll
maybe have to sleep out in the
brush!"

Pachecho Dan was of the same
mind. "I'm curious to see what the
new manager will be like," he said.
"Isn't that right?" he said. "I ain't
got no objection to a man, if he
Barto got sick and had to quit; I
merely advances the hope that the
new one will leave us lose our hag-
gard look."

"And Sam Duck ain't any better!"
complained Uncle Tommy Saddler,
peevishly. "If we pick on a man,
I ain't got no objection to a man, if
Chink's got to poison us all!"

"Ain't it the truth?" wailed Ab
Linder. "Sam Duck's a good cook,
but it takes a regular man with
whiskers to manage a hotel in this
town. Besides, Sam Duck don't understand
he-man justice. I ain't got no sense
of humor. Why, when I tied the end
of his quose to a flatiron yesterday,
he grabbed his cleaver and chased me
clean out of town, chatterin' like a
monkey!"

"And the worst of it was
that I couldn't tell whether he was
cussin' me or recitin' the Chinese
multiplication table!"

"Here comes Poker Terribone,"
said Uncle Tommy Saddler. "But
what's the matter with him? Usually
he comes into a crackerin' his whip
and yellin' like a Pitue with the
stomach ache. Look at him—dry as
a stick and cautious, like he was afraid
of wakin' the baby!"

Hill-Billy Tunes Are Fad
In Tin Pan Alley

And Rose Wilder Lane,
Famous Writer of Nov-
els, Tells Why
New York City.—Hill-Billy
tunes are the new fashion in pop-
ular songs this year. Along Tin
Pan Alley the vogue is spread-
ing. While I was collecting the
material for my book, I spent a
great deal of time with the hill
folks of the Ozarks. I found
among them what I believe to be
the real folk music of America—the
Hill-Billy songs. These songs
go back to the time before jazz,
or even negro music, was heard
on this continent.
"Who's this girl you brought in to-
night, Poker?" asked Ab Linder.
"Who's this girl you brought in to-
night, Poker?" asked Ab Linder.
"Who's this girl you brought in to-
night, Poker?" asked Ab Linder.

New Rule for Ethyl
Gas Is Advocated

WASHINGTON.—The flivvers of
the land may again enjoy the anti-
knock benefits of ethyl gasoline, if
proper precautions are used in han-
dling the much discussed liquid.
Though chemists and physiologists
are still engaged in research on the
ethyl fluid and its effects, it has been
found that it is not necessarily a
menace to public health.

The committee appointed by the
surgeon general of the United States
Health Service to investigate the
harmful effects of ethyl gasoline has
prohibited the use of ethyl gasoline
as a motor fuel, provided that its dis-
tribution and use are controlled by
proper regulations.

The question of regulations has
been taken up by the Journal of In-
dustrial and Engineering Chemistry
and a set of provisions has been
drawn up for consideration at a meet-
ing of state and territorial health au-
thorities with the surgeon general
scheduled to take place this month.
They are proposed for adoption by
the different states to secure uniform-
ity of control.

The suggested regulations provide
for periodic physical examinations
and tests of all workers in the tetra
ethyl lead plants. The possibility of
cumulative lead poisoning by absorp-
tion through the skin or inhalation of
lead dust is to be excluded through
efficient ventilating systems. Ample
drainage facilities must be supplied
at all points where accidental spilling
is likely to occur. Since serious risk is
run by using ethyl gas for a cleaning
fluid, a sufficient quantity of it is to
be added to the ethyl fluid to prevent
its use for such purposes.

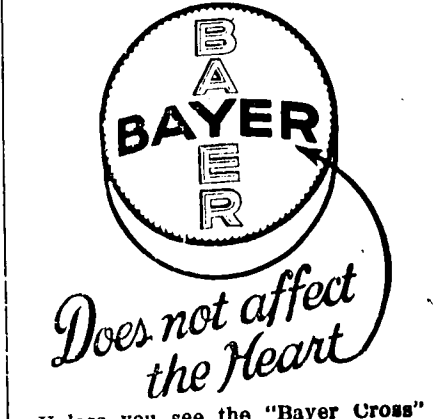

General education of the public is
heavily stressed with respect to the
facts that automobile exhaust gas is
dangerous and that the fumes from
gasoline are injurious.

Bankers Something More
Than Money Changers

In his address at the recent Mid-
Continent Conference in St. Louis,
James H. Perkins, president of the
Farmers' Loan and Trust Co., New
York, raised and answered a most
pertinent question in the following
manner:
"Who shall bankers make it
known that they are something more
than money changers? How can they
more effectively assert their influ-
ence?"

Relic of Early Logging
Days Given University

ABERDEEN.—The first donkey en-
gine used in logging operations on
Crazy Harbor has been presented to
the College of Forestry, University of
Washington, by the Polson Logging
Company, of which Alex Polson is
president. The donkey engine, a mere
mite in size when compared with
those in use today, was introduced
here in 1885, Mr. Polson said.

"The old engine may be a puny
thing today but it was considered a
great step forward when we bought
it from a California firm in 1885 and
used it in place of several of our
"there are at present no good grounds
prohibiting the use of ethyl gasoline
as a motor fuel, provided that its dis-
tribution and use are controlled by
proper regulations."

Petroleum
Decreasing production of Petroleum
and increased consumption is the big
problem that confronts the Federal
Oil Conservation Board in framing its
final report to the President and Con-
gress. The "President's Oil Board" has
been doing a weighty job in which it
has sought to digest the views of the
leading oil men of the country who
have expressed themselves carefully
and conservatively. Former Secretary
of State Charles Evans Hughes is
chief counsel for the American Petrol-
eum Institute and the leader of an
army of able lawyers employed by dif-
ferent oil interests. Many technical
men have been employed to advise the
Presidential Board. There also has
been a Naval Commission investigat-
ing petroleum conditions. The Fed-
eral Trade Commission has made re-
ports on the same subject. The ques-
tion of essential and non essential use
of petroleum and the effect that so-
called competitive conditions have
had on the oil and petroleum indus-
tries, along with the problems of possible
substitutions, is occasioning very ser-
ious consideration.

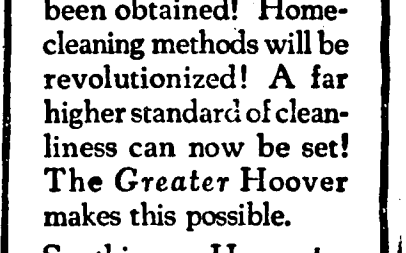

In considering petroleum the Gov-
ernment Boards and varied agencies
come first. The annual production in
the United States is estimated at 700,
000,000 barrels. The needs of the Navy
for petroleum is a vital factor of the
National defense, because most of the
United States battleships and other
naval craft are oil burners.

In the investigations that have been
made by the President's Board, and by
other public agencies, the leaders of the
petroleum producing and selling busi-
ness have cooperated helpfully to the
fullest possible extent in aiding the
Federal Government to find ways that
will help to conserve our great natural
oil resources.

New Method of Locomotion
Tuesday there were two laboring
men pulled thru town pulling their
supplies, blankets, camp outfit and
etc., on a cart. They had come from
Lewiston via Uniontown over the hill
road. Who knows what we will see
next.

Specially Built For
Hillside Harvesting

- 1. Can be used with equal success on hillside or
level fields.
2. A real 2-man machine. Bagging platform,
centrally located, well balanced, men work close
together.
3. Header platform is parallel to ground at all
times. No grain skipped.
4. Operates equally well up hill or down.
5. Cylinder, 24" long, runs on self aligning, en-
gine.
6. Five square feet of grate surface beneath
cylinder and main beater provides for immediate
separation of 80 to 90 per cent of grain at the cy-
linder.
7. Wide separator (44") permits straw to
spread thinly over straw racks for thorough sep-
aration.
8. Air blast of shoe fan is distributed evenly
over entire area of shoe screen, whether machine
is going up or down hill.
9. Recleaning device in addition to shoe—similar
in action to fanning mill. Cleans grain thoroughly.
10. Power operated leveling device. The operator
merely moves a clutch lever—the power does the
rest.
11. Screens are automatically leveled when going
up and down hill.
12. All bearings supported on brackets attached
to the frame not to sheet metal siding.
13. Auxiliary engine same as used in Harvester
trucks and tractors. Ball bearing crankshaft.
14. All drive chains are short. Double roller chain
and cut steel sprockets on cylinder driver.

Twenty Years Ago
During the week the promoters of the Army Opera house have inanced a loan thru Mat Kamibstich and work on the erection of the fine building adjoining the Conant building on the west will be commenced at once. At a meeting held on Wednesday night the contract for erection was awarded Geo Steltz.

accidents. The stage will be large and modern and so arranged that the large traveling troupes can play there.
The erection of this building will fill a long felt want in Genesee and the assurance of its now being built will be hailed with delight by all residents.

The National Wool Exchange Reporter says:
That the bottom of the wool market has been reached is generally conceded, and in face of the strong foreign markets there is no justification for the low offer made in the west at this time. For the welfare of the industry, growers who are financially able should keep their clips off the market at this time.

Mikado a Success
The comic opera, "The Mikado," given under the direction of Mrs. Antonie Hordemann, at the Opera House Friday night, was greatly enjoyed by all music lovers who heard it.
All who took part in the opera did so well that it is difficult to especially mention anyone as the star. The entertainment was conceded by all to far surpass anything of its kind ever attempted in Genesee.

Wheat transactions in the vicinity of Lewiston were heavy last week according to estimates given out by dealers in the various sections. Among the heavy sellers were: Astin Union, Genesee, Craigmont and Cottonwood according to the Cottonwood Chronicle.

Linger Longers Entertained
The Linger Longer Club was delightfully entertained on Wednesday, May 26, at the country home of Mrs. Ben Jain. The Ladies spent the afternoon socially and doing fancywork. At four thirty o'clock a dainty luncheon was served by the hostess.

Church Notices
St. John's Lutheran Church
Sunday school at 9:30 a. m.
English services will be held each Sunday morning at 10:30 o'clock, with the exception of the first Sunday of each month, when German services will be held at the usual hour.

Christian Church
Next Sunday is the regular all day meeting and community dinner followed by our business session and social hour.
The Bible school will observe annual children's day as a program of songs by the children and a children's sermon by the pastor, following communion. The offering will go to the foreign countries, where our hundreds of missionaries with their transforming native helpers bring help and healing of body and soul in Jesus name.

Morning worship, 11 o'clock.
Young People's meeting, 7 p. m.

Not a Fad
Buying Idaho products is not a fad and by this time should be out of the souvenir-hunting class. It is a strict necessity in order to build the states interally and intensify. The support of present industries is imperative before we may expect others to come into the state and spend their money in developing our great resources.

Why They Advertis.
Newspapers of the United States carried \$720,000,000 worth of advertising during the year 1925, according to William A. Thompson, director of the bureau of advertising of the American Newspaper Publishers' Association, who testified recently before the Federal Trade Commission in local advertising.

Boys Band Coming
When John Philip Sousa, world's greatest band leader, was in Omaha, he was greeted by Father Flanagan's Boys' Home band. He said the reception he received from these orphaned boys at the depot meant more to him than the receptions from royal personages on his many European tours.

backward and went over the grade. No one was seriously injured. Mr. Long received a cut across the nose and Miss Seeley slight cuts on the face. The car was not badly damaged, a broken window, windshield and front wheel, damaged fender and minor interior parts constituted the principal damage.

Further—Idaho's products, both grown and manufactured, are of the finest quality. We have no apologies to make for them. We are forced to apologize to the Idahoan who forgets the loyal to Idaho quality and Idaho intentions—Golden Idaho.

Wisdom is merely the reaction that follows contemplation of receipted bills.

must pay, or the advertisers would not be spending three-quarters of a billion dollars annually on it. The keen business leaders of America do not put money in losing ventures. It is doubly significant that two-thirds of this great sum, a half a billion dollars, went into the so-called local newspapers, while only one-third of the amount went in to the national publications.

These figures show something of the faith that the American business man has in the value of newspaper advertising. This fact of publicity

Mr. and Mrs. R. E. Emmett and children visited with relatives at Whitebird Ridge last Monday.
Mr. and Mrs. Gilbert Craywood and sons of Spokane, and Mr. and Mrs. Tony Halverson of Clarkston spent Sunday at the W. W. Burr home.
Mr. and Mrs. Mahlon Follett, Mr. and Mrs. V. A. Beckman and Mr. and Mrs. Will Burr picked at Winchester, Monday.
Grace Jain, Helen and Wilma Casbolt, and Fred Cann, who are attending the U. of I. spent the week-end with home folks.
Miss Lucille Gray returned to Moscow Tuesday after visiting a few days with Mr. and Mrs. Ray Edwards, and family.
Roscoe Riggs, a brother in law of J. M. Kane arrived here Tuesday for a few days visit with Mr. and Mrs. Kane.
Mrs. Chas. Whalen and little daughter, Monica, left last Monday for Spokane. They expect to be gone about a week.
Mr. and Mrs. Milton Rader and children left Monday morning for Walla Walla, where they will spend a week.
Misses Martha, Christine, Viola and Mr. Charles Loring all of Spokane, spent Sunday with relatives and friends.
Mr. and Mrs. C. L. Flomer and family of Walla Walla, left Monday after spending a few days at the Henry Flomer home.
Miss Alfrida Hampton returned home Friday and will spend the summer with home folks. She has been attending the Lewiston Normal.
Miss Mary Curwell who has been visiting at the Joe Robin home left last Wednesday. Miss Culwell is a sister of Mrs. Joe Robin.
Mrs. Edd London of Seattle was in Genesee for a short visit with friends last Tuesday. She is a former Genesee resident.
Mr. and Mrs. Neils Lande left Monday for the coast. They will visit Portland, Tacoma, Seattle and Vancouver and other coast points.
They expect to return in about two weeks.
Anna Winterfeldt returned to Clarkston Monday after a several days visit with friends.
Dick Nebedsieck and Reece Gibbs and sons left Monday for Grandeville, Idaho. From there they are going to hit the tall timber in search of specked beauties. They intend to be gone several days.
George Smylie returned home Thursday after attending school the past year in Colfax. He will be at home during the summer.
Mr. and Mrs. F. E. Diebs drove to Colfax Sunday. Mrs. Ira Hanson who has been visiting in Colfax returned home with them.
Mr. and Mrs. Grant Clark motored to Colton last Thursday evening to attend the graduation exercises at the St. Scholastica's Academy. Esther returned with them the same evening.
Mr. Arthur Scroggin and daughters, Misses Arts and Marie, of Spokane, returned to their home Monday evening after spending a few days with Mrs. F. K. Bressler.

"Where Quality Counts"
C. E. BOLLES, Propr. MOSCOW, IDAHO

Mr. and Mrs. Jack Barnes and little son Jack, of Wilbur Wash., visited a few days with Mrs. Barnes' parents, Mr. and Mrs. Leon Follett, returning to their home Monday.
Mr. and Mrs. Chas. Mochel and Fred Jones who is attending the U. of I. and a school chum Dick Bean, spent the week end with Mr. and Mrs. Mochel's parents, Mr. and Mrs. George Mochel.
Mr. and Mrs. Will Herman left Thursday for a month's visit in California. They expect to camp out being and returning. Enroute they will stop in Portland for a short visit with Mrs. Herman's brother.
Mr. and Mrs. T. H. Herman entertained the following guests for a few days: Mr. and Mrs. Jim Lake and family, Misses Ethel and Floy Hamel, Kate McFadden and Norman McFall. They all returned to their homes in Spokane Monday.
Rev. Wolff and Hugo Gehrke, returned Wednesday afternoon. They were attending the Lutheran Church Conference held at Endicott last week.
Mr. and Mrs. B. F. Koster and daughter, Bessie Alfred and Clara Koster of Moscow, Mrs. Nebelsieck, Verona, Viola, Mildred and Howard Rosenau were visitors at the Dick Scharnhorst home Sunday.
The Spryng Club
Held their last meeting at Mrs. Henry Flomer's home, as the president had appointed at a previous meeting. The business of the club was transacted after which a delicious luncheon was served by the hostess. The next meeting of the club will be at Mrs. Wm. Flomer's the coming Thursday.
Blue Bird Club
The Blue Bird Club met at Mrs. Albert Peterson's on Tuesday June 2. The time was spent socially and in hemming towels for the Childrens Homes at Lewiston. The luncheon was at 4:30. Besides the Club Members were present: Mrs. Leonard Rudd, Mrs. Cora Harding, Mrs. Fred Bradley, Mrs. Mildred Rader, and Mrs. Will Jenkins. The next meeting of the club will be at the home of Mrs. Jesse Borgens in two weeks.
Demand and Supply
The balance existing between demand and supply of labor reflects the general stability of the country's business. Where there is a job there is a man to take it, and where there is a worker unemployed, there is a place waiting for him, reports the United States employment service.

# Winter Plattsburg's Survey of Railroads

By CAPT. H. W. L. NIEMEYER  
Com. Res. Secretary Seattle Winter Plattsburg

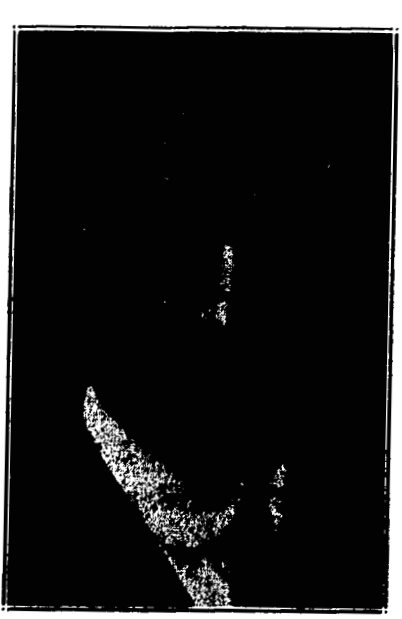

WINTER PLATTSBURG is not a war machine, but rather a national effort in national preparedness, conducted along sound lines of patriotic, economic and commercial research in which the military features, though prominent, is by no means of primary importance.

That the railroads of Puget Sound are primary elemental factors in the national defense and the commercial development of this area, no one can gainsay. The strength of the national defense can be no greater in its immediate powers, than the effectiveness of the transportation, manufacturing, commercial wholesaling, scientific building, structural and fabricating trades, the mining, banking and agricultural developments as well. Only in a military requirement of magnitude all of the foregoing must be so coordinated that they will function as one machine, capable of delivering a crushing, smashing blow that will insure defeat of the national enemy, be that enemy a foreign nation, a great river on a rampage, a wild and turbulent tidal wave, an earthquake or a treacherous, insidious enemy from within; so as to avoid needless economic waste.

In studying, then, the defensive and offensive problems of the Puget Sound we as a natural sequence become better acquainted with the tremendous power and resources of the Pacific Northwest, her present and future possibilities of expansion as a peaceful pursuit, thereby maintaining and further strengthening the position of Seattle and her sister cities on Puget Sound as the dominant factor in world trade on the Pacific Coast.

In the Winter Plattsburg of 1924-1925, the position of chief of rail transportation was ably filled by Mr. W. H. Olin, assistant general freight and passenger agent of the Union Pacific System; and in the 1925-1926 Plattsburg by the late I. B. Richards, assistant general superintendent and transportation of the Northern Pacific Railway Company, and M. G. Crawford, his executive officer. Among others whose names are available were Capt. Harry Y. Metcalf, C. E. Ferret, Ralph M. Smith, P. A. Griffin, F. Bader, J. B. Smith, N. A. Meyer, Frank Kergan, I. P. Iverson, F. B. Perceval, W. J. Smart, E. M. Sheahin, V. G. Spels, Leo B. Koyes, C. A. Aitman and John S. Andrews.

Four great transcontinental railroad systems have their terminals in Seattle and Tacoma, namely, Northern Pacific Railway Company, Great Northern Railway Company, Union Pacific Company, and St. Paul and Northern Pacific Company, and by traffic agreements, the Southern Pacific Railway Company, Canadian Pacific Railway Company and Canadian National Railway Company serving and connecting the land transportation for eighty-six transoceanic, coastwise and sound

MURRAY G. CRAWFORD  
Murray G. Crawford who was one of the leaders of the winter Plattsburg for 1925-26 was recently appointed Transportation of the Northern Pacific succeeding the late I. B. Richards. Mr. Crawford joined the Northern Pacific as a clerk at Tacoma in 1908. His duties consist of practically 28 years with N. P. in positions as Chief Car Distributor, Chief Clerk to Assistant Superintendent, Tacoma, and Traveling Car Service Agent at Tacoma.

to ascertain terminal and storage facilities that would try the capacity, without destroying the efficiency, to determine the extent of dead and rolling storage, the amount and kind of car equipment available, the track mileage on docks and in terminal yards, the amount of rolling storage at points within 150 miles of Seattle.

Next, the time required to move a given number of trains from the Chicago and St. Louis gateways, then obstacles in the form of destroyed bridges, necessitating shuttle service. In fact, all manner of disheartening difficulties were added to the normal traffic requirements.

A preliminary survey showed that in 1923 the ports of Puget Sound handled in imports and exports to and from Japan 76.65%, China 51.74%; that the Port of Seattle alone handled exports to the Orient of 71.8% of the total and of imports 84.5%. It was also found that in excess of 10% of the total foreign commerce of the United States was through the ports of the Pacific coast and that 49% of this stupendous tonnage was cleared through Puget Sound ports and that in money value and tonnage were exceeded only by New York and New Orleans. There was Alaska and the Atlantic coastwise trade, practically all of which required a rail movement of some kind, all amounting to a grand total of nearly twenty-seven million tons for the port of Seattle alone.

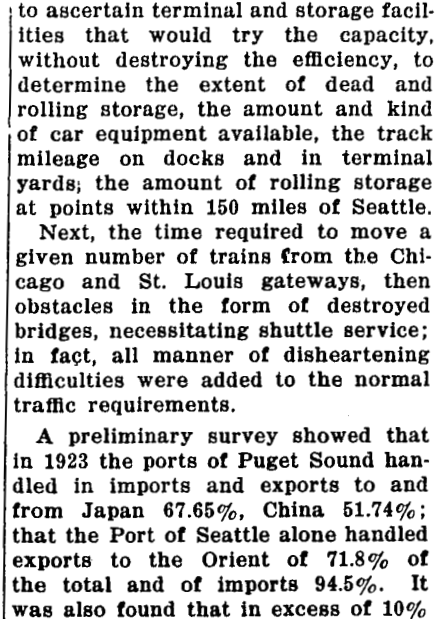

On Pier 41, we found approximately five miles of railroad track on the pier itself, that 3273 freight cars can be placed for loading or unloading on the several ocean piers, that the dead storage space will accommodate in excess of a half million tons and that the grain storage exceeds four million bushels, that there are over three hundred miles of track in the terminal yards of Seattle, Tacoma, Everett and Auburn, that thirteen thousand cars can be stored in these terminal yards without disrupting normal traffic, that the normal requirements in freight cars, both open and closed, amount to forty thousand in round numbers.

We further found that the rolling storage above normal requirements in these yards and within 150 miles of Seattle was 10,000 cars, or approximately four hundred thousand tons, so that with information at hand the planning board of the Plattsburg, headed by Nathan Eckstein, as assistant secretary of war, and his military and civilian advisors, there were evolved several interesting railroad movements.

Three of these will be presented, as follows: viz: A troop movement which required passenger equipment, between Spokane and Portland, was accomplished with 109 trains of 15 cars each and 15 trains daily for ten successive days. The daily movement commenced at Spokane at 12:01 a. m., and was completed at 8 a. m. in Seattle. In addition to the movement also brought out the fact that by substituting coaches for sleeping cars, it

ated, thereby effecting a considerable saving in time, equipment and expense, without serious inconvenience to the men and none to camp equipment and impediments, clearly demonstrating the value of planning a local problem by a group of men thoroughly acquainted with local conditions.

The second problem contemplated two expeditionary movements, one of 300,000 men and animals and so the hypothetical war play of the Seattle Winter Plattsburg made heavy demands upon the railroads, it having been decided that the Port of Seattle be designated as a primary port of embarkation, involving the movement of many thousands of men, animals and thousands of tons of impediments over and above the normal use of railroad facilities and without building any additions; it then became necessary

The above shows the huge cranes on a Port of Seattle lifting a car from a barge.

carried out in an orderly manner. Only as a military problem could rail transportation, co-ordinating with an excellent terminal organization, carry out an embarkation movement of the magnitude referred to, and then only at the biggest and best equipped port on the Pacific coast.

The Winter Plattsburg movement is sponsored by the Quartermaster General of the United States Army, the Quartermaster Corps being charged with the supply of food, clothing, shelter and equipment of the nation's armed forces, with their transportation by land and by sea, thus requiring business men of ability, its objective, then, becomes two-fold, that is, to train reserve officers in their duties and to bring about a better understanding of what national defense means, when measured in terms of commercial usage. To cause business men and reserve officers to plan in times of peace how best to employ the tremendous business facilities of the nation, so as to avoid waste of the nation's treasure as one of the most effective means of preserving peace and to at the same time be prepared when the need arises.

To the men of Seattle who made

the Winter Plattsburg movement a success by their thoughtful planning, study and solving of the problems, the vision of a greater Seattle can only be and is an inspiration.

**Clallam Co. Farmers Plan Weekly Luncheons**  
The first of the weekly farmer luncheons promoted by County Agent Holland at Port Angeles, proved a great success. Forty farmers sat down together and a pleasant and profitable hour was spent. These luncheons follow the example of city business men, where groups, in particular, gather together for a social time and to discuss some of the problems confronting their business.

As it is almost necessary for farmers to go into town at least once a week, this lunch is an excellent idea and a fine method for a certain day of each week gives the farmers an opportunity to arrange their trips to town for that day. Nothing will tend to bring the farmers closer together, or to solidify their interests better than will this weekly visiting around the luncheon table.

The crack train of the C. P. R., the Trans-Canada Limited, the only through passenger train from the Pacific to the Atlantic, running from Vancouver to Montreal, was put into service again this month.

What has become of the old-fashioned, misquoting gentleman who never took a vacation?

## Announce Cow Testing Results in Clallam Co.

In the Clallam County Cow-Testing Association in March 458 cows were tested. The 332 on the standard plan averaged 800 pounds milk and 36.6 pounds fat. Six herds averaged over 40 pounds. J. A. Davis leading with the impressive average of 1,172 pounds milk and 56.9 pounds fat. For three high spots the Clallam County, Jack Middleton and L. S. Farnie, Jas. Lotzgesell and Max Schmuck followed in order. High mature cow was a grade Jersey owned by Dick & Sullivan, with 1,550 pounds milk and 83.7 pounds fat. Next was J. A. Davis' Vivian with 1,392 pounds milk and 72.4 pounds fat, followed by C. E. Blake's Roanle with 52.2 pounds fat. J. A. Davis' Baldy led the 4-year-olds with 1,708 pounds milk and 76.4 pounds fat. Dolly in the same herd was third with 58.1 pounds fat. Jas. Lotzgesell having second cow with 68.8 pounds. The three high 2-year-olds were the Ocean, new and old gaffers have been going after the scalp of Col. Hoxey, who doesn't really amount to a test of the game as a golfer device, as Joe Swetzer, and who is a real opponent because one has to make one's best score in amateur champions married Canadian. Dan Cupid seems to be calmying for international matches. The Banff Golf Course, in Banff

The association is just starting its sixth consecutive year of operation, with about 650 cows in line. In the Jefferson County association 162 cows in 11 herds were tested with an average of 902 pounds milk and 37 pounds fat. Sixty-one cows produced over 40 pounds fat, two herds averaging over this mark. In the Clallam County association in April a total of 517 cows were tested of which 408 were on the standard plan. These averaged 818 pounds of milk and 37.5 pounds of fat with an average test of 4.6 per cent. grade Guernsey herd of 29 that averaged 1,088 pounds milk and 44.7 High herd was Max Schmuck's pounds fat. Second and third were Jack Middleton and James Lotzgesell with averages of 910 pounds milk, 43.7 pounds fat and 1.06 pounds milk, 42.1 pounds fat, respectively.

Max Schmuck also had high mature cow with a production of 1,530 pounds milk and 79.6 pounds fat. She is a grade Shorthorn and freshened in December. She has a 4-year-old record of 612 pounds fat. J. S. Mantle and F. P. Holland each had a cow making 70.1 pounds fat, giving them second and third. High 4-year-old was E. A. Schmuck's Marjorie that made 71.0 pounds fat from 1,650 pounds milk. Next in line were Hazel and Esther owned by Max Schmuck and O. O. Hardgrove, with 61.5 and 54.9 pounds fat. Their good Jerseys owned by Bob Gaskell, Ben Chambers and Frank Holland led the 3-year-olds with 66.2, 60.4 and 55.2 pounds fat and another of Mr. Holland's led the 2-year-olds with 46.5 pounds fat, followed by a pair of food Guerneys in the herds of E. A. Schmuck and Max Schmuck, with 45.6 and 45.5 pounds fat.

In the Jefferson County association 160 cows made the splendid average of 964 pounds milk and 39.6 pounds fat, with four of the ten herds over 40 pounds and only one under 39 pounds. High herd under the tester gain over the year before. A number of Port Townsend with 14 cows, averaging 1,014 pounds milk and 43 pounds fat.

C. A. ROBINSON, Tester.

**Whatcom mLeads in Egg Production in State**  
Whatcom is the banner egg producing county in Washington, and it now lays claim to producing 35 per cent of the egg crop of the state. It will, it is claimed by H. G. Smith, manager of the Bellingham branch of the cooperative egg producers' association, ship an average of a car of eggs a day during 1926, which will return to the county approximately \$1,700,000 to be divided among the producers. An additional \$100,000 will be realized from dressed poultry, so altogether the industry will be worth to the county nearly \$1,500,000. The Whatcom County Cooperative Hatchery, operating independently of the egg association, had this year hatched 1,600,000 baby chicks when it closed for the season on May 10th.

Nine Snohomish county berry fields have been studied rather closely this spring to determine the effect of the heavy freeze a year ago last winter and the following dry summer upon the production of fruit this year. The conclusion was reached that there will be about 75 to 80 per cent of a normal crop of Cutbush raspberries this year. Insect pests and diseases are apparently going to be prevalent this year.

## Livestock Does Not Pollute Watershed

Since the beginning of 1925 livestock has been excluded from the range composing the watershed of Mill Creek on the Umatilla National Forest, as this creek contributes to the water supply of the city of Walla Walla. This exclusion was made in compliance with the request of city officials, who feared that the water supply from the presence of livestock on the range. This decision was not acceptable to the stockmen who previously held ranging permits, so protests were filed. Walla Walla being in Washington, and the source of the water supply in Oregon, the problem was an interstate affair, with jurisdiction centered in the federal government, so upon the protest of the excluded stockmen, backed by national livestock organizations, the case was referred to the United States Public Health Service, which directed Dr. H. D. Honman, in charge of its Northwest division, to make an examination, and the following is taken from his report:

"1. Tests of the water supply for the year 1925, when livestock was excluded, differ but little from those of 1924 and 1923, when grazing was practiced, and when the water showed a high degree of purity.

"2. In the judgment of most sanitarians, domestic livestock does not transmit water-borne diseases to human beings, and the presence of livestock on the watershed is therefore not a menace to the health of the community.

"3. Unrestricted occupancy of the watershed by human beings creates the possibility of dangerous pollution, for which the exclusion of livestock is no remedy.

"4. Absolute safeguards against contamination of drinking water are provided only by filtration and chlorination plants, such as the city of Walla Walla is now operating.

Dr. Honman's decision is undoubtedly a victory for the rangemen and will no doubt lead to the reopening of this range to grazing, if the Walla Walla city authorities can be induced to release their contract with the United States department restraining the stockmen.

**Coeur d'Alene Babe Drowns in Lake**  
COEUR D'ALENE, Idaho.—Albert Campbell, age nineteen months old, son of Mr. and Mrs. Earl E. Campbell, was discovered in Coeur d'Alene lake here when he fell through a fence on the family homeboat at Chatolot, near here. The child was playing on the homeboat porch at the time.

**Legion Trophy Conceded To Idaho Department**  
INDIANAPOLIS.—The West Virginia Department of the American Legion recently conceded the Henry D. Lidsley membership trophy to the Idaho department after a controversy over its possession this year. The trophy is given each year to the state which on March 1, shows the largest percentage of membership gain over the year before. A number of cards from the Idaho department were found to have reached Indianapolis before midnight, February 28, the final day for filing, but were held up in delivery, Legion officials said. West Virginia regarded this as a sound reason for claiming the trophy when it was shown the disputed ballots would put Idaho ahead. Idaho's gain to March 1 was 140 per cent and West Virginia's 124.98.

**Hold Training Schools in Vegetable Cookery.**  
Training schools in vegetable cookery have been held for two days in Thurston County—at Olympia and Tenino. Demonstrations were given in the morning, followed by a vegetable dinner. A talk on the value of vegetables in the afternoon was followed by a round table discussion of the all-year-round garden. Vegetable recipes were given out to each club leader present, who carried the work to her club.

**Be a home-town booster.**

**Hank Stops a Fight.**  
I'LL TELL YOU WHAT WE'LL DO—WE'LL GET HIM INTO A FIGHT. GIVE HIM A GOOD BEATING! THAT'LL TAKE SOME OF THE SNOBISHNESS OUTTA HIM.

I THOUGHT UP THE IDEA SO YOU'LL HAFTA DO THE FIGHTIN'—YOU CAN'T EXPECT ME TO DO THAT. TOO WEE GO DOWN TO OUR HOUSE NOW AN FIND FLUFFY AN HAVE THIS THING OVER WITH—COME ON!

OH, ALL RIGHT. RUN AWAY THEN, YOU BIG COWARD! IF THAT'S THE WAY YOU FEEL ABOUT IT!

## The Royal and Ancient Game of Golf in Canada

More than 100,000 enthusiasts in Canada are playing golf, with a choice of some 400 private and 40 municipal or public links. In Winnipeg, for example, in addition to many first-class private courses, there are four municipal links run by the city. In Toronto, there are 100 links, and in Montreal, 150. In British Columbia, where golf is played nearly every day in the year, the Victoria Golf Club, overlooking Juan de Fuca Strait and the snow-capped Olympic Range in Washington, has many links which are as fine as those of the St. Lawrence Valley. In the Pacific Northwest, where golf is played nearly every day in the year, the Victoria Golf Club, overlooking Juan de Fuca Strait and the snow-capped Olympic Range in Washington, has many links which are as fine as those of the St. Lawrence Valley. In the Pacific Northwest, where golf is played nearly every day in the year, the Victoria Golf Club, overlooking Juan de Fuca Strait and the snow-capped Olympic Range in Washington, has many links which are as fine as those of the St. Lawrence Valley.

**\$12,544,907 Paid As Bonus to Soldiers**  
OLYMPIA.—Total of \$12,544,907 had been paid out as compensation to veterans in settlement of 57,739 claims under the soldiers' bonus act since the act became law April 30, at which time the veterans' compensation bureau, operating under State Auditor C. W. Clausen, wound up its business, and funds under appropriation ceased to be available for further claims.

**Now's the Time to Suet the Fly**  
By PROF. F. W. ATKESON, Head of Dairying, University of Idaho.  
Late in the year much publicity is always given to the "Suet the Fly" idea. It is people who realize that by destroying natural breeding places at this season and by killing the few flies that remain, they can do more effective sueting than it will be possible to do later in the summer. The idea would get much better results.

**Spinal Meningitis Hits Idaho Town**  
WALLACE, Idaho.—Spinal meningitis made its second appearance in Wallace, physicians reporting that two men are critically ill. Joe Melliss, fifty, a miner, is in a critical condition and little hope is held for his recovery. Milton Trederow, twenty-eight, is also seriously ill.

**Francis Citizens Plan Council**  
Plans are being made at Francis, for the organization of a community council to assist in carrying out a community program. Representatives of various organizations and unorganized interests are cooperating. With many organizations working along their own program lines and these overlapping to a considerable extent, this central organization is designed to coordinate the plans into a well rounded program.

## LONGVIEW CLAIMS PROPOSED BRIDGE WILL NOT BE A NAVIGATION MENACE

TREMENDOUS interest has been created by the proposal to build a bridge across the Columbia River at Longview, Wash., connecting that city with Rainier, Ore. The whole lower Columbia River valley is heartily in favor of the project, but determined resistance has been met by certain interests at Portland, Ore. Briefly, the towns of the lower valley believe the bridge will mean great development of that entire region. Portland contends a bridge will constitute a bar to navigation.

But the people of the lower valley claim Portland's opposition is due to the fact that it is afraid of development of the lower valley cities and Longview in particular. They say Portland has long dominated the entire region, and now fears a rival at Longview.

An application was made to Congress by W. D. Comer of Seattle and Wesley Vandercook of Longview for an enabling act for the bridge. Congress passed the act but added an amendment that the state highways of Washington and Oregon should consent. Washington approved, but Portland interests, so it is claimed, secured an act by the Oregon legislature which made it necessary for the Port of Portland commissioners to approve a bridge before the Oregon highway authorities could do so. The Portland port held no hearing until January, 1926, and then made recommendations which the bridge promoters claimed would impose impossible restrictions. The enabling act would expire shortly, so another bill was introduced in Congress which did not require permission of the two states.

The latest act is now before Congress. It carries requirement that the secretaries of war, commerce and agriculture, shall approve the bridge project. The senate bill, which has been approved and it is hoped the house committee will do so and that Congress will act favorably before it closes the present session.

The Longview promoters when they applied for the first enabling act submitted tentative plans which set the clearance vertically at 155 feet after consultation with shipping interests. Portland men who oppose any bridge can be high enough. The bridge promoters decline to set a definite height, pointing out that neither they nor Portland interests have anything to say about it. The war department, through the Corps of Engineers, is charged with setting the height and specifications of any bridge over a navigable stream, and they must first issue a permit before any bridge can be built.

Should the bridge be built it will have under tentative plans a horizontal clearance between the main piers of 750 feet, which pilots say is sufficient.

California and other west coast automobile travel enters largely into the bridge fight. There is now being constructed a highway called the Roosevelt Highway, up the coast from California. When built, tourists could follow that route up the coast to Seattle, Ore., and then connect with the Columbia River Highway, coming up the south bank of the Columbia River to Rainier, Ore., the Oregon terminus of the bridge, and then take the Pacific Highway on to Seattle and other northern cities. Those tourists from the north could take the same route on the southern trip. The travel would be diverted from Portland, and this forms a real part of Portland's protest. Tourists could

## WESLEY VANDERCOOK

go one way and return the other, at least.

Such a condition would mean great development at Longview, as it would certainly become an important hub of travel.

Another angle is the fear Portland has of the development of Longview as a port. Longview has the finest harbor to be found on the Columbia River, and is the natural center for a vast hinterland, with three transcontinental railroads passing through. An aggressive campaign for port development is now under way and it is believed it will not be long until Longview harbor will be a busy one, with general shipping constituting an important part of its business.

Under tentative plans the Longview bridge proper would be about 2800 feet long, with long approaches, and would cost in the neighborhood of \$3,000,000 with a reasonable requirement for a vast hinterland, with a toll bridge, with a recapture clause giving the public the right to purchase it after a reasonable length of time.

Longview advocates declare it is fully to presume that Longview would allow a bridge that would obstruct navigation, because not only its own newly built public dock, but that of the great Longview Harbor Company, is above the bridge site.

Captain B. L. Jones, president of the Bellingham Trust and Barge Company, was elected president of the Rotary Club of Bellingham last month for the 1925-26 term.

Say, Bill, whenever I go to Spokane I never miss getting some of those sandy meals at the Tray Tavern on Howard Street just north of Riverside Avenue.—Adv.

Longview has the finest harbor to be found on the Columbia River, and is the natural center for a vast hinterland, with three transcontinental railroads passing through. An aggressive campaign for port development is now under way and it is believed it will not be long until Longview harbor will be a busy one, with general shipping constituting an important part of its business.

Under tentative plans the Longview bridge proper would be about 2800 feet long, with long approaches, and would cost in the neighborhood of \$3,000,000 with a reasonable requirement for a vast hinterland, with a toll bridge, with a recapture clause giving the public the right to purchase it after a reasonable length of time.

Longview advocates declare it is fully to presume that Longview would allow a bridge that would obstruct navigation, because not only its own newly built public dock, but that of the great Longview Harbor Company, is above the bridge site.

Captain B. L. Jones, president of the Bellingham Trust and Barge Company, was elected president of the Rotary Club of Bellingham last month for the 1925-26 term.

Say, Bill, whenever I go to Spokane I never miss getting some of those sandy meals at the Tray Tavern on Howard Street just north of Riverside Avenue.—Adv.

**Twenty Years Ago**  
Tuesday of this week Fred Nagel accompanied by Will McMahon, Dave Sampson and Arthur Biram, left for the Salmon River Country with a bunch of cattle to put on the summer range. In attempting to cross the Clearwater on the Central Ferry they had quite an experience. When in mid stream the Ferryman saw a raft of logs approaching, and thinking that he could not clear it he attempted to turn around which resulted in the breaking of one of the cables. The boat drifted down the river a short ways and then swung to the bank. They succeeded in getting the cattle off without any loss and later crossed on the ferry opposite Lewiston.

Mr. and Mrs. Leon Follett and Faith were Moscow visitors Saturday and Sunday. Miller and Johann moved to the Volmer block this week. F. E. Dicus left for Boise Sunday. He expects to return next Sunday. The Springer family have leased the Beck residence in the northeast part of town and will occupy it at once. The American family will move to the house vacated by the former parties.

**Bootleg Milk**  
Bootleg milk, i. e. milk produced over the Canadian frontier and therefore cheaper than American farm milk produced under a multitude of rules and regulations designed to protect public health, has become a rather serious issue to our dairy farmers. Because of its low price, the wholesalers are able to pay an excessive transportation cost for the long haulage an yet sell it below the price of American milk.

The fact that the consumer has no guarantee as to the conditions under which it is produced also makes it a serious matter. For that reason Sen. Lenroo's bill to compel imported milk and cream to conform to the standards applied to American dairies is deserving of attention both from the economical and health standpoint.

**Felix Warren May Drive East**  
Felix Warren, veteran stage coach driver, and one of the really picturesque figures of the west today, winner of the prize for the best exhibition of horsemanship at the World's Fair in Chicago in 1893 and still able to handle the reins with the same skill as in days of yore, was the center of attraction in the hotel lobby Friday morning among the large number of visitors who stopped here for breakfast on their way to the meeting of The North Idaho chamber of commerce at Grangeville.

Mr. Warren, although 75 years old, is in the pink of condition, erect of form ruddy of countenance and, the ladies agree, handsome. During the short stay which the caravan made here Mr. Warren greeted scores of friends and was always the center of interest in his stories of the early days in Moscow and the other towns through which the caravan had passed.

It is interesting to know that plans are on foot in Spokane to send Mr. Warren on a transcontinental drive to the sequentennial exposition in Philadelphia this summer, the trip to

be made entirely by stage coach as a means of interesting the people in the west and calling attention to the great strides which have been made in transportation over a period of a few years. —Star Mirror.

## Glacier National Park Opens June 15

With the greatest advance reservations in his history, Glacier National Park, mountain playground in the Northern Montana Rockies, will open June 15, offering a wide variety of recreation to its visitors.

Glacier National Park, one of the more recently established of national parks, presents an unusual diversity of interest to the vacationist. The park, which covers 1500 square miles, contains, besides beautiful mountains and scenery, 250 wonderful lakes fed from 60 living glaciers, and most of its interesting features are readily accessible. It is unique in the complete provisions made for the pleasure of the sightseer there being every sort of facility for recreation.

The park contains many miles of splendid roads and no end of trails, which may be traversed by motor, saddle horse, or on foot, bringing its remotest regions within reach of the vacationist. And every comfort is provided for the traveler. Large modern hotels and chalets, which can accommodate many hundreds of people at one time, are splendidly located, and camping equipment is available. A large fleet of auto stages is at hand for those who wish to see the park features in this way. Fishing is one of the big attractions. The lakes and streams in the park constitute a fisherman's paradise.

Glacier National Park is one of the most easily reached of all national parks, being located directly on the main line of the Great Northern railway, its track skirting the southern boundary of the park for 56 miles.

**EXAMINER'S REPORT ON L. P. & N. FILED**  
Recommendation of C. E. Bolls, examiner for the denial of the petition of Longview which two trains each day between Seattle and Portland be detoured over the tracks of the Longview, Portland & Northern, west of the Cowitz river, through the new \$150,000 Longview station, has been given the Interstate Commerce Commission. This is directly opposite the recommendation made by the Washington Department of Public Works which held the hearing at the request of the I. C. C. It is also contrary to the report of Special Examiner Mayhew of Portland.

The case will come before the commission on transcript of proceedings and its final decision can be contrary to the examiner's recommendation. O. O. Calderhead, supervisor of transportation at Olympia, declares that in nearly one-half of the cases considered by the examiner the commission did not accept the recommendations as offered. The usual procedure is for the petitioners to file exceptions and otherwise develop the case for final consideration of the I. C. C. It is assumed the railroad and Longview officials will take further steps by request for another hearing before the commission. The three railroads concerned are the Northern Pacific, Great Northern and O. W. R. & N. Bolls has recommended that any authority granted should be conditioned upon appropriate modification of the commission's order in the Puget Sound-Portland joint passenger train service case.

The Ranger, Allman-Hubble Company tugboat at Aberdeen, made her first trial run last week since being equipped with a 135-horsepower Diesel engine and is said to have developed ten per cent more power. A similar engine is being installed on the tug Watson No. 4.

## Noted Clergymen Praise or Flay Kipling's Conception of Heaven

Has Judas been received into heaven? This is the question raised by Rudyard Kipling in his latest story, "The Gate," as a result of this famous English author has started a new controversy. Some of the country's most noted clergymen are praising Kipling's conception of the Divine mercy, while others, equally famous, are attacking it.

In "The Gate" appearing in the June number of McCall's Magazine, Kipling draws a moving and powerful picture of the Hereafter, as affected by the World War. He pictures a boundless charity and an utter compassion as ruling there. So merciful is his conception of Heaven that he finds a place there for Judas Iscariot himself.

Speaking of Kipling's conception, Dr. Newell, pastor of the First Baptist Church, says, in part: "The greatest living master of the English language, the most understanding of our present day writers, Rudyard Kipling has given us in 'The Gate' a most arresting, original, and what is more, consoling picture of the everlasting mercy of God in the life after death. 'Dante, the immortal Italian, placed Judas in the lowest hell. Kipling, the sane and kind-hearted Englishman, places him in heaven. The mystery of his present abode is hidden with only a hint of the truth. There is no limit to the spirit of forgiveness as Jesus understood and practiced it," says Dr. John Haynes Holmes, of the Community Church of New York City. "He Himself laid down the principle, in answer to the inquiry of one of his disciples, that we should forgive the sinner, not seven times, but seventy times seven. He applied this

Rudyard Kipling

Monsignor Richard Barry-Doyle, of the Archdiocese of Seattle, Catholic Church, and President of the Catholic Near East Relief Association, says: "There is no limit to the spirit of forgiveness as Jesus understood and practiced it," says Dr. John Haynes Holmes, of the Community Church of New York City. "He Himself laid down the principle, in answer to the inquiry of one of his disciples, that we should forgive the sinner, not seven times, but seventy times seven. He applied this

principle by praying on the cross for the forgiveness of those who had betrayed and slain Him, since Jesus never forgave anyone who had betrayed and slain Him, since by promising the thief, who has just completed, left behind him a sweeping denunciation of American houses. "I have seen many of your fine residences in America. To enter one is to enter all. They are invariably characterized by a gloomy monotony of wall surface which makes them all alike. Perhaps the Baron's criticism is well founded in so far as houses which were decorated several years ago are concerned. It is regrettable, however, that the Baron could not have visited some of the smarter American homes decorated recently. American people themselves have sensed the drabness and monotony of wall treatments which characterized the period of ultra simplicity in decorating so prevalent during the years immediately following the war. It is therefore only natural that leading American architects and decorators practically have abandoned the plain wall treatments and are introducing a colorful variety by means of the countless designs available to them in wallpapers and decorative fabrics. A range of decorative possibilities particularly in wallpapers is so limitless that the American housewife and decorator are reveling in their use."

"I do not believe that Judas will ever see Heaven," says Dr. Joseph Fort Newton, Rector of the Central Church of St. Paul, Philadelphia, Pa., says: "The suggestion which Kipling makes is very wonderful and has been a part of my religious faith for many years. Without it I should have very little heart to go ahead. Only a few men in every age have held that faith. Both Tenyson and Browning rejoiced in it, as did Canon Farrar. I have not been received in the West, but its major provisions are known. Two-thirds of a man's earnings up to a limit of \$25 a week is the maximum compensation with a seven-day waiting period. No payment is allowed for injuries less than one week. Payments for death benefit will be highest in the country and will run without limit of time. Temporary disability will be compensated for up to five years' maximum."

**Secretary Hoover to Open Radio Show**  
WASHINGTON—Secretary of Commerce Herbert Hoover has consented to officially open the Radio Show at Grand Central Palace, New York City, on September 10, on the invitation of leading manufacturers of radio sets, accessories and parts, who have organized the radio exhibition corporation to conduct this exposition.

## MILLIONS SPENT IN SAFETY WORK

Twenty years of organized accident prevention in the plants of the United States Steel Corporation has saved 46,000 men from death or serious injury, has averted accidents which would have disabled 322,000 other workmen, and has resulted in a very large saving of money, it is shown in the 1926 report of the company.

The report shows that the corporation has spent \$158,000,000 for safety, sanitation and welfare in the last fourteen years, the largest item being \$46,000,000 for the relief of injured employees and of the families of employees killed. From 1912 to 1926 the corporation spent \$31,700,000 for sanitation, \$28,000,000 for playgrounds, schools, clubs, gardens, visiting nurses, and similar activities, \$15,700,000 for accident prevention, \$13,000,000 in pensions, and \$22,000,000 for the employees' stock subscription plan.

In bringing the Steel Corporation's report to the attention of the members of the American Museum of Safety, Arthur Williams, president of the museum, wrote: "This is the most astounding record of accomplishment in accident prevention and health promotion that I have seen in the fifteen years of my association with the safety movement. The report is remarkable not only because of the magnitude of the expenditures shown, but because of its striking evidence of the extent to which industrial accidents may be prevented. When such industries as are represented by the plants of the United States Steel Corporation can show a reduction of more than 60 per cent in fatal and

other serious accidents' and a reduction of more than 80 per cent in the less serious but disabling accidents, there is no longer excuse for the failure of any industry to give its utmost attention to organized accident prevention.

"Industry and the nation are indebted to Judge Gary not only as the founder of the industrial safety movement but for his proof that expenditures for accident prevention and health promotion in industry are justified on economic as well as humanitarian grounds. When Judge Gary initiated the safety movement within the plants of the Steel Corporation in 1906 he promised that no reasonable request for funds to insure greater safety for the men in the mines and mills, or to better their working conditions, would ever be refused. That this promise has been faithfully kept is demonstrated by the record of an expenditure of more than \$7,000,000 for safety and sanitation in plant improvement in addition to \$111,000,000 for general welfare work in the Steel Corporation's properties."

Analyzing the causes of 300,000 accidents in the operations of the corporation over a long period, Charles L. Close, manager of the corporation's bureau of safety, sanitation and welfare, reports that hot metal, flue dust or flame—hazards distinctive in the steel industry—were responsible for less than five per cent of the total, and that only 4.9 per cent of the accidents were due to machinery. Nearly half of the total number of accidents were due to hand labor, the majority of which, the report says, cannot be controlled by mechanical safety devices or appliances.

The report indicates that it is now a common occurrence for large steel plants to operate for months without a single injury to a workman. It is shown, for instance, that the Joliet works of the Illinois Steel Company with an average employment of 2,300 men went 116 consecutive days without a single disabling accident. The Universal Portland Cement Company with an average of 3600 men operated two months without a disabling accident. The Edgar-Thompson works of the Carnegie Steel Company averaged 4,600 men, operated for 67 consecutive days without accident. The Duluth plant of the Steel Corporation, employing 500 men, came through the entire year without a single injury to a workman sufficient to cause the loss of a day's time.

Discussing expenditures for the comfort of employees the report points out that there are 66 restaurants in the corporation's plants where food may be obtained at cost 39 clubhouses employing 500 men, came through the entire year without a single injury to a workman sufficient to cause the loss of a day's time.

## LONGSHOREMAN LAW MAY PASS CONGRESS

News from Washington just as we go to press is that the maritime compensation bill has just been reported out of the committee on the floor of the house. This is one of the most important bills to be considered by Congress affecting maritime transportation. It is believed to be a forerunner of legislation for interstate railroad workers as well.

Its provisions are limited to longshoremen and harbor workers and exclude seamen. It provides compensation for all injured longshoremen and harbor workers and limits employers' liability in all cases of personal injury to employees. It does for the interstate worker of shore what the state compensation laws have done for the last decade for workers on shore in all hazardous industries.

The bill was introduced in both the house and senate and referred to committees who held hearings and have reported the bill out favorably with some modifications. Complete copies of the bill as recommended have not been received in the West, but its major provisions are known. Two-thirds of a man's earnings up to a limit of \$25 a week is the maximum compensation with a seven-day waiting period. No payment is allowed for injuries less than one week.

Payments for death benefit will be highest in the country and will run without limit of time. Temporary disability will be compensated for up to five years' maximum.

You can't expect a regular supply of standard size eggs from undernourished birds—and the feed formula you are laying now accurately determines your profits when your Pullets begin their work in the laying pen. Fisher's special Fishers' Growing Feed for every age of a profitable fowl, and at this time of year there's always a big demand for

**FISHER'S GROWING FEED AND FISHER'S DEVELOPING MASH**  
These two time-tested Feeds should be used until the Pullets are ready for the laying pen. The addition of God Liver Oil and Minerals to Fisher's Developing Mash makes it an unexcelled natural developer, and this is perfectly supplemented by the clean, wholesome, correctly proportioned grains of the Growing Feed.

**Fisher's FEEDS**  
from start to finish

These quality Feeds have now been brought to the last stage of efficiency known to modern feed specialists, by the addition of the necessary Minerals not sufficiently supplied by the grains.

## European Artist Condemns American Decision

ARON DOBLHOFF, one of the world's foremost portrait painters, on sailing back to Europe after painting President Coolidge's portrait which he has just completed, left behind him a sweeping denunciation of American houses. "I have seen many of your fine residences in America. To enter one is to enter all. They are invariably characterized by a gloomy monotony of wall surface which makes them all alike. Perhaps the Baron's criticism is well founded in so far as houses which were decorated several years ago are concerned. It is regrettable, however, that the Baron could not have visited some of the smarter American homes decorated recently. American people themselves have sensed the drabness and monotony of wall treatments which characterized the period of ultra simplicity in decorating so prevalent during the years immediately following the war. It is therefore only natural that leading American architects and decorators practically have abandoned the plain wall treatments and are introducing a colorful variety by means of the countless designs available to them in wallpapers and decorative fabrics. A range of decorative possibilities particularly in wallpapers is so limitless that the American housewife and decorator are reveling in their use."

These quality Feeds have now been brought to the last stage of efficiency known to modern feed specialists, by the addition of the necessary Minerals not sufficiently supplied by the grains.

## Specially Built For Hillside Harvesting

1. Can be used with equal success on hillside or level fields.  
2. A real 2-man machine. Bagging platform, centrally located, well balanced, men work close together.  
3. Header platform is parallel to ground at all times. No grain skipped.  
4. Operates equally well up hill or down.  
5. Cylinder, 24" long, runs on self aligning, enclosed ball bearings.  
6. Five square feet of grate surface beneath cylinder and main beater provides for immediate separation of 80 to 90 per cent of grain at the cylinder.  
7. Wide separator (44") permits straw to spread thinly over straw racks for thorough separation.

8. Air blast of shoe fan is distributed evenly over entire area of shoe screen, whether machine is going up or down hill.  
9. Reclaiming device in addition to shoe—similar in action to fanning mill. Cleans grain thoroughly.  
10. Power operated leveling device. The operator merely moves a clutch lever—the power does the rest.  
11. Screens are automatically leveled when going up and down hill.  
12. All bearings supported on brackets attached to the frame not to sheet metal siding.  
13. Auxiliary engine same as used in Harvester trucks and tractors. Ball bearing crankshaft.  
14. All drive chains are short. Double roller chain and cut steel sprockets on cylinder drive.

WE NOW HAVE A SAMPLE MACHINE FOR DISPLAY. WE WILL BE GLAD TO SHOW YOU THE MANY ADVANTAGES YOU HAVE WITH A

**ZeZ Confrey Mixes Salads and Songs**

ZeZ Confrey, famous composer of the musical classic, "The Kitten on the Loose" is the most versatile of America's popular song composers. Those who know him say he can mix salad or a song oddity with equal success, which is saying considerable since his portrayal of the delightful pranks of a certain young fellow frisking over the ivories has been recognized as the model of American syncopation.

But Mr. Confrey has other "firsts" in his repertoire, his acquaintance with the country and the company of a certain murmuring brook. Inevitably he comes back with one of the merry tunes for which he is noted.

A bachelor, ZeZ keeps open house for his friends. If he invites a few of the boys over for a midnight supper, he does the cooking himself. Invitations to his lively little dinners are sought after. There are two dishes to which Mr. Confrey is partial. So are his friends. His recipes for the two follow:

**Royal Eggs With Mushroom Sauce.**  
12 eggs  
1/2 cup evaporated milk  
1/2 cup cream  
1/2 pound mushrooms  
1 slice pimento  
1/2 cup butter  
12 slices toast

Beat the mushrooms in two tablespoons. Add salt and pepper. Mix with a white sauce of two tablespoons butter, one tablespoon milk and one egg. Cook five minutes. Add the cooked mushrooms and drop into hot fat. Break eggs and drop into hot fat. Fry until brown. Lift out and drain. Place an egg on each slice of toast. Allow two pieces for each serving. Pour over all the mushroom sauce and garnish with parsley.

**Pineapple-Cheese Salad.**  
10 slices pineapple  
1 cup cream  
1/2 cup chopped nuts  
1 cup evaporated milk

Combine the cheese, nuts, evaporated milk, pineapple and cream. Blend into a smooth mass. Cut pineapple circles in half. Spread cheese mixture on a slice of pineapple. Press the other half circle of pineapple on top of cheese as one would do with bread in making a sandwich. Cut diamonds or triangles from green and red mangoes and press into the edge of the cheese mixture between the pineapple. Lay two of the prepared pieces on a crisp lettuce leaf. Dress with a creamy salad dressing. This serves five.

Anything to sell? Try a small ad.

**Life on the Farm**  
(Continued.)  
Down on the farm, about half past 4 I pull on my pants and sneak out the door.

Out thru the yard I run like the chickens, Milk ten cows and feed all the chickens hatched by his friends and his friends' friends. Feed, curry and harness old Prince and Jiggs, separate the cream and stop all the pigs.

Work about two hours, then eat like a Turk. Then by heck! I'm ready for a day's work. So I grease up the wagon and put on the rack, Throw a jug of water in an old grain sack.

Hitch up the horses and hurry down the lane, Must get the hay in, cause it looks like rain.

Look over yonder, sure as I'm born, cattle on a rampage, cows in the corn, Start across the meadow, run a mile or two.

Heaving like a windbroke, Wet all thru Got back to the wagon, then for recompense, Prince gets straddled in the barbed wire fence.

Bones all aching, muscles in a jerk I'm as fit as fiddle for a full day's work.

Worked all season, didn't make a thing Got less cash than I had last spring. Some people say there aint no h-l But they never farmed so they can't tell.

But as spring rolls around, I'll take another chance, As the fringe grows longer on my old blue pants, So I give my suspenders another big jerk

And by Heck I'm ready for a full day's work.

**Mrs. Nixon at Rest**

Funeral services were held yesterday afternoon at 2 o'clock from the Presbyterian church for Mrs. W. A. Nixon, Rev. Hedley A. Vicker, pastor of the Presbyterian church of Asotin, assisted by Rev. D. H. M. Boyle pastor of the local church conducted the services, speaking comforting words from the sacred passage, "Come unto me, all ye that labor, and I will give you rest." The song service was rendered by the church quartet, Mrs. Henry Morris, Mrs. John Kennedy, J. N. McPhail and C. S. Richardson, with Mrs. Boyle at the piano.

A large number of sorrowing friends attended and many flowers were given as a testimony of respect. The ladies' aid society and A. S. chapter P. E. O., of which organizations the deceased was a member attended in groups. The pall-bearers were J. R. Standley, Joseph Banks, Emil Geigerg, B. H. Oliver, E. N. Clark and J. P. Michaelson. The burial was made in the family lot at the Genesee Cemetery.

—Lewiston Tribune

**River's Variations**  
The width of the Mississippi river at New Orleans is quite uniform and averages 2,100 feet. At St. Louis the width varies considerably with stretches of 1,600 feet at Eads bridge and vicinity to 2,700 feet at other places, all within the limits of St. Louis.

No doubt when Col. House visited the White House recently he couldn't help noticing how much the place has changed.

**Maybe So—**  
Bilkins: "Say! Have you seen Clem Harrison's wife since she got her hair bobbed?"

**When to Cut Grasses**  
The best time to cut grasses is as soon as they are well headed, says the United States Department of Agriculture. The millets and Johnson grass should be cut as soon as the heads begin to show in the milk stage. Legumes like cowpeas and soy beans, in which the seeds is an important part of the forage, should not be cut until the earliest pods begin to mature, but perennials legumes such as alfalfa and clovers, may be cut as soon as they are well in bloom. The hay made from any crop is always that which is made the most quickly and with the least exposure to sun and air. Too much exposure to the sun bleaches the hay, making it less attractive when placed on the market and also less palatable and less digestible.

**Why the Thrifty Man Buys a Studebaker**  
1. One-Profitt Prices - recently reduced 2. Time Payments - lowest rates 3. Unit-Built Construction - adds excess mileage

If a motor car means something more to you than mere transportation—if you want more comfort—more power—and if you want to be certain that your money buys the utmost in tangible value, a One Profit Studebaker is the car for you.

World's most powerful Sedan of its size and weight The fine Studebaker Standard Six Sedan illustrated below is an outstanding example of the extra value passed on to Studebaker owners through One-Profitt savings. It is a real four-door Sedan. It is upholstered in genuine wool. Carpets are wool. Windows are real plate glass.

The equipment includes and 8-day clock, gasoline gauge, ash receiver, rear vision mirror, stop light, air cleaner gas and oil filters, dome light, safety lighting control on steering wheel, automatic windshield cleaner, full sized balloon tires, coincidental lock to steering gear and ignition, controlled by same key operating door and spare tire locks.

Body pillars are of northern white ash, cross members are of hard maple. We pay a premium for the best steels.

Run the engine—the most powerful in any Sedan of its size and weight, according to the rating of the N. A. C. C. and the Society of Automotive Engineers. Its crankshaft is machined on all surfaces to eliminate vibration. The motor is not built for excessive speed, but rather for smooth, trouble-free service at 5 to 55 miles an hour. It is built for a long, quiet life—not for spectacular stunts.

Come in—test its performance—power—comfort; then realize that you can buy it out of income for the lowest price Studebaker ever placed on a Sedan, and at the lowest time-payment rates known to the automobile industry.

**Studebaker Standard Six Sedan**  
(Four Doors—Ample Power—Wool Trimmed)  
Under Studebaker's fair and liberal Budget Payment Plan this Sedan may be purchased out of monthly income for a small initial payment and at the lowest time-payment rates known to the automobile industry.

**GUM-DIPPING the Extra Process for Extra Miles! Breaks all Tire Records**  
The 500 Mile Speed Classic at Indianapolis has always been a Battle of Tires. In 1911, Firestone won with fabric tires at 74.59 miles per hour. In 1920, Firestone won with cord tires at 88.5 miles per hour. In 1925, Firestone won with Full-Size Gum-Dipped Balloons at the record breaking average speed of 101.13 miles per hour. In 1926, Firestone again won with Full-Size Gum-Dipped Balloons at the record breaking average speed of 101.13 miles per hour. They were all Firestone-equipped. They went the distance without a single blowout and with but two tire failures—one due to a puncture and the other to a leaky valve.

This performance is even more remarkable when you consider the terrific speeds at which the cars traveled over this fifteen-mile, rough brick track.

Experienced race drivers will not risk their lives or chances of victory on any other tires. As in the commercial field, large truck, motorbus and taxicab fleet operators, who keep careful cost records are among the big users of Firestone Gum-Dipped Tires. The City Transportation Co., of Tacoma, Wash., writes: "One of our 12 buses on Firestone Gum-Dipped Tires has gone over 40,600 miles and still looks good for many miles of extra service. The largest taxicab companies in the world standardize on Firestone Gum-Dipped Tires. W. R. Rothwell, taxicab operator, Detroit, Mich., writes: "Two of my Firestone Gum-Dipped tires have run 76,000 miles." "We operate 40 buses all equipped with Gum-Dipped Tires. The very low cost per mile on which these tires operate is considerably less than that of any other make." Hayes Bus Lines, Columbia, S. C., says: "We operate 19 buses equipped with Firestone Gum-Dipped Tires. A number of these tires have run over 45,000 miles without ever having been removed from the rim."

The largest taxicab companies in the world standardize on Firestone Gum-Dipped Tires. W. R. Rothwell, taxicab operator, Detroit, Mich., writes: "Two of my Firestone Gum-Dipped tires have run 76,000 miles."

Hundreds of thousands of car owners voluntarily testify to the safety, comfort and economy of Full-Size Gum Dipped Balloons. W. H. Peacock, Birmingham, Ala., testifies: "I have had Firestone Balloons for thirteen months and they have delivered to me 24,469 miles." H. C. Staehle, Minneapolis, Minn., says: "My Firestone Balloons have gone 49,900 miles and are still in good condition."

These records of endurance, speed, safety and mileage could only have been made because of Firestone development of the Gum-Dipping process which insulates and saturates every fiber of every tire with rubber, reducing friction and heat and building greater strength and endurance in the cords—assuring you at all times—

AMERICANS SHOULD PRODUCE THEIR OWN RUBBER... *James B. Firestone*

**A LITTLE TALK ON THRIFT**  
(By S. W. Straus, President American Society for Thrift.)  
Carelessness and lack of thrift are much the same. The vice of carelessness, which may seem trivial, is capable of serious consequences. The National Board of Fire Underwriters has recently issued some instructive data on the effects of lack of care. According to these figures, the destruction of property in the United States from fires due to the careless handling of matches amounts to \$30,000,000 a year. It was a little more than that for the year 1924, the last annual period for which figures are obtainable. During the five years from 1920 to 1924, carelessness with matches caused the loss of \$171,000,000 or enough to erect 50,000 homes at \$3500.00 each.

The insurance organization tells us that American use 770,000,000 matches daily. This means 770,000,000 times that we must be careful. The percentage of carelessness, therefore does not need to be very great in order to bring about disastrous results. The destruction of property is of small consequence compared with the destruction of human life due to carelessness in the use of matches.

A few years ago 145 girls were burned to death in a New York shirtwaist factory because of a carelessly tossed match. At Binghamton, N. Y., 35 workers lost their lives because someone was careless in disposing of a lighted cigarette, and the same cause led to the destruction of 15 lives in a paper factory in Pittsburgh.

America has not forgotten the tragic story of the Windsor Hotel fire in New York. An old man, lighting a cigar, tossed the flaming match into a lace curtain.

The United States Forest Service estimates that the careless smoker alone is responsible for upwards of 20 per cent of all fires in the national forests.

Bear in mind always that constant carelessness is part of true thrift.

**High in Nutrition**  
That the pecan is high in nutrition is a known fact. The nutritive value is the result of its fat and protein content. The pecan offers a high food value in concentrated form, and for that reason food authorities recommend that it be eaten with bulkier foods to secure proper assimilation.

**USE MOBILIO and Save Crops Fuel Oil Repairs Trouble Time Depreciation**  
Remember you can buy Mobilio at Western Oil Prices AT Morscheck Brothers Genesee, Idaho

**Wash Away Ivy Poison**  
Thorough washing soon after exposure to poison ivy reduces the danger of injury, says the United States Department of Agriculture. The poison usually requires some time to penetrate into the tender layers of the skin, and until such penetration has taken place much of it can be removed. Make a thick lather and wash several times, with thorough rinsing and frequent changes of hot water, using ordinary alkaline kitchen soap. Running water is preferable for this purpose. If a basin is used, the water should be changed frequently. Even after inflammation has developed, thorough washing should be tried in order to remove exposer surfaces of the skin all traces of the poison that can still be reached. For the inflammation, simple remedies, such as local application of colution, of cooking soda or of Epsom salts, one or two heaping teaspoons to a cup of water, are helpful. Fluid extract of grindelia, diluted with 4 to 8 parts of water is often used. Solutions of this kind may be applied with light bandages or clean cloths. Such clothes must be kept moist and discarded frequently in order to avoid infection. When the inflammation is extensive or severe it is best to consult a physician.

**Silver Map of World.**  
A silver map of the world, exhibited by the Royal Geographical Society, is said to be the best of four such maps in existence. It is a thin circular plate of silver, about three inches in diameter, and commemorates Drake's voyage around the world, 1577-1580.

Another question is whether there would be any intelligence tests if those who prepare them had to submit to one first—Lynchburg News.

A small "Classified" adlet will get what you want—or will sell your surplus stuff. Try it.

**Ice Cream the Quickest Dessert!**  
When unexpected callers come—when dessert becomes a baffling problem, send for our richly flavored and healthful ice cream. It's the quickest and best dessert. Sealright cartons assure you 100 per cent leak proof, crush proof protection and cuts into attractive round slices that will please your guests.

**An Ad. In This Paper will bring the entire family to your store**  
Putting an advertisement in this paper is much more economical and will get much greater returns than though you hired a boy to go about crying the news aloud. And it affords you the opportunity to place all of the facts of your offering before the people of this community in an intelligent and completely convincing manner.

**The Genesee News reaches more than 90 per cent of the Genesee Valley**

**VARY THE CEREAL COURSE**

Cereal is very valuable as a part of our daily diet, but it may easily become monotonous unless it is varied in some way. An article in the People's Home Journal suggests variations as to the kind of cereal and its service.

From a nutritive standpoint cereals are essentially energy foods, starch being the nutritive element found in the largest proportion. It requires from two-thirds of a cupful to one cupful of cooked cereal to yield 100 calories, while the 100-calorie portion of most ready to eat cereals is about one and one-fourth cupfuls.

The amounts of protein, minerals and vitamins will vary according to the percentage of the whole grain used. Those products including all of the grain will have a larger proportion of these elements than will the product from which the outer coats of the grain have been eliminated.

The caloric value of the finer milled food will be higher but there are other elements that may outweigh a few calories. For children, in whose diet vitamins and minerals are so particularly essential, the whole grain cereals are advised. There probably is nothing better, both for flavor and nutritive value, than the wheat kernel, whole or slightly broken, which constituted one of our first breakfast cereals. However, it cannot be easily obtained except in wheat-growing sections and it takes hours to cook. Manufacturers have been quick to respond to the needs of this age of hurry and rush and have provided us with products that can be poured directly from their containers to the serving dish which can be made ready for the table by a short cooking process. They have responded, too, to the dietetic needs of our time. We can obtain a breakfast food of high caloric value, with roughage and minerals and vitamins all included or we can have these latter values of the grain, as in bran, with the calories largely eliminated. We can have the time-honored hot porridge, or we can choose from an alluring array of crisp ready-to-eat varieties. There need be no lack of variety.

Vary the Service  
Steamed or boiled rice, when served hot with sugar and cream and possibly some fruit, is a very acceptable variation in the breakfast cereal list. It is particularly delicious with baked

or stewed apples. A dish of baked apple sauce before breakfast, as at the breakfast table, should stimulate even a sluggish appetite. A mould of steamed rice with stewed apple arranged wheel fashion around it makes an appealing service for a child or an invalid.

Rice will absorb about three and one-half times its bulk of liquid. Put the water, rice and salt in a double boiler and let it cook until tender. It will take about forty to fifty minutes. It should not be stirred after the grains have become softened as that will make it mushy looking. Rice may be steamed in custard cups for individual portions. Properly cooked rice should be thoroughly tender, but each grain should be separate. Boiling rice is a quicker process.

Cereals may be varied by different methods of cooking and service. Milk may be substituted for part or all of the water. The addition of sugar, fruit, dried fruits are rich in sugar and minerals. Both fresh and cooked fruits are fine with the ready-to-eat cereals. Dry cereals and fresh fruit or cooked cereals moulded and served cold with fruit, sugar and cream are relished as hot-weather dishes.

Over 3,000 tons of textile machinery was received in the United States during March from England, Germany and France, according to bulletins received by the Russian Information Bureau. The machinery represents first shipments of extensive orders being placed abroad for the rebuilding of the Soviet textile industry. The machinery will be used for replacement in existing plants and in the new factories to be built during the next two years at a cost of \$70,000,000, half of which are now under construction.

Of the machinery received in March 2,142 tons came from England, 897 tons from Germany, 80 tons from France.

In the past five years the number of telephones in San Francisco has increased over 41 per cent.

**Successful Musicians Come Out Of West**

**JOHN NELSON HALL**  
(“Sleepy” Hall)

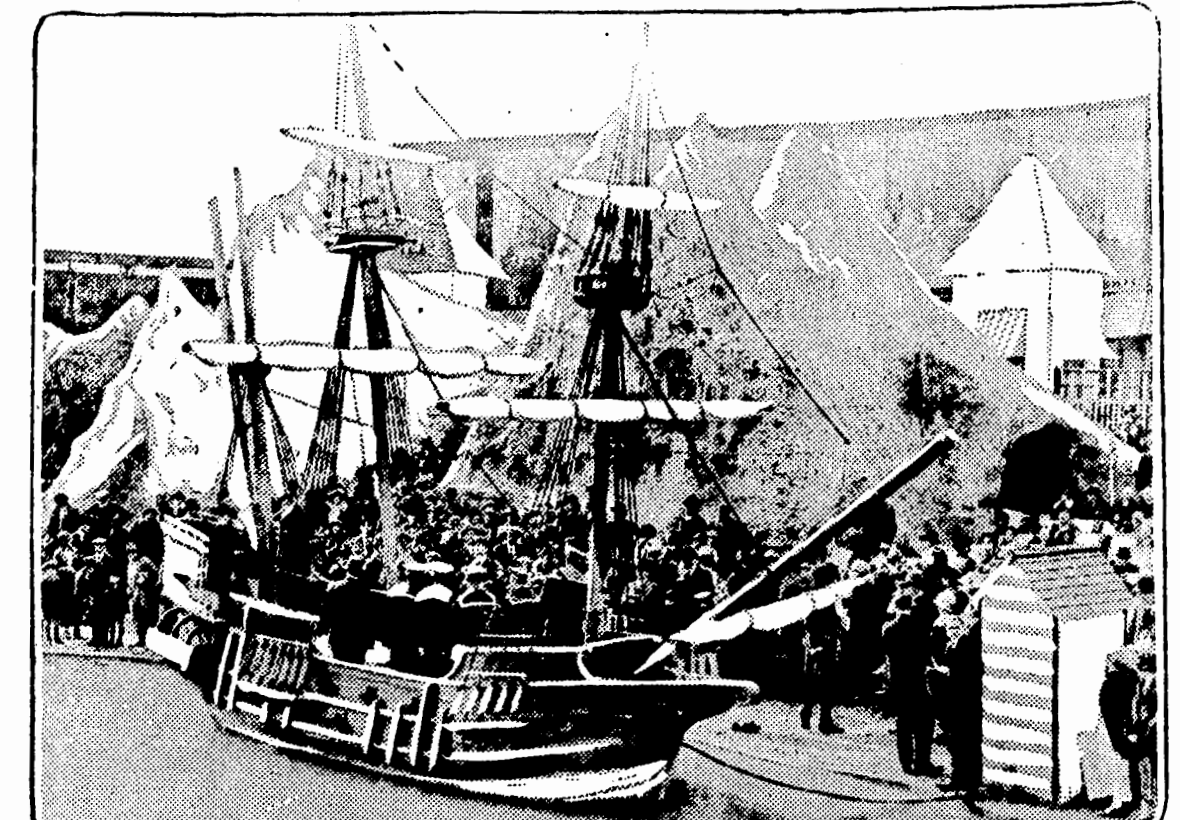

And Reasons, Only Hardy Men Can Stand Strain Declares “Sleepy” Hall

New York City.—John Nelson (Sleepy) Hall thinks he has discovered why most successful musicians come out of the West.

“Do you wonder that it takes a Westerner to stand it? I come from Montana myself and even I often get groggy from the noise we hit.”

Mr. Hall is an ex-Annapolis and Yale man and a member of the Beta Theta Pi fraternity. He began his musical career in the Yale Glee Club. In fact, he paid his way through Yale by being a member of the Beta Theta Pi fraternity.

**Treasure Island The Greatest Amusement Feature At Philadelphia's Sesqui-Centennial Exposition**

TREASURE ISLAND, DRAKE'S GOLDEN HIND, AND CHINAMAN PACIFIC ROCKIES

Treasure Island, the outstanding amusement feature of the Sesqui-Centennial Exposition, at Wembley, with its bold pirates, Long John Silver and Capt. Jack, and with its other famous characters, Peter Pan, Wendy, Alice in Wonderland, the Duchess, the Countess, Cinderella, the Queen of Hearts, Little Red Riding Hood, Aladdin and many others is the greatest entertainment attraction at the Sesqui-Centennial Exposition at Philadelphia. One hundred students, 75 of them being co-eds, from the University of Pennsylvania will interpret these characters and act as guides. Treasure Island, at Philadelphia, covers six acres and is nearly three times as large as the British Treasure Island. The entire layout of the island in Philadelphia was designed and built by Maxwell

**PRESENT DAY CONDITIONS IN CHINA**

By W. E. PRIESTLEY

VERY few people in this country have any knowledge of the undeveloped resources of China. Every mineral and every metal that the world knows can be found in that country. Coal and iron are plentiful and when we remember that Japan has only a limited supply of coal and practically no iron, we begin to understand why Japan should have such a keen interest in China. No nation can be really great without these two minerals. Besides vast mineral resources, China has immense agricultural resources. We are accustomed to think of China as a land densely populated, but as a matter of fact half the area of China has never been occupied owing to the lack of roads. Build roads and railroads in China and there is no fear of a yellow invasion for years to come.

In addition to these resources, we must never overlook the biggest asset of China, and that is her people. One quarter of the world's population is Chinese, and if occasion demanded, China could put seventy-five million men into the field. The Chinese people are thrifty (they have to be in order to live), they are industrious, they are good mechanics, good farmers, patient and cheerful. In the face of grinding poverty they still go ahead. They have been conquered, but always absorbed their conquerors. Millions have been destroyed by flood, famine, and opium, but this seems in no way to lessen their resources. They have developed a remarkable civilization which is unique simply because it was developed without outside assistance, whereas every other civilization has been built upon one still older.

The Chinese people have given to the world some marvelous things, such as silk, paper, printing, glazed pottery, gunpowder, astronomical instruments, and the mariner's compass. Such a people who have given so much to the world, cannot be an uncivilized people. Their undeveloped resources, their national characteristics, and their absorption of the West, make them one of the world's leading nations.

The central idea of Chinese life is that of the family. Their conception of a state or national life, is almost entirely lacking. So long as he can be left alone, the average Chinese does not care very much who governs, or who administers the law, so long as the taxes are not too heavy. As a race they can get along with less law and with less government.

The Chinese people have given to the world the average of her weakness by financing the different warring generals of China, and then fishing in the muddied waters.

Japan intends to hold Manchuria. Her vast manufacturing interests depend on Manchuria's raw materials. Russia must have a warm water port on the Pacific ocean and to these two nations, China is simply a pawn in the game. Russia and Japan are

playing a game of chess, with provinces for pieces and Chinese politicians and soldiers for pawns. France sits secure enough in extreme southern part of China, but in the struggle between Japan and Russia, Great Britain is certainly on the anxious seat. Under the guidance of Bolshevik diplomacy the Chinese are gradually blockading and starving out the British island of Hong Kong.

In the struggle for control of China, which is now going on between the Bolshevik government of Russia and the imperialistic government to Japan, it is rather interesting to note the different methods of procedure. Until recently, the methods of Japan were largely devoted to peaceful invasion backed by Japanese capital and Japanese statesmanship. Korea, which was at one time a vassal province of China, is now the Japanese province of Chosen. Manchuria, which is still nominally under Chinese sovereignty, is, as I have already pointed out, really a Japanese possession. In the seizure of Korea, the occupation of Shantung, and the occupation of Manchuria, Japan is not looking for land for her surplus population, for the simple reason that the Japanese cannot compete in the labor market with either Chinese or the Koreans. This territory is simply being exploited for the benefit of Japanese foreign trade. Japan cannot be particularly blamed for her methods; she is simply copying the tactics of other foreign nations in China. Japanese money in China has been spent in the development of Japanese enterprises, and the financing of the various provincial wars that have so disrupted China.

The Russians, on the other hand, are playing a deeper game. Under the guise of humanitarianism, they have spent millions of dollars in China in the furtherance of the Bolshevik doctrine, and their own aggrandisement. In northern China they are fighting the Japanese, and in southern China they are fighting the British. I do not believe for one moment that China will ever go Bolshevik. The principal plank in the Bolshevik platform is that of land ownership. This idea has no weight with the Chinese people, because the vast majority of the Chinese farmers already own the land which they cultivate. The best thing that the Russians can possibly get from the millions they are spending in China, is a China friendly to Russia, and thus provide a Chinese watchdog for her own back door. In other words, China will be a buffer state between Siberia and foreign aggression.

Kwantung province, of which Canton is the capital is largely under Russian influence. Seventy Russian advisers control the political life of Kwantung, and two hundred Russian officers are drilling the Chinese army. In a long struggle between Russia and Great Britain in the Orient, the Bolsheviks in Canton are taking every advantage of the situa-

tion to force the British out of China. I really believe that the Chinese themselves are using the Russians as tools. After the World War has learned all he can from the Russian, then the Bolshevik will get his walking papers and will return to Moscow a sadder and a wiser man.

I am convinced that the day of foreign aggression in China is soon to be a thing of the past. Of all the nations, and as soon as they are able will attempt to develop China for the Chinese. It will be remembered that the Japanese employed foreign advisors in large numbers, but as soon as they could, the foreigners were dismissed, and Japan is entirely free from foreign control.

China is out to learn, and here, I believe, is the big opportunity for the United States. We are bringing to this country every year a large number of Chinese students who are absorbing our ideas, and our methods of government. Of all foreign nations, the Chinese are looked upon as about the only nation that has tried to give China a square deal. We have never taken over a sphere of influence, never fought an unjust war with China, we returned the Boxer indemnity to be used for educational purposes, we have always insisted on the Open Door policy with China, and it was American influence that was largely responsible for the downfall of Japan's notorious Twenty-One demands.

One of the biggest prizes in the world's business history will be the foreign trade of China. Some day China will settle her differences, and will begin to put her houses in order. China will begin to develop her vast resources, and then will come an unprecedented demand for foreign machinery and produce of every kind. The nation friendly to China in her time of adversity will be the favored nation in her time of prosperity.

Let us extend to China the hand of sympathy, the hand of understanding, and the hand of helpfulness. It is a short-sighted policy to take advantages of China in her hour of trial; the Chinese people have long memories. Out of the chaos and turmoil a new China is being born, a new young China that will eventually be one of the world's great nations. We cannot be father or mother to the struggling China; but we can, at least, be a kindly uncle—Uncle Sam.

WASHINGTON STATE COLLEGE, Pullman.—A treatment for European Brown Scale, a plant pest which has attracted considerable attention in the vicinity of Seattle during the past months, has been worked out by R. L. Webster, head of the zoology department of the State College and entomologist for the experiment station.

The disease is a new one for the state, and so far has been found only in the western part. It is said that it was introduced from Europe to British Columbia some twenty years ago, and apparently has slowly extended its range into Washington, attracting little attention, however, until this season.

According to Mr. Webster, it can be only a matter of conjecture what the result of the spread of the disease into the fruit regions of Central and Eastern Washington would be. The insect is known to affect a wide variety of food and shade trees, including apple, pear, plum and cherry, as well as alder, dogwood, elm, maple, oak, poplar and willow trees.

A spray of nicotine-sugar solution is advised by Dr. Webster for controlling the insect, the spray to be used as soon as the eggs hatch. He points out that it is important to determine as fully as possible the distribution of this insect within the boundaries of the state, and twigs of shade or fruit trees supposed to be infested will be examined upon request if sent to the Department of Zoology. A detailed formula for spray and other information may also be secured.

The poultry club in the Ritzville community has voted to limit the breeds of chickens for club members this year to Rhode Island Reds, White Leghorns and Wyandottes. One of the goals for this year is that every boy and girl should make a profit of at least \$30. The club will have an enrollment of about 25 members.

John L. Smith, of Hazelwood fame, known throughout America as a hunter of big Holsteins of big milk production capacity, is not satisfied with that distinction alone, but also seeks big production in crops. Report comes to us that on his Hazelwood farm near Spokane he harvested a carrot crop that yielded 70 tons to the acre. The carrots were of the Mastodon stock variety. What a fisherman John L. could tell us if he ever took an outing on Puget Sound.

When Harry Gosch, winner of the Tom Brown saxophone contest in Omaha recently, was on the second annual tour of the middlewest with Father Flanagan's Boy's Home show he was the troupe star trumpeter but he had the ambition to play a saxophone. He told Father Flanagan of his desires, and so Father Flanagan purchased an old broken "sax" for Harry.

Harry did not take a lesson on his "sax". He practiced on it every spare moment, and before the troupe returned to Omaha, Harry was playing a "sax" in the band. He is now band-master at Father Flanagan's Boy's Home in Omaha. The members of the troupe, which is now making its six annual tour of the middlewest, are those who have received hand instruments from Harry.

#### Face's About Idaho

Oregon Short Line railroad bridge over Snake River, raised 21 1/2 feet to new track level without interfering with traffic.

New business houses opening up here at rate of one every two weeks.

Southern Idaho shipped 24 cars horse, 720,000 pounds, last year.

Idaho's dairy shipments for first three months of 1926, were 24.4 per cent heavier than for the same period in 1925.

Boise shipment of lettuce this year, estimated at 50 carloads.

Gooding County wool pool sells 91,736 pounds, for \$31,190.24.

Driggs—Standard Oil geologists will make report on Teton oil prospects.

Idaho Falls—Idaho Lead Mines Co. operating Scott Mine on Birch Creek, ships first car of ore. Company installing 100-ton mill.

Jerome—Robertson and Thomas sells 9,100 shered yearling ewes, for \$11,20 a head.

Jerome—Eight cars hogs, worth \$2,500 a car, shipped from here each month.

Nampa—Concrete pouring begins on new Nazarene hospital, to be finished this fall.

Homedale—Promising ledge of gold-silver ore uncovered by cloudburst flood.

Priest River streets to be oiled this summer.

Burley—Playground equipment and swimming pools to be established, in both city parks.

Important forest highway appropriations in Idaho are: McCall-New Meadows, \$103,000; Lovans-Stanley, \$95,000; Victor-Irwin, \$60,000; Lewis and Clark, \$50,000; Clark Fork Highway, \$109,000; Ketchum-Clayton, \$25,000.

Inland Power and Light will spend \$100,000 in reconditioning and extending old Grangeville Light and Power lines serving Grangeville, Fern, Cottonwood, Ferdinand, Craigmont, Rubens, Nezperce, Kamiah, Greer, Orofino.

Old Evolution mine at Osburn, being reopened.

Kellogg—Bunker Hill and Sullivan Company expected to build great electrolytic zinc plant here.

About \$225,000 will be spent on Eastern Idaho sections of Old Oregon trail this year.

Federal, State and Lemhi County funds of \$20,000 may build link of Salt Lake-Seattle Highway, on Challis Creek.

Payette—Local oil company being formed, to drill for oil or gas.

Meridian—Heavy sales of dairy cows reported, for shipment to California.

Mackay—Idaho Metals Co. will greatly increase ore production and milling force.

Mackay—Old Ramshorn mine to be operated, under contract for 50 tons or more a day.

Nampa—Lettuce shipments run 5 to 10 cars a day.

Idaho prune shipments for this year, are estimated at 2,000 cars.

Nampa—Idaho lambs top Omaha market at \$17.60 per 100 pounds.

Cattle branding was the main feature of the day the Odeker Ranch Sunday.

Mr. and Mrs. Clarence Trail and Melvin Currin spent Sunday at Mrs. Trails parents Mr. and Mrs. Chas. Curran.

Mr. and Mrs. Guy Payne of North Bend, Oregon, who have been visiting at Geneese left for Montana Wednesday last week where they will visit their daughter Mrs. Kittie Ness.

Nellie Hayden spent the week end with Mrs. Taylor.

Louise Gage is visiting at the homes of her sisters, Mrs. Elmer Johnson and Mrs. M. Green.

Edna Green spent Sunday visiting her grandparents, Mrs. W. H. Gage of Culdesa.

### "Warlike" America

It is almost laughable to see the pacifists in this country so widely at work to get the United States to be "peaceful". Since when has this country been anything else? What time did anybody ever see Americans wildly rushing into war? Since when have we kept up a terrific armament race, or engaged in the wild conception and training of armies.

Yet ever and anon we see the pacifist ladies and gentlemen running to Congress lobbying desperately, as though world peace were threatened by some pernicious activity of American militarists—whatever they are.

Now we have the spectacle of Miss Jane Addams and a number of other pacifists interviewing President Coolidge, and begging him to use his influence to get the world to disarm.

Miss Addams is president of the Women's International League for Peace and Freedom, and she believes that the United States should instruct its delegates to the preparatory armament limitations conference at Geneva to work for abolition of conscription and "complete world disarmament."

As the United States has no conscription and the finest standing army in the world today and as it is evidently the only major power which is taking this Geneva disarmament conference at all seriously one wonders just why Miss Addams and her associates do not concentrate their attentions upon some other country.

It is entirely absurd for our pacifists to go about preaching pacifism in a country which is already the most pacific country in the world never suffer if the peace of the world were left in the hands of the world left in the hands of the United States. We not only have reduced our navy by agreement with other nations, but we are refusing even to build the auxiliary ships needed by our navy, and which are being built in large numbers by such nations as Japan, our navies in the 5-5-3 pact. There is no phase of our life which gives the pacifists any right to charge us with any faint trace of militarism—yet constantly they repeat their charge.

Which repetition is, we affirm the uttermost in absurdity.—Exchange

### May Be Ousted

Gentlemen with soft hands and well fed bodies, who for a number of years have filling comfortable government positions in Washington, are beginning to complain that the Coolidge governmental economy system has gone too far, and that it is time a halt was called. Their outcry is becoming louder and more insistent as they see their comrades rooted off the payroll, and they personally begin to sense the probability that the time is not far distant when they will also be separated. So to forestall this catastrophe, they have begun to argue that the axe and knife have been used enough, the Coolidge hand should be stayed. Others attempt to argue that any such attempt is impossible have been accomplished.

It is just as well to scotch this at the source. Great and important re-trenchments have been made in government expenditures, but government is today still costing much. This is the time to halt. Not only must the Coolidge program of the eliminations be continued, but state and municipal governments should follow suit. Government of all kinds in the year 1924 cost the people of the country almost eight billion of dollars close on twelve percent of the total income of the people of the nation. This means that the people of the nation out of 313 working days of their year spent 46 days working to meet the expenses of government in 1924.

They are saying that these are facts worth bearing in mind when the fact is raised that a halt should be called on the program of thrift and economy in governmental expenditures.

### Which System Is Best

Our tariff system, which has been made the plaything of politics, but which has protected American industries, American Farms and American workers against the inroads of destructive foreign competition has justified its existence.

There are two kinds of tariff, one for protection and one for revenue. The American tariff is of the protective type although it produces increasing revenue. A revenue producing tariff can be witnessed in England which is supposed to be a free trade country but which has in reality a much higher per capita tariff tax than the United States. Under the English system the products of the English resources are largely unprotected by a tariff and at the mercy of world competition, while the goods consumed in largest amounts by English workmen are subject to a tariff tax for the purpose of raising federal income. This is just the reverse of the American system which admits commodities we cannot produce, but through a reasonable duty on certain foreign products, which if admitted free would destroy American industries, agriculture, wages and hours, protects our resources and working men and makes our nation self-sustaining.

The aim of our country should be the useful occupation of all the people and all their wealth to make them prosperous, and administration of the government with such efficiency and economy that it will make the smallest possible draft on the people's income and prosperity.

### Geneese Boy Wins Two Prizes

Kenneth Cook of Geneese won two prizes this year in contests among students of architecture at the University of Idaho. He won first for design of a suburban housing project and second in the sophomore competition on design of an athletic memorial.

Train of Spuds Worth \$100,000

The peak in Idaho Falls potato shipments was reached when potatoes valued at \$100,000 moved out of Idaho Falls for their various destinations, the Pacific coast, and eastern points, particularly Chicago. This is the largest one day's shipment of potatoes as his share of the made up of about 50 carloads, valued at about \$2000 to the car.

The shipments for the past ten days or two weeks have been totaling \$50,000 a day in value, bringing enormous income to the Idaho Falls district potato growers.

As an example of what the Idaho Falls potato crop means to this section this season, the case of Fred Browne, a renter on the Zieman place south of town, produced 5,000 sacks of potatoes as his share of the crop. Today he is receiving \$4.90 a sack for these potatoes in his pit at the farm, the buyer furnishing the sacks and doing the hauling.

Potato buyers are paying the price today as high as \$4.40 per 100 pounds sacked, 4.25 bulk that being the average with higher prices being paid individual instances.

—Golden Idaho.

### Kleweno-Miller

The many friends of Miss Florence Kleweno were greatly surprised to hear of her recent marriage to Bert Miller of La Grande, Oregon, at Walla Walla, Washington, May 7.

The wedding took place before the fireplace in the living room of the Congressional parsonage, the Rev. Burdick officiating.

The bride, daughter of Mr. and Mrs. J. P. Kleweno, was charming in a gown of old rose crepe and heavy rose colored Venetian lace. Only the immediate friends and relatives of the bride were present. Those who attended were: Mr. and Mrs. J. P. Kleweno, Mr. and Mrs. Walter Kleweno, Mr. R. C. Kleweno, Mr. Art Kleweno, and Miss Jessie Helfert.

After the ceremony a wedding dinner was served at the College Inn. Mrs. Miller is a graduate of Cheney Normal and has for the past few years been teaching in Washington and Montana. She is at present attending

### Return Safety

Dick Nebelschick and Reeco Gibbs and son, returned home Saturday from a few days fishing trip, in the vicinity of Grandville. They report much snow still in the mountains and fishing poor on account of high water.

M. E. Muhlitz left for Winchester, Idaho, Tuesday. He will be employed in the Craigmont Lumber Co.'s Mill at that place for the summer.

Cliff Olson and Dale Lamphere and families returned from the North Fork of the Clearwater Thursday, where they had gone fishing. They report a good time and excellent catches.

Dr. Leavitt of Geneese is leaving for Portland, Oregon, June 19, to attend the Pacific Coast Dental Conference. He expects to return about the 10th of July. During his absence his office will be open for phone calls and appointments.

### Monday Club Entertained

The Monday Club spent a very pleasant afternoon Monday at the home of Mrs. Ira Hanson. At 6 o'clock their husbands enjoyed a delicious pick-up dinner with them out on the lawn.

Helen Casbolt, Rowena Hanson and Jessie Gray, U. of I. students spent the week-end with Geneese folks.

Miss Theresa Miller left Monday morning for Uniontown where she will spend a week with her aunt. Harold Hallman spent the week-end in Moscow visiting with Eugene Tucker.

### Genesees Defeated

All the boys say the less said the better, and we expect that is right from the way the score showed up at the end of the game. The boys could not get into their regular form and it looked like every time they hit the ball they hit it right into the hand of some Polish fielder. Polish got by on placing their hit and knocked the ball where the boys was not and proceeded with their merry-go-round. Never mind that game fellows, there are other games more to you that we want to see you win bad, better luck next time.

Next Sunday we will play Garfield on our own field and we hope to turn the tables on Garfield also on our luck for a game or two.

### Progressive Club

Mrs. Fred Perkins was hostess to the Progressive Club at a dinner Friday evening. The ladies met in the afternoon and spent their time socially and with fancy work. At six o'clock they were joined by their husbands and enjoyed a delightful pick-up dinner.

### Idaho's First Oil Well Promising

The Rockland Valley Oil Co., not far from American Falls has its first well down some 1900 feet, and in it oil shale. Oil was struck at 1000 feet it is reported, but water made casing dry for \$31,190.24.

Jerome—Robertson and Thomas sells 9,100 shered yearling ewes, for \$11,20 a head.

Jerome—Eight cars hogs, worth \$2,500 a car, shipped from here each month.

Nampa—Concrete pouring begins on new Nazarene hospital, to be finished this fall.

Homedale—Promising ledge of gold-silver ore uncovered by cloudburst flood.

Priest River streets to be oiled this summer.

Burley—Playground equipment and swimming pools to be established, in both city parks.

Important forest highway appropriations in Idaho are: McCall-New Meadows, \$103,000; Lovans-Stanley, \$95,000; Victor-Irwin, \$60,000; Lewis and Clark, \$50,000; Clark Fork Highway, \$109,000; Ketchum-Clayton, \$25,000.

Inland Power and Light will spend \$100,000 in reconditioning and extending old Grangeville Light and Power lines serving Grangeville, Fern, Cottonwood, Ferdinand, Craigmont, Rubens, Nezperce, Kamiah, Greer, Orofino.

Old Evolution mine at Osburn, being reopened.

Kellogg—Bunker Hill and Sullivan Company expected to build great electrolytic zinc plant here.

About \$225,000 will be spent on Eastern Idaho sections of Old Oregon trail this year.

Federal, State and Lemhi County funds of \$20,000 may build link of Salt Lake-Seattle Highway, on Challis Creek.

Payette—Local oil company being formed, to drill for oil or gas.

Meridian—Heavy sales of dairy cows reported, for shipment to California.

Mackay—Idaho Metals Co. will greatly increase ore production and milling force.

Mackay—Old Ramshorn mine to be operated, under contract for 50 tons or more a day.

Nampa—Lettuce shipments run 5 to 10 cars a day.

Idaho prune shipments for this year, are estimated at 2,000 cars.

Nampa—Idaho lambs top Omaha market at \$17.60 per 100 pounds.

### Washington, D. C.

The slick city-follows with their runabouts and roadsters and gasoline devil-wagons have been foiled in their attempts to exclude horse-drawn vehicles from certain of the arterial highways of Washington. On the whole sober folk who love their city and who also love horses are rejoicing at the judicial decision which has nullified a traffic rule which barred the fourfooted friends from his place in the sun.

It must be admitted that relatively few horses will profit by the extension of their rights and privileges, but this few will form a pleasant variation in the scenery.

### Thomas Meighan

IN

## "The Man Who Found Himself"

Lost! A man's honor, a town's trust, a girl's love. And then he found himself and won them back!

Remember Thomas Meighan in "The City of Silent Men!"

That was one of Meighan's greatest. Though the picture is old, every print of it is still getting the crowds.

Like the "City of Silent Men," "The Man Who Found Himself" is a prison story. It was written especially for Tom by Booth Tarkington America's foremost author of popular fiction. Tom has the role of the happy go lucky son of a small-town banker. His family is prominent and looked up to. The bank smashes, and Meighan's kin become criminally liable to the state. Rather than see his respected father and brother go to jail, Tom who has been always considered nonaccount anyway, assumes responsibility and is sent to Sing Sing.

Virginia Valli plays opposite the star in the production directed for the screen by Alfred E. Green, who made "Back Home and Broke" "Pied Piper Malone" and other big Meighan hits. Tom Geraghty wrote the screen play.

A Paramount Picture don't miss it

### Obituary

The funeral of Mrs. Henry Morgan was held Tuesday at 2 o'clock at the Congregational Church.

The sad death of Mrs. Morgan occurred Sunday, June 13, at 12:10 P.M. Mrs. Morgan had been suffering for the past few months with tuberculosis however her condition did not seem serious.

Miss Martha Dresher was born nine miles southeast of Geneese, Nov. 28, 1905. When she was fifteen years old she moved with her family to Julietta. In 1922 the family again returned to Geneese. In 1923 Miss Dresher was united in Marriage to Henry Morgan. To this union one daughter was born. Besides these Mrs. Morgan leaves to mourn her death, her parents, Mr. and Mrs. John Dresher and six sisters and six brothers.

Mrs. Morgan spent the greater part of her life in and near Geneese. She was liked by everyone who knew her and leaves a host of friends.

### Larrabee Smawley Nuptials

Announcements were received by Geneese friends telling of the wedding of Miss Gladys Larrabee to J. K. Smawley, Jr., May 9 at Coeur d'Alene. They are both graduates this year of W. S. C. Mr. and Mrs. Smawley will be at home in Pullman after July 11. Mrs. Smawley spent the greater part of her girlhood days in Geneese, and her many friends wish her much happiness during her married life.

Besides these Mrs. Morgan leaves to mourn her death, her parents, Mr. and Mrs. John Dresher and six sisters and six brothers.

Mrs. Morgan spent the greater part of her life in and near Geneese. She was liked by everyone who knew her and leaves a host of friends.

### Larrabee Smawley Nuptials

Announcements were received by Geneese friends telling of the wedding of Miss Gladys Larrabee to J. K. Smawley, Jr., May 9 at Coeur d'Alene. They are both graduates this year of W. S. C. Mr. and Mrs. Smawley will be at home in Pullman after July 11. Mrs. Smawley spent the greater part of her girlhood days in Geneese, and her many friends wish her much happiness during her married life.

### Obituary

The funeral of Mrs. Henry Morgan was held Tuesday at 2 o'clock at the Congregational Church.

The sad death of Mrs. Morgan occurred Sunday, June 13, at 12:10 P.M. Mrs. Morgan had been suffering for the past few months with tuberculosis however her condition did not seem serious.

Miss Martha Dresher was born nine miles southeast of Geneese, Nov. 28, 1905. When she was fifteen years old she moved with her family to Julietta. In 1922 the family again returned to Geneese. In 1923 Miss Dresher was united in Marriage to Henry Morgan. To this union one daughter was born. Besides these Mrs. Morgan leaves to mourn her death, her parents, Mr. and Mrs. John Dresher and six sisters and six brothers.

Mrs. Morgan spent the greater part of her life in and near Geneese. She was liked by everyone who knew her and leaves a host of friends.

Wages and Profits

Even a child can understand that there must be profits made in any business or it will have to be abandoned.

This thought was emphasized in a recent article by Owen D. Young, who helped Europe get on the financial basis of a going concern.

A paralyzing government investigation into the operation of a business rendering a public service merely because it makes good profits is not logical.

Mr. Young said development of our American industrial system to the point where what is known as a "cultural wage" could be paid—that it wages above mere necessities of life—it being considered by many employers.

How far American captains of industry can go on this line is not known but our country has discovered that a period of general good wages in the period of highest prosperity.

Young At 60, Or Old At 40? Diet Decides

Women are as old or as young as their state of health. A woman may be young at sixty years or old at forty.

Youth and beauty have a foundation in sound health. And food is really the most important item in health.

Blame for round shoulders, flat chest and poor teeth among women is due in large measure to faulty diet.

Because of the concentration of evaporated milk, which is regulated by government standards, it is of double the richness of ordinary market milk.

Ordinary Milk. Fat (lactose) . . . . . 3.5 to 4 per cent. Sugar (lactose) . . . . . 4.5 to 4.75 per cent.

Evaporated Milk. Fat (lactose) . . . . . 7.5 to 8.5 per cent. Sugar (lactose) . . . . . 8.5 to 10 per cent.

A quart of milk a day for adults is recommended by doctors not only because of its high mineral content, but for the reasons that it helps keep the digestive tract in proper condition.

Salads also play an important part in the dietary. Some sort of a salad, lettuce, tomato, fresh fruit, cottage cheese or vegetable, should be eaten at least once a day.

If a woman follows out the rules of diet, childbirths to be easier and less more than an excuse for a celebration.

The President's Cabinet

There have been many who have asked regarding who composed the president's cabinet, and the following taken from the questions and answers department of the Spokesman-Review.

Secretary of state, Frank B. Rowland; under secretary, Joseph C. Klogg; secretary of the treasury, Andrew W. Mellon; under secretary, Garrard E. Witson; secretary of war, Dwight F. Davis; under secretary, Hanford MacNider; attorney general, John G. Sar-

gent; assistant, William J. Donovan; postmaster general, Harry S. New; chief clerk, Thomas J. Howell; secretary of the navy, Curtis D. Wilber; assistant secretary, T. Douglas Robinson; secretary of interior, Hubert Work; first assistant secretary, E. C. Finney; secretary of agriculture, William M. Jardine; assistant secretary, R. W. Dunlap; secretary of commerce, Herbert C. Hoover; assistant secretary, J. Walter Drake; secretary of labor, James J. Davis; assistant secretary, Robe Carl White.

For Better Health PUBLIC HEALTH IS PUBLIC WEALTH COMPILED BY THE PUBLIC HEALTH LEAGUE OF WASHINGTON

SUNSHINE AND RICKETS Let us give you a recipe for making preserves—a kind vastly more important than the ordinary fruit preserving children.

Take a large grassy field, half a dozen chickens, two small dogs, a pinch of brook, a handful of pebbles and two cups of flowers. Put together and stir well.

The above recipe is not new—it has been used for years; but only comparatively recently has it been known, proven by experiments with young animals, that the element responsible for its great value is the sun.

Just what does the sun do for animals (we have long known of its necessity for plants)? Experiments on white rats showed that if one group was kept on a proper diet and in good environment except excluded from the sun, and another group under the same conditions was given access to the sun, the first group would grow nearly as large as the second, but would become soft and their bones would become deformed.

Rickets is a disease extremely prevalent in young children, some of the cases are mild and are cured during the summer by the sun without the condition having been recognized.

Let us be missionaries and generously spread the recipe to preserve children.

PORCHES AND PORCH FURNITURE

By FRANK PRICE HECKEL There is no portion of a house that is more exposed to the relentless buffeting of wind and weather than the porch.

Concerning the color schemes of porches, they should harmonize with the body of the house, though they need not be of the same color.

Next to the porch itself, it is very necessary to decorate porch furniture so that it will harmonize with the color of the porch itself.

It should always be remembered that the rigors of winter storage are very trying on the paint film of porch furniture, so that it usually requires a fresh coat of paint in the spring when it is brought out of storage.

Direct exposure to the sun half an hour three or four times a week will prevent rickets if proper diet is at the same time maintained.

Rickets is a disease extremely prevalent in young children, some of the cases are mild and are cured during the summer by the sun without the condition having been recognized.

Let us be missionaries and generously spread the recipe to preserve children.

Giant Poppy Anchor To Honor Sailor Dead

By ERIC H. PALMER Senior Boy tells in a letter to the Fred-Eisemann Radio Corporation from which these extracts are taken:

How would you like to have your radio reception interfered with quite often by earthquakes?

Usual complaints of American listeners that they are sometimes hampered by interference of one sort or another sink into insignificance when the story of St. Vihary Boy of Guatemala is told.

"Radio is dead before an earthquake," he declares. "It comes in fairly good after the shake is over."

Just like that! What's an earthquake in the life of a real radio enthusiast? Evidently he turned to the KFIU, Alaska, and so many points east, west, north and south that every night brings its novelty.

It is a most interesting story that "Radio is dead before an earthquake," he declares. "It comes in fairly good after the shake is over."

It is a most interesting story that "Radio is dead before an earthquake," he declares. "It comes in fairly good after the shake is over."

Specially Built For Hillside Harvesting

- 1. Can be used with equal success on hillside or level fields.
2. A real 2-man machine. Bagging platform, centrally located, well balanced, men work close together.
3. Header platform is parallel to ground at all times. No grain skipped.
4. Operates equally well up hill or down.
5. Cylinder, 24" long, runs on self-aligning, enclosed ball bearings.
6. Five square feet of grate surface beneath cylinder and main beater provides for immediate separation of 80 to 90 per cent of grain at the cylinder.
7. Wide separator (44") permits straw to spread thinly over straw racks for thorough separation.
8. Air blast of shoe fan is distributed evenly over entire area of shoe screen, whether machine is going up or down hill.
9. Reclaiming device in addition to shoe—similar in action to fanning mill. Cleans grain thoroughly.
10. Power operated leveling device. The operator merely moves a clutch lever—the power does the rest.
11. Screens are automatically leveled when going up and down hill.
12. All bearings supported on brackets attached to the frame not to sheet metal siding.
13. Auxiliary engine same as used in Harvester trucks and tractors. Ball bearing crankshaft.
14. All drive chains are short. Double roller chain and steel sprockets on cylinder drive.

WE NOW HAVE A SAMPLE MACHINE FOR DISPLAY. WE WILL BE GLAD TO SHOW YOU THE MANY ADVANTAGES YOU HAVE WITH A

**Purity of Milk Protected Now By Scientists**

By KATHRYN ST. JOHN

Careful housewives constantly make it a point to ascertain the quality of each item that goes on their tables. Preparing food for the family is an extremely important job, for the proper selection and preparation of foods make in a large measure for the health and happiness of the family.

Milk is the most nearly perfect food, but it is a very delicate one as well. The keeping qualities of milk are slight. Danger from contamination is ever present. Evaporated milk, which is double rich because of the removal of 99 per cent of the water, is science's solution to these conditions.

Safeguarding evaporated milk is worked out as perfectly as man's ingenuity has been able to make the process. From cow to can, the milk which goes into the evaporated product is watched every step of the way.

Cows of the dairy herds are guarded with constant care and are subjected to regular inspections by veterinary surgeons. Herds are carefully grouped, and their yards and barns are kept scrupulously clean, as are all utensils. Milk condenseries are located in the heart of the big dairy regions to facilitate speedy handling, for this is essential if the milk is to be canned at "its moment of maturity." Canvas-covered trucks haul the milk to market, thus protecting the product from contamination on the way. Arriving at the condensery, the milk goes through tests for acidity, sediment, flavor and butterfat content before it is accepted.

Experts watch the progress of the milk through every step of its way. It goes into the evaporating machine; to the homogenizer, which breaks up the fat globules so that the milk may be easily digested by the consumer; by way of the almost human filling machine into sterilized cans; then into the sterilizer, where the cans are surrounded by steam and boiling water, destroying any possible bacteria. Inspectors handle the product, as the last step to see that the canning job has been perfectly done. Labeling and packing follow. The housewife obtains the milk as fresh and sweet as when it came from the cow.

**A LITTLE TALK ON THRIFT**

(By S. W. Straus, President American Society for Thrift.)

It is of special interest and importance to note that a national conference of educators has been called to meet this summer for the purpose of furthering the thrift educational movement in this country.

Reports will be submitted on the progress that has been made in the work of teaching thrift in the schools and plans will be developed for still further developing this great movement.

It is appropriate that the conference will be held in Philadelphia—a city so closely affiliated with the career of America's great thrift apostle, Benjamin Franklin. It is appropriate, too, that this conference, coming as it will on June 29, will be on the eve of the one hundred and fiftieth anniversary of the birth of our nation. Good thrift is good patriotism and any man who practices it contributes directly to the upbuilding of his country.

It will be interesting to learn just how far the work of teaching thrift in the schools has progressed. It was started at the Panama-Pacific Exposition in San Francisco in August 1915 when the International Congress for Thrift sent resolutions to the National Educational Association recommending the advisability of teaching thrift in the schools. Accordingly the National Committee on Thrift Education was appointed as one of the standing committees of the National Council of Education.

During the eleven years, the work has progressed—somewhat slowly at first, but always steadily—and now moving forward with tremendous momentum.

As we all know, lessons learned in childhood take a much stronger hold upon us than those acquired in later life. No person is too old to learn to practice thrift, but it is thrift of effort to concentrate our educational activities on children and young people.

Let the teachings of thrift in our schools be given every encouragement and by doing this we are laying a most substantial foundation for the future progress of our country.

**We handle a complete line of films and**

**KODAKS**

We do Kodak developing and finishing. If you compare my work and prices, I don't think you will find it justifies you to send your work out of town. (There's a trick in all Trades)

You get coupons for enlargements, free from out of town work but if you notice they add in enough to your work so as to make them a good price.

I have installed a new machine for making enlargements from your negatives, and will give coupons to those who bring me their film work at no additional cost on the work done.

Ask for particulars and how many coupons it requires for a free enlargement of your favorite negative.

**A Poor Way to Conserve Timber**

There has been more or less agitation in some sources to conserve our timber resources by substitution by the use of steel for lumber in home building construction. In discussing this proposition, Wilson Compton, of the National Lumber Manufacturers Association, says that the economic consequences of such a substitution would be so widespread, that they deserve consideration. Mr. Compton points out that elimination of the use of lumber would by no means prevent the use of our forests, as many people suppose. He shows that cut of a probable annual drain on our forests of some 25 billion cubic feet, 91-2 billion cubic feet of the amount are for stumps, tops and other material needed for fuel wood; 21-2 billion cubic feet are used for other purposes than fuel and lumber. Substitution of steel for lumber would not stop these losses.

Timber in a crop, not irreplaceable resource like iron, petroleum or coal. A crop can be grown but it will not grow where one now stands, and like other crops, timber wastes if not cut. Mature trees die, decay, balance growth. To restrict utilization of this nature resources would neither increase its value nor benefit industry.
