The surest way to conserve our forests is to keep fire out of them, use the timber as it is needed, and see that our laws and taxation policies encourage the growth of new timber on cut over land.

**"Renewing Mining Resources"**

For years the great East Helena smelter was operated under the curmilling practice of penalizing zinc ores as a metallic menace rather than an asset. The metallurgical world considered that zinc was a pest and the zinc ores were frowned upon.

Now, the improved processes, and the market demand for zinc, makes old slag dumps valuable. It is estimated that the East Helena smelter has 2,000,000 to 3,000,000 tons of zinc slags on its dumps, that can be reworked with a profit.

The old Congress mine in Arizona is said to have \$8,000,000 worth of lower grade ore on its dumps, which once cost fortunes to throw away as waste, but that now can be concentrated as a profit.

Mining is an enduring industrial enterprise. It is the farmer's good friend because of the markets it makes for his produce.

From Idaho to New Mexico, mining has been the basis of prosperity for every mountain state. It has been the great employing and taxpaying industry and it deserves intelligent consideration at the hands of the public.

Quite So

If he finds his thoughts always wandering away in some sort of wool-gathering, he may be sure that he hasn't the business mind.

A small "Classified" adlet will get what you want—or will sell your surplus stuff. Try it.

**Home Recollections**

It's no sixteen page edition that expresses big men's views, and it's not filled up with pictures nor with telegraph news; It isn't printed daily with an "extra" every hour, and the editor's not bragging of his influence or power. It may be crude and homely, but these I will forgive, For its printed in the country, "way back there where I used to live. It's only issued weekly, and it's not made for style, But when it comes I gladly put the daily by awhile, But I see that "Silas Jiggers brought some wood to town today."

And that "Greenhorn Parks is better" Or that "Old Man Jones is dead," And it tells just what the parson in his Sunday Sermon said. I see again the faces of the friends I used to know In the dim and distant fancies of the happy long ago. And I read up in the corner that the fall winds howl and blow And that "Uncle Nathan Smith predicts any early fall of snow." Or "that our debating club has planned a social for next week,

At which our fellow townsman, Abner Brotherton will speak."

There are never learned essays on the question of the day, But it says that "folks are looking for

another raise in hay." I can see no glaring headlines of the last election fight, But I say that "Tom Shaw marries Ella Edgerton tonight." And my thoughts somehow grow fond, or when the old folks' name I see, Telling that Reverend Thomas Thompson was invited there for tea." It may be crude and homely, that same little country sheet, And the make-up of its pages may be rather obsolete; It is damp when I unfold it, and the print is somewhat blurred, Yet it's always more than welcome, and I read it every word. And no reading to a city man a greater joy can give Than the little country paper printed where he used to live.

Can't Have One Without The Other. No agitator who foments strife between two essential elements of production and consumption, performs a worthy service. Capital and labor are one and the same thing; Capital is yesterday's Labor. Labor is Tomorrow's Capital. City and country, office and factory, bank and farm, all are but manifestations of the same thing—human labor.

Chinese elections are now settled by bullets, not ballots. The advantage of this system is that recounts are not necessary.—Ottawa Citizen.

## THE FEMININE TOUCH

By LOWELL OTUS REESE

(Continued from Last Week)

Three days after Jim Hood started to die, every man in Stovell was in bed and the great Stovell typhoid stage was on. Did I say every man? There were two exceptions. Old Shad Popper continued as well as ever. Shad seldom drank water; besides, his internal mechanism had become so accustomed to sinister things that a typhoid germ stood absolutely no show at all. Nor did Sam Duck fall sick. Perhaps the red devil papers he scattered all over the hotel made him immune. I don't know.

The beginning of the epidemic is more or less dim in my recollection. However, I recall two lucid intervals that occurred before my light went out for keeps. During the first lucid interval Birdie Calamus came into the big dining room where she had us all bedded down as though we were in a hospital ward, with old Shad Popper ambulating about, attending upon us and swooning at approximately six-hour intervals of a horrible death.

"This old fuzzy-face is coming along, Miss Birdie," he called. "He's got his sense of humor back. He'll live!"

"I heard Power Terribone insisting in a weak, peevish voice. "You got to talk mul talk to 'em—and you don't know you. They'll just naturally lay down on you if you don't use mul talk to 'em. You don't speak their language!"

"Hed, Shad Popper! you hurry out there and help me hitch up those mules!" was Birdie's only response. "Move fast, too. I'll have the Chuckawalla doctor here before tomorrow night—chuck! he's dead matter scattered all over this desert! Fly!"

"It can't be done, Miss Birdie! It can't be done!" wailed old Pooker. "It takes two whole days to make that round trip—with a regular mule skinner driver!"

But Birdie was gone.

I came out for the second lucid interval to hear the jingle of harness rings, the cracking of a whip and a stream of the most blood-curdling language I ever heard. Under that searing attack the mules apparently broke into a frightened gallop and presently the sounds died away and disappeared down the Chuckawalla stage road.

"He, he, he!" chuckled poor old Pooker Terribone weakly. "Birdie shore does speak their language after all!"

It was many days later when I next struggled back to consciousness. I opened my eyes and found myself peering up into the face of a young man; he could not have been more than twenty-five or thirty, with fuzz on his chin and a mustache which reminded me of a discouraged bunch of alfalfa grass trying to grow on the stony desert soil. With the instinct of an old desert dweller I guessed that he was a tenderfoot—and not over a year out of college. He had a spon in his hand.

"Drink this!" he said.

I cordially invited him to go to a

climate even hotter than Stovell's famous cauldron, uttering the words with the most strenuous effort with which an exhausted sleeper strives to throw off a nightmare.

"Drink it, I tell you!" he repeated, advancing the spoon. I tried to ward off the threatening invasion from my lips, but I discovered that I hadn't the strength to move my hand. "I won't!" I muttered peevishly. "Who are you?"

"I'm the doctor," said the tenderfoot. "And if you don't open your homely face and swallow this dope, you thundering old lizard, I'm going to punch you in the eye!"

Some way or another the idea of this soft-handed tenderfoot threatening to punch me in the eye struck me as the funniest thing I had ever heard. I giggled, the puerile giggle of a two-hundred-pound man who has been reduced to a mischievous child. The doctor had half turned and grinned over his shoulder.

"This old fuzzy-face is coming along, Miss Birdie," he called. "He's got his sense of humor back. He'll live!"

"I heard Power Terribone insisting in a weak, peevish voice. "You got to talk mul talk to 'em—and you don't know you. They'll just naturally lay down on you if you don't use mul talk to 'em. You don't speak their language!"

"Hed, Shad Popper! you hurry out there and help me hitch up those mules!" was Birdie's only response. "Move fast, too. I'll have the Chuckawalla doctor here before tomorrow night—chuck! he's dead matter scattered all over this desert! Fly!"

"It can't be done, Miss Birdie! It can't be done!" wailed old Pooker. "It takes two whole days to make that round trip—with a regular mule skinner driver!"

## RALLY TO PUBLISHER'S DEFENSE

Bernard Macfaden, one of the world's largest publishers, who was recently attacked in an article in the Atlantic Monthly. Over two thousand ministers have rallied to his defense.

brassy sun glared upon Stovell with a withering heat.

"Yes," I cordially agreed with Doc. "This is a wonderful place!" For no man can see anything but beauty in his own home. Whereupon I invited Doc to settle with us permanently.

"This place has a great future," I told him. "And all the boys are strong for you. They've asked me to talk to it over with you."

"But Doc grinned and shook his head. "Buck," he said, "I don't begin to tell you how I wish I could do what you want. But I can't. You see, Chuckawalla merely loaned me to Stovell. I promised to go back as soon as you boys were able to stand and smoke again. I should have gone sooner; but—but—"

I didn't say much for a few minutes. Then I told the doctor something that had been lying grievously upon my soul.

"Doc," I said, "when I was coming out of my fever I called you—a tenderfoot!"

Doc laughed till he cried and then I saw that he was more than ever a boy, with a cowlick that wouldn't stay in place and a mischievous eye that had not yet learned to watch the world for envy and hate and selfishness. "Well, Buck," he said, "I am a tenderfoot; ain't I?"

"You're a liar!" I told him hotly. "Doc, you're a whole flock of wild cats!" And Birdie Calamus is an angel!

As I fell asleep I heard the doctor's voice again. "That's the last one!" he croaked. "We've saved 'em all, you and I! Miss Birdie, there isn't a woman in the world who could have done what you've done—"

"Nix, kid—nix!" Birdie's voice responded. "I'm too tired to listen to the stuff, Doc! I'm sleepy, boy—I'm tired to death!"

And the last thing I heard as I went to sleep was the sobbing of a terribly exhausted girl and the voice of a tired young doctor soothing her. Everybody was up again. None of us was strong enough to brag about, but the rest was simply a matter of good food and religious shamming of Ab Linder's brew. There was no particular reason why the young doctor should not go, yet unaccountably he tarried.

"I like Stovell," he said one day. "It like the climate and the—er—the scenery..."

Doc and I were sitting on the porch of the hotel one evening when he made this remark. Inside the hotel Birdie Calamus was singing. Back in the kitchen Sam Duck was singing too. It sounded like a cat fight, but poor Sam Duck was not aware of this.

But, rising bare and waterless against the sky, paled by a thousand centuries of storm-driven sand, made bald by a million years of fierce sun baking his ancient head. I viewed the shriveled desert waste, crowding hospitably about us and sweeping away to the blue Panhandle lying drunk from the east. Above us the

**PETER B. KYNE TO HUNT BEAR IN B. C.**

VANCOUVER, B.C.—Peter B. Kyne, well-known novelist and magazine writer, will visit British Columbia this month. He is after grizzly bear and will be taken on a hunt into the Columbia Valley by Jim French, well-known big game hunter, who enjoys the reputation of always introducing his clients to the grizzly.

**BIRD BUILDS NEST IN GLOVE**

VANCOUVER, B.C.—Strange places have been chosen by birds in which to construct their nests, but perhaps one of the strangest was that chosen by a wren at Rostown, Vancouver Island. Last fall a gardener there left an old glove hanging on a nail in a tool house. This spring when he returned, he found a wren had built her nest in it. In time five tiny eggs were laid and now there are five fledglings. The wren is not the least wild flurried by the sensation she has created in the district.

## FROM THE EARTH'S FOUR CORNERS

THE American appetite is an exacting sovereign. It demands rare delicacies from the four corners of the earth and accepts no excuse in the way of innumerable experimental recipes. Ice cream flavored with bananas. This was new. It was also palatable. The demand for it increased so rapidly that it became necessary to engage someone in the banana importing business to supply the thousands of bunches which were used for this purpose. During one month, 3,734 bunches of bananas were imported into the city. There are about 120 bunches to a bunch.

There is another aspect of this business of satisfying the American appetite. Bananas are exported chiefly from Central America and the West Indies. To secure this flavoring for one of the dozens of fruit and nut ice cream flavors manufactured, a healthy importing business is involved. The port of New Orleans is the chief banana admitting port in the country. Last year it admitted 20,000,000 bunches, while New York, Philadelphia, Mobile, Baltimore and Boston did their share to apply this tropical fruit to the country.

But the difficulty of securing this and other exotic fruits is not good reason why Americans cannot have banana ice cream whenever the idea strikes them. Surely no magnificent potatoes were ever catered to as are the citizens of this vast nation.

**Holstein Fieldman for B. C.**

P. H. Moore, British Columbia director of the Canadian Holstein-Friesian Association, announces the appointment of Harold Steves, as fieldman for British Columbia.

Mr. Steves is a native son of British Columbia, and the oldest son of J. M. Steves of Stevenson, pioneer Holstein breeder of Lualaba Island, whose father was a Holstein breeder before him. For more than 40 years the Steves have been prominent Holstein breeders in British Columbia, during which time they have been actively engaged in the breeding and developing of some of the best cattle produced in the Pacific Northwest.

Harold Steves received his B. S. A. at the University of British Columbia, graduating in the class of 24. In 1922 he was high man on the dairy judging team at the Pacific International Livestock Show at Portland, Oregon. Mr. Steves' appointment is being enthusiastically received by the Holstein breeders of British Columbia, where he has served for many years as secretary of the B. C. Holstein Breeders' Association.

**Adopt Poultry Program in Thurston County**

The Poultry Association of Thurston County has adopted an educational program of work. It includes securing 15 per cent increase in accredited flocks; securing 30 completed entries in the home egg laying contest conducted by the State College Extension Service; securing records on brooding of 30,000 chicks; having a local poultryman discuss a timely topic at each meeting, followed by an open discussion; and continuing the policy of getting outside speakers when possible.

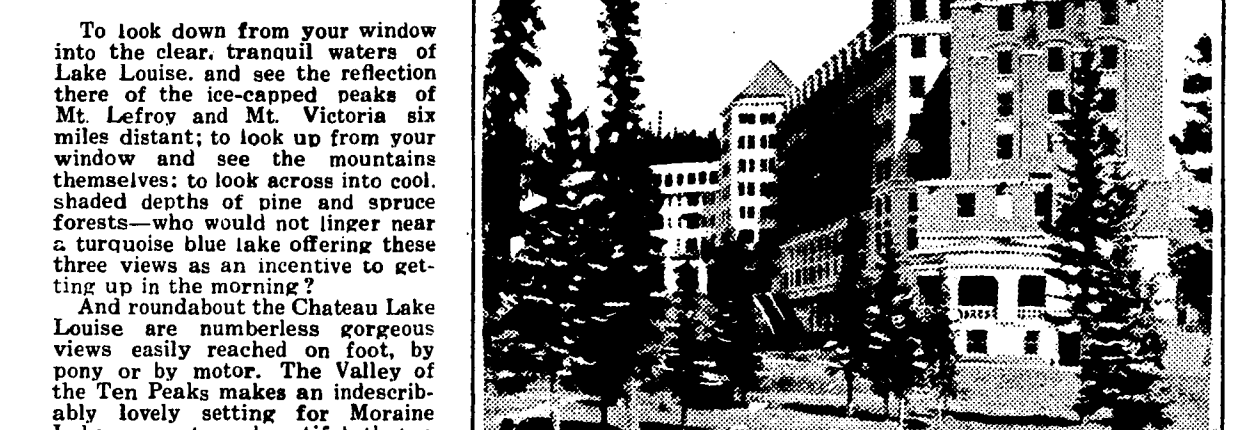

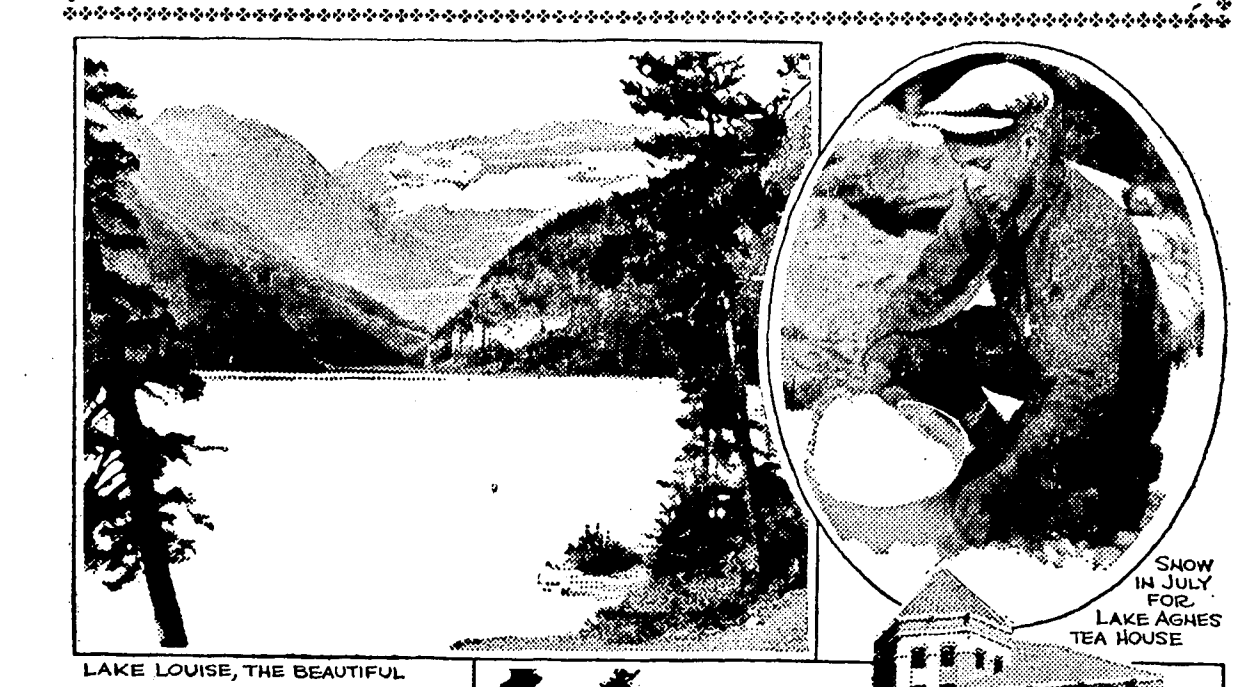

**Skagit County Men Buy Partnership Sire**

D. M. Donnelly and Peter Omdal have purchased a partnership sire from the Northern State Hospital herd. Its breeding shows a splendid production combined with show ring achievements. The dam, Norlum Wayne Sade Vale, was grand champion female at the state fair in 1925. On test in heifer form she produced 11,574 pounds of milk and 938 pounds of fat. On official test at the beginning of her second lactation period she produced 30 pounds of butter in seven days, placing herself in the class of distinguished Holstein producers.

It's not what you do with a million. It's a million what you do with your lot. But it's what you are going to do. With that one eighty-five you've got.

King county farmers have ordered a total of 321,000 pounds of pyrotol, the government explosive, since September 1, 1925. This is sufficient to clear approximately 1,500 acres of land.

## The Chateau on the Mile-High Mountain

To look down from your window into the clear, tranquil waters of Lake Louise, and see the reflection there of the ice-capped peaks of Mt. Laford and Mt. Victoria, five miles distant to look up from your window and see the mountains themselves; to look across into cool, shaded depths of pine and spruce forests—who would linger near a turquoise blue lake offering these three views as an incentive to getting up in the morning?

And roundabout the Chateau Lake Louise, a number of gorgeous views easily reached on foot, by horse or by motor. The Valley View is a spot so beautiful that it is being built there in order that tourists may linger day after day on the mile away from Lake Louise. Paradise Valley has been recently named. If paradise itself should be half so beautiful, the views away by each mountain breeze, nodding their approval of the scene. These popples were planted by a member of the royal

## COW TESTING REPORTS

**SAYS COW TESTING PROFITABLE**

J. K. Conger, of Covolt County, who was a consignor of Jerseys to Col. C. E. Payne's May community sale here at Chehalis, considers that the prices received for his cattle, that he has been paid for his membership in the Lewis County Cow Testing Association. In remitting his testing association dues he writes Glen Gleason, the secretary, as follows:

"I am sending my check for last month's testing. You may say to the members of the Cow Testing Association that I feel that I have been well repaid for the money spent testing. I sold seven heifers last Saturday that had not freshened and three in fact were not bred. I feel satisfied that I got enough extra for those seven heifers to pay all that. I was out for the production of 14 pounds of fat per cow, sold at very satisfactory prices."

Mr. Conger has been a member of the testing association for the past three years, so is in a position to measure fully the benefits to be derived from the work.

**GRAYS HARBOR**

There were 25 herd numbering 336 cows in the Grays Harbor cow testing association during April, of which 332 cows were under test. Of this number 296 gave an average production of 35.4 pounds of butterfat from an average of 819 pounds of milk. Eighty-one of these cows produced over 40 pounds of butterfat; while 27 exceeded 50 pounds of fat during the month.

In herds of 16 or more cows Joe Bilyeu's 27 purebred and grade Jersey cows led with an average of 40.9 pounds of fat from 806 pounds of milk. The high producing cow of this herd was the 7-year-old grade Jersey "Priscilla," credited with 62.6 pounds fat from 1,224 pounds of 5.2 per cent milk. She freshened on March 15, last. Parker Askew's 19 purebred Jerseys occupied second place in this class with an average of 39.4 pounds fat from 749 pounds of milk. The high cow in this herd was the 10-year-old Octor "Lily," credited with 56.9 pounds fat from 1,185 pounds of 4.8 per cent milk. She has been fresh since February 16; John Taylor's 19 purebred Jerseys were third in the list, with a credit of 38.7 pounds of fat from 793 pounds of milk. Mr. Taylor's high cow was the 4-year-old Frances "Octor," credited with 62.6 pounds fat from 1,224 pounds of 5.2 per cent milk. She has been fresh since February 25th.

In herds numbering under 16 head John Martin's eight head of purebred Jerseys stood at the head of the list, with an average of 46.9 pounds of fat from 855 pounds of milk. The 3-year-old Maj. Royal Buff was honor cow in this herd with a production of 52.4 pounds of fat from 888 pounds of 5.9 per cent milk. She has been in service since September 28; R. O. Beckwith's seven grade Jerseys were second in this class credited with an average of 43.8 pounds fat from 818 pounds of milk. The 4-year-old grade Jersey "Poly" was high cow in this herd

**KING COUNTY**

Production for the month of May just about equaled that of April, 1,107 pounds of 5.2 per cent milk. She was fresh September 25 of last year. James Clark's 11 Jerseys occupied third place with an average production of 41.6 pounds fat from 997 pounds of milk.

The Jersey herd owned by the H. L. Allen Co. of Duval increased its April production of 14 pounds of fat per cow to a 51.0 pound average for a herd of 25 cows. This is the high herd for May. Allen's St. Mawes Mary Ann, bred by the above firm, was high cow for the month with 86.3 pounds of fat, and 1,629 pounds of milk. This cow was milked but twice per day. Twenty of the above herd exceeded forty pounds of fat for the month of May.

C. C. Calavan's herd which was high herd for April with 62.5 pounds of fat dropped slightly, producing an average of 50.6 pounds of fat for the month of May, and 1,346.5 pounds of milk.

These dairymen are taking advantage of the low grain prices and are maintaining good production in view of fairly good milk prices.

HAROLD DEMPSEY, Tester.

**CLALLAM AND JEFFERSON**

In the Clallam and Jefferson Association for May a total of 733 cows in 48 herds were tested. Five hundred and thirty on the standard plan averaged 918 pounds of milk and 41.4 pounds of fat, test 4.5 per cent. Three hundred and seventy-nine produced over 40 pounds of fat with 152 over 50 pounds.

A. A. Schneck of Sequim topped the list for production, his Guemsey herd of 32 head averaging 1,122 pounds of milk and 50.1 pounds of fat. In second place was James Lotzessell's herd of 29 that averaged 1,129 pounds of milk and 48.9 pounds of fat. Max Schuch of Sequim topped the list for 1,161 pounds of milk and 48.0 pounds of fat for 33 cows.

Wolf and Hohn of Sequim carried off first and third in the mature cow class with a pair of good grade Holsteins that gave 1,975 pounds of milk and 79.0 pounds of fat, and 1,910 pounds of milk and 72.6 pounds of fat, respectively. Second was Sunshiner, owned by Gould and Knapp at Port Ludlow, with 1,367 pounds of milk and 76.6 pounds of fat. Six mature cows and two 4-year-olds produced over 70 pounds of fat. E. A. Schneck taking the first three places in the latter class with two grade Guemseys and one grade Jersey that made 73.7, 72.3 and 64.5 pounds of fat with an average

## REACH DECISION ON USE OF PRISM LIGHTS

That prism sidelights only will be required on boats operated on Puget Sound was the decision reached this month at a conference of the Steamboat Inspection Service and Coast Guard officials with representatives of tugboat operators. The regular classes masthead and range lights can be used as under present practices.

When the Coast Guard stopped a number of tugboats recently for showing only prism sidelights, W. T. Isted, secretary-treasurer of the Northwest Tugboat Owners' Association, asked for a conference so that the Motorboat Act of 1910 covering the situation could be definitely interpreted.

It was estimated that it would cost tugboat owners nearly \$20,000 to equip their tugboats with additional prism lights if this decision had not been reached.

EDMONTON, Alberta.—A trial shipment of Alberta-grown meat has been sent to Belgium and if it suits the needs a considerable trade is anticipated. About two tons of marketable meat was frozen and shipped on a definite order from Brussels and a shipment was also made to Japan where there is a potential market. If the results are satisfactory a profitable method of disposing of scrub horses will have been developed.

From 25 cents to \$1 a quart is the price received for only strawberries by the Florida raisers who catch the earliest markets by shipping in the "pony refrigerators" owned by the big shippers. Some 21,000 of these "ponies" take care of the early Florida crop as it is rushed north to the big metropolitan centers for consumption in strawberry shortcake, pies, and fresh fruit desserts, says the research Department of the National Association of Farm Equipment Manufacturers. From 1500 to 10,000 quarts an acre are harvested by growers.

### THE PERSON MAKES A FARM PAY BETTER

Farm Accounting Reveals Losing Methods and Points Way to Bigger Profits.

(From Banker-Farmer)

A farm cannot properly be called successful unless it pays a fair rate of interest on the investment and returns fair wages for the farmer's labor. Agriculture is considered by all odds the most important industry in the world, and yet in no other industry is the business end so neglected.

It is common to find a farmer with an investment of fifteen or twenty thousand dollars, yet does not keep books? Perhaps he may jot down a note now and then of an important deal, but this is of no value in an analysis of his business as a whole. No other industry, however small, is carried on without books of some sort.

Farming is a business and to be successful must be conducted in a businesslike way. The business man's mind should have indelibly printed upon it two questions: "What is my business making? How can that profit be increased? To know the latter, one must find out the former; and to find out about profits requires the keeping of books.

It is not necessary for a farmer to have a course in bookkeeping. Almost every agricultural college in the country has issued a simplified farm accounting book which it sells at cost, and only a few minutes are required each day to jot down the day's happenings.

Accounts increase profits. Instances number a thousandfold where farmers have profited by knowing their business. Accounts kept by nineteen farmers in Illinois led them to improve the organization and operation of their farms in ways that added approximately \$50 to their average net income in 1922, the seventh year they had kept accounts.

An Iowa farmer found at the end of the first year he kept books that profits to livestock brought more money than when sold outright. His figures showed that his cows were poorer compared with other farms in the state, he found the number of acres cultivated per man on his farm, as well as the number of acres per horse, were below average. He rented more land and replanted his fields, so that the crop areas per man and horse were increased. He sold some of his scrubby and bought good cows. The second year his income from the farm, after paying all expenses and interest on the money invested, had been increased over \$500.

Cows Can Be Regulated. "I have discovered," says one farm bookkeeper, "that the kind of man you have on a job, as well as the particular nature of the work, makes quite a variation in the cost of performing certain tasks. I have learned from the pages of my book that if I could have increased the yield of my corn by field by two bushels and my corn by five bushels I would have realized a substantial profit from them."

While the farmers may not be able to fix prices on their products, they do have a voice in determining the costs of production. To reduce this cost they must first know what the costs are.

The number of farmers who are keeping books on their business has increased remarkably in recent years, but the number of businesslike farmers is woefully small when listed alongside the sum total of the farmers in the country.

Inventory is indispensable. The basis of any system of farm accounting is the annual property list or inventory. It is the starting point of the farm records. One must take into consideration decreases or increases in the value of all property owned to gauge the progress of the business. Leading facts as to the value of his property, no business man can form an accurate estimate of how he stands financially. Increased cash may be due to property which was sold, or increased debts may be due to improvements made. If a farmer is falling behind, the inventory will emphasize this fact. Often when a man is discouraged and thinks he is making no progress, his inventories will tell him that he is better off than he thought.

At the end of each year a financial statement is drawn off. This is the farmer's rating and no farmer with a good financial statement need fear walking into a bank and asking for a loan.

### The Farmer Can't Stand Much More Help Like He Has Been Getting

Congress say they are helping the farmer. They are in Washington ON salary. He is home trying to pay it. Farmers have had more advice and less help than a wayward son. If advice sold for 10c a column, Farmers would be richer than Booleggers. And when they get all through advising, there is just one thing will help the farmer. That is eliminate some of the middlemen and let the two ends meet. The Consumer and the Producer are two men in America that have never seen each other. Cut out the middle and tie the two ends together.

When a steer starts from the feed pen to the table, there is about 10 to take a bite out of him, before he reaches the family that pay for him. Who wears the best clothes or drives the best car, the fellow who raises a bushel of wheat, or the work ing fellow who goes up to buy a sack of flour? Why neither one of them. The ones in between these two have their private Tailor and "Straight Eights."

The Government just told Agriculture, "You are in a hole." They didn't offer to pull them out, but they did say, "We will get down in there with you."

I want to tell you right here, I don't know what would have happened to the poor farmer if it had not been for his old friend, "Bull" Durham. It's the only thing he has been absolutely able to rely on. And I want him to know that myself and "Bull" Durham are with him right to the poor house door.

### How Butter Fat in Milk Is Broken Up

Do you know what the word homogenization means? Ninety-eight out of 100 homogenized milk receives to whom the question recently was put admitted they couldn't answer. Can you? Here it is explained by Miss Mera H. Given, food authority doing research work at the University of Chicago.

"Homogenization," says Miss Given, "is the name of the process which breaks up butter fat in evaporated milk into tiny particles so they blend evenly with the solids. Homogenization causes the butter fat globules to adhere to the albumin and the casein of the milk. In the process, milk is forced through countless numbers of openings at a pressure of around 3,500 pounds.

"In addition to preventing a cream and skim milk line, this breaking up of fat contributes to smoothness and perfect blending of foods such as cream sauces, soups, ice cream and in baked products.

"It also has a digestive advantage for those who have difficulty in assimilating milk. Many pediatricians recommend evaporated milk as a baby food, although, like other substitutes for the natural supply, it should not be considered as a food complete in itself. Addition of orange or tomato juice, barley water or lime water are important in providing adequate diet for the infant.

"As authorities recognize that normal mother's milk is the best food for infants, but this natural milk is frequently inadequate in quantity and quality. Scientists say cow's milk is the best substitute. But cow's milk must be modified and supplemented with other foods. The fat in mother's milk is in homogeneous suspension and being flocculent forms small curds in the stomach, but the fat in cow's milk is in relatively large globules, forms large tough curds in the stomach and is much harder to digest. In evaporated milk the fat is broken up by homogenization and the curds softened until in size and digestibility they resemble natural infant food."

### "A NEW RANGE WITH A CLOCK"

From the great Westinghouse institution, with its wonderful resources and genius, comes a new electric range to serve average size families.

This is the new Westinghouse Junior Cabinet.

The Price Is Greatly Reduced—The Down Payment is Reduced—The Monthly Payments Are Very Low

For months we have been preparing for this sale—we have assembled a huge quantity—increased our installation facilities so that you are assured a modern electric kitchen within a few days after you make your down payment of \$4.75 down. All ranges installed in order of purchase.

WESTINGHOUSE RANGE INSTALLED COMPLETE FOR

**\$4.75 DOWN**

BALANCE IN EASY MONTHLY PAYMENTS

## At a Greatly Reduced Price and Special Terms We Present The Westinghouse Junior Cabinet Electric Range

A Complete Electric Kitchen for \$194.75

Here are the various items that go to make a complete electric kitchen. The entire equipment, beginning Monday and for a short time only, will be placed in your home ready for use at a greatly reduced price and \$4.75 down. Here are the price details:

- A JUNIOR CABINET WESTINGHOUSE ELECTRIC RANGE, \$134.75
- ALL NECESSARY RANGE AND WATER HEATER WIRING, 40.00
- A CORRECT SIZE WATER HEATER, 10.00
- FIBREFORM COVER FOR HOT WATER TANK, 10.00

Total price for a complete electric kitchen, installed and ready for use, 194.75

Same model in all over gray enamel finish may be had at a slight increase in price.

Distinctive Features of the Junior Cabinet Range

- The clock turns on the heat and starts the cooking without supervision.
- The automatic switch turns off the heat when the proper temperature is reached and the cooking is completed by stored heat.
- The enamel oven will not rust.
- The removable oven racks and trays make it easy to clean all parts of the oven.
- It has a white finished cooking top with three large heating units.
- All switches are plainly marked. There are three heats for each unit.
- It is clean—no dirt, soot, or fumes.
- It is accurate—no fear of over cooked or under cooked food. It is easy to operate—once the time is set there is no further operation.
- Ovens are enamel, have rounded corners, making them easy to wash.
- No waste energy—cooking completed by stored heat.
- It saves—where a five pound roast is required with a fuel range, a four pound roast is ample with an electric range.

# Pacific Northwest Advisory Board of Shippers Will Meet at Tacoma June 30

Livestock Men Will Hold Special Session

By DONALD C. STEWART

**H. J. Arnett**  
Secretary

**L. C. Foster**  
Asst. Secretary

**A. F. S. Steele**  
General Chairman

**J. A. Swadwell**  
Executive Secretary

INTEREST in railroad transportation and service has been on the increase since the formation of the Pacific Northwest Advisory Board late in 1925 and attendance records at the third regular meeting to be held in the Hotel Winthrop, Tacoma, on June 30, are expected to shatter all records.

The meeting will open at 9:30 and will continue through the day. The Traffic Club of Tacoma will be host to those attending at a luncheon at noon when Judge George T. Reid, vice president, Northern Pacific Railway, will be the principal speaker. Mayor Tennant of Tacoma will give the address of welcome.

The livestock men of the Northwest will hold a special session the day before the general meeting. They will gather at 10 a. m. in the Winthrop hotel to discuss special problems of vital interest to their industry. Their subject was so big that leading shippers wanted to discuss their needs before the heavy livestock shipments start in September. C. E. Howell, of the Cattle & Horse Raisers' Association of Oregon, and chairman of the sub-committee on livestock, will preside.

The Pacific Northwest Advisory Board is an organization of carrier patrons of railroads directly or indirectly interested in shipping and receiving freight. Anyone is eligible for membership and there are no fees necessary to join.

The board is composed of a general chairman, a vice general chairman, executive secretary, secretary, and an executive committee of 15, and 21 commodity chairmen and vice chairmen, all of whom serve without compensation, defraying their own expenses to and from meetings. The general membership embraces 650 shippers, receivers and distributors.

A. F. S. Steele, general manager, Apple Growers' Association, Hood River, Oregon, is general chairman, and R. W. Vinnebeck, president, North Bend Timber Co., North Bend, Wash., is vice general chairman. J. A. Swadwell, chairman of the board, Dexter-Horton National Bank, Seattle, is executive secretary. H. J. Arnett, district manager, American Railway Association, 1187 Dexter-Horton Building, Seattle, is secretary. L. C. Foster is assistant secretary for Oregon.

The regional chairmen are J. C. Ainsworth, president, U. S. National Bank, Portland; A. R. Currie, vice president, Ryan Fruit Co., Seattle; J. P. McGoldrick, president, McGoldrick Lumber Co., Spokane; William Pollman, president, First National Bank, Baker, Oregon, and Huntington Taylor, vice president and general manager, Edward Rutledge Timber Co., Coeur d'Alene, Idaho.

The first advisory board was formed at Minneapolis in 1923 as an experiment. The movement has been so successful, and its benefits so uniformly helpful to shippers and carriers alike that 13 boards have been formed so that now every section of the United States is covered. The Pacific Northwest board embraces Washington and Oregon, that part of British Columbia served by United States railways, Idaho north of the Salmon River, and Montana west of the Snake River. Officials of the livestock associations and the shippers themselves. Under the Colorado plan shippers are requested to place their orders for cars at least two weeks in advance of when they are to be loaded. Most shippers plan to reach the Denver market on Monday morning. When orders for cars are placed in advance the railroad traffic officials know when more cars are expected than the market can handle on that day and this information is relayed to the livestock breeders through his organization, with the suggestion that shipments be delayed until later. Before this plan was adopted the market was usually glutted early in the shipping season and seldom recovered and low prices of making and applying rigid statutes. It substitutes the cooperative law which may be changed overnight for legislative acts, which require a long time to effect and equally as long to modify or cancel.

Without the intent to reflect unfavorably on the ability of the staff Interstate Commerce Commission, it might be pointed out that its report

vided into two groups, (a) fir and (b) pine. The chairman of these groups select their membership so as to include competent representation from each section of the territory.

Grains, fruits, vegetables, livestock, paper and every other basic commodities are similarly organized. They assume the duty of analyzing and forecasting transportation demands in the territory. They are organized to meet their analyses to the general chairman at meetings held every three months. In territories where boards have been functioning sufficient time to become thoroughly organized, these forecasts or estimates, have been surprisingly accurate; in some cases having come within an infinitesimal fraction of actual tonnage moved in the territories whose forecasts were made.

Until this plan began functioning; that is, where shippers analyze their own transportation requirements, there has never been a year since 1907 when business was not in actual or suspense as to whether or not a car shortage would develop.

Herbert Hoover has estimated the loss to industry and agriculture in 1924, account of car shortage, at a billion dollars. In 1922 there has not been an actual car shortage and contrary to the usual opinion the railroads have not bought additional freight cars comparable with growth of traffic. To illustrate, in 1921 car loadings amounted to a little over 39 million; in 1925 they amounted to a little over 51 million, or an increase of about 23%. Freight car ownership has increased 1.7% and freight car capacity a little over 2% or a total freight carrying capacity of about 4 1/2%. Had it been necessary for the railroads to continue to build cars comparable with growing traffic, the primary benefits of this plan are to the cattle raiser and stock breeder, the railroads are greatly benefited by reason of avoiding extra service since the movement of equipment may be arranged to correspond with the orderly flow of cattle to the markets.

H. J. Arnett, secretary of the advisory board and district manager, American Railway Association, was formerly located in Colorado and personally worked with Dr. B. F. Davis, chairman of the livestock committee of the Central Western Shippers' Advisory board in putting over the plan. He states that the main reason why it was successful was through a general conference when practically every product section was adequately represented. He has written a number of prominent men in this territory asking them to use their influence to have representative men attend the Tacoma meeting.

In a report of the results of the plan during 1925, Dr. Davis said:

"In trying out the plan of orderly marketing of livestock in the Denver market the feet that was handled as nearly as perfectly as it could be handled. The association wants to say to the advisory board that they are very grateful for the assistance they have given them in the orderly marketing of cattle. We especially appreciate the advice, information and those employees who assisted in giving advice on information that was so helpful in guiding us what to do."

"As the result of this advance car program, we were able to post a bulletin on Friday the arrival of the following Monday, and there were times when we were sure within one day of the number of cars that would be shipped to points other than Denver. We were able to make a definite determination to the stockyards, to the packers, and to the commission men, as to the advance information to the number of cars they will require to move from Denver besides the livestock that will come in. There were three or four days when sold at 11 a. m. did not get out of Denver for two, three or four days, as a result of car shortage. That has been overcome since the advance car program was reshipped before 6 p. m. the same day. We believe this advance car information and the manner in which the shippers handled the railroads, has been a great advantage to the railroads."

"We recall one railroad in 1924 had 462 cars of cattle in Denver one day. I think that was nearly all the cars they had. In 1925 they handled the same amount 3,000 more cattle and never had more than one car in Denver at any one time."

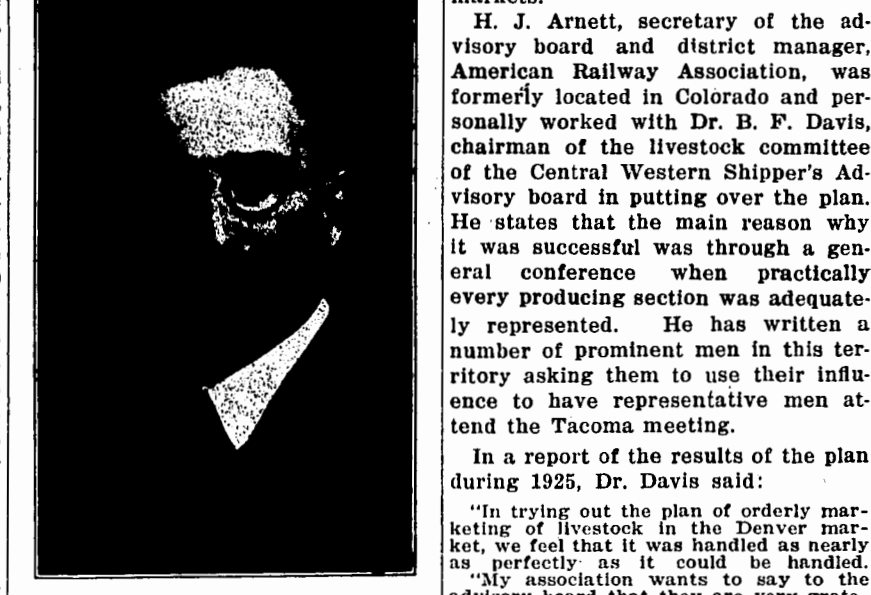

Railroads have authorized the sale of special round trip tickets on the certificate plan of a way fare for a round trip for this meeting. Advisory board officials are hopeful that every livestock producing section of the Pacific Northwest will be represented at the meeting.

During the month of November, 1925, we handled 3,000 more cattle than in November, 1924, without congestion. The movement of cattle to points outside of Colorado in a way we have outlined 10 per cent less than the year before. In November, 1925, we handled 3,000 more cattle and never had more than one car in Denver at any one time."

"Last year we were able to market in Denver on Monday about 50 per cent of cattle that arrived in any one week during September, October and November, and about 50 per cent arrived on the other four or five days of the week.

## Livestock Shippers Plan Special Meeting to Discuss their Problems

Board is seeking the same objectives attained in Colorado, Southern Idaho, Utah and Wyoming; that is, to eliminate every element possible of removal contributing to market glut. While the primary benefits of this plan are to the cattle raiser and stock breeder, the railroads are greatly benefited by reason of avoiding extra service since the movement of equipment may be arranged to correspond with the orderly flow of cattle to the markets.

C. E. HOWELL

The meeting will be held at 10 a. m., at the Hotel Winthrop.

An open invitation to attend this meeting has been sent to county livestock associations, meat packers, commission men, bankers and business men interested in the industry. The state livestock association of Oregon has passed a resolution instructing each local association in that state be represented.

Transportation as it affects cattle-men and livestock raisers will be the principal subject on the program of this special meeting. The committee's report on prospective livestock transportation and economic conditions will be read and there will also be a discussion of the plan for orderly marketing that has worked to the benefit of stockmen into the Intermountain district shipping into the Denver market.

This plan has been worked out between representatives of the railroads, officials of the livestock associations and the shippers themselves. Under the Colorado plan shippers are requested to place their orders for cars at least two weeks in advance of when they are to be loaded. Most shippers plan to reach the Denver market on Monday morning. When orders for cars are placed in advance the railroad traffic officials know when more cars are expected than the market can handle on that day and this information is relayed to the livestock breeders through his organization, with the suggestion that shipments be delayed until later. Before this plan was adopted the market was usually glutted early in the shipping season and seldom recovered and low prices of making and applying rigid statutes. It substitutes the cooperative law which may be changed overnight for legislative acts, which require a long time to effect and equally as long to modify or cancel.

Without the intent to reflect unfavorably on the ability of the staff Interstate Commerce Commission, it might be pointed out that its report

## A Brief Picture of the Progress of Business

YEAR	Total value of goods shipped by railroads	Total value of goods shipped by express	Total value of goods shipped by motor carriers	Total value of goods shipped by water carriers	Total value of goods shipped by air carriers
1921	39,323,158	3,276,930	2,276,930	2,276,930	2,276,930
1922	43,297,581	3,600,630	2,500,630	2,500,630	2,500,630
1923	43,812,113	4,000,000	2,500,000	2,500,000	2,500,000
1924	45,534,443	4,044,536	2,500,000	2,500,000	2,500,000
1925	51,177,962	4,264,830	2,500,000	2,500,000	2,500,000

the advantage in increased profits and sales of surplus stock.

**Business Transacted**

The election of officers followed the reading of the reports. Robert Scoville of New York was re-elected president for the ensuing year; William H. Caldwell of New Hampshire was retained as first vice president; Gage E. Tarbell of New York was elected second vice president to succeed to late James A. McShoy of Ontario, Canada. E. T. Gill of New Jersey and S. M. Shoemaker of Maryland were re-elected to serve three years on the executive committee.

Investigation of the subject of advanced register testing during the past few months indicates that the one day test is fully as reliable as the two day test. In view of the fact that the universal use of the one day test will save Guernsey breeders upwards of \$20,000 a year its adoption was recommended and accepted.

The remainder of the meeting was given to a discussion of the painting of the ideal type Guernsey cow and bull, as prepared by the artist and the committee on judging standards. The same committee will be continued in office until the completion of the task.

Members of the club came from as

far as the Hawaiian Islands and the Pacific states to New England on the east coast.

**The National Guernsey Sale**

The annual sale of the national sale of the Guernsey breed, the national sale, was held at the new Chicago Riding Club, Chicago, Illinois, on Thursday, May 13.

The 69 head sold for a total of \$73,525 or an average price of \$1065.63. Of these nine were bulls that averaged \$1877.77, and 60 were females that sold for an average of \$943.35. The cattle were purchased by 21 buyers from nine states, ranging from North Dakota to the Atlantic coast.

Twenty head were purchased by Illinois breeders and Minnesota followed closely with 19. Guernsey breeders at the sale welcomed the addition to their ranks of Mrs. Chauncey McCormick of Chicago and Naperville, Illinois, who purchased 10 head for a total of \$15,150. Among them was the top priced bull of the sale, May Rose Cherub 70934, purchased for \$5000 from the consignment of the Guernsey Guernsey farm of Idaho. G. N. Dayton of Minneapolis, Minn., was another strong purchaser, with nine head at \$7075. J. C. Penney of Hopewell Junction, N. Y., always a good supporter of Guernsey sales, bought six head costing \$12,825.

An interesting incident of the sale was the consignment of one excellent cow by a farmer of northern Wisconsin who is struggling to make a living on his rather poor land. This man, August Johank of Moushau, Wisconsin, consented to send his good cow to the sale, on the assurance of the sale manager, Charles L. Hill, that she would bring \$500. She was bought by Mr. Penny for \$2100, a sum that means untold encouragement to Mr. Johank.

**THE END OF A PERFECT PICNIC**

"And so we came to the end of a perfect day," said Ma. "I hope all your children have thoroughly enjoyed your picnic."

Chorus of "Yes, Ma."

"Then let's pack up and get ready to start for home. Johnny!"

"Yes, Ma."

"Have you scattered the Sunday paper all over the clearing?"

"Yes, Ma."

"Mary Ellen, have you smeared the left over jam on the bench?"

"Yes, Ma."

"William, break those two milk bottles and hide the glass that she place under the big tree."

"Yes, Ma."

"Myrtle, hurry up and finish tramping down those wild flowers."

"Yes, Ma."

"Frederick, go over and help your father break down that fence."

"Yes, Ma."

"John, are you sure the camp fire is still smoldering?"

"Yes, my love."

"Then we seem to have done all that's expected of us. Let's go!"

Goblin.

According to figures prepared by the National Coal Association from preliminary reports, the estimated output of bituminous coal during the week ended May 29 was the largest quantity mined for the past two weeks. The tonnage produced during that week is given at 9,550,000 net tons.

The Bureau of Mines of the Department of Commerce reported bituminous coal production for the week ended May 22 at 9,295,000 net tons, and for the week ended May 15 at 9,299,000 net tons.

**Be a home-town booster.**

The nearly 2000 records made during the year raised the average production of the entire 21,000 records by 4.6 pounds of butter fat, or nearly 100 pounds of milk. The present average of all cows that have been tested for a year is 481.2 pounds of butter fat. Three world's records are included in the yearly tests.

The Guernsey Breeders' Journal, the breed publication, shows a circulation increase of nearly 10 per cent, while the number of persons seeking information on the breed has increased 140 per cent. Two new extensions men have been added to the force, who will devote their activities to the middle western states. The sale of Guernsey milk has immensely increased, and breeders are reaping

**Personals**

Mr. P. W. Struppeler and his mother, Mrs. Ella Struppeler from Pullman were visitors at the home of Mrs. Dora Eter on Tuesday, Mrs. Eter returned to Pullman with them for a two weeks stay while Mr. Struppeler is gone to the coast.

Misses Bertha Gash and Margaret Becker spent Sunday picnicking at Cold Springs. They were accompanied by Jean Edgar and Phil Millard, two boys from the Washington State College.

The Genesee boys and girls who have been attending the U. of I. during the past year returned to their homes the last of the week. They will be vacationing in various ways during the vacation, most of them to return to the university next fall.

Word was received from P. C. McCready last week that he and William had reached Colorado Springs, there they will visit for a couple of weeks. They report a fine trip so far and expect to soon continue their journey east.

Mr. and Mrs. G. Follett drove to Spokane Wednesday for a few days visit. They were accompanied by Mr. Will Brown, who will go from there to Seattle, and Mrs. Con Steltz who will return with the Folletts.

Mr. and Mrs. Follett will spend a week there with their daughter, Grace.

Mr. and Mrs. Nels Lande, Mr. and Mrs. Sam Lange and family and Mr. and Mrs. Arthur Tegland and family returned Thursday after spending a few weeks in Seattle.

Mr. and Mrs. Walter Jain and Nels Liberg left Tuesday morning for Grangeville where they will attend Grand Lodge.

Miss Jessie Keeler left Sunday after spending a few days with Genesee friends and is expected to attend summer school at the U. of I.

Miss Wilma Casbolt will assist Mrs. Smylie in the post-office during the summer, while Miss Maurine Swenson is having a vacation.

Mrs. Marie Lloyd returned to Uniontown Wednesday, after spending a few days with Mrs. Henry Morscheck.

Mrs. S. B. Tabor of Boise, arrived Wednesday to spend the summer with Mr. and Mrs. R. E. Emmett and family. Mrs. Tabor is a sister of Mrs. Emmett.

Mrs. Henry Morscheck and Miss Bertha Gash drove to Pullman Thursday to attend the graduating exercises at W. S. C.

Mrs. J. C. Yochum and little daughter, Bernice, were visitors at the home of Mrs. Mary Blume last week.

Misses Evangeline and Elizabeth Fix of Walla Walla arrived Monday for a visit at the Mrs. Amelia Roder home.

Jack Hasfurther of Spokane, spent Saturday and Sunday with his parents and friends, after spending a few days with Mrs. Henry Morscheck.

Clarence Sample who has attended the U. of I. this year, spent the week end with Fred Dieus.

Miss Ethel Anderson of Moscow visited Genesee friends Saturday returning to her home on Sunday.

Miss Lucy Edwards, who has attended Pullman college the past year returned home last Saturday.

Miss Mary Moser of Kootenai is visiting several weeks with her sister Mrs. Marion Meyer.

Mrs. Kunkel of Moscow spent Wednesday visiting with Mrs. Carl Erikson.

F. W. Loncosty went to Moscow Tuesday on business.

Alfred Olson returned Sunday after a short visit in Spokane.

Mr. and Mrs. J. M. Kane spent Sunday at the Carl Grief home in Uniontown.

**Against Evil Gases.**

The United States bureau of mines, informing the public against the use of masks against obnoxious gases, etc., says that gas masks are the simplest and easiest to wear, but they protect only in comparatively low concentrations of obnoxious gases and should never be used where the air contains less than 10 per cent of oxygen.

**So There, Smarty.**

### Altar Society Entertained

Mrs. Joe Harfurner was hostess to the Altar Society last Tuesday afternoon. After a short business meeting the remainder of the afternoon was spent with needlework. At 4:30 a very delicious lunch was served. The next meeting of the society will be with Mrs. C. P. Whalen, Tuesday, June 22.

### Parents of Son

Mr. and Mrs. Fred Morscheck are the proud parents of a baby boy born Monday, June 14. Mother and babe are getting along nicely.

### Sell Two Combine Harvesters

Meyer and Son report the sale of a combine harvester to the Green Bros. also one to John Hordemann. These machines are adapted to this country having been constructed to work on hillsides and save grain in this operation.

### Cannery Open

The cannery of the Oregon Packing company at Lewiston has started its season's run of cherries, and fruit has been coming in at the rate of 25 tons daily according to reports received at Spokane, a force of more than 100 persons is now working, which will be increased to 200 in the near future.

### Go As Delegates

Mrs. O. F. Rader, Bob Emmett, Nels Liberg and Walt Jain left on Tuesday for Grandville. They will attend the Grand Lodge of the Knights of Pythias at that place.

### Went Fishing

Mr. and Mrs. Art Springer and Mr. and Mrs. Will Mervyn returned Sunday after spending a few days camping near Elk River. They report a very enjoyable trip and that they got their limit in fish.

### Gray and Meyer are Back

Cecil Gray and Clyde Meyer were both back in the team on Sunday and playing in the same old form. Cecil and Clyde had the misfortune to run into each other in the Kendrick game with disastrous results to both of them.

It is almost pathetic to think of a hard-boiled League of Nations fan like Senator Walsh earnestly telling his Senate friends that they needn't be afraid of the World Court because it has nothing whatever to do with the League.

A New York preacher says America is a conceited nation and should recognize its indebtedness to other people. We will as soon as they start paying what they owe us.

The German nationalists heard President Hindenburg say in the campaign that he would be president of the whole republic but they didn't expect him to take it seriously.

Trade with advertisers.

### WEDNESDAY'S MARKETS

Wheat	
Club	\$1.24
Red Walla	\$1.17
Hogs	
Prime	14 1/2
Heavy	13 1/2

Eggs	22 1/2
Butter	20c

Dr. Leavitt of Genesee is leaving for Portland, Oregon, June 19 to attend the Pacific Coast Dental Conference. He expects to return about the 10th of July. During his absence his office will be open for phone calls and appointments.

### K. of C. Picnic

A district picnic was held Sunday, June 13 at Rollin's Park, near Moscow for the Knights of Columbus and their families. A very large crowd was present from Genesee (Ontonagon), Colton, Lewiston and Moscow. At noon the picnickers enjoyed a lovely dinner. In the afternoon the group had the pleasure of watching a very interesting baseball game. Everyone from Genesee reports a very pleasant time.

### Safety First

A belief has prevailed that more people are killed and injured on the railroads of the United States than is the case in Great Britain. However, official figures for 1924 prove that travel by rail in Our Country is safer than it is in Great Britain.

Charles F. Carter, historian of railroads, calculates that if as many passengers per train mile were killed in this country as in Great Britain, our total of life would be 278 annually; while in reality it is only 41. One American passenger is killed for every 242,220,714 miles of travel. One British passenger is killed for every 124,904,273 miles.

### The railway "safety first" campaign has made ours the safest railroads in the world.

### Sunday's Ball Game

The Garfield team which was scheduled to play our base ball team last Sunday failed to arrive.

In their absence two teams were organized to play against the organizers. The game was enjoyed by the participants as well as the spectators. We were surprised to know that there were so many really good ball players in this community.

### Dancing Party

Mr. and Mrs. Ira Hanson and daughter, Rowena, Mr. and Mrs. W. W. Burr, Mrs. Glenn Sampson, Misses Gertrude Sampson, Irene Mulalley, Jessie Keeler, Margaret Sampson, and Paul Sandberg of Spokane, Don Bressler and Carl Nagel were guests of Mr. and Mrs. Ray Dickey at the dance held at the Yellow Lantern Pavilion near Colfax last Saturday night. Everyone present reported a splendid evening.

### Dewberries

George Provost of the Berry Farm at Clarkston says his Dewberries are now on the market, and by the middle of next week the peak of the season will be reached. The best time for canning them is from now on to the fourth of July, as after that the berries will be smaller and the price will be higher. Any one wishing the directions to the Berry Farm can get them from the Highland Grocery at the end of the street car line.

### Friday, June, 18

Ladies Aid Meeting  
The Congregational Ladies' Aid will meet at the home off Mrs. F. W. Qualey, Wednesday afternoon, June 23. Mrs. James Qualey will assist in entertaining.

### All members who wish to go are requested to meet at Follett's store at 2:00 P.M., where transportation will be provided.

### Good Hawks and Bad

The red-shouldered hawk and the broad-winged hawk prey upon the destructive rodents of the farm and they are enormously valuable to agriculture. The most destructive hawks were where the large areas of our Central and Southern states are the sharp-shinned and the Cooper's hawk.

### These hawks usually perch in a tree. In many places pole traps are set up for the purpose of catching hawks.

The broad-winged hawk and the red-shouldered hawk do not hide in a tree; they do not feel that it is necessary for them to secrete themselves. Along comes an enthusiastic, well-meaning but not well-informed game protector he puts up a pole trap because he saw a hawk catch a quail. Flying closely across the field, comes a hawk which is beneficial to agriculture interests, alights on the pole to look around the meadow for the mouse or rat that is working near, and is caught instantly, and subsequently reported among the other vermin that have been killed.

T. G. Pearson, Pres., Nat. Audubon Soc.

## WHAT'S SMART IN MEN'S WEAR

The "barrel" overcoat promises to be the successor of last season's "tube" coat

YOU remember the "tube" overcoat, introduced last fall—how it jumped into instant popularity.

It may seem an odd time of year to be thinking of overcoats, but manufacturers and designers have to do their thinking months in advance if the millions of American men are to have their overcoats ready for them when snow begins to fly.

They have been doing their thinking, and the style analysis experts of Hart Schaffner & Marx say it looks to them as though the "barrel" overcoat is to be next fall's "tube" successor to last fall's "tube."

Like the "tube" coat, the "barrel" overcoat originated with that small group of well-dressed Englishmen who compose what is known as the "club set." It widens out a bit at the hips, and tapers slightly to the bottom of the skirt, giving a suggestion of a barrel effect.

The velvet collar, Chesterfield, lengthened to meet the demand for longer coats, also bids fair to come in for a good degree of popularity among men who insist on smart clothes. Toward the end of last season it was being seen rather frequently among the dresser men at the colleges, and in the cities.

Late spring analysis of the coats worn by members of the New York stock exchange showed an increase in the number of raglan shouldered coats. It is indicative of a trend toward a return to popularity of the full, easy fitting raglan overcoat.

There are no further conditions in the new time extension for reinstating and converting war time insurance. Mr. Hudelson stated, properly executed applications, proof of insurability, and the payment of premiums are the only requisites for reinstatement. Applications should be made upon regular provided form. Proof of insurability means that a veteran must be in good health. The necessary physical examination may be had free of charge, at any office of the Bureau. To reinstate term insurance, the payment of two monthly premiums are necessary: one premium for the month of lapse or grace and one monthly premium for the month in which the insurance is to be made effective.

## World War Risk Insurance

World War Veterans who have permitted their war risk insurance to lapse have been given another opportunity to reinstate and convert their Government insurance, according to C. H. Hudelson, Regional Manager of the Bureau for the state of Idaho with headquarters at Boise.

A recent amendment to the existing law extends the time to July 2, 1927, during which yearly renewable term insurance may be continued and converted. The new law further authorizes the issuance by the Veterans' Bureau of a five year level premium policy, exchangeable for other forms of Government level premium life or endowment policies within the five year period.

There are no further conditions in the new time extension for reinstating and converting war time insurance. Mr. Hudelson stated, properly executed applications, proof of insurability, and the payment of premiums are the only requisites for reinstatement. Applications should be made upon regular provided form. Proof of insurability means that a veteran must be in good health. The necessary physical examination may be had free of charge, at any office of the Bureau. To reinstate term insurance, the payment of two monthly premiums are necessary: one premium for the month of lapse or grace and one monthly premium for the month in which the insurance is to be made effective.

But don't wait for another year to pass before reinstating and converting your war risk insurance, is the advice Mr. Hudelson is giving former service men and women. Hundreds, no doubt were contemplating a renewal of their war insurance before July 2, 1926, the date previously set by Congress for expiration of the war rate. Life insurance should be considered indispensable. Government insurance is particularly adaptable to the needs of former service men and women.

## Interesting Motor Trips

One of the real treats in store for the tourist when visiting Oregon, is the trip around Mt. Hood Loop road.

Starting and ending at Portland Oregon, this trip is just an easy one-day drive of 176 miles. If preferred, it may be divided into two or even three days to advantage, as there is much to see and many inviting spots where one can linger to advantage.

The road is of the very best—about half hard surfaced, and the rest nice, wide gravel road in good condition.

This trip takes one for 65 miles along the world renowned Columbia River Highway, with its many waterfalls and scenic wonders. Then the road winds up through the full length of the famous Hood River valley, where some of the finest fruit in the whole world is grown.

A good part of the trip is through the government forest reserve where Uncle Sam has provided several well appointed camping spots for the convenience of tourists. Also, along the route there are several well located hotels and resorts for the comfort of those who do not carry their own camp equipment.

This trip takes you up to the timber line on Mt. Hood, and down on the other side over the old Barrow road, which was the route followed by the early pioneers.

All in all, this is one of the most interesting trips in the entire West, and every foot of the way is over good road and on an easy grade which can be negotiated by any car that is hitting on three or more.

Rebekah's have "Picked up" The Rebekah's with their husbands and families enjoyed Thursday afternoon and evening at the home of Mr. and Mrs. Ira Hanson. The time was spent socially and a pickup lunch was served at six-thirty.

## Has Pneumonia

G. W. Lundt has been confined to his home the past week on account of pneumonia.

## Live At The Crossing

That all streets and roads that intersect a main highway should be made stop streets, is the contention of the Albany, Oregon, Herald Democrat. It says: If such a practice had been in force last Sunday it is very likely that the sad accident in which a baby lost his life would not have happened.

Change the picture to a main line railroad. Would the operating officials of the railroad permit cars to enter the main line from spurs, switches and branch lines without stopping to be sure that the track was clear?

The block system and locked switches help explain why railroads that carry millions of passengers annually, do so almost without loss of life.

Another reason is, of course, that engineers don't operate locomotives until they know how and until their eyesight and judgment is tested.

There will be no real safety in motor operation until a master traffic plan has been adopted and enforced.

If railroad systems did not enforce every precaution to balance the carelessness of thousands of people, they would kill thousands annually.

One railroad, the Southern Pacific, feels it has progressed so far in making people safe that it has a right to expect motorists who collide with its cars and trains.

Lives won't save themselves at the crossings. The baby that might have lived, had the traffic plan enforced a safety stop, tells the story.

## Invents Tractor Cultivator

Wm. Behrens of Leland has invented a cultivator for his Cletrac tractor that he says enables him to cultivate six times as many acres in a day as an ordinary tractor cultivator can be made to accomplish. The cultivator takes four rows at a time and the tractor travels at a speed of 3 to 4 miles an hour covering practically 50 acres a day.

Mr. Behrens has made this cultivator himself. It is pushed ahead of the tractor and in this manner the operator can see what he is doing. He has tried the new invention on his own place and says it works in a most satisfactory manner.

He is also working on a bean cutter to attach to the tractor which will cut and rake 4 rows at one operation.

Mr. Behrens will be glad to have anyone interested to see the cultivator at work on his farm during the next few weeks.

## Lead An Ear Here

You folks with fallen arches and no hair, listen to this tale of woe. Here's a man who is as healthy as any one alive. In fact he's too darn healthy. He has so much superfluous energy that he tries to get rid of it by doing stunts in movies. Leo Nomis is not a "good risk" for any insurance company because he earns his living by risking his neck three to four times each day.

For Richard Dix's latest Paramount starring picture, "The Lucky Devil" at the Hotel Theatre, Director, Frank Tuttle cast him as one of the racing drivers. All he had to do was skid off a high bank into a lake.

The worst that could happen would be for him to turn turtle in the water. When you see this bit of action in the picture no matter what kind of life insurance enthusiast you may be, you'll agree that the companies were right in not giving Nomis a policy.

## Less Brain Work Needed

Breaking away from the one-crop plan of farming requires more scientific methods and longer seasons of work but it means getting farming on a business basis.

This does not necessitate making wheat, corn or cotton secondary crops or to produce material less of these but to build up sources of profit in other things. Reduced acreage in the major cash crops often leads to increased yields by the use of more scientific methods.

## Undergoes Operation

Miss Pearl Perkins underwent an operation for the removal of her tonsils Monday. She returned home Tuesday evening and is getting along nicely.

# THE GENESSEE NEWS

VOL. XXXVII

GENESSEE, LATAH COUNTY, IDAHO, FRIDAY, JUNE 25, 1926

NO. 52

## THE VOICE OF THE LIBERTY BELL

This is one of the two new official posters of the Sesqui-Centennial International Exposition, opening in Philadelphia June 1 to celebrate the 50 years of American independence. The Exposition will continue to December 1. Dan Smith, the artist, has symbolized the epoch in history which the tolling of the Liberty Bell in Independence Hall, July 4, 1776, marked and has depicted the growth of the United States from the original thirteen states, represented by the thirteen stars which emerge from the mouth of the Liberty Bell.

## THE RENTER AND THE HOMEOWNER

Ever since the advent of the automobile the humorists in the newspapers and periodicals have been coming jokes about how the people who have homes do not stay in them any more. And the great boom in apartment houses in the larger cities has added to the belief that the individual home is becoming passe.

Doubtless this condition has been exaggerated, but if it is true that the people as a whole do not care so much about their homes as they used to, there is more reason than ever to encourage the use of one's own home movement.

Every enterprising city likes to pride itself on the fact that it is a city of home owners, whether it is or not, and there is a reason for this.

As a general thing the home owner is a pretty good citizen. And he is more apt to stay in his home than the fellow who only rents parking space in an apartment. This is not saying the apartment is undesirable. It doubtless fills a necessary place in our city life, but the individual home is still the ideal to be strived for.

The homeowner is not apt to become a bolshevist. He feels that he has a little property right in his own city and country, and if he is ambitious as most homeowners are he wants to increase it. He is interested in the improvements in his home city and is very apt to be a useful citizen in general. Of course the man who rents may be just as good and useful a citizen as the man who owns his home, but this not gaining the fact that the homeowner has it on the renter in more ways than one.

A city or town therefore cannot do itself or its citizenry any greater good than in encouraging in every way it can the "own your own home" movement. It will not do to say that people do not stay in their homes after they have acquired one, because this is not true. The latest inventions of science including the radio to say nothing of the electrical conveniences of which every household knows the value, have checked the "away from home" movement in the other direction namely—back home.

## THE CREATIVE SPIRIT IN AMERICA

The United States has been accused of being the richest nation on earth. Some foreign comment has been to the effect that money is all we care for. This is a mistaken viewpoint. The reason that is not only rich but great, is simple—we all work over here. Not only do we work, but we make everything else work for us. We enjoy producing something useful.

Here in the United States we use forty times as much mechanical power as human power. In China, Russia and India they use from two to four times as much human power as mechanical. That is the reason America is rich and that is the reason we are great, is simple—we all work over here. Not only do we work, but we make everything else work for us. We enjoy producing something useful.

The United States we use forty times as much mechanical power as human power. In China, Russia and India they use from two to four times as much human power as mechanical. That is the reason America is rich and that is the reason we are great, is simple—we all work over here. Not only do we work, but we make everything else work for us. We enjoy producing something useful.

High production per man tells the story of our high wages, short hours and modern conveniences in every home. If the rest of the world would try to follow our example there would be more happiness and less cause for wars and discord.

## The Troy Celebration

Two carloads of Troy Business Men were in town Tuesday in the interest of the celebration, at Troy on the 3rd of July. Among the features of the celebration will be three base ball games, of which Genesee will play at least one, and if they win the first they will play a second game.

These games are to be played for a purse of \$800.00, \$400.00 going to the winner of the two games, and \$200.00 to each loser, which certainly seems fair enough.

Brass Bands will play during the day, there will be games and races, etc., that go to make up a very interesting day. Troy has the reputation of always putting on a very good celebration, if you are thinking of celebrating in this vicinity we believe Troy is the place to go.

## Two Genesee Girls Graduate

Maxine Ehlen and Amalia Lavon were among the list who graduated from the University of Washington on June 14. Both are affiliated with Delta Omicron Chi, National Greek Letter Sorority.

## Wider Roads a Necessity

Paved roads used to be our chief concern in a good roads program. It is estimated that this year we will have in excess of 500,000 miles of hard-surfaced roads in the United States. These improved roads have brought an increase in traffic which was not even dreamed of 10 years ago. The problems we now face is not only "narrow" roads, but "wide" roads. Wider roads are necessary for two reasons: to enable traffic to speed up, and to prevent accidents.

On many of our crowded roads a slow moving truck or other vehicle will block traffic, due to the fact that there is little opportunity to pass such obstructions from the rear.

Many states have already started to remedy this situation, and on the Pacific Coast, 2ft shoulders are being built on each side of the road and a few inches higher than the old surface. These shoulders shoulders are made of either asphaltic concrete or cement and the space between them is resurfaced with asphaltic concrete.

By this method, narrow pavements are satisfactorily widened and thickened at a minimum expense. From now on, road widening will be as important as road paving.

The tendency is to make all the new roads with less crown.

## Near East Relief

What is believed to be the largest check ever written in the history of banking is being carried to the Near East by Tom Swayze of Tacoma, when he sails from New York on July 7 as American Golden Rule Ambassador to the Near East.

The check is nearly four feet long, is for \$100, and will enable Swayze to make up to one of the largest checks in the history of banking in the Near East and take a child into an orphanage where its care will be guaranteed for a year.

In addition to the check, Swayze carries with him similar checks from many organizations including authority from his Alma Mater, the college of Puget Sound, Tacoma, and also from Willamette University, Salem to endorse some worthwhile young man or woman with a scholarship in an American university in the Near East. By others he has been commissioned to take children from refugee camps and place them in orphanages and to guarantee their support.

"I shall be glad to bring back the photographs and stories of children for anyone who will guarantee the children's support for a year or more if he will communicate with me through the Near East Relief offices in Seattle, Portland," writes Swayze.

Swayze rules the distinction of being Golden Rule Ambassador to the Near East through being chosen by the people of Tacoma, the Golden Rule Club of America, and their representative, Cleveland H. Dodge, the New York Philanthropist offers each year to send to the Near East a representative of that city which makes the best observation of international Golden Rule Sunday.

Swayze saw service in the World War in the 110th Engineers, is the district secretary of the Gyro clubs of Oregon and former president of the Epworth League Tacoma District.

With his wife he will visit the convention in London and later will see the thousands of children now in America's care in Greece, Palestine and Syria.

## Uncook Record Gasser

A row of gas larger than any ever found in a Kevin-Sunburst well at less than 1,000 feet has been encountered in the North Devon test well being drilled by the Sunburst interests. It was reported in Great Falls Monday night by L. C. Stevenson.

The well is flowing between 2,000,000 and 3,000,000 feet of gas daily from a sand reached at 870 feet, giving the test a good outlook. Mr. Stevenson stated, "No water has been encountered in the well thus far."

## Received Typewriting Pins

An exceptional record was made in Genesee High school this year by the typewriting class. Three of the students making the best record in the history of the Genesee High. Rosanna Trautman won the gold Underwood typewriting pin for writing 60 words a minute for fifteen minutes in the May Underwood speed test.

**SPIRITUALIST MEDIUM**

Rev. Stella Ross Walker gives readings daily at 523 Seneca St. Three questions answered by mail for \$1.

Oh, Daddy, when in Seattle bring some Boddys good bread and pastry. 1414 3rd Ave.—Adv.

## THE FEMININE TOUCH

By LOWELL OTUS REESE

(Continued from Last Week)

I got up and went inside. Birdie saw me in and she stopped in the middle of the dining room and looked at me with a wistful, timid sort of smile. Not at all like the old Birdie that had come into Stovell and bullied us all.

"I know what you're going to say, Uncle Buck," she said, "but don't say it! Not until you hear me first. Come over here and sit down."

So we sat down and Birdie told me all about it.

"I was brought up in an orphanage home, Uncle Buck," she said. "But I didn't stay there any longer than I could help. And when I got out and faced the world—it's a mighty big world, Uncle Buck, and it—it scared me. Did you ever see a kitten wrinkle up its nose and fluff up its fur and try to terrify a bulldog? That was me! All my life I've had to fight. A girl who goes out to face the world alone has got to fight, every day of her life. If she doesn't—she goes under. And I found out early that I could bluff—me! And so I bluffed."

"Even you whiskered desert men were afraid of me! Oh, if you boys had only known how frightened I was when I came to Stovell that day—how awfully Pook Terribone scared me! And if I had only known what great big soft hearts you same rough fellows had! I know it now! And—and they were inside."

There were tears in her eyes. And then suddenly I saw the real Birdie Calamus; just a poor, scared little girl, alone in the dark, making faces to keep the spooks away. I thought about the scared kitten, fluffing up its fur to frighten the bulldog, and something got into my eyes. Alkali dust, probably. I couldn't seem to wink it away, and so I got up and went across to Ab Linder's place. Doc wasn't there, but half a dozen of the old-timers were, and I went right to the middle of the subject at once. I told them all that Doc and Birdie had told me.

"And so we're going to lose Doc and Birdie, both at one wallop!" I wailed up.

Nobody said anything for several minutes. Then old Pook Terribone got up and started for the door.

"Which way, Pook?" I asked him, "I'm goin' over to Chuckawalla," said Pook, not turning his head.

"But wait a minute! Wait—"

"Wait—hell!" snarled Pook Terribone.

"You keep the doctor cornered in Stovell till I get back—there'll be shooting!"

Late as it was, Pook hitched up and started to make his first trip to Chuckawalla after his recent sickness. As he drove past the hotel he saw Doc sitting on the porch. He stopped and beckoned; and when Doc came out to

Miss Madeline Couzens, daughter of United States Senator James Couzens, of Detroit, Mich., enjoys a bottled carbonated beverage with Mr. D. Dimanecco, attache of the Rumanian Legation, at the National Capital Horse Show, Washington, D. C.

Leaders of Washington Society like their beverages "bubbly" and direct from the bottle, which fashion probably was set by President Coolidge whose fondness for ginger ale is well known. The "soft drinks" booth was one of the most popular spots at the recent show which is one of the principal annual social events at the Capital.

By WINNER

When building the small house it is often necessary to economize on space in some room not in constant use, such as the dining room, hall or breakfast room. More space is not necessary, yet it is more attractive in furnishing these rooms to select decorations that will make them seem larger; if possible, and the proper wallpaper will do much to create this effect.

There has been a delusion in the minds of some people that plain walls make a small room seem larger. If this is true then the meaning of the word "perspective" is that you cannot suggest perspective in your wall decoration without design.

Perspective in wall decoration is the use of perspective in a picture, as it does in the case of many well drawn wallpapers, you are not conscious of the actual confining wall surfaces that are so close, rather you feel air,—and space,—and distance.

There are perspective wallpapers of many kinds. Nearly everyone realizes that the large magnificent scenic papers having four or more strips to a complete picture, will appear to stretch the room, but distance giving perspective is not confined to the scenic designs of large dimension. It is also found in many patterns of small scale and frequent repeat. In selecting a design for this purpose remember that you must consider whether it is large or small should show more than one apparent surface. There should be depth to the picture, whether it is a large expanse of field and woods, or merely a branch of blossoms across an open background.

Scenic papers are usually colonial in feeling and were used to great effect in early American decoration. There are many reproductions of the original patterns now on the market and they are particularly appropriate for the modern Colonial houses that are being designed in the spirit of that period.

## VALUE OF MANGELS AS A DAIRY FEED

By GUY MACRICHARDS, Editor, Northwest Farmer.

NEWS item says "Mangels are growing in popularity among Skagit County dairymen as a source of winter succulence. Present plans indicate that there will be a larger acreage planted in 1926 than in any past year. The yield is from 30 to 50 tons per acre."

The above is an item of real value and one that should interest every man that owns and feeds a dairy cow. After more than 35 years of actual experience in growing and feeding stock mangels, I am pleased to add my endorsement to the above as to the value of mangels to supplement the winter dairy ration for milk cows and growing heifers.

There is nothing in my opinion that can be grown to go into the storage bin that will equal the beet as a succulent food. It acts as a regulator on the digestive system as well as a stimulant to milk secretion. When fed to the milking cow at the rate of 3 1/2 pounds to each pound of grain it is practically impossible to throw the cow off her feed; and from day to day, on a gradually increasing ration, the cow becomes more fit to do her work, and as the lactation period advances she gains in physical condition, while still holding up in her milk flow, if not actually increasing her production until well on into the lactation period.

If there is any fault to be found with this system of feeding, where beets form the bulk of the ration, it lies in the difficulty in drying off the cow as the time for another calving approaches, for it is not uncommon for a cow to be unable to get within a few pounds of her flush flow up to within 60 days of the date at which she should freshen again.

Beets cannot be considered a roughage as they (mangels) are composed of 90 per cent water, and the solids that remain are highly concentrated and practically devoid of fiber, consequently the feeding of mangels in large quantities will not relieve the necessity of feeding hay or some other roughage. The cow's architectural construction calls for roughage and this she must have along with any other feed she may be getting. But beets I consider an alternative and a digestive stimulant, and as they are composed so largely of water their bulk passes quickly from the animal's body largely through the urinary system. That portion not so eliminated takes its orderly route through the digestive system stimulating bowel activity.

Mention has been made here of a feeding ratio of 3 1/2 pounds of beets to the pound of grain. This is the minimum amount of roots that should be fed regardless of the amount of grain, but no dairy cow worthy the name should get less than 40 pounds of clean roots daily after she becomes accustomed to them, and this amount can easily be doubled should the animal be a large one and develops a particular liking for them, and should the results in the milk pail justify this additional feed.

When in Seattle eat your meals at **Bricks Cafe**, 1414 3rd Ave. Popular Prices.—Adv.

**SELECTION OF COLOR SCHEMES**

By FRANK PRICE HECKEL

If we will always bear in mind the three primary colors, red, yellow and blue, the three secondary colors, orange—formed from red and yellow, green—formed from yellow and blue—and violet—formed from blue and red—and the further combinations of primary and secondary colors, such as blue green and red violet, we will have little difficulty in understanding the fundamental principles of color harmony. In addition to the primary and secondary colors and their combinations, we have the relationship of the primary colors known as complementary. Thus, yellow is complementary to violet, blue to orange, and green to red. Whenever the complement of any color is added to that color, the color is grayed or neutralized in proportion to the quantity of complementary color added.

There are three attributes of color namely: tone or hue—the color content—tint, or the amount of white, and shade or saturation—the amount of black. There is some confusion about these terms, but if we will remember that these three color attributes, tone, tint and shade, correspond to the newer terms, hue, brilliance and saturation, we shall not be far wrong. Color and tone are frequently used synonymously. The term "pure color," though inaccurate, merely signifies a minimum amount of white or black in a color, that is, it is practically synonymous with the tone or hue of the color itself. A tone, for example, would be any of the primary or secondary colors, a tint would be pink—i. e., red and white, while deep blue—i. e., blue and black, would be a dark shade of blue.

The three types of color combination in general use are the monochromatic—using but one color in as many tints and shades as desired, analogous—using colors formed from combinations of the primary and secondary colors, and complementary—using the complementary colors.

A room decorated in the monochromatic type of color harmony might be painted light cream for the ceiling, gray orange for the walls and deep orange for rugs and overdrapes or valences.

If blue is the main color selected, analogous colors would be blue green and blue violet and all shades and tints of both. That is, the ceiling might be painted light blue green, the walls blue, rugs and overdrapes blue, and a touch of brilliant green added here and there in mantel ornaments or lamp shades.

Complementary harmony is the one most frequently employed. These are the color relations of yellow and vio-

**Added Space for Small House**

By A. Louise Fillebrown

Building the small house it is often necessary to economize on space in some room not in constant use, such as the dining room, hall or breakfast room. More space is not necessary, yet it is more attractive in furnishing these rooms to select decorations that will make them seem larger; if possible, and the proper wallpaper will do much to create this effect.

There has been a delusion in the minds of some people that plain walls make a small room seem larger. If this is true then the meaning of the word "perspective" is that you cannot suggest perspective in your wall decoration without design.

Perspective in wall decoration is the use of perspective in a picture, as it does in the case of many well drawn wallpapers, you are not conscious of the actual confining wall surfaces that are so close, rather you feel air,—and space,—and distance.

There are perspective wallpapers of many kinds. Nearly everyone realizes that the large magnificent scenic papers having four or more strips to a complete picture, will appear to stretch the room, but distance giving perspective is not confined to the scenic designs of large dimension. It is also found in many patterns of small scale and frequent repeat. In selecting a design for this purpose remember that you must consider whether it is large or small should show more than one apparent surface. There should be depth to the picture, whether it is a large expanse of field and woods, or merely a branch of blossoms across an open background.

Scenic papers are usually colonial in feeling and were used to great effect in early American decoration. There are many reproductions of the original patterns now on the market and they are particularly appropriate for the modern Colonial houses that are being designed in the spirit of that period.

**ALFALFA**

A. W. Holland, county agent, says that "Alfalfa is rapidly displacing other hay crops in Clallam County." The progress made in growing alfalfa in Clallam County is also being reported in other counties in Western Washington. This is particularly true of King County, where alfalfa growing, we may say has long since passed the experimental stage. Clallam County has one advantage not enjoyed by other Western counties, and that is her irrigation systems in the Sequim and Dungeness valleys. Accepting the changing climatic conditions of Western Washington, through which we are now experiencing longer, drier summers, there is bound to be a decided advantage for growing alfalfa on those lands where irrigation is possible. The drier summers are a decided advantage for harvesting alfalfa for hay and the opportunity to cover the land with water insures the cutting of at least two good crops in these valleys.

The reputation for hospitality enjoyed by the Coast d'Alene Hotel, Spokane, is the result of many years of conscientious effort to provide travelers with a home away from home. The Hotel with a Personality.—Adv.

## Veterans of Foreign Wars Get Christy Buddy Poppy Poster

Miss Frances Silberglied of New York City, 1926 V. F. W. Poppy Girl, and Howard Chandler Christy, famous artist, with the BUDDY POPPY poster presented by Mr. Christy for use in connection with their annual national sale of Buddy Poppies, made by disabled and needy ex-service men, to raise funds for relief work. Mr. Christy selected Miss Silberglied as model for the poster because of her particularly appealing appearance. The poster is a reproduction of the original painting by Howard Chandler Christy, "To My Buddy" is the dedication inscribed on the poster by Mr. Christy. "I tried to make this poster the best I have ever done," he said in presenting it to Commander-in-Chief Fred Stover of the Veterans of Foreign Wars. "And I am glad that I have had this opportunity to help the boys who did so much for these." The painting symbolizes the loyalty and sacrifice of America's soldier sons. It is a tribute equally to the memory of those who sleep in permanent garrison on the battlefields of France and to the living courage of those war-disabled heroes who returned to face the handicap of an impaired existence.

**Statures Unveiled of Mark Twain Characters**

HANNIBAL, Mo.—Erection of statues of Tom Sawyer and Huckleberry Finn constitutes a tribute to the eternal of the boys' "Dime Novel" of the University of Missouri, School of Journalism, declared in an address at luncheon exercises here.

Bronze life-size figures of Mark Twain's famous literary characters were presented to the city by George A. Mahan, Hannibal, president of the English department of the University of Missouri, School of Journalism, declared in an address at luncheon exercises here.

Johanna Rap Apple Pabst, grand champion Holstein bull at the Pacific International in 1924, and for the past three years all-American champion bull of the breed, will be the featured attraction of the four-day "Clark's Holstein Classic" sale held in Wisconsin the second week in April. He was sold by J. E. Piek of Wisconsin to T. B. McCauley of Montreal, for the tidy sum of \$15,000, the highest price recorded lately for a Holstein in public auction.

**University of Idaho Enrollment Increases**

UNIVERSITY OF IDAHO, Moscow.—There are 524 more regularly enrolled students at the University of Idaho this term than there were two years ago, according to figures from the 1925-26 university catalogue now on the press. This represents an increase in regular curriculum enrollment of 37.2 per cent during the last biennium.

In the 1923-24 school year there was a total regular enrollment of 1407. For the current year there were 1931 students registered in regular courses at the university.

The increase has resulted in a congestion most noticeable in the university library where facilities for study are not adequate. Construction of the new \$400,000 science hall was expected to provide more than enough room for classroom and laboratory work. But as soon as the building was finished it was filled to capacity. Building of the proposed \$100,000 girls' dormitory, to be completed next fall, will relieve a pressing need for living quarters for Idaho co-eds.

Correspondence course enrollment has taken a 50 per cent jump since 1923-24, according to the catalogue figures. The number taking university courses by mail was 158 two years ago; today it is 237. Much of this increase represents added interest in university work on the part of high school and grade school teachers throughout the state. Miss Bernice McCoy, former state superintendent of public instruction is in charge of the correspondence work offered by the university.

The fact that enrollment in special courses has decreased almost 26 per cent indicates that the university is rapidly expanding its curricula until such courses are no longer necessary, as they are included in the regular work offered.

The Yakima Valley Bank is offering prizes to adults and club members at the second annual corn show which will be held in November. Prizes will be given for single ear corn samples and bushel samples of corn grown this season. The boys and girls will be given prizes for these exhibits and also for the largest yields of corn.

The American poultryman contributes to the wealth of the nation an annual production of a billion and a quarter dollars. It is safe to say that there is not another branch of agriculture that has made such a marked development during the last half-century years as has the poultry industry.

## Idaho's Graduates Are Placed In Schools

UNIVERSITY OF IDAHO, Moscow.—Announcement of the placing of the more graduating seniors and five alumni in teaching positions for next year, has been made by Miss Bernice McCoy, director of placement service.

The nine graduates are placed as follows: Robert Lincoln Holbrook, superintendent of schools at Bovill; Thomas Payne West, head of science department, Pendleton, Ore., head of science department, Malad high school; Ellen Neilson, instructor in economics department, University of Idaho; Verne Caldwell, head of department of education, Ashland, Ore., State Normal School; Marie Hogenson, executive secretary to President Turner, Lewiston State Normal; Robert Lough, instructor of history and coach at Lewiston Normal; and Charabette Stevens, junior high school critic to the Dillon State Normal School, Montana.

Lewis Williams, Sugar City, has been promoted to vocational agriculture work. Silas Arthur Williams will be superintendent at Cottonwood. Loretta Meskill will teach at King Hill and Hazel McNeill will be head of the English department in the Coeur d'Alene public schools. Loren Mesinger has been named superintendent of the Nyssa, Ore., school. Agnes M. Brown will be head of the English department in Bonners Ferry.

# The BULL'S EYE

Editor and General Manager WILL ROOPER

## Meeting the "Bull" Durham Smoker Face to Face

I am just making, as the politician says, "A swing around the circle," to see what was going on in "Real America." I had been in New York so long, I was getting a kind of a Subway "Slant" on things. I was becoming as narrow as a Metropolitan Newspaper Editor's view. My eyesight was getting so poor I couldn't see beyond the Hudson River, and my mind wouldn't function farther away than Albany, N. Y.

I knew that New York was "amusing the world," but I wanted to meet the fellow who was "feeding it." I am kinder oddily constituted. If you can cut off my amusement, but if my food stops you are going to have an argument on your hands.

I, as Editor and Proprietor of the Bull's Eye, wanted to meet not only the readers, but the consumers of THIS Wonderful Product of OURS. (The American Tobacco Company and me.) Well, I wish you could see the type of Men they were. Big fine healthy upstanding He-Men. They were not the little America that has to tap his Cigarette on the box before he can smoke it. They were our Producers of our Necessities of Life. When I saw the type of He-Men smoking "Bull" Durham, it almost made me cry, that I wasn't a smoker myself.

Will Rooper

P.S. There will be another piece here a few weeks from now. Look for it.

## Facts About Idaho

Craigmont—Craigmont Kamiah highway to be built, costing \$65,000.

Lewiston—Cherry crop this year estimated at 100 carloads.

Newport—Bids opened for Pond d'Oreille River bridge.

Lewiston—Small sheepmen have shipped 200,000 pounds of wool from here, this spring.

Hailey—Blaine County wool pool 18,376 fleeces sold for \$51,534.00.

Twin Falls—City Council adopts general budget of \$62,000, the maximum by law.

Twin Falls—Craig Company of Odgen, builds plant to can sour cherries.

Old Oregon Trail in Idaho will receive \$650,000 for construction, this year.

"Rim" bridge over Snake River begun.

It will have one span, 1500 feet long and 500 feet high.

Pocatello—State potato growers vote to standardize packing marking and selling Idaho potatoes.

Driggs—Nine-foot vein of high grade coal opened in Samuels mine, Brown Bear district.

Gooding—Two ears lambs bring \$6.049 on Omaha market.

Wendell—Carload of farm lambs bring top price on Portland Market.

Coeur d'Alene—Paving open to Bennett Bay, for light traffic.

Challis—Famous old Lucky Boy and General Custer mines to be reopened, at a cost of \$150,000.

Salmon—\$15,000 theater being built here.

Coeur d'Alene to have \$263,000 appropriation, for new Federal building.

Congressional appropriation bill gives \$80,000, for Federal building at Sandpoint.

Idaho Falls—Big Paving plant moves in to take care of paving contracts this year.

Idaho shipped 17,309 cars of potatoes from 1925 crop, third state in production.

Coeur d'Alene—Two Million fry trout will be planted in local streams this year.

## DePew Says Coolidge and Smith

Republicans and Democrats marching arm in arm to the polls in 1928 and voting a nonpartisan ticket, with Calvin Coolidge and Governor Al Smith for vice president, was pictured as a possibility by Chauncey M. DePew, in an address recently before the Progressives Society.

He describes the present as the "most wonderful age of nonpartisanism" in politics in his seventy years of experience.

"I was born in a day of party politics," Mr. DePew said, "and as a lad I learned to shout for my party and starve for my party, if necessary."

What do we find to-day? "A tax bill, always the subject for acerbic controversy and party feeling, being passed unanimously by the house of representatives and slated to pass the senate with comparatively little agitation. I think Cal Coolidge must have studied old Ben Franklin, for he has decided not to go up in an airplane and view the affairs of the nation from some "God-like" position on high, but to come down to earth and meet the representatives of people for economy and thrift.

"And if the present general prosperity continues and if the people continue to devote themselves to business, if employment continues plentiful, if there will be another miracle in 1928."

Difficult Situation

Control of thought cripples the intellect, and without control of thought your mouth is in danger of betraying you.

## Wisest Man in the World

There is a man in our town And he is wondrous wise; He kicks out all his troubles And laughs at other guys.

Another European nation announces that it is displeased with the United States immigration law. As most persons recollect, the law was not drafted to please European nations.—Detroit Free Press.

Children have to be taught to like the foods that are good for them much in the same way that they have to be taught arithmetic and history. Boys and girls are not born with any particular desire for cereals or for bread. It's up to their parents to see that they learn the rudiments of a balanced diet and the reason for such a diet. Firmness and patience are often necessary in the teaching, but the job must be done.

Many mothers unconsciously put their children under health handicaps by allowing them to use their own discretion in the matter of eating candy, fruit, nuts and cookies. By so doing they set a precedent in the matter of other foods and make the teaching of good nutrition harder.

One or two articles are not enough to supply a child's needs for a meal. In order that there be normal development, there must be variety.

Fresh eggs, whole cereals, fruits in season and leafy vegetables should occupy an important part of the growing child's dietary. Then, too, a certain amount of concentrated food is necessary for children, because rapid growth whets their appetites to a razor edge, so that they crave more food than their systems can well dispose of.

Evaporated milk, diluted with orange juice as a drink, or in custards or other baked foods, is especially beneficial for the growing child for the reason that it is concentrated to double the richness of ordinary cow's milk and is entirely sterile as well. The can of evaporated milk solves the problem of obtaining perfectly pure milk, as well as the problem of lack of refrigeration facilities, since this type of milk will keep indefinitely in the can.

Foreign Dishes Bring Added Zest to Dinner

By MRS. WM. C. POST

Height of my culinary ambition always has been to make dinner each day a gastronomic poem, rounded and perfect like a stately rime. A meal that pleases eyes, nose and palate alike.

A well returned dinner is like a pretty woman in that it unlocks men's hearts with a magical key.

Exotic dishes give a tang of other lands to the dinner table. Things foreign awaken the romantic sense. Taste of codfish in a Benedictine transports one for the minute to the Montmartre in gay Paris, a dash of Prosciutto and we are supping in a quaint cafe on the Nevsky Prospect in Leningrad, while the crunch of English tea cakes may bring visions of the rolling moors of Sussex.

As an aid to the housewife in carrying out this new and fascinating idea in cooking, the following of my recipes may prove of particular interest:

Italian Polenta.

8 cups hot-cooked 1 1/2 then butter rice or mush or olive oil

Beat the butter into the mush while hot. Turn onto a hot serving plate and pour over the following cheese sauce:

1/2 cup evaporated milk 1/2 cup grated cheese

Melt the fat, add the flour, salt and pepper, and stir until the mass is smooth. Add the diluted milk and cook in a double boiler. Stir occasionally to keep smooth. Add grated cheese to the hot sauce and stir until melted or about three minutes.

Butteten Kuchen.

1 1/2 cups sugar 1/4 cup flour 1/2 cup butter 4 tsp. baking powder 2 eggs, separated 1-3 cup evaporated milk 1-3 cup water

Chopped or sliced almonds Cream butter and sugar, add yolks of eggs and the lemon rind, stirring constantly. Mix flour and baking powder, add to the butter mixture, alternately with the milk and beaty stir in the stiffly beaten whites of eggs. Place in well-greased shallow coffee cake tins, sprinkle with granulated sugar, cinnamon and a few almonds, sliced fine or chopped. Bake in a moderate oven.

## Child's Health Maintained By Wholesome Diet

Modern educators are lending more support to the old idea of rearing the citizens of the future. They are working on the principle of "a sound mind in a sound body."

Good health is built primarily on the foundation of right food. The sort of food the child has determines to a large extent the fitness of the man or woman.

Children have to be taught to like the foods that are good for them much in the same way that they have to be taught arithmetic and history. CHURCH NOTICES

Catholic Church Mass at 10:00 o'clock Sunday. Father Scanlon, Pastor. Congregational Church Paul W. Sprague, Preacher. Mrs. W. M. Herman, organist. W. E. English, choir director. Sunday school, 9:45 a. m. Mrs. Arthur Hampton, superintendent. Morning worship, 11 o'clock. Young People's meeting, 7 p. m.

Genesee Valley Lutheran Church Sunday, June 13, 9:45 A. M. Sunday School and Bible Classes. 10:00 A. M. Norse Services. 11:00 A. M. Morning Worship. A cordial welcome is extended to these services. Gerh. A. Peterson, Pastor

The Genesee Valley Lutheran Y. P. S. will give an ice cream social at the Sam Lange place on Sunday June 27. A lunch will be served commencing at 12:30.

Lutheran Church will hold annual Sunday School Picnic next Sunday at the home of D. Scharnhorst.

Services will be held at the Church at 10:00 A.M.

Bring your lunch and stay all day.

A. F. Wolff Pastor

Christian Church

Bible School, 9:45 Preaching, 11:00 Subject: "The Fruitage of the Year."

A report of the Convention of the Churches of Christ of the Inland Empire will be given. Delegates at Spokane: D. W. Alverin, Clarence Alverin, Blanch Craft and Mr. and Mrs. N. E. Beach.

Lightning And Radio

Lightning has no special affinity for radio antennae, and radio operators need have no special fear during thunderstorms, say Engineers of the Underwriters Laboratories, who have conducted an amazing series of tests in radio safety.

"Lightning is hard to check," says one of the engineers. But more men are lightning struck under trees than in any other way according to unofficial statistics. One might indeed be a target at the end of a properly installed radio set, but no more so than at the keyboard of a piano, or with knife and fork in hand at the dinner table, or patting the keys of a typewriter.

David Sarnoff, Vice President of the Radio Corporation of America, predicts that the moving-talking pictures may soon be shown in every home by radio.

He says the only problem is in speeding up the transmission of still pictures, and that research engineers are hard at work perfecting the speed-up attachments.

N. P. Makes Good Record

The Northern Pacific has completed another year without being chargeable for the death of a passenger, according to A. B. Smith, passenger traffic manager.

"During the last ten years, the Northern Pacific has had only one passenger fatality," said Mr. Smith. "This was in 1918 when a passenger stepped from the end of a coach, after the train had been cut at a terminal to do some switching. In that time we have carried safely nearly 70,000,000 passengers."

"We are naturally very proud of the almost perfect record of our lines. Considering the extent of our business, the character of operation and climatic conditions, our safety record is one that few railroads can equal. "Railroad transportation today is such an exact science that a passenger's risk of being killed on a railroad train is so remote as to be practically negligible. A passenger's risk of being killed on a passenger train in the United States was one in 182,000,000 miles run in 1900. In 1910, his risk was one in 196,000,000 miles run—numbers hard to conceive. In 1926, the risk is even less than that. A train running 60 miles an hour, and covering 525,600 miles a year, would require 373 years to run 196,000,000 miles."

Many Sought Widow

The mayor of Grimsby, England, published a notice in the local paper that he had received a letter from a widow asking him to help her find a second husband. In a few days he received more than 200 letters applying for the "position."

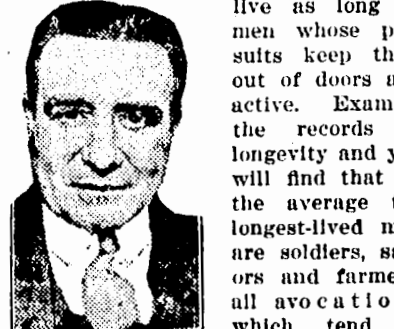

Most people won't believe that the League of Nations is really able to settle anything until the League puts one over on a country which is really strong enough to talk back.

Eat Less and Live Longer, Says Lawyer

By W. W. O'Brien

(Noted Criminal Lawyer of Chicago.) Business and professional men working under high nervous pressure do not live as long as men whose pursuits keep them out of doors and active. Examining the records of longevity and you will find that on the average the longest-lived men are soldiers, sailors and farmers, all avocations which tend to keep a man at his physical best.

Man, in general, rolls down the hill of life as fast as when his figure is rotund. "Leanness and longevity" is a good axiom for business men to remember. If office workers would eat a little less, they would add years to their lives.

Overfeeding is as dangerous to adults as underfeeding is to children. Foods difficult to digest, or which overstimulate, should be avoided by persons whose work does not require any particular amount of physical exercise. Yet thousands of business men eat as much as or more than men who do manual labor. And, inevitably, nature rebels and sickness results.

Many of the country's foremost executives eat but two meals a day, breakfast and dinner in the evening. They seek to keep the organs of the body from becoming clogged. Thousands of other business men confine themselves at noon to custards, puddings, soups and other sustaining dishes made with milk, or evaporated milk, which is milk in its most sterile form, from which 90 per cent of the water has been removed by evaporation. Such a diet is light and readily assimilated.

There is no more necessary lesson to be learned by the brain worker than how to keep well and healthy by proper attention to food habits.

Judging from newspaper accounts of the doing in Congress, the World Court hasn't been able to entirely supplant the Volstead act as a burning issue.

Use Good Oil. its cheaper in the long run MOBIL OIL. is good oil it was gargoyle Mobiloil that lubricated the U. S. Army round-the-world flight in 1924. It was Mobiloil that lubricated the Fokker plain that carried Lieut. Byrd in his successful flight to the North Pole. Sixty years of specialization in lubrication have given Mobiloil the qualities that caused them to select it. Why not use it when you can buy it almost cheap as poor oil. Do not forget to see the new John Deere Binder on display AT Morscheck Brothers

Specially Built For Hillside Harvesting. McCormick--Deering Hillside Harvester-Thresher. Meyer & Son. 1. Can be used with equal success on hillside or level fields. 2. A real 2-man machine. Bagging platform, centrally located, well balanced, men work close together. 3. Header platform is parallel to ground at all times. No grain skipped. 4. Operates equally well up hill or down. 5. Cylinder, 24" long, runs on self aligning, enclosed ball bearings. 6. Five square feet of grate surface beneath cylinder and main beater provides for immediate separation of 80 to 90 per cent of grain at the cylinder. 7. Wide separator (44") permits straw to spread thinly over straw racks for thorough separation. 8. Air blast of shoe fan is distributed evenly over entire area of shoe screen, whether machine is going up or down hill. 9. Reclaiming device in addition to shoe—similar in action to fanning mill. Cleans grain thoroughly. 10. Power operated leveling device. The operator merely moves a clutch lever—the power does the rest. 11. Screens are automatically leveled when going up and down hill. 12. All bearings supported on brackets attached to the frame not to sheet metal siding. 13. Auxiliary engine same as used in Harvester trucks and tractors. Ball bearing crankshaft. 14. All drive chains are short. Double roller chain and cut steel sprockets on cylinder drive. WE NOW HAVE A SAMPLE MACHINE FOR DISPLAY. WE WILL BE GLAD TO SHOW YOU THE MANY ADVANTAGES YOU HAVE WITH A

HAIL Insurance Policy. A FAIR COLORIST. This young woman ascends a giddy ladder every day to put finishing touches to the "Rainbow City"—the Sequi-Centennial International Exposition, opening in Philadelphia June 1 and continuing until December 1, to celebrate the 150th anniversary of the Declaration of American Independence. She is one of an army of young artists who are making the Sequi a colorful success. It is Funer. It is reported that 90 per cent of China's population have no voice in its affairs because they cannot read or write. What People Want. That novel "Babbit" pointed out the barrenness of city life, but what people want is a novel to show them how to better enjoy it. Genesee is a good town.

4th of July Picnic Accessories. Paper plates, Napkins folded and packed in boxes of 50 per package. Spoons, Ice Cream Dishes. Why burden yourself with dishes and take chances of breaking and losing them when you can get a complete outfit for 30 cents. Save and Have GRANT CLARK The Druggist. A small "Classified" adlet will get what you want—or will sell your surplus stuff. Try it.

"More Than Paid For Itself in 2 Seasons" Craigmont, Idaho, Nov. 18, 1925. Gentlemen: I bought my Case combine in 1924 and after using it two seasons I think it is the only way to harvest I have cut over 1700 acres and the machine has performed well under all circumstances. I have threshed both wheat and barley. It is a good grain saver and threshes clean. I use 4 men on the machine and my total cash outlay was less than \$1.00 per acre. In 1924 on over 990 acres we averaged 23 acres per day some days as high as 35 acres. This year on 725 acres we averaged 27 1-2 acres per day. We find the machine easy to handle and well built. I can assure you that it is a safe investment for any farmer. This machine has more than paid for itself in the two seasons. M. E. Younger. "My Total Expense Did Not Exceed \$1 Per Acre" Untown Wash., Sept. 19, 1925. Gentlemen: I am very much pleased with my Case combine which I have used for two seasons. All my cutting has been over hilly ground and the machine has saved the grain on the steepest of the hills. The Case is a wonderful grain saver, in fact, after it leaves a field there is not enough left to make good pasture for my hogs. I hired four men and my total expense did not exceed \$1.00 per acre. I also threshed peas with it and did a good job although because of rain, the peas were tough. The upkeep of the machine is very light. It will cost very little to put it in shape for another season. Otto Schwenne

Has further Hardware. Iced Cocoa. 1 1/2 cups cocoa 1/4 cup sugar 2 1/2 cups water 1/2 cup hot water 1/4 cup vanilla. Send the diluted milk in a double boiler. Mix cocoa, sugar, salt and add the hot water. Cook over a low flame from 10 to 15 minutes, stirring occasionally to prevent burning. Add to the cocoa the scalded milk; return to the double boiler and continue cooking for 10 minutes. Add vanilla, chill before serving. Pour into tall glasses which contain a few small cubes of ice. Serve plain or top with whipped cream sprinkled with cinnamon. Serve four. Egg-Nog. 1 egg 1/2 cup orange juice 1-3 cup evaporated milk 2 1/2 cup water 2 1/2 cup sugar 2 1/2 cup cherry or cherry juice or nutmeg 2 1/2 cup non-alcoholic sherry. Separate white from yolk of egg. Add salt to white and beat until stiff. Beat yolk until thick and lemon colored and add the fruit juices, nutmeg and sugar. Combine diluted milk with yolk mixture. Pour into a tall glass and put the egg white on top. Sprinkle top with chopped nuts and serve at once. Serve one. Orange-Nog. 1/2 cup orange juice 1-3 cup evaporated milk 2 1/2 cup water 2 1/2 cup sugar 2 1/2 cup cherry or cherry juice or nutmeg 2 1/2 cup non-alcoholic sherry. Add sugar and salt to orange juice and pour slowly into the diluted milk, stirring to mix thoroughly. Chill before serving. One-half tsp. lemon improves this drink for many. Serves one.

Books as Levelers. Books are the true levelers. They give to all who faithfully use them the society, the spiritual presence of the greatest and best of our race. It is funny about some "realistic" novelists that they never write about any likeable people, yet there are lots of them. Senator Edwards accuses Senator Borah with playing politics in his stand on prohibition. Of course Senator Edwards wouldn't think of doing such a thing himself. A pot of gold buried during the Civil War has been dug up on an Alabama farm. It is now up to the thrift experts to figure out how much it would have amounted to at six per cent compounded semi annually. Wonder what has become of the fellows who used to manufacture that blue black dye for long flowing whiskers. Speaking of public calamities, just suppose the little silkworm should go on a strike forcing the ladies to go back to cotton stockings! Residents of fashionable New York suburbs reported feeling strange earth tremors the other day. But it happens that this was on the afternoon when Babe Ruth made two home runs.

Eating Greater Cause of Death Than Drinking. Drink is the second greatest cause of disease and death. Food comes first, then drink. Excluding alcoholic beverages, there are dozens of drinks on the market today whose effect is detrimental, particularly to children. Milk is the best drink for children. Not only is it drink, but food as well—the most nearly perfect food known to man. Milk is an all-the-year-round drink and for this reason the children often rebel against drinking it. This condition, however, may be overcome by the introduction of the mixed drink. Milk or diluted evaporated milk may be mixed with eggs or used in fruit juices or in some other way which will disguise the fact that the drink contains milk. In the hot summer months when the child naturally drinks more than in cooler weather, it is wise to vary the ways of serving milk, so as not to create a distaste for this important food.

**Additional Personals**

Charles C. Gray of the United States Veterans Bureau was in town this week in interest of the Disabled Ex-Servicemen.

Mr. Gray is a former citizen of Genesee, and is now one of the board of rating examiners at the Boise Veterans Regional Office.

Miss Grace Jain left Sunday for Colfax for a short visit, from there she expects to go to Spokane for a week's visit.

Miss Mary Wardrobe, who has been teaching in Spokane returned to her home Saturday and will spend the summer here.

Mrs. John Wardrobe, of Portland is visiting for a few weeks with Mrs. A. Wardrobe.

Mrs. Eva M. Hahn and Mrs. G. R. Scott returned to their home in Coeur d'Alene Wednesday after spending a few days with Mrs. Walter Jain.

Mrs. F. K. Bressler returned Tuesday after spending two weeks in Boise with her sister.

Mr. and Mrs. J. H. Sherfey and daughter Geraldine, of Buhl, and Mrs. E. Slate of Colfax, spent Sunday at the Walter Jain home.

**Legends of Sleepy Hollow**

We're on the job again this week after a very busy season of hard work which kept us from writing the News.

A large number of men from the Hollow are working our new highway.

Fredrick Baumgartner Anthony Ebel, Raynold and Charles Ebel, Jr. May Mossman, Ray and Lee Johann and Lowell Isaksen are all back on the farm after spending the previous nine months in school.

W. O. Borgen and family and Mr. and Mrs. Jesse Borgen were called to the bedside of their father who is seriously ill.

The Knights of Colubus will have the annual picnic at the home of Mrs. Lorang Sunday the 27 of June. All K C's and families are invited.

Mr. and Mrs. C. F. Ebel and Francie picked cherries in Lewiston Monday.

Many of Sleepy Hollow folk attended the dance at Uniontown last week.

R. F. Kluss spent Sunday night at the John Gesellen home.

Mr. and Mrs. Walter Nibler returned from California and spent Sunday at Mrs. Nibler's parents, Mr. and Mrs. John Gesellen.

Walter and John Klemm spent Sunday with Ray and Charles Ebel.

Less Wishard is working on the road.

Mr. and Mrs. Henry Baumgartner were at John Kluss' Tuesday.

Mr. and Mrs. C. F. Ebel and daughter Freda were in Moscow Tuesday.

Mr. and Mrs. Joe Grieser returned from Wallace after visiting with relatives.

Mrs. R. J. Kluss and Mrs. W. J. Mossman attended the graduation exercises at the Academy in Moscow from which May Mossman graduated.

Mr. and Mrs. W. J. Mossman and family spent Sunday at the Arthur Linehan home.

**Changes Location**

Mr. and Mrs. Will Rader and family who have been occupying a house in the north part of town moved to the John G. Meyer house last Friday where they will make their home.

**Move to Genesee**

Mr. and Mrs. Ed. G. Bowker and family of Spokane moved their household goods to Genesee last Tuesday. They will occupy the house belonging to Mrs. Gray in the east part of town.

Don't forget the Ice Cream Social at Sam Lange's.

Genesee,

**Little Change in Gasoline**

The quality of motor gasoline sold in the United States in the last few years has undergone little change, according to the bureau of mines. The net result of the surveys made indicates, it is stated that the gasoline being sold is approximately equal to that sold six years ago and in the intervening time.

Examination of samples taken directly from the service station pumps in widely scattered cities over the country by the bureau of mines employees and placed in screw cap cans with light leak proof tops, shows there has been little variation in the average values for the gasoline thus gathered. In each of the semi annual surveys made about 150 representative samples were examined.

52(adv)

**Card Club Entertained**

The card club was delightfully entertained Tuesday afternoon by Mrs. Nellie Haymond at the home of her brother Mr. Will Cunningham.

Mrs. F. C. Shork won the largest number of games of the members and was awarded a prize and Mrs. Frank Hoorman was awarded the guest's prize. The consolation was given to Mrs. Fred Nagel.

Besides the members the invited guests were, Mrs. Gibson, Mrs. Joe Hasfurth, Mrs. Harry Schooler, Mrs. V. A. Beckman, Mrs. Frank Hoorman, Mrs. T. H. Herman, Mrs. Elmer Vanouck, Mrs. Milton Rader, Mrs. Harold Haymond, Mrs. Mahlon Follett, Mrs. James Jackson, Mrs. James McGee, Mrs. Lou Jain, Mrs. Ben Jain Misses Margaret Sampson, Rowena Hanson and Miss Jessie Pine of Boise.

The Club will meet with Mrs. Glenn Sampson.

**Why Use Hot Pack?**

"Hot pack" canning is the method now recommended by the United States Department of Agriculture in its latest bulletin on home canning. The advantages of the term "cold pack" has been applied to the method in which the material is packed cold into the containers and then processed of both the old-fashioned open-kettle method and the cold pack method are combined in the hot pack.

In the so-called open-kettle method the material to be canned is cooked directly in an open kettle as a means of killing the bacteria, and then filled into sterilized jars and sealed immediately. This method is suitable only for fruits and tomatoes, and has certain disadvantages, even with them. One is the necessity for sterilizing the jars before they are filled; another is the danger of contamination during filling or the incorporation of germs in the likely to cause spoilage.

The chief disadvantage of this method is that when the material is packed cold a longer time is required for that at the center of the can to reach the temperature of the canner. This is especially true in cases of corn for they are thick and pasty and heat through very slowly. Some fruits, however, with a large proportion of added liquid may heat through quickly and be successfully canned by this method, but the shrinkage is sometimes considerable.

In the "hot-pack" method a short precooking of the material is used to wilt and shrink it so as to facilitate packing. Any inclosed air is driven out. The material is then filled into the containers boiling hot and processed immediately, either by the water bath, if fruits or tomatoes, or in case of nonacid vegetables. Containers so packed may be sealed without the usual exhaust, and the time required for the material to reach the temperature of the canner is decreased for containers of all sizes.

Now is the time to stock up

# THE GENESSEE NEWS

GENESEE, LATAH COUNTY, IDAHO, FRIDAY, JULY 2, 1926

NO. 1

## BIG FOUR RING CIRCUS

The circus will arrive here this afternoon and leave for Moscow on Monday.

According to announcement the circus has been enlarged and in addition to all new spectacles selected 1080 employees, other new features are: 180 horses in one act, The Fez Ton tribe of Arabs from the Sahara Desert their first visit to America, The Canton Troupe of Chinese (himself), The Giant Gorilla Man, Lotus, the only performing hippopotamus in the world, and the Famous Exclusive Al. G. Barnes Feature—40 Dancing Horses and 40 Dancing Girls, and Al. G. Barnes appears in person at each performance.

Owing to the enormous size of the circus this year, the management announces that no parade will be given in the city visited, however, in place of the omitted will be given a mammoth Open Air Free Exhibition will take place on the show grounds at 1:00 and 7:00 p. m., immediately preceding the opening of the doors to the circus, and the largest traveling manager in the world, comprising over 400 rare animals from all quarters of the earth.

The circus performance starts promptly at 2:00 and 8:00 p. m. Ample parking space for autos is reserved on the show grounds and a City Ticket Office, where emerald reserved chairs may be obtained at same price charged on the show grounds, is maintained in each city.

## Washington, D. C.

Secretary Mellon shows considerable bravery when he took his pen in hand and set forth in writing his objections to the McNary-Augen bill. Farmers and industrialists alike will be all the better for reading his statement.

Those who do not agree with it, will at least get a clearer insight of the line of thought which influences a number of their fellow American citizens in the industrial east in their opposition on the measure. The unescapable point in the statement is set forth by Mellon in the following paragraphs when he wrote:

"It is, of course, apparent at once that the effect of the bill will be to increase the cost of living to every consumer of the five basic agricultural commodities in the country. The equalization fee while it purports to be paid by the farmer, will be included in the increased price of the commodity, and will, in the end, be borne not by the farmer but by the consumer. The net result will be that the American consumer will pay the increased domestic price, which, of necessity, must include the 'equalization fee' of the loss incurred in selling the surplus abroad."

"We shall have the unusual spectacle of the American consuming public paying a bonus to the producers for five major agricultural commodities, with a resulting decrease in the purchasing power of wages and, at the same time, contributing a subsidy to the foreign consumers, who, under the proposed plan, will obtain American commodities priced below the American level."

"European labor could purchase American products at a lower price and could live more cheaply than American labor. Foreign industrial costs would be lower and the foreign competitors assisted in underselling American products abroad and in our home market. I can see no permanent relief for American agriculture through subsidizing foreign competition; and that, in my opinion, is what the bill if it becomes a law will do."

## Summit News

The Pep Club was very delightfully entertained by Mrs. M. S. Wilson Thursday of last week. The afternoon was spent as usual in needlework and social converse. At 5:00 o'clock a luncheon was served by the hostess. Those in attendance other than club members were: Violet Qualey Madeline Herman, Theresa Kraut and Mrs. Art Potsch.

Chas Grieser Jr. and family and Bielenberg family, Mr. and Mrs. Joe Schleuter and Cecilia Dwyer were among those that attended the K.C. picnic Sunday held at the Lorang farm.

Mr. and Mrs. James Qualey, and Mr. and Mrs. M. S. Wilson motored to Winchester Saturday, where Mr. Wilson attended the annual meeting of the Nez Perce Fire Insurance Co.

Wilson Esser went Colton Wednesday of last week where he visited with his father Frank Esser and Brother Charles, returning home Saturday.

Mrs. Stratt and son Myron of Billings Montana, arrived in Genesee Friday for a visit at the home of her sister Mrs. Frank Qualey and family.

Mr. and Mrs. Elmer Johnson, Mrs. F. O. Green and Mrs. O. F. Rader motored to Lewiston Sunday to attend the funeral service of Mr. Chas. Sampson.

Mrs. M. Reisenauer spent Sunday trying to find a cool spot. If successful she might tell the rest of us the secret.

Mrs. Sumner Stucker and son Ralph, Frank Hampton and Alice Green were Moscow visitors Saturday.

Miss Florence Bielenberg spent several days this week at Lewiston.

Helen Grieser spent several days this week at the home of Chas Grieser.

Mr. Chas. Kraut and family, Frank Wilson left for Tacoma Wn., Wednesday where he expects to remain for an indefinite time.

Amenda Johnson visited Mrs. O. F. Rader Friday.

Chas. Grieser and Joe Schleuter were Lewiston visitors Monday.

## Rebekahs' Picnic

The Rebekahs spent delightful afternoon last Tuesday at the home of Mrs. A. Springer.

The husbands and families joined the party in the evening and at 6:30 a picnic dinner was enjoyed on the lawn.

## A Son of His Father

Friday and Saturday at the High School Opera House this famous Paramount Picture from Harold Bell Wright's book is showing come and see the Wild West and Society compared.

Admission 20 and 35 cents.

## SUPPORT YOUR SCHOOL

## Fishing Trip

Mr. and Mrs. Ray Edwards and Mr. and Mrs. Chas. Gray returned Sunday evening after spending a few day fishing near Kooskia.

## American Legion to Celebrate

On the 3-4-5 of July a celebration will be staged by the American Legion of Moscow at Rowlands Park. Among the features of interest will be a speech by Hon. Thos. Kerr on Sunday. There will also be appropriate Patriotic exercises, Base Ball game in the afternoon Elk River vs Moscow, and other features too make it a real 4th. On Saturday Genesee will play Moscow a game of Base Ball and Monday Moscow will play Thornecreek, Brass Bands, Ring Dancing and other sports of amusements are included on their program making a celebration worth one's while to attend.

## Accidents

The increasing number of motor car accidents and casualties deserves the immediate attention of public officers. This is not a brief for the creation of a new supervisory federal board or division, but it is written with the hope that the local officials in each and every community will appreciate their responsibility for it is they alone who have the power to curb the increase in reckless driving on the public highways.

In 1925 there were 22,500 fatal accidents in the United States, an increase of ten per cent over the total in 1924. In 1924 motor vehicle death rate per one hundred thousand increased five per cent over 1923. Deaths of children under 15 years increased from 6,000 in 1924 to 6,300 in 1925. Wholly apart from the economic loss through the death of men women and children by motor accidents, we cannot ignore the sorrow, grief and the hardship which these deaths impose on the members of the afflicted families, seems in danger of becoming disease. It demands that local highway officials check it.

## Altar Society Entertained

Mrs. C. P. Whalen entertained the Altar Society at her home Tuesday. The afternoon was enjoyably spent with needlework. At 4:30 a delicious luncheon was served by the hostess.

## Parents of a Daughter

A Daughter was born to Mr. and Mrs. Herman Bieleberg, Saturday, June 26 at the Saint Joseph Hospital at Lewiston. The newcomer weighed 7 pounds.

## Monday Club Entertained

Mrs. W. M. Herman was hostess to the Monday Bunch at her home Monday afternoon. The time was spent socially and with fancy work.

## Parents of Son

Mr. and Mrs. Marion Mayer are the proud parents of a son born Sunday evening, June 27. The baby has been named Marion Dwight.

## Henry Halvorson Reports:

A heavy showing of oil in the North Devon well, being drilled by C. O. Templeton, representing North Dakota and Shelby interests, has created considerable interest in this west. Because of the measures employed at the well to carry out a policy of secrecy it has been impossible to obtain detailed information on the well's status, but it was well established Wednesday that enough oil has been found to make a substantial showing in the pump and to create an oil atmosphere about the rig.

The oil is believed to have been found at about 1,500 feet and the horizon is thought to be near the top of the second redbeds. This would place the present bottom of the hole a short distance above the sunburst sand, in which commercial production is regarded as possible. Before drilling is continued, it is reported, the well will be under-reamed and casing set so as to avoid going into the Sunburst sand with an open hole.

Three heavy flows of gas have been found in the well thus far, but the volume of any of the flows is not definitely known.

## Card of Thanks

We wish to express our thanks and appreciation to all those who assisted us during the illness and at the death of our father. And we also wish to thank our friends and neighbors for the many beautiful floral offerings and special music.

Mr. and Mrs.,  
D. C. Borgen  
J. A. Borgen  
W. O. Borgen  
Miss Hazel Borgen

## Living to Be Hundred Years Old

The centenarians is by no means rare to day, but he is still good for a few sticks of type in any newspaper. However, he is in danger of becoming commonplace. In other words, the health of the nation is improving so rapidly that everybody will soon have a sporting chance to live to be one hundred.

If the things that we now know can be applied, we should add ten years within the next twenty to life expectancy. We have lengthened it ten years in the last fifteen and I believe we can add another ten in the next twenty, with proper progress. In 1936, it is believed that centerians will be common.

Each year brings new conquests of dread diseases. The exact causes, course and cure of yellow fever, typhoid and diphtheria have been mastered in the past generation, so that it is not improbable that ten years from now a death from one of these diseases will be the subject of a coroner's inquest to fix the criminal responsibility.

Brazil has given up its box seat in the League of Nations and is going to leave the game before the ninth inning is over.

## July 5th Holiday

Monday, July 5, will be a legal holiday, to be celebrated by the of Idaho as Independence day. A proclamation to this effect was issued Tuesday at the office of Governor C. C. Moore. The proclamation follows:

"This year the Fourth of July falls on Sunday and, since the statutes of the state of Idaho make no provision that a legal holiday occurring on that day be observed the following day,

"Now, therefore in order to avoid misunderstanding or uncertainty, by authority vested in me by law, I, C. C. Moore, governor of the state of Idaho, do hereby proclaim Monday, July 5, 1926, a legal holiday, to be so observed in the celebration of Independence."

"This is the one hundred and fiftieth anniversary of possession of supreme sovereignty by the American people. We have reason to rejoice and be grateful for freedom that grants to every citizen of this great nation the 'inalienable rights of life, liberty and the pursuit of happiness, and a duty to perform in preserving to future generations this priceless heritage."

## Winchester to Celebrate

The 4-5-6 of July will be celebrated at Winchester, Idaho this year and probably there will be a few from this section that will be glad to take advantage of this opportunity for a picnic and a real fourth of July.

There is \$500 in prize money to be given away and some games will have to be played to win this prize money. The Craigmont Brass Band will be there to furnish the music, and there will be a regular celebration dance to furnish this amusement to those who care for it. Everyone is invited to go and camp there the 3 days and have all the 4th of July that any one is entitled too.

## No Stability in Marriage without Love as Foundation

Without love, marriages are an insult to the principals and to the community. A young man marrying today should choose a girl who will enter intelligently and sympathetically into his life's work. A young man should see that she is a home maker too.

They should have a common ground of agreement and temperament and be relatively equal in culture and religiousness. The primary and only motive for their marriage should be love. It will conquer everything upsetting to a marriage if it is strong and loyal. On the other hand, a young couple can follow all the rules for success in the world and make a failure of their marriage if they haven't love.

Don't marry a girl you have to apologize for.

Don't marry a girl simply because she pretty, wealthy or popular.

## GENESEE FOLLOWED BY LOSING JINX

On last Sunday Genesee was again defeated by Potlatch by a score of 14 to 7. Although the local boys equaled them in home runs and outdone them in hits, the boys could not seem to hold on to the ball, a good many errors being placed to the credit of Genesee before the game was over. Genesee leased 9 hits off the Potlatch battery while Gray and Meyer the pitchers for Genesee held them to eight hits.

Next Friday, Genesee will play the Uniontown-Colton Consolidation at Troy, and the winner of that game will play Kendrick the second day of the Celebration at Troy. These games are scheduled for the prizes that the Troy people are offering at their celebration, the 2nd and 3rd of July.

Genesee has without doubt, some of the top-notch ball players of this immediate country, but if a team does not practice, they can not expect to win consistently. One night a week, with everybody out, would do a lot towards keeping the score in reverse of what it has been the past few games.

## Enjoy Picnic

Large crowd of Genesee people spent last Sunday picnicking at the Moscow park. Among those present were: Mr. and Mrs. Fred Nagel, Miss Hazel Ouse, Mr. and Mrs. Leon Follett, Mrs. Jas Jackson, Mr. and Mrs. W. W. Burr and children, Mrs. Laura Phipps, Mrs. F. K. Bressler, Mr. and Mrs. Elmer Vanouck and daughters, Mr. and Mrs. T. H. Herman and children, Mr. and Mrs. Ira Hanson and daughter, Rowena, Mr. and Mrs. F. C. Shork and Mr. and Mrs. Fred Perkins, and daughter Pearl, and Mr. and Mrs. F. E. Dieus and son, Fred.

## Eastern Intolerance

A recent edition by the Daily News in New York City, classifies the citizens of Idaho chiefly as "hog wallopers", is typical only of the uneducated and intolerant extreme saster citizens of the United States. The editorial betrays a sublime ignorance not only of Idaho but of the west, its people, its industries and the history of its development. We are thankful that only a few newspaper writers and others, cursed with the intolerance have this opinion of our state.

The most casual observer and every school child knows that the west has been populated, reclaimed and developed by the more courageous souls of the extreme states. These people are educated have educated their children and have surrounded themselves with the finer touches of civilization. Thousands of residents in Idaho who are native sons of New York state and other far eastern sections resent, more than any other group, this puerile attempt to debase the land of their adoption.

Proximity to large cities does not necessarily mean civilization. In many ways it means the opposite. Those who came to the west brought with them the desire for better things, higher morality and a real sincere desire for advancement. Western civilization is built on a demand for regimes of olden days and places. Western civilization has been refined by the fire of sacrifice, burning away the dross of selfishness. We are proud of our Idaho citizens, gathered from all points of the world. We can only sympathize with those who live in ignorance and intolerance and bid them come to Idaho to shake off the mantle of greed and cloth themselves in the raiment of unselfishness.

—Norman B. Adkinson

## Additional Personals

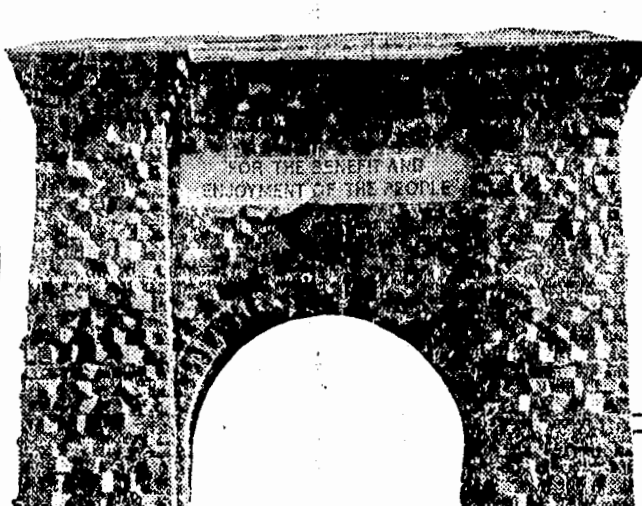

Will Davies of Lewiston was a Genesee visitor last Saturday.

Miss Jones of La Grande Oregon, arrived Saturday to spend a few weeks with her sister, Mrs. Clyde Meyer.

James Tuomy of Glendale California arrived in Genesee last Sunday and expects to spend the summer in this community.

Miss Mable Bottjer of Portland Oregon, arrived Thursday, and will visit with relatives and friends.

Miss Marie Gage of Caldesac, returned home Sunday after spending a few weeks at the Oscar Rader and Will Rader homes.

## Stephen T. Mather, National Parks Head, Opens Yellowstone

Delivers Principal Address At Gardiner  
June 20; Big Season On.

Stephen T. Mather, director of National Parks (left above) was master of ceremonies at Gardiner Gateway to Yellowstone Park June 20 when he formally opened the National Park season.

Mr. Mather delivered the principal address of the Opening Day program, released the chains across Roosevelt Arch, entrance to Yellowstone Park, and unfurled a pair of locked elk horns as symbolical of the friendly reception awaiting America's tourists this summer at the hands of the Park animals.

Above is shown Roosevelt Arch at Gardiner Gateway, through which nearly 200,000 summer tourists are expected to pass during the 1926 Park season, June 18-September 15, on the famous "In Gardiner-Out CoCo" Park tours.

New York city is now closing its night clubs at 2 A. M. and the visiting butter and egg men are complaining because there is nothing to do for the rest of the evening.

A British visitor says that the Statue of Liberty stands with her back to the United States. Putting the fact more agreeably, we might say that the United States stands back of the Statue of Liberty and all that it signifies.

Miss Eva Hampton, Arthur Hampton, Mrs. G. A. Bumpass and son Francis, returned home Saturday after spending a few days in Spokane with Mrs. Hampton.

Mr. and Mrs. G. B. Swank of Coulee City, Wash., left Monday after spending a few days with their daughter, Mrs. E. O. McAllister.

Walter Thomas returned last Thursday after spending the past year attending a business school in California. He expects to spend the summer in Genesee.

Ilah Wiswell of Haines, Oregon returned to Moscow Wednesday, after visiting with Galt Sampson. In Moscow she is visiting at the Harry Thatcher home.

Mr. and Mrs. Tom Edwards and children of Murray, Idaho are visiting at the Nathan Edwards home.

Miss Cozette Hull of Colfax returned to her home Thursday after visiting a week with Miss Rowena Hanson.

Mr. and Mrs. Harry Edwards and daughter of Lewiston motored up from Lewiston and spent Sunday at the Chas. Galt home.

Mr. and Mrs. Frank Lorang and Mrs. Theo. Lorang of Spokane visited a few days last week with relatives here.

Mr. and Mrs. W. M. Herman returned Saturday evening after spending a month in California.

Helen and Jess Winegardner left Sunday for Lewiston after spending a few weeks with Mr. and Mrs. V. Beckman. The girls are nieces of Mrs. V. A. Beckman.

Mrs. F. K. Bressler and Mrs. Frank Girard visited with Mrs. Geo. Gannon and family at Fullman Tuesday.

Mrs. W. M. Herman spent Tuesday in Moscow at the home of her parents, Mr. and Mrs. Jno. Dunbar.

**Facts About Idaho**

Grangeville—District votes \$40,000 road bonds.

Noz Perce—Thousands of sheep on their way to Clearwater summer range.

Lewiston—Larger crews being put on for power dam railroad and mill work of \$11,000,000 Weyerhaeuser projects.

500 cars Southern Idaho lambs shipped out up to June 15.

Mackay—Contracts let for 19 miles Lost River highway.

During first quarter of 1926, Southern Idaho shipped 73 cars of eggs. First three months of 1925 showed but 41 cars.

Idaho Falls—Armour Packing Company opens cream station here.

Rupert—Additional 3,000 H. P. unit for Minidoka reclamation project will cost \$200,000.

Ferdinand—B. A. Jones will build grain warehouse.

Barley—New city well provides 1,000 gallons of soft water per minute.

Twin Falls—Work to begin on Rim to Rim Snake River bridge.

Caldwell 1812 cars of diversified products, worth almost \$4,000,000, shipped from this district last year.

Lincoln, Blaine Butte and Minidoka Counties will join in building road to Craters of the Moon district, national monument.

Mountainhome—Contracts let for new high school, total \$84,000.

Lewiston—Cherry harvest up to June 10, reached 60 carloads.

Wallace—Silver Cable mine open good vein of lead zinc ore.

Kellogg—Nevada Stewart mine to be extensively developed.

Wallace—Atlas mine crosscut advances 392 feet during May with two shifts. It has 3,000 feet to go to reach objective, and will cost \$250,000.

Murray—Chester Consolidated takes over Perrille Gold mine for heavy power development.

Eight new mills or mill additions with 1950 tons daily capacity to be opened in Coeur d'Alene mining district this year.

Wallace Callahan Zinc-Lead mine strikes new ledge of galena ore.

New mill of 150 tons daily capacity, and 200 h. p. electric hoist, will be installed.

Wallace—American Mining Company has good ore showing in south shaft development.

Wallace—Ajax mine, managed by Hayes in last year restored to shipping condition.

Wallace—Success mine supplies ore to keep mill running full time.

Wallace—Cornerstone laid for St. Alphonsus Catholic Church.

Bunnett—Portly mine cars lumber and farm produce, shipped from here in recent week.

Two townships in Custer County, 45,000 acres, will be open for homestead entry Aug. 24.

Minidoka irrigation district gets 50,000 acre feet stored water in

**Blackfoot reservoir.**  
Cornerstone laid for new Strahorn Memorial library, College of Idaho.

Mackay—Work begins on Penney store building, important business structure.

Lewiston—Dike for big Clearwater long pond will be 7,000 feet long with average height of 30 feet.

Challis—Boston Idaho dredge and placer field sold to New York buyers, who will build larger dredge and do much work.

Payette—Idaho Canning Company will pack 100 cars of fruit and vegetables this season.

Parma—Local Wool Growers Association ships 500 sheep to Eastern market.

Crops all through Southeastern Idaho, in excellent condition.

Wallace—Shaft at Charles Dickens mine on Moon Creek, will be sunk to forty feet.

Wallace—Hecla mine adds another 300 tons-a-day unit to tailings recovery plant.

Wallace—Square Deal mine on Mullen road, will continue exploration.

Mullan—250 ton capacity mill to be constructed for Page mine.

Liberty—Dairy cattle exhibition held.

Wallace—Operations to be resumed, at old Ramshorn.

Wallace—Contract awarded for driving 200 feet of new tunnel at White Delf mine.

Pocatello—Work started on test well south of city, for Layne Bowler Company.

Wallace—Idaho Metal Company makes large increase in working force.

Mullan—Bullion Mining Company lets contract to extend raise, 250 feet.

(Too to be continued on page 5)

**Rotations Means Food**

The rotation of crops is nearly as effective in increasing soil productivity as is the use of farm manures and complete fertilizers, as based on experimental yields of wheat, corn and oats, taken collectively. When rotation and the use of fertilizers are practiced together the one practice adds to the benefits of the other and increased yields are greater than from either practice alone.

**"CLEANED THE GRAIN TO PERFECTION"**  
Green Creek, Idaho,  
October 7, 1925.

**Gentlemen:**

My Case combine has proved satisfactory in every respect. I have never yet seen a combine that was so well balanced and that pulled so easily for its weight.

We threshed wheat and barley and a lot of it was down and tangled. The machine handled a full 14 feet cut all the time and cleaned the grain to perfection. This fall we cut 1100 acres and had no stops. In one day's run in wheat we cut 36 acres threshing out 722 sacks. To cut the 1100 acres we used 600 gallons of gas and 70 gallons of oil. The total expense which covers all labor, (not including my brother and myself) all gas and oil and repairs came to \$877.00.

We were out 42 days and had no motor trouble whatever. I think this is the best motor ever put on a combine. I am figuring on going into the field again next year without touching the motor.

We have been recommending this machine to all our neighbors and we know that a farmer can make no mistake buying the Case combine. Arnszen Bros.,  
Per Frank H. Arnszen

**"THE MACHINE LEVELED FINE AND WAS EASILY HANDLED"**  
Uniontown, Wash.,  
November 16, 1925

**Gentlemen:**

For years previous to 1923 we bound our grain and had it threshed by a custom thresher. In 1923 and 1924 we headed threshed but both ways are expensive and wasteful.

This year we bought a Case combine. It certainly is the best and the cheapest way to harvest. There is practically no waste of grain. The Case combine did cleaned work than anything we have ever used. The motor gave us complete satisfaction and was never any trouble. It had lots of power to handle any kind of grain.

A lot of our cutting was done on very hilly ground and the machine leveled fine and was easily handled. We threshed 38 acres in one day and 2 hours. Our entire average for the season was about 19 acres a day. The expense of harvesting by this method was only \$1.19 per acre.

We are sure a farmer is safe in buying a Case combine.

There will be a full report of the Convention at Spokane given at this time.

Heart beats can now be recorded on a phonograph record, and if this gets to be the custom, a lot of these fellows who claim to be in love are going to have a hard time proving it.

A London scientist says that plants have feeling just like humans, and if that is true the cactus plant must feel stuck up.

**A Little Talk on Thrift**

There are few persons who have not at sometime shown themselves able to save money. The trouble has been that a considerable portion of these persons have been unwilling to continue these thrifty practices.

Saving must be continuous. The person who pinches and saves every possible penny for a short time and then gives up and quits will never reach the goal of independence or success. It is well always to have in mind the matter of moderation. There is such a thing as being carried away by enthusiasm. The miser is an example of this.

Goethe observed that, "enthusiasm is of the greatest value when we are not carried away by it." This can be applied to saving money as well as to everything else in life.

Being thrifty does not mean that we must be an extremist in the matter of saving of money or in giving up beneficial pleasure. Cultivate moderation. Do not save to a point of being a miser or to the exclusion of the various uplifting elements that have a rightful place in our lives.

On the other hand, we must have moderation in the matter of pleasure and out of our earnings make sure that we are providing for the lean days that are sure to come. Plan your savings along sensible lines.

Adjust them to your income and to the conditions of life as they surround you.

Do not try to save too much because it is far better to put away money systematically and persistently than to save intensively for a while and then give it up.

Even in thrift there is harm in over-enthusiasm.

Genesee is a good town.

**The Weather**

North Idaho: Heavy general rains occurred at the beginning and again near the close of the week. Fair weather with moderate temperatures prevailed during the middle of the week. The rains were unusually heavy for this season of the year and were of great benefit to grains, pastures and truck crops, but materially damaged cherries in those sections where harvest was just beginning. Much of the crop in the immediate valleys of the Snake and Clearwater rivers was harvested, however, before the rains. Harvest of wheat is under way in the Lewiston region, while spring wheat is heading well and the outlook is favorable for a heavy yield. Corn and beans are making fine growth. Pastures and ranges are fine and stock are thriving.

Southwest Idaho: Temperatures were generally low for the season, particularly at the beginning and again at the close of the week. Frost was reported in northern Boise County Tuesday morning. Moderately heavy showers occurred in the western part, improving for a time the dry farm situation which had become serious. Haying is completed in most sections and favorable yields are reported. The second crop of alfalfa is making good growth.

A scientist reports finding a tree in the tropics, that when tapped, produces milk. Now if he can only find one that will produce beer under the same circumstances, think what a reforestation program we could put on in New York and New Jersey!

Maybe the reason Jack Dempsey doesn't fight any more is that he has joined the League of Nations.

**Swine Sanitation Boosts**

**Pork Yield**

Seven thousand pounds more pork 10 litters of pigs represents the difference between raising pigs the ordinary way and raising them under the swine sanitation system devised by the Bureau of Animal Industry. Until States Department of Agriculture, according to the experience of one Iowa farmer he reports that he raised one pig from four sows under the conditions that had prevailed in the past on his farm. From comparison, he raised another lot from six sows under the system of swine sanitation, which prevents round worm and relative diseases and ailments. The first lot of sows furnished 35 pigs, of which 19 survived and weighed 35 pounds each at the end of Oct., 1925. The second lot farrowed 41 pigs of which 40 survived, one being killed by accident. The 40 pigs weighed 130 each at the end of October.

Reduced to pounds of pork the result shows that the four sows kept under ordinary conditions produced 700 pounds more pork than a similar sow handled in the ordinary manner. For 10 sows this would mean a total of 7,000 pounds more pork due to sanitary conditions and methods of handling.

Such a large difference is, of course, unusual but striking in creases, both as to number of pigs saved and gains made, are common.

The system of swine sanitation, now well known through the Central West, involves in keeping young pigs away from permanent hog lots are likely to be infected with the eggs of roundworms, a serious swine parasite. Instead, the pigs are raised on pasture under worm-free conditions.

**A Few Whys and Wherefores**

A regiment of Chinese troops turned on their Russian allies and slew 3,000 of them. It is said that the trouble started over a mah-jong game when one of the Chinese discovered a Russian player with two West Winds up his sleeve.

A Connecticut economist suggests that Uncle Sam cancel one half of the debt Europe owes us. If we did Europe would doubtless be willing to throw off the other half.

A North Carolina bishop advises all men to wear mustaches because "it is all the women have left us." Evidently he has forgotten about the collar button.

Now that the girls wear shingled hair and knickerbockers, the boys with the long patent leather hair should wear ruffles on their wide trousers to make the picture complete.

A New York minister upbraids America by calling it the Hermit nation. But anyhow we don't live like hermits. We leave that to the other fellows.

Iron rust stains on white enamel may be removed with a solution of oxalic acid. Keep it out of the children's reach.

**GREAT SESQUI STADIUM OPENED AT PHILADELPHIA**

The giant arena in the centre of the Sesqui-Centennial International Exposition site in Philadelphia was built in approximately 300 working days. It was completed in use a month before the opening of the big exposition which celebrates the 150th anniversary of the signing of the Declaration of Independence. This photograph, made from the air, shows nearly 3,000 boys on the playing field, massed there for the dedicatory exercises on May 1 which formally opened the structure. In the stands are seated 10,000 persons watching the program. A group of 10,000 persons is a large crowd but they are only a "drop in the bucket" in the big Philadelphia stadium. The boys paraded onto the field to the accompaniment of fourteen bands and there went through their drills and athletic exercises for the benefit of city officials and parents.

According to Governor Pinchot, the Pennsylvania primary cost an awful lot of money and the results prove to him that it wasn't worth it. Running in a Pennsylvania primary, according to the Senate investigation returns, is about as expensive as living at a fashionable seaside resort. The summer climate of our National Capital was the subject of debate in the British parliament the other day. This what you might call hot stuff.

**Studebaker's lowest-priced 4-door enclosed car**  
Studebaker Six Sedan \$1295 f. o. b. factory

Men and women who shop before buying a car tell us they are frankly amazed at the quality features in the Standard Six Sedan at \$1295.

It is quality through and through—not in design alone, but in a score of features that make it the rival of cars hundreds of dollars more.

In power it is unequalled by any car of its size and weight in the world, according to the rating of Society of Automotive Engineers. 28 seconds have less rate horse power and sell for \$100 to \$1890 more.

It is unusually comfortable—due to full-size balloon tires, genuine wool upholstery, tailored to a formfitting design; and extra deep, wide cushions.

Many refinements and practical conveniences have been added as the result or savings effected under Studebaker's famous One-Plant plan of manufacture. See for your self.

**MURPHY MOTOR COMPANY**  
Lewiston, Idaho

**Personals**

Miss Esther Martinson returned home after spending a year teaching at Kamath Falls, Oregon. She visited with friends in Seattle for a short time at the close of her school and was accompanied from there by Mr. and Mrs. Iver Anderson and Mr. Herman, who will visit in Genesee a while.

Mr. and Mrs. Geo Gannon and little son, Don, of Pullman visited with Mrs. F. K. Bressler last Thursday. They returned to Pullman Friday, accompanied by Mrs. Bressler; from there going to Lake Chatolet for a few days outing.

Mr. and Mrs. Chas. Gray and little daughter returned to their home in Boise after visiting a few weeks at the Bay Edwards home. They were accompanied home by Miss Lucille Gray who will visit with them for an indefinite time.

Mr. and Mrs. John Kane returned home Monday evening from Orofino, where they spent the Fourth of July and Mrs. Kane had been visiting a week with her parents.

Al Mayer left Wednesday noon for Bull Idaho, via the North and South State highway. At Culdesac he will be joined by J. S. Wilson formerly of this place.

Miss Sylvia Johnson and Miss Viola Davis who are attending the Lewiston Normal spent the week end at the Eimer Johnson home.

George Bolou and Leland Emmett left Sunday for Lake Chatolet where they will spend a week fishing. Mr. Emmett took them up returning home Sunday evening.

Mr. and Mrs. Grant Clark motored to Lewiston Tuesday evening. While there they visited the sample rooms where Mr. Clark bought his stock of Christmas goods for this year.

Mr. and Mrs. Andrew Peterson of Seattle arrived Friday for a visit with Mrs. Peterson's mother, Mrs. Henry Reese.

Mr. and Mrs. Theodore Cameron and children spent several days the first of the week visiting relatives and friends in Spokane.

Mr. and Mrs. Ira Hanson returned home Tuesday morning after spending a few days in Colfax.

Mr. and Mrs. Fred Deus and son Fred returned from Chatolet Monday evening after spending the Fourth there.

Mr. Fred Meader arrived from Los Angeles, Tuesday and expects to visit here for a few weeks.

Mr. and Mrs. W. W. Burr Mr. and Mrs. Mahlon Follett and Mr. and Mrs. Verne Beckman spent Sunday and Monday picnicking at Clarkin.

Mrs. Carl Osmundson and two little sons have gone to Princeton to visit relatives.

Mrs. T. A. Feeney and little son, Tom spent several days the first of the week with Mrs. C. P. Whalen.

Lester Hayden who has been attending school at Mansfield the past year arrived Saturday and expects to spend the summer here.

Miss Grace Jain left Tuesday for Moscow where she will be employed in the Registrar's office at the U. of I. during the summer.

Mr. and Mrs. John Dunbar visited with Mr. and Mrs. Will Herman Saturday.

Mr. and Mrs. C. E. Manning and little daughter, Billie, and Miss Pearl Perkins picnicked at Winchester last Sunday.

Mr. and Mrs. Leon Follett, Mr. and Mrs. Will Herman and Mr. and Mrs. F. C. Shork camped at Grizley, Sunday and Monday.

Mrs. Jas. Jackson visited last Thursday at the home of Mrs. Art Tegland.

Mr. and Mrs. Leon Follett made a business trip to Moscow last Thursday.

Mr. and Mrs. T. H. Herman left Saturday morning for a week's camping trip at the lakes near Spokane.

Mrs. Fred Meader arrived from Los Angeles last Friday and will visit several weeks here with relatives and friends.

Mr. and Mrs. Ernest Becker and family, and Rowena Hanson spent Saturday and Sunday at Winchester.

Mr. and Mrs. Grant Clark and daughter, Esther, Miss Verne Goltz and Mrs. Keiser spent Monday at Colfax.

Uncle Sam is about as popular in Europe as the village squire and money lender was in the Horatio Alger books we used to read when we were boys.

A prehistoric brain that is petrified has been found in a clay pit near Moscow. Some of them in the same condition are not prehistoric, either.

**THE ACCREDITED HATCHERY**

By W. D. BUCHANAN, Extension Poultry Specialist, State College of Washington.

This accredited Hatchery movement in Washington was definitely organized on June 3, 1923. Though it has never won the support of all the poultrymen in the state, nevertheless the accredited hatchery movement has made a definite and permanent impression on the poultry industry of the state.

Last year the accredited hatchery started a campaign to rid the breeding flocks of bacillary white diarrhea. It voted unanimously to test 20 per cent of the hens in all breeding flocks, as a check on the spread of this disease. Over 30,000 hens in the association and some 10,000 outside were tested. The results were so good that 25 of the transformers of the state voted unanimously this spring to have all breeders tested, and that this be made a requirement for membership in the association.

The most important contribution of the accredited hatchery system lies in the fact that it has increased the mental equipment, and broadened the vision of our poultrymen. They are no longer satisfied with conditions as they are. Everywhere there is talk of higher standards.

**French Standing Army Totals 607,000 Men**

According to advices received by the Bankers Trust Company from its French Information Service, a well-known French authority on military questions, Colonel Jean Fabry, formerly a member of the reporting committee of the Army Commission of the Chamber of Deputies, in a recent address stated that the French standing army at present numbers 607,000 men. This figure includes the troops at present in North Africa but does not take into account the other French colonies and protectorate countries nor the regions for which France holds a mandate under the League of Nations and the Treaty of Versailles.

The annual cost of the French standing army is estimated by Colonel Fabry at 4,058,000,000 francs, while at an average rate of exchange, 690 francs per 100 rentenmarks, 140 francs to the pound and 9 francs to the dollar, the respective annual costs for other armies are 2,415,000,000 francs for Germany, 2,214,000,000 francs for Great Britain and 2,236,000,000 francs for the United States. France, according to these figures, spends half as much for military purposes as Great Britain and the United States.

The 1926 enrollment of 276 boys and girls in club work in agriculture and home economics is the largest ever obtained in Adams county. The largest enrollment is in sewing clubs, where 117 are taking the work. Cooking clubs have 58 and poultry 33, with smaller numbers in canning, room improvement, swine, colt, mule, potato, sheep, corn and garden clubs.

Twenty-one people attended a demonstration on canning chicken. The steps included killing and dry picking the chicken, then canning it. Use of the pressure cooker, tests for rubbers, jars, etc., were shown by extension workers.

Graduation photographs make the business of your school days. We give special discounts to graduates. See the display of Lothrop Studio at the entrance of the Walker Bldg., Second and University, Seattle.

**What Do You Know About Your Hair?**

**By JEANNE RUEBE**  
Beauty Specialist

KEEP your hair beautiful—the old adage about a woman's hair being her crowning glory is as true today as of yore. To do this, however, it is not only necessary to nourish and care for the hair, but also to correct and neutralize a diseased condition—the presence of gray, faded and streaked strands. Medical science considers gray hair a disease, calling it "canities."

Hair, as seen under the microscope (Figure 1) is a long slender stem with a lustrous covering. The number of individual hairs in a single scalp is approximately 120,000, but the number, size and length of the hair differs greatly with individual. The normal rate of growth is about a half inch a month and there is more rapid growth in the summer than in winter.

Every hair has essentially the same structure. Underneath the covering there is a layer of fibres. In those fibres nature puts its color. Thus, the natural color of hair, as it appears to us, is color seen through the lustrous, almost transparent covering of hair. The color is due to tiny granules of pigment in the cortex of the hair, influenced by the number of these granules.

When hair turns gray it simply means that nature no longer supplies color to the inner layer of fibres. The natural color of the inner hair substance is grayish and it is seen through the lustrous transparent covering of the hair. It is impossible to duplicate the natural color of hair by applying dye on the outside surface. This is merely painting over which actually hides the natural color of the hair. However, this is exactly what the old-fashioned dyes and restoratives do, giving the hair a garish appearance. It proved unsatisfactory for it made a hard, flat and palpably artificial effect. Science comes to the front solving the problem with a synthetic dye which colors hair inside as nature does. The color pigment goes inside the hair, placing the color under the lustrous surface in the inner fibres. Through this treatment the hair once again assumes a clear, lustrous sheen which defies detection.

This is brought out in the diagram, which illustrates a cross-section of a hair as seen under a microscope. Figure II shows how nature distributes the color through the layers of fibres beneath the outer covering. Figure III, a gray hair, showing that the color is gone from the inner fibres and is replaced by the synthetic dye, indicating that the dye is resting in the layer of fibres underneath the outer coating, exactly as in Figure II of natural color hair.

Two things are cannot be taken into the selection of hair dye, particular caution should be taken to see that the dye restores the color in the fibres of the hair and not merely coats the outer shell.

**Dangers of Dry Cell Batteries for Blasting**

It is generally conceded that firing explosives for blowing out stumps and boulders, making ditches, and the hundred and one purposes for which explosives can be used, is best effected by the electric method. The advantages of electric firing are numerous. To name only a few—the elimination of hang fires, the control of the exact time of firing, the reduction in risk of starting forest fires, and simultaneous firing of several blasts may be mentioned.

One of the drawbacks of electric firing is the necessary expense of the leading wire to enable the blaster to get to a safe distance from the blast, and of the blasting machine or current supply for supplying the necessary current. Blasting machines supplied by the manufacturers of explosives cost from \$15 up, depending upon their capacity. The average farmer has considerable use for dynamite, but he usually manages to do all his blasting inside of a month or two each year. Having to spend \$15 for a blasting machine, if he desires to shoot his explosives by the electric method, strikes him as unnecessary when he can get dry cells for 40 cents or 50 cents apiece. It is usually necessary to connect five or six of the common size dry cells in order to produce enough voltage to overcome the resistance of two or three blasting caps and the necessary leading wire, but even so, this apparatus does not cost very much and sometimes can be obtained already assembled.

A battery of dry cells may fire the caps of a blasting machine, but the cells are fresh but it is far from safe, because its terminals or binding posts are alive, whereas the binding posts on a blasting machine are dead except at the moment it is being operated. With a blasting machine, when a farmer connects the wires and operates the machine, if for some reason the blast does not fire, he can go over the wiring and safely mend any breaks he may find without detaching the leading wires from the blasting machine, provided there is no one around to tamper with the machine. With a dry cell battery, it is different. If he forgets to disconnect the leading wires and goes near the machine, he may find that the shot will fire and he is likely to be killed. In fact, a number of accidents have happened in this way which have resulted in an unjustified fear of dynamite when fairly the blame could be

**Cereals an Important Crop in Washington Agriculture**

The cereal crop industry is an important phase of agriculture in Washington, as shown by production figures. An average of the census reports for 1919 and 1924 shows that Washington produces annually an average of 43,832,000 bushels of wheat; 6,844,323 bushels of oats; 881,792 bushels of barley; 655,471 bushels of corn and 139,216 bushels of rye.

Wheat is the leading cereal in Washington and occupies 85 per cent of the land devoted to cereal crops. Washington leads in the production of white wheats, producing 33.6 per cent of all the white wheat grown in the United States. Over a 20-year period the surplus of wheat in Washington has averaged 65 per cent of the total crop. Approximately 61 per cent of the entire crop has reached its final destination by water. Europe and the Orient are the principal foreign markets for Washington wheat and flour. The relation of wheat with other crops is a problem receiving attention from growers now. Land remains in fallow one out of two or three years in most areas where wheat is the leading crop. This system has already greatly reduced the organic matter and nitrogen of the soil, two essentials in maintaining productivity. There is at this time a marked tendency to include alfalfa, sweet clover and field peas in the cropping system. Experiments conducted at Pullman by the State College show that a larger total yield of grain has been secured during equal periods of time in the rotations in which a legume was used in place of summer fallow. Investigations show that during years of normal rainfall wheat grown on land previously occupied by peas, alfalfa, red clover or sweet clover generally exceeds in yield wheat following late summer fallow and compares favorably with wheat on early summer fallow. In every case, wheat after legumes produces a higher yield than wheat after wheat.

A tendency toward great stability in the price of wheat results from the fact that it can be substituted directly for feed grains. The production of either corn and oats in the United States exceeds the production of wheat. Corn, oats, and barley are feed grains and have a very limited use as a substitute for wheat. If the price of wheat goes below that of feed grains, the average annual acre yield of it may be substituted for them. The world crop of rye of 818,000,000 bushels is a factor affecting the wheat situation, however, since rye in certain countries takes the place of wheat, especially when it is cheaper. Every bushel of rye consumed replaces an equal amount of wheat. Wheat in Washington is higher than in either the Pacific Northwest or the United States. The acreage in Washington amounts to one-half that of the entire Northwest.

Costs but \$1.50 to 2.00 a Month to Operate

**The Washington Water Power Co.**

**POWER BOATS DUE TO RULE MISSOURI**

**New Type of Navigation Replaces Steamboat.**

Kansas City, Mo.—When the little blue-winged teal first took the water on the Missouri river ages ago, it began navigation history on the "Big Muddy" that soon is to see another step in its evolution.

The Indian with his canoe, the half-civilized voyager with his pirogue, the fur trader with his keel boat and the "dingy" or little steamboat with a single boiler and engine successively tolled up and down the treacherous river, each marking a step forward in navigation.

**Steamboat Once "King."**

The magnificent steamboat of the '50s, that great floating palace that marked the heyday of steamboating on the Missouri, held sway for a decade or more and with its passing river traffic halted. Now is to come the power boat and string of freight-laden barges. This modern means of river commerce is to be made possible by a channel improvement program extending over five years, whereby approximately \$200,000,000 will be spent the first year between Kansas City and St. Louis.

The first attempt to navigate the Missouri by steam was made in 1810. It was a hazardous undertaking. Besides the danger of the river, which needed the most skilled navigation because of snags, sandbars and tortuous channel, there was the danger of the lurking savage, concealed in the grass along the river banks ready to open fire on the boatmen without warning.

The Western Engineer, a small steamboat 75 feet long, was the first to ascend the river as far as Council Bluffs, which it reached September 17, 1810. It was built expressly to save the Indian. On the bow, running from the keelson forward, was a large steam escape pipe, made in imitation of a serpent. The pipe was painted black and the mouth of it red, and clouds of steam belched forth as the little ship crawled upstream at the rate of three miles an hour.

**First Trip in 1831.**

The first steamboat to ascend the river above Council Bluffs was the Yellowstone of the American Fur company, which left St. Louis April 10, 1831, and reached the mouth of the Bad river in South Dakota, on June 10. The following year the Yellowstone ascended to the mouth of the Yellowstone river, thus demonstrating the claim long made by army engineers that the Missouri was navigable that far.

Traffic on the "Big Muddy" doubled after 1830 and was at its height between 1850 and 1860. Lines of noble boats piled the stream, making possible the military and trading posts of the ever-extending frontier.

**New Shenandoah Park Has Fountain of Youth**

Luray, Va.—Gurgling through sands and flint rock of pearly whiteness, the waters of a spring in the foothills of the Blue Ridge of this county, an analysis just made reveals a specific for gotter, gout, indigestion, rheumatism and many other ailments.

Three-quarters of a century ago these waters were believed to contain curative properties for gotter, but the recent analysis shows many other diseases will yield if the waters of the spring are persistently drunk. The spring is in a separate mountain from the Blue Ridge, but in a spur of that mountain that will be embraced in the Shenandoah national park area.

The owner of the land on which the spring is situated says that nature's compound will make the spring a fountain of youth to millions when the Shenandoah national park is thrown open.

**Man Preaches 20 Years With Self as Audience**

Samman, Switzerland.—For twenty years an eighty-year-old man has been preaching in a little church here with himself as his congregation.

A century ago the village was half Protestant and half Catholic. There was only one church, so the two sects agreed to use the church during alternate Sundays.

The aged man is the last survivor of the Protestant sect. He still occupies the church every second Sunday. The Catholics for years have besought him to abandon use of the church, but he refuses.

**Sees Diet Adding Inch to Next Generation**

Atlantic City.—"The gain of an inch in height and a corresponding increase in weight may be looked for in the next generation, because of our better diet habits," said Dr. S. J. Crumblin, general executive of the American Child Health association.

Miss Miriam Birdseye, an extension agent in nutrition of the United States Department of Agriculture, agreed with Doctor Crumblin. She said that the children of the future would have longer and stronger bones, better muscle tone, clearer skins and brighter eyes.

**To Sponge Italy**

Rome.—The Fascists aim to sponge Italy a bit without what they regard as the excesses of American prohibition. The number of vendors of drinks has been cut in half, and the hours for sale have been limited.

It is said that one-half million people live on the Sahara desert. And just think of how much nice parking space they must have.

Dry workers are asking for a tax on near beer. We doubt whether it would be Strong enough to survive.

**Five Counts Against Stumps**

Stumps in cultivated fields are a serious liability. They occupy valuable land, foster the growth of weeds, mar the appearance of otherwise smooth fields, shelter insects and harmful animals, and prevent efficient use of machinery.

A two-way dish closet in the wall between the kitchen and dining room is a great convenience. If on the kitchen side, it adjoins the sink it will save still more steps.

**A Little Talk on Thrift**

To be thrifty in the truest sense is to thrive, to succeed, to make progress. Anything that interferes with this steady development is, therefore, a violation of thrift. Most of us give ample thought to our individual up-building in a material way, but there are subtle elements in life that all too often receive scant attention.

Two thousand years ago, Seneca, the philosopher wrote: "Man is born of mutual assistance—you must live for another if you wish to live for yourself."

We cannot thrive or advance to the high levels of success thru any creed of criticism.

How much time and energy are wasted in looking for the shortcomings of others! How many opportunities of self-advancement are sacrificed on the altars of petty jealousy and fault finding! It is within the meaning of thrift to say with Ruskin: "Do not think of your faults; still less of others' faults; look for what is good and strong, and try to imitate it. Your faults will drop off like dead leaves, when their time comes."

Fault finding and criticism of our fellows is a habit that will grow steadily unless checked. Human imperfections are not difficult to find if we are disposed to waste time looking for them. But to do so is not only a sacrifice of time, but develops a reflex influence upon ourselves that is harmful.

Look for only good in others. True character is not built on a frame-work of other men's faults. Success will never come through picking at the faults of those about us.

Needless destructive criticism of others is a petty vice, but it weighs heavily in the balance of human affairs. Grow within yourself and thrive through an attitude of generous helpfulness to those about you.

Seats for the first performance of a new revue in New York sold recently at \$55 apiece, which shows that every year it is getting more expensive to be a sucker.

Some interprising Californians are overlooking a bet by not signing Abd-el-Krim a movie contract.

**America Prospers**

Mass production, inventive genius, elimination of class hatred, and recognition by labor and capital that only a prosperous industry can pay high wages, are among the principal factors contributing to the high level of industrial development and prosperity among all classes in Our Country, declares Secretary Mellon. In a recent radio address he said:

"Our wealth has come from two sources. It is due, in part, to our great natural resources and in larger measure to the efficiency of our industrial organization. That organization, by utilizing labor-saving devices and other inventions and discoveries, has succeeded in keeping wages and profits at a high level and diffusing prosperity among a larger number of people than has ever known it before."

"As a result, America is now the richest nation in the world. We have a greater income per than any other nation. Our standard of living is higher, and we are now the leading industrial nation and the world's greatest creditor."

"It is organized industry that has brought about the present unprecedented development in this country. It has made possible a uniform and therefore, a cheaper production of commodities with distribution and consumption of goods over a wide area so that in America we now consider as necessities many things which were luxuries to the preceding generation."

"Both labor and capital are beginning to realize that they have a common interest in building up the great industries which are sources of wealth for all, and that in America, with the opportunities which it offers and the constant transition from poverty to wealth, there is no place for class antagonisms or class warfare."

"We have found out in this country, that by investing heavily in labor-saving machinery, we can increase the productive capacity per capita of labor, and also eliminate waste, which is such an important factor in the attainment of national prosperity. In this way, we can pay high wages and still reduce costs, so that the finished product can be within reach of the average man."

## The Value of Feeding Grain to Dairy Cows

By T. E. SPEEDY, Test Supervisor

COMPARISON of some of the records made in the Gooding-Jerome Cattle Testing Association, in Gooding and Jerome Counties of Idaho, during the past year, show very clearly that it pays to feed grain to our dairy herds. The yearly records of the five highest producing herds fed grain, and the five highest producing herds not fed grain, were compared, and the results were remarkable. The table below shows the averages of the two groups. Their differences are expressed in percentages.

	Grain-fed herds	Non-grain-fed herds	Difference
AVERAGE Pounds milk	6,915	5,722	+1,193
Pounds fat	366.7	286.0	+80.7
Value of product	\$177.00	\$122.47	+\$54.53
Pounds succulent roughage	2,119	2,119	—
Pounds dry roughage	5,817	5,632	+185
Days on pasture	179	203	-24
Cost of pasture	\$8.81	\$8.73	+\$0.08
Cost of roughage	\$39.35	\$32.89	+\$6.49
Cost of grain	\$59.63	\$32.86	+\$26.77
Total feed cost	\$115.49	\$69.50	+\$45.99
Value product over feed cost	\$61.51	\$52.97	+\$8.54
Returns for 51 spent for feed	\$3.37	\$3.29	+\$0.08
Feed cost per pound milk	.016	.017	-.001
Feed cost per 100 pounds milk	.66	.67	-.01

A study of these figures shows that the grain fed herds had an average milk production of 8,915 pounds per cow, against 5,722 pounds per cow in the non-grain fed herds, or a difference in favor of the grain fed herds of 3,193 pounds milk, a 55% greater milk production.

In butterfat production, the difference was 100.7 pounds in favor of the grain fed herds, or a 37% greater butterfat production. In the grain fed herds this butterfat had an average value per herd of \$54.53, over the value of the butterfat produced in the non-grain fed herds, a 44% greater income for the grain fed herds.

In feed it will be noted that the amount of dry roughage was very similar, while the grain fed herds received ensilage in addition. (Herd receiving ensilage were not purposely selected for this comparison.) Days on pasture an equal cost of pasture were very similar. In summing up the results we could say that the grain was the big difference.

This feed for the grain fed herds cost \$26.67 over the feed for the non-grain fed herds, or an additional cost of 21%. However, there was still a profit over feed cost of \$35.58 per cow over what each cow in the non-grain fed herd gave, a 28% greater profit.

In addition to the greater production and profit of the grain fed herds, the cows were in better physical condition, carried more flesh, and held up to their large flow of freshening time longer.

## Long Distance Guernseys

Fine Feathers of High Hill 73199, is the champion long distance record cow of the Guernsey breed. At the age of eight years she had completed five yearly records credited with a total production of 3,457.32 pounds of butterfat from 48,744.5 pounds of milk. Divided into years this gives an average of 691.5 pounds of fat and 13,722.9 pounds milk. Her highest production year was in her 6-year-old form when she produced 812.13 pounds of fat from 15,750.3 pounds of milk.

"Fine Feathers" is a daughter of Imported Fine Feathers 53988; she was sired by King Robert of Great Hill 31925. She was bred and is still owned by William R. West of New Bedford, Massachusetts.

The only Guernsey cow to have seven official records is Little Beauty 21, 45221, owned by D. O. Bryant, Oceanside, California. By the time she was 12 years old she had to her credit a total production in seven years of 3,791.5 pounds of fat from 74,360.7 pounds of milk. She made her best production as a 9-year-old, taking a record that year of 679.46 pounds fat from 14,576.8 pounds of milk.

A dairymaid milked the penive goat, and putting, paused to mutter, "I wish, you brute, you'd turn to milk." And the animal turned to butter.

## Lopez, Famous Orchestra Leader, Gives His Advice On A Favorite Dish

VINCENZO LOPEZ, famous conductor and orchestra leader, and a radio star who is heard by millions of persons through the WEAF radio chain of twelve stations, and whose recordings on phonograph and piano roll are nationally played, is one of the busiest men in New York. Nevertheless, he finds time to take interest in every detail of the various matters with which he is concerned. Mr. Lopez is quite a connoisseur in culinary matters, and often makes suggestions in this regard. Here he is seen in the kitchen of his own institution, the Casa Vincent Lopez, assisting his chef, Michel, in the preparation of Blaque Lopez's favorite recipe which is not only extremely delicious, but, on account of its gelatine ingredients, very nutritious besides.

## Swiss Yodel Familiar in the Canadian Pacific Rockies

GUIDE AND TOURIST ON A GLACIER.

The Swiss influence is felt throughout the Canadian Pacific Rockies, with their heaven-kissing peaks to scale, then the erection of model Swiss chalets reminding them still more of their faraway home-land, finally enticed the Swiss guides to take up permanent wooden houses were built on the side of the hill just west of Golden, B. C. they answered the call from across the Atlantic and returned after every profitable summer season in the Canadian Pacific Rockies. Now, however, with their wives and flocks of children, they live happily all the year round in the land of their adoption. Two of the most famous Swiss guides in the Canadian Pacific are Edward Feuz and Rudolf Aemmer, both holding Swiss licenses. No climber in their care has ever had an accident.

## Prominent Japanese Breeders Visit State

Heiso Shionoya, prominent Holstein breeder of Sapporo, Japan, and Hiroshi Komatsu, special representative of the Central Association of Animal Industry of Japan, whose address is Tokyo, were Washington visitors the early part of the month, and in company with Thomas J. Owens, representing the State Holstein-Friesian association, made the rounds of the larger Holstein herds of Western Washington.

Mr. Shionoya has been commissioned to buy for friends and acquaintances at home 20 head of outstanding Holstein females, and one very high-class bull, and one cow, desiring to select these cattle, but in choosing will visit Wisconsin before making his final selections. He did, however, before leaving for the East, close for the purchase of two heifers each from Carnation and the Western State Hospital.

Mr. Komatsu is making a tour of observation at the best of his association, so will visit the leading livestock centers of this country before returning home.

Mr. Shionoya will be remembered as the purchaser of the bull Firoch Plebe Veeman, that topped the Pacific International Holstein sale in 1923 on his bid of \$2,000. This bull is now giving a good account of himself in Mr. Shionoya's herd, and Mr. Shionoya is well pleased with the bull's offspring which he describes as of good type and of much dairy promise.

## Russell Barred From England

Secretary of State Frank B. Kellogg has been urged by a telegram from Forrest Bailey, a director of the American Civil Liberties Union, to protest the action of immigration authorities at Plymouth, England, in preventing Charles Edward Russell, socialist candidate for governor of New York in 1910 and 1912, and author of numerous books on social problems, from debarking on English soil. No reason was at first given for the ban. Later it was explained that Mr. Russell was barred at the request of the Irish Free State, which he has attacked in books.

TIME ENOUGH  
"Don't intend to be married until I am 30!"  
"I don't intend to be 30 until I am married!"—London Mail.

## Vacation Camps for Farm Women

The beneficial effect produced on the average human being by change and recreation is being constantly impressed upon the public through the doctor's advice to his patients; health specialists of every school and cult dilate upon it at every school and boy scout leader and turn; girl and boy charge of the well-being of groups of men, women and children do likewise.

The extension service of the Washington State College is not backward in advocating these three great factors—rest, change and recreation—to those really requiring rejuvenation of mind and body and announces that three vacation camps for farm women will be held in Washington this year. The first one, open to all farm women in the state, will be held in Pullman, June 20 to 25, at the same time that the boys and girls' club camp and a farm marketing school are to be held. Special rates are being offered by railroads.

A camp will be held at Lake Summit in Thurston County August 13 to 21 for the farm women of Thurston, Grays Harbor, Mason and Kitsap Counties. Whatcom County rural women will have a camp at Mt. Baker High School August 12 to 14. At each camp recreation and vacation will be stressed, with a certain amount of object work.

These camps will be arranged especially for the convenience of farm women; advantage of this opportunity should be taken by all weary housewives to take the five days' absolute rest from the cares of home and family, to enjoy the change they can have at very little expense to themselves, and the opportunity to meet congenial friends and strangers, away from the busy life of the home. The women are entitled to this time at least, during the year, and if she is wise she will prepare herself and the family to consider this opportunity and arrange for this absolute rest, change and recreation that is offered to her.

This outing need not be without profitable results, if advantage is taken to seize upon some of the many suggestions that will be made by those in charge of the camp, for improvements in the home, ways and means to better the conditions of the home surroundings and the opportunities afforded to increase the family income in many little ways.

Most women are real economists, but none of us know it all, and the sensible ones will grasp every detail of suggestion, and at least give it a trial when occasions arise to demonstrate what others have found to be good methods.

There is so much still for all to learn, although it does seem that papers and pamphlets are full of "rehash"; still that "rehash" at last becomes impressive and we conclude that there is something in it for ourselves.

Any woman desiring to go to the summer camp should go with the fixed idea to get all the good possible from the opportunity—to rest all she can—to learn all she can—to enjoy all she can—to help make others enjoy all they can—to be cheerful, jolly and happy—to meet everybody—(you may be entertaining angels unaware)—to take along a few good humorous stories.

This will give to the tired housewife a new lease on life, she will look on her familiar kitchen at a different angle when she is miles away from it—the pots and pans will not look so formidable when they are only pictured piled up in the kitchen sink, and the pile of ironing to be done will twinkle down to nothing when observed in the mind's eye, and that weary feeling will disappear in the atmosphere of other women's bright happy faces, each intent on seeing that one and all shall have a real holiday.

The uplift will stay with such a "Farm Woman" for a long time, and she will decide to make the few days' camp life a yearly occurrence—it the college will only give her the chance.

## Wallpaper Industry Training Paperhangers

Modern vocational training has for several years been recognized as a vital step in the development of American industries. Manufacturers in many fields are beginning to depend upon craftsmen and mechanics for proper application and installation. The wallpaper industry is one of those that recognize the importance of developing more and better mechanics and as a result are sponsoring educational programs. The wallpaper industry has established in public schools throughout the entire country. Approximately 250 men are being trained at the present time for the paper hanging trade in seventy cities of the United States.

## study the greatest book in the world.

The pastor will preach at 11:00 A. M. on the theme, "It's the Wonderful way of the Cross."  
Our church was recognized at the Spokane Idaho Empire Convention as having given the most per capita for station missionary work and for having by far the largest percentage of the women of their church enrolled in the Missionary Society. The Missionary Society will meet Tuesday afternoon, July 13 at 2:30 P. M. with Mrs. Frank Qualey.

## Horse Sense Instead of Shovel

In the campaign of education to prevent fires, a suggestion is made that campers and picnickers carry with them long handled shovels to be used in smothering camp fires with earth, says the Seattle Times.

A better suggestion would be for each camper or picniker to carry a little longhandedness and common sense into the fire hazard areas. A camping party with a supply of common sense will not need other materials with which to cope with the remains of a sensible fire.

Prevent fires through moderate reasonable use of the forests. Protect the right to renew your youth by occasional contact with nature, unhampered by other men and there will be no need for carrying curative weapons into the forests.

It is the unthinking boastful fool who misuses the privileges of enjoying nature at her best, and such individuals are a menace wherever they are to be found. They do not have to go camping to demonstrate it.

A school to study dogs has been opened in Berlin where may be a move to reduce the price of frankfurters.

## At Washington, D. C.

There is strong possibility that proposed prohibition legislation which a little while ago seemed certain of passing, will go into discard at the close of this session. Only a few weeks ago the members of House and Senate were standing by the programme for the strengthening of the enforcement machinery. The wets and Drys alike had apparently agreed that whatever the final revision on this matter, they could not be short in any part of the law. Therefore they were ready to uphold it. The situation has changed entirely. Many of the bills promise to die on the calendar or at least await the December session.

The only explanation is that the testimony given during the investigation of the Pennsylvania primary campaign which disclosed that back of the candidates a great wet and dry fight was waged with lavish expenditure by interested parties has created a feeling that where the pot is calling the kettle black, there is little to be gained by enacting additional legislation. It will be most unfortunate if the Treasury reorganization bill which provides for the creation of a Customs Commissioner, and also for a Commissioner of Enforcement, a bill which is necessary for the effective administration of the Customs Department, should fall by the wayside.

Who remembers the good old days when we knew that Florida was nothing but a swamp, alligator and burning sand?

A newspaper writer says that the farther south one goes the heavier becomes the alcoholic content in the bootleg liquor. May be this accounts in part for the Florida migration.

North Idaho: The weather has been fair with temperatures above normal all week, and uncomformably high the last half. In the Lewiston district the cherry harvest is about completed and wheat harvest is in full swing. In the later sections the cherry harvest is under way and all grains, including corn, are making fine growth. Alfalfa and pastures are very good, having been much benefited by the recent rain. Irrigation water is not likely to be short in any part of the district. Early apricots are being marketed and early peaches are beginning to ripen. The fruits are abundant.

Southwest Idaho: Temperatures were above normal all week and were exceptionally high during the last half when the highest June temperatures for years were recorded in many parts of the district. Irrigated crops continue to do well, but the supply of a failure and ranges are very dry. Having continued in many districts and grain harvest is on in the lower Boise and Payette valleys.

Southeast Idaho: The first of the week was cool, but the later half was unusually warm. The winter wheat crop will be light on dry lands and in some places will not be worth harvesting. Spring wheat on irrigated land is excellent and oats and Barley are looking well. Fancy potatoes for seed are being planted in the Benewah County, while the market crop is making good growth. The condition of beets is fair to good. Small fruit is ripening. Jack Rabbits are reported to be causing serious damage to crops in parts of Bingham and Power Counties.

It is said that Great Britain last year imported enough apples from America to pay one-third of her annual debt payment to Uncle Sam. No wonder those European diplomats can hand out so much applause.

Sweet Clover Wants Sweet Soil  
Where sweet clover is to be sown sufficient lime should first be applied to neutralize the acids in the soil to a depth of 6 inches, says the United States Department of Agriculture. An application of 1 or 2 tons of burnt lime or finely ground limestone will usually be sufficient for this purpose.  
Although fields with apparently acid soil have been known to make a fair growth of sweet clover, such fields usually are rich in humus or phosphorus and are exceptional. Soil types with slightly acid surface soils and alkaline subsoils will grow sweet clover successfully; provided the acid soil is not more than 6 to 12 inches in depth. If a maximum growth is to be expected, however, sweet clover, like many other legumes, must be grown on soil having an abundance of lime.  
They used to blame all the bad weather on to the sun spots and pretty soon we expect to hear Senator Pat Harrison blame it on to the protective tariff.

Specially Built For Hillside Harvesting

1. Can be used with equal success on hillside or level fields.  
2. A real 2-man machine. Bagging platform, centrally located, well balanced, men work close together.  
3. Header platform is parallel to ground at all times. No grain spilled.  
4. Operates equally well up hill or down.  
5. Cylinder, 24" long, runs on self aligning, enclosed ball bearings.  
6. Five square feet of grade surface beneath cylinder and main beater provides for immediate separation of 80 to 90 per cent of grain at the cylinder.  
7. Wide separator (44") permits straw to spread thinly over straw racks for thorough separation.

8. Air blast of shoe fan is distributed evenly over entire area of shoe screen, whether machine is going up or down hill.  
9. Recleaning device in addition to shoe—similar in action to fanning mill. Cleans grain thoroughly.  
10. Power operated leveling device. The operator merely moves a clutch lever—the power does the rest.  
11. Screens are automatically leveled when going up and down hill.  
12. All bearings supported on brackets attached to the frame not to sheet metal siding.  
13. Auxiliary engine same as used in Harvester trucks and tractors. Ball bearing crankshaft.  
14. All drive chains are short. Double roller chain and cut steel sprockets on cylinder drive.

### 10-20 Plow Tractor

Recommended to drive a 20x32 thresher

### TRACTOR FARMING A PLEASURE

The man who has wrestled with plow handles, or who has urged tired, sweat-marked horses to more effort, or who has reluctantly set the plow or disk harrow a notch or so shallower, understands what is meant by "Tractor Farming a Pleasure." It is not the same sort of pleasure one gets from a social gathering, celebration, etc., but it is that deeper, truer sense of pleasure coming from an accomplishment—coming from doing a piece of work and doing it well.

Then there is always the problem of getting the work done on time. A late season, rainy, cold weather, must always be contended with. The tractor power farmer knows that he can jump in on the good days and accomplish many times as much as with animal power and do it better. He knows that if necessary his outfit can be kept going day and night, long enough to get his crops in on time. These, briefly, are some of the reasons why the progressive, practical man who farms for a profit gets a thrill of pleasure from doing his work with tractor power. Good seed-bed preparation is the most fundamental step toward a profitable crop. It takes plenty of dependable power to prepare the seed bed properly and on time.

This McCormick Deering Tractor can be seen at work with a 2-bottom McCormick Deering plow and Disc Harrow this week and next at the John Krier Farm, adjoining the City on the South, just across the railroad tracks.

### Oldest White Settlement Celebrates

The historical center of the Pacific Northwest is the city of Astoria, located on the south bank of the mighty Columbia river, a short distance from the shores of the Pacific ocean, the first settlement of white people in the vast and fertile empire which lies west of the Rockies and north of the California coast.

Events of tremendous historical importance in the growth and development of the United States, transpired within a short distance of this community, events which in later years were determining factors in making this great district with its tremendous potential wealth, under the guardian folds of the Stars and Stripes in spite of the encroaching waves of Britain's ambition for extended empire.

Captain Robert Gray, the intrepid mariner, brought his ship Columbia over a surf beaten bar, to anchor within a few miles of where Astoria now stands, in May 1792 and named the mighty river which has since been molded by the hand of man into a great and safe artery of commerce, after his staunch craft.

In the winter of 1807, Merriweather Lewis and William Clark, leading a band of ragged, half-starved but undiscouraged explorers down the north bank of the Columbia, looked longingly across the seven miles of swirling water to the more hospitable shores of the other side. Finally the river was negotiated and the party landed where Astoria now stand within sound of the surf and the mighty ocean they were seeking.

In the spring of 1811, a party of traders and settlers, headed by John Jacob Astor, sailed across the Columbia bar on the ship Tonquin and Astoria became a reality.

Later while British forces occupied this territory and while mistaken and poorly formed politicians of our own nation were trying to separate this territory from the United States, it was the fact of these heroic achievements, of discovery and exploration and settlement, that gave final determination to the boundary problem bringing what later became the great states of Idaho, Washington, Oregon and Montana into the Union.

On July 20, 21, and 22 of this year, the daring feats of those hardy pioneers of another century are to be commemorated.

Rising high above the city of Astoria, a great column of stone, unique in its beauty of carving and aspect of simple strength and dignity, has been erected by Vincent Astor, grandson of the founder of the city.

From a platform on its lofty summit a magnificent panorama permits the eye to trace the weary trail of Lewis and Clark down the Columbia river, the vast harbor in which the ship Columbia cast anchor and which is now populated by the ships of all maritime; the site of old Fort Clatsop where the Lewis and Clark party wintered before undertaking the arduous return trip to the east; the waves of the Pacific ocean and its sandy beaches, where the explorers boiled the sea water to obtain their salt; and the now thriving city which has sprung up from the confluence of the stockade of that old Astor trading post.

In memory of these things Astoria will be a mecca in July for a great concourse of historians, writers and scholars, who are coming west on the Columbia River Historical Expedition, sponsored by the governors of the Northwest states and which will run over the line of the Great Northern railroad, commemorated by a number of government officials and notables in all lines of life, this distinguished group will take part in dedication services for the great "Astoria Column"; the stone canopy marker at the Salt Grain at Seaside, Oregon; the memorial chapel under course of erection at the site of the first Protestant church erected west of the Rockies, which is situated on Clatsop Plains, 10 miles from Astoria, and a monster flagpole and tablet erected on the site of old Fort George.

The citizens of Astoria, in recognition of their benefits from the deeds of pioneer heroes of the Northwest have laid elaborate plans for a great celebration to commemorate these high points in

### Can We Stand The Pressure

Money in the average man's pocket burns its way out. Prosperity to often brings discontent. As with the individual, so it is with states and nations. People will struggle against adversity and be drawn closer together by hardships. But when the necessity for self preservation is removed, dissatisfaction, envy jealousy and agitation creep in.

That is the greatest danger that our country faces today. We have been unusually prosperous. We have had more money than the necessities of life called for.

The "curse all doctor" with his address of "steaming political theories offers us a remedy for our real or imaginary problems. Like the magician who can produce a bowl full of gold fish out of a silk hat, he offers us laws to help this class or that class, at the expense of the other class. But when the curtain goes down on his act, he has our tax money and we have had the pleasure of seeing him do his political tricks.

Our country is ripe for the cure all doctors. They are showing what is wrong with present prosperity, and how by adopting their courses of treatment we can put two dollars in our pocket where we now have one, and better yet make "the other fellow" pay the bill.

We should be thankful for the prosperity which is now ours. The dog with the bone that saw his shadow in the water tried to grab the bone of the other dog and lost the one he had.

We not only have a bone but a good juicy steak in our teeth today. Our banks are full of money, our workmen are the highest paid on earth, most of our farm crops are bringing good prices, transportation is above normal, building is at record figures, power and development has broken all records, our homes are filled with electric lights, telephones, radios, automobiles and every modern convenience under the sun.

As a nation, can we stand prosperity, or will we allow ourselves to be duped by the "cure-alls" who would offer visionary theories in trade for proven advantages which we now enjoy?

### Hotel Changes Hands

Monday the 15th of July, Mrs. Olive L. Reynolds took over the Genesee Hotel from the Campbell Investment Co., of Spokane. Mrs. Reynolds is an experienced hotel keeper, having run the hotel at Colville Wash., for several years. Her latest experience has been in running a dairy farm in the Colville section for which she traded for her present location.

She will take full charge of the Theatre and Hotel; will run a strictly up to date place and will appreciate the patronage of those who need the services of the hotel and theatre.

### Progressives Entertain

The Progressive Club entertained in honor of Mrs. Casebolt last Thursday at the home of Mrs. Glenn Sampson.

The evening was spent socially after which dainty refreshments were served.

The club presented Mrs. Casebolt with a beautiful silver bread plate.

### Farewell Party

A number of friends give a pleasant party Friday afternoon, in the honor of Miss Kathryn Casebolt. Kathryn received many pretty and useful gifts. Later in the afternoon a lunch of ice cream and wafers was served.

### The Syringa Club

The club gave a very pleasant surprise last Thursday to two of their members, Mrs. Jesse Borger and Mrs. John G. Meyer both celebrating their birthday on the same day.

The club served a delicious dinner at 5 o'clock and presented the birthday children with handsome birthday presents.

The next meeting of the club will be at the home of Mrs. Paul Heppner. Only five club members were present with one exception, Miss Inger Ulre, the invited guest.

### Casebolt's Leave

Monday morning Mr. and Mrs. Casebolt left for Yakima to make their home. They will be met at Wilbur, Wa., by Victor who will accompany them and help them to get settled in their new place of residence.

### W. W. P. Co. Notes

The first 6 1/2 per cent cumulative preferred stock certificates of the Washington Water Power company are being mailed this week to 796 customers and employees of the company in the Inland Empire who paid for those stocks in full before the issue of May 26, according to work received from W. H. Ude, director of public relations for the company. These 796 new stockholders are the first to be entered on the preferred stock list. These certificates would have been mailed shortly after May 26 but the delay was occasioned by the failure of the lithographers to get them out in time.

The 796 new stockholders will receive certificates for 10,460 shares, representing a par value of \$10,460,000. The next issue of shares is August 26 and subscribers who will have paid for their stock in full will at that time receive their certificates.

Since the customer ownership campaign was resumed April 7, a total of 449 customers and employees in the rural districts have subscribed for 4243 shares of this stock. In both Spokane and the rural districts a total of 1968 customers and employees have subscribed for a total of 22,065 shares of this stock. A little more than 7000 shares remain to be sold.

In the Moscow and a Genesee district, a total of 42 customers and employees have subscribed for 360 shares of this stock to date.

### Announcement

Dr. Jesse H. Burgess of Moscow has sold a one half interest in his office and practice to Dr. A. T. Bradbury of Boise, Idaho. Office of the Drs. at Moscow will continue under the name of Drs. Bradbury and Burgess. Dr. Bradbury having charge at Moscow, while Dr. Burgess is establishing an office in Pullman in the First National Bank Building. Dr. Burgess will be in Moscow every Monday morning and will spend the balance of his time in Pullman after the 17 of July.

### Entertain Sunday School Class

Miss Pearl Perkins delightfully entertained her Sunday School Class last Friday at her home. The kiddies pleasantly spent the afternoon playing games on the lawn. At 4:30 a dainty lunch of ice cream was served. The guests were: Betty Lonoway, Betty Lou Burr, Bernice Mervyn, Billie Mantering, Cecily Ann Herman, Cleora Miller, Frances Dresher, Floyd Rader, Richie Sampson and Bayne Hickman.

### Grain Fire

A grain fire occurred at the Wm. Fish ranch Tuesday morning in which 40 acres of fall club wheat was destroyed. The wheat was exceptionally heavy although it was partly covered by insurance, it will not compensate Mr. Fish for his loss. The cause of the fire is unknown.

### Harvest Starts

Last week Roy Evans started the ball to rolling by bringing some of his his years crop to the Genesee Farmers Union Elevator. Many of the farmers are now binding and by the last of next week it is probable that the combine harvesters will be going full blast in this vicinity.

### Dr. and Mrs. Leavitt Return

Dr. and Mrs. N. M. Leavitt returned home Sunday morning from a 3 weeks trip to the coast, where they spent their honeymoon, and the Dr had been in attendance of the Pacific Northwest Dental Conference held in Portland recently.

## Genesee Exchange Bank

SEE US FOR FARM LOANS

### Causes unknown unless started from damp hay

But Moscow now suffers the loss of their mammoth warehouse, since about seven o'clock Sunday evening when the alarm was turned. The loss was estimated at ninety thousand dollars which however is partly covered by insurance.

Had the fire occurred a few weeks later there would have been still larger loss which would have amounted to fifteen thousand dollars more, for their shipment of twine would have been in store for the harvest.

### New Assistant In Postoffice

Miss Mamie Krier will assist in the postoffice during the summer months, she having taken Miss Wilma Casebolt's place, who recently moved to Yakima, Wash., with her parents, Mr. and Mrs. F. S. Casebolt.

### Card of Thanks

We wish to thank our friends and neighbors who helped us extinguish the fire in our grain field this week.

Mr. and Mrs. Wm. Fish

### College Training Pays Big

Investigations show that each day spent in college pay the student \$55.55 in later life.

Does it pay to go to college? Most people have agreed that it does, but few have taken pains to determine how much it pays.

President A. W. Van Hoose, of Shorter College, Georgia, and Dean Everett Lord of Boston University have both made interesting studies of the value of education.

According to information furnished by the Department of Information-Service of the Utah Agricultural College, President Van Hoose found that a young man or a young woman with a college education has 800 times as many chances of being successful in life as one with no schooling, 200 times as many as one who has a high grade education, and 9 times as many as one with a high school training. While less than one per cent of Americans are college graduates, President Van Hoose points out that this small number has furnished 55 per cent of our presidents, 54 percent of our vice presidents, 47 percent of our speakers, 46 percent of our members of Congress 61 per cent of our secretaries of state, 67 per cent of our attorney generals, 69 per cent of our great army and navy commanders and over 50 per cent of the distinguished people of the United States.

President Van Hoose also says that every day spent in College is worth \$55.55 to the student and offers the following proof:

"Every day spent in College pays the young man or woman \$55.55." Proof: Illiterate laborers earn an average of \$500 per year in forty years they would earn \$20,000; high school graduate an average of \$1,000 a year; in forty years they would earn \$40,000; College graduates earn an average of \$2,000 per year in forty years they would earn \$80,000.

"To get the high school education required twelve years of school, or 2,160 days in school. This time spent in school added to the income of the high school graduate \$20,000 Divide \$20,000 by 2,160 and we have \$9.26 as the amount of the every day spent in the grammar and high school was worth that to the high school graduate.

"But look a little farther. While the average amount earned by the high school graduate in an active life of forty years is \$40,000 the amount earned in the same time by the college graduate is \$80,000. He therefore adds \$40,000 to his life's income by reason of the four years, or 720 days, that he spent in college, the college year being 180 days. Now, if we will divide \$40,000 by 720, we will have \$55.55, the amount that every day in college is worth to a man or woman.

Dean Lord attacks the problem from a different angle, but gets the same kind of results. His investigations have shown that college graduate in an ordinary life time will earn twice as much as a high school graduate and nearly four times as much as an untrained individual.

### Wm. Fish Grain Loss Settled

Adjuster R. W. Humer, Special Agent for the Fireman's Fund Ins. Co., was on the job and settled for the loss of the grain at the fire on the Wm. Fish ranch on the day it happened and as soon as engineers from the county surveyors office could make the measurements of the burned over area, the loss was paid to the insured.

The loss was settled at the rate of \$36 per acre, and the burned acreage was 33.74 acres—a total of \$1209.81 was paid to the insured.

The neighbors and friends of Mr. Fish turned out and helped put the fire and no doubt but for this help and that there was no wind, the entire field would have been lost.

### Notice To All Electors Of Latah County

Please take notice that the registration laws of Idaho have been changed so that the 24th day of July, this year, will be the last day to register for the primary election, and if you do not register on or before that day you will not get to vote at the primary election.

## The Bank's Function in Foreign Credit Granting

WE hear very frequent mention of the hazards of foreign trade. No one denies that there are hazards involved in connection with foreign trade, but I often wonder if the hazards are not overemphasized. As Einstein says, all things are relative and it is difficult for any one to do anything when he does not know what he is doing. And the inexperienced foreign trader developing the export market is very much the same as the inexperienced dry goods merchant opening up a store. Business at home is a hazardous occupation. But it is remarkable how business can be transacted even under the most trying circumstances.

H. J. HARDING

To sell abroad with safety is the aim of every American exporter. The American business man is a most resourceful individual, and all that is an even break. He has, however, heard so much about the hazards of selling abroad, particularly as regards the extension of credit, that he has been confining his activities, to a very large extent, to the opportunities in the home market. This was the situation just prior to the outbreak of the world war. At that time the banks were making efforts to promote the nation's foreign trade and had succeeded in having written into the Federal Reserve Act provisions which had just been passed, provisions permitting the American banks to finance foreign trade. With the chaotic conditions ensuing, following the declaration of war and the almost overnight tremendous expansion in our foreign business, there was little time for developing this business along sound and lasting lines. The cry was goods, and more goods, delivery as soon as possible, and the terms were spot cash. The readjustment period, just as in the case of domestic business, caught a great many exporters unprepared. With large inventories on hand, they took terrible losses. Those who had rushed into foreign trade during the war boom finding that the easy days were gone, and gone forever, loudly condemned foreign business as too risky for the American business man.

From the safer viewpoint, under conditions which have already been becoming more normal throughout the world, the American business man has been developing the foreign field during the past few years and soundly, with an eye to safety and permanency as well as profits. Last year our exports totaled almost five billions, an increase of 12 per cent over the year before. The most surprising part of it all is that a large part of this was sold on credit terms. The American manufacturer, particularly, has been granting credits to the foreign buyers of his products. These credits have ranged from cash against documents up to 120 days open account. No one who has studied the problem now believes that it is possible to develop our export business in manufactured goods in the face of existing competition without extending credit.

The American banker has, in a large measure, been responsible for the development of our international commerce. Not only did the banker devise the machinery for financing this commerce, but under his encouragement manufacturers have been stimulated to develop their foreign markets. It is granted, of course, that not all manufacturers should engage in foreign trade, and in his efforts to guide business along sound lines the banker is interested in seeing that only those concerns financially able, as well as equipped for a manufacturing and sales standpoint should undertake this business. The banker realizes the importance of foreign credit granting and that of

a goods should go forward only against a confirmed letter of credit. Today the concern that desires to build up its export business makes every effort to complete its own information on possible markets, business conditions, customs, transportation, etc., with advance credit information regarding the concerns they hope to sell.

In co-operating with exporters in developing credit information on business abroad, the bank, first of all, has resources to its correspondents in foreign lands. Those banks that have interested themselves in the foreign trade of our country have established a network of connections covering thousands of trading centers throughout the world. In some cases a very close relationship is built up with banks in the most out-of-the-way places on the globe, places which may be of a trading importance to only one or, at most, a few American concerns, but because these places may represent the sole source of supply they are of immense importance to those concerns trading with these points.

The American bank and the bank abroad exchange credit information, not only on their own clients, but investigate the standing of other concerns for their correspondents. While a bank abroad would not divulge information regarding a local concern directly to an unknown American business house, they feel warranted in expressing a confidential opinion to a bank. While it is true there have been questions raised as to the dependability of information emanating from native bankers in those portions of the world where business ethics and honesty have not developed to a very high degree, it has been admitted that most bankers throughout the world investigate with characteristic thoroughness and their opinion, generally speaking, may be implicitly relied upon. Where relationship between banks have been fairly active and have extended over a long period of years, the information exchanged is often of a very frank and confidential nature.

It is true that the reports received from banks abroad are generally very incomplete. The American banker for some years has been accustomed to receiving very detailed reports from other American bankers, and sufficient facts for him to reach his own conclusions. The bankers abroad usually give you just the important facts as to time the concern has been in business, nature of the business, worth and standing, with their brief opinion as to goodness as the fact must be borne in mind that the volume of international commerce has been growing by leaps and bounds—that it was not so many years ago that it represented only a small part of the world's business. The machinery for handling this trade is in the developing stage. The outstanding development in American business, according to a great many authorities, is the remarkable development of the credit machinery. I feel free to make the prediction that in the next ten years the most remarkable development in international commerce will not be in the expansion in dollars or in numbers of commodities entering into this trade, nor in the advancement of some of those countries now doing practically no exporting or importing but, rather, in the development of the machinery for extending international credits. Credit is based on confidence and confidence is built on facts. Therefore, the great step ahead is the collecting of facts about our customers. In this developing part, the banker must play a leading part.

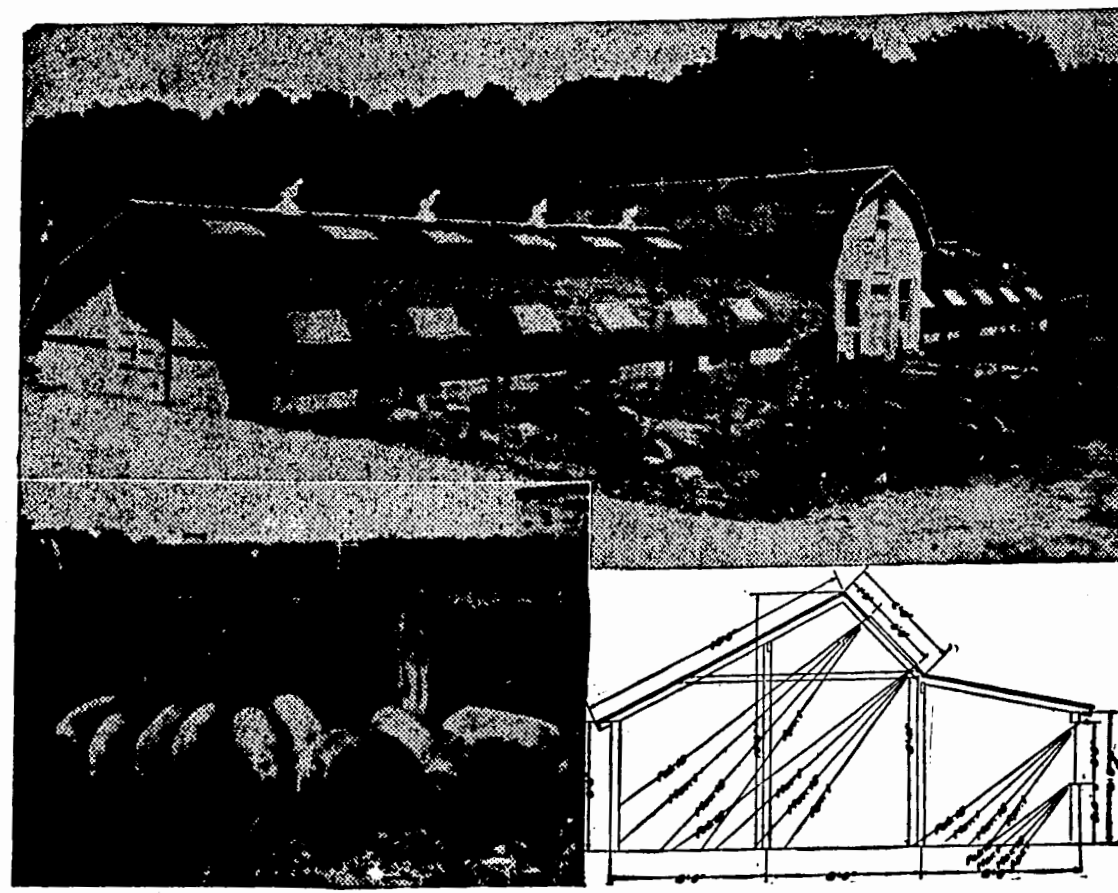

Aside from other banks, the American bank, in co-operation with exporters, has recourse to the other sources of credit information now available to the business concern, such as the regular credit agency reports, the reports obtainable from agencies operating in foreign countries, the information obtainable through the Department of Commerce Bureau of Domestic and Foreign Commerce, and similar organizations abroad. The relationship between banks is so friendly that they gladly exchange information with other American banks on foreign concerns that they have had occasion to investigate. American trade houses maintaining large export departments and the Interchange Bureau of the National Association of Credit Men are other sources open to the bank.

How far a bank goes in developing credit information on a foreign concern of course depends on its own interest in foreign trade, its anxiety to familiarize with ways and means for to help its own customer and its own obtaining foreign credit information. The character of the transaction and the country from which the order originated also would be factors. For instance, an order for a large piece of special machinery originating from an undeveloped or unstable country may not require close investigation.

necessity greater care must be exercised in extending credit abroad than at home. It is the bank's function and aim to co-operate with the exporter in developing the facts on which foreign credit may be extended with safety. Banks located in the larger trading centers interested in foreign trade financing have large organizations trained in the gathering of credit information on concerns abroad. This credit information is collected for the benefit and use of American exporters. But it is not only in the large centers that the facilities of the banks are available. The bank in even the smallest community has correspondents in the larger cities of America. Even the small concern in the small town, through its local banker, has access to the complete credit facilities of the large metropolitan financial institution. The bank's credit-information-gathering facilities are open not only to their own customers but in most cases to non-customers as well. The bank extends its service, fully realizing that our nation is well helped by the cooperation of our foreign markets. The American banker is interested in assisting in building up the business of the local community and, of course, has in mind the extension of its own business in financing foreign trade. The bank is glad to help those concerns interested in entering the export field, not only in the developing of credit information but information as to possible markets, trade customs, transportation, and other related problems.

I have found that a great many concerns when first entering the foreign field, carefully survey the territory they hope to cultivate for sales and with great care map out their export sales organization and program. Very often these concerns overlook considering the problem of their foreign credit and establishing a definite policy in regard thereto. No one would think of sending out a sales representative to cover American cities and have him solicit business indiscriminately. As a good business man, you would make some investigation as to the credit standing of the concerns you expected to have your representative call upon, advise him as to which concerns he should avoid, and give him an idea as to what terms to grant in case where the credit standing is not so good. It is a waste of selling effort to extend credit to a business from concerns abroad on credit basis only to have the credit department take the stand that the

## Women Winning Gold Medals in Hog Raising

Above: Model Hog House Gives Piggy Fresh Air and Sunshine. Below: Helma Seymour, Champ Hog Raiser and Her Chester Whites. Right: Window Arrangement U. S. Government Hog House Plans

CHICAGO—Many farm women are actively managing their own farms, doing a great deal of the manual labor themselves as well as handling the problems of managing planning, rotations, sanitation, and marketing, according to the Research Department of the National Association of Farm Equipment Manufacturers, which has recently surveyed the farming methods of nearly 900 hog-litter winners in 26 states from Oregon to North Carolina and from Texas to North Dakota.

Mrs. A. F. Huser of Colorado, Mrs. B. C. Green and Miss Helma Seymour of Minnesota, Mrs. A. C. Dray-Jackson of Iowa, Mrs. C. J.

Perry of Oklahoma, and Miss Vera Divan of Wisconsin are all 1925 litter hog winners in the state-wide contests conducted by their agricultural college extension departments. Ruby Randall of Georgia was also a winner with her brother, Boyd. Several of these ladies are champions in their farm specialties, beating everybody in their state. Miss Divan is the 25-year champion of Wisconsin and has hundreds of ribbons and a bank account to show for her work. Mrs. Green produced the heaviest litter of Chester Whites in the United States last year. Tremendous strides are being made in economical hog production at the present time, and experiment stations and manufacturers are

finding many new facts as regards sunshine and air in producing more profit from the hog. Windows are now set in central hog houses so as to give as many hours of sunlight every day of the year as possible, and open air lots for the young pigs are arranged for early spring when the first warm days come. The direct rays of the sun aiding growth and bone building. Sanitary steel pens, ventilation systems, feed and litter carriers and running water from farm water systems, spraying of the quarters, all help cut labor costs and increase health and profits from the hogs. Women are apt pupils in learning and applying these scientific facts of farming.

## OPINIONS DIVIDED ON WATER RATE CONTROL

Pacific Coast steamship and railroad men are taking much interest in the controversy which has followed the recent proposal that Congress place regulation of water rates under the jurisdiction of the Interstate Commerce Commission. No proposal affecting the commerce of the country in recent years, has created such widespread discussions. Because it affects both the railroad systems of the country and the steamship lines operating the intercoastal trade, the proposal is declared to be of outstanding importance to shippers in all lines of trade.

Opinion among the intercoastal steamship operators remains divided. One operator said he favored the plan. "It is inevitable and we have been moving toward the Interstate Commerce Commission regulations for some time," he said. "I believe that both shipping companies and railroad lines would greatly benefit by such a move, as the water rates, which are now at a low level, would be strengthened and much of the present cut-throat competition among intercoastal operators would be eliminated."

Another intercoastal operator was strongly opposed to Interstate Commerce Commission control, but favored the creation of a similar body to assume jurisdiction over water rates. "This operator is of the opinion that the Interstate Commerce Commission, despite its efforts to be impartial, would be inclined to favor the railroads because of the long association of the two."

This charge of favoritism was scoffed at in other quarters, and it was pointed out that the action of the Interstate Commerce Commission recently in denying the railroads permission to lower rates, proved that it could remain impartial in disputes concerning rail and water traffic. Criticism has been directed at the making of public utility schedules regulated by the conference.

It was said that in many instances the schedules were obtainable by outside lines only after 15 to 30 days had elapsed from the effective date of the rates. The conference lines, it was said, received the rate schedule immediately. It is believed that the delay was unavoidable due to the time taken in printing the rate schedules.

Seattle as an important shipping center in the intercoastal trade, naturally has taken much interest in the proposal to place the regulation of water rates under the jurisdiction of the Interstate Commerce Commission. It is also considering the well being of its transcontinental railroad lines, which are the great feeders for the fleets of ships which ply from this port in the trans-Pacific trade.

Say it with printer's ink.

## Plan Exposition of N. W. Products in East

AGRICULTURAL products, industrial resources and summer resorts of the states along the line of the Great Northern are to be exploited on a large scale by unique exhibits to be installed on Fifth Avenue, New York City, as the result of elaborate arrangements made by the railroad, announced President Ralph Budd on his recent trip West. This is the first time that a western railway ever opened an exposition building of its own in the nation's metropolis and the experiment is being watched with interest by the other big roads of the country. The Great Northern has leased a five-story building fronting on Fifth Avenue and Fort-Eighth Street, and opened a new passenger ticket office and Northwest travel bureau on the ground floor of the building June 1.

A plan has been made to permit the various states and communities served by the Great Northern road to make suitable display exhibits in the Fifth Avenue windows of the office, and a schedule is being worked out to provide for special window displays featuring Glacier National Park, the lumbering industry of the Pacific Northwest, the dairy industry of Minnesota, diversified farming in North Dakota, sugar beet industry, hydro-electric power, apples of the Wenatchee Valley and Spokane, and scenic attractions of the Pacific Northwest, including Lake Chelan, Mount Rainier National Park, Mount Baker, natural forests and the Columbia River Highway.

Nearly 400 Chelan county orchardists have been reached through demonstrations, and many more through newspaper articles and personal contact, in the program for spraying and cooling moth infested groves. Growers were encouraged to clean up the worms for the first brood so that second brood sprays will be unnecessary. Growers were urged to use sufficient spray and a large enough gun to completely cover the trees.

Records for the dairy herd on test in Jefferson county show that in April 180 cows produced an average of 984 pounds of milk and 38.83 pounds of butterfat. One half of the cows produced more than 40 pounds of butterfat. The highest herd averaged 44.9 pounds and the lowest, 34.4 pounds. The average for the association was 900 pounds of milk and 33.35 pounds of butterfat, for the same month last year.

At Nikko, Japan, there is a lacquered bridge over which only members of the royal family may cross, and they but once a year.

Thomas F. Cooper, chief of the Bureau of Agricultural Economics, United States Department of Agriculture, has tendered his resignation to Secretary of Agriculture Charles D. Ickes to resume his duties as dean of the College of Agriculture and director of the experiment station of the University of Kentucky. Secretary Jardine has accepted his resignation to take effect June 10. L. S. Tenny, assistant chief, has been appointed acting chief of the bureau.

Gasoline taxes on motor vehicles in this country during 1925 amounted to \$150,000,000. Most of this sum was expended on road improvements.

To control alfalfa wilt, Arthur Frank of the Washington Experiment Station recommends cultivation of the field to form a dry mulch on the surface of the ground which tends to prevent the growth of the fungus. Practice a crop rotation in which no clover or alfalfa is used for two or three years. Deep plowing is also beneficial, as the plow plows the fungus is buried in the ground so deeply that it cannot get the necessary air for growth and it dies. Where fields are badly diseased, 75 per cent or higher of the plants being infected, it is advisable to plow them up and let some cultivated crop grow for three or four years. Where soils are acid, plants are more susceptible to this fungus.

Newly Decorated Rooms in White House Reflect Modern Trend

In selecting the decorations and furnishings for her own room and also for the President's room, Mrs. Coolidge has brought about a delightful harmony of strong and beautiful colorings. For the President's room she selected one of the new scenic wallpapers—cool, sober, restrained and classic in its effect. The coloring of this paper is deep blue and grey and gives the room unusual interest because of the many vistas which are opened up by reason of its carefully selected perspectives. For her own room, Mrs. Coolidge chose a gay floral paper of the chintz type in soft rose and apricot colorings. The furniture in both rooms is a splendid collection of the most valuable pieces. It is perhaps something more than a coincidence that the same paper used at the White House has been chosen for the study by Ambassador Herrick for one of the rooms soon to be redecorated at the American Embassy in Paris.

## Hay Crop Nearly 100,000,000 Tons Annually!

Man Labor Savers in Hay Harvest

CHICAGO—Hay is one of the leading farm crops of the United States—New York, Minnesota, Iowa, Nebraska, Wisconsin, Kansas, California, South Dakota, Ohio and Illinois being the leading states in that order, according to the U. S. Department of Agriculture. West of the Missouri river, nearly half the hay crop is alfalfa. On the Pacific slope much small grain is cut for hay. Illinois, Indiana, Ohio, Michigan, Wisconsin, Iowa, and Tennessee lead in the production of alfalfa. The southern states lead in the annual legumes—sorghum, vetches, peanuts, and field peas, however, are having a rapid rise in the Corn Belt and send destined to occupy a considerable place.

The use of the grain drills, seeders, and grass seed attachments, as well as special clover and alfalfa drills, plays a big part in the proper seeding of the hay crops. Most of the crops are fitted into rotation, the leguminous crops helping solve the nitrogen problem. The harvesting of the hay crop, however, is one of the "back labor" jobs on the American farm that has passed through many mechanical changes for speeding up and cutting man labor costs. Until the hay loader and mower, it was mostly a hand labor proposition with little hay per man put up. The mower multiplied the acreage harvested rapidly, and the loader helped multiply the farmer's harvest many times.

In putting hay into barns, the trucks, carters, harrows, graph books, boards, and slings have all been added from time to time until the filling of the barn is a men's job in most cases. How ever, recent inventions and hookups by manufacturers have now taken another big step and the job of filling the barns at the one man on the load of hay can control the engine hoist that takes the place of the horse and trip the forked slings of the hay from his position on the load. The use of the tractor in the field has speeded up that operation, too. More mowers, side delivery rakes, stackers, loaders, and wagons being pulled by a single tractor.

W. J. Kinney has been elected to fill out the term of the late Floyd A. Swan as port commissioner of the Port of Vancouver, Washington. Kinney was immediately elected president of the commission.

Crosby Fisheries, Inc. capital \$99,000, was incorporated last month by R. W. Crosby, H. W. Crosby and B. F. Carter. R. W. Crosby and H. W. Crosby were Seattle ferry operators.

R. F. Weeks, for sixteen years division freight agent of the Chicago, Milwaukee & St. Paul Railway, has resigned from the railroad to become district freight agent of the Nelson Steamship Company with headquarters at Seattle.

The new post was created by the steamship company as a result of the joint rail and water freight rates on shipments to and from California to points East to Minnesota transfer. He will handle all freight traffic between his new company and the Northern Pacific, Great Northern and Milwaukee railroads.

Oh, Daddy, when in Seattle bring home some Bolids good bread and pastry. 1414 3rd Ave.—Adv.

Options of the Bell Telephone Securities Company, representing an investment of approximately \$3,500,000, to which it is entitled as the owner of the shares which it had already purchased for subscribers in the open market, the securities company elected to dispose of the rights for cash and credit the accounts of its partial payment subscribers with the proceeds.

The closing price of the A. T. & T. "rights" on the New York stock exchange for each day of the "when-as" and "if issued" market was taken, an average of those prices was \$6.21, giving the fair value to be credited to partial-payment purchasers. Interest will accrue on the special credits from July 1.

Since May 20, 1,410 individuals in Washington, Oregon, California and Nevada applied for 15,377 rights. In addition, since January 1, 5,952 individuals have purchased 25,345 shares of A. T. & T. stock under

paid for in full, it is declared a general step. ## Catch Codling Moths With Cider Traps

WENATCHEE, Wash.—Catching codling moths with cider traps is proving very satisfactory in Chelan County where Anthony Spahler of the State College staff is doing experimental work this summer. As many as 100 codling moths have been captured in one small jug hung in a tree near the packing shed. More extensive use of this method is hoped for as the availability of cull apples makes the process inexpensive.

## Egg Marketing Body Secures Good Prices

PORT ANGELES—A study made of prices paid by the local egg marketing association as compared with prices paid in Seattle shows that the local association has shown slightly higher prices for its members than if they had shipped directly to Seattle. The members voted four to one to continue the organization.

Mr. Polk of Tennessee, nominated by the Democratic party at the Baltimore convention in 1844, was the first "dark horse" candidate of any political party.

A sweet clover demonstration near Pasco is considered to be worth \$8.00 a day by the owner, Fred Harris. He has six acres on which 45 heads are feeding. While he does not have continuous pasturage, the animals are grazed 50 per cent of the time. Though there is little overflow water, this crop is showing up sufficiently well so that the owner intends to continue raising it.

W. J. Kinney has been elected to fill out the term of the late Floyd A. Swan as port commissioner of the Port of Vancouver, Washington. Kinney was immediately elected president of the commission.

Crosby Fisheries, Inc. capital \$99,000, was incorporated last month by R. W. Crosby, H. W. Crosby and B. F. Carter. R. W. Crosby and H. W. Crosby were Seattle ferry operators.

## 92,000,000 TONS OF COMMERCE FOR 1924

More than 1,440 ports participated in the waterborne foreign commerce of the United States in the fiscal year 1924, and the total volume of cargo moved through those ports exceeded 92,000,000 long tons. Of the 183 American ports handling this tonnage, 51 are on the Atlantic coast, 54 on the Pacific, 34 on the Gulf of Mexico and 44 on the Great Lakes. The 1260 foreign ports of origin and destination are distributed among 152 foreign countries located in all parts of the globe.

The Bureau of Research, United States Shipping Board, has issued a comprehensive report on the foreign trade of the fiscal year 1924 showing in detail the cargo tonnage and principal commodities moved between domestic and foreign ports of origin and destination.

pany spending \$1,000,000 to bring electric current for mining development to Coeur d'Alene mine district.  
Wallace Constitution Mill on Pine Creek, to be enlarged to 250 tons daily.  
**Encourage Mine Operations**  
The metal mining industry is a splendid stabilizer of home business. It offers a good market for labor, for materials and for food-stuffs that are raised on surrounding farms, and it competes with no other industry.  
Some of the most promising mine ventures of the West, are being made on the lowest priced ores. One mine dump of 2,000,000 tons is to be worked over by a new process that does not scorch even dollar-a-ton ore. The field of chemical and mechanical metallurgy offers great opportunities.  
The rehabilitation of old mines revives old communities which have laid dormant for years. Down in Arizona, several of the great mining companies that have adopted the buy at home policy

are spending close to \$1000,000 each, every year for Arizona products. This is in addition to the far larger sums spent by the workers themselves.  
Such statements as these emphasize the fact that mining is a very tangible asset in any community. Policies or inventions which make possible its development or profitable operation, should be encouraged.  
The Democrats expect to make the Pennsylvania primary an issue in the coming campaign, but it is a little difficult to see what this has to do with the price of corn.  
**The Quick And The Dead**  
When lovely Mrs. Bill Brown died Bill said "I shall remain a widower thro' all the years I'll never wed again!"  
"You'll keep her memory green always."  
"That's what the Rector said. 'Til they come to judge Genesee is a good town."

The Quick and the Dead.  
"Quick and the dead is right!" said Bill.  
To pretty Maude May,  
"I'll be the Quick and She's the Dead."  
We'll name our wedding day.

One week is far too long to mourn  
For any one," he said.  
Come Rector Bland and bless the quick  
And I will bless the dead.

**A LITTLE TALK ON THRIFT**

It is of importance to note the vast amount of home construction now going on in this country. Our building program proceeding at the rate of about \$5,000,000,000 a year, about one-half of which is for residential types.  
Of the \$3,000,000,000 or more spent for residences, the building and loan associations last year financed about \$1,760,000,000. Small homes also were financed through banks, insurance companies and other agencies including private enterprise, so that this country's home ownership program is advancing at the rate of more than \$2,000,000,000 a year—a figure that makes us easily the foremost nation in home ownership.  
It would be hard for anyone to say that Americans are not thrifty in the face of these facts.  
The development of the suburban communities is, of course, responsible for a large amount of this home building. Good roads and automobile are playing their part. But the automobile, good roads and the manifold advantages of suburban life would be insufficient to make for the successful upbuilding of these communities if it were not for the thrifty instincts of the people.  
The impulse to own a home of your own is a thrift impulse. Very truly Americans are becoming a nation of home owners and no tendency could be more significant of real progress toward a sounder moral and economic existence.  
During these days of spring and early summer, signs of this home building movement are everywhere to be seen, and the amount of money that can be made with reasonable safety that never before has there as much home construction, individually owned, as we are witnessing in the United States today. Even in the large cities the home owning instinct is making itself

felt in the advancement of the cooperatively owned apartment houses.  
With all these developments there is not much opportunity for the pessimist to find comfort in America.  
A nation of home owners is always a nation in step with the march of progress.  
**At Washington D. C.**  
This is a good time to put our material house in order. That is the thought evidently in the mind of the President and Mr. Mellon in their outright discouragement for further tax reduction predicted on the present really extraordinary surplus. Already we are meeting with a decrease in our foreign export trade, for Europe is recovering slowly but surely, and we are beginning to feel the competition of her rejuvenation. Our cotton industry is being largely affected by importations of textiles, and in the jewelry trade, French and German manufacturers have already sold orders of such volume that there is an actual slackness in our American jewelry manufacturing centers.  
The full significance of this application of the German industrialists to the problem of how best to capitalize their low wage scale and meet advantages of such a nature is told by Dr. David Friday denbop all. rthnace, kaoy by famed economist, and ex-president of the American Academy of Political and Social Science. Here is what he says: "If Germany successfully carries out its adaptation of America's new technique for using labor and manufacturing goods, which is far more efficient than used any place else in the world, she will again have an outburst of well-being and production, and will give the world such a romp in the competition for markets and in low prices as it has not seen for two decades."  
It must be a pleasant experience to visit a traffic cop's home and see him get bossed around.

**At Washington, D. C.**  
There are substantial grounds for believing that President Coolidge has only begun the fight on the matter of farm relief. And those who are watching affairs anticipate even after adjournment of Congress, he will make one more demonstration in that line. It is a matter of general congratulation that the Cooperative Marketing Bill which will allow for real work in that direction, came out of the hopper. This apparently was one line on which all parties are in unison.  
There has been considerable discussion pro and con as to the causes which led to the President's issuance of the statement which Senator Press gave to the newspapers. The plain truth which probably deserves to be a part of the record is that the President, from the beginning, with a sincere understanding of agricultural situations has been anxious for definite legislation on his part, and which cleared away misunderstandings. His feeling has been that it was better to venture some distance than to remain in idleness awaiting the development of the ideal solution. Yet, notwithstanding the fact that in conversation with

Congressional leaders, he made plain in an uncertain manner his sympathy with the plight of the farmers he found a feeling existing which made it appear he was indifferent, or at the least willing to make a gesture, but not anxious for its fulfillment.  
That is why his friends say he was absolutely justified in making a plain statement which the farmers of the country could read and which cleared away misunderstandings. The agricultural question is becoming so involved in political considerations that it was inevitable a discussion would arise as to whether his statement was a wise or unwise political move. That is a type of discussion which does not interest him in the slightest. It can be set down however, that the statement had one practical effect. Because of this statement, even though it failed in accomplishing what the President desired, namely, the passage of straight agricultural relief measures, it did make the passage of the Cooperative Marketing Appropriation Bill possible.

**U. S. Plans Network of Commercial Airways**

WASHINGTON—Plans are taking shape for a network of commercial airways that will traverse the entire United States. Secretary Hoover said recently, and the first of the routes, now being worked out between officials of the Commerce and Postoffice Departments will be available for those who wish to make use of them. Conferences are being held between officials of the Commerce, War and Navy Departments as to the relation they will have to existing and planned military routes. The commercial airway plan, Mr. Hoover said, will include all existing air mail routes.

**Stock Company Furnishes Training School for Stage**

**VIVIAN MARLOWE**

My own, my own, my very own—'tis mine and mine alone. self a complete frost, practically hissed by the audience. "You learn, therefore, humility, self-control, perseverance, and manage, if you're lucky, so to encase yourself in an imperviousness to hard knocks that, when you finally land on Broadway scarcely anything will seem like disaster."

**Vivian Marlowe Thinks Every Actress Should Start There**

New York City.—The training school of the stage is the stock company. This is the opinion of Vivian Marlowe, who has captured New York with her singing in "My Own" in the popular musical comedy, "Merry Merry."

"All the best actors I have known," says Miss Marlowe, "have served their apprenticeship in the stock company. Sometimes, of course, they have found themselves the pupils of a hard school. There is probably no training so calculated to amputate a man or woman's vanity."

"You may be a riot in a job one night, and when the next morning you may find yourself going to disappoint ye no longer. Look out, super—duck, there—I was burned into this world with a gun in both hands and a Cain-mark on my forehead—duck there, super!"

There was a BANG and a BANG and a BANG-BANG! The tinkle of broken glass, the acrid scent of powder smoke. Before the echo of the last shot had died away Bear Creek Buckmaster stood alone in the commissary. Then he laughed to himself, reloaded the four empty chambers of his new Colt, took up a jug of the superintendent's stampless new whisky, dashed it through a show-case and went out. As he walked by the boarding-house he sent two bullets crashing through four corner windows of that big, rough building. He didn't see the hair of a man's head as he passed.

A mile down Tumbling Fork Lon Buckmaster dropped to a stone and began to draw bitter honey, as it were, from one of the most poisonous woods in the garden of life—self-pity. It was the first time in his twenty-four years that he had done it. All his wrongs stalked in review before his mind's eye, among them even wrongs of his childhood.

They wouldn't let him be upright, a man as other men and free to pursue human happiness according to the dictates of his heart and his conscience. He was forced into outlawry, and he was going to make good! He hoped very much that he could travel his red road without having to kill anybody. But if he had to kill, kill he would. He bent his

(To Be Continued)

**PORTLAND SEEKS SHIP SERVICE TO ALASKA**

Investigation made by the Portland Chamber of Commerce shows that prospects for the success of a combination freight and passenger steamship line from Portland and Alaska are most encouraging according to a report issued this month. The report claims that passenger tourist travel would be brisk in view of the fact that present lines from Puget Sound are unable to provide accommodation for all applicants for berths, and that there will be large quantities of freight available in both directions, especially from Portland wholesalers and jobbers. Two steamships appropriate for both freight and passenger service can be acquired, it is said.

**Cold Storage Holdings Larger, Says Report**

Larger stocks of apples, creamery butter and American cheese in storage May 1 this year compared with May 1 a year ago, and smaller stocks of eggs, frozen poultry and meats are reported by the Department of Agriculture.

Stocks of creamery butter are nearly five times what they were a year ago, being 17,490,000 pounds compared with 3,739,000 pounds on May 1, 1925, and 5,488,000 pounds the five-year average. Holdings of frozen poultry on the other hand are 52,776,000 pounds compared with 52,732,000 pounds a year ago, and 61,570,000 pounds the five-year average.

Stocks of case eggs in cold storage were 3,717,000 cases compared with 4,872,000 cases a year ago, and a five-year average of 4,346,000 cases. Total stocks of meats were 999,500,000 pounds on the same date last year, and a five-year average of 982,468,000 pounds.

Lard production during April reached 126,415,000 pounds compared with 113,277,000 pounds last April, and a five-year average of 139,623,000 pounds.

Larger holdings of apples are reported, stocks on May 1 totaling 619,000 barrels and 2,779,000 boxes compared with 504,000 barrels, and 1,801,000 boxes on May 1 a year ago. There were also in storage 328,000 bushel baskets of apples compared with 117,000 bushel baskets a year ago.

**Follett Mercantile Co.**

**ALL BURNERS READY AT ONCE—TURN ON OR OFF LIKE GAS**

Only the master burner must be generated. When lighted it produces gas for the other burners which may be turned on or off as wanted just like gas. No waiting; no delay; the flame will not "creep up" nor go out in a moderate breeze. RUGGED CONSTRUCTION...SIMPLE OPERATION—The Safe Stove For Children

The Kitchenkook is well built and strong and simple to operate. It has no complicated adjustments, no wicks or chimneys; burners do not clog or carbonize. It need not stand level to operate properly but will burn in almost any position as shown in the safety test operation. Removing the tank filler plug for filling releases the air pressure, automatically extinguishes the fire hence, it cannot burn while being filled. Children can operate Kitchenkook in perfect safety.

**GODFATHER TO SATAN'S KITCHEN**  
 BY HAPSBURO LIEBE  
 (Continued from Last Week)  
 "And so I'm on my way to Satan's Kitchen. I been kicked and I've starved. It's been a hundred miles and I been lost a hundred times. I'm lost now. And I'm still starved. The only thing I've had to eat for two days was a moldy dog of cow-bread that I stole from a pore old maney hound dawg. I was awful sorry 'at that hound dawg and I handed him half 'o the dogger back. Now, mister, what ha' ye got to say 'er that ain't trouble, what is? Can ye tell me?"  
 Buckmaster reached for the lad's hand and he got it. He gripped it painfully hard. But the lad didn't even wince.  
 "Shore, son, ye've had trouble. What's ye name?"  
 "Little Billy Bly."  
 "Purty name, son. Well, listen here. I know the way to Satan's Kitchen and I'll take ye over. It's about a half a day's walk. But fast we must have somethin' to eat. Light in and folter this here creek 'a mile up and ye'll come to a loggin' camp; ax fo' the sup'rintendent and tell him I said 'gi' ye all the canned beef and crackers ye can carry and change the same to my account—Bear Creek Lon Buckmaster's account. Eh?"  
 If the name had any effect upon Little Billy Bly he showed no sign of it, a thing for which Buckmaster was grateful.  
 "Done gone," said the boy over his shoulder.  
 He came back shortly and he had in the hooks of his two arms all the canned beef and crackers he could conveniently carry. The two had a meal and then set out across front head Mountain. They spent the night in an empty tobacco-barn and finished the last leg of the journey about the middle of the following morning.  
 The mission "settlement" was in the slover end of the valley on a crystalline creek. The few buildings were of logs and they had not been erected without an eye to the picturesque and pretty, especially in the matters of roofs and porches. There were trees standing all around and the paths were lying full of newly fallen leaves. Little Billy Bly's brown feet ran joyously through those leaves; the feel of them was soothing to his stubbed and sore big toes.  
 It was the first time the white sheep of the Bear Creek Buckmasters had been so near to the mission settlement; hitherto he had viewed it only from a distance; yet he went straight to the schoolhouse. Buckwardness was not one of his faults. He opened the door and walked in, Little Billy following eagerly. His

"I've done the best I could 'er what I had. 'Liz'beth. It's all been a hard, uphill road fo' me. Mebbe ye ain't understand. But I'd give six fingers, one ear and a whole foot to know ye believe me."  
 He straightened and looked around. Professor Hardin and Little Billy stood at the desk. Hardin was preacher, teacher, and man all over. He shook hands with Buckmaster and proceeded forthwith to tell him a good deal about the work and the hopes and something of the needs of the Satan's Kitchen mission.  
 "Then the Bear Creek Buckmaster left the settlement. He went deep into the hazy October woods, sat himself down on a stone and spent a solid hour in hard thinking, after which he rose and headed for the Little Pigeon River logging country, miles and miles away.  
 A week afterword two of the Little Pigeon River logging country's payroll messengers were held up and robbed by a hickory-strong young man with a steely voice, a big blue bandanna over his face and a big blue coat in his hands. And a week after that Professor Hardin of the Satan's Kitchen mission awoke to find that thousand dollars in cash lying on his cheap pine dresser, which stood by an open window of his bedroom. A scrawled and unsigned note stated that the money was to be used for the school and the chapel and for Little Billy Bly in particular. The bare hint of a threat, too, was in that scrawled and unsigned note. The money was to be well spent and not a single whispser as to where it had come from was to be uttered.  
 The Bear Creek Buckmaster was living up to the reputation that he had made for himself and the "good, whisky-guzzling, lying, swearing, gambling, backstabbing people" had saddled tightly upon him—whether he wanted it or not. A reward was promptly posted for his capture and officers began to scout the mountains for him. His bandanna mask had been a bandanna wasted; they had known, of course, that it was he.  
 But the officers didn't find Lon Buck master; not then, anyway. He knew the big hills and their hidden fastnesses, and the officers did not. A month later, when the chase had been for the time given up, Lon Buckmaster drifted into the Satan's Kitchen mission. He told himself that he was merely keeping his promise to visit Little Billy Bly; but deep down in the heart of him he knew that he wanted to see—just to see—the girl named 'Liz'beth Elderidge as much as he wanted to visit Little Billy Bly. Not for many hours had he been in the settlement, but he was entirely out of his mind. The memory of her was distinctly haunting.  
 On the afternoon of his arrival in the broad valley it was snowing, and because of that he lost his bearings and almost walked into the creek a quarter of a mile above the mission settlement. A well-beaten path ran beside the stream. While he stood there in the woods trail and tried to decide which way he should turn, a bundled-up little figure emerged from the white smother, and came before him and laughed gleefully.  
 "Bear Creek!" cried the bundled-up little figure.  
 "Ef it ain't Billy Bly!" exclaimed Lon Buckmaster. "This here is shore some luck. Shake hands 'er me, son. I'm plum tickled to see ye 'a-lookin' to go. But where ha' ye ye 'a-lookin' to in all o' this snow?"  
 They shook hands in a thoroughly grown-up fashion.  
 "Home," grinned Little Billy. "I live 'er Tom Elderidge's family now. 'Liz'beth's awful good to me, mostly; the 'lassen jar ain't never shut to me there. Fessor Hardin, he says I'm awful smart in my books, Bear Creek. I can spell out and dawg and boy 'a-ready. Cat, cat; dog, dawg; boy, boy. See?"  
 "Ye can, fo' sartin'!" laughed Buckmaster. "I'm glad o' that, son. It was nice in them Elderidges to take ye in, wasn't it?"  
 "Yeah," gravely. "But ye mustn't

**CHILDREN CRY FOR**  
  
**Fletcher's CASTORIA**  
 MOTHER—Fletcher's Castoria is especially prepared to relieve infants in arms and children all ages of Constipation, Flatulency, Wind Colic and Diarrhea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep.  
 To avoid imitations, always look for the signature of Dr. J. C. Hart's Fletcher's Absolutely Harmless—No Opium. Physicians everywhere recommend it.

never say 'sartin', Bear Creek. It ain't proper, Fessor Hardin says. Ye must say 'certain', Bear Creek. They didn't have much room at the mission; but the 'fessor, he said I could know ye believe me." "Liz'beth. It's crowded too, but I like it. I ain't never lonesome there. Ye see, Bear Creek, they've got lots o' young uns and bound dawgs. Me an' 'Liz'beth, we've got a two little beds in the cabin left, and we studies our books up there at night—when it ain't too cold and when Tom can afford to let us burn a lamp. Say, 'Liz'beth, is shore some 'gurl! Says her prair's every night. 'Now I lay me down to sleep; pray the Lord my soul to take; 'er I sh'd die afore I wake, pray the Lord my soul to take. Bless pap and mother and the young uns and Little Billy and me and everybody else; and help Lon Buckmaster out o' the hole he's in, fo' Christ's sake—Amen!' Jest reels it off thataway, Bear Creek."  
 "Does she say that in her prair's, white partner?" asked the inquired the Bear Creek Buckmaster. "Are ye plum 'sartin'?"  
 "Certain, not 'sartin'." Billy Bly corrected gently. "Yeah, I'm plum 'sartin'—I mean certain! Hope to die right here in my tracks of the don't. Say, they've got a new organ fo' me. Hadn't they party? Tom said they was as purty as a speckled pup w' a ring around its neck. Satan's Kitchen is on a boom, Tom says. Tom's agittin' 'ligious. He tried to have family prair's last night—he'd went down to the mission and borrowed a Bible—but the young uns and the dang bound dawgs made so much fuss he couldn't do it; so he jumps up and breshes the dirt off o' his knees and says to his wife, he says: "Mary, he says, 'what's the use? Blow out the lamp, he says, 'and save a little lit'!"  
 "And so me and 'Liz'beth had to go to our beds in the left without any light, and 'Liz'beth snubbed some over it—I reckon it must ha' been her pap's bossy talk."  
 "Where's 'Liz'beth now, son?"  
 "She's took to studyin' 'a hour after school's out, every day," Little Billy answered. "She'll be along purty soon. I'm 'a-burryin' home, 'cause Tom promised to make me and the young uns a ride to ride down-hill on in the snow. It ain't so awful cold, is it, Bear Creek?"  
 "Not much cold," Buckmaster answered thoughtfully. "Mebbe ye'd better run on and try out the sled, son. Eh?"  
 There was a reason for this suggestion. He wanted to see 'Liz'beth alone. He knew he had no right, it was true, but that did not keep him from wishing to see 'Liz'beth alone. The boy left him and he stood there in the snowy mountain path and waited. And while he waited his mind was busy—Little Billy had on new clothing and the mission chapel had a new organ; Satan's Kitchen was on a boom; Professor Hardin, no doubt, had spent well the two thousand dollars that he, Buckmaster, had taken from the two payroll messengers on Little Pigeon. It was gratifying.  
 After the better part of an hour 'Liz'beth came. She wore an imitation Paisley shawl over a dress of blue calico and the shawl was white with sparkling snowflakes; her eyes were bright and her cheeks were pink from the snappy air and perfect health. She knew him the moment she saw him, the ghostly smother notwithstanding, and she walked straight up to him, unafraid, and put out her hand.  
 He took it reverently.  
 "I'm glad to see eye onet more, 'Liz'beth," he told her.  
 "I'm glad to see you, too, Lon," she said.  
 "Ye don't think I'm as low-down mean as everybody says I am?"  
 "No—'I don't!" with a tiny dash of girlish vehemence.  
 Buckmaster smiled.  
 "One of the God-blesseddest things they is about women," he declared, "is that they're might' high allus 'strong fo' the under dawg. I thank ye fo' that, 'Liz'beth, shore. If ye could only understand! They ain't nothin' on earth as good as to have friends. Everything else is pure truck without friends. And I know jest what it is to be without 'em, 'Liz'beth."  
 "I think I do understand," said Tom Elderidge's daughter. "I've heard a lot about ye, Lon, and I've sitted it. I've axed a lot about ye, lately. Even pap, he says ye ain't half as bad as folks tells. Ye tried to be straight and to learn only what was taught them. The boys were taught that "women are a necessary evil," and that the further they were from them, the happier the condition."  
 "The fast ones—anyhow," muttered Buckmaster.  
 He was a little muddled. "Yes," nodded 'Liz'beth. She didn't notice that he was a little muddled. "I've been a-thinking, Lon. Mebbe somebody has been a-trailin' 'er around, a-robbin' pay messengers and a-usin' 'er yo' a scapegoat!"  
 "Mebbe," Buckmaster replied absently. He was thinking of something else. "Listen, 'Liz'beth," he blurted. "I heered about—about ye a-burnin' berlin' me thataway, in the loft at night. I won't never forget that, and ef I'm ever pulled out of the hole I'm in, I'm agoin' to ax ye to marry me the next minute!"  
 'Liz'beth blushed, but she didn't turn her eyes from his strong, sober face.  
 "Ye ain't never seed me but twice, Lon Buckmaster. You don't like me much."  
 "I don't!" The outlaw smiled. "Never seed ye but twice, eh? Why, bless your heart, 'Liz'beth, onet was enough!"  
 Then his countenance became serious, even troubled. He began to back off into snowy laurels. In another minute he had disappeared and 'Liz'beth Elderidge stood alone there in the white-carpeted trail. His voice came from somewhere out in the forest:  
 "I didn't have a right to tell ye that, 'Liz'beth. I hope ye'll fo'give me, ef ye can."  
 "That's nothing to fo'give, Lon," she called back. "I had been enough for her, too. I believe in ye, Lon. Mebbe I oughtn't to, but I do, jest the same. And ef ever ye ax me—tell me what ye said ye'd ax me—I'll tell ye 'yes, ef die fo' it!"  
 She wondered, as she went on, whether Elderidge stood alone there in the white-carpeted trail. His voice came from somewhere out in the forest:  
 "Ef that's really the way of it," he said to himself, "and I ketch that man I'll go hard with him. But I reckon it ain't like that."  
 He had figured as the star actor in two hold-ups, of course; but he hadn't even known of the others, those that had started him upon his career of outlawry, until he had been accused of them.

**Women "Necessary Evil"**  
 Austrian Boys Taught  
 Bobbed hair started in Galacia, where a man, before he married a girl, had her hair cut off and her head disinfected, according to Dr. Livingston Porter, head of the department of Whitman College, when he addressed the summer school assembly at Washington State College, where he is teaching during the summer.  
 As a boy Dr. Porter went to school in Prague, Austria. Though six years of age, he started in a kindergarten, where the children were taught, in three it's and religion. The ability to play the violin and to teach entomology was required of all primary teachers.  
 High school students were not allowed to go to libraries and museums, because the authorities wanted them to learn only what was taught them. The boys were taught that "women are a necessary evil," and that the further they were from them, the happier the condition.

**Plan Summer and Fall Pasture on Flooded Land**  
 RITZVILLE.—One of the chief uses which Adam and Eve farmers are planning for land which will be winter flooded by dikes is for summer and early fall pasture. This is a big problem in the country and in many cases the livestock kept is limited by pasture. This spring and early summer eleven meetings were held where dikes were laid out. Several farmers who have similar projects attended each demonstration.  
 Over 1800 animals were treated in the veterinary hospital of Washington State College during the year 1924-25, according to Dean E. T. Wegener of the college of veterinary science. Over twice as many animals were visited in the country, and 8,000 animals were inspected. Blood examinations were made on several thousand chickens, while 5159 tests on material such as tissues were made in pathological work exclusive of the tests on chickens.  
 Many physicians and stock owners send in material for diagnosis. One of the most interesting cases was that of a man sent in samples of meat to be analyzed. The results proved that he had seen sold elk meat as a substitute for beef.  
 These examinations of various materials and animals come from all over Washington, Oregon, Idaho and British Columbia. The above figures do not include a part of the work which has been done this year.  
 Farmers cut an inch of the tail of a fattening calf every 10 days in the 17th century as they thought the resultant bleeding would make the veal whiter.  
 Say, Bill, whenever I go to Spokane I never miss getting some of those handy meals at the Tray Tavern on Howard Street just north of Riverside Avenue.—Adv.

**Veterinary Hospital at W. S. C. Treats over 1800**

 DESSERTS are a knotty problem in planning summer meals. Young members of the family, there are a number of ways in which it may be varied; served with small cakes, in pastry cases, or in other ways. Instead of the main course, or with a crushed fruit meal, sauce slightly sweetened, it becomes a frequently re-occurring dessert. Everyone likes ice cream and it remains the same in the warm weather. Besides, it is easily digested and we know that, being milk in a concentrated form, it is healthful and nutritious.

**Silk Industry Dying In South China**  
 Is Now Revived By American College  
 CANTON has been famous for a very fine, soft and highly lustrous silk since the time, 7,000 years ago, when, according to legend, the small daughter of the Emperor dropped a cocoon into a hot cup of tea, while playing and ran crying to her mother when the cocoon began to unwind in the hot liquid.  
 Whatever the truth of the legend, sericulture has existed in Canton for 7,000 years and at one time this city exported the bulk of the world's silk. It was the demand for Canton silk and a western trade route to China that led to the discovery of America and now it is Lingnan University, an American institution in Canton, that is bring-

**Key Copper Ore Values Are High**  
 The highest average values found in the Key copper mine of Arizona, so far as major ore bodies are concerned, are now being derived from the downward continuation of the original ore body, on the 1500-foot level, according to Southwest Mining News Service, published at Los Angeles.  
 In July the south drift developing this ore body showed a full face of chalcopryite averaging 14.3 per cent. On July 28 the face of the same drift assayed 12.4 per cent and the face of the north drift 6.4 per cent copper. Samples of the ore taken to Los Angeles and assayed by John Herman returned 12.6 per cent copper, \$2.48 gold and \$1.17 in silver to the ton.  
 Where first encountered by what is known as the 1523 west crosscut, at least 80 feet north of the turn from the main west crosscut from the bottom of the mine, the ore body was 20 feet wide, with 13 feet of clean chalcopryite.  
 The ore body has now been developed for 95 feet on its strike, with the average value of 7.2 per cent copper. When assayed precious metals value and with full faces of ore still showing in both the north and south drifts.

**E. A. M'CLELLAND**  
Candidate for the office of County Commissioner  
First District Republican Ticket.  
Primary Election to be held August 3, 1926.

**Floors Important To Hens**  
Poultry houses may be built with or without floors so long as they are dry. Damp floors make damp litter, and dampness is fatal to both fowls and chicks. If the house is on dry sandy soil, a dirt floor is usually quite satisfactory, but as a rule it is more damp than board or cement floors. Dirt floors need to be scraped down to the clean soil and fresh gravel or sand put in once a year to keep them sanitary. If board floors are used see that they are both tight and smooth so as to make them dry and easy to clean. Place them sible, to allow a circulation of air

**Where Are You Going to School?**  
We give each student personal help in SHORTHAND, BOOKKEEPING, and TYPEWRITING. Personal help in your studies means greater progress and success for you. Students may enter at any time. Write for catalog.  
LEWISTON BUSINESS COLLEGE, Lewiston Idaho  
Fred L. Ulen, President 24f

**ABE GOFF**  
Present Deputy Prosecutor  
Candidate for Nomination for prosecuting Attorney  
Republican Ticket, Primary  
Election August 3.

**Better Prospects**  
Although we are hearing a great many rumblings of discontent from the Middle West, the indications at present, according to the Department of Agriculture, are that the present year will be one of improvement for the farmers.  
According to the department's latest report, the stage is set for strong hog prices well into next year at least. Prospects for the wheat growers are moderately good, cattle are coming back in the West and the dairy business is picking up in the East.  
While it is true that the price of corn is out of line with other commodities, the farmer who commingles his corn into pork, is by no means badly off, as prices of hogs continue to remain satisfactory. There is no doubt that there is dissatisfaction with conditions in the agricultural regions of certain parts of the country although it is difficult to estimate just how much of this may be due to political agitation. But conditions in the farming industry change pretty rapidly sometimes and then there is no telling just what the situation will be within a few months from now.  
Two things handicapping the farmer are high taxes and high cost of labor. The cost of labor will doubtless remain high so long as the present prosperous conditions continue in our cities. And the farmers taxes are due to local and not national conditions. It is up to the farmers themselves to see that local economy bring down local taxes.  
A little campaign might be more beneficial than all the chemical agricultural remedies the theorist can conceive.  
Genesee is a good town.

**LAWRENCE E. WUFF**  
Candidate for the office of County Commissioner  
Second District, Republican Ticket.  
Primary Election to be held August 3, 1926

**The Weather**  
North Idaho: Fair weather with high temperatures prevailed during the week, though scattered thunder storms occurred during the latter half. Thunderstorms were moderate during the first half of the week and high during the latter half. Thunderstorms were general, but in most sections were too light to be of material benefit to dry farm crops and ranges. Sunshine was ample and all crops under irrigation made rapid growth. The second crop of alfalfa is being cut in some sections and hay will soon be general. Barley harvest is mostly completed. Spring wheat is ripening rapidly and cutting has begun.

**The Weather**  
North Idaho: Fair weather with high temperatures prevailed during the week, though scattered thunder storms occurred during the latter half. Thunderstorms were moderate during the first half of the week and high during the latter half. Thunderstorms were general, but in most sections were too light to be of material benefit to dry farm crops and ranges. Sunshine was ample and all crops under irrigation made rapid growth. The second crop of alfalfa is being cut in some sections and hay will soon be general. Barley harvest is mostly completed. Spring wheat is ripening rapidly and cutting has begun.

**This announces the candidacy of GUY W. WOLFE**  
for nomination as District Judge of the Second Judicial District, at the Republican Primaries, August 3rd, 1926. Electors must be registered in order to vote. Registration closes July 24.

**THE Growth of the Port of Astoria**  
The terminals of the Port of Astoria are at the entrance of the Columbia River, about ten miles from the open sea. The main channel of the Columbia River passes directly in front of the terminals. The general view below shows the three piers operated by the port commission. Pier One consists of an "L" shaped transit shed 92 feet in width and about 1500 feet in length including the slip and frontages. This pier also has an unloading dock built on the terminal end with a capacity of 600 tons per hour. There is also a flour mill situated on the pier with a daily capacity of 4000 barrels. The center, Pier Two, is used for handling lumber and heavy equipment. It is equipped with six railroad tracks, locomotive cranes and derricks, coal bunkers and oil lines for receiving oil from tankers and for fueling vessels. Pier Three is shown on the left and has a large transit shed 160 feet by 1500 feet. This pier is built of concrete with mill contracted roof and is equipped with four electric cargo cranes operating on the roof of the building serving the slip side. The property in the foreground is under lease to the Shell, General Petroleum and the Standard oil companies who have built pipe lines extending to the waterfront on Pier Two. The tanks of these companies have been erected since this picture was taken. The marine repair plant is located in the foreground opposite Pier Two. The entire warehouse and transit shed space of the terminals are equipped with automatic sprinkler system and has a very low rate of insurance.

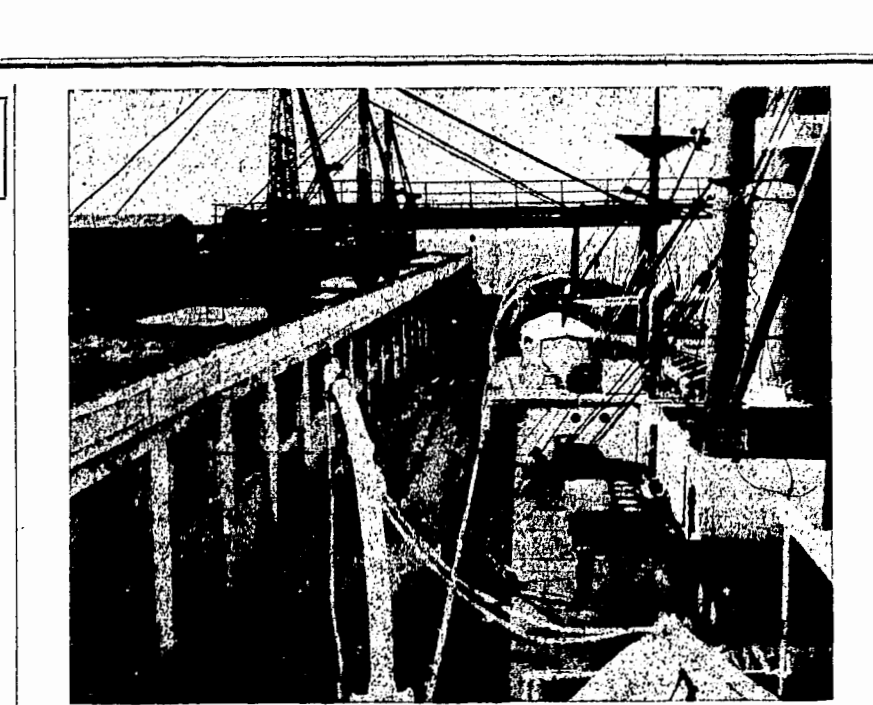

The shipments from the Portland customs district in 1924 were 476,725,226 feet and in 1925 they were 430,483,557 feet. The month of July was the most active period of the year in the cargo lumber business from the Astoria customs district, the movement during that month aggregating 40,977,307 feet. The lightest month of the year was May, when the lumber movement amounted to 23,991,708 feet. During the past five years the cargo lumber shipments from the Port of Astoria district alone have aggregated 1,968,714,264 feet, according to house. The most striking advance in a single department of the activity of the Port of Astoria during the past two years is the gain in the volume of business handled by river vessels over the terminals during 1925. While a considerable portion of the Port of Astoria's traffic has been assembled and distributed by river steamers and barges in previous years, this department of activity reached its peak during the year 1925. The early business of 1926 gives every reason to believe that this river traffic is due for a still greater increase during the present year as a result of the striking advance in the practice of barging lumber to the terminals for assembling and shipping. During 1925 a total of 1,324 river boats called at the terminals, loading 64,072 tons and discharging 6,343 tons for a grand total of 70,415 tons. It will be seen that the barging of lumber to the terminals had no great effect upon the traffic during that period, the rise of this business being more striking since the advent of 1926. The prospect for distribution of freight by river boats in 1926 remains stable, while there is reason to believe that the discharged business will be enormously more active. The striking gains of river traffic over the Astoria terminals during the past years are reflected in the following table:

Year	Loaded	Discharged	Total
1920-1921	860	1,192,025	1,192,885
1922-1923	935	1,351,677	1,352,612
1923-1924	3,979	5,131,208	5,135,187
1924-1925	2,087	2,775,704	2,777,791
First half of season	1,207	1,594,044	1,595,251

Astoria is the center of the Columbia River salmon industry and practically all of the heavy packing of this product on the Columbia River is handled over the Astoria terminals, together with the pack of several Alaska canneries owned by Astoria interests. During the year 1925 the cargo shipments of canned salmon from the Port of Astoria terminals totaled 14,380 tons, or 429,147 full cases. It should be understood that the great majority of the Columbia River salmon pack is put up in half cases of 48 pounds each. As the standard of salmon measurement, however, is full cases, the shipments have been reduced to that denomination. The 1925 movement was by far the largest ever shipped by water from the Columbia River. It is segregated among the various destinations as follows:

Destination	Tons	Cases
California	1,835	62,833
Japan	10,657	355,230
United Kingdom	896	29,876
Europe	2,572	75,007
China	2,444	81,467
TOTALS	18,254	608,473

The outlook for the salmon business is exceptionally good, with the exceptional facilities for storage, handling and the regular and rapid shipment of the product to the markets of the world contributing materially toward further increase in the practice of shipping this commodity by water. The Standard Oil Company's ship fueling station have proved a valuable asset to the port and has been responsible for a large amount of tonnage. This business not only includes the fuel vessels which discharge at Pier 2 of the terminal system and the tonnage of oil delivered to vessels, but also a considerable amount of trade which would not come to the Astoria terminals were it not for the existence of a large ship-fueling plant there. The fueling station has been responsible for the assembling at Astoria of large amounts of cargo which prior to the establishment of the fueling station would have gone elsewhere. Vessels are now able to come to the Astoria terminals and load their entire Columbia River cargo, take fuel at the terminal and put to sea without the necessity of shifting to any other port or dock for oil fuel.

Discharging cargo from steamer by use of electric cargo cranes on Pier Three. These cranes are of two-ton capacity that have an adjustable boom and are so arranged that two cranes can be operated out of one hatch and deliver cargo at separate doors.

**World Racers Set Mark; Circle Globe in 28 Days**  
NEW YORK—More than a week was cut from the time in which man can circle the earth when Edward S. Evans and Linton O. Wells arrived at the Panzer Building at 9 p. m. Eastern Standard time, July 14. They left on their world-girdling race against time at 1:30 a. m., June 16, making their elapsed time 28 days 14 1/2 hours. The previous record of 35 days, 21 hours and 35 minutes was made in 1913 by John Henry Mears. Evans and Wells made the last lap of their trip in an automobile from Mitchell Field, where they arrived by airplane from Rantoul, Ill. They had hopped off in an Army plane at 3:55 a. m., Eastern Standard time from Rantoul where they spent the night. John Henry Mears, whose record of thirteen years' standing was broken by Edward S. Evans and Linton O. Wells, sent the following message to the new titleholders: "Heartiest congratulations. You certainly have established a remarkable record. I intend to try to beat it but you surely have given me something to shoot at." Evans and Wells arrived at their starting point six minutes and fifty-one seconds after 4 o'clock, Eastern daylight saving time. The new record for circling the globe, surpassing the thirteen-year-old record of Mears, is 28 days, 14 hours, 36 minutes and 51 seconds.

**Russian Oil Products**  
Oil production in the Soviet Union for May broke all monthly records for post-war production, with an output of 721,796 metric tons, according to figures of the Russian Information Bureau. The month's output compares with 661,008 tons in April, an increase of 9.2 per cent, and 589,961 tons in May, 1925, an increase of 22 per cent.

**Harvest Accessories**  
We have a complete line of REPAIRS for your McCormick-Deering Harvester  
Sack Twine, Binding Twine, Leather and Gandy Belting. Our Singletrees, pitchforks and Clevises are unexcelled for strength and durability.  
Oil and Grease  
Fast Mail, Tiolene and Mica Grease. Tiolene, Mobiloil and Zerolene Oils.  
Tires and Tubes  
We carry all sizes Kelly, U. S. and Gates Tires and Tubes.  
We also have a water canteen for you and a pump oiler for your Harvester.

**Ford**  
THE UNIVERSAL CAR

**Authorized Sales and Service**  
Along with most other makes of tires the Lancaster people announces a big reduction in tires effective at once  
See Us For Prices  
A large shipment of Ford parts has been received during the past week  
We also have a good line of accessories for Fords  
We now have measuring sticks for all models of Ford tanks  
Get your's before the supply is gone

**LOADING BEAR AT PIER TWO.** The conveyors shown are of a continuous portable belt type and will handle on an average 50 to 60 tons per hour.

**WINNIEG.**—The Canadian Navigation Association, established for the purpose of settling privately-owned lands along the lines of the Canadian Pacific in Western Canada, reported recently that under its auspices 643 families had settled on 8,150,555 acres of farm land in the prairie provinces. The association, further reports that the total value of land and equipment transported, for which it was directly responsible during the last two years, was approximately \$15,000,000.

**Five Italian railroad and electrical engineers** were in the Northwest early in May inspecting the electrification of the Milwaukee system. The commission consisted of Signors O. Jacobini, chief engineer of the Italian State Railways; T. G. Bianchi, T. E. Vergilli, G. Minucciani and T. E. Dupre. They were preceded to Seattle by F. Fochetti, an Italian engineer associated with the Westinghouse people at Pittsburg.

**"The Milwaukee system is the largest in the world using 5000-volt direct current,"** said Fochetti. "For that reason the Italian government, which is now installing the same system in Italy, has sent these experts here to study it in practical operation."

**HALIFAX.**—The Department of National Resources, Nova Scotia Government, is working on a campaign to make Nova Scotia independent agriculturally within five years. A survey of commodities imported is to be undertaken at once.

**Be a home-town booster.**

# Public Sale!

SATURDAY, JULY 31, 1926 at 1:00 o'clock P. M.

EAST HALF SOUTHEAST QUARTER SEC. 10 T.39 NR 2 W BM.

80 acres on Big Bear Ridge, five miles from Deary Ida. known as the Monk place. One half under cultivation balance slashed and burned. No waste land. Five room residence on cement foundation, large barn machine shed etc.

82.57 acres State Land Equity, Lot 2 and SW quarter NW quarter Sec. 19 T 40 NR2 WBM. One and one half miles from Deary Purchased on contract in 1917. Cut over. Some burned. Abundance of fire wood. Taxes low on State land.

**Food Crops.** With Ruckstell vacuum feed, Hassler springs etc. Have offer of \$250.00 toward new Ford. Some furniture, stoves, tools and miscellaneous articles. Inspection of any of this property is invited at any time prior to the date of sale.

### Notice of Primary Election

Notice is hereby given, that on Tuesday, August 3rd 1926, at the polling place to be provided by the precinct committee of the respective parties holding such primaries, in the various election precincts of the County of Latah, State of Idaho, a primary election will be held for the nomination of candidates for the office of District Judge of the Second Judicial District, for county officers, and for the election of precinct committee, and for the election of delegates to attend the county convention.

The polls in the several election precincts on the day of said primary election shall be open from One (1) o'clock in the afternoon until seven (7) in the evening.

The names and addresses of all persons for whom nomination papers have been filed and who are to be voted for, with the party designated and title of each officer, and the number and names of each political party and several precincts are entitled to select to the county convention, are as follows, to wit:

#### Republican Party

- State Senator: Chris A. Hagan ..... Moscow, Idaho.
- State Representatives: Alfred S. Anderson ..... Moscow, Idaho  
J. A. Harsh ..... Deary, Idaho  
LaFayette Keane ..... Moscow, Idaho  
A. H. Oversmith ..... Moscow, Idaho
- District Judge of the Second Judicial District: Edgar C. Steele ..... Moscow, Idaho
- County Commissioner, First District: Guy W. Wolfe ..... Moscow, Idaho
- John C. Cone ..... Princeton, Idaho  
E. A. McClelland ..... Palouse, Wash.
- County Commissioner, Second District: Laurence E. Huff ..... Moscow, Idaho  
Elmer M. Paulson ..... Moscow, Idaho
- County Commissioner, Third District: Geo. C. Hoidal ..... Troy, Idaho  
James W. Pence ..... Kendrick, Idaho  
G. F. Walker ..... Kendrick, Idaho  
John L. Woody ..... Juliaetta, Idaho
- Clerk of the District Court and Ex-Officio Auditor and Recorder: Harry A. Thatcher ..... Moscow, Idaho
- Sheriff: William H. Smith ..... Potlatch, Idaho  
Charlie Summerfield ..... Moscow, Idaho
- Prosecuting Attorney: Abe Goff ..... Moscow, Idaho  
Latham D. Moore ..... Moscow, Idaho
- County Treasurer and Ex-Officio Tax Collector and Public Administrator: Leola R. King ..... Moscow, Idaho
- Probate Judge: Adrian Nelson ..... Moscow, Idaho  
L. G. Peterson ..... Moscow, Idaho
- County Superintendent of Public Instruction: Ellen Peterson ..... Moscow, Idaho
- County Assessor: Emmett J. Gemmill ..... Troy, Idaho
- Surveyor: Harvey J. Smith ..... Moscow, Idaho
- Coroner: H. R. Short ..... Moscow, Idaho.

#### Delegates to County Convention

- Bear Creek Precinct (1) T. J. Torpey ..... Farmington, Wn.
- Genesee Precinct (5) Walter F. Jain ..... Genesee, Ida.
- Jas. S. Nelson ..... Kendrick, Ida.  
Bovill Precinct (3) Harvey Precinct
- J. B. Mallory ..... Bovill, Idaho.  
E. K. Parker ..... Bovill, Idaho.  
S. B. Peterson ..... Bovill, Idaho.
- Cora Precinct (2) Helmer Precinct (1)
- Cornwall Precinct (2) Juliaetta Precinct (4)
- Deary Precinct (3) A. W. Behrens ..... Juliaetta, Ida.  
Columbus Clark ..... Juliaetta, Ida.  
W. J. Cochran ..... Juliaetta, Ida.  
William Cox ..... Juliaetta, Ida.
- J. A. Harsh ..... Deary, Idaho.  
Charles J. Munson ..... Deary, Idaho.  
J. C. Peterson ..... Deary, Idaho
- East Moscow Precinct (9) G. P. Anderson ..... Kendrick, Ida.  
Alfred S. Anderson ..... Moscow, Ida.  
I. R. Boyd ..... Moscow, Ida.  
Earl David ..... Moscow, Ida.  
J. G. Gibson ..... Moscow, Ida.  
H. Melgard ..... Moscow, Ida.  
A. H. Oversmith ..... Moscow, Ida.  
W. S. Robbins ..... Moscow, Ida.  
Ross R. Sherkey ..... Moscow, Ida.  
C. L. Thompson ..... Moscow, Ida.
- North Moscow Precinct (6) Ray Carter ..... Moscow, Ida.  
J. S. Heckathorn ..... Moscow, Ida.  
Geo. G. Pickett ..... Moscow, Ida.

- M. L. Romig ..... Moscow, Ida.  
B. C. Rowe ..... Moscow, Ida.  
L. C. Stenger ..... Moscow, Ida.  
Warren Truitt ..... Moscow, Ida.
- North Troy Precinct (4) H. H. Christie ..... Troy, Ida.  
J. H. Pelton ..... Troy, Ida.  
K. T. Mykelbust ..... Troy, Ida.  
Axel Olson ..... Troy, Ida.
- Park Precinct (1) Palouse Precinct (2)
- Stanly Anderson ..... Palouse, Wn.  
B. J. Jones ..... Palouse, Wn.
- Potlatch Precinct (13) Princeton Precinct (3)

- Robert Clyde ..... Princeton, Ida.  
B. F. Cone ..... Princeton, Ida.  
A. L. Davis ..... Princeton, Ida.
- Southeast Moscow Precinct (9) Eda B. Holman ..... Moscow, Ida.  
Roy L. Laing ..... Moscow, Ida.  
Geo. T. Miller ..... Moscow, Ida.  
Alois Moser ..... Moscow, Ida.  
Alex. Munro ..... Moscow, Ida.  
J. L. Naylor ..... Moscow, Ida.  
John Orness ..... Moscow, Ida.  
Mrs. J. Ramstedt ..... Moscow, Ida.  
Mattie L. Randall ..... Moscow, Ida.  
Fred Stone ..... Moscow, Ida.

- South Troy Precinct (4) O. Bohman ..... Troy, Ida.  
August Hedden ..... Troy, Ida.  
J. A. Sandell ..... Troy, Ida.
- Southwest Moscow Precinct (12) Clara R. Davis ..... Moscow, Ida.  
R. P. Drury ..... Moscow, Ida.  
Lillie Henley ..... Moscow, Ida.  
W. H. Hill ..... Moscow, Ida.  
T. J. Huntbach ..... Moscow, Ida.  
E. K. Kroh ..... Moscow, Ida.  
W. A. Lauder ..... Moscow, Ida.  
A. S. Lyon ..... Moscow, Ida.  
Edna Rodgers ..... Moscow, Ida.  
J. C. Stillinger ..... Moscow, Ida.  
R. C. West ..... Moscow, Ida.  
C. L. Williamson ..... Moscow, Ida.  
Guy W. Wolfe ..... Moscow, Ida.

- Texas Ridge Precinct (1) Gus Birchmeir ..... Deary, Ida.  
Thorn Creek Precinct (2) Oscar M. Anderson ..... Moscow, Ida.  
Viola Precinct (2) E. P. Ball ..... Viola, Ida.  
Milton Sims ..... Viola, Ida.

- West Moscow Precinct J. T. Allen ..... Moscow, Ida.  
W. G. Barge ..... Moscow, Ida.  
J. E. Collins ..... Moscow, Ida.  
John H. Reid ..... Moscow, Ida.  
C. C. Vincent ..... Moscow, Ida.
- Justices Of The Peace Suteast Moscow Precinct J. L. Naylor ..... Moscow, Ida.
- West Moscow Precinct: W. G. Barge ..... Moscow, Ida.

- Bear Creek Precinct Jas. S. Nelson ..... Kendrick, Ida.  
Bovill Precinct E. B. Flasher ..... Bovill, Ida.  
Cora Precinct
- Cornwall Precinct R. J. Knapik ..... Moscow, Ida.
- Deary Precinct J. C. Peterson ..... Deary, Idaho.
- East Moscow Precinct Ross R. Sherkey ..... Moscow, Ida.
- Farmington Precinct S. A. Rose ..... Farmington, Wash.
- Genesee Precinct Harvard Precinct Helmer Precinct

- Juliaetta Precinct A. W. Behrens ..... Juliaetta, Ida.  
Kendrick Precinct N. E. Walker ..... Kendrick, Ida.  
Lenville Precinct Linden Precinct
- North Moscow Precinct J. S. Heckathorn ..... Moscow, Ida.
- North Troy Precinct J. H. Felton ..... Troy, Idaho.
- Palouse, Precinct Park Precinct

**A LITTLE TALK ON THRIFT**

Are you saving money on your present income? A great many persons seem to be under the impression that the saving of money is largely a matter of income. The fact is it is a matter of will-power and determination.

Most of the great American fortunes of today were started with the savings of an individual whose income was extremely limited. Had these individuals waited until their incomes had increased before they began to save, they probably never would have progressed as far or beyond mediocre advancement in the business world.

The man who is earning \$5,000 a year may feel that it is out of the question for him to save anything. He undoubtedly is of the opinion that if he were earning \$10,000 a year he could save a very substantial sum.

But the man who is earning \$10,000 a year lives on a more expensive scale than the \$5,000 a year man, is surrounded by more demands, and therefore finds it correspondingly harder to save.

And so it goes throughout the whole range of incomes. Many a man today looks back on the years when his earnings were much less than they are now and feels that it would have been easier to save then than it is now. It is not an easy matter to save.

**Sensible Forestry Taxation**

The next Oregon legislature will consider a bill exempting young, growing timber from annual taxation until it reaches the crop-harvesting stage; the yield that is taxed as a product. Under the Coast climatic conditions, a crop of timber may mature in from 40 to 80 years; for some purposes there would be considerable yield in thinning, in from 20 to 40 years. Most of the nation's timberland is in private hands. Private growers must grow the forests of the future, if there are any to be grown at all. Manifestly, they are few who are able, or willing, to pay annual taxes on forest lands that will produce no crop for almost a century; a tax exemption must be made as a protection for the future, and for even the present.

Let it should ever be borne in mind that the mere matter of income has little to do with it. Many times it has been shown that those who are unwilling to make the sacrifices necessary to save on limited incomes are just as unwilling to make sacrifices necessary when their incomes are increased. Most men who have succeeded have had to do so at great odds. Saving money on a limited income does require pluck. But because of this the savings take on additional value. It is not the amount of money that counts in the long run, it is the amount of character necessary to produce the savings.

Progressive Methods in Industry A new field for the use of illuminating gas is found in the process of using it with oxygen for metal cutting. Recent tests shows that it is cheaper, safer, more available and it may find its way into the welding and cutting shops the country over. Especially because of its low cost, it has a profound influence on manufacturing. The rapid increase in the use of this fuel in just another step in the progressive development of the American industrial system.

# GREAT INTERNATIONAL HEALTH EXPOSITION DRAWS THOUSANDS TO OLD GERMAN TOWN

League of Nations and Red Cross Exhibits Excite Interest Among Visitors Along Two-Mile Midway

THOUSANDS of persons from all parts of Europe, including countless American tourists, are making their way to the picturesque old town of Duesseldorf on the Rhine, where an immense health, hygiene, social welfare, and physical culture exposition, extending over two miles and covering 450,000 square yards, is in progress and will continue until the latter part of October.

Top: General view of Duesseldorf Exposition. Bottom: Close up of one of the Planetarium Buildings.

Though the exhibits comprising the exposition are not of a technical nature, models and practical demonstrations affording the spectator a splendid opportunity to study the progress of medical science and social welfare organization during the first quarter of the twentieth century, regions of books show a high percentage of professional people among the visitors to the unusual display.

Doctors, dentists, blind, persons engaged in social welfare work, and public and private charity athletes, sportsmen, employees of large groups of men, and the workmen themselves are numbered among the crowds that collect about the demonstrations staged daily by the Red Cross in which forty-two nations participate, by the League of Nations which offers for the first time an opportunity to the spectator to become acquainted with its work in preventing epidemics, and by the exhibits of national and municipal governments.

**Exhibits Practicable.** So varied are the exhibits that it is almost impossible to enumerate them. Many of them are characterized by their immediate practicability. Demonstrations of infant welfare work are carried out in an infant hospital with real babies as subjects. Work among adolescent boys is conducted in a reproduction of an actual hostelry, typical of the overnight hotels where parties of German youths on walking tours may spend the night cheaply and safely.

Hygienic care of convalescents is demonstrated in an actual convalescent home where children are brought to regain their health in the excellent air of the Duesseldorf

region. Advice regarding what sport is best adapted to each individual to enable him to avoid more readily overstrain and damage to heart and lungs is given in special consultation rooms in a planetarium.

Exhibits illustrate the progress of tropical medicine, national insurance, control of contagious diseases, their prevention, isolation, and disinfection, as well as the history of mankind, and exhibits pertaining to prehistoric man being included among the latter demonstration but arranged in such a way as to make the matter intelligible to the ordinary visitor who may, in fact, engage an English guide at small cost if he so desires, as well as to the student who realizes that the Neanderthal man was unearthed not many miles from the exposition site.

**Modern Science Explained.** Displays illustrating what effects the characteristics of the parents have upon the offspring are included among the exhibits showing the influence of heredity. Genetics, the science of breeding to produce the healthiest and best offspring, is illustrated by similar exhibits. Vital statistics, dealing with the death rate and birth-rate throughout the world, becomes an interesting subject ever for the layman as the result of carefully planned demonstrations.

Extensive demonstrations are staged to show the effects of the worldwide plague of tuberculosis, depicting in detail the results and means of fighting it. A practical sanatorium equipped in the latest mode makes it easier to visualize the care of consumptive patients.

national Exposition, now being held in Philadelphia. The products carried in the camel packs are valued at \$3,000,000 by the Persian Government. They will be shown in the Palace of Civic and Foreign Exhibits at the Exposition.

**new bread-home made with Wild Rose Lard**

You'll get better results than ever before by rubbing the outside of the dough with warm Wild Rose Lard before setting to rise.

The absolute freshness and purity of this natural shortening make it ideal for every cooking purpose.

A Perfect Shortening for Every Purpose

## First Jobs of National Electric Leaders

This is the first of a series of sketches, in biographical form, of first jobs of the nation's leaders in the electrical industry. Albert L. Salt, head of the Graybar Electric Company, tells how polishing brass was the forerunner to presidency of one of the nation's leading electrical merchandising companies in the world.

Back in July, '81, after finishing grammar school, at the age of 15 1/2 years, a friend of mine asked how I would like an office boy's job with the Western Electric Manufacturing Company. If interested I was told to report to H. D. Gill, the company's shipping clerk, who would give me the chance of a lifetime.

ALBERT L. SALT

I applied and was given a salary of \$100 a week. My duties, as outlined by the chief clerk, consisted of everything from polishing brass handles to the big front door to keeping his private and other desks, show cases, retail stock, in first-class order. I concluded that the responsibilities vested in me were greater than those ever assumed by any president of the United States, and set out to "make good."

**Messenger Boy Duties.** How well I remember after doing a few chores at the office, Mr. Cleaver, the Chief Clerk, calling me and placing in my hands about twenty envelopes and telling me to proceed to the transportation companies and take out tickets to Des Moines, Iowa, each receipt of the offices of these companies were some distance apart, but I hustled from one to the other.

### Contract Let in U. S. Valued at \$68,238,000

NEW YORK—Construction activity for the United States, measured by the value of contracts let, was much higher the week ending July 10 than in the same period a year ago. The value of contracts let totaled \$68,238,000 in the preceding week, and \$20,163,000 in the corresponding week a year ago, according to the Engineering News-Record report. The minimum costs observed in the total are \$40,000 for industrial buildings and improvements, \$150,000 for commercial buildings, including residential projects, and \$15,000 for public jobs.

The money value of contracts let in the United States from January 1 to date amounted to \$1,492,984,000, as against \$1,204,211,000 in the corresponding period a year ago. In the total to date private work absorbed \$921,568,000, as against \$672,430,000 a year ago.

Clatsop County Fair, held annually at Port Angeles, will open its gates for the 1925 exhibition on September 10th. Improvements contemplated are the erection of additional buildings for livestock exhibits and the widening of the race track. At a recent meeting of the directors, Ray Haynes was re-elected secretary manager for the third time.

Twenty-five dollars a pint is paid for blood for transfusion purposes at the Wisconsin general hospital at Madison, and 168 University of Wisconsin students supply the demand.

## O. L. Waller Named On Columbia Board

SPOKANE—Dr. Elwood Mead, commissioner of reclamation in the Interior department, announced here his appointment of Dean O. L. Waller of Washington State College as his personal representative on the joint board, authorized by congress to allocate waters of the Columbia River, between the four Pacific Northwest states.

The Okanogan Apple Growers' Union has installed five apple wiping machines in its packing plants, which are intended to remove spray residue from the apples packed this season. These machines will be electrically driven, and the apples in passing over a succession of revolving rollers are slapped by 500 pieces of canvas, the process being accompanied with drafts produced by fans to remove the dust. Labels on boxes of apples so treated will announce that the apples have been wiped.

**He Gets Fired.** Like some other members of the Company's General Committee, I was "fired" after I had been with the company about a year and a half for having made errors in an American Bell Telephone Company's report. On contact with Mr. Barton, however, that I had misunderstood what was wanted I was permitted to continue working for the company.

About this time we became firmly entrenched in the manufacture of switchboards and sub-circuit apparatus and the company's growth justified our operating a special wire for half an hour each day between New York and Chicago.

**Diversity of Duties.** From this job I gradually progressed until I had held nearly every position with the company. When we moved to West and Bethune streets, I was given charge of the company's relations with the American company and its associate members.

During my connection with the company, now nearing forty-five years, I have employed and brought up a great many office boys, some of whom are now holding responsible executive positions with the company.

Governor Al Smith sent President Coolidge a fishing license, but so far as is known neglected to include anything for snakes.

The poet laureate of Peru was sentenced to three years in prison for homicide. If he had tried to include anything for snakes he might have received more than that.

**ALL BURNERS READY AT ONCE—TURN ON OR OFF LIKE GAS**

Only the master burner must be generated. When lighted it produces gas for the other burners which may be turned on or off as wanted just like gas. No waiting; no delay; the flame will not "creep up" nor go out in a moderate breeze. RUGGED CONSTRUCTION...SIMPLE OPERATION—The Safe Stove For Children

The Kitchenkook is well built and strong and simple to operate. It has no complicated adjustments, no wicks or chimneys; burners do not clog or carbonize. It need not stand level to operate properly but will burn in almost any position as shown in the safety test operation. Removing the tank filler plug for filling releases the air pressure, automatically extinguishes the fire hence, it cannot burn while being filled. Children can operate Kitchenkook in perfect safety.

**Has further Hardware**

**PERSONALS**  
Mrs. Clara H. Schmidt and daughter, Gertrude and mother Mrs. Winkler, from San Diego were visitors for two weeks at the Elms. Elms home recently. This was the first time the two families had met for forty years, the visit being greatly enjoyed by all parties concerned. They went from here to take Louise at Banff and from there to Vancouver, shipping their car by boat to San Francisco, from whence they will return to San Diego overland.

Dr. A. E. Jones of Spokane, was at the Genesee Hotel on Monday and a great many people took advantage of the occasion and had glasses fitted. Those who are needing glasses will do well to see Dr. Jones on his next trip.

**LATHAM D. MOORE**  
Candidate for Nomination for Prosecuting Attorney on the Republican ticket at the primary election to be held August 3rd, 1926

Mr. Moore is a graduate of the University of Idaho and has resided in Latah county for 28 years. He has been engaged in the general practice of law for three years and has had one and one-half years experience as assistant prosecuting attorney.

Mrs. Arthur Hampton, who underwent an operation at the Deaconess Hospital in Spokane several weeks ago returned home Saturday evening. Her many friends are very glad to hear that she is improving.

Mrs. Laura Phipps and Mrs. W. W. Burr entertained Mrs. Geo. Follett, Mrs. Leon Follett, Fred Meader and Mrs. Jas. Jackson Saturday noon at dinner.

Mrs. John Loring returned home Saturday after spending a week in Spokane. She was accompanied home by her son, Charles, who will visit here two weeks.

Mr. and Mrs. Fred Meader, who have been spending a few weeks here returned to their home in Los Angeles last Monday. They will stop in Portland for a short visit.

Mr. and Mrs. Chas. Hornum, Mr. and Mrs. Frank Qualey and family and Mr. and Mrs. Dick Green and family spent last Sunday picnicking at the Moscow park.

Mr. and Mrs. Tom Edwards and children Betty and Billie left Wednesday for Walla Walla after spending several weeks with relatives here.

Mrs. Clyde Maclean and children of Clarkston arrived Sunday for a two week's visit at the Henry Hanscu and Nels Flamos homes.

Margaret Rader left Saturday morning with her Aunt and Uncle, Mr. and Mrs. A. Fix of Walla Walla, for Colville. Mr. and Miss Martin accompanied them.

Mrs. Mary Burr who spent the past winter with her daughter in Portland, visited a few days in the week at the home of her son, W. W. Burr.

Miss Kathryn McMahon, who has been in Spokane for the past few weeks is visiting with her grandparents, Mr. and Mrs. Con. Stutz.

Mrs. Geo. Giles of Boise left Saturday for her home after a few weeks visit her with her cousin, Miss Mary Wardrobe.

Mr. and Mrs. Carl Erikson and family, Mr. Frank Rader, and Mrs. Thelma Hoorman motored to Moscow Monday.

Mr. and Mrs. W. W. Burr, Mr. and Mrs. Malton Follett, Miss Elieta Jane Nelson, Mr. and Mrs. V. A. Beckman, Mrs. Ira Hanson and daughter, Rowena all picnicked at Spalding last Sunday.

Mrs. G. A. Bumpus returned Saturday from Harrington after attending the funeral of her mother, Mrs. Rebecca Talkington.

Mr. and Mrs. Bert Moersel and family, of McMinnville, Ore., were visitors at the Gus Fickens

**VOTE FOR L. G. PETERSON**

for Probate Judge at the Republican Primary August 3. He is an A. B. and Law graduate of the University of Idaho, and has been admitted to practice in the State and Federal Courts. He will appreciate your support, and, if elected, will perform the duties of the office with fairness, justice and impartiality to all.

**LAFAYETTE KEANE**  
Candidate for State Representative at the Republican primaries.

A resident of Latah county since 1898. Earned on American Ridge 14 years. Served one term as county commissioner. Has lived in Moscow the past 11 years. Believes in the right kind of economy in the management of state affairs. Believes in the Idaho educational system and proper support of the University and common schools.

ing at the Nels Flamos home for several days.

Herb Potech of Lewiston, came up Tuesday to repair the State Highway's tractor.

Miss Eldora Edwards of Clarkston is visiting at the Nathan Edwards and Chas Goltz homes.

Francis Bumpus left Monday for a short trip to Spokane.

Mrs. Sadie Gibson returned Monday after visiting several days in Lewiston.

**Amplifying System Makes Debut at Big Ten Athletics**

Football enthusiasts attending the University of Illinois games next Fall will be treated to an innovation which will be treated to greatly facilitate the following of plays by the spectators.

Announcement has just been made of the signing of contract by the University of Illinois for the installation of a series of loud speaker units, in its double-decked stadium, whereby a man stationed on the side lines will talk into a microphone detailing plays; the voice will then be amplified and sent all parts of the field by means of the loud speaker units.

The apparatus, known as a Public Address System, is the first to be used by any Big Ten University. It is expected to be in operation for the opening game with Coe, October 2. Twelve to fifteen loud speaker units will be employed. It is expected that the system will be connected to the new 1,000-watt broadcasting station being erected at Urbana and Champaign, Ill. This will enable a word picture of the game to be put on the air direct from the playing field.

In addition to having this loud speaking system in operation on the football field, a series of five speaker units will also be installed in the University gymnasium to provide twice amplification for indoor games and class gymnastic exercises.

According to engineers of the Graybar Electric Company, who are installing the system, a voice, with a favorable wind, can be heard four miles away. A similar system is being installed at Franklin Field of the University of Pennsylvania.

JOHN GONE Present Incumbent Candidate on the Republican ticket for the office of COUNTY COMMISSIONER First District LATAH COUNTY Primary Election, August 3, 1926.

Death of Mrs. Talkington Mrs. Rebecca Anne Talkington, 87, died a week ago Monday morning at 8:30 at the home of her daughter, Mrs. G. A. Bumpus.

Grandma Talkington was born in Anderson County, Tennessee, November 9, 1838. She lost her mother in early life and was raised by Thomas Yaden.

near Bluestem. Mrs. Talkington joined the Methodist church at 14 years of age and lived her consistent Christian life for 74 years.

**Notice of Primary Election**

Notice is hereby given, that on Tuesday, August 3rd 1926, at the polling place to be provided by the precinct committees of the respective parties holding such primaries, in the various election precincts of the County of Latah, State of Idaho, a primary election will be held for the nomination of candidate for the office of District Judge of the Second Judicial District, for county offices, and for the election of precinct committeemen, and for the election of delegates to attend the county conventions.

The polls in the several election precincts on the day of said primary election shall be open from One (1) o'clock in the afternoon until seven (7) in the evening.

The names and addresses of all persons for whom nomination papers have been filed and who are to be voted for, with the party designated and title of each officer, and the number and names of each political party and several precincts are entitled to select to the county convention, are as follows, to wit:

**Republican Party**

- State Senator: Chris A. Hagan ..... Moscow, Idaho.
- State Representatives: Alfred S. Anderson ..... Moscow, Idaho
- J. A. Harsh ..... Deary, Idaho.
- LaFayette Keane ..... Moscow, Idaho.
- A. H. Oversmith ..... Moscow, Idaho.
- District Judge of the Second Judicial District: Edgar C. Steele ..... Moscow, Idaho.
- Guy W. Wolfe ..... Moscow, Idaho
- County Commissioner, First District: John Cone ..... Princeton, Idaho.
- E. A. McClelland ..... Palouse, Wash.
- County Commissioner, Second District: Laurence E. Huff ..... Moscow, Idaho.
- Elmer M. Paulson ..... Moscow, Idaho
- County Commissioner, Third District: Geo. C. Hoidal ..... Troy, Idaho.
- James W. Pence ..... Troy, Idaho.
- G. P. Walker ..... Kendrick, Idaho.
- John L. Woody ..... Juliaetta, Idaho.
- Clerk of the District Court and Ex-Officio Auditor and Recorder: Harry A. Thatcher ..... Moscow, Idaho.
- Sheriff: William H. Smith ..... Potlatch, Idaho.
- Charlie Summerfield ..... Moscow, Idaho.
- Prosecuting Attorney: Abe Goff ..... Moscow, Idaho.
- Latham D. Moore ..... Moscow, Idaho.
- County Treasurer and Ex-Officio Tax Collector and Public Administrator: Leola R. King ..... Moscow, Idaho.
- Probate Judge: Adrian Nelson ..... Moscow, Idaho.
- L. G. Peterson ..... Moscow, Idaho.
- County Superintendent of Public Instruction: Ellen Peterson ..... Moscow, Idaho.
- County Assessor: Emmett J. Gemmill ..... Troy, Idaho.
- Surveyor: Harvey J. Smith ..... Moscow, Idaho.
- Coroner: H. R. Short ..... Moscow, Idaho.

- Buyer Yields Profit-This wheat Doesnot.
- False stories of the origin of Polish and poulard wheats usually have accompanied offers of the seed for sale at from \$20 to \$60 a bushel. The United States Department of Agriculture advises farmers against buying and growing these wheats. They are not only unsuitable for making bread flour and macaroni, but their yields are considerably lower than those of standard varieties of wheat grown in the same places.

**A LITTLE TALK ON THRIFT**  
The newspapers recently told of the exhumation of a jar, in the ruins of an ancient city, containing six small coins. Archaeologists are of the opinion that the coins were the savings of a child who lived and died thirty centuries ago. As near as can be estimated these coins each had an original value comparable to our present day penny.  
Here we have a splendid lesson in thrift. Aside from their value as curios, these small pieces of coin are worthless today. Through ages of idleness, they have practically speaking, contributed not to their own worth nor to the wealth of the world.  
Had these coins been properly invested, instead of having been merely saved, they would represent a value today almost beyond the range of mathematical calculation. Some has described the amount in dollars as a sum represented by 36 followed by 59 ciphers. There figures are to fantastic to mean much to us, but they bring out the light that there is a vast difference between hoarding your dollars and keeping them at work.  
The secret of a successful executive lies in keeping everyone around him employed in the right way. One of the secrets of accumulating money and reaching the point of financial independence, is in keeping your dollars at work. It is not enough to merely save money.  
Every day in the year countless persons have their savings swept away.  
An ancient proverb says:—"The money begets money." but hoarded money begets nothing.  
The value of thrift lies very much more in knowing how to use money profitably and rightfully than in just being able to save it. Keep your dollars busy.  
**The Happy Medium**  
Forty years of sound agricultural planning and progress have revolutionized the economic and social life of the Danish people.  
From a depressed state of peasant agriculture, which threatened the welfare and prosperity of the whole nation, Denmark stands today as the world's foremost agricultural country in the scientific organization of her production and marketing. Her people, rural as well as urban appear contented and prosperous. Neither extreme wealth nor extreme poverty exists.  
**Save Calves**  
Calf diseases result mainly from filth and carelessness. Cleanliness is necessary in feed, pens, bedding and stalls or other utensils.  
**Hay Killers**  
In growing a crop of alfalfa the worst animal pests are gophers, ground squirrels, prairie dogs, and mice. This is particularly true in the western half of the United States. The best means of holding them in check are poisoning and trapping.

**Reduced Fares East!**

**Extra Comfort—No Extra Fare**  
D. B. Emerson, Agent  
Genesee, Idaho.

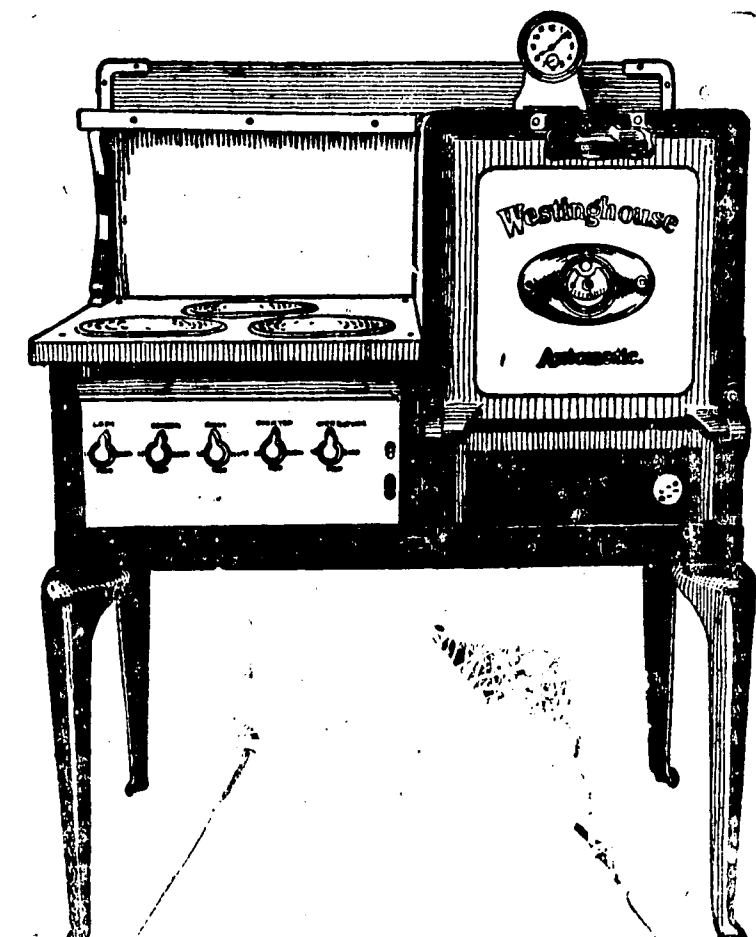

**Swine Sanitation**  
A system of swine sanitation developed by specialists of the United States Department of Agriculture in McLean County, Ill., has gradually spread until it is widely used in hog-growing States. The method used greatly reduces losses caused by round worms, and extension workers, in Iowa Nebraska, and other States have been active in acquainting swine growers with it. The Bureau of Animal Industry, United States Department of Agriculture says that many hog men using the system, are now raising as many pigs as formerly with about two thirds as many brood sows, being equally as good. The method has been established, the bureau is continuing its experiments with other parasites and related diseases.  
The foregoing results show the practical application of scientific work which at its outset was extremely technical and involved a detailed study of the worm's life history and characteristics. Although control methods are now established, the bureau is continuing its experiments with other parasites and related diseases.

# GODFATHER TO SATAN'S KITCHEN

BY HAPSBURG LIEBE

(Continued from Last Week)

A week passed. The snow melted and more snow came; once again the great hills were wrapped in winter's cold, pale shroud. Bear Creek Buckmaster spent the most of those bleak and desolate days in a floorless and wind-swept tobacco-barn; he ate what ever he could find to eat and always he was trying to think of a possible way out of the hole he was in. Had it not been for 'Lizbeth he would have gone to some new country of the West or Northwest to begin life all over. He couldn't leave his mountains! not now, after her telling him that she would marry him when he asked her. He decided that he would hold up no more payroll messengers. The snow melted again, rain came mercury went down like a rocket all over eastern Tennessee. Buckmaster's temporary quarters became decidedly uncomfortable and he started for a deserted old cabin on the eastern slope of the Big Bald, a cabin that had a fireplace; nobody would live there because it was so far from the beaten path and because a man, a moonshiner, had been killed in the doorway.

By noon on a Saturday he had reached the crest of the Big Bald's highest eastern spur, and he halted to look over the broad stretch of rugged country lying below him. Suddenly his keen eyes made out the figure of a man on horseback on a winding trail a mile down the slope. The horse was a light gray, by which Buckmaster concluded—correctly—that the rider was a cattle-buyer from the lowland, an elderly fellow named Rubens. Then his eyes caught something else and he uttered a little exclamation that was half oath.

# WASHINGTON-LAID EGGS COMMAND PREMIUM IN NEW YORK

Left—Feeding eggs into one of the big sand-blast cleaning machines which have raised Western Washington eggs to the highest standard in the world. Center—A general view of the sand-blast cleaning machine. Right—Cleaned eggs being candied as they come from the sand-blast machine.

Careful management, efficiency and making the greatest use of available resources have placed the poultry industry of Western Washington not only the largest in the world among the state's greatest industries but to a point of excellence that cannot be duplicated throughout the world. For instance, Western Washington eggs are marketed through the Washington Co-operative Egg and Poultry Association, command a price in New York markets that ranges all the way from one to two cents a dozen more than California eggs and from two to four cents a dozen more than eggs actually laid within New York state.

Without going deeply into this subject it may be stated that the electric light has provided a longer laying day for pullets, the electric incubator has resulted in a better hatching percentage, the electric brooder is responsible for healthier and stronger chicks, while the electric water heater is coming rapidly into its own for grain-purifying. A recent survey of Western Washington shows that the industry is rapidly becoming universal.

There was the fear that makes rank cowards to men. "Who're you?" he half gasped. He struggled to sit up and failed. "Me? I'm Lon Buckmaster, of Bear Creek. Who're you, partner, and what's the matter wi' ye?"

"The unknown turned slightly and with evident pain. His blue shirt was already unbuttoned; he drew it open over his thin chest and revealed a purple-edged bullet-hole not far from his heart.

"Through and through," he mumbled. "Rubens—he got me." "Rubens! I thought it was you shot at Rubens!"

"No. It was him. He shot as he galloped off. I'm—going—to cash in. Buckmaster. If I could only square it wi' you, maybe I—maybe I could get some more of the other things 'I've done."

"I see," Lon Buckmaster growled. Once more, certain of 'Lizbeth Elderidge's words came back to him. After all, she had been right about it, and this was the man who had used him as a scapegoat. "But how," he demanded, anger burning hotly within him, "do ye think yer's a goin' to square it wi' me?"

"I'm a dyin', Buckmaster." "Shore. Anybody could see that." "And hate to go out this way." "Yeuh. Most o' people would. Ye shore ain't got no golden harp a-comin' in you, partner."

"No. I reckon—my golden harp'll be a pitchfork, maybe." "WY sharp harp on it," Buckmaster cut in mercilessly. "And ye'll have horns on ye head and a tail which will be split like a snake's."

The little man moaned. "It ain't no time," he insisted, "fo' jokin', Buckmaster."

"No," Buckmaster agreed quickly. "It ain't."

A moment of silence. Then: "I've got might nigh all o' the money I took in yore name, Buckmaster, came the weakening voice of the unknown. "Et ye'll f'give me—ye can have every cent o' it."

A watchmaker accidentally split a fine steel instrument just as he was about to sign a document. No quill being at hand he used the ruined tool. Thus came about the invention of the steel pen.

## "The Wanderer"

with Ernest Torrence Greta Nissen William Collier, Jr Wallace Berry Tyrone Power Kathlyn Williams

The Story of the Prodigal Son of long ago who left Home for the Wine, Women and Song of a wicked City.

The Picture the Whole World is acclaiming as the Peer of any Directional Effort the Motion-Picture Industry has ever seen.

A PARAMOUNT PICTURE

25c and 50c

It's a Funny Thing, But—The same ground upon which the padres of early California preached their sermons to the Indians and early settlers was used as the location upon which the parable of the prodigal son was put on film.

The location, several miles out of Los Angeles, was once the site of an old fortress, where staid old missionaries once preached the Word of God to the pioneers of Southern California. Upon this same spot, the Famous Players-Lasky Corporation filmed "The Wanderer," famous Biblical spectacle, which was directed by Raoul Walsh, Friday and Saturday night at the High School Opera House.

# PERSONALS

Mr. and Mrs. Delbert C. Jacobson of New York City are visiting at the Ed Erikson home, for the next two or three weeks. Mrs. Jacobson is a sister of Mrs. Erikson. They made the trip overland in their Chrysler Coach, registering over 3200 miles on the trip one way.

Mr. and Mrs. W. M. Hoern and Mr. and Mrs. F. C. Shork spent the week end picnicking at Grizzly Camp.

Where The Women Work A recent survey of the number of positions which women occupy as town, county state and federal officeholders, has some elements of astonishment for those who do not keep their eyes on other sections of the country. We have now more than 11,200 postmistresses, and women serve as superintendents of schools in eight commonwealths. In Montana 50 of the 56 county superintendents of schools are women in Colorado 52 of the 63, in Idaho 36 of the 44, in Wisconsin 29 of the 71, in Washington 21 of 36, in North Dakota 64 per cent, in Oregon 44 per cent, in New Mexico 58 per cent, in Minnesota 50 per cent. The women are strong, too as county recorders, county treasurers, clerk of courts and auditors. In Utah, Iowa, Ohio and Indiana, the percentages of county recorder offices filled women are respectively 80, 56, and 25 the figures for Ohio and Indiana being about the same.

Two of our 48 states have elected women governors, Mrs. Ross in Wyoming and Mrs. Ferguson in Texas, each a beneficiary of a preceding husband, and Mrs. Ferguson being really governor in name only. Half a dozen women have been secretaries of state, Mrs. Fergus has a supreme court judge. We have women mayors recently in seven states.

Child's Health Conference. One of the special features of the Whitman-Latah Fair to be held at the city of Garfield Wash. Sept. 2-3-4 will be the Child's Health Conference sponsored by the Whitman County Nurse.

Do you know what your child should weigh? Do you know what your child should eat? Do you know that health correction made during the first few years of your child's life means adult strength?

A splendid opportunity will be offered on the second day, Sept. 3rd, of the Whitman Latah Fair, to the parents of children within the preschool age for thorough medical examination.

The best specialists available will be sent to conduct this Child Health Conference and the examination will be free. The regular admission to the fair grounds will be the only requirement. Children should be regularly examined and this conference will afford an unusually fine chance for this important duty.

Parents are requested to make reservations before August 20, by telephone or letter, with Miss Lois Shearer at the State National Bank of Garfield.

Charles Lorang returned to Spokane Thursday after spending two weeks with relatives here.

Mr. and Mrs. I. E. Goldsmith and daughter, Doris returned Monday evening after spending several days fishing and huckleberrying on the Clearwater.

Mr. and Mrs. Sherman Wahl and family and Mr. and Mrs. McCarty and family and Bert Armstrong spent Sunday at the beach near Lewiston.

Ed Bowker and sons, Jim and Ed, returned Monday evening after spending several days at Grangeville.

Miss Ruth Jacobs of Lewiston spent Tuesday and Wednesday with Mrs. E. E. Bussell.

Misses Irene and Olive Mullaney returned Sunday after spending two weeks at Seattle and other places of interest.

Misses Verna Geltz and Mary Mullaney spent last Thursday visiting in Lewiston.

Mr. and Mrs. Geo. Gammon and little son Don of Pullman visited Sunday with Mrs. F. K. Bressler.

Mr. Frank Grand returned Sunday with her mother, Mrs. F. K. Bressler.

Mr. and Mrs. W. M. Hoern and Mr. and Mrs. F. C. Shork spent the week end picnicking at Grizzly Camp.

# WHAT'S SMART IN MEN'S WEAR

HOW much is a good suit of clothes worth?

There is a great deal of confusion about that question these days. A great deal of advertising has stressed the price appeal alone. The writers all use the same dictionaries and say the same things about cheap clothes and fine clothes so that it isn't any wonder people have difficulty in telling what priced suit really is a good one.

In fact "good" is more or less of a relative term when applied to clothes. Naturally it doesn't mean the same thing to a millionaire society man and the young clerk who has hard time making both ends meet, although both of them want to dress just as well as they can.

One of the things a man should do in buying clothes is to keep his suit in proportion to the other things he wears. If you pay \$3.50 for a necktie, \$10 or \$12 for a hat, \$5 for your shirt and \$12 to \$15 for shoes, you certainly can't expect to get a suit of clothes worthy to go with them for less than \$50 or \$60.

If, on the other hand, you're forced to content yourself with a \$1 tie, \$1.98 shirt, \$5 shoes and a \$5 hat, it is reasonable to suppose that a \$75 suit might be in keeping with them.

More and more men, according to merchandise experts of Hart Schaffner & Marx, are feeling this sense of proportion and acting accordingly. As a result better clothes are being sold this year than for a number of seasons past.

## IDAHO WEEKLY INDUSTRIAL REVIEW

Idaho potato growers planted 88,000 acres this year, compared to 73,000 acres last year. Work to start at once, on new \$300,000 highway from Enaville to Pritchard. Burley's two national banks report deposits of \$1,163,493; increase of \$371,646 over last year. Over 3,600 acres in Western Montana and Northern Idaho planted with young trees during 1925, at average cost of \$10.44 per acre. Idaho's State investments have increased \$5,000,000 since 1919. Now total \$14,525,891.72. Lewiston—New \$60,000 Pacific Telephone and Telegraph Co. building will be finished by Sep. 14.

Caldwell—Farmers in this district raised products valued at \$4,105,060, for months ended the 30th of April. Craigmont—Work on Gymnasium building progressing nicely. Wallace—2,000 tons ore from Western Union mine run through at Hercules mill, and concentrates will be shipped to Bunker Hill smelter at Kellogg. Wallace New Snowstorm mill operating. Will handle more than 100 tons daily. Jerome—Work to start within 60 days, on rim-to-rim bridge across Snake River canyon. Nampa—New Nazarene General Hospital well under way. Grounds will be improved under 5-year operation.

Kellogg—Boarding house and bunk house being built by Federal Mining & Smelting Co. at Page mine; 250 ton mill to be completed within 90 days. Wallace—Highland Surprise Mine enlarging mill. Has ore supply in sight for two years' run at 125 tons daily. Murray—Mill equipment for Terrible Edith will be installed and road to mine finished within few weeks. Coeur d'Alene—Preliminary work for new Spokane River bridge under way. On June 30, Idaho had \$3,320,343.57 in State treasury. Record of Idaho building permits in 1925 to June 30, greater than entire year of 1925.

Wallace—Idaho Chief mine, on Nine Mile, has cut five years on 150 foot extension of crosscut. Burke—Street to be paved at a cost of \$10,000. Coeur d'Alene—Buildings being erected on Carlson Fox Farm, between here and Foman Lake. Idaho's wheat crop will be about 21,000,000 bushels, large crop reported in northern part of state. New potato shipments from state exceeding 5 cars daily. Lettuce acreage large. Custer County mining properties going into hands of big interests. Julianna expects to ship 20 carloads cherries, more than double last year's output.

Payd interests, owners of Red Bird mine, will build dam on the Salmon river above Squaw Creek for power to operate electric smelter at midle. Several thousand land-locked Salmon planted in creeks tributary to Payette Lake. Bingham County wool growers sell 44,000 fleeces, at 33 cents a pound. Nampa—Caldwell Boulevard completed. Parma bank deposits amounting to \$600,000. Emmett—26 carloads cherries, shipped to New York, brought an average of \$3,000 per carload. New Plymouth—Apple crop of Payette Valley this year will approximate 2500 carloads. Nampa—Idaho Holstein Breeders hold annual meeting here. Wallace—Operations resumed at Weaver Mine. Wallace—Diamond drilling in lower tunnel at Bullion mine progressing satisfactorily. Dublin—Post office building being reconstructed. Lewiston—\$100,000 raised, in campaign for construction of Idaho Memorial armory and gymnasium. Pocatello—Highway west of city, to be paved. Montpelier—Colossus Mining and Milling Company erecting new mill building. Wallace—Roadway to Pocatello, Bow to be improved. Pocatello—Tilden bridge over Snake River to be moved where R.R. river flows into Snake River.

**Former Genesee Girl Passes**  
On Monday afternoon Mr. and Mrs. A. J. Eikum received a message of the sad news of the daughter, Mrs. O. Holm of Portland, formerly Miss Ruth Eikum of Genesee and Lewiston. The deceased was born and grew to young womanhood on the home farm near Genesee. After graduating from the Genesee High School, she completed a course at the Lewiston Business College of Lewiston and there remained in the employ of the C. J. Brewer Co.'s office force until the head office of that Company was removed to Portland where she went to continue her faithful work. Last September she was united in marriage to Mr. Ove. Holm of Portland. Besides her husband she leaves to mourn her passing her bereaved parents, four sisters: Synneve of New York, Marie of Baker, Ore., Mrs. Carl Chase of Reubens, and Christine of Lewiston; two brothers, John of Genesee and Hans of Lewiston, besides a host of other relatives and friends. The funeral will take place on Thursday at Portland. The deceased was an active and faithful member of the Lutheran Church.

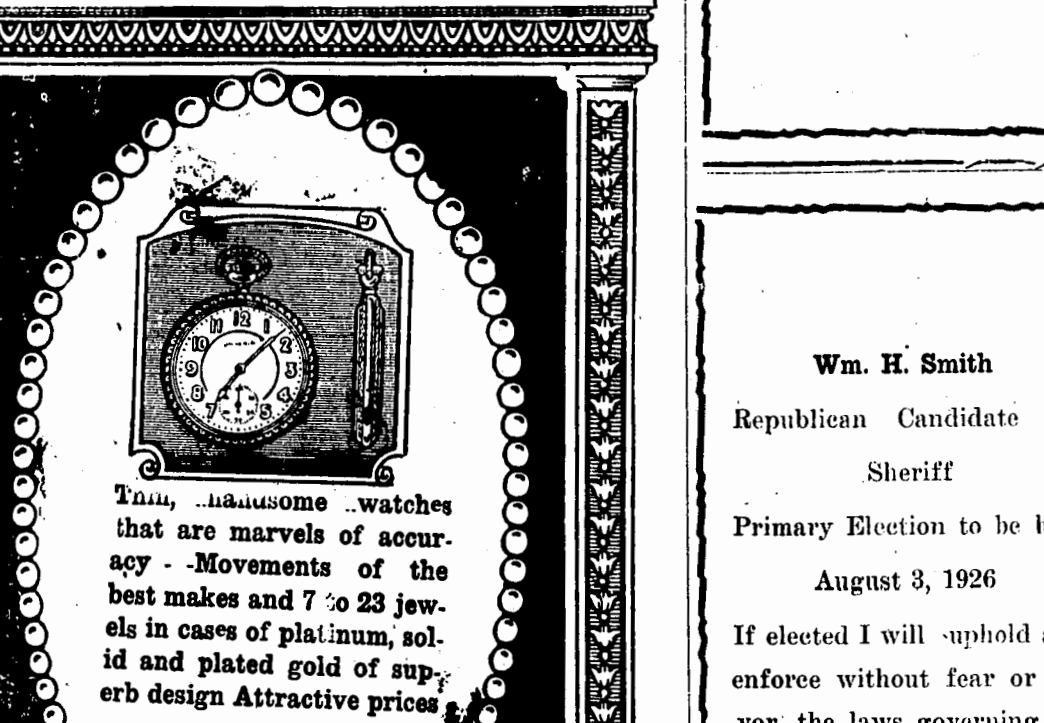

**Fire Insurance Companies Lose**  
Notwithstanding the enormous increase in volume of business, fire insurance companies have made no profit during the last five years due to a constant decrease in rates and a definite increase in expenses, and above everything else a steady rise in the fire loss waste in the country.

**Labor Reduced**  
When the Steel Corporation was organized, 25 years ago, it required 14 hours of labor to produce a ton of pig iron; now a ton is produced in two hours. An auto mobile factory 12 years ago, used 1,500 hours of labor to produce a car; now car built in 25 hours. If the farm production could be systematized in this manner, the farm problems would be solved. A vacation would be all right if it weren't for the first day or two at the office after you get back home.

**Onion Goes West**  
The center of the onion production is moving westward. Production in the Western and Middle Western States, especially in Colorado, Idaho, Washington, Ohio and Indiana, has tended to increase whereas production in New York, Massachusetts, and some of the other older onion sections has remained about stationary or has decreased. Kipling says only a dozen writers have gained immortality in the last 2,500 years and no doubt Sinclair Lewis is wondering who the other eleven are.

## Firestone GUM-DIPPED BALLOON PRICES

20% Less Than Year Ago!

Never before in our history as tire dealers have we been able to offer our customers such wonderful tire "buys" as right now. Due to the great volume of tire business coming direct from car owners throughout the country—the great Firestone factories have been, and are now, working at top speed building Gum-Dipped Tires in tremendous quantities. Manufacturing costs have been lowered—crude rubber prices have been reduced—and the savings passed on to car owners.

OLDFIELD TIRES	
At These Reduced Prices	
30x3 1/2, Fab. Cl. .... \$7.50	29 x 4.40 Balloon... \$11.20
30x3 1/2, Reg. Cl. Cord... 8.95	30 x 4.75 " " .. 15.60
30x3 1/2, Ex. Svc. Cl. Cord... 9.95	29 x 4.05 " " .. 16.45
31x4 S. S. Cord... 15.75	30 x 5.25 " " .. 18.15
32x4 1/2 " " .. 23.95	31 x 5.25 " " .. 19.05
33x5 " " .. 29.50	33 x 6.00 " " .. 24.10

Made in The Great Economical Firestone Factories and Carry the Standard Tire Guarantee

## Morscheck Brothers

Genesee, Idaho

AMERICANS SHOULD PRODUCE THEIR OWN RUBBER. —Harvey Morscheck

### Additional Personals

Mr. and Mrs. Herman Krier spent Sunday with Mr. and Mrs. John Krier of this place. They have just returned from a two weeks vacation trip, having gone overland via the Columbia Highway to various scenic points. Mrs. Paul Cann of Moscow visited relatives and friends in town Wednesday.

Mrs. Tony Halverson and sons, Jerry and Clifford, of Clarkston spent Wednesday and Thursday at the W. W. Burr home.

### Ladies Aid Meets

The Congregational Ladies Aid were delightfully entertained on Wednesday afternoon by Mrs. I. Martinson, and the Misses Ruth and Esther Martinson.

Thirty-two members and friends were present. After the business session the afternoon was spent in visiting. At 5 o'clock a delicious luncheon was served by the hostesses. The next meeting will be at the home of Mrs. F. K. Bressler, August 11.

### Fine Wheat Here

In 33 seasons, Ole Flanico a local thresherman says he has never seen the grain yield more consistently than this year and after threshing 6 days this year he reports yields of 35 to 45 bushels to the acre. He also states that he has wheat ahead of him that is sure it will go 50 bushels per acre. This along with other crops demonstrates the ability of the Genesee country farmer and the fertility of this good old Palouse soil.

argument, we think the Genesee country farmer should be sitting on the world this fall.

### Birthday Surprises

Mrs. F. K. Bressler was pleasantly surprised on Thursday evening by a number of her neighbors and friends, the occasion being a birthday anniversary of Mrs. Bressler. The self-invited guests brought well filled baskets and after dinner was served the evening was spent in visiting.

### Announcement

J. C. Peden of Clarkston Wn., will open the Vollmer Clearwater warehouse here on July 27. The house will be open for custom, storing and shipping. Mr. Peden stands ready to give all those who patronize him a square deal.

### Announcement

Mr. L. G. Peterson, Candidate for Probate Judge of Latah County, states that if elected he will perform the duties of both Probate Judge and Clerk of the District Court as now constituted.

### The Syringa Club

The Club had their last meeting at Mrs. Paul Hepper's and a good social time was had by all who were present: at the usual time a delicious luncheon was served by the hostess, Miss Inger Ure was the only invited guest. The coming meeting will be held August the fifth at Mrs. Henry Flomer's residence.

### Bridge Party

Mrs. Harold Haymond entertained a number of friends at her home last Saturday evening. Bridge was played and dainty refreshments were served by the hostess. The invited guests were: Misses Mary and Elizabeth Haymond, Mrs. F. C. Shork, Mrs. Glen Sampson, Misses Gertrude and Margaret Sampson, Mrs. W. M. Herman, Mrs. T. H. Herman, Mrs. Leavitt and Miss Mary Wardrobe.

### Radio An Exception To The Rule

Radio is in its infancy; but it is the lustiest youngster of record it has become a national institution for amusement, for education and for material application. Broadcasting from police stations and the sheriffs offices leads to apprehension of crooks who would otherwise make a clean get away. Broadcasting weather conditions is of reasonable value to farmers. Radio has reduced enormously the hazard of ocean navigation, and has saved countless lives. "Most remarkable of all," says the Los Angeles Times, no serious abuse of the radio has yet developed. Science is unmarred. Its inventions are generally applicable alike to good and evil. Weapons protect life by destroying life. Most health giving remedies can also be used as poisons. Chemistry is alike a blessing and a bane. To the present time, radio is a happy exception to the rule."

### FINIS

He tried to cross the N. P. track before the rushing train. They put the pieces in a sack. But couldn't find the sack.

### G. F. WALKER

Present Incumbent  
Candidate on the Republican ticket for the office of COUNTY COMMISSIONER  
Third District  
LATAH COUNTY  
Primary Election, August 3, 1926

### FINAL July Clean-Up

## R. C. Beach Company

Lewiston, Idaho

### Monotony of Waiting

Too Much for Billy  
It is hard for grownups to see things from a child's point of view, and to realize that our ideas of politeness must sometimes seem strange to him! The Woman had this fact brought to her notice the other day. She was visiting a friend who has a small son. Billy had been sitting next his mother when the Woman entered the room, but at his mother's "run and play, dear," he retired to a corner with books and blocks. Presently, however, he returned and slipped into his little chair between the two ladies. The grownups continued to talk, and Billy, holding a book in his fat little hands, looked eagerly from one to the other in the hope that a pause in the conversation would give him a chance. Falling this, he presently laid a hand on the Woman's arm, "Excuse me," he said softly. "Certainly, dear," replied the Woman, "what is it?" "Nothing," I just wanted to speak to my mother a minute," answered Billy, and turning to her he spoke quickly, before the stream of adult conversation should start again. "I found that story about the kitten! You keep it and we can read it when this lady has to go."—New York World.

### Patriotic Act of Foreign-Born Citizens

Through the efforts of a naturalized Swede, a naturalized German and a naturalized Frenchman, the United States government once was saved from bankruptcy, writes Sydney Greenleaf in Asia Magazine. It was during the War of 1812, a war so unpopular in many quarters that the government's attempt to negotiate a loan of \$10,000,000 for its conduct brought in subscriptions of less than \$3,000,000. New England refused to extend any aid, and some persons thought that the colonies were going back to the Mother Country. The treasury was almost at the end of its rope, lacking both funds and credit, when John Jacob Astor, a native German, and Stephen Girard, a Frenchman, the two richest men in America, came to the rescue and, through Secretary Albert Gallatin of Madison's cabinet, a Swede, took the remaining \$10,000,000. Astor subscribed for \$2,000,000, and Girard, through his bank, became responsible for \$8,000,000.

### Sign Told The Truth

The blind mendicant, led by a dog on a string, has not been so much in evidence during the last few years, but the other day the blind man took up a position on Girard avenue near Broad street. He was fully equipped up to the old-time standard. His clothes were ragged, his tin cup was battered and the dog put on as dull and sleepy an appearance as his master. Fastened about the dog's neck was a placard bearing the appeal: "Please help the blind."

A man in passing attempted to toss a quarter into the cup, but it struck the edge and rolled out over the pavement. The "blind" man promptly made a dive for it and as his hand closed over the coin the surprised passer-by exclaimed: "What do you mean? You're an old faker and not blind a bit."

"Never said I was, mister," was the prompt reply. "His" cheer that he proclaimed: "I'm a blind man, but I can see."

"Not Appreciated"  
"My dear fellow," said John Clayton. "I wrote to a man who had sent me an envelope of money, and he said, 'My dear sir, I have read your play. Oh! my very dear sir! Yours truly, John Clayton.' I told this story on many occasions with great success. At last I told it to one who did not laugh. He was my secretary. It seemed to me hard, indeed, that my own secretary should not laugh at one's funny stories. It appeared to me that he had mistaken his vocation, and I said in a tone of slight irritation, 'You don't seem to think that funny.' Said he, 'No, I don't. It was to me Mr. Clayton wrote that letter.'"—From "A Player Under Three Reglms," by Sir Johnston Forbes-Robertson.

### Specific

The sweet young thing and her future life partner were making arrangements with the minister for the marriage ceremony. "What is your name?" the clergyman asked. "Mary Jones, sir." (Perhaps it was Smith.) "And what is your age?" he continued. "Nineteen, sir," answered Mary. "Where were you born?" "In Genesee, sir." "What did you say, sir?" inquired the bride hesitantly. "I say where were you born?" Taking two steps nearer the minister, she lowered her voice—"At home, sir."

### His Share of Cupboards

He'd bought a house and it had been such a bargain to his idea that he could hardly wait till his fiancée saw it. "How many clothes' cupboards are there, John?" she demanded breathlessly. "Six," said John proudly. "Oh, but that's hardly enough." "What! Do you want more than six cupboards merely to hang your clothes in?" "Yes, dear," replied the fair one. "You see, you'll want part of one for your things, won't you?"

## DEEN PAUL NOW VISITING IN GENESEE

In connection with the extra picture shows, Deen Paul, is presenting at the Genesee Hotel Theatre. He will be at the Theatre five nights with his exhibition. His first performance was held Wednesday night and was well patronized and enjoyed by every one present. At that time many different interesting questions were asked by the audience and gladly answered by the demonstrator. Deen Paul has spent twenty years in India and China, and has given his demonstrations in every corner of the globe. In every town or city he has visited he has been highly recommended. As he performs Magic Tricks of all kinds exhibiting plenty of fun, mystery and excellent amusement. He will also give Private Readings at the Hotel and will answer any fair question a person wishes to know. This entertainment is worth the price, but is held in addition to an extra picture show, so you get double your money's worth. See it, before you say "it can't be done."

### A LITTLE TALK ON THIRIFT

"Opportunities are more plentiful than conquerors and powerful," wrote an old philosopher, and he might have added that most opportunities come as a result of thrift. I have a fine opportunity offered to me for bettering my condition in life but cannot take advantage of it because I have no money saved up." How often have we heard this sentiment expressed by those who all too late have seen some golden opportunity near their lives because they were not able to take advantage of it. A few hundred dollars laid away in the bank or safely invested often has meant the turning point in the life of many a man and woman.

One of the greatest values in our saving money lies in the fact that our savings often constitute opportunities for enlarged activities and more successful employment. In the case of the farmer, the saving of money is the key to success in life. The greatest secret of success in life is to be ready when your opportunity comes. To those who are drifting along from day to day without getting ahead and apparently are making no effort. Money should be saved merely with the object of being ready for some great opportunity in life, but we should not forget that there will never be an opportunity for any material progress in life. It is also to be borne in mind that opportunities for great self-advancement often come to those who, because of their thrifty habits, have gained the good will and confidence of some person who is in a position greatly to advance their interests. Thrift and opportunity are always friendly terms.

### Many Visitors at Yellowstone

A gain of 13,084 in Yellowstone Park Visitors, for the first half of the summer, over the 1925 record was reported today by A. B. Smith, passenger traffic manager of the Northern Pacific Railway. Yellowstone Park Lines reported 15,710, a total of 64,919 people registered in the Park, as compared with 51,835 a year ago. The total of rail travel to the Park this year greatly exceeds the previous mid-season record made, in 1923, and the largest single day's crowd for the history of the Park was recorded on July 4th 1926, when 3,102 tourists were checked in, according to National Park service figures. The previous record was 2,859 on Aug. 17th, 1923. Yellowstone's great popularity is due to the variety of its thrills and attractions, Mr. Smith believes. Excepting the Big Trees of Sequoia and General Grant's Parks, Yellowstone has the phenomena and charms of all National parks within its borders, and with the geysers to boot he said, "the most wonderful trip in America is the In Gardiner—Out Cody Yellowstone tour."

To handle the heavy Yellowstone Park travel from the East, the Northern Pacific and Burlington railroads have been operating the "North Coast Limited" out of Chicago every day this summer in two sections and, on several days in three and four sections.

The King of Belgium has been made dictator of his own country which is cheaper than having to get somebody else to do it.

## THERE IS NO FOOL'S PARADISE

It is a noticeable fact, that once of living and prosperity often bring discontentment, while adversity strengthens the character and offers an incentive to accomplish seemingly impossible results. This phenomenon is witnessed in both family and national life. The wealthy individual with all the material things that should help bring contentment, is often not satisfied, when his poorer neighbor who has little of this world's goods and has to work hard for a living, finds peace and happiness. And so it is with nations and states. The United States which is probably the most prosperous country on the globe and which has had the most free and democratic form of government for 150 years, is constantly attacked by plitical theorists who exchange our governmental structure for a dangerous mess of potage. When we were struggling for freedom, and necessity forced us to devise and adopt a constitution which would protect the individual from oppressive officialism, in our day of prosperity and power we listen to schemes that would undermine our constitution and detract from the liberty of the individual. We have seen North Dakota swing toward a socialistic form of government where the state competes with its own citizens in business, thus destroying personal opportunities and initiative. We have seen Iowa encouraging paternalistic experiments which run contrary to the law of sound economics, and promise to create a fool's paradise by legislative edict. We have seen the states of California, Oregon, Washington, New York, Wisconsin and others as well as our national government itself, flirting with proposals which would put the government into business competition with private citizens and taxpayers. So far, the common sense of the people has generally repudiated any program which seemed to undermine constitutional rights and liberties. But the agitation continues, and we catch and prosper. We have a tendency to breed envy, jealousy and hatred. Life insurance records show that the majority of people who receive the proceeds from an insurance policy—have lost their cash benefits which have resulted from certain economic conditions. In other words, the country is prosperous. It is prosperous because we have a sound government, because our money is worth its face value, because property rights have been protected, because our workmen have good wages and because our nation has great cumulative power to offset its ability to produce. As a nation, we should recognize these facts and realize that any program, political policy or agitation which tends to interfere or discourage sound government and safe business conditions will destroy our prosperity and our savings just as surely as unsound investments or profligate living will use up the insurance bequest.

### No Make-up for Beery

Wallace Beery never has made a director delay the filming of a scene while he adjusted his make-up. The answer is that he does not wear any. In Beery's most recent screen appearance, that of a sailor in "The Devil's Cargo," Victor Fleming's newest production for Paramount, he is shown with a two week's growth of beard. His wardrobe consists of heavy shoes—"clodhoppers," a pair of rough pants and an equally rough and ragged shirt. In addition to Beery, the featured player in "The Devil's Cargo," which will be shown next Friday and Saturday at the Opera House Theatre, include Pauline Starke, William Collier, Jr. and Claire Adams. Raymond Hattorn is also in the cast.

### Wool Eaters

Wool eating by sheep is often a bad habit, which, when started by one or more animals, is imitated by others. In some cases lack of essential mineral elements in the feed may also cause the habit. The practice is observed principally when sheep are confined in close quarters. Lambs begin by gnawing the wool of their mothers, usually on the thighs and abdomen. Older sheep may select one animal and eat all of its wool before turning to another. Wool eating may become general in the flock. A few lambs may become anemic, even die as the result of the formation of wool balls in a compartment of the stomach and the subsequent plugging of the intestine. Wool eaters and their victims should be removed from the flock. It is important that the animals be turned out for exercise, and the nutritious feed be provided. The young lamb used to get a real thrill out of his first pair of long pants, now the old man gets the same kind of a thrill when he puts on his first pair of knickers.

GODFATHER TO SATAN'S KITCHEN BY HAPSBURG LIEBE

(Continued from Last Week) The Bear Creek Buckmaster thought again that Satan's kitchen was a good one. It could use that money; it needed that money. Besides, when it came down to a hard pinch, he could never refuse any dying man a favor. The angel in him had struggled to the ascendance, having once more vanquished the devil.

"'Do it,' he said, and he reached for the other's clammy hand. 'It's all right. I forgive you, pardner. It's all right.' 'Much obliged to ye. Look under this here heath—' he yanked a heap of little, do yo reckon?'"

"'Pray, Me!' Buckmaster slowly shook his head. 'I ain't never prayed none. Leastwise, not since I was a bity kid. Mebbe it wouldn't do no good, now, 'me a-prayin' for ye. Mebbe ye'd better pray for ye self, pardner. I s'pose I'd go a lot higher.' 'Mebbe it would. Tell me what to say, Buckmaster. You know the 'circumstances.'"

The white sheep had softened all through. He had forgotten entirely his wrongs at the hands of that unknown man; he was deeply sorry for him now. As for prayers, these were but words that he knew and that was the one that 'Liz'beth Eldridge had saying, with additions, at bedtime. "'All right,' he agreed, and it was with difficulty that he kept his voice steady. 'Say after me, pardner—'"

"'Now I lay me down to sleep,'" "Now I lay me down to sleep," "Pray the Lord—'" They went through it very solemnly. The little fellow interrupted himself almost on the last syllable of his "Amen."

"'Buckmaster!' he cried, his sick eyes shining. 'You s'pose, 'pardner. 'Why didn't we think of it afore? Take me to witness an I'll clear ye.' The Bear Creeker's strong face showed interest immediately. Why, indeed, hadn't they thought of it before? He didn't know why, but they hadn't. But that wouldn't clear him, but everything, still, it would help. It would show people that their conclusions had been wrong in the beginning. He shook his head.

"'It's awful cold, pardner. You couldn't never stand it. The closest to anything, still, it would help. It would show people that their conclusions had been wrong in the beginning. He shook his head.

"'But I can stand it!' Buckmaster, please help me to do—this one good thing afore I go. The bity blankets—two blankets—over there in a cawner. Wrap 'em around me. I'm not heavy; ye could tote me easy. Et I die with out clean' ye. Buckmaster—I won't die right. I've lived a low-down life, but I want to die right!"

Buckmaster lifted a stone from the hearth, took out a canvas bag nearly full of money and thrust it inside his blue shirt. A few minutes later he strode into the cold and dark and wind-swept mountain wilderness with a gray bundle in his arms.

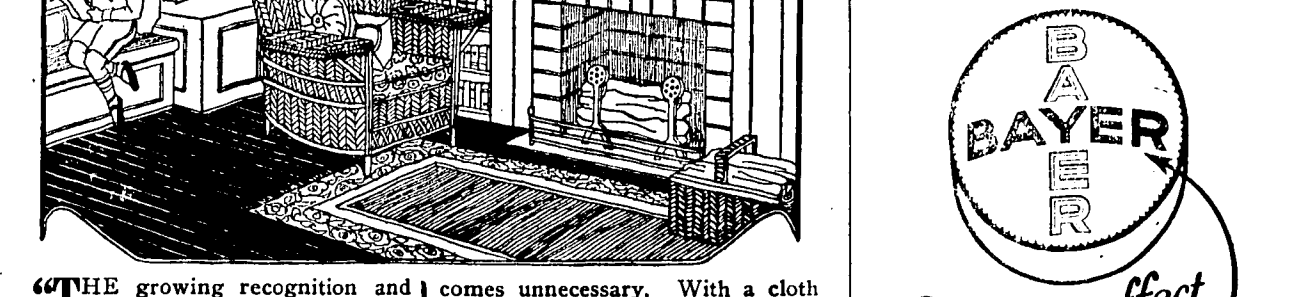

He doesn't remember a great deal of the journey now, though the years have been few since that night. It was a sort of nightmare to him. Twice he fell—he has hardly forgotten the first—and each time he saved his limp form in the gray bundle from further injury. And he hoped that life and consciousness would stay with the little man until they reached Professor Harlin's home at the mission.

About the middle of that bright and sparkling Sunday morning Buckmaster half dragged himself and his burden to the top of a low spur that almost overhung the settlement and there, panting for breath, he was weak now; his wonderful strength was nearly spent; the average man never could have done what he had already done in the six hours just gone and his tired eyes wandered over the icicle-eaved houses of the mission, finally coming to rest on the chapel, the front

of which was surmounted by a weather-worn wooden cross. Under that cross by the doorstep were two men in office-blue, and with them was Rubens, the lowland cattle-buyer. Buckmaster's inborn fear of the law writhed him now harder than ever. If he went on down there he would be arrested. "Pardner!" he muttered. "Pardner!" A muffled voice answered from the gray bundle. The highwayman was still alive. "How do ye feel, pardner?" "Bout the same. I—I'm awful cold, Buckmaster." "The two officers down at the mission, pardner. I see 'em."

Healthful Surroundings Bayer Aspirin Proved Safe

Take without Fear as Told in "Bayer" Package

The growing recognition and use of Bayer Aspirin for cleanliness and cheerfulness is playing an important part in saving the nation's babies, declared Dr. Max C. Stark, Health Commissioner of St. Louis for thirty years in an address, not long ago. Dr. Stark gave some remarkable statistics, in which the effectiveness of Bayer Aspirin in fighting disease germs was scientifically demonstrated.

The New York Department of Health is finding that in the homes where Bayer Aspirin is used, there is a marked decrease in the number of children who are ill. This is especially essential that floors be frequently washed, because children are constantly getting down on the floor to play. The painted surface, being washable, is easily kept in a sanitary condition. Its smoothness offers no foothold to impure bacteria. The housewife is finding that well-washed or varnished surfaces relieve her of much drudgery. Vigorous scrubbing be-

comes unnecessary. With a cloth dipped in warm, soapy water, dust and spots wipe off easily. Well painted, easily washed surfaces are desirable not only in the living room, but in the kitchen, kitchen and bathroom, where insect pests are likely to collect. Paint or varnish applied to beds, woodwork and shelves is an effective weapon against vermin, and much safer than spraying poison around, especially where there are children or pets. Roaches will flee from fresh paint, and the odor of the paint is a disinfectant and has an odor obnoxious to them.

Frequent repainting of surfaces has long been considered essential in hospitals. And it is now widely recognized that in the homes where this sanitary practice prevails, much of the illness that leads to the hospitals is prevented. There is no better way to safeguard the health of children than by thus keeping dirt and disease germs at bay.

Unless you see the "Bayer Cross" on package or on tablets you are not getting the genuine Bayer Aspirin and you are getting millions and prescribed by physicians over twenty-five years for Neuritis Lumbago Toothache Rheumatism Colds Headache Neuralgia Pain, Pain

Each unbroken "Bayer" package contains proven directions. Handy boxes of twelve tablets cost few cents. Druggists also sell bottles of 24 and 100.

France Imports and Exports Grow... The latest official figures concerning France's trade with foreign countries as well as with her colonies and protectorate countries during the first four months of 1929 show an increase of 6,941,622,000 francs for imports and of 2,523,087,000 francs for exports.

Russian Exports and Imports Show Gains... Washington, D. C.—Details of exports and imports of the Soviet Union for the first six months of the Soviet fiscal year, October 1 to April 1, show substantial gains in all the principal items of export and import.

County Agent Handles Supply of Pest Poisons... CATHLAMET—County Agent Islet of Wahkiakum County is handling a small supply of pest poisons for local farmers, as there is no pharmacy in the county where they are available.

Telephoning By Wireless From Moving Trains

Mr. Brown enters and presently he is talking with his friend in Berlin. Making a Call... Communication may be established from the train almost anywhere. Mr. Brown desire to reach his friend in Berlin he approaches the operator with the Berlin-Berlin exchange number. Telegrams, likewise, may be transmitted by telephone to the passenger and from the moving train to any city in the republic.

Toll Charges... The charges for the train telephone service are slightly higher than for ordinary long-distance calls. On another train filled with newspaper men, calls of three minutes each were made from the train within two hours without difficulty.

Broadcasting Part of System... While broadcasting does play an important function in the train telephone system, the method employed is really quite different from that of the ordinary wireless telephony. There are three sending stations for the Berlin-Hamburg line, one at each end of the line, and another midway between the cities.

How Call Is Received... Passengers on the Berlin-Hamburg express may now expect to hear from home or friends while travelling on the 175 mile stretch between the two cities not alone by telegraph but by word of mouth. The passenger receives the reception of a phone call in a big hotel.

State College Praised By U. S. Agriculturist... The State College of Washington agricultural extension service is one of the best in the United States, according to W. A. Lloyd, agriculturist representing the U. S. Department of Agriculture, in charge of these particular states.

NELSON LINE BUYS SEVEN NEW SHIPS... The Shipping Board by the Nelson Steamship Company was announced this month by Thomas R. Nelson, district manager at Seattle, following receipt of the news from James Tyson, a resident of the company.

Anglers Must Pay Toll to Indians... VANCOUVER, B. C.—Squamish Indians on reserves in North Vancouver have been given authority by the Dominion Government at Ottawa to charge for permits to anglers who wish to fish in the portions of two of the city's principal fishing streams.

LIME KEEPS ROADS FIRM... Experiments of engineers have developed, it is claimed, that mixture of 2 to 6 per cent of lime over two and one-half inches of road surface has ended excessive rutting and clinging of the clay to feet of animals and tires of automobiles, after rainfalls. The chief feature does not, however, consist in lime being spread on the road surface. Instead it tends to smooth out and pack down more quickly than does untreated surfacing.

MOODY'S LEAF CREAM... Will remove all impurities and leave the skin in a fresh healthy condition. Indicated by leading beauticians. Available in all drug stores or by mail for \$1.00 per tin.

Perry Hotel... 1518 4th Ave., Seattle, Wash. Phone and Plaza. Light, clean, every modern convenience and first-class in every way. Rates by Week—\$10.00, \$12.00, \$14.00, \$16.00, \$18.00, \$20.00. Rates by Day—\$1.00, \$1.25, \$1.50, \$1.75, \$2.00. Bathing room, 102 5th Ave., between Seneca and Spring Streets.

WALLBOARD MANUFACTURERS... PERFECTION PLASTER WALLBOARD... 2904 Pike Street, Seattle, Wash. Phone 4211. Clean, quiet, furnished bedrooms for men; steam heat; hot and cold water; bath; linoleum; weekly \$2.00. Centrally located.

Poultrymen Consider Marketing Station Buys Cyanite Dusting Pump for Franklin Co.

PASCO—County Agent Harold Sheldons has purchased a cyanite dusting pump outfit for use of Franklin County farmers. A recent demonstration was given in rat killing. Twenty rats were killed on premises that have been trapped for three months.

Cow Testing Records Increases Cow Values... CHEHALIS—That cow testing association records have a value in selling cows is shown by the experience of Mr. Conger. He has been testing in the Lewis County association for three years. He says that his records sold his heifers, even when not bred, for increased prices sufficient to pay for all his cost of testing.

INTERCOASTAL TRADE OF COAST INCREASES... Figures released by the Bureau of Research of the U. S. Shipping Board on July 19 show that the products of the state of Washington shipped through the Panama Canal during the first quarter of 1929 made a gain of approximately forty per cent over the corresponding quarter of 1928.

California oil shipments show a substantial increase but other products show a decrease. Oregon shows an increase of 34,000 tons, reaching a total of 133,000 tons. While east-bound intercoastal traffic figures increased 320,000 tons, the westbound traffic dropped off 100,000 tons.

It has been found that a lime casing mixture, 1 part casing to 5 parts lime, mixed to a thin cream consistency and introduced into an insecticide solution used for spraying trees holds the poisons on the trees longer and hence increases its effectiveness.

you can not get Fisher's results without Fisher's FEEDS... August is a critical month in your pullets' development, and you can't afford to experiment in the allimportant matter of right feeding. Right now your pullets need FISHER'S DEVELOPING MASH. Feed Fisher's Growing Feed until your pullets are sufficiently developed to pick up Fisher's Scratch. Change from Fisher's Growing Feed to Fisher's Scratch gradually—continuing feeding Fisher's Developing Mash until pullets are six months of age (whether they lay or not), then take 10 days to change to Fisher's Egg Product.

MINERALS NOW ADDED TO FISHER'S POULTRY FEEDS... This valuable addition to Fisher's Developing Mash and Fisher's Egg Product. Producer supplies the needed mineral elements not sufficiently supplied by grains.

Play Safe! FEED Fisher's from start to finish... IF YOUR DEALER CAN'T SUPPLY YOU With Fisher's Feed, write direct to Fisher Flouring Mills Co., Seattle or Portland.

SEATTLE BUSINESS DIRECTORY... Consult this Directory for your requirements, and use it as your Shopping Guide when in Seattle. Our advertisers will be glad to answer mail inquiries. Kindly mention your Home Page when answering these advertisements.

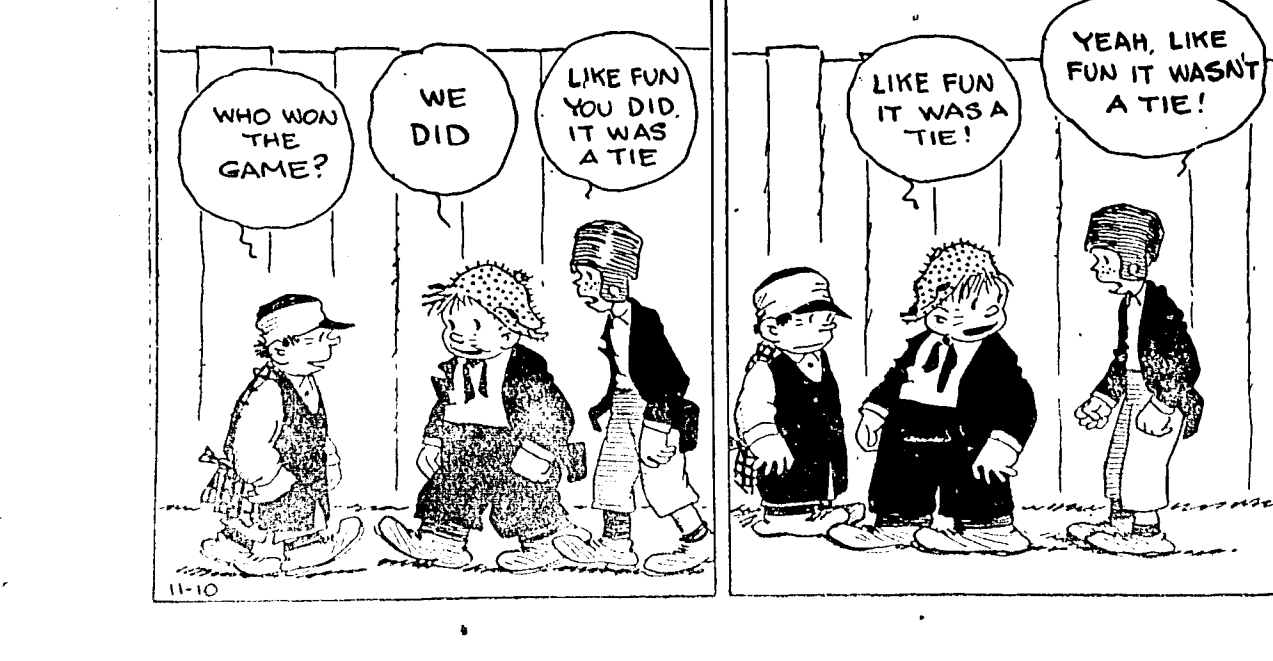

EMPLOYMENT AGENCY... Crowford Bros. All kinds of help furnished. 202 Occidental, Seattle, Wash.

HARDWOOD LUMBER... D. A. JOHNSON, 304 1st Ave. West, Seattle, Wash. Phone 4211. Dealer in all kinds of Hardwood Lumber and Flooring.

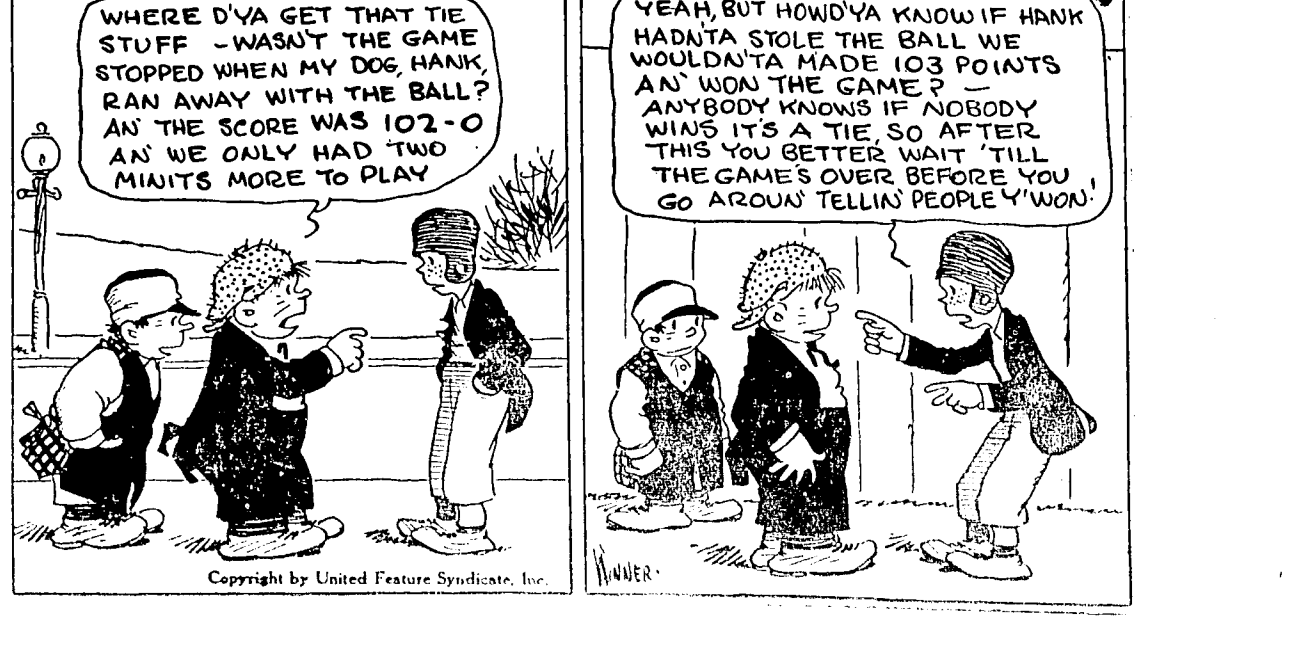

IRMPERIAL HOTEL... 1408 4th Ave. Phone 4211. Clean, comfortable rooms. Rates \$1 and up. Special weekly rates.

**The Weather**  
 North Idaho: The weather was  
 fair and favorable for harvesting  
 and threshing, but unfavorable  
 for corn beans, and garden crops.  
 Blight has seriously damaged to-  
 matoes and has damaged beans  
 and beets to some extent. The  
 harvest of early potatoes, apricots,  
 and early peaches is about  
 completed in the Lewiston coun-  
 try and the yield has been excel-  
 lent. Apples are filling out well  
 and McIntosh Reds are being har-  
 vested. Pastures and ranges are  
 dry and poor over much of the  
 district. Stock are doing well.  
 Southwest Idaho: The weather  
 was hot and dry, but generally  
 favorable for haying and harvest.  
 Irrigation water is short in some  
 sections and the third crop of al-  
 falfa will be light.  
 In districts where water is ample  
 crops are making excellent grow-  
 th. The second crop of alfalfa is  
 in stack in many parts of the dis-  
 trict. Grain is mostly harvested  
 and threshing has begun. Corn is  
 exceptionally fine due to contin-  
 ued warm weather. Fruit trees are  
 in good condition and peaches  
 and prunes of excellent quality  
 are being sent to market. Potatoes

are being dug in the earlier  
 parts of the district. In the Good-  
 ing section lamberts are being  
 shipped out on account of scar-  
 city of range feed. Stock gener-  
 ally are in good condition.  
 Southeastern Idaho: The first  
 week was cool but warm weather  
 prevailed during the last half  
 with light showers in some sec-  
 tions on Sunday and Monday.  
 Harvest of winter wheat is gen-  
 eral and spring wheat and corn  
 are being out in the south. In the  
 north, oats and barley are filling.  
 Seed peas are ripening fast and  
 are ready to harvest in the Idaho  
 Falls Section. Potatoes and fruit  
 are doing well. The ranges are  
 reported fair to good.

**Control Pests by Fall Plowing**  
 Fall plowing is a practicable  
 and successful means of control-  
 ling insect pests of cereal crops,  
 says the United States Depart-  
 ment of Agriculture, and should  
 be adopted where local condi-  
 tions permit. Where cutworms,  
 wireworms, and white grubs are  
 prevalent corn should not be  
 planted on fresh broken sod land.  
 Crops belonging to the bean fam-  
 ily, such as cowpeas, soybeans,  
 clover, alfalfa, etc., may safely  
 follow sod, and grown before  
 grain, especially corn; much in-  
 jury by these pests may be avoid-  
 ed.

**Stopping Milk Flow**  
 Most cows can be dried up by  
 materially reducing the grain fed  
 and lessening the frequency of  
 milking. First miss one milking  
 the two, then three, and so on un-  
 til the daily production is reduced  
 to a few pounds. During this  
 process the udder should be  
 watched carefully to see that no  
 soreness develops. With persist-  
 ent milkers it may be necessary to  
 reduce the feed to nonleguminous  
 hays only.

**License Taxes**  
 The business of tax exacting is  
 capable of an expansion beyond  
 the wildest dreams of even the  
 most earnest and successful prac-  
 titioners. Indeed there is no busi-  
 ness or calling that need be con-  
 sidered as exempt. If cement  
 block manufacturers may be li-  
 censed, there is no reason why  
 any form of manufacturing should  
 be exempt from the watchful eye  
 of the council. No logical place  
 for drawing the line can be found.  
 Why, for instance, should bar-  
 bers pay a fee, and not beauty  
 shops and shoppes? This is but  
 one illustration of the difficulty  
 of discrimination. Realtors,  
 churches, private schools, doctors  
 lawyers—all might conceivably  
 be licensed. The system could be  
 pushed so far as to make un-  
 necessary the levying of any other  
 taxes.

Clearly there are great and un-  
 exhausted, even untouched re-  
 sources. Yet there is something  
 to be said against these license  
 taxes indeed against any new  
 taxes of any sort. The people are  
 hoping for lower taxes and also  
 for less and less regulation and  
 control by governmental author-  
 ity. Thus far they have looked  
 vain in connection with local  
 administration. Of course no tax  
 should be imposed unless revenue  
 is needed, and then there should  
 be none—with a few possible ex-  
 ceptions—that is not of general  
 application.  
 However, these considerations  
 will have no weight. Their motto  
 seems to be hit anything in sight

and one thing will do as well as  
 another. We doubt whether the  
 policy will be widely popular or  
 be much extended in its applica-  
 tion. Certainly ordinances de-  
 signed to carry it into effect have  
 thus far not fared very well.

**PERSONALS**  
 Miss Eleana Jane Nelson who has been visiting the past month with Mr. and Mrs. Mahlon Follett left Sunday for her home in Chicago, Ill. Miss Nelson expects to visit in N. Dakota and Minnesota enroute to her home.  
 Miss Hazel Ouse returned last week from Moscow after attending summer school at the U. of I. She is spending the remainder of the summer at the Fred Nagel home.  
 Mr. and Mrs. George Follett and Mr. and Mrs. Ezra Raymond drove to Lewiston Monday to view the new lumber mill and dam which are under construction.  
 Mr. and Mrs. Vern Beckman spent last Sunday at Asotin. They were accompanied home by Mrs. Beckman's mother, Mrs. Winegardner who will spend a week here visiting.  
 Misses Ruth and Esther Martindale, Mrs. Mahlon Follett, Mrs. V. A. Beckman and Mrs. W. W. Burr motored to Moscow Tuesday evening to enjoy "No, No, Not Yet."  
 Mrs. Jack Barnes and little son, Jack Jr. of Wilbur Wn., arrived last Friday for a couple of weeks visit with Mr. and Mrs. Leon Follett.  
 Miss Grace Willoughby returned to Spokane Saturday afternoon spending a week with her parents Mr. and Mrs. Frank Willoughby.  
 Miss Kathryn McMahon, Miss Thelma Hanson, Mrs. Hanson and Mrs. Schultz all of Spokane spent last Friday and Saturday with Mrs. Con Steltz.  
 Miss Maxine Eiken arrived last week after visiting her aunt, Mrs. Ollie Follett, of Seattle and attending school there for the past year.  
 Mrs. H. J. Striratt and son Myron, of Billings Mont., who has been visiting here with her sister, Mr. Frank Qualey and family returned to her home last week.  
 Miss Grace Jain returned to Moscow Sunday evening after spending the week-end with her parents, Mr. and Mrs. Walter Jain.  
 Mr. and Mrs. Ezra Raymond of Spokane returned to their home Wednesday after visiting a few days with Mr. and Mrs. Geo. Follett.  
 Miss Helen Milliken and Mr. Hanley Payne, students of the U. of I. spent Thursday and Friday at the home of Dr. and Mrs. N. M. Leavitt.  
 Miss Sylvia Johnson, who is attending summer school at Lewiston, spent the week-end with her parents, Mr. and Mrs. Einar Johnson.  
 Miss Wilma English visited Saturday in Moscow with Congressman and Mrs. Burton L. French.  
 Mr. and Mrs. Leon Peterson of Spokane drove down last week for a visit with their uncle, Frank Qualey and family.  
 Roy Harris returned to his work at Walla Walla after visiting a few days last week with his parents.  
 Mr. and Mrs. W. W. Barr and children and Mrs. Laura Phipps spent Sunday at the Dan Barr home in Moscow.  
 Mrs. C. P. Whalen and little daughter, Monca, spent Saturday and Sunday at the home of Mrs. T. A. Peasey in Moscow.  
 Miss Viola Lorang arrived Saturday from Spokane and expects to visit here two weeks with her mother, Mrs. John Lorang.  
 George Raymond visited Tuesday with Mr. and Mrs. Geo. Follett on his way from Spokane to Lewiston.  
 Miss Alma Nelson arrived Wednesday from Wilbur Wn., to spend several days visiting with friends.  
 Mrs. F. K. Bressler went to Lewiston Tuesday to spend several days with her sister, Mrs. E. T. Jacobs.  
 Mrs. Walter Emerson and sons, Don and Billie, went to the country home of Wm. Emerson Monday.  
 Miss Cecil Smith and Floyd Morris of Moscow spent Sunday with Dr. and Mrs. N. M. Leavitt.  
 Miss Maxine Plath of Spokane, is visiting at the home of Will Rader.

**NOTICE**

**BIG SIX SEDAN \$1895**

**POWER:** Only 7 American cars equal the Studebaker Big Six Sedan in power. They sell for \$2855 to \$8155 more. Compare its power with that of the costliest cars and you will know why the Big Six outsells every other car in the world of equal value or greater rated horse power.

**COMFORT:** The Big Six Sedan is equipped with full-size balloon tires for which steering gear was specially designed. Long flexible springs and snubbers smooth out rough roads. Upholstery of genuine mohair—tailored to a form-fitting design. Extra deep, wide cushions, packed with long coil springs, genuine curled hair and washed quilted cotton.

**QUALITY:** Body construction of selected northern white ash and hard maple—built to highest standards in the industry. The finest alloy steels. A bar of Studebaker steel the diameter of a dime will stand greater strain than a bar of ordinary steel the diameter of a dollar. No finer car can be built than this big Six Studebaker.

**EQUIPMENT:** Complete equipment includes dome light, rear corner reading light, silk window curtains, automatic windshield cleaner, rear view mirror, coincidental lock to ignition and steering gear operated by the same key controlling the door and spare tire locks, automatic spark control, safety lighting switch on steering wheel, gasoline gauge on dash, air cleaner gasoline and oil filters.

R. H. Copeland of Plummer, Idaho, has been dubbed "Dean of United States Newspaper Men" according to a recent story in the N. Y. World. He has just completed seventy-five years of actual work in this profession. He started sticking type as a boy in 1851 on the Waukesha Wisconsin Chronicle and has been engaged steadily since. He attended the first editorial convention in Milwaukee in 1859 and in his first venture as a publisher in the Sparta Wis. He now publishes the Times of the Idaho city and is at his desk every day although nearing the nonagenarian class.

Prosperity in Business  
In U. S. Shown by Survey

NEW YORK—Healthy business conditions in all parts of the country were found in a nationwide survey by the National Association of Manufacturers, the result of which was made public recently by John E. Edgerton, president of the manufacturing plants in thirty basic industries.

"The industry of the nation is running on an astounding curve of 84 per cent of its manufacturing capacity and unemployment is practically nil," said Mr. Edgerton's report. "This is an unusually healthy summer status; there can be no slump."

THE BRYAN UNIVERSITY

Tennesseeans are naturally interested in any movement looking to the establishment of a great Christian educational institution within the borders of the state, which will attract attention and interest of national scope.

This seems to be the outlook in connection with the building of the Bryan Memorial University at Dayton, East Tennessee.

Active campaign has so far been waged in part of only two states, Tennessee and Florida, but the treasurer reports that subscriptions in hand now amount to more than \$430,000.

With this success in such limited territory, Mr. Bryan's great personal following throughout the country, with the challenge and appeal there is in his life, character and teaching, and with such a large portion of the country yet to be won, the actual building of the Bryan Memorial University at Dayton on a large scale, seems to be an assured fact, and this is gratifying to Mr. Bryan's friends everywhere.

AN HEIRLOOM FOR SALE

When the Civil War broke out a young soldier who was among the first to answer Lincoln's call for men, handed her this pearl brooch and earrings, saying:

"These are a link between the past, the present and our future. Wear them when I return to you and when our cause is won the ranks to be a high officer, but he never returned. He was killed in action. The pearls have been carefully kept in the family nearly a century. Now they are for sale. They are in the possession of a niece of the soldier's betrothed, in the employ of the Western Electric Company.

Compensation for Injured Harbor Workers and Limited Liability for their Employers

WATERFRONT EMPLOYERS on the Pacific Coast are opposing the enactment into law in its present form of the Federal Compensation bill now before Congress, declaring that its provisions unless modified are unfair to the employer.

They point out that though this proposed law extends the compensation principle to injured harbor workers it fails in effect to establish the companion principle of limiting the liability of the employers. It is much more burdensome in this respect than similar state laws in maritime states.

Enactment of the bill will affect the overhead and earnings of every steamship operator and stevedoring company. It is estimated that the cost of stevedore liability insurance on the Pacific Coast will be doubled and a greater increase can be expected on the Atlantic Coast.

Of utmost importance to the marine interests of the Pacific Coast and the entire country as well as to longshoremen and harbor workers is the Federal Compensation act being considered by the present Congress.

This bill is declared to be one of the most important measures affecting maritime labor to be considered by Congress in years because of its far-reaching effects on steamship owners, ship operators, dock owners and stevedoring companies, as well as labor.

The title of the bill now before Congress is "The Longshoremen's and Harbor Workers' Compensation Act." It provides for Federal compensation for injured harbor workers and limits the liability of their employers to a certain extent.

The bill passed the Senate before the adjournment and the House committee reported for passage a somewhat similar bill but nonfinal action was taken. The two bills will come up before the short session that opens December 1.

The principal advocate of the bill is the International Longshoremen's Association and it is championed by the American Association for Labor Legislation who drafted the bill and provided the expert testimony. The bill estimates there are \$1,000,000 of those workers in New York alone.

Passage of the bill in its present form is being opposed by employing interests. The reason for this opposition is that, though the bill extends the compensation principle to the injured harbor workers, it fails in effect to establish the companion principle of limiting the liability of the employers.

Adequacy of compensation had come to be recognized by industry as a matter of justice; but not less essential is the common sense need of limiting the compensation to a figure against fraud and malingerers.

Word from Washington is that no disputed bills will be taken up on the floor of Congress during the last few days before the present session recesses so that the vote on this measure is improbable until the short session next winter.

To quote from the bill, "It provides compensation for employees injured, and dependents of employees killed, in certain maritime employments, and provides for administration by the United States Employees' Compensation Commission."

When the first State Workmen's Compensation Laws were enacted for the United States for more than 27 years, have maintained a yield of 70 bushels of corn, 30 bushels of wheat, and 5,000 pounds of clover an acre.

Some high lights of the measure are: Compensation paid for all accidents up to 60% per cent of a man's earnings with a maximum compensation limit of \$25.00 per week.

Compensation paid for total permanent disability for a lifetime. In case of death the widow receives 35% of a man's earnings and each child 15% up to the 60% limit.

Burial expenses to the extent of \$25 provided. Occupational diseases treated as accidents. Provision made for re-training disabled men at expense of the employers.

The administration of the bill is through deputy commissioners located at the principal ports of the country. Each maritime employer must furnish satisfactory assurance or bond to the commissioner that he has adequately covered his liability. No Federal insurance fund is provided, instead the usual form of private insurance will be available.

Prominent maritime leaders have declared that they welcome the principle of workmen's compensation extended to the marine industry but object to this bill because it provides rates far in excess of those enacted to cover workers in other industries in any maritime state in the country.

Vacation Housekeeping Hint

By Mildred Nichols  
Electrician, Department, Gray Electric Company

The closing of school marks the opening of summer cottages. Plans and preparations for migrating to the seashore or mountains encroach on the highly important graduation festivities. Naturally the young folks are hilarious—no more school—long weeks of vacation—days of sunbathing, tennis and golf.

Freedom and a general letdown for everybody—but mother. Her master how tough and ready the summer home may be, there are always three meals to cook, clean clothes to wash and fresh household linens to provide.

Camping is really more difficult than normal living for those who have the means to do it. For years, many of the modern conveniences are missing—running water, laundry tubs and up-to-date cooking equipment, especially, being prominent in the new summer camps.

Generally, many of the modern conveniences are missing—running water, laundry tubs and up-to-date cooking equipment, especially, being prominent in the new summer camps.

With electricity as a background, it is comparatively easy to bring it into the vacation home. The most important thing to do is to make sure that the wiring is up-to-date and that the summer cottage is properly equipped.

It is possible to do without many things, but it is impossible to do without light and if the summer cottage is not within easy distance of a power line, it is better to have a generator and a battery system.

The high type of labor employed on the Pacific Coast and the high average earnings are tendencies which work against deliberate attempts at the employers and prevent any compensation in each state. A comparison of those figures with the provisions of the pending law allowing a maximum of \$25.00 per week and no total liability limit, shows that the compensation paid to injured workers is less than that of the workers in other states.

HUGE TUGBOAT MERGER IN BRITISH COLUMBIA

Involving property valued at nearly three million dollars, the largest tugboat merger in this history of British Columbia and one of the largest on the Pacific Coast, was consummated at Vancouver this morning.

The average wage in the North Atlantic states while higher than that of the Pacific Coast, is less than that of the Pacific Coast. Steamship interests will no doubt be faced in the near future with a department of legislation to include the seamen who, it is expected, will find by experience that a compensation measure is more desirable to them than the present situation.

Likewise, railroad interests will no doubt face in the near future an extension of similar compensation to railway workers.

This measure is the most advanced compensation act before the country and it is looked upon by some as labor's "farthest point north." Expedited legislation is expected in the coming session of the legislature.

Passengers from the East and Midwest will make their summer holiday homes for 30-day voyages through the West. The object of this enterprise is to see if a new class of travel can be created, offering luxury travel on the coast.

On a vacation trip en route to Italy, Luigi Sivilli, Italian consul, paid his first visit to Seattle last month. He visited friends before departing for a three months' trip abroad.

The 1926 club enrollment in Spokane county has been completed and shows 64 members in 64 clubs. Twelve communities are organized on a community basis of work.

The county club leaders are organized into a council.

NATURAL WONDERS OF IDAHO

A chapter from the diary of Calvin Clawson, pioneer prospector and writer, in which is described the petrified forests in Custer county, was recently published by Bragilia W. Clark in the Idaho Falls Times-Register.

Many people of Idaho probably never heard of this natural wonder of the state and it is interesting to the description as written by this respected pioneer is reprinted in full:

"Idaho has within the borders of her vast and beautiful mountains, wondrous and strange objects of interest, romantic lakes and picturesque mountain ranges; great river falls; vast, wild prairie slopes; mines of fabulous wealth cropping through the surface; hot sulphur and iron springs; living fountains of sparkling soda water; subterranean water courses, and in brief, something of almost everything that continues to make a state useful and interesting to all the resident and the transient visitor and tourist.

"But the fossil fields of Custer county, at which my eyes are fixed, still add something worth mentioning to the already well provided 'Old Curiosity Shop' of the state. The locality known as the 'Petrified Woods' is easy of access, and lies about three miles south of the Salmon river.

"The closing of school marks the opening of summer cottages. Plans and preparations for migrating to the seashore or mountains encroach on the highly important graduation festivities. Naturally the young folks are hilarious—no more school—long weeks of vacation—days of sunbathing, tennis and golf.

Freedom and a general letdown for everybody—but mother. Her master how tough and ready the summer home may be, there are always three meals to cook, clean clothes to wash and fresh household linens to provide.

Camping is really more difficult than normal living for those who have the means to do it. For years, many of the modern conveniences are missing—running water, laundry tubs and up-to-date cooking equipment, especially, being prominent in the new summer camps.

With electricity as a background, it is comparatively easy to bring it into the vacation home. The most important thing to do is to make sure that the wiring is up-to-date and that the summer cottage is properly equipped.

It is possible to do without many things, but it is impossible to do without light and if the summer cottage is not within easy distance of a power line, it is better to have a generator and a battery system.

The high type of labor employed on the Pacific Coast and the high average earnings are tendencies which work against deliberate attempts at the employers and prevent any compensation in each state. A comparison of those figures with the provisions of the pending law allowing a maximum of \$25.00 per week and no total liability limit, shows that the compensation paid to injured workers is less than that of the workers in other states.

Whether the trees are kin in the California redwoods, or the yellow pines of Oregon and Washington, or of a kind foreign to the trees of our day is left for the eye of science to speculate upon. It does not require the aptness of an expert to prove that at present they are of the hardwood species.

It is only about 15 minutes' walk from the road to the petrifications. The country is made up of low hills and quite deep ravines, but is entirely accessible. The formation is probably secondary and the fossiliferous strata, approaching the river, sandstone is visible in places. The petrifications are seen well upon the hill sides where beavers had been gnawing at the vicinity, upon which little work has been done.

Three or four miles to the south-west of the group of trees described there is another fossil field of considerable extent, many stumps and trunks of trees being exposed upon the surface. These who have visited it are loud in the praise of its numerous wonders, but it has not been fully explored. North of Challis about 20 miles, in the direction of the Tule Lake mining district, an entire strip of petrified wood was discovered some years ago, but only a few prospectors and hunters have visited that locality.

The petrified forest in our party who had made rocks a study, principally quartz and wall rock, although they had never before seen such rock trees. Each one had a different theory to hold as to the origin of the trees and the time they had been in their present state. One believed that they were not so very aged after all, as he could see by the marks of the axe on the wood, that they had been chopped down, probably by the early Salmon Indians with their little stone tomahawks.

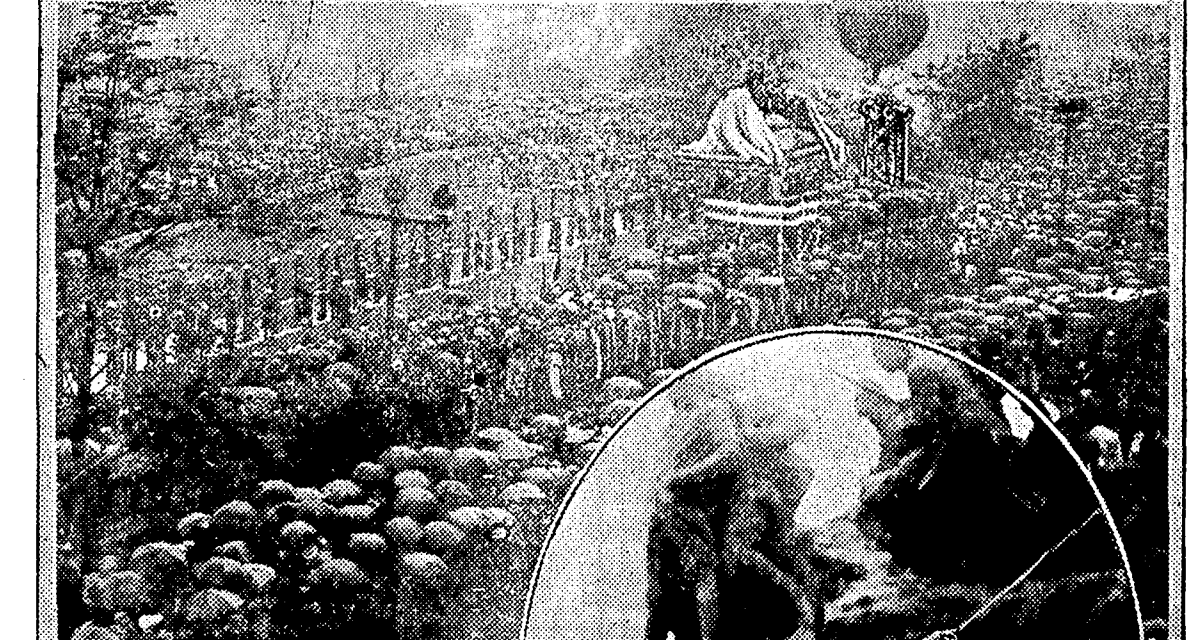

Another imagined he could see where beavers had been gnawing at them. One undertook to explain that by the geological text the date at which these giants of the forests died, the cooling shade of their luxuriant canopy, and the surrounding vegetation was just 1500 years B. C. Still another antedated all this and settled the discussion by asserting very distinctly that the trees were old as the hills and might even have been there before the world was made.

"So every one who visits this most interesting locality has his or her own pet theory, but it is not given any intelligent information as to the time when these strange specimens of fossilized things took on life or left it off, or how long they have remained in their petrified state. The earth has undergone so many changes, and passed through so many baptisms of fire and water that it is all guesswork as to the time and date of the changes. It is not a matter of fact, but it is a matter of faith, and consequently, one person knows as much about it as another.

One of the things to remember about your storage battery is that fire and flame must be kept away from it. The storage battery, if it is in proper working order, gives off hydrogen gas fumes. The volume of gas is not great and the fumes are not dangerous to human life when the battery is kept in an ordinary room with reasonable ventilation.

Establishment of the gateways, it is asserted would compel lower rates to Puget Sound than to Portland from the Inland Empire. Lower rates would also affect the movement of this wheat to the Orient as much of it is now being shipped via the Columbia River.

"Wars of America" Memorial Dedicated; Largest Bronze Monument in Country

Newark Unveils Colossal Tribute to Nation's War Heroes

On the historic ground of Military Park, Newark, N. J., where thousands of recruits in the Revolutionary and Civil wars trained to fight the cause of freedom and liberty, was unveiled on Memorial Day a colossal tribute in bronze, known as the "Wars of America" and dedicated to the heroes of the nation's wars.

The memorial bears the distinction of being the largest bronze monument in the United States. Approximately 20,000 persons, including officials of the national government, veterans of three wars, women and children stood with, bare heads and sang the Hymn of the Republic during the unveiling of the monument.

Crowding the huge area of Military Park, the sidewalks around the park and the windows of surrounding buildings, the spectators of the late Amos H. Van Horn, who provided in his will for the memorial, drew part the flags which covered the mountainous pile of bronze.

They saw 500 homing pigeons, two of each state of the Union, flying from the covering of the memorial, rise high in the sky and then fly off to their respective states, carrying messages of peace and goodwill to the World War, but in all our previous wars. This monument is a message to our children and also those who come to us from other lands, reminding them that the liberties, the security and the prosperity they enjoy, though it may be free to them, has cost a great price and is also worthy of supreme sacrifice on their part.

"My development of the subject has been a long and arduous one, and I am very much heartened with the prospects of developing a source of seed in the western states that will prove invaluable to us in Florida."

GOOD RESULTS IN OREGON  
Dallas, Ore.—Higher crop yields in western Oregon have resulted from treating acid soils, an agricultural problem in this section, according to C. C. Getchell, of the Oregon Agricultural College.

The legumes—clover, alfalfa, vetch, peas and beans—thrive in slightly alkaline soils and do poorly in acid soils. Acid soils are corrected by adding alkalis to them. The cheapest and most convenient substance for this purpose is lime.

Wings of new life insurance business are being spread by the United States Life Insurance Co. of New York, which reports that subscriptions in hand now amount to more than \$430,000.

THE MONETARY VALUE OF NON-SKID CHAINS  
Aside from the 21,300 fatalities and the 639,000 non-fatal injuries caused by motor accidents during 1925, physical property damage was valued at \$40,000,000. The total loss to the industry was \$100,000,000.

Idaho Bean Seed Scores in Florida

Idaho grown seed scored a decisive victory in tests conducted in various parts of Florida this spring, according to a letter just received at Moscow by Dr. C. W. Hungerford, plant pathologist from R. B. Ensign, pathologist-entomologist of the Florida agricultural experiment station.

The letter refers to the performance of bean seed sent to the Florida State Experiment Station at Gaines, Fla., in the spring of 1925. Mr. Ensign's request to R. B. Brossard, county agricultural agent of Twin Falls county, Mr. Ensign had not completed the summarization of results, but he says:

"On the whole, I can say now that the seed from Idaho is the best of any that we had from any source, and we had some California and Colorado seed, besides that which we secured from your state. Not only were the plants from Idaho seed greater and more thrifty but they were better producers."

"There has been very little evidence on the diseases which we were anxious to get rid of, namely, Anthracnose and bacterial blight. In one or two instances I discovered a few plants here and there where the Anthracnose was present on the leaves, and only in one instance am I certain that we had bacterial blight. This was on some Colorado seed."

"The legumes—clover, alfalfa, vetch, peas and beans—thrive in slightly alkaline soils and do poorly in acid soils. Acid soils are corrected by adding alkalis to them. The cheapest and most convenient substance for this purpose is lime.

**Genesee Valley Lutheran Church**  
Sunday, August 8  
School and Bible Class 9:45  
Worship Services: 10:40 a.m.  
Worship: 11:00 a.m. Sermon  
"The Account of Our Stewardship."  
Thursday, August 12, 8:30 p.m.  
Meeting of the congregation in  
the parish hall.  
A cordial welcome to all ser-  
vices and meetings.  
G. A. Peterson, Pastor

**Prizes to Be Given**  
The special prizes in the 1926  
Prenatal List of the Whitman-  
Latah Fair to be held at Garfield  
Sept 2-3-4 were completed last  
night. Due to the generosity of  
the merchants of the two counties  
the fair-board will be able to  
give some attractive prizes.  
Seventy-five dollars in cash is  
being offered for first and second  
prizes in both county and high  
school exhibits. It is hoped to the  
management of the fair that prizes  
of this kind will attract very  
great exhibitions. Cash prizes are  
also being offered on the best  
sheaf of Red Chaff, Marquis and  
California Glory wheat and the  
best sheaf of oats.  
Word has just been received that  
Congdon and Battles will enter  
their show herd of Aberdeen Angus  
cattle. This means that every  
breed of beef cattle will be  
represented with a complete show  
herd. Mr. Fred Bayless of the  
Mountster ranch, Hill, California,  
will be here with his show  
herd. Thos. S. Griffith will  
have a prize herd of Jerseys in

competition at the fair. The State  
of Washington is sending the  
show herd of State Holsteins  
from the coast.  
According to reports from Mr.  
Harper the hog show will be the  
largest ever held in the state of  
Washington.  
**Honorary Dinner**  
Mr. and Mrs. Ed Erickson gave  
a dinner in honor of Mr. and Mrs.  
D. C. Jacobson, of New York, on  
Sunday, August 1st. Among the  
present were: Mr. and Mrs. H.  
Halverson, Mr. and Mrs. Carl  
Erickson and daughter Lela, Mrs.  
Ananda Johnson, Mr. Ernest  
Peterson, Mr. and Mrs. Ed. Erick-  
son and family and Mrs. M.  
Woodley.

**Campfire Girls Slumber**  
The Campfire Girls and their  
guardian, Miss Ruth Martinson,  
enjoyed a slumber party Saturday  
night at the home of Pearl Per-  
kins. The Girls ate an early  
breakfast at Smolt's the following  
morning.

**The "Naked"**  
The "Naked" or hull-less  
oat makes its appearance annually  
about this time of year in various  
forms of advertising. Farmers  
have been induced to try to grow  
the "freak" of the oat family at  
various times during the past 50  
or 60 years with promise of great  
profits. The very fact that the  
hull-less oat has gained no foothold  
in American agriculture after  
these repeated attempts to exploit  
it is proof enough of its inabil-  
ity to compete with best common  
or hulled oats, and farmers should  
not be inveigled into growing it  
it says the United States Depart-  
ment of Agriculture.  
One of the latest varieties to be  
exploited is the one known as  
Liberty Hulled, which was devel-  
oped in Canada. Repeated tests  
have shown that it can not com-  
pete favorably with the best com-  
mon varieties. In addition to being  
inferior in yield it is very  
susceptible to smut.  
While there is still demand for  
oat kernels without hulls for feed  
for squabs and young chickens, it  
is better economy, says the depart-  
ment to buy ordinary oats that  
have had the hulls removed, rather  
than to try to grow the hull-  
less varieties.  
The hull-less oat is primarily a  
plant novelty, and farmers are ad-  
vised not to grow it.

**Batam Appetite**  
According to the best informa-  
tion, a batam hen will consume  
from 25 to 35 pounds of feed in  
the course of a year, about half  
as much as a hen of Mediterranean  
breeds or about one third as  
much as a hen of the larger  
breeds.  
**Picnic At Grizzly Camp**  
Mr. and Mrs. Leon Follett, Mrs.  
Jack Barnes and Jack Jr., Mr.  
and Mrs. Will Herman and Mr.  
and Mrs. F. C. Shork spent Sun-  
day at Grizzly.

**Notice**  
I will pay cash in the future for  
all goods I buy. There will be no  
settlement for goods charged to  
me by other parties.  
P. F. Mulalley.

Downey — State testing section  
of new highway, paved with  
tarvia. Other sections will be  
laid at Rigby and Barley.  
Parma — Artesian well flowing  
70 miners' inches of water, struck  
on Thornburg farm. Idaho crops  
generally are excellent this year,  
and stock in good condition.  
Idaho Falls — Plans almost com-  
pleted for new community hotel.  
Koski — Contract for 10 miles  
of Lewis and Clark Highway let  
for \$68,262. Project has \$100,  
000 forest Service appropriation.  
Idaho Bank deposits increased  
\$2,408,367, over year ago.  
Challis — Hecla mine Company  
of Wallace, buys South Butte  
property.  
Mackay — Federal Mining Com-  
pany takes over Donahue mines  
in Alto district, at head of Lost  
River.  
Mackay — Walker McGinnis  
Metals Company acquires and  
will develop Phi Kappa mine  
group in Alto district.  
Caldwell — Caldwell Hatchery has  
shipped 150,000 baby chicks this  
year.  
Gooding — Federal Land Bank  
of Spokane sells 900 acre farm  
lands in three counties.  
Meridian has shipped more than  
\$500,000 worth of live stock in  
six months.  
Twin Falls — Work to start on  
\$650,000 Snake River bridge, 550  
feet high.  
Fruitland — 27 acres of wheat on  
Harry Ronfeld farm, yields 61  
bushels an acre.  
Parma — Potato crop here this  
year, estimated at 125 carloads.  
Bellevue — 14-inch vein high  
grade silver ore reported in Lark  
mine near here.  
St. Anthony — State Industrial  
School farm earns \$11,564, in six  
months.  
Idaho will have 90,000 acres of  
potatoes this year, 25 per cent  
over last year.  
Nampa — H. H. Cummins devel-  
ops two superior new varieties of  
giant apricots.  
Red Clover and other small-seed  
crops of Idaho promise to be un-  
usually good.  
Lewiston — Fall grain here runs  
from 25 to 50 bu. per acre.  
Wallace-American Command-  
mine, held up for two years by  
litigation, has \$30,000 to \$40,000  
for development work.  
Mullan — Atlas tunnel being driv-  
en 26 feet a day by two shifts.  
Mullan Concentrates from Snow-  
strom mine run 36 1/2 per cent  
copper, with some silver and gold.  
Orofino — Extension of logging  
railroad from Headquarters, will  
give logging field for 200,000,000  
feet of logs a year.  
Camas — Scott mine, on Birch  
Creek, shows new body of high  
grade ore.  
Cascade — Wood River power  
plant here practically finished,  
and will soon open for service.  
Idaho Falls — Finance Corpora-  
tion to build 50 new homes; \$100,  
000 apartment house to be start-  
ed at once.

**Trained Personnel a Separate**  
**Asset**  
Economists are pretty gen-  
erally agreed in determining  
gross values, whether of a gro-  
cery, bank newspaper, railroad or  
hotel, that the "going" or "com-  
mercial" value is as much an ele-  
ment to be considered as the  
tangible or physical properties.  
In any line of business, the em-  
ployment, organization and de-  
velopment of trained personnel is  
basically a determinant factor, and  
a primary determinant between suc-  
cess and failure.  
In business, success or failure  
depends on the degree of per-  
centage used in selecting the per-  
sonnel, and the quality of that  
personnel, and the degree of that  
personnel's organization and de-  
velopment. That costs are in-  
curred in developing the per-  
sonnel, and that when developed,  
the gross value, would seem to be  
self-evident.  
People should remember the  
confusion and difficulty expe-  
rienced in recruiting and placing  
troops in the field during the re-  
cent great war. Though recruits  
were "hand-picked," so to speak,  
it took a large force of capable  
army officers of the best part of a  
year, even to partly qualify them  
for military duty.  
The question of the value of an  
employed, organized and devel-  
oped personnel becomes of impor-  
tance at this time, because raised  
in connection with federal valua-  
tion of the railroad. The rail-  
road managements contend that  
by instructive supervision, the  
new beginners in the course of  
several years become more profi-  
cient, that during their training,  
waste and damage result from  
their lack of training and experi-  
ence, and that the increased profi-  
ciency of the working force thus  
obtained, is an asset and an ele-  
ment of value to be added to the  
physical value.  
While for mere political advan-  
tage we may be predisposed to  
resist this method of procedure as  
applied to federal valuation of the  
railroads, such an attitude, even  
under the shelter of political  
expediency, can find neither jus-  
tification nor precedent in recog-  
nized standards of appraisal, nor  
in the accepted principles gov-  
erning modern commercial ethics.

**Jerome** — North Side Canal being  
dredged.

Creek.

**New Spoke Tightening Machine**  
The Genesee Motors have re-  
cently installed a Seeburg Auto  
wheel spoke tightener and rim  
press for the purpose of tighten-  
ing steel felloe wheels against the  
spokes. The machine actually  
tightens the spokes and uses no  
shims in the operation. It does  
not matter what kind of a steel  
felloe auto wheel that you may  
like to tighten, bring it to the  
Genesee Motors and take it away  
as good as a new wheel.

**A Bowery Tale**  
The Street of Forgotten Men is  
a dirty Bowery alley where the  
professional beggars of New York  
make their unholy headquarters.  
It is from here in the morning  
they hobble and limp to the fine  
hunting grounds on Fifth Avenue  
and upper Broadway.  
Among this crew of fakirs is  
Easy Money Charlie (Marmot),  
who conceals the fake that he is  
young, strong and handsome with  
a fake plaster arm and ragged  
clothes. Charlie is getting rich on  
the easy graft, when one day a  
female deliric sends for him. She  
is dying and begs Charlie to look  
after her four year old daughter,  
innate of an orphan asylum.  
Charlie sends for her and in-  
stalls her in a little cottage far  
from The Street of Forgotten  
Men, and there the child is  
brought up in the belief that her  
guardian is a well-to-do business  
man.  
As soon as she is old enough  
Charlie sends his ward to a fash-  
ionable school for girls. He loves  
her now but doesn't tell her so.  
He wants her to marry a young  
millionaire in the hope that her  
position in life will always be as-  
sured. He is forced to work his  
begging graft to the limit in order  
to provide for her at school but  
feels that once she is happily mar-  
ried his responsibility will be  
over.

**Trucks Collide**  
The trucks of Ed. Wahl and  
Louis Henrick ran together in a  
head on collision 1.2 mile east of  
Jim Qualey's ranch Wednesday  
morning about noon. One of the  
drivers a Mr. Kirkland, was  
thrown through the windshield of  
one of the trucks and sustained a  
bad cut on the back of the neck.  
As far as could be learned the  
other driver was not injured to  
any extent. The injured man  
was picked up and brought in to  
town by a salesman of the Over-  
land company of Lewiston, and  
was taken to the Doctor's office  
and repaired in the best shape  
possible. It is thought that no  
serious results will occur from  
the mishap.

**Work Your Money**  
Deposit your spare or idle Dol-  
lars in Certificates of Deposit.  
They pay you 4 percent and can  
be compounded semi-annually.

**Disabled Men Who Served With**  
**British To Get Pensions**  
Brig. Gen. Frank T. Hines, di-  
rector of the Veterans' Bureau,  
has just been advised that the  
British ministry of pensions have  
opened a sub-control office in  
Ottawa, Canada, through which  
the British government will as-  
sume control of the rating and  
payment of pensions and author-  
ize medical treatment to its veter-  
ans, when ordered. This infor-  
mation will be of great interest to  
many American boys who served  
under the British colors and who  
are back at their homes in the  
United States, as all British min-  
istry checks will issue from this  
sub-office to beneficiaries of that  
ministry who are resident in the  
United States, according to C. H.  
Hudson, manager of the bureau  
for Idaho, with headquarters at  
Boise.  
Once functions have previous-  
ly been discharged by the Depart-  
ment of Soldier's Civil Re estab-  
lishment of the Canadian Govern-  
ment at Ottawa, Canada, acting  
as the agent of the British Gov-  
ernment, but the growth of this  
work has necessitated a change.  
The operation previously exist-  
ing with the U. S. Veterans  
Bureau, however will continue to  
obtain.  
The British Ministry Represent-  
ative at Ottawa, Canada, states  
that while new claims to disabil-  
ity pensions are still being re-  
ceived from British ex-service men  
now resident in the United States  
the time limit for entering such  
claims will soon be reached in the  
majority of cases, and points out  
that, under British regulations,  
an claim may be considered un-  
less made within seven years of  
the date of discharge or by Aug-  
ust 31, 1928, whichever is the ear-  
lier. This applies not only to new  
claims but also to claims for ad-  
ditional disabilities arising in men  
who are, or have been in receipt  
of pensions, and who are entitled  
to Canadian ex-service men only  
to British Imperials. By that, it  
meant men who served under the  
British Forces and not under the  
Canadian flag, but in the English  
organizations.

**Card Party**  
Mrs. J. Topper was hostess to  
the card club Tuesday afternoon.  
The honors of the afternoon  
were won by Mrs. Ira Hanson and  
the consolation was given to Mrs.  
W. E. English.  
Besides the club members the  
invited guests were Mrs. Elmer  
Vanocck, Mrs. T. H. Herman, Mrs.  
Ray Edwards, Mrs. V. Sampson,  
Mrs. Harold Haymond, Mrs. Jas.  
Magee, Mrs. Frank Hoorman, Miss  
Hazel Ouse, Mrs. Gibson, Mrs.  
Harry Schooler, Mrs. O. Krotch-  
mer, Mrs. Joe E. Furber, Mrs.  
Bernadine Heschfurth, Mrs. Ma-  
hlon Follett, Mrs. Clyde Meyer,  
Mrs. Gus Fickens, and Miss Mar-  
garet Sampson.

**Undergoes Operation**  
Little Dorothy Follett, daugh-  
ter of Mr. and Mrs. Mahlon Fol-  
lett, underwent an operation for  
the removal of her tonsils Sunday  
morning at the office of Dr. W.  
H. Ehlen. The operation was per-  
formed by Dr. Burg of Union-  
town.

**Notice**  
On account of the failure of  
our supplies to arrive this week,  
we have only a four page paper

**At The Genesee Valley Church**  
Rev. W. W. Bell lately returned  
missionary from India, will show  
the public stereoscopic pic-  
tures and numerous curios in the  
Genesee Valley Lutheran Church,  
next Sunday beginning at 6:30  
p.m., August 15th.  
Rev. Bell has lived and travel-  
ed in several of the countries in  
the Far East and comes with a  
wide experience of Orient life.  
The collection of curios is large  
and expensive and the different  
articles have been gathered from  
China, Burma, India and Africa.  
The pictures are for the most part  
from Rev. Bell's own camera and  
show the religious and domestic  
life of the people of India and  
Burma. They have proved of in-  
terest in the surrounding country  
wher they have been shown. Rev.  
Bell will appear in Burmese cos-  
tume. The public is cordially in-  
vited to attend.

**Rates On N. P. Ry.**  
Special rates for three national  
conventions of American military  
organizations at one fare for the  
round trip on the identification  
plans were announced today by A.  
B. Smith, Passenger Traffic Man-  
ager of the Northern Pacific  
Railway. For the meeting of the  
Veterans of foreign Wars at El  
Paso Texas, September 19, 1923,  
a one fare round trip rate will ap-  
ply at all points on the Northern  
Pacific Railways except Manitoba  
Mr. Smith said. This special  
fare will be open to members, de-  
pendents of members, and widows  
of deceased members of this or-  
ganization.  
For the annual convention of  
the American Legion at Philadel-  
phia, October 15-19, the same por-  
tion of the American Legion Auxillary  
also are eligible; likewise the  
National Encampment, United  
Spanish War Veterans, Des  
Moines, August 15 according to  
Mr. Smith. A member of di-  
vers routes have been arranged  
for the convenience of patrons  
going to any of these national  
meetings.

**"Deaf" Telephone Sets**  
A specially designed telephone  
set for the use of the deaf has  
been perfected in the Bell Tele-  
phone Laboratories. It will open  
a wonderful new world to those  
whose deafness has made it im-  
possible to use the telephone.

**IDAHO LEGION TO**  
**MEET IN LEWISTON**  
Eight speakers will comprise  
the speaking program at the 8th  
annual convention of the Idaho  
Department of the American Leg-  
ion which meets in Lewiston,  
August 19-20-21 according to ten-  
tative plans made recently.  
More than 600 visitors, including  
150 convention delegates, are ex-  
pected in Lewiston during the 3  
day session.  
Mayor E. G. Braddock will de-  
liver the principal address of  
welcome on the morning of Aug-  
ust 19 and a response will be given  
by a member of the Legion  
not yet named but probably by  
a most distinguished commander.  
The convention will open its ses-  
sions in the Lewis-Clark hotel.  
The principal speaker will be  
John R. McQuigg, national com-  
mander, who will make his ad-  
dress Saturday forenoon, Aug-  
ust 21, probably before an open  
meeting to which the public will  
be invited. Other speakers at the  
convention will include Judge J. A.  
Howell of Odgen, Utah, national  
vice commander of the Legion,  
J. E. Dameron, National vice  
president of the American Legion  
Auxiliary, Dr. F. B. Brewer,  
head of the Veterans' Hospital at  
Boise; Homer Hudeleson, manager  
of the regional office of the Vet-  
erans' Bureau at Boise; and Nor-  
man Engle, district secretary of  
the national rehabilitation com-  
mittee.  
Invitations also have been ex-  
tended to Governor C. C. Moore,  
General Byng of Canada, Han-  
ford McInider former commander  
of the Legion, and now assistant  
secretary of the American Legion  
at Glendive, Montana, head of the  
national organization of the Forty  
and Eight, and representatives of  
the army and navy.  
Representative Legionaires of  
Moscow were in conference at the  
Lewis-Clark hotel recently with  
Robert D. Leeper, Fred Babcock  
and Mark Donaldson of the Lew-  
iston post regarding plans for  
taking the convention delegates to  
Moscow Thursday and Satur-  
day afternoons, August 19 and 21.  
On Thursday it is planned to hold  
a "state promenade" to use the  
Legion members into the 17th  
Eight organization of the Legion  
On Sunday dedicated exercises  
will be held for the new Idaho  
memorial gymnasium construc-  
tion of which a start was made  
last week.

**A LITTLE TALK ON**  
**THRIFT**  
One of the great needs of this  
country is a more intensive edu-  
cational campaign in the elimina-  
tion of fire. A report just made  
public by the National Board of  
Fire Underwriters show fire  
losses last year of more than \$25,  
\$70,000,000. While these figures  
are an increase of more than \$25,  
000,000 over the fire losses sus-  
tained in 1924, and \$35,000,000  
over the 1923 loss, they represent  
considerable progress in fire lina-  
tion when we bear in mind  
that our national building pro-  
gram has amounted to approx-  
imately \$18,000,000 in the last 3  
years.

While we have not increase of  
several hundred millions of dol-  
lars in building during the last  
year, the increase in destruction  
by fire has been comparatively  
negligible. The figures given  
show that the various thrift and  
fire prevention campaigns going  
on during the past few years have  
not been without their beneficial  
effects.  
The character of building also  
is changing. As the communi-  
ties grow there is a greater dem-  
and for building of fire-proof or  
semi-fire-proof type, and the  
great increase in steel and con-  
crete structures in the last five  
years has been a factor in elimi-  
nating fires.

Every agency of the dissemination  
of information should be  
made use of in showing the  
danger of carelessness. Most  
fires are the result of sheer over-  
sight. The historic story of the  
origin of the great Chicago fire,  
which resulted from a candle be-  
ing kicked over by a cow, is an  
illustration of how insignificant  
event can lead to terrible destruc-  
tion of life and property.  
It is doubtful if there is any  
phase of human activity wherein  
as much benefit is possible from  
an effort.

The wanton destruction by fire  
of one building for each eleven  
that are erected, as was the case  
in the United States last year,  
to say nothing of the loss of life  
and personal injuries, offers a sit-  
uation that should not continue  
under any circumstances.

**Separator Burns**  
The grain separator of the  
Schleuter Bros., burned while the  
threshing on the M. S. Wilson  
ranch was being done, and was  
completely destroyed. The cause  
of the fire was a smut explosion.  
After the fire had gained consid-  
erable headway the machine was  
removed from the field so that no  
damage would be caused to the  
grain. So far as we were able to  
learn there was no loss except the  
separator.

**Card of Thanks**  
We wish to thank our friends  
and neighbors for assisting us in  
putting out the grain fire at our  
threshing machine last week.  
Charles Herman  
J. P. Herman

Christian Church  
Bible School 9:45

Communion and Sermon 11 a.m.  
Last Sunday nine members of  
the G-S club accompanied by Dr.  
Roe and Prof. Hicks of Lewiston.  
were with us and had charge of  
the services. Misses Lois and

Margaret Moore sang a special  
song after which Misses Moore  
Melcher, Mounce and Crawford  
delivered the sermon in four  
parts taking for their subject,  
"The Glory of God."

After a picnic dinner we were  
entertained at the home of Mr.  
and Mrs. Lawson where an ex-  
cellent program of songs and  
readings were given by our visit-  
ors.

**Regulation, Not Ownership**

In speaking of rapid growth  
of casualty insurance and sure-  
tyship, Jess S. Phillips, president  
of the Greatest American Insur-  
ance Company, says it is difficult  
to comprehend the extent to  
which this insurance is interwov-  
en into the fabric of American  
trade and industry. This type of  
insurance must cover an ever  
expanding field.

Innovations must constantly be  
introduced, to meet the changing  
requirements of business. Great  
ingenuity and courage on the  
part of the company executives  
are required to meet the demands  
imposed upon them by the pro-  
tection Every development in econ-  
omic, industrial and social condi-  
tions creates contingencies con-  
tributing to the complex and ever  
changing hazards of the business  
naturally then, no hard and fast  
rules and inflexible regulations  
can be successfully applied to such  
a business.

We can find no fault with most  
of the statutory and depart-  
mental regulations. It will be  
conceded by all sane-minded  
people that reason must be equit-  
able and reasonable, but adequate  
so that the solvency of the insur-  
ance carriers may be maintained  
and the policyholder amply se-  
cured.

But I regret to say that boards  
and officials charged with the ap-  
proval of rates in some instances  
overlook these basic facts. Super-  
vising officials must constantly  
bare in mind, that they are deal-  
ing with regulations not with the  
actual conduct of the business.  
Under the guise of regulation,  
some state and supervising au-  
thorities have extended their po-  
wer of supervision over private  
enterprise to a point amounting  
virtually to a actual control with-  
out responsibility of ownership,  
thus hampering business by un-  
due an unnecessary restrictions.  
The United States Supreme  
court, in a recent decision, stated.  
The doctrine of regulation means  
regulation, not ownership. Broad  
as is its power to regulate the  
state does not enjoy the freedom  
of the owner. That declaration  
must be the cardinal principle  
for administrative and regulating  
authorities.

**SHIP TAKES CARE  
OF SECRET CABLES**

Is Really "Oculist of the Coast  
Artillery."

Boston.—A little gray steamship  
with a queer signal hanging from its  
masted and aged rigging, sometimes  
in the great ports of eastern and  
southern United States. Yet thou-  
sands of travelers who view it never  
suspect that this vessel, the only one  
of its kind in the world, is engaged  
in the defense of the American coast.

The ship is the United States steam-  
ship Joseph Henry. Its work is the  
maintenance of a secret system of  
submarine telephone cables that en-  
ables the coast artillery to train its  
big guns on targets out at sea. The  
Joseph Henry, anchored here or there  
or busily steaming about its business,  
is the only visible evidence of these  
underwater communication lines.

It might be appropriately called  
"the oculist of the coast artillery."  
The eyes that help find the range of  
distant targets are located far away  
from the harbor fort, sometimes on a  
neighboring promontory, sometimes  
on an island in the harbor. The  
cables are the nerves that carry the  
range-finding observations to the  
"brain" that fires the big batteries.

The fact that these under-water  
cables exist is no secret. Their exact  
location, however, is a military secret.  
They are laid so that they are out of  
the way of shipping lanes and anchor-  
ages. Nevertheless, every so often,  
some vessel fouls one of the cables,  
or a new cable must be laid, or a  
cable develops a leak.

If this situation occurs anywhere  
from Portland, Me., to Galveston  
Texas, the Joseph Henry appears on  
the scene. It is designated a mine  
layer, although it never laid a mine  
and probably never will.

A hundred and sixty-five feet long  
and displacing 601 tons, its only dis-  
tinguishing characteristic is a huge  
mast or windlass, mounted horizon-  
ally on its forward upper deck, a big  
sheave on a forward boom, and an-  
other pair of sheaves at the bow.

It looks like a tug but it is  
operated by the army, being attached  
to the Seventh coast artillery at  
Sandy Hook. The crew consists of  
enlisted coast artillerymen and mar-  
ine officers under Capt. T. R. Parker.  
It is supposed to carry a crew of 25,  
but the vessel is generally short-  
handed. When not working, it ties  
up in the shade of the Statue of Lib-  
erty at Bedloe's island.

**You'll Have to Pay**

When you use up all the assets in  
the bank account of life You've  
got to pay.

When you use up all your ener-  
gies in keeping up the strife,  
You've got to pay.

When you burn the candle at  
both ends and bat around at  
night;

When you gaily tread the primrose  
path and follow beauties  
bright;

When you go the limit, son, no  
matter where you fly your kite,  
You've got to pay.

For the law of compensation has  
not been beaten yet, You've got  
to pay.

And for every fleeting joy and  
hollow pleasure that you get,  
You've got to pay.

Old Destiny is accurate, though  
roisterers may scoff:

She is a great collector from the  
gay and sportive toff,  
And when your account is due,  
son, you cannot stand her off,  
You've got to pay.

**Estimate of Necessary Expendi-  
ture for Fiscal Year 1926-1927,  
and City Tax Levy**

Whereas the estimate of prob-  
able amount of monies necessary  
to be raised by the City of Gen-  
esee, Idaho for the fiscal year  
1926-1927, for which appropria-  
tion is to be made as follows:

General Fund ..... \$2700.00  
Bridge and Improvement Fund, .. 1300.00  
Street Lighting Fund ..... 1200.00

The total amount of money re-  
quired from all sources the pre-  
vious fiscal year was, \$421.32.

Be it resolved that a Levy of 10  
mills be made for General pur-  
poses, and a special levy of 5  
mills be made for Bridge and im-  
provement fund purposes, and a  
special levy of 5 mills be made  
for street lighting fund total of  
20 mills levy.

Passed by the Council and ap-  
proved and signed by the Mayor  
this 2nd day of August 1926.  
(Seal) John Meyer, Mayor,  
Attest, W. W. Burr, City Clerk.

"Where Quality Counts"

C. E. BOLLES, Prop. MOSCOW, IDAHO

**Find Sailors Prefer  
Highbrow Literature**

New York.—A third mate calling on  
"The Lady of the Lake" and "The  
Lay of the Last Minstrel" to add strength  
to his sea-going remarks is something  
new under the ocean sun.

Yet these are among the softening  
changes wrought by the American  
Merchant Marine Library association,  
which, according to its director, Carl  
W. Shattuck, has scattered 250,000  
books aboard 75,000 ships riding the  
seven seas.

"Sometimes four months at a  
stretch without touching shore, the  
sailors of the chanted are thus able to  
alternate their 'skipping on the  
deck' by 'lying down below' with  
books that range in choice from a  
Meade's First Reader or a Zane Grey  
thriller to Wells' 'Outline of History'  
or Willa Cather's 'The Professor's  
House'.

"There are grammars and books on  
'How to Write.' They are for the  
young fellow on board—there's always  
at least one who is going to sea  
to write sea stories. They read Con-  
rad, Captain Riensberg, and Captain  
McFee. The older sailor asks for  
books on farming, keeping the dream  
of a farm at the back of his head for  
the day when he will come ashore."

**Park to Trade Zoo**

**Animals for Birds**

Los Angeles, Calif.—The howl of  
the bobcat and the bark of the silver  
fox at Fairmount park, Riverside,  
Calif., will soon give way to the chirp  
of the canary and the twittering of  
the nightgale, according to the ac-  
tion of the board of park commis-  
sioners a few days ago, when they de-  
cided to trade the animals for song  
birds, provided a second party to the  
transaction can be found.

Commissioner Holland brought up  
the subject, declaring the odor of the  
bobcat and the howling of the fox is  
objectionable and that the expense of  
feeding them is more than their use-  
fulness warrants.

She further said she believed the  
songs of birds would be much more  
attractive than the less musical  
sounds of the animals.

**Hooks Trout Wearing  
a Gold Watch and Fob**

Saranac Lake, N. Y.—A. J.  
Bernard of this place believes  
he is the luckiest fisherman in  
the Adirondacks. Recently,  
while trout fishing in North  
Branch river, near Goldsmith's,  
he noted what appeared to be a  
gleam of gold amid submerged  
brush.

As his hook neared the bright  
object there was a vicious strike.  
The astounded fisherman found  
himself in possession of an  
eight-inch trout and a gold  
watch. The line had caught in  
the fob when the trout struck.

**Estimate of Necessary Expendi-  
ture for Fiscal Year 1926-1927,  
and City Tax Levy**

Whereas the estimate of prob-

**PERSONALS**

P. C. McCree and son, Wil-  
liam returned Friday after a two  
month's trip to Colorado, Miss-  
ouri, Illinois and states farther  
east. They took the trip overland  
and report a fine time.

Mr. and Mrs. O. E. Cathcart of  
Harrison passed through Genesee  
Monday enroute to Pomeroy.  
They visited at the W. M. Horman  
home until Tuesday. Mr. and  
Mrs. Cathcart, were former resi-  
dents here.

Mr. and Mrs. D. C. Jacobson  
and Mrs. Ed. Erickson were in  
Auto to the coast on the 3rd of  
August. Their trip included Se-  
attle, Portland Tacoma and other  
coast points of interest. They re-  
turned home Sunday evening.

Mr. and Mrs. J. M. Tedford and  
C. P. Persons of Lewiston were in  
Genesee Tuesday. Mr. and Mrs.  
Tedford are enroute to California  
where they intend to make their  
home in San Francisco. Mr. Ted-  
ford was formerly the cashier in  
the First Bank here.

Miss Amy Mosher, Will Mosher  
and Edwin Laine returned Sun-  
day to their home at Kookkia af-  
ter spending a week at the home  
of Mr. and Mrs. Marion Mayer.

Miss Agnes Sweeney returned  
Sunday after spending several  
weeks at Priest River. She was  
accompanied by her sister, Mrs.  
Burner and baby, who will visit  
here for two weeks.

Mrs. Winegardner, who has  
been a guest at the home of her  
daughter, Mrs. V. A. Beckman,  
returned to her home in Lewiston  
Saturday.

Miss Mayme Krier, Misses Ag-  
nes and Sylvia Johnson, Miss Al-  
frieda and Mr. Elvon Hampton  
spent Sunday at Moscow.

Mr. and Mrs. Geo. Follett and  
Mrs. Art Mayer and little  
family visited friends in Lewiston  
last Friday.

Mrs. F. K. Bressler returned  
Sunday evening after spending a  
few days with her sister, Mrs. Ed.  
Jacobs of Lewiston.

Mrs. Art Mayer and little  
daughter, Beverly, of Troy, visit-  
ed relatives in Genesee last Fri-  
day.

Mr. and Mrs. Marion Mayer  
visited a few days last week at  
the home of Mr. and Mrs. J. W.  
Mosher at Troy.

Mrs. Mattie Schooler of Berk-  
eley Calif., arrived Sunday for an

extended visit with relatives and  
friends.

Mr. Sweeney, of the U. S.  
Navy, left Friday for Tacoma, af-  
ter spending two weeks with re-  
latives and friends here.

Miss Edith Boyd of Moscow is  
the guest of her friend Mrs. V. A.  
Beckman.

Mr. and Mrs. Sherman Wahl  
and children spent Sunday and  
Monday at Lewiston.

Mrs. Steltz and children of  
Payallup are visiting at the home  
of Mr. and Mrs. Harry Scholer.  
Miss Emma Sather left Friday  
evening for a visit with friends  
in Lewiston.

Miss Grace Jain visited the  
week-end with her parents, Mr  
and Mrs. Walter Jain.

Mr. and Mrs. Marion Mayer  
spent Sunday with Mr. and Mrs.  
G. J. Hopkins at Lewiston.

Hermie Krier of Palouse spent  
Sunday with his parents, Mr. and  
Mrs. John Krier.

Wood Gush of Pottlatch spent  
the week-end with his family.

Mr. McCarty left Monday morn-  
ing to spend a week at Kellogg.

THE UNITED STATES, FOR  
THE DISTRICT OF IDAHO CEN-  
TRAL DIVISION**

**In the Matter of  
GERARD BROEMMELING**

**Bankrupt  
NOTICE OF SALE**

Pursuant to an order of Fred J.  
Babcock, Referee in Bankruptcy,  
duly made and entered on the 31  
day of July 1926, and pursuant to  
the Statutes of the United States,  
in such case made and provided  
NOTICE IS HEREBY GIVEN  
that the undersigned, Trustee of  
the above entitled estate will on  
the 24th day of August 1926, at  
the hour of 11 o'clock a.m., in the  
office of Fred J. Babcock Refere-  
e in Bankruptcy, in the Lewis-  
ton National Bank Building, in  
Lewiston, Nez Perce County,  
Idaho, receive sealed bids for  
cash, ten (10) per cent with hid  
Lawful money of the United  
States, free and clear of all incum-  
brances of record, the following  
described real property situated  
in Nez Perce County, State of  
Idaho, to wit:

"The Southwest quarter (SW  
1/4) of the Northeast quarter (NE  
1/4) of the South East quarter  
(SE 1/4) of the Northwest quarter  
(NW 1/4) of the Southeast quarter  
of SW 1/4; Lot four (4), all  
in Section thirty six (36) Town-  
ship thirty eight (38), North of  
Range six (6), (W.B.M.)."

Said sale shall be subject to  
confirmation by the above entitled  
court and shall be for a sum not  
less than three fourths of the ap-  
praised value thereof and the  
trustee herewith reserved the  
right to reject any and all bids.  
Dated this 10th day of August,  
1926.

Samuel D. White,  
Trustee.

Accounts An account is no account if it is not collectable. If we expect to compete with other towns it can't be done by credit. Cash is Cash, 30 days is not. If an account runs 30 day or over the profit on that sale is lost for times a year. Your account may be good, but I can't pay my bills with them. Just because you are asked for an account that is not because you are dishonest. The money is added to pay his bill and the whole sale houses are not in the ostification business. They will not take any jaw bone, but cash on the 15th and 30th of each month. My accounts are due the first of each month and 10 per cent will be added on to purchase price, if not paid. Some people will get sore if you ask them for an account so far as to quit trading with you, well if anyone feels that way, don't ask for an accommodation in the form of credit for two reasons it is an injustice to the man who pays cash. Who is the life of our business. We can't deposit accounts either good or bad we can not pay our bills with them. To keep up our stock, my price is the same to all, Cash, but those who do not pay the first of the month will have to pay 10 per cent more, for that is about the difference between cash and credit. R. C. BEACH C.O. Lewiston's Greatest Store

Again in Harness As stated last week in the News, P. C. McCreary and son, William, returned some ten days ago from a three-months auto trip, they going as far east as central Illinois, and they have again taken charge of the News, taking over the business last Monday. We had a wonderful time and a good rest and we are now ready to again take up the business of putting out the News and will do our best to make the paper what it should be—and again we call upon our readers to help us by giving us all the news possible.

In order to put out a good country paper, it is necessary for the country people to help us, and we are again asking our country correspondents to give us all the news possible. Of course we know everyone is busy at this season of the year, but just as soon as you can, will you please "get busy" and send in your items? If you need stationery or stamps, or both, come to the office or write us and we will be glad to supply your needs. We saw some very fine country roads and some splendid views on our trip, but there is no section of the country through which we passed in travelling some 6,000 miles that will surpass, and very few sections compare, with that around Genesee—and as a place to live, well, there are finer towns and some of them better kept, perhaps, than Genesee, but in our opinion, it is the best place in the entire country.

Warehouses Bulging That the wheat crop of the Genesee section will reach the general average, or a little above, this year, is conceded by those who are in touch with the situation. Threshing has now been in progress about three weeks and from the amount of grain already delivered to the warehouses and elevators, indications are that the farmer will not fare so badly this season. It is estimated that fully 25,000 bushels per day have been brought in. The east end elevator and storage tanks of the Genesee Union Warehouse company, with a capacity of 210,000 addition to many thousands of sacks of wheat in the warehouse. The west end elevator, with a capacity of 100,000 bushels, has been full for more than a week. There are also many thousands of sacks of wheat in the warehouse. In addition to the above, an average of 14 cars of wheat are being shipped daily.

Twenty Years Ago Work of laying brick for the new opera house was begun Wednesday of this week and construction will be rushed as rapidly as possible. Contractor Steitz states that unless plans miscarry the building will be ready for use by September 20. Thursday morning of this week J. E. Moore completed the sale of his 80-acre farm east of town to Ed. Peterson, the consideration being \$42,500 per acre. The land adjoins Mr. Peterson's farm on the east. It is likely that the price of tomatoes will remain high during the entire season. The Snake river crop is said to be very light, a large percent of the vines being ruined by blight. It is claimed that the crop throughout the coast will be very light. (The same condition prevails this season—the vines of the Lewiston country being badly injured by blight.)

Smoking Room For Church According to a recent news dispatch from Los Angeles the latest thing in churches for that city that will house a smoking room for men, a dance floor, a theater for amateur productions, a gymnasium and a club room for women. These features are included in plans for the First Unitarian church of that city. "Aimee" doesn't seem to need any attractions of that sort to keep her temple, before the public.

Entertained at Dinner Mr. and Mrs. W. M. Herman entertained the following people at dinner Wednesday noon: Mrs. Omer Richardson and daughter, Marjorie, of Canby, Mrs. Frank Byrnes of Lewiston, Mrs. Harry Sampson and Miss Myra Moody of Moscow.

Picnic at Spalding Dr. and Mrs. N. M. Leavitt, Miss Helen Mikan and Hank Payne of Moscow, Mrs. Irene Muelker, Miss Bernadine Hasafther, Don Bressler, and Harry Hanson spent Sunday afternoon and evening picnicking at Spalding and Lewiston.

First For Signals in U. S. Development of the radio compass for the first time made possible the taking of accurate bearings effectively by a considerable distance during a fog, but puffs, fired occasionally, were the first fog signals used in this country. Page two will interest you.

THE GENEESEE NEWS

VOL. XXXVIII GENEESEE, LATAH COUNTY, IDAHO, FRIDAY, AUGUST 20, 1926 NO. 8

A Worthy Heritage If I can help my boys to learn One fact my father taught to me Some day their gratitude I'll earn; I want their heritage to be. Above all else that fortune brings, An understanding of this law: That men may rise to greater things Some one must grapple with the raw! What do I mean? The answer's here: All comforts come from work alone; I want my boys with ready cheer To claim the right to win their own! They must not be content to take What I may hold of wealth or fame, But fortified with humble state Let them add honor to the name. Of such a breed were those who carved This nation from the wilderness, Who fought and froze and bled and starved To prove their title to success; Of such a breed must be the men Who brave each hazardous frontier— Lord, stimulate boys' hearts again With eagerness to pioneer!

SHERIFF SUMMERFIELD BRINGS SUIT FOR \$10,000 IS IDAHO AS DRY AS WE ARE TOLD Picking on Idaho because this state is the home of Senator Borah, now having this oratorical fling at the wet and dry problem, a New Yorker indulges in some statistical comparisons. He dares to compare New York, very wet in reputation with the state which has been advertised, now and then as a great among the dry. And he finds that, for each 10,000 of its population, Idaho is just a little sopier. For instance, considering violations on a so much per 10,000 basis, the commissioner of internal revenue requests seizures in Idaho as in New York as many distilleries in Idaho as in New York. Idaho had 27 times as many stills. There were 100 times as many stillrooms and eight times as many fermentors and more than five times as much mash was found. Besides his brother, John, of Big Stone City, South Dakota, Mrs. Louis Reuben, who resides in Alberta, Canada.

Not Responsible for Death At a hearing last week before Probate Judge Woolfin, at Lewiston, Gilbert Wayne and Verne Warfield, were vindicated of any responsibility for the death of C. G. Heimark of Kamiah, who was killed last week when his auto left the Lewiston highway and he was instantly killed, his wife, who was riding with him, being only slightly injured. The young men mentioned above were passing the Heimark car when the accident happened, but evidence that they were at fault was lacking, and the judge released them from custody. This deplorable accident has brought forth renewed agitation for the fencing of the entire Lewiston hill highway. While the expense would be heavy, it would undoubtedly save for good many lives—which would more than repay for the monetary part of the work.

Buyers Residence Property A deal was closed last week whereby Fred Hampton became the owner of the Schooler residence property, just a block west of the business district. Mr. Hampton will occupy the residence during the school year, at least.

Will Give Harvest Ball The American Legion will give their annual harvest ball, in their hall, on Thursday evening, August 26. Allen's Singing-Dance Band will furnish the music—and you know what that means. The general public is invited.

Appliances An Irishman who had just arrived in New York was taking his first walk under escort of his brother, who had been living there for several years. In the window of the shop he saw a great mound of fresh cranberries. "What are them?" he asked. "Them is cranberries," said his brother. "Are they fit to eat?" "Are they fit to eat?" repeated his brother. "Why, when them cranberries is stewed they make better appliances than prunes does!"—Journal.

Where Leprosy Started Leprosy had its origin in Central Africa and thence it spread to Asia. The bodies of the army of Darius brought it to Europe and it was taken to the Americas by an accompanying of negro slavery, according to a writer in the London Quarterly Review.

Schick Buys Dayton Papers Brown M. Schick, for five years editor of the Daily StarMirror and the Idaho Post, daily and weekly papers at Moscow, has purchased the two papers at Dayton, Wash., and will consolidate them. The papers are the Columbia Chronicle and the Columbia County Dispatch, which Mr. Schick will combine under the name of the Chronicle-Dispatch. The former is one of the oldest papers in eastern Washington.

Miscerant Kills Steers Some miscerant shot three fine steers on the Frost ranch near Ferdinand last Sunday, and then cut the animals' throats, the word coming from that section. The steers were property of F. M. Biecker of Ferdinand. Idaho county officials have been on the case a week and there are some indications that the wanton destruction of property is next to murder in the eyes of the normal person.—Idaho County Free Press (Grangeville).

Fires Under Control Another week of hot weather has gone by with the protection forces still on top with the exception of the Collins creek fire which has spread several thousand acres and thrown but many spit fires. These are in the vicinity of the Nub lookout. The local office reports the fire at 15,000 acres and being held at the mouth of Collins creek and along Skull creek. There is danger to the fine stands of timber of Indian Henry ridge. One hundred and ninety men were on the fire the first of the week and more were sent in.—Clearwater Tribune (Oronofu).

Death of Husband Louis John Rodar passed away at Banning, California, August 8, after an illness of 18 days, hemorrhage of the brain and dropsy being the immediate cause of death. Mr. Rodar was taken suddenly ill and his wife was summoned at once but he passed away before she reached his bedside. Mr. Rodar had been a resident of California since 1923. He had been employed by a candy maker for about six years. He was later employed at the Lutheran Sierra sanitorium, where he met Miss Teresa Sprenger, formerly of Genesee, she having gone there for her health. They were married about a year and a half ago. They were a devoted couple and were known to "Louis and Teresa" in Banning as "Evans and Fris."

Be Postoffice at "U" September 1 will see the university branch of the Moscow post office fully established and ready to handle mail and all sorts of postal business. Equipment has been ordered for delivery August 15. The post office is to be installed in the University Hut. Equipment will be thoroughly up-to-date. It will include 330 lock type boxes of the combination lock type. As many as possible of the university departments, faculty members, students and organizations arranged through Postmaster Homer E. Esker are preparing to receive their mail through these boxes. More boxes will be installed if necessary. Residence groups are especially urged to use them.

Mill Work Progressing Work on the various portions of the big sawmill and power development near Lewiston is proceeding in good order and a feeling of optimism pervades the various headquarters of those having in charge the various units. All the way from Lewiston to Headquarters and beyond the work is going on with early next summer as the date for mill production to start. And nobody seems to doubt that the schedule will be met. Logs are being decked with confidence that the log pond will be ready next June. Work on the mill buildings is going ahead with a speed that is surprising to the casual visitor and those who go to the dam site can now see at least one big piece of concrete in place and forms and offer dams going in to take their load of the machine made rock. The dyke does not make such a good showing to the inexperienced eye, but it is taking form as the guys pass. The second Monaghan drug line outfit will be in operation soon. Within the month a definite schedule will probably be in shape and the progress of all the big jobs checked off as it progresses. Up to the recent past, much time and effort were necessary for getting the plant into working order. The unusually low stage of water has aided the work at the dam site.—Lewiston Banner.

Superstitions in Breeding The same superstitions on which the shepherds of Asia based their practices of animal breeding at least partly continue are still widely current, while the one sound principle known to the ancients, selection of the best for breeding stock, is still widely neglected.

Three Souls to Each Man Among the natives of South Africa there is a general belief in the split soul. One tribe believes in three souls—one in the head, another in the stomach, and a third in the big toe.

FRIDAY, AUGUST 20, 1926

**Harvest About Over**

If the weather man still keeps on his good behavior the harvest in this section of the country will soon be nearly well cleaned up. There seems to be more grain to the north to thresh yet than in any other direction, but continued good weather will about clean this up.

This entire section is harvesting a splendid crop and the farmers and merchants are happy for the prosperity of the farmer means prosperity to a certain degree to the entire community—and everyone is rejoicing with them.

There are few sections of the United States that are as prosperous as the Palouse country. Some may have better climates, but it is a hard job to undertake to live on climate. Give us the "makings" of the staff of life in preference to anything else.

**CHURCH NOTICES**

**St. John's Lutheran Church**  
English services will be held each Sunday morning at 10:30 o'clock, with the exception of the first Sunday of each month, when German services will be held at the usual hour.

**Christian Church**  
Bible school at 9:45 a. m. Communion and preaching service at 11 a. m.  
Rev. Covington of the Children's home at Lewiston was with us last Sunday and brought the morning message. He was accompanied by the matron and three girls from the home.

**Genesee Valley Lutheran Church**  
Gerh. A. Peterson, Pastor.  
Saturday, August 21, at 2 p. m. Confirmation instruction.  
Sunday, August 22, at 9:45 a. m. Sunday school and Bible classes.  
At 10 a. m. Norse services.  
At 11 a. m., Worship. Sermons at these services by the Rev. M. A. Christenson of Portland, Oregon.

A meeting of the congregation will be held on Friday, August 27, at 8 p. m.  
To all services and meetings, a cordial welcome.

**Congregational Church**  
Sunday school at 9:45 a. m.  
Last Sunday the Sunday school was very much pleased to have their regular superintendent, Mrs. Arthur Hampton, back with them again. It had been nearly three months since she had been present on account of illness. She gave the Sunday school a very enjoyable talk and informed them that sometime in early September the Sunday school will hold a big rally.

Rev. Covington, of The Children's Home at Lewiston was present and gave a very interesting talk about his work.

The scholars are working very hard to earn pins for being present and on time for a certain number of Sundays at Sunday school. The pins have not arrived yet, but a large number will receive them when they come.  
The first Sunday in September church services will again begin. Everyone is welcome to attend both Sunday school and church services.

**Rev. Christenson Visits**  
The Rev. M. A. Christenson, former pastor of the Genesee Valley Lutheran church, will be in this community during this week and in the interest of Spokane college. He has also been secured to give the sermons at the services on Sunday forenoon at the Genesee Valley church.

Since leaving Genesee Rev. Christenson has served as pastor for many years in Portland, Oregon.

**Dinner Party**  
A very pretty dinner party was given in honor of Miss Viola Lorang Thursday evening at 6 o'clock by Misses Gertrude and Margaret Sampson, at the Glenn Sampson home.  
The honor guest has been visiting here from Spokane for the past two weeks. After dinner the evening was spent in playing bridge.

**THE PICTURE SHOWS**

**"The Goose Hangs High"**  
The feature film at the High School opera house for Friday and Saturday nights, August 20 and 21, will be "The Goose Hangs High," directed by James Cruze, director of "The Covered Wagon."

Along with its many admirable qualities of gripping plot, competent cast and shrewd direction, the picture has the added advantage of being free from the usual improbabilities that are injected into so many of the film plays. It is a study in naturalness; it breathes the spirit of realism and humanity.

The story of "The Goose Hangs High" is a story of what is happening today in millions of homes, where parents and children look at family life from different points of view. The Ingalls parents, in the "photoplay," struggle to give their children all the educational advantages and luxuries that other boys and girls enjoy, only to come to the bitter realization that their sacrifices have been in vain.

**"The Lighthouse By the Sea"**  
With Rin-Tin-Tin, the wonder dog, as one of the leading attractions, will be the feature film at the Genesee Hotel Theater Saturday night, August 21.  
Into the arms—and into the hearts—of the picturesque keeper of an Atlantic Coast light, living alone with his devoted daughter, "Ole Man Devil Sea," in stormy rags has cast up two wonderful protectors. One a youth to fill the daughter's heart with happiness, the other a wonderful dog to give his life, if need be, for those he soon learns to love.

**"The Cohens and Kellys"**  
"The picture with 1,000 laughs," will be the lead at the Hotel Theater for Sunday night, August 22. If your laughter isn't working order, we would advise you to stay at home. The story is laid on the east side of New York, where dwell two families—one is Irish, the father and son being policemen. The other is Jewish, the father of which runs a clothing store. The Irish son and the Jewish daughter fall in love and marry secretly, because they are afraid of their parents. The combination makes more laughs to the square inch than you could get at any other place at any other time.

**"Too Much Worry"**  
The feature picture for Wednesday night, August 25, will be "Too Much Worry." The advertising having gone astray nothing definite can be given at this time regarding the play. Watch for the display in front of the show house. The comedy will be "Cheap Skates."

**Notice of Election**  
Notice is hereby given that an election of the qualified voters of Independent School District No. 2 of Idaho, will be held on Tuesday, September 7, 1926, in the school house, between the hours of 1 p. m. and 6 p. m. of said day, for the purpose of electing two trustees, whose terms will be for three years. Dated this 16th day of August, 1926. By order of the School Board of Independent School District No. 2. ROBERT EMMETT, Clerk.

Presenting  
**The St. Olaf Male Quartette**  
at the  
**Genesee Valley Lutheran Church**  
Sunday, August 29--8 P. M.  
25 Admission 50

"It is the best of its kind we have ever had," WENR, All American radio station, Chicago, Illinois.

**St. Olaf Quartette Coming**  
The College Quartette from St. Olaf College, Northfield, Minnesota, is well-known throughout the country. Not so much the listeners enjoyed the quartette as a quartette, but rather because it has sung over a number of our best radio stations and has been heard far and wide. Stations WCCO, WCAL, WQJ, WHAD, WENR, have all arranged with the Quartette to have them broadcast programs and the replies indicate that the singing was of unusual merit. To show how much the listeners enjoyed the quartette, the Milwaukee Journal stated on April 6th: "If comments of listeners can be considered a criterion, the program offered over WHAD Monday afternoon at 4 o'clock by the quartette of St. Olaf College was one of exceptional merit."

The Quartette will appear on Sunday evening, August 29, at the Genesee Valley Lutheran church.

**Picnicked at Grizzly**  
Mr. and Mrs. Leon Follett, Mr. and Mrs. Jack Barnes and Jack, Jr., Mr. and Mrs. F. C. Shork and Mr. and Mrs. W. M. Herman spent Sunday picnicking at Grizzly camp.

**The Charter Oak**  
parlor furnace is in a class by itself. There is no other stove "just as good" Automatic dampers and heat equalizers control the heat and are great fuel savers. Opens and closes check damper without attention. Comes only on Charter Oak.

We expect to have, before the week is over, a complete line of Ford cars to demonstrate.

**Genesee Motors**  
**Lincoln Ford Fordson**

**News Items Wanted**

The News respectfully asks that everyone send in all the news items they may have. Also the churches are asked to send in their announcements of all kinds, which will receive our every attention. Everything that is free to the general public is free in the News and is considered as news matter. Whenever a charge is made for an entertainment, no matter of what nature, it ceases to be news matter, unless the matter is accompanied by a very brief and concise description. Of course there are exceptions to this rule in some cases, especially when it comes to the churches, which are always given a reasonable amount of free advertising.

We therefore invite all churches and church societies to send in the items of their doings and activities.

**Birthday Party**

Little Bonnie Lange, daughter of Mr. and Mrs. Sam Lange, celebrated her ninth birthday anniversary last Thursday afternoon, a party being given in her honor by her mother. The guests present were: Constance and Rodney Tegland, Nadine and Mercedes Smolt, Richard and Gail Sampson, Elaine and Floyd Hove, Vernon Peterson, Beuletta and Rowena Nordby, Elmo and Myrtle Larson, Arwin and Bernice Nordby, Vivian and Gainford Olson, Arlene Borgen, Frances and Carol Rudd.

The children spent the afternoon playing games, after which they enjoyed a delicious lunch.

**PERSONALS**

F. W. Loncosty was a Spokane visitor Saturday.

Miss Maxine Ehlen returned Saturday after visiting a week at Pullman.

Miss Susan and Edna Alber returned Sunday after visiting a week at Coeur d'Alene.

Mr. and Mrs. R. B. Knepfer of Kendrick were Genesee visitors for a short time Sunday.

Mrs. F. K. Bressler and G. N. Hollister visited Saturday with Mr. and Mrs. Geo. Cannon at Pullman.

Miss Arvilla Clark, who has been teaching at Troy, spent Monday visiting with Miss Bernadine Buefurther.

Miss Alma Nelson returned to her home at Wilbur, Wn., Friday, after spending a week here visiting friends.

Harley English returned Wednesday after a ten-day visit at the home of his uncle, Burton L. French, at Moscow.

Stewart Savage of Pullman, Wash., arrived Monday for a visit with his uncle and aunt, Dr. and Mrs. W. H. Ehler.

Mr. and Mrs. A. Wilson of Metaline Falls, Wash., visited Wednesday at the home of Mr. and Mrs. Henry Martinson.

Miss Viola Lorang returned to Spokane Sunday, after spending two weeks here visiting relatives and friends.

Supt. M. E. Muhlitz arrived Wednesday from Winchester, where he and Mrs. Muhlitz had spent the past two months.

Kenneth and Weldon Sampson left Sunday for their home at Hunters, Wash., after having spent the harvest time here.

Rev. A. F. Wolf and family returned home Monday from a two-weeks auto trip to Yakima, Ellensburg, Walla Walla and other points.

Mr. and Mrs. Leon Follett and Mr. and Mrs. Jack Barnes and Jack, Jr., spent Tuesday visiting relatives and friends at Lewiston and Asotin.

Mrs. McPhail of Everett, Wash., who visited several days at the O. H. Nordby home, left Friday for Moscow. She expects to visit there a short time before returning home.

Miss Oma Castle, who has been employed in Moscow for the past year, arrived Monday for a visit with her parents, Mr. and Mrs. Carl Erikson.

George Coverdale and son, Harold, will leave shortly for Yakima, Wash., where they will again make their home. They have spent the past eight months here.

Miss Kathryn Bowker arrived Friday from Cheney for a short visit with her parents, Mr. and Mrs. Ed. Bowker. She has been attending the Cheney Normal during the past year.

Mr. and Mrs. Abe Rasmussen and children, Ella, Harold and Glenn of Lebanon, Ore., spent Thursday and Friday visiting friends here. The Rasmussens were residents here six years ago.

Mr. and Mrs. W. B. Burr and children and Mrs. Laura Phipps spent Sunday at Moscow. They were accompanied home Sunday evening by Mrs. Dan Burr who spent several days at the W. B. Burr home.

Mrs. and Mrs. Jack Barnes and Jack, Jr., left Wednesday morning for their home at Wilbur, Wash. Mrs. Barnes and little Jack had been visiting with Mr. and Mrs. Leon Follett for several weeks, and Mr. Barnes joined them last Friday.

Alvin Halverson arrived last week from Snohomish, Wash., to look after farm interests here. He again leased his farm to John Hagan, who has been farming it for some time. Mr. Halverson reported everything as flourishing on the coast.

Mrs. John Kane left Friday for a visit with her parents, near Orofino. Sunday she was joined by Mr. Kane. They will remain there for a short time. Later they expect to go to Lind, Wash., where Mr. Kane will be employed in the printing office. Mr. Kane assisted in the News office during the absence of P. C. McCreary.

Mr. and Mrs. D. C. Jacobson left Thursday of last week for their home at New York city after a two-weeks visit with Mr. and Mrs. Ed. Erickson and family. Mrs. Jacobson and Mrs. Erickson are sisters. They returned home via Boise, Salt Lake City and other western cities of interest. They will also visit Washington, D. C. en route home. They are making the trip by auto.

**Ladies' Aid Entertained**  
The Congregational Ladies' aid spent a pleasant afternoon last Wednesday at the home of Mrs. Fred K. Bressler. Mrs. Glen Sampson assisted in entertaining.

A large number of members and friends were present and the afternoon was spent socially.

Delicious refreshments were served by the hostesses.

The next meeting will be held at the home of Mrs. Leon Follett, August 25.

Three in a game of love make it more interesting than satisfactory.

**High School Opera House**  
Friday, Saturday, August 20 & 21  
**"The Goose Hangs High"**

"The Goose Hangs High"—The Great American Family Picture. It solves the universal American family problem—and offers a laugh, a tear, a gasp and a thought to carry home with you.

Are your parents your best friends or are they just your severest critics. Everything is lovely and the goose hangs high.

**A Rattling Good Comedy**

25c and 15c

**FARM RADIO FEATURES—DEPARTMENT OF AGRICULTURE**

The vast fund of popular and scientific agricultural information that originates on the farm and in laboratories of the United States department of agriculture will soon be tapped in a new place. This is the announcement made by Sam Pickard, chief of the newly created radio service in this department. Steps will be taken immediately, he said, to furnish a variety of agricultural program material to commercial broadcasting stations serving farmer audiences.

Much of the material furnished by the radio service will be prepared for presentation in a radically different manner than the almost universal practice of reading manuscripts. Broadcasting stations co-operating will be asked to provide personalities who have unmistakable qualifications to voice the information and material which in most cases will be presented in popular style and in the form of a dialogue or questions and answers.

"Uncle Bert" the garden expert, one of Mr. Pickard's phantom characters, will entertain and instruct the boys and girls of the Radio Order of Junior Gardeners with nature study information. Some of the information themselves will be heard over the radio as they ask questions of Uncle Bert.

"Fifty Farm Flashes" will soon be offered as a regular feature on the air. The "flashes" will consist of interesting current information sought by the farmers through several thousand letters received each week by the department.

Other special feature programs are under consideration, among which are the "Housekeepers Half Hour" and the "National Farm School". In the latter the farm will be considered as the student's laboratory. Timely lecture courses which dovetail with the daily farm work will be developed and laboratory assignments will be made which necessitate putting into practice the subject matter taught. These will be supplemented with a file of bulletins dealing with the subject matter broadcast.

How women love to tempt men! and then abuse them for being tempted!

## THE BULLY OF ST. ANNE'S

By Vingie E. Roe

A slim youth, his face sparkling with excitement, came running up to Father Tenau, as he sat musing on the log step that edged his house of God beside the Qu'Appelle.

The good old man, so greatly loved by all in the lonesome reaches of the fur country, was looking down contentedly on the trading-post, and stretching from his step to the time-worn carriage, standing open, hospitably bade all the world enter, or, closed, gave frowning defiance to its enemies.

But there had been no enemies for many a long year at Fort St. Anne, and the priest's mind was far in spiritual quest of some one to contend with. He looked in mind inquisitely at the excited boy. Oh, Father, come quick! Arthur Du Bois is come down from his riven his canoe 'n' trouble come with him.

The boy watched him anxiously. At mention of that name the priest's eyes came back, and he rose and hastened after the lad through the gate and together they hurried toward the crowd gathered on the shingly beach.

A canoe lay there, fine and slim and made with cunning craft, that looked as if it had been shot from the water half its running length by a mighty and imperious hand.

Its duffel was still within—a rifter leaning in the bow, a bale of winter furs, the antlers of a moose.

And, where a group of youths had been idly gambling about a blanket spread on the pebbly stretch, their eyes were turned to the newcomer.

He was a splendid figure, tall, broad, Hewed like an ox. His white teeth gleamed in his handsome face, and his black hair blew in the wind.

He was engaged in a riotous burlesque of greeting.

"Hien—Hien!" he cried loudly, "how fine it is to see you!"

He grasped the hands of one youth in a bone-breaking grip. The boy yaled, but stood his ground.

"An' Prierer La Forge!"

Again Du Bois, his black eyes dancing, crushed a man's fingers in his cruel grasp. But he looked up at the priest, and he was dying a year later at Lake-of-the-Woods she blessed his name to Father Tenau, who gave her consolation! Strange, was it not? However, there was that one who said it was just as well she died, for Du Bois was better than a live one. They were there heard—for none dared to tell him the gossip.

But Father Tenau knew that the bully had knelt by that lovely couch in the wilderness and wept like a child, riven dying hand on his head. He knew also that he had been passing that way the following autumn, had visited the unmarked grave for human life's sake and had found there a little jar with flowers drooping in it, set there by one who must have journeyed far to place them there. So what would you? The priest was there to know the heart of this man?

A few days Du Bois stayed at Fort St. Anne's, filling his canoe with stores and smoking many pipes with McQuoid, the factor. The latter had promised a dance in the long room at headquarters to celebrate the marriage of his son to his daughter. The thought of this tickled Du Bois.

It would be great fun, dancing at the ceremony of a man who hated him! It came near, however, being more, for with his characteristic high-handedness the trapper took big Elias from the very arms of Prierer La Forge in the middle of the figure and finished it out with her himself. Prierer was a small man, light and sinewy, but the spirit of warfare forebears lived in him, and he waited only for the dance to be done before he launched himself in the bully's face like a fury. It took Du Bois but a scant few minutes to punish him frightfully, to pick him up bodily and toss him away. But, as he straightened up with a laugh, he met Cosan's flaming eyes, an draw his fingers playing with a knife.

"How long, my friends," cried Cosan, "are you going to be playthings of this fellow? How long?" At his electric cry, four youths, friends of his and Pierre, drew in behind him and faced Du Bois. Du Bois laughed again, shrugged his massive shoulders.

"You're his," said "an' 'w'at you goin' to do to Du Bois?"

"Lick you, M'sieu!" said Cosan through closed teeth. "Lick you like hell!"

It is hardly possible to describe what followed. There were five, against one. The mother had made for the boy, and one like it for Nora. Because we're twins, you know, and she is—she is—"

"Don't lose it, Du Bois," said the boy. "My mother had it made for me, and one like it for Nora. Because we're twins, you know, and she is—she is—"

He gulped and swallowed, and the big blue eyes fixed on Du Bois' face clouded slowly with a mist of tears. The bully rose, lifted the arms about him, patted his shoulder as gently as a woman would.

"She is all things sweet an' good 'at ever lived in zis o' world," M'sieu, he said, "an' for her sweet sake, Du Bois, you have never looked on her livin' face, would die with the laugh, just as she is, a scorch from the so small finger of her."

It waded Du Bois—this miracle, that he, light of love that he was, should be humbled in the dust of abasement by this woman's pictured face. For two months now he had studied it in fire-light and at dawn, at noon and night, and over the wonder of its beauty and innocence had bowed down his heart in worship. He opened it now and looked at it in its glittering case. "She is god, M'sieu," he said, "pure as lily 'w'at bloom in shade."

"And she believes in me," sobbed the boy, "she won't admit I'm all bad."

Du Bois shook his head and said, "For sure! You are not bad at all, M'sieu, only yer' young, an' youth she do wild things."

"Ah," he said, "ze thumb mark! Zat's funny—'all zee small tracks ron-in' rou'n' lak fox 'w'at lick nose-bug ze hunter. Mebbe lak june-bug 'w'at gozzy, eh, M'sieu?"

"I know I liked Van Blunt—'at been at his apartment many times before. He was fine—kind, courteous, and very wealthy. All the fellows liked him. That night we had played and drunk a lot. There were about nine of us there. Kennet, Carson, Hargrave, myself and some others. We broke up late, I remember, and taking my hat and coat from Van Blunt's man who was waiting to go home then. All of a sudden a table seemed rising to meet me and—and I didn't know anything more until—"

"I know I liked Van Blunt—'at been at his apartment many times before. He was fine—kind, courteous, and very wealthy. All the fellows liked him. That night we had played and drunk a lot. There were about nine of us there. Kennet, Carson, Hargrave, myself and some others. We broke up late, I remember, and taking my hat and coat from Van Blunt's man who was waiting to go home then. All of a sudden a table seemed rising to meet me and—and I didn't know anything more until—"

"The lad clenched his hands. "If I only knew, Du Bois," he muttered. "For God's sake, why can't I remember?"

"I know I liked Van Blunt—'at been at his apartment many times before. He was fine—kind, courteous, and very wealthy. All the fellows liked him. That night we had played and drunk a lot. There were about nine of us there. Kennet, Carson, Hargrave, myself and some others. We broke up late, I remember, and taking my hat and coat from Van Blunt's man who was waiting to go home then. All of a sudden a table seemed rising to meet me and—and I didn't know anything more until—"

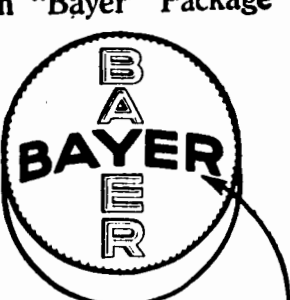

"The boy only shrugged his shoulders and yawned wearily through the day. Du Bois, fascinated by this new study and his daily adoration at the shrine of the locket, was always busy.

Colds	Headache	Neuralgia	Pain, Pain

Each unbroken "Bayer" package contains proven directions. Handy boxes of twelve tablets cost few cents. Druggists also sell bottles of 24 and 100.

## ATTRACTIVE SIGNS NEEDED IN ROAD-SIDE MARKETING OF FARM PRODUCTS

ROAD-SIDE marketing of farm products offers interesting possibilities for Washington farmers. Through this system, advertising has not yet been extensively developed, but wider use in the future will no doubt come. Those who have farm produce to sell will be interested in some of the principles of advertising these markets.

Since successful roadside marketing is so largely achieved by silent salesmanship, that is, the appeal through the eye, attractive signs and posters along the highway on each side are very important. Of the many markets crowding the highways in this state very few have attractive signs or posters.

Signs displayed are frequently not only a failure as signs but are exceedingly unattractive along the highway. State highway regulations should be carefully observed in placing these signs. The majority can be read only at short range and are too often scrawled on a board or shingle which is too small or of such color that the words are very indistinct.

The best signs are the simplest. Letters at least one foot high should be neatly painted and spaced on the sign. Colors which produce a strong contrast are easier to read; a combination of black and white is hard to beat.

These signs must be read rapidly by the traveler and the fewer the words used to convey the information, the more effective they are. These are but two or three things necessary on any sign; it should state, first, what is for sale; second, where it is sold; and sometimes third, the price. Frequently the first two are all that is necessary, and it is right at the market only the first is needed.

The name of the person or the brand of the product often makes the sign more attractive, such as: John Son's Newtown cider; or Fresh Ranch Eggs, at Barred Rock Henney; or Creamed Cottage Cheese at The Green Meadows Dairy. An attractive announcement of:

## Idaho Football Coaches Ready for Grid Season

UNIVERSITY OF IDAHO, Moscow.—Coaches "Charley" Erb and David "Mac" MacMillan are back on the campus, getting settled and looking things over for the coming football season and for the new developments in physical education that were prominent when Erb was hired as director of athletics and MacMillan was promoted to be director of physical education. This was following the resignation of T. L. Matthews last spring. Erb has been playing baseball this summer in the Sacramento valley. He has thrown away the big dark-rimmed glasses he was wearing when he was here in the spring—says he doesn't need them any more. Several good athletes are coming up from Sacramento to attend the university, he says.

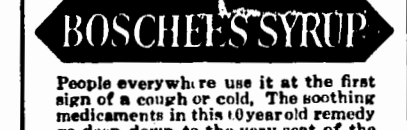

As to Idaho's football prospects for next fall, "I can't commit myself," says Erb. As a matter of fact, Erb doesn't know what material he is going to have. Nine first-string men from last year were graduated, leaving at least six first-team positions to be filled. A dozen or other letter men are due to return, but whether they actually will appear, the new coach does not yet know. One of his tasks for the coming month or six weeks is to find out. "If I have as good material as I had in Nevada," he said, "we may do more than is expected of us."

Before the university year opens, Erb probably will make the acquaintance trip through the state in company with George E. Horton, alumni secretary.

MacMillan, who taught physical education and coaching in the summer school at Boise, has just returned by way of Yellowstone park and will be here for the rest of the summer. Erb and Erb are in consultation regarding the program for fall—especially football. MacMillan is supervising arrangements in the gymnasium in preparation for the enlarged work in physical education.

## CHECK SUMMER COUGHS AND COLDS

You can get quick relief with that old, reliable family remedy for coughs and colds

**BOSCHE'S SYRUP**

People everywhere use it at the first sign of a cough or cold. The soothing action of the ingredients, especially the deep down to the very seat of the cough, loosens the phlegm, stopping the dry tickling and relieving congestion. It is the best remedy for coughs and colds. Write to G. C. GREEN, Inc., Woodbury, N. J.

"What's this?" asked the factor sternly, trying not to smile.

"Merely a little partridge, M'sieu, 'w'at fly in ze parther's face."

He set the rifle on her feet, brushed down her ruffled feathers, and bowed.

"We can excuse you now, Ma'm'selle," he said pointedly, "I would speak with my fr're, Monsieur le Facteur."

All the northland knew Du Bois' feat was much to be commended. As no one moved he hung back his shoulders, tossed the hair from his forehead and swung away down the floor.

Gray dawn found him on the beach, stepping into his canoe, bound once more for the westward. He was not to leave without a farewell word, for the old priest stood at the shingle's lip and held his hand at parting.

"Son," he said sadly, "selfishness and arrogance are ear-marks of Satan. We broke up late, I remember, and taking my hat and coat from Van Blunt's man who was waiting to go home then. All of a sudden a table seemed rising to meet me and—and I didn't know anything more until—"

"I know I liked Van Blunt—'at been at his apartment many times before. He was fine—kind, courteous, and very wealthy. All the fellows liked him. That night we had played and drunk a lot. There were about nine of us there. Kennet, Carson, Hargrave, myself and some others. We broke up late, I remember, and taking my hat and coat from Van Blunt's man who was waiting to go home then. All of a sudden a table seemed rising to meet me and—and I didn't know anything more until—"

"The boy only shrugged his shoulders and yawned wearily through the day. Du Bois, fascinated by this new study and his daily adoration at the shrine of the locket, was always busy.

## IDAHO PROFESSOR WRITES TEXTBOOK

UNIVERSITY OF IDAHO, Moscow.—"Methods of Study" is the title of a textbook for education students, being published by Dr. C. C. Crawford, professor of education at the University of Idaho. The book is designed for high school and college freshmen use and is the result of five years of research work by the Idaho professor.

The book was written last summer from data and notes collected since 1921. During the college years Crawford closed the book was used in the university here in lecture form. Revisions were made this summer and the book was given to the printers less than four weeks ago. It is now being bound and sample copies are ready for distribution. Printing was by the Menzies Publishing Company.

It was while teaching at Carnegie Technical Institute, Pittsburgh, in 1921, that Dr. Crawford realized the lack of an authentic work on the subject of study methods, and under Dr. H. W. Charters of that institution began the work which he has now completed in book form. He attempted to classify the difficulties facing students, and approached fifty-five college professors to learn how they solved those difficulties in their classrooms. Several hundred students were then questioned.

According to Dr. Crawford, a number of acceptances of the book for prescribed work during the coming year have already been received, including Washington State College, University of Idaho, Kellogg, Gooding, and Nez Perce high schools. Approximately 175 colleges have requested sample copies, and it is likely that a number of them will adopt the text for class work this year. Dr. Crawford declares, "An evidence of the value of the work, Dr. Crawford points out that the class of 181 students to which the work was given in lecture for this year, had just one-half the failure percentage of the entire university for the first six weeks' period, and one-fifth the percentage failure of the institution at the close of the first

## THE FIRST AUTO ACCIDENT

BRONSON HOWARD'S TWENTY-YEAR-OLD PROPHY COMES TRUE.

Nantucket has had its first auto accident. Nantucket Island, just off the coast of Massachusetts, has long been the refuge of artists, authors and writers, and for years automobiles were barred from the island as if they were the mechanical reincarnations of Lucifer. Among the former residents of Nantucket Island was Bronson Howard, famous author of "Young Mrs. Winthrop," "The Banker's Daughter" and "Shenandoah," and it was this old time playwright who was active 20 years ago in getting the Massachusetts State Board of Highway Commissioners to erect the bars of automotive prohibition around Nantucket Island. Mr. Howard wanted to "leave at least one place on the foot-stool where the very young and the cautious might walk the highways in safety," he said at the time. Contrary to his opinion it should be said that the advent of automobiles would bring with it death and deprivation. Bronson Howard died in 1908. For ten years Nantucket remained true to his memory and militant guidance, but finally lowered its gates to the motorcar in 1918. Less than two weeks ago Nantucket suffered its first automobile accident and death, there by bringing into the realm of truth Bronson Howard's prophesy of 20 years ago. Strangely enough, the first victim was neither young nor old, and was not a pedestrian. Rather, the life was lost when a privately owned passenger car skidded on a wet road, struck the edge of the highway, turned over and crushed the driver.

In justice to the automotive industry and in opposition to Bronson Howard's opinion it should be said that the death probably would never have occurred had the driver taken the precaution to apply non-skid chains when it was raining. Contrary to his opinion it should be said that the advent of automobiles would bring with it death and deprivation. Bronson Howard died in 1908. For ten years Nantucket remained true to his memory and militant guidance, but finally lowered its gates to the motorcar in 1918. ## Amundsen's Old Ship To Sail for Arctic

VANCOUVER, B. C.—Three vessels will leave Vancouver soon on trading expeditions to the Grays Harbor and chief among the three is the former schooner Maud, built especially in 1917 for the explorer Amundsen on his specific.

This vessel is now known as the Baymaud and is in the service of the Hudson Bay Co.

The other two vessels are the Old Maid No. 2, formerly the Maud of Orleans, and the Uglavik, now under construction.

The three-masted schooner W. F. Jewett, masted in the Grays Harbor "bonnyard" for five years was towed to sea this month on route to San Pedro where it is understood it will be used in the production of a movie feature film. The ship was famous a quarter of a century ago, carrying cargoes to all parts of the world. Later she was used in the coastwise lumber trade between Seattle and Tacoma. Her agents for a motion picture garden.

In the heart of Spokane, close to stores, theatres, and the business district, the Hotel "Ad" offers the traveler every convenience. Popular prices and perfect service. "The Hotel With a Personality."—Adv.

## Farm Electricity Report Ready for Distribution

UNIVERSITY OF IDAHO, Moscow.—Printed copies of the progress report of the Idaho committee on the Relation of Electricity to Agriculture are now available for distribution. The report, which was prepared by Prof. M. R. Lewis, head of the university department of agricultural engineering and electrical engineering, was approved at the recent committee meeting in Boise.

The published report presents the relation of electrical use to farm development in Idaho, including maps showing transmission and rural distribution lines, a state map showing rural consumers, a general discussion of electrical power in Idaho and the use of electrical power on the farm, both from the central stations and through organizations of farmers cooperating for distribution of electric power bought wholesale from federal or other producers.

The detailed studies, conducted during the past year by Professor Lewis and his associates, Prof. Robert Berens and, show that approximately one farmer in five in Idaho makes some use of electric current. The relative number in Idaho is much greater than in most other states, being four times the average for the country and 10 times the number for some states.

The manuscript was submitted to the national committee on the Relation of Electricity to Agriculture and Dr. E. A. White of the committee asked the Idaho committee to have 7,000 copies printed for distribution throughout the country.

Oh, Boy! Give me some more of the good coffee at Jim Boldts Cafe, 1414 3rd Ave., Seattle—Adv.

## Fencing Used As Decoration

If you have a fence around your country or suburban place, let it be something more than a "barrier" to the outside world. Make it a decoration. Why not get away from the white fence of tradition and paint yours to match the trim of your house?

Nearly all wood and metal surfaces exposed to the rain, wind and hot sun require regular and adequate paint protection. A fence should be painted with a good oil paint. Then paint the fence yellow, tan, and plant a row of green glow or sunflowers behind it. By way of contrast have scarlet geraniums along the front of the house.

A cozy cottage by the sea might be painted cream with a trim of marine blue, and have its fence painted the same lovely blue. Train red-colored sweet peas over the blue fence, and have a colorful patch of poppies and cornflowers somewhere in the garden.

A light green fence as a support for red and pink ramblers would be a red fence with a row of hollyhocks peeping over it!

TOO MANY LAWS ARE OVERWHELMING AMERICANS

Americans are fairly overwhelmed by law because of the avalanche of legislation, according to Harold C. McGuigan, veteran Kansas attorney in an address made recently before the Kansas State Bar Association. Mr. McGuigan pointed out how congress had been almost continually grinding out laws for years and pointed out that there are now no less than 15,000 sections of the United States statutes. In addition to this there are more than 11,000 sections of the state statutes and the number is constantly increasing. He said in part: "These various statutes are so complex that two courts will seldom reach a like construction. The federal statutes reach such great numbers that no lawyer in America has a comprehensive knowledge of them. Some lawyers may be expert in finding them in the sense that some bird dog might be expert in finding quail, but these lawyers no more know the statutes than the bird dog knows the number of quail in the covey he is pointing."

Mr. McGuigan deplored the legal maxim which sets fourth that ignorance of law is no excuse. In view of these volume upon volume of law, many of them beyond comprehension, he said it would be an absurdity to invoke the maxim and it does violence to reason.

The Kootenia Valley Kootenia valley, Idaho, a recent state reclamation project, is a veritable agricultural wonderland, though undeveloped. E. J. Idings, dean of the University of Idaho college of agriculture, said at a recent meeting at Moscow, Idaho, that the legal maxim which sets fourth that ignorance of law is no excuse. In view of these volume upon volume of law, many of them beyond comprehension, he said it would be an absurdity to invoke the maxim and it does violence to reason.

"The district, extending from three miles below Bonners Ferry to the Canadian border, about 35 miles, is being reclaimed by five drainage districts established a few years ago," he said. "The process consists of digging out the high waters of Kootenia valley and of constructing artificial channels for small streams tributary to the river. Waters, which for hundreds of years have stood over the district during periods of high flow, are now permanently removed, and the muck-soil is extremely fertile, even though it is still somewhat sour and filled.

"Approximately 13,000 acres have been reclaimed, and 20,000 acres are in sight. The district is principally sown to wheat and hay with fall grain shoulder high. The soil and climate, however, is adaptable to a wide variety of crops."

IN THE DISTRICT COURT OF THE UNITED STATES, FOR THE DISTRICT OF IDAHO CENTRAL DIVISION

Children's Oxfords—one lot, choice \$1.59  
Boys' Leather Hi Kicks—special \$1.98  
Misses' Pumps and Oxfords—special \$1.98  
Bakefoot Sandals . . . . . 69c and 98c

**R. C. BEACH CO.**

Lewiston, Idaho

Most American agree with the statement of Grove Paterson, editor of the Toledo Blade, to the effect that the modern newspaper is one of mankind's four greatest institutions, the others of course being, the home, the church and the school. Like other modern institutions, newspapers often make mistakes, and the public does not hesitate to tell the editor about these errors. But the magnitude of the task of building the modern newspaper in so short a time will easily account for the mistakes, and they are no more numerous than they would be in other lines of endeavor under similar conditions. People like to criticize public officials, lawyers, and the general run of folks, but for some reason, they like best to criticize newspapers. The reason may be that the mistakes of the newspaper are always before them, and cannot be denied or buried. At any rate as Mr. Paterson said: "It is the cheap and joyous custom to criticize newspapers. Nearly all public speakers from snake charmers to preachers at attack newspapers for the reason that it is the simplest and easiest way to get quick applause. Applause is the breath of life to luncheon speakers."

Yet the newspaper is always in the forefront, defending the community in which it lives, and in promoting all things that are for the community's good. It probably gives more free service and more honest service for less money than any other commercial enterprise. No man would want to live in a city or town without newspapers and the newspapers themselves are usually an index of the prosperity and progressiveness of the community.—National Republic.

# THE GENESSEE NEWS

VOL. XXXVIII GENESSEE, LATAH COUNTY, IDAHO, FRIDAY, AUGUST 27, 1926 NO. 9

MOSCOW MAN TO HEAD AMERICAN LEGION

Elmer W. Ellis of Moscow was chosen commander of the American Legion for Idaho at the closing session of the three-day convention last Saturday, at Lewiston. Weiser was selected as the meeting place in 1927, virtually without opposition; Weiser.

The women's auxiliary, also closing its convention, honored Mrs. T. W. Detweiler of Hazelton with reelection as president. Mrs. Carl Harris is president of the Lewiston auxiliary and directed arrangements for the convention.

Other officers elected were: vice commander, H. C. Dvorak, Burley; historian, R. Lee Fisk, Parma; master at arms, Tom Sutton, Idaho Falls; chaplain, the Rev. H. N. Dukas, Lewiston; national executive committee-man, George L. Petrashek, Weiser.

Delegates to the national convention from the first district were: E. W. Ellis, Moscow; N. R. Fitch, Payette; Norman O'Donnell, Elk River; L. S. Albert, Payette; E. H. Helfrey, Emmett. The alternates were: Leon Fisk, Nampa; Phil O'Brien, Sandpoint; Virgil Kirkham, Moscow, and Howard Rusak, Council.

The second district: O. W. Worthwine, Boise; L. A. Thomas, Malad; Alvin Denman, Idaho Falls; C. C. Thompson, Boise; R. F. Hamilton, Postville. Alternates: Mrs. E. D. Conner, Postville; W. H. Destweiler, Hazelton; J. O. Davis, Blackfoot; W. E. Daley, St. Anthony, and R. D. Philblad, Boise.

Polatich Bean Crop Short

According to a news dispatch sent out from Julianna dated of August 21, more than 40 per cent of the threshing in the Polatich district is completed, and about 50 per cent of grain has been delivered to warehouses. There will be, according to indications, a somewhat smaller tonnage of grain this year than last.

In the Polatich district one of the most important bean sections of the Inland Empire, the bean crop will be well-nigh a failure. This resulted from the long period of hot weather. While the crop usually yields 700 to 1400 pounds to the acre, this year's crop will average less than 300 pounds.

Julianna's melon crop this season will yield a less tonnage than in former years on account of moisture. While the sugar content of the melons this year is fully up to standard, size will average less. The price of melons is holding up, so growers will probably realize as much as in former years.

Owing to the prevalence of tomato blight in the other areas, demand for Julianna tomatoes is pronounced, and growers are receiving satisfactory prices. The blight was not so prevalent as in other tomato-growing sections.

The Julianna canner has not begun to operate, but report is that it will start within a week.

School Opens September Sixth

The Genesee public schools will open on September 6. Superintendent Muhlitz is in town getting things ready for the opening of school. Monday students will register in all departments of the school and regular classes will be held on Tuesday, September 7. A complete faculty has been selected with much care.

All grade teachers are Normal school graduates and have had two or more years of successful experience. There will be no inexperienced teachers in the entire system.

Following are the names of the teachers and the work that they will do. M. E. Muhlitz, superintendent, mathematics. Guy P. Wicks, science and athletics. Ethel Anderson, commercial. Ruth Wolf, history and English. Jessie Keeler, seventh and eighth grades. Emma Schetzle, fifth and sixth grades. Mary Weaver, third and fourth grades. Thelma Hanson, primary. J. J. Tupker, manual training.

Dismal Fire at Lewiston

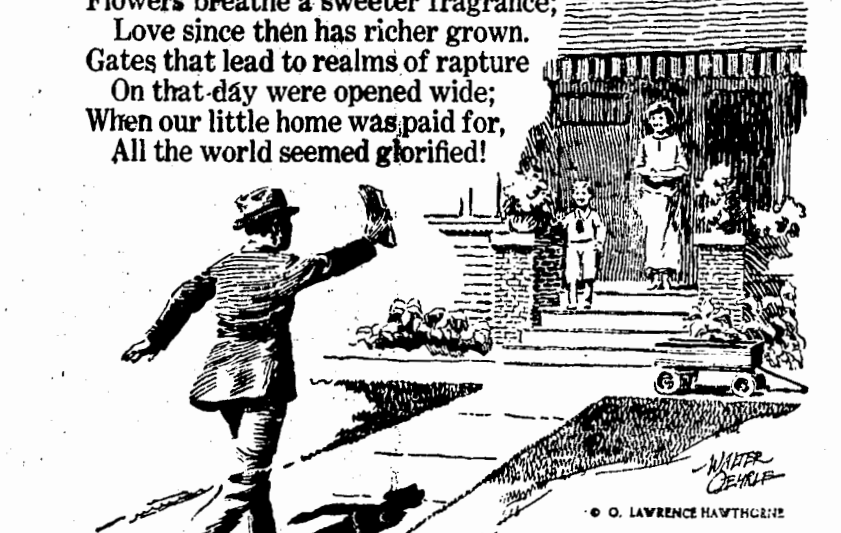

Lewiston's business district suffered a loss of approximately \$140,000 by a fire which destroyed the Lewiston Grocery company's store and the Housh & Beckman furniture store, on Main street. The Wright drug store and the Woolworth company were also quite heavily damaged by water and smoke.

## Our Happiest Day

by O. Lawrence Hawthorne

When at times we sit and ponder On the lessons life has taught, When we pause to count the blessings That experience has brought, There's a certain joyous moment That we always shall recall With delightful recollection As the happiest of all.

Since that day the skies are brighter; Music has a finer tone; Flowers breathe a sweeter fragrance; Love since then has richer ground. Gates that lead to realms of rapture On that day were opened wide; When our little home was paid for, All the world seemed glorified!

© O. LAWRENCE HAWTHORNE

### SUMMARY OF IDAHO WEATHER AND CROP REPORT

Following is the weekly report of Idaho weather and crops for the week ending August 18: North Idaho: The weather continued dry and the temperatures moderate throughout the week. Threshing and harvest are about completed in most sections. Harvest is coming up well and the work of thinning is under way. The harvest of peaches, plums, and pears is in full swing. Melons are being picked and marketed in quantity. Corn is suffering for moisture, particularly in the lower valleys, and other growing crops are badly in need of rain. Drier crops are being given supplemental feed.

Southwest Idaho: Fair and moderately warm weather continued during the week. Cooler nights were the rule during the last few days. All crops are making good progress in sections where the moisture is adequate. The third crop of alfalfa is being cut in some sections and will soon be ready to cut in others. Threshing continues in all parts of the district. Where water has been restricted, crops are not doing well and in some sections will not put on a satisfactory range of hay, but stock are doing well.

Southeast Idaho: Moderate temperatures and cool nights prevailed during the week with light showers in most parts of the district. Harvest is well advanced and the work of threshing is making rapid progress. The second crop of alfalfa is mostly cut in the late sections and the third crop of hay is making good growth. Potatoes are improving, but sugar beets are not doing well, mostly on account of pests. Fruits are doing well. The range is dry, but is somewhat improved by showers.

Twenty Years Ago

Wheat was quoted yesterday (Thursday, August 24, 1906) at 61c, 54c, and 57c; barley 75c and oats at 90 cents. Timothy hay \$12 and oats at \$7.

Up to Wednesday evening of this week a large amount of threshing had been done south and east of town. A large number of good yields have been reported and as threshing progresses it is evident that the present crop is nearly an average one. To date the best yield reported was grown by Chas. Jain, who from a 25 acre field threshed an average of 48 bushels of wheat per acre. The Andrew Martinson farm, east of town, has produced an average yield of 35 bushels per acre. J. B. Durston reported a yield of a little better than 40 bushels of barley per acre. The Evans and Collins ranches, southwest of town, will produce an average crop of at least 35 bushels of wheat per acre. So far little wheat has been marketed.

The Whitman-Latah Fair

The Whitman county fair will be held at Garfield, Wash., on September 2, 3 and 4. A very extensive premium list has been printed and distributed and the fair promises to be one of the best held in this part of the country in many years.

Thos. H. Herman, our local florist, is superintendent of the Floriculture department and states that anyone having flowers they wish to exhibit may bring them to his store and he will see to it that they are cared for and properly entered.

The list of exhibits includes asters of all colors, zinnias, marigolds, sweet peas, bouquets of sweet peas, asters, perennials, dahlias of all descriptions and gladiolus of all colors and colors. In fact, most all kinds and colors of flowers will be accepted for show and Mr. Herman will be glad to take care of them for you.

W. A. Coover of Bueda, Wash., is visiting with his daughter, Mrs. Walter Miller, and family.

### SEMI-LOCAL NEWS CLIPPINGS FROM EXCHANGES

A Little Talk on Thrift (By S. W. Straus, President American Society for Thrift.)

Do you know exactly how much money you have wasted so far this year? No doubt, comparatively few persons could answer this question. If the answer could be secured it would doubtless cause amazement. For the small amounts of waste count up much more rapidly than we can imagine.

Many persons are unable to make progress in their personal affairs simply because, unconsciously, they are paying just a little too much for about everything. Too much for rent, for clothes, for recreation, for little luxuries here and there bring failure and ruin.

Keep your expenses down to such a point that progress is assured. No matter what you may do otherwise or how hard you may labor, failure will be the inevitable result of misadministration of your personal finances.

Dickens, through the character of Micawber, emphasized the truth of this lesson: "Annual income, twenty pounds; annual expenditures, nineteen pounds six—result, happiness. Annual income, twenty pounds; annual expenditures, twenty pounds nine—result, misery."

The difference between nineteen pounds six and twenty pounds six is the difference between success and failure; between progress and disaster; between a fine, useful life and a life made wretched by debt, worry and a sense of impending disaster.

Watch your personal overhead. Keep down your fixed charges. Keep free of the yoke of bills that can't be paid. To do so is to grasp one of the essentials of personal upbuilding.

Speaking of Roads

There seems to be a great diversity of opinion regarding the condition of roads in general. One traveler, coming over a certain piece of road, will say "It is rotten!" Another, coming over the same road, will say "It is good," or "It is in fine condition." It all depends upon the kind of roads one is in general. One traveler, coming over a certain piece of road, will say "It is rotten!" Another, coming over the same road, will say "It is good," or "It is in fine condition." It all depends upon the kind of roads one is in general.

Remedy for Crossing Accidents

Prevention of grade crossing accidents is so easy and simple that there is no excuse for such accidents. All that is necessary is to look in both directions to see whether a train is approaching. If a train is approaching, stop and let it go by.

When there is more than one track, wait after a train has passed, to make sure that another train is not approaching on one of the other tracks. When a crossing does not afford good vision, because of view being obstructed by buildings, trees, curves or embankments, stop, look and listen before crossing.

When signals are in action, crossing guards lowered or flagman is at crossing, do not proceed; and drivers should stop, or let it pass. These are reasonable regulations. If observed, they will prevent grade crossing accidents just as effectively as grade changes. When not observed, the driver's license should be cancelled.

Entertained Syringa Club

The Syringa club was very pleasantly entertained on Thursday last week by Miss Inger Ure at her country home west of town, the occasion being in the nature of a celebration of Miss Ure's birthday anniversary. At 5 o'clock a delicious chicken dinner was served by the hostess, assisted by Mrs. John Meyer, sr.

The hostess received many very fine gifts and presents in remembrance of the occasion. Besides the members the invited guests were Mrs. John Meyer, sr., Miss Gladys Surbeck of Walla Walla, Misses Teresa and Frieda Scherer, Mrs. George Schmidt and daughter, Mrs. Alice Johnson, and their family. The club will meet the coming Thursday with Mrs. Jesse Borgen.

The Blue Bird Club

The Blue Bird club met at the country home of Mrs. Arthur Hampton Tuesday afternoon of this week and a very pleasant and profitable meeting was the result. A very delicious luncheon was served by the hostess.

The invited guests were Mrs. Wm. Jenkins, Mrs. Elnor Johnson, Mrs. Ernest Johnson, Miss Ida Johnson, Miss Alice Hanson and Mrs. George Rader.

The next meeting of the club will be at the home of Mrs. Olaf Johnson on Tuesday, September 7.

Pago seven will interest you.

Those present were Mr. and Mrs. Vern Beckman, Mr. and Mrs. Henry Martinson, Mr. and Mrs. W. W. Burr, Mr. and Mrs. Mahlon Follett, Mrs. Ira Hanson, Mrs. Laura Phipps, Misses Mary Wardrobe, Esther and Ruth Martinson and Edith Boyd.

**CHURCH NOTICES**

**Congregational Church**  
Sunday school at 9:45 a. m.

**St. John's Lutheran Church**  
English services will be held each Sunday morning at 10:30 o'clock, with the exception of the first Sunday of each month, when German services will be held at the usual hour.

**Christian Church**  
Our Bible school meets at 9:45. There is a class for you.

The pastor will preach at 11 a. m. on "The Marriage of the King's Son." This sermon will help you to better understand the meaning of God's grace. It is dramatic in picturing the oriental marriage ceremony.

**The St. Olaf Quartette**

The College quartette of St. Olaf is an official organization from St. Olaf College, Northfield, Minnesota. The quartette has given numerous concerts throughout the states of Minnesota, Wisconsin, and Illinois, including such places as Minneapolis, St. Paul, Eau Claire, Chippewa Falls, Madison, Wis., Ottawa and Chicago, Ill. They have at several times been heard over radio, having appeared on the programs of WCAL, the St. Olaf College station; WCCO, the Gold Medal station, Minneapolis-St. Paul, and many others. The members of the quartette are: Osgood Westley, first tenor, of Cooperstown N. D. who is singing his third year with the organization; Sigvard J. Steen, second tenor, of Clinton Minn., for two years a member of the Luther College Band of Decorah, Iowa; Constantine Nestande, first bass, of Lanesboro, Minn., who since his matriculation at St. Olaf has been a member of the choir; and Reuben A. Benson, second bass, of Brookings, S. D., who has done extensive work on the chautauqua platform. These young men are all students of St. Olaf College, and members of the famous St. Olaf Lutheran choir.

They will appear at the Genesee Valley Lutheran Church Sunday evening, August 29. In their program will be included secular as well as sacred numbers, among them Sibelius "Te Dum," the negro spiritual, "Deep River," "Annie Laurie" and Burleigh's "Mother O' Mine." The Colfax (Wis.) Messenger has this to say of the quartette: Every number rendered by the quartette was a gem and struck responsive chords with the audience. Much praise is due Osgood Westley, first tenor, J.S. Steen, second tenor, both of whom have done extensive concert work.

The concert to be given here is under the auspices of the Young People's Luther League of the Genesee Valley church.

The third largest producer in the world.

**Moscow, Idaho**

**IDEAL VECTO HEATERS**  
Not In the Basement, But Really a furnace in every sense of the word. Guaranteed to heat 8,000 cubic feet of space in home, store, church, etc.

**Plain Facts**

The Ideal Vecto Heater was announced in July, 1925. By October every Vecto that could be manufactured in 1925 was sold. Orders continued to come in from our friends in the Trade and it was to our deep regret that they could not be filled. Even during the first year of its existence, the Vecto established itself as an unprecedented success, and not because of any enormous advertising campaign or trick selling methods, but because of its simplicity, its wonderful heating capacity, its convenience, its beauty and its low consumer selling price.

Last season we sold eight (8) Vecto heaters. This season we expect to sell not less than 12. If you are not already familiar with this wonderful heater, we will gladly give you the names of the owners that you may get their opinion.

Some reasons why you owe it to yourself to see the Vecto before you buy.

- 1—Manufactured by American Radiator Co., the largest concern of its kind in the world.
- 2—One big casting, weight approximately 600 pounds.
- 3—Absolutely in a class by itself; nothing like it.
- 4—Guaranteed to heat 8,000 cubic feet or bring it back.
- 5—Easier to keep clean.
- 6—Better looking.
- 7—Will heat your whole house uniformly.
- 8—Will save you coal bills.
- 9—We can prove that you are getting more for your money.

**Herman's Hardware Shop**

**HERMAN'S HARDWARE SHOP**

**Team Runs Amuck**

Colin Wilson says his horses have more pep than he can put into his truck. The other day while he had on a load of hay and was descending a small hill the neckyoke came down and his team became frightened and ran away. In their flight they ran into a barbed-wire fence (of course) and tore things up pretty badly. Before they hit the fence, however, Colin jumped and when he lit he encountered a chunk that contained a large nail, which he struck with his left hand, tearing it quite badly. He came at once to the office of Dr. Eiken, who took six stitches in closing the wound.

Those rusty nails are bad things to encounter and the wound will need careful attention.

**Interruptions Explained**

The early morning interruptions in the electric service are due to the fact that the W. P. P. company is making improvements along the highway between Genesee and Moscow, it being necessary to move some of their poles to make room for widening and straightening the road. This work cannot be done with the electricity on as it is too great a hazard to life and property.

There will be a few more such interruptions before all of the work along the highway is completed.

**Extravagant Women**

Happy is the man whose wife is stingy. Women's extravagance is the downfall of most men.

**St. Olaf Quartette**

It was a revelation to hear these young men sing, there was intonation that one seldom hears. The voices were of exceptional quality and extremely pure. Of special note was the second bass, which was commendable throughout the program, and especially so in the solo, "Asleep in the Deep." If St. Olaf can't send its entire choir, we will be more than thankful to again hear the quartette. "Scandinavian," Chicago, Ill., Jan. 6, 1926. At Genesee Valley Lutheran church, Sunday night, August 29. 9-1

**Forest Fires Extinguished**

The heavy rains of the past week almost completely extinguished the forest fires that had been raging in many sections of the Northwest for the past several weeks and which devastated many thousands of acres of fine timber. At least they are now under control, which will save many millions of feet of merchantable timber in the forests of Idaho and Montana.

**Moscow Flower Show**

In another part of this paper you will find the advertisement of the Rudolph Motor company of Moscow. In this advertisement you will find announcement of the Moscow flower show, which will be held in the Rudolph garage on Saturday, August 28. Good music will be furnished. The admission is free.

The other 80% is cost of delivering service from power plant to customer.

**PERSONALS**

Mr. and Mrs. Holben left Wednesday on a short trip to coast points.

Mr. and Mrs. Martin Meyer of Kellogg are visiting relatives here this week.

Mrs. John Krier and daughter, Miss Mayme, spent Tuesday visiting at Moscow.

Mr. and Mrs. Paul Cann of Moscow visited relatives here last Saturday and Sunday.

T. Driscoll and Fred Hampton drove to Spokane Tuesday for a short business trip.

Miss Driscoll and Miss Talbert of Moscow are spending this week visiting friends here.

Harry Beach and family are visiting with Mrs. Beach's parents at Winchester over the week-ends.

Beatrice, Wilbur and Joyce Botzger of Potlatch are visiting at the home of their grandmother, Mrs. M. Botzger.

More than a dozen returned last week from the Big Bend country, where he has been assisting in the harvest work.

Mr. Alonzo Murphy and little daughter, Frances, of Lewiston spent Sunday visiting at the Fred Hampton home.

Mr. and Mrs. Earl Baird of Caldwell visited Monday and Tuesday at the home of Mr. and Mrs. Harley Smith.

Mrs. Carl Erikson, Lela Castle, Mrs. Amelia Bachler, Mrs. Milton Rader and Margaret Rader visited in Moscow Tuesday.

Robt. Emmett left Sunday for Weiser where he will attend the republican convention, which is being held there this week.

Mr. and Mrs. W. M. Herman, Mr. and Mrs. Leon Follett and Mr. and Mrs. F. C. Shork motored to St. Maries, Sunday.

Miss Wilma Ingle, Helen Millikan, Floyd Maurice and Hank Payne spent Sunday visiting with Dr. and Mrs. N. M. Levitt.

Miss Christina Loring of Spokane arrived Saturday for a two-weeks visit with her mother, Mrs. John Loring, and other relatives.

Mrs. N. E. Beach was called to Clarkston Wednesday on account of the illness of her friend, Mrs. Olive May Ingraham. She will return Sunday.

Mr. and Mrs. Chas. Ingle and children, Wilma and Marie, and Mr. and Mrs. E. D. Johnson of Pullman spent Sunday visiting at the Chas. Herman home.

Mr. and Mrs. Matt Tonnig and children left for their home at Weiser, Friday, after spending several days at the Chas. Herman and Ira Hanson home.

Mr. and Mrs. Fred Tweed and children of California visited Sunday with friends. Mr. Tweed was formerly a Genesee resident, he having owned the Tobin ranch north of town at one time.

Mr. and Mrs. Chas. Mochel and little son Paul of Walla Walla returned to their home Sunday afternoon after visiting several days with Mr. Mochel's parents, Mr. and Mrs. George Mochel.

Mr. and Mrs. George Mochel and Mr. and Mrs. Chas. Mochel and little son, Paul, visited at the home of Mr. and Mrs. Chas. Vinegarholtz in Lewiston last Friday, and spent the evening picnic at Asotin.

Miss Oma Castle returned to Moscow Tuesday after spending ten days with her parents, Mr. and Mrs. Carl Erikson. She was accompanied by Kenneth Halverson, who has been visiting a few days at the Erikson home.

Mrs. Wood Gash and daughter, Miss Bertha, visited at Potlatch Saturday where they joined Mr. Gash and the three went to Spokane Sunday, where they spent the day visiting. Mrs. Gash and Bertha returned home Monday morning.

P. Dinsen drove to Spokane Saturday to bring his wife and little daughter back with him. Mrs. Dinsen and baby daughter, Enge, arrived in Spokane Friday from Hamburg, Germany. Mr. and Mrs. Dinsen will occupy the Burdie residence in the north part of town, for the present.

Mary E. Lauce of Washington, N. J., who had spent the past three weeks visiting her cousin, Mrs. John Vandenburg, and husband, left Monday morning for Seattle, from which place she expected to go to points in Alaska, returning to her New Jersey home over the Canadian Pacific. She has been touring the United States for the past three months.

**A Music Treat**

Their program was rendered in that same manner which has brought international fame to the St. Olaf Choir. Such balance and blending of parts is seldom found in similar organization. Badger State Banner, Black River Falls Wis., Jan. 2, 1926. At Genesee Valley Lutheran Church, Sunday night, August 29. 9-1

**NOTICE**

We sell Conoco gasoline for 24 1/2¢ cash. Time price, 27¢ cents. If paid within 30 days, a discount of 2 1/2¢ a gallon will be allowed.

Miss Christina Loring of Spokane arrived Saturday for a two-weeks visit with her mother, Mrs. John Loring, and other relatives.

Mrs. N. E. Beach was called to Clarkston Wednesday on account of the illness of her friend, Mrs. Olive May Ingraham. She will return Sunday.

Mr. and Mrs. Chas. Ingle and children, Wilma and Marie, and Mr. and Mrs. E. D. Johnson of Pullman spent Sunday visiting at the Chas. Herman home.

Mr. and Mrs. Matt Tonnig and children left for their home at Weiser, Friday, after spending several days at the Chas. Herman and Ira Hanson home.

Mr. and Mrs. Fred Tweed and children of California visited Sunday with friends. Mr. Tweed was formerly a Genesee resident, he having owned the Tobin ranch north of town at one time.

Mr. and Mrs. Chas. Mochel and little son Paul of Walla Walla returned to their home Sunday afternoon after visiting several days with Mr. Mochel's parents, Mr. and Mrs. George Mochel.

Mr. and Mrs. George Mochel and Mr. and Mrs. Chas. Mochel and little son, Paul, visited at the home of Mr. and Mrs. Chas. Vinegarholtz in Lewiston last Friday, and spent the evening picnic at Asotin.

Miss Oma Castle returned to Moscow Tuesday after spending ten days with her parents, Mr. and Mrs. Carl Erikson. She was accompanied by Kenneth Halverson, who has been visiting a few days at the Erikson home.

Mrs. Wood Gash and daughter, Miss Bertha, visited at Potlatch Saturday where they joined Mr. Gash and the three went to Spokane Sunday, where they spent the day visiting. Mrs. Gash and Bertha returned home Monday morning.

P. Dinsen drove to Spokane Saturday to bring his wife and little daughter back with him. Mrs. Dinsen and baby daughter, Enge, arrived in Spokane Friday from Hamburg, Germany. Mr. and Mrs. Dinsen will occupy the Burdie residence in the north part of town, for the present.

Mary E. Lauce of Washington, N. J., who had spent the past three weeks visiting her cousin, Mrs. John Vandenburg, and husband, left Monday morning for Seattle, from which place she expected to go to points in Alaska, returning to her New Jersey home over the Canadian Pacific. She has been touring the United States for the past three months.

- 3 heifers, coming one year old.
- 1 purebred Jersey bull, 3 years old.
- 1 bull calf.
- 1 brown mare, 8 years old.
- 1 bay colt, two years old.
- 10 shoats, weighing about 90 pounds each.

I will also offer for sale at this time the mammoth Kentucky jack, "John Hooper," and the black Percheron stallion, "Maiden," and plow.

1 Job Deere gang plow.

Terms of Sale: On all sums of \$20 and under, cash; over that amount time will be given until October 1, 1927, on approved bankable notes bearing 8 per cent interest from date. No property to be removed until terms of sale have been complied with.

JOHN P. KRIER, Owner.  
D. L. BRESSLER, Clerk. 9-2

### Estimate of Necessary Expenditures for Fiscal Year 1926-1927, and City Tax Levy

Whereas the estimate of probable amount of moneys necessary to be raised by the City of Genesee, Idaho for the fiscal year 1926-1927, for which appropriation is to be made as follows:

- General Fund ..... \$2700.00
- Bridge and Improvement Fund, 1926-1927 ..... 1300.00
- Street Lighting Fund ..... 1200.00

The total amount of money received from all sources the previous fiscal year was \$7421.32. Be it resolved that a Levy of 10 mills be made for General purposes, and a special Levy of 5 mills be made for Bridge and improvement fund purposes, and a special Levy of 5 mills be made for street lighting fund total of 20 mills.

Passed by the Council and approved and signed by the Mayor this 2nd day of August 1926.  
(Seal) John Meyer, Mayor  
Attest, W. W. Burr, City Clerk.

### Where Genesee Girls Will Teach

Miss Mayme Krier has been engaged to teach the Smith school, north of town.

Miss Kathryn McMahon will begin teaching the 6th of September at the Pine Grove school.

Miss Eva Qualley will go to her school near Troy to teach the same grades she taught last year.

Miss Maxine Eichen expects to teach at Mosby Rock, Washington. Her school will begin early in September.

Miss Olive Mulalley, who was employed at the Danielson school last year, will again resume her duties at the same place.

Miss Mary Wardrobe, who has taught in the Spokane city schools for the past several years, will again teach in that city.

Miss Hope Michelson will leave the last of the week to engage in teaching near Craigmont, where she taught for several previous years.

Miss Agnes and Sylvia Johnson are to be employed in the same school where they were employed last year, near Palouse, Wash.

Miss Hazel Ouse will leave Saturday for Thompson Falls, Montana, where she will again teach the coming year in the public school.

Miss Johanna Dwyer left last Sunday for Troy, near which place she will again teach school. This is Miss Dwyer's fourth consecutive year in the same district.

### Radio Fans to Hear London

David Sarnoff, general manager of the Radio Corporation of America has announced that he has completed arrangements with the British Broadcasting company by which regular radio programs will be broadcast for the United States from London early this fall between the hours of 2 and 7 in the morning, London time.

It is felt that these hours, which are from 9 p. m. to 2 a. m., eastern time, which will make it 6 to 11 p. m. in Genesee, will permit American audiences to listen in at a most suitable hour for them.

Mr. Sarnoff said that his chief object in visiting Europe was to arrange for the broadcast of radio programs to European artists, soloists and famous dance bands which they cannot hear at home.

And now Marconi has announced that he has perfected a loud speaker that can be heard for ten miles. It is a cinch that it wouldn't do to use in some of the gatherings where much "confidential" conversation is going on about your neighbors.

He's Still Around

What has become of the old-fashioned agitator who wanted the government to "seize" this or that public utility?

## Fall and Winter Stocks Complete In Every Department

We announce complete stocks in every department of this big store and never before in the history of the R. C. Beach Company have the assortments been better and the styles more attractive.

Cooperative buying with other big stores has made it possible for us to secure the lowest possible prices.

We have had three buyers in the New York market who have recently returned home enthusiastic over their purchases and the quality and styles shown for fall and winter 1926.

A wonderful showing and exceptional values in the women's Ready-To-Wear department.

Men's clothing and furnishings in the most complete stock shown in the Inland Empire.

Two splendid shoe departments, one on the main floor and one in the economy basement.

The famous Pendleton line of Indian robes and fine red blankets, complete stock of cotton and wool blankets from the lowest price up.

The Economy Basement is better than ever, thousands of dollars worth of quality merchandise priced lower than elsewhere. Don't fail to visit the Economy Basement.

Let us figure with you right now on your fall bill of merchandise, complete.

### THE PICTURE SHOWS

#### Harold Lloyd Here This Week

If you have tears, prepare to hide them; if you have cares, prepare to shed them; and if you have troubles, prepare to forget them, for Harold Lloyd is coming!

Harold—with his lensless spectacles and ingratiating smile; his shy, appealing manner and wholesome, contagious laughter—is coming to the High School Opera House, Friday and Saturday nights of this week in his latest funfest, "For Heaven's Sake!" to make you laugh and chuckle and grin and guffaw and roar at his antics, adventures and thrilling experiences on the missionary in the slums of a big city.

Yes, Harold is a palming-singing salvationist in his new comedy opus—a mighty crusader, who comes to the conclusion that the underworld can stand a lot of uplifting. Just picture him trying to persuade the tough and gangster to trod the straight and narrow path and you'll have a faint idea of the uproarious action, the hysterical excitement and the delirious fun concentrated in "For Heaven's Sake!"

Of course there is a girl at the bottom of Harold's strenuous soul-saving efforts—a lovely and lovable girl, charmingly personified by Jobyna Raiston, who furnishes the love interests so necessary to every picture. Noah Young, James Mason and Paul Wiegand are others in the capable supporting cast. "For Heaven's Sake!" was especially written for Lloyd by Ted Wilde, John Grey and Clyde Bruckman. Sam Taylor directed.

#### "The Unwritten Law"

The feature film for Saturday night, August 28, at the Hotel Genesee Theater, is "The Unwritten Law," with Elaine Hammerstein in the leading role.

The story is of a beautiful girl who lives with her father and is employed as private secretary of a wealthy man, John Randall, who falls madly in love with his pretty secretary. But she loves another, an employee of the same office, one Jack Wayne.

Wayne who is about to leave for Mexico for the firm, begs Helen to marry him and leave with him as his wife. Helen refuses on account of her father, but promises Jack she will marry him and marry him as soon as he returns.

Randall having succeeded in getting Jack out of the way and thinking he will have more chance of getting Helen, starts laying plans to force her to marry him. He instructs his men to kidnap Helen and send out all letters for Helen which came from Jack—and then complications set in.

#### "Sealed Lips"

For Sunday night, at the Genesee Hotel Theater, the leading picture will be entitled "Sealed Lips," with Dorothy Revier and Cullen Landis in the leading roles.

Every hand was pointed at beautiful Margaret Blake when George Garnett, executor of her father's estate, lay on the floor, perhaps dead in a pool of blood.

Her lips were sealed. No one knew that in an adjoining room was the sister of the man whom Margaret loved. No one raised a hand to her defence. All knew her as the daughter of a fair, but notorious gambling house owner—and that she had operated the establishment for a time after her gambler-father's death.

In a flash she had disappeared.

#### "The Lone Wolf"

The feature picture for the Hotel Theater for Wednesday night, September 1, will be "The Lone Wolf." Also a dandy comedy. Watch boards in front of theater for full announcement.

#### Terteling & Sons Do Grading

J. A. Terteling & Sons of Moscow have been awarded the contract for grading approximately nine miles of the unfinished portion of the North and South highway between Riggins and Pollock. This contract covers the last important link in this road in the Salmon river canyon. Work will start this fall after the summer traffic.

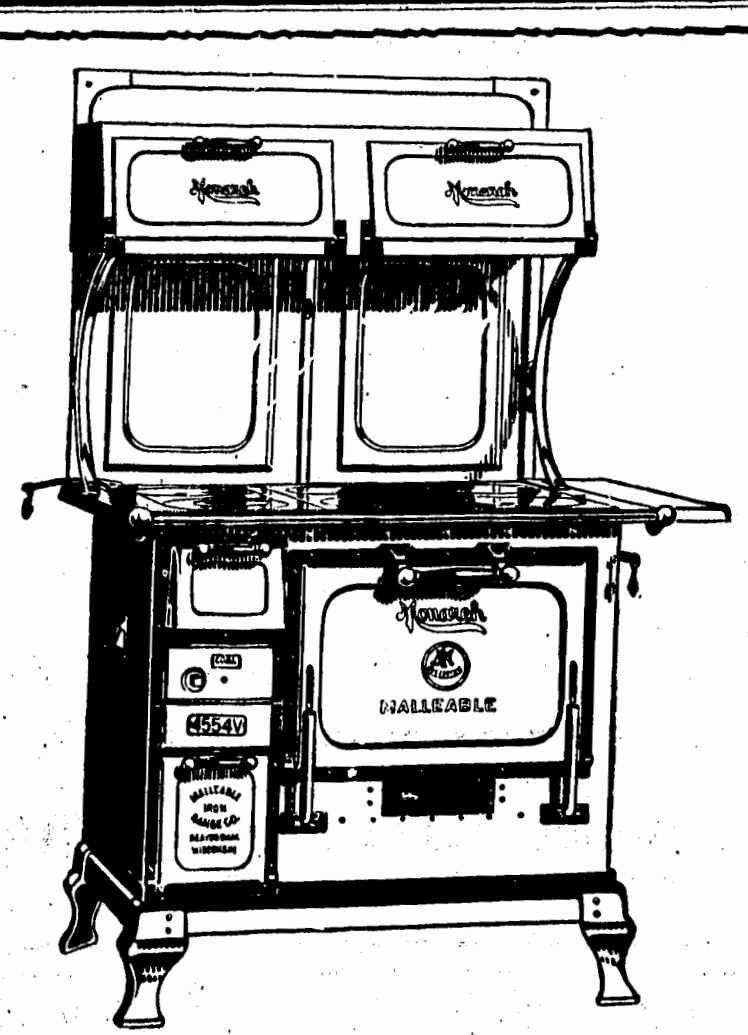

#### Sells Much Property

G. F. Shirred, Fullman realtor, says he has closed three real estate deals during the past month or so of small proportions. He is offering a good buy in a farm in this issue of the News.

Trade with advertisers.

## Ten Reasons for Buying a MONARCH and How It Will Lighten Your Kitchen Work

1. Patented Duplex Draft. Easily controls uniform heat the full width of the flues, on the cooking surface and in the oven—a big fuel saver.
  2. Mirco Processed Top. A rust resisting blue-black finish—attractive in appearance—requires no stove blacking.
  3. Vitrified Flue Linings. A tough glass-like substance fused into the steel flue and oven linings—a real protection against fumes, gases from fuel, rust and corrosion.
  4. Riveted Oven Construction. Possible only through the use of unbreakable malleable iron—assures a rigid leakproof oven—the secret of perfect baking results.
  5. Wood Oven Door Handles. Always cool—attractive in appearance—sufficient space provided between handles and door frames to prevent burning of hands.
  6. Exceptional Oven Capacity. Large roomy oven, 24 1/2 inches deep—permitting the use of four two-pound bread pans at one time.
  7. Sanitary Leg and Base Construction. The legs on all Monarchs are filled at the base—a sanitary feature—eliminating dirt catching corners.
  8. Hot Blast Type Firebox. A firebox adaptable for soft coal and wood or when desired a special firebox designed particularly for hard coal and lignite.
  9. Malleable Iron Construction. Through the use of malleable iron where strength is required—excessive weight is eliminated—quicker heating surfaces are acquired and a more rigid range throughout.
  10. The Monarch Organization. The reputation and quality building policy of the Malleable Iron Range Company is back of every range sold, assuring complete satisfaction.
- These are only a few of the leading features found in MONARCH Ranges that are being enjoyed daily by the many satisfied MONARCH OWNERS

## At Close of Day

By O. Lawrence Hawthorne

CONGRESSMAN FRENCH BE HONORED AT LUNCHEON

Congressman Burton L. French, of the north Idaho congressional district, was the guest of honor at a luncheon affair to be held in the new central Idaho country on Friday evening beginning at 6:30 o'clock, so says the Lewiston Tribune. This is the first time this part of Idaho has been recognized in such an affair in recognition of the necessary appropriations for rehabilitating the plant. In view of the law at the sanitarium has been selected for the luncheon and an attendance from all parts of the central Idaho country is expected.

There will be no formal program but there will be an organization of the luncheon and talks will be given by the people of the Lapwai country and by representatives of the central Idaho communities. It is expected a review of the work at the Indian agency, the plan for the future and the needs of the central Idaho country will be reviewed by H. L. Dwyer, district superintendent, who has initiated the movement that has brought the improvements to the Lapwai agency.

The meeting will be opened to all of Idaho but it is expected a larger percent of the attendance will come from the central Idaho communities. Moscow will very naturally be the center of a large delegation and Lewiston will be well represented. It was stated that practically every point in the entire central Idaho region had already indicated an intention of being represented by a delegation and with favorable weather on Friday, it is expected a very large gathering of representative central Idaho people will greet Congressman French and express to him personally their appreciation of his work in congress.

### Twenty Years Ago

Before another year rolls around the music of automobiles will be heard in Genesee. We know of at least three persons, all able to stand the extravagance, who have serious intentions of investing in good machines. The following news item appeared in the Spokesman-Review, Wednesday, sent out from Washburn, Wash., "W. E. Gage of Spokane, for 20 years a wheat buyer in Washington and Idaho, succeeds S. L. Farnsworth as manager of the local depot of the Farmers' Grain and Supply company. For three years he was buyer for the company at Lind."

### Wesley's Coat Quickly Whitens

In cold countries where snow prevails during a long winter many animals change the hue of their coats to a white tint. The case of the weasel is especially curious; it retains its brown coat until the first snow appears, and then whitens in a few hours.

### Piety and Puritans

Piety is indifferent whether she enters at the eye or at the ear. There is none of the senses at which she does not knock one day or other. The Puritans forgot this, and their beauty out of the meeting house and slammed the door in her face.—James Russell Lowell.

### TOWN PROPERTY CHANGES HANDS—MUCH MOVING

Several pieces of residence property have recently changed hands and considerable moving is of necessity being done in Genesee.

Henry Hanson and family last week moved to the property recently purchased from Mrs. Sadie Mending. Walter Emerson and family having occupied the residence for the past few months, have moved to the Herman residence, two blocks to the north.

A deal has recently been closed whereby Ernest Peterson has become the owner of the Virgil Sampson residence in the east part of town and Mr. Peterson will soon occupy it as a home. Mr. Sampson last week bought the Martin Meyer cottage in the west part of town and will occupy it as a home.

Mr. M. E. Marston, who has been residing in the Schooler property for the past year, will move to the Sprubek property, Mr. Manning and family, who have been occupying the property, will have rooms at the hotel for the present, it is understood.

Dr. T. A. Elliot has purchased the F. C. Shork cottage on "Church Hill" and will take possession soon. Mr. and Mrs. Shork expect to move their household goods and jewelry store to Pullman.

Mr. M. M. Shultz and family will occupy the Taber residence as soon as vacated by Dr. Elliot and his mother. A deal was closed last week where by Lars Liberg has become the owner of the former R. S. Sullivan home. Mr. Liberg having made the purchase from E. S. Barton of Moscow.

Mr. S. McCuarr has closed a deal for the purchase of the Burr building, in the north part of town, which he has been occupying for the past two years.

Mrs. G. A. Bumpass has moved from the Rosenstain house to the Sprubek property, vacated by C. E. Manning and family, who will take rooms at the hotel for the present.

Isaac Isakson and family have taken a lease on the Henry Hanson property, in the northeast part of town, and will soon move in from the ranch for the winter.

### Will Give Recital

A piano recital will be given by the younger pupils of Mrs. Hornemann on Monday evening, September 6, in the High School opera house, as follows:

- Sweet Little Baby Song..... Verdi
- Accompianist, Mary Schlueter
- Our First Dance..... Czerny
- Beverly Manning, Helen Edwards.
- (a) The Contented Bird..... Rowe
- (b) Barcarolle..... Offenbach
- Bonnie Lange
- Triot: The Paper Chain..... Lynes
- Evelyn Krier, Mercedes Smolt
- Rachel Broemmeling
- The Dance of the Brownies..... Layer
- Helen Beach
- Pink Pearls..... Engelmann
- Hazel Craft
- Evening Song, Duo..... Coerne
- Janita Bowers and Helen Beach
- In Rank and File..... Lange
- Mercedes Smolt
- The Buzziing Bumble Bee..... Bugbee
- Helen Thiesen
- Tableau (Hansel and Gretel)..... Humperdink
- Evening Prayer
- Butterfly..... Merkel
- Eloise Emmett
- The Sailor Boy's Dream..... Le Hache
- Vivian Olson
- Le Carnaval de Venise: Duo..... Czerny
- Edith Craft and Mary Schlueter
- American Legion March..... Lavelle
- Maurice Krier
- Here Comes the Band..... Spaulding
- Ralph Broemmeling
- Grand Military Gals..... Durand
- I Piano: Rosa Broemmeling
- II Piano: Vivian Olson
- Potpourri: Hansel and Gretel..... Humperdink
- I Piano: Bonnie Lange
- II Piano: Mary Schlueter
- Sextette for two pianos..... Waldtental
- I Piano: Paul Perkins
- II Piano: Viola Blume
- III Piano: Vivian Olson
- IV Piano: Frances Smylie
- Rosa Broemmeling
- Audrey Pleiman

### Card Club Entertained

Mrs. T. H. Herman was hostess to the card club and a number of invited guests Tuesday afternoon. Pinochle was played at six tables.

The honors of the afternoon were won by Mrs. Nellie Haymond and the consolation was given to Mrs. Virgil Sampson.

Besides club members, the guests present were Mrs. Harry Schueter, Mrs. Milton Rader, Mrs. Gus Fickens, Mrs. Ray Edwards, Mrs. Fred Shirrod, Mrs. Christianson, Mrs. A. White, Miss Hazel Ouse, Miss Mary Wardrobe, Mrs. Frank Hoorman, Mrs. Virgil Sampson, Mrs. Walter Emerson, Mrs. Milton Follett and Mrs. V. A. Beckman.

Mrs. Fred Shirrod invited the club to meet at her home, Sept. 14.

### Can You Swim It?

About the most absorbing topic nowadays is about those who have succeeded in swimming the English channel. Two successful attempts have been made since Miss Gertrude Ederle successfully negotiated those treacherous waters—but unless you are able to "make the cross" the channel there is little likelihood of your becoming famous right away, unless you are a famous member of a film colony, then you will be paid more homage than if you were president of the United States. It seems to be necessary to "make the cross" nowadays in singing, dancing and playing games. At a late hour dainty refreshments of ice cream and wafers were served.

### Senior Class Reunion

The senior class of '26 was delightfully entertained Friday evening by Lawrence Kraut at the home of his parents, Mr. and Mrs. Chas. Kraut.

The evening was delightfully spent in singing, dancing and playing games. At a late hour dainty refreshments of ice cream and wafers were served.

### Warehouses Filling Up

One of the problems that has been facing the local warehouses this week is what to do with the wheat. There has been a car shortage and the elevator and warehouse practically filled and a steady stream of trucks and teams hauling every day, it is rather a difficult situation. It is reported that this season's crop has every indication of surpassing that of last year. There is much grain still to be hauled. Few farmers are selling on the present market.—Kendrick Gazette.

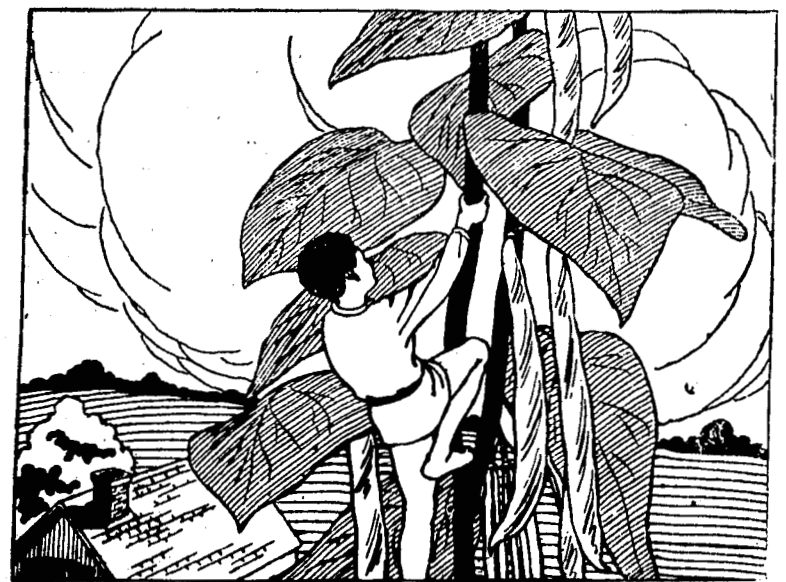

### Boats Not a Failure

Notwithstanding the reports that Latah county will have a bean crop failure this year, news from the ridges south of Henry to the effect that the crop there will be pretty good and a long way from a failure. Anton Nelson and other Bear Ridge farmers stated that the recent rains had helped the crop wonderfully and that a fair yield is expected. However it seems that the bean crop failures in the upper Potlatch valley are as mighty scarce articles.—Latah County Press (Dearie).

Genesee is a good town. Page seven will interest you.

# The Evolution of Jack's Bean Stalk

THAT must have been a tough old bean-stalk that permitted Jack to climb up an enormous amount of this castle in the clouds. In height it out-distanced the Tower of Babel, which aimed at heaven but never got there.

If the stringless beans we have today were as tough as those on Jack's beanstalk, the farmer would not be as popular as he is now. The modern "stringless bean" is not one of the miracles performed by that wizard of plant life, Luther Burbank, but is an achievement of the canning industry.

Only when she buys them in a can is the housewife able to save herself the trouble of "stringing" beans. The commercial canner, with its highly perfected equipment, has relieved her of this burden.

Now is the time to eat stringless beans, because of their remarkable cheapness. Owing to the unusually large crops, last summer, the canner put up an enormous amount of this healthy and delicious food, and therefore are selling at a great reduction, in order to reduce their large stock on hand. So the consumer is reaping the benefit. And the thrifty housewife will take advantage of the "special sales" to stock her supply shelf with a goodly amount of stringless beans, rejoicing that she may thus practice economy and at the same time save herself time and trouble.

Besides cooking stringless beans in white sauce or butter, here is a delicious way of serving them "peasant fashion":

Simmer contents of a No. 2 size can of beans with one ham bone or a half-pound of bacon fat, for an hour. Season, and serve with vinegar. The bean's lack of fat is thus supplied.

## EFFICIENT POULTRYING ADDS MILLIONS TO WASHINGTON'S WEALTH

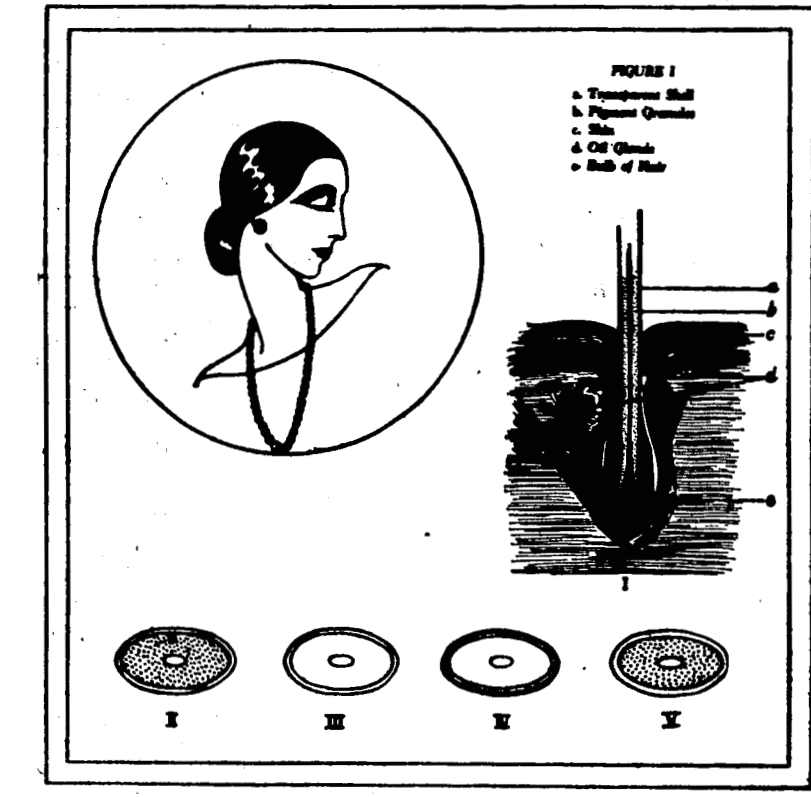

A gross annual increase in our Washington state wealth of \$2,404,500 has been obtained within the last five years by increased efficiency in the poultry industry.

Five years ago the extension service of the State College asked its specialists to set themselves a definite job; that is a goal or set of goals which they expected to reach in four or five years. At that time, W. D. Buchanan, extension poultry specialist, set for himself five goals, two of which were as follows: An increase of 20 eggs per hen in four years, and an increase of 5 per cent in the net profits per dozen eggs.

Probably nobody, except Mr. Buchanan, believed that these goals would be reached. At that time he said: "If these goals are reached, it will add \$1,250,000 a year to the wealth of the state of Washington." Which caused a friend to reply: "Don't count your chickens before they are hatched." It was good advice, but Buchanan's reply was: "We are going to see that they hatch."

The United States census report for 1925, shows that the Washington hen averaged 35.5 eggs. The 1920 figures gave her an average of 72.2. The gain in the five year period is 21.4 eggs per hen. Massachusetts, with an average of 79.2 eggs per hen in 1920 was the highest state in the Union. In 1925

## What Do You Know About Your Hair?

KEEP your hair beautiful—for the old adage about a woman's hair being her crowning glory is as true today as of yore. To do this, however, it is not only necessary to nourish the hair, but also to correct and neutralize a diseased condition—the presence of gray, faded and streaked strands. Medical science considers gray hair a disease, calling it "canities."

As hair, as seen under the microscope (Figure 1) is a long slender stem with a lustrous covering. The number of individual hairs in a single scalp is approximately 150,000, but the number, size and length of the hair differs greatly with individuals. The normal rate of growth is about a half inch a month and there is a more rapid growth in the summer than winter.

Every hair has essentially the same structure. Underneath the covering there is a layer of fibers. In these fibers nature puts its color. Thus, the natural color of hair, as it appears to us, is colored by the transparent covering of hair. The color is due to tiny granules of pigment and the exact shade of hair is influenced by the number of these granules.

When hair turns gray it simply means that nature no longer supplies color to the inner layer of fibers. The natural color of hair is inner hair substance is grayish and it is seen through the lustrous transparent covering of the hair. It is impossible to duplicate the natural color of hair by applying

# Mrs. Van Thick Lightens a Shaving Tragedy - - - By Dick Spencer

her hair had risen to 84.1 eggs, a gain of 4.9 in the same period that Washington gained 21.4. The census figures for all states are not available, but it is firmly believed that Washington's average hen is the best in the world.

Mr. Buchanan gives great credit to every county agent and every progressive farmer in the state for contributing to the final result. The beginning was made when D. T. Maxwell of Kent, began his work in breeding some 20 years ago. Hollywood and Beall and a dozen other good breeders have done their part. The extension service simply stepped in and sold the idea of better breeding to the rank and file of our poultrymen.

Asked if breeding was the only factor involved, Mr. Buchanan replied: "No. As soon as our goal was fixed we began work on every project that would help us to reach it. Better breeding, more careful selection of females and the use of pedigreed cockerels, was an important part, but it was not all. We had projects on housing, so that the birds might be more comfortable; projects on feeding and nutrition, so that they might be better nourished; projects in rearing, so that the pullets might have more vitality and be better able to digest their feed. In fact no stone was left unturned that would aid us in reaching our goal."

In accounting for all factors contributing to the gain in production, Mr. Buchanan says that the increase in the number of commercial flocks of Kent, began his work in breeding some 20 years ago. Hollywood and Beall and a dozen other good breeders have done their part. The extension service simply stepped in and sold the idea of better breeding to the rank and file of our poultrymen.

## AMERICA'S NATIONAL BEVERAGE ONCE HAD ITS BOOTLEGGERS AND SCOFFLAWS

Coffee Drinkers of an Earlier Era Had Depend Upon the Bootlegger for the Cup that Cheers but does not Inebriate

WITH nose twitching like a rabbit's, and with a beam of light from a dark lantern to prevent a stumble over the butler, a man in a suit proceeds cautiously down a dark alley.

Form halves before an open window. A loud sniff is followed by a grunt of exultation; and then, in response to the waving of the lantern, the first form is joined by half a dozen others. Two minutes later the bootlegger and the butler are made for the nefarious trade are in the hands of the servants of the law.

A raid upon a bootlegger's den in Twentieth Century America? Not at all. The scene is laid in Prussia nearly 150 years ago, and while it is indeed a bootlegger's den in which the raid is made, the bootlegger is not a dealer of alcoholic liquors—but of coffee.

A Government Monopoly

The use of coffee as a beverage beyond that recorded by history, it was not until the sixteenth century, and for many years following its introduction into a number of countries was subject to government regulation.

In Prussia coffee was made a government monopoly at the last quarter of the Eighteenth Century. Only those holding a special license were permitted to sell a cup of "coffee smeller," who went about with their noses in the air, trying to detect intruders of the law, were set to guard against illicit coffee roasting and the bootlegging of the beverage.

Behind the Bars.

In the treatment of the bean during the stages it must pass through to arrive at the roasting, Columbia, or Central America of the kitchen of the American housewife.

One improvement that has recently added greatly to the drinking quality of coffee involves a radical change in the method of roasting. In the earlier type of roaster, large quantities of coffee were roasted at one time. In the new machine that has just been developed, small quantities of coffee are roasted through perforated tubes revolving over a fire which carries off the fumes of roasting, preventing their absorption by the coffee.

Although this machine roasts small quantities at a time, the operation is continuous; so the output is not only better in quality but greater in quantity than was the case with the old machine. Thus there is afforded, a striking example of the efforts made by the American coffee manufacturer to bring about a constant improvement in the quality of his product—efforts which have played an important part in raising the average American's coffee consumption from one cup to two cups a day.

Coffee in America

Since the night of the Boston Tea Party—December 16, 1773—the use of coffee in the United States has grown by leaps and

## Slight Improvement in Agricultural Income

Farmers Still at Deadweight Compared to Industrial Workers.

Income from farm production the past season, 1925-26, again showed a moderate improvement, but farmers as a class are still at a financial disadvantage to industrial workers, according to an analysis of receipts and expenditures just completed by the United States Department of Agriculture.

Gross income from agriculture is estimated at \$12,415,000,000 for the year, compared with \$12,002,000,000 for 1924-25, an increase of about 3 per cent, the increase appearing in both cash income from sales and in the value of products consumed by farm families. Increased income from potatoes, dairy products, and meat and milk more than offset declines in income from grains and cotton, the department says.

The total gross income is made up of \$9,891,000,000 computed as cash income from sales, and \$2,524,000,000, the value of food and fuel consumed on farms. It includes \$2,727,000,000 for poultry products; \$2,746,000,000 for meat animals; \$1,682,000,000 for cotton and cotton seed; \$1,625,000,000 for fruits and vegetables, and \$1,565,000,000 for grains.

Receipts increased somewhat more than expenses, yielding an increase in net income available for all capital employed including reward for managing the industry, of 4 per cent. This larger net income represents a rate of return for all capital and management of 4.6 per cent compared with 4.4 per cent the preceding year. These rates are not comparable with rates of return on investments in other industries. Estimates of comparable returns for corporations in 1925 gave 11 per cent as the return on capital and management compared with 3.3 per cent for agriculture.

Out of the gross income of \$12,415,000,000 farmers paid \$6,812,000,000 including \$1,216,000,000 for wages and labor; \$3,076,000,000 for products and services of other industries, repairs and maintenance of buildings and equipment; \$635,000,000 taxes on operator-owned investment; \$1,127,000,000 rent on property rented from non-operators, and \$758,000,000 interest on mortgage and other indebtedness held by mortgagees.

The difference is \$5,603,000,000, of which \$2,524,000,000 represents the value of food and fuel consumed on farms, and \$3,079,000,000 is the net cash income, which gives an average per farm of \$879 compared with \$354 in 1924-25 for operators' capital, labor and management.

The analysis shows further that the farm operators earned on their own net investment including management, after paying rent and interest on debts, 3.5 per cent, compared with 3.2 per cent in 1924-25. These rates are considerably less than the rates

## Federal Meat Inspection Explained in Booklet

The falling off of 20 per cent in the consumption of bread in the United States during the last 45 years is attributed, according to federal statistics, to the cityward movement of population. Strange as it may seem, which are more expensive to buy than starchy foods, eat more of them than do farm families, that can have an advantage simply for the growing.

Vitamines, those mysterious substances that our systems crave and must have if we are to thrive physically, are found largely in leafy vegetables and some fruits. It may be due to the artificial life of the city that causes city-folks to crave vegetables more than they do bread.

There was a 10 per cent increase in the 1926 lamb crop over the previous year. This, however, will not materially influence prices, although there may be a slight decline for a few months. Wool prices remain about the same with but small demands.

Irish Cobbler Potatoes Do Well in Franklin County

A demonstration of early variety potatoes in Franklin county shows good results for Irish Cobblers. They showed 70 pounds increase over two adjacent rows of Bliss Triumph. On an acre basis the increase would be 2250 pounds. The Cobblers yielded 13,000 pounds of tubers. Demonstrations of Netted Gens are being started.

## Authority on Beauty Is Authority on Food Too

KATHLEEN MARY QUINLAN, famous New York authority on Beauty, is a specialist not only in face cream, but also in cream for one's diet. She believes beauty aids as well as food should be simple, and pure, and wholesome.

Eggs, milk and honey are the basis of a Beauty Treatment and has originated, and some of these same ingredients she combines, with a bit of sweet, to create a beautiful way—her yearning for goodies. Here is one of her favorite recipes:

Macaroni Creams  
1 tablespoon gelatine  
1/2 cup cold water

Soak gelatine in cold water five minutes. Make a custard of egg yolks, sugar, salt and milk. Add soaked gelatine to hot custard, and when nearly cool, add whites of eggs, beaten until stiff, macaroni and vanilla. Turn into individual molds, first dipped in cold water, and chill. For "French Cream" add one square chocolate.

1 egg  
2 cups milk  
1/2 cup sugar  
Few grains salt  
1/2 cup ground macaroni  
1 teaspoon vanilla

Large quantities of skim milk are being converted into a marketable product by a number of companies utilizing a process recently perfected by the Bureau of Dairying, United States Department of Agriculture.

One company has sold more than a million pounds during the last year for poultry and hog feed. At Grove City, Pa., this manufactured product—concentrated sour skim milk—is made by dairymen and sells at four cents a pound, netting 62 cents a hundred pounds of skim milk.

Briefly, the process consists of the use of a culture containing a mycoderm, which is a yeastlike organism, and an active culture of the lactic-type. When used in combination they are able to develop more than double the amount of acidity in the curds alone. The use of this mixed culture has made it possible to create an acidity of 2 per cent in skim milk which when concentrated at the rate of 3 to 1 gives the finished product an acidity of 6 per cent. An acidity of 2 per cent removes the difficulties formerly experienced in concentrating skim milk in the vacuum pan, and 6 per cent acidity in the finished product prevents spoiling. The product has been kept in good condition for more than a year.

Concentrated sour skim milk is a pasty, semisolid product. As poultry feed it is mixed with water or dry mash. Good results are obtained with the product when fed to baby chicks in a dilution of 1 to 3; when fed to laying hens either in paste form or in a mixture of 1 pound paste to 1 pound of dry mash; and when fed for crabs fattening at the rate of 60 pounds of the paste to 100 pounds of mash.

The utilization of surplus skim milk in manufacturing this concentrated product promises a greater output of surplus milk for the use of the dairymen for his products and assures the poultryman of an unlimited supply of good feed that has excellent keeping qualities.

Foot and mouth disease is on the increase on the Continent of Europe, and as a precautionary measure, the United States government has placed an embargo against meat carcasses from the Continent. Holland is the most seriously affected country by this embargo, as England is her largest customer for veal and pork products.

A careful survey of oat rust in Skagit county in 1925 showed that it extended in a northwest direction from a marsh where Barbary bushes were located. The infection decreased as the distance from this marsh increased. The bushes have been eradicated and the trouble is not expected to occur this year.

In the heart of Spokane, close to the downtown community, the business district, the Coeur d'Alene Hotel offers the traveler every convenience. Popular prices and perfect service. "The Hotel With a Personality."—Adv.

## Dairymen Must Help Themselves Says Scollard

"There are two million people in the entire state of Washington and there are nine million people in what will soon be Greater New York," said J. A. Scollard, president of the cooperative picnic recently held on the Southwest Washington fair grounds. "If you think," he continued, "that these nine million people are interested in you or are thinking about your problems you are mistaken. No one is thinking very much about you, except yourself, so you must do your utmost to add to your membership. You must learn to think as a unit. The structure you aim at cannot be built in a day but the future is assured if you continue to cooperate."

Mr. Scollard, continuing, outlined the history of the building of the great cooperative dairy associations of Western Washington, calling attention particularly to the success of the Lewis-Pacific Association of which he is president. This association has grown in five years from a business of \$439,000 in 1921 to \$680,761 in 1925, and with the final liquidation of the bonded indebtedness in 1927, the association will be the owner of a plant and business free from debt, valued at \$500,000. It is through cooperative effort, Mr. Scollard asserts, that Washington dairymen can enjoy a 25 per cent better market on milk per hundred pounds, and one cent a pound on butter. This advance does not seem much on a few hundred pounds of either milk or butter, but on the enormous production of an association's membership it runs into thousands of dollars annually. This advance in price is gauged by the markets of the Sound cities as compared with that of Portland, Ore., which is universally lower. In Oregon the dairymen have not as yet been able to cooperate effectively as they have up here.

## "THE STAMPEDE OF YOUTH"

Under this heading, Vera L. Conroy writes a most illuminating article telling of the good and bad of the youth of the present day. The article appeared in the recent number of Good Housekeeping, and it is one that all parents and guardians of young people should read, as well as the young people themselves. It may be of help to both generations to hear what is the opinion of many of the judges of our juvenile criminal courts, for the reason of the lawless attitude that is taken by the youth of the present day to all rules and regulations that experience has shown to be good for the upbuilding of character and the overcoming of vicious tendencies.

It is the opinion of Judge F. McIntyre, of the Court of General Sessions "that my experience in this court leads me to believe that most of the serious crime in our country today is carried on by young people between the ages of sixteen and twenty-three. Among these, all classes are represented." He gives also as his opinion that the causes for the rotten moral standards and general "jazz" spirit of the times lie merely wasted or inefficiently used being converted into a marketable product by a number of companies utilizing a process recently perfected by the Bureau of Dairying, United States Department of Agriculture.

One company has sold more than a million pounds during the last year for poultry and hog feed. At Grove City, Pa., this manufactured product—concentrated sour skim milk—is made by dairymen and sells at four cents a pound, netting 62 cents a hundred pounds of skim milk.

## Improving the Soil By Green Manuring

A noted agricultural writer recently said, "The great need today is not to grow two blades of grass where but one grew before, but to grow better grass where the one will bring greater return for the labor and money expended in growing it." What will make it possible for us to grow better crops?

More fertile land, of course, so our problem really shifts itself down to improving our soil. Once we have accomplished this—larger and better crops will naturally follow. Just as a factory can, and always does, produce better goods when better equipment is used, so will better land grow better crops. Diversified farming, crop rotation, the application of fertilizer, all help greatly in building up the fertility of the soil.

The least expensive way to build up soils, however, is by the practice of "green manuring" which consists of growing leguminous crops, such as clover, alfalfa, or vetch, and plowing them under preparatory to growing the regular crop. These green manure crops improve the soil as follows:

Add plant food—by taking nitrogen from the air and depositing it in the soil for succeeding crops.

Create humus—by incorporating in the soil all the vegetation produced. Conserve moisture—by shading the ground in extreme dry weather and by adding humus to the soil which naturally holds moisture.

Control weeds—known to spread most rapidly while the land lies idle, by occupying the ground when regular crops prevent weeds from spreading. It is a fact that weeds are most aggressive while the land is idle.

Improve tilth—by root penetration, which breaks up lumps and hard soils, by the addition of humus which allows the penetration of air and sunlight, all of which are great factors in making the soil easier to work.

The cost of growing "green manure" crops is insignificant compared to the cost of the regular crop. According to one of our leading experiment stations was estimated as being one to six. Six dollars return for each dollar investment is certainly a good return.

Gray vetch or peas sown with either corn or wheat, when a plow will turn under, make the best green manure crops for Western Washington. The rate of seeding need not be heavy; 40 pounds of vetch or 50 pounds of peas with about 30 pounds of grain makes a good crop and will produce all the ground that the plow will turn under by planting time in the spring if the seeding is done during the early fall months.

These crops have another value in that they can be used for feeding livestock in case of emergency. Many farmers prefer pasturing for a couple of weeks just prior to plowing them under in the spring when hay is high in price and other pasture scarce.

By all means, get in the habit of helping yourself by increasing the productive capacity of your land through the growing of green manure crops.

Another demonstration of the importance of better bulls for use in dairy herds is found in a report of the U. S. Department of Agriculture relative to the use of purebred bulls on the Island of Porto Rico. The expert station maintained there during the direction of the department has used purebred bulls from the states to mate with the native cows of its own herd. Milk production has increased with each succeeding generation. The native cows of the foundation herd yielded on the average 8.09 pounds of milk per day per cow. Mated to Guernsey bulls these cows raised calves that yielded on the average 11.9 pounds per day per cow; the third generation produced 13.5 pounds per day.

This shows an increase of 47 per cent for the half-breds over their native dams, and a 115 per cent increase for the three-quarters bred over the half-bred.

A Chinaman may at the same time be a Taoist, a Buddhist, and a Confucianist, the three religions being closely allied.

Five farms, comprising seventy-two acres, are still in existence on Manhattan Island.

A total of 950 poultrymen attended the fifth annual poultry school held in the Whittom County. The program included three days of work, on a wide range of poultry subjects. Those attending the school asked that it be extended to a four-day school next year.

Say, Bill, whenever I go to Spokane I never miss getting some of those tender meals at the Tray Tavern on Howard Street just north of Riverside Avenue.—Adv.

## MAKING TAX FIGURES TALK

TO ADD a new set of figures to the array that are dangled before the voters this year a genius for trouble-making set the experts of State Auditor C. W. Clausen's office to work to determine whether or not King County has been offsetting the cost of state university maintenance and building contributions to the state highway funds.

Well, King County has, if the fact is of any interest to anybody, King County's surplus highway contributions since 1905 are a little bit less than the total amount the rest of the counties have contributed toward the support of the state since the beginning of that statehood in 1889. The figures, of course, may be subject to correction for slight errors but they satisfy a curiosity.

The "put and take" tables of the state highway engineer show King County up to the beginning of this year had paid \$12,133,935 into the highway fund, while the rest of the state had paid \$12,133,935 into the highway fund. This is 26.6% of the total received from all counties of the state. Applying this percentage to the \$11,394,144 of federal aid received allows King County a credit of \$3,030,842 from governmental funds. As only \$3,795.60 has been spent on building King County roads, \$11,619,075 of King County money has been taken for the benefit of other counties.

University appropriations up to January 1, 1926, are the only ones that can be considered for that is the last period when the highway accounts were tallied. Up to that time \$18,200,812 of appropriations had been made available since the state was admitted. King County's taxes have averaged about 27% of the state total, which, when deducted, leaves \$133,522,293 to come from other sources. Still further adjustments must be made for student fees, university tract earnings, interest on investments and other income so the contribution from other counties is whittled down close to the total of King's road contribution to the smaller counties.

## FOREST FIRES REACH HUGE TOTAL

Nine hundred and ninety-nine forest fires have been reported by Oregon, twenty-two national forests of Oregon and Washington for the present fire season, up to July 31.

More than 67,000 acres of national forest land, 1,396 acres of private land inside national forest boundaries, and 26,609 acres of private land outside and adjacent to national forest boundaries. Only 131 of the fires burned over ten acres and over 295 were held under ten acres and over one quarter acre; while 573 fires were held under a quarter of an acre or less and not available as yet.

Over half of the fires were caused by lightning. The forest service reports call attention to the fact that the lightning hazard has been unusually severe this year; at the same time it expresses appreciation of the fact that many forest visitors have cooperated by being more careful.

The British Parliament, in 1933, refused to sanction the building of a railroad in England on the grounds that it would corrupt the morals of the Brit boys by giving them easy access to the dissipations of London.

Charlie Big Eyes, an Alaskan Indian, under tribal decree, must pay his squaw as alimony one bushel of properly butchered and delivered, tomluk skin, dressed and stretched, five gray fox pelts or one silver pelt, and one hundred full-grown salmon each year.

Oh, Boy! Give me some more of the good coffee at Jim Bold's Cafe, 1414 3rd Ave., Seattle.—Adv.

THE GENESEE NEWS

Genesee, Idaho
ENTERED AT THE POST OFFICE AT GENESEE AS SECOND-CLASS MAIL MATTER
P. C. MCCREARY, PUBLISHER
Subscription price, strictly in advance, \$2.00
FRIDAY, SEPTEMBER 3, 1926

Please Pay Your Subscription

A number of subscriptions to the High School opera house are still unpaid and the school board is very anxious that they be taken care of as soon as possible. They are only small ones, individually, but in the aggregate they amount to considerable.

The school board has made an extra effort in securing this building to be used as a gymnasium by the Genesee public school, and for public entertainments and they are very desirous of getting the money collected that has been subscribed. So if you have not already paid your subscription, please call at the Genesee Exchange Bank and do so as soon as possible. Thank you.

Family Reunion

A very pleasant day was spent last Sunday at the country home of Chas. Shoeler, when a number of relatives assembled to enjoy a picnic dinner.

Rev. Peterson Resigns Pastorate
The people of this community will learn with much regret that Rev. Gerh. A. Peterson, pastor of the Genesee Valley Lutheran church and of Our Saviors Lutheran church at Moscow, has tendered his resignation as pastor of these churches to accept the pastorate of the Montia Lutheran church, Spokane. He will take up his new duties some time in November.

St. Olaf Quartet Pleases
The college quartet of St. Olaf, which appeared at the Genesee Valley Lutheran church Sunday evening, gave one of the most satisfying concerts heard in our community in a long time.

Parents of Daughter
Mr. and Mrs. M. E. Mushlitz are the proud parents of a baby daughter, born at St. Joseph's hospital, Lewiston, Friday morning, August 27. Mother and babe are doing nicely.

Public Sales

Mrs. Wm. Flomer, having decided to quit farming, will sell at public auction, on Tuesday, September 7, commencing at 10 o'clock, 14 head of horses, 2 head of cattle, 2 brood sows, harness, farm machinery and household goods. Free lunch at noon.

Notice of Election

Notice is hereby given that an election of the qualified voters of Independent School District No. 2, of Latah county, Idaho, will be held on Tuesday, September 7, 1926, in the school house, between the hours of 1 p. m. and 6 p. m. of said day, for the purpose of electing two trustees, whose terms will be for three years.

USED STOVES

- 7 Head of Horses
1 black mare, 6 years old, weight 1400
1 gray mare, 6 years old, weight 1550
1 black mare, 8 years old, weight 1500
1 sorrel mare, 10 years old, wt. 1450
1 black mare 12 years old, wt. 1550
1 gray mare, 13 years old, wt. 1700
1 bay gelding, 12 years old, wt. 1300

Free Lunch at Noon

TERMS OF SALE—All sums of \$20 and under, cash; over that amount time will be given, until, October 1, 1927, on approved bankable notes bearing 8% interest. No property to be removed until terms of sale have been complied with.

CHURCH NOTICES

Congregational Church
Sunday school at 9:45 a. m.

St. John's Lutheran Church
English services will be held each Sunday morning at 10:30 o'clock, with the exception of the first Sunday of each month, when German services will be held at the usual hour.

Christian Church
Bible school at 9:45 a. m.
Morning service at 11 o'clock. Subject, "The Parable of the Sower."
Evening services at 7:30. Subject, "Did the Roman Catholic of the Protestant Churches Give Us Our Bible?"

The chairman of the official board requests all members to attend a business meeting Sunday at noon. The missionary society will meet Tuesday afternoon with Mrs. Chas. Shoeler. Mrs. Curran will be the leader.

Genesee Valley Lutheran Church
Gerh. A. Peterson, Pastor.
Saturday at 2 p. m. Confirmation instruction.
Sunday, September 5, at 9:45. Sunday school and Bible classes.
At 10 a. m. Norse services.
At 11 a. m. Morning worship.

A cordial welcome is extended to you and your household to these services.

"U" to Open September 14

The University of Idaho opens the 1926-27 college year on Tuesday, September 14, with the arrival of the student population, expected to be the largest and most representative in the history of the state.

Everything Set for School

The Genesee Public Schools are ready for the opening of school next Monday. The building and grounds have had a complete going over and all indications are that the high school will have the largest enrollment in its history. A new course in advanced mathematics will be offered to upper classmen. This course will consist of advanced algebra and solid geometry.

As stated last week registration of all classes will be on Monday and regular classes will begin on Tuesday, September 7. Miss Anderson will again have charge of the commercial classes, Mr. Wicka will take science and athletics, Miss Wolff will have history and English and Supt. Mushlitz will have charge of the mathematics classes.

The prospects are for a better football season than last year. Most of the last year lettermen are back and some very good new material is coming in. Genesee always boasts good athletic classes, which must go with getting his courses lined up for next good scholarship.

Coach Wicka is in town this week, and incidentally looking over the athletic situation. There is good reason to believe that the school year will be bigger and better than ever.

Lewiston - Upstairs In Old Elk's Building

All "Livable" Houses Taken

Genesee is suffering from a house shortage of the better kind. Every house that is in a livable condition has either been sold or rented and more will be sold to desirable parties were they even in fair condition. There are still quite a few farmers who have been in the habit of spending the winter in town to take advantage of the public schools, who have not as yet secured living quarters.

There are several houses in town that have been standing idle for several years for the reason that they are not in a condition to be occupied. A few dollars properly applied to them would bring in big returns for the investment. A modern house in good condition always rents for enough to pay big interest on the investment.

Too Much "Fire Water"

Charley Wilson, who was on his way to attend the Whitman-Latah fair at Garfield, last Wednesday (a trifling early) was picked up from the roadside just north of Genesee by Sheriff Summerfield and taken to Moscow where he was taken before Judge Adrian Nelson and given a chance to tell just how he came to be in the fix he was in.

Charley was accompanied on his trip by a bottle of alcohol rub, which he said he was using on his horse, and it is probable that the "fame" overcame him while engaged at his work of curing the horse from some imaginary ailment. Anyway, he was almost past the navigation point when taken in charge by the sheriff.

A Splendid Rain

This section of Idaho was visited by a splendid rain which began falling Sunday night and continued intermittently for several hours, not only laying the dust and washing off things generally, but making the roads quite slippery, necessitating the use of chains on cars.

Practically all the threshing has been finished and most farmers were ready for the moisture, which will bring out fall pasture and go a long way toward putting the ground in shape for fall plowing. Generally, it was quite welcome.

PERSONALS

Mrs. Al White of Lewiston is visiting with her brother, Fred Shirrod and wife.
Mrs. Hanson of Spokane spent Thursday and Friday at the Con Steltz home.

Miss Lillian Luvaas of Moscow arrived Monday for a visit at the Glenn Sampson home.
Miss Thelma Hanson of Spokane arrived Thursday for a visit with Miss Kathryn McMahon.

Miss Grace Jain, who is employed in Moscow, spent the week-end with her parents, Mr. and Mrs. Walt Jain.
Miss Margaret Sampson returned home last Thursday, after spending a week with Mrs. Art Mayer at Troy.

Miss Kathryn McMahon returned Thursday evening after spending the greater part of the summer in Spokane.
Mr. and Mrs. Jack Vandenberg of Lewiston returned last evening and Monday at the John Vandenberg home.

George Bolio left Monday morning for Kimberly, being called there on account of the serious illness of his mother.
Grace Cressett returned to Lewiston Sunday after spending several days with her sister, Mrs. Isaac Isaaksen.

Mrs. Fred K. Bressler left last week for a visit at Pullman with her daughter, Mrs. George Gannon, and grand.

Mr. and Mrs. Jim Nelson and daughter, Miss Mildred, of Seattle arrived Sunday for a two-weeks visit with Mr. and Mrs. Nels Lande.

Mrs. Louis Steltz and children returned to their home at Puyallup, Wash., Monday, after spending several weeks with relatives and friends.

Mrs. Kretz, sister of John Weber, and Mrs. Humartus; both of St. Louis Missouri, left Wednesday for their homes after visiting several weeks at the Weber home.

Mr. and Mrs. Harry Vandenberg and little daughter of Seattle arrived last Thursday for an extended visit with Mr. Vandenberg's parents, Mr. and Mrs. John Vandenberg.

Leonard Dorchester has returned to his home at Wetaskiwin, Alberta, Canada, after having spent the past 14 months at the home of his mother and aunt, Mr. and Mrs. W. R. Hickman.

Congressman Burton L. French of Moscow and Arley Decker of Potlatch, made a short stop here last Thursday on their way home from the republican convention which was held at Weiser.

Mr. and Mrs. Marion Mayer and little son of Lewiston spent Sunday at the Al Mayer home. They were accompanied home by Miss Inez Mayer who spent several days visiting at their home.

Misses Ida, Dorothy and Harriet Evans daughters of Dr. and Mrs. Evans of Genesee, returned to Genesee, now residing at Dover, spent Wednesday and Thursday of this week visiting friends here.

Mrs. J. M. Clarke and daughter left Wednesday after spending a few days at the F. W. Longcosty home. They are on their way to their home in Seattle after having taken a trip to California. Mrs. Clarke and Mrs. Longcosty are sisters.

Miss Manette Gravelle left for her home in Minneapolis Wednesday morning, after having spent the past six months here with her sister, Mrs. D. B. Eronson, and family. Mrs. Eronson accompanied her as far as Spokane, returning to Genesee Friday evening.

Mrs. M. Laven came over from Uniontown on Friday of last week and spent some time here looking after business interests. Mrs. Laven and daughter, Mrs. B. B. Odum, who have been visiting their daughter and sister, Mrs. Busch, at Uniontown, left Friday for their home at Seattle.

Misses Theresa and Frinda Scherrer and brother, Hans Scherrer, who have been visiting their sister, Mrs. Fred Connick, left last week for their home at Granite Falls, Wash., after having spent some time visiting their sister and family. They were accompanied home by little Miss Marie Connick, who will attend school at Granite Falls.

SCHOOL ACCESSORIES

I am stocking the old reliable Parker fountain pens. The house that has been making pens the last 50 years, and they know how to do it. That they lend and others follow can't be denied. All pens are guaranteed by myself and I have the Parker Co. buck of me, and I don't mean maybe.

The life pen was first invented by the Parker Pen Co. They are like the Eastman Kodak Co., a firm that is in front in all new inventions in their line. If this is not true, disprove it. I am never too old to learn.

# THE BULLY OF ST. ANNE'S

By Vingie E. Roe

(Continued from Last Week)

At the simple words, so full of evident truth, the girl fell back with a hand at her throat. Here were forces beyond her grasp.

Du Bois sighed and shook his great body. He touched the officer with his foot. "Tak him," he said gently, "tak them all—go—go quick. Du Bois has had enough."

He stood, huge limbs apart, hands on hips, grotesque with blood and dirt, and watched the canoes head away down river where might be had such remedial skill as the country afforded. Then he turned wearily away, but at the all he stopped.

On the white surface of a split log set in the cabin's wall there lay the print of a hand in blood—Hargrave's. For a moment he looked at it, then he stepped inside and felt the ancient power and performance with his previous best. This is the simplest and surest way to prove that it pays to install Champions and that they are the better spark plug.

# CLIMBING

You know how your car performs on the "testhill" in your vicinity. Install a set of Champions and compare the increased power and performance with your previous best. This is the simplest and surest way to prove that it pays to install Champions and that they are the better spark plug.

# TUBBY

stumbled—the waiting, the dead beat, the rifled room, the open wall safe.

"An' so he is run away—'an' come to ze Qu'Appelle."

As he ceased for a moment Rodney Blake leaned forward, his hands work, his mouth open. The girl at his side was white as milk. Hargrave moved uneasily, and stepped back a pace amid the hushed throng. Du Bois went on.

"So now we come to end of story—and Du Bois furnish something to fill ze gap."

He stooped gently, still holding the crowd with his eyes, and slipped the paper on his shoulder to the earth. The helpless head rolled over, and they beheld his face. Rodney Blake gasped and swayed forward, but Mora and the factor held him up.

"Wait," went on Du Bois, "there come to Du Bois' cabin some people on traverse—and his heart ache for his frien', for ze eye are zose who live him an' zose who would take his life—his own people an' ze law. Du Bois is hid in ze cave, laugh at ze law. Bot Fate—she is betray him—'an' zat law wot nevaire sleep—it demand ze man in ze left. So, Du Bois, who 'ave give his word of honor to save his frien', mus' be murderer if he keep it, if he let his frien' go free. An' so, he added pensively, 'I try for sure to kill two men. He is all bot succeed—'wen someone speak and Du Bois mus' obey. In zat great fight a gun off an' shoot ze poor lad in ze left, so zat Du Bois mus' bring him at las' to zat civilization wot 'treat him so hard—to save his life."

Here the spellbound listeners stirred, but Du Bois went steadily on.

"You recall ze, Pere. Tenuau?" he asked, holding up the pamphlet which he had laboriously extracted from the slender form, its unconscious face hidden on the trapper's back.

To every corner of the post went his ringing call, and the populace came running—the factor himself, the youths, the women. Rodney Blake came on his daughter's arm, the lieutenant, and even Hargrave, his broken arm bound and slung.

When all the actors of the little tragedy were there, Du Bois spoke, knowing that every eye was leveled on him in hostility.

"My frien'," he said, "I would parlay. Even the savage has zat right. Also I am ready to kill ze man wot make one false move. My god knif, she not onlee stab swift an' sweet, bot she is fly too, straight at him who might reach for gun. Attendez."

"Las' fall Du Bois is meet with stranger—young, stranger who is in distress. He tak' him to zat cabin where Du Bois is make an' ze become frien'. Real frien'—for soon the trapper come to love his lad. Bot sorrow is in ze other's heart. Always he sit with head on hand an' try to recall a point. Always it run up to certain point an' stop an' he cry 'I can't remember.' My god, Du Bois—I can't remember."

Swiftly now the speaker sketched the tragic tale of that night in New York—the stag party, the drunken

He had beheld the gates of Paradise, and earth was laid in shadow. So he sat in the creeping dusk, his arm along the table—and he did not hear the light plash of paddles, the splash of a small canoe. He heard nothing save a woman's flaming voice, saw only blue eyes flashing with contempt.

Presently there came to his doorstep the faint sound of feet. A slender form hesitated against the lavender glow without. A low voice said very softly, "Monsieur Du Bois."

As in a dream he leaned forward, peering, unbelieving. His hand still lay supine on the table's edge. Then Mora Blake held out her arms and there was the sound of tears in her trembling voice.

"Artine," she said, "Artine Du Bois, I have come here to you—because—I know it now—I am your mate!"

Du Bois straightened. He leaped to his feet, his great arms spread wide to fold the girl against his heart. Then humbly fell upon him, and he went slowly down before her to lift her garment's hem and lay his lips against her dress.

"But—my past?" he asked diffidently.

"What does the past matter when we have our great love?" she asked tenderly, "and little Marcelle has told me of your tenderness and strength. I am content."

She gathered the black head against her breast as good old Father Tenuau loomed in the shadowed doorway, his face shining.

"Now," he said, "my son, between us we'll save your reckless soul!"

(THE END)

### START COW TESTING IN BEACH SECTION OF PACIFIC COUNTY

Cow testing work has just been started in the beach section of Pacific County by A. R. Reber, tester for Lewis County. A total of 157 head are being tested, principally under the Whatcom plan. Four hundred cows are now being tested in this county. Following ten months of testing, the value of the work will be pointed out, and an effort made to put 1,000 head under test.

Java is one of the most distinctly volcanic regions of the world, having fourteen active volcanoes.

# Keeping Buck in the Game.

### COMPLETE TUBERCULIN TEST SHOWS NO REACTORS

At the close of a complete test of dairy cattle in Franklin county, the report is made that there is not a single reactor or suspect. A total of 110 herds have been tested this spring, in which there were 756 cows. This record is the cumulative result of five years of testing.

The Jefferson county cow testing report shows that for the last month pasture has made up the principal feed. Of 211 cows tested a average butterfat production was 41.9 pounds.

Oh, Daddy, when in Seattle bring home some Bolts good bread and pastry. 1414 3rd Ave.—Adv.

### save fuel bill

Where "PERFECTION" Plaster Wallboard is used for walls and ceilings there is a marked conservation of heat and a corresponding saving of fuel. This is due to the Gypsum plaster core which also makes "PERFECTION" a practical fireproofing agent, and in many cases fire which has been checked in its early stages by this modern insulating material.

Its insulating properties can be easily tested by placing a piece of paper on a sample of "PERFECTION" and applying a blow torch to the other side. Mail "PERFECTION" to walls and ceilings just like lumber and get a first class plaster job that will not crack.

Ask your local dealer for sample and further information, or write to the manufacturers,

### Life-Giving Air

Fresh air is as essential for good health of cows, horses, hogs, and other animals in dark, poorly ventilated, damp barns affect their health and helps to spread tuberculosis when the germs are present. Clean, wholesome milk can be had only from healthy cows. Poor ventilation also causes damp or wet barns. In the cooler sections of the United States unventilated barns are frequently found in which the roofs and ceilings are dripping wet with condensed moisture. This condition results in molding of feed and hay stored in such buildings. Proper ventilation aids in the prevention of spontaneous combustion in haymows and granaries.

### Size Up Each Ear

The best way to select seed corn is from the stalks standing where they grow. As soon as the crop matures and before the first hard frost, go through the field with a picking bar and husk the ears from the stalks that have produced the most good corn without having any special advantages, such as excess of space, moisture, or fertility. Avoid late-maturing which are heavy because of excessive sap and ears from down, smutted or otherwise diseased plants. Select seed from normal, healthy plants that have produced most heavily in competition with a full stand of vigorous plants, that are neither too early nor too late maturing for the conditions where the corn is to be grown.

### Sun's Radiant Energy

If the radiant energy of the sun falling on the earth were wholly converted into mechanical energy, each individual's share would be sufficient to lift a weight of 3,300 pounds through a vertical distance of nearly 20 miles every minute of his life.

### A Queer Creature.

One of the queerest creatures imaginable is the midwife toad. The female lays her eggs in long streamers, which the male collects and wraps around his legs. He carries them about in this way until they hatch into tadpoles.

### A LITTLE TALK ON THRIFT

(By S. W. Strauss, President American Society for Thrift.)

We are rapidly approaching another Labor Day, which to millions means the end of the vacation period and the return to regular vocations.

While these vacations have proved enjoyable and helpful, the majority of persons will welcome again the return to work. For in the final analysis one of the greatest sources of human happiness is work. And this is a truth that could be more widely learned to advantage.

Too many follow the rule that the more money they can avoid the greater will be their happiness.

There is no true happiness in an idle life. Waste of time is a form of thriftlessness that is as destructive of right pleasure as waste of money or waste of health.

Work alone brings happiness, because work is creative and uplifting and because all rightful impulses of the human race have their fulfillment only in work.

This does not mean that there is no correct place in life for vacations or that diversion is not in accordance with good thrift.

You cannot transform a man into a machine and get human results. But within the average routine of life work brings the most satisfying happiness; work that is right, upholding and helpful.

Do not cherish an ambition for idleness. Wasting time never, under any circumstances, can bring anything but regret. The routine of life, if it is well to remember that happiness through work is one of the fundamentals that can be continually counted on. It is a splendid type of true, constructive thrift.

### Secured the Necessary Data

After an exploration of Europe for several days, Senator Pat Harrison, of Mississippi, turns in his report to the American people. He visited Germany, Belgium and France. In Paris, he entered into extended talks with taxi drivers, hotel couriers and waiters at boulevard cafes. The data thus accumulated, after careful coordination and analysis, have yielded this distilled wisdom:

1. A high tariff is an abomination.
2. The European debtors of the United States cannot pay unless the United States removes its tariff on their goods.
3. As the demand for payment of these debts is unabated, it follows that the tariff will be the leading issue in the campaign of 1928.

Senator Harrison's report is that the tariff will be the leading issue in the campaign of 1928.

But Senator Harrison is not of that ilk. He believes in personal research as a means of vindicating opinions already informed. French customs officers, waiters, taxi drivers, et al., would be rendering poor service to their country if they failed to supply its champion with data whereby he can force the United States to close its factories for the benefit of Europe. They did not fail. They gave Senator Harrison the information he was seeking. He will do the rest.

Friendship costs least in money and makes most in profits.

### Many Snakes Deserve Protection

Contrary to popular belief, most common snakes are neither obnoxious nor poisonous. The Biological Survey of the United States Department of Agriculture. The prevalent dread of snakes is due largely to the fear of such venomous species as the cotton-mouth moccasin, the copperhead, the rattlesnake, the massasauga, and the coral snake. Although these poisonous snakes have no place in a settled country, and efforts should be made to eradicate them, yet most common snakes are beneficial in their food habits and should be protected.

Wherever snakes are present in abnormally large numbers there must be an abundance of living animal food in the vicinity to attract them. This food consists largely of injurious rodents and insects, pests of garden crops and stored foodstuffs. Snakes eat such small living creatures as earthworms, spiders, grasshoppers, salamanders, small frogs, mice, rats, chipmunks, and young rabbits. King snakes are able to kill rattlesnakes, and have been known to eat them. The little red-bellied snake subsists to a large extent on slugs, which are very destructive to gardens. Bull snakes and gopher snakes destroy large numbers of injurious rodents in the course of a year.

The food habits of very few snakes conflict with man's interests. Water snakes feed largely on small fish, but not as a rule on species used as food by man. The moon or gopher snake eats crawfish and toads. The black snake and coach whip snake destroy a large number of ground-nesting birds particularly quail and eggs in the nest, and have been known to eat young chickens and even pheasants. Local campaigns for the destruction of these and of poisonous snakes may be desired in many districts, and in snubbing and shooting are, so far as known, the only successful methods of eradication. No successful apparatus for snaring snakes has ever been devised, and most species seem immune to poison gases.

### Happy School Days

School bells toll the knell of vacation days as the first weeks of September are heralded by falling leaves, the invigorating tang of autumnal air, and most important, the happy days of school. While expressions of reluctance toward school attendance have become time-honored expected things from all youngsters, a new note has crept in in recent years and is being evidenced more than ever this fall.

Idaho boys and girls await the clarion call of the school bell with honest admissions of eagerness. Idaho schools of today have achieved that happy combination of work and play, drudgery has been eliminated, interest has been stimulated and school days have become attractive days. September in all phases from the tremulous, yet hopeful, anticipation of the first graders to the joyous renewal of friendships and recognition of work by the "admittedly-mature youngsters" of the high schools and the higher educational institutions of the state.

Zoro Women Supreme, but Ugly

The Zoro women of India are supreme. They woo the men, control the affairs of the home and the nation, transmit property, and leave the men little or nothing to do. The result is, says an eminent scientist who has investigated the race, that they are the ugliest women on earth.

Ode to Skeptics

Tell us not in mournful numbers Advertising is the bunk, For the business men who slumber Son find trade is mighty punk. The End

### Andorra's Strong Box

Six iron locks, connected by an iron chain, guard a massive chest in the council hall of the little republic of Pyrenees. A council from each of the six parishes has a key, and the locks cannot all be opened unless the six councils are present. No stranger is permitted to see the contents of the box, but they are supposed to be sheets of lead upon which is written the charter granted by Charlemagne.

# NOW—THE NEW MEADOWS

## The World's Greatest Washing Machine

### Greater speed, more clothes per tubful, no repairs with the Meadows

If you want improved wash-day service, look to the one washer able to give it. If the economy of home laundering appeals to you, take advantage of the one machine that can do all the work—from buckskin shirts to lingerie. If by chance, you are now shopping for a washer and have tired of looking at the ordinary squat, thick barreled mechanisms—take pleasure in the graceful well turned lines of the Meadows.

The new Meadows is the greatest washing machine we have ever seen. The finest we have ever sold. The speediest—the sturdiest—the best looking.

It is a woman's washing machine. Hundreds of washers have been built to please the eye of an engineer, but this one alone combines the beauty of a piece of furniture with a mechanical sturdiness never before attained in a washer.

You owe it to yourself to do at least one washing with the Meadows. Go back to other machines, clumsy and inconvenient as they

afterwards appear in comparison—if you wish. But you won't.

If there is a thrill in the laundry, it will come in watching the Meadows at work. Such speed! Such thorough cleansing of everything—from the flimsiest to the coarsest garment! Such ease of operation at every stage of the wash!

You are cordially invited to inspect this great washer. Watch it do a wash right in your own basement. Our service man can show you everything to be known about its operation in five minutes.

You alone, with the Meadows, will decide that it has fulfilled its rich promise.

We promise prompt action on receipt of your call. Phone today for demonstration.

The Pine Grove school house is being remodeled and school will begin Monday, September 6, with Miss Kathryn McMahon as teacher.

### THE PICTURE SHOWS

#### Where Was I?

The feature film for the Hotel theater for Saturday night will be Reginald Denny in "Where Was I?" This is another of Denny's laugh-provoking pictures.  
The story goes that Thomas F. Bedford, a staid young business genius, falls in love with the daughter of his fiercest business rival, George Storm. In an effort to break up the match, Storm plots with an actress to disillusion his daughter, Alice. Thereupon, Claire, the actress, claims she is married to Bedford, January 9, 1920. Bedford doesn't know what to do until he tries to find out where he was on that date to refute the claim. He dashes into a subway, unconsciously exchanging brief cases with a bank messenger. He and his secretary are pursued as thieves. Seeking his former secretary they are caught in a taxi and an exciting and funny chase and other humorous complications, Alice clears up the question by recalling that Bedford proposed to her on that date.

#### "The Dark Angel"

"The Dark Angel," with Ronald Cole and Vilma Banky in the leading roles, will be the attraction at the Hotel theater for Sunday night.  
Miss Banky was leading lady with Rudolph Valentino in his last great picture, "The Son of the Shik," and is one of the foremost female entertainers on the front of theater for further announcement.

#### "What Fools Men"

The feature film for Wednesday night, September 8, at the Hotel Theater will be "What Fools Men." If you are anxious to know, don't miss this picture.  
Watch for announcement in front of theater.

#### "Sea Horses"

The above is the caption of the feature film to be shown at the High School, opera house Friday and Saturday nights, September 3 and 4.  
The early scenes are laid on the ocean freighter, and very vividly portray the coarse, crude life of those who go down to the sea in ships. A realistic fight, a wild storm, add to the general excitement. The rest of the action takes place in a coast, where the principal characters come into contact and bitter conflict, and where the plot reaches a climactic point at the height of a terrific tropical rain-storm.

#### In a Way

Missionary—"And do you know nothing whatever of religion?" Canibal—"Well, we got a taste of it when the last missionary was here."

### MRS. L. KLINE DIES SUDDENLY AT COUNTRY HOME

This community was very much shocked last Friday evening when word reached town that Mrs. L. Kline had passed away suddenly at her home, five miles south of Genesee, the immediate cause of death being apoplexy. Deep and genuine grief was expressed by all who knew her.

The accident occurred after an automobile with blinding headlights passed Stearns in his Ford. The lights of the Ford went out at about the same moment and the car crashed through the railing into a culvert, toppled upside down in the ditch, filled with about a foot of water, Stearns said.

Mrs. Stearns was pinned underneath the machine and suffered a severe wound about the head. It is possible that she was drowned while beneath the wreck, the coroner said.

Stearns was slightly injured, but suffered no shock.

John Prater of the Auto Transfer and Storage company, who was passing the scene of the accident, brought the man and woman to the emergency hospital.

Prater declared that several cars were jammed around the scene of the accident, one of them smashing into another car and nearly pushing it into the same ditch in which Stearns' machine was turned over.

Dr. William Newman, deputy coroner, and deputy sheriffs Morefield and Pacific investigated the case. The body of the woman was sent to Hazen & Jaeger's.

It was said that the couple had been married but two weeks and were returning from a visit at Genesee, Idaho, where relatives entertained them.

Stearns is a riveter for the Northern Pacific and worked in the shops at Parkview. After treatment at the emergency hospital, Stearns was taken to his mother's home, 8417 Harrison.

Mrs. Stearns was formerly Miss Sarah Martin and lived in Genesee at one time, going to Spokane some years ago with her mother to reside with relatives in the east.

Mrs. Stearns and her husband had been here for a visit with her grandmother, Mrs. Laura Phipps, and her aunt, Mrs. W. W. Burr, and family and had left here Monday afternoon for their home at Spokane.

### Card of Thanks

We wish to thank our many friends for their kind thoughtfulness and the beautiful floral offerings.

Lemuel Kline.

### Grey Eagle News

Cluett Gustafson motored to Troy last week.

Cleo Taylor is helping Mrs. J. P. Herman this week.

Lorene Platt is home again after an absence of several weeks.

Mr. and Mrs. Robert Gray visited with Mrs. Gray's parents on Sunday.

Mr. Blanchard from Lewiston has been visiting at J. C. Cameron's for a few days.

Harry Perks is again back in the neighborhood and is helping Mr. Bershaw at present.

Mr. and Mrs. W. Hoag and Mr. and Mrs. Ellis, from Spokane, were visitors at the J. C. Cameron home Sunday and Monday.

Robert Parks motored to Rathdrum last Friday, accompanied by Tom Parks as far as Gardfield. He returned home Sunday morning.

Theo Parks and Delpha Cameron spent last Saturday afternoon with Doris Harris, helping her celebrate her birthday anniversary.

School commenced at Grey Eagle bright and early Tuesday morning, with ten scholars attending. There will probably be two or three more pupils to start soon.

### Pine Grove News

Mrs. Sweet and daughter, Dorothy, are visiting in Clarkston.

Mr. and Mrs. Frank Lambert had Sunday dinner at the Henry Whitted home.

Mr. and Mrs. Chas. Parker of Lewiston visited at the Spurbuck home on Sunday.

Mrs. G. D. Fleming of Yakima, Wash., and daughters, Miss Esther of Yakima and Mrs. H. Dawson of Seattle, visited at the C. H. Spurbuck home the last of the week.

Ira Fuston and Miss Echo Forsythe returned to Spokane Sunday. They were accompanied by Sidney Spurbuck on his return to Coulee, Wash., after spending the summer with his grandparents.

### Bazaar and Dinner

The Congregational ladies' aid will have a bazaar and serve dinner on election day, November 2.

Further particulars will be given later.

### FORMER GENESSEE GIRL MEETS DEATH UNDER CAR

Mrs. Sarah Stearns, 20, 8417 Harrison, was killed last night shortly before 10 o'clock when the car in which she and her husband, Milo Stearns, were riding crashed into an eight-foot ditch about eight miles south of Spangle on the main highway.

The accident occurred after an automobile with blinding headlights passed Stearns in his Ford. The lights of the Ford went out at about the same moment and the car crashed through the railing into a culvert, toppled upside down in the ditch, filled with about a foot of water, Stearns said.

Mrs. Stearns was pinned underneath the machine and suffered a severe wound about the head. It is possible that she was drowned while beneath the wreck, the coroner said.

Stearns was slightly injured, but suffered no shock.

John Prater of the Auto Transfer and Storage company, who was passing the scene of the accident, brought the man and woman to the emergency hospital.

Prater declared that several cars were jammed around the scene of the accident, one of them smashing into another car and nearly pushing it into the same ditch in which Stearns' machine was turned over.

Dr. William Newman, deputy coroner, and deputy sheriffs Morefield and Pacific investigated the case. The body of the woman was sent to Hazen & Jaeger's.

It was said that the couple had been married but two weeks and were returning from a visit at Genesee, Idaho, where relatives entertained them.

Stearns is a riveter for the Northern Pacific and worked in the shops at Parkview. After treatment at the emergency hospital, Stearns was taken to his mother's home, 8417 Harrison.

Mrs. Stearns was formerly Miss Sarah Martin and lived in Genesee at one time, going to Spokane some years ago with her mother to reside with relatives in the east.

Mrs. Stearns and her husband had been here for a visit with her grandmother, Mrs. Laura Phipps, and her aunt, Mrs. W. W. Burr, and family and had left here Monday afternoon for their home at Spokane.

The entire community will extend their sympathy to the family.

### Given Bridal Shower

One of the very pleasant afternoon features of the fall season was a bridal shower tendered—Miss Eva Hampton at her home north of town on Friday afternoon of last week when some 25 or 30 neighbors and friends gathered to congratulate her on her coming marriage and to leave gifts.

A feature of the occasion in the form of useful and beautiful gifts which are sure to bring many happy memories in after years.

Mrs. Glenn Sampson and daughter, Gertrude, returned Tuesday after spending the week-end visiting relatives in Seattle.

Miss Sophia Kambsch returned to Elk River Monday afternoon after a short visit with her parents, Mr. and Mrs. John Kambsch.

Rev. Paul Sprague returned Saturday after spending his vacation with his parents at Yalta, Wis., and taking a trip to California.

James Kane arrived Thursday for a visit at the Leo Edwards and Roy Hoffman homes. He has spent several months at Belt, Montana.

Miss Anna Kambridge returned to her work in Lewiston, Monday, after having a short visit with her parents, Mr. and Mrs. Matt Kambridge.

Mr. and Mrs. G. E. Tonnig arrived Saturday from Sandpoint for a visit with his sisters, Mrs. Chas. Herman and Mrs. Ira Hanson and families.

Mr. and Mrs. Painter and children of Slepton, Wash., spent Sunday and Monday at the Chas. Whalen home.

Mrs. Pauline Gehrke returned to Spokane Saturday after having spent the past five weeks here visiting relatives and looking after farm interests.

Mr. and Mrs. J. C. McEachron, Mrs. Noel McEachron and son, Jack, and Mrs. Hayes of Detroit, Mich., visited with Mr. and Mrs. H. B. Jones last Sunday.

A. H. Potech and L. A. Wilson have returned from Hot Lake sanatorium. Mrs. H. B. Wilson, whom they accompanied to the institution, is remaining for rest and treatment.

Virgil A. Klemm returned to Lewiston Tuesday morning, where he is employed as bookkeeper at the Gage hardware store, after spending Sunday and Labor day with his parents, Mr. and Mrs. Andrew Klemm.

Charles Lorang of Spokane spent Sunday and Monday with his mother, Mrs. John Lorang. He was accompanied back to Spokane by Miss Christina Lorang, who had been visiting her mother for the past three weeks.

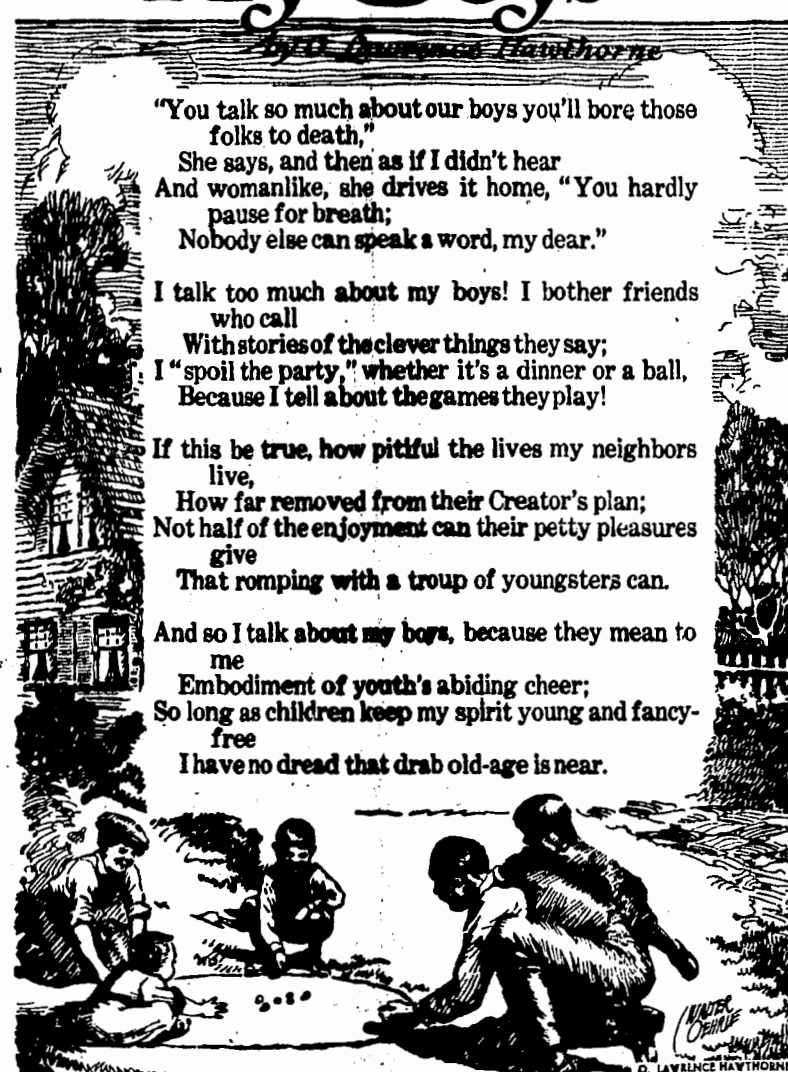

# THE GENESSEE NEWS

VOL. XXXVIII

GENESEE, LATAH COUNTY, IDAHO, FRIDAY, SEPTEMBER 10, 1926

NO. 11

## My Boys

"You talk so much about our boys you'll bore those folks to death."

She says, and then as if I didn't hear: "And womanlike, she drives it home, 'You hardly pause for breath; Nobody else can speak a word, my dear.'"

I talk too much about my boys! I bother friends who call.

With stories of the clever things they say; I "spoil the party" whether it's a dinner or a ball. Because I tell about the games they play!

If this is true, how pitiful the lives my neighbors live. How far removed from their Creator's plan; Not half of the enjoyment can their petty pleasures give.

That romping with a troop of youngsters can.

And so I talk about my boys, because they mean to me.

Embodiment of youth's abiding cheer; So long as children keep my spirit young and fancy free.

I have no dread that drab old-age is near.

### PERSONALS

ROY HARRIS returned Thursday after spending most of the summer in Walla Walla.

Miss Gladys Johnson returned home Monday after spending a week with relatives in Lewiston.

Mr. Oli Hagan and Ole Piamoo left Thursday for an extended visit with relatives in the east.

Mrs. Harold Haymond returned home Tuesday after visiting a week with her sister at Winchester.

Mr. and Mrs. Al Mayer and little son, Glenn, visited in Lewiston, Sunday, with Mr. and Mrs. Marion Mayer.

The guests present were: Mrs. Victor Shaw of Boise, who is visiting relatives here.

The evening was spent in playing bridge and Mrs. Nellie Haymond was awarded a prize for receiving the highest score and Mrs. Ray Edwards was given the consolation.

The guests present were: Mrs. Victor Shaw, Mrs. T. H. Herman, Mrs. Ray Edwards, Mrs. N. M. Leavitt, Miss Esther Martin, Mrs. W. E. English, Mrs. Harold Haymond, Mrs. Frank Hoorman, Mrs. Gibson, Mrs. Leon Follett, Mrs. Mahlon Follett, Mrs. F. C. Shork, Mrs. Fred Nibel, Mrs. Ira Hanson, Miss Rowena Hanson and Mrs. Nellie Haymond.

### The Syringa Club

The Syringa club had a very pleasant meeting at the home of Mrs. Jesse Borgon on Thursday of last week. Needlework occupied the time of the ladies during the afternoon and at 5 o'clock a delicious luncheon was served by the hostess.

The invited guests were Mrs. Geo. Schmidt, Miss Bernadette Weber and Miss Ulbrich.

The club was invited to meet at the home of the president, Mrs. John Whalen, on Thursday, September 23, to help her celebrate her birthday anniversary.

Grouse Season Open  
The grouse season opened here the first of the month, but so far as has been learned, none of the local hunters have been "pinched" for exceeding the speed limit by having over stacked gamebags.

There are many who claim they can hit a "coyote about once out of every 50-shots, but when it comes to drawing a bead on a swiftly-moving grouse they say it is too fast work for them.

### Will Give Dance

There will be another of those dandy dances in the American Legion hall Thursday evening, September 16, to which you are especially invited. A. F. Wolf, who were re-elected to succeed them.

Monday Bunch Entertained  
The Monday club was delightfully entertained Monday at the home of Mrs. Leon Follett. The afternoon was spent socially. Mrs. Victor Shaw of Boise, was the only invited guest.

### PUBLIC SCHOOL NOTES OF MUCH INTEREST

Registration Monday showed marked increase over the enrollment of last year. The whole school shows an increase of about 6 per cent. This is a very healthy gain and is gratifying to the faculty. It is good to see the upper classmen back in school in Genesee. Many of these were in other schools last year.

The high school shows an enrollment of 90 students.

Football  
Football practice on the field will start next Monday night. The squad having been confined this week to the study of the rules and plays.

Although at present the squad is no larger than last year, more are expected in the near future. Genesee has a very difficult schedule lined up this year, and it is necessary that all those boys who are planning on turning out come to school and start football immediately.

Seventh and Eighth Grades  
School began Monday with an enrollment of 19. Tuesday two more pupils enrolled making the eighth grade enrollment sixteen and the seventh grade five.

A general review has been made in all subjects this week and the new work has begun.

The seventh grade began the work in history with a complete review of the life of Columbus.

**MOTOR TROUBLES DUE TO POOR OIL**

Let's take a typical case of the pace that kills. Your eighty-eight rolls out of the salesroom on its first 2,000 miles. Of course you drive pretty nicely for the first five hundred or thousand miles, so as not to burn her up. You watch the oil gauge and when it slides down the scale you stop at an oil station. And here's where you get into trouble.

"Medium or light oil?" asks the oil man. "Medium," you say because "medium" sounds like a good average. And then whatever brand of oil that particular station has is poured into your crankcase.

All right. Let's go! Soon "3,000" clicks into place on the speedometer, and you let her go to discover what the big eight can really do. A rough overtone sounds, over the sweet purr of the motor, but you're hitting forty-five and are too busy to notice it. Then comes a hint of labor in the drone of the motor and then a musical tap-tap. And as you accelerate the spring up from the floorboard the tap becomes a whack—and then—you have on one to blame but yourself. The \$50 bill the garage man hands you is the cost of a lesson in "Don't Just Say Oil!"

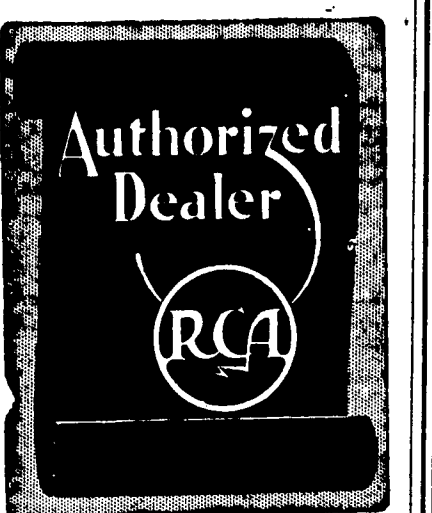

Here is what happened to the inside of the motor. It was a beautiful job to start with—joints cozy and bearings snug, to start with—but it was new metal, and surface ground against surface. Tiny filings washed off into the oil and sank to the crankcase. Some of the "medium" oil you purchased was sticky. Under the increased under friction and permitted the bearing surfaces to wear. The bearings got hotter and wore away quickly, dropping still more filings down into the oil below.

Dust came in through the breather tubes and air intake, carbon began to accumulate, and as the motor was over again given a good cleaning out there formed in the reservoir a sand-like mixture of oil, metal and various kinds of grit. And when you let her out the motor sent in an emergency call for more oil and the pump obeying flushed the friction surfaces with a sticky mess until finally a wrinkle began to shriek.

If only every motorist would keep his car supplied with best oil and greases adapted to it, 90 per cent of motor troubles would disappear.

Other One: "Strange, too! He played polo and rode almost every day."

**An Old Pear Tree**  
A pear tree brought from England by Gov. John Endicott of the Massachusetts Bay colony, in 1630, is still bearing fruit on the spot it was planted at Davenport, Mass.

**MORSCHER BROTHERS**

**Twenty Years Ago**

The Sanford Evans family moved to Clarkston Saturday to remain for the winter.

Peter Loring, son of Mr. and Mrs. John Loring, left Tuesday morning for Lewiston, where he has accepted a position with the Vollmer bank.

Monday was a lively day on the local wheat market and we are informed that a good many thousand bushels were sold at a price on a basis of 45 cents for club. Some have disposed of their crop in advance of threshing.

We made the statement some weeks ago that notwithstanding the fact that the present crop would be shorter than that of last year, an equal number of bushels would be marketed at this place. Genesee grain buyers are out for business—and they are getting it. Dealers report the sale of local wheat of grain who live in a territory that does not belong to Genesee. The reason is plain—they are being paid more than the market price.

**Largest Waves**  
From a series of observations made of waves of the Atlantic, Pacific and Indian oceans by a French naval officer, it was found that the largest waves occurred in the Indian ocean, where thirty different waves averaged 29 feet, the largest being 37 feet.

**Copper Carbonate**

What is the difference between copper carbonate and copper sulphate (bluestone)? There is this difference. Blue Stone is made by adding sulphuric acid to scraps of copper and also through nature, from the water that flows through the copper mines.

Copper has an acid radical with a copper base. This acid is what kills the wheat germ and retards germination from 12 to 14 days with a loss of 6% to 8% of the grain.

Copper carbonate is made by treating the copper with another base and that in turn forms two salts, one copper carbonate and the other, Ferric sub-carbonate.

Copper carbonate will stimulate the growth of the wheat and will not kill any of the grain as it does not contain an acid. It can be sown any time regardless of dryness as it does not require moisture.

Use copper carbonate at the rate of 3 oz. to the bushel. There is no danger if you use a respirator (I have them), or use a sponge or wet cloth over the mouth.

The only difference I can find between the two is that one is a dry treatment free from acid and contains more copper than the other and that in turn is what kills the smut germ. There are a number of grades of the copper carbonate, get the 53-55% and you are safe if a large number of farmers and the colleges are correct.

**GRANT CLARK**

Yank: "Well, the Prince of Wales didn't fall for any of our girls, did he?"

**PUBLIC SALE**

The undersigned will sell at public auction, at the Walter Herman farm 3 miles west of Genesee, on **Monday, September 13** Commencing at 10 o'clock a. m. sharp, the following described property:

- 12 HEAD OF HORSES**
  - 1 brown mare, 12 yrs. old, wt. 1500
  - 1 bay mare, 9 yrs. old, wt. 1450
  - 1 bay mare, 12 years old, wt. 1400
  - 1 bay mare, 10 years old, wt. 1350
  - 1 brown horse, 4 yrs. old, wt. 1450
  - 1 brown horse, 11 yrs. old, wt. 1200
  - 1 bay horse, 12 yrs. old, wt. 1200
  - 1 black mare, 12 yrs. old, wt. 1350
  - 1 bay horse, 8 yrs. old, wt. 1400
  - 1 bay horse, 7 yrs. old, wt. 1400
  - 1 sorrel horse, 2 yrs. old, wt. 1300
  - 1 brown mare, 5 yrs. old, wt. 1200
- 12 HEAD OF CATTLE**
  - 3 high-grade milch cows—1 fresh, 2 fresh soon
  - 2 yearling heifers
  - 2-year-old heifer
  - 1 yearling
  - 1 registered Holstein bull
  - 1 2-year-old cow
  - 3 calves
- 16 HEAD OF SHEEP**
  - 1 grassed buck
  - 12 ewes
  - 3 dozen chickens
  - 3 lambs
- HARNESS**
  - 3 sets breeching harness
  - 3 sets lead harness
  - 1 set breeching harness
  - 2 sets plow harness
  - 4 extra collars
- FARM MACHINERY, Etc.**
  - 1 F. & O. 14-inch gang plow
  - 2 horse cultivator
  - 1 3 1/2-inch wagon, with 100-bushel grain tank
  - 1 2 1/2-inch wagon
  - 1 3 1/2-inch Moline wagon
  - 1 4-inch Carley roller mill
  - 1 14-inch gang plow
- Household Goods**
  - 1 extension dining table
  - 1 library table
  - 1 kitchen table
  - 1 washing machine
  - 1 dresser
  - 1 dining chair
  - 1 rocker
  - 1 kitchen cabinet
  - 1 refrigerator

**Forced Sale of Land at Public Auction**

**In Bankruptcy**

At 2 o'clock p. m., on Monday, the 13th day of September, 1926, on the Gerard Bremmeling land, three miles northeast of Uniontown, Wash., 132 1/2 acres of choice farm land. Good improvements, consisting of house, barn, and other outbuildings. Fine SPRING WATER.

Land is well summerfallowed and is ready to seed.  
To be sold free and clear of all incumbrance. The land will carry a loan of from \$50.00 per acre up.  
Sale is absolute and without reserve.

**S. D. WHITE, Trustee In Bankruptcy**

**Reforestation Plans Should Interest Farmers**

Prof. B. P. Kirkland of the College of Forestry at the University of Washington who also operates a fruit and poultry ranch at Vashon Island, has pointed out the importance of reforestation on the logged-off lands of Washington to the farmers of the state.

"The timber industry," said Professor Kirkland, "furnished the largest and best market for the farm produce of the state. This is true because a larger proportion of the people of the state are directly dependent upon the timber industry for a livelihood than upon any other industry, and many industries are indirectly dependent upon the timber resources. This may well be illustrated by the transportation industry. Sixty-five per cent of the freight shipped out of the state over four large transcontinental railroads is composed of forest products and 80 per cent of the boat tonnage on Puget Sound is likewise composed of forest products so that more than two-thirds of the people of the transportation industry are indirectly dependent upon the forest. When the farmer considers the very large demand for his produce from the people who are either directly or indirectly supported by the lumber industry he must realize that the timber resources of this state are one of his greatest assets in that they furnish the very best market for his produce."

"Not only is this true," continued Professor Kirkland, "but the farmers are likewise interested in cheap lumber for a multitude of different uses on the farm as well as for marketing their produce. An acre of western Washington forest produces from 1,000 to 15,000 feet B. M. annually. Hence balanced production between horticulture and forestry requires between two and three acres of forest to each acre of small fruit. Similar situations might be cited with reference to the apple industry and many other farm products. Without sufficient forest production crating material and farm timbers will become prohibitive in price. Anything which can be done to perpetuate forest production, on the non-agricultural lands of the state should, therefore, receive the hearty support of the farmers."

The Interstate Commerce Commission has placed a tentative valuation of \$3,064,500 as of June 30, 1918, on the Washington Eastern Railroad, a branch of C. M. & St. P., according to word from Washington this morning.

In the Heart of Spokane, close to stores, theatres, and the business district, the Coeur d'Alene Hotel offers the traveler every convenience. Popular prices and perfect service. "The Hotel With a Personality."—Adv.

**Jack Sprat and His Wife**

"Jack Sprat could eat no fat, His wife could eat no lean."

NO one ever heard of what became of Jack Sprat and his wife, but it's likely enough that his wife grew fatter and fatter. They seem to have disappeared for every one nowadays seems to be making a courageous and sensible attempt to eat sanely. Over-indulgence in fattening foods is looked upon with general distaste and women in particular abhor the thought of becoming too stout. This people and especially thin men make desperate attempts to lay on weight in order to retain a youthful and healthy appearance. In the vast assortment of healthful foods that come in tin cans there are many fattening ones and many thinning ones. The housewife who knows what foods reduce and what thin

**G. N. Dedicates Three Monuments**

(Left) The Astoria Column. (Upper right) The Wishram monument. (Lower right) The monument at Bonners Ferry, Idaho.

THREE monuments were dedicated in the Pacific Northwest in July by the Columbia River Historical Expedition started from St. Paul in special Great Northern train. The expedition revived the names of many of the nation's outstanding explorers, men and women, who were the first to penetrate this section of the country. Strange as it may seem the names of many of these men and women had never appeared on the maps of the United States.

At Astoria, Oregon, was dedicated a unique column 125 feet high. Spiraling upwards on it is a ribbon-like frieze upon which is carved a continuous series of pictures depicting events of Captain Robert Gray's discovery of the Columbia; Lewis and Clark's expedition and the meeting and life of John Jacob Astor's Fort Astoria. This resembles somewhat in general character the Vendome Column in Paris and will be the only one of its kind in the United States.

At Wishram, Washington, the expedition dedicated a monument constructed of blocks of basalt taken from the cliffs that line the Columbia River. It carries the following inscription:

"To the Memory of These Distinguished Pathfinders and Pioneers Who Followed the Great Thoroughfare of the Columbia at This Place."

At Bonners Ferry, Idaho, another monument was dedicated. This one is constructed of Kettle River sandstone. The inscription on the front is as follows:

1898—1926  
To Commemorate the First Route of Travel and Trade Across What Is Now the State of Idaho.  
David Thompson  
Finnan MacDonald  
James McMillan  
William Kittson  
Sir George Simpson  
Red River Emigrants  
Peter Skene Ogden  
Warrand Vavasour  
Father DeSmet

On the back is shown: "Down the Kootenai, Thence to the Bend d'Oreille and Spokane the Explorer, Trader and Missionary, a Route Which, From Time Immemorial Had Been the Highway of the Indian."

The expedition is sponsored by governors of Western states in cooperation with the Great Northern.

**STATE STUDENTS ACTIVE AT U. OF IDAHO**

University of Idaho, Moscow.—The University of Idaho as a statewide institution, drawing its students from every county, sending them back again as alumni and former students into every section of the state, disseminating its service in agriculture and home economics, mining and forestry—this is a conception of the institution discussed in a long article in the Argonaut, university paper, recently published.

Members of last spring's graduating class, the largest in the history of the institution, says this article, came from Sandpoint, Coeur d'Alene, Springton, Mulden, Wallace, Kellogg, Burley, Harrison, Potlatch, Lewiston, Troy, Kendrick, Kootick, Moscow, Caldwell, Lapwai, Nez Perce, Reubens, Cottonwood, Craigmont, Orofino, Grandview, Roseberry, Hinton, Huston, Caldwell, Nampa, Meridian, Ustick, Boise, Payette, New Plymouth, Mountain Home, Twin Falls, Kimberly, Gooding, Richfield, Rupert, Burley, Oakley, Albion, Malad, McCammon, Pocatello, Whit.

Of the Gem of the Mountains, student year-book, the editor was from Nampa; associate editor, Emmett; business manager, Moscow.

The Argonaut opened its year with an editor from Rupert and closed with an editor from Cashmere, Wash., and a managing editor from Boise. The business manager was from Grandview.

The R. O. T. C. regiment was commanded for the first semester by a cadet colonel from Nampa and a lieutenant colonel from Boise, and the adjutant was from Moscow. For the second semester the colonel was from Blackfoot, the lieutenant colonel from Moscow and the adjutant from Moscow.

Baseball letters were awarded to students from Franklin, Huston, Jer-

**Sundai Islander Carries Bakeshop Around On His Shoulders**

THIS portable bakeshop may be all right in the Small Sundai Islands where the photograph shown above was taken. In America, however, where groceries and delicatessens are almost as numerous as the sands of the sea, this gentleman would not only be out of the way, but more decidedly in the way.

The modern system of bread distribution has been a load of "neighborhood store," whether that store is in a town of 3,000 inhabitants, or in huge New York, which for all its size, is a city of individual shopping communities, necessitates every store in a marketing district having one of practically every store needed to supply the wants of a household. The baker's products of one bread company alone—the largest in America—are distributed through more than 80,000 grocers and delicatessens in all parts of the country, where the grocer is the counterpane for a load of "neighborhood store," whether that store is in a town of 3,000 inhabitants, or in huge New York, which for all its size, is a city of individual shopping communities, necessitates every store in a marketing district having one of practically every store needed to supply the wants of a household.

**American Farm Efficiency**  
At the present time, when the problems of the farmer are receiving much attention, it is of interest to note the advance that has been made in farm efficiency. According to the findings of statisticians, the average farm worker is using about five times as much machinery as he did the average farm worker of 50 years ago.

**ICE CREAM AID TO HEALTH**  
If children do not like milk, give them ice cream, is the recommendation of experts on child feeding. America needs to set itself to the task of raising healthier children, says Herbert Hoover, president of the American Child Health Association. "About 80 per cent of American babies at birth are physically perfect, he says. Yet of 35,000 fifth grade children examined by the Child Health Association's specialists, 42 per cent were receiving less than a pint of milk a day, the minimum set for children's needs. Nearly a quarter had no milk at all."

**ICE CREAM RICH IN FOOD**  
It should not be forgotten that ice cream has a high food value and is not simply an agreeable dessert. Ice cream is rich in fats, containing growth-promoting vitamins, body-building proteins in their best form, mineral matter including lime and phosphates that build bones and teeth, and sugar that gives energy.

**GROWTH OF CHAIN STORES**  
Chain stores are growing at an amazing rate throughout the country. No less than 10,000 chain store systems are now in operation with approximately 100,000 stores.

Seventy-five of the best systems have been analyzed by a survey just completed by Paul H. Nystrom for the Chamber of Commerce of the United States.

It is now estimated that 12 per cent of the nation's retail grocery trade goes to chain stores as well as 20 per cent of the drug business and 75 per cent of men's shoes.

**Nine-Tenths of Farms Without Plumbing**

Remember, way back, the frosty morning wash-up in a tin basin on the back step? Remember the swimming hole in July, the delight you took in it, and how you blistered your back drying it in the sun? Remember Saturday night, when mother brought the wooden wash tub and placed it near the kitchen stove? How the tub leaked water over the floor? How your front toasted while your back was cold? Remember how thoughts of inconvenience and discomfort caused you to delay or neglect personal duties?

With thousands, these things are only memories, but with millions they are still realities. The 1920 census reports 645,899 of the 6,448,343 farms in the United States as having water piped into the house. This is only one farm out of ten, or nine out of ten, had little or no plumbing. A farm home survey by the United States Public Health Service in 14 average counties in 13 states shows only 808 water-closets in a total of 51,852 rural homes. 142,772 of the homes had no privy. Expressed in simpler terms, only one home out of 64 had a water closet and one home out of three had no privy.

Discouraging as these statistics, the facts are that the American farmer has more plumbing and better plumbing than any other agricultural people in the world.

He will have more plumbing as he better realizes what it means in convenience, usefulness, comfort, and health; as he learns that plumbing may be simple and yet sanitary; that it may be sanitary and yet not unduly expensive; that it may be inexpensive and yet durable—lifetime plumbing—provided it has good care.

The farmer will have more plumbing when plumbing codes are simplified and unified; when plumbing authorities get together on conjunctural or controversial points; when plumbers, inspectors, sanitarians, and writers are less contradictory; when identical questions premised on similar conditions elicit like replies whether in Utah or in Virginia. For example, James says no soil stack should be smaller than 4 inches and Brown says a 3-inch soil stack is ample for an ordinary house. As a matter of fact, Brown is correct, 3-inch stacks easily taking the simultaneous discharge of 4 or 5 water closets and have been in successful use for 16 or more years in the District of Columbia and elsewhere.

The Federal Government promulgates no plumbing regulations, codes, ordinances, or laws applicable to the several states or to cities, towns and municipalities. Local and state plumbing regulations are intended to protect the householder and the public and to promote better and more orderly practices. They have all the force of law, and where such regulations have been established, the householder should make sure that his procedure is in conformity with them. This end is most likely to be attained by employing a good plumber.

**Article by Idaho Man Printed by Mining Paper**  
University of Idaho, Moscow.—A recent issue of the "Engineering and Mining Journal" from New York contained an article by Prof. Virgil R. D. Kirkham, geologist of the Idaho Bureau of mines and geology.

The article, which is quite extended and is supplemented by 10 illustrations, is entitled "Some Adverse Influences of Glaciation on Mining." It is attracting considerable attention in mining circles, since before its publication the literature of both glaciation and mining was notably barren concerning this relationship. The paper was an outgrowth of Professor Kirkham's geological field study in the glaciated areas of the Pacific Northwest in general and of northern Idaho in particular.

In the article Professor Kirkham briefly recounts types of glaciers and their probable history in the area, and presents an analysis of the effects of the consequent effect of glaciation on the mineral industry. He describes and illustrates four ways in which placer deposits have been disadvantageously affected and six ways in which lode deposits have been advantageously influenced. He discusses in a manner in which glacial deposits interfere with petroleum prospecting and the mining of coal, clay, phosphate, magnesite, etc. It is further pointed out that the presence of glacial drift renders difficult all geological studies in an area, and concludes that the mining district of the glaciated portion of the Northwest, or perhaps of any glacial area, would have been notable more successful and productive of mineral wealth but for the ice invasions of the last 100,000 years.

The illustrations show some of the ways in which glacial action has affected and reveals the way in which actual ore deposits have been dispersed or concealed by glacial action.

# OF THE FIRST WATER

By WILLIAM MERRIAM ROUSE

Some men know the only girl in the world when they see her; and some men don't. Some understand their sensations, but don't get the sand to do anything about it until it's too late. Big Bill Harriman knew his own when he saw her, at the first glance; and sand, next to size, was the thing with which he was most abundantly endowed.

She appeared about fifty feet away near a hickory tree, and her errand in the woods was revealed when she dropped to her knees and began to gather nuts. Her small brown hands moved as gracefully as ground swallows.

Big Bill had just finished his lunch, sitting upon the stump of a giant birch; otherwise she would have heard the sound of his axe as he approached the cut of wood where he was working. She had come into his range of vision as noiselessly as a squirrel pops into the crotch of a limb—in a moment she would be hidden again by the intervening tree trunks, and within five minutes she would finish gathering the nuts under that particular hickory and go on.

Bill stood up—six feet three from bootsoles to brown hair—and drew a trembling breath. If it had been just "What is a Diuretic?"

EVERYONE knows that a laxative stimulates the bowels. A diuretic performs a similar function on the kidneys. Under the strain of our modern life, our organs are apt to become sluggish and require assistance. More and more people are learning to use Doan's Pills, occasionally, to insure good elimination which is so essential to good health. More than 50,000 grateful users have given Doan's signed recommendations. Scarcely a community but has its representation. Ask your neighbor!

To avoid imitations, always look for the signature of Dr. J. C. Fletcher. Absolutely Harmless - No Opium. Physicians everywhere recommend it.

looked honest, but he had established himself as a hoodlum. "I heard there was a couple of choppers this side of the mountain."

"My name's Bill Harriman," he said, tentatively. She gave him a mischievous little grin—and considered, while he felt himself growing red.

"Now you're acting as though you belong to the family, Mr. Harriman."

"I didn't mean to be fresh," stammered Bill. "Honest, I didn't."

"You'll find out where I live, if you've got a long job here," she said. "I sure have!" he assured her earnestly. "I've got so much to do, I could knock off a little while this afternoon and help you, just as well as not."

"All right," she agreed. "You help me get what I can carry in that sack and some day or other I'll give you a pie. I'll bet you two men can't make a decent pie."

"No," he admitted. "It's mostly salt pork and potatoes for us; and you just watch me go after these hickory nuts!"

Immediately Bill set himself seriously to the task in hand, thus unconsciously making progress in the esteem of Marie Malloy. Although he did not know it, literal honesty of purpose carried him further with most strangers than any amount of gloss would have done. Even those who did not like Big Bill Harriman admitted that he was a dependable man upon as surely as sunrise and sunset.

Bill, being wholly absorbed in the task of getting a sackful of hickory nuts as swiftly as possible, moved out from the tree and away from the girl. Possibly five minutes passed. He had his hat nearly full and was kneeling over a little drift of dead leaves, sorting out the green shucked nuts, when from a point that at the instant seemed to be directly above his head, came a human voice.

"Caught ye at it, didn't ye?" Harriman jerked his head up, and leaped to his feet. Within reach of his arm stood the man who had spoken a bearded, thick-set individual whose arms filled the sleeves of a shirt made with the idea of giving free movement to the wearer. He crowded his shirt, this man. He bulged with solid brown. Harriman knew at a glance that the newcomer was not only able, but willing to fight. However, Bill could not understand why they're on woodland like this. But I'm willing to pay."

"What are you doing on my land, anyway?" cut in the other.

"Chopping," answered Bill, now growing quiet and quite grave as he began to grow angry. "My partner and I have got a wood job—you can almost see where I'm working from here."

"All right. But I own the land you're standing on now. The line is blazed between here and your job. Keep your eyes open. Chopping for Zeb Smith, ain't you?"

"Yes."

"To Clean Enamelled Pans  
Soak enamelled saucepans and dishes in cold water for several hours. Then rub the stains with salt moistened with vinegar, to remove burn.

"Stay on his land and they won't be liable." The stranger stopped suddenly and Bill half turning to follow his gaze, saw that Marie Malloy had appeared. I seemed to him that her face had grown a little white under its tan, but she was looking the other man straight in the eye.

"Hello, Mr. Barnes," she said. "Hello, Marie," Black-whiskered Barnes was embarrassed for no more than a second. Almost instantly his brows drew down into a deeper scowl as he looked suspiciously from Bill to the girl. "Are you chopping, too, Marie?"

She flushed, and for the first time Bill felt a whole-hearted sympathy to drive his fist into the middle of Barnes' whiskers.

"Mr. Harriman was helping me for a few minutes," she said; and then, before either of the men could speak, she ran to her sack and dumped the contents on the ground. "There! It's the first time I ever saw a man in this country who was man enough to be grudge hickory nuts to anybody that wanted 'em."

Bill Harriman laughed, and upon him Barnes turned a gaze of concentrated hatred. Marie Malloy faded into the woods, the empty sack in her hand, and the two men were left facing each other.

"What are these causes which are so fatal?" Infections, generally, of the throat or tonsils, particularly in children. Just a sore throat, which may have started as a simple cold, takes thousands of cases. In fact, tonsil infections are recognized as the very great cause of valvular heart disease.

Although the infection is sometimes called rheumatic, children do not show inflammation of the joints as do adults with rheumatic fever. So parent must maintain rigid inspection of throats to prevent heart disease.

Other diseases which may affect the heart muscle or valve are influenza, pneumonia, typhoid fever, scarlet fever, diphtheria and syphilis. If you have had any of these diseases, do not assume that your heart is unimpaired. You owe it to your safety to have an occasional examination of heart, throat and other sources of focal infection.

When there are two other important causes of heart disease, one is the too strenuous life, which many are leading, which, with insufficient proper exercise and over-eating, exacts a toll which the human heart cannot stand. Close mental application, under high tension, is fraught with danger. All these conditions may be found in factories, offices and in the home with its innumerable social engagements.

Parents can often protect their children against heart disease by guarding against colds, taking care of the general health, and keeping the nose and throat in a healthy condition. Infected tonsils should be removed, before they have had time to cause injury, by a capable physician.

TEA FLAVORED ICE CREAM  
Give the average Britisher his tea and he cares not who makes his laws nor who writes his songs. Now it appears he is to have his tea in an entirely new form, tea-flavored ice cream. Selfridge's the London department store, announces that after extensive experiments this new delicacy is being served. There has as yet been no attempt to introduce tea-flavored ice cream in America.

Liming Soil a Disease Control  
Rhizomania of the sugar beet—a disease causing damping off of the young plant—is controlled by liming. This is the only method of combating this common beet disease.

Incidentally, lime helps the crop because the sugar beet is among our most lime-preferring crops, ranking with alfalfa in this respect.

save fuel bill  
by using PERFECTION WALLBOARD  
Where "PERFECTION" Plaster Wallboard is used for walls and ceilings there is a marked conservation of heat and a corresponding saving of fuel. This is due to the gypsum plaster core which also makes "PERFECTION" a practical fireproofing material, and in many cases fire has been checked in its early stages by this modern insulating material.

Its insulating properties can be easily tested by placing a piece of paper between the wall and the floor and applying a piece of tallow to the wall and ceiling. The plaster will not crack.

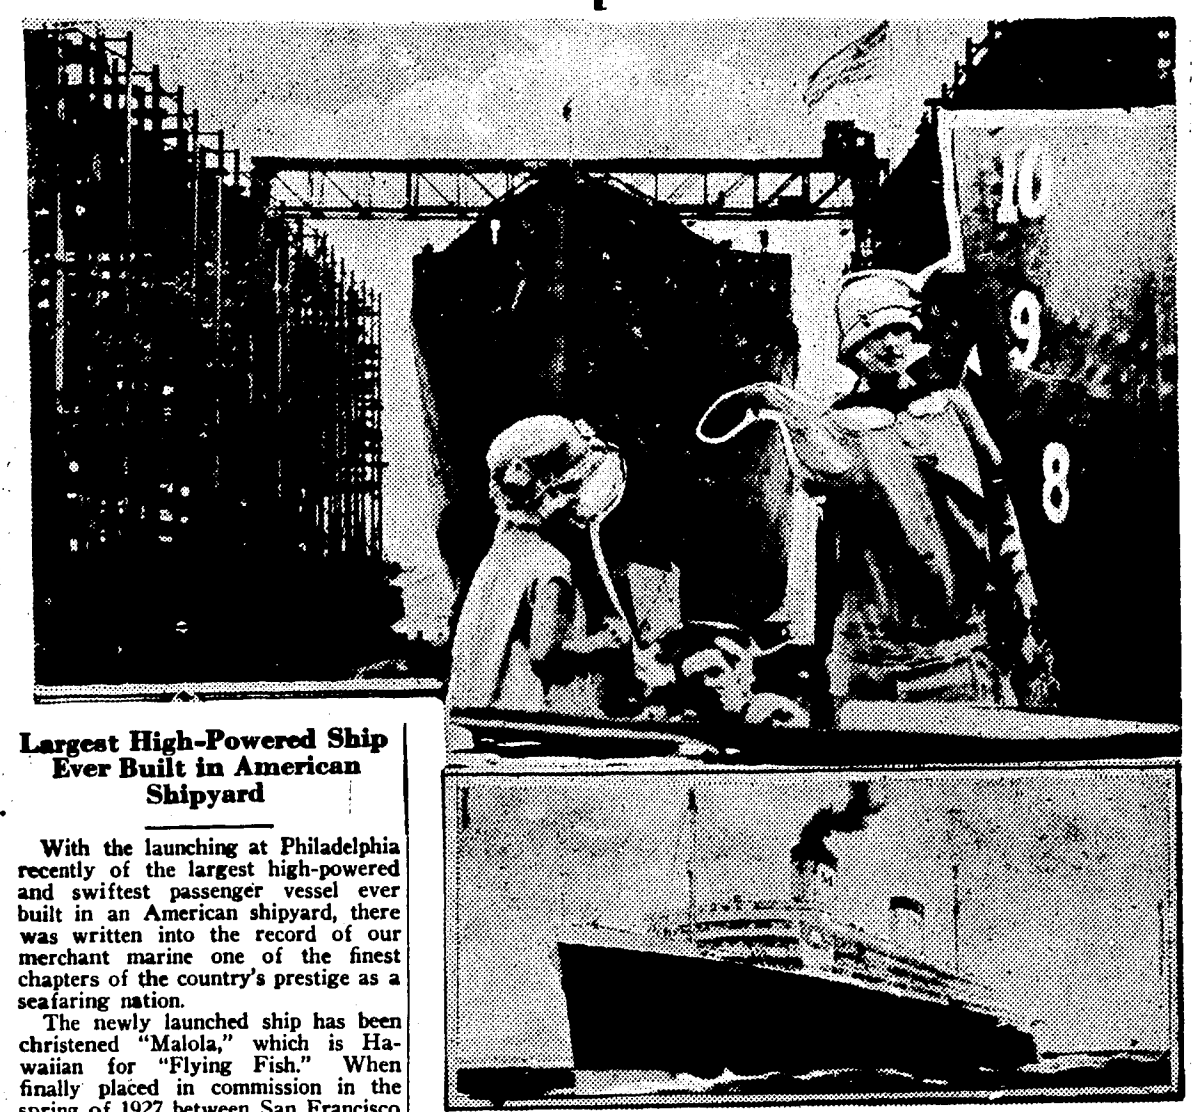

Ask your local dealer for sample and further information, or write to the manufacturer.

Sold by druggists everywhere, the and etc. If you cannot get it write direct to G. G. GREEN, Inc., Western, N. J.

GREEN'S AUGUST FLOWER

# Malola, "Flying Fish," Is Launched; Has Shore Telephone Communication

Top: Malola Sliding Down Ways; Inset: Miss Helen Tenney of Philadelphia Christening New Ship; Bottom: Malola as She Will Appear When in Commission.

Largest High-Powered Ship Ever Built in American Shipyard  
With the launching at Philadelphia recently of the largest high-powered and swiftest passenger vessel ever built in an American shipyard, there was written into the record of our merchant marine one of the finest chapters of the country's prestige as a seafaring nation.

The newly launched ship has been christened "Malola," which is Hawaiian for "Flying Fish." When finally placed in commission in the spring of 1927 between San Francisco and Honolulu, it will reduce the round-trip passenger time from 16 to 12 days. The new ship will be one of the eight-eighth largest, one of the eight swiftest and one of the first four ships in passenger carrying capacity in the world.

And it will be to Waikiki Beach—to Honolulu, the chief port of the mid-Pacific Islands that this latest and finest addition to the American merchant marine—the Malola—will wing its way.

In building this new Leviathan of the seas science and industry have played a significant role. There has been embodied every refinement known to man to insure safety, comfort and convenience.

Picture, if you will, this latest and finest addition to our merchant marine. The displacement of the liner, when loaded, is 22,000 tons. She will be driven by twin-gear turbines generating 25,000 horsepower and her speed will be more than 22 knots. There will be 274 staterooms to accommodate 692 first class passengers. There will be more private baths than ever have been built into a ship before.

The Malola will have the first swimming pool in an American built passenger liner. All the cooking will be done by electricity and 115,000 pieces of silver, glass and china will be provided in addition to 16 trunk lines for direct telephone communication with local exchanges at San Francisco and Honolulu.

The vessel will be equipped with the latest type inter-communicating telephone system. This system will provide communication to any point on the ship and in addition will have shore connections at San Francisco and Honolulu, thus enabling passengers to remain in direct telephonic communication with home or office from their stateroom aboard ship.

There will be a total of 323 telephones installed, each stateroom having its own private phone. According to W. W. Ponsford, telephone engineer and specialist of the Graybar Electric Company, the system to be here installed will be one of the finest and most complete ever incorporated in an ocean going vessel.

To handle this telephone traffic, the equipment of which is equal to that generally utilized in a town of approximately 3,000 inhabitants, 323 lines will be provided in addition to 16 trunk lines for direct telephone communication with local exchanges at San Francisco and Honolulu.

The Malola is said to be the first private vessel built in the United States to incorporate in its design full compliance with the specifications of the International Convention for Safety Surveys at Sea. A reef could rip open the outer shell of the Malola's double bottom from stem to stern, but she would still float.

The Malola's keel was laid May 4, 1925. She was designed by William Francis Gibbs, naval architect of New York. The Matson Navigation Company of San Francisco are the owners of the vessel.

U. S. LEADS WORLD IN TAPE OUTPUT; MILEAGE PRODUCTION MANY THOUSANDS  
Automobile and Household Appliances Make for Increased Use

To the uninitiated, tape is tape, and nothing more. You buy it, stick it on, and there it is.

Tape is one of the modern necessities. It is used in innumerable activities—in surgery, in the household, in industry, in science.

Last year enough tape to go around the world more than 114 times was manufactured in this country alone. If this amount is added to the increased total of some 60,000,000 pounds, were made into one-half pound rolls, each roll three-quarters of an inch wide and stacked one on top of the other, it would make a column over 1,424 miles in height.

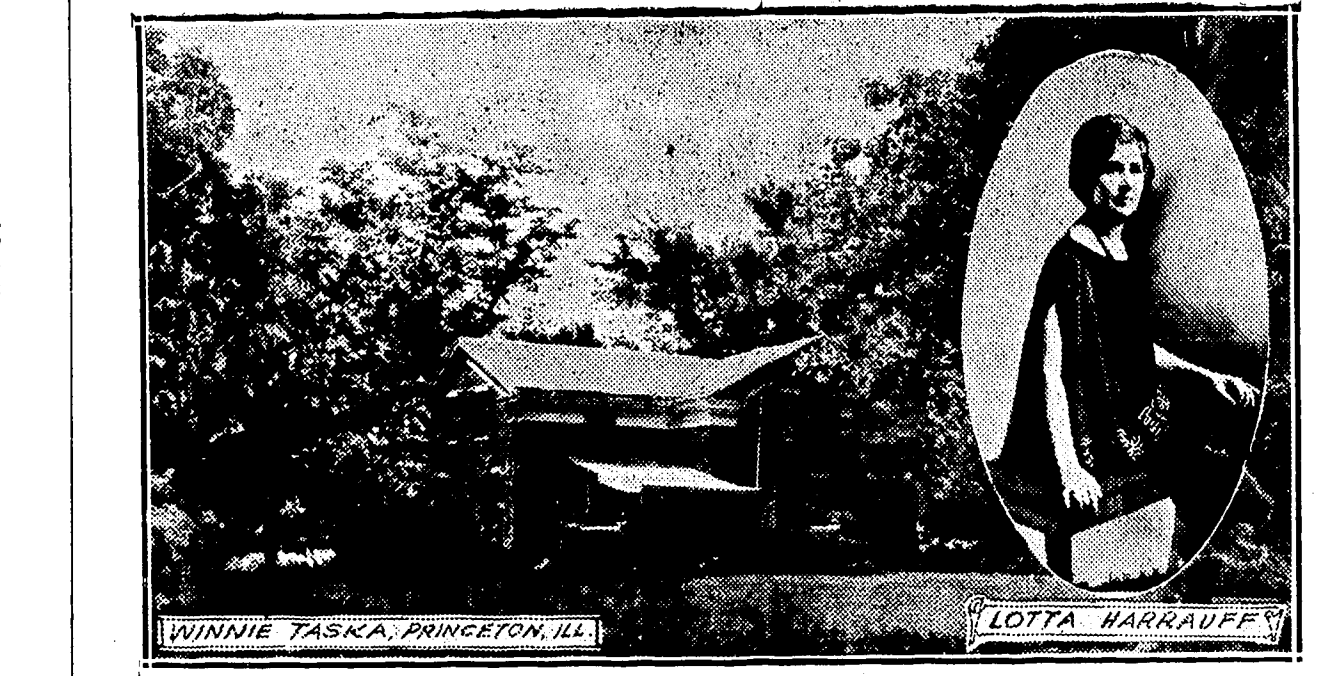

According to one large distributor—the Graybar Electric Company, who dispose of over a million pounds of friction tape annually—the increased use of household electrical appliances and the constantly growing number of automobiles have been the two greatest single contributors to larger tape consumption in this country.

The manufacture of this product is an ingenious process. While hardly an art, it is certainly a science.

There are two main parts to a strip of friction tape: the sheeting and the rubber compound.

This fabric or sheeting must be of a certain thickness and generally of a specified width; in addition, it must stand a rigid test for tensile strength and it must have a specified number of threads per square inch.

The sheeting is first "calendered." This consists of pressing the sheeting by means of heated rollers.

# AMERICA'S "MRS RADIO-1926-7" AND HER HOME

900 Listed as Alumni of State University  
University of Idaho, Moscow. — A new directory of alumni of the University of Idaho has just come from the press and is being distributed.

The directory contains the names of all graduates and former students of the university with, now far as possible, their 1926 addresses.

Nine thousand names appear in the 1926 directory—including cross-indexed names of married women—and approximately 5,500 addresses of alumni are on the list. The book contains 178 pages, 74 more than were necessary to publish the list three years ago, when the last previous directory was issued.

The directory, in former years published by the university director of publication, was this year taken over by the alumni secretary, George E. Horton, and in the future will be published by his office.

"The rapidly increasing number of names in the alumni directory is a measure of the growth of the University of Idaho," says a brief introduction.

"Cooperation of every Idahoan is necessary if the directory is to continue to be a success. This cooperation involves no arduous duty for any individual; it does require a simple, faithful service by all graduates and former students. Please look carefully through the alphabetical index and send in the present address of any one whose name appears in italics, with his occupation if possible. Send also the address of any person for whom 'addresses wanted' is listed in the class lists, and make a correction if the address that is incorrect or out of date. This information should be sent to George E. Horton, alumni secretary, at the University."

Colorful Candy Boxes  
CANDIES of every known kind are packed in the most beautifully decorated tin boxes. Several manufacturers of the finest candies are using only tin containers for their widely popular confections. When lined, it makes a good jewelry case or sewing box. A long narrow box makes an excellent case for playing cards. Even in the kitchen, these tin containers are useful as receptacles for the small boxes of spices, cereals, or the kitchen, too, kid, twine, and nails.

Gay and colorful motifs are lithographed on the boxes. Any of them are the creations of expert color designers and occasionally the box bears a reproduction of some famous painting. Always they are artistic and make a decorative asset.

The manufacture of ice cream is largely a development of the nineteenth century, especially in the United States. The first advertisement of ice cream appeared in a New York paper on June 8, 1786, but the huge ice cream business of today was not originated until after 1800. The present annual output is about 323,000,000 gallons.

FIRST AMPLIFYING SYSTEM FOR INTRA-SCHOOL COMMUNICATION INSTALLED  
With completion recently of the first installation of an amplifying system ever used for intra-school communication purposes at the William Wilson Junior High School at Mt. Vernon, N. Y., there was added to the nation's educational system the latest and what promises to be a revolutionary phase in scientific educational methods of the future.

At this school there has been installed a public address system, connected to all classrooms, the gymnasium, auditorium, shops, etc., so that voice and music amplification can be had to all rooms simultaneously or in any one section as desired.

With the system as here installed, according to A. J. Eaves of the Graybar Electric Company, installers of the apparatus, there has been provided the following features: voice extension of the principal to any group or to all classrooms simultaneously; voice reinforcement for speakers in the auditorium; additional fire alarm facilities; amplification and distribution of phonograph or other music for marching and rhythmic dancing; distribution of educational radio programs covering music appreciation, lectures, concerts, speeches of celebrities, etc.

The system used here comprises 27 loud speaker units of the cone type. The microphone, which acts as the medium for picking up the amplified voice of the speaker, is located in the principal's office.

All the projectors, or loud speakers, associated with the amplifying system, are controlled by a group of keys in the principal's office, a switch in the foot

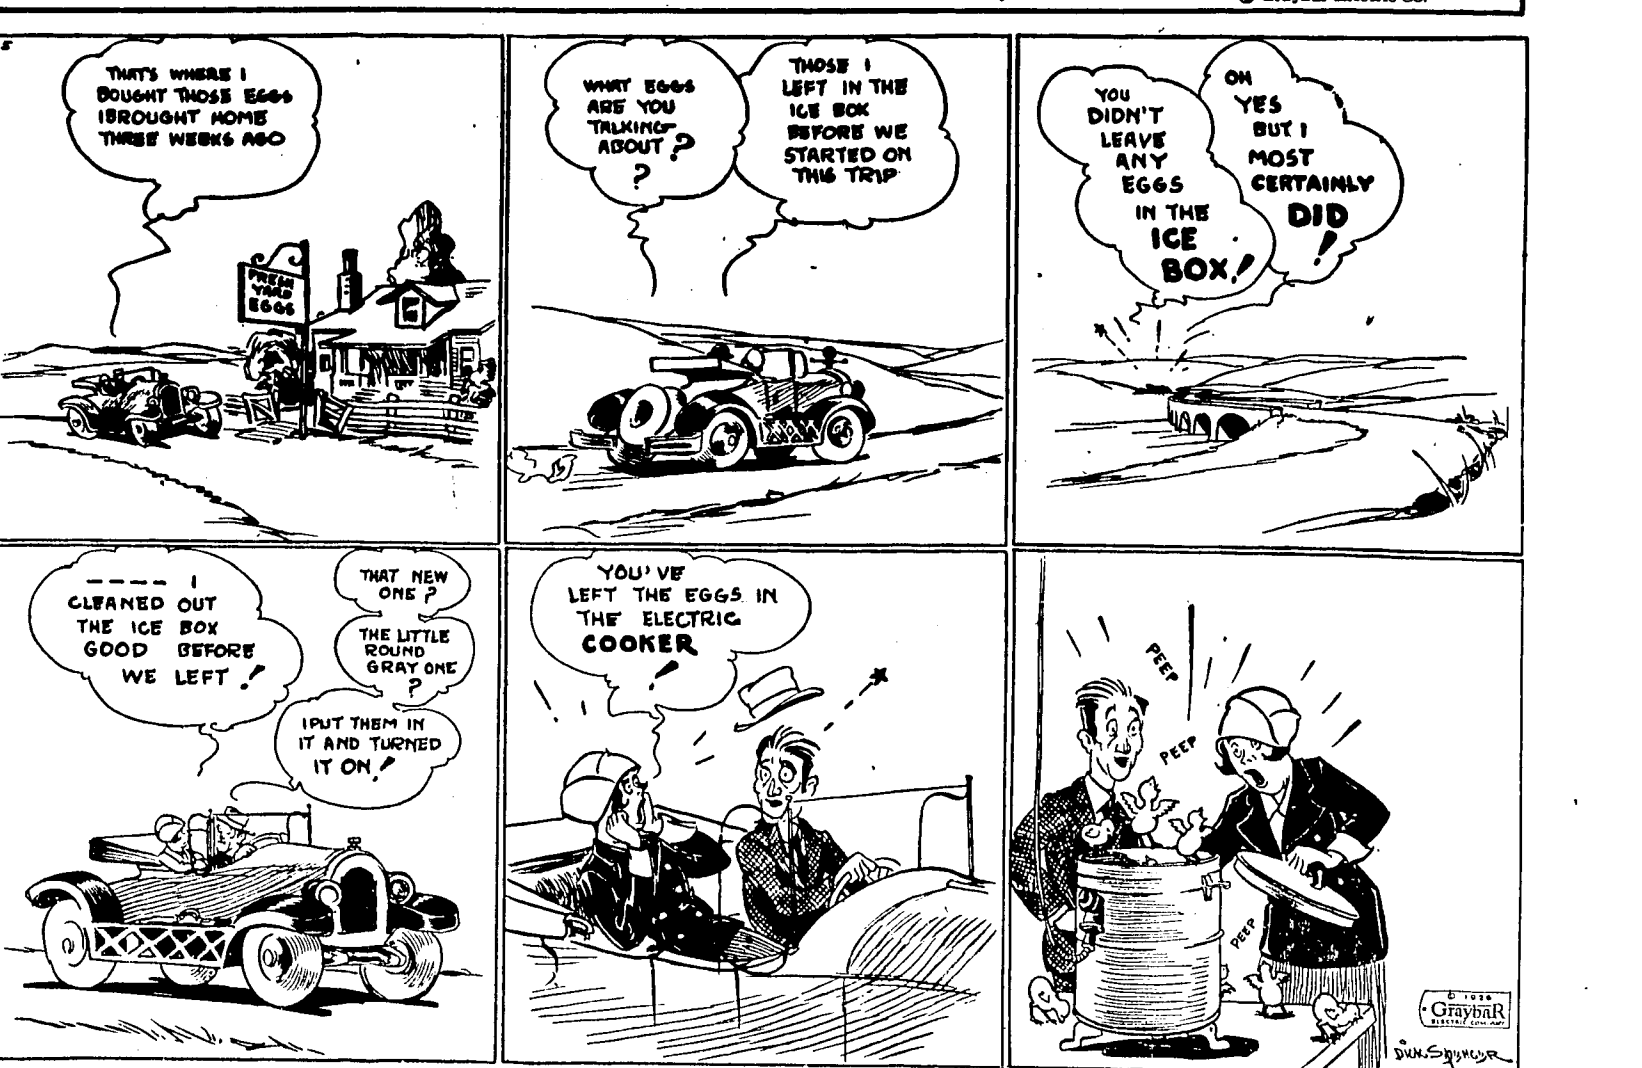

ing the operation of the loud speakers; input control key is next operated to one room. This makes it possible to direct the output of the amplifier to any desired point.

In operation of the system, the power is first applied by means of a remote control power relay, which, in turn, is controlled by a switch in the foot of the principal's office. The transmitter or speaker circuits.

Top: Showing loud speaker unit in classroom. Middle: M. H. Trapen addressing classes by means of close talking transmitter. Lower: Exterior of school.

Upper right: Machine rolling tape into bars and cutting at same time. Lower left: Spreading machine laying compound. Lower right: Tub of spreader stock.

# Mrs. Van Thiek—It Happens In Every Family - - - By Dick Spencer

"THAT'S WHERE I BROUGHT HOME THESE WHEELS AND..."

"WHY EGGS ARE YOU TALKING ABOUT?"

"THOSE IN THE ICE BOX BEFORE WE STARTED ON THE TRIP."

"YOU DIDN'T LEAVE ANY EGGS IN THE ICE BOX?"

"OH YES! I MOST CERTAINLY DID."

"I CLEANED OUT THE ICE BOX GOOD BEFORE WE LEFT."

"THAT NEW ONE THE LITTLE GRAY ONE."

"YOU'VE LET YOUR EGGS IN THE ELECTRIC COOKER."

"BUT THEY IN IT AND TURNED IT ON."

## High School Opera House

Friday and Saturday, Sept. 10 - 11

## Betty Bronson

### "The Golden Princess"

"In the days of old, the days of gold, the days of '49'!" Usually in movies, Indians chase and capture the girl, but in "The Golden Princess," the situation is reversed, the girl pursues and captures the Indians.

Not only that, but she washes their faces for them! Come and see Betty as a cut little gold digger of the '49s! The story of a girl who found love and romance in the California hills.

**THE PICTURE SHOWS**

"The Golden Princess"  
The feature film at the High School opera house for Friday and Saturday nights, September 10 and 11, will be "The Golden Princess," when Betty Bronson, star in "Peter Pan," will have the leading role. Betty is a lovely little actress and is seen to best advantage in "The Golden Princess." The true story of the tremendous California gold rush of 1849 is vividly portrayed in Betty Bronson's initial starring vehicle, "The Golden Princess." This picture is taken from one of Bret Hartle's famous stories.

This spectacular melo-drama reveals with almost ruthless accuracy the unbelievable hardships, the heart-breaking disappointments and the poignant sufferings encountered by those early prospectors and their families who started on a mad stampede to the far west when the cry of "Gold!" echoed throughout the land.

**"The Pinch Hitter"**  
You don't necessarily need to know anything about baseball to get a big kick out of "The Pinch Hitter," which will be the big picture at the Hotel theater Saturday night, September 11. The "hitter" gets into all sorts of funny situations at college and you'll enjoy seeing him rescued from them by a pretty girl.

Baseball and Joel Martin were soul mates. When his uncle sent him out to hoe the cabbage rows, Joel watched the neighboring team kick the visitors. When he was supposed to mend the fence, he could generally be found practicing with a bat. He was hopeless.

Finally his uncle decided to send him to college to get him out of the way and give him a chance to distinguish himself if such a thing could be possible. Clad in a glorious new mail order suit, Joel departed for the campus, a clipping from the local paper crisply folded against his heart, which reported the news that "our distinguished and enterprising young citizen is leaving for college at..." etc.

**"Blue Blood"**  
George Walsh is the leading male figure in "Blue Blood," a picture that is full of action from start to finish and furnishes many real thrills during the action. This delightful picture will be shown at the Hotel theater on Sunday night, September 12. The story concerns a young scientist in search of scarce specimens who is encamped near a fashionable hotel. Among the guests is the daughter of Lester Hicks, the chewing gum multi-millionaire, who, tired of callow young men of her set, is in search of a real man. While out for an auto ride Geraldine Hicks and some girl friends arrive in the camp. Rising to the occasion, the scientist and his heart, young Chester making a perilous climb to the top of a cliff to secure one of his beloved specimens. As he reaches the top he loses his balance and is compelled to make a dangerous leap to the ground. Rising to his feet around the neck by Gerry and kissed heartily, after which she runs away without giving an explanation. The kiss was in the nature of a bet given to her girl friends to kiss the first real man she met.

**"The Beautiful City"**  
The picture at the Hotel theater for Wednesday night, September 15, will be Richard Barthelmess in "The Beautiful City." You all know Barthelmess, but watch for further announcement in front of the theater.

Attention, Farmers  
John Roach would like to see you at the following places, on the dates named:  
Friday, September 10—Ernest Peterson sale.  
Saturday, September 11—Swank estate sale—20 miles west of Anatone, Washington.  
Tuesday, September 14—Sam Nye stock sale, on Fix Ridge.  
Wednesday, September 15—Tobin Brothers sale—1½ miles north of Genesee.  
Thursday, September 16—Shoemaker and Son—near Uniontown.  
Wednesday, September 22—Burns and Son—near Lenville.

## BREAD GRAINS FIRM ON GOOD EXPORT BUYING

Briak export demand and the delayed movement of Canadian grain held wheat prices firm during the week ending September 11 in spite of a larger movement of spring wheat, states the weekly grain market review of the United States Department of Agriculture. Spring wheat prices declined slightly but winter wheat worked higher in central western markets. Rains over a considerable area were less favorable for the corn crop, which is late, and corn prices made substantial gains, while oats were steady. Domestic demand of what was of fair volume. European demand has been more active on account of the wheat harvest over a considerable territory and the poor quality of the crops. Deliveries of German wheat have been light and of poor quality, forcing mills there to depend largely upon imported wheat. Poor quality together with transport and tariff difficulties, hindered the export movement from Hungary, Jugoslavia and Roumania. European buyers continued to take for immediate needs only. The crop so far reported for Europe is now placed at 1,051,000,000 bushels, a decrease of nine per cent from the crop of the same country in last year. The total European crop outside of Russia will probably be at least ten per cent below last year's harvest, but above the average for the past four years.

Wheat production in the United States, according to the department's September forecast, will probably be the same as reported August 1. Forecast of spring wheat production were raised slightly in the hard spring wheat producing States but were lowered somewhat in the Pacific Northwest. The Canadian crop showed great improvement over last year's total production for Canada is officially forecast at 399,000,000 bushels against about 317,000,000 from August 1 conditions. The Canadian harvest in 1925 totaled 411,000,000 and heavy rains hindered harvesting and threshing in this country by accelerating the latest reports the rainfall does not appear to have caused much damage by sprouting.

Winter wheat marketings in the United States were of moderate volume. Farmers were busy in the field and also less willing to sell than the prevailing prices. Local and outside mills were competing for prices of good protein wheat at Wichita, and high protein wheat was commanding premiums at Fort Worth.

Receipts increased sharply at Minneapolis and Duluth but the hoarding accumulation at Minneapolis was absorbed readily. Reports indicated that Northwest farmers were taking out storage tickets for about half of their marketings. Cash wheat premiums declined about 1 cent per bushel.

Receipt fell off at the principal soft winter wheat markets while demand for good wheat was brisk, forcing prices upward. Low grades were fully 10c higher for the week at St. Louis while top grades were steady. Prices advanced at Cincinnati where Southern demand was urgent. Export demand continued brisk in the Pacific Northwest with buyers offering about \$1.28½ for soft and western white wheat. Farmers, however, were selling less freely. More wheat was going into country storage. Less was arriving from southern Idaho. About 50 of the shipments were going to the United Kingdom while Oriental buyers were taking fair amounts.

Additional rainfall during the week in sections where warm, dry weather was needed to hasten crop maturity was less favorable for growing corn. The crop made fair to good progress in the principal producing areas though some damage was reported by flooding in limited areas. The crop is late and the yield and quality are still largely dependent on the date of the first killing frost. Lighter receipts of oats, together with strength in the corn market, held the oats market firm with prices slightly higher at most markets. Production of this grain forecast is at 1,264,000,000 bushels in the departments of September report, a decrease of 47,000,000 bushels from the August 1 estimate. Demand continues good for heavy weight oats but light of weight and damp oats sold at discounts.

## When Were Fishin

"I've noticed this," says Old Josh Plum, "It makes no difference when you come, Or how, they ain't be'n here a day Before they puts their pride away An' every one of 'em, it seems, Has settled down to pleasant dreams; There surely ain't no finer sight Than fellers waitin' for a bite!"

"Somehow they all seems more like men— Or else it makes 'em boys again— But, anyhow, the poorest lad Is just as free an' just as glad As any millionaire can be; An' what seems best of all to me Is how most everybody lends A helpin' hand that makes 'em friends."

"The tollin' world is far away An' life fer us jest now is play, But I've observed that fishin' brings A lot o' help for other things; Men learns the worth of patience here An' what it means to persevere; They learns that nothin' counts unless It helps 'em share their happiness."

## MISS EVA HAMPTON BECOMES BRIDE OF ROY PATCHEN

At a very quiet and prettily appointed wedding on Sunday, September 12, at the home of the bride's parents, Miss Eva Louise Hampton became the bride of Roy Patchen of Coeur d'Alene, Rev. Gerh. A. Peterson, pastor of the Genesee Valley Lutheran church, officiating, the beautiful ring ceremony being used.

The bride was attended by Miss Iles Hampton, a cousin, of Moscow, while Harold Hampton, a brother of the bride, acted as best man.

The bride was becomingly attired in yellow georgette over pink satin and carried a shower bouquet of lilies and snapdragons. The bride's maid was gowned in blue georgette and carried a shower bouquet. Miss Grace Iles presided at the piano. A large bow of pink and white asters and ferns, suspended from the center of which was a large white bell, meath which the vows were taken. Following the ceremony a dainty wedding dinner was served.

Only a small party of immediate relatives and close friends witnessed the ceremony.

The bride and groom left Sunday afternoon for Coeur d'Alene for a short visit with the groom's parents, before returning to resume their studies at the University of Idaho.

The bride and groom both belong to prominent and highly respected families in their respective communities, the bride being the daughter of Mr. and Mrs. Arthur Hampton and has lived here all her life and is a young lady of high ideals. She is of a domestic turn of mind and will make an ideal home-maker for the man of her choice. The groom is a young man of splendid reputation, the son of prosperous farmers of the Coeur d'Alene country.

Both the bride and groom are students of the University of Idaho and upon their return from their honeymoon trip will again take up their studies at that institution of learning. Mr. Patchen is in his senior year, taking the course of electrical engineering, while his bride is a sophomore and is taking a general course. She graduated from the Genesee high school with the class of '25. She is a member of Del Teth Gimmel of the University city and a member of the "47" club and other organizations.

As the newly-weds took their departure from the Hampton ranch they discovered that the car that was to transport them had been decorated with signs appropriate to the occasion. Mr. Patchen is in his senior year, taking the course of electrical engineering, while his bride is a sophomore and is taking a general course. She graduated from the Genesee high school with the class of '25. She is a member of Del Teth Gimmel of the University city and a member of the "47" club and other organizations.

## SEMI-LOCAL NEWS CLIPPED FROM EXCHANGES

### Father Carey to Orofino

Father Gentes, recently appointed to the Thornecreek mission, was a brief visitor in Uniontown last Saturday. Father Carey who has been in charge of the Thornecreek church was appointed to Orofino—Uniontown Journal.

### Plant Fish In North Fork

Last Monday 45,000 rainbow trout fry were received here by Deputy Game Warden H. L. Wairath from the Sandpoint hatchery, and were planted by him in the North Fork. Mr. Wairath stated that these were the nicest young trout that he had ever received here.—Tribune (Orofino).

### Not the "Moon Kind"

Out of Siles some distance is the Pleasant Valley country. One of its girl residents, Mildred Gilder, has killed six rattlesnakes so far this year—and the reptiles are still on the move. The last snake the girl killed she found in a bucket of water she had drawn from the home well.—Lewiston Banner.

### Sam a Moose on the Clearwater

Tuesday of last week the trainmen on the morning passenger saw a moose drinking out of the river near Paradise as the train passed along the opposite side of the stream. Where it came from and how it came to be so near civilization no one can figure out, but that it was there several ago a cougar was seen going east through Kookia, and George Lowe, the cougar hunter, was put on his trail, but the big cat got away before he could be located again.—Progress (Kamiah).

### Unfavorable Bean Weather

The frequent showers that have visited the Potlatch section recently have delayed the bean harvest considerably and caused much extra work to the growers. Beans that were cut prior to the last rain will have to be turned out, but that it was there several ago a cougar was seen going east through Kookia, and George Lowe, the cougar hunter, was put on his trail, but the big cat got away before he could be located again.—Progress (Kamiah).

### Seventh and Eighth Grades

The eighth grade held a class meeting Wednesday evening and elected officers for this semester. The following pupils were elected: President, Geraldine Bumpass; vice president, Lester Ingle; treasurer, Pearl Springer; secretary, Jean Freeman. Jack Platt and George Solbakken were absent from school Monday.

The eighth graders have been memorizing the poem "Old Ironsides" in reading.

Grace Curran, Floyd Heppner and Fred Springer received "progress pin" for progress in penmanship.

### Fifth and Sixth Grades

Mary Reynolds has been absent this week on account of illness.

We have organized our spelling class into two teams for the fifth grade taking the name of "The Gumps" and the sixth grade being "The Goops." We will keep a graph of the spelling grades received during the first six weeks. At the end of that time the losers will entertain the winners.

The fifth grade is drawing maps of South America now, so will probably see some masterpieces soon.

### Third and Fourth Grades

There was a new member enrolled in the third grade Monday, making an enrollment of the third and fourth grade rooms. There has been perfect attendance in this room so far this week. Each grade is getting into its regular habits of work and progress is being made.

The handwork class has nearly completed its baskets of fall fruits, made by free-hand cutting, and the third grade geography class started work on a modern farm, sand-table project, Thursday. Other classes are also showing progress.

### First and Second Grades

Records this week show several absences, due to illness.

Primary pupils are enjoying their woven paper mats.

This week first and second graders have been dramatizing some of the Mother Goose rhymes they like best.

### Iron Bars for Gossipers

The small town of Cutrim, in Prussia, has decided to renew a custom which had become extinct and which dates back to the middle ages. The municipal authorities have decreed that all housewives who neglect their households to go gossiping with their neighbors, shall be put in prison.

If the decree is carried into effect, it is doubtful whether the local jail will be large enough to accommodate all the culprits, for it appears that the drastic measure is to come into force consequent upon numerous complaints by husbands.

And only the other day a news dispatch stated that a gossip, who had been freed of the charge, later had his tongue cut out—a drastic measure, to say the least—but an effective way to stop scandal-mongering.

### Big Sale Still On

The closing-out sale of the Follett Mercantile company is still going on unabated. In addition to the many bargains that are being offered, Col. Marden is putting on several "stunts" which should attract many to their doors. Their ad. tells about them.

### Hostess to Bride Party

Mrs. N. M. Leavitt gave a pretty bride party Wednesday afternoon in honor of her mother, Mrs. P. S. Casebolt, who is here visiting from Yakima, Wash.

The highest score was won by Mrs. Glenn Sampson, who received a pretty gift. Mrs. W. E. English was given the consolation.

The guests present were Mrs. W. M. Herman, Mrs. T. H. Herman, Mrs. Ray Edwards, Mrs. Harold Haymond, Mrs. Nellie Haymond, Mrs. W. E. English, Mrs. Ira Hanson, Mrs. Leon Follett, Mrs. F. C. Shork, Mrs. Mahlon Follett and Mrs. Frank Hoorman.

### More Property Changes Hands

Several real estate sales have been made within the past week, as follows:

A deal was made last week whereby Thos. Ingle became the owner of the J. H. Brakelby property, in the north part of town. Mr. Ingle and family will occupy it as a home.

On Tuesday of this week R. L. Edwards bought the Smith Prity property, in the south part of town, and Mr. Prity in turn purchased a cottage from John G. Meyer in the north part of town.

In a recent deal John Roach became the owner of the old Peter Steltz acreage, in the west part of town and the family will occupy it as a home.

Still other buyers and renters are looking for desirable property. It has been changed hands in Genesee as has this fall, indicating that the people of this section still have abiding faith in the Genesee section.

Our town and country, as a place to live, is what we make it—no more and no less. It's as fine agricultural country as any outdoors and is peopled by a good class of residents as can be found on earth—why leave it?

### Breaks Collar Bone

Little Elmer Cameron, son of Mr. and Mrs. Ted Cameron, had the misfortune of breaking his collarbone last Friday. The accident was caused by a fall in a barn where he was playing.

The little fellow was taken to the office of Dr. Ehen where the fracture was reduced and he is getting along nicely at this time.

### Undergoes Operation

Fred Dues underwent an operation on his nose last Thursday morning at the Sacred Heart hospital, Spokane. At last reports he was getting along as well as could be expected.

### Loses Little Finger

C. N. Hornan had the misfortune to lose a part of the little finger of his left hand the other day while feeding an ensilage cutter.

Love may make the world go round, but it takes a little jealousy to accelerate the speed.

### Truel Too True

Wearry: "I've rid in me own carriage in my own day, and I'm gonna ride in my own carriage again."

Willie: "Don't kid yourself, Steve—your poor old mother can't push you no more."

## OF THE FIRST WATER

By WILLIAM MERRIAM ROUSE

(Continued from Last Week)

The mingled odor of frying salt pork and boiling coffee met Harriman as he entered, stooping the low doorway of his temporary home. Beauty, darkly handsome and lithe as a cat, was leaping from the rusty stove to the rough board table and back again; a knife in one hand, a fork in the other, and a song of Canada upon his lips.

A trip to the village was always as good as a tonic to Beauty, but it seemed to Bill that this time he was even more than ordinarily elated. Moreover, his green and black shirt was decorated by a flaming crimson necktie; his hair had been cut.

"My friend," he cried, at sight of Bill, "I have a feast for us. Acan of peaches! Some most excellent five-cent cigars! Parbleu! I am happy."

Harriman grinned, and set down his axe. He also, was happy.

"What's happened?" he asked, as he went to the water pail and prepared to wash for supper.

"Me, I have seen the most beautiful girl I ever saw!" Beauty attempted to kiss his fingers to the air and nearly stuck them into his mouth.

"I have talk to her. I have also talk to her most droll pore. He is Irish, that excellent man, and the mother of Miss Malloy was French. You yourself shall see her. I promise."

"Malloy?" schooled Bill, stupidly. "Marie Malloy?"

"But yes," Beauty dropped the platter of salt pork into the house with a bang. "Mademoiselle Marie Malloy. She lives not a mile from here. And you—know her?"

"I guess so," rumbled Harriman. He sat down heavily at the table, his appetite gone. "That girl, I mean looks like an angel would look it. I mean"

## USED TRUCKS

### THE WHITE WAY

There is no better place in the United States to buy used trucks than at THE WHITE COMPANY

We get the pick of the market. Our stock is good just now. Any size you need.

Light Trucks  
Medium Trucks  
Heavy Trucks

ALL-GALVANIZED FENCE  
Lives live, yet inexpensive. Catalogs mailed on request. Free trial copies of the new book "The Cyclone" and "The Cyclone" sent free to all who order. Northwest Fence & Wire Works, 1515 First Ave. So., Seattle, Wash.

## Children Cry for

# Fletcher's CASTOR OIL

MOTHER—Fletcher's Castor is a pleasant, harmless Substitute for Castor Oil, Paregoric, Teething Drops and Soothing Syrups, especially prepared for Infants in arms and Children all ages.

To avoid imitations, always look for the signature of *Dr. J. C. Fletcher*. Proven directions on each package. Physicians everywhere recommend it.

"I don't want any from Murdoch Barnes' trees."

"What's the matter with him, anyway?" Harriman took the sack from her.

"Murdoch Barnes is about the biggest thing around here," she replied, evasively. "He owns three farms and a lot of woodland. Besides that, he's the biggest man in the county, and he's usually coming pretty close to getting what he wants."

A sudden thought began to stir within Bill's mind. He tried to look into the girl's eyes, but she would not meet his gaze squarely.

"Does Barnes want you?" he demanded.

"Yes," she said. "She hesitated, and finally looked up to Bill with a revelation of pain that startled him. "He's said I've got to marry him, or—"

"Or what?"

"He can do what he likes. Pop is only Jim Malloy, the fisherman."

"How can a man make a girl marry him, if she don't want to?"

"Let's—let's go and get those hickory nuts."

Harriman had the sense not to press her further at the moment, in spite of his desire. He made the most of the situation, and then, somewhat to her surprise, what against her desire, he carried the sack of nuts home for her.

The dwelling of Jim Malloy and his daughter was hardly more than a shack. It stood a considerable distance back from the little-used road-way that led from Turner's Falls to Crowquill Mountain, and it had never attained the dignity of clapboards, shingles or paint. It would have been a respectable-looking place had it not been for the scrupulous neatness that prevailed all about the building. Harriman understood something of the reason for this incongruity when he noticed that her father had had a good deal of his interest in life at the death of her mother.

Jim Malloy sat upon the plank that served for a doorstep when they approached. He was a small, neat man, who looked at them with snapping black eyes. A short clay pipe was held in his dim mouth.

"This is Mr. Harriman, Pop," said Marie, with a hint of nervousness. "He's Pierre Beauty's partner. You remember Pierre spoke about him yesterday?"

"Howdy do, Mr. Harriman," Malloy did not offer to shake hands, nor did he ask Bill to enter the house. There was a little atmosphere of chill, if not of hostility. Moreover, they called Beauty by his first name, while neither father nor daughter failed to say "Mr. Harriman."

For a matter of five minutes Bill did his best to make himself agreeable. He asked about the fishing and the work, and Marie was able to get most of his living from Lake Champlain, a couple of miles eastward. In the winter he put out a line of traps. It took the old man but a short time to reduce the conversation to nothing and Harriman found himself forced to leave. Nor did he have an opportunity to ask Marie when he could see her again.

With feeling mixed to the point of distress, Big Bill Harriman went back to his chopping, only to find that more trouble was due that day. He had barely lifted his axe for the first time when the crackle of a footstep made him turn. Murdoch Barnes had come to see him.

A few seconds the men faced each other, taking mental measurements. Bill's first thought, that he had a fight on his hands, dimmed somewhat, for Barnes drove his big hands into his pockets and contented himself for the moment with a friendly nod.

"You've just been over to Malloy's," he said.

"That," replied Bill, "is none of your business."

"Let it go that way, if you want to," snapped Barnes. "I didn't come up here today to fight, young feller. I come up here to tell you something."

"All right," Bill leaned upon the handle of his axe. "Go ahead and tell it."

"If you don't keep away from Marie Malloy," said the older man, "I'm going to run you out of this country—out of the township, anyways. That was the first one we've had, and it ain't fool talk, young feller. I can do it."

"Maybe so," Harriman grinned, but he was as earnest as Murdoch Barnes. "We've got a right here, as far as that counts. If you start a fight, it won't be the first one we've had, but you better go home and cool off."

Barnes seemed about to burst. Then he controlled himself and turned away.

"Keep right on foolin' yourself and you'll wish you'd never seen Crowquill Mountain. You'll know how half as much as you think you do."

He left Big Bill Harriman with plenty to think about, although without any marked degree of apprehension.

(To Be Continued)

## "Bobbed Hair" Style Favored In Office Building Design

Bright lined panels and other terra cotta decorations are being used to avoid over-ornamentation in the new buildings. And because the back style makes the top of the roof-level visible to the occupants of the upper stories of the same building, ornamentation is being employed there to present a pleasing view to those above.

Architects predict a reduction in the number of buildings erected with beautiful fronts, and crudely finished sides. Particularly in the small and medium sized cities the new style of edifices can be seen, hand-somely finished on the street-face, with city zoning ordinances requiring walls to be set back further as they rise progressively higher, above the street level. At houses the architect, just as it is from the modern beauty parlor, additional color in building is being regarded as advisable to complete the effect.

## "Peaches Time"

The old song says "It's peaches time in Georgia." But fortunately Georgia isn't the only state where peaches flourish on the trees which sprout in the fertile soil of young ladies. For even the ultra-modern girl can blush though she is not as famous for the talent as her grandmother was.

Peaches and cream time, too, and from now on you can get the most welcome season in the year by eating the peach ice cream in a panel effect by the use of batters, or finished as a one-surface plaster wall.

No house can be really comfortable without proper insulation. By the use of "PERFECTON" PLASTER WALLBOARD nailed to studs and rafters you will reduce fuel bills in Summer and winter in Winter you will reduce fuel bills by conserving heat.

This modern form of real plaster construction can be finished with coloring in a wide variety of panel effect by the use of batters, or finished as a one-surface plaster wall.

Ask your local dealer for free sample and illustrated folder.

Four pairs beautiful Silver Black Fox Cuff sets, very reasonable if accepted before September 15th.  
HUBBARD, 707 1/2 Broadway, Seattle.

## Keep in Trim!

Good Elimination is Essential to Good Health

THE kidneys are the blood filters. If they fail to function properly there is apt to be a retention of toxic poisons in the blood. A dull, languid feeling, and, sometimes, toxic backache, headaches, and dizziness are symptoms of this condition. Further evidence of improper kidney function is often found in burning, scanty passage of secretions. Each year more and more people are learning the value of Doan's Pills, a stimulant diuretic, in this condition. Doan's Pills are not a cathartic, but they have many enthusiastic users. Ask your neighbor!

## DOAN'S PILLS 50c

Stimulant Diuretic to the Kidneys  
Foster-McBurg Co., Mfg. Chem., Buffalo, N. Y.

## ISSUE REPORT ON CAMAS PRAIRIE WATER

University of Idaho, Moscow.—"Ground Water for Irrigation on Camas Prairie," a 46-page pamphlet with large maps, has just been issued by the Idaho Bureau of Mines and Geology in cooperation with the United States Geological Survey.

This pamphlet carries out in detail the findings of a preliminary report issued six months ago. Among topics discussed are the geology of the section, its physiography, geology, surface, water resources, ground water resources, irrigation problems, well drilling technique, an unsaturated development. The sinking of a 1000-foot test hole is recommended.

"There is no reason to believe that the artesian supply beneath Camas prairie will ever be wholly depleted except by the most flagrant waste and disregard of the principles of conservation that have been outlined," says the pamphlet. "Moreover, yields as large as a second-foot per well, yields which must be obtained if irrigation from artesian wells is to be highly efficient, may be reasonably expected if wells of much larger diameter are put down to the bottom of the water-bearing alluvium, and properly finished and cleaned."

Investigations of the bureau of mines have been reported in the last seven years in a series of 10 bulletins, 16 pamphlets and four co-operative publications. The bureau has also answered 24,000 individual inquiries.

Arthur M. Piper, author of the Camas prairie bulletin, resigned this summer to take a position as artesian water expert with the United States Geological Survey.

## "EAT TO LIVE, NOT LIVE TO EAT"

So much has been written about food during the last few years that anything more may seem superfluous, but superficially those who do not understand the real gist of the matter—the purpose underlying all this writing—is to try to establish a physically better race of men and women than we are at the present time.

For three generations, at least, the human race has been deteriorating physically. Eyes, teeth, hair, bones, nails—in fact every part which goes to make up our physical architecture has deteriorated. We do not possess the stamina our forefathers enjoyed—that is speaking generally. There are many individuals who are perfect specimens of humanity because they have happened to eat the right food to make them perfect specimens. Unfortunately these perfect specimens of manhood and womanhood are few and far between.

While youth lasts imperfections do not show up so perceptibly, but when middle age approaches so many fall down with a dull sickening thud. The writer knows of one-half billion in which five women of middle age, during the last two years, have each undergone a major operation. And we are constantly hearing of men and women taken off around the age of sixty, when they ought to be in their prime.

It took years and years to educate the public to eat the wrong things—years of advertising the "refined foods," prepared to tickle the palate, but deprived of those vitamins without which the body gradually loses its power and does not renew the energy used up in every effort that is made, and does not build up the growing body making it able to resist the attacks made upon it by all kinds of diseases.

This building up commences before a child is born. The food which does not eat the right kind of food to nourish herself her baby will not be properly nourished. This is such a vital question that just as the improper foods have been advertised for years until the public has been educated by this advertising to think they are the foods "for excellent living," so the foods must be advertised until it is realized that "we are what we eat."

And if the vital force has been gradually refined out of the food that has been thrust upon us, we must take a stand and follow the advice of those who know by scientific research and demonstration that foods really necessary to give us health and strength.

We can fill our stomachs to repletion and feel satisfied for the time being, but the food that has been gradually refined out of the food that has been thrust upon us, we must take a stand and follow the advice of those who know by scientific research and demonstration that foods really necessary to give us health and strength.

We can fill our stomachs to repletion and feel satisfied for the time being, but the food that has been gradually refined out of the food that has been thrust upon us, we must take a stand and follow the advice of those who know by scientific research and demonstration that foods really necessary to give us health and strength.

## SOIL IMPROVEMENT IMPORTANT

Considering both the farm income and soil production of legumes hay and pasture sufficient to meet ordinary farm demands and the careful return, to the land, of manure produced from feeding livestock, is the most universal need of Tennessee agriculture, according to a resolution on economic improvement by county agents at their last annual meeting.

The resolutions also stressed the fact that in spite of the fact that there has been a gradual upward trend of crop yields, soil improvement should continue to hold first place in agricultural improvement. Lime and clover are recommended as the most effective means of soil improvement. Where these are not included in the farm system, farmers are to be urged by the agents to substitute soybeans for part of the corn crop and feed the clover to the livestock. In this way considerable manure can be returned to land for the production of cash crops.

On limed land, a mixture of sweet clover and Japan clover with orchard grass is recommended. Alfalfa mixed with red clover or alsike is advocated for hay on limed land.

## UPKEEP PER FREIGHT CAR IN 1925 ONLY \$155

Analysis Shows It to Be the Most Economical Unit for the Transportation of Goods in the United States.

The most economical unit for the transportation of goods in the United States is the freight car. A glut for work, this beast of burden is at the same time the cheapest to keep in good running condition. This partly results from the inherent advantages of steam transportation—as compared with other forms—and partly a tribute to the competence of railroad management.

In the maintenance of its cars and locomotives, the railroad performs one of its great unreasoned services for modern society. The Bureau of Railway Economics recently made an analysis of these expenditures for the year 1924.

This shows that in 1925 the railroads had to spend \$155 per freight car to keep it in good running order, \$1,552 per passenger car, and \$1,723 per locomotive. These expenditures seem small enough in themselves; the maintenance of freight cars, for instance, is not more than one-fifth of the cost for a good automobile. Yet, multiplied by the 2,400,000 freight cars on the Class I railroads of the country it means an expenditure of \$372,441,252.

## Ice Cream on "The Broadway"

WHEN the Broadway Limited, a crack "No. 1" Pullman train of the Pennsylvania railroad, comes to a stop in Harrisburg, Chief Justice A. Bell, tall, ebullient and smiling in his dining car kitchen, is serving ice cream, for the majority of the famous folk who "ride" this excess fare train seem to prefer ice cream for dessert.

Last year, 143,877 meals were served on "The Broadway." About sixty per cent of the diners selected ice cream for dessert, and Chief Justice Bell serves. So popular is ice cream that no Pennsylvania dining car is ever without it.

Justin Bell is a veteran of 19 years' service. Simplicity rules in his rolling kitchen, and since the larger number of dining car patrons find ice cream a perfect dessert without fancy trimmings. Justin does not have much chance to do his stuff and make up fancy dishes. He is in a mode, cantaloupe or other melon filled with ice cream, crushed berries or sliced fruits served with ice cream are about all he does by way of trimmings.

The homemaker will agree with Justin that the simpler the better; yet how can a cook show his or her ability if experiment is not allowed? The following recipe illustrates Justin's ability. Perhaps you will like to know that ice cream is more than a mere dessert—it is concentrated nourishment, rich in vitamins and other health-giving materials. This fact should be considered when meals are planned.

Ask for your nearest Valentoed Bull, Inc. VALLENTOED BULL, INC., VALLENTOED BULL, SEATTLE, WASH. 516 BLDG. SEATTLE, WASH.

Save a hatful of this dressing over a serving of strawberries. Cream then top with crushed strawberries. A regular diet indeed.

To make CHERRY RING COMPILER: Place a cone of vanilla ice cream on an ice cream plate. Pour over the ice cream a half pint of cherry rings. Cut the rings so that they will cling to the ice cream. Top with a whole marshmallow cherry. Simply itself, but the excellent flavor of this combination must be used to be understood.

STRAWBERRY IMPERIAL: Whip together equal parts of marshmallow and strawberry syrup.

## Homemade Sundaes and Sodas

By JANET JANUARY

BRINGING the soda fountain home is a great idea. You can have all the delicious marble fountain with all its accoutrements—only its finest secret. There is a syphonette equipped with carbon attachment that makes wonderful soda water while you are in the refrigerator. Other carbonated sparkling waters and ginger ale, fruit syrups and plain sweetening syrups, marshmallow whip, preserved fruits, honey, maple syrup, and nuts are easy to keep on hand.

Now we are set for the secret of how to turn the soda fountain into a fountain specialty. Each recipe will speak for itself. The big part of the secret is in what you use. We are ready made ice cream!

**Maple Nut Sundae**  
Take a cupful and a half of the best flavored maple syrup. Chop enough English walnuts to make a generous half cupful, set aside until needed. Take a quart of vanilla cream and divide into five sherbet glasses, sprinkle with nuts and turn over the syrup. To vary the sundae, honey may be used with a teaspoonful, each glass. Add a little maple syrup, if desired, instead of the maple syrup.

**Chocolate and Marshmallow Sundae**  
Make a chocolate sauce of a quarter of a cake of bitter chocolate, a cupful of sugar, a half cup of water and a quarter cup of cream. Cook gently for several minutes, add a heaping teaspoonful of butter, try on water, if cold water and when it reaches the soft ball stage add a teaspoonful of vanilla and a quarter cup of cream. When the mixture is hot, add a double quantity of the chocolate. In five sherbet glasses, spread a little marshmallow whip over each portion.

**Pineapple Sundae**  
Open a can of grated preserved pineapple and set in the ice cream. When the vanilla ice cream is brought in, divide as usual in the glasses, turn a generous amount of the pineapple over each and top with a spoonful of whipped cream. Decorate with a candied cherry.

**Peach Sundae**  
Peel and cut up fine enough peaches to make two cupfuls. Put the peaches into a stewpan with a cupful of sugar and a quarter cupful of water. Swap gently for five to ten minutes then set aside to cool. When a quart of peach ice cream is divided in the glasses pour the fruit sauce over each and top with whipped cream.

**Apple Ice Cream**  
Fill half glass half full of pineapple ice cream. If the shop near you has no pineapple cream then buy a quart of the same and add a heaping tablespoon of the grated preserved pineapple. Fill the glasses with cold sparkling ginger ale. Serve at once.

**Coffee Ice Cream Soda**  
To a cupful and a half of strong coffee add a cupful of sugar, and a cupful of hot cream. Set to cool. When a quart of coffee ice cream is brought in divide in the glasses, pour over a quarter glassful of the coffee favoring, then fill with cold sparkling water. Serve at once.

**Ginger Soda**  
Use vanilla ice cream in the glasses filling them half full. Four over each a quarter cupful of ginger favoring, and a quarter cupful of spoonfuls of sweet cream to each glass. Fill the glasses with the siphon soda and serve at once.

## FRUIT SHIPPERS ARE WORKING ON PLAN TO PREVENT CLUTS ON EASTERN MARKETS

HOPING to eliminate market glut of pears, prunes, plums and boxed apples at Chicago and other Eastern markets, fruit shippers of the Pacific Northwest Advisory Board through the cooperation of the railroads and the American Railway Association inaugurated this month a plan to check up fruit shipments on passing reports of fresh fruit shipments through the principal gateways leading to eastern marketing regions.

Each morning telegrams are received from the office of H. J. Bennett, district manager, American Railway Association at Seattle, from railroad headquarters in Minneapolis, Council Bluffs, Iowa, Kansas City and St. Louis, showing number of refrigerator cars passing through each station and additional data showing the delivery of these cars from the four Western transcontinental railroads to (a) Baltimore and Ohio, (b) C. C. & St. L., (c) Erie, (d) Michigan Central, (e) New York Central, (f) Nickel Plate, (g) Pennsylvania, (h) Pure Markette, and (i) as a general deliveries to lines leading south and southeast.

It appears that this class of traffic when routed via roads (a) to (h) indicates a heavy market for apples which it is destined, whether for auction, direct sales, storage, etc., which it is destined, whether for auction, direct sales, storage, etc., which seems especially accurate as to apple and pears.

The plan was put into effect for apples and plums on August 10 and the information will be gathered later, starting on September 25. It is a little early yet as we go to press to learn how successful the plan is working in its initial stages but the fruit shippers have hopes of saving the shippers considerable money every year.

Ivan L. Plette, manager of Yakima Valley Traffic Association, is chairman of the fruit committee of the Pacific Northwest Advisory Board. Bert L. Manger, manager, Wenatchee Valley Traffic Association, is vice-chairman and Frank W. Shields, of the Shippers' Protective League of Walla Walla is district manager.

## World's Longest Automatic Rail Block Signals Now Operating Between St. Paul and Seattle

ONE of the recent achievements was attained by the Great Northern, according to official announcement of the completion by that road of an automatic block signal system extending from Seattle to Spokane, a distance of 173 1/2 miles. This is said to be the longest unbroken signal installation on a single railway anywhere in the world. On this route a train signal system is operated, most that under the block system every foot of the journey, there being no gaps or breaks whatever in the continuity of the signaling system. Other main line mileage provided with the automatic block system brings the total up to 2,885.5 miles so equipped on the Great Northern lines.

This work was started in a small way during 1913 at which time the first position upper-quadrant semaphore signal was adopted as standard. In 1907, 120 miles of track was provided with automatic in Northern line. The outstanding advantages of this new type of signal over the old style semaphore warranted its adoption as standard on the Great Northern. This signal system is great simplicity and reliability of indication, there being no rotary or moving parts subject to derangement in operation or to freezing in the winter months.

At night time railway signals of necessity are displayed by lights and it is consistent to use the same colors by day, now that it is feasible to do so. This produces uniformity of signaling which is even smaller than those commonly used in an automobile headlight. The skillful use of lenses with a 5-watt lamp has produced a signal with a beam of light brilliant even in the most adverse conditions for more than a mile in bright daylight, and at night, of course, this beam of light could be seen much further.

Another interesting feature is the manner in which the supply of current of constant voltage is furnished to these signals in a territory where generally there is no commercial power available. A considerable part of the Great Northern is constructed through the mountains, and in such districts where no outside supply of power is available these light signals are operated by means of the semaphore batteries which are constantly charging a set of storage batteries, which in turn furnish current of constant voltage and volume to the signals.

It is of course not to be noted that there is not a single oil lamp in use on these signals the entire distance from St. Paul to Seattle, electric lamps being used throughout. The entire signal system is so in-

Dr. J. J. Froy, of the California State Bureau of Dairy Control now claims 220 pounds as the average fat production for the dairy cows of California. It is not stated just how the doctor reached these conclusions, but it would seem to an outsider a rather bold jump from an average of about 100 pounds claimed for the cows of California only four months ago; but then we all know that California has a wonderful climate and things do grow very fast.

In the Heart of Spokane, close to stores, theatres, and the business district, the Cour d'Alene Hotel offers great simplicity and perfect service. Popular prices and perfect service. "The Hotel With a Personality."—Adv.

**Miss Maggie Nesbit Married**  
Word has been received in Genesee of the marriage at Dufer, Oregon, of Miss Maggie Nesbit to a Mr. Yates of that place.  
Miss Nesbit formerly lived in Genesee and at one time was a teacher in the public schools here. Her friends will join in congratulations.  
The newly-weds will make their home at the Dalles.

**Buys Delivery System**  
Chas. Jain last week bought the Merchants Delivery system at Lewiston and has taken over the business. Charley says he don't mind to work a little, but that he likes to ride while doing it.

**Entertained at Dinner**  
Mrs. Art. Hove entertained at dinner Thursday evening, Mr. and Mrs. Jas. Nelson and daughter, Mildred, of Seattle and Mr. and Mrs. Henry Hanson.

You can get your blue stone at Herman's Hardware Shop. 12-1

**Card Club Entertained**  
Mrs. Fred Shirrod was hostess Tuesday afternoon to the Card club and a number of friends. Pinochle was played at five tables. Mrs. F. S. Casebolt won the largest number of games and was awarded the prize and the consolation was given to Mrs. Gloria Sampson.  
Besides club members the guests present were Mrs. E. W. Vanouck, Mrs. T. H. Herman, Mrs. Gus Fickens, Mrs. Otto Kretschmer, Mrs. Johanna Christensen, Mrs. White of Lewiston, Mrs. Wm. Fish, Mrs. Mahlon Pollett, Mrs. Harold Hammond, Mrs. Carl Erikson and Miss Maggie Bottjer.  
Mrs. Jas. Magee invited the club to meet at her country home on September 28.

**K. of P. Busy Again**  
The Knights of Pythias met Tuesday evening, the first meeting of the after-harvest season, with Arthur Hove, chancellor commander, in the chair. A good attendance was reported.

A stag feed and smoker is announcing for next Tuesday night. It is also stated that F. E. Dicus and Ed. Vanouck will mix the mulligan.  
All members are asked to be present if they possibly can.

**Is Seriously Ill**  
Little Margaret Tobin, daughter of Mr. and Mrs. Joe Tobin, is seriously ill and was taken to St. Joseph's hospital, Lewiston, the first of the week.

**TOO MUCH SPEED—EIGHT ARE KILLED**  
In a news dispatch from Medford, Oregon, under date of September 15, relates the fate of a auto load of tourists:  
The bodies of four of the eight victims of an automobile accident at Lookout point, on the Crater Lake highway, near Prospect, Oregon, had been recovered from the Rogue river on Monday. They were D. T. Norris, refrigerator mechanic, Akron, Ohio; Jesse Kitchen of Mahaffey, Pa., aged 35; Theodore Beize of Jacksonville, Oregon, and DeWitt Talmadge Norris, aged 6, son of D. T. Norris.  
The bodies of Mrs. Norris, a sister of Kitchen, her two daughters, aged 4 and 3 years, and Mrs. Beize of Jacksonville, Oregon, were still imprisoned in the car, which was wedged between rocks in the river.  
The bodies of the two men and boy, badly bruised, were found by the rescue party in a swirling pool of water about 15 feet from where the car lay submerged.  
The car plunged off the Crater Lake highway about 4 o'clock Sunday afternoon, the driver apparently being blinded by the sun when he came around a sharp curve.  
Wheel tracks showed that the car had skidded 200 feet before the fatal plunge and that the brakes had been hurriedly applied.  
The only eyewitness to the accident was J. W. Burgoyne, of Portland, a motor salesman, who was standing on a bridge 300 feet away. He saw a cloud of dust, heard a roar and a muffled scream, then saw the car as it dropped 200 feet into the river below. It fell in ten feet of water and was pinned down by a huge log which was loosened by the falling car.  
Indications are that the car was making too much speed, else it would not have skidded 200 feet before it left the road on its fatal plunge.  
The only wonder is that many more fatalities do not occur, taking into consideration the number of drivers of all kinds one meets on the road.

**Pine Grove News**  
Mrs. Frank Lambert visited Sunday with Mrs. Wm. Freeburn.  
Miss Thelma Hanson visited Miss Kathryn McMahon Thursday night.  
The families of Frank Qualey and Dick Green spent Sunday with Mr. and Mrs. Fred Brazier.  
Mrs. Johnson and children and Mrs. C. H. Spurbeck visited at the Henry Whitte home Sunday.  
Miss Elba Swanson is teaching the second grade and one subject in the third grade at Kellogg, Idaho.  
Harry Perks was renewing acquaintances in Pine Grove Saturday. He has been working in the fire zone all summer.  
Miss Marguerite Spurbeck returned Monday from Spokane where she attended the fair and visited friends for several days.  
Jack Gehrke returned Saturday from a three day grouse hunt on the Salmon river country, where he had gone with Sam Lange and Oscar Danielson. They reported the hunting good and the birds plentiful.  
Mr. and Mrs. Chamberlain and daughter Sylvia, recently from Olympia, Wash., were guests at the C. H. Spurbeck home Tuesday and Wednesday of this week. They expect to go to California soon. Mrs. Chamberlain is a niece of Mrs. Spurbeck.

**Grey Eagle News**  
Pearl Schooler visited at school on Tuesday.  
Clara Hamilton was a Sunday visitor at J. C. Cameron's.

**H. N. CURD PRESIDENT MANUFACTURERS' ASS'N**

H. N. CURD, general manager of the Pacific Car & Foundry Company, was elected president of the Manufacturers' Association of Washington early this month. He is the former president of the National Association of Manufacturers who has been in the industry since 1907. He was also president of the Board of Trustees and was promoted from vice president to the present position.

**National Dairy Leader Is Northwest President**

Dr. H. E. Van Norman, president of the American Dairy Milk Institute, Chicago, was the principal speaker at the Whatcom County Dairyman's picnic recently. Dr. Van Norman is one of the shining lights of the dairy industry of this country. He was professor of dairying at the University of California for a number of years, resigning to take the chairmanship of the World's Dairy Congress, held in Washington city in October of 1923. Since then his attention has been directed toward centralizing the power of the dairy industry. Powdered milk has now become one of the most important of our dairy products, the baking and poultry interests taking all that can possibly be manufactured at steadily increasing prices. When first put on the market a few years ago powdered milk went begging at seven and eight cents a pound. Now the manufacturers are being behind with their orders, and at prices ranging round 12 cents a pound.

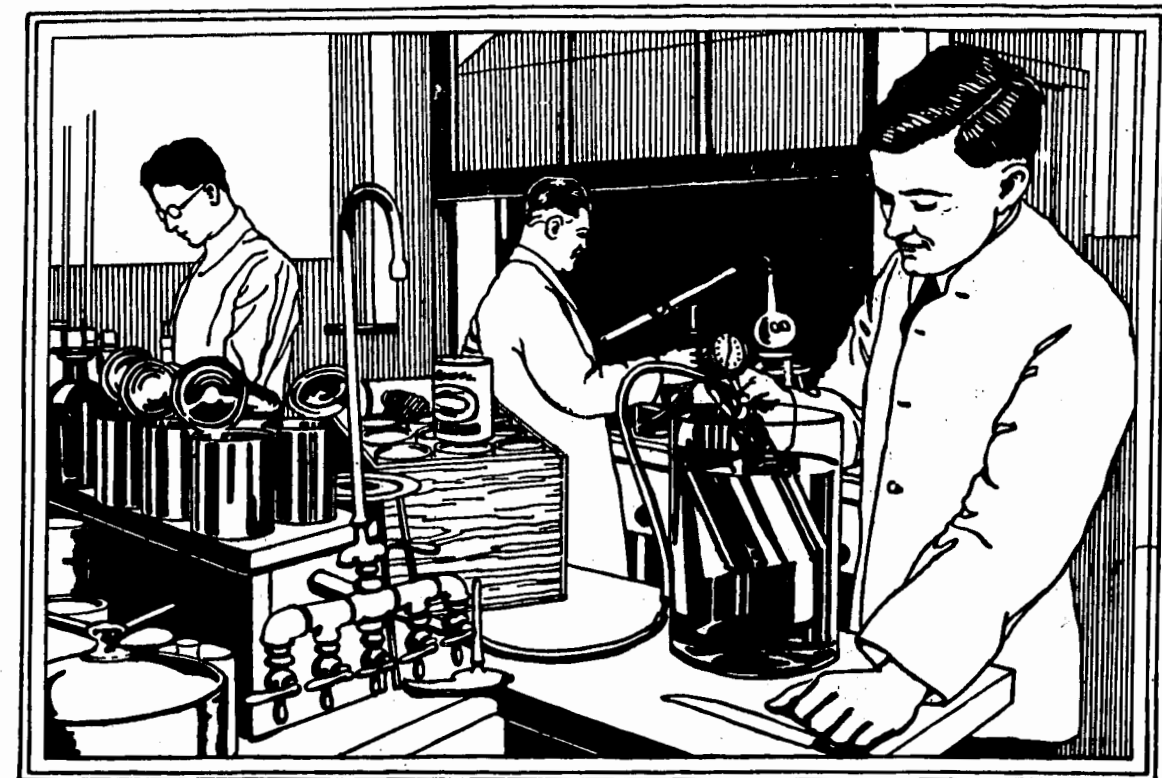

**Insanity Increasing**

Never before in the history of the country has there been as much insanity as at present. The Department of Commerce has just issued a report of latest available insanity statistics. These reveal 245 patients per 100,000 of population in hospitals for mental disease. The number of commitments per year has also grown by leaps and bounds in recent years. The number of insane persons in our asylums is now three times as great in proportion to population as was the case in 1880.—Thrift Magazine.

Farmers are rapidly learning to use sweet clover as a green manure for corn. Recent experiments on the Paulding County Farm emphasize the value of this practice. As a 4-year average the inclusion of sweet clover as a plow-down crop for corn from 31.3 to 48.7 bushels per acre and the oats following from 40.9 to 49.8 bushels per acre. It will be recalled that commercial fertilizers have been relatively ineffective on this soil. This raises the question whether sweet clover may not have some special value in opening up these heavy soils in addition to supplying nitrogen to the crop.—Ohio Agricultural Station Bimonthly Bulletin.

Prophecy that Seattle will become the wheat port of the Pacific Coast was expressed by Colonel George Lampling, president of the Seattle Port Commission before visitors to the recent Pacific Northwest Merchants Exposition. He told of plans of the port to spend \$100,000 to provide for additional facilities at the Hanford Street terminal to handle grain. "To offset the ten per cent wheat differential on rail rates in favor of Portland against Seattle, the Port of Seattle is making special elevator rates to large exporters of wheat," he announced. "Our improvements to the Hanford Street elevator will triple its capacity and Seattle this year will ship from six to ten times as much wheat as in any previous year."

A keen-eyed mountaineer led his overgrown son to a country schoolhouse. "This here boy's a ceter larmin," he announced. "What's yer bill of fare?" "My department, sir," replied the professor, "consists of arithmetic, algebra, geometry, and trigonometry." "That'll do," interrupted the old man, "load him up with trigonometry." He's the only poor shot in the family.

**Research Work of the National Canners Association**

THE housewife who eagerly welcomes the help given her in canned products would be astonished to know of the amount of careful preparation and trouble that goes to make her canned foods palatable, sanitary and healthful. Her neat shelves of convenient, prepared foods represent much thought and scientific research.

Science has paved the way for every new advance in canning since the days when Nicholas Appert made his first experiments in the canning process more than a century ago. The National Canners Association, organized in 1907, soon saw the need for organized research as an aid to its members and in 1913, at the suggestion of Dr. Harvey W. Wiley established its own Research Bureau, which is now under the direction of Dr. W. D. Bigelow, formerly Dr. Wiley's assistant.

The Research Laboratory at Washington conducts investigations in chemistry, physics, biology, bacteriology, and the canning of foods and the composition, nutritive value, and storage of canned foods. Its work is closely correlated with several universities. In addition to these universities, the laboratory is in easy contact with the administrative and scientific offices of every department in the United States Government, maintaining cooperation in many fields. Recently, in its search for a new disinfectant for apples, the Department of Agriculture turned for aid to the Research Laboratory of the National Canners Association. The disinfectants now in common use touch only the skin of the apple and since the fruit is peeled before canning, the canners have no great interest in the new disinfectant, but the aid of the scientists was gladly accepted.

Not long ago, a canner found himself with a much larger supply of peas on hand than his steam retorts could handle. All food is canned the same day it is picked and peas are used that day would result in waste and loss of money. A wire was dispatched to the Research Laboratory and within an hour back came the information that the peas could be cooked a shorter length of time at a higher temperature with equal results. Without this ready information, he would have sustained a loss and so would the public had his pack failed. A few years ago, the claim was made that canned foods are robbed of their vitamins by the process of sterilization. Extensive investigations by the Research Bureau warrant the general statement now that vitamins A and B are not destroyed to an appreciable extent and that four or five times as much vitamin C is contained in canned foods as in home-cooked foods.

BOSTON BROWN BREAD

**IRON IS A NECESSARY PART OF THE DIET BECAUSE IT BUILDS UP THE BLOOD.**

WIDESPREAD discussion of food properties in the press of the past few years has awakened the housewife to the need of applying scientific methods to the present question of feeding her family. To many the charts pictured above will be of great help in making understandable much of the theory that, in the past, has seemed undeciphered, too far away for plain every day use. These charts are prepared from statistics gathered by the health experts, and they have authority back of them.

One of the housewife knows the sources of minerals and vitamins essential in the diet, she has only to include those vitamin and mineral containing foods in her menu. This is greatly simplified by the use of canned foods, which give her the best mineral and vitamin sources the year round. Of the best are spinach, stringless beans, peas, containing both kinds of minerals indicated and large amounts of vitamins A, B, C and D. The housewife need never worry about pea or bean season, for either are available, cooked, needing only re-

**Wholesome Goodies Made with Cherries**

EIGHTY per cent of the cherries picked during July are canned. Most of these are sour red cherries. They are packed in large No. 10 cans for hotel use and in small cans for household use. The large cans are good for making preserves when the housewife wants to prepare some favorite preserve on not too large a scale.

**Deep Dish Cherry Pie**  
Line a deep pan with plain pastry, cover with canned sour red cherries and juice, several small lumps of butter, sprinkle with sugar, dredge with flour, add another layer of pastry, then the rest of the fruit with sugar, butter, and flour. Add to crust and bake.

**Cherry Jam**  
Drain liquor from gallon can of cherries, boil liquor till it is reduced by half. Add sugar in equal quantity, cook until a little poured on a plate jellies, run fruit through meat chopper, then add it to hot syrup. Boil again and again till it proves, pour into jars, and seal. Canned cherries are always available and the jam can be made at any season of the year.

**Cherry Pie Pie**  
Drain canned cherries from syrup. Put cherries in center of six inch square of pastry, sugar, butter, and spice to taste. Brush white of egg on edge of pastry, bring four points to top, brush surface with white of egg, bake and just before taking out, sprinkle with powdered sugar to form glaze. Make syrup into a sauce.

**Cherry Pie Pie**  
In a deep dish on top of stove boil cherry juice into the hot juice, drop by spoonfuls soft lumping paste in round balls. Cook till they are done, about twenty or thirty minutes.

**Summer Luncheons**

SIMPLE, easily digested foods that can be prepared with little effort are best for summer luncheons. In the heat of the day the housewife is not equal to much preparation, and her shelf of canned foods with vegetables and fruits that may be served in a few minutes is a ready solution.

Spinach and eggs make a splendid luncheon dish, complete in food elements. The eggs may be poached and put on top of each portion of spinach, or hard boiled and sliced. Spinach may also be used cold with egg and mayonnaise as a salad, or with any left-over vegetables such as stringless beans or peas in a vegetable salad.

Tuna fish and salmon make good luncheon salads, and with wholesome bread and butter sandwiches, cookies, and iced tea, the menu is as complete as one could wish. These fish are also good when creamed. With one such hot dish, an excellent dessert is fruit salad. A slice of Hawaiian pineapple with a lump of mayonnaise is sufficient. Canned pears are equally good, and canned fruit salad, combining five fruits, is delicious. A fruit cup may be the dessert and canned crushed pineapple or canned grapefruit topped with a luscious maraschino cherry sauce tempt any jaded hot weather appetite.

An easily prepared dessert to supplement the luncheon is Brown Betty made with canned applesauce. Butter the baking pan and put in layers of the applesauce and breadcrumbs, sprinkle with spices, brown sugar, and butter. Bake breadcrumbs on top. Bake to a golden brown. Cream or hard sauce is good with Brown Betty, but not necessary.

**Jellied Vegetables**

A rare treat was offered to some American visitors by a Venetian host who gave a dinner in their honor one summer evening on a large island in the Grand Canal near the Doge's Palace. Every dish served was cold, and prominent on the menu were jellied meats and vegetables.

These are excellent summer foods, whether one eats them on the Grand Canal or in an American home. Here are suggestions, simplified by the use of canned foods.

**Tomato Jelly**  
Bring one can chicken soup and two cans tomato sauce to boiling point and pour into two envelopes gelatin softened in one cup of cold water. Add three diced cucumbers, two small cans of chicken, two tablespoons sugar,

**WOODWORK PLAYS PART IN HARMONIOUS APPEARANCE**

A room is just as beautiful as its woodwork. Many a color scheme is spoiled by cheap, homely woodwork painted or stained a weird shade that never harmonized with anything in the house. In such instances, the housewife usually tries to cover the offending wood with wide curtains, to hide its ugliness as well as possible, but it still insists on peeping out at some vital spot and spoiling the whole setting.

For a long time, it was believed that a house had to keep the woodwork which a wise or otherwise builder had seen fit to bestow upon it. But the housewife of today is inclined to follow nobody's taste but her own in decorating her home, but the woodwork comes in for a renovation just as the walls do.

The housewife who can choose the woodwork for a new home without regard to cost, will, of course, choose hardwood with a waxed finish to bring out its beautiful grain. If it proves too expensive, she can choose its best substitute, soft wood, with the stipulation that it must be well finished.

Soft wood, when new, may be given a natural finish, which allows the grain of the wood to show through a coat of wax, or the flat varnish, which has taken the place of the old-time highly-glossed varnish. If this treatment is to be given to oak, chestnut or other open-grained woods, a coat of paraffin wood filler should be applied on the bare wood to fill the grain and pores and form a smooth hard surface for the finish. Close-grained woods, such as pine, cypress and birch, do not require a filler and the wax or varnish may be applied directly to the bare wood.

We have a lot of millionaires in America but few of them get that way by running for office.

**Welsh Had Their Way**  
During the reign of Edward I, the Welsh rose against the English, declaring that they would never acknowledge allegiance to any prince but of their own nation and language and of unblemished life. Edward II was born in a castle at Carnarvon, Wales, and he was presented to the Welsh people as "a native-born prince of unblemished life from whom they recognized their allegiance." He bore the title of prince of Wales.

**"EASTERN" AND "WESTERN" SYNONYMOUS, PAPERS 'SHOW**

The West and the needs of the West are daily becoming more and more generally known to Eastern people. The time has passed when an Easterner speaking of a trip to Chicago called it "going west". His journey is West of course, but he appreciates that Chicago is not West.

This change has been brought about not only by the increased facilities of transportation and the rapidity with which journeys can be accomplished, but by the almost continual travel of people east to west and west to east. Even the most Eastern of the magazines and weeklies have long since discovered that Western views and Western topics are matters of interest which must be included on the printed pages.

One of the happy results of this change is that we have ceased to make a distinction between eastern problems and western problems. They are now all being comprehended under the title of national problems. Eastern papers for weeks have been printing columns on western agricultural conditions almost equal in total to the totals which they devote to their own distinctly eastern affairs. The discussion of improved waterways in the West occupies a first page position in eastern newspapers close beside similar columns describing local eastern affairs. The reclamation and shipping problems, whether east or west, are now being discussed as national problems. This is good for all of us. Happily in the Western newspapers they are also showing an appreciation that it is not all beer and skittles even in the haunts of the Eastern money-makers and financiers.

The matter of the farmer struggling with the problem of the disposal of his surplus products is now appreciating that strikes in the industrial establishments of the east reflect themselves immediately in the agricultural districts by the inability to purchase and pay for farm products. The eastern industrial worker has as large a field as the farmer whether he is loafing or working, but without employment, no matter how strong his appetite, he is obliged to limit himself to his capacity to pay.

This mutual understanding is one of the finest things of American life. This is a great, broad nation, but our people are to be worthy of their traditions and of those who founded this nation must discard as they are happily discarding the thought that any distantly born nation, eastern, western, or far western, and recognize all our problems as national.

**Fortune Hunters**  
By Irving King

Everybody said the match was a suitable one. His comfortable little fortune, added to her comfortable little fortune, would be beneficial to both. The parties concerned in the case were Clarissa Maxwell and Madison James. James belonged to an exclusive, but rather inexpensive, club where he appeared regularly once a day. He accepted invitations to dinner and to take yachting trips.

Miss Maxwell was active in various charitable and "uplift" organizations. She called great society leaders by their first names and by them was called "Clarissa dear" in return.

That Madison James and Clarissa Maxwell should be brought together was inevitable. They moved in the same social orbit. That they should attract each other was considered quite natural.

Clarissa was thirty and Madison was thirty-five. Not knowing the reason of their having remained single so long their friends invented reasons to suit themselves. Clarissa, it was decided, had remained unwed because she was too good for the young man had married somebody else or had died; the majority voted in favor of death. Madison had not married because if he did so without the approval of an extremely aged and an extremely wealthy great-uncle would be a disgrace to the family. The reasons for celibacy were entirely satisfactory to their inventors but in point of fact were without the slightest foundation.

Clarissa had had no arly love affair and Madison was possessed of no worldly goods, but she was an extreme age, or in fact, of any great-uncle of any sort. But now, everybody said, the end of the bachelorhood and spinsterhood was approaching. Madison's antediluvian great-uncle had approved and Clarissa had locked up the money in a safe. A wonderful lover in the closet of forgetfulness.

The engagement was announced; it only remained to fix the wedding day. It was agreed by the parties most concerned that this should be done on a certain night when Madison and Clarissa were to go out in the evening to a large restaurant and take possession of a quiet corner. For the first time since their engagement something intangible seemed to have risen between them. Both were strangely silent and preoccupied. They got through dinner by talking forcible platitudes with each other.

At last Madison leaned back in his chair and said, "Well, Clarissa, when is it going to be?" She hesitated; her eyes were misty. But she quickly recovered herself and said in an even voice: "Madison, before we go any further, I have a confession to make. You think that I am possessed of a comfortable fortune. As a matter of fact, I haven't a cent. I have been living on an allowance made me by my Aunt Martha, who is in the enjoyment of a large fortune. The estate of her deceased husband. This income is only for her life, and she is now aged and in feeble health. If you marry me, you take a pennies bribe."

"I was a full minute before he spoke and then without looking up he said: 'I am sorry to hear that. I looked up before I proposed.'"

"And yet you did propose!" gasped Clarissa eagerly.

"Yes," said he. "And I also have a confession to make. I have hardly a dollar to my name. Ten years ago, after being granted from school, I went to Missouri. There I met a young man who had entered after completing my college course, I found myself by the sudden death of my father, who had suffered large financial losses, possessed of an expensive and extensive wardrobe and \$10,000. I came to New York. How I managed to string out that \$10,000 for ten years it would take too long to tell you. It was a truly marvelous exploit at which I am rather amazed at myself. But I am at the end of my rope now, briefly, they were bound 'Aux Ares.' With eastern expression was contracted to Ozarks. At first the new words meant the River Arkansas, then its basin, next the highlands north of it.

"And yet you did accept me!" cried Madison.

"Yes," said Clarissa. "I couldn't help it. And I was so afraid that when I got to the office on the day of the election, I would find that I had been nominated for prosecuting attorney, will not be candidate during the November elections, and Friday requested the county auditor to strike his name from the election ballot.

"This leaves the field open to Abe Goff, nominated for the office on the Republican ticket. Mr. Moore, at the time the Democrats announced that they intended writing his name in on the ticket in the primary elections, said that he would not be a candidate in the 1926 elections for the office, which he formerly occupied.—Star-Mirror.

**The Famous Ozark Country**  
But the Ozark country, famous as it is for its lead and zinc, and zinc, deserves to be even better known for its glorious scenery. Its remarkable geological features, its curious sink holes, some of the largest in the world; its unusual water power on rapid, rock-walled streams, the possibilities of which are revealed by the dam and plant of the Ozark Power and water company, on White River, near Forsythe.

The beautiful Ozarks are the most centrally located highlands in the United States. They cover a region larger than England in five states, Missouri, Arkansas, Oklahoma, Kansas and Illinois, though the greater portion is in Missouri. They comprise practically half the state. Fortunately, the name of this highland district is as pleasing as the country—though some of the people who live there do not think so. It sounds like an Indian name, but it isn't; in vain philologists will seek its derivation, until they have the simple key; it is a contraction of the French "Aux Ares." In early days, when travelers spoke of going to the French port on the Arkansas, they said, briefly, they were bound "Aux Ares." With eastern expression was contracted to Ozarks. At first the new words meant the River Arkansas, then its basin, next the highlands north of it.

**What a Faker**  
This article, which was clipped from a Boston newspaper published 61 years ago and reprinted in the Wall Street Iconoclast, might be of some interest to local wildcat prospectors:

"A man about 46 years of age, giving the name of Joshua Coppermith, has been arrested in New York for attempting to extort funds from ignorant and superstitious people by exhibiting a device which he says will convey the voice any distance over the telephone wires so that it will be heard by the listener at the other end. He calls the instrument a 'telephone' which is obviously intended to imitate the word 'telegraph' and win the confidences of those who know of the success of the latter instrument without understanding the principle on which it is based.

"Well informed people know that it is impossible to transmit the human voice over the wires as may be done with dots and dashes and signals of the Morse code, and that, were it possible to do so, the thing would be of no possible value. The authorities who apprehended this criminal are to be congratulated, and it is hoped that his punishment will be prompt and fitting, that it may serve as an example to other conscienceless schemers who enrich themselves at the expense of their fellow creatures."—Nezperce Herald.

### SUMMARY OF IDAHO WEATHER AND CROP REPORT

Following is the summary of Idaho weather and crops for the week ending September 22.

**North Idaho:** Rain Monday and Tuesday delayed farm work and hauling grain, but was beneficial in putting the ground in condition for plowing and seeding of fall wheat. Fair weather and moderate temperatures have prevailed since the rain. Best harvest on the Camas Prairie was delayed, but with continued fair weather will soon be in full swing. Cutting of corn is under way in the Kendrick section. Lettuce was greatly benefited by the rain and thinning is completed in Lewiston districts. The first harvest is over for this year and many teams are leaving the forest reserves. Stock are looking well.

**Southwest Idaho:** Generally fair and cool weather prevailed during the week, though light showers occurred in some sections near the close. Weather conditions were favorable for reasonable farm activities. Threshing is mostly completed, but

having continues in many sections. The harvest of peaches and early pears is drawing to a close and pruning picking and shipping are in full swing. Clover and alfalfa are being threshed for seed. Bean harvest has begun in the Burley district. Range feed and pastures are dry but stock are generally in good condition.

**Southeast Idaho:** The weather during the week was cool with light showers in some sections. Light frosts occurred in the northern part of the district, but no damage was reported. Grain harvest is about completed and threshing is progressing rapidly. The third crop of alfalfa is well on in some sections and cutting has begun in others. Early potatoes being dug and shipped to market. Beets are poor to fair. The range and pastures are dry, but cattle are generally in good condition.

**True to Form**  
Ambitious (To Leader): "If you'll give me a job in your orchestra I know I can learn to play the saxophone in no time."  
Leader: "Son! They all do."

### High School Opera House

Friday and Saturday, Sept. 17 - 18

## "Miss Bluebeard"

— WITH —  
**BEBE DANIALS**

It's the maddest, gladdiest, jazziest comedy ever made. It's French, it's frisky, it's ritzzy. It's FUNNY! "Miss Bluebeard" is a howl from beginning to end.

Imagine a French actress being accidentally married and then finding out that her husband is not her husband at all, but another man! When Bob Hawley took Larry Charter's name and got stranded with the beautiful Colette in a small French village, the fun started.

The mix-up which ensues in Larry's London apartment with Colette, Lulu, Eva, Gloria, Bertie and Bob trying to unscramble the affair is hilariously funny.

Two Reels of Comedy

### THE PICTURE SHOWS

**"The Chechahcos"**  
The feature film at the Hotel theater for Saturday night will be "The Chechahcos," showing the hardships and perils endured by those who take part in a gold rush to the interior of Alaska. It is full of action and gripping interest from start to finish. Professor Stanlaw, his wife and baby are members of a party enroute to the newly discovered Alaskan gold fields. Others on the boat are Richard Steele, a gambler, Bob Dexter and Horseshoe Riley, prospectors. The boat is being driven at breakneck speed and the boilers finally exploded. Mrs. Stanlaw sees her husband killed and is finally persuaded by the gambler that her baby likewise has perished. Alone in Alaska she gradually drifts under Steele's influence and becomes a woman of the dance halls. The baby, rescued by Dexter and Riley grows into womanhood and is betrothed to Dexter. Just before the wedding Dexter comes across Steele and his mistress.

**"The Thrill Hunter"**  
For Sunday night, September 19, the offering will be William Haines in "The Thrill Hunter" at the Hotel theater.

He was a young writer of romantic stories. And she was the publisher's daughter. But he didn't have a thrill story. Naturally, she was his sweetheart disliked having his selling pencils on the corner so she urged him to get to work and learn how to smash out a couple of exciting situations before he found himself without any kind of a situation.

He tried too, but you know how it is. If you're naturally a timid, peace-loving fellow—why it is hard to think up all sorts of wild ideas.

On Wednesday night, September 22, the offering will be Johnny Hines in "The Live Wire." Watch for further announcements in front of the theater.

**"Miss Bluebeard"**  
At the High School Opera house for Friday and Saturday nights the offering will be "Miss Bluebeard," with Bebe Daniels in the leading role.

**"Miss Bluebeard"** is a story of Colette Girard (Bebe), French actress who goes to London. Enroute she meets a young fellow who poses as Larry Charter, prominent composer. The pair are stranded in a small town railroad station and go to the mayor's house as the only place of shelter in the little hamlet. The mayor mistakes them for a young couple who is expecting and marries them. Fancy that!

Now Bob Hawley, Colette's temporary husband, had given the name of his friend, Charter, so the girl finds herself with not one husband, but two. Nothing to do now but get a divorce. But when the real Larry Charter gets a glimpse of his make-order bride, he decides that it is a honeymoon Colette will get, not a divorce. The girl also falls for him, but will not admit it. She's heard a lot about these author fellows and far be it from her to be another of his "inspirations."

**State Parent-Teachers' Meeting**  
A north central district meeting of the Idaho State Parent-Teachers' association will be held in Lewiston, October 21, at which Mrs. L. Rosenfield will be the guest of honor. The district includes Nez Perce, Lewis, Idaho, Clearwater and Latah counties. A similar meeting will be held in October for the northern district, comprising Boundary, Bonner, Shoshone and Benewah counties.

**Don't Buy Good Money Under Poor Coat**  
Buying the cheaper grades of coal is one of the surest ways in the world to bury good money under poor coal. Let us show you the facts which prove the economy of buying Owl Creek coal.

THE UNIVERSAL CAR

## Authorized Sales and Service

If you have a Radio, keep this in mind—No battery is more suitable for Radio purposes than the genuine Ford 13 plate battery with rubber case.

If you ever expect to need new tires—Be advised of this fact, no tire is backed by a better guarantee than the Lancaster.

If you are thinking about buying a new car—do not overlook this. The Ford car will cost you less, give more miles per dollar of both first cost and upkeep, be in style the longest, ride just as easy, and have a greater resale value than any other car on the market.

If your Ford is hard to start let us help you out. Cold weather is coming on and doubtless your Ford will get no better without attention.

## Genesee Motors

Lincoln Ford Fordson

### WHAT HAPPENED HERE TWENTY YEARS AGO

Clerk Nebelsieck of the school district has completed the school census for 1926. There are 186 boys and 179 girls of school age, a total of 365.

The rains of Tuesday night and Wednesday of this week have again delayed threshing. Heading is entirely completed and it is estimated that close to two-thirds of the threshing has been finished. The weeks of favorable weather will complete the harvest work.

This year the Puget Sound warehouse has been equipped with a patent sack piler, a contraption operated with a gasoline engine, and is said to be giving excellent satisfaction.

**Don't Buy Good Money Under Poor Coat**  
Buying the cheaper grades of coal is one of the surest ways in the world to bury good money under poor coal. Let us show you the facts which prove the economy of buying Owl Creek coal.

**Notice to Delinquent Stockholders**  
Notice is hereby given that there is delinquent upon the following described stock on account of assessment No. 27, the several amounts set opposite the names of the respective shareholders, as follows, to-wit: W. D. Woodward—9,000 shares, \$81.00

A. E. Rosenau, 10,000 shares, \$120.00. And, in accordance with law, so many shares as may be necessary will be sold at the office of the company in the city of Genesee, Idaho, on the 1st day of October, 1926, at the hour of 7 o'clock p. m. of said date, to pay the delinquent assessment, together with the costs of advertising and expense of sale.

### WEDNESDAY'S MARKETS

Club	Wheat	\$1.19

# THE GENESEE NEWS

VOL. XXXVIII GENESEE, LATAH COUNTY, IDAHO, FRIDAY, SEPTEMBER 24, 1926 NO. 13

### CORNWALL BROTHERS, MOSCOW, IN DEADLY QUARREL

Tuesday morning's Spokesman-Review contained the following news dispatch from Moscow:

Enos Cornwall, member of a pioneer Moscow family, living on a farm just east of Moscow city limits, was shot twice and probably fatally injured at his home Monday evening following an all-day altercation with his two brothers, Earl and Mason Cornwall.

According to Sheriff Charley Summerfield, Earl Cornwall later admitted the shooting when taken to the sheriff's office with Mason Cornwall for questioning. Earl Cornwall will be held pending the outcome of his brother's injuries.

Enos Cornwall is in the Grinnon hospital suffering from a wound through the head and another through the body. The first shot, fired at pointblank range as the victim stood in the entrance to the house, struck him in the forehead below the right eye, and ranged to the back of the neck. The second shot struck him after he had fallen, entering the left side and passing out the back under the right shoulder.

According to Sheriff Summerfield, the men, who are unmarried and lived on a farm with their widowed mother, had recently disagreed as to the operation of the farm. The dispute increased in bitterness until Monday night, when the warfare developed. About 7 o'clock Monday evening Enos was locked out of the house by his brothers.

He telephoned his mother, sometime after 10 o'clock, that he was coming home at once and did not expect to be locked out. His mother urged him to do nothing rash, and to be careful. He is said to have replied that he wanted no trouble merely wishing to come home and retire.

Arriving at the house he was met at the door by the two brothers and they had words which grew more and more violent until the shooting occurred. The mother was not present at the shooting, it was said.

The Cornwall brothers are well known in the Genesee section, they being old-time residents of the section to the northeast of town.

**Genesee Students Make Good**  
Two students of the University of Idaho from Genesee won special recognition for their scholastic attainments in the University of Idaho during the last college year, according to announcement from the registrar's office. They are Lela Grace Jain, who won freshman class "highest" honors, and Kenneth Milton Platt, who won freshman class "highest" honors.

Highest honors are awarded for an average grade for the year of 5.666 or better and high honors for a grade of 5.333 or better. Under the system used by the university, 6.0 is the perfect grade.

Highest honors were won by 14 seniors, seven juniors, nine sophomores and 13 freshmen.

**F. H. Thomas Seriously Ill**  
Word has reached Genesee of the serious illness at Jerome of Frank H. Thomas, former superintendent of schools here, he suffering from typhoid fever.

Mr. Thomas has many warm friends here who will be sorry to learn of his illness.

### PUBLIC SCHOOL NOTES OF MUCH INTEREST

As last year, the high school curriculum has been arranged to fit the graduate for entrance to the state universities and other schools of higher learning. But the high school tries to make itself individual as well, so different courses are offered as electives. This gives the student a chance to find out what he is best fitted for and at the same time makes his education more interesting. The following required and elective courses are offered this semester:

**Freshman—Required:** Algebra I, English I, penmanship, spelling, world history or general science. Elective: Sewing, manual training.

**Junior—Required:** English III, chemistry. Elective: Bookkeeping, manual training.

**Senior—Required:** English IV, chemistry, American history and government. Elective: Commercial law, typing, mathematics III, Latin II.

It will be noticed that the first two years of the course are very much lined out for the student while a wider range of subject matter is offered to the upper classes. As the student reaches more toward his maturity he should have more and more chance to express the kind of work that he wishes to do.

The grade school at Genesee is showing a marked increase in enrollment over that of last year. The growth is healthy. This school is the backbone of the high school and must have the best of attention. The faculty of the Genesee grade school are all normal school graduates and have had from two to four years of experience in teaching in the state of Idaho.

If the country adjacent to Genesee were consolidated into one school district the boys and girls of this section would have a school system second to none in the state in enrollment.

The High School opera house is putting on a feature picture this weekend, "The Vanishing American," a Zane Grey story produced by the Famous Players-Lasker corporation. The opera house will be warm from now on this fall and winter. We appreciate your patronage as the money goes to the benefit of the students of Genesee.

**Football**  
Football is again holding the interest of the community and school. The turnout is not as big as expected. There are only 17 men in suits. These are turning out every night and are working hard. The school and the town owe much to these boys who are spending two hours every day to put Genesee on the map, and it is only right that everyone get behind the team and support it in all its games.

The eighth graders have been memorizing the Star Spangled Banner this week.

The seventh graders are making outline maps of the British Isles for geography.

We have a new pupil this week—Martha Hettinger—enrolled in the seventh grade.

### SEMI-LOCAL NEWS CLIPPED FROM EXCHANGES

**Growing Grapes at Deary**  
Perhaps the best evidence of climatic changes in this section is to be seen in the fact that this season grapes grown in Deary are on the market in sizeable quantities, from the J. A. Collins tract. The fruit is of excellent quality and highly flavored, tasting better, many think, than grapes grown by irrigation—Latah County Press (Advsy).

**Dr. Elliot Visits on Cholera**  
Dr. T. A. Elliot was a visitor from Genesee Wednesday afternoon, calling at the News-Letter office and stating that there is no need of farmers' relief their pigs before they are full grown, and losing money. If they are afraid of cholera in their hogs, he advises getting a good worm powder, keep the pens and bedding clean and do not expose them to bad weather, and there will be no danger and no cholera.—Colton News-Letter.

**Some Potatoes**  
A remarkable bill of potatoes is on display in the postoffice window. There are 19 of the tubers, grown in a single hill from a single stem. The longest potato measures six inches in length and the shortest 1 1/2 inches. Ten are above 3 1/2 inches in length, five would have to be classified as small potatoes and the remaining four are of medium size. They are of the Netted Gem variety and were raised by Oscar Nelson. If every hill of the 12 acres he has planted yields that well, Genesee will have potatoes enough to last all winter.—Troy News.

**To Begin Road Contract**  
Terteling & Sons, Moscow contractors who are to build the 8.75 miles of highway in the Pollock sector of the Salmon river canyon this fall and winter, are now taking in their equipment and are about ready to start moving dirt, according to H. W. Gregory, director of highways, with headquarters at Boise.

This project is next to the last grading job on the famous Salmon river canyon and the highway officials and the people who are pleased to know that work is actually starting. This contract will eliminate the last of the narrow road between Whitebird and New Meadows, and the remaining project of about three miles is in good terrain and can be completed in the money.

The contractors will use a heavy crew this fall in the dirt work and are planning on making their main camp at the old town of Pollock—Lewiston Tribune.

**Track Laying In Rushed**  
Track laying on the new branch of the Northern Pacific railway company, Orofino to Headquarters, is progressing very satisfactorily, the track laying machine and crew of about 50 men putting down more than they estimated at the start of a half mile. Wednesday of this week 3,000 was made, bringing the end of steel eight miles up Orofino creek and over half way through the grading contract of Ramsey & Jordan. This mileage extends past the first two crossings of Orofino creek, making three bridges which have to be built.

A contract was recently let to E. N. Brown, an old-time logger, to get out some 300,000 feet of round cedar posts and piling for nine bridges to be built in the vicinity of Quartz creek. Mr. Brown is now logging on the head of Grasshopper creek and will deliver the timbers to the bridges. These timbers will be placed and ready for the decking as the steel proceeds. All the bridges between here and Quartz creek will be built, as the steeling-up of the bridge will be done in the fall and taken from the Orofino yards, although many of the foundations are already in.—Clearwater Tribune (Orofino).

**Buyers Town Residence**  
A deal was closed last week between F. S. Casebolt and D. W. Aherin, whereby Mr. Aherin became the owner of the Casebolt residence and Mr. Aherin and family will later occupy it as a home.

**First Snow of Season**  
The first trace of snow of the fall season fell Wednesday afternoon, intermixed with rain—but it was snow just the same.

After the small "squal" the sun came out bright and made one think of April and the approach of spring instead of figuring on just how much coal is going to be needed.

It is no trouble to keep our eyes and ears open these days, but it requires a lot of forbearance to keep our mouths shut.

**A Serious Accident**  
Glen Mayer, the seven year old son of Mr. and Mrs. Al. Mayer, had the misfortune of falling from a ladder onto a broken gas lamp while playing in the barn with some friends last Thursday evening. The cut appeared to be quite serious and the little fellow was at once taken to the Grifman hospital at Moscow, where he has had reports he was getting along nicely.

**Breaks Arm**  
Elmer Larson had the misfortune of breaking his right arm just above the wrist last Thursday when attempting to crank a Ford car belonging to Harvey Hagen. The fracture was reduced by Dr. Ehlen, and Elmo is getting along nicely now.

**Entertainers at Dinner**  
On Sunday Mrs. G. A. Bumpass entertained at dinner Mr. and Mrs. Arthur Hampton, Mr. and Mrs. Roy Patchen and Glenn Patchen of Coeur d'Alene.

**CHURCH NOTICES**  
Congregational Church  
Rev. Paul W. Sprague, Minister.  
Mrs. W. M. Herman, Pianist.  
W. E. English, Choir Director.  
Sunday school at 9:45 a. m.  
Regular preaching service at 11 o'clock.  
Sunday will be the annual rally day for the Congregational Sunday school. A pick-up dinner will be served after the church service.  
All members and friends of the Sunday school are invited.

St. John's Lutheran Church  
A. F. Wolf, Pastor  
Sunday school at 9:30 a. m.  
English services will be held each Sunday morning at 10:30 o'clock, with the exception of the first Sunday of each month, when German services will be held at the usual hour.

Christian Church  
Bible school at 9:45 a. m.  
Morning service at 11 o'clock. Sub-This is United Christian Missionary Society day in the Churches of Christ. The pastor has chosen as a topic under which to present the work, "Seven Arms of Love."  
Evening service at 7:30. Subject, "Safety First."  
The missionary society will meet next Tuesday afternoon with Mrs. N. E. Beach. This is "guest day" and every member is urged to be present and bring a friend. Mrs. Aherin will be the leader.  
One number on the program will be the dramatization of "The Old and New Rural Church."

Genesee Valley Lutheran Church  
Cerk A. Peterson, Pastor.  
Saturday, September 25, at 2 p. m. Confirmation instruction.  
Sunday, September 26, at 8 p. m. Young People's Luther League. A good program is being prepared for this rally meeting. Members are urged to bring friends.  
Thursday, September 30, the ladies' aid will hold their mission meeting at the home of Rev. and Mrs. Peterson in Moscow. The mission boxes will be received at this meeting. All members and friends are invited.

**Will Make Annual Fall Visit**  
The Genesee Valley Lutheran ladies aid will make its annual fall visit to the parsonage in Moscow on Thursday afternoon, September 30.  
Consider this announcement a personal invitation to all members and friends to come and make this meeting a real rally day.  
A special mission program will be rendered and the mission boxes will be opened at this meeting.

**Altar Society Entertained**  
The Altar society of St. Mary's church was very pleasantly entertained by Mrs. Gus Fickens Tuesday afternoon. After a short business session a very delicious luncheon was served.  
The next meeting of the society will be with Mrs. Edwin Smolt on Tuesday, October 5.

**Has Taken Over Business**  
Mrs. Maud A. Slightom has purchased the "Peacock" beauty parlor from Mrs. D. B. Eronson and has taken charge of the business.  
In addition to the beauty parlor she will also conduct a dress-making establishment and will carry a line of hats, ready-to-wear articles and goods.  
Mrs. Slightom will be assisted by Miss Evelyn Hoffer, a graduate of a beauty culture institution at Portland, Oregon.  
Mr. and Mrs. Slightom and Miss Hoffer come from Great Falls, Montana, and the ladies are not new to the business they have undertaken in Genesee.  
Mr. Slightom is a painter and paper hanger by trade.  
Some fond mothers believe that they could love their babies to death and some mean old bachelors wish they would.

Mrs. Robert Gray motored to Moscow on Monday.  
Mrs. Mary Edwards visited at the Robert Gray home this week-end.  
Mr. and Mrs. Fred Bershaw were Lewiston visitors Saturday evening.  
Gladys and Mable Harms made a business trip to Moscow on Monday.  
Mr. and Mrs. P. A. Parks, Theodore and Theo motored to Lewiston on Sunday.

Frances and Kenneth Platt drove to Patick, starting bright and early Monday morning.  
Grandma Wahl, Phillip, George and Matt returned from Yakima and other points of interest, on Saturday evening.  
Almost everyone out our way is busy sowing the fall grain, digging potatoes and so on.  
(Delayed)

Mr. and Mrs. Chas. Schooler motored to Spokane Friday, returning home Sunday.  
Mrs. Mary Wahl, sr., and Phillip, George and Matt, motored to Yakima, Wash., on Monday, by way of Walla Walla, where they expected to visit relatives.

F. S. Casebolt of Yakima, Wash., was a visitor in our neighborhood this week.  
Mr. and Mrs. Arthur Olson and son were dinner guests at Lester Gray's Sunday.  
Mrs. Cameron and Wilfred visited at the J. C. Cameron home last Sunday.  
The Christian church missionary society met at the home of Mrs. Chas. Schooler Tuesday afternoon.

**Pine Grove News**  
Henry Whitted was on the sick list Sunday.  
Al Springer is helping Chas. Spurbek enlarge his reservoir.  
Mrs. W. A. Freeborn visited at the Leon Baker home Monday.  
Mrs. Sweet and daughter spent Tuesday with Mrs. R. F. Lambert.  
Miss Thelma Hanson spent the week-end with Miss Kathryn McMahon.

Mr. and Mrs. Tom Johnson left Monday for Yakima for an indefinite stay.  
Mr. and Mrs. Tom Johnson and Mrs. C. H. Spurbek were Lewiston visitors Friday.  
Roy Sweet went to Felton's Mill Monday for a load of posts. He believes that good fences make good neighbors.  
**The 1927 Auto Plates**  
According to information sent out from Walla Walla, Wash., the contract for the making of the 1927 automobile license tags for Idaho has been let and they will be made in the Washington penitentiary at Walla Walla. The color scheme is a blue background with orange figures.  
Plates for southern Idaho will be sent to Boise while those for the northern part of the state will be sent direct to counties.

**Ladies Aid Entertained**  
The ladies aid of the Congregational church met for an all-day session Wednesday at the home of Mrs. F. K. Bressler.  
In the forenoon the ladies tied a comforter and at the noon hour a lovely pick-up dinner was served.  
The day being the anniversary of Mrs. W. J. Harman's birth, the ladies gave her a handkerchief shower and a beautiful birthday cake was lighted with 76 candles, and which formed the center piece of the large dining table.  
The afternoon was spent socially and with needlework.

**Mrs. Shork Honored**  
The Tuesday club gave a party Tuesday afternoon, at the home of Mrs. Ira Hanson, in honor of Mrs. F. C. Shork who is leaving this week to make her residence at Pullman.  
The afternoon was spent playing pinocle and a dainty luncheon was served.  
Mrs. Shork was presented with a beautiful picture by the club members.  
Besides club members the invited guests were Mrs. F. E. Dicus, Mrs. Leon Follett, Mrs. Laura Phipps and Mrs. Watskey, of Omega, Kansas.  
Advertisers appreciate your trade.

**Beauty Parlor**  
I wish to announce that I have taken over the Peacock Beauty Parlor and am prepared to do all work of the class on Thursday, Friday and Saturday of each week.  
I have also opened a dress-making parlor in connection and will do sewing of all kinds.  
I will also handle a line of hats, ready to wear and art goods.

# THE FOREST POLICY OF THE CANADIAN NATIONAL RAILWAYS

A Clean, Well-Kept Right-of-Way on the Canadian National Railways. There Are Over 500 Miles of this Type of Right-of-Way in One Stretch Through Northern Ontario.

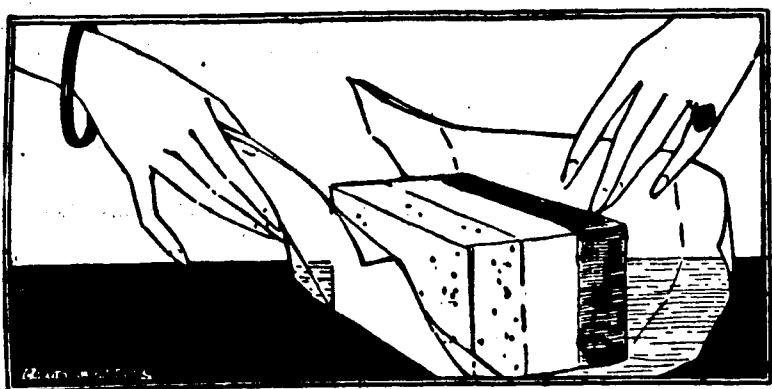

By Sir Henry Worth Thornton  
Chairman and President, Canadian National Railways  
in American Forests and Forest Life.

CANADA is a young country of scattered population and great area. For her first duty is to safeguard and to develop as wisely as she can, her heritage of vast natural resources, among which none ranks higher in importance than her forests. The time is past when any nation can, with impunity, speak glibly of "illimitable" resources. There are limits to everything as most nations have discovered to their sorrow, Canada among them. There was a time when Canada boasted of her "illimitable" forests, but she has since found that there is a limit even to the miles upon miles of trees which cover her hinterland. Fortunately she has discovered it in time to preserve those limits forever in her children if she employs sane methods in their protection. To some extent at least Canadiana have awakened to their duty as trustees of the forest, and the educational campaign being vigorously promoted by our forestry associations is meeting with an encouraging response.

By words and act; by precept and example, every effort is being made by this company to further the work of forest conservation. The success of this Canadian National Railway enterprise is dependent, in no small measure, upon the preservation of Canada's forests, and when we fight for the life of our forests, we fight for our own.

The day is long past when the chief function of a transportation company was the carrying of passengers and commodities. That still is a very important part of our work, but more important still is the safeguarding of the sources from which such traffic springs, so that the carrier shall secure this business, not once, but many times. The forests, in other words, are the source of the earnings of the Canadian National Railway and it is, therefore, a matter of pure, selfish business for us.

## Papyrus Put To New Use

ONE of the many reasons why papyrus is so valuable today is because of its use in the manufacture of paper. The papyrus plant, which grows in swamps and along the banks of rivers, is cut into strips and dried. These strips are then woven together to form a mat, which is pressed and dried to produce papyrus paper. This paper is used for a variety of purposes, including the manufacture of bookbinding, stationery, and other types of paper.

It is a long jump from the days of King Tutankamen who reigned over Egypt at about the time papyrus was first used in the manufacture of paper. During his reign, that paper was used only to convey royal commands. Today vegetable parchment is necessary in the handling of many food products for that most exacting ruler—the American public.

Yet even ten years ago vegetable parchment was a new-fangled thing, rather a novelty to be wondered at but hardly worthy of a serious thought. No one could foresee, let

alone forest, that it would come to be so necessary. But during the war period, manufacturers and distributors of ice cream, butter, and other food products, discovered that parchment made with thousands of layers of vegetable parchment was temporarily curtailed to secure the production of this cream industry and others could not continue to function in their efficient manner without the protection of genuine vegetable parchment.

Produced from cotton fiber, vegetable parchment alone among the present great variety of papers fulfills all the requirements as protective wrapper for ice cream. It is impermeable to water, odorous; tasteless; water-proof; fire-proof; grease-proof, translucent. The care expended by manufacturers even in such minute details accounts in part for the popularity with which ice cream is viewed by intelligent people as a health food of rare value.

When we set ourselves to undertake the duty of forest prevention, we realized from the outset that while it would be necessary to provide the mechanical and other equipment to prevent and extinguish fires, our first task would be to secure the proper mental attitude of all organization toward the work. We developed a forest consciousness the keystone of our forest protection policy. I think we have succeeded in that endeavor.

We established at general headquarters of the company, a forest fire prevention department and placed at the head of it a man whose experience in forestry work had covered a wide field and who brought to his duties this knowledge, plus a tactful personality, both very necessary when the good-will of an organization is being sought. He was given a free hand. Two assistants, one in western Canada and one in Ontario were placed under his direction. The pages of the company magazine which circulates all over the system were opened to him and articles were printed dealing with many phases of forest life. He attended as many as possible of the staff meetings and the subject of forest fire prevention was

discussed at every opportunity. We established at general headquarters of the company, a forest fire prevention department and placed at the head of it a man whose experience in forestry work had covered a wide field and who brought to his duties this knowledge, plus a tactful personality, both very necessary when the good-will of an organization is being sought. He was given a free hand. Two assistants, one in western Canada and one in Ontario were placed under his direction. He attended as many as possible of the staff meetings and the subject of forest fire prevention was

expedites the sending of information to the nearest and highest officer on all fires which do occur. Very few other reports except those devised to record the activities of men solely engaged in fire prevention work, are required. We have realized that causes of all fires must be determined if recurrence are not to happen and so the report of every fire receives prompt attention, is thoroughly probed, and the data secured is used to broaden the scope of our forest policy.

All this has not been accomplished without great effort and without discouragement. But the results have more than justified our effort. We have not suffered our enthusiasm to wane or our vigilance to relax. We do not intend to. Our record is one of which we are justly proud and one which we intend to maintain and to better.

At one time we stood at the top of the list as a cause of forest fires in Canada. Today we are almost at the bottom.

That is our achievement. And this is the one and only instance where our ambition is to sit upon the lowest rung of the ladder!

I venture to say that we have demonstrated in some small measure at least that where there exists the will to do, much can be accomplished; that given proper direction, the public, no less than a body of employees, can be brought to a realization of their duty as guardians of their forest wealth and as the protectors of this heritage which they hold in trust for the future generations of this land.

My personal feeling in the matter I can scarcely express more concisely than in the appeal I made for forest conservation to members of the Canadian National Railways, and which I repeat here:

"It is my personal desire that as members of the Canadian National Railways and as citizens of Canada, you pay heed to this appeal and use every effort to further the cause of forest conservation. The proper use and restoration of our forest wealth is a matter of vital importance, and every stick of timber wasted, whether by fire or other agencies, is an economic loss which cannot be replaced."

With a fine lot of pullets in Whatcom county this year, good winter production can be looked for if pullets are given proper care now and not forced into too early production. Says County Agent H. B. Carroll, Jr. A series of pullet management meetings are being held in the county by W. D. Buchanan, extension poultry specialist from the State College of Washington.

given a prominent position in every innovation, but the Board soon discovered its advantages, and the unity trained foresters were made specially welcome at those meetings and took active part in them.

Later at Montreal, Winnipeg and Toronto, forest protection meetings were organized and these were attended not only by the principal regional officers of the company, but by representatives of every organization connected with forest work in the Dominion. All of the ten radio broadcasting stations of the Canadian National Railways were utilized to spread the gospel of forest protection and those messages have been heard in every Canadian province and in every State in the Union. In a little more than a year, 250 two-minute talks on forest fire prevention were given from these stations and thirty-three speeches by prominent men, including the federal and provincial premiers, were also broadcast. At most every pamphlet published by the company has some terse, prominent reference to forests and their protection, and "doctors" issued in co-operation with the Canadian Forestry Association and embodying fire warnings to passengers, were attached to the menu cards in our dining cars.

To such a campaign there could be only one response and results have proved that the arrows which we shot were better aimed than we knew. Our next step was to demonstrate to the Board of Railway Commissioners, which adjudicates for the railways and corresponds to the Interstate Commerce Commission at Washington, the Dominion and Provincial forest authorities and the lumbermen's forest organizations, our desire to co-operate with them in the friendliest and most full-hearted manner. This appeared to be somewhat of an

These tanks are now being equipped with main hose 2 1/2 inch and 1 1/2 inch in order to facilitate handling.

PILING AND BURNING SLASH ON A RIGHT-OF-WAY.

One of the most important phases of the policy of the Canadian National Railways in their fire protective work is the piling and burning of slash under proper conditions.

## Novelties in Ready-to-Serve Foods

WHEN the modern housewife wishes to avail herself of the convenience of ready-to-serve foods, she is not limited to a few staples, as her grandmother was. All sorts of delicacies and novelties are at her disposal. Without the fuss of preparation or long cooking, and at reasonable prices, she can serve her family and guests with a wide variety of foods which need to be more or less in the epicurean class, or the preparation of which entailed much hard work.

Since the Russian dainty, caviar, is procurable in canned form, a supply should be kept on hand for sandwiches for afternoon tea, or for the impromptu after-theatre supper. Now chicken curries come in cans, they are used with much more confidence than of old. For those used in the

canneries are grown for the purpose, thus eliminating all danger of harmful species. These prepared mushrooms are exceedingly convenient for last-minute use. They may be heated and served with beefsteak, chopped up with bits of left-over chicken and served on toast, or served alone on toast.

Cheese of all kinds can be purchased in small tin cans, in this preparation it keeps moist indefinitely. The forlorn housewife who has hard work. Since the Russian dainty, caviar, is procurable in canned form, a supply should be kept on hand for sandwiches for afternoon tea, or for the impromptu after-theatre supper. Now chicken curries come in cans, they are used with much more confidence than of old. For those used in the

"Where Quality Counts"

C. E. BOLLES, Prop. MOSCOW, IDAHO

YOU CAN NOT BE LOYAL TO TWO COUNTRIES

"The Good Book says one cannot serve two masters. By the same token one cannot hold sincere allegiance to two countries—he cannot hold aloft two flags and be loyal to both at the same time. One or the other must ride at the top of the mast. Loyalty is an attribute akin to godliness. Treason is the outward expression of ingratitude.

"President Coolidge says that the greatest danger to our government today, lies among those who are here, but who are unassimilated in heart and spirit, and whose greater love is still for the foreign lands they left to better their condition in the United States.

"It is not unnatural, nor even cause for criticism, our ancestry being common to the United States from some foreign country, should retain a certain degree of love for the land of his birth. All citizens of the United States descended from foreign lands, and there is no disrespect in this. We love to trace our ancestry back to the Pilgrim Fathers, and even beyond. But there is a limit to ancestral boastfulness.

"Marital vows remove a young man or a young woman from the paternal home, and a new home is chosen. This does not mean that love any of the old home should be obliterated; but it does mean that a new altar has been erected—a new hearthstone built and dedicated to a new life, and this is the altar and this is the hearthstone that demands loyalty above all others.

"So it is with the country of one's adoption. No man ever came to the United States of America except of his own volition; urged by a desire to obtain greater temporal blessings. The highways of the seas are never closed against his return, if he finds himself unhappy under the laws and under the constitution of this country.

"Loyalty to God, to country, to home and one's self commands citizenship of others and bespeaks good citizenship."

Lewiston to Change Traffic Laws  
On account of congested traffic conditions at Lewiston on their very narrow streets, recommendations have been made by Police Commissioner Sorey of the police department of that city to create through streets.

The plan proposed by commissioner Sorey is to designate Main street for its entire distance as a through street, make D street a through street between First and Ninth street, make Ninth street a through street between Main street and the foot of Ninth street grade and not permit the parking of cars on F street between Fifth and New Sixth streets.

This system of handling traffic is in vogue in many cities, some of which are not much larger than Lewiston. While it inconveniences the motorist entering from a side street, it nevertheless practically eliminates accidents at street intersections.

Modern Statistics  
One car for every six persons.  
One radio for every eight families.  
One phonograph for every seven families.  
One washing machine for every five families.  
One vacuum sweeper for every four families.  
Five installment accounts for each family.

Cheating the Birds.  
In Japan, small fish are caught by trained cormorants, principally at night with the aid of jacklights. Rings are tied around the throats of the fishing birds to prevent their swallowing the catch. When their pouches are filled they are emptied in the boat well.

Dry Battery Fails Rapidly  
Car owners who use dry batteries often have occasion to lament the brief existence of these devices. In many cases the real reason why the dry batteries fail so rapidly is simply because they are not protected from moisture, dirt and excessive vibration. It is easy to make a stout wooden box, fitted with a cover and permanent terminal connections. The sides, bottom, ends and cover are made of hardwood three-eighths of an inch thick. The box may be made to accommodate as many cells as desired, either in single or double rows. The various parts of the box are screwed together and inside is given an even coat of melted paraffin wax to render it moisture proof. The cover should be made to fit flush with the box sides.

Even Steven  
A son of Erin, Tim by name, boarded a street car. All seats were occupied except one, in which a grouch-looking man had seated a pet monkey next to him. Finally Tim walked up and pointing at the monkey, said: "Beg pardon, sor, but has this gent paid his fare?"  
Without a word the grouch picked up the monkey, sat him on his knee and Tim took the seat. After a few blocks Tim asked: "Beg pardon, sor, but what nationality is your friend?"  
"Half Irish and half ape!" snarled the grouch.  
Tim smiled genially. "Begorra, and he's related to both of us, ain't he?"

THE PICTURE SHOWS

"The Skyrocket"
The feature film at the Hotel theater for Saturday night will be "The Skyrocket," with Peggy Joyce in the leading role.

"When Husbands Flirt"

For Sunday night at the Hotel theater you will have an opportunity of seeing "When Husbands Flirt" with a thousand laughs, a thousand tears, and ten thousand seconds of real entertainment.

They were newly married and you know how it is! Couldn't be apart for a minute. But he had to go to the office one night. That was the end of the night his gay old dog of a partner picked to borrow his car for a rip-roaring date with Charlotte, a package of blonde and dangerous dynamite.

Charlotte, of course, left a beautiful lace handkerchief mixup ever a card case. Which the newly-married bride found and thought—oh horrible thought—that her husband so recently acquired was entirely unfaithful!

There is a great scene, with one of the most side-splitting mixups ever filmed. Everybody suspects everybody else and nobody, of course, would do anything wrong.

But there seems to be a great explosion coming down when the bride sees hubby in the vamp's arms! Hubby thought he was a hero. His wife thought he was a worm—at that particular moment.

"Joanna"

You will have an opportunity to see "Joanna" in all her glory, at the Hotel theater, Wednesday night, September 29, with Dorothy Keady, September 29, with Dorothy Keady, September 29, with Dorothy Keady.

"The Vanishing American"

At the High School opera house, Friday and Saturday nights, September 24 and 25, will be presented the greatest picture that has been shown here since "The Covered Wagon"...

WHAT HAPPENED HERE TWENTY YEARS AGO

Threshing for the present season is practically completed and the majority of the machines have been put away. A few odd jobs still remain, but with favorable weather for another day or two all will be threshed.

Market Report--Wheat, bluestem, 56c; club, 58c; red, 56c; butter 25c; eggs, 30c; chickens, dozen, \$3.00.

Arthur Linehan holds the record for the best yield of wheat, acreage considered, so far reported this year. On the Cunningham ranch of 160 acres, five miles northeast of town, he has threshed an average of 42 bushels per acre.

Louis Anderson, residing five miles north of town, reports that from a 14-acre piece of ground he threshed an average yield of 60 bushels of Klondyke wheat to the acre.

Petty Thievery Has Started

Petty thievery has again broken out in Genesee and it behooves people to keep a close watch on their stuff and it would be a good idea to put locks on your cellar doors if you value their contents.

A short time ago while Mr. and Mrs. Frank Willoughby were in Spokane, a sneak thief visited their cellar and took some three dozen canned fruit jars. A bit gentlemanly, to say the least, for the petty thief generally waits until the jars are full before taking them.

Just a few nights ago some thief drove the car and lighthouse broken to the Al. Mayer home and helped themselves to about enough to make a barrel of kraut. The thief or thieves, evidently knew just where the best cabbages were for they drove to the middle of the patch to get what they wanted.

A load of birdshot peppered into the legs of such gentry might learn them that the honest policy is the best.

Card Club Entertained

The card club was entertained at a pretty party Tuesday afternoon, by Mrs. James Magee.

Pinochle was played at four tables and the honors for the afternoon were won by Mrs. Fred Nage; the consolation by Mrs. Frank Hoorman. A guest prize was given to Mrs. Elmer Vanouck.

Heavy Loser On Beans

Perhaps the heaviest loser on the bean crop in this section of the country is Cornelius Sweezy. Mr. Sweezy had 89 acres of which he got about 35 acres shocked before the heavy rains and freeze came, but he said he did not think he would be able to save many of those in the shock.

Ladies' Aid Meeting

The Ladies' Aid meeting will meet at the home of Mrs. Con Steltz, Wednesday, October 6.

Sunday School Rally

The Sunday school rally held in the basement of the Congregational church last Sunday was enjoyed by a large crowd. After the church services a pick-up dinner was served in the basement.

Seventh and Eighth Grades

The eighth grade spent a very enjoyable evening last Tuesday in a "weenie" party. After hiking about a mile down the railroad track, a bonfire was built around which thirteen hungry people gathered and roasted marshmallows and wafers.

First and Second Grades

The sand table is attracting much attention and interest this week. The children enjoy the cut-out work. The children are much pleased with their new autumn cut-out border.

Montague-Stach Nuptials

A very pretty wedding was solemnized at St. Mary's Catholic church Tuesday morning, September 28, when Miss Mary Montague, daughter of Jas. Montague, became the bride of Joe Stach of Nez Perce.

The bride was very prettily attired in a tan satin dress, with hat to match, and carried a bridal bouquet of pink tea roses. The groom wore a dark dress suit. Miss Josephine Stach, a sister of the groom, was bridesmaid and James Montague, a brother of the bride, was best man.

The groom is engaged in farming a few miles from Nez Perce and is highly respected in his community. The young people will be at home to their friends on a farm near Nez Perce after November 1.

Death of Baby

The sad death of the infant daughter of Mr. and Mrs. John Roach occurred at their farm home Saturday night, October 25, and funeral services were held from the Christian church, Genesee, Monday afternoon at 2:30 o'clock, with Rev. N. E. Beach in charge.

The cause of death was the leakage of the heart. The little sufferer was three months and 19 days of age at the time of her passing.

She is survived by her father and mother, two sisters, Ruby and Mildred, and two brothers, Wayne at home and Lee and family of Uniontown, Wash.

The singing was by Mrs. Arthur Springer, Rev. Beach, Harry Beach and Mrs. Anna Beach, the songs being "Precious Jewels" and "Safe in the Arms of Jesus."

Many beautiful flowers were given by sympathizing friends and neighbors.

Card Club Entertained

The card club was entertained at a pretty party Tuesday afternoon, by Mrs. James Magee.

Pinochle was played at four tables and the honors for the afternoon were won by Mrs. Fred Nage; the consolation by Mrs. Frank Hoorman. A guest prize was given to Mrs. Elmer Vanouck.

Heavy Loser On Beans

Perhaps the heaviest loser on the bean crop in this section of the country is Cornelius Sweezy. Mr. Sweezy had 89 acres of which he got about 35 acres shocked before the heavy rains and freeze came, but he said he did not think he would be able to save many of those in the shock.

Ladies' Aid Meeting

The Ladies' Aid meeting will meet at the home of Mrs. Con Steltz, Wednesday, October 6.

PERSONALS

Elmer Krier spent Friday and Saturday with relatives at Lewiston.

Miss Ethel Anderson spent the week-end with her mother at Moscow.

W. J. Baumgartner and family spent the week-end visiting relatives in Moscow.

Miss Rowena Hanson, a student of the U. of I., spent the week-end with home folks.

Mrs. F. K. Bressler and Mrs. Frank Girard spent Sunday with Mr. and Mrs. Geo. Gannon at Pullman.

Mr. and Mrs. Herman Krier of Palouse, Wash., spent Sunday with his parents, Mr. and Mrs. John Krier.

Mr. and Mrs. Paul Cunn of Moscow spent Sunday visiting Mr. and Mrs. Carl Omsundson and children.

Mr. and Mrs. Chas. Ingle and children of Pullman spent Sunday visiting with relatives and friends here.

Mrs. F. K. Bressler, G. N. Hollister and Mrs. Frank Girard attended the pioneer picnic at Lewiston Monday.

Miss Hugo Michelson, who is teaching near Crump, spent the week-end with her parents, Mr. and Mrs. L. Michelson.

Ed. Peterson came up from Clarkston Tuesday to look after farm interests. He reports Mrs. Peterson as in very poor health.

Mr. and Mrs. John Hoffman and children of Winchester spent Friday afternoon until Sunday evening with the Peter Dallagosa family.

M. A. Russell came up from Clarkston Monday and removed the remainder of his household effects to Clarkston. Mr. Russell was formerly chauffeur on the Genesee Bus.

Mr. and Mrs. Marion Mayer and little son of Lewiston and Mr. and Mrs. Arthur Mayer and little daughter of Troy were dinner guests at the Al. Mayer home Sunday.

Rev. A. F. Wolf went to Cameron Monday to attend a session of the Spokane conference of the Lutheran church, which convened there Tuesday and Wednesday of this week.

Geo. Bolou returned home Sunday from Ketchikan, where he had been called some three weeks ago on account of the serious illness of his mother, who passed away on September 21, at the age of 85 years.

Sam Alm, who has spent the summer here harvesting, left Wednesday for his home at Duhamel, B. C., Canada. He was accompanied home by Ed. Vanouck, who will visit his brother Fred, and old-time friends in that section. Mr. Alm is a brother of Mrs. Derald Springer.

Pine Grove News

Joe Doyle spent Sunday at Chas. Spurbeck's.

Lack Gahrke was a Lewiston visitor Saturday and Sunday.

The Roy Sweet family spent Sunday at Oliver Clark's.

Mrs. R. L. Baker spent Sunday with her mother, Mrs. J. E. Sams.

The Wardrobe brothers finished combing the heat of the week-end. Miss Thelma Hanson was a week-end visitor with Miss Kathryn McMahon.

Fred Brazier is having an up-to-date lighting plant installed in his home.

M. L. Baker and J. E. Sams made a business trip to Lewiston one day this week.

Mr. and Mrs. Arthur Mayer and little daughter, Beverly, called at the R. F. Lambert home Sunday.

Mrs. Brazier, mother of Mr. Brazier, returned home after an extended trip to Spokane and St. John, Ore.

Mr. and Mrs. Springer visited with the Blaine Sams family Saturday. Mrs. Springer is a sister of Mrs. Sams.

Misses Thursa and Pearl Sams moved to Lewiston Saturday. Miss Pearl returned to her work at Moscow Sunday.

Mr. and Mrs. Chas. Spurbeck and Dorothy Lambert and Mrs. Freeburn and children were guests at Frank Lambert's Sunday.

Several of the farmers are plowing Frank Jones is turning over the soil with a three-bottom 14-inch gang propelled by a caterpillar tractor.

Lloyd Spurbeck and family passed through Pine Grove Sunday on their return from taking Mrs. Williams, mother of Mrs. Spurbeck, to her home on Fix Ridge.

Summit News

F. B. Hampton took a load of sheep to Lewiston Tuesday.

Frank Green and family were Moscow visitors Saturday.

THE PICTURE SHOWS

"The Dressmaker from Paris" At the High School opera house Friday and Saturday nights, the feature picture will be "The Dressmaker from Paris," with Leatrice Joy in the leading feminine role and Ernest Torrence of "Covered Wagon" fame, in the leading male role.

The scene shifts to the States—the Fifth, a tom-boy errand girl in a smart French modiste shop. She falls in love with an American army officer. He goes to the front; she enters and wins a contest which enables her to study designing.

The scene shifts to the States—the Fifth, a tom-boy errand girl in a smart French modiste shop. She falls in love with an American army officer. He goes to the front; she enters and wins a contest which enables her to study designing.

There are complications, laughs and loads of excitement.

"Wild Justice"

If you love dogs, as most people do, you will have an opportunity of seeing a picture Saturday night at the Hotel theater that will give you many thrills in "Wild Justice," featuring Peter the Great, a new German shepherd dog actor.

Thrilling action coupled with a remarkably human story and love in the snows of the lonely North country marks "Wild Justice," starring Peter the Great, the dog marvel of the screen.

"Counsel for Defense"

The above caption is the title of the feature picture at the Hotel theater for Sunday night, October 3.

The advertising man in this picture having gone astray, we are unable to give details of the story, but it will be up to the usual standard, it is said.

"The Splendid Road"

The picture for Wednesday night, October 6, at the Hotel theater, will be "The Splendid Road," with Anna Q. Nilsson and Lionel Barrymore in the leading roles. Watch the boards in front of the theater for further information.

At this time the new serial picture, "The Green Archer," will be begun and will be continued each Wednesday evening. This is said to be one of the best mystery serials that has ever been produced and you should not miss a single installment.

You can get in free the first night. Read the show ad.

Shower for Miss Quilty

Miss Violet Quilty was delightfully surprised Sunday afternoon when a large crowd of friends gathered at the home of her parents. A miscellaneous shower was given and Miss Quilty received many useful and pretty gifts.

The main feature of the afternoon was a mock wedding. Later in the day delicious refreshments of ice-cream and cake were served.

Word from Fr. Godschalk

The News has received word from Rev. Fr. Godschalk that he expects to arrive in Genesee on October 17. On the postcard received from Holland he says: "Am having a fine time on my trip, but anxious to see again the old U. S."

A Fact You Cannot Dodge!

MONEY in the bank is one of the most satisfying thoughts you can have, whether it be a time of prosperity or a time of trouble. You know that you are assured whatever comforts or pleasure money will bring. Starting an account is a simple matter. Do it today.

# YELLOW!!

By DOUGLAS MACK

To the generally rough and ready Brown Sox, Jim Potter was more than an easy-going, unobtrusive hurler with a world of stuff—to these hardy scrapping hurlers who seemed to be in the lead from the flagpole out in center, he was the man who could make their dream come true. Forster, and the likeliest on the staff, he was a player to be looked up to. They were looking up to him; had been doing so since his advent into their midst the previous August. Jerkins, the canny scout, sent him in from a jerkwater league with his usual terse comment.

"This boy is twenty-nine," Perkins wrote, "and he's never had a chance in the leagues because he loses his stuff in a pinch. Break him of that and you've got another Flank."

McCarthy, keen a manager as ever at in a dugout, passed the note around. The boys grew enthusiastic and eagerly awaited Jim's appearance. Beyond his shrinking makeup they found nothing to disapprove of, and after his first endeavor on the mound in batting practice they forgot that he had the goods—an in, a sweeping out, a dumbfounding drop, fast ball that sizzled, slow one that apparently would never get to the plate, and control of the whole reper-

tor. Enthusiastic? Man, they were delirious with joy!

"Shoot him in this afternoon," they demanded of McCarthy.

"Better go slow," argued the manager. "Let him get used to big league climate. Member what Perk said about the pinches?"

"There won't be any pinches," Blake, the big first baseman, flared. "Ain't you got faith in the gang?"

"We can't win this year anyway," McCarthy remonstrated.

"But we're going to next, with this baby flim' left-handed apples. I say, you win all you can, and knock off the rough edges he's got."

So Jim went to the hill that afternoon against the Bruins, just about the hardest hitting team in the league. For seven innings he toyed with them, but in the eighth Blake fozzled an easy grounder and almost before the big fellow had given prop-erty to his feelings, the second batter lined one over second that Chesters missed by a hair. Jim Potter's poise seemed to vanish. It was very apparent to the experienced eyes of his teammates; his growing nervousness, his reluctance to make the next pitch. They talked to him, patted him on the back, and Blake damned himself and called Chesters seven kinds of an idiot.

"We're to blame," he growled, "not you. Just settle down and toss 'em in there. We'll do the rest."

Jim appeared to steady, and the next offering was fair.

"That's all right," he murmured.

The next pitch was pounded out of the park, and the game was lost. McCarthy left the recruit in until two more batters hit safely, and then he called Jim from the box.

Gene Martin, the under-sized lad of ten who masoqued the Brown Sox when he wasn't in school, followed Jim to the showers.

"You weren't to blame," he declared, as Jim stopped to listen.

"That big bomo on first, and—"

"That's all right, youngster," Jim broke in. "I was to blame. Next time I'll do better. Run along now; maybe it's not too late to pull the boys through."

They sent Jim in again four days later, and he met similar fate. Because of his unusual stuff, McCarthy continued to work him. If he had gone six or seven innings regularly before the crash, the riddle might have been solved, but he sometimes weakened early in the game. Without men on the bags he worked smoothly and confidently—let one error or a bingle come, and the blowup became inevitable.

The pitcher became the center of interest. Well stocked with veterans, right handers who were fair, needing only a capable outpaw to make them contenders the coming season, they studied Potter and worked to steady him, but without avail. Not until the last game of the season did the cruel word creep in, and Blake, big, smooth but kindly Blake, was the offender.

"The fellow's yellow!" he declared to McCarthy. "He can't stand the stuff. He'll never be a big leaguer!"

Too late did McCarthy give him the word.

## A Word With the Old Folks

Elderly People Are Learning Importance of Good Elimination

In the later years of life there is a slowing up of the bodily functions. Good elimination, however, is just as essential to the old as to the young. Many old folks have learned the value of Doan's Pills when a stimulant diuretic to the kidneys is required. Stagnant or burning passages of kidney secretion are often signs of improper kidney function. In most every community are scores of users and endorsers who acclaim the merit of Doan's. Ask your neighbor!

## STUDY LIFE HISTORY OF APHIDS TO CONTROL POTATO MOSAIC

By GEORGE L. ZUNDEL  
Former Extension Specialist in Plant Diseases, State College of Washington

The life cycle of aphids, and methods of their control are important to the control of mosaic for certain species of plant life or aphids are the means of spreading mosaic disease in the potato field. Mosaic is caused by a virus that circulates in the sap of the potato plant. When an aphid feeds on a diseased plant by sucking the sap and then flies to a healthy potato plant and begins sucking, it is capable of carrying the virus disease to the healthy plant, thus spreading the disease in the patch.

## University Scores at Moscow

UNIVERSITY OF IDAHO, Moscow.

Three grand championships, four championships, one junior championship, and 35 first places were won by University of Idaho livestock at the recent Interstate fair held in Spokane. In addition, the university entries captured 21 second places, 11 thirds, and seven fourths.

The dairy herd headed the list with two grand championships and a junior championship. Idaho Violet Plebe was senior and grand champion bull and Idaho Matador Novelty Colthane was first two-year-old senior and grand champion. Idaho Plebe Jes-Tro was the junior yearling and grand champion. The dairy entries also accounted for 15 of the 38 thirds, and took four seconds, two thirds, and one fourth.

The university exhibit of sheep took the other grand championship, four championships, 15 thirds, 12 seconds and four thirds. The grand championship was won in the fat wether class. The university had both the champion ewe and the champion ram in the Rambouillet classes, the champion Southdown ewe, and the champion Dorset ewe.

Poultry entered by the university also made an exceptional showing, the 21 birds shown taking a total of 20 prizes. The winnings included eight firsts, four seconds, five thirds, two fourths, and one fifth. The record was the best ever made by the poultry department at the Spokane show.

## PREPARATION OF SEEDBED FOR GRASSES

By JOE BOHL

It is important that the soil should be well compacted so that the surface layer will retain the moisture well in order that the young seedlings will not perish from lack of available moisture, before they become well rooted. It is not essential that the surface be thoroughly pulverized by a roller or plank drag, in fact, the surface is best left covered with small lumps about one inch in diameter, which afford considerable protection for the young plants and helps retain the moisture.

Seeding should be sufficiently early in the fall to allow the development of strong plants before severe winter weather sets in, or early in the spring so that the seedlings are sufficiently well rooted to withstand summer droughts, as the moist, cool soil.

## LOSS IN PIGS SERIOUS

Only about 65 per cent of the pigs farrowed live to reach the market. Of the 35 per cent that die, the greatest mortality occurs during the first 10 days, says the United States Department of Agriculture. During this time weak pigs die or are killed, accidental deaths and injuries occur. Digestive disturbances and mismanagement bring the toll of loss to a point which who has never tabulated them.

When corn is worth a dollar a bushel and tankage \$60 a ton, each pig has cost approximately \$2.75 at birth, under average conditions. Many of these losses which occur during the first 10 days could be avoided by better management of the brood sow and closer attention to them at farrowing time. Reducing the mortality among all kinds of young animals is an easy way to increase profits.

## GETTING THE MOST FOR ONE'S INCOME

The development of a plan for spending the family income to best advantage means not only a better household management, but a margin with which to secure worth-while things, and money for labor-saving devices which help the homemaker in an easy way to increase profits.

French Legion of Honor members must now buy their own crosses; and the beautiful parchment decrees have been replaced by paper ones.

Recent excavations in Georgia and Tennessee indicate that the mound builders there had cultural contact with the Aztecs of Mexico and the Mayas and Yucatan.

In the Heart of Spokane, close to stores, theatres, and the business district, the Casco Hotel offers the traveler every convenience. Popular prices and perfect service. "The Hotel With a Personality."—Adv.

## Round the World Golfers to Tee Up Again

The Round the World Golf Club, open to all golfers who cherish an ambition to tee up in strange lands during an entire circuit of the globe, will leave New York Dec. 2, 1926 on their palatial floating clubhouse the Empress of Scotland for 132 days of golf, travel and sightseeing, returning to New York via the Panama Canal April 12, 1927. This novel club was organized last year by an enthusiastic golfer who wished to play as many different links as possible and enjoy the fascinating experience of driving a golf ball around the world.

The golfers who embark on the Empress in December will proudly display a ball which he declared he had played on the first hole of every link visited. Many times it was a "lost ball," but the white yellow and black caddies found it. Still driven early at 4:15, he exclaimed, "That's the golf ball I drove around the world!"

## For Better Health

PUBLIC HEALTH IS PUBLIC WEALTH

REGARDING HEALTH INSTRUCTION

Those who have been following our articles may be disappointed with lack of definite instruction covering certain conditions. A moment's thought will show how impossible it is to give definite information that would fit your particular case. All we can do is to deal with fundamental principles.

Indeed, so difficult is a health paper to write that many medical men despair of doing it successfully. Conrad Carter, of England, says: "Instruction of the public regarding the nature of refractive errors (he might have said any disease) is a colossal mistake. To attempt in a five-inch space to teach the newspaper reader what myopia is (or any disease) seems to me to be the silliest error into which a professional man can fall. It gives to the public that little knowledge which is a dangerous thing. It makes them vaguely familiar with the meaning of technical terms of which they have only a foggy notion."

Consider, too, how difficult it is to write of scientific matters in popular language—so much of the subject is highly technical, and there are no popular terms capable of expressing the meaning. Even the improper pronunciation of a medical term may change its meaning. To say that the kidneys are secretive organs may be made to mean that they do their work in secret or that they produce a secretion according to the manner pronounced. The worst. Yet we must "Make it snappy and give it a kick."

So in this article we make a plea for better cooperation between the public and the physician in the dissemination of medical information. We suggest that when the writer has been compelled to use a medical term that is not quite understood the reader consult the dictionary to learn its exact meaning. We know that the public is interested in measures that will conserve health and that our readers are capable of absorbing and applying the general information with which it is our privilege to supply them.

W. E. English, Choir Director.  
Sunday school at 9:45 a. m.  
Regular preaching service at 11 o'clock.

**St. John's Lutheran Church**  
A. F. Wolff, Pastor  
Sunday school at 9:30 a. m.  
English services will be held each Sunday morning at 10:30 o'clock, with the exception of the first Sunday of each month, when German services will be held at the usual hour.

The annual missionfest will be held in St. John's Lutheran church on Sunday, October 10. English services will be held at 10:30 and German services at 2 p. m.

**Christian Church**  
Bible school at 9:45 a. m.  
Communion and worship at 11. The topic will be "Sunday School and Church Work Compared."

At 12 noon, dinner and business session.

The missionary society met Tuesday afternoon with 50 members and visitors present.

The program was led by Mrs. Aherin.

A devotional reading, "The Teacher and the Lilies of the Field," was given by Mrs. Harry Beach.

The playlet, "The Rural Church," by Madames Pleiman, Wilson, Huffman, Curran and Beach, was much enjoyed.

**The Syringa Club**  
A very pleasant meeting of the club was held at the home of Mrs. John Weber on Thursday of last week, the meeting taking on the nature of a birthday party for two of the members—Mrs. John Weber and Miss Violet Heppner. Each were presented many pretty and useful gifts by friends and members of the club.

At 4 o'clock a very delicious luncheon was served and at 7 o'clock a six-course dinner was served, of which the husbands were invited to partake. After dinner pinocle was played at four tables and a very pleasant evening was spent.

The meeting date has been changed from Thursday to Wednesday, and the next meeting will be held at the home of Miss Violet Heppner on Wednesday, October 13.

**Will Give "Mikado" at Pullman**  
Mrs. Antonie Hordemann, who put on "The Mikado" at Genesee, Moscow and Colfax last spring, will put on the opera at Pullman on Saturday evening, October 2. Mrs. Hordemann has secured several new singers for will be a great success in every way. It will be given at Pullman's entertainment series.

Good reading on page 7 this week.

**Will Give Concert**  
Mrs. Antonie Hordemann will give a fine concert in the High School opera house on Monday evening, October 4, at 8 o'clock, which will be her farewell appearance here before sailing for Germany to spend several months.

Mrs. Hordemann will appear personally and will be assisted by Prof. Gottfried Herbst, violinist, of Spokane, and Miss Mary Lloyd, who will render several vocal selections in German, Italian and English, thus rounding out a very pleasant evening's entertainment. The older piano pupils of Mrs. Hordemann will also assist at the concert.

If you miss looking at a single page this week you may miss something

**"The Dressmaker from Paris"**

"The Dressmaker from Paris" is not just a picture—it is the smartest production that has graced the screen for many a year.

Leatrice Joy as Fifi, the little errand girl of the Paris shop who wins a contest and becomes a famous creator of fashions, gives to the screen the most fascinating role of her career. Ernest Torrence, of "Covered Wagon" and "Peter Pan" fame, is featured at the head of the supporting cast. He plays the role of a Scotch department store owner with moths in his pocketbook. Torrence is Scotch, a wonderful character actor and has a role in this picture as good as any part he ever played. The combination of girls and gowns is going to make you people sit up and take notice—and that's that!

More beauties than the Follies; more gowns than a fashion exhibition; more fun than a circus—and a stirring love story.

**CHANGE OF POLICY**

Times change, just as some folks do; the ways of doing business change, and we must also change. We must realize that times are different and unless we get in the parade and do as others do, it will be but a short time before we will have the auditors pounding on our front door.

Heretofore we have given credit to our patrons, allowing them to choose their own time in paying us, but today our creditors are demanding that we pay our bills on the first of each month. We have no choice in this matter. If we hope to give you quality goods at the right price—give you the service you are entitled to, if we expect to remain in business, we must also go on the 30-day cash basis.

We have learned by sad experience that this change in our policy must be made; that no business can make an agreement to supply and pay unless it is based on the confidence that those with whom it deals will perform their agreement to supply and pay.

**"The Price He Paid For Me"**

Most men and women can look back to a happy childhood. Not so the girl whose picture is here shown. She says, in the September issue of "True Romances," a Macfadden Publication: "I never knew my parents or where I was born; my first recollections are of a narrow street in a shabby, dirty neighborhood. I think I must have been about five years old when I first began to take particular notice of my surroundings, and of the old woman who fed me and provided the pile of trash she called a bed. It is a true story and emphasizes the fact that truth is stranger than fiction."

**Yes Sir! She's Some Baby**

Above is Edith Hastings. This three year old physical culture baby, is the daughter of Milo Hastings, the internationally known writer on health foods. Her life is ordered differently from that of an ordinary child. For instance, she goes to bed at midnight, but you can read about her unusual regime in the January number of Physical Culture Magazine, a Macfadden publication.

**Old Violin Thrills Radio Fans**

Restored Maggini, More Than Three Hundred Years Old Played by Max Jacobs in Eveready Hour Summer Program.

ONE of the oldest violins in the world is lending its mellow tones to the entertainment of radio listeners throughout the East and Middle West this summer.

When the first permanent English settlement in America was established by Captain John Smith at Jamestown, this ancient fiddle already counted number generations among men who had thrilled to its strains. Long years before the discovery of electrical impulses, of which radio was born, it was falling to pieces through age and neglect.

Product of Maggini This remarkable violin has an interesting history. Originally it was a genuine Maggini and was made by that famous apprentice of Gaspare, during the latter half of the sixteenth century. Some years ago the only part of it that remained intact, the back, came into Max Jacobs' possession.

BOOTS TOBACCO YIELD Tobacco showed a 126% increased yield with lime and fertilizer according to data recently released by the Kentucky Agricultural Experiment Station at Campbellsville.

Dr. Silas Beebe presenting the restored Maggini to Max Jacobs, leader of the Eveready Chamber Symphony Orchestra.

making. Dr. Beebe asked Jacobs' permission to attempt a restoration of the old violin and it was taken away to the physician's workshop at Hampton, New Jersey. The original back was of maple. In his shop Dr. Beebe found a piece of old Puritan pine which had been taken from the timbers of a New England farmhouse known to be more than a hundred years old. With this he fashioned a new front and sides.

Early this summer, Max Jacobs was summoned to Hampton and there presented with his restored Maggini. The very first test showed that the soul of the old instrument had been revived. The ancient Maggini was again with the voice its original maker had given it more than 300 years before.

**Smithsonian-Chrysler Expedition Hunts Peculiar Pangolin**

A pangolin, an animal which as far as is known can't be found in any American zoological park.

WHEN the Smithsonian-Chrysler Expedition returns to the National Zoological Park in Washington with its collection of wild animals from Tanganyika Territory in East Africa, it is hoped that the collection will include at least one pangolin.

The Advent of the "True-Type" Holstein Sale. R. E. Everly, Northwest representative of the Holstein-Friesian Association of America, writing of this sale under date of August 14th, while touring the Eastern part of his territory in company with Earl J. Cooper, sale of "True-Type" cattle during the extension Pacific International Livestock Show, at Portland, Oregon, in November.

however, did draw the line at "Sarah Ann." It is with a self-sacrificing spirit that the breeders of the Northwest consign to this sale, for they all feel that in the face of prices realized the last few years at public auctions of purebred Holsteins, that they cannot hope to get near the value in the auction ring for such cattle as is being demanded of them for entry in this "True-Type" sale.

It is with true pioneer spirit that the Holstein breeders of the Northwest are entering their cattle in the First Annual Pacific International Quality Holstein Sale, cattle of the quality that is being eagerly sought by the managers of the big National sales of the East. Clark's Classic and the Greatwood National have the possession of the animals to be sold at Portland on November 5th, when the Northwest breeders enter their First Annual Quality and "True-Type" sale.

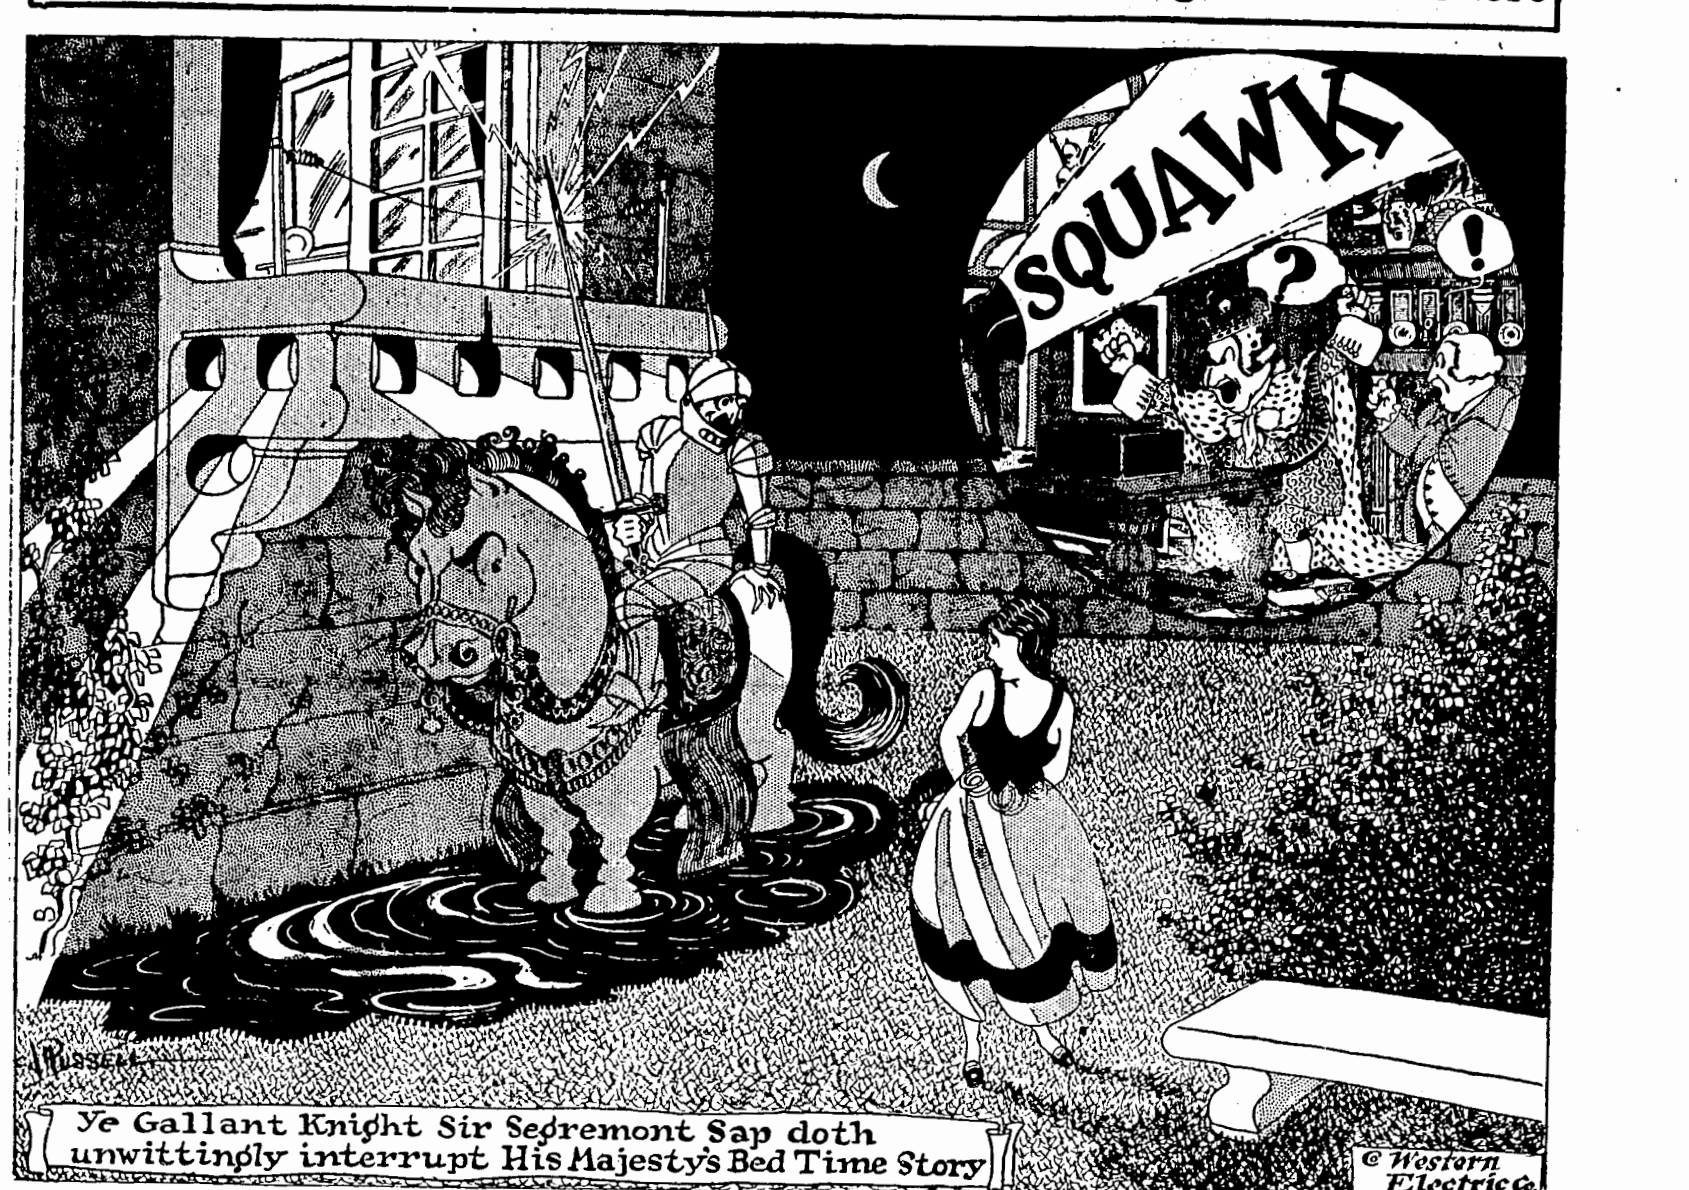

Arthur Honeyman, near South Bend, is reclaiming 400 acres of this land for farm use. The drier and pile driver are now at work on a new dike of more than a mile in length, 20 feet wide at the bottom and 10 to 12 feet high. For the sloughs four rows of piling are being placed. The and ditch drainage for the wet areas has been planned for Mr. Honeyman by A. B. Crane, extension specialist in agricultural engineering at the State College of Washington.

The Canadian Pacific plans to extend its wharves at Victoria. A start on the work will be made this year or early next spring. The C. P. R. has planned to improve the inner harbor approach for some time but until the old building is removed this could not be accomplished. This building obscures the magnificent new terminal erected at a cost of a half million dollars. Wharfage extension will be made to meet the increased traffic in the various coastwise services operated by the C. P. R.

K. J. BURNS, port superintendent for the Vancouver, B. C. Harbor Board, is now in the East on a several weeks' trip that will take him to the Pacific Coast. Later he will visit the Gulf and port engineer of the harbor board, he was larger aspects in order that Vancouver may keep abreast of port developments in other ports.

"Where Quality Counts" C. E. BOLLES, Prop. MOSCOW, IDAHO

**DEATH VALLEY SCOTTY HAS FOUND A BONANZA**

"Death Valley Scotty" has located a bonanza in the Slate Creek region back of Grangeville, in the opinion of mining men of the region, according to J. J. Pulse, Grangeville resident, who is a visitor in the city.

This venerable old miner who has made several fortunes by locating rich mines at various places over the world, came into Lewiston about two months ago en route from British Columbia to look into this business about a "lost mine" in the Slate Creek region. After several days here and a day or two at Grangeville he slipped back into the hills, in the direction of Slate Creek. Mr. Pulse is of the opinion that "Scotty" might have located the "lost mine."

After "Scotty" had been in the hills about a month he turned up at Freedom with ten pounds of very rich quartz. Later, it is understood he ordered some equipment from the outside and it was announced from a Grangeville dispatch that he expected to start operations. A week ago he left Grangeville for parts unknown, but he told a few of his confidants that he would be back.

"I recently talked with a man from the Freedom section who saw Scotty's ten pounds of quartz," said Mr. Pulse. "This party said that it was the richest quartz he had ever seen and that it would assay several thousands of dollars to the ton. If fairly glistened with gold ore, plainly visible in the quartz, he claimed.

"The movements of 'Death Valley Scotty' have been watched with interest by mining people in Grangeville, and much significance is attached to his visit into the Slate Creek region. The items appearing in the Tribune about the discovery of gold by George Thompson on Slate creek last year, and the comment on a 'lost mine' was given wide publicity in mining papers, and it went even as far as Los Angeles.

"Death Valley Scotty" has gone into that region and somehow has gotten hold of an old map about 30 or 35 years old, so a friend tells me, and he has been using this to trace down possible clues of the old mining properties. Everybody up there figures "Scotty" has located a real bonanza, and his trip out, they think, is to get lined up for some real operations."

An item appearing in the Sunday Oregonian, dated from Chicago Sept. 11, reports that "Death Valley Scotty" has arrived from the west on a "mysterious mission," and that he is proceeding on to New York. The item shows the prominence of the man and indicates that the "business man" result in another fortune" may be the Slate Creek "lost mine."

The Chicago item is as follows: Chicago, Sept. 11.—Twenty years ago "Death Valley Scotty" gave Chicago and the east a real scare by chartering a special train at a cost of \$39,000 to carry him from Los Angeles to New York and he shed \$5 tips all along the line.

Yesterday he arrived again, but a modest, lowly berth in a Pullman sufficed and there was no shower of \$5 bills. Instead he dispensed handshakes, hellos and good byes to the train crew and his fellow passengers.

Scotty enveloped himself in an impenetrable air of mystery as to the what, hows and wherefores of his journey to the east.

"Let me get my bearings," he protested. "I can't talk to you now. When you asked me what I'm going to do it is just like asking John D. Rockefeller to open up his private books for you."

After transacting his mysterious business here, which he hints is to result in another immense fortune, he will continue on to New York, probably tomorrow. He has made and lost two fortunes running far into the millions, and those nearest him believe he has not exhausted the resources of the mysterious gold mine in Death Valley of which he alone knows the location.—Tribune.

Wig and Robe Expensive English judge cost approximately \$2,000. The lord chancellor, the attorney general, the lord chief justice, the master of the rolls and lord justices of appeal are even more expensively dressed.

**Quality Performance at a moderate price**

**THE Radiola 20**

ONE FACT alone would prove the exceptional value of the Radiola 20—the great public demand, since its first appearance a few months ago.

There are dozens of reasons for its popularity. It combines the moderate price of a five tube receiver with performance finer than many larger and more elaborate sets. It gives a remarkable degree of selectivity. The wonderful tone quality of this set—its undistorted volume—is accepted as one of the genuinely important developments in radio receivers.

In a word . . . the set is a RADIOLA, and therefore the finest of its class to be obtained today.

**HERMAN'S**

**Stewart-Warner Matched-Unit Radio**

I have found out that I am no radio salesman. I will not, nor will the Stewart-Warner company permit me to make a sales talk to sell a radio of their make on any promise or statement that the radio will not test out. Being an agent for the Stewart-Warner Matched Unit Radio, will make this statement: My company has a service station in Spokane, with master radio experts, trained at the factory. If any radio they send out fails to come up to what they claim, all you have to do is to notify your agent, and if he fails to give you service, notify the Stewart-Warner service station at Spokane and give the name of the agent; they will attend to your wants, as well as attend to the agent, for they will not have an agent that does not give service. You will get immediate attention from Spokane and they will have a man see your radio set. If not, they will have it sent to Spokane and if there is any damage in transportation or defect in the mechanism of the radio, it will not cost you anything. But if damage was caused by the owner, he will only pay the minimum cost of repair. If they find the radio was not in the best of order, you will get a new one and that one will be sent back to the factory so they may find the cause of the trouble and avoid the same trouble in others they may send out.

I don't get as big discount as some agents get on radios, for the reason the Stewart-Warner company puts one of the best radios on the market at a low price, with the best of service to back up their salesman. They say smaller profits and many sales will make more money for the agent than a big discount and few sales. In that way we have to work with them. The success of the Stewart-Warner company has come about by giving value received for the money—and it proves itself, or 1,200,000 people would not be using their product today.

A Stewart-Warner radio will give as clear tone, get as many stations and as great a distance as any radio on the market with the same number of tubes.

I can furnish you a radio priced from \$65 to \$419, with either five or six tubes, and either dry or dry and wet cells. See the radio I have in the window.

**GRANT CLARK**

N. B.—I can furnish you with any make of radio you want, if there is no agent in Genesee, at the same price you can get one in any other town.

Give me a show and be handy to get service when you need it. I will also be glad to have you come up to my home and hear the Stewart-Warner in operation. Come whether you are now contemplating the purchase of a radio or not. It may help you in your selection when you are ready to buy.

**PUBLIC SCHOOL NOTES OF MUCH INTEREST**

The girls of the Genesee High school have organized into the Genesee association and have elected Genevieve Hampton as president. Every girl enrolled in the high school is allowed to join this club. There are no membership dues and the purpose of the organization is to teach good morals and manners; to serve as a source for entertainments, and to serve as a basis for other divisions.

From this main association, which is democratic, in that all girls are eligible, will be formed more clubs that will be based upon scholarship, music ability, dramatic ability, etc. This arrangement permits all girls to participate in some extra curricular activity, whether they be athletes, musicians, dramatists, or just girls.

The boys who have won the official "G" for participating in some major sport in the high school have organized into the "G" club. This club will endeavor to uphold the honor of the school and will try to advertise Genesee and its schools. Clarence Doyle has been elected president and Roy Cameron treasurer.

The Curtis Publishing company is again putting on a sale of magazines through the school year. The high school sanctions the plan of this company for two reasons: The magazines are educational in themselves; give the student practical lessons in sublimity and at the same time enriches the student body.

A play has been recently received and a cast is being picked out for the parts. This play will soon be given at the opera house. The proceeds of this play will go to buy magazines, music books, etc.

The increase in enrollment over that of last year is almost 20 per cent to date. People are beginning to realize that a centralized plan for education pays the most in the long run. Genesee is now in the position to give in actual value more than its weight in gold with consolidation.

With the bonded indebtedness rapidly decreasing for the Genesee school district the outlying districts would receive several thousand dollars' worth of property in valuation with no cost. Consolidation has been tried in many communities in Idaho with such wonderful results that the people wonder why they ever had any other plan. Talking dollars and cents in taxation, the consolidation plan is the more economical.

**WHAT HAPPENED HERE TWENTY YEARS AGO**

Market Report—Wheat, Bluestem, 56c; Club, 53c; red, 50c; flour, 25c; eggs, 25c.

Mrs. W. E. Smith and Mrs. J. H. Jackson left Monday of this week to view their Big Camas prairie possessions.

The price of watermelons reached the limit Friday, when a large load each about all one could carry, was disposed of at 10 cents each.

Beginning on the seventh inst all the stores will remain closed all day Sunday. Also following that date the hour for closing in the evening will be 7:30.

Pasco will put on metropolitan airs. The large gasoline lamps used at Genesee before starting of the electric system, have been sold to that city and were shipped there last week.

Some of the names appearing on the republican state ticket for the fall election of 1926, were: For U. S. senator, W. E. Borah; governor, Frank R. Gooding; congressman, Burton L. French; district judge, E. C. Steele. On the county ticket appeared the following names: For senator, Warren Trutt; representatives, Benjamin J. Jones; auditor, Axel P. Ramstadt; sheriff, Frank A. Robin son; treasurer, Pauline Moerder; assessor, E. J. Gentry; probate judge, Charles M. Lukins; superintendent of schools, Catherine Bryden; county attorney, W. E. Stillinger; coroner, L. B. McCarty; surveyor, John H. Kirkwood; commissioner first district, Ellwood S. Cook; second district, Chris A. Hagen; third district, Jas. E. Lamb.

**DAN CUPID BUSY—TWO COUPLES WED**

**Griffith-McCreary**

A very pretty home wedding took place in Spokane Saturday evening, October 2, at 8 o'clock, when Miss Floy Griffith of that city became the bride of William L. McCreary of Genesee, Rev. F. E. Harold, pastor of the Marito Methodist church, officiating, the beautiful ring ceremony of that church being used.

The bride was attractively and girlishly costumed in a beaded pink georgette and carried a shower bouquet of pink rosebuds. She was attended by Miss Bessie Meredith, who was becomingly attired in beaded orchid georgette and carried a bouquet of carnations. The groom was attended by Harold Carburn of Lewiston.

Only a small party of immediate relatives of the contracting parties and a very few intimate friends attended the wedding. Mr. and Mrs. McCreary were congratulated and were served by the bride's mother.

The happy pair left immediately in an automobile for a short trip, returning to Genesee Monday evening. They are at home to their friends at the McCreary home in the north part of town.

The bride is a daughter of Mr. and Mrs. E. O. Griffith of Spokane. The family resided here for a few months during 1925, Mr. Griffith being a contractor on the Northern Pacific railroad. The bride has many admirable qualities and made many good friends during her brief residence here. The groom is the only son of P. C. McCreary, publisher of The News, and has resided here for nearly 14 years. He is a graduate of the Genesee High school with the class of '23, and also a graduate of Northwestern Business college, Spokane. He is associated with his father in the printing business.

**Summit News**

Mrs. Sumner Stuecker was a Moscow visitor Tuesday.

Miss Qualey spent the weekend with home folks.

Miss Norma Grieser spent Tuesday night with Mr. and Mrs. Joe Schlueter.

Mr. and Mrs. Frank Green spent Monday evening at the M. S. Wilson home.

Mr. and Mrs. F. W. Qualey and Edna Green visited at the Dick Green home Sunday.

Mr. and Mrs. Joseph Schlueter and Henry Schlueter visited at the Thos. Dwyer home Sunday.

Mr. and Mrs. Elmer Johnson spent the week-end with Mr. and Mrs. W. H. Gage at Culliside.

A. W. Bielenberg of Uniontown is visiting at the home of his parents, Mr. and Mrs. H. Bielenberg.

James Qualey, Ernest Peterson, Svenson brothers, F. W. Qualey and Chas. Kraut are very busy harvesting their potato crop this week.

Mr. and Mrs. Chas. Kraut and children, Grandma and Andrew Kern were Sunday dinner guests of Mr. and Mrs. Joe Trautman and family.

Mr. and Mrs. F. O. Green had an Sunday dinner guests Mr. and Mrs. F. Rader and children, Mr. and Mrs. W. A. Green, and Ole, Swede and Ike Gage.

Mr. and Mrs. F. O. Green and W. A. Green motored to Lewiston Saturday, when Mr. F. O. Green had an Sunday dinner guests Mr. and Mrs. F. Rader and children, Mr. and Mrs. W. A. Green, and Ole, Swede and Ike Gage.

Andrew Kern was badly in need of exercise, so he secured a job "picking potatoes" on the Kraut farm. After a few days—well—Andrew's mind ran something like this: "Strong in the back," etc.—and plenty of exercise.

Chas. Kraut and family accompanied by Grandma Kern, motored to Clarkston Friday to call on Mrs. Ed. Peterson, who has been quite ill for some time. Mrs. Peterson's friends will be glad to hear that she was somewhat improved at that time.

The pep club was very delightfully entertained by Mrs. Dick Green, September 30. The afternoon was spent as usual with needlework. The club members have been working on embroidery. Miss Althea Hinton and Miss Violet Qualey. The next meeting will be with Mrs. Otto Kretschmer on October 14. All members try and be present.

**Qualey-Liberg**

Another very quiet wedding took place at Moscow Wednesday forenoon, when Miss Violet Qualey became the bride of Nels Liberg, Rev. Oliver, pastor of the First Lutheran church of that city, performing the ceremony. The newly-weds were accompanied to Moscow by the bride's mother and her brother, Ernest Qualey, who acted as witnesses, the ceremony taking place at the Lutheran parsonage.

Mr. and Mrs. Liberg left immediately for Spokane on a short honeymoon trip after which they return to Genesee and be at home to many friends in the Rosenstein residence.

The bride is the daughter of Mr. and Mrs. James Qualey, prominent farmers of the Summit neighborhood, east of Genesee. She is a graduate of the Genesee high school with the class of '21 and of the Lewiston normal. She has been engaged in teaching for the past four years, her last term being as primary teacher in the Genesee public schools, where she made a splendid success. She is a capable young lady and has many accomplishments. The groom has been employed at the East End elevator of the Genesee Union Warehouse company for the past several years and his friends are numbered by his acquaintances.

The News joins their host of friends in wishing them much happiness as they journey on life's way.

**Of What Use Are Flies?**

By Edna Green

How many women cry, "I wish there were no such things as flies!" What good are they, anyway?

Mrs. Fly, however, does more good than people give her credit with. In more than one way she keeps people in good health. Doesn't that sound ridiculous?

Many men and women say, "Oh, look at those horrid flies, they are spoiling the new wall paper!" But still these flies help keep the world sanitary. Mrs. Fly's work is to lay her many eggs in dead animals. In seven or eight hours the eggs turn to grubs; the grubs turn to worms. These worms begin to eat as fast as they can. In that way they devour these dead and decayed carcasses. Flies help keep the streets and air clean. Do you know why flies fly everywhere through the air? They are devouring small bacterial things in the air.

In and about the home many bits of food are thrown in the yard, which decay and mould, then the selfish little fly eats it.

We all know that flies carry dangerous poison and disease all over their bodies and drop it on our food, clothes and skin.

Birds, fish, frogs and some insects eat flies as food. All of these things are useful to us, each in their own way.

Maybe flies are a great trouble to us, but they are also useful.

**SLEEPY HOLLOW NEWS**

John Johann is digging spuds this week.

R. J. Kluss just finished building a new chicken house.

Mr. and Mrs. Chas. Ebel motored to Lewiston Saturday.

Bill Borgan is plowing with his new McCormick-Deering tractor.

Frances Ebel is visiting at the home of Miss Fern Herman this week.

John Kluss and Joe Grieser are hauling wood from the mountains.

Joe Grieser and family were Sunday visitors at the Chas. Ebel home.

The new highway is nearing town and a few more days will see the road into the city limits. All we need now is a few more miles.

Fritz Baumgartner is the only bachelor in the Hollow. A very good chance for Dan Cupid.

Miss Irene Ebel, Mrs. Irene Peterson and Earl Kearn visited at the Chas. Ebel home last week.

John Kluss and family, Miss Nola Wilson and Miss Dolly Baumgartner of Clarkston motored to Spokane last week.

Bruno Ebel returned home Saturday from Ferndale Farm, having been there plowing for the past three weeks.

The Sleepy Hollow high school opened a few weeks ago, with Miss Nola Wilson as teacher. This is her third consecutive term in the Hollow high school.

Mr. and Mrs. Matt Baumgartner, and daughter, Elizabeth, and Miss Elizabeth Welle are spending the winter at St. Louis, Mo., having made the trip overland.

**Pine Grove News**

Jack Gehrke was a Lewiston visitor Sunday.

Wm. Frencorn came over from Forest Monday.

Frank Jones struck a tough job plowing sod for a neighbor.

Mr. Cremon of Moscow has been taking orders for footwear.

Miss Katherine McMahon was a week-end visitor in Genesee and also attended the opera at Pullman.

Everyone is very busy these fine days plowing, seeding, digging potatoes, cutting corn, hauling wood, threshing beans, etc.

Mr. and Mrs. Spurbeck and daughter, Marguerite, Bernice and Dorothy Lambert and Joe Doyle took Sunday dinner with Mrs. W. A. Frencorn.

**Parents of a Daughter**

Mr. and Mrs. George Gannon of Pullman are the proud parents of an (eight-month) baby daughter, born Thursday morning, September 30.

Mother and daughter are at the Sacred Heart hospital, Spokane, and are doing nicely.

**Losers Please Pay**

Tom: "Hey, Jed, we're trying to settle an argument and we have agreed to take your word. Do you know anything about the Mongolian race?"

Jed: "Well, I'll tell you, fellows! I wasn't there. I went to the ball game."

**Have "Went" Hunting**

That there has been no unusual disturbance coming out from the wilds of the upper reaches of the Clearwater country is rather disappointing to the friends of Private Pat Sampson of the Coyote club and Bob Emmett, who has been gaining considerable fame as a big game hunter. They left last Sunday morning for a try at the deer up in the Clearwater country and the only fear of their friends is that they may get caught trying to sneak out with more than the limit.

**Kinnison Likes Hawaii**

Mr. and Mrs. Frank Kinnison, former Moscow residents, who sailed from San Pedro, Calif., September 14 for Honolulu, are now located near that city and both are teaching in the high school there. Word to that effect was received by friends of the couple here recently.

The Kinnisons spent a week visiting in Honolulu, while Mr. Kinnison attended an agricultural conference prior to taking up Smith-Hughes teaching. They write that they like the climate and the country very much.—Star-Mirror.

**SEMI-LOCAL NEWS CLIP—PED FROM EXCHANGES**

**Shil Hauling at Colton**

Wheat hauling is still going on and the condition of the roads and weather gives the farmers an opportunity to get their grain to the warehouse as fast as they can haul it. Most of it is being sold.—Colton News-Letter.

**Bear and Cougar on Craig Mountain**

Reports from Craig mountain above Waha tell of an unusual number this fall. Residents tell of bears eating up food supplies in places heretofore always safe. These animals do not seem to have the usual timidity in regard to people and help themselves to anything they want that is available. So far no animal has attacked or attempted to attack anyone.—Lewiston Banner.

**Beans Harq Hit**

The bean crop in the Potlatch country was badly damaged and in some cases completely ruined, by the freezing weather last week. Frozen beans is a condition that is new to the growers in this section as weather like that of last week has never been experienced in September in past years, even by the oldest inhabitants.

Reports concerning the extent of damage to the bean crops vary in the different localities. The early planted beans were damaged much less than the late ones and with favorable weather for the next ten days part of the crop may be salvaged. The late beans are a total loss and will have to be plowed under.

Heavy frosts that nip the leaves of the beans in September are not uncommon, but freezing weather cold enough to form two inches of ice in a wash tub, is entirely out of the ordinary in the Potlatch.—Kendrick Gazette.

**Hatchery Has Successful Year**

The Grangeville Hatchery under the supervision of C. H. Pemble has just completed a very successful season, having turned out 225,000 Rainbow trout and 525,000 native Cutthroat trout, totaling 750,000 on this one small hatchery alone, in a season's hatching.

These small fish were distributed as follows: 136,000 to Clearwater county and 60,000 to Lewis county; 60,000 to searing pond at the state game farm at Lapwai; 150,000 to Kooskia; 128,000 to the Southfork of the Clearwater and the balance distributed to all the smaller streams of Idaho county.

The road to the hatchery was much improved this summer and many of the local people kept in constant touch with the development of the fish. Some improvements were made at the hatchery which is located in a grove of trees, making a fine place to go and spend the Sunday afternoon. Remember the fish hatchery next summer. It's interesting.—Free Press (Grangeville)

**The Blue Bird Club**

The Blue Bird club was very pleasantly entertained by Mrs. Herman Isakson at her country home Tuesday afternoon. The time was spent in picking out for the Children's home at Lewiston and in social converse. At 3:30 a dainty luncheon was served by the hostess.

The invited guests were Mrs. Wm. Jenkins, Mrs. Ernest Johnson and Mrs. Pauline Peterson.

The next meeting of the club will be at the home of Mrs. Sam Lange on Tuesday, October 19.

**Serving Subpoenas**

If you have not already been subpoenaed to attend the big closing-out sale of the Follett Mercantile company, you are sure to be, as Col. Marden had many of the legal-looking documents made and is going to do his best to see to it that you are on hand at the final session of the "Probable" court, which is to convene at the Follett store from October 9 to 16, inclusive. The final big sale will start on the 9th and close on the 16th.

# YELLOW!!

By DOUGLAS MACK

(Continued from Last Week)

"I'd like to win just because you've got such faith in me," Jim managed, and scooped Gene into a bear hug. Then came the road trip, a tireless jaunt at best, and particularly so when a team picked as a road dash horse plods along like a drab old mare whose race seems run. Jim didn't win a game, and he marveled at the fact that McCarthy kept starting him. But he was being taken into the blowup seemed imminent, called from the field before the damage was done. McCarthy was taking for granted that he would weaken, and that Jim would make him look for the blowup. The older pitcher worked with him; they asked him why he invariably weakened. He couldn't tell them. They asked him why he grooved the ball in a crisis, and he insisted that he meant to work the corners. And deep in his heart he knew what was wrong. He was a coward—he was yellow!

"Boys, we're going to lose the pennant because we've got a yellow pitcher on the team. He grooves 'em when he's got enough stuff to make the batters look like monkeys. What are we going to do about it?" One was for according to him with the accusation. After lengthy argument they decided against this. He was the type to crumple if this procedure were adopted. So they decided on nothing other than the possibility of leaving him on the hill regardless of the consequences the next time he weakened. This was tried, and fourteen humiliating runs crossed the platter before Jim, perspiring and shaking, got his third out. He was astonished to be sent in for the next inning, and again he was pounded. The night on the train he was determined to give up. He was notified the club, or claim his salary, but would disappear and forget baseball. He scarcely heard McCarthy's command to be at the park early next morning for practice. No more work for him; he was through with this child play. As about he was reminded of Gene, the one person who seemed sorry for him—he would have to leave him and Mrs. Martin's excellent hospitality—and the girl who made light of baseball. The thing that made him cause some philosopher to say: "He may be down but he's never out until he admits it." McCarthy called the older batted out conference just before they started for home, and spoke his piece.

## For Better Health

USE OF GOGGLES Eye-sight is so precious that everything should be done to preserve it. It is necessary for us to mention goggles in this connection.

When you make many excuses for not using goggles—they interfere with vision, they become sweaty and blurred, they break and injure the eyes, etc.; but instances when goggles have prevented injury to the eyes, when flying pieces of metal or emery would have struck the eyes but for the goggles, are forgotten. Examine the ordinary glasses of some workman who uses them at his work and you will find all over the lenses tiny specks made by substances striking the glass.

A safety supervisor sent the following letter to his workers: "Today M. F. is soldering a lug on a generator lead. In some way the hot solder splashed up into his face, several large blotches striking his goggles. It is evident that serious injury or loss of vision was prevented by the use of his goggles in this case. The eyes were not injured in the least."

Yesterday S. M. was cutting off rivets with an air gun. He was cutting upward on a side of a car and just about his head a rivet flew. This flew backward about a foot and a half and struck the left lens of his goggles and made a hole through the lens about 1/4 inch in diameter. The entire lens was shattered but remained in the frame. Around the hole the lens was shipped on the inner side but no glass entered the eye and he suffered no injury."

The Committee for the Prevention of Blindness, 370 7th Ave., New York, is doing everything possible to induce workers to use goggles while at work liable to injury. They will send, upon application, pamphlets and illustrated circulars giving much valuable information.

It is encouraging that employers and superintendents to factories are beginning to appreciate the importance of goggles and advise the workmen with goggles and advise their use, finding that preventing injury to the eyes saves much loss of time and poor work. It pays the employer to help the workman remain well and efficient.

Great improvement has been made lately in goggles. They are now made like veneer—in layers glued together—so that if shattered the glass will not scatter. By all means use goggles at work if they are needed.

ANNOUNCE TAX RATES ON FOREIGN-BUILT BOATS Tax regulations for the administration of section of the new revenue act governing the tax on the use of foreign-built boats have been issued by the Treasury Department at Washington, D. C., effective as of July 1.

As outlined in the regulations, items subject to the tax include the use of foreign-built yachts, pleasure boats, power boats, motor boats with fixed engines and sailing boats of more than five net tons and length of over 32 feet. The use of foreign-built boats of foreign register and used in the United States, and boats owned by non-resident alien navigating United States waters, which were not owned on January 1, 1926, by a citizen of the United States, or a domestic partnership or corporation, is subject to the tax.

Taxes on these vessels will be computed as follows: (a) Over five net tons, length over 32 feet and over 50 feet, \$2 for each foot; (b) over five net tons, length over 50 feet and not over 100 feet, \$4 for each foot; (c) over five net tons, length over 100 feet, \$8 for each foot.

Be a home-town booster. Oh, Dad, you in Seattle bring home some Boldts good bread and pastry. 1414 3rd Ave.—Adv.

## NEGRO FARMERS

There are 88 negro farmers per 1,000 of their racial population as compared with 65 white farmers per 1,000 white inhabitants. These negro farmers operate land in farms equal to 2.2 per cent of the total land area of the United States, and if the land occupied by them was placed acre to acre it would form a belt about two and a half miles wide that would encircle the earth at its widest circumference. Contributing to the agricultural resources of the nation are 92 colored women dairy-farm operators, 28 stock raisers, and 79,773 general farm operators.

Prospects for beef cattle are brightening and reports from Washington say that within the next 18 months both feeders and range stock will be higher. An upward trend is probable, says this report, over the next two or three years. This offers some encouragement to the beef raisers who certainly have been playing a waiting game, but eighteen months is still a long time to wait for a return of prosperity; then for three years only! It is rather a short time to enjoy this prosperity. Perhaps a surprise is in store—the prosperity may come sooner and last longer. Let's hope so.

A HAPPY THOUGHT "I shall pass this way but once. Any good, therefore, that I can do, or any kindness that I can show to any human being, let me do it now. Let me not defer or neglect it, for I shall not pass this way again."—Robert Louis Stevenson.

## DAIRY

### Good Showing of the Whatcom Association

The Whatcom County Dairyman's Association held business at 11:30 a. m. for the first six months of 1926, and added enough to its surplus to bring the total up to \$157,534.13.

A statement recently issued covering the financial condition of the association on June 30, shows a net worth of \$467,933.24, the assets being \$919,172.31.

It is claimed by the management that for April the Association's members were paid 97-10 cents a 100 pounds of milk more than was received by the members of any other County group in the state; and in May and June this increase had expanded to 17-20 cents a hundred pounds of milk, being equivalent to a dividend of approximately \$4,000.

The Whatcom County Dairyman's Association operates two plants. One in Bellingham, the other at Lynden.

The Inland Empire Agricultural Corporation, with \$10,000 capital, has been formed in Spokane by the officials of the Inland Empire Dairyman's Association. The object of the new concern is to discount dairy cattle loans with the Intermediate Credit Bank of Spokane. A capital of \$100,000 in cash makes possible a \$100,000 credit with the Intermediate Credit Bank, of which Ward M. Buckler is manager. Farmers in the vicinity of the new corporation will now be able to procure long-time loans at a fair rate of interest, pledging their dairy cows as security.

The rebuilding of the large hay and grain barn recently destroyed by fire, at Carnation Milk Farms, is rapidly under way. The fire, which destroyed the barn was supposed to have originated from spontaneous combustion in the hay barn.

Defective electric wiring is reported to be the cause of a fire that recently destroyed the dairy barn of the farm of Joseph Sutter, near Auburn. Seventy-five cows were successfully removed from the burning structure, but a pair of work horses refused to get out. The loss is estimated at \$6,000, partly covered by insurance.

Northford Farm, Redmond, Wash., has a good herd of 16 milking Short-horn and Friesian cows. The herd was seen first at Burlington at the Skagit County fair, then on to Chehalis for the Southwest Washington Fair. Elma, Puyallup and the State Fair at Yakima are included in its itinerary, which will terminate with the Pacific International Livestock Exposition to open at Portland on October 30th.

Arthur J. Berry, a young farmer, near Novelty, in the Snoqualmie Valley, was awarded the first prize offered by the Seattle and King County bankers, consisting of \$115.00, for the best growth of alfalfa from last spring seeding. W. N. Crable, near Carnation, was paid second money, \$60, and Harry Siam, of Carnation, third money, \$40.00. County agents of west side counties are very active these days stimulating interest in alfalfa growing and are meeting with much success.

Another world record has recently been completed on the Western State Hospital Farm at Fort Steilacoom. Stellacoom Homestead Beauty has just qualified for the honor of world record senior three-year-old bull for butter production in the 305-day division, classification B, which limits milking to three-times-a-day. Her production is 314.10 pounds of butter from 19,379.9 pounds of milk.

She is a daughter of Kate Homestead Beauty, that was second prize mature female in 1917 Pacific International Livestock Show, Portland. Her sire is Sir Pieterje Ormsby Blossom, that is also the sire of the world record junior three-year-old Stellacoom Prilly Ormsby Blossom. Having two world record daughters in the same division is a distinction enjoyed, we believe, by no other sire of the breed.

A bridge approximately 1,600 feet long with a minimum clearance of 200 feet is proposed across The Narrows at Vancouver, B. C., and permission is being asked of the department of marine at Ottawa.

There once was a folksome Slouch, Whom didn't know just what t'wixt dioux. So he went for a walk With his gay tomahawk, And proceeded t'wixt thru the air blitoux.

## Washington Stands High in Weight of Wool Per Fleec

The Washington wool producers are efficient is indicated by the fact that this state ranks high in the nation in the average weight per fleece per sheep. Figures for 1926 show that this state, with an average weight of 8.1 pounds per fleece, is second highest in the United States. Oregon, 9.2 pounds per fleece, ranks first. The only other states which averaged 9 pounds were Idaho and Utah, with exactly 9 pounds each. These figures are released by the Bureau of Agricultural Economics of the United States Department of Agriculture.

In 1925, Washington also ranked high, being with Oregon and Utah first place in the nation. Each of these

## SHE FOUND HER "HOUSE" BY THE SIDE OF A ROAD

ROSE BRYANT decided she wanted it by the side of a lake—hence the Adventures.

ROSE BRYANT has a notion that "Lady Luck" is no lady. Also, Rose, whose contralto voice has been familiar for more than two years to millions of radio fans who have listened to the weekly offerings of the "Eveready Hour" broadcast from station WREAF, New York, and its affiliated stations, wants personal and tangible proof that "a" long lane that has no turning back

Concerning both questions, she thinks she will be able to speak with greater authority by the end of her vacation this summer in Maine. Meantime, Rose is certain of the truth of that ancient notion that it is completely disastrous for a house to be "divided against itself."

Last summer Rose went to Harrison, Maine, seeking rest and recreation in the great outdoors. She was motoring through the neighboring countryside one day when she noticed a rather dilapidated little white schoolhouse, squatting off in a field by the side of the road. Just how the idea developed, she can't quite explain, but she had a hunch that the schoolhouse was the place for her. She had a hunch that the schoolhouse was the place for her. She had a hunch that the schoolhouse was the place for her.

Two days later she opened another telegram in New York. It was from the county sheriff and read: "Your house, sitting on the site, then she arranged with the county authorities to buy the schoolhouse for \$1,000. She had a hunch that the schoolhouse was the place for her. She had a hunch that the schoolhouse was the place for her.

Next day another telegram came. This one was from the contractor. It said: "To cut the darn thing in two. Even now can't get it down. Had to cut it up in two. Then came another telegram from the contractor: 'Had to cut down a lot of trees.'"

"My lovely old pine trees!" wailed Rose. "Then she fired back a telegram. "No, not your trees—the other fellow," came the prompt reply. "The contractor says that had he been advised by wire that 'the other fellow' was suing her for damage to his property, he would have been a lady, but—xxxx!" quoth Rose.

## HUGE MEMORIAL HANDLED BY YAKIMA MAN

Dispensing the \$15,000,000 Milbank memorial fund to the poor of New York is the latest social service work undertaken by John A. Kingsbury, who spent his boyhood in Yakima and is a son of the late J. W. Kingsbury. Mr. Kingsbury was for several years charity commissioner of New York city and his present appointment came to him through his acquaintance at that time with Mrs. Milbank Anderson, who recently bequeathed her money, \$40,000. County agents of west side counties are very active these days stimulating interest in alfalfa growing and are meeting with much success.

## LETTING CLOTHES TALK FOR YOU

NEW YORK—Neither vanity nor frivolity is responsible for the importance the modern woman gives to clothes—it is the richness of her personality.

"This is the edict of Peggy Hoyt, one of New York's most exclusive costumers, who is also one of the most fastidiously gowned of women herself.

"Human personalities have become more complex along with everything else in life," she explains. "Primitive woman could express all she had to say and all she was in a few guttural syllables and a bear-skin!

"Her present representative finds the entire vocabulary of Babal tunc. She extends herself in her adornment. She expresses herself through her clothes as a violinist does through his music."

Montana ranked next, with 8.7 pounds per fleece, and Idaho, with 8.6 pounds per fleece. The average was 8.4 in 1925 and 8.1 in 1926.

The half-tone printing plate was invented in 1881 by Frederick E. Ives, a Cornell University research worker. The government printing office was the first user of his plates.

Say, Bill, whenever I go to Spokane I never miss getting some of those dandy meals at the Tray Tavern on Howard Street just north of Riverside Avenue.—Adv.

## CELEBRATION MARKS OPENING OF NEW CASCADE LINE OF SOUTHERN PACIFIC

LOCAL train service on the new 128-mile Natron cutoff, now officially known as the Cascade Line of the Southern Pacific through the Cascade Mountains between Klamath Falls and Eugene started early in September and through train service is expected to be inaugurated later in the year.

Marking the completion of construction a "Trail to Eugene" pageant was staged at Eugene, August 19 and 20. The pageant, Kistava, written by Prof. W. P. G. Thatcher of the University of Oregon, depicted the evolution and history of transportation in the Northwest. Practically every known phase of transportation was represented in the parade. It included Indian pole drags, ox teams, burros, covered wagons, stage coaches, buckboards, buggies, horses, railway locomotives and coaches, ships, high-wheeled bicycles and airplanes.

The old "C. P. Huntington No. 1" and a modern Southern Pacific type 3-cylinder locomotive were on exhibition.

The cut-off, a second track on the Shasta route, covers the points of Butte, Cal., to Springfield Junction, three miles south of Eugene, opens a virgin territory of undeveloped land and the forests in order to supply lumber. The right of way between Eugene and the Willamette valley on the west. The significance of this project in the future development of Oregon can only be glimpsed at this time. In penetrating a country only accessible over trails and roads the railroad reveals the old world of the Cascades and just north of relation to the ease with which he can travel and transport his harvest and manufactured goods from where they originate to where they are needed or consumed.

The Cascades Line, with the Black Butte-Grass Lake line change, has involved a total expenditure of more than \$20,000,000. Among other advantages the new line reduces the maximum grade between San Francisco and Portland from 174 to 85 feet per mile, reduces curvature by 15,455 degrees, or about 51 complete circles.

The most difficult part of the construction was between Oakridge and the summit of the Cascades, on the west slope of the mountains. Here 19 tunnels having an aggregate length of 10,500 feet, the longest tunnel, 3,648 feet, is at the summit and at an elevation of 4,812 feet. The shortest tunnel is 150 feet. Nearly all the tunnels are bored through solid material, little concrete lining was required.

An average of 3,000 men were employed during the summer and fall of 1924, size of the crews varying with the season. A total of approximately 4,000,000 cubic yards of all classes of material were handled in the construction between Oakridge and Kirk. Exclusion of the 24 mile cut-off between Black Butte and Grass Lake, Cal.

Many miles of wagon roads and trails were built on the mountain sides to enable the contractors to haul equipment, material and supplies to the various camps and points of construction. Due to excessive cost and difficulty of hauling, small sawmills were established at convenient points in the forests in order to supply lumber. The right of way between Eugene and the summit was cleared through thick forests of heavy timber.

The new line offers unsurpassed scenic attractions. From Klamath Falls the line runs for about 21 miles along the shores of heavily timbered Lake in the heart of lovely mountain ranges. A north of Kirk the line runs for 22 miles through the Klamath Indian reservation and then north and northwest 35 miles to the summit of the Cascades, just north of beautiful Odele Lake. The entire region is a veritable fisherman's paradise of lakes and streams.

From a scenic viewpoint the new line opens to the lumber industry hundreds of thousands of acres of timber land. It permits the marketing and sale of cattle raised in the grazing country and will open to the settler a fertile back country heretofore inaccessible because of lack of transportation.

Contract has been let to the Prince Rupert drydock by the provincial government of British Columbia for the construction of a 40-foot wooden gas cruiser for the forestry department. It will be driven by a 150 horsepower Scandia engine.

The Weyerhaeuser Timber Company plans to construct a logging railroad from Muljeunes on the upper Skookumchuck river to South Bay on the Olympic peninsula in the Thurston county communitarians to cross county roads. A machine shop will also be established at Rainier.

In the Heart of Spokane, close to stores, schools, and the business district, the Coeur d'Alene Hotel offers the traveler every convenience. Popular prices and perfect service. "The Hotel With a Personality."—Adv.

## TRANS-PACIFIC LINERS

SIX new ships, the Nippon Yusen Kaisha for their routes between Japan and Seattle and San Francisco according to an announcement by the company last month. Three new freighters are being planned for service between Seattle and Japan for the development of the northern Trans-Pacific trade and also three 17,000-ton diesel-engine liners with a speed of nineteen knots are planned for the San Francisco route. The new freighters are to be of more than 10,000 tons and will be similar in type to the Atago Maru and Asuka Maru built last year. When the new passenger liners are completed the larger boats now running out of San Francisco will be transferred by the N. Y. K. to the Seattle-Orient run.

## The Young Cockerel an Economic Disaster

An agitation is reported to have started in Petaluma, California, for the establishing of a business district to take care of the surplus of young cockerels each spring. The male chicks have long been an economic problem to the poultry raiser. They must be fed to a certain age to distinguish the sex; and as they can rarely be fed at a profit to the broilers, it has become the practice in many places to snap off the heads just as soon as the sex is distinguishable, the body going into the fire or on to the manure pile. This is a great loss sufficient to carry twice the present number of the flock.

Many attempts have been made to market the young roosters profitably as broilers, and thousands of them annually find their way to market, but it is doubtful if any of them ever reach the market returning a profit to the grower. If a cannery process could be devised, whereby these young cockerels could find a market at a profit to the grower, a great loss would be eliminated that is now eating a large hole in the poultryman's pocket. These surplus cockerels in many instances stand between the poultryman and his profits.

"CHEVON" IS NAME FOR GOAT MEAT Hereafter, if the efforts of a number of organizations and individuals have the desired effect, goat meat will be designated by a special name which, for the comparing to pork, beef, and mutton. The name selected by the goat-raising interests in the Southwest is "chevon." In reply to requests for approval of this new name, the United States Department of Agriculture has stated that there seems to be no reason why this name should not be adopted and generally applied to the meat of this domestic animal, and it, therefore, approves the name "chevon."

The word "chevon" was created after long consideration of many suggestions, by organizations representing the principal Angora-goat producing region. It was made by combining parts of two French words, "chevre," meaning goat, and "mouton," meaning mutton. In other words, "chevon" means goat mutton.

I have also opened a dress-making parlor in connection and will do sewing of all kinds.  
I will also handle a line of hats, ready to wear and art goods.  
Maud A. Slighton

**30 DAYS --- CASH**

Times change, just as some folks do; the ways of doing business change, and we must also change. We must realize that times are different and unless we get in the parade and do as others do, it will be but a short time before we will have the auditors pounding on our front door.

Heretofore we have given credit to our patrons, allowing them to choose their own time in paying us, but today our creditors are demanding that we pay our bills on the first of each month. We have no choice in this matter. If we hope to give you quality goods at the right price—give you the service you are entitled to, if we expect to remain in business, we must also go on the 30-day cash basis.

We have learned by sad experience that this change in our policy must be made; that no business can make an agreement to supply and pay unless it is based on the confidence that those with whom it deals will perform their agreement to supply and pay.

"Mother, you're the bestes' cook in the whole world!"

What gives a mother greater pleasure than to make the kiddies happy with the goodies she prepares for them?

And how simple it is with a MONARCH Range in your kitchen. A MONARCH oven is ready for baking of any kind in remarkably quick time—and with such little fuel.

A hot oven—slow oven—a range that gives any service the occasion demands and continues to do for years to come.

To insure such service, the Monarch is built of unbreakable malleable iron, so it can be riveted—the only way to avoid air-leaks that cause fuel waste and cooking failures.

There is no economy in using the old range even if it can be made to do another year. Visit our stove display today and let us explain the many advantages and exclusive features of the MONARCH Range.

**PERSONALS**

Mrs. F. K. Bressler left Thursday morning by way of Moscow for a visit in Spokane.  
Joe Decker of Moscow visited Saturday and Sunday with Mr. and Mrs. Leon Follett.  
Mr. and Mrs. Al. Mayer and family spent Sunday with Mr. and Mrs. Art. Mayer at Troy.  
Misses Agnes and Sylvia Johnson, who are teaching near Palouse, spent the week-end with home folks.  
Misses Grace Jain and Rowena Hanson, who are attending U. of I., spent Saturday with home folks.  
Orland Mayer, who is teaching near Potlatch, spent the week-end with his parents, Mr. and Mrs. Al. Mayer.  
Mr. and Mrs. Frank Hudson of Spokane spent Saturday and Sunday at the home of Mr. and Mrs. Henry Hanson.  
Mr. and Mrs. Grant Clark, Mr. and Mrs. Florence and Misses Mabel Botter and Florence Rader spent Sunday in Spokane.  
Mrs. F. K. Bressler returned Saturday after spending a few days with her daughter, Mrs. Geo. Gannon, and family, at Pullman.  
Miss Rowena Hanson and Miss Nadine Tucker, students of the U. of I., visited Tuesday evening with Miss Hanson's parents, Mr. and Mrs. Ira Hanson.  
Miss Esther Martinson left Friday evening for Postello, where she went as a delegate from the local Rebekah lodge. Enroute she will spend several days visiting friends.  
Rev. A. F. Wolf left Monday morning for Tacoma where he attended a meeting of the Northwest Lutheran mission, which convened in that city Tuesday and Wednesday of this week.  
F. E. Dicus spent Sunday in Spokane. He was accompanied home by his wife, who had been there for a short visit, and his son, Fred, who has been in Spokane the past several weeks recovering from an operation.  
Rev. Paul Sprague left Monday for Spokane, where he will attend a session of the Washington-Idaho conference of the Congregational churches, which convenes in that city from Tuesday afternoon until Friday of this week. Rev. Sprague will read a paper on "The Church's Alleged Inferiority Complex."

**CONCERT WAS ENJOYED**  
The concert given in the High School opera house Monday night by Mrs. Hordeman, Prof. Herbst, violinist, of Spokane, and Mrs. Marie Lloyd, vocalist, was much enjoyed by a fair-sized crowd.  
The entertainers were all masters of their parts and a very pleasant evening's entertainment was given.

**Old-Timer Visits**  
Eugene Levy, son of Aaron Levy, who many years ago conducted a general merchandise store at "Old Town," was a Genesee visitor one day last week.  
While Mr. Levy left here some 36 years ago, while he was yet a small boy, he seemed to get a great kick out of the fact that he had once lived here and was able to again visit the old town. His younger brother, Aubrey Levy, was born at Old Town, which naturally created a tie between the family and Genesee.  
Mr. Levy is now a resident of Seattle and was formerly in the theatrical business, but some four years ago he sold out to the trust.

**"The Shadow of the Law"**  
On Wednesday night, October 13, "The Shadow of the Law" will be the feature picture at the Hotel theater. This is a thrilling drama of society and the underworld of a great city.  
Love, youth, sweetness and romance suddenly wrecked by a disastrous revelation. He had loved her because she was untouched by life. He found she had a prison record.  
A powerful dramatic situation in "The Shadow of the Law."

Don't miss page 7 this week.

Blivens: "Indeed, I am not!"  
Wiseboy: "Yes, yes, you are. For example—while you've been standing here talking to me Henry Ford has made \$3,500,000."

Wrong Fr Once  
Proud Father: "A bouncing baby boy, eh? Well, doctor, I'm a proud and happy father."  
Doctor: "But I said twins, sir. You are the father of twins."  
Proud Father: "Ah, but doc, you can't fool me. I learned long ago to believe only half I hear."

Statement of Ownership, Management, Etc., Required by Act of Congress August 24, 1912

Of the Genesee News, published weekly at Genesee, Idaho, for October 1, 1926.

State of Idaho, County of Latah—ss. Before me, a notary public in and for the state and county aforesaid, personally appeared P. C. McCreary, who, first being duly sworn according to law, deposes and says that he is the editor and publisher of the Genesee News, and that the following is, to the best of his knowledge and belief, a true statement of the ownership, management, etc., of the aforesaid publication for the date shown in the above caption, required by the Act of August 24, 1912, embodied in section 443, Postal Laws and Regulations, printed on the reverse side of this form, to-wit:

That the name and address of the editor and publisher is P. C. McCreary, Genesee, Idaho.

That the owner is P. C. McCreary, Genesee, Idaho.

That the known bondholders, mortgagees, and other security holders owning one per cent or more of total amount of bonds, mortgages, or other securities are: None.

P. C. McCreary,  
Owner and Publisher.

Subscribed and sworn to before me this 5th day of October, 1926.

CARL F. NAGEL, Notary Public.

Ah—A Man's Man

**Nebraska Rough On Liquor**  
Stern Nebraska law, which has placed many liquor law violators on bread and water diets, has dealt what is believed to be among the most severe sentences ever ordered for violation of the Volstead act.

Convicted of illegal possession and sale of liquor, Oscar Nelson, wealthy farmer, was sentenced to four years in the Nebraska state penitentiary. He has posted bond and is at liberty pending appeal to the state supreme court.

Nelson and his brother, John, both of whom were visited by liquor agents who represented themselves to be multiple buyers. While dickering with them for this purchase, the agents suggested that it would be well to buy some "white mule" also. The brothers said they had no "white mule," but sold the agents five bottles of Canadian whisky at \$10 a bottle, the agents testified.

Oscar, who has been twice convicted of liquor law violations, pleaded not guilty but was convicted. The court imposed a sentence of two years for illegal possession and two years for illegal sale, the sentence to run consecutively. John was also convicted, but as the court allowed it was his first offense, he was given 60 days in jail and \$100 fine for each count, sentence to run concurrently.

Don't miss page seven this week.

**PUBLIC SCHOOL NOTES OF MUCH INTEREST**

The school has recently completed the sale of the Curtis Publishing company's publication and had a very successful contest. The division called the "Greens," headed by Erling Lande, won in having sold the most subscriptions. The "Reds," headed by Ruby Roach, were second and the "Blues," headed by Mabel Bottjer, were third. The total number of subscriptions sold were 122.

The all-high-school play has arrived, the cast picked out, and practice has begun. The title of the play is "Ruth in a Rush." Miss Wolf has picked an excellent cast and there is every indication that this play will be a success.

We are still showing Paramount pictures at the High School opera house. This will be continued this fall until the beginning of the basketball season, when the building will be used as a gymnasium.

The books for the Glee club have arrived and practice has begun. As stated before, there will be two divisions, the girls' club and the boys' club. The two clubs will be combined on special occasions.

The manual training room has been enlarged so as to take care of the large number of boys who are taking this course. The chemistry class is so large this year that the course had to be arranged in two schools. The advanced mathematics course, that promised to have an enrollment of only half a dozen, has 13 students. This shows a trend for students to take advanced work.

The October issue of the Idaho Teacher states that by a vote of the people, another district was consolidated with the Filer district, in the southern part of the state, which will now make a total of six districts joined with the original Filer district. The general tendency of all states is toward consolidation. People are beginning to see that the consolidation plan is the more economical in terms of taxation and child interest. Education costs money! As a school grows it needs new equipment. The best thing I ever heard a man say was that he was always glad when his wife said that their child needed new clothes. He knew that his son was having a healthy growth. The same applies to the school, which represents children, collectively.

**Animated Beans**  
The farmers have turned their bean sheaves so often, on an account of the weather, that all they have to do now is point a pitchfork at a sheaf and it rolls over.—Kendrick Gazette.

**A Successful Hunt**  
Dr. A. J. Powell, George Murray, Adam Hills and Louis Anderson returned yesterday from a two week hunting trip in the Clearwater country between the Lochsa and Selway, bringing in four deer, one bear and a very large caribou. V. Neal, also returning from the same section, captured an elk and a deer.—Lewiston Tribune.

**Freeze Did Much Damage**  
The heavy freeze of two weeks ago did a great deal of damage to the fruit on the prairie, as the berries, because since the result of the cold snap is becoming more manifest. Practically all of the apples on the prairie and mountain across the river were frozen enough to ruin them for all commercial purposes and many that look undamaged are found to be turning dark near the core and will not keep. Some are being salvaged by converting them into cider but in many of the small orchards even this saving is not made. The cold snap froze all garden stuff down to the ground and put a week's delay on the growth of the potato crop, with the result that many will find their spud crop considerably short when the time comes to dig them. The freeze reached down almost to the Salmon river and tomatoes and peaches on the ranches in Rocky canyon and other similar places were almost totally destroyed, while grapes, melons and even squashes were frozen where they were not protected from the cold. It was the earliest heavy freeze experienced here for many years and caught everyone unprepared.—Cottonwood Chronicle.

**Putting in New Water Mains**  
Loncosty & Powell, who secured the contract for putting in some 1250 feet of new water mains, are making good progress and the work is going forward on schedule time.

The original contract for the putting in of the Genesee water system was let in September, 1923, making the system 23 years old. There are 16,000 feet of main in the city, consisting of eight, six and four-inch pipe, and these will all have to be replaced sooner or later as they are springing leaks at various places and causing no end of trouble.

The city water works bonds were all taken up some five years ago and the city has accumulated and will continue to accumulate, enough money from the water fund to replace these mains as replacement is needed. This is a very important matter and Genesee not only has a new water system, but has as fine a cool water supply as can be found anywhere coming from deep wells.

There will be no interruption in water service at any place for more than 12 hours. The hotel will be supplied by a pipe being laid across the street from the First Bank corner, thus insuring no interruption to water service to that hotel.

**Politics Warming Up**

Politics have begun to thaw out in this section of the country and politicians of all beliefs are on the move.

On Friday of last week Lieut. Gov. H. C. Baldrige of Parma, and candidate for the office of governor on the republican ticket, accompanied by State Senator Halley of St. Maries, a candidate for lieutenant governor, as lieutenant governor, Victor Shave, secretary to Governor Moore, and Bliss Moore, state highway maintenance engineer, were in Genesee during the afternoon making friendly visits and talking to republicans and others who might be interested in the coming campaign.

County Chairman J. S. Heckathorn, State Senator C. A. Hagan and County Auditor H. A. Thatcher came over from Moscow and accompanied the gentlemen to that city, where Mr. Baldrige delivered an address that evening on campaign matters.

H. F. Samuels, candidate for United States senator on the non-partisan ticket, accompanied by his retinue, visited the city Friday afternoon in the interest of his candidacy.

**Some Pie Maker**  
As a rapid-fire pie maker, Miss Laura House of Mascotah, Kan., is believed to hold a record. Twenty pies in 45 minutes are her figures.

**Summit News**

Mr. and Mrs. F. B. Hampton visited at the M. S. Wilson home Sunday evening.

Ethel Qualey came up from Lewiston to spend the week-end with home folks.

Mr. and Mrs. Nels Liberg spent Monday night at the James Qualey home.

A number of the Summit natives were among those that attended the chivari in honor of Mr. and Mrs. Louis Heinric.

Mr. and Mrs. Dick Green were Sunday visitors at the Martin Liberg home.

Mr. and Mrs. H. Bielenberg had a Sunday guests. Mr. and Mrs. A. J. Reisenauer and children of Colton and B. H. Bielenberg of Moscow.

Mr. and Mrs. Ed. Erickson of Orofino are visiting at the Chas. Kraut home this week.

F. O. Green and family moved to Caldwell Saturday to attend the "cornshoes" and visit with W. H. Gage and family.

O. F. Rader and family visited with Mr. and Mrs. Elmer Johnson Sunday.

Mrs. Sumner Stucker, Mrs. F. B. Hampton and daughter Alfreda returned to Moscow Tuesday.

Mrs. F. W. Qualey and daughter, Mrs. Dick Green, entertained a number of the Summit Ladies at a "guessing best" Thursday afternoon. Lunch was served by the hostess exactly at the right time. Those present were Mrs. J. Qualey, Mrs. M. S. Wilson, Mrs. Chas. Kraut, Mrs. W. A. Green and Mrs. F. O. Green.

Mr. and Mrs. Elmer Johnson left for Caldwell Tuesday. Mrs. Johnson expects to visit at the home of her parents, Mr. and Mrs. W. H. Gage, while Mr. Johnson will go to Bend, Oregon, looking for a location.

The Summit school was closed on Friday on account of the county fair and school exhibits put on at Caldwell. First prize for a one room school exhibit was awarded to the Summit school. The prize being \$5.

**MARKET DEVELOPS WEAKER TONE—SLACKENED DEMAND**

Some improvement in the weather in the spring wheat belt of the United States and Canada, together with a slackening in both the domestic and export demand, caused a weaker tone in the grain market during the week ending October 9, according to the weekly Grain Market Review of the United States department of agriculture, and prices of most grains made moderate declines. Lower prices for cotton and commodities also had a depressing influence on the grain market.

Foreign wheat markets did not follow the decline in the American markets but foreign buying of United States and Canadian wheat was less active. Shortage of ocean freight space and higher ocean freight rates were partly responsible for the reduced demand. Later foreign crop reports tended to reduce the estimates of European crops, and this was an additional strengthening factor in European markets. The movement of the United States grain has increased with better weather in the prairie provinces and prices at Winnipeg declined about 5/8c for the week ending October 8.

In the United States markets the demand was also less active although price declines were not so great. Receipts have recently been in excess of the current demand and stocks have steadily increased, totaling at the close of the week around 30,000,000 bushels more than at the corresponding time last year. Receipts of spring wheat for the week were slightly larger at Minneapolis but were materially smaller at Duluth. Good, dry wheat was in excellent demand but damp wheat was slow to sell although demand for the tough offerings showed some improvement at Minneapolis toward the close of the week.

The market for durum wheat remained firm with choice milling qualities scarce. No. 1 Amber was quoted at \$1.32 - \$1.47 at the close of the week at Minneapolis. The winter wheat market declined 3c to 5c during the week. The slow demand for cash wheat, together with the lower prices at Winnipeg and Minneapolis, was the principal cause of the decline. Mills were not active buyers and took only the top grades, premiums for which declined about one cent in addition to the decline in future prices. Elevators and shippers were fairly active buyers but some of the lower grades were being carried over unsold at the close of the week.

The demand for soft winter wheat was less active but light offerings held prices relatively firm. Declines of 2c and 3c, however, were reported at the principal markets. The Pacific Northwestern markets held firm with soft wheat selling around \$1.34 to \$1.35 per bushel at Portland. There was a steady demand but very little wheat was being offered by the country shippers. Exporters were taking everything offered and mills having some difficulty in filling current milling requirements. New export business was small because of the higher freight rates.

The oats market was relatively firmer than other grains as offerings of both high grade, dry oats were scarcely seen in the market. The receipts of all grades of oats at the principal markets were larger than for the previous week, but a large proportion of these receipts were damp and were difficult to dispose of as the facilities for handling these off-grade oats are becoming taxed at some of the markets.

**Freddie Did Much Damage**

The heavy freeze of two weeks ago did a great deal of damage to the fruit on the prairie, as the berries, because since the result of the cold snap is becoming more manifest. Practically all of the apples on the prairie and mountain across the river were frozen enough to ruin them for all commercial purposes and many that look undamaged are found to be turning dark near the core and will not keep. O. F. Rader and family visited with Mr. and Mrs. Elmer Johnson Sunday.

Mrs. Sumner Stucker, Mrs. F. B. Hampton and daughter Alfreda returned to Moscow Tuesday.

Mrs. F. W. Qualey and daughter, Mrs. Dick Green, entertained a number of the Summit Ladies at a "guessing best" Thursday afternoon. Lunch was served by the hostess exactly at the right time. Those present were Mrs. J. Qualey, Mrs. M. S. Wilson, Mrs. Chas. Kraut, Mrs. W. A. Green and Mrs. F. O. Green.

Mr. and Mrs. Elmer Johnson left for Caldwell Tuesday. Mrs. Johnson expects to visit at the home of her parents, Mr. and Mrs. W. H. Gage, while Mr. Johnson will go to Bend, Oregon, looking for a location.

The Summit school was closed on Friday on account of the county fair and school exhibits put on at Caldwell. First prize for a one room school exhibit was awarded to the Summit school. The prize being \$5.

**MARKET DEVELOPS WEAKER TONE—SLACKENED DEMAND**

Some improvement in the weather in the spring wheat belt of the United States and Canada, together with a slackening in both the domestic and export demand, caused a weaker tone in the grain market during the week ending October 9, according to the weekly Grain Market Review of the United States department of agriculture, and prices of most grains made moderate declines. Lower prices for cotton and commodities also had a depressing influence on the grain market.

Foreign wheat markets did not follow the decline in the American markets but foreign buying of United States and Canadian wheat was less active. Shortage of ocean freight space and higher ocean freight rates were partly responsible for the reduced demand. Later foreign crop reports tended to reduce the estimates of European crops, and this was an additional strengthening factor in European markets. The movement of the United States grain has increased with better weather in the prairie provinces and prices at Winnipeg declined about 5/8c for the week ending October 8.

In the United States markets the demand was also less active although price declines were not so great. Receipts have recently been in excess of the current demand and stocks have steadily increased, totaling at the close of the week around 30,000,000 bushels more than at the corresponding time last year. Receipts of spring wheat for the week were slightly larger at Minneapolis but were materially smaller at Duluth. Good, dry wheat was in excellent demand but damp wheat was slow to sell although demand for the tough offerings showed some improvement at Minneapolis toward the close of the week.

The market for durum wheat remained firm with choice milling qualities scarce. No. 1 Amber was quoted at \$1.32 - \$1.47 at the close of the week at Minneapolis. The winter wheat market declined 3c to 5c during the week. The slow demand for cash wheat, together with the lower prices at Winnipeg and Minneapolis, was the principal cause of the decline. Mills were not active buyers and took only the top grades, premiums for which declined about one cent in addition to the decline in future prices. Elevators and shippers were fairly active buyers but some of the lower grades were being carried over unsold at the close of the week.

The demand for soft winter wheat was less active but light offerings held prices relatively firm. Declines of 2c and 3c, however, were reported at the principal markets. The Pacific Northwestern markets held firm with soft wheat selling around \$1.34 to \$1.35 per bushel at Portland. There was a steady demand but very little wheat was being offered by the country shippers. Exporters were taking everything offered and mills having some difficulty in filling current milling requirements. New export business was small because of the higher freight rates.

The oats market was relatively firmer than other grains as offerings of both high grade, dry oats were scarcely seen in the market. The receipts of all grades of oats at the principal markets were larger than for the previous week, but a large proportion of these receipts were damp and were difficult to dispose of as the facilities for handling these off-grade oats are becoming taxed at some of the markets.

**Grey Eagle News**

Elsie Wahl spent Saturday evening with Doris Harms.

Allison Stubblefield started to school at Grey Eagle on Monday.

J. P. Herman and family were visitors at the Fred Bershaw home on Sunday.

Mr. and Mrs. Fred Bershaw and children were Lewiston visitors on Monday.

We now have our new slide up at Grey Eagle. It's sure a "slick" one and we don't mean maybe!

Mr. and Mrs. Ray Archer from Cambridge, Idaho, were visitors at the J. C. Cameron home on Tuesday and Wednesday.

Mrs. Sherman Wahl and children spent Saturday at their home on the hill. They report that they like their home and school at Lewiston very well.

Monday it rained and Tuesday it rained some more. Some folks are still singing, "It Ain't Gonna Rain No More", but well, it probably will rain a little more out here anyway.

Advertisers appreciate your trade.

Linger Longers Meet

The Linger Longers were very pleasantly entertained by Mrs. T. H. Herman Wednesday afternoon. Officers were elected for the ensuing term as follows: Mrs. Harry Schooler, president; Mrs. V. A. Beckman, secretary and treasurer. Fried chicken and trimmings were served by the hostess.

The next meeting will be at the home of Mrs. Ray Edwards on Wednesday, October 27.

K. C. Annual Banquet

The Knights of Columbus held their annual banquet Tuesday evening in their hall, which was attended by a very good crowd, weather taken into consideration. Supper was served at 6:30, after which a free dance was given in the American Legion hall. Interesting remarks were made during the evening by Fathers Davis and Janges and George Erb of Lewiston.

Have You Registered?

Only nine more days remain in which you can register. Remember, you will be unable to vote at the general election on November 2, if you are not registered by Saturday evening, October 23. Deans' drug store is the place—and now is the time!

Buyers Town Property

Fred Bernshaw last week bought the Dal Rogers place, in the north part of town, and will later occupy it with his family.

CHURCH NOTICES

Congregational Church Rev. Paul W. Sprague, Minister. Mrs. W. M. Herman, Pianist. W. E. English, Choir Director. Sunday school at 9:45 a. m. Regular preaching service at 11 o'clock. At the morning service Rev. W. S. Pritchard, assistant superintendent of Washington and northern Idaho, will speak. All members and friends of the church are earnestly requested to be present.

St. John's Lutheran Church A. F. Wolff, Pastor Sunday school at 9:30 a. m. English services will be held each Sunday morning at 10:30 o'clock, with the exception of the first Sunday of each month, when German services will be held at the usual hour.

Christian Church N. E. Beach, Pastor Bible school at 9:45. The "HILL" contest began last Sunday. The committee has decorated the classroom and everyone is enthused. Come, let's study the world's greatest book.

Sermon topic for 11 a. m., "The Song of Songs." Subject for 7:30 p. m., "The Lost Christ." A special song and a song season will be enjoyed as well as the sermon. You will enjoy the whole week the better if you begin it at the house of prayer and praise.

Mrs. Beach wishes to meet the ladies of the missionary society for a short important conference at the close of the morning service, November 28 to December 17 is the date chosen for the evangelistic meetings, led by Rev. Ross Allen of Watsburg, Wash.

Plays Reckless Drivers

Reckless drivers should be shown less mercy than robbers. Deputy Prosecutor Ralph Hammer of Seattle said before a jury trying Walter Alfred, Seattle University of Washington sophomore, on a charge of manslaughter. Alfred is accused of driving an automobile which collided with a machine in which Frank Kilborn, Everett, was killed June 1.

"Robbery at least requires one kind of courage, while reckless driving requires nothing," Hammer asserted. Mrs. Mary Kilborn, widow of the automobile victim, went on the stand while testifying for the prosecution. "I took no part in bringing about this prosecution," she said. "It will not help me or my three fatherless children if the boy is convicted."

Carl Johnson, witness of the collision, testified that Alfred was driving 40 to 50 miles an hour.

Had Tonsils Removed Mrs. Carl Erikson returned Sunday from Moscow where she underwent an operation for the removal of her tonsils.

Rebekah masquerade party, Wednesday evening, October 27. Admission, 25c. Refreshments will be served. Don't miss it, ladies. 16-1

Use the mail to get this Big Saving. Every Genuine Sealy has this black and gold label sewed on the ticking near the end. There is no substitute for a Sealy. Look for the label. HERMAN'S

# The Development and Handling of the Business of a Port

By W. S. CAHILL  
Traffic Manager, Port of Seattle, Seattle, Washington

TOO much money is often spent in the development and construction of waterfront terminal facilities without due consideration first being given to the character of traffic to be handled. The purpose of spending money for the construction of waterfront terminal facilities is the development of shipping business and commerce. If the facilities are designed and created to adequately take care of the needs of shipping and are determined by a thorough and intelligent study of the rail and water traffic, the problems remaining consist in attracting to the port the proper kinds of traffic and the requisite shipping service.

W. S. CAHILL  
New York City and from there control the routing of their export freight.

Every port has two inter-dependent traffic problems: First, attracting ships to the port; second, attracting cargo to the port for the ships to carry. Ships will go to a port or terminal where profitable cargo is available in sufficient quantities. Profitable cargo, however, will not be attracted to a port where there is lack of dependable and regular shipping service.

The port traffic organization must familiarize itself with the origin and destination of the traffic moving through the port and through all competing ports. It should have a pretty general idea of the world's commerce and the economic factors determining production and distribution, in order that it may correctly determine the part which the port and the hinterland tributary to it may take in national and international trade.

Statistics compiled by port officials and others, showing the value of commodities imported and exported in the foreign and domestic trade are of little value in transportation studies. In order to ascertain the increase or decrease in commerce, in any commodity, the unit of comparison must be constant. Weight and measurement is the proper basis for any study of commerce related to transportation and shipping.

With reliable information and data available regarding the origin and destination of traffic in which the port is interested, the traffic organization will then be in a position to direct its efforts to securing business which is particularly needed to stabilize the essential shipping routes and attract other regular lines of steamship service to the port.

Ports often make the mistake of confining their trade to a few bulky or heavy raw products originating in their immediate local territory. It is necessary, in procuring well-balanced cargoes, to solicit a general assortment of commodities, and an endeavor must be made to share in through traffic of the interior, both inland and out-bound. The commodities moving in volume, originating or destined to territory tributary to a port afford the foundation upon which to build up commerce for regular and dependable steamship lines. No progressive port should be content to see all its products of this character, usually moved in large lots, carried in tramp steamers which return empty, if they return at all. If ports depend for their commerce entirely upon a few raw commodities produced in large volume within their immediate local territory, their elimination as a natural consequence will come with the depletion or exhaustion of these commodities.

Manufacturers and producers in the interior whose products are destined to a number of foreign countries, cannot avail themselves of the shorter and cheaper haul to the nearest port where shipping conditions are irregular. A great many ports on the Pacific Coast are confronted with this problem, but it is by no means a hopeless one to overcome.

It is primarily essential in carrying out the project for the development of a port's business to establish a competent traffic organization. No private terminal corporation would make an expenditure comparable with that required for the establishment of port terminals without taking adequate steps for marketing the facilities and services which it creates.

Transportation Company has been making extensive shipments of lumber and building materials from Beaumont to the Gulf Coast region is concerned. With the completion of the first section of the municipal docks, under a recent bond issue to the amount of \$225,000, with warehouses on piers five and six, congestions such as has been the bane of shippers for the past several months has ceased. Shipping men know that ships come in bunches, and hereafter as many as a dozen vessels have sought berthing space at the municipal docks at one time.

Since construction, section seven of the municipal docks has been allocated to the Gulf Export & Transportation Company, and has been used by them continuously in handling exports to Tampico. By far the greatest overseas shipping to and from Beaumont during the past year has been by the Transmarine Corporation, which more than a year ago inaugurated a regular schedule from Port Newark to Beaumont, and thousands of tons of miscellaneous merchandise compose their cargo from week to week.

Transmarine vessels take on an average of a million feet of lumber and timber, destined for the eastern markets every week, to say nothing of many other miscellaneous articles of cargo.

It is interesting to note that a great part of Helium gas which goes to the various naval stations of the United States for use in dirigibles is taken in Mexico by the steamers, the gas in drums coming here from Fort Worth and other points in Texas near the only Helium fields in the nation.

For several years the Gulf Export & Transportation Company has been making extensive shipments of lumber and building materials from Beaumont to the Gulf Coast region is concerned. With the completion of the first section of the municipal docks, under a recent bond issue to the amount of \$225,000, with warehouses on piers five and six, congestions such as has been the bane of shippers for the past several months has ceased. Shipping men know that ships come in bunches, and hereafter as many as a dozen vessels have sought berthing space at the municipal docks at one time.

Since construction, section seven of the municipal docks has been allocated to the Gulf Export & Transportation Company, and has been used by them continuously in handling exports to Tampico. By far the greatest overseas shipping to and from Beaumont during the past year has been by the Transmarine Corporation, which more than a year ago inaugurated a regular schedule from Port Newark to Beaumont, and thousands of tons of miscellaneous merchandise compose their cargo from week to week.

The traffic organization of the port must be sufficiently informed regarding rail and water routes and rates, the charges, rules and practices in connection with wharfage, dockage, handling, storage, cartage, lighterage, etc., available for handling, storing and shipping specific commodities and for fueling ships and all other services and charges affecting both the ships and cargoes. It must be in possession of the needs of traffic so that it can gain and hold the business against all competition.

The industrial development of a port should not be overlooked, for industries which are users of raw materials and shippers of manufactured articles, contribute needed tonnage and make for balanced cargoes. Many ports owe their development to industrial enterprise and their reconignment and transshipping trade. This is particularly true of many European ports where a free port zone has been established.

In the future competition among ports will undoubtedly become keener and keener. In fact, the rivalry is now intense among a number of ports. It is upon the port to realize the necessity of expert knowledge of shipping and its needs in order that intelligent decisions can be made regarding the facilities to be established, at the port, their expansion and the development of business. Adequate terminal facilities permit traffic to move through the port but they alone do not control the movement.

Where ports control and operate their facilities they are confronted with a much more difficult problem of managing their vessels with economy. It is the problem of operating a port terminal. Not economy at the expense of the ship, shipper, or consignee, but that which results from organization methods, a thorough knowledge of loading, discharging and receiving, and proper coordination and harmony between operating and traffic officials.

Tenino Farmer Wins Thurston County Alfalfa Contest  
George Churchill's field of alfalfa, which scored 98 per cent, won the Thurston county alfalfa contest. More than 60 plots of one-half acre or more were entered. Some plots ran as high as 12 acres. The Churchill plot at Tenino of about one acre had been sown in rows and the weeds kept entirely under control. J. E. Platter of Yelm tied for second place with alfalfa in rows which had been cultivated about a year. Both men received 97.5 points.

The capture of those Los Angeles crooks who stupidly left a valuable clue in a taxicab proves the truth of the phrase "as thick as thieves."—Farm and Fireside.

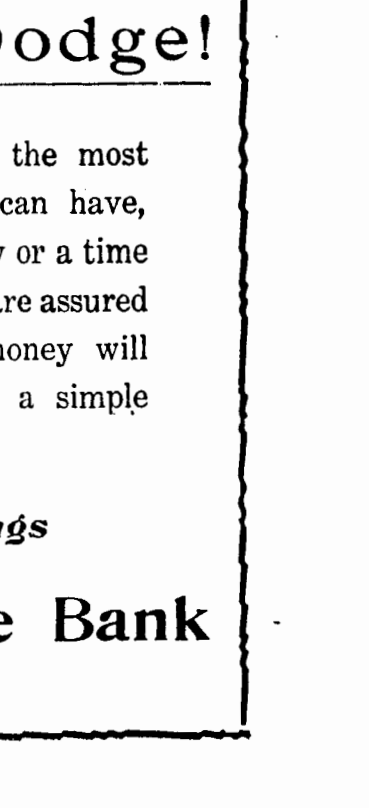

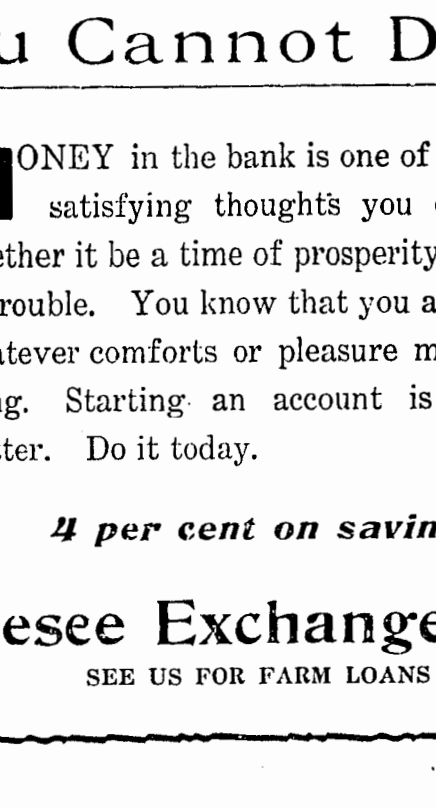

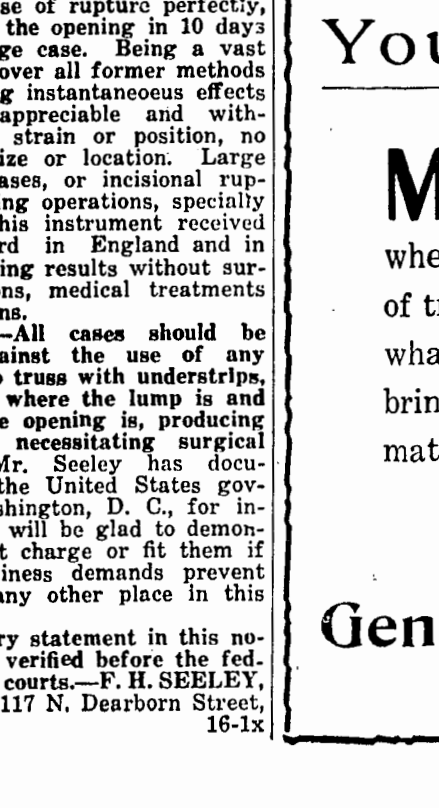

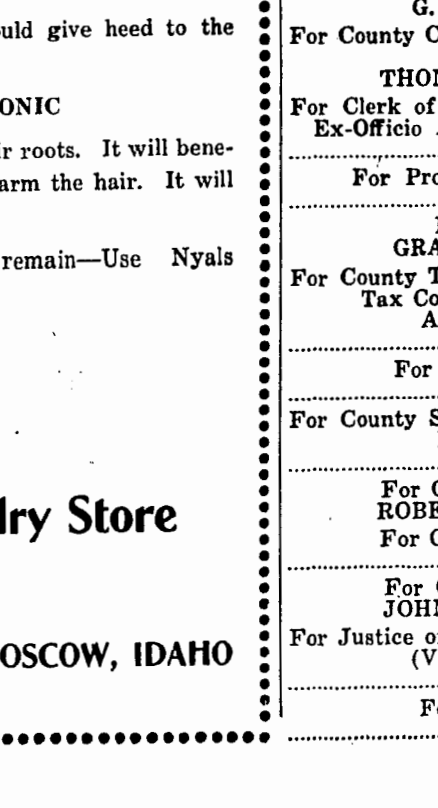

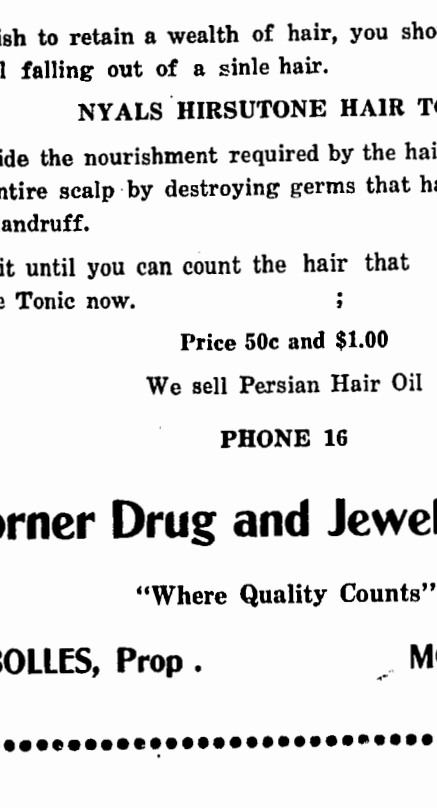

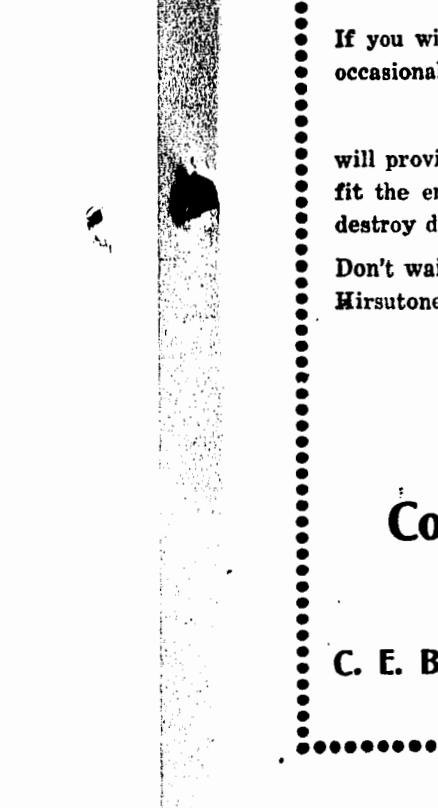

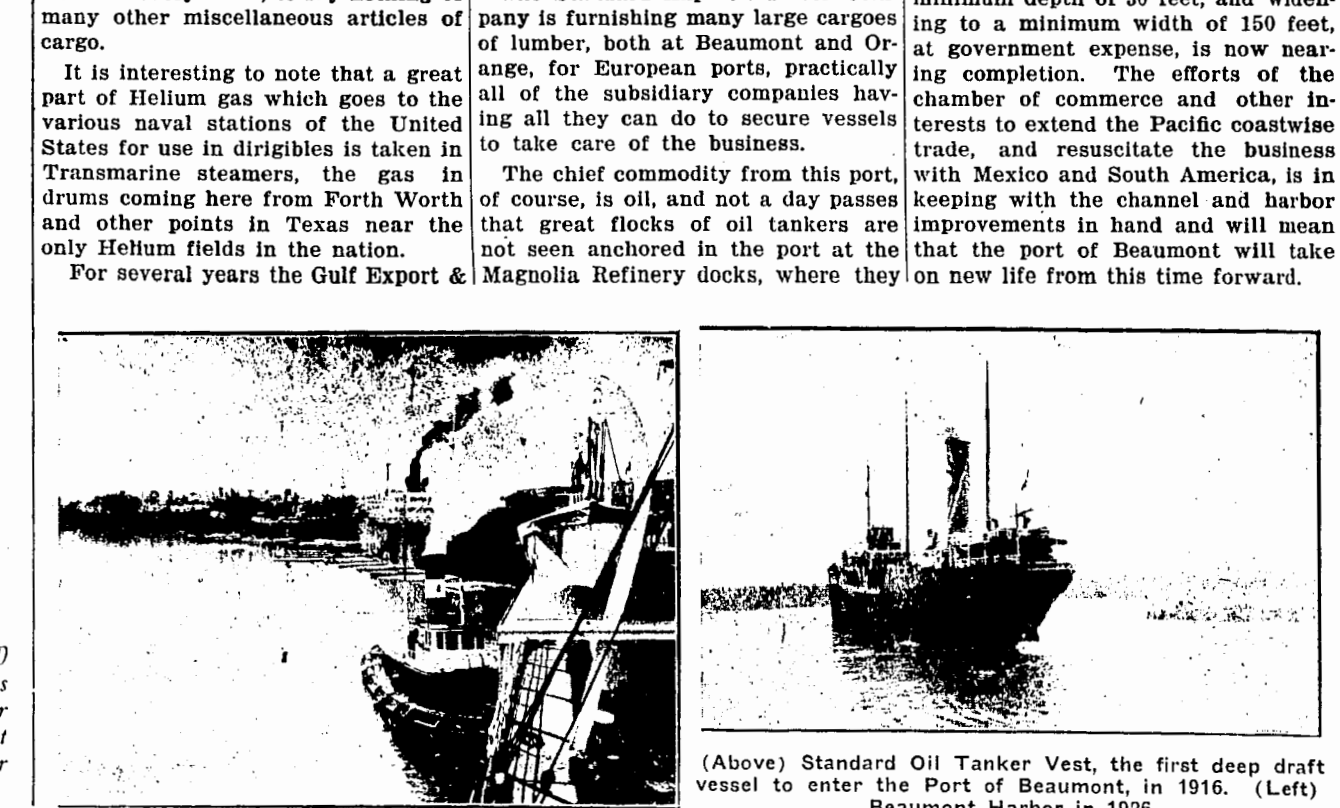

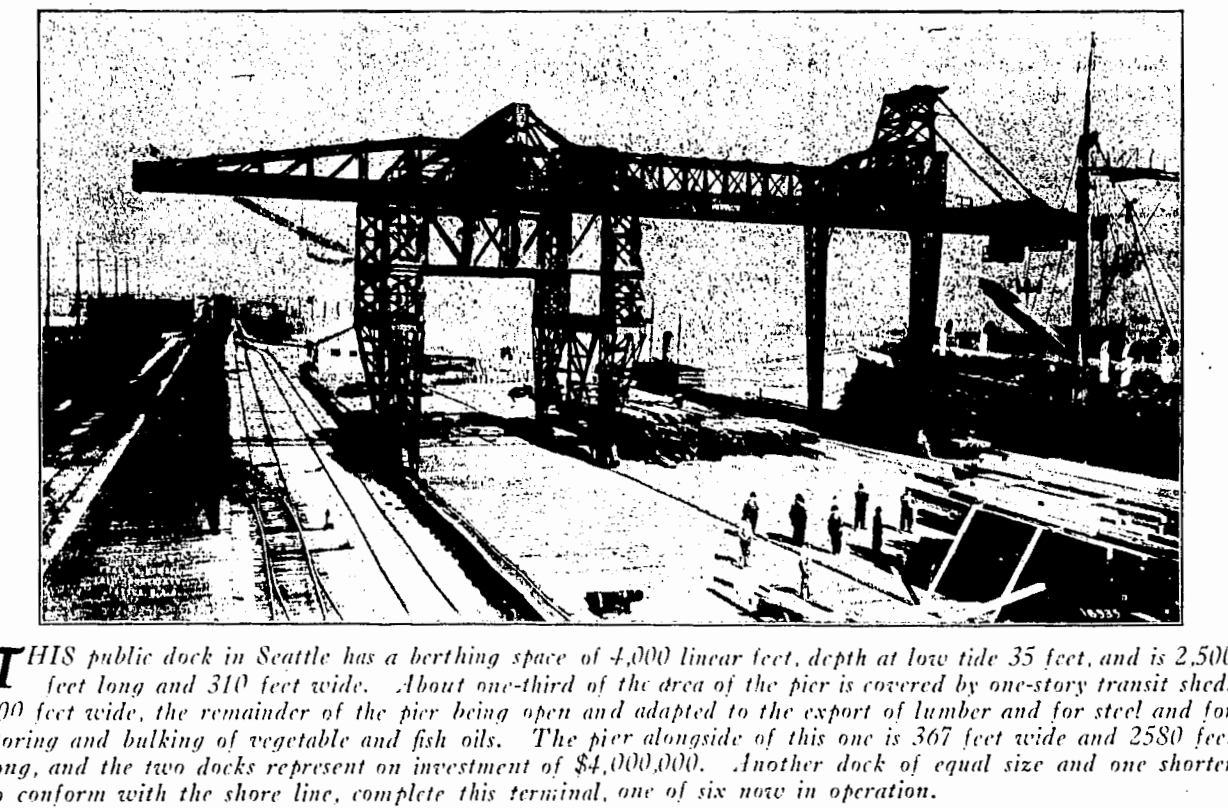

The Baronial estates of Sweden are being divided and sold to farm workers in an attempt to stem the tide of emigration to America. Say it with printer's ink.

By the discovery, or rather the creation of Garnet wheat, the Canadian government announces that a new area 75 to 100 miles wide and extending 900 miles from East to West, and containing 40 millions of acres will be added to Canada's wheat fields. The superior points claimed for the Garnet variety over that of the Marquis, Canada's old reliable hard variety are: 1, it matures from seven to 10 days earlier; 2, it stands dry weather better; 3, it stands excess moisture better; 4, it is more immune from the danger of rust; and 5, it will be the means of extending the wheat line further north opening a new area for settlement.

With this variety accepted for all that is claimed for it, and full opportunity accorded for increasing the acreage, a glutted wheat market, in the future, should be the rule rather than the exception.

Protest against the differential in rates on freight imports from Europe was made last month in a letter from the traffic bureau of the Tacoma Chamber of Commerce to the United States Customs and Border Protection conference with headquarters in Holland. Tacoma is subjected to a differential as compared with Seattle and Portland on shipments under 1000 tons where the rate is less than \$8 per ton. There is no differential against Tacoma exports as that city supplies much cargo for outgoing ships most of them going to Tacoma to pick up cargo, so they claim there is no reason for the discrimination in imports.

When the Nelson Steamship Company steamer Viking left Puget Sound this month she had in tow the famous barkentine Charles F. Crocker. The vessel was disposed of by the Pacific Freighters Company, owners, to West, Elliott & Gordon of San Francisco, an agency directly connected with the motion picture industry. The vessel has been moored in Lake Union for some time. The Charles F. Crocker was built at Alameda, in 1890.

## The Hairs of Your Head Are Numbered

If you wish to retain a wealth of hair, you should give heed to the occasional falling out of a single hair.

NYALS HIRUTONE HAIR TONIC

will provide the nourishment required by the hair roots. It will benefit the entire scalp by destroying germs that harm the hair. It will destroy dandruff.

Don't wait until you can count the hair that remain—Use Nyals Hirsutone Tonic now.

Price 50c and \$1.00

## "Have You Anything Left for Savings?"

After you have paid the usual monthly bills, have you anything left for savings to represent your "profits" from wages or salary? Are you actually setting aside a definite amount each month or are your savings still in the form of good intentions?

We believe no better means of systematic saving is at hand than our liberal partial payment plan, used in subscribing for the new 6% Cumulative Preferred Stock of this company. Make a small initial payment on each share you purchase and then pay \$5 a month per share until the balance is paid. Your payments will earn 6% per annum as they are made while you are purchasing a high grade security. When the stock is fully paid you will share in the earnings of this company. Here's an easy tried-and-proven means of getting ahead.

This offer is made to customers who now hold less than 10 shares of stock in this company.

## The Washington Water Power Co.

The W. W. P. Co., Spokane, Wash.

## RUPTURE EXPERT HERE

F. H. Seely, of Chicago and Philadelphia, the noted expert, will personally be at the Lewis-Clark hotel, and will remain in Lewiston Wednesday, October 20, only. Mr. Seely says: "The spermatic shield will not only retain any case of rupture perfectly, but contracts the opening in 10 days on the average case. Being a vast advance over the old methods, it—exemplifying instantaneous effects—immediately appreciable and without standing any strain or position, no matter the size or location. Large or difficult cases, or incisional ruptures following operations, (specimens solicited). This instrument received the only award in England and in Spain, producing results without surgery, injections, medical treatments or prescriptions.

## A Fact You Cannot Dodge!

MONEY in the bank is one of the most satisfying thoughts you can have, whether it be a time of prosperity or a time of trouble. You know that you are assured whatever comforts or pleasure money will bring. Starting an account is a simple matter. Do it today.

# SAVING MONEY

The old saying, "Money Saved Is Money Earned," is even more true today than when it was first uttered.

And the young man or woman who would like to get ahead in the world, who wants to be financially independent at some time in life, can find no more certain way to accomplish it than to start a Savings Account with this bank—and start it NOW.

The first deposit may be any amount you wish to make it. The big thing is to start. We will be glad to talk this matter over with you at your convenience.

**Making Vegetable Leather**  
In Japan a vegetable leather is made from the inner bark of a plant called the mitsumata.

Was Radio "Bug" Right  
It sounds like a Bananea's wail and it nearly frightened Juanita Abbe out of bed, she told Superior Judge Holzner, at Los Angeles, the other day.

"Waldo," what was that?" Mrs. Abbe inquired of her husband.

"Why, I believe it's Honolulu coming in," was Abbe's reply.

"And, Judge, it was that way night after night," the wife complained. "Sometimes he would fish for distance until dawn. I came near to a nervous breakdown for lack of sleep."

Mrs. Abbe's record of static and other interferences in the harmony of her marital life won her a divorce.

## PUBLIC SCHOOL NOTES

OF MUCH INTEREST

(Continued from first page)

Our sand table will remain the same for this week. Next week it will picture our Halloween story.

Francis Drescher and Harriet Hetchinger were absent one day each on account of illness.

Report cards were given out Wednesday noon. Some were very proud of them. Will parents help us to get them promptly signed and returned? Thank you.

Those receiving the quarter holiday for perfect attendance for six weeks were: First grade—Lucile Curran, Charlotte Foster, Clecy Ann Herman, Reta Loncity, Beuletta Nordby, Floyd Radley, Lucile Rogers, Robert Scholer and Danella Swenson. Second grade—Betty Lou Burr, James Drescher, Elbert Hollingsworth, Barbara Huffman, Cleora Miller, Paul Osmundson, Mary Packer, Margaret Springer and Louise Wishard.

Mr. Mayvyn, Henry Moreschek and Marie Lloyd were visitors this last week.

**Why All The Tariff Confusion?**  
We hear a lot about the tariff being the cause of high prices. But it is simply putting the cart before the horse.

If butter in this country was selling at 20 cents a pound, we would not need a tariff to protect the American farmer from competition, and a high standard of living, which makes it necessary to protect American agriculture and industries from products produced in foreign countries at lower wages and under a lower standard of living.

With American butter selling at 50 and 60 cents a pound, we have a 12-cent-a-pound tariff to give it an even break with lower cost foreign product.

Canada has recently established a countervailing tariff against Australian butter, canned fruit and apricots which were being "dumped" on the Canadian market. If the tariff was considered as a business, rather than a political issue, it could be made as flexible as interest rates, and used for the purpose of stabilizing both foreign and domestic commerce, instead of disrupting them as is too often the case at present.

**PROGRESSIVE TICKET**  
For United States Senator H. HAMMILL  
For Representative in Congress (First Congressional District) W. SCOTT HALL

## MEDICAL EXAMINATION BEFORE MARRIAGE?

For what reason does human beings form a partnership called marriage? If we think clearly we should be able to answer the question, "Should a physical examination be required before entering upon the marriage state?"

Two people deciding to spend the rest of their lives together should realize and know their reasons for doing so and the two chief ones are companionship and procreation.

If you were going to offer yourself as a companion to anybody, would you like to be considered fair to withhold the fact that you are likely to be sick on that trip and therefore a burden? Would you think it fair to have a companion hide from you the fact that latent tuberculosis might break out or that insanity might easily develop if trying to get home suspended during the journey? I am sure you will answer "no" to these questions.

Consider the second reason for marriage—procreation. If you were planning to raise thoroughbred stock, would you not be sure that the inheritance was good and free from disease? If you are incompetent to judge of it yourself, would you not get expert advice? Again, you must answer "yes."

You would surely advise that careful physical examination be made of all those applying for marriage if you realize, as do many doctors, that great suffering could be saved and the general mortality lessened by expert medical advice.

Such examinations should be standardized to cover not only routine examinations, physical and laboratory, but they should include inquiry concerning the family and personal history of each individual, and consideration of his mental stability. These examinations should be for both men and women and the findings open to the couple contemplating union so that they would fully know each other's physical assets and liabilities before marriage.

## Egg Candling Station Sought at Centralia

**CENTRALIA**—At a meeting here recently local members of the Washington Egg & Poultry Association, decided to petition the directors of the organization to establish an egg candling station at the Centralia plant.

The appearance of a pineapple plantation is that of a million of cactus plants marching over plateaus and up hill and down in orderly rows, the lines as straight and beautiful as soldiers ever marched in parade, every soldier plant bearing a tremendous pineapple in its center, regally topped with a crown of pointed leaves. It is its resemblance to a pine cone, together with the tart and juicy nature of the meat that has given the fruit the name of pineapple.

As pineapples are grown in tremendous quantities in the Hawaiian Islands, or the Paradise Islands, as they are popularly called, many of these islands, or the Paradise Islands, are one of the sights and wonders of the place to tourists. In a land where palms wave in the sunlit air, where all health and beauty are favored, the pineapple ranks as the King of Fruits, it is the most luscious of all tropical products, one of the longest to ripen, and most useful to the human race.

**OKANOGAN-CARBIBO TRAIL Association Elects**  
OKANOGAN—L. J. Jones of Okanogan was advanced from vice president to president of the Okanogan-Cariboo Trail Association at the annual meeting at Kamloops recently.

A. J. Vogler of Okanogan was elected secretary, D. B. Johnston of Kamloops was named vice president, S. T. Elliott of Kelowna is the retiring president.

A review of the results accomplished this year showed satisfactory progress. Present figures show that 2,000 head of cattle cleared customs at the boundary that last year.

Plans were announced this month by the Seattle Chamber of Commerce for a trade excursion to the Hawaiian Islands next February. To increase the Northwest's share in the \$85,000,000 annually spent by the Hawaiian Islands on the Pacific Coast is given as the reason behind the business trip which was originally planned a year ago but fell through owing to the inability of the sponsors to secure a representative group of business men from the Northwest. At present Puget Sound exports to the Islands are estimated to be in excess of \$10,000,000 yearly, contrasted with the Hawaiian annual commerce of \$200,000,000. The party will make the trip on the Matson liner Lurline. The estimated total cost per person will be about \$400 for a three week journey.

The I. C. C. this month authorized the Great Northern to procure delivery of \$45,000,000 of general mortgage 4 1/2 per cent bonds to be exchanged for a like amount of 5 per cent bonds now in the road's treasury. At the same time the road was authorized to sell \$15,000,000 of the bonds at not less than 91 1/2, the proceeds to be used for corporate purposes.

Stevedoring at Cristobal and Balboa, Panama, since August 1 has been under the control of the Receiving and Forwarding Agent of the Panama Railroad. The new arrangements are intended to eliminate the unsatisfactory conditions arising from the competitive methods which were declared to be the cause of unequal distribution of labor.

Say, Bill, whenever I go to Spokane I never miss getting some of those dandy meals at the Tray Tavern on Howard Street just north of Riverside Avenue.—Adv.

## PINEAPPLE FROM THE PARADISE ISLANDS

By Capitola Williams Ashworth

WHEN you sit down to breakfast and find a dish containing a golden island of pineapple surrounded by an amber sea of liquid awaiting you, do you find your mind trying to picture the tropical islands in the midst of the beautiful Pacific Ocean where this luscious fruit was grown, and where it last saw the light of day before it was popped into a can? You may have heard that this fruit is a long journey to your table.

The story of pineapple is probably one of the most interesting of any fruit in the world, even of any other tropical fruit.

In the Hawaiian Islands, principally the Islands of Oahu and Lanai, are grown, and, in fact, the tremendous, carefully tended plantations, spread out over the tropics, are one of the sights and wonders of the place to tourists. In a land where palms wave in the sunlit air, where all health and beauty are favored, the pineapple ranks as the King of Fruits, it is the most luscious of all tropical products, one of the longest to ripen, and most useful to the human race.

Its exotic and delicious flavor preserved and enhanced by the addition of sugar and cooked just long enough to make it absolutely safe and sanitary. As a matter of fact, many people, even in the Paradise Islands where the fresh fruit may be had in its glory, prefer the canned because the sugar has sweetened the juices and prevented to the very fiber of the fruit. Also the fact that it is canned in its prime when it has reached a golden perfection of ripeness makes it more palatable than most fresh fruits and melons that can be obtained in the market.

There are many other fruits grown in these delightful islands, about which most people know little or nothing. There is the papaya, a melon which grows on trees, and is served at breakfast, or for salads, and breadfruit which is baked and served as a starchy vegetable, mangoes, guavas, banana, and rose apples. And, of course, there are coconuts. Yet the favorite of the islands is the pineapple, which is shipped in cans to every corner of the world, the greatest amount coming to the United States where it is served on the American table as a salad, a dessert, a pie, or with nuts and cream. It is becoming increasingly popular in fruit punch to which it lends a delicious tang and a tropical flavor which can be obtained in no other way.

**IDAHO UNIVERSITY DRAWS STUDENTS FROM EVERY COUNTY IN GEM STATE**  
UNIVERSITY OF IDAHO, Moscow.—The University of Idaho is drawing its new students almost equally from every part of the state, according to a county survey of new students conducted in the office of President A. H. Upham.

The apportionment by counties follows: Bear Lake, 3; Franklin, 4; Oneida, 8; Cassia, 9; Twin Falls, 38; Owyhee, 2; Canyon, 18; Ada, 63; Elmore, 6; Gooding, 14; Jerome, 5; Lincoln, 2; Minidoka, 13; Power, 3; Blaine, 2; Bingham, 22; Blaine, 7; Payette, 15; Gem, 5; Custer, 4; Butte, 11; Jefferson, 2; Bonneville, 14; Fremont, 11; Clark, 4; Lemhi, 1; Valley, 5; Washington, 9; Adams, 2; Idaho, 10; Lewis, 9; Nez Perce, 30; Clearwater, 5; Latah, 119; Shoshone, 41; Benewah, 11; Kootenai, 38; Bonner, 22; Boundary, 5.

**New Figures on Meat**  
A revised mimeographed circular containing the statistics of meat production and consumption covering the years 1907 to 1925, inclusive, has just been issued by the United States Department of Agriculture. Seven tables with supplementary comments show the number of animals slaughtered in the United States for each year, and also the production of the various kinds of meat by classes. The report makes possible comparisons of the calendar year 1925 with preceding years. A table showing per capita consumption of dressed meats and poultry in the United States on imports and exports, supplements and production tables.

Noteworthy recent developments in the meat situation have been an increase in the beef supply and a decrease in pork production. Since 1921 beef supplies have risen steadily each year. In 1925 the total production of 1,145,000 head was almost exactly 1,000,000 pounds larger than the total for 1921.

The enormous pork production in 1923 and in 1924 fell off more than 1,000,000,000 pounds in 1925, which means that upward of 10,000,000 fewer hogs were slaughtered in that year than in either 1922 or 1924. Government present size of the farming and meat-packing industries of the United States may be judged from the fact that the number slaughtered in 1925 fell exceeded any year in history except zinc.

## "Picture Frames" Author Pictured In a New Frame

THOSE who have known Thyrza Sanner Winslow only through her book "Picture Frames" and her other writings may be interested to learn that her delightful Sunday afternoon "at home" in New Gardens, New York, are a frame which sets off still another picture of the writer. Here she draws about her a variety of interesting personalities, and it is evident that to all of them her hospitality is still more gracious because the delectable dishes she serves have been prepared by her own hands.

Her "Chicken Cream," which she served recently, was an epicurean "best seller," and we asked for her recipe:

1 1/2 tablespoonfuls Gelatine  
3/4 cup cold Chicken Stock, highly seasoned  
1 cup cooked Chicken, cut in dice  
1 cup heavy Cream  
Salt and Pepper  
Soak gelatine in cold stock, dissolve in hot stock and thicken. When mixture begins to thicken, beat, using an egg beater, until frothy; then add cream, beaten until stiff, and chicken dice. Season with salt and pepper. Turn into one-half pound baking powder tin, first dipped in cold water, and chill. Chicken served in this way, is more desirable than when it is served without the addition of gelatine.

## Grangeville Girls Win Trip to Portland Fair

UNIVERSITY OF IDAHO, Moscow.—The Grangeville 4-H canning demonstration team, composed of Estaline Geary and Fern E. Spencer, won the Montgomery Ward prize, a trip to the Pacific International Livestock Exposition, at the recent Lewis County Fair. Announcement of winners was made here by W. L. Stephens, district extension agent for North Idaho.

The Plummer baking team, composed of Juanita and Virginia Herford, won second place in the competition and a \$50 prize offered by Lewis County. The money is intended to help defray expenses to Portland.

Third and fourth place winners, who will serve as alternates, were Nesperce club members, the baking team being the first and the sewing team the second alternate.

The Grangeville team was highly praised by Miss Katherine Jensen of the University of Idaho home economics department, who was an official at the fair. "Miss Geary and Miss Spencer," she said, "were very much at ease, and they made everyone present realize the value which may be secured from four years of intensive club work."

The girls will be chaperoned to Portland by Miss Verna Johanssen, district home demonstration agent for North Idaho. They will present at the international the same demonstrations they gave a Nesperce.

There are more telephones in Virginia than in the whole of Africa.

**CHURCH NOTICES**

**Congregational Church**  
Rev. Paul W. Sprague, Minister.  
Mrs. W. M. Herman, Pianist.  
W. E. English, Choir Director.  
Sunday school at 9:45 a. m.  
Regular preaching service at 11 o'clock.  
Of especial interest to Genesee should be the fellowship meeting which will be held at the Congregational church here Thursday, October 28.  
The churches which are expected to send delegates to the meeting are:

**St. John's Lutheran Church**  
A. F. Wolff, Pastor  
Sunday school at 9:30 a. m.  
English services will be held each Sunday morning at 10:30 o'clock, with the exception of the first Sunday of each month, when German services will be held at the usual hour.

**Christian Church**  
N. E. Beach, Pastor  
Bible school at 9:45.  
Morning service at 11 o'clock. Subject, "The Praying Church."  
Evening service at 7:30. Subject, "Why and How Restore the New Testament Church."  
Inland Empire Christian Missionary society workers, Chas. Adleman, H. A. Vanwinkle and C. N. Balch, will visit Genesee Tuesday evening, October 26. One session, beginning with a fellowship dinner at 6:30 p. m., will be held in the basement of the Christian church.  
All members and friends of the church are requested to be present.

**Genesee Valley Lutheran Church**  
Gertrude A. Peterson, Pastor.  
Saturday, October 23, 2 p. m. Confirmation instruction.  
Sunday, October 24, 8 p. m. Young People's Luther league.  
All are invited.

**Will Give Dance**  
The American Legion will give another of their dances in their hall on Friday evening, October 29. Allen's Singing Dance band will furnish the music. You are cordially invited to be present and to bring your friends.

**Altar Society Entertained**  
The Altar society spent a very pleasant afternoon last Tuesday at the country home of Mrs. Arthur Linehan. The time was spent socially and in planning for their bazaar. Rev. Father L. C. Godschaux was present and gave a very interesting talk on his trip to Holland.  
A delicious luncheon was served at 4:30. The next meeting will be with Mrs. Theo. Schlueter.

**Ladies Aid Bazaar**  
The Congregational Ladies' Aid will hold their annual bazaar, dinner and supper, on Election Day, November 2, at the Legion hall. In the bazaar there will be a fancy work booth, candy booth, country store and other attractive features. The public is welcome.

**St. John's Lutheran Church**  
A. F. Wolff, Pastor

Witches, black cats and ghosts at Rebekah masquerade party. K. P. hall Wednesday night, October 27. 17-1 will be a hum-dinger.

It may be on page two this week--look for it.

The Charter Oak Automatic Damper and Heat Equalizer is not an experiment but an assured success. We have had a great many nice things said about it and below repeat what three users have to say:

The Heat Regulator is the best thing out; it works O. K.

The Heat Control in the back is a wizard and most certainly saves coal as well as saving the stove itself.

The Heat Control Attachment on the back of the stove opens itself when real hot and checks it wonderfully.

**Hasfurther Hardware**

Only Three More Days  
**Sealy Week**  
Sale of Sealy Mattresses

Regular Price \$50.00  
**39.50**  
You Save \$10.50

the senate, but as chairman of an informal committee of agricultural senators, he arranged for a series of lunches at which two-thirds of the senators were present, and at which the farm legislation was thoroughly presented by representatives of the farm organizations. These meetings did a great deal to place the farm problem squarely before the senate, and they probably would never have been held had it not been for the work of Senator Gooding.

We sincerely trust you will realize that our motive in writing you is not political, but is solely to show a slight measure of appreciation of the efforts for the farmers of those of your congressional delegation who stood the test for agriculture and were not afraid to differ with their nominal party leaders in that stand.

Yours very truly,  
North Central States Agricultural Conference.  
GEO. N. PECK, Chairman.

Two Cars Hogs Shipped

Two double-decked cars of hogs went out of Genesee Tuesday, shipped to the Spokane market by the Genesee Union Warehouse company.

Chicago Style

A story is being told of a certain farmer whose sister came from Chicago to visit him. One day the three were alone and the guest insisted on doing the work alone and sent her sister away to rest. When twenty-seven threshers filed in to supper that night they found a sandwich tied with a ribbon, one chicken croquet, one cheese ball about the size of a marble and a buttonhole bouquet at each plate.

AGRICULTURAL CONFERENCE COMMENDS GOODING

The members of the "Executive Committee of 22" of the North Central states agricultural conference, made up of representatives of eleven states, held in Des Moines, Iowa, for the purpose of putting agriculture on a business basis with other business enterprises, felt so kindly towards the efforts of United States Senator Frank R. Gooding of Idaho for his vote and support of the farm relief bill which was acted upon at the conference in question, that several thousand copies of the following letter were sent to producers of Idaho commending Senator Gooding on his action in this matter and his devotion to agriculture and its interests, and stressing the necessity for the return of Senator Gooding to the United States Senate in order that he might continue to carry on his fight for the people of Idaho and the interests of agriculture generally.

REGISTER OR YOU CAN NOT VOTE—REGISTRATION CLOSURE, OCTOBER 23.

JOHN McMURRAY,

CHAIRMAN REPUBLICAN STATE CENTRAL COMMITTEE

As chairman of the "Committee of 22" of the North Central States Agricultural Conference, formed to cooperate with the farm organizations of the United States in their fight to secure equality for agriculture with other groups and industries, I was in position to observe the work of your senators and representatives in the Washington very closely. Both Congressmen French and Smith supported the Haugen bill in the House to make the tariff effective for the farmer; while in the Senate, Senator Gooding was the only farmer through-out the United States to give them their loyal support without respect to party, for in these premises the hour has arrived when we must place the well-being of agriculture above the petty lines of party division.

# SAVING MONEY

The old saying, "Money Saved Is Money Earned," is even more true today than when it was first uttered.

And the young man or woman who would like to get ahead in the world, who wants to be financially independent at some time in life, can find no more certain way to accomplish it than to start a Savings Account with this bank—and start it NOW.

The first deposit may be any amount you wish to make it. The big thing is to start. We will be glad to talk this matter over with you at your convenience.

4% interest paid on savings accounts

### W. W. P. News

Preliminary work has been started on the construction of the dam for the Chelan project of the Washington Water Power company, according to announcement of W. H. Griesser, chief engineer for the company. The dam is to be located across the river a short distance below Lake Chelan. During the last few weeks the dam has been built in the river bed, and the driving sheet piling for the dam work on one side of the river so that work on the dam can commence. The pile driving work has just been completed.

The dam will be approximately 900 feet long and 30 feet high. Water for the power station will be carried from the dam through tunnels approximately two miles long, making a drop of nearly 400 feet to the turbines. Work is progressing rapidly on the other phases of the big project. Crews are drilling in the tunnel and the foundations for the surge tank and power house are being excavated.

## Only While the Supply Lasts MAJESTIC ELECTRIC AIR HEATER

55 cents Down, Remainder, \$1 a Month --- \$5.55

WE bought all the wholesaler had in stock—but at this low price they will sell out quickly. Majestic Electric Air Heater, just as pictured, with 14-inch golden faced copper reflector and long connection cord. Every home should have one; useful the year around.

Only while the supply lasts, Majestic Electric Air Heater at the bargain price of \$5.55. Special terms —55 cents and \$1.00 a month for five months with your light bills.

## The Washington Water Power Co.

YOUR ELECTRIC SERVICE COMPANY

What Killed Washington

At last a long-waiting public is to be given the true cause of the death of George Washington, according to information just given out by a learned physician who says he has studied the case for a year.

The learned doctor says that history has been in error as to the true cause and he is at last going to diagnose his case and he will probably issue a "bulletin" as to the true cause of death.

"I have found that the throat affection from which Washington died was not the same as stated in history," declared Dr. Wells. For a year he has been making a study of Washington's last illness and will reveal his findings in a paper to the Virginia Medical society.

Dimensions of U. S. Capitol  
The length of the capitol at Washington, D. C., is 751 feet and its width is 350 feet.

## Skagit County Herd Wins Northwest Honors

Skagit County Holstein breeders showed their sporting spirit by organizing a county Holstein herd and taking it over the entire fair circuit, starting at Burlington the middle of August and ending at the Oregon State Fair at Salem the last week of September. En route they met all comers, winning many "Blues" and at the Western Washington State Fair at Portland both Grand Champions by Judge Geo. A. Geo, placing these honors on Sir Skagit Chimacum Cascade, a junior bull calf, and the two-year-old heifer, Skagit Luna Homestead. These two champions have been assigned to the "True-Type" Holstein sale to be held at Portland on November 5th, during the Pacific International Livestock Show.

## NOAH'S ARK RIVALLED IN RETURN OF SMITHSONIAN-CHRYSLER EXPEDITION

Hundreds of Animals and Birds Bound for National Zoo in Washington

EVEN Noah's ark "of gopher wood," with a collection which included "every living thing of all flesh, kind after their kind, cattle after their kind, every creeping thing of the earth after their kind, is rivalled in the return of the Smithsonian-Chrysler Expedition, which is now on New York with 200 cages of live, wild animals and birds, hundreds of specimens in all.

The expedition went from Dar-es-Salaam, Ceylon, where the animals and birds, all intended for the National Zoological Park, in Washington, were transferred from one ship to another bound for New York direct.

Noah's famous ship was at sea forty days and forty nights. Dr. William M. Mann, director of the National Zoo and head of the Smithsonian-Chrysler Expedition, will do well if he gets his party home in 50 days. And his big problem is to keep the animals well.

The collection which Dr. Mann has acquired, includes a lion, a tiger, a giraffe, three vicious leopards, the bushbuck, hartebeest,eland and many monkeys. When this company passes in sight of Mt. Ararat, as it will, the parallel to the days of the flood will be close indeed.

Delegates representing more than 10,000 members in western Washington districts heard W. C. Ruggitz, 41 president, Portland, tell of the success of the wood box promotion campaign conducted by that organization.

Ruggitz said that the organization had grown during the past six months, and was in sound financial condition.

He reported that several thousand dollars in claims have been paid through group disability insurance.

A resolution promoting vocational training for disabled workmen in Washington was introduced and passed by the board members present, and ordered to be presented to the board of directors at their meeting to be held in Portland Nov. 15-16.

What else can one do when affliction comes? Sit down and despair? Will one be happier being miserable? No. Take heart. Look up. Face the situation with courage and confidence. Adjust your life work to your abilities and use your affliction to further your interests. Lord Nelson used his blind eye to look at the things he didn't want to see.

The biological survey of the United States Department of Agriculture, under whose jurisdiction the new refuge is placed, has found these rocky islets especially desirable as breeding grounds and safe retreats for wild fowl. From early in winter until the northward migration of fowl in the spring the islands have been for years the favorite day-time resting places for hundreds of wild ducks, especially mallards, and wild geese, as well as for gulls, blue herons, and other species in smaller numbers.

The new reservation is not easily accessible to man and already affords waterfowl fairly safe refuge from the fact that the Washington state game law already protects all waterfowl on the Columbia River.

Outdoor Photography Contest  
Prizes to the sum of \$75 are offered by American Game, the publication of the Game Protective Association, for photographs of the out of doors, especially of wild game, animals or birds, and fishing and hunting scenes. The competition is open to all and pictures may be taken anywhere in North America. Pictures must not have been heretofore published, but may have been taken any time.

A committee of nationally known amateur wild life photographers will judge the contest, which will close December 1, 1926, and full particulars of which are published in American Game for October, or may be had by addressing 2273 Woolworth Bldg., New York City.

"Why is it?" asks a university dean, "that the worst students are usually the best-dressed?" That's easy: the boys figure that sartorial smartness makes up for classroom dumbness.—Furn and Fireside.

The Pleasant Prairie Club held an achievement day, when the Bone and Green Bluffs home demonstration clubs were guests. An exhibit was made of work done during the year. A talk was given on care and nutrition of small children.

## For Better Health

PUBLIC HEALTH IS PUBLIC WEALTH  
COMPILED BY THE PUBLIC HEALTH LEAGUE OF WASHINGTON

CAPITALIZING YOUR AFFLICTION  
If you have an incurable condition, don't despair, but adjust your life to your limitations and carry on. Much of the world's best work has been done by people suffering from some bodily affliction. The poet Homer was blind, yet wrote his Iliad and Odyssey for the honor of having been his birthplace. One of the largest employers of labor says he prefers to employ persons for certain jobs who have suffered from some bodily ailment and have learned to control the stock by control of bodily habits etc. Even old age has its compensations. Many large business establishments prefer to have as their secretaries old maiden ladies. These ladies have ceased to be influenced by life's frivolities and have settled down into serious attention to the business at hand. They can be trusted and will stick to their job, no longer deluged by the hope of wedded bliss.

We learned the lesson of readjustment to changed conditions from the late war. Many of the returning soldiers were maimed and were no longer able to engage in their former occupations. Yet under the wise policy of rehabilitation these same soldiers, many of them, were taught new ways of carrying on. Many of them, in fact, have found the new occupations more pleasant and more lucrative than were their former occupations.

What else can one do when affliction comes? Sit down and despair? Will one be happier being miserable? No. Take heart. Look up. Face the situation with courage and confidence. Adjust your life work to your abilities and use your affliction to further your interests. Lord Nelson used his blind eye to look at the things he didn't want to see.

## IDAHO CROP REPORT FOR OCTOBER, 1926

A condition of 80 per cent of normal on October 1 indicates an average yield of 175 bushels on 16,000 acres of potatoes, a crop of 16,016,000 bushels. Last year, 67,000 acres averaged 196 bushels, for a production of 14,311,000 bushels.

The crop matured fully two weeks earlier than last year, otherwise the freeze would have caused serious loss. However, some end freezing of tubers is showing up as harvesting progresses.

The United States crop has reached October 1 with a prospect of 351 million bushels. This is only 25 million bushels more than the short crop of 1925, but 45 million bushels less than the past five-year average. The September freeze in western states coupled with some wet water in the east, reduced the nation's crop about a million bushels from the September 1 prospects.

State	Production in Thousands of Bushels	
	1925	1926
Maine	35,646	34,790
New York	31,947	28,994
New Jersey	9,042	9,868
Pennsylvania	22,580	25,461
Ohio	9,851	11,978
Michigan	27,888	24,411
Wisconsin	27,295	23,622
Minnesota	26,773	27,772
North Dakota	7,055	7,280
Nebraska	6,300	8,652
Virginia	11,340	15,299
IDAHO	16,016	14,381
Colorado	11,563	14,190
Washington	9,192	8,120
California	6,214	6,510
U. S. TOTAL	350,821	325,902

Spring Wheat Averages Twenty-four Bushels Per Acre.  
Idaho's Spring wheat is averaging 24 bushels per acre, for a 13,728,000 bushel crop. Adding 10,962,000 bushels of winter wheat already harvested, the state's wheat crop totals 24,690,000 bushels. The 1925 crop was 26,042,000 bushels.

The U. S. total wheat crop is estimated at 839 million bushels. Last year it was 666 million and the past 5-year average is 802 million bushels. As noted elsewhere in this report, the Canadian wheat crop has suffered reverses.

Oats and Barley Reduced.  
Oats yielded 40 bushels per acre, for 5,440,000 bushels. Last year it was 49 bushels for a 5,260,000 bushel crop. Barley averaged 37 bushels per acre, producing a crop of 4,144,000 bushels, against a 44-bushel acre yield and 4,646,000 bushels in 1925.

Beans Less Than 1925.  
With about half of the bean crop threshed, an average yield of 20 bushels on 66,000 acres was in prospect. The Idaho crop is 1,320,000 bushels against 1,548,000 in 1925.

The U. S. prospect was 16,970,000 bushels October 1, against 17,253,000 September 1. The 1925 crop was 19,634,000, and the past 5-year average, 14,552,000 bushels.

State	Production in Thousands of Bushels	
	1925	1926
New York	12.0	10.8
Michigan	10.0	13.5
Montana	8.5	12.5
IDAHO	20.0	22.0
Colorado	7.5	1.87
New Mexico	4.3	3.5
California	16.2	17.0

## New Bird Refuge in Columbia River

A new Federal bird reservation, to be known as the Columbia River bird refuge, has been created by President Coolidge on two small islands in the Columbia River, at the mouth of the Walla Walla River, Washington, comprising together about eight and a quarter acres of land.

The biological survey of the United States Department of Agriculture, under whose jurisdiction the new refuge is placed, has found these rocky islets especially desirable as breeding grounds and safe retreats for wild fowl. From early in winter until the northward migration of fowl in the spring the islands have been for years the favorite day-time resting places for hundreds of wild ducks, especially mallards, and wild geese, as well as for gulls, blue herons, and other species in smaller numbers.

The new reservation is not easily accessible to man and already affords waterfowl fairly safe refuge from the fact that the Washington state game law already protects all waterfowl on the Columbia River.

Outdoor Photography Contest  
Prizes to the sum of \$75 are offered by American Game, the publication of the Game Protective Association, for photographs of the out of doors, especially of wild game, animals or birds, and fishing and hunting scenes. The competition is open to all and pictures may be taken anywhere in North America. Pictures must not have been heretofore published, but may have been taken any time.

A committee of nationally known amateur wild life photographers will judge the contest, which will close December 1, 1926, and full particulars of which are published in American Game for October, or may be had by addressing 2273 Woolworth Bldg., New York City.

**A Pleasant Surprise**  
On the evening of Saturday, October 23, a number of the little friends of Grady Rogers gathered to give her a birthday surprise, it being her sixth anniversary.  
After games, a bonfire and a social time, refreshments were served amid jack o'lanterns, witches, etc. All joined in wishing the little hostess many happy returns of the day.

**Parents of Son**  
Mr. and Mrs. Barthol Weber are the parents of a baby son, who arrived at their home Tuesday, October 26. Mother and babe are reported as doing nicely.

**New Hats**

I wish to announce that I have a fine new line of hats, in the latest of modes. I am sure that I can please you.

The new stamped goods are now on display also, with the new threads to work them.

My dressmaking parlor is open and I will do sewing of all kinds.

The Beauty Parlor will be open as usual, on Thursday, Friday and Saturday of each week.

MAUD A. SLIGHTOM  
Advertisers appreciate your trade.

**Will Observe Armistice Day**  
After much discussion at our last regular meeting, the following program for Armistice Day was evolved:  
At 6:30 p. m. the Legion will have a big free dinner for all ex-service men and their immediate families, the place for holding the dinner to be announced later. Every one of you come, as we are planning on all of you being there—and we don't want to be disappointed.

The Legion's free show will be at the Genesee Hotel theater, and is free to everyone. A feature film, appropriate for the day, will be shown, the name of which will be announced later; also a good comedy will be shown. Two shows will be given, the first one starting at 6:30 p. m.

Last, but not least, will be the old-time dance at the Legion hall, for which a small charge will be made. Remember the feeling you had November 11, 1918? Get a bit of it again and help us to celebrate. We want everyone to come out and have a good time.

Bielenberg-Schooler Post No. 68.

**Violets in Bloom**  
Frank Harris, who happened to "hoof" it in from the farm Tuesday afternoon, was exhibiting several violets that he said he picked along the road near the Flomer farm, west of town, and that there are plenty of them blooming there.

Frank has made several trips to California within the past few years, but he says that is now unnecessary for climatic conditions seem to be about the proper thing right here in "God's country."

**Allen's Music for Legion Dance**  
Don't forget the dance in the Legion hall tonight (Friday). Allen's singing band will furnish the music—and you know what that means.

**K. P. Social Evening**  
The Knights of Pythias will give a supper and social evening for members and their families, on Friday evening, November 5. You can dance, play cards, bowl, or eat most of the time if you want to. All members are asked to please be present.

Don't miss page two this week.

**ATTENTION!**  
Drs. Bradbury & Burgess wish to announce that due to business conditions in their Moscow office, it will probably be some time before Dr. Bradbury will be in a position to make a professional visit to your city again. Former patrons and others requiring optical attention will please call at our Moscow office, where we shall give you the same satisfactory service that has made for our continued success.

**CHURCH NOTICES**  
Congregational Church  
Rev. Paul W. Sprague, Minister.  
Mrs. W. M. Herman, Pianist.  
W. E. English, Choir Director.  
Sunday school at 9:45 a. m.  
Regular preaching service at 11 o'clock.

**St. John's Lutheran Church**  
A. F. Wolff, Pastor  
Sunday school at 9:30 a. m.  
English services will be held each Sunday morning at 10:30 o'clock, with the exception of the first Sunday of each month, when German services will be held at the usual hour.

**Christian Church**  
N. E. Beach, Pastor  
Bible school at 9:45 a. m. Be on time. The "Hill Top" race is interesting.  
Morning service at 11 o'clock. Subject, "The Reason of Our Hope."  
Evening service at 7:30. Sermon topic, "Reasoning With Jehovah."  
The missionary society will not meet on the regular date but will be guests of the Lewiston society Friday, November 5.

The fellowship banquet and conference were well attended. The program given was a vocal duet by Misses Alfrida and Genevieve Hampton and three addresses on the difficult phases of the Inland Empire work by Chas. Adleman of Clarkston, C. N. Beach of Lewiston and the pastor of the local church.

**Genesee Valley Lutheran Church**  
Gerh. A. Peterson, Pastor.  
Reformation Sunday, October 31, at 9:45 a. m. Sunday school and Bible classes.  
At 10 a. m. Nurse services.  
At 11 a. m. Confirmation services.  
A cordial welcome to all to attend these services.  
The Inner Mission society will hold a meeting in Seldu church, November 4 to 7.  
The fall circuit meeting will be held in Our Saviour's church, Moscow, November 8 to 11. Theme, Luke 13:23-30.

**K. P. Social Evening**  
The Knights of Pythias will give a supper and social evening for members and their families, on Friday evening, November 5. You can dance, play cards, bowl, or eat most of the time if you want to. All members are asked to please be present.

**Visited Coast**  
Mrs. John Kambitsch and daughter, Miss Sophia, returned last week from a ten-days visit on the coast, during which time they visited their son and brother, John Kambitsch, at Seattle, and the Gunther, Steltz and Kimbel families at Puyallup, Wash., all of whom they reported as enjoying good health. Miss Sophia is employed as stenographer for the Potlatch Lumber company at Elk River and was taking her annual vacation. She spent a week here with her parents, Mr. and Mrs. John Kambitsch.

**Will Give Old-Time Dance**  
Everybody is invited to the old-time dance to be given by the American Legion in their hall on Thursday evening, November 11 (Armistice Day). If you don't have a good time it will be your own fault. Admission 50 cents.

**Senator Gooding--**

does not claim support because, like John F. Nugent, he has--

Avoided criticism by doing and being nothing,  
Worked with a party which created big deficits,  
Opposed legislation that would bolster up farm prices,  
Permitted a flow of immigration deadly to industry,  
Permitted gambling with farm products,  
Served as a Democrat in the period of wasteful spending and misrule.

**SENATOR GOODING DOES NOT ASK VOTES LIKE H. F. SAMUELS**

Samuels is fighting the tariff on farm-produced food and raw materials and manufactured articles made from them.

Samuels is dodging national issues by limiting his speeches to state affairs.

Samuel's record is one of shirking duty...

Samuel's petty quibbling has no place in the United States Senate.

**THE BUDGET, EMERGENCY TARIFF RELIEF, IMMIGRATION RESTRICTION, A BILLION DOLLAR "WAR FINANCE" FUND FOR LOANS TO FARMERS AND STOCKMEN, \$25,000,000 FOR ADDITIONAL FARM LOAN FUNDS, IT MADE FARM LOAN BONDS MORE MARKETABLE, RESTRICTED GRAIN GAMBLING, CURBED CORRUPT PRACTICES OF PACKERS, REDUCED FEDERAL TAXES OVER A BILLION A YEAR, PROVIDED \$75,000,000 FOR EXPENDITURE ON PUBLIC HIGHWAYS, ESTABLISHED INTERMEDIATE CREDIT BANKS FOR FARM LOANS, LIBERALIZED WAR RISK INSURANCE PROCEDURE, PROHIBITED SHIPMENTS OF FILLED MILK, PROTECTED BUTTER SALES WITH HIGH STANDARD REGULATIONS, FOUGHT VALIANTLY FOR FREIGHT RATE REDUCTION, PROVIDED FOR RECLAMATION PROJECT FARMERS THE FACT FINDERS BILL GIVING HONEST RELIEF, BROUGHT NEW DEVELOPMENT AND PROSPERITY TO IDAHO.**

**SENATOR GOODING personally headed the tariff fight. He introduced and succeeded in passing the pure seed bill. He won place on the senate steering committee. He is on the interstate commerce committee, and in line for the chairmanship of this committee, the agriculture committee or the irrigation committee. With Addison T. Smith he brought the Fact Finders' bill before Congress. His fight for relief from freight rate discrimination forced the hand of the interstate commerce commission. He has won the indorsement of such organizations as the committee of 22 of the agricultural states.**

**IN AGRICULTURAL, TARIFF AND RECLAMATION FIGHTS HE HAS BEEN A LEADER AND**

**Always Fighting for Idaho**

He has been close to farming, farm financing and farm equipping all his life and knows the problems of Idaho's basic industries. A vote for Baldridge is a vote for continuing the march toward prosperity.

Entertained at Dinner

Mr. and Mrs. Martin Liberg and baby daughter, Norma Jean, Mr. and Mrs. Edgar Evans and little son, Sanford, Mr. and Mrs. Henry Halverson, Mr. and Mrs. Leo Miller and daughter Pearl, and John Liberg were dinner guests at the Ed. H. Erickson home Sunday.

Had Grown Older

Employer.—Aren't you the boy who applied for this position two weeks ago? Boy.—Yes, sir. Employer.—And didn't I say I wanted an older boy? Boy.—Yes, sir; that's why I'm here now.—Passing Show.

SOAP

Colgate & Co. are soap makers. They began making soap 106 years ago, and are still making it.

I have a line of their face and bath soap. Bath soap, large bar, 10c; face soap, 3 bars for 25c.

It is of no use for me to try to tell you how good Colgate's goods are, for you know.

See my window. Spangle's dancing flakes—in any quantity—at the regular price.

Wet weather leather shopping bags, regular price \$1.50, now \$1.00, only six left.

I just received a 6-tube one-dial control Federal & Marconi radio. I am trying it out to see if I can find the advantage of a 6-tube set over the Stewart-Warner 5-tube set, which costs far less to operate.

GRANT CLARK

Copper carbonate in any quantity.

Geo. J. Fuchs, Prop.

Uniontown, Wash.

Election Issues

NOTE THE REPUBLICAN TICKET AND KEEP TAXES DOWN

The Republican party has reduced state taxes. This year Latah county will pay a total state tax of just a trifle over one-half of what the county paid in 1919, the year the Republican party paid the indebtedness created by the previous democratic administration. Get out your tax receipts for 1919 and then phone your county auditor for your 1926 state tax and prove to yourself the 50% reduction in state taxes.

The State University Idaho has a population of about half a million people. She has built up a university which ranks with the best in the United States. Can the tax payers afford another four-year college in Idaho? Scott Hall, who is a candidate for governor of Idaho on the progressive ticket, has made the most persistent effort for the past eight years to establish a four-year college course at Pocatello at the expense of the tax payers. Can we afford to double the cost of higher education in Idaho? During the same time Mr. Hall has made a most determined fight to abolish the State Board of Education, and to create several boards in place of one. Can this be done without increasing the cost of administration?

Mr. Hall lives in southeastern Idaho and is supported by the bootleggers for the four-year college course at Pocatello. In many papers in southeastern Idaho Mr. Hall is carrying a paid advertisement appealing for votes for the reason that he is in favor of a four-year course at Pocatello.

It is hard to estimate what Hall's program will cost Idaho tax payers, but it is reasonably safe to say that in a few years the added yearly cost will amount to \$250,000.00, which will have to be raised by taxation. Would the tax payers at this time authorize a state bonded indebtedness of over forty million dollars? Figuring money with 6% interest per annum it would take a capital outlay of over forty millions of dollars to support another four-year college in this state.

Ex-Governor Davis and Governor Moore have always taken the attitude that one university at all the points of this state can afford. Baldrige, the Republican candidate for Governor, is of the same opinion. There are Big Issues In This Election Every voter who has registered should vote. The issues in the state are economy, one University, and a business-like administration. The Republican party is on the right side of these issues.

County Affairs Latah county continues to have the lowest taxes for county purposes of any county in the state. Our criminal laws, and especially the violation of prohibition laws, has probably been more efficiently enforced in Latah county than in any similar county in the United States.

Farm Relief We are recovering from the disastrous results of the inflation of money and credits caused by the war more rapidly than any country in the world. An equitable tariff law, protecting such farm products as beans, peas, eggs, dairy products, wheat, live stock and other farm products, and putting agricultural machinery and steel on the free list, is gradually improving farm conditions. No opposition party has ever proposed any relief for the farmer. Senator Gooding and Congressman French supported the Hauger-McNary bill, and while it failed to pass congress, these men have given up the fight, and if the farmer to get any such relief it will have to come through the Republican party.

Republican Central Committee.

Clarence Peterson a Spud "Kink" Eli Hillingsworth, who said he finished hunting for Clarence Peterson's spuds last Sunday, says Clarence is entitled to the cognomen of "Spud Kink," according to his way of figuring. He said he hunted over three acres of ground for the elusive tubers and succeeded in finding only 17 sacks. Eli says there were two acres they didn't hunt over for they didn't feel that it was any use.

Linger Longers Entertained Mrs. May Edwards was hostess to the Linger Longer club and several invited guests Wednesday afternoon. After a short business meeting the remainder of the time was spent socially. At 4:30 a delicious lunch was served by the hostesses.

Besides the members, the guests were Mrs. Harold Hayward, Mrs. Roy Evans, Mrs. N. M. Leavitt, Mrs. W. M. Herman, Mrs. Ira Hanson, Mrs. Elmer Vanouck, Miss Margaret Sampson and Mrs. Clyde Meyer.

The next meeting will be with Mrs. Vern Beckman on November 10.

Bring In Fancy Work If you requested that all donations of fancy work and aprons for the Congressional bazaar be brought to the Dicus drug store or given to Mrs. Glenn Sampson as early as possible as they desire to prepare it for display.

PUBLIC SCHOOL NOTES OF MUCH INTEREST

Football The climax of the football season for the Genesee high school will be reached and passed this, Friday, afternoon. The school has a strong team—probably the strongest team in its history. Eight of the eleven boys will never have another chance to beat Lewiston. If Genesee wins the game the team will go to south Idaho to play for the state championship.

In the last two years Genesee has won eleven football games and lost one, and this one game was lost to Lewiston. In these two years Genesee has scored 282 points to the opponents.

Friday afternoon, November 5, at 2:30 the Genesee high school team will play the Lewiston team for the championship of northern Idaho.

The team showed up well against Plummer, although they were offered no real opposition. Mosman, half-back, and Flomer, tackle, were the stars of the game. Mosman ran well for four touchdowns and Flomer was outstanding for his defensive work and interference. The men who were put into the game showed lots of fight and plenty of football.

The lineup that will probably start Friday's game for Genesee is Wheeler, Mulalley, rt; Kieweno, rg; Quaber, eb; Ebel, ler; Flomer, lt; Kraut, rb; Doyle, rb; Mosman, qb; Putnam, rb; Cameron (capt), qb.

Other men who are very likely to see action in this game are F. Bumpass, quarterback or halfback; Mayer, halfback; Hayden, halfback; Ingie, guard; Reynolds, guard, and Hampton, guard.

The field has been changed so it is running with the bleachers. There will be plenty of seats.

In order that the pupils of the high school may have a great incentive to study and to study the Constitution of the United States, the local paper, The Genesee News, has offered three prizes to the boy or girl who has written the best essay on this document.

A. J. Bielenberg and family visited at the H. Bielenberg home Tuesday. Mrs. Ed. Erickson and Elizabeth Kern visited at the Chas. Kraut home Wednesday.

Mr. and Mrs. Chas. Kraut and family spent Sunday at the John Kambitsch home.

A. J. Reisenauer and family of Colton were Sunday guests at the Bielenbergs.

Mr. and Mrs. Dick Green and family motored to Lewiston Sunday to view the dam site.

Mr. and Mrs. Martin Grieser and little daughter are visiting at the Chas. Grieser home.

Mr. and Mrs. Schaffer, accompanied by Mrs. M. S. Wilson, motored to Spokane Friday, returning home Monday.

Don't forget the masquerade dance at the Summit school house on Friday night, November 19. Come out and have a big time.

Mr. and Mrs. O. F. Rader and children, accompanied by Mrs. Bill Rader and family, spent the afternoon at the Frank Green home.

Mr. and Mrs. F. W. Qualey and family had a Sunday dinner guest. Mr. and Mrs. Dick Green and family, Archie Putnam and Ed. Green.

The entertainment Friday evening at the Summit school was a great success. A quilt was raffled off and was drawn by Mrs. Fred Miller. Lunch was served by the Pep club.

John Johann and sons, Ben and Theo., Chas. Grieser and son, Carl and Martin Grieser left early Wednesday morning on a hunting trip. Just the spot selected for big game was not given out.

Legends of Sleepy Hollow Mr. and Mrs. R. F. Kluss had Mr. and Mrs. Walter Nibbler and children as dinner guests on Sunday.

Mr. and Mrs. J. Kluss and family were visiting at the home of her sister, Mrs. Kasper, last Sunday.

Mr. and Mrs. J. W. Mosman and family visited at the home of Mr. Mosman's parents at Uniontown last Sunday.

Grey Eagle News

Frances Platt spent Sunday night and Monday at the Harms home.

A group of young people from the neighborhood attended the Halloween entertainment at Summit Friday evening and enjoyed it immensely.

Edwin Dunham and family and his sister, Lottie, of Pomeroy, Wash., and Lester Ingie were guests at J. C. Cameron's home Sunday evening.

James Hazelbaker of Grandville and Mrs. Sloan, Miss Maud Sloan's party, attended the Halloween party at Grey Eagle school Saturday evening.

The masquerade party at the Grey Eagle school house Saturday evening was very much enjoyed by about 50 people. The evening was spent with guessing contests and dancing.

A very delicious luncheon of jelly, cookies and cocoa was served about 11 o'clock, the little girls of the school acting as waitresses. Every one departed for home about midnight, voting the party a decided success.

Loyalty to Our School (By Doris Harms) Do you know that without loyalty to our school there would be no joy in school life? Loyalty means working with your school, helping for it, and in every possible way cheering it along.

Without loyalty there would be no school spirit; without school spirit there would be nothing you could truthfully call a school. Work with your school, not against it. Help it along and make it bigger and better every year.

MRS. GEO. GANNON PASSES AWAY AT SPOKANE HOSPITAL

While it was not entirely unexpected, the announcement of the death of Mrs. George Gannon, daughter of Mrs. Fred K. Bressler, at the Sacred Heart hospital, Spokane, caused a shock and profound grief.

Mrs. Gannon went to the hospital about a month ago, where a baby daughter was born October 5 and she seemingly was getting along nicely for a time but later complications set in and, while she made a valiant fight for life, she gradually grew weaker until the end came Monday night, November 1, at 10:35 o'clock.

Caroline Bressler was born in Genesee July 21, 1892, and had lived here all her life until her removal to Pullman some years ago. She attended and was graduated from the Genesee High school with the class of 1911. She later attended Brunson Hall, Spokane, and taught school later. After teaching for a time she entered W. S. C. and was graduated from that institution. She was married to Geo. H. Gannon at Pullman in 1917, he later entering the World War. After his discharge from the service, Mr. and Mrs. Gannon made their home at Pullman, where they have since resided. Mr. Gannon being cashier of the Pullman State Bank.

Two children were born to this union, both of whom, with their father, survive. They are Donald, aged 7 years, and a sister, Mrs. Frank Girard, and her aged grandfather, G. N. Hollister, all of Genesee, to mourn the loss. Her father, the late Fred K. Bressler, passed away a little more than a year ago.

While Mrs. Gannon was not affiliated with any church, she was of the Episcopal faith. She was a member of Alpha Beta Pi sorority at W. S. C.

The funeral was held from the Methodist church, Pullman, Thursday afternoon at 2 o'clock, Rev. Monbeck of that city conducting the services. Burial was in the Pullman cemetery. Many Genesee friends were present at the obsequies.

A Business Change As was stated last week, the Follett closing out sale had come to an end and the store is closed. It is still closed, but will be opened again for business about the middle of this month.

The firm has been reorganized and Harry Hanson has taken over the interest of W. E. English and will be actively engaged in the store.

The interior of the store is being remodeled and a meat market is being installed, which will be in charge of an experienced butcher, a Mr. Lukin from Potlatch. A large cooling room is being installed and it will be prepared to handle all kinds of meat and fresh vegetables, according to Mr. Follett.

Mr. English has been connected with the Follett store for the past eight and a half years and the family has made many friends here who will be sorry that they are to leave Genesee. Just where Mr. English has decided to locate, if he has done so, has not been learned by the News.

Pine Grove News Frank Jones has been plowing for Leon Baker.

Mrs. R. F. Lambert visited Sunday at Chas. Spurbuck's.

Billy Freeburn made a business trip to Lewiston this week.

A. Butzine is helping Chas. Schooler repairing on the reclamation.

Mrs. R. F. Lambert and Mrs. Fred Brazier visited Mrs. Baker Tuesday.

The Henry Whitted family is moving back to their home place this week, after an absence of several months.

section—much more numerous than section—much more numerous than the game.

Miss Thelma Hanson, Miss Kathryn McMahon and Marguerite Spurbuck were dinner guests of Mrs. W. A. Freeburn Sunday.

Chas. Spurbuck was busy the other day repairing on the fence posts and uttering all sort of appreciations on the heads of absentminded auto drivers.

There were quite a number of relatives at the Fred Miller home Sunday. The families of J. Ellis of Troy, Sherman Oyster of Asotin, Leo Miller and A. Butzine.

There were 70 persons attended the Halloween party here last Saturday. The room was very appropriately decorated by Miss McMahon and Miss Hanson. Games were played and light refreshments served.

A Sporty Course First Flea: "Where did Sam and Pete go?" Second Flea: "Over on the lynx to play golf."

HIGH OCEAN FREIGHTS REDUCING WHEAT EXPORTS

The grain market developed a weaker tone during the week ending October 30, according to the weekly Grain Market Review of the United States department of agriculture. High ocean freights restricted export demand for wheat and domestic demand was not sufficient to prevent a slight decline in prices.

Continued heavy receipts of corn with only a moderate demand weakened the corn market and resulted in the decline of two to three cents per bushel. The market for other feed grains was also weaker but oats maintained independent strength, largely as a result of the limited offerings of high grade grain.

There was no material change in the price of wheat as a result of the private reports showing favorable crop prospects in Australia and more favorable weather conditions in Argentina. The European demand is being influenced by the high ocean freight rates occasioned by the coal strike.

Much of the tonnage needed for wheat has been taken for the exportation of coal from America to Europe. The Liverpool market has also been influenced somewhat by the coal strike and prices have fluctuated in response to rumors concerning the settlement or a continuation of the strike. Dealers' prices at Liverpool, however, are about 25c higher than at this time last year and apparently reflect the shorter crop of bread grains in Europe this year.

The domestic wheat market for most grades declined two to three cents per bushel as a result of this year's crop and America and has smaller export demand and only moderate buying by the domestic trade. Hard winter wheat declined about two cents for the high protein types but ranged from about unchanged to one cent higher for the lower protein types.

Last week's firm market caused increased country loadings, which were reflected in larger receipts during the current week at the principal winter wheat markets. Elevators were only moderate buyers at Kansas City because of the limited storage space now available. An important factor in the market was the Wichita for high grade protein wheat but mostly from local buyers as outside buyers were practically out of the market. Exporters were bidding around \$1.61 at Kansas City for No. 1 hard winter wheat delivered f. o. b. gulf ports.

The demand for soft winter wheat was also limited and prices were not materially changed. Unfavorable weather has interfered with seeding in the principal states of the soft winter wheat belt and less acreage has been seeded than was intended, according to trade reports.

Most of the wheat contracts were also rather drab and cash premiums were lowered about two cents per bushel, particularly for the high protein grades, with which the mills are well supplied.

Test weight and moisture have become important factors in the market. Protein content and the principal demand has been for high test weight, dry wheat. The market for durum wheat continued very firm and premiums were further increased. No. 1 Amber being quoted at Minneapolis at 10c to 50c over the Duluth December price, which, however, declined 3 1/2 cents and closed October 29 at 31.5c.

The demand in Pacific coast markets was also restricted by the scarcity of ocean space and exporters were taking only small amounts. Around 30,000,000 bushels of wheat have been shipped from the Pacific Northwest to date. Soft and western winter wheat was quoted at Portland at the close of the week at \$1.40-\$1.41.

The oats market declined with other grains but there was a fairly active cash demand, particularly for the heavy weight oats, which held prices fairly steady. Receipts have been only of moderate volume and stocks in the markets have decreased slightly since the first of the month.

Will Spend Winter In Germany Mr. and Mrs. Wm. Hordemann will leave next week for New York, from which place they expect to sail on the Muretania for Germany, landing at Havre. From there they will go to Essen where Mr. Hordemann will spend the major portion of the time, but they will visit other places in that country.

Mrs. Hordemann will go to Berlin, where she will study during the months of January and February and to Leipzig, where she will spend April and May in study.

They expect to return to America about next June.

THE PICTURE SHOWS

"The Night Club" If your laughter isn't working, you won't have any business going to the High School opera house Friday or Saturday nights to see "The Night Club," with Raymond Griffith in the leading male role. It's a scream from start to finish.

What road is a legacy of a million dollars to a woman-hater when to get it he must marry a girl he has never seen?

That's the kind of legacy Raymond Griffith learns has been left to him in his latest picture, "The Night Club," in which he heads a featured cast. Griffith learns of his inheritance just after he has renounced all women because a girl he was about to marry left him at the altar.

"White Mice" The feature picture at the Hotel theater for Saturday night, November 6, is "White Mice." Watch the boards for further particulars.

"Hell Bent For Heaven" Patsy Ruth Miller, one of the screen's best loved actresses, will be seen in "Hell Bent For Heaven," at the Hotel theater Sunday night, November 7. See bill boards for further particulars.

"Puppets" On Wednesday night, November 10, at the Hotel theater, Milton Sills will be seen in "Puppets," his best picture since "The Sea Hawk."

"Puppets" is the story of an Italian who has come to America and has made a success of life and has acquired a tiny puppet theater in the Italian quarter of New York. He meets the one girl and marries her, only to depart for Europe within an hour after the ceremony to fight for his country in the World War. His wife hears of his death and falls in love with his dearest friend. At such a critical moment the husband returns, deaf, but alive to the danger of his happiness.

Hallowe'en Celebrated Hallowe'en was duly celebrated in Genesee Saturday night and early Sunday morning the main street of the town presented an appearance such as has not been seen here since 1918.

Decorations of all kinds and various outbuildings decorated the street and front doors of many places of business and it took Marshal Beachler and Markie Springer, with the aid of a team and stone-boat, several hours to make the street look natural.

It is understood that very little real mischief was done, although the delivery car of T. H. Herman had been run down town and the air let out of all the tires and one of the tires had been cut with a knife, ruining it entirely. That was going entirely too far and comes under the head of malicious mischief, for which there is a heavy fine. Very few people object to a little innocent fun, but when it comes to deliberately destroying property, it makes it entirely different.

A small second celebration was staged Sunday night, but very little mischief was done. Some fence posts were broken off and a few other minor tricks played, but nothing to amount to much.

Return from Extended Visit Ole Flamme and his sister, Mrs. Ole Hagan returned Saturday from a seven-weeks visit with relatives at Sioux Falls, S. D., and other points in that state, and other relatives they visited in their sister Mrs. Nels Nelson and family and other relatives. They report the weather as fine and that they had a very enjoyable trip. The visitors were kept busy attending dinners and other social functions in their honor.

Mrs. Flamme and Mrs. Hagan also visited Mrs. Nels Vialy and family, at Amber, Washington, former Genesee residents, and report them as doing nicely.

Twenty Years Ago Mr. and Mrs. Wm. Bottjer are rejoicing over the arrival of a daughter, born Saturday.

Miss Lena Wood claims the honor of making the first cash deposit in the newly-organized First Bank.

The ladies aid society will serve a chicken pie dinner and supper on election day in the old Blue Front building.

Johnnie Manley has disposed of his barber shop in this city to Virgil and Glenn Sampson, who will continue to operate the same.

## Lewiston's Greatest Store

**PUBLIC SCHOOL NOTES OF MUCH INTEREST**  
(Continued from first page)

**Met Old-Timers**  
Mr. and Mrs. Chas. Herman spent Sunday at the home of Mr. and Mrs. Potter in Lewiston. They were met there by Mr. and Mrs. H. G. Page of Prigmont, who lived north of Genesee some 21 years ago and who will probably be remembered by some of the Genesee pioneers.

## Coming United Doctors

The Doctor who has charge of the State of Washington is a SPECIALIST in Chronic Diseases and Clinical Medicine

Will Be at DAVENPORT HOTEL, Spokane, Wednesday, Thursday and Friday Nov. 10 - 11 - 12

COZY NOOK HOTEL, Palouse, Wash. Saturday, November 13

Office Hours, 9 a. m. to 3 p. m. No Charge for Consultation

The doctor is a graduate in medicine and surgery, licensed in the State of Washington. He visits professionally the important towns and cities, and offers free consultation to all, except the expense of treatment when desired.

He treats Chronic Diseases of long standing and has to his credit many wonderful results in catarrh, ulcers of the stomach, diseases of gall bladder, bowels, blood and skin, nervous disorders and diseases of heart, kidney, and bladder, bed wetting, rheumatism, sciatica, leg ulcers, varicose veins, rectal ailments and chronic constipation.

If you have been ill for any length of time and do not get better, call on the doctor, as improper measures rather than disease are often the cause of your long standing illness.

Special attention is given to each case, and an earnest effort made to attain the best possible results. Remember the above date and that the doctor specializes in Chronic Diseases.

Laboratory: 335-336-337 Boston Block, Minneapolis, Minn.

## "Consider This Investment on Its Merits"

In offering the new 6% Cumulative Preferred Stock of this company to our customers, we are marketing this high grade security solely on its merits. Trained salesmen and suburban agents are busy explaining the many desirable features of this offering and showing our customers what highly liberal terms have been made on our customer-ownership plan.

The splendid earning record of our Common Stock, to which the Preferred Stock is senior in regard to dividends; the ease with which this stock may be sold, or used as collateral at the bank; the ample security behind this investment and the excellent financial condition of the company are explained in detail by these stock salesmen.

Let them call upon you, without obligation to yourself, and review the merits of this offering made to our customers now holding less than 10 shares of our stock.

Mrs. H. C. Larson had as dinner guests on Sunday, Rev. and Mrs. Gerhard Peterson and little son, Paul, of Moscow, Mr. and Mrs. M. H. Nordby of Clarkston, Mr. and Mrs. C. C. Matheson of Palouse, Wash., Mrs. Kawana of Spokane and Peter Norlie.

**Underwent Operation**  
Mrs. Arthur Hampton was taken to Spokane last Friday where she entered the Deaconess hospital and on Saturday underwent another operation, the second within the past few months. She is reported as doing nicely at this time.

**Children have been much interested in their "health chart work."** They are to keep them for four weeks and then return them. They also need their parents' aid here.

**Stories for Halloween** have greatly attracted the children—they never seem to grow tired of them. They are still clamoring for them this week.

**Supper at K. P. hall** for ex-service men and their families, Armistice day. Genesee is a good town.

# THE WORLD'S RECORD BROWNIE

A world's record for grade Ayrshire cows of 20,140 pounds of milk, 891.35 pounds of butterfat has just been completed by the eight-year-old Brownie, owned by Ralph W. Cripps of Camden, Maine. Of particular interest to every dairymen is the fact that this record has focused attention upon the remarkable achievements of both this cow and her owner. In fact, all through the country about Camden the folks are talking about Brownie, and Ralph Cripps, the "husler," who started farming fifteen years ago with \$200, and today owns one of the best farms along the coast, stocked with fifty pure-bred Ayrshires as well as the famous grade cow, Brownie.

Brownie, World Record Grade Ayrshire.

To show their appreciation for the work of this industrious pair, a farewell reception was given in the heart of the city of Camden on the eve of Brownie's departure for an extensive fair circuit as a special exhibit of the Ayrshire Breeders' Association. A band was secured, several state and local speakers extolled the virtues of Cripps and his cow. The Farm Bureau and the Camden Chamber of Commerce were also present.

Hard work, a careful study of the business, and the ability to handle good cattle economically have resulted in the growth of a \$200 investment in brush land into an excellent farm of 175 acres, 50 head of pure-breds, a modern home, and a profitable business. After all, Brownie is simply one link in the chain of evidence regarding the career of Ralph W. Cripps.

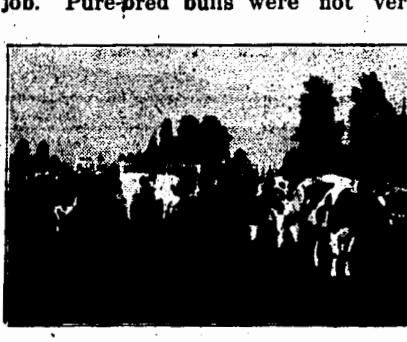

## Up From The Stumps

The Story of a Successful Dairyman.

Editor, Northwest Dairyman and Farmer: To your question "How goes farming?" my answer is "This story of my experiences, and then I will let you be the judge."

In 1910 I started on a 40-acre tract with nothing but stumps and a loan of \$100. My herd now is about 20 head, three only are grades. I do official testing one year. This testing was done on twice a day milking. One two-year 10-day old produced milk 12,691.1, butter 52.62 in 365 days. One mature cow produced 18,664.5 milk and 678.85 butter, C. C. 205 days, and these cows were milked with a De Laval milking machine—I am not yet ready to trade my bed for a lantern.

I have now used the milking machine for six years. I keep private records; I weigh every milking from every cow and I find that the two-year-olds average over 10,000 lbs. a year and a calf, and the older cows produce much higher. Two cows which encouraged me to stay on the job. Pure-bred bulls were not very

Farm Home of Peder Halkjar

on the land. My first cows were grades but I had the use of my neighbor's pure-bred bull, a Holstein. Well, the stumps were soon flying and as the cream check grew larger I got a real liking for being my own boss, which encouraged me to stay on the job. Pure-bred bulls were not very

Part of the Purebred Holstein Herd on the Peder Halkjar Farm, Enumclaw, over 50 lbs. a day and the tests are just as good as ever. I have not a three tested cow in the barn and if I am not home till milking time Mrs. Halkjar operates the machine as easily as I do and she enjoys it. Then again I always milk the first few days by hand and you know how well a heifer likes that. When I put on the machine the heifer will quit eating and look back and the look in her eye

First De Laval Milker sold in Washington. Installed April 10, 1920, and has been in use by Mr. Halkjar ever since.

is used for calf raising and for poultry and hops for good advantage. The cream goes to the Cooperative Creamery at Enumclaw of which I am a member. With the barn full of good hay and with pasture growing like it was this spring, my dairymen should be able to face the future with optimism.

Peder Halkjar, Enumclaw, Wash.

The United States Department of Agriculture, in a recent bulletin, notes the increase in the number of farms in the State of Washington, us with electricity; we use a 2-horse power motor to pump water out of a drilled well and we run the De Laval milking machine with the same motor. We run our De Laval separator, a No. 17, with a small motor. We also have an electric washer and do not forget the electric range which it would be just as hard to get along without as the milking machine. I got ahead of my story—the skim milk

# Hurried Housekeeping

By JANET JANUARY

**BUSY** housekeepers are always in a hurry. Many little time-taking details make us wish that beans and peas were potatoes, and apples and pears, cucumbers and skins. "What shall we have for dinner?" This is the handwriting on the kitchen wall that no one sees but the housekeeper. It is not so much the dinner itself as the desert which makes her think, and think, and think some more.

Speaking of desert, a woman of many interests told us the other day that "if it were not for ice cream I should just curl up and die!" If ice cream is a life saver, we decided after that hunch to turn right in and save the lives of some of the fine housekeepers we know, and others we have heard about.

Chocolate Ice Cream, Deviled Sauce, Since soft chocolate cake in this case is a life saver, we decided to add a half cup of sugar and a cupful of water to the cream. Add a tablespoonful of arrowroot, mixed with six tablespoonfuls of chops, scalloped potatoes, string beans, lettuce salad, and ice cream

Blend all together and add to the syrup cooking all gently for three minutes. Add a teaspoonful of marachino and the cherries chopped, a tablespoonful of chopped candied pineapple and the same of chopped pecans. Spread the slices of cake with a little of the sauce, cut each slice of chocolate ice cream, top with another slice of cake then pour over the sauce. Cut slices of plain or sponge cake, put thick slices of the ice cream on each and turn over the sauce, or rich puree as it will be when cold. Put a spoonful of whipped cream on top of each helping.

Cham chowder, broiled fish, baked potatoes, stuffed baked tomatoes, cucumber salad, and chocolate ice cream with deviled sauce. It sounds wicked, but it is the chocolate lovers' delight.

Make deep patty pan tart shells of good crust and bake them a delicate brown. When cold fill them with the cooked lemon pie filling. Save the whites of three eggs and just before the ice cream arrives beat the eggs stiff, adding a few minutes. Lightly greased baking dish and brown in the oven. Put a round of ice cream on top of each helping and one of the meringues on top of each helping.

Lesson Three With Ice Cream. Make deep patty pan tart shells of good crust and bake them a delicate brown. When cold fill them with the cooked lemon pie filling. Save the whites of three eggs and just before the ice cream arrives beat the eggs stiff, adding a few minutes. Lightly greased baking dish and brown in the oven. Put a round of ice cream on top of each helping and one of the meringues on top of each helping.

## For Better Health

PUBLIC HEALTH IS PUBLIC WEALTH  
COMPILED BY THE PUBLIC HEALTH LEAGUE OF WASHINGTON

**A HEALTH EXPERIMENT**  
St. Thomas, an island of 33 square miles, with a population of about 10,000, was shortly after its purchase in 1917, placed in charge of the health of our country, which immediately put into force a disease prevention system.

Intestinal diseases were first attacked. Proper sewerage was instituted, water supplies protected, fountains cleaned, typhoid vaccination made general. Since 1918 there have been no cases of typhoid reported and the death rate for intestinal diseases has been lowered remarkably.

The mosquito-borne diseases, malaria, dengue, and filariasis, also were winning much sickness and economic disability, were combated by eradicating the insect carrier, and—in the case of malaria—by treating the population so thoroughly that there should remain no reservoir of the disease for its future propagators.

Smallpox has been extirpated by repeated vaccination. Leprosy in a colony where modern methods of treatment are employed. Yaws has been made rare through early sterilization of infected persons by arsenamine; venereal infections, previous to the infant mortality, have been curbed; and, although at one time the streets, jails, and asylums were thronged with pellagrins, changing the dietary habits of the people brought about the practical disappearance of pellagra in two years.

The infant mortality was appalling—one-third of all babies born dying within the year. A school for the training of native nurses to be instructors in hygiene among their people, maternity and baby clinics, visiting nurses, and an annual baby-show, combined, have reduced the former mortality 25 per cent—and the lowering is still progressing.

Three farmers, Elmer Meiners, F. R. Fields and Ben Maxson, have been awarded certificates in recognition of improved milk production in wheat. Of the group whose potato fields passed tests for accredited seed, four of the growers are members of the 4H clubs in agriculture organized through the Extension Service of the State college.

One person in every nine in the United States meets with an accident every year, and one out of every ten deaths is chargeable to accident causes.—New York Times. It pays to be careful.

Say, Bill, whenever I go to Spokane I never miss getting one of those handy meals at the Tray Tavern on Howard Street just north of Riverside Avenue.—Adv.

denome, we would be spared something over a quarter of million deaths a year. What might be saved in ill-health, sickness, suffering, and disability can only be surmised.

Thurston County Dairymen Adopt 1927 Program. Thurston county dairymen have decided to stress during 1927 pasture and succulent feed demonstrations and a sire campaign. They will actively support a Milk-for-Health campaign. These will be major subjects, with the following minor ones: manure sheds, calf club work, C. T. A. tour, breed tours or picnics, and a county delegation to Pacific International Livestock Show.

Seed peas growing has become an established industry in the neighborhood of Fairfield, Washington, and now offers a rotation crop to work in with wheat growing, for the land planted to peas, would as was the usual practice, be summer fallowed. Rotating peas in wheat has increased the wheat yield from 30 to 35 bushels an acre. There were 15,000 acres in peas in the Fairfield district this year that produced an average of 22 bushels an acre and according to O. E. Moss, cashier of The Bank of Fairfield, the crop filled 235 cars, valued at \$950,000; most of these peas are hand picked to insure a uniformity and purity before being placed on the retail market.

Superphosphate placed on a clover plot on the D. D. Smith farm in the Skookumchuck Valley made the clover look 100 per cent better than the unfertilized plot. An oat field on the W. H. Bennett farm at Nisqually, which had been fertilized last year, showed much better growth than surrounding fields, reports County Agent E. B. Stookley.

Three farmers, Elmer Meiners, F. R. Fields and Ben Maxson, have been awarded certificates in recognition of improved milk production in wheat. Of the group whose potato fields passed tests for accredited seed, four of the growers are members of the 4H clubs in agriculture organized through the Extension Service of the State college.

One person in every nine in the United States meets with an accident every year, and one out of every ten deaths is chargeable to accident causes.—New York Times. It pays to be careful.

Say, Bill, whenever I go to Spokane I never miss getting one of those handy meals at the Tray Tavern on Howard Street just north of Riverside Avenue.—Adv.

Supper at K. P. hall for ex-service men and their families, Armistice day. Genesee is a good town.

Supper at K. P. hall for ex-service men and their families, Armistice day. Genesee is a good town.

Rape Fills Gap in Summer Green Feeding. Trial plots of rape grown in San Juan county this year indicate that this crop will fill a gap otherwise present in the program of summer green feeding. At between six and seven weeks old, the crop yielded 12½ tons per acre. Rape was fed until corn was ready to be thinned out for green feed. Two seedlings would make rape available until late in August. Scouring in cattle will result from a too sudden change to the feeding of rape.

In the Heart of Spokane, close to stores, theaters, and the business district, the Coeur d'Alene Hotel offers the traveler every convenience. Popular prices and perfect service. "The Hotel With a Personality"—Adv.

My dressmaking parlor is open and I will do sewing of all kinds.

The Beauty Parlor will be open as usual, on Thursday, Friday and Saturday of each week.

MAUD A. SLIGHTOM

**Accidental eath of Mrs. Steffenson**

The sad news of the death of Mrs. B. O. Steffenson, wife of Rev. B. O. Steffenson, former pastor of the Genesee Valley Lutheran church, reached our community last week.

On Friday morning, October 15, the pastor and his wife were on their way in an automobile to visit a neighbor pastor when they were hit by a train at a blind crossing. Mrs. Steffenson was instantly killed, while her husband received a number of cuts and bruises, making it necessary to take him to a hospital, where he remained until October 20, the day of his wife's funeral.

Rev. Steffenson and family had moved to Dodgeville, Wisconsin, where the accident occurred, only four weeks previous, having accepted the pastorate of the Lutheran church at place.

The community about Genesee will remember the fine services laid down by Rev. and Mrs. Steffenson and will sympathize to the bereaved family.

A message of condolence was sent Rev. Steffenson by the Genesee Valley Ladies aid at their meeting last Thursday afternoon.

**Confirmation Services**

Confirmation services were held at the Genesee Valley Lutheran church last Sunday forenoon, when six young people made public confession of the Christian faith and were received into full fellowship of the church. The members of the class were Misses Mildred Peterson and Olive Borgen, Otto Borgen, Eleno Larson, Palmer Anderson and Hardy Hagan.

The ladies chorus rendered beautiful and appropriate music. A large audience was present to witness the services.

On Sunday evening, November 7, the class will be received into the local Young People's Luther league. There will be a special program and refreshments.

All are welcome.

**CHURCH NOTICES**

**Congregational Church**  
 Rev. Paul W. Sprague, Minister.  
 Mrs. W. M. Herman, Pianist.  
 W. E. English, Choir Director,  
 Sunday school at 9:45 a. m.  
 Regular preaching service at 11 o'clock.

**St. John's Lutheran Church**  
 A. F. Wolff, Pastor  
 Sunday school at 9:30 a. m.  
 English services will be held each Sunday morning at 10:30 o'clock, with the exception of the first Sunday of each month, when German services will be held at the usual hour.

**Christian Church**  
 N. E. Beach, Pastor  
 Bible school at 9:45. The attendance is on the increase. Come and enjoy the contest songs.

The pastor will preach to the children at 11 o'clock. Each child will bring a stone and aid in delivering the sermon on "Bible Stoner."

The rally and fellowship banquet was greatly enjoyed.

Our wide awake missionary society will journey to Lewiston today to visit that society and will give the program, while the Lewiston society will serve a banquet.

**Genesee Valley Lutheran Church**  
 Gerh. A. Peterson, Pastor.  
 Sunday, November 7, 7:30 p. m.  
 Young People's Luther league. Reception for the confirmation class, with special program in the church auditorium.

Following the program, refreshments will be served in the parish hall.

There will be a rollcall of former confirmation classes. Let there be a good representation.

All are invited.

**Brought Home the Deer**

Harry Beach (captain), Rich and Clay Stout and Matt Kasper returned Monday from a ten-days hunting trip on the Big Salmon river. The party packed in from Riggins about 14 miles, where they found plenty of deer, they having killed two before they had made camp and brought back the limit.

Beach and Kasper may not know anything about hunting coyotes, but they can give some coyote hunters cards and spades and beat them out when it comes to bringing in the deer. Mr. Kasper says there is some wonderful scenery there as well as plenty of deer. The party climbed to the summit of Sheep mountain and said the view from that promontory is grand.

**To My Students**

I am leaving next week for Germany to spend the next seven months and wish to extend to all my students my best wishes and hope they will continue their music studies.

I wish you all a fond goodbye.  
 Mrs. Antonie Hordemann.

**Public Sale of Mules**

A. A. Hatley of Pomeroy, Wash., will sell at the Genesee stock yards, on Saturday, November 6, 10 head of mules, 8 to 10 years old, weighing from 1100 to 1350 pounds; 1 gray gelding, 7 years old, weight 1400; 1 gray mare, 7 years old, weight 1300.

**A Dinner Party**

Mr. and Mrs. Henry Hanson entertained the following guests Sunday at dinner: Mr. and Mrs. John Peter, Mrs. W. M. Herman, Miss Olson and children of Troy, Mrs. John Hagan, Ole Flamm and Mr. and Mrs. Nels Flamm and children.

**Will Give Old-Time Dance**  
 Everybody is invited to the old-time dance to be given by the American Legion in their hall on Thursday evening, November 11 (Armistice Day). If you don't have a good time it will be your own fault. Admission 50 cents.

There is additional local on page 2 this week. Don't miss it.

### Sticking Butter

To keep butter from sticking to paddles and other wooden utensils these should be thoroughly rinsed immediately before using, first with hot water, then with cold water. This fills the pores of the wood with water and prevents the butter from sticking to it. Wooden utensils should be cleaned immediately after using so that the fat will not have an opportunity to get into the pores of the wood.

Page two will interest you—read it.

### Stewart-Warner Matched-Unit Radio

Service is half of the keeping. If you buy a Stewart-Warner radio you get real service.

I have sets ranging in price from \$52.50 to \$420.00.

This year the company is tripling their output of radios and today I received the glad news of price reductions, stating that the \$97.50 set will be 75.00. The \$7.50 set \$52.50.

I will match them with any 5 tube set for volume, tone, selectivity, service and price.

The above reductions were made to enable those in less circumstances to have a Stewart-Warner receiving set at a minimum of expenditure.

### Some Turnip

The fine turnip on display in the News office window was brought in by N. R. Shepherd. He planted the seed August 15, but it did not sprout until the fall rains began, and on October 23 the turnip reached a circumference of 22 inches. We wouldn't wonder if Mr. Finney's turnip, that was made so famous by the poet, may have been raised at Troy.—Troy News.

### Buy Blankets Now

## Genesee Motors

### Lincoln Ford Fordson

### Football

The Genesee football team lost to Lewiston last Friday 19-0. Twice during the game the Genesee team worked the ball the length of the field, only to lose it within a few yards of a touchdown. Lewiston worked hard and got the breaks. Twice Genesee families were converted into cheerleaders, and once the timely intervening of the referee kept Genesee from stopping the third touchdown.

In the last quarter Genesee opened a passing attack that took them from their own ten-yard line to the Lewiston one-yard line but were unable to buck the ball over Lewiston's hard-hitting line.

Genesee's sensational passing attack and poor refereeing featured the game.

Officials—Referee, Hal Orion; umpire, Giff Davidson; headsman, Baird.

### Seventh and Eighth Grades

The pupils in this room took the Monroe Standardized Silent Reading Tests this week. These are for the purpose of testing rate and comprehension. Results in most cases were satisfactory, showing a rapid rate of reading and good comprehension of the reading material.

The eighth grade spelling class has reorganized for a new contest. Edith Craft and Lester Ingle are captains. The losing team at the end of three weeks must entertain the winning team.

Pearl Springer and John Hickman are editors of "The Echo" this week. The eighth grade held a class meeting Monday night to invite the seventh grade to join the eighth grade class and thus have just one organization in the room. The seventh grade accepted the invitation as the class is too small for a separate organization. The eighth grade is planning an initiation for them to take place very soon.

We received our first copies of Current Events last week and immediately began special reports from different pupils in the room.

### Fifth and Sixth Grades

The sixth grade has just finished making some very good looking "Health Posters," worked out in autumn colors.

We had no school last Friday afternoon, being dismissed on account of the football game.

The eighth grade is planning an initiation for them to take place very soon.

We do not sell the ordinary Christmas cards.

### Have Moved to Genesee

Mike Kinzer and family have moved to the Genesee section, where they will make their home.—Uniontown Journal.

### In Recovering

Miss Louise Herman of Genesee, who has been ill in the Grimas hospital for some time, is able to be moved to the home of her aunt, Mrs. Frank Slater, on Mabelle avenue.—Star-Mirror.

### Soon Be No Novelty

The extremes to which this country is going in order to entertain Queen Marie, ought to make visiting America a popular pastime for the crowned heads of Europe. Their visits will probably be so frequent that it will allow her to act as a floor-walker in her suite. So perfect is his make-up that Miss Vidor fails to recognize him in his disguise. In his efforts as a waiter, however, he fails miserably and ends by spilling a pitcher of cream down her neck.

While a prestant lover, Adolph makes a poor waiter, and the fun becomes fast and furious.

### "The Lone Wolf Returns"

Saturday night, November 13, at the Hotel theater, you will have an opportunity of seeing one of the most beautiful women on the silver screen in the person of Miss Billie Dove, who carries the stellar role in "The Lone Wolf Returns."

"The Lone Wolf" was unique. He had a passion for adventure and daring and he indulged them by seeking games in all parts of the world and getting himself into all sorts of wild adventures. He always went alone.

The authorities of every continent were continuously watching him, and when they almost came up to him time after time, he was always able to keep his head by the use of his wits. Another thing, he was always immaculately dressed. Wherever he went he was always dressed as though planning to go to the opera.

He had always said this—"when ever I find a jewel that I believe is the most beautiful thing in the world but still he never satisfied.

### "Footloose Widows"

A rip-roaring comedy is billed for the Hotel theater for Sunday night, November 14, when Louise Fazenda, conceded to be one of the best comedienne on the silver screen and Jacqueline Logan will have the stellar female roles in "Footloose Widows."

The young folks from Grey Eagle who attended Sunday school at Pine Grove last Sunday enjoyed the nice dinner and also the treat afterwards, very much.

Mary and Frances Platt, Leonard Clark, Glenn Sams, Gladys, Mabel and Helen were at the Pine Grove home Sunday evening and after supper spent the time enjoyably playing games and listening to the radio.

### The Use of School Ground Apparatus

By Homer Schooler—age 12

How many of us know the importance and joy of good school ground apparatus? The children will enjoy going to school more. They work harder with their school work, so they can get out to play on the chute, the swing, the giant stride, the acting bar and teter-teter.

Some schools have not only the apparatus mentioned, but they have the merry-go-round, the seesaw, the cellar-door slide, all the acting bars and swings, the tennis, football, basketball and baseball apparatus and supplies.

More play ground apparatus makes a better looking school ground, a better school, happier children and induces better school attendance.

The apparatus is easy to get and easy to put up. Let's make the school better in this way.

### Personal Greeting Cards

Your attention is again called to our splendid line of personal Christmas greeting cards, which is the largest and finest we have ever had.

We carry a full line of Christmas cards from \$2 to 25 up to \$10.50 for the same number. But we have many very pretty ones that range from \$2 to \$3 for 25.

Come in and see them. We are sure you can please you.

We do not sell the ordinary Christmas cards.

### WHAT HAPPENED HERE TWENTY YEARS AGO

W. M. Thompson sent out seven cars of grain the first of the week for the Philippine market.

Chas. Ingle has leased the Mack Kambleth farm and will take up his residence there with his family.

Mat and Belda Bielenberg left Wednesday for the Big Camas Prairie section, in the southern part of the state, to look after their claims.

The Congregational dinner served on election day in the old Vollmer building, was very generously patronized, the total receipts having been close to \$90.

A. A. Raymond and Dr. J. L. Conant, Jr., paid a visit to the American ridge section the latter part of last week, hunting quail. They report having bagged over 60 on the trip.

Farmers, Beware! Frank Terhaar informs us that on the George Tergland farm, north of town, a large amount of muskrat has been discovered—growing in and near an alfalfa field. It is presumed that seed of the dreaded weed was sown with the alfalfa. It behooves every farmer to keep a sharp lookout for this pest of pests, for once it is started and gains a foothold in our country it takes years to eradicate it. (And it is still flourishing here.)

Here is a little political history that concerns Genesee. In the past this place seems to have a weakness for a number of men in the Troy community have purchased stock in these mines and will be pleased to know that the work is progressing nicely, states Mr. Conger. He also states that the price of stock is liable to raise in the near future. Houses, bunk-houses, sheds and other buildings have been erected and everything is in working condition. Several men will be employed and altogether this industry will mean considerable to this community.—Troy News.

### Grey Eagle News

Issue Isaksen went to Troy Tuesday after a load of lumber.

Delpha Cameron spent Friday afternoon with Doris Harms.

Alfred Cann was a visitor at the Wahl home Sunday evening.

J. C. Cameron and family were Sunday visitors at Halvor Olsen's.

Several of our people attended the football game at Genesee from Grey Eagle last Friday.

Mrs. J. C. Cameron and Mrs. O. W. Harms were visitors at school Thursday afternoon.

Robert and Theodore Parks and Mabel Harms visited at the Platt home near Genesee on Friday.

There was no school on Friday on account of the teacher and others wishing to attend the football game in town.

The young folks from Grey Eagle who attended Sunday school at Pine Grove last Sunday enjoyed the nice dinner and also the treat afterwards, very much.

Mary and Frances Platt, Leonard Clark, Glenn Sams, Gladys, Mabel and Helen were at the Pine Grove home Sunday evening and after supper spent the time enjoyably playing games and listening to the radio.

### The Scarlet Saint"

For Wednesday night, November 17 the feature picture at the Hotel theater will be "The Scarlet Saint," with Mary Astor and Lloyd Hughes in the leading roles.

Here is the big surprise drama—the revelation of young womanhood which rebels against marriage that ties her to old age!—A sensational expose of Beautiful June shackled to bleak December and the way out found through love and sacrifice.

Also installment No. 7 of "The Green Archer."

### The High School Play

The high school play, "Ruth In a Rush," was given in the opera house Tuesday night and was witnessed by a capacity house.

Genesee is noted for putting on the best of plays and the one Tuesday night was no exception. While none of those taking part had ever appeared on the stage in a like capacity, they did not exhibit any symptoms of "stage fright," which is so often the cause of spoiling an otherwise good part.

The students are to be congratulated upon the success they made of their venture.

The singing by the girls' and boys' glee clubs singly and ensemble, was very good indeed and was much appreciated.

We do not sell the ordinary Christmas cards.

### Spread Mind of Tarvia

Beginning Monday morning, the highway authorities have spread a mile of tarvia surfacing, commencing at the north line of the city and extending northward for one mile.

This is one of the experimental miles of this surfacing that the highway department is putting down in this section of the country, the other two miles being, one to the north of Moscow and the other will start from the Idaho-Washington state line and extend for one mile toward Lewiston.

The road really should be closed to lay the tarvia to the best advantage and get the best results, but that is not always possible. However, a small detour to the north of town is available for all, the objective of covering a chance to set and harden, which takes only a short time in comparison to other materials.

If the present experimental three miles prove to be all that is claimed for it, it is likely that the entire highway in this section of the country will later be surfaced, which would give us a real road—equal to that of twenty years ago.

### Idaho Bank Deposits Increase

Deposits of \$36,276,216 were in 99 Idaho state banks at the close of the third quarter October 15, an increase of \$3,281,696 over the total for the third quarter of last year, the department of finance reported today. Deposits increased \$2,263,642 over the second quarter. Proportionate gains were made in total resources, the report showing \$41,777,406 October 15, compared with \$39,503,801 June 30 and \$40,428,306 a year ago.

"Taken as a whole, the banking record of constant increase in volume during the past four years is indicative of profitable production and satisfactory marketing of products," E. W. Porter announced.

### Will Open Store at Sprague

W. E. Ingle has decided to open a dry goods, furnishings and shoe store at Sprague, Washington, and the family is preparing to move to that place the first of the winter.

Mr. English states that he has secured a good location, has bought an entirely new stock and that prospects for a good business are very encouraging.

The good citizens of Genesee are loth to see Mr. English and his estimable family leave, but they will wish them success in their new location and home.

### Many Attend Game

Regardless of the inclement weather, many Genesee fans went to Moscow on Saturday to witness the Idaho-W. S. C. football game—and came home "all wet" and disappointed.

### A Queer Custom

At a marriage ceremony in India the bride stands on a large plate filled with milk and rose-colored sweets.

If you miss a single page this week you may be loser. Don't do it.

### THE PICTURE SHOWS

"The Grand Duchess and the Waiter"  
At the High School opera house on Friday and Saturday nights you will have the opportunity of seeing one of those rollicking comedy love stories that will tickle your funny-bone.—"The Grand Duchess and the Waiter."

Florence Vidor, a Grand Duchess, has been forced to flee to Paris with a vestige of her court, following the rise of revolutionists in her home country.

Attending a theater one evening, Miss Vidor is seen by Adolphe Menjou, a millionaire Beau Brommel who becomes immediately infatuated with her. All his attempts to meet her are coldly ignored, and finally he engages a suit of rooms directly below those she occupies in a prominent hotel. To her he writes an old waiter to allow him to act as a floor-walker in her suite. So perfect is his make-up that Miss Vidor fails to recognize him in his disguise. In his efforts as a waiter, however, he fails miserably and ends by spilling a pitcher of cream down her neck.

While a prestant lover, Adolph makes a poor waiter, and the fun becomes fast and furious.

### "The Lone Wolf Returns"

Saturday night, November 13, at the Hotel theater, you will have an opportunity of seeing one of the most beautiful women on the silver screen in the person of Miss Billie Dove, who carries the stellar role in "The Lone Wolf Returns."

"The Lone Wolf" was unique. He had a passion for adventure and daring and he indulged them by seeking games in all parts of the world and getting himself into all sorts of wild adventures. He always went alone.

The authorities of every continent were continuously watching him, and when they almost came up to him time after time, he was always able to keep his head by the use of his wits. ### SPOKANE CIRCUIT LUTHERANS TO CONVENE NOV. 15-18

The annual fall meeting of the Spokane circuit of the Rocky Mountain District, N. L. C., will meet in Our Saviour's Lutheran church, in Moscow, commencing Monday evening, November 15.

Luke 13:23-30, as outlined by Rev. Stephen Dale of Bonners Ferry, will be the theme for the discussions and evangelistic addresses. Twelve or more pastors, together with a large number of laymen delegates are expected and will take part in the program.

Each congregation is entitled to two lay delegates, and as many as can are most cordially invited and urged to attend.

The Woman's Missionary Federation has its meetings on Wednesday forenoon and afternoon. Every day is asked to send two voting delegates and is many visitors as will come.

The Ladies Aid of Moscow will serve warm lunches at noon of each day, and together with the congregation extend a hearty invitation and welcome to all.

The following is, in part, the outline to be used: Who are saved? Few or many? In the present time. Strive to be among the number saved. Put salvation first. The "Too Late" and "I know ye not." The saved. The importance of using our opportunity. The Norse and English languages will be used in the afternoons. All English in the evenings. Tuesday morning will be a Norse communion service—special music will intersperse the address.

### Spread Mind of Tarvia

### THE PICTURE SHOWS

### SEMI-LOCAL NEWS CLIPPED FROM EXCHANGES

### WHAT HAPPENED HERE TWENTY YEARS AGO

### SPOKANE CIRCUIT LUTHERANS TO CONVENE NOV. 15-18

### HIGHWAY CLOSED NEAR POLLOCK FOR TWO WEEKS

### National Broadcasting

### Receiving sets of the best quality, and adequate broadcasting made available for all, the objective of the new organization, the best service and the best sets brought within the reach of all, and free from monopoly or discrimination.

### It is a dream, but the same dream seems to be realized by other forms of electrical service, such as lighting, telephones, etc.

### Three of the biggest radio and electrical organizations genius head the National Broadcasting Company, Inc., which invites completing manufacturers of radio equipment to make use of its facilities for rendering better broadcasting service to the public.

### Following close on the heels of the news stories of the domestic difficulties of "Teasdale," aged 18, and her 51-year-old husband, who have created so much comment during the past several months, comes the delirious news that Dr. Silas Rogers Corwith, aged 66 years, had married an 18-year-old girl, back in New York, and their home party in celebration of the event was broken up by the indulgence of some of the guests in too much of the wild cow's milk.

### Instead of allowing the old married and the young one to get far off, he should have been sent to an insane ward and the kid sent off to school. It is a shame to allow such disgraceful things to happen in this supposedly enlightened country. It may be all right for the Fiji Islanders and their like to do these things, but when it comes to allowing such in this country, it is a disgrace to the nation.

### Mrs. W. E. English Honored

The Rebekahs prettily entertained at their hall Wednesday evening in honor of Mrs. W. E. English, who will soon leave for Sprague, Wash., where the family will make their home.

A beautiful picture was presented Mrs. English by the lodge and dainty refreshments were served at Smolt's.

### Continued Story Next Week

Owing to a rearrangement of the paper it was impossible to use the continued story this week. The story will again be used next week.

Pages three and six will interest you this week.

**NEW ADMIRAL-ORIENTAL SCHEDULE STARTS JAN. 1**

A combination of the fleets of the Admiral Oriental Line of Seattle and the Dollar Steamship Line of San Francisco into one service for operating purposes on a horsehoe route between Seattle, Japan, China, Hongkong, Manila, Honolulu, San Francisco will take place January 1, it announced plans are approved by the shipping board.

Under the plan, nine of the 635-foot "President" liners will come to Seattle in the Oriental service and there will be a sailing from Seattle and one from San Francisco every two weeks. The vessel sailing from Seattle will go to the Orient and return to San Francisco and return on the same route.

One of the advantageous features of this retooling will be the improvement of mail service to the Far East. Under present arrangements two of these boats are often in an Oriental port at the same time and following their departure there is no other for two weeks. The complaint of Lieut. Gov. General Wood of the Philippines on mail service is declared to be one of the principal factors leading to the change.

All ships will lay over 14 days in Seattle and but seven in San Francisco, according to a statement of A. F. Haines, vice president of the Admiral Oriental line, to the daily papers. This will automatically make Seattle the home port of the entire fleet. The ships will go into drydock here and renovation will be made here.

Under the new arrangement one of the Oriental ships will be withdrawn by the Dollar interests and placed on the Dollar around-the-world service. Adoption of the plan hinges on the approval of the legal department of the shipping board. The proposed schedule is one for operation purposes only, the two corporations remaining separate as before.

**NEW GRAIN ELEVATOR PLANNED AT LONGVIEW**

ENTRANCE of the Port of Kelso in the grain trade is foreseen in the passing of a resolution by the authorities this month to hold a special election to vote on issuing a bond issue of \$116,000 to pay for a port and the construction of grain elevators at Longview to be leased or rented to grain operators.

Present plans are to float twenty-year bonds, which will not be issued unless the promoters of the grain elevators guarantee to care of the indebtedness, including bond interest and upkeep. It is declared that responsible interests have offered to make such a guarantee.

Estimates on the cost and capacity of the elevators are not yet available, but are being prepared by engineers. Tentative plans call for bulk grain elevators of at least 600,000 bushels capacity. At a recent meeting it was declared that the same freight rates will prevail as are employed by Portland which are a cent and a fraction cheaper than to Puget Sound ports. A telegram from Walla Walla was read which assured the backing of the Walla Walla chamber of commerce and grain dealers and wheat growers of Eastern Washington. Representatives of grain interests present announced that flouring mill concerns from Minnesota and Montana are now negotiating for sites on the Columbia river and that if grain elevators are constructed there they look for negotiations to follow immediately for the establishment of large flouring mills near the elevators, which will enjoy the advantage in rail rates and a short water route of only 50 miles to the ocean.

**Oyster Fritters**

1 1/2 cups pastry flour, 2 teaspoons baking powder, 1/4 teaspoon salt, 1 egg, paprika, 3 tablespoons evaporated milk diluted with 7 tablespoons oysters, few drops onion juice. Mix and sift dry ingredients. Beat eggs and add diluted milk. Combine liquid and dry ingredients and beat until smooth, about two minutes. Drain oysters and chop. Season with onion juice and paprika. Add oysters to batter. Drop by spoonfuls in hot fat having a temperature of 360° F. or hot enough to turn a one-inch cube of bread a golden color in 60 seconds. About 5 minutes is required for frying.

1 No. 2 can peas, cold water, 1 slice onion, few grains pepper, 1 tablespoon flour, 1 cup evaporated milk diluted with 1 cup water, 1 1/2 teaspoons salt, 1 tablespoon butter. Prepare white sauce from diluted milk, flour, butter, salt and pepper. Drain the liquid from the peas. There should be about seven-eighths of the cup. Add enough water to the liquid to make one pint and return to the peas. Add seasoning and boil for five minutes; then rub through a sieve. There should be 2 1/2 cups of pulp and liquid. Combine peas and white sauce. Serve immediately.

Thirty thousand pounds of Pyrotol was received on September 27, for clearing land in Clallam county. Of this amount 220 cases were delivered to farmers in the east end of the county and the balance was delivered in Port Angeles. Some of the Pyrotol which was not requested on the day of delivery was placed in the magazine and may be secured by those who wish it, reports County Agent Holland.

**PORT AUTHORITIES AND RIVERS AND HARBORS CONGRESS HOLD JOINT MEETING AT PORTLAND**

S. L. Prenter of Vancouver, B. C., Harbor Commission, and J. J. Donovan, Bellingham Lumberman, Elected to Head Two Organizations for 1926-27.

Some of the leading Pacific Coast port authorities at the recent annual convention at Portland are shown above. From left to right: William A. Sherman, of San Francisco, elected third vice president; John H. Burgard, Portland, retiring president; S. L. Prenter, Vancouver, B. C., the new president; and J. H. Polhemus, Portland, executive secretary.

THAT the greater development of property facing the Pacific Coast can best be served by the development of the smaller or secondary ports together with the larger ports was expressed by the delegates attending the joint convention of the Pacific Coast Association of Port Authorities and the Northwest Rivers and Harbors Congress at Portland, recently.

S. L. Prenter, of the Vancouver Harbor Commission, was elevated from first vice president to president of the Pacific Coast Association of Port Authorities for next year and Vancouver, B. C., was named for the annual convention for 1927. Mr. Prenter succeeds John H. Burgard, chairman of the Commission of Public Docks, Portland.

J. J. Donovan, Bellingham lumberman, was named president of the Northwest Rivers and Harbors Congress, succeeding W. C. Bristol, nationally known authority on maritime law, of Portland. Bellingham was awarded the 1927 convention of the organization.

Other officers elected by the two organizations were:

Pacific Coast Association of Port Authorities:

Walter B. Allen, president of Board of Harbor Commissioners, Los Angeles, first vice president. Mr. Allen formerly was second vice president.

Capt. W. Frank Andrews, secretary Port of Tacoma, was raised from fifth vice president to second vice president.

Estimates on the cost and capacity of the elevators are not yet available, but are being prepared by engineers.

Tentative plans call for bulk grain elevators of at least 600,000 bushels capacity.

At a recent meeting it was declared that the same freight rates will prevail as are employed by Portland which are a cent and a fraction cheaper than to Puget Sound ports. A telegram from Walla Walla was read which assured the backing of the Walla Walla chamber of commerce and grain dealers and wheat growers of Eastern Washington. Representatives of grain interests present announced that flouring mill concerns from Minnesota and Montana are now negotiating for sites on the Columbia river and that if grain elevators are constructed there they look for negotiations to follow immediately for the establishment of large flouring mills near the elevators, which will enjoy the advantage in rail rates and a short water route of only 50 miles to the ocean.

George F. Lamping, president Seattle port commission, sixth vice president.

Hugh M. Delanty, Gray's Harbor Stevedoring Company, Aberdeen, treasurer.

R. R. Bartlett, Port of Astoria, sec. All of the above officers were re-elected.

Los Angeles was a contender for the 1927 convention of the port authorities but it is said that the meeting passed expressing the gratitude of Commissions, its officers and representatives for the many entertainments both the Pacific Coast Association of Port Authorities and the Northwest Rivers and Harbors Congress to the Port of Portland, the Portland Dockments and the hospitality shown the delegates.

Announcement was made at the meeting of the sudden death at San Francisco of M. F. Cochrane who was to have been a delegate to the convention. A committee to draft resolutions relative to his passing was named to include W. A. Sherman, Charles A. Spear, manager of Port of Los Angeles, and G. W. Osgood, general manager Port of Tacoma.

Papers read at the two conventions were as follows: "Charges for Use of Port Facilities," by B. F. Stone, president Port of Astoria. Discussion led by F. R. Brown, manager Port of Vancouver, Wash., and H. L. Hudson, traffic manager, Port of Portland.

"Problems of the Small Port," by Russell Hawkins, president Port of Tillamook, Oregon. Discussion led by A. H. Powers, president Port of Coos Bay, Marshfield, Oregon; Russell Hubbard, president Port of Umpqua, Reedsport, Oregon; and Lieut. Col. Charles T. Leeds, consulting engineer, Los Angeles, Cal.

Hannchen barley demonstrations in Whatcom county are proving out better than last year. Seed accreditation work for the past four years on this crop is the reason for the improved conditions of the barley fields, says County Agent Carrol.

The company completed a plant near Smith Cove port terminals last fall at an investment of approximately a million dollars. In this plant crude oil from California is refined and distributed throughout the Northwest.

Launching of the Okanagan Lake, Canada, passenger and freight vessel Pentowna at Kelowna, B. C., took place last month. The Pentowna was fabricated at Prince Rupert, B. C., and was erected at the new dock at Kelowna. The launching was a side-slip and the vessel was placed immediately into commission. The boat

under this resolution have the power to add to its body those whom it may deem best from whom to secure information.

Resolution No. 2 covered the development of the smaller ports, as follows:

RESOLVED, That the Pacific Coast Association of Port Authorities, realizing that the greater development of property facing the Pacific Coast, can best be served by the development of smaller or secondary ports together with the larger ports, that we in convention assembled recommend to the president of the association that a committee of five members be appointed to investigate and collect data relative to the development of what may be termed the smaller ports of the Pacific Coast and that the findings of the committee be referred back to the association for its recommendation or rejection.

A resolution was passed expressing appreciation to James H. Polhemus who took over the duties of secretary of the organization and handled the details of the convention on short notice following the resignation of G. F. Hazard who has been moved from Portland to Oakland.

It was also decided that a recording secretary-treasurer be named to gather all records of the organization since inception, to prepare a financial statement for each annual meeting and that a full record of the proceedings of each convention be kept. An annual membership fee for the association will also be decided upon.

A resolution of thanks was also passed expressing the gratitude of Commissions, its officers and representatives for the many entertainments both the Pacific Coast Association of Port Authorities and the Northwest Rivers and Harbors Congress to the Port of Portland, the Portland Dockments and the hospitality shown the delegates.

Announcement was made at the meeting of the sudden death at San Francisco of M. F. Cochrane who was to have been a delegate to the convention. prehensive plan for port development for Bellingham Bay, and if the voters of Whatcom county approve the purchase of 200 acres of tidelands there on December 4, its further development is assured.

The port may dredge the waterway to its full width of 600 feet and also dredge a channel to deep water in the area. It may construct docks, warehouses and other buildings for the development of the areas as a big modern terminal, connecting railroad tracks, roadways, water mains and electric light and power lines. In short, the enlarged comprehensive plan would allow the port to do anything in the area necessary to handle freight and passengers between ship and destination.

There already has been done a considerable amount of improvement to this area. A fill of 22 acres has been made and Squalicum Waterway dredged to 26 feet at mean low water, for a width of 200 feet.

**MONUMENT TO EZRA MEEKER**

The dedication of the Ezra Meeker statue took place at Puyallup, on September 14th, "Pioneer Day" at the Western Washington Fair, and was an occasion of much congratulation to Mr. Meeker, the "Oregon Trail Blazer" who now in his 95th year, was present during the ceremonies and apparently enjoying the best of health. Mr. Meeker, who crossed the plains for the first time in 1852, in an ox-drawn prairie schooner, has since that time retraced his steps in a similar conveyance, and later by train and automobile he has made the journey; finally to cap the climax by making the trip through the air by flying machine.

It is a wonderfully exciting and interesting life that this pioneer has lived; and now while still in the possession of all his faculties, he is given the unusual honor of having a monument erected to him—an honor generally reserved for the dead. The monument, as it stands today, is erected in the public city park at Puyallup, the ground for which was given to that city many years ago by Mr. Meeker.

A general revision of intrastate livestock rates on all railroads in Washington were ordered by the department of public works on July 15 to take effect within 30 days. The order follows the joint investigation of the department and the I. C. C. upon the complaint of the Northwest Livestock Shippers' League. Revisions are both upward and downward and are applied to specific stock for specific hauls. The department's order is in accord with the findings of the I. C. C. as well as those of the state body.

—be able to get any station I want and keep out others"

In other words, it must have "selective sensitivity." The Binocular Coils, found only on the Grebe Synchronphase, guarantee this. They protect the set against outside interference, such as signals from undesired stations, and thus give that "selective sensitivity" for which the Synchronphase is famous.

—get all stations"

Each station broadcasts on a definite wave-length, but the ordinary set receives satisfactorily only wave-lengths between 240 and 550 meters. The new Grebe Low-Wave Extension Circuits enable the Synchronphase to receive from 550 down to 150 meters. This means that it will tune in over 100 existing low-wave stations, with worth-while programs, not now available to other receivers.

—pick up the station I want"

The Synchronphase is easy to tune. First, because Grebe S-L-F Condensers give all stations equal spacing on their dials, eliminating the usual crowding which necessitates almost microscopic dial adjustment.

Second, because the Flexible Unit Control, another recent Grebe development, enables you to set two or all three dials by operating one; or to adjust them separately at will.

—give voice or instrument its natural tone) through the loud speaker"

Perhaps the greatest recent Grebe contribution towards the perfection of radio reception is the "Colortone" or tone control. With it you may vary to your taste the quality of speech or music, from high, thin pitch to low, deep, round tones with all the variations between, without changing the positions of the dials or losing the full strength of the broadcast signals. The naturalness of sound is absolutely preserved. It is also possible to suppress, to a great degree, disturbances due to static.

—give me the volume I like, even from distant stations"

In the Synchronphase a complete and continuous range of sound intensity from all stations is at your disposal, without any distortion or change in the character of the sound.

—look well, last well and not be obsolete next year"

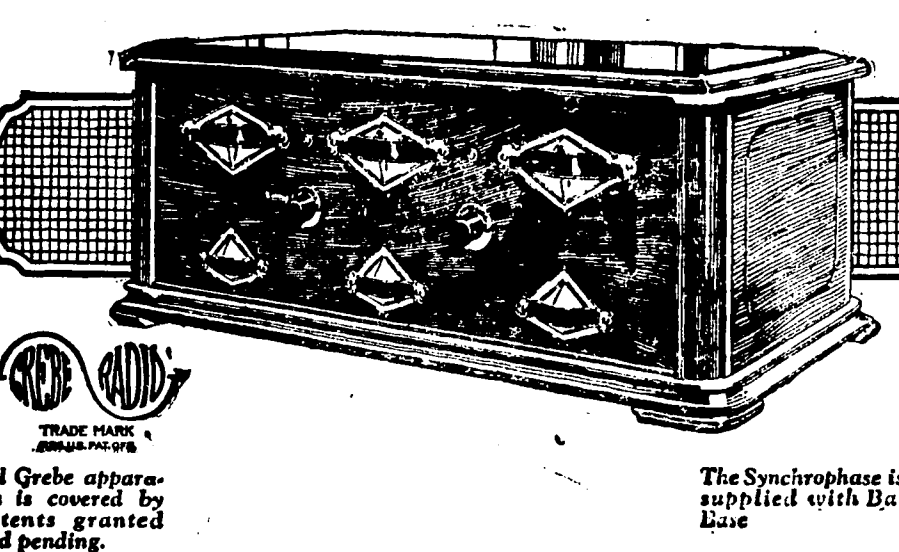

The enduring quality for which Grebe receivers have always been noted, is due to the fact that every part is made in the Grebe factory. Only by this controlling quality of design and construction can the outstanding performance of the Synchronphase endure.

There are many things about the Synchronphase which other receivers do not possess. But there is nothing now known in radio development which this receiver will not do.

As the Synchronphase more than meets the most exacting requirements of both layman and engineer, why not get your set today?

Ask for a demonstration of the truth of the above statements.

**THE GREBE SYNCHROPHASE**  
TRADE MARK REG. U.S. PAT. OFF.

The Synchronphase is also tuned in with Battery Line

#### Democrats Rule Nez Perce County

The newly-elected officers of Nez Perce county, who will be sworn in January 9, are mostly of the democratic faith. They are E. L. Parker, democrat, probate judge; Fred J. Babcock, republican, prosecuting attorney; C. Whitman, republican, commissioner, third district; Wayne Talbot, commissioner second district, are the incoming officers. The political complexion of the courthouse there will be seven democrats and five republicans.

#### You Can't Afford to Miss It

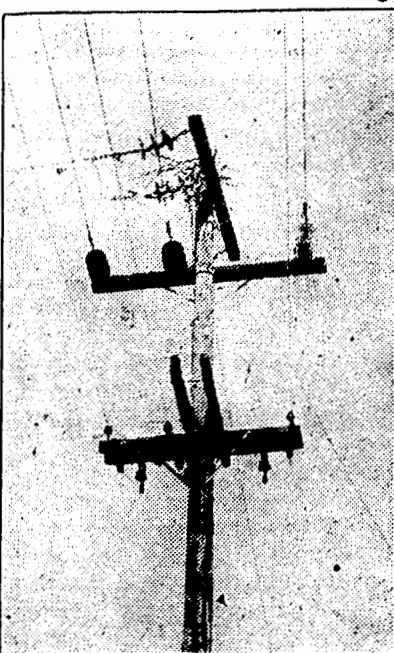

The dinner and suppers to be given by the Catholic ladies on Tuesday before Thanksgiving is something to look forward to. It will be satisfactory to everyone. The bazaar will end with a public dance in the Legion hall. Dinner, adults, 50; high school students, 35c; children under 12 years, 25c. Supper 35c. 20-1

Read the ads.—keep posted.

A new Victor Records Out Today

SMOLT'S

A pair of daring fish-hawks in the vicinity of Omak, Washington, have been endeavoring to make their nest on the high voltage transmission line pole shown in the above picture, taken by R. J. Vogler, Omak agent for the Washington Water Power company. A foundation of sticks for the nest is shown at the top of the pole.

This happens to be a corner pole for the 33,000 volt line between Omak and Riverside and because of the danger of a short circuit and service interruption, linemen of the electric service company have repeatedly taken down the nest sticks and attempted to drive the birds away. The fish-hawks evidently can't figure out why such an apparently inviting home site should be denied them.

#### CHURCH NOTICES

##### Congregational Church

Rev. Paul W. Sprague, Minister. Mrs. W. M. Herman, Pianist. W. E. English, Choir Director. Sunday school at 9:45 a. m. Regular preaching service at 11 o'clock.

##### St. John's Lutheran Church

A. F. Wolff, Pastor. Sunday school at 9:30 a. m. English services will be held each Sunday morning at 10:30 o'clock, with the exception of the first Sunday of each month, when German services will be held at the usual hour.

##### Christian Church

N. E. Beach, Pastor. Morning Service 11 a. m. Subject, "Seven Words from the Cross." Evening Service at 7:30. Subject, "Conscience—How Formed. Does it Guide Aright?"

Clarence Aherin and Harry Beach entertained their Sunday school class of intermediate boys in the basement of the church Monday evening. They enjoyed a venison feed cooked in real Boy Scout fashion.

##### Genesee Valley Lutheran Church

Gerh. A. Peterson, Pastor. Sunday, November 14, at 9:45 a. m. Sunday school and Bible class. At 10 a. m. Norse communion services. At 11 a. m. Worship, with holy communion.

An offering will be received for missionary, educational and charitable activities of our church.

Everybody is going to be ready for the Catholic bazaar, November 23, in the Legion hall. Everybody is cordially invited. 20-1

#### Mrs. Burr Entertains

The card club and a number of invited guests were delightfully entertained Tuesday afternoon at the home of Mrs. W. W. Burr. Pinochle was played at five tables. The honors were won by Mrs. Jas. Magee and Mrs. Ira Hanson received the consolation.

Besides club members the guests were Mrs. Gibson, Mrs. J. Christenson, Mrs. Fred Shirrod, Mrs. Clyde Meyer, Mrs. Harold Haymond, Mrs. Harry Schooler, Mrs. Walter Emerson, Mrs. T. H. Herman, Mrs. E. W. Vanouck and Mrs. Mahlon Follett.

#### Will Hold Bazaar

The Genesee Valley Lutheran ladies aid will hold their annual bazaar on Saturday evening, November 20, at the parish hall, starting at 7 o'clock. Lunch will also be served during the evening. 20-1

M. A. Dean wants your shoes to repair. Leave at the pool hall or Ford garage. All work guaranteed. 20-2x

## Men's Ball Band Work Shoes

Comfort  
Good Looks  
Long Wear

MISHKO

THE

"BALL-BAND" WORK SHOE

THE Mishko Sole is the foundation of this "long life" shoe.

Tough and waterproof, this is the sole that stands such long use and much abuse. If you are "hard on shoes" we can surprise you with More Days' Wear.

"BALL-BAND" quality in every pair.

Here is what you want; long wear—extra long wear, with comfort and good looks "thrown in."

The Mishko Sole is a waterproof sole—so tough that it outwears a leather sole.

A "BALL-BAND" quality shoe all the way through. A big money's worth.

Men's 16-inch Hi-Cut—a wet weather shoe ..... \$8.50

Men's 5-inch work shoe ..... \$4.50

Boys' 5-inch work shoe ..... \$4.00

Do not confuse these Mishko soles with the ordinary composition sole. This sole will outwear any leather upper. One pair will convince you.

We now operate our own delivery.

SECTION OF  
**THE GENESEE NEWS**

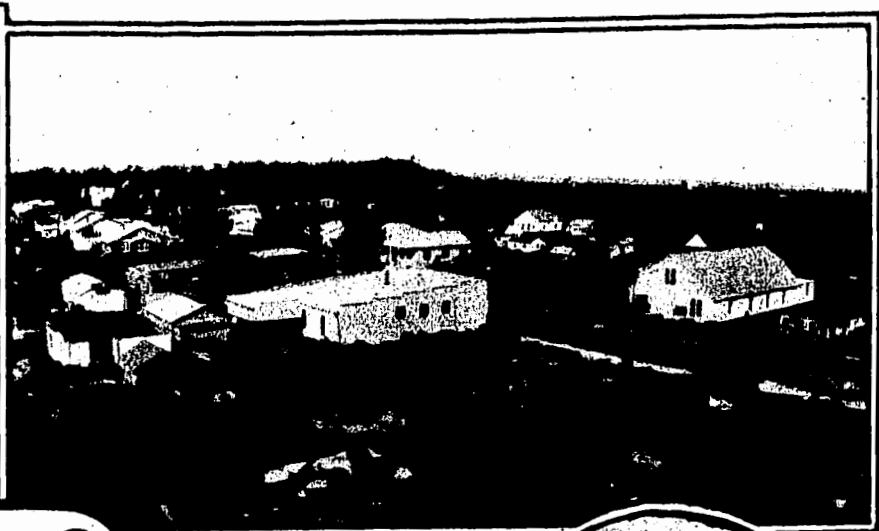

GENESEE, IDAHO, FRIDAY, NOVEMBER 12, 1926.

**AMERICAN  
RED CROSS**

*Serves Humanity*

A mid-western community demolished by a tornado. When disasters like this occur the American Red Cross, the nation's agency for relief, speeds to the scene.

# The American Red Cross in Action

A tornado swept town six months after the disaster. With the Red Cross as the agency of relief the people are in new homes, and community life is getting back to normal.

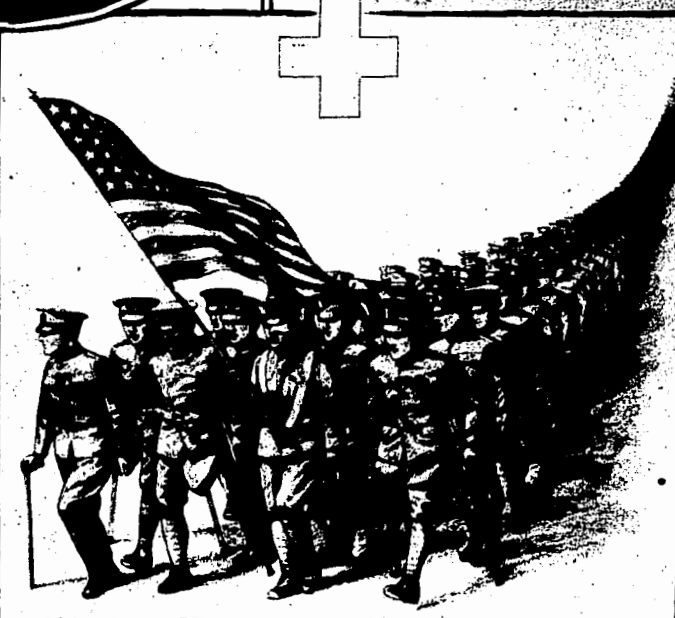

A daily health conference for mothers and children conducted by an American Red Cross Chapter in one of the island territories.

A class of girls learning the essentials of the proper care of a baby as part of their training in Home Hygiene and Care of the Sick.

Members of an American Red Cross Life Saving Corps going to the rescue of a drowning bather.

A solemn Red Cross obligation — an army of 75,000 sick and disabled men eight years after the Armistice.

Police officers, trained in Red Cross First Aid, reviving by prone pressure method a man rescued from the harbor waters.

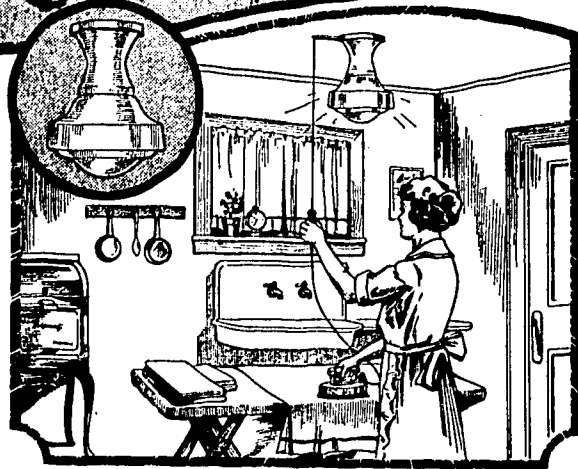

A Red Cross Nutritionist telling a class of children, all Junior Red Cross members, what food is best to keep them healthy.

A Red Cross Public Health Nurse advising a father what his children need to keep them sturdy. Grandfather is an interested listener.

### New Hats

I wish to announce that I have a fine new line of hats, in the latest of modes. I am sure that I can please you.

The new stamped goods are now on display also, with the new threads to work them.

My dressmaking parlor is open and I will do sewing of all kinds.

The Beauty Parlor will be open as usual, on Thursday, Friday and Saturday of each week.

MAUD A. SLIGHTOM

### No Lutfisk Dinner

Many were the expressions of disappointment heard when the announcement was made that the ladies of the Genesee Valley Lutheran church had decided not to give one of their famous lutfisk dinners in town this fall. Many of us had looked forward with pleasant anticipation to this event—but now our hopes are blasted and another perfectly good dinner will not materialize. But the ladies have decided to give their annual bazaar and a lunch at their parish hall, north of town, on the evening of Saturday, November 20. You are invited.

Don't forget the Lutheran ladies aid bazaar and lunch, to be held Saturday evening, November 20, commencing at 7 o'clock, at parish hall.

A man is never either so happy or so miserable as he imagines.

### PERSONALS

Mrs. Nellie Haymond left Saturday for a visit at Chesaw, Wash.

Raymond Hanson left Saturday for an extended trip to Longview, Wash.

Mr. and Mrs. Chas. Jain of Lewiston spent Friday with Genesee relatives and friends.

Mrs. Walter Jain returned Saturday after having spent the past several weeks in Spokane.

Joe Raymond of Spokane arrived last week and is visiting with his sister, Mrs. Geo. Follett.

Sig. Tidemann and Harold Hampton left Monday for an extended trip to Portland and other points.

Mr. and Mrs. Jack Vandenburg of Moscow were dinner guests of Dr. and Mrs. N. M. Leavitt on Sunday.

Mrs. T. A. Feeney and son, Thomas, jr., of Moscow spent Sunday and Monday with Mrs. C. P. Whalen.

Misses Agnes and Sylvia Johnson, who are teaching near Palouse, Wash., spent the week-end with home folks.

Miss Grace Jain, who is attending the U. of I., spent the week-end with her parents, Mr. and Mrs. Walter F. Jain.

Mrs. Lew Jain, Mrs. Ben Jain and Mrs. Nellie Haymond returned Saturday after spending a few days in Spokane.

Mr. and Mrs. Fred Nagel left Tuesday for an extended visit in the eastern states. They will visit in Michigan and in other states.

Mr. and Mrs. Will Borgen and daughter, Arline, and Mrs. Leonard Rudd left Saturday morning for a two-weeks visit in Portland.

J. P. Michaelsen, a former resident of the Genesee section, was a visitor in town from the Lewiston Orchards, where he has been residing since he left here.

Mr. and Mrs. Jack Barnes and son, Jack, jr., returned to Wilbur, Wash., Saturday after spending a few days with Mrs. Barnes' parents, Mr. and Mrs. Leon Follett.

Cliff Lundt, Harold Hallman and Dempsey Smith left Tuesday of this week for an auto trip to California, where they will spend the next several weeks viewing the sights of the Golden state. They expect to go as far south as the "greaser" country and will undoubtedly have many large stories to tell when they get back. (Cliff belongs to a coyote club, you know.)

Miss Rose Currin returned Tuesday after spending several days in Lewiston.

Miss Bernadine Hasfurther, who is attending the U. of I., spent Thursday with home folks.

Mr. and Mrs. Wm. Hordemann left Thursday morning for a seven-months' stay in Germany.

Edgar Geselchen of Portland visited a short time in Genesee Wednesday with relatives and friends.

Mr. and Mrs. W. W. Burr and Miss Ruth Martinson left Thursday morning for a week's stay in Spokane.

Mr. and Mrs. F. E. Griffith of Spokane were visitors at the home of their

daughter, Mrs. W. L. McCreary, and husband, Wednesday evening.

Mrs. Arthur Hampton returned Tuesday from Spokane where she recently underwent an operation. She is getting along nicely at this time.

### A Surprise Party

Misses Edna and Martha Grieser gave a party in the form of a miscellaneous shower in honor of Mr. and Mrs. Jack Harris, last Sunday evening.

Mr. and Mrs. Harris received many useful and beautiful gifts from their friends.

The evening was spent socially and in playing games. At midnight a delicious luncheon was served by the hostesses.

### Have Gone Hunting

Frank Jones, Al. Snowden, Fred Miller and Bob Wardrobe left Thursday for the Priest Lake section of the country on a deer hunt—and when Frank goes after anything he generally gets it.

### The Catholic Ladies

Will give their annual bazaar on Tuesday, November 23 (not on November 30, as was announced before). Dinner and supper will be served in the Legion hall. Everyone is welcome to enjoy himself with the rest of the folks.

All men are born helpless, but some help less than others.

### November 23—Tuesday

Before Thanksgiving day, is the day for the Catholic bazaar. Fancy and useful articles will be sold. Grab-bag for the young and old kiddies. A country store will have everything to folks. Dinner, adults, 50c; high school students, 35c; children under 12, 25c; Supper, 35c.

### Is Out Again

Little Glenn Osmundson, who had recently been so seriously ill, is again able to be out. While still weak he is getting along nicely and will soon be himself again.

## Christmas Goods

I will have a more complete and up to date line of goods than I did last year.

I purchased my goods from the same place and the same salesmen as did the larger towns.

I receive all my goods direct and I know that I can please you. All I ask is that you see my line before you buy.

Grant Clark

## Keep Your Eye On This Space

Not yet, but soon, there will be an announcement made in this space by Lewiston's Greatest Store.

The message will be unusual and interesting and tell a merchandising story that will be worth your most careful consideration.

Keep your eye on the R. C. Beach Company and we assure you there will be no disappointments.

THE BEST IS ALWAYS THE CHEAPEST IN THE END  
The value of drugs or a prescription is not in the price you pay—it is in the good they do. The failure of customers to demand drug quality is often responsible for serious results. All drug buyers should know that quality is the true test of cheapness. The same truth also applies to the buying of drug sundries.

Compare our prices with those asked elsewhere and carefully note the comparative quality of the goods.

If you pay higher prices than those asked here, you pay too much—if you pay less than our prices, you get inferior quality. Best quality at lowest cost is a rare combination—but that is just what we offer you.

## PUBLIC SCHOOL NOTES OF MUCH INTEREST

(Continued from first page)

gotten as far in their text as "Modern Times," so we are having a rapid review this week.

So far we have had perfect attendance this week. We hope it will continue that way.

### Third and Fourth Grades

The third grade geography class are completing some very interesting booklets on the use of wood.

For opening exercises this week we have been having some interesting lessons about the care of our bodies. After measuring and weighing we find that most of us are average or above average in weight. We endeavor to get weighed the first of each month. It was interesting to note that most every youngster had gained nearly exactly three pounds since the first of October.

Our attendance for this month has been nearly perfect. Grant Loncosty was absent Tuesday of this week because he was ill.

### First and Second Grades

First and second grades are very busy with their Thanksgiving program.

The primary room received the picture for the best attendance last month. We are very proud of that. Dallas Flomer has been absent several days on account of illness. He is having his tonsils and adenoids removed. We hope he is soon able to come back to school.

Will parents kindly help us to remember to turn our health cards in on Friday, November 12. They are dated November 11, but there will be no school on that day, it being armistice day.

Second graders enjoyed their spelling match Wednesday afternoon. We are having a rather difficult time keeping our flags up in front of our boys—some of us forget to keep clean hands and faces and so our flag goes down.

The first graders are reading stories from the blackboard—they like to read them very much.

### Good School Lunches

Here are some things you may not have tried in the school lunches; sliced meat loaf, rolls hollowed out and filled with chopped meat or fish, moistened with salad dressing and seasoned; salad; cheese straws; stuffed eggs; tomatoes and whole fresh fruits; cut-up fruit; brown-sugar or maple sugar sandwiches, made with crackers or hot biscuit so as to melt together; sausage and onion stuffing served on dates or figs; cup custard; a small box of raisins; a cake of chocolate; little tarts, cookies or frosted cakes; sandwiches of two kinds of bread; a bottle of orange or grape juice; lemon juice sweetened ready to make into lemonade at school.

See that sandwiches, cookies, slices of cake, fruit—in fact, everything that goes into the lunch box—are wrapped separately in waxed paper. This not only prevents crushing, but keeps them crispier or crisper, as they happen to require. Provide paper napkins, to keep hands and clothing clean, and to spread on the desk under the lunch.

### Vital Seed Corn

A good way to dry ears of seed corn is to string them, suspending the strings of ears in an open shed or loft. The ears, not being permitted to touch one another. The vitality of seed corn often is reduced by leaving it in a sack or pile for even a day after gathering. With some moisture in the cobs and kernels, the ears begin to sour or mildew in a remarkably short time during warm weather. If left on the plant long after ripening, the kernels may sprout or mildew during warm weather or be injured by freezing.

Seed ears should be picked, therefore, as soon as thoroughly ripe and placed where they will be safe. If they contain much moisture when picked they must be stored in such a way that there will be a free circulation of air around each ear.

### Why Not Move to Russia?

When a prominent motion picture producer recently arrived in the United States after a tour of Europe and Russia, he was reported as advocating government ownership of motion picture films in this country. The remarkable results of government direction of motion picture industry in Russia, he said, led him to advocate the plan for the United States.

Would he also advocate government ownership of newspapers and publishing houses, which from an educational standpoint excel the moving pictures? Why is it that persons who favor government ownership of industry do not stay in the countries where this system is in vogue?

Read the ads.—Keep posted.

## HER EXILE

By Jane Jordan

She came among them in strange robes, and they questioned her. Her accent was not successful. There was a kind of haughtiness about the new resident, which forbade intimacy. Later it was the exacting townsfolk who encouraged the coldness. Mrs. Gay was not desirable, they decided. True, her frocks in their modest good taste were superior, and the bungalow she had taken the finest in town.

There was craning of necks on Sunday when the remote neighbor attended service at the beautiful stone church, whose ancient date was registered on the doorpost. The organ was the pride of all. It was the gift of a now great musician who had come from Plainville in his boyhood.

Rupert Rolf had repeatedly promised to return to his old home town to give an exhibition of his skill. The promise had been unrealized. One day printed placards announced that the musician was to arrive that week in Plainville; the following Sabbath he would play upon the gift organ in the beautiful church.

The placard in the store window seemed to scream at her with its red letters—Rupert Rolf! Rupert Rolf! And next Sabbath he was to play at the church she attended. Well, might she not still attend?

"Good-by," said the little girl, "my mamma would not want me to see Mr. Rolf, your eyes are well."

Mrs. Gay laughed shakily. "Why, so they are," she said. "She wore a dark dress the day of Rupert Rolf's church recital. She went early to take her seat in the gallery, and sat palpitating throughout the preliminary opening of the service."

The minister explained that he was waiting, with little hope, the appearance of Rupert Rolf. The musician had not arrived in the town as expected, detained by engagements, but he had sent a letter, assuring his presence if possible, at the morning service.

The allotted time of waiting passed. The minister looked, smiling, over his people. "Our hymn is 'The Morning Star,'" he volunteered to play for this morning? Please," he begged—and paused. There was no response; again the request was given.

"This is an unusual circumstance," the minister explained, troubled. "Will not some one kindly help in this manner?"

Again no response. Some one arose in the gallery—signified her willingness. "I am a stranger in this town," she volunteered to play the volunteer organist who went swiftly to take her place before the keys. They saw a dark-clothed back, an enveloping small hat.

The music poured forth. It was an offertory. This was a musician indeed who played for them, and their hearts recognized the sympathetic skill, the beautiful rendering of a great composition.

She stood a moment, finding her way—the volunteer organist was the disapproved Mrs. Gay. Her face shone white and sweet beneath the brim of the prim black hat—then she was seated beyond their sight. The minister came down the pulpit stair hurriedly afterward that he might not miss her, to extend his thanks. Many lingered, looking back curiously. A man arose in the rear of the building—a distinguished-looking blonde man. He, too, pressed hurriedly forward until he stood with the minister. And the one who had come to his assistance. But the man's hand went to the woman's hat—"Gay," he murmured chokily. "Gay!"

The little woman smiled; a smile which set her blue eyes all at once ashine. "Rupert!" she answered him; the minister waited. Suddenly his hand went out to the man. "Rupert Rolf!" cried Reverend Roberts. "Here and I did not see you."

"I arrived very late," the musician replied. "My substitute was already at her post filling acceptably my place." He hurried about, "Mr. Robert," said Rupert Rolf, "let me present to you my wife."

The minister hesitated—"Mrs. Gay," said the musician, "is my wife's given name. To you I may as well now explain. My wife and I were rival musicians. We went abroad, under a musical tour. After our marriage we traveled together giving recitals. I had lived but for my music before I met her. You know, my life was so And—in an artist's madness of pride—I found myself humiliated when she said, 'I brought to my wife to wish to excel—by my wife's superior performance. I and my loud attempt was lost in her glory; can you understand a man's bitter jealousy? Now—I am overwhelmed at that madness. I know not what reward she has brought to my wife. I know that next day she left me secretly, and my most absorbing effort to find her was unavailing. In order to place me first in the musical world which she thought my all—she had

### "The Grand Duchess and the Waiter!"

with ADOLPHE MENJOU and FLORENCE VIDOR

A snappy sparkling comedy relating the exploits of a rich boulevardier who masquerades as a waiter in order to make love to the outwardly haughty, inwardly warm-blooded duchess who has caught his fancy.

The funniest of all French love comedies. With Menjou as the gay Parisian love-adventurer. A snappy love cocktail with a real Parisian flavor.

A picture that is full of fun and pep from the very title to the last little tiny detail. You will hold your sides and roar with laughter! You can't help it.

### Two Reels of Comedy

15 and 25

### The Show Must Go On

The above slogan was the invention of Old John Robinson, one of America's greatest circus managers, the esprit de corps of the whole organization.

This sentiment was drilled into the mind of every performer and employee—there was a date at the next town where the entertainment must be pulled off without fail.

A cyclone might prostrate the lions, tigers, elephants or the monkey cage might mire down in bad roads, but "the show must go on," and meet every engagement.

Just so with our country and its institutions. There will be storms—some of the wild animals in the political menagerie break loose, but all important functions of the government must go on.

Congress, the supreme court, the federal and state institutions and departments of government must perform their parts in the program of self-government by the people, for the people, and for the people—the show must go on.

None of the important features on the regular program demanded by the American people, can be missed or will be omitted at any date ahead where Uncle Sam has billed his continuous performance—the greatest and best show on earth.

Genesee is a good town.

## LUMBER MERGER SHOULD AID INDUSTRY

By CHAS. E. HUNT

SHIPPING MEN throughout the world who have been advised of the proposed merger of West Coast lumber mills are confident that this plan in its completed stage will steady lumber prices, elevate gross margins to all the mills and by steady prices will not affect the more secure the dealings in all tonnage matters from coastwise to offshore.

The tendency of American industry is toward consolidation. Proof is lacking that widely scattered units, insufficient business to reach round and temptations to cut prices beyond the point of profitable operations eventually drives such industry, if vast enough, into amalgamation. Gradual drift back to the fundamentals of good business that for so many years characterized and made possible the economic greatness of the United States is observed, the last to respond being the mills cutting timber in the last Great West.

With only a third of the annual West Coast production of 10,000,000 feet per annum is expected to enter the merger, this one-third is ample to eliminate and make forever extinct those occasional "lean spots" that occur through each year with distressing frequency. Business on land by the rail routes has settled into a replacement basis. Competition among the railroads for business has developed to such a service point that a retail lumber dealer in Alliance, Neb., for instance, can order a carload to land and unload it in his own yard in 8 to 11 days. The movement by rail takes 50 per cent of the annual West Coast lumber production.

Various attempts have been made by lumber buyers in Japan and Australia, who make up the major consumption of the foreign trade, to go on something like a replacement basis, that is, to buy more as needed than in a speculative way, which has its drawbacks. This work for two or three years, conducted by the Douglas Fir Exploitation & Export Co., has for its object the sale to Japan only on the C. I. F. basis. There has been some opposition in Japan, where many buyers believe that the C. I. F. plan carried to its logical conclusion would build up a close held corporation that could dictate prices, and sell on a basis of price from the shipper to the buyer of the f. a. s., costs, insurance and freight added, and takes considerable cognizance of world tonnage both current and future when booking its space. Generally operators not allied with the organized group prefer to trade on the f. a. s. basis as at times lumber prices are so close that they can make a profit on the difference, tramps, usually. All this disorder, viewed from the angle of the steamship owner or operator, does not clean up space offered, and the shipping market is a distress market to bearish attacks, with cancellations and resales a part of the daily program. It has not infrequently happened that, when orders for the Pacific were not at hand when the ship arrives that the space owners plead for release, and it is not uncommon for the vessel operators to grant such pleas, especially when the market is asking the favor of good customers. These are merely incidents, but they are undesirable circumstances that can be eliminated by the merger idea.

There has never been a time over a period of years when the demand fell under 10-15 percent of the volume of lumber produced. Control of this amount will enable the big corporation, at will, to close down certain groups, such as remain out of contact until the demand is built up to normal absorption. This is the plan of other merged corporations. Lumber mills believe they are performing likewise in their own industry.

Most of the lumber mills are losing money. It is established that they will lose less by keeping in operation than to shut down under the present plan. Maintenance by the merged group of sufficient production and no more than the market requires, will automatically raise prices, invite confidence of buyers, and sell the construction world on the idea that lumber can nevermore be a buyer's market, and so invite forward contracts for steamships both as to distress and characters.

As far as the Antipodes lumber trade is concerned lumber buying must be done on the 90-day basis. Allowance must be made for the long time in transit, during which many changes of price may occur. Conceding that the merger of the mills will steady prices, ocean space must of necessity go on a much more stable basis, with shippers able to agree to maintain the possible future sales volume. Any commodity moving in bulk to be profitable to any or all handling it can turn a better profit under better marketing conditions where prices of the commodity and the costs of transportation settle to a level where there are few fluctuations.

Fluctuations of steamship space or tonnage affect lumber buyers exactly as would rapid changes of price in the commodity to be moved. Holding lumber prices, or any measure that will hold them steady over a period of time as now seems possible would have very much the same effect on

shipping, but it is possible for ship-owners and operators to enjoy beneficial results therefrom. Loading lumber shippers are of the firm opinion that tonnage at first will gradually steady down, that once buyers of lumber moving by water understand that the merger means regular profitable operations for the mills they will be inclined to make their reservations farther into the future. If the ideas of the leaders in the merger plan are correct, large lumber buyers can contract with safety for 90 days or better ahead and feel the assurance that competitors cannot come along, buy lumber and freights for less, and beat them with a lower price to the retail merchant or wholesaler.

## Grow a Holly Tree For Your Own Front Yard Say the Scientists

The Doyle Thompson Institute for Plant Research

"A HOLLY tree for everybody's back yard" is one of the slogans of the Doyle Thompson Institute for Plant Research at Yonkers, New York, where Dean P. W. Zimmerman of the University of Maryland, in his vacation hours, has for two years been working on the problem of propagating difficult and desirable trees from cuttings, specializing on the holly among others. The urge that everyone feels at Christmas to "say it with holly," the feeling that no one is devoid of holly wreaths hanging in its windows, threatens this beautiful tree with extinction, especially as it is slow growing and has been difficult to propagate.

The Institute specializes on long-time difficult problems, and this one is not completely solved, but when all the tricky preferences of the young holly have been discovered, it is expected that little holly trees in pots, bearing their full quota of red berries, may be due in two years' time, and that eventually everyone may pick his holly from the tree on his own lawn. If, as desired, instead of being a localized rarity, threatened each year by being literally stripped bare or torn up by the roots.

The scientists are shy of giving out particulars at the moment because without due attention to detail, some false and undesirable trees may be raised a holly tree of their own and failed. But it appears that one of the secrets of the Doyle Thompson method is to plant in the fall from the first year or older wood. Again great care must be taken in the cutting and planting, and using the most modern equipment for determining the growing and reproductive needs of different plants. All this is with a view to increasing agricultural and horticultural prosperity of every kind, and speeding the production in a constructive way.

Indeed, having due regard for the individuality of the plants and not resting on past theories or too broad generalizations leads to important discoveries in the plant world the common results of which often seem out of all proportion to their simplicity.

### NEW COMMITTEE CHAIRMEN NAMED AT THE ADVISORY BOARD MEETING AT PORTLAND

THE appointment of H. S. Welby as chairman of the Cattle and Poultry House Committee of the Pacific Northwest Advisory Board, was confirmed by the executive committee at the meeting held at Portland recently. Mr. Welby succeeds C. E. Howell, who has resigned as chairman of the Dairy and Poultry Products Committee with the present chairman, S. D. Sanders, president of the Washington Cooperative Poultry Association. The new Wool Committee, H. W. Hay and Hugh Sprout were named vice chairmen of the Hog and Sheep committees, respectively.

The suggestion was made and approved that the Civic and Commercial Organizations committee be divided and that the Wholesale and Retail Trades be made a separate committee.

Rae C. Johnston, traffic manager of the Schwabacher Hardware Company, Seattle, was elected chairman of this committee. It was also decided to separate the Dairy and Poultry Products Committee with the present chairman, S. D. Sanders, president of the Washington Cooperative Poultry Association. The new Wool Committee, H. W. Hay and Hugh Sprout were named vice chairmen of the Hog and Sheep committees, respectively.

It was also decided to separate the Dairy and Poultry Products Committee with the present chairman, S. D. Sanders, president of the Washington Cooperative Poultry Association. The new Wool Committee, H. W. Hay and Hugh Sprout were named vice chairmen of the Hog and Sheep committees, respectively.

The suggestion was made and approved that the Civic and Commercial Organizations committee be divided and that the Wholesale and Retail Trades be made a separate committee.

Rae C. Johnston, traffic manager of the Schwabacher Hardware Company, Seattle, was elected chairman of this committee. It was also decided to separate the Dairy and Poultry Products Committee with the present chairman, S. D. Sanders, president of the Washington Cooperative Poultry Association. The new Wool Committee, H. W. Hay and Hugh Sprout were named vice chairmen of the Hog and Sheep committees, respectively.

## Manikin Plays Important Part in Designing of Special Machinery

Card Board Doll Used in Chicago Plant to Determine Whether Operator has Room to Work

A cardboard doll that would duplicate the heart of a youngster plays an important part in the designing of special machinery by the Western Electric Company's Hawthorne Works in Chicago.

Although a visitor to the plant might be assumed to see a serious faced design specialist apparently playing with a manikin and making it go through the motions of operating a machine, this procedure has proven of great benefit in proportioning machine equipment so that the working parts are convenient to the operator.

The manikin is made one-fourth the size of the average man, as that is the scale to which drawings of machine equipment are usually made. To determine whether or not the machine as designed will be convenient as possible to operate, the manikin is placed before it in the operator's position.

In this way the designer can readily see whether he is giving the operator sufficient room to work. To determine this merely by measurements is a tedious task, due to the many different positions the body can assume and to the complications in combining them in all their varieties.

The manikin was carefully designed. The joints of the body are located accurately, so that the figure will bend forward and backward correctly at all the principal joints, including the waist.

As lateral motions are almost unnecessary in the uses to which the manikin is put, it is not equipped with ball and socket joints or complete spinal flexibility.

her respectively and that the meeting places be decided by the executive committee. It was decided to include in the present Agricultural committee the chairman of each agricultural commodity committee group.

The by-laws of the board now read that an election of officers shall be held at the annual meeting in December. To simplify the selection of officers at the meeting this December, the executive committee recommends that the General Chairman be authorized to appoint a nominating committee consisting of two members of the executive committee and three members from the personnel of the commodity group committees or members at large, a total of five.

Ernest Dolge, Tacoma lumberman, was elected to the executive committee succeeding H. A. Rhodes, of Tacoma, who had resigned. John H. Barry, of Portland, insurance man and member of the Board of Harbor Commissioners of Portland was named the fifteenth member of the executive committee. The by-laws provide for a committee of fifteen but up to the last meeting only 14 had been named.

The next meeting of the advisory board will be held at the Olympic Hotel, Seattle, in December.

Say, Bill, whenever I go to Spokane I never miss getting some of those dandy meals at the Tray Tavern on Howard Street just north of Riverside Avenue.—Adv.

Police of Charlotte, N. C., will no longer withhold names from reporters. Police officials recently issued a blotter system whereby names of all persons arrested will be available.

## For Better Health

PUBLIC HEALTH IS PUBLIC HEALTH  
COMPILED BY THE  
PUBLIC HEALTH LEAGUE  
OF WASHINGTON

DAILY DOZEN

School authorities are discovering that children at play should have their physical directed. They need a physical examination before they are permitted to engage in certain sports. They feel well and enjoy the games, but they may overtax the heart, or muscles or the nerves.

Grown persons too! Many adults send for someone's book on physical culture, and without determining whether they are in condition to follow the courses outlined, will do so enthusiastically—only to find that they have done themselves more harm than good.

This applies particularly to those of middle or advanced age, of sedentary habits. Such persons usually are overweight, and have an accumulation of fat or fatty degeneration of the muscles. When a muscle is in this condition, it will remain defective; it can easily be overtaxed, and, if this muscle happens to be of the heart, overtaxing must result disastrously.

Certainly, a proper amount of suitable physical exercise is good for any one. But before taking a course of anyone's physical development or trying to do the exercises therein described, get your physician's advice about it.

A word further concerning the setting-up exercises broadcasted each morning. These are usually sent out from Y. M. C. A. gymnasium classes and have been arranged for young men, for whom they are beneficial. But quite often the parents of the children try to take them. Even grandpa sometimes has an ambition to show his agility. There is where he shows his dotage. For these exercises are usually not suitable for grown-ups.

They are nearly always quite unsuitable for old people. Don't attempt them unless you are very certain that you are qualified for them.

"What kind of exercise is suitable for old people?"  
Walking. There is nothing better. Even though you are a cripple walking will usually be good for you.

Struthers & Barry, recently relieved of the operating management of the American-Far Eastern line by the Shipping Board, has no intention of abandoning the shipping business, announced Harry R. Struthers, chairman of the firm at San Francisco. Plans are being formulated, he declared, for continuance of the firm's service. They are nearly always quite unsuitable for old people. Don't attempt them unless you are very certain that you are qualified for them.

Police of Charlotte, N. C., will no longer withhold names from reporters. Police officials recently issued a blotter system whereby names of all persons arrested will be available.

# CHURCH BENEFIT

Sale Starts Monday, Nov. 15 **SALE** Sale Ends Saturday, Nov. 20

Only a month until Christmas, why not pick out some useful gifts and let your church make the 5 per cent.

## HERMAN'S HARDWARE SHOP

LAMP SHADE FRAMES  
Bed lamp frames with silk cord and socket, at \$1.25

Bridge lamp frames, special art silk braid and beautiful art silk fringe in Old Rose, Copenhagen and Black and Gold—use odd pieces of silk and make up several of these lamp shades for Christmas.

Special Hand Saw \$2.50  
Saw larger than cut shows

Specially Priced Shears  
A size for any use.

Just received a big shipment of eve trough and down spout—fix up those building now.

A Corley Roller Feed Mill, Special Price \$75.00

De Lavel Feed Cutter, Regular \$90.00 Value \$65.00

Poultry Drinking Fountains  
Don't neglect warm water for your chickens this winter \$1.00, \$1.25, and \$1.40.

Sure Lay Egg Mash \$3.00 bag  
Oil Meal \$4.50 bag  
Corn Meal \$2.75 bag

5 per cent to Your Parish  
No discount on tax prices

On the above dates we will deduct 5 per cent from your purchases, and this will be placed in a sealed box marked for the church you designate.

There is no chance, no lottery, your church will receive 5 per cent of all goods purchased by the people of that church. This will be paid to your church in cash at the end of the sale.

Further—we will give two cash prizes—First \$5.00, Second \$3.00 to the parish having the largest fund when the boxes are opened.

Every one purchasing goods during this period may designate the church he wishes to have this donation.

Goods not in stock can be ordered and you can have the 5 per cent apply on this fund if you wish.

### 50,000 MILES OF ROADS ARE BUILT EACH YEAR

Highways in the United States are being built at the rate of 50,000 miles a year, according to the American Road Builders association.

This phenomenal rate necessitates a yearly expenditure by state, local and federal highway bureaus of \$1,200,000,000.

"The road system in the United States is so enormous that few laymen can grasp its meaning," H. C. Shirley, president of the association declared.

"There are enough roads in this country to completely gird the earth 120 times, or estimating the average width of 18 feet, to make a single highway around the world 2100 feet in width," Shirley said.

"The first modern transcontinental highway will in all probability be completed before the end of the present year. This will be a hard surface road of enormous width from coast to coast, passing through Washington, St. Louis, Phoenix, El Paso and southern California. Its length is a little more than 3400 miles and already more than 90 per cent of the road has been completed.

The immediate goal of the highway associations, Shirley said, is the completion of the \$12,000 mile federal aid system. Already 140,000 miles have been improved to some degree, he said, and work on the remainder is progressing favorably.

Solving the Farm Problem  
In four years there has been a jump in Idaho farm production that is phenomenal. In 1921, carload shipments over the Union Pacific from the farms of southern Idaho totaled 151. In 1925, they totaled 1213. They included 434 carloads of butter, 450 carloads of cheese, 298 carloads of eggs and 116 carloads of poultry. It will be noticed that the shipments were butter or eggs or poultry, rather than hay or other bulky commodities.

The Idaho farmers have found that to reduce feed to the higher values of dairy and poultry products, results in products for which there is reader demand in the markets.

One Who Seldom Speaks  
He who seldom speaks, and with one well-timed word can strike dumb the quaquacious, is a genius or a hero.—Lavater.

### PUBLIC SCHOOL NOTES OF MUCH INTEREST

"The Light of Western Stars"  
At the High School opera house on Friday and Saturday nights, November 19 and 20, the feature film will be one of Zane Grey's masterpieces, "The Light of Western Stars," with Jack Holt, Billie Dove and Noah Beery in the principal roles.

"The Light of Western Stars," another of those clean, wholesome, typically American stories which Zane Grey is famous, has been filmed by Paramount under the direction of William K. Howard, the producer of that epic photoplay, "The Thundering Herd."

Picture goers who have come to expect certain things in Zane Grey productions will find them in overflowing measure in his latest colloidal opus, "The Light of Western Stars" is a romance of the Arizona border where desperadoes clash with the sturdy Americans who are building up the great range country.

The story vividly pictures the last stand of the bold, bad men of the west—outlaws, cattle rustlers and pillagers—on the last strip of frontier country, and the love element on which is pivoted the thrilling battle against high-handed villainy is ingeniously combined with red-blooded action and compelling drama.

"Two Can Play"  
The feature film at the Hotel theater for Saturday night, November 20, will be "Two Can Play," with Clara Bow, one of the stage's flapper flappers, in the leading role.

Clara Bow is her usual flippant self but is in a situation that requires considerable tact and mental agility to handle. Two men are wooing this capricious lady, and when the three are marooned on a desert island, she is in considerable of a quandary to pick the winner. How she does what she does, and who proves the best man is told in a new and exciting manner calculated to thrill the most blasé of movie-goers.

"A Hero of the Big Snows"  
For Sunday night, November 21, you will have another opportunity to see Rin-Tin-Tin, the wonder dog, in his best picture to date.

The regeneration of a desolate, youthful heart through the splendid character of Rin-Tin-Tin, the dog of almost human sympathy and understanding. Dumps of heroism and courage against the majestic beauty of the snow covered north, where need drives hard and love bears much. Desperate hours of hope, battling despair and then—Rinty's magnificent rush through the storm to save the lovers he loved.

"The Far Cry"  
On Wednesday night, November 24, the feature film at the Hotel theater will be "The Far Cry," with Blanche Sweet in the leading feminine role.

A novelty in the way of a war manion is said to be offered in "The Far Cry." The aquatic wonder consists of a floating villa luxuriously furnished in the American language it is a houseboat—and then some.

Floating villas like the one shown in the picture are said to be fairly frequent in the pleasant water highways of Venice, where they form an adjunct to the luxurious inland estate.

The action of the play is laid entirely in Europe, divided between Paris and Venice, and concerns the love quest of a young American girl.

Boys Not Guilty  
The News is very glad indeed to announce that the boys who were out pulling off a few Halloween pranks, were not guilty of cutting the tire on Mrs. T. H. Herman on Armistice Day. The boys were brought down town and let out of the tires. It has been learned on good authority that the tire was cut before Halloween night.

The News man came into possession of what appeared to be authentic information regarding the tire, and takes this occasion to exonerate the boys.

Progressives Entertained  
The progressives were entertained at a 1 o'clock luncheon at the home of Mrs. T. H. Herman on Armistice Day. The afternoon was spent with needle work and social converse. The rooms were appropriately decorated for the occasion, among which was an American flag carried by Mrs. Herman's father in the Civil war.

Mrs. Roy Edwards and Miss Margaret Sampson assisted Mrs. Herman. The next meeting will be held at the home of Mrs. Elmer Vanouck.

A. E. CLARKE, Pres. N. S. VOLLMER-HOPKINS, V. P. C. P. WHALEN, Cashier

### You Can't Afford to Miss It

The dinner and supper to be given by the Catholic ladies on Tuesday before Thanksgiving is something to look forward to. It will be satisfactory to everyone. The bazaar will end with a public dance in the Legion hall. Dinner, adults, 50; high school students, 35c; children under 12 years, 25c. Supper 35c.

### W. W. P. News

When tunnel crews of the Chelan power project, after boring towards each other for four months, joined their tunnels a few days ago they completed a continuous tunnel 6954 feet long in which the work of concreting can now be carried on, according to word received from V. H. Greaser, chief engineer of the Washington Water Power company.

When the two sections of tunnel were brought together, the theoretical center survey lines from each section of tunnel met within three-quarters of an inch.

The entire tunnel, when all the sections are completed, will be approximately 12,000 feet long. Crews are working in different sections of the tunnel at the same time, and 8,000 feet, or 66 per cent, is the total amount of excavation to date.

This does not mean that the tunnel is two-thirds completed, for there remains the huge task of lining the tunnel with concrete, from 15 to 18 inches in thickness. This will require 50,000 barrels of cement and a mountain of sand and gravel. Two washing plants have been erected in the bed of the Chelan river and large supplies of sand and gravel are being washed and stored at the dumps. Concreting has been begun in the continuous tunnel section just completed.

States showing the greatest increase in automobile registrations the first half of 1926 are Florida, 76.2 per cent, Michigan 24.3 per cent, Mississippi 21.0 per cent, Arkansas 19.0 per cent. Increases between 14 and 15 per cent are reported by Georgia, Idaho, Nevada and North Dakota.

# For Health's Sake

REGULATE THE TEMPERATURE OF YOUR LIVING AND WORKING ROOMS

The temperature of the air you breathe has as much to do with your health as the quality of food you eat. In order to have perfect health and sanitation you must have perfect ventilation. Get a STANDARD THERMOMETER

and keep the temperature at a point which your physician says is necessary for perfect health. These thermometers register accurately and will last for years. Have one in your living room and office and insure the health and comfort of others as well as yourself.

## PUBLIC SCHOOL NOTES OF MUCH INTEREST

(Continued from first page)

a meeting after school Monday for the purpose of deciding when and where their next party will be held.

### Fifth and Sixth Grades

A new pupil, Wayne Roach, enrolled in the sixth grade last Friday. We have finished our new black-board border, consisting of shocks of corn and pumpkins.

We are having a contest between the fifth grade boys and girls in arithmetic. At present the girls are ahead, but the boys are doing fine.

Lucille Wishard was absent Monday because of illness. We were visited, Tuesday, by Rev. Covington, superintendent of the Lewiston Orphans' home. He told us about his little folks, and we hope to have a good Thanksgiving offering to send them.

### Third and Fourth Grades

We were all very sorry Friday to see Burton English pack his books and leave us. Burton, who is in the third grade, is moving with his parents to Sprague, Washington.

The fourth grade geography class have completed the study of the Northwest states and as a final review are making some very interesting booklets about these states.

The third grade geography class are making an interesting study of stone and it's uses.

All the other classes are showing much progress, especially the fourth grade arithmetic class. They have learned to really enjoy working their long division.

Howard Carrio was absent from school Monday and Tuesday of this week because he was ill.

### First and Second Grades

We are busy making big fat Thanksgiving turkeys and big yellow pumpkins, for Thanksgiving is al-

most here. We have a new sand table this week our Thanksgiving story.

Some of us have been indolent, I am afraid. Our fingers have gone down because we let our hands get soiled and didn't keep our desks clean.

Handwork classes are busy with decorations for Thanksgiving.

The costumes we need for Thanksgiving we should have by Monday afternoon, November 22—parents have pictures of them to know how we would like them made. We appreciate your help and wish to thank you very much.

The snow has brought sleds and snowmen in evidence. The kiddies always enjoy the first snow of the season.

Elbert Hollingsworth has been absent several days on account of injuring his arm. He is back in school again.

Wednesday afternoon at 2 o'clock on November 24, the primary room will have a Thanksgiving program. We cordially invite you all to come to our room on that day.

The primary children are very busy selling hearts for the benefit of the orphans in the Lewiston Children's Home. The children will appreciate your help.

### First Real Winter

The first real winter hit the Genesee section Monday, it having commenced snowing about 11:30 and continued intermittently until sometime during Monday night.

Had the ground been frozen there would have been several inches of white on the ground and there is little doubt but that slight of various kinds, would have been very much in evidence, but as it was, it was wet and soft and wasn't even good for coasting. However, it did not leave at once and traces of it might be seen for several days.

Don't miss the dance at the K. P. hall Thanksgiving night. You will need the exercise to settle your Thanksgiving dinner.

—the Grebe Synchronphase brings order out of the congestion of radio programs

OUT of the scramble of programs from broadcast stations you can select, with the Synchronphase, just the one desired. For you, other stations do not exist—until you want them.

This "selective sensitivity," the most sought-for element in radio reception, is given by Grebe Binocular Coils, found only in the Synchronphase. Another Synchronphase advantage is the ease in getting the right station quickly and clearly. Grebe S-L-F Condensers distribute stations equally around the dials, preventing the usual low-wave crowding, which necessitates, at times, almost microscopic tuning. Here are three other important reasons why the Synchronphase gives the utmost in reception and simplicity of operation:

It receives all stations—high-wave and low-wave; and because of its Low-Wave Extension Circuits, it tunes in over 100 low-wave stations not now reached by other receivers. The Synchronphase has a range of from 550 down to 150 meters. It is thus equipped for the future as well as the present.

One dial operates all—The Grebe Flexible Unit Control permits the setting of two or all three dials by one; or they may be adjusted separately, at will.

Perfect tone quality control—The Grebe "Color-tone," perhaps the greatest recent advance in radio reception, enables you to vary the timbre of voice or instrument to your taste, independent of the loud speaker's influence. It removes all taint of artificiality and reduces, to a great degree, static disturbances.

Ask for a demonstration of these exclusive Grebe advantages; then compare the reception with that of other receivers

All Grebe apparatus is precision ground and polished

Flexible Unit Control permits one, two or three-dial control.

# MEYER & SON

## SALESMANSHIP FOR PARENTS

Has your child a good appetite? Is he eating the right food or is the demand for spinach and other healthful fare falling off in your home? If the latter is the case you should adopt better methods of salesmanship, according to Happy Goldsmith in "Children, The Magazine for Parents."

"The parents of the country should form a merger and get some system into their business," declares the author. "Perhaps the article you are trying to sell is neither attractive nor appetizing," says Mr. Goldsmith. "Is it made irresistible to your public, so to speak? Remember, your competitors are flooding the market with highly colored sweets and brightly colored pop bottles."

"Does your product appeal to the eye and to the taste to your customer?"

"If it does, and he still refuses to clip the coupon and sign on the dotted line, look over your sales force. Are both of you parents attractive, popular salesmen, who use your own products?"

"Don't tell me, I know the answer. 'The next important phase of your campaign is the publicity.'"

The High Pressure Parent. "Try this out on your adolescent sometime. One reason Red Orange is always in the pink of condition is because he eats green vegetables."

"I'll admit it isn't very clever, but it's better than that one I once heard, which ran: 'For heaven's sake, eat your spinach!'"

"Why not name a few dishes after these heroes? Why not 'Babe Ruth's Home Plate' or 'Mary Pickford's Beauty Compound'?"

"I have heard so many parents, genuinely anxious over the health of their children, exclaim: 'Now I've told you nearly seven times to eat your spinach. I don't want to hear another word out of you. Just keep still and eat it or you'll be even punier than your are.'"

"Supposing the clever fellow who sold you your vacuum cleaner had forced his way into your home and announced in a most unpleasant voice: 'I've asked you seven times to buy this cleaner. Now don't argue with me any more. Just keep your mouth shut and buy it or your house will look even dirtier than it does!'"

"Parents, be patient with your child. 'Don't' is a very common word. 'Try not to be too eager. As worried as you may be regarding your child's health, be just as indifferent outwardly as possible.'"

Sales Talk. "It makes no difference whether you are selling a vacuum cleaner, a dish of spinach, or a bath, the job can easily be done if a real desire is finally created. It may take much careful advance work before your customer even nibbles at the spinach. Perhaps during the entire campaign absolutely no signs of interest will be shown. But if your spinach is tempting, and if your publicity is good, and if your sales talk is both appealing and in the language of your customer, then trade will pick up and your hard-earned bill will begin to pour in."

"Of course, some innocent parent may try the idea out, and just before closing the contract will let it be known that there is a whole kettle of spinach out in the kitchen which must be eaten so that it won't go to waste. If your customer doesn't dash away after that one, it's only because he's too weak."

"No, good friend, we haven't a ketchup going to waste. On the contrary we have a limited amount. In fact, what you see in the dish before you is all that there is in stock. Even that has been practically promised to somebody else. I'm sorry, because this evening it is unusually delicious."

"Must I be so strict as to remind you that when the supply goes down, the demand shoots up?"

## 11:00-day Luncheon Clubs

By JANET JANUARY

In the big offices of downtown New York noon-day luncheon clubs are quite the thing these days. Nearly every girl likes to play at housekeeping and the office luncheon gives the business girl this opportunity. It is quite common to find girls bringing in and taking sandwiches from home and at noon spreading clean paper over their desks and, as one of them explained, "getting jostling crowds and noisy, cluttered quick lunch places."

It is the desert the girls like to run over into and they take turns trying to outdo each other concocting macaroni and dressing new ways of serving that ever-pleasing desert—ice cream. "We use ice cream mostly," our friend explained, "because it is the only dessert we all like and it is nourishing, inexpensive, easy to get, and may be served in so many delightful ways." Here are some of "the ways" this bobbed haired young hostess employs.

When Bert, the office boy, has brought in the macaroni, she spreads a few macarons for each macaron with apricot jam. The ice cream is cut in thick slices. The macarons are placed on each portion and a little of the soft jam on top and the treat is served.

Two bananas to a serving are split lengthwise and placed on each dish. The cream is covered with squares of ice cream, and a caramel sauce is poured over all. The sauce is purchased in bottles or made at home.

Perhaps the most popular dessert made by the girls is the cream cut in slices on top of fresh lady fingers that have been split apart and are peering over adorned with a small bottle of clover honey to which has been added two tablespoons of orange flower water, and two tablespoons of chopped pecan nuts, or toasted almonds. Whipped cream may be added if liked.

## Favorite Recipes of a Famous Chef

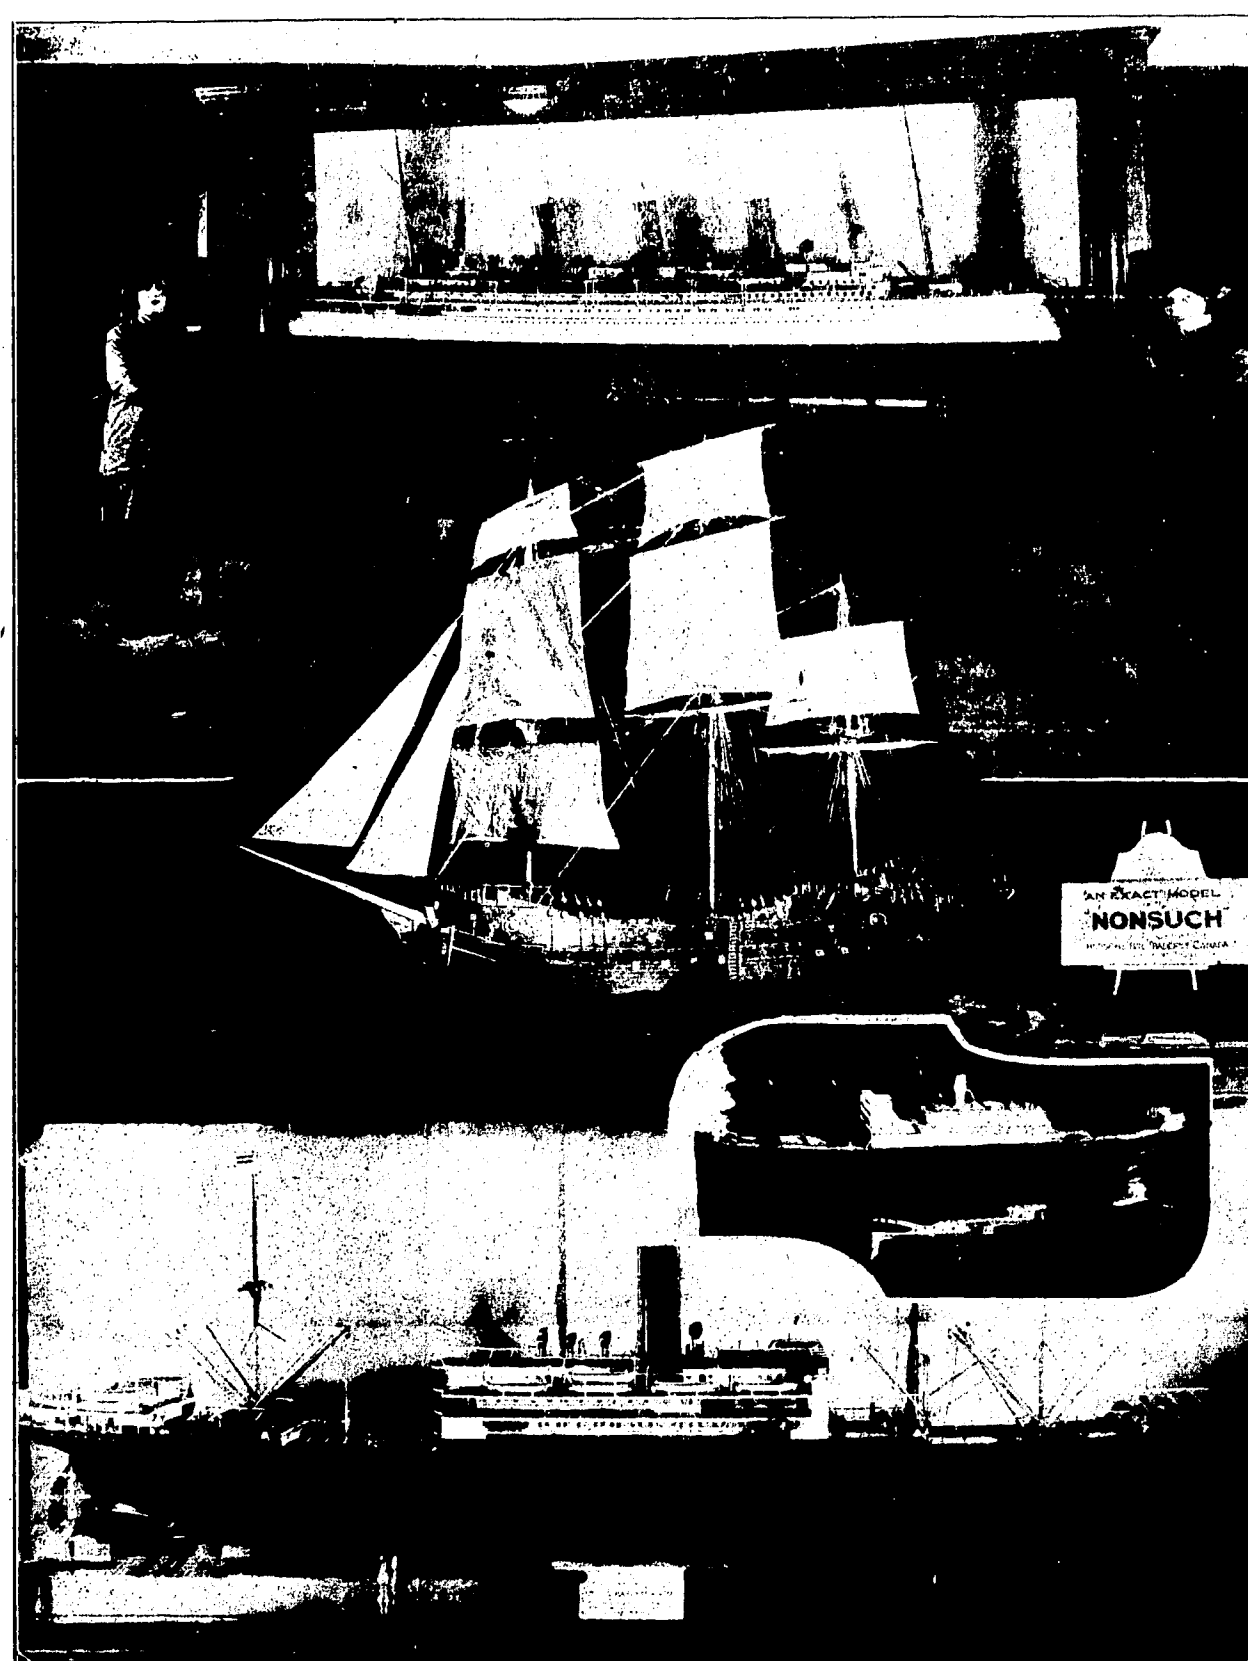

Gaudencio Garces, Chef de Cuisine

POSSIBLY the gentleman with the cheerful grin and the high puffed cap has just eaten one of the ice cream dishes which he prepares in large and unusual variety at the Book-Cadillac Hotel in Detroit, Michigan. For he is Gaudencio Garces, Chef de Cuisine, of that hotel, who has traveled half way round the globe acquiring the knowledge and facility with food materials which is today making the Book-Cadillac famous for its forms. The woman who seeks distinction as a hostess may easily duplicate certain of his ice cream desserts in her home with little difficulty. Chef Garces has given his dishes imaginative names, but with them he gives explicit directions for preparation. The first is the "Madrone," which holds for him the romantic flavor it has for the small boy.

"St. Bernard" appears in a delicate glass dish. The base of pineapple ice cream is covered with strawberries, and whipped cream tops.

## SHIP MODELS ON EXHIBITION

SHOWN above are some of the ship models featured at the recent maritime exhibition of Seattle. The top picture is the model displayed by the Canadian Pacific of the Empress of Asia. In the center is shown an exact model of the "Nonsuch," which carried the first Hudson's Bay traders to Canada in 1668. Inset is a model of the President Garret carved from a stick of wood by a Seattle man, whose only tool was a jack-knife. At the bottom is a model of the Nippon Yusen Kaisha vessel, Hakone Maru.

## Episcopal "Bishops' Crusade" Begins Jan. 6th

Starts Nationwide Evangelistic Campaign. Dispatches from Washington announce the opening there of headquarters for a nation-wide campaign which will be launched early in 1927 to carry the principles of practical and militant Christianity into every hamlet and village throughout the United States. One of the most unique religious movements ever attempted in America is planned, enlisting the foremost bishops of the Episcopal Church, with scores of its leading priests and laymen of national reputation, and whose names are household words all over the land.

Plans for the campaign are underway in this city and vicinity, as well as in every parish and mission station of the Church. During the first two months of 1927 simultaneously from the Atlantic to the Pacific, and from the lakes to the Mexican border, day and night, these representatives will be engaged in a wide spreading effort which, initiated by the House of Bishops of the Episcopal Church, and backed by the National Council of the communion, has been given the name of "The Bishops' Crusade."

Its promoters announce that it is not a campaign to raise money, to proselytize among members of other communions, nor even primarily a movement to gain new members for the Episcopal Church. As defined by its leaders it is a crusade to secure a new allegiance to the whole Christian world there is a new and pressing demand for an exposition of the life and teachings of Him whose message is eternally new.

"That Christ has a message for the modern world, adapted to modern needs, is one of the most demonstrable facts of our time. The persistence of Jesus in human thought and affection excels even the originality of Jesus."

The Bishops' Crusade will be preceded by a period of spiritual preparation beginning on St. An-

Every father, mother, grandfather, grandmother, uncle, cousin and school m'am knows that the old educational edifice has seen its day. It was a fine and imposing building when our ancestors laid the foundation. Today the roof leaks, the floors are no longer same, the walls need repairing, the chimneys smoke and the janitor has gone on strike.—Henrik Willem van Loon in "Children, The Magazine for Parents."

WEAKNESS—A DANGER SIGNAL. Disease begets disease! And at the bottom of almost all diseases is weakness or lack of strength. It precedes and follows disease with almost unerring certainty.

If you are weak, you can offer only a weak resistance to the attacks of infectious organisms. Weak blood vessels may become stiff, wanting in elasticity, and easily may break.

A weak stomach is easily upset. With weak eyes, you tire easily and cannot see well. A weak heart necessitates positive restrictions in your actions and mode of living. With a weak head one loses intuitive understanding and intelligent reasoning. Such persons are led into pitfalls of feeling, imagination, and suggestion. They are feeble, sickly and constantly ailing.

To guess what ails a person when he is weak often means irretrievable disaster. Doctors must know before they can act properly in such conditions.

Often a person who feels weak is prone to believe that he is suffering only from nervous prostration, nervous exhaustion from overwork, when well meaning, but often poorly considered positive restrictions in your actions and mode of living. But nervous exhaustion is preceded by nervous irritability; nervous irritability by defective nutrition; defective nutrition is preceded by insufficient or excessive food or drink, exercise and rest and heat and cold.

All this may or may not be coupled with organic defects and functional disorders.

For sturdy health, the state of weakness must be changed into a state of strength. Most oncoming diseases, indicated by the occurrence of weakness, that predisposes to disease, can be prevented. The ability of the family physician can remove diseases and disorders that are accompanied or followed by states of weakness.

If the disease is not removed, weakness remains, and the disease may beget new disease in addition to the old. Keep well! Health begets health just as disease begets disease.

Every father, mother, grandfather, grandmother, uncle, cousin and school m'am knows that the old educational edifice has seen its day. It was a fine and imposing building when our ancestors laid the foundation. Today the roof leaks, the floors are no longer same, the walls need repairing, the chimneys smoke and the janitor has gone on strike.—Henrik Willem van Loon in "Children, The Magazine for Parents."

**"The Workshop of the Home"**

Make the workshop of the home the pleasantest, cheeriest and best lighted room in the home!

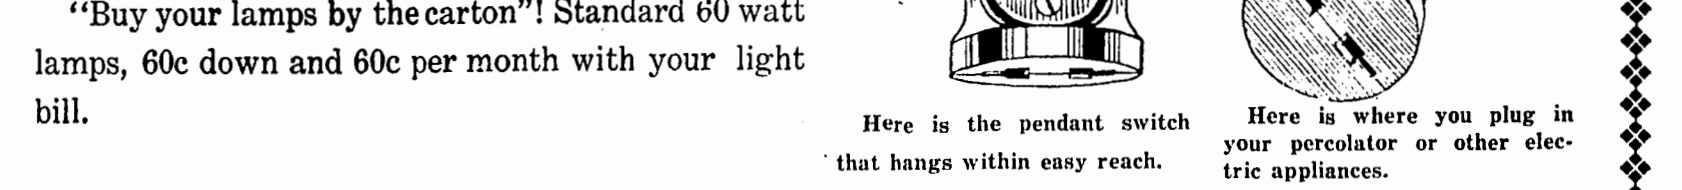

These units cast no shadows and make the kitchen a room of pleasure. They radiate perfect illumination. The holder is made of white porcelain

enameled steel and will not tarnish. The shade takes off the glare of the light and radiates perfect illumination. Kitchen units are made in two types—one with the combination switch and convenience outlet—one without.

Sold on easy payments of 75c down and 75c per month with your light bill.

"Buy your lamps by the carton"! Standard 60 watt lamps, 60c down and 60c per month with your light bill.

**WASHINGTON WATER POWER CO.**

State Cheese Wins

World's Gold Medal
The gold medal for Edam cheese was awarded to the Purty Creamery company, Leavenworth, Washington...

Richard Mus, proprietor of the Purty Creamery, was induced by the Manufacturers' Association of Washington to enter his cheese this year at the Washington State Fair, Yakima...

The best dairy cows in the world have scored from the state of Washington, and with conditions favorable for the production of milk...

Egg producers of Chelan County are considering the development of better products. A committee has been appointed to consider the matter...

John Henry Walsh of New Orleans resigned early in October as a member of the United States Shipping Board to accept a position with the American Overseas Steamship Co.

A wooden hoop silo was built last fall at the Gaul farm in King County. Mr. Gaul stated to a group of dairy men visiting his place recently that it has already paid for itself as it saved him buying over a carload of hay.

Scenes taken in Seattle and other Washington points are shown in a two-reel film just released by the United States Department of Agriculture.

Everyone in the neighborhood is kidding Charlie Trippett, our village's prize innoxia case, who claims he hasn't slept a wink in sixty-nine nights, for fail to answer the volunteer fire-alarm bell the other night.

The dramatic instinct is strong in children and can be encouraged to make them both obedient and understanding. "Children, The Magazine for Parents."

The value of thrift in building up the country and establishing sound conditions is exemplified in the work being done by the building and loan associations of the country.

Father—When Abe Lincoln was young he was making his own living. "Son—Yes, and when he was your age he was president." "Children, The Magazine for Parents."

Award of the John Fritz gold medal to Elmer Ambrose of New York in recognition of his development of the gyro-compass and his application of the gyro-compass to the stabilization of ships and airplanes was announced October 19 by the Engineering Foundation.

The steamship Emperor of Port McNiel, formerly the freighter Canadian Adventurer of the Canadian government merchant marine, has been purchased by the Canadian Pacific for Pacific Coast freight service.

Many a father who hasn't any to spare gives his child a piece of his mind.—Far and Farside.

RELATIONSHIP BETWEEN PRIVATE AND PUBLIC-OWNED DOCKS

By PHILIP H. CARROLL, Manager and Executive Secretary, The Commission of Public Docks, Portland, Oregon.

Following pre-historic men, self-sufficient and dwelling in comparative isolation, the inhabitants of earth, partly for the sake of protection, partly for sociability, and through tribal instinct, gathered together in villages...

Yet the public has the natural fear that these great units will be used for domination and extinction of equality or opportunity. Arising from the fear of the wrong use of the past we have enacted much legislation to compel competition, such as the Sherman and Clayton Acts...

As already outlined, the community is justified in building dock facilities which will not only give it a better port but also a better harbor...

Modern inventions have completely revolutionized transportation; the volume of traffic is increasing and the changed labor conditions have necessitated new and still newer mechanical equipment...

Steel mill operations continue to go forward at a strong pace, notwithstanding a slight let-down recently in some districts from the exceptional activity of the Summer.

Building figures for August likewise made a very good showing, total contracts awarded rising 18 per cent over July to a level only 2 per cent under that of the record month of August, 1925.

Private ownership of public utilities is more elastic, more direct, and generally capable of more efficient effort than are similar utilities publicly owned and operated.

Accompanying continued evidence of prosperity in industrial regions, developments in agriculture have been such as to temper optimism with some restraint. The precipitate fall of cotton prices to levels approximately nine cents below a year ago naturally affected the buying

When ships first put in to a future port, they must perform, anchor off shore. Facilities are lacking and what little can be done is placed there.

Private enterprises invests its capital for profit, and the development of a port is a slow and tedious process, limited by the finances of the promoter.

As already outlined, the community is justified in building dock facilities which will not only give it a better port but also a better harbor...

## You Have a Date

Make your plans to come to the R. C. Beach Company store on Friday, November 26.

This is an important date that you should keep.

### R. C. BEACH CO.

Lewiston's Greatest Store

I have a 5 tube receiving set complete with Willard storage battery, 2 45 volt B batteries, 1 console table with built in loud speaker and wiring for installing all for \$127.50.

I have this set installed in the store. Come in and see and hear it tuned in.

Stewart-Warner receiving set complete with console for only \$128.50. No better value on the market.

The question has been asked how far out stations can be tuned in. I tried a set out at the house and I got 43 stations in 6 states and 5 stations in Canada.

If you have a receiving set you can get one of these Stewart-Warner console set tables for the small sum of \$37.50 with loud speaker and place for your A and B batteries, made of solid wood. If you had one of these console tables for your set you would not change for twice what you payed for it. It is neater, handier and cheaper for your batteries and connections are protected. The comparison with batteries setting on the floor or setting on the table and a lot of wires hanging down and battery acid spilled on floor or carpet is about the same as a man all dressed up in his black suit walking down the street with about a foot of his shirt tail sticking out. How many would look at the suit?

Seventh and Eighth Grades  
We are having six-weeks examination in most all the subjects in this room this week.

The seventh graders have finished their outline maps of Asia. They are studying some of the larger islands at present for geography.

Burford Rogers was absent on Friday last week.

Our record of attendance in this room has improved this six-weeks but our cases of tardiness have increased. We hope to improve both records the next six-weeks period.

Rev. Covington of the Lewiston children's home visited our room for a few minutes last week and distributed envelopes for the Thanksgiving offering among the pupils.

Ruby Hollingsworth and Ida Foster are responsible for the class paper this week.

The seventh graders have made a complete outline of the Revolutionary War as a final review of their study. Lester Ingle was absent Monday afternoon.

Fifth and Sixth Grades  
We have each contributed ten cents and have gotten new books containing school songs. Now we can really sing.

As this week ends the second six-weeks are very busy with examinations.

There will be no school on Thursday and Friday, school being dismissed because of Thanksgiving.

Our room sent a very good collection to the orphan's home at Lewiston, this being the time of the Thanksgiving offering.

Little Johnny Flomer visited us Tuesday.

Third and Fourth Grades  
The boys and girls in our room have worked enthusiastically this week selling tags for the Lewiston Orphan's home Thanksgiving collection. The tags were sold for ten cents each. The total sales in our room amounted to \$10.26.

Since this week ends three months of our school we have been very busy reviewing and measuring our ability in all subjects. We have found that in most subjects we are more than one-third through the required amount.

Grant Loncosty was absent Friday afternoon because he had to visit the dentist. Gretchen Reismeyer was absent Thursday and Friday because she went to Spokane to have her hip treated. Evelyn Rogers was absent because she was ill.

This week completes another month and takes Thanksgiving along with it, but also brings in December and Christmas festivities.

The children sold hearts for the Lewiston Children's home; the sum totaled \$12.25. We are very proud of that large amount and are glad to lend a helping hand to those in need.

### Grading Almost Completed

Had the weather remained good for a few more days, the grading in road district No. 1 would have been completed to the city limits, at the northwest part of town.

The grading starts at a point north of the John Howe farm, where the road intersects with the North and South highway, and enters the city of Genesee at the old road leading in from the Catholic and Lutheran cemeteries. It is expected that this road will be surfaced with gravel next season.

Now that the grading of this road is almost completed and ready for surfacing as soon as the weather will permit, it behooves the city to make preparations to meet the road at the city limits and grade and surface the necessary street, or streets, to connect it with the present city surfaced street extending to the west from the business section.

The farmers who have secured the grading of this road have done their part to make it possible to get to Genesee at all times of the year and its part to meet them at the city limits.

### Time for a Probe

If one hasn't time to do something he very much desires, one should see if he isn't doing a lot of things that are not necessary.

### Obliging

"How much are your eggs?" "Thirty cents a dozen." "Goodness! How reasonable. You know down our way dealers are charging twice that much for them." "Sixty cents per dozen is all right with me, stranger—if it will make you feel any more at home."

### The Catholic Ladies

Will give their annual bazaar on Tuesday, November 23 (not on November 30, as was announced before). Dinner and supper will be served in the Legion hall. Everyone is welcome to enjoy himself with the rest of the folks.

Save Your Shoes

GRANT CLARK  
Copper carbonate in any quantity.

### The Springs Club

Mrs. Ernest Reismeyer delightfully entertained the club members and one invited guest, Mrs. George Smith, on her birthday anniversary last Wednesday.

The afternoon was spent socially and with needlework and at 4:20 the hostess served a delicious and attractive luncheon. She received many pretty presents.

The next meeting will be held at the home of Mrs. Carl Flomer on November 24.

### Lassen Peak Threatens

Lassen peak, the only active volcano in continental United States has been restless during the last week. Seismograph reports from the government observatory, recently installed at the base of the peak show that a severe earthquake was recorded on last Wednesday at 9:50 p. m. The tremor was preceded by a rumble lasting about one second. Four minutes later a similar rumble was heard, followed by a slight shock.

### New Hats

I wish to announce that I have a fine new line of hats, in the latest of modes. I am sure that I can please you.

The new stamped goods are now on display also, with the new threads to work them.

My dressmaking parlor is open and I will do sewing of all kinds.

The Beauty Parlor will be open as usual, on Thursday, Friday and Saturday of each week.

MAUD A. SLIGHTOM

DR. BURGESS

Specialist  
Thorough, efficient, visual service at very reasonable prices.

LENS GRINDING LABORATORY  
Satisfaction Guaranteed

First National Bank Bldg. Phone 66  
Pullman, Washington

Genesee Motors

Lincoln Fordson

Chains, cross chains, good lights, top dressing, windshield swipes, (both automatic and hand), top patching outfits, flashlights, horns, hot shots, spark plugs, fan belts and brake lining. We have them all!

### PUBLIC SCHOOL NOTES OF MUCH INTEREST

The Constitution essay contest is now on in the high school. The theme is limited to 500 words in length. The student may choose any part of the Constitution as his subject. The essay may be merely an explanation of that part of the Constitution and how it should effect our everyday living or it may be the influence any certain man had upon the framing of that document. Again the theme may be amendments to the Constitution and the reasons for such amendments. Quite a great deal of interest has been shown by the students in this contest, which is being put on by the Genesee News. As stated before, the best essays will be published in the News.

The picture shows in the High School opera house has been discontinued through the basketball season. These shows will be run again next spring when Paramount pictures will again be shown.

There will be no school Thursday and Friday of this week because of Thanksgiving.

This week ends the first three months of school and also marks the end of the second six weeks' period. Examinations are in process now and students are working to raise grades over those of the last six weeks' period.

There are probably 10,500 consolidated schools in the United States, serving the name. The mere union of several schools making them a larger one-teacher school is not considered as falling within the definition of consolidation. The state of Indiana has recognized the necessity of consolidation to such an extent that new legislation has been enacted which has practically made consolidation universal in that state.

Another "Meanest Man"  
Sam Lange says he has discovered another "meanest man—or men," to match the one or ones who killed the flock of chickens near Moscow recently.

The Lange family had gone to the entertainment given at the Smith school last Friday night and while they were away some sneak thief (or worse) took seven fine turkeys from his chicken house and made off with them.

Sam had been preparing the birds for the Thanksgiving market and was to have delivered them in Moscow in time for "turkey day."

A man that will steal chickens or anything else in that line, would do anything on that calendar of crime if he could get away with it. It is the lowest form of thievery, in our estimation.

A Pleasant Party  
Mrs. Harry Schooler and Mrs. Clyde Meyer gave a very pleasant party at the home of Mrs. Schooler Friday evening.

The invited guests were Mrs. Gus Pickens, Mrs. Ray Edwards, Mrs. T. H. Herman, Mrs. V. A. Beckman, Misses Ruth and Esther Martinson, Mrs. W. V. Burr, Mrs. Mahlon Follett, Mrs. Milton Rader, Mrs. Arthur Springer, Mrs. Carl Erikson, Mrs. V. Sampson and Mrs. Frank Hoorman.

The evening was spent in a social way. Refreshments were served at a late hour by the hostesses.

Select Christmas Greeting Cards Now  
Now is the time to select your personal Christmas greeting cards which our line is complete—but they are beginning to go, and if you want something real nice, better come in and select them now.

We have them from \$2 for 25 up. We do not sell ordinary Christmas cards.

bad weather.

Danella Swenson, who was a first grader, left school Friday for Eugene, Oregon. We are sorry to lose Danella.

Mrs. Mervyn and Mrs. Herman were recent visitors. Come again some day. We are always glad to see interested parents.

This week completes another month and takes Thanksgiving along with it, but also brings in December and Christmas festivities.

The children sold hearts for the Lewiston Children's home; the sum totaled \$12.25. We are very proud of that large amount and are glad to lend a helping hand to those in need.

Primary Room  
We have a new sandtable this week—another Thanksgiving story.

Primary folks are especially excited this week about their program for Thanksgiving.

We have had many absences and tardy marks this week, mostly due to

### WHAT HAPPENED HERE TWENTY YEARS AGO

Our summer weather gave way Monday to a much colder article and with Monday night came the first fall of snow of the season. Snow has continued to fall throughout the week and we are now enjoying a fair article of sleighing.

A day or two prior to the recent heavy rain R. F. Lambert and son took it into their heads to go hunting in the North Fork country. The trip was an enjoyable one but the day following their arrival it began to rain. For a number of days it was hardly possible for them to leave camp and at the first sign of a clear sky, with a light grub box, they trekked for home. The trip out, Mr. Lambert says, was one which he will never forget. The start was made on Thursday and when a short distance out from camp a fierce wind began to blow. The day's travel with a team and back through the thick timber, with trees falling in every direction, was one which he does not care to repeat.

The marriage of Dan C. Burr and Miss May Keane took place Tuesday morning of this week at the home of the bride's parents, Mr. and Mrs. T. Keane, in this city, the ceremony having been performed by Rev. J. Hendricks of Moscow. Following the ceremony a wedding breakfast was served and the newly-married left on the early train for Spokane and other points, expecting to be absent about a week. Upon their return home they will be met by the Rev. J. Hendricks of Moscow. Following the ceremony a wedding breakfast was served and the newly-married left on the early train for Spokane and other points, expecting to be absent about a week. Upon their return home they will be met by the Rev. J. Hendricks of Moscow.

Parcels may not exceed 84 inches in length and girth combined nor weigh more than 70 pounds if for delivery within the first, second or third zone, or 50 pounds in any other zone.

Parcels may be marked "Do not open until Christmas," this being permitted in order to encourage early mailing.

Do not inclose letters in parcels, as doing so would subject the entire package to letter postage.

Christmas seals or stickers should not be placed on the address side of mail.

Valuable parcels should be insured.

The Panhandle Poultry Show  
The twenty annual Panhandle Poultry show will be held at Moscow, on Tuesday, Wednesday and Thursday, December 14, 15 and 16. Cash premiums and specials, as well as A. P. A. ribbons and diplomas, will be awarded, and the president's cup will be given for the first time this year to the largest and best display by any one exhibitor.

Fren Moore of Boise, will judge the show, which will be a comparison show of all species, using the new A. P. A. cards. Special features will include a poultry institute and a number of poultry judging contests.

The Moscow Chamber of Commerce sponsors the show, which is financed by donations of advertising from business houses of Moscow and vicinity.

Premium lists are ready for distribution and may be obtained by writing to Charles W. Hungerford, secretary Panhandle Poultry association, Moscow, Idaho.

Blue Bird Club  
The Blue Bird club was entertained at the home of Mrs. Nels Lande last week.

After the business meeting the afternoon was spent in a social way and with needlework and at 4 o'clock a lunch was served by the hostesses.

The invited guests were Mrs. E. Olson, Mrs. Oscar Nordby, Mrs. R. E. Nordby, Mrs. Lilly Larson, Mrs. Guy Brown and Mrs. Wm. Jenkins.

The next meeting will be at the home of Mrs. Isaac Isakson, November 30.

A Day Early This Week  
The News is published a day early this week in order that the News subscribers may enjoy "turkey day" with the rest of the people ought to, so if a few things are left out or are missing this week, you will know the reason.

Be Good Here, Too  
It is said that a censorship is being maintained in Roumania on the news about the queen in the United States. Sometimes we are very proud of that large amount and are glad to lend a helping hand to those in need.

### WOOL MARKET RESPONDING TO STRONG SITUATION

Wool markets are responding to the strong situation developing in Australia the past week and to the fact that the New Zealand auctions opened at prices slightly higher than anticipated by the trade. The five per cent decline occurring during the first ten days of November has been apparently recovered, and if the London sales scheduled for this week show additional strength, October price levels should hold.

A review of the season's markets indicate that wool houses as a whole have not profited greatly in the handling of domestic wools. Values received from shearing price levels in May of last year were about two cents per pound. The advance during September and October, while giving a great deal of publicity, was in reality only about sufficient to equalize the decline occurring during the previous weeks, and bring values back to where they slightly above shearing price levels.

With wool houses having on hand from 35 to 40 per cent of their season's handlings, general uneasiness prevailed when the market slowed down the first part of November.

Costs of raising wool are less active. All mills are practically on a hand to mouth buying basis, and spot wools at Boston continue, as they have during the past three or four months, to have the call over wools stored in the western territory, according to the Pacific Coast Wool Growers association of Portland.

Our Christmas Editions  
As has been our custom for the past 14 years, the News will issue its annual Christmas editions, putting them out this year on December 10, 11 and 12, giving the benefit of the early advertising and Christmas sections.

In these papers readers will find all kinds of Christmas articles advertised and you are asked to reserve sufficient covering, they gave up where you will buy it until you have seen one of these papers.

Every person receiving mail at the Genesee office will get a copy of the paper. However, there is only a few getting their mail at the Genesee office, and the remainder are being sent to their homes.

Every person receiving mail at the Genesee office will get a copy of the paper. However, there is only a few getting their mail at the Genesee office, and the remainder are being sent to their homes.

Roads Are Sloppy  
The highways are sloppy and the dirt roads are getting deeper and deeper in mud.

The road to Lewiston is in very fair condition but the road to Moscow is very poor—full of chuck holes and where the clay has been graded and the gravel is very slippery, especially on the curves, where it has been slanted, and it is positively dangerous in some places to undertake to maintain a safe speed.

Better be safe than sorry.

Will Hold Up Tarnish Job  
Owing to the very bad weather the contractors for the spreading of the mile of tarnish road surfacing, beginning at the north city limits, have decided not to undertake the spreading of the remainder of the surfacing after having found it impossible to continue the work with satisfactory results. The 4,000 feet of the mile contracted for was put on.

The tarnish not used has been placed in large tanks where it will remain until spring.

Mapping Bad Lands  
Roads into and around the famous bad lands of South Dakota are to be accurately mapped for the first time. The first mappings for motorists will be of the Custer Battlefield highway extending from Des Moines, Iowa, through South Dakota, Wyoming and Montana to Glacier National park.

"No See-um"  
I bought my girl some garters At Moolworth's five-and-ten. She gave them to her mother— That's the last I'll see of them!

The woman who is always giving other people "a piece of her mind" soon has none left herself.

### GOLDEN RULE SUNDAY BE CELEBRATED DECEMBER 5

In doing our part to help celebrate Golden Rule Sunday, December 5, we are arranging for a special supplement to use in an early issue of the News. The supplement contains a message to the nation from President Coolidge and is full of pictures of the Golden Rule children.

Special interest attaches to Golden Rule Sunday this year as nine thousand of the children whose behalf the day is celebrated are in the earthquake zone in the Near East and two weeks ago were driven from their orphanage buildings into the horrors of an Armenian blizzard.

The day is celebrated this year in fifty different nations. The first dinner of the year was held in connection with the league of nations in Geneva, and in the cities of the United States dinners are being held where a menu similar to an orphanage meal is served, while those who are unable to attend try to figure out what they would like to have others do if their children were among the 35,000 homeless orphans in the Near East.

"The Golden Rule children of the Near East are among the finest children in the world," writes C. V. Viny, general manager of the Near East Relief. "They have splendid physiques, otherwise they would have died from the hardships they have endured, in some cases literally from birth. They are mentally alert, or have survived, and are less active. In many cases they are children from homes of education and refinement. Never before in history did a nation have its chance to stamp the very highest ideals upon a people as has America, which in the last ten years has been the only thing so far to indicate that winter is approaching—Caldese Enterprise.

Ship Many Hogs  
Farmers of the Grangeville, Fenn and Cottonwood communities made up the largest shipment of hogs last Monday that has ever left the Prairie in one lot, for several years. The shipment consisted of 1600 head of fine hogs, 10 decks being made up at Grangeville and Fenn, and eight from Cottonwood. Besides this number there were about 100 head picked up at Craigmont, from the Near Perce prairie.

This shipment will represent a round sum of about \$40,000 to the farmers in these sections. The price is somewhat lower just at present than it has been for some time, but no great objection is being made by the farmers. More hogs on the Camas prairie will help keep the farmer on his feet—Free Press (Grangeville).

Keep the Goose Light Burning  
Ed. Deobald, Ben Cummings and Joe Gardner, the Kendrick duck-hunters triumvirate, have their "goose light" burning over the Kendrick Garage every night, when the signs are right. The theory is that the light, furnished by a 1,000-candle-power electric bulb, will attract the geese on their annual pilgrimage to the southern climes. When the geese get into the circle of light they lose their bearings and scatter in every direction. They will then perch around on the telephone wires and wait until the light of day gives them an opportunity to regain their sense of direction. They will thus cause several boxes of ammunition to be expended before they resume their migration.—Kendrick Gazette.

Some Record—What?  
The story of a man who twice married, at 76 is the father of 87 children, 84 of whom are living, is reported by a Vienna medical association journal.

Bernard Scheinberg, living near the German border, had 69 children by his first wife, who died at the age of 56, the journal says. Not one was a single birth. There were four quadruplets, seven triplets and 11 twins. Sixty-seven of the children are living, but he admits having lost count of the grandchildren.

Scheinberg's second marriage, at the age of 57, was blessed with 18 children, including two sets of triplets. His second wife is still living.

She Sure Would  
"Wouldn't you mother be angry if she saw you in that scant bathing suit?" the preacher inquired of the flapper.

"I'll tell the world she would," Miss Flapper exclaimed. "It's hers."

There is but little change in this week's styles in women's attire—only enough to require new gowns.

Page two will interest you—read it.

### Dress Up for Thanksgiving at Lower Prices

This is the time of year when the first price concessions are being made in the Ready-to-Wear markets. Our always alert and ever-ready New York buyers have sent us the newest coats and dresses at the new low prices. These savings we are passing on to you at once.

### Sports Coats -- Dress Coats

Sports coats, full lined, fur collars, now \$14.75  
Sports coats, silk lined, fur collars and cuffs, now \$24.75

**Maude Muller Again**

Maude Muller on a summer's day, with her feller ran away; in a benzine touring car, they scooted to a preacher far. Her father saw the fleeing pair—smelled the benzine-scented air; caught a mule whose name was Jane and galloped down the dusty lane. The mule's swift run, but burned the benzine all out of the can. The motor stopped on top of the hill, but Jane ran on to kill. Alas! fair maid, alas! for man, alas! for empty benzine can; Maude's daddy on the old gray mule came and took her off to school. The mule high reared the benzine cart; the fellow died of a broken heart. The moral of this tale so sad: "Don't steal the girl—go ask her dad."

## Galli-Curci Swayed by the Seer of Sweden

**Prima Donna Gives Wonderful Interpretation of the Writings of Emanuel Swedenborg—**

**HENRY FORP'S** Dearborn Independent publishes a remarkable article on Galli-Curci and Emanuel Swedenborg, by Clarence W. Barron of the Wall Street Journal, the world famous financial authority.

Mr. Barron declares that Galli-Curci has the most wonderful brain he has ever met or heard of in a woman, although she is much more a true woman with a life and soul of affection for all that is ennobling and uplifting in the family, and in color, form, and music.

Mr. Barron is chairman of the Booth Trustee, who acting under the will of Lydia S. Roth of New Bedford, Mass., began in 1872 a modern translation of the Theological Works of Emanuel Swedenborg, which he published in the Latin tongue, and deposited in the libraries of the world 150 years ago.

This work was completed and published by the Houghton Mifflin Co. in 32 volumes in 1907.

About three years ago there appeared in a Cleveland paper a paragraph which mentioned the accomplishments of Galli-Curci and read the Theological Writings of Emanuel Swedenborg. The claim seemed so absurd to Mr. Barron that he thought it might be easily punctured by a simple inquiry as to the edition.

The Bible is a Creative Work. The Bible to Mr. Barron's direct inquiry Madame Galli-Curci promptly replied: "Yes, I have read in the past year the complete Swedenborg Works, in fact in the Dutch Edition of the Houghton Mifflin Co. that I have."

"I can say certainly that the Bible to me is a greater work than it is before."

Mr. Barron says: "My astonishment was intensified. Familiar with many years with Swedenborg's general theological writings, I had set out to read the entire thirty-two volumes preparatory to an advertising campaign for the sale of the edition. Reading a few pages each day I finished my self-imposed task in fourteen years. I shall probably finish a second reading, at my present rate of progress, in perhaps ten years. Was it possible that a woman with no previous knowledge or relation to these books had really intelligently read them within a year?"

**Swedenborg's Writings**

Mr. Barron continues: "As an economist writing state papers on weights, measures, coinage and currencies, Swedenborg is easily comprehended as an engineer. His engineering ships overlaid he is easily visualized. As a government official in the great mining industry of Sweden, writing practical books on mining and smelting, geared to the foundation of modern metallurgy, he is of interest in the encyclopedia of scientific history. As the writer of volumes—original studies in search for the human soul—he is not without human interest.

"But when one comes to the realm of the unseen, where there is neither time nor space upon which to rest mental conceptions, few may enter into the fullness of the revelation which has come into the libraries of the world through Emanuel Swedenborg."

"Think of twenty modernized volumes, originally written in the Latin tongue and unfolding from the Hebrew 'Genesis' and 'Exodus' the internal or spiritual sense that lies beneath the letter. Annex a dozen more similar volumes that not only expound every picture set forth in a tremendous truth of universal application throughout invisible degrees of creation and life, but illumine all the problems of sex as presented throughout the universe from the union of the love and wisdom in the wine down to sex crystallization in the mineral kingdom; include the deepest of all works ever written entitled, in the original Latin, 'Angelic Wisdom Concerning the Divine Love and the Divine Wisdom.'"

Then answer to yourself the number of years that ought to be required to master these thirty-two volumes?"

**Mean More Than Any Other Books.**

Mr. Barron, still incredulous, continued his correspondence with Madame Galli-Curci for some months. He learned that soon after she lost her dear mother she had sought the Writings of Swedenborg in a desire to know more about the other world where her mother had gone. She spent the entire summer vacation studying Swedenborg's Works, and declared: "They, I mean, meant, and I mean more to me than anything else I will ever read."

When Galli-Curci returned from California Mr. Barron motored up to San Francisco to see her in the Italian palace, and in an afternoon with her and her husband, Mr. Homer Samuels, he was convinced that Galli-Curci had read and devoured Swedenborg in a briefer period than anybody had ever done before.

He says of this interview: "Hours flew like minutes. I wasn't the questioner. Mr. and Mrs. Samuels were at me with the sharpest and deepest questions. They seemed to perfect harmony mentally and spiritually, as in their work in music."

**Wanted to Learn**

"She wanted to know about the 'Grand Man'. I told her it would be easier to comprehend it if she would forego the idea of time and space and consider, as Swedenborg says in 'The Apocalypse Explained', that every society in the heavens connects with some organ of the human body and helps to sustain it. Therefore the heavens have the organization of the 'Grand Man', but we need not think of it as a shape or figure."

"Yes," exclaimed her husband, "I see it is organized. I explained, many years with Swedenborg's general theological writings, I had set out to read the entire thirty-two volumes preparatory to an advertising campaign for the sale of the edition. Reading a few pages each day I finished my self-imposed task in fourteen years. I shall probably finish a second reading, at my present rate of progress, in perhaps ten years. Was it possible that a woman with no previous knowledge or relation to these books had really intelligently read them within a year?"

**Swedenborg's Writings**

Mr. Barron continues: "As an economist writing state papers on weights, measures, coinage and currencies, Swedenborg is easily comprehended as an engineer. His engineering ships overlaid he is easily visualized. As a government official in the great mining industry of Sweden, writing practical books on mining and smelting, geared to the foundation of modern metallurgy, he is of interest in the encyclopedia of scientific history. As the writer of volumes—original studies in search for the human soul—he is not without human interest.

"But when one comes to the realm of the unseen, where there is neither time nor space upon which to rest mental conceptions, few may enter into the fullness of the revelation which has come into the libraries of the world through Emanuel Swedenborg."

"Think of twenty modernized volumes, originally written in the Latin tongue and unfolding from the Hebrew 'Genesis' and 'Exodus' the internal or spiritual sense that lies beneath the letter. Annex a dozen more similar volumes that not only expound every picture set forth in a tremendous truth of universal application throughout invisible degrees of creation and life, but illumine all the problems of sex as presented throughout the universe from the union of the love and wisdom in the wine down to sex crystallization in the mineral kingdom; include the deepest of all works ever written entitled, in the original Latin, 'Angelic Wisdom Concerning the Divine Love and the Divine Wisdom.'"

## AS USUAL THE SIXTEENTH PACIFIC INTERNATIONAL WAS A GREAT SUCCESS

**R**UNNING true to form, keeping up his reputation for speed, O. M. Plummer, general manager, placed another winking hat to his credit when he put over in splendid shape the 16th annual Pacific International Livestock show at Portland, the week of October 30th and 31st. To his credit the assistance of five days out of the eight of the most perfect weather; and on Wednesday night, the presence of Queen Marie of Roumania to assist him in drawing the crowds that were reported to have been the largest seen at this show since the memorable year of 1923. There were many good cattle, a credit to the show and the breed, but not among them was there a Johanna Rag Apple Babst as in 1924, nor a Sara Ann Duplicate as in 1925. A sensational feature of the show was the fact that one might have developed had Judge Alex Hanson son fit to have made the sweet two-year-old Idaho Matador Novelty Colantha grand champion, instead of conferring this honor on DeKol Clothide Monona. The Murphy cow is a splendid specimen, but one can see her like on numerous occasions. As for the University of Idaho's heifer, it is only about one in a year that shows up to equal her in all that the true type committee tried to embody in the perfect Holstein type. She is an exceptionally fine specimen of the breed, and in the eyes of the talent outside the rail she should have had the grand champion honor. Idaho Matador Novelty Clothide, is full of "All American" quality, and had she the "grand circuit" passing before the different judges that compose the committee, there is little doubt but that she would have received that coveted distinction in the final award.

It was an imposing sight—that line-up of 13 aged bulls—every one of them about as good as any that have been but not one of them with the "flash" to make him grand champion whenever shown. Prince Cornucopia Tobe Pontiac, senior and grand champion at the Eastern State Exposition back in Massachusetts, was the best of the lot. He was a fine specimen of the breed, and in the eyes of the talent outside the rail she should have had the grand champion honor. Idaho Matador Novelty Clothide, is full of "All American" quality, and had she the "grand circuit" passing before the different judges that compose the committee, there is little doubt but that she would have received that coveted distinction in the final award.

**GETTING CHICKS THAT PAY**  
By W. D. CHUCKMAN, Extension Specialist in Poultry.

If a basket were filled with articles ranging in value from worthless stuff to goods of rarest price, a blind man might, by accident or chance, get something desirable by reaching into the basket and taking the first article that touched his hand. So a poultryman, moving with no intelligence and groping blindly in the dark, may be getting good chicks. But he is just as likely to get something mediocre or poor.

Chicks that pay big profits are obtained by intelligent choice, and not by accident. This is true whether the chicks are produced on the farm or purchased from a hatchery. Good chicks do not come from poor stock. Chicks that are born to lay 200 eggs

must carry a rich inheritance for egg production. The sire and the dam are both important in the factor of inheritance.

Chicks come from eggs; therefore the first step is to select hens that are fit to lay the kind of eggs that will produce profitable chicks. Profitable chicks are those that develop into pullets that lay many eggs; therefore their mothers must be selected for egg production.

The next step is to select hens that will produce the practical farmer and the poultryman who is producing eggs for market, must select his hens by culling. He will not be able to tell exactly how many eggs his hens have laid; but he should be able to

select hens of high production, 175 eggs or better. If he is buying chicks he should buy from hens that have been so selected, and he should know how to buy.

Having determined to get chicks or hatching eggs from hens that have been carefully selected, he should be sure that they are mated to cockerels of equal or greater production. The only way that this can be done with certainty is to select cockerels from flocks of known high trapnest record. Nobody can tell, by looking at a cockerel, how many eggs his mother laid. Mating high producing females to males from high producing dams is the first step; but it is not the most important one. The final test of a good breeding flock is that it shall have vigor and stamina and the ability to transmit this stamina to its offspring.

The State of Washington is fortunate in having over one hundred thousand hens, and some seven thousand cockerels that have been so selected. The Washington Accredited Hatchery and Breeders Association makes a specialty of so selecting its breeding pens according to this standard. Supervisors who have been appointed by the Extension Service of the State College of Washington, are getting primarily for vigor. The aim is to get eggs that will hatch and chicks that will live.

The results is that the State of Washington has, in addition to the great breeding stock produced by its world-famous breeders, over one million five hundred thousand chicks to distribute among those who are looking for chicks that pay.

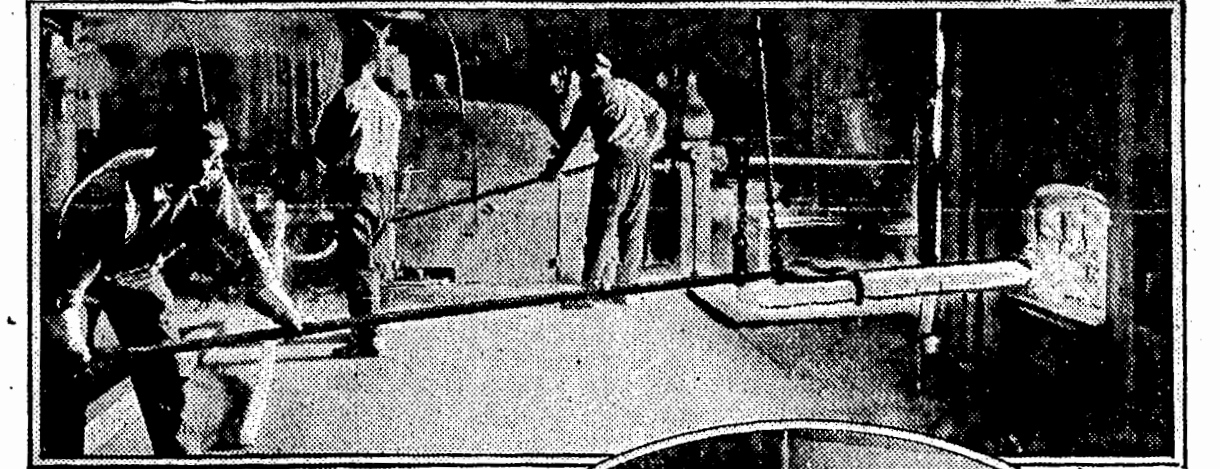

Plans are already under way for a special set of prizes for the Grays Harbor County Fair next year in the Get-Off-the-ground class for local exhibitors. This year 127 dairy cows were exhibited, most of which were local. This plan is to assist in locating outstanding local sires.

Seed for approximately 2,000 acres of Kild wheat has been distributed by County Agent Zentgraf to Douglas County farmers. The bulk of the fall acreage will be sown in this variety, which shows superiority in yield and grade in this year's crop.

The Royal Mail Steam Packet Company celebrated its 57th anniversary on September 26. The firm is one of the oldest British shipping companies, being incorporated in 1829, by royal charter granted by Queen Victoria at the outset of her long reign. In 1839 when paddle steamers, fully equipped with sails, were in fashion, the company started with a fleet of fourteen and inaugurated a regular service to the West Indies.

## Movies Show How Copper Bars are Spun Out Into "Threads of Speech"

Motion pictures are gradually bringing to the American public an intimate knowledge of their great industries. "The Spinning Wheel Workshop," a picture that shows the telephone makers in the Western Electric Company's Hawthorne Works in Chicago at their intricate tasks, is one of the most popular of the great plant are the rod and wire mills, where one sees the huge glowing copper bars actually spun into "threads of speech." Everywhere in action—the muscular men, with faces glowing in the rush of light, who swing the writhing copper in and out of the powerful all-devouring rolls, while overhead the monorail cranes drag, carrying heavy coils of thick wire for the complex machines that whirl mysteriously and draw it out as fine as human hair.

A picture showing the activities of the entire mill from the time the copper bars arrive at Hawthorne to the burring of the finished wire, recently has been completed and soon will start on its tour of the country.

Other pictures show how the copper is cleaned by "picking" it in an acid bath; the overhead monorail

that carries the cleaned copper rod sizes, they are reamed out into larger sizes.

Besides serving theatres throughout the United States and Canada, the company film bureau is now supplying films to between 5,000 and 6,000 in schools, colleges, churches, etc. About sixty of the leading colleges of the country are showing Western Electric films regularly as supplements to the curriculum.

## New Northwest Radio Station Opens Jan. 1

The New Year will see a new and powerful Seattle broadcasting station of the most modern design and construction on the air, according to announcement made by Wallace Fisher, president of Fisher's Blend Station, Inc., by which it will be owned and operated. Equipment is due to be shipped this week from Chicago and the first program is planned for New Year's Eve.

As may be surmised from the name of the operating company, the station is controlled by the owners of the Fisher Flouring Mills, one of whose featured products is Fisher's Blend Flour.

It is to be a standard Western Electric Company station of 1000 watts, the only one of its kind on the Pacific Coast north of Portland. Others of similar type are KGW, Portland; KPO, San Francisco; KFSB, San Diego; KTAH, Oakland, and KFSN, Pasadena.

The transmitter will be on Harbor Island, near the Fisher Flouring Mill plant, where the towers and the new building in which the equipment will be housed are now under construction. There will be a small studio at the same site, but the main studios will be in the Metropolitan center, whence the program will be carried by wire to the transmitting station.

The new equipment is expected to arrive in Seattle very shortly, accompanied by an engineer from the factory, who will install it.

The call letters and wave length of the station will be announced later.

In addition to Wallace Fisher, president, the officers of Fisher's Blend Station, Inc., are: D. R. Fisher, vice-president and treasurer; Birt F. Fisher, secretary and manager.

**FUR BEARERS AND WEARERS**  
The steadily diminishing supply of fur animals in the United States tends to prove that the "fur wear" industry is a dying one.

Collectors of raw furs estimate that the catch during the past season (1925-26) was approximately 20 per cent less than in the previous season. Formerly the decrease has been in the more valuable pelts, such as marten, fisher and bobcat, but now the decrease is affecting such staples as muskrat and raccoon. The value of the annual catch of fur 25 years ago is roughly estimated at \$25,000,000; the catch today is estimated at more than \$60,000,000. Even this figure no longer would have been exceeded, says the Biological Survey of the United States Department of Agriculture, if the supply had been maintained.

Say, Bill, whenever I go to Spokane I never fail to get a couple of those sandy meals at the Tray Tavern on Howard Street just north of River-side Avenue—Adv.

English services will be held each Sunday morning at 10:30 o'clock, with the exception of the first Sunday of each month, when German services will be held at the usual hour.

Geneese Valley Lutheran Church  
Sunday school and Bible classes at 10 a. m., Nov. 28.  
Following Sunday school the Christmas tree festival will be planned and pieces distributed.  
Everybody welcome.

Christian Church  
N. E. Beach, Pastor  
Bible school at 9:45. The Church at Study.  
At 11 a. m. Communion and sermon. The Church at Worship.  
Rev. Ross J. Allen of Watsburg, Wash., will preach his initial sermon. You will like him.  
Special song—a duet—"The Shepherd Leads."  
At 7:30 p. m. A rousing evangelistic song service and sermon by the evangelist.

Mr. Allen is making a real sacrifice to come to our community. So also are the few families who compose the local congregation in sustaining the meetings, but we feel the need of religious teaching. All we are asking of our neighbors is to come and near the messages from night to night. We will attempt to keep the room comfortable, make you feel welcome and at home and entertain by song and sermon that will aid you in every phase of life.  
Meetings every evening at 7:30, except Saturday.

Follett Store Open  
The Follett Mercantile company opened their store for business Tuesday at 1 o'clock.  
The store has been greatly improved and redecorated and makes a very neat and attractive place of business. Their ad. appears in this issue of the News.

Starting with December 1, the operator will be at the Beauty Shop every Wednesday, Thursday and Friday.  
The wit of a family is usually best received among strangers.—George Eliot.

The Little Country Newspaper

It's no 10-page edition that expresses big men's views, and it's not filled with pictures nor with telegraphic news; it isn't printed daily, with an "extra" every hour, and the editor's not bragging of his influence and power; it may have its faults and errors, but these I will forgive, for it's printed in the country, "way back where I used to live."

It's only issued weekly, and it's not made up for style, but when it comes I gladly put the daily by awhile. I don't read in its pages what the wise and great men say, but I see that "Silas Jiggers brought some wood to town today" and that "Grandma Parks is better" or that "Old Bill Jones is dead," and it tells just what the parson in his Sunday sermon said.

I see again the faces of the friends I used to know in the dim and distant fancies of the happy long ago, and I read up in one corner that the fall winds howl and blow and that "Uncle Nathan Smith preaches an early fall of snow" or that "our debating club has planned a social for next week, at which our fellow townsmen, Abner Brotherton, will speak."

There are never learned essays on the questions of the day, but it says that "folks are looking for another raise in hay." I can see no glaring headlines of the last election fight, but it says that "Tom Shaw marries Ella Edgerton tonight" and my thoughts somehow grow tender when the old folks' names I see, telling that "Becky and Thomas Tompkins was invited there to tea."

It may be crude and homely, that same little country sheet, and the makeup of its pages may be rather obsolete; it is damp when I unfold it, and the print is sometimes blurred, yet it's always more than welcome, and I read it every word, and no reading to a city man a greater joy can give than the little country weekly printed "where he used to live."—Exchange.

Club Gives Plays  
Two plays, "Fat and Forty" and "A Model Wife," given by the Clover Leaf club at the Smith school house last Friday evening, were well attended and were thoroughly enjoyed by the large crowd in attendance.

Such affairs as these are what make for the life of any community and it is a notable fact that the people of this community are up-and-coming.

Auto Speed Limits Changed  
New England states tend to be more conservative in establishing speed limits than western states, according to the touring department of the National Automobile club.  
Massachusetts has a limit of 20 miles an hour, with New Hampshire close second with 25 miles an hour. South Dakota also falls in line with a speed limit of 25 miles an hour. The average speed limitation on the highways in other states is 30 to 35 miles, with Nevada motorists boasting a limit of 45 miles an hour.

Social Dance  
The Knights of Pythias will give a social dance in their hall on Thanks giving night, to which the general public is invited. Music will be furnished by the K. P. orchestra. 21-1

PERSONALS

Dr. Howard Rouse of Lewiston was a Genesee visitor Friday.  
Mr. and Mrs. N. H. Rhodes and son, Junior, of Lewiston spent Sunday at the McCreary home.

Mrs. W. A. Ingle left last week for Texas, where she will spend the winter with her children.  
Jack Hasfurther of Spokane spent the week-end with his parents, Mr. and Mrs. Joe Hasfurther.

Mr. and Mrs. Wm. Fish and family have gone to California where they expect to spend the winter.  
Mrs. E. E. Carter of Boise arrived Monday for a visit with her father, G. N. Hollister, who is very ill.

Jack Flammoe and Allen Sather left Saturday for Los Angeles. They expect to be gone about a month.  
Miss Bernice Hasfurther left Sunday for Spokane, where she will spend the Thanksgiving vacation with friends.

Mrs. F. K. Bressler arrived Saturday from Pullman, where she has spent the past few weeks, filled here an account of the serious illness of her father, G. N. Hollister.

Mrs. E. M. Becker and Stanton returned Tuesday from Madson, Wash., where they had been for a visit with Dwight, who is keeping books for a fruit company.

Miss Kasper and son, Lawrence, and Miss Lizzie Holt, accompanied by Mr. and Mrs. C. P. Whalen, spent the week-end visiting relatives and friends in Spokane, returning Sunday.

Mr. and Mrs. Gus Fickens and Mrs. A. H. Foster returned home last week from a visit with Jos. Moersch, at Vancouver, B. C. They report Mr. Mersch, who was a former resident of this section, as getting along nicely and enjoying good health.

Mrs. Aberin Entertains  
Mrs. D. W. Aberin was hostess at her new town home on Wednesday afternoon at a surprise birthday luncheon, given in honor of Grandma Springer.

The guests were seated at a table beautifully decorated with pink ribbons, the centerpiece being formed by ferns and pink carnations, while the place cards were ornamented with little pink and blue forget-me-nots.

A large white birthday cake, made by Mrs. Ben Pleiman, was very beautiful, lighted by its seventy-five blue, held in pink and white rose buds.

The honor guest was presented a jardiniere, showing the esteem in which she is held in the community.

The hostess was assisted in serving by Mrs. Harley Smith and Mrs. F. B. Hampton.

Those present were Grandma Springer, Mrs. N. E. Beach, Mrs. Otto Stucker, Mrs. Guy Brown, Mrs. Eli Hollingsworth, Mrs. Ben Pleiman, Mrs. Harley Smith, Mrs. Frank Qualey, Mrs. Sim Carrin, Mrs. Henry Craft, Mrs. C. C. Swenson, Mrs. Harry Beach, Mrs. M. Springer, Mrs. F. E. Hampton, Mrs. Wood Gash, Mrs. Emmett Stout.

THE PICTURE SHOWS

"The Carnival Girl"  
At the Hotel theater Saturday night the feature film will be "The Carnival Girl," with Marion Mack in the leading feminine role.

Life was dangerous enough for her as a tight-rope walker in a circus kind show. But danger of a different kind stalked her when she was flung headlong into the seething whirlpool of Rum Row; when she was made captive on a small boat that was the target for the coast guard guns—when she was in the wreck of a motor ship. See the smashing melodrama that has enough laughs for a comedy.

"The Little Irish Girl"  
For Saturday night at the Hotel theater the feature picture will be "The Little Irish Girl," with Dolores Costello and John Herron in the leading roles.

How could he believe that she was not as good as she looked, as honest as he? How could she tell him that she and her companions were robbing him and Granny of their money?  
How could the grifters know that Granny had once been the slickest little confidence woman in the game? How could a girl reform when the leader of her gang threatened to shoot her? How could love conquer all obstacles in a thrilling and amusing situation? See "The Little Irish Girl" and find out.

"Her Second Chance"  
The feature film at the Hotel theater for Wednesday night, December 1, will be "Her Second Chance," with Anna Q. Nilsson, one of the most beautiful women on the silver screen, in the leading role.

Crying out as he pinned her soul to the door of prison, the woman who wanted to live and love, recoils to strike back at the man who had taken precious years just when life is sweetest—  
And installment No. 9 of "The Green Archer."

K. of P. Dance  
Thanksgiving night is the time of the big K. of P. dance, in their hall. The general public is invited.

Everybody needing lumber—why not go to Felton's mill and get it? Selling at \$16 and \$18 a thousand, as long as it lasts, to clean up. E. W. Felton, Troy, Idaho. 21-3x

## First Announcement

**A Typical R. C. Beach Company Sale**  
**Beginning Friday, November 26**  
**Ending Saturday, December 4**  
**32nd - ANNIVERSARY SALE - 32nd**

For thirty-two years we have done business in Lewiston. The quality of our merchandise, our fair dealings with the public, our cheerful "make it right with a smile" policy has placed this store favorably in the minds of the buying public to the extent that it needs no special comment from us.

Our entire stock, with the exception of a few contract goods, will be reduced in price for eight days. All small lots, odds and ends and lines we wish to discontinue will be radically reduced, some as much as one-half the former selling price.

You will receive a four-page ad. telling you a part of the great merchandising event. If you cannot come in person, send us your mail orders. But come, if possible, and lay in your entire winter needs.

**Opens Friday, This Week -- Closes Saturday, December 4**

**Walker's Stock Purchased for Sixty Cents on the Dollar!**

The Walker stock, consisting of men's leather coats, sheep lined coats, underwear, blazers, sweaters, hose, army breeches and blankets, men's and boys' shoes and rubbers, hats and caps, blankets, and many other wanted articles for winter wear.

This entire stock will go in the anniversary sale at less than wholesale cost. Come early for this.

### HOW MARIE GETS HER REDUCED RAILWAY FAIR

Many people no doubt have wondered who pays the railroad fare of the Rumanian queen and her party on the extensive tour of the United States and Canada. The fact is the queen pays it herself, but on account of the honor and advertising benefits, real or imaginary, the railroad companies reduced the fare to a nominal sum. Here is the way it was done as told by the Traffic World, of Chicago:

"Rumania's queen, one of the five grandchildren of Queen Victoria, of Great Britain, prominently involved in the World War, which, on that account might be called a technical obligation, is getting passage fares over 27 railroads over which she is traveling at a much lower rate than was ever accorded to any grand opera star or any celebrity other than Marshalls Foch and Joffre. She is paying \$1 for herself and party for the riding she is doing on a score or more of railroads. The commission gave them sixth section permission to file schedules naming such low rates just as it did in the case of the marshalls of France. The whole thing seems more or less of a reflection on the government of the United States. It has forbidden the giving of free transportation by the railroads. Congress gives the state department so little money to be used in the entertaining of foreign dignitaries that it can not do more than pay for the postage service required. Congress, knowing how it, at times has caused scandal by expenses incurred in sending delegations to attend the funerals of congressmen, seems not to trust the state department. Therefore, the burdennas fallen on the railroads. Of course, the railroads are not to be blamed for the technical obligation of the law. In Europe, when an American dignitary calls, there is no such embarrassment and whipping the devil about the bush because the governments on that side of the earth even if they cannot pay their debts, can provide entertainment, including transportation. The entertainment fund of the British ambassador in Washington, a few years ago, for instance, was said to be about \$40,000 a year at the time when the salary of the president was \$50,000.—Wallace Miner.

W. W. P. News  
During the month of October, 121 customers and employees of the Washington Water Power company subscribed for a total of 945 shares of the six and one-half per cent cumulative preferred stock of the company, according to word received from W. H. Ude, director of public relations. In the rural districts alone, 23 customers subscribed for 172 shares of this stock. Two customers in the Moscow district, including Genesee, subscribed for 25 shares, during the month of October.

"The worth of this stock is shown by the fact that since its sale was started in April, 27,863 shares have been bought or subscribed for by 2,605 customers and employees of the company," states Mr. Ude. "Many subscribed for all they could get. Of the 30,000 shares of this stock allotted to us to sell, only 2,137 shares now remain.

"We offer this stock only to our customers and employees who do not already hold 10 shares of our common or preferred stock, and they are allowed to buy only the number of shares which will bring their total holdings to 10 shares.

"This stock may be bought on the partial payment plan or for cash. Interest at six and one-half per cent annum is paid on partial payments. The stock is issued quarterly and the dividends are payable quarterly.

That's Fair Enough

### WHERE GENESEE FOLKS SPENT THANKSGIVING DAY

There are few communities in this broad land that have more reason to be thankful than has the Genesee section and most of them showed their thankfulness in the good old-fashioned way of partaking of sumptuous dinners (and feeling the result for several days afterward).

Mr. and Mrs. Peter Dallasego entertained at dinner on Thanksgiving day Mr. and Mrs. E. M. Becker and Margaret, Mr. and Mrs. Fred Shirrod and Stanley, Mrs. White, Mrs. Johanna Christenson.

Mr. and Mrs. Roy Evans entertained Mr. and Mrs. Frank Hoorman, Mr. and Mrs. J. J. Tupker and Eugene, Mr. and Mrs. Oscar Anderson and family, Frank Snelling and Archie McCoy.

Mr. and Mrs. W. B. Burr had as dinner guests Mrs. Mary Burr and Mrs. Tony Halverson and family of Lewiston.

Mr. and Mrs. T. H. Herman entertained Mr. and Mrs. Harry Schooler and family, Mrs. Nebelsick and Mrs. W. J. Herman.

Mr. and Mrs. Lester Gray entertained Mrs. Eliza Gray, Fred Smith of Lewiston, Mr. and Mrs. Robt. Gray, Mr. and Mrs. Ray Edwards and son and Jesse Gray.

Mr. and Mrs. Nick Wagner entertained Mr. and Mrs. Lundt, Mr. and Mrs. Bertha Weber, John Michael, Rose Heitmann, Stan and Becker, Mike Kasper and Mr. and Mrs. Harry Beach.

Mr. and Mrs. V. A. Beckman had as dinner guests Mrs. Beckman and Ralph Beckman of Asotin.

Mr. and Mrs. D. W. Aherin had as dinner guests Rev. and Mrs. N. E. Beach.

Mr. and Mrs. Jas. Magee entertained Mrs. Mary Cunningham, Will and Jack Cunningham, Mrs. Nellie Hammond, Mrs. and Mrs. Harold Hammond, Miss June Gross of Sitka, Mr. and Mrs. W. E. Jain, Mr. and Mrs. Lou Jain, Mr. and Mrs. Ben Jain and children and Grace and Don Jain.

Mr. and Mrs. Henry Hanson had as dinner guests Mr. and Mrs. Nels Lande and son, Mr. and Mrs. Wm. Borgen and daughter, Mr. and Mrs. Arthur Hove and children, Mr. and Mrs. Sam Lange and children and Ole Flamoe.

### Pine Grove News

Grandma Lambert visited Grandma Brazier Sunday.

Theo. Parks visited Bernice and Dorothy Lambert last Sunday.

Roy Sweet brought Mr. and Mrs. Hasler up from Clarkston for an indefinite stay.

Miss Kathryn McMahon spent Thanksgiving with home folks and spent the week-end with friends at Orofino.

Mrs. Fred Brazier went to Clarkston Friday for a visit of several days.

Marguerite Spurbuck was a Lewiston visitor Saturday.

The hunting party of five that went to Priest Lake a few weeks ago in quest of deer, returned Friday with four deer. The Pine Grove hunters have been exceptionally successful.

All told, nine hunters have brought in eight deer, and three of the hunters were boys.

The following were present at the Community club Thanksgiving dinner: Mr. and Mrs. R. F. Lambert, Mr. and Mrs. Roy Sweet, Dorothy and Clyde Sweet, Mr. and Mrs. Henry Whitted, Stella, George and Arthur Whitted, Mr. and Mrs. Fred Brazier, Mr. and Mrs. Ben Palmer, Elsie Case, Mr. and Mrs. Wm. Freeburn, Earl, Marguerite, Mildred and Marvin Freeburn, Mr. and Mrs. Oliver Clark, Sebort Holgart, Mr. Al. Snowden and three children, Mr. and Mrs. Leon Baker and two children, Mrs. Fred Miller and Margie Miller, Gladys Harms, Mabel Harms, Marguerite Spurbuck, Luzina Jones, Theo Parks, Bernice and Dorothy Lambert, Mrs. Reil, Joe Doyle, Ted Parks, Bob Parks, Heber Harms, Harry Brooks, Mr. Butzine, Bob Wardrobe, Chas. Northern and Ted Dresser.

There were not as many in attendance as usual, owing to some being gone and other sick, but every one reports having a good time and a bountiful repast.

C. H. Spurbuck is able to be around again.

### Gray Eagle News

Harry Parks was a Moscow visitor on Friday.

Walter Gerlach from Moscow was a visitor at the John Platt home over Thanksgiving.

Mr. and Mrs. Peter Isaksen and family spent Thanksgiving day at Herman Enksen's.

Emil Gustafson, Halver Olson, Geo. Wahl, Mr. and Mrs. Harms and Doris ate Thanksgiving dinner at the J. C. Cameron home.

Fred Smith left Thursday morning for his home after having spent a week at the home of his daughter, Mrs. Lester Gray.

Mr. and Mrs. R. A. Gray had as dinner guests on Sunday, Mr. and Mrs. Lester Gray and son Russel, Fred Smith and Chester Sams.

Lester Gray had as guests on Thanksgiving Mr. and Mrs. R. A. Gray, Mr. and Mrs. Ray Edwards and son La Verne, Mrs. Eliza Gray and Fred Smith from Craigmont.

An oyster supper at the Harms home was enjoyed by about twelve young folks on Saturday evening. Games were played until about midnight when supper was served.

Walter Gerlach, Glenn Sams, Harry Parks, Mabel, Gladys and Heber Harms were guests at the P. A. Park home on Thursday evening. The time was very enjoyably spent in playing games, dancing and singing old time songs.

(Delayed)  
Isaac Isaksen is building a new machine shed this week.

Mr. and Mrs. James Cameron were visitors in Genesee on Tuesday.

### DEATH OF G. N. HOLLISTER OCCURS AT LEWISTON

Our little city was saddened when the word came up from Lewiston on Tuesday that our fellow townsman, G. N. Hollister, had passed away at St. Joseph's hospital, where he had been taken a few days before on account of his failing health.

Mr. Hollister had been failing for some weeks and it was thought best to take him to a hospital where he might receive constant attention and have the care of a trained nurse. He seemed to hold his own for a time but his life span had been run and he died peacefully on Tuesday, November 30, at 2 a. m. The immediate cause of death being the result of a stroke of apoplexy suffered some two weeks ago. Deceased was 86 years of age at the time of his passing.

The remains were brought to Genesee Wednesday and the funeral was held from the Congregational church at 2 p. m. of that day, conducted by the Rev. Summerville, pastor of the Protestant Episcopal church of Lewiston.

George Newton Hollister was born at Glensburg, Connecticut, September 25, 1840, and lived in that state when a lad, coming west with his parents at the age of seven years—in 1850. In 1860 he enlisted in the army for the Civil war and served in the Sixth U. S. Cavalry and in the First Minnesota and was honorably discharged from the army in 1862. Later he served in the French and Indian wars.

In 1872 he was married to Miss Myra Camp at Watsburg, Wash., and to this union three children were born, Mrs. Bertha Bressler of Genesee, Mrs. Edith Jacobs of Lewiston, and Mrs. Mary Carter of Boise, all of whom survive and were in attendance at the funeral. Besides his daughters he leaves two grandchildren, D. L. Bressler and Mrs. Frank Girard, both of Genesee, and two great-grandchildren.

Mr. Hollister was perhaps the oldest living pioneer of the Genesee section, having come to this vicinity about 54 years ago and has been intimately connected with the development of this country all these years, and while he had not been actively engaged in any business for many years, yet he kept in touch with all that was going on and being done and was always interested in anything that was best for the community that he loved.

He was a member of the Knights of Pythias lodge and was an active worker in that organization for many years and his kindly face will be missed not only by his lodge brothers, but by the entire community, everyone of whom knew and loved him. And with his passing goes another one of the pioneers, of whom there are not many real ones left.

The pallbearers were W. W. Gray, P. F. Mulalley, F. E. Dicus, Ira Hanson, Robt. Emmett and W. F. Jain. A salute was fired over his grave by veterans of the late World War in honor of his services as a soldier and a patriot.

Reuben Kieweno Lost in Mountains  
Word reached Genesee Wednesday morning from the mountainous section of the Big Polatch that Reuben Kieweno had been missing from camp since Tuesday morning at 9 o'clock when he presumably left for a hunt he having gone to the mountains near what is known as Grizzly Camp with a party of hunters some time ago. Upon receipt of the word Walter Kieweno and David Hickman left at once for the mountains and Wednesday evening a party consisting of Jas. Magee, Bruce Wardrobe, Frank Doyle, Frank Jones, Sam Lange, Jas. Archibald, John Gamble, Robt. McGarvey, Joe Doyle, Oscar Danielson, L. A. Packard and others left for the mountains to assist in finding the missing young man. Joe Tobin took the party as far as he could in his truck.

It is understood that Sheriff Charlie Summerville and some of his deputies will also take part in the hunt.

State Championship Game  
Lewiston and Twin Falls will play for the Idaho state football championship at Lewiston on Friday, December 3. Plenty of seats will be put on for a contest this fall, as Lewiston, with one of the speediest eleven ever turned out, has high hopes of taking the state title. Twin Falls has a big, powerful team that has licked everything in the south. Those who saw the Nampa-Lewiston game two years ago, will not want to miss this one.

### PUBLIC SCHOOL NOTES OF MUCH INTEREST

On Wednesday afternoon of last week the losers of the season ticket contest gave a program in the high school assembly. This consisted of music and recitations.

Two new students enrolled in the tenth grade this week. They were Perry Larkin of Polatch and Helen Betty of Anatone, Wash.

One of the big problems confronting the average school is that of attendance. In every district there is a tendency for the enrollment to diminish from the fifth grade through the high school. There are several reasons for it, but one of the main causes is bad attendance. In every district there are several families who do not realize the importance of their children of regular attendance, consequently they allow them to remain at home upon the slightest pretext.

Mr. and Mrs. H. J. Hanson of the baby, John's father, was him to go to a neighbor's and borrow a wrench. Jane was out in the wet yesterday and has a slight cold, or Henry wants to go hunting. All of these excuses seem valid to some parents and the children soon fall behind in their studies and as a result soon lose interest in their school work. At the present time we have a law in Idaho that states that all children must attend school until they are fourteen years of age, or until they are eighteen, unless they are through the eighth grade.

A new pupil was enrolled in the grades this week. This child was put in the Genesee schools because it was almost impossible for it to reach the country school on account of the mud. The parents of this child stated that the child could easily come to Genesee if there was a bus on the highway. Consolidated schools would solve the difficulty of this parent.

A letterman of the high school had a meeting Monday night and elected this year's basketball captain, Clarence (Bub) Doyle was elected to lead this year's basketball team. This is Bub's last year on the team and he should be a good leader. Paul (Pat) Mulalley, tackle on the football team for the last two years, was chosen football captain for next year. Pat is the only two-year man left on the team and was a logical selection for the place.

Seventh and Eighth Grades  
The seventh graders were dismissed last Wednesday—a half-holiday for being neither absent nor tardy for the first week.

The following eighth graders were dismissed a quarter-day for being neither tardy nor absent the past six weeks. Virgil Post, Ruby Hollingsworth, Flossie Hollingsworth, Pearl Springer and John Hickman.

The pupils in this room are preparing to play for their Christmas program. George Solbakken was absent last Wednesday.

Edith Craft and Flossie Hollingsworth are writing the class paper this week.

The eighth graders have completed quite a number of their book reports on the reading circle books.

Fifth and Sixth Grades  
We have had perfect attendance so far this week. Pretty good for the first week after Thanksgiving vacation.

The sixth grade won again in the spelling contest. A good record for them.

We are beginning work on a Christmas program. More about it later.

The fifth grade geography class has just finished the study of "rubber," taken from material gotten from the United States Rubber company.

Third and Fourth Grades  
We were pleased last week to receive a letter from Burton English. We were glad to know that he likes his new home and school.

Since Wednesday of last week ended our second six-week period, the following received a quarter day vacation from the rest of us: Emma Louise Vanocue, Glenn Mayer, Genevieve Harris, Donald Rader, Anita Henderson, Annabelle Huffman, Marie Springer, Gaynell Hanson, Ray Solbakken, Howard Hansen, Thomas Sanford, Bertie Wilson and Thomas Herman. They have had a perfect attendance record of six weeks.

Monday Anita Henderson and Bernice Stucker were absent because of colds and the bad weather.

To Our Subscribers  
We have mailed a statement to each subscriber whose subscription is due. Some have waited for the girls to again come after votes, but we are not putting on a contest this fall, as we would like to bring our subscription list up to date.

Just because you receive a statement, do not think we are "dunning" you, as some are pleased to call it, for we are merely sending you a "reminder" of a small amount you have probably overlooked.

We are merely asking you if you want the News continued.

(Continued on second page.)

**To Give Series of Card Parties**  
The ladies of St. Mary's church will give a series of card parties during the winter, the first of which will be given in the K. of C. hall on Wednesday evening, Dec. 8, commencing at 8 o'clock.

Prizes will be given the winners at

each party and the score cards will be taken up after each party. At the end of the season grand prizes will be given those having the highest scores for the series.

Each and every one is invited, and welcome.

23-1

Don't miss page two this week:

**CHURCH NOTICES**

**Congregational Church**  
Sunday school at 9:45 a. m.

**St. John's Lutheran Church**  
A. F. Wolff, Pastor  
Sunday school at 9:30 a. m.  
English services will be held each Sunday morning at 10:30 o'clock, with the exception of the first Sunday of each month, when German services will be held at the usual hour.

**Genesee Valley Lutheran Church**  
On Sunday, December 5, the Sunday school hour will be used for the rehearsal of the Christmas program. The Young People's Lutheran League will meet at the Parish hall at 7:30. Everybody welcome.

Tuesday, December 7, at 10 a. m. the annual meeting of the congregation and the ladies' aid will be held in the Parish hall.

**Christian Church**  
N. E. Beach, Pastor  
Our evangelistic meeting is making fine progress. The attendance has been good in spite of unfavorable weather, and the interest is fine. Evangelist Allen announces the following subjects and dates:  
Thursday, Dec. 2—"On the Witness Stand for God."  
Friday, Dec. 3—"A Divine Picture."  
No services Saturday evening.  
Sunday morning, Dec. 5—"The Church of Christ."  
Sunday evening—"The Five Kingdoms."

Monday, Dec. 6—"The Healing of an Army Officer."  
Tuesday, Dec. 7—"The Handwriting on the Wall."  
Wednesday, Dec. 8—"The Home."  
There will be special music each night, also sermonettes and missionary talks for the children.  
On Sunday evening from 7 to 8, Mr. Heter, soloist, and Mr. Matthews, trombonist, of Clarkston will give a program of sacred music. Among other numbers will be "The Holy City," which will be illustrated. This promises to be a rare treat. It will be followed by the regular evangelistic sermon.  
Bible school will be held as usual at 9:45 a. m. There were 85 present last Sunday. Our goal is 100 for next Sunday. Help us go over the top.  
The woman's missionary society will meet Tuesday afternoon at 2:30 at the home of Mrs. S. C. Currin. Mrs. Henry Craft leader.

**K. P. Stag Party**  
The Knights of Pythias will give a stag party in their hall next Tuesday evening and all members are asked to attend if possible. There will be eats, smokes, and a general good time.

23-1

**An Appreciation**  
The Altar society of St. Mary's church wish to express their appreciation and thanks to all who helped in any way to make their bazaar and dinner such a splendid success.

# "ONE OF THESE LITTLE ONES"

The program of Near East Relief centers in the child and is the natural outgrowth of the spirit of the Golden Rule

## The President Says

THE WHITE HOUSE  
WASHINGTON

May 15, 1926.

Gentlemen:

I regard International Golden Rule Sunday as a movement of much importance. Begun in an attempt to care for the orphaned children of Bible lands, it has been extended to other countries.

Practical help is the best expression of friendship. The aid we may give out of our abundance to those less fortunately situated than we should be of great value in bringing about the application of the Golden Rule to the settlement of misunderstandings among nations as well as among individuals.

I hope the voluntary observance of this day may become increasingly prevalent in America and throughout the World.

Very truly yours,

International Golden Rule Committee  
151 Fifth Avenue,  
New York, N. Y.

Where 1000 boys eat daily.  
1/35 of the total number to be fed.

Food, clothing, shelter and loving care are provided for the homeless; school and religious training for the young and inexperienced.

Skilled medical aid in case of accidents.

The carpenter shop at Nazareth.

Every child goes to school. No illiterates among graduates.

Harvesting the orphanage crop—double the local yield.

Increased production and improved methods lift the economic level.

A RELIABLE ORGANIZATION, chartered by and responsible to Congress. "Easily the leader in the quality of its personnel."—Felix Warburg.

"I can endorse without reservation its wise economic administration and the devoted and ably qualified personnel."—John R. Mott.

Serves to "create a more sympathetic understanding between peoples and thus helps us to progress a step further toward world peace."—Charles E. Hughes.

# International Golden Rule Sunday December 5, 1926

EAT A SIMPLE, ORPHANAGE TYPE OF DINNER THAT DAY: for example, a stew (they have meat but once or twice a week in the orphanages), bread, apricots and cocoa. Think of the orphans of the Near East. Realize to yourself their condition. Do for them what you would want to have done for your children if they should ever be left destitute. More detailed suggestions concerning Golden Rule Sunday available upon request.

"Good Wishes pay no bills."  
**Give! Now!**  
"He gives twice who gives quickly"

A WORTH WHILE OBJECTIVE. Training children for self-support and future usefulness. "Its orphanage work is one of the finest pieces of constructive work I have ever seen."—Cardinal O'Connell.

"Nothing in the history of the American people so becomes them as their attitude toward these persecuted people."—S. Parkes Cadman.

\$5.00 means food for one month.  
\$2.00 means full support for just over one week.  
\$100.00 means a Sponsorship for one year. Definite child assigned, tenograph and story furnished.  
\$500.00 brings a ten year old orphan to full self-support.

Your money in the hands of Near East Relief is yourself at work for these children

To help these children I will for one year pay Near East Relief the sum indicated by my (x) mark.

<input type="checkbox"/>	\$100.00 Sponsorship for one year.*

NEAR EAST RELIEF — E. W. TUCKER, Treasurer  
c/o Pacific National Bank,  
Boise, Idaho

The Golden Rule ~ Applied World Wide

Don't Let Go--LIFT!

The Golden Rule, applied, would revolutionize human relationship as the application of electrical science has transformed modern life....

## Saving Children

"He who helps a child helps humanity with an immediateness which no other help given to human creature in any other stage of human life can possibly give again."—Phillips Brooks.

There were 132,532 orphan children among the more than ONE MILLION LIVES saved by Near East Relief. 35,000 still remain in the care of Near East Relief.

Character building is the great objective of Near East Relief, but it takes time for moral fibre to grow as it does for bone and muscle.

105,000 bowls to be filled every day. Food is the largest single item of expense—79½ tons consumed daily.

\*\*\*\*  
Medicine and hospital supplies for 35,000 children—a daily expense.

The Golden Rule applied already has wrought miracles in bringing children like the above to full health. Further applied it will bring every orphan still in the care of Near East Relief to self-support; a fitting climax to "the greatest piece of constructive relief work the world has ever seen."

Every ten orphans have a "group leader," every ten groups a "senior leader." Through these leaders the orphanage director can influence the entire orphanage.

\*\*\*\*  
School supplies for 35,000—a daily expense.

### MEETING THE PRESENT PROBLEM.

The present problem of Near East Relief is nothing new. It is as old as life. It is as old as love. It is a problem that every father and mother understands.—to supply all the varied, changing, recurring needs of children, from babyhood to full self-support.

THIS MEANS CASH FOR DAILY EXPENSES.

1000 articles of clothing and 400 pairs of shoes are needed daily to replace what wears out.

Material and equipment for vocational training is a constant item of expense.

### UNDERWRITING FUTURE OBLIGATIONS.

Near East Relief has no cash reserve, no endowment. Its program depends on cash gifts and payments on pledges. Pledges may be made in any amount. Correspondence is invited regarding sponsorship pledges whereby a definite child is assigned and photograph and story furnished to sponsor.

PLEDGES UNDERWRITE THE FUTURE.

The practical application of the Golden Rule to children in need is the principle of Near East Relief.

## Morscheck Brothers

### PERSONALS

Harold Tinker of Pocatello spent the week-end at the F. E. Dicus home. Eugene Tupker of the U. of I., spent the Thanksgiving vacation with home folks.

Miss Inez Mayer spent the week-end with her brother, A. G. Mayer, and family at Troy.

Robt. McGregor of Seattle is visiting at the home of his sister, Mrs. W. H. Ehlen, and family.

Miss Ethel Qualey, who is teaching near Troy, spent the Thanksgiving vacation with home folks.

Misses Grace Jain and Rowena Hanson of the U. of I., spent Thanksgiving vacation with home folks.

Misses Fern and Madeline Herman and George Ebel were week-end visitors at the Hirzel home at Asotin.

Mrs. Jack Vandenburg came over from Moscow Tuesday for a short visit at the John Vandenburg home.

Mr. and Mrs. C. L. Flomer of Walla Walla spent Thanksgiving with his parents, Mr. and Mrs. Henry Flomer.

Mrs. John Kimbel arrived Saturday from Puyallup, Wash., for a two-weeks visit with relatives and friends.

Fred Smith of Lewiston arrived in Genesee Wednesday for a few days' visit with his daughter, Mrs. Lester Gray.

Miss Margaret Kempf of Sandpoint is spending the week with her uncle and aunt, Mr. and Mrs. Matt Kambitsch.

Mrs. Arthur Springer and daughter returned Monday noon from Lapwai where she had spent Thanksgiving with relatives.

James Swenson and Robert Dryden of Lewiston spent Thanksgiving day with Mr. Swenson's parents, Mr. and Mrs. C. C. Swenson.

Mrs. Herman Broemmeling left Tuesday, via Lewiston, for San Diego, Calif., where she will spend the winter with her daughter, Mrs. J. B. Masse, and family.

Mr. and Mrs. Cecil Bumpass and family of Harrington, Wash., arrived on Wednesday of last week for a visit with his mother, Mrs. G. A. Bumpass, and other relatives.

Miss Lucy Kambitsch, who is attending W. S. C., arrived Wednesday of last week to spend the Thanksgiving vacation with her parents, Mr. and Mrs. Matt Kambitsch.

Misses Alfreda Hampton, Agnes Sweeney, Ethel Qualey, Bernadette Weber and Helena Dwyer, who are attending the Lewiston normal, spent the Thanksgiving vacation with home folks.

Fred McGarvey of Biggar, Saskatchewan, Canada, arrived Monday, November 29, for an extended visit with his brother, Robert McGarvey, and other relatives at Moscow and vicinity.

Nick Bielenberg left Wednesday for Moscow where he joined his brother, M. A. Bielenberg, and family and the party left Wednesday for Van Nuys, California, where they will spend the winter, at least.

Mr. and Mrs. Hubbard, guests of Mr. and Mrs. Thos. Ingle, left Wed-

nesday for Lewiston for a visit with Mrs. Williams, a sister of Mrs. Hubbard. They expect to make a further visit with the Ingles before returning to their home at Rockford, Wash.

### The Blue Bird Club

The Blue Bird club was very pleasantly entertained Tuesday afternoon at the home of Mrs. Isaac Isaksen. The time was spent tying two quilts and socially. A delicious lunch was served at 4 o'clock by the hostess.

The invited guests were Miss Irene Mulalley, Mrs. W. Gash, Mrs. Ira Hanson, Mrs. W. L. McCreary, Mrs. Fred Perkins, Mrs. Carl Erikson.

The next meeting will be held at the home of Mrs. Archie Tegland on December 14.

### Apples

Fine Winesap apples delivered at your place, for \$1.10 per 100 pounds. See R. L. Edwards, or phone 64F2. 23-1

Page two may interest you.

### Santa Says:

I have arranged with HERMAN'S Hardware Shop to show many fine useful Christmas presents at this store. I have asked them to arrange things differently than elsewhere.

They will have many moderately priced gifts from 10c to \$1.00, REAL VALUES displayed and plainly marked.

Lamp Shade Material will be found at this better arranged store, such as lamp shade frames, silk braid and silk fringe. Bed lamp frames complete with pull chain socket and silk cord for \$1.25.

I have ordered a raindeer load of Christmas Trees to be sent there as HERMAN'S have always sold my Christmas Trees at a fair price.

HERMAN'S Hardware will also have my genuine Flexible Flyer sleds.

Signed,

Santa Claus.

### Mrs. Bumpass Entertains

Mr. and Mrs. Cecil Bumpass and family were entertained at the home of his mother, Mrs. G. A. Bumpass, on Friday of last week in honor of their thirteenth wedding anniversary. Those present were Mr. and Mrs. Roy Patchen and Glenn Patchen of Moscow, Mr. and Mrs. Arthur Hampton, Mr. and Mrs. C. E. Paris of Lewiston.

Advertisers ask you to trade with them.

### A Satisfactory Heating Coal

Owl Creek is one of the best heating coals to be found on the market. It holds fire over night, requiring only a slight shaking in the morning to secure a good fire.

We also have other grades at a lower price.

Slab and cord wood by the cord or carload.

22-1f Standard Lumber Co.

It may be on page two this week—look for it.

### Buttercups in December

On Wednesday, December 1, Mrs. Irvin Manderfeld brought to the News office two full blown buttercups—as pretty as ever appeared in the spring-time. They were picked near the Manderfeld farm, just west of town.

Only a short time ago several violets were pick to the west of town and now comes buttercups—indicating that the weather man has not been too severe on this section of the country thus far—only we are having just a wee bit too much moisture at this time.

The Lewiston weather bureau reports that all rain records have been broken there since the establishment of the weather bureau 26 years ago, the record for November being 4.15 inches, making the total rainfall for the year 17.54 inches.

If that much has fallen in the Lewiston section, how much has fallen at Genesee?

### Altar Society Meets

The Altar society of St. Mary's church held a very pleasant and profitable meeting at the home of Mrs. Mary Cunningham last Thursday and a goodly number of members were present.

The ladies expressed themselves as very well pleased with the success of their bazaar and dinner.

### The Syringa Club

The Syringa club met at the home of Mrs. Carl Flomer, Wednesday, November 24. The afternoon was spent in a social way, needlework being the main feature. A pick-up lunch was served at 4:30.

The next meeting will be at the home of Mrs. Henry Flomer, on Wednesday, December 8.

M. A. Dean wants your shoes to repair. Leave at the pool hall or Ford garage. All work guaranteed. 22-2x

## What Mother really wants

### An Automatic Hotpoint Electric Range

## SPECIAL CHRISTMAS OFFER New Hotpoint All-White Christmas Range for Mother

Beginning December 1 and closing on December 31, we will present our first Christmas sale of Electric Ranges. Chief interest in this sale centers around the beautiful new all-white enamel Hotpoint Automatic "Christmas Range for Mother." This wonderful gift will be installed in homes at a very low price and attractive terms of payment. Here are the details:

NEW HOTPOINT RA95 ALL-WHITE "CHRISTMAS RANGE FOR MOTHER" .....	\$137.50
CORRECT SIZE ELECTRIC WATER HEATER .....	\$10.00
FIBERFORM WATER TANK COVER .....	\$10.00
ALL NECESSARY RANGE AND WATER HEATER WIRING .....	\$40.00
INSTALLED COMPLETE, READY TO USE. TERM PRICE .....	\$197.50

\$10.50 HOTPOINT ELECTRIC PERCOLATOR FREE

As an added Christmas gift for mother and the home, we will give a new \$10.50 Hotpoint Electric Percolator (just as pictured) free with each Electric range purchased during the month of December—this one month only.

\$7.50 DOWN

To make it just as easy and convenient as possible for you to supply the home and mother with an electric range at Christmas time, we introduce this extremely low first payment. Pay only \$7.50 down on any electric range during the month of December—next payment with January light bill.

The Washington Water Power Co.

## Excels In Both Musical And Culinary Productions

IRENE DELROY, star of the Greenwidge Village Follies and a talented dancer and actress, has appeared in many Broadway productions and has an enviable record on the musical comedy stage. Miss Delroy's busy professional life does not permit her a great deal of time for feminine household pursuits, being toward which she shares with most of her sisters of the "weaker sex," but despite this handicap Miss Delroy has succeeded in creating for herself a reputation in domestic activities. Her specialties are her particular specialty, and one of her own favorites is Jellied Orange Melange, the recipe for which is given below:

Soak the gelatine in cold water until softened. Dissolve in boiling water, add the sugar and cool. Then add lemon juice and strain the mixture. Dice the pineapple and figs and separate the oranges into sections. Oil a mold and pour in a little of the jelly mixture. When it is slightly stiffened arrange on it a design of orange sections and when stiff add more fruit. Continue until all is used. Allow to stiffen and serve with whipped cream.

The inclusion of gelatine in Miss Delroy's recipe is interesting in view of the food and health value which the ingredient adds to other foods with which it is combined.

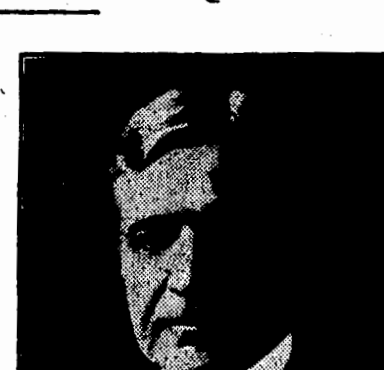

**Jellied Orange Melange**  
 1 1/2 tablespoons granulated gelatine  
 1/2 cup cold water  
 2 1/2 cups boiling water  
 1 cup sugar  
 1 cup lemon juice  
 2 slices canned pineapple  
 2 figs  
 2 whole oranges  
 1/2 cup seeded and halved grapes  
 1/2 cup candied cherries cut in half

An interesting recipe booklet, "From Soup to Dessert," will be sent free to readers of this newspaper upon receipt of four cents in stamps to cover postage. Write to: The Home Economics Bureau for Gelatine, 555 Fifth Avenue, New York City.

## THE SHEEP BREEDERS' BANQUET

One of the delightful entertainments held during the recent Pacific International Livestock Show, was the Puredbred Sheep Breeders' banquet.

The banquet was given to honor Mrs. Minnie Miller, president of the American Hampshire Sheep Breeders' Association, and Miss Julia M. Wade, executive secretary of the American Shropshire Registry Association, who were visitors at the Exposition.

Aside from the sumptuous feed, at which mutton chops were served, the like of which was never before, there was an interesting program on which appeared Gov. Walter M. Pierce of Oregon; Geo. L. Baker, mayor of Portland; E. A. Stuart, president of the Pacific International Livestock Exposition; Frank W. Dunlin, president of the Oregon Holstein Breeders' Association, who took the place of W. S. Gullford, president of the American Shropshire Registry Association, who was unable to be present; Mrs. Minnie Miller; Miss Julia M. Wade; F. N. Bullard, president of the American Rambouillet Sheep Breeders' Association; "Bobby" Miller of the University of California, who appeared for E. C. Thibbe, president American Romney Sheep Breeders' Association, who was not present; C. E. Greile, director Pacific International Livestock Exposition, and the Hon. Frank O. Lowden, O. M. Plummer, manager of the Pacific International, presided, and in his inimitable way introduced the speakers who had something pertinent to say befitting the occasion. To Mr. Lowden, however, fell the task of making the principal speech of the evening.

Mr. Lowden is one of the really big men of this country and one of the very few of his class that views agriculture with sympathetic and understanding eyes. He fully appreciates the serious plight in which the farmer finds himself these days, and is ever ready to lend a hand in their bettering conditions as they now exist. He is looking for a solution to this very vexing problem.

In his address, Mr. Lowden touched upon many phases of the business of farming, taking occasion to declaim that "although the industry of agriculture is in a state of general prosperity, agriculture is struggling against conditions which threaten its ruin. Some remedy must be devised in order that the farmers may escape from the dilemma of hunger and nakedness, and produce and losses if they do produce."

Pointing to conditions that demonstrate that industry is not enjoying "unexampled prosperity," Mr. Lowden pictured the plight of the farmer as truly serious.

"Suppose," he said, "that you should awake some morning and find in the press a story under these headlines: 'Interest upon corporate capital investment reduced from 11 per cent to 3.5 per cent; wages in industry reduced from \$1250 to \$648; wages of those engaged in transportation reduced from \$1570 to \$1170.' What a startled and panic-stricken world you would look upon. And yet you would only behold a world reduced to the present state of agriculture."

"According to 'Crops and Markets' for July, published by the United States Department of Agriculture, for the year ending June 30 last the farmers of America earned 3.5 per cent upon their net capital investment. They received for their services, labor and management (including family labor), \$648 each.

"This, it is true, is slightly an improvement over the preceding year, when they earned 3.2 per cent upon their investment. It is considerably better than their average earnings for the last six years, for during that period they earned an average of exactly 1/2 of 1 per cent upon their capital investment.

"The more favorable showing for last year was reached only because the farmer's net investment has shrunk from \$47,000,000,000 in 1913-1920, to \$32,000,000,000 in 1925-1926. In other words, the farmer has lost about one-third of his net investment."

Classes were larger than they have been for many years and made real work for Judge Bob Hager.

In the senior calf class there were thirty-five. Eighteen aged bulls were shown in that class and in the aged cow class 43 were in the ring.

Teacher to little girl learning to write—"But where is the dot over the 1?" "It's in the pencil yet!"—Children, The Magazine for Parents.

## DAIRY

An exhibit of grade cows at the Southwest Washington Fair at Centralia-Chehalis showed the value of cow raising and selection records. The grade cows were judged on conformation. The cow with the lowest record was placed first on conformation. All the cows had had a full year in cow testing work.

Beef stock being fed by Yakima Club members for Pacific International Livestock Show is looking very good and they are hoping to win honors as they have in the past two years.

At the dispersal sale of the W. G. Cordier's Shorthorns at Walla Walla in the middle of October, 48 head sold for an average exceeding \$115.00. The top price paid was \$400.00 for a bull that went to Byron Bosser of Walla Walla. He also bought the highest priced cow that cost him \$250.00. Most of the cattle stayed in the county, Sandy Keith was the auctioneer and A. H. Dunn was the lord high everything else.

The very favorable fall weather is helping materially in keeping down the price of milk production, as the cows are still on good pasturage which with bright days and showery nights continues to make almost spring growth. The cows will appreciate liberal grain feeding at this season of the year and profiting by it will go into the winter in much better condition than they would if left on grass alone; a little grain just now will lessen the demand for heavier grain feeding a little later should there come a sudden change in the weather.

Mr. Lowden is one of the few men of affairs who is giving serious attention to agricultural needs. He is himself one of the largest farmers in this country and he perhaps the largest cotton grower in the world. As one of the evidence of Mr. Lowden's intense interest in agriculture, he is now and has been for several years past the president of the Holstein-Friesian Association of America.

## FURTHER DROP IN FARM PRICE LEVEL

The general level of farm prices dropped from 134 to 130 per cent of the pre-war level from September 15 to October 15, the Department of Agriculture announces in its monthly price report issued today.

The October index of 130, the department says, is 13 points below October a year ago, and only 10 points above the 1921 October farm price level. Cotton and cottonseed prices alone dropped from 134 to 94 per cent of the pre-war average during the month.

"The downward swing in the market price of cotton," according to the report, "has been reflected by a decline of six cents per pound, from 16.3 to 10.7 cents, in the farm price of cotton from September 15 to October 15. This brings the farm price of cotton below the five-year pre-war average of 12.1 cents for October. Cotton is now in an absolute position when compared with pre-war prices as corn, oats, and barley during the past year and with apples this fall.

"The farm price of oats and barley advanced in face of a further decline in corn prices; wheat and rye showed small price gains. The sharp rise in the market price of hogs between September and October 15 was not accompanied by a similar advance in the farm price as is usually the case.

Holsteins at Wisconsin State Fair Five hundred and thirty-one purebred Holsteins, the pick of middle western states, helped to make the dairy exposition of the Wisconsin State Fair at Milwaukee, one of the best shows ever held in that state. Dairyman will remember this show as the best exhibit of Holsteins in recent years.

The four first prize Holstein calf club calves in the Junior Calf Class, all placed in the first fifteen moneys. In open class, the first fifteen calves were entered.

Sir Fobes Ormsby Hengerveld, a Wisconsin bull, was senior and grand champion.

The junior champion bull was Piek Spring Pabst Sir Johanna, a son of the famous Johann Rag Apple Pabst. All-American champion in 1925 and sold to Canada for \$15,000, is owned by Joseph E. Peak of Hartford, Wisconsin.

A Carnation bull from the Carnation Milk Farms, Seattle, Prince Cornucopia Tobe Pontiac, won in the aged bull class.

In the aged cow class, Clotilde Piebe Langfield of the Milwaukee County Institutional Farms, won first prize.

The year's senior and grand champion honors went to Hollywood Piebe Farms, owned by Gustav Pabst of Duwamish, Wisconsin.

Classes were larger than they have been for many years and made real work for Judge Bob Hager.

In the senior calf class there were thirty-five. Eighteen aged bulls were shown in that class and in the aged cow class 43 were in the ring.

Teacher to little girl learning to write—"But where is the dot over the 1?" "It's in the pencil yet!"—Children, The Magazine for Parents.

Throughout the world we are known as a nation of wasters and careless spenders. Our natural resources have been not merely consumed but frequently destroyed in a manner which shocks the average European.

No sooner have we made up our minds to budget our expenses, save and provide for the future, than some well-meaning person comes along and tells us that if we will buy an article now, which can be paid for by the installment plan, we will be learning the principle of saving! Even some bankers, surprising to note, have resorted to this method of the practice of paying for this year's luxuries out of next year's prospective income.

Minerals in Milk Important Milk is an important source of mineral matter. It contains more calcium or lime than other common foods. These are important for building bones and teeth. It contains a good proportion of phosphorus, which is used for tissue building.

Milk contains all the mineral elements in about the right proportion except iron. What iron there is in milk, however, is in an available form so that it can be well utilized. This deficiency in iron can be supplied by the use of spinach, egg yolks and similar foods.

One quart of milk contains more lime than a quart of saturated lime water. Milk is without question the cheapest food to supply lime in a desirable form and in the necessary quantities.

Careful studies indicate that a shortage of calcium or lime is probably one of the most serious errors in the eating habits of the average American family today. Mineral elements are present in the human body to the extent of several pounds in the bones, teeth, body tissues and body fluids. From the standpoint of growth and repair of these parts of the body, it is very important to supply food which contains available minerals.

Malformation of bone, as shown in knock knees, bow legs, etc.; enlarged joints in rickets and decayed teeth are examples of lack of lime in the diet. About 75 per cent of the children of preschool age in the United States are ways of behaving that turn themselves—"Children, The Magazine for Parents."

## Composes Songs and Makes Culinary Symphonies Too

ROSALIE HOUSMAN, well known as a musical composer, has several distinctions to the title. She is the first woman who has written and has published a Temple Service for the Synagogue, and has also had her songs and piano music on distinguished recitalists' programs. Many of these singers and pianists are also Americans, among them Florence Easton, Florence Macbeth, Reinald Werrenrath, Ashley Pettis, Olga Samaroff, and Mabel Beddoe. Miss Housman collaborates with the various progressive musical groups in New York, and is a charter member of the Society of American Women Composers.

In addition to her creative works, Miss Housman is becoming well known to music lovers through her lectures on musical subjects, among her recent ones being a series for the New York City Board of Education.

In her domestic activities Miss Housman combines the spirit of progressiveness with a taste for good old fashioned dainties. She likes candies which have fondant as a base, and always includes in her recipe for this a small quantity of gelatine, knowing of the recent scientific discovery of the health value of this food; Miss Housman's recipe for creamy fondant follows:

1 cup sugar  
 1/2 cup water  
 1 teaspoon granulated gelatine  
 Cook to 235 or to soft ball when tried in cold water.

Put sugar and water together. Cook stirring until sugar is dissolved. When thermometer reaches 234, or when batch begins to thicken around edges of pan, add gelatine that has been soaked in 2 tablespoonful of cold water. Stir carefully without beating to mix gelatine. Continue to cook until required degree is reached. Then pour on a clean, dry platter, or cold marble slab. When cold to the touch of the hand, work back and forth with spoon or scraper until a firm dry texture is obtained. Then place in covered jar or crock, place cup cloth over top of jar under the cover. It should be 24 hours old before using. It will keep for several months if stored in a cool place, and may be flavored as desired and used to make stuffed dates, creamed walnuts, etc.

Milk contains all the mineral elements in about the right proportion except iron. What iron there is in milk, however, is in an available form so that it can be well utilized. This deficiency in iron can be supplied by the use of spinach, egg yolks and similar foods.

One quart of milk contains more lime than a quart of saturated lime water. Milk is without question the cheapest food to supply lime in a desirable form and in the necessary quantities.

Careful studies indicate that a shortage of calcium or lime is probably one of the most serious errors in the eating habits of the average American family today. Mineral elements are present in the human body to the extent of several pounds in the bones, teeth, body tissues and body fluids. From the standpoint of growth and repair of these parts of the body, it is very important to supply food which contains available minerals.

Malformation of bone, as shown in knock knees, bow legs, etc.; enlarged joints in rickets and decayed teeth are examples of lack of lime in the diet. About 75 per cent of the children of preschool age in the United States are ways of behaving that turn themselves—"Children, The Magazine for Parents."

Throughout the world we are known as a nation of wasters and careless spenders. Our natural resources have been not merely consumed but frequently destroyed in a manner which shocks the average European.

No sooner have we made up our minds to budget our expenses, save and provide for the future, than some well-meaning person comes along and tells us that if we will buy an article now, which can be paid for by the installment plan, we will be learning the principle of saving! Even some bankers, surprising to note, have resorted to this method of the practice of paying for this year's luxuries out of next year's prospective income.

Minerals in Milk Important Milk is an important source of mineral matter. It contains more calcium or lime than other common foods. These are important for building bones and teeth. It contains a good proportion of phosphorus, which is used for tissue building.

Milk contains all the mineral elements in about the right proportion except iron. What iron there is in milk, however, is in an available form so that it can be well utilized. This deficiency in iron can be supplied by the use of spinach, egg yolks and similar foods.

One quart of milk contains more lime than a quart of saturated lime water. Milk is without question the cheapest food to supply lime in a desirable form and in the necessary quantities.

## Safety Devices Forty Years Ago and Today

Above—Thomas DeRusha demonstrating first safety device used on a punch press.

Right—The elaborate safeguard now used on a punch press.

The first safety device ever used in an American factory, insofar as the history of such appliances can be traced, was a simple-looking steel piece for placing and removing the work at a punch press, then the most dangerous of any of the general classes of machines used in manufacturing.

It was first used in 1882 by Thomas DeRusha, dean of toolmakers at the Western Electric Company's Hawthorne Works in Chicago. It was the granddaddy of all the thousands of elaborate safety devices of today, and

### Ladies Aid Meets

The ladies aid of the Congregational church met at the home of Mrs. Virgil Sampson, Wednesday afternoon. Mrs. Sampson was assisted by Mrs. Fred Perkins.

The invited guests were: Mrs. I. W. Larkin, Mrs. Arthur Springer, Mrs. Mary Haymond, Mrs. M. Rader and Mrs. Isaac Isakson.

At the regular business meeting was terminated the afternoon was spent in needlework and social converse. Late in the afternoon a delicious luncheon was served.

The next meeting will be at the home of Mrs. G. A. Bumpass, who will be assisted by her daughter, Mrs. Arthur Hampton.

Recent census figures show that there are in the United States nearly 14,000 actresses.

### THE PICTURE SHOWS

At the Hotel Theater for Saturday night, December 4, the feature film will be "The Highbinders," with William H. Tilden and Marjorie Daw in the principal parts.

A gang of notorious New York crooks—a beautiful girl in distress—a handsome young author. New York colorful underworld is the stage. Combine all these in an adventurous and romantic conflict and you have the answer to the prayer of most theatergoers—a thrilling melodrama.

And that's what this screen story is. A swift action tale of a hunted girl of the slums and a nameless Lothario who cheated the Highbinders of her and took her as his own.

### "The Fighting Edge"

For Sunday night, December 5, the feature picture at the Hotel theater will be "The Fighting Edge," with Kenneth Harlan and Patsy Ruth Miller in the stellar roles.

Crammed with the melodrama of a band of smugglers operating along the Mexican border, "The Fighting Edge" is a picture you cannot help but enjoy.

### "Ella Cinders"

Nearly everyone has read about Ella Cinders and her step-mother in the comic strip of the Spokesman-Review. One of the most laughable comedies on the silver screen has been concocted from this comic strip, with Colleen Moore in the leading role. Its a scream from start to finish and you will enjoy every minute of the time. It's to be at the Hotel Theater on Wednesday night, December 8.

Ella Cinders was the slayoff of the Cinders household. She did all the work which added to the comfort of Lotta and Prissy Pill, her step sisters, and Ma Cinders, her stepmother.

But Ella had one joy in her life. That was the smile of Waite Lifter, the iceman. Then one day Ella was excited by the announcement that there would be a movie contest in Enytown, and that the winner would be sent to Hollywood. By taking care of children, Ella made enough money to have herself photographed, and this photo she entered in the contest. It was a very funny picture, as a fly had rested on Ella's nose just when the photographer snapped.

### Girl Attacked by Cougar

Laura Hamm, 12-year-old daughter of Mr. and Mrs. James A. Hamm, who attends school at Stanford, near Deary was attacked Thursday of last week by a full grown cougar, which sprang upon the neck of the horse she was riding to school, says a news dispatch from Moscow.

The girl escaped with only a few leg scratches, and hunters have been scouring the woods in search of the beast and two others seen in the vicinity.

Laura had a blanket slung across the saddle for warmth and was reading a book when the cougar leaped upon the pony. The horse bolted, the girl falling off and the cougar becoming entangled in the blanket.

While picking up her lunch pail the girl saw two younger cougars come toward her from thickets near. The girl ran and found her horse a short distance away. She continued to school for the day.

### Should Be Cautious

Two fatal accidents and one serious wound are the result of the deer hunting season in North Idaho this fall.

In all three cases it was the hunters' partners who did the shooting. It seems a simple lesson for a hunter to learn, not to shoot until he can see what he is shooting at, but the annual toll of the hunting season indicates that there are many hunters whose mentality is not sufficient to put this lesson into practice. Anyone who will shoot at something moving in the brush without knowing positively that it is game of some sort, has no business to carry a gun in the woods. —Kendrick Gazette.

## R. C. BEACH CO.

32nd ANNIVERSARY SALE 32nd

This store-wide sale, combined with the selling of the Walker stock, has crowded this store since the opening day.

This is an unusual merchandising event from the fact that every article in this big store is reduced in price until Saturday, December 4.

It is your opportunity to lay in your winter needs at a very substantial saving.

On Monday, December 6, The R. C. Beach Company's Christmas store will open. For years the young and old look to this store for the big Christmas stocks and the wonderful Toy store in the Economy Basement.

Every day in December will be an interesting day. The Christmas spirit will prevail throughout the store and the word WELCOME from the management and the employees.

## R. C. BEACH CO.

"Lewiston's Greatest Christmas Store"

# CHRISTMAS

by W. D. Pennypacker

IN HUMAN experience there is no page more replete with joyous association. The first Christmas we remember only as described in sacred story, and we visualize its influence through the spirit exemplified in the lives of our fellows.

The next Christmas we cannot recall. We may have lain in trundle-bed or cuddled in a mother's arms. That was a hal-lowed Christmas!

Then followed anniversaries teeming with visions of sleighs, Santa Claus, candy and toys, when the veriest romance of Yuletide was so real! We never forget those days.

But how mystically they merge into another epoch. With the diminishing vision of Santa we become aware of a better Christmas in the conscious love and loyalty of others. And then—

In years that follow, the Christmas season becomes richer and more beautiful. It has lost the confusion of toys and confections. But in all these years there has been growing a tree that is ever green—upon it a thousand glittering spangles—hallowed memories of those who played with us around our earliest Christmas trees, or shared the season's festivities in later years.

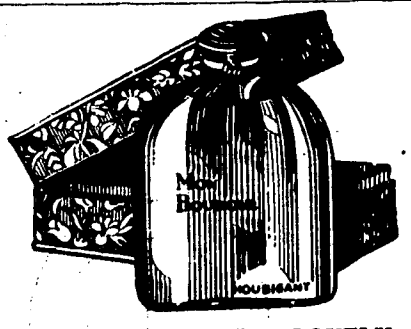

Refreshing are the recollections that flood upon us as a newer generation takes our place in the pleasures and happy illusions of Christmas.

May this Yuletide be brighter and happier than all that have gone before.

## "GIVE PRACTICAL GIFTS" Is the Slogan This Christmas

**TOILET REQUISITES LOVELY GIFTS INDEED**

There is a thousand suggestions in our Toilet Goods section and every one will make a lovely gift for someone.

Perfumes, softly scented, in quaint little bottles, \$1.00 to \$8.50.

Atomizers, graceful and pretty—75c to \$7.50.

Toilet waters, fragrant and dainty—\$1.00 to \$3.50.

Bath crystals, refreshing and sweet—75c to \$3.50.

Dusting powders, soothing and restful—75c to \$3.50.

We can't list but a few. Visit this department.

### YOU KNOW SHE WILL LIKE HOSIERY

Trim, graceful-fitting hosiery in the loveliest shades and the most sheer, cowbeby silk—a gift that will please. Packed in pretty holiday boxes and attractively wrapped—\$1.50 the pair. Three pairs for \$4.25. Others priced \$1.00, \$1.25 and \$2.50.

### LINENS

Fine imported linen pieces from every quarter of the world—delicately shaded with dainty hand embroidery. Luncheon sets \$1.25. Bridge sets, \$2.45. Dollies as low as 49c.

### TOWELS

Big fluffy turkish towels, snowy white, with colored borders, 25c to 75c. Towel sets in attractive boxes, 99c and \$1.19.

### BLANKETS

Great big wool blankets that hint of quiet, restful sleep. Soft plaids, wide bound borders—66 x 90—\$8.95. Cotton blankets—66 x 90—\$3.95.

### HANDKERCHIEFS

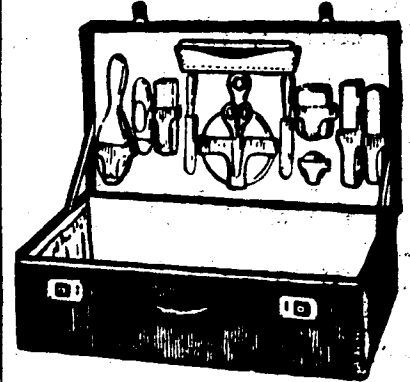

Oh! what a thrill buying your handkerchiefs here. Hundreds of the prettiest little affairs of linen, silk and lawn. Embroidered corners, lace edges and soft colors add appealing touches—5c to \$1.75.

### EVERY WOMAN LIKES DAINTY UNDERTHINGS

These dainty underthings of filmy silk in the most delicate shades of orchid, flesh, peach, maize, blue and green are sure to please. Bits of lace and ribbon add bewitching touches.

Nighties, \$4.95 to \$12.95. Step-ins, \$2.95 to \$3.95. Combinations, \$2.95 to \$4.95.

### LUGGAGE A PRACTICAL GIFT

Heavy wardrobe trunks are priced from \$12.50 to \$75.00.

Week-end bags, compact and trim, are priced \$5.95 to \$32.50.

Week-end bags, fitted with lovely ivory fittings in new shades, \$9.95 to \$37.50.

Hat boxes of reptile leathers, \$7.95.

### STOUT AND LIGHT WOMEN TOO!

The Indian who toed-in as he went his swift, sure-footed way through the primeval forest is often held up as a correct model of correct walking but toeing-in straight is not necessarily the normal angle of gait for Americans of today who wear shoes and take on excess fat. At least, this is one of the conclusions reached by Miss Sadie D. Patek, of the department of anatomy at Stanford University, who has measured 150 women students' walk, says The Boston Transcript.

Results of the tests, which will appear in a forthcoming issue of "The American Journal of Physical Anthropology," indicates that women whose feet make the smallest angle as they walk do not necessarily have the strongest or highest arches. Miss Patek believes that the angle of gait may be influenced by heredity, age, weight and height, and also sometimes by the length of the foot and the other proportions of the body, and by the previous habits of life and activity. Her measurements show, for instance, that heavily built women tend to toe out at a wider angle than women under 130 pounds, and toward the other extreme of weight, very light women also show a greater angle of gait.

New evidence that most people's feet do not match was obtained by Miss Patek, when she discovered that none of the women students walked at the same angle on both sides, and only five individuals showed less than one degree of difference between the two feet.

"The average angle of gait for the right foot of women students was 6.5 degrees, for the left 7 degrees, giving an average for both feet of 6.8 degrees," Miss Patek states. She determined the average angle of gait for men to be 7.2 degrees for the right foot, 5.8 for the left, with an average for both of 6.5 degrees.

The average length of the college girls foot is 9.3 inches and the average width 3.2 inches, judging by the 160 girls measured in the test.

The True Christmas Spirit  
That if, as a Scrooge-like cynic intimates, the Christmas spirit comes to us but once a year not even he will attempt to assert that we are not the better for it. Think what it would mean if that period of good will and kindly thought for others were dropped from our calendar. No blessed interruption to our too generally self-centered lives; no yearly oasis of brotherly love to purge us, however temporarily, of selfishness and cause us, if only for a few days to think of making others happy.

Pre-eminently the children's festival, as of right it should be since it commemorates the nativity of the Christ Child, it transforms us all whatever our years, into children of larger growth. We experience anew the glad expectancy of childhood, the thrill that far surpasses any realization, and find our greatest pleasure in the simple childish emotions of love and joy.

And this is the noblest Christmas gift, the gift of true Christmas spirit that captures and takes possession of each one of us. "Except ye be converted and become as little children ye shall not enter into the kingdom of heaven."  
Christmas Time.  
It is the Christmas time, And up and down 'twixt heaven and earth, In glorious grief and solemn mirth, The shining angels climb.  
At Christmastide  
At Christmastide the open hand Scatters its bounty o'er sea and land And none are left to grieve alone, For love is heaven and claims its own.  
The fuses still used in clocks in its original form was invented by Jacob Zech of Prague, in 1825.

## Do You Know That a Small Down Payment Puts a New McCormick-Deering Primrose on Your Farm?

Our liberal time payment plan lets every farmer buy the McCORMICK-DEERING Primrose Ball-Bearing Cream Separator easily, paying for it out of his increased income. 12 full months to pay—and you don't have to pay much!

### Earn as You Turn—Ball Bearings Make It Easy!

The McCORMICK-DEERING Primrose is a wonderful machine—a mechanical masterpiece. Its fast-moving parts spin easily on high-grade ball-bearings, eliminating hard work and minimizing vibration. It goes about its work faithfully twice each day and turns out a grade of rich cream beyond compare. No farmer can afford to be without it a day longer!

### Ask Us to Demonstrate

It's up to you. Say the word and we will set up the machine on your farm, show you how to use it, adjust it perfectly, and ask only a small down payment. You'll find it the world's easiest-running cream separator and you'll like it better every day.

**J. W. PLATT, Colesburg, Iowa, says:**  
"I do not believe there is another cream separator of any other make in this community skimming so close and giving as high a test as our Primrose."  
"Anyone looking for a close-skimming, economical cream separator does well to buy a Primrose—for it's a machine that can't be beat."

# ELECTRICAL GIFTS

For Christmas are the most practical gifts of all, for they are more than a remembrance of the day; they last a lifetime. Any of the following will make acceptable gifts:

## What Mother really wants—

ELECTRIC TABLE STOVE

ELECTRIC IRON

ELECTRO-KOLD

DECEMBER SPECIAL  
With each \$10.50 Hotpoint Electric Percolator a pound of Imperial Coffee will be given free.

Mother Deserves the Best

### An Automatic Hotpoint Electric Range

\$10.50 Hotpoint Electric Percolator Absolutely FREE

As an added Christmas gift for mother and the home, we will give a new \$10.50 Hotpoint Electric Percolator (just as pictured) FREE with each Electric Range purchased during the month of December—this one month only.

Come in and look over our stock of electrical goods. If we haven't what you want, we will be glad to get it for you.

## The Washington Water Power Co.

ELECTRIC TOASTER

ELECTRIC REFLECTOR

ELECTRIC PERCOLATOR SET

ELECTRIC WAFFLE IRON

### Old German Belief

Among the old German settlers in Pennsylvania it was a popular belief that a boy could be cured of homesickness by placing salt in the hems of his trousers and making him look up the chimney.

### Deafness of Snakes

Snakes have no external ears, and it is thought that they hear little or nothing. Whether they feel sound impulses through their bodies or bones is something that is not known.

### Binder for Cigars

Chemists of Lehigh university have just perfected a binder for use in cigars which it is claimed will permit carrying a cigar in the pocket without fear of breaking it under ordinary conditions.

### An Oversight

Go-gettery is quite in vogue and is highly successful in so many cases where the citizen has failed to mine the approaches to his money and chattels.

### CHRISTMAS TEAM WORK—AND IT WAS FOR KEEPS

It hadn't been a good Christmas season for the little maiden lady in her little Economy store. Economy was the apt name for it—the very strictest economy prevailed there. The next day was the last before Christmas, she reasoned, and a lot of her cheap toys were not sold. The little maiden lady made a resolution. She had always wanted to be rich that she might bestow fine presents upon all the boys and girls. She liked the boys and girls, but somehow they always treated her distantly when she made her timid overtures. It was very evident that she was never going to be rich—she would do something now; so she made a big sign and put it in her window: "A Christmas toy for each one in at four o'clock the day before Christmas."

Miss Watkins didn't think there ever had. The "Thankyous," were all so genuine and overwhelming and right in the midst of it who should appear but the kind-faced, white-haired gentleman who kept the small candy shop across the street, and he invited them all over to partake of his wares. He looked like Santa Claus himself with his round rosy cheeks, shining blue eyes, and white hair curling over his fur collar.

When everything was quiet once more and Miss Watkins sat with folded hands thinking about the Christmas gift the simple giving had brought her, Santa Claus from across the street again appeared: "Pretty good team work we made of it, didn't we, Miss Watkins?" he chuckled.

Santa Claus chuckled again and put his hands on the surprised lady's shoulders: "Don't you think we could team it together the rest of our lives?" And Miss Watkins looked up and blushing stammered: "Yes indeed!"

Science gives us artificial rain and synthetic lightning when what they want is some means of making winter merely hypothetical.

### The Mica Mines

The Press is glad to be able this week to tell of the activities of the Troy Mica Company which has for some months been engaged in developing its mica holdings about 10 miles northwest of Deary. Here is a source of community wealth that has languished for many years, but which under the present operations and others that will doubtless follow, bids fair to soon be adding its quota to Latah county's richness. The demand for mica is constantly increasing, due to the development in electricity and other directions. The product of this district is known to be of high quality and the extent of the deposit covers a wide area. The Troy Mica Company is systematically developing its holdings with a view of making a permanent and paying mine.—Latah County Press (Deary).

### Meaning of Equinox

The term "equinox" means literally "equal night." There are two equinoxes, the vernal and the autumnal, in each year. When they occur the sun passes north or south, over the equator, and the length of night and day is equal over the entire world. The equinoxes occur about the 21st of March and the 21st of September.

### The Scotch Recruit

A young Scotch sentry was put on sentry-go outside the general's tent. In the morning the general rose, looked out of his tent, and said in a stern and loud voice: "Who are you?" The young man turned round smartly and replied: "Fine, sir! Hoo's yersel?"

### Santa Says:

I have arranged with HERMAN'S Hardware Shop to show many fine useful Christmas presents at this store. I have asked them to arrange things differently than elsewhere.

They will have many moderately priced gifts from 10c to \$1.00. REAL VALUES displayed and plainly marked.

Lamp Shade Material will be found at this better arranged store, such as lamp shade frames, silk braid and silk fringe. Bed lamp frames complete with pull chain socket and silk cord for \$1.25.

I have ordered a reindeer load of Christmas Trees to be sent there as HERMAN'S always sold my Christmas Trees at a fair price.

HERMAN'S Hardware will also have my genuine Flexible Flyer sleds.

Signed,  
Santa Claus.

### CHRISTMAS TEAM WORK—AND IT WAS FOR KEEPS

It hadn't been a good Christmas season for the little maiden lady in her little Economy store. Economy was the apt name for it—the very strictest economy prevailed there. The next day was the last before Christmas, she reasoned, and a lot of her cheap toys were not sold. The little maiden lady made a resolution. She had always wanted to be rich that she might bestow fine presents upon all the boys and girls. She liked the boys and girls, but somehow they always treated her distantly when she made her timid overtures. It was very evident that she was never going to be rich—she would do something now; so she made a big sign and put it in her window: "A Christmas toy for each one in at four o'clock the day before Christmas."

Miss Watkins didn't think there ever had. The "Thankyous," were all so genuine and overwhelming and right in the midst of it who should appear but the kind-faced, white-haired gentleman who kept the small candy shop across the street, and he invited them all over to partake of his wares. He looked like Santa Claus himself with his round rosy cheeks, shining blue eyes, and white hair curling over his fur collar.

When everything was quiet once more and Miss Watkins sat with folded hands thinking about the Christmas gift the simple giving had brought her, Santa Claus from across the street again appeared: "Pretty good team work we made of it, didn't we, Miss Watkins?" he chuckled.

Santa Claus chuckled again and put his hands on the surprised lady's shoulders: "Don't you think we could team it together the rest of our lives?" And Miss Watkins looked up and blushing stammered: "Yes indeed!"

## The Road of Happiness

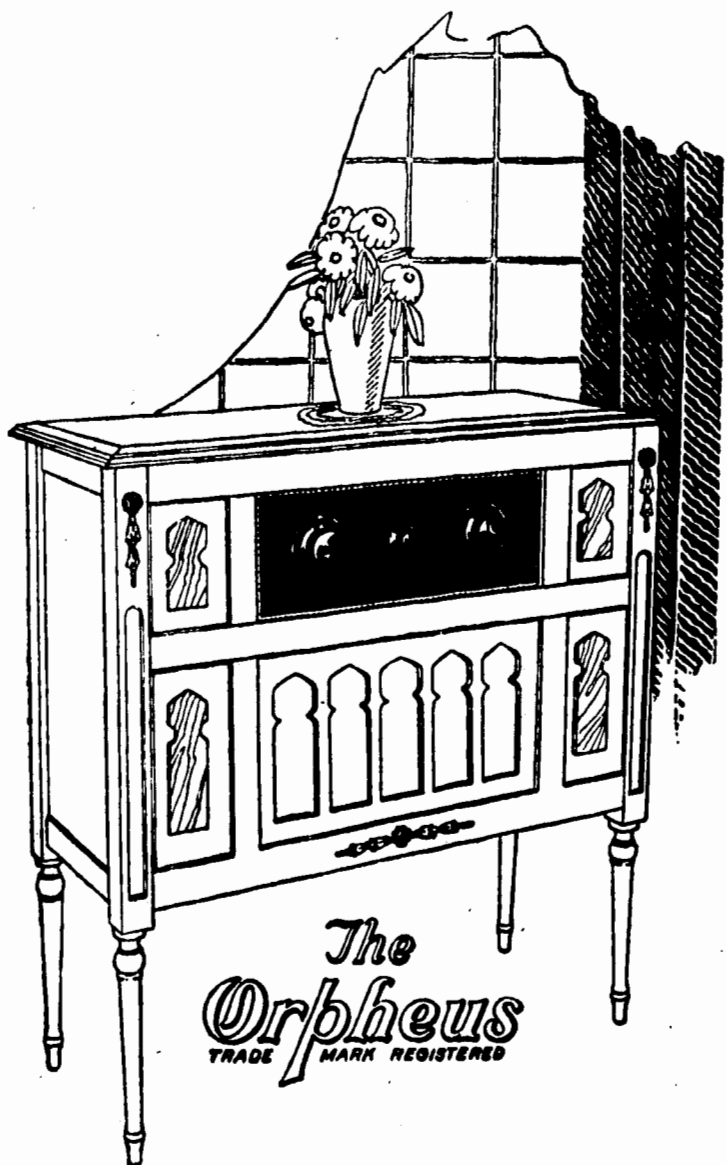

O. Lawrence Hawthorne

Across the rolling hills of life A friendly highway leads, A road whose every wondrous mile Is paved with noble deeds. For any man this course begins Where will and judgment meet, Where solemn purpose points the way And kindness guides his feet.

This highway is the only road That leads to great success; No other trail, no sidelong path Will find true happiness. Though up and down its route may run It carries straight and far And gains at last that haven where Life's great possessions are.

The youth who sets a worthy goal And formulates a plan Of progress that enables him To serve his fellow man Begins at once to know the joys That glory and bliss The lives of those who daily walk The Road of Happiness.

**HEARTS OF GOLD**  
 There had come a great change over Judson Marsh during the brief space of a year and Cedar Grove marvelled. Marsh had usually made the holidays a wild, riotous occasion of revelry, such as "shooting up the town," distributing time and money squandered in games of chance, indulging in a fist fight daily, generally maintaining a terrorizing influence. Always had he detained the gentle cheer of Christmas and the good pledges of New Year's, but this special Yuletide period he had renounced. He had renounced freely to charity and only his eagle eye had flashed and his lips became stern and firm as some derisive pal of the past sneeringly intimated that he had reformed and had taken "the goody, goody pledge."  
 No one could trace the cause of the remarkable alteration in manner and deed except Marsh himself and he was a close mouthed man. Perhaps Gladys Revere suspected, but if so she said nothing. She had come to the crude, wild settlement to teach school.  
 The Marsh ranch was ten miles from the settlement and there was no school in its immediate vicinity. Its owner was a young man not over 25 years of age, but he maintained quite an establishment. His widowed sister had lived with him until she died, leaving a shy, puny little girl, Madeline, who was idolized by Marsh.  
 "I have come to see you about my little niece, Miss Revere," spoke Marsh, and his face and manner did not belie what she had heard of his being a well educated member of a prominent Eastern family. "She is lonesome where we live, never has any young companions. I have heard of your kindly care of these little ones. Won't you find her a good boarding place in the town and sort of look after her?"  
 "She shall be as an own sister," replied Miss Revere spontaneously, taking the shy, reticent child in tender embrace, and the result was that little Madeline became an occupant of the home where Miss Revere boarded.  
 Once a week Judson Marsh called to pass half an hour with Madeline. Up on each succeeding visit it pleased him to note the change for the better in the child. Her devotion to her teacher was something pathetic. This was the period when Judson Marsh changed his course of life. A time too when the merest passing word with Miss Revere seemed to cause him to lift his head higher, and the influence of a worthy resolve was noticeable in his bronzed, impressive face.  
 It was about a month before Christmas when the settlement was visited by Marsh on horseback. There was something about him that reminded of his old-time briskeness and forcible imperative ways. In turn he visited twenty of the leading men and presented to each his proposition. Time was when anything Marsh suggested was carried out from motives of policy. In the present instance he found willing auditors, interested and sympathetic.  
 "It's about a Christmas present for Miss Revere," said Marsh. "I understand she is a proficient musician, and there isn't a piano in the place. She has been royal good to all of our children, little Madeline among them. I'll head the subscription list."  
 "And who'll pick out the instrument," one of the town committeemen asked.  
 "Oh, I'll go to the city and attend to that. You can trust me, boys," answered Marsh readily. "I was thinking of a player myself years ago. Now, then, this is to be a secret until Christmas."  
 That was agreed upon. Also it was arranged so that on Christmas Eve the scholars gave a concert in honor of their devoted teacher. The piano had been smuggled into the home at dusk while she was at the schoolhouse. She came home alone, as it was planned that she should. She noticed a light in the house as she neared it. As she fitted the key to the door a stream of pretty music met her ear. The next moment she stood at the parlor threshold.  
 There at the piano sat Judson Marsh. He was softly playing "Love's Old Sweet Song." Gladys noted a wreath on the piano holding a card-board disc reading:  
 "Merry Christmas—A token of love from the people of Cedar Grove."  
 "Oh! it is impossible!" began Gladys, and broke down from emotion. And then as the hand of Judson Marsh gently clasped her own, with downcast eyes and happy, happy heart she listened to his fervent avowal of the love that had made him a better man.  
 Get the Air  
 Blessed is the man who walketh not in the house of contagion, nor sitteth in the seat of the 'cougher' nor standeth in the way of the "sneezer," but whose delight is in the wholesome air of the land and of this air doth he breathe, day and night.

**A LITTLE TALK ON THRIFT**  
 (By S. W. Straus, President American Society for Thrift.)  
 There is no royal road to independence. There is a roadway, sometimes not easy to travel, however, that leads directly to that goal.  
 That roadway is thrift.  
 Here are a few figures that show what may be expected along that roadway. Save \$30 a month during twenty-five years of your life at 6 per cent compounded semi-annually and you will have \$61,975.  
 Five dollars a week for fifteen years at 4 1/2 per cent compounded semi-annually will give you \$5,500.  
 What better plan could be carried out for the education of one's children. Even \$1 deposited weekly for ten years will amount to \$635.32 at 4 per cent compound interest. Start at the age of twenty and save \$33.14 per month with interest compounded at 6 per cent semi-annually and at sixty-five one's accumulations will be \$50,000.  
 Let us suppose you are a young man 25 years old and that your earnings are sufficient to make it possible for you to save \$25 a month. You go along on this basis, saving systematically for a period of five years, when your earning capacity make possible the regular saving of \$50 per month.  
 At thirty-five you increase your savings to \$100 a month. When forty you find yourself able to save \$150 a month and at forty-five you increase your monthly savings to \$200.  
 By following this plan you will at the age of fifty have \$54,946.61 providing your savings have been compounded semi-annually at 6 per cent.  
 Sad and Solemn Thoughts  
 "Even at Christmas, when all the world is gay and glad," said the gray bearded philosopher, "there come to a man sad and solemn thoughts."  
 "Yes agreed the young man who had no watch on the end of his chain, and the saddest and most solemn are those that come to a fellow when he reads of the marriage of a girl to whom last Christmas he gave a diamond ring on which he is still paying installments.  
 One Kind of Sentinel  
 Critics are sentinels in the grand army of letters, stationed at the corners of newspapers and reviews, to challenge every new author.

**OH, DO DO IT EARLY!**  
 By Geo. H. Free, Algona, Ia.  
 Once a young man named O'Grady had a sweetheart, Nora Brady. Such a darling little lady, And she lived far, far away; She was pretty as a pheasant, And Dan thought it would be pleasant To select a Christmas present For his sweetie bright and gay.  
 Now it was, as I remember, On the last day of November, Or the first day of December, That he had this thought sublime; But though filled with glad elation, He sat down in meditation While that imp Procrastination Whispered slyly, "Take your time."  
 Art is long but time is fleeting, There's no hurry," still repeating, Thus his good intentions cheating, Dan let golden days slip by; But awake in perturbation To a state of consternation  
 And a sad realization That to win he needs must fly, Ransacked stores, with stocks depleted Friend O'Grady's optics cleared, And his quest well-nigh defeated, He some tawdry gift selected, Chosen from the oft-rejected-- Mailed it at the latest hour.  
 Christmas mails are oft belated, Even though anxiously awaited; So O'Grady's gift was fated-- After Christmas 'twas received! You who'd know in largest measure Joy of giving others pleasure, Haste to yield to them your treasure-- By delay be not deceived!  
 Spiders Have Calling Organ  
 Experiments seem to prove that spiders can call to one another. Several spiders have on the underside of their abdomens a round depression containing small, hardened projections, which is suggested to be the calling organ.

**Genesee People Are Appreciative**  
 Genesee people who have taken part in the search for R. C. Kleweno, who has been missing since a week ago last Tuesday morning, are loud in their praise of the hospitality extended them by the people of Pocatello and Harvard. While the hospitality was given in the name of humanity, it was nevertheless genuine and the people of this section who have had occasion to take advantage of it, are very appreciative.  
 At the time of going to press on Thursday at noon, no word had been received regarding the strange disappearance of young Kleweno, only that the hundreds of searchers have been unable to find even a trace of him.  
 All the "clews" that have been advanced have proven to be myths. It had been stated that traces had been found at various times, but they proved to be of no value and his disappearance is still an unsolved mystery.  
 It is understood that the young man's parents have offered a reward of \$250 for the return of his body or any part of it, this reward to stand indefinitely.

**New Press in Operation**  
 Tuesday morning's issue of the Lewiston Tribune was printed on their new 16-page press, which is capable of printing a 16-page paper at the rate of 30,000 papers per hour. This is indeed a step forward, not only for the Tribune but for Lewiston as well, for there is perhaps no other town in the United States within several thousand inhabitants of the size of Lewiston whose paper possesses a like press and the Tribune management is to be complimented on their progressiveness.  
 The Lewiston Tribune is conceded to be one of the best papers published in the Northwest. It is ably edited and is typographically good and the good people of Lewiston should be proud of it.  
 Christmas Turkeys Be Higher  
 A big turkey deal reported from Idaho indicates that the Christmas bird will cost more than he did at Thanksgiving time. In a big turkey growers' pool a Chicago firm bid 44 cents for fancy birds, compared to a top price of 43 cents two or three weeks ago. The Idaho deal, shippers believe, will tend to establish the standard for values for the next holiday deal. It is expected that 75,000 birds will be gathered up by the association for the Chicago concern, involving a total purchase value estimated at \$300,000.  
 Gwen Richardson of London, England, is the first white woman to explore the wilds of British Guinea.

**CELEBRATE SILVER WEDDING ANNIVERSARY**  
 Somewhere in the neighborhood of 75 or 80 friends and relatives gathered at the Lutheran church basement about 7 o'clock on Saturday evening, November 27, to help Mr. and Mrs. Paul Heppner celebrate their silver wedding anniversary.  
 The basement was very nicely decorated with silver tinsel and a large silver bell hung in the middle of the room. The main decoration on the table was a large wedding cake, very prettily decorated with a little silver bell and two hearts.  
 At about 7:30 supper was served, after which Rev. Wolff gave a short talk, which was much enjoyed by all. The guests of honor were then presented a very beautiful set of silverware; also several other silver articles as mementos of their silver wedding anniversary.  
 The main feature of the evening was a mock wedding, with Miss Bernadette Weber as the very handsome groom, while Mrs. Chas. Herman made a very charming bride. Viola Scharnhorst carried off the honors as preacher. Gretchen Reileman was flower girl and carried a large basket of cabbage leaves. Esther Heppner was ring bearer and carried a large slice of a carrot and Marjorie Nebelsick carried the bride's veil.  
 Games were played until later in the evening, when the crowd started for home. Mrs. Heppner went out and asked the noise-makers in and treated them to cigars and cake, after which all departed for their homes wishing the couple much happiness and hoping that 25 years from now they may help them celebrate their golden wedding anniversary.  
 Pine Grove News  
 Glen Sams is on the sick list. C. H. Spurbek is in Moscow for a few days.  
 Mr. and Mrs. Freeburn and family visited at the Henry Whitte home Sunday.  
 Jesse Coverdale has gone on a visit to Rainier, Wash., where his sister, Mrs. Al. Whitte and family, live.  
 Heber, Gladys and Mabel Harms, Bob and Ted Parks were Sunday dinner guests at the Fred Miller home.  
 Leon Baker left Sunday morning for a visit with his mother who lives at Pocatello. He was accompanied by Emerson Sams and his daughter, Pearl.  
 The condition of the roads between here and Genesee are a fright, especially for a mile on this end of the highway. Several cars have been stuck and had to be pulled out after a great deal of trouble and a liberal coating of mud. One was stuck overnight. It is high time the higher powers were prevailed upon to do something for this section of the road.  
 Grey Eagle News  
 Delpha Cameron was absent from school last Tuesday.  
 Ted Parks was a Sunday visitor at the John Platt home.  
 Kenneth Platt was a Saturday visitor at the Parks home.  
 Chester Sams was a visitor at the J. C. Cameron home on Tuesday.  
 J. C. Cameron and family visited at the J. P. Hermann home last Sunday.  
 Newell Stubblefield and family of Whitebird are now residing in this neighborhood.  
 Grandma Wahl, Bertha Vandepool, Phil and Matt Wahl were Sunday visitors at Chas. Scholer's.  
 A group of young people spent a very enjoyable Sunday evening at the Chas. Scholer home, Sunday, singing songs and listening to the radio.  
 Christmas Gifts for Everyone  
 In the center of Smolt's store they have a large display table loaded down with suitable Christmas gifts for everyone. You will enjoy inspecting them--reasonable, too--nothing over a dollar.  
 Believed to be 500 years old a salmon-remainer six feet long has been discovered in a temple pond in Tokyo.

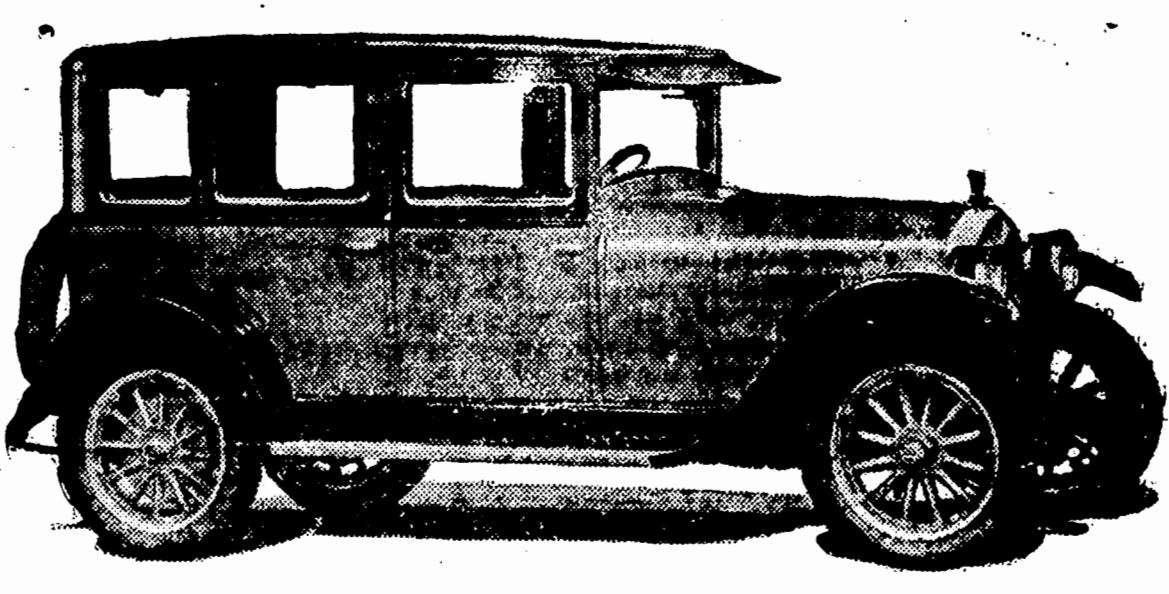

Once more old Santa Claus is ready to greet you at our store.

Loads of gifts are here, you will be surprised at the wonderful showing. Come early while the display is at its best. Inspect the largest display of beautiful gifts we have ever had, and at prices too, that will fit every pocket book. Just the gifts you've been looking for, for Everyone.

As has been our Custom in the past we will have a FREE Wrapping and Packing service for mailing too, this year.

Thank You,

Display windows and what's in them is a guide for you. (We invite comparison).

## RHODES CLOTHES SHOP

-- Known as the Best --  
Lewiston, Idaho

### WHAT HAPPENED HERE TWENTY YEARS AGO

Henry Herman arrived home from Spokane in time to enjoy his Thanksgiving dinner under the parental roof. He has been employed for some time in a Spokane greenhouse and expects to return to his work again after the holidays.

### Revival Continues at Christian Church

The special series of meetings at the Christian church are increasing in interest and attendance. Last Sunday night the house was filled to overflowing and the sacred musical program given by Dwight Heier, soloist, R. E. Matthews, trombonist and Mrs. Harmer, pianist, all of Clarkston was indeed an enjoyable hour.

### Around the Bush; Tuesday, "Conversion of the Eunuch"; Wednesday, "The Individuality of Sin"

In the 52 towns and rural districts it serves, exclusive of Spokane and the Coeur d'Alenes, the Washington Water Power company during the first ten months of 1926 generated and delivered more kilowatt hours of electricity than for the entire twelve months of 1925, according to the announcement of J. P. Farquhar, general agent.

MRS. MARION McQUARY

On Tuesday Mrs. Marion McQuary of Milton, Ore., joined the evangelistic party and her solo has captivated all who have heard her. She was one of the members of the famous Hatley-Giffillan quartette who have sung in the large cities of this country and their programs broadcast. She is a rare treat for this small church and community to have in our midst.

"There is probably no other industry which can give such an accurate picture of general conditions in the territory it serves as the electric service industry does, for the pulse of trade is reflected in electrical consumption," states Mr. Farquhar. "The record of kilowatt hours is delivered up to November 1 of this year, eclipsing as it does the record for all of 1925, indicates progressive activity throughout the territory."

"In the first ten months of 1926 the company delivered to the cities and rural districts exclusive of Spokane and the mining districts, 49,735,974 kilowatt hours of electricity, as compared with 47,737,504 kilowatt hours delivered in the twelve months of last year. July and August of this year saw the heaviest demand on record, with more than 7,000,000 kilowatt hours delivered during each of the 9 months to these districts. The increasing use of electricity for irrigation pumping is one reason for this; the other is the lowering of the general rate schedule in March of this year."

**Mione Vanity Chests**  
Each Christmas season we endeavor to have something different; something distinctive for our patrons. This year we have to offer a magnificent creation known as the Mione Vanity Chests. They are attracting favorable attention from everyone. Smolt's. 24-1

### THE GENESEE NEWS

Genesee, Idaho  
Subscription price, strictly in advance, \$2.00  
FRIDAY, DECEMBER 10, 1926  
Canadian Wheat Poorly Off  
Canadian farmers face heavy losses in the tie-up of wet and damp grain shipments in ice-locked lakes and rivers of the east, says a recent Winnipeg news dispatch.  
With much undried grain still unshipped the Northwest Graindealers association began seeking means for handling and drying it. Adverse fall weather made it necessary to thresh large quantities while it was wet.

### Spent Thanksgiving Here

Mr. and Mrs. Floyd Pinkerton and children of Athena, Oregon; Mr. and Mrs. Maurice Frazier of Milton, Oregon; Mr. and Mrs. A. Murphy of Lewiston, Mr. and Mrs. Oliver Woodley, Butler Mathews and Frank and Raleigh Hampton were dinner guests at the Fred Hampton home on Thanksgiving day.

### CHURCH NOTICES

**Congregational Church**  
Sunday school at 9:45 a. m.  
St. John's Lutheran Church  
A. F. Wolf, Pastor  
Sunday school at 9:30 a. m.  
English services will be held each Sunday morning at 10:30 o'clock, with the exception of the first Sunday of each month, when German services will be held at the usual hour.  
Genesee Valley Lutheran Church  
Sunday school and Bible classes at 10 o'clock a. m., December 12. Every one is urged to be present as there will be a rehearsal of the Christmas program.

### Card Club Entertained

The card club was very pleasantly entertained Tuesday afternoon at the country home of Mrs. Ira Hanson. The afternoon was spent in playing pinochle. The honors of the afternoon were won by Mrs. W. M. Herman while Mrs. Ben Jain was given the consolation.  
The invited guests were Mrs. Ray Edwards, Mrs. Ben Jain, Mrs. Lou Jain, Mrs. T. H. Herman, Mrs. G. B. Erikson, Mrs. Milton Rader, Mrs. W. L. McCreary, Mrs. Isaac Isakson, Miss Margaret Sampson, Miss Irene Mulalley, Mrs. Harold Haymond, Mrs. N. M. Leavitt, Mrs. Frank Hoorman and Mrs. E. W. Vanouck.  
The next meeting will not be held until after Christmas, the time and place to be decided upon later.

### Eastern Star Elects Officers

At the regular meeting of the Order of Eastern Star, held on Thursday night of last week, the following officers were elected for the ensuing term: Mrs. Henry Craft, worthy matron; Fred Perkins, worthy patron; Edith Smylie, associate matron; Minnie Thomas, secretary; Frank Wil- loughby, treasurer; Mae Lande, con- ductress; Victoria Hampton, associate conductress; Kate Nagel, chaplain; Ruth Perkins, marshal; Minta Follett, Aida; Emma Shirrod, Ruth; Johanna Christenson, Esther; Agnes Jones, Martha; Frank Willoughby, Electa; Butler Mathews, warder; Nels Lande, sentinel; Mrs. Robt. Emmet, pianist.

### The Syringa Club

The Syringa club met at the home of Mrs. Henry Flomer on Wednesday, December 8. The time was spent in needlework, after which a pick-up lunch was served.  
The next meeting will be at the home of Mrs. Paul Heppner on December 22.

### Few Wagons—Many Autos

Nex Perce county commissioners met Monday to equalize the personal property tax roll. This roll includes all property not attached to real estate for the purpose of taxation.  
It is noticeable the inroads the automobile is making on the mode of transportation in the county in the last ten years. In 1917 there were 1500 wagons and buggies in the county and this year but 23 are listed, says a Lewiston dispatch.  
Work horses, however, seem to be holding their own, the difference between the two periods being 175, in 1917 the number being 3280 as against 3105 this year.  
There are approximately 4,000 automobiles in operation in the county. In the last ten years there has been a decrease in common cattle of 800.

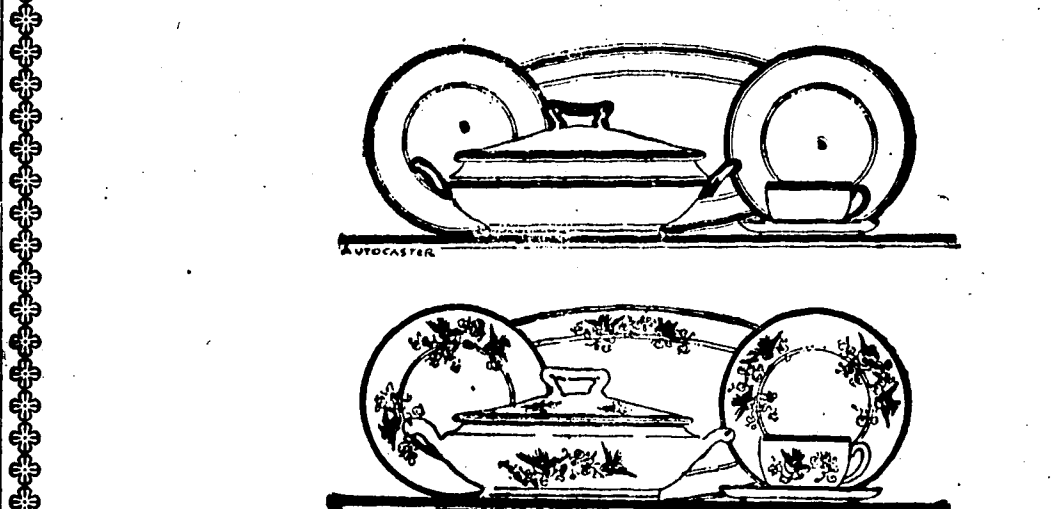

### More Rain—More Rest!

According to the popular way of figuring long about the first of June, there have been several million dollars' worth of rain fallen in this section during the fall season. It has been stated by some of the old-timers that more rain has fallen this fall than since 1893—the wet year. Be that as it may, everyone concedes that we have had enough, and to spare and as yet the country has had no opportunity of drying off and it now what might well be termed "wet territory." However, the temperature has been quite mild to date and is in deep contrast with that experienced in the central states and the east during the past few weeks.  
Everyone is hoping for a "white" Christmas and the chances look favorable at this time.

### PERSONALS

Miss Irene Mulalley spent the week-end in Moscow visiting Miss Bernadine Hasfurther.  
Miss Helen Grieser left Saturday for Moscow where she will visit at the Henry Broekneke home.  
D. W. Abern and son, Clarence, arrived home Saturday evening after having spent a few days in the Big Bend country.  
Wm. Fountain of the cattle firm of Fountain Brothers of the Salmon river country, was a business visitor in Genesee Tuesday.  
Mrs. Wm. Smolt returned home from Spokane Sunday, where she had spent the past week visiting her sister, Mrs. John Lorang.  
Mr. and Mrs. C. E. Richardson of Frederic, Wisconsin, arrived Saturday and will make an extended visit at the E. M. Becker home.  
Norman Cole, Ed. Thompson, Don Lemon and Pat Taylor of Pocatello were luncheon guests of Perry Larkin, son of Mr. and Mrs. I. W. Larkin, Friday evening.  
H. A. Allingham of Winchester, has been assisting the News in getting out its Christmas edition this week. Mr. Allingham was formerly owner and publisher of the Winchester Journal.  
Miss Violet Heppner returned home Monday after having spent the past week visiting at the home of her uncle at Moscow. Her cousin, Alfred Heppner, will leave about the middle of the week for Poyallup, Wash., where he will spend the winter visiting at the home of his grandparents, Mr. and Mrs. Peter Stoltz.

## A Gift With a Personality

"Where Quality Counts"

**PUBLIC SCHOOL NOTES  
OF MUCH INTEREST**

On last Wednesday at noon the report cards for the entire school were given out. These cards are given to the students on Wednesday at noon following the Friday at the end of each six-weeks' period.

Last Friday night the sophomores entertained the juniors at a program and party at the opera house. The sophomores are to be commended on the unique and successful program given.

There are yet many people who think that the child's education begins the first day he starts to school. The child's education begins at birth and ends at death. The training that a child receives at home has much to do with his progress at school. Many of the educational acts are performed by the child at home. Before he learns to read his senses are more or less developed, and he has learned many things through imitation. The thought material that the child has acquired before attendance at school will serve him as a comparison and will contrast to the things that he learns at school. Every primary teacher should see that the children have an abundance of thought material before she begins the difficult process of teaching the child to read.

The following is taken from the Idaho Rural Teacher: Statistics compiled recently by the Bureau of Education, department of the interior, that the consolidation of the one-room school into the larger unit is steadily moving forward. The number of one-room, one teacher schools reported in 1924 was 165,417.

This is 10,028 less than in 1922. The difference indicates the number of one-teacher schools that were centralized into the larger unit. The number of consolidated schools in 1924 was 14,918, an increase of 2,603 in 1922. The rate of increase of consolidated schools has been 1,000 per cent while the rate of decrease for the one-room school has been 4,500 per cent.

**Seventh and Eighth Grades**  
Our attendance record last week was rather low as so many pupils were absent on account of illness. We had a perfect attendance on Tuesday of this week and hope we can keep this up.

The representative from the Palmer Method company visited in this room last week and complimented the pupils on the type of work they were doing.

Some of the eighth graders have begun writing the required drills for their final certificates. The seventh graders are working for their improvement certificates which are next after earning their progress pin.

Buford Rogers and Jack Platt are the editors of the class paper this week. Each member in the eighth grade class has taken a turn.

**Sixth and Seventh Grades**  
We lost the picture given for the best attendance last month, but we won it back again this month. The sixth grade science class has completed one book and are all ready to begin on a new one.

We are working now on booklets of Idaho. They will contain a map and all of the important facts concerning our state.

**Third and Fourth Grades**  
We were glad to have with us on the second of December an expert sent out by the Palmer Writing company of Portland. She told us some interesting things about writing and taught our class that day.

Last Friday we each wrote our name on a slip of paper, then the papers were mixed up and each of us drew one. Now each of us are to get the person whose name we drew in an inexpensive Christmas gift.

Our room has begun to practice our Christmas play, which will be given in connection with the other grades. The date has not definitely been decided. The name of our play is "A Surprise Christmas."

**Primary Room**  
Christmas decorations are being put every day now and the children are all getting eager for old Santa Claus to get here.

Mrs. Dean was a visitor Tuesday of this week. We are always glad to have visitors. Come again.

Henry Dean and Paul Omundson have been absent on account of illness. They have both returned to school.

Mary Packer, a second grader, left us Friday for her home at Hilliard, Wash. We will all miss Mary and regretted her departure very much.

We have decided to give our Christmas program with the other grade rooms at the High School opera house. We will tell you more about it later.

First graders have made little spelling cards this week. They will place their stars on them each time they receive 100 in spelling.

We received our room pictures the last of last week. The children seemed very pleased with them.

The promptness in returning the report cards this six weeks period was splendid. Thank you.

**THE PICTURE SHOWS...**

"He's a Nut"

The Hotel theater for Saturday night, December 4, will present the big comedy success, "He's a Nut," with Edward Everett Horton as the "nut." It's a scream from start to finish and if you're not in a laughing mood Saturday evening, don't come. You'll be all out of tune.

The story starts by saying that Horatio obeyed when Martha demanded an immediate cessation of his activities on the saxophone. He passionately loved the instrument, but was needed to cow Horatio into complete docility was for his spouse to remark, looking dolefully at the chromo of her first husband, "Now, Jasper never did that."

Then the fun's on and stays on during the entire evening.

"The Night Cry"

Everybody loves Rin-Tin-Tin, the wonder dog. He will be seen at the Hotel theater on Sunday night in "The Night Cry."

A thrilling tale of courageous, powerful and loyal dog in the sheep-raising section of lower California, who guarded his master's baby with loving care and did battle with his enemies without fear or dread. Rin-Tin-Tin, wrongly accused of plundering the flock, narrowly escapes death at the hands of a revengeful shepherd and then, in one glorious flash of daring, tears and lashes at the conductor until that fearsome bird of prey gives its last weird "night cry" and dies.

"The Wilderness Woman"

The feature picture at the Hotel theater for Wednesday night, December 15, will be "The Wilderness Woman," with Allen Pringle in the leading feminine role.

Oh man, what a woman! She has the punch of dynamite—a figure like a queen—a temper like a tornado—the soul of a baby girl—and the heart of a woman. Her father made a million with a pick. She helped him spend it with a shovel. And when love comes into her life—why, you'd better be there to see the fun.

We received our room pictures the last of last week. The children seemed very pleased with them.

The promptness in returning the report cards this six weeks period was splendid. Thank you.

**Gifts for Women**

THERE is nothing that your friends--wife--or sweetheart would appreciate more than a gift of Luxite Lingerie.

Luxite Fine SILK LINGERIE is the Best

**MORSHECK BROS.**

**Myths Of Christmas Season**  
Legends and myths without number have become associated with the celebration of Christmas. Among some of the peasantry of France is a strong belief that loaves of bread baked at Christmas will remain fresh for ten years. It is also believed by some of the simple folk that during the whole of the Christmas holidays a portion of bread should be left on the table day and night because of the Holy Mother who may come to share it. For some reason not to be explained, there is a superstition among some French peasant wives that no bread must be baked between Christmas day and the feast of the Circumcision because an infraction of this rule will bring disaster on the household.

**It's Different Now**  
Lady: I suppose you wish Christmas several times a year.  
Willie: I used to till I got engaged to Millie Next door, but it's different now.

**First Repeating Watch**  
Gerrit Brammer was the first maker of the repeating watch, which he exhibited at the South Kensington (England) museum about 1735.

There is a peasant belief of age-long standing that if the cattle on the farm be given drink immediately after midnight mass of Christmas their health will continue good for the next year. Another belief that if seed of wheat be wrapped in a tablecloth which has been used for Christmas dinner, a profitable harvest will be insured. Another strange belief is that a cold bath taken on Christmas day will protect the bather against fevers and toothache throughout the year.

ISN'T Christmas, after all, a time when we strive to lighten a little the burden of those whom we love. And because housecleaning is her heaviest task, isn't it also the one where relief would be most welcome?

We suggest a New Hoover for HER—the finest electric cleaner in all the world. Only \$6.25 down.

**The New HOOVER**  
It Beats -- as it Sweeps -- as it Cleans

The Hoover Company will demonstrate, December 17 and 18 in Genesee, at the Hasfurther Hardware

**Santa Claus Was Good to Me**

There is no special program prepared—and no speechmaking, no urging of any plan, no propaganda to let loose, no elections, no restrictions and no "red tape." Farm men and women, who are "young in spirit" and who are interested in better and more profitable agriculture, are simply invited to gather together for the informal discussion of their problems and to work them out on the basis of their own experiences.

Participating farmers themselves manage the conference and mold the nature of discussion according to their own preferences. The facilities are arranged for by The Washington Farmer, which introduced the "young farmers" self-aid conference plan four years ago. But otherwise the meeting is left to the initiative and resourcefulness of attending farm men and women to supply their own program and discuss whatever subjects which seem most available. (And they know what they want too, previous conferences show!) A conference leader assists to speed things along and help coordinate the questions and answers.

For efficiency, the main conference is divided into sectional groups according to types of agricultural problems which are represented in main geographical areas. One division comprises the wheat country southward from Spokane in Washington, and north central Idaho; another the Big Bend country and a third the Panhandle of Idaho and the adjacent counties in Washington. Each of these regions will probably desire to have sub-conference meetings for the two days, to take up problems pertaining to their own agriculture just as they did last year. The women's division will also constitute another section, but farm women may attend any other sectional meeting where the subject for discussion interests them particularly.

As in previous years, the entertainment of "mixing" and having a friendly good time, will be a vital part of the conference.

The annual Young Farmers' banquet is becoming an institution of notable fun and enjoyment and this year will be even more vibrating with neighborly recreation and merrymaking, according to the "young farmers" who are planning stunt features for Friday evening, January 28. "Come and have a good time at a real dirt farmers' dinner in a pleasant hotel" is the banquet slogan.

The luxurious Davenport hotel is almost entirely turned over to farmers for the occasion. Last year the banquet room bulged to overflowing and many could not be accommodated. But this year a larger room has been secured, and "There'll be a hot time in town that night." You are invited for the two days—January 28-29.

**Not Without Beer**  
A Dutch concert is a social entertainment in which every man sings his own song at the same time that his neighbor is singing his, or in which each person present sings in turn one verse of any song he pleases, some well known chorus being used as a burden after each verse.

**Christmas Ribbons**  
If Christmas ribbons could express themselves they would say that people were thrifty, for some ribbons claim to have been doing business every Christmas for many, many years. They are often pressed and made to look their best, but they're the same ones used again and again. However, if they philosophize they would rejoice that they were the means of added gaiety, color and cheer to Christmas packages, year after year!

Advertisers appreciate your trade.

**SHOPPERS' HEADQUARTERS**

*A Lady Told Us Why She Was Going To Do Her Christmas Shopping at the City Market. She said:*

I am sure what I order will be right, as it has been for so many years past.

I have a phone and all I have to do is to call and my order will be taken care of, with the guarantee that if there is anything not just right it will be gladly adjusted.

We are glad to hear these things and always stand behind anything we sell in quality and price. Our aim is to please you and this we can and will do.

## IN TOYLAND

### Everything In Readiness For A Happy Christmas

For months and months Santa has planned this collection of toys. And when you see the gaiety and charm of them you will vote his work a great success. Every little boy and girl should pay a visit to this section and bring a list of the toys most wished for—it is a good way to make sure that Christmas morning will bring no disappointments. Bring mother or dad along—they will enjoy these fascinating toys with you and appreciate their moderate prices.

### Doll of Every Sort, Games, Mechanical Toys, Wooden Animals, Blocks, Books, Doll Houses and Trains

Cunning, clever toys, every one—and so well made that they withstand the most strenuous play. Little girls will love the pretty baby dolls with their curling locks and wide sweet eyes that open and close. Small boys will appreciate the skill that has fashioned the electrical toys. Indeed, so complete are the assortments that practically every toy is represented here. Come early while assortments are complete.

## R. C. BEACH CO.

"Lewiston's Greatest Christmas Store"

**Christmas Time.**  
Yesterday we put away the balls and tinsel; we robbed our tree of its adornment and left a mute witness of many a happy occasion.  
Today another tree is decorated. We inhale a balm from its bruised branches and feast on a beauty of line and color. But tomorrow—  
Tomorrow never comes. It never comes to those who live and love Christmas. It is always today!  
Yesterday is but a memory.  
Today is only the great arena of action.  
But tomorrow—  
Tomorrow is anticipation and dream. We get our anticipation from the love and achievements of yesterday; we gather our courage from the successes and sacrifices of today; and we build our hopes upon our rarest and chosen dreams for tomorrow.  
Yesterday. Today. Tomorrow. Every day is Christmas if the heart is warm with good-will to our fellows. Tens of thousands of happy voices may repeat the songs of the angels, but the notes will fall upon deaf ears unless the heart is properly attuned.  
While it is true a lot of money is spent each year for fun, there are some folk who never seem to have a moment's rest.

### CHRISTMAS TREES THEIR HIGH COST

The car was full, beautifully full, almost to the obliteration of the foliage-screened occupants. They were proud and happy.

Until stopped: At the sight of the constable the driver threw up his hands.

"All broke," he facetiously called—"Speed fine, trespass fine, and taking some worthless shooting fine. All gone. But what now?"

The owner of the adjoining estate stepped forward.

"Come here, Burleson," he said to his gardener. "Look over the trees in this car and tell what they cost."

The man studied the car, and then looked at a notebook in his hand. "Golden fir rare," he said. "Fifteen dollars."

"Say," expostulated the man at the wheel. "I won't stand for that. I can buy Christmas trees on the public market for fifty cents to two dollars."

"These are rare trees stolen from a private estate." Sternly, "Go!"

"Two English holly, with berries \$20, pyramidal box, \$10; six small yews, \$30. That's all except limbs chopped off."

"Seventy-five and the limbs—say a hundred. Well this is the sentence: Three hours work for each of you, and collateral left for the balance."

The man sniffed and turned to the constable. "A court would make it far more," warned the officer. "There would be at least \$300 for malicious trespass and theft. Better deal with the owner if you can."

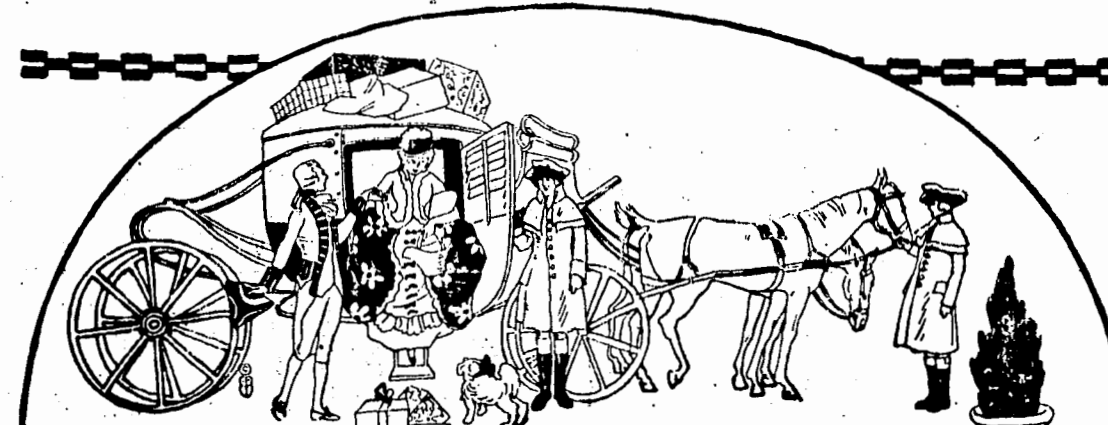

"When work?" he asked sullenly. "Today. It is only eleven. You got your load easily."

"But it's Christmas, and—"  
"That's why I make it light. And I pay you a dollar an hour for your work."

That is why two ladies worked three hours on Christmas, peeling potatoes and washing vegetables, in borrowed aprons, while one man sawed wood and another forked straw in a stable. And when they left they left two watches were left behind as collateral. The alternative was a multiplied fine and a probable jail sentence. It was the last that decided for work.

Once out of sight, the car was stopped and the driver threw an arm dramatically toward heaven.

"Never no more from the narrow path of a reformed car," he vowed. "It cost too much."

### This Is The "Present" Time

—Once every year almost everyone is asking, "What shall I give for Christmas?" This advertisement is written with the definite purpose of reminding you that we can furnish the completely satisfactory answer.  
—Each and every employee has been trained to help you with your gift problems—they will aid you with eagerness and with a smile.  
—Here you will find a distinctive gift for every member of the family—No shopping around. The prices are most moderate—lower than elsewhere.  
—Let us help make this Christmas, the best ever.

## Visit The Gift Shop DAVIDS' Visit The Gift Shop

**Christmas Weather**  
For Christmas the weather should be of that Pickwickian kind in which the grass is crisp and "frosty" the air has a "fine dry, bracing coldness," and the day is one "that might induce a couple of elderly gentlemen in a lonely field to take off their greatcoats and play at leapfrog in pure lightness of heart and gaiety."  
**Firefly "Some Battery"**  
Efficiency of the light of the firefly may be judged, says Nature Magazine, from the fact that the efficiency of a carbon incandescent lamp is 0.004 of a tungsten bulb 0.015, of an open arc 0.072, of a quartz-mercury arc 0.068, and of the firefly 0.96.  
It may be true that all men are born equal, but they don't know it at the time and forget it afterwards.

**PROVIDED BREAKFAST FOR OLD SANTA**  
"Do you think?" inquired small David of his father, "that Santa is coming 'bout this time?"  
"Why, not quite so early, son. A little later, perhaps. Still if you listen carefully, perhaps you can hear his bells."  
Small David stood on tip-toe near the window and cocked his pink ears. "I think I hear 'em!"  
The family rather forgot small David in the next half hour. There was so much to do. But finally father looked up. "Where's the boy?" he asked.  
David had disappeared. They scurried about hunting for him in every room. No David. Then some one heard a faint noise on the front porch. Father stepped out to see what it was.

A small, square figure in very short pants was bending over something.  
"Son," called father, "what are you doing out here?"  
"S-sh!" warned small David. Father stepped nearer.  
"See," said small David, reaching up tip-toe to whisper. "See, I brought out a bowl of breakfast food for Santa Claus. He might get hungry." Father gathered up his son, amused and pleased.  
"That's the very first time I ever knew of any one thinking about Santa's comfort. Bless you my boy! That's the right holiday spirit."  
Next morning small David found a note pinned to his stocking:  
Thank You for My Bowl of Breakfast Food!  
SANTA CLAUS

### MY CHRISTMAS TREE

By Charles Dickens

I have been looking on this evening at a merry company of children assembled around that pretty German toy, a Christmas tree. Being now at home again and alone, the only person in the house awake, my thoughts are drawn back by a fascination which I do not care to resist to my own childhood. Straight in the middle of the room, cramped in the freedom of its growth by no encircling walls or seen reached ceiling, a shadowy tree arises, and, looking up into the dreamy brightness of its top, for I observe in this tree the singular property that it appears to grow downward toward the earth, I look into my youngest Christmas recollections.

All toys at first I find. But upon the branches of the tree, lower down, how thick the books begin to hang—thin books, in themselves at first, but many of them, with delicious smooth covers of bright red and green!

"A was an archer and shot at a frog." Of course he was! He was an apple also, and there he is! He was a good many things in his time, was A, and so were most of his friends, except X, who had so little versatility that I never knew him to get beyond Xerxes or Xantippe.

But now the very tree itself changes and becomes a beanstalk, the marvelous beanstalk by which Jack climbed up to the giant's castle. Good for Christmas time is the ruddy color of the cloak in which, the tree making a forest of itself for her to trip through with her basket, Little Red Riding Hood comes to me one Christmas eve to give me information of the cruelty and treachery of that dissembling wolf who ate her grandmother without making any impression on his appetite and then ate her after making that ferocious joke about his teeth. She was my first love, I felt that if I could have married Little Red Riding Hood I should have known perfect bliss. But it was not to be, and there was nothing for it but to look for the wolf in the Noah's ark there and put him last in the procession on the table as a monster who was to be degraded.

Oh, the wonderful Noah's ark! It was not found seaworthy when put in a washing tub, and the animals were crammed in at the roof and needed to have their legs well shaken down before they could be got in even there, and then ten to one they began to tumble out at the door, which was but imperfectly fastened with a wire latch. But what was that against it?

Again a forest and somebody up in a tree—not Robin Hood, not Valentine, not the Yellow Dwarf; I have passed these and all Mother Buncle's wonders without mention—but an eastern king with the glittering scimitar and turban. It is the setting in of the bright Arabian Nights.

Oh, now all common things become uncommon and quite enchanted to me! All lamps are most wonderful. All rings are talismans. Common flower pots are full of treasure, with a little earth scattered on the top; trees are for Ali Baba to hide in; beefsteaks are to throw down into the Valley of Diamonds, that the precious stones may stick to them and be carried by the eagles to their nests, whence the traders, with loud cries, will scare them. All the dates imported come from the same tree as that unlucky one with whose shell the merchant knocked out the eye of the genie's invisible son.

But, hark! The waits are playing and they break my childish sleep. What images do I associate with the Christmas music as I see them set forth on the Christmas tree! Known before all the others, keeping far apart from all the others, they gather round my little bed—an angel, speaking to a group of shepherds in a field; some travelers, with eyes uplifted, following a star; a baby in a manger; a child in a spacious temple, talking with great men; a solemn figure, with a mild and beautiful face, raising a dead girl by the hand; again, near a city gate calling back the son of the widow on his bier to life; a crowd of people looking through the open roof of a chamber where he sits and letting down a sick person on a bed with ropes; the same in a tempest, walking on the waters; in a ship again, on a seashore, teaching a great multitude; again, with a child upon his knee and other children around; again, restoring sight to the blind, speech to the dumb, hearing to the deaf, health to the sick, strength to the lame, knowledge to the ignorant; again, dying upon a cross, watched by armed soldiers, a

darkness coming on, the earth beginning to shake and only one voice heard, "Forgive them, for they know not what they do!"

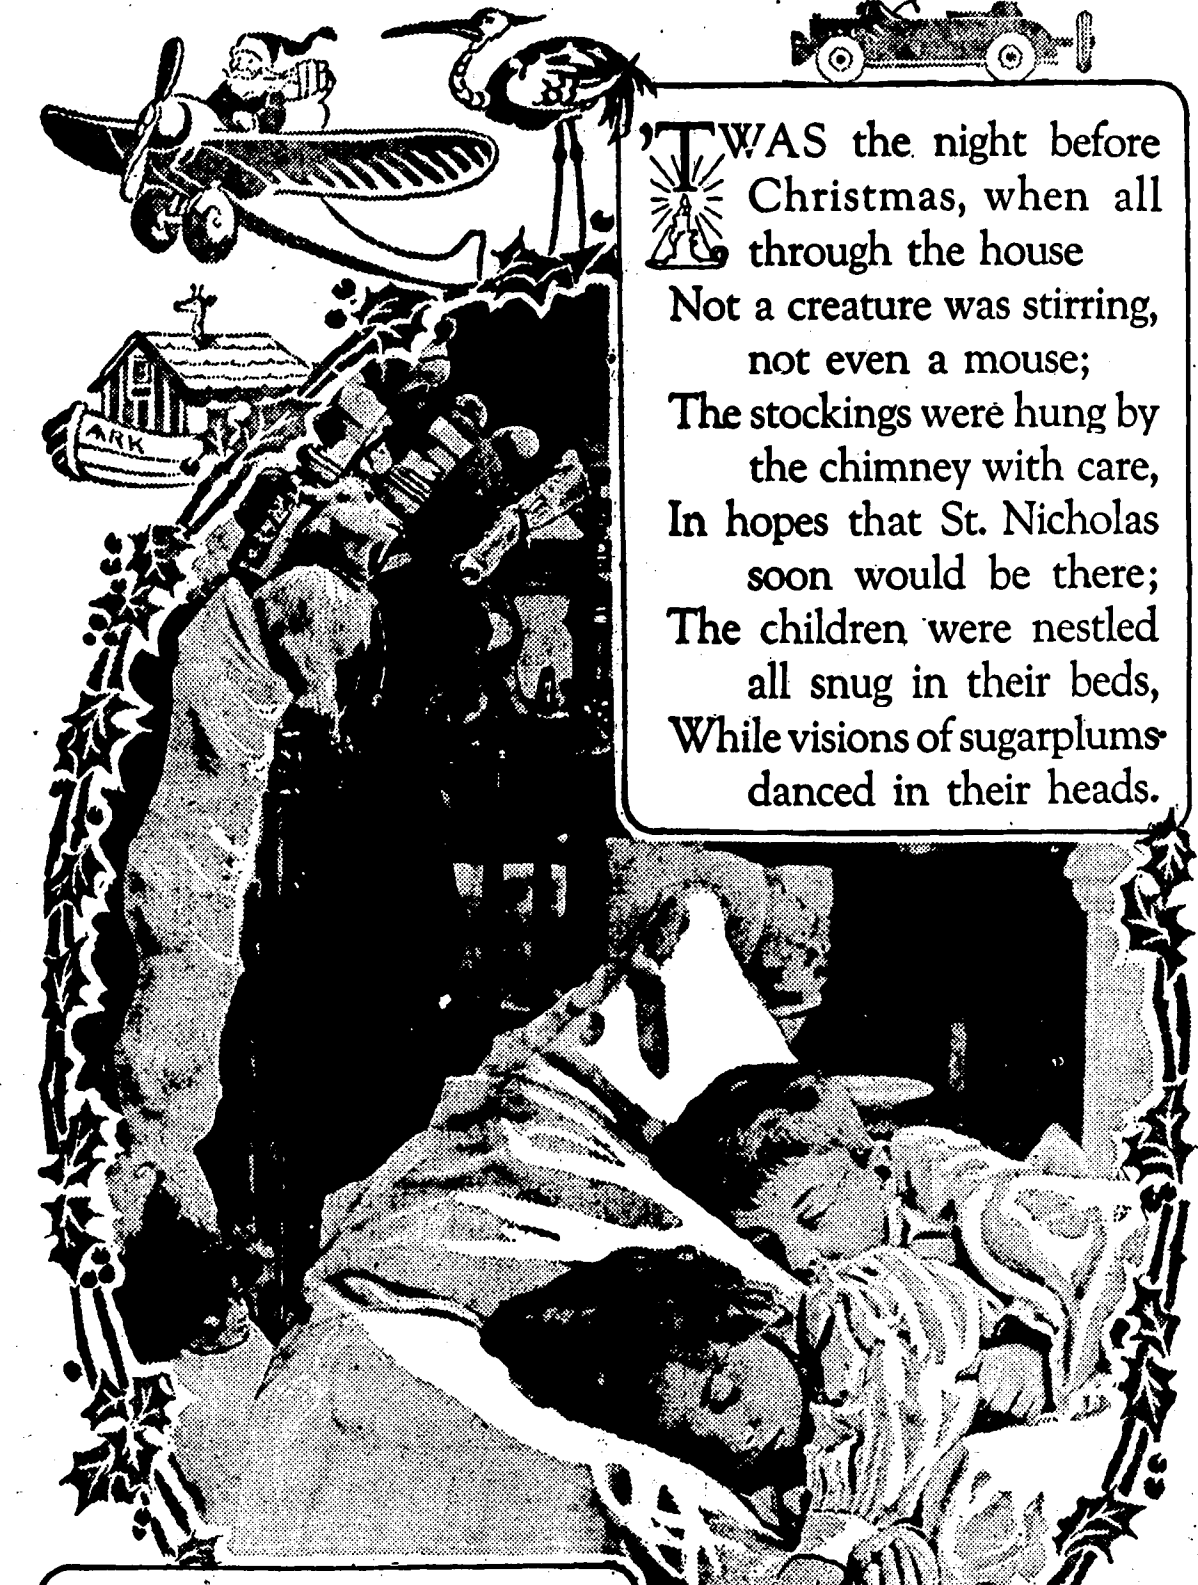

Encircled by the social thoughts of Christmas time, still let the benignant figure of my childhood stand unchanged! In every cheerful image and suggestion that the season brings may the bright star that rested above the poor roof be the star of all the Christian world!

A moment's pause O vanishing tree, of which the lower boughs are dark to me yet, and let me look once more. I know there are blank spaces on thy branches, where eyes that I have loved have shone and smiled, from which they are departed. But far

## "One Night Before Christmas"

IT WAS the night before Christmas, when all through the house Not a creature was stirring, not even a mouse; The stockings were hung by the chimney with care, In hopes that St. Nicholas soon would be there; The children were nestled all snug in their beds, While visions of sugarplums danced in their heads.

AND filled all the stockings; then turned with a jerk, And laying his finger aside of his nose, And giving a nod, up the chimney he rose; He sprang to his sleigh, to his team gave a whistle, And away they all flew like the down of a thistle. But I heard him exclaim, ere he drove out of sight, "Happy Christmas to all, and to all a good night!"

—Clement Clarke Moore.

above I see the raiser of the dead girl and the widow's son—and God is good.

**Compensation**  
Mrs. Hoyle—"It's too bad that we are kept at home from the opera by the storm." Mrs. Doyle—"Well, it will give us something to talk about, when we do go."

**And Maybe Better**  
If the girls would spend a little less time in making eyes, and a little more in making pies, they would come out just as well.—Ex.

Don't court trouble unless you want to find yourself married to it.

### Legend of the Mistletoe

The mistletoe bough, according to an old Scandinavian legend, was responsible for the death of Balder, the son of Odin, and the God of Eloquence and Poetry. Having informed his mother, Friga, that a dream had warned of his imminent death she invoked the powers of earth—fire, air, earth and water, (including all animals and plants)—to come to his rescue. In the combats of the gods, therefore, he found himself unharmed. But Loake, his deadly enemy, was determined to discover the secret of his invulnerability, and by judiciously flattering Friga, and praising the progress of her son obtained from her the reason. But she foolishly told

him, there was one feeble little s host she was not thinking it necessary to invoke—the mistletoe.

The treacherous Loake immediately procured a branch of the mistletoe, and entering the assembly of gods presented an arrow made from it to blind Heda, with the words—"Balder is before thee. Shoot!" He shot and Balder fell pierced and slain. And countless thousands have since been "slain" and will be slain for ages to come with darts from the Mistletoe bough.

The devil knows his friends when he sees them, but don't let this fact prompt you to dodge around the corner.

### COLLECTING ON CHRISTMAS

Told by a Traveling Man

A bunch of us were putting in Sunday evening swapping yarns of our early days on the road when it came the turn of an accident insurance special.

"The first trip I ever made was when I was a kid of twenty," he said. "I was shipping clerk in an agricultural implement house in Brooklyn. I was to make a collection, and, of all days in the year, I was to see the man on Christmas day!"

"Why then? Well, the chap I was to see was a big farmer up in the hills of Sullivan county, and he did quite a business in farm implements among his neighbors. He had given the house a bunch of notes running four months and falling due September 1. Every one of them came back protested.

"The junior partner had charge of the collections, and he figured there was just one sure way of nailing the chap, and that was to get to the house Christmas morning.

"I don't remember the name of the village I had to get off at, but I do remember it was a mighty cold night when I arrived there. I got away all right in the morning after the hotel man had given me all sorts of directions about the way to get to Johnston's place, twelve miles away.

"Johnston himself opened the door and without waiting for a word from me, said: 'Come right in, stranger. Mighty cold morning, ain't it? S'pose you lost your way.'

"I didn't commit myself one way or the other, but accepted his invitation by walking into the parlor. There was a bunch of children in the room, one a lad of sixteen or so, who was told to put the horse up. There was a big Christmas tree in the window, all decorated with shiny ornaments and tinsel.

"We chatted for quite awhile until he had to go to the barn to help his men tend the horses. I played with the children, and when he got back I had the littlest girl on my knee and was reading to her.

"Started snowing again," Johnston remarked as he stamped his feet on the rag rug outside the parlor door. 'Dinner'll be ready in a little while, but I'll have the wife hurry it up if you have to get away.'

"I told him I couldn't think of butting in on the family that way and that if he'd give me a few minutes I'd like to talk business with him.

"You'll talk no business to me today," he said. "You'll have dinner and supper with us and a mighty good bed tonight. You can talk business in the morning."

"But—I broke in. "There's no 'but' about it. That's the program, and I'm boss in this house!"

"And let me tell you, boys, I had a lully time! "After breakfast my host took me into the little office he had between the parlor and dining room and told me to fire away.

"What do you think I said? 'Mr. Johnston, I don't want to talk business at all. I'm going on my way and I'll come again tomorrow.'

"Don't be afraid. If it's something disagreeable, spit it out!" he said. "What's the question?"

"When are you going to take up those notes of Ehrman & Wilson's? That's what they sent me up from Brooklyn about. But after the friendly way you and your wife have treated me I have nothing more to say. I'm ashamed of my job."

"You're all right, young man," he remarked, to my astonishment, and relief. "I don't blame you a bit, and I admire the stand you take. Read some more stories to Nellie out of the book while I look after the cattle, and by and by we'll drive to town, and I'll fix up the notes for you. I have been pretty hard up the last few months, but I got in a sum of money a few days ago, and everything's O. K. now."

"When we got to the bank he gave me a certified check for the \$600 he owed the house and a ten-dollar bill for myself to buy something for my baby as a present from curly-headed Nellie."

**Process of Getting Helium**  
Natural gas subjected to a tremendous pressure by a secret process turns to liquid at 317 degrees below zero, and from it helium then is drawn off.

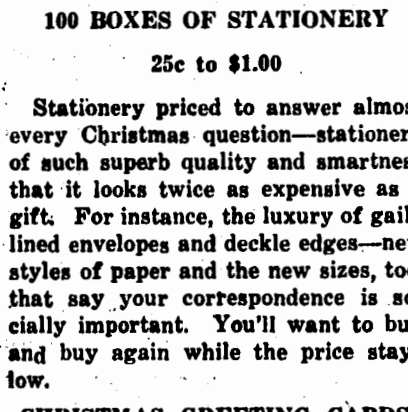

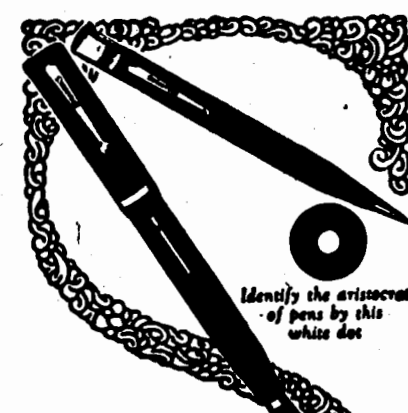

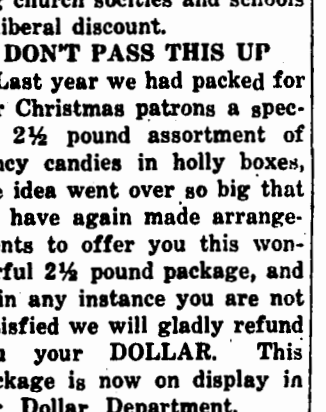

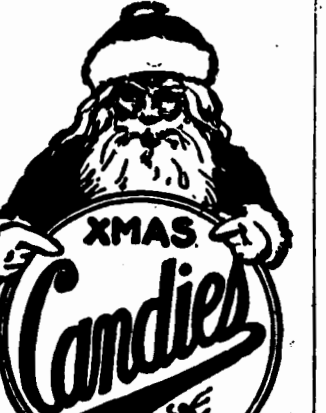

## Do Your Christmas Buying Now!

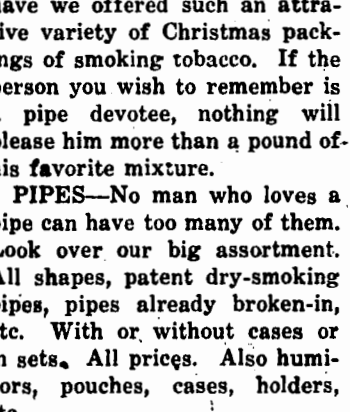

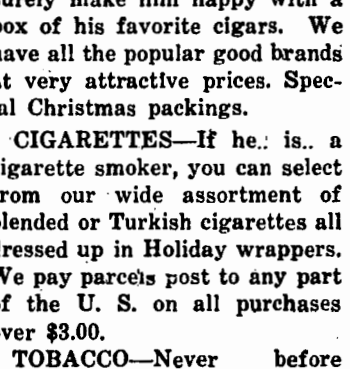

Here you are --- Christmas just a few days away - but never worry, our dollar table will make your Christmas allowance go further, while the great variety of our offerings will make selection easy. In choosing your presents, just remember that we have gifts that are sure to be appreciated.

**Stationery priced to answer almost every Christmas question—stationery of such superb quality and smartness that it looks twice as expensive as a gift. For instance, the luxury of gaily lined envelopes and deckle edges—new styles of paper and the new sizes, too, that say your correspondence is especially important. You'll want to buy and buy again while the price stays low.**

**A LITTLE TALK ON THRIFT**

(By S. W. Straus, President American Society for Thrift.)

Now is a good time to make plans for the coming year. No matter what ideas are incorporated in these plans they should include some provision for the systematic saving of money.

Many persons make resolves of this kind each year, hold to their resolutions for a while and then let them go. Quite often this is due less to instability of character than to defective planning.

It is as much a mistake to try to save beyond one's means as it is to try to live beyond one's means.

There are rightful and necessary demands made upon every individual. If we try to save too much, especially if we are beginners in thrift, we court failure.

The amount to be saved is a matter of adjustment. The man who has never saved money will find that he can save more the second year on the same income than he was able to save the first. This is because, with the development of thrift habits, he not only finds it easier to restrict his extravagances and unessentials, but he develops short cuts. He learns that, with ingenuity, he can attain the same results often at less cost than when he was not under self-discipline.

It is for these reasons that every savings plan should be based on the idea of systematic accumulation. There is little value in sporadic saving but there is in regular saving.

Plan your savings for the coming year along sensible lines. Adjust them to your income and to the conditions of life about you.

Goethe observed that "enthusiasm is of the greatest value when we are not carried away by it." This can be applied to saving money as well as to everything else in life.

Advertisers appreciate your trade.

THE LINE-UP OF AGED HOLSTEIN COWS AT THE RECENT PACIFIC INTERNATIONAL LIVESTOCK SHOW. The position in line indicated the premium awarded each animal by Judge Alex Hanson, of Savage, Minn., who stands in the foreground. From right to left the cows are: DeKok Clithilde Monona, senior and grand champion, owned by F. E. Murphy, Breckenridge, Minn.; Nookack Irma Segis, Carnation Milk Farm, Seattle; Frances Cornucopia of Ceresilla, James C. Chamberlain, Ceres, Wash.; Miss Pontine Roxanna, C. H. Erickson, Salt Lake City, Utah; Hilda Sir Korndyke DeKok, F. E. Murphy; Tillamook May Boon DeKok, Carnation Milk Farm; Josephine Segis Walker Lass, Albert J. Evers, Forest Grove, Ore.; Hollywood Dudley, Hollywood Farm, Woodinville, Wash.; Primrose Beate DeKok, W. A. and Jennie Swan, Sunnyvale, Wash.; Colara Oriana, Mrs. F. T. Durkin, Salem, Ore. These were the pick of the twenty-one aged cows that entered the ring to contest for the ten premiums.

## SHORT COURSES AT THE STATE COLLEGE OF WASHINGTON, PULLMAN, WASHINGTON

Several agricultural short courses will be presented in this winter to show the application of technical information to practical plant operation, in the handling and processing of dairy products.

The department of dairy husbandry is especially well equipped to give such instruction. Twelve separate laboratories in the new dairy manufacturing building, David S. Troy Hall, are devoted to instruction in dairy plant operation. Machinery of the latest type and design and of full plant size, for pasteurization, ice cream making, butter making, automatic washing and refrigeration is available for study and practice. A commercial dairy plant is operated in the laboratories where milk, butter, and ice cream for the state college and the city of Pullman are processed and manufactured.

In addition, there is available three separate testing laboratories where the various tests and analyses will be demonstrated and practiced. A Mojonnier testing machine will also be available for those who desire experience in its operation.

A registration fee of five dollars will be required for this course and in addition it is urgently recommended that certain books, which will be specified, be purchased by those taking the course.

**Poultry Production and Marketing**  
This course will be held January 31 to February 5, and is intended for men and women who are interested in handling poultry flocks whether on a small farm flock or larger commercial flock. The course will consist of lectures and practice work on the poultry plant. Some of the subjects considered will be: Feeding for egg production, feeding young chickens, calling poultry flocks, management, and building and equipping laying houses. Practice will be given in breeding and in incubation. Diseases and soil contamination also will be studied.

All of the work in the poultry short course will be of a character directly applicable to the management of poultry. The practice work will be provided for in the poultry plant consisting of incubator house and service rooms, feeding experimental house, breeding house, laying houses, and colony and brooder houses. The high producing S. C. White Leghorn and Rhode Island Red flocks and several breeds of other poultry from the college poultry plant will be used for demonstration purposes. There will be no fee for this course.

**Farm Marketing**  
The one week farm marketing course will begin January 3 and close on January 8. It is intended for practical farmers, warehouse, and elevator men. This year special emphasis will be given to grain marketing. Factors affecting the establishment of prices, growers control of prices, government price fixing, market information, meeting of problems in market finance, the nature and functions of grain exchanges and future trading, present and possible future market outlets, grades and standards, and new wheat varieties and their significance in marketing are some of the subjects that will be considered. Other important phases of marketing will also be given attention. There will be no fee for this course.

## For Better Health

FAIR, FAT AND FORTY—BUT WHY FAT?

Like President Roosevelt's cowboy who after visiting the circus, and viewing the giraffe, said, "There ain't any such animal!" you can't be beautiful and fat, no more than you can be healthy and fat.

Life insurance companies won't insure you if you are too fat and movie companies won't employ you if you are over-weight, unless you are taken on as a burlesque.

Even out of the movies fat people are the source of much amusement and the butt of many good-natured jibes. It is probably because they look so funny; but sooner or later it is a serious matter to be over-weight.

When you are building a house you pile up bricks and mortar until the house is built, and when it is finished you do not pile on more bricks and mortar just to make it look bigger, distorting your lines of symmetry and beauty.

When building up our stature, we force the feeding to make a strong structure, but after becoming mature and the structure of our body is complete, we should not keep on adding food and fat until we are bulging out all over.

The reason so many people get fat about 40 years of age is because they keep on over-eating all kinds of foods, principally starches, fats and sweets, bread and butter, hot cakes, sweet cakes, pie, waffles, fat and cream. If you wish to be attractive at 40, and you certainly should be attractive at 40.

travels at this age, then keep your weight normal and do not be a misfit. Fair at forty, certainly try and be so, for that is the best time of life. But to be good looking and fat is as impossible as it is to be fat and in the best of health. If you are over-weight, do not commence taking some peculiar diet or cure of which you know nothing, but go to see your family doctor so that you may be fair at 40—without the fat.

Secretary of Agriculture Jardine wrote a special commendatory letter to the folks in Union county, Kentucky, for their splendid work in disposing of all their grade bulls in the county and replacing them with pure-bred bulls of merit. Secretary Jardine commended them for being the first county in the United States to achieve the distinction of putting its cattle breeding operations on a 100 per cent purebred-bull basis.

The Adams county fair this year gave more than \$400 in prizes to club members. The club exhibit is always a feature of the fair. The county now has 191 members, of which 117 are in the sewing project.

Not a single foreign country has as many telephones today as the United States had twenty years ago.

The first lumber schooners to be equipped with the new Kalaist radio compasses are the Coos Bay and F. A. Warner of the Coos Bay Lumber Company. It was announced by the Federal Telegraph Company who completed the installations this month.

In the Heart of Spokane, close to stores, theatres, and the business district, the Coeur d'Alene Hotel offers the traveler every convenience. Popular prices and perfect service. "The Hotel With a Personality."—Adv.

## Plays a Manly Instrument But Practices Feminine Art

**DRUMMING** is a branch of musical art which is generally considered to be peculiarly masculine in appeal, but a striking exception to this rule is Julia Goldman, 18-year-old drummer of the well-known Pio Richardson orchestra, and probably the youngest drummer, male or female, in any "big-time" orchestra.

But the mastery of this manly instrument has by no means detracted from Miss Goldman's feminine attributes, as witness her fondness for cooking, which she often indulges in her few spare moments. And she never finds it necessary to drum up trade for her Rice Cream, the recipe of which she has given us:

- Rice Cream**
- 1/2 cup rice
  - 1 1/2 pints milk
  - 1 teaspoon vanilla
  - 1/2 pound almonds
  - 1/2 cup sugar
  - 1/2 tablespoon gelatine
  - 1 pint cream
- Wash rice, put in boiling milk, boil until rice is tender, stir in the chopped almonds, vanilla and sugar, add whipped cream and gelatine (dissolved in boiling water). Serve with fruit sauce.
- Miss Goldman always adds a small quantity of gelatine to her recipe for Rice Cream, having learned recently that this ingredient is an aid to the digestion of other foods with which it is combined.

## RESULTS IN PUREBRED SIRE CAMPAIGN IN PIERCE AND SKAGIT COUNTIES

Dairymen of Pierce County have for many years been selecting their cows and raising their best heifer calves in order to get better production from their herds but there had been no definite step taken toward securing a higher class of herd bulls. Questions as to how this might best be accomplished had come from the breeders' association and it was finally decided to make an effort to place as many purebred bulls as possible regardless of breeds.

When assistance was asked from the county extension service, the Best Sires campaign method was suggested and finally adopted as the best plan for putting over a drive of this kind. Dr. S. B. Nelson, director of the extension service at the State College, offered to assist with the plans for such a movement. The expense of this way was partly carried by the dairymen and by the extension service, which placed the bulls at a lower cost than could have been levied in any other manner.

Preliminary surveys were made of the dairy communities prior to the campaign and it was found that there was a large percentage of grade and scrub bulls at the head of many herds. There were over 300 which were not registered, and this was found to be nearly 60 per cent of the total number of herd bulls that were in use.

The task of securing bull calves from serviceable bulls for the campaign was taken up by an active committee and by September 27, the starting date, there were 150 animals listed for sale from some of the known herds of this state and of Oregon. A provision that each animal listed should be from a dam having at least 400 pounds butterfat to her credit, assured the buyers that they were getting high class animals.

The support given the dairymen indicated that there was an earnest effort on the part of all businessmen to help in the effort to increase their profits. The Chamber of Commerce of Tacoma took an active part and helped in getting the news of the drive to all parts of the county. This was done through the agricultural development bureau with C. L. Babeock, chairman and A. H. Banwell secretary. Members of the campaign committee were: Albert Ryhner, Sanitary Lumber Company, and Pete Gammelfoft of Roy. A. M. Richardson, the county agent, was appointed manager.

The total number of bulls sold was not large, but a good many expected to get better bulls later on. A few bulls were also sold before the campaign began as a result of committee work. The following is a list of the bulls sold during the campaign:

Harry Prescott, Parkland, Guernsey; from Vander Gulch and Bros., Longdon; Albert Ryhner, Sanitary Lumber Company, from Hollywood Dairy; A. M. Albert, Buckley, Holstein, from Western State Hospital; G. Olson, Pursty Dairy, Guernsey, from Clyde E. Ringo, Multnomah, Ore.;

## Applies Housekeeping Abilities To Store Management and Buying

When you think that you are running a house successfully call into play all the qualities—some others—required for success in the business world. And now comes along Mrs. Lionel Bigman as a living exponent of all our theories. Mrs. Bigman, with her husband, conducts the Rialto electric shop in one of the busiest sections of New York, and does all the buying and store management, leaving her husband free to look after the home.

A few minutes of Salt

Apriocot Souffle (Makes eight servings)

- 1 tablespoonful Gelatine
- 1/2 cup cold water
- 1 tablespoonful Lemon Juice
- Whites of two Eggs
- 1 1/2 cups canned Apricots
- 1 cup canned Apriocot Juice
- 1/2 cup Sugar

A few minutes of Salt

Soak gelatine in cold water ten minutes, and dissolve in hot apricot juice. Add sugar and lemon juice and when mixture begins to set beat in whites of eggs which have been beaten until stiff. Add apricots strained and cut in halves, then turn into mold, first dipped in cold water and chill.

Needless to say she does not neglect her house, and while she leaves the execution of the work to others, she retains an active supervision, and on Sunday enjoys nothing better than to don an apron and put together some delightful dessert.

When in Seattle eat your meals at Boite Cafe, 1414 3rd Ave. Popular Prices.—Adv.

**FARMERS ARE RECEIVING QUESTIONNAIRES THIS WEEK**

What agricultural problems are most important to the average farmer of eastern Washington and northern Idaho?

More than 200 committee members of the fourth annual young farmers' conference and nearly 1000 other farm men and women are this week receiving questionnaires asking them to submit problems that could profitably be given attention at the fourth annual conference, to be held in Spokane January 28 and 29.

No one particular theme is being solicited for discussion at the conference. In fact, it is traditional of the young farmers' conference that a wide variety of farm problems be discussed. The question of marketing, new a live topic throughout the country, will be divided off, in which special branches of agriculture, such as dairying, wheat growing, home management, poultry production, etc., can be studied cooperatively. If attending farmers desire, discussions in the sectional meetings can begin almost where last year's work left off, after proper summaries are made of experiences previously learned. However, for all practical purposes, this year's conference in itself will be a complete unit supplying a wealth of self-contributed information to those who participate. There is no "program" arranged, no "speeches" scheduled and no promotion of a particular hobby permitted by the committee of young farmers in charge.

Farmers will themselves supply the program and mold the action of the conference, just as they have done in the three previous young farmers' gatherings at Spokane. Farm women are particularly invited to participate again this year and special plans are being made to make the meeting even more worth while for them than it was last year.

Again the annual young farmers' banquet on Friday night, January 28, will be a rollicking entertainment feature. A larger banquet room has been secured this year to accommodate the hundreds of farm folk who are expected at the conference. Both the banquet and other activities will be held in the Davenport hotel, which will be a veritable "home coming" for farmers and their families.

There are no charges or fees of any kind solicited at the young farmers' conference. The funnest dinner on Friday night is the only expense attached, except of course, for the individual's personal expenditures.

**First and Only**

"Sir, I would like to marry your daughter."

"What's your occupation?"

"Radio announcer."

"Take her. You're the first man who ever said good night and meant it."

**Monogram Stationery**

If you are looking for something real new, what could be more pleasing for "her" or "him" than a gift of monogram stationery printed especially for them? We make it.

We can give you the regular business stationery, or the "secretarial" size, so much used now.

Come in and let us show you what we have. It's not too late.

All Glory Be to God  
And to the earth be peace;  
Good-will henceforth from heaven to  
Begin and never cease.

# ELECTRICAL GIFTS

For Christmas are the most practical gifts of all, for they are more than a remembrance of the day; they last a lifetime. Any of the following will make acceptable gifts:

What Mother really wants ~

An Automatic Hotpoint Electric Range

\$10.50 Hotpoint Electric Percolator Absolutely FREE

As an added Christmas gift for mother and the home, we will give a new \$10.50 Hotpoint Electric Percolator (just as pictured) FREE with each Electric Range purchased during the month of December—this one month only.

Come in and look over our stock of electrical goods. If we haven't what you want, we will be glad to get it for you.

The Washington Water Power Co.

ELECTRIC TABLE STOVE

ELECTRIC IRON

ELECTRO-KOLD

DECEMBER SPECIAL  
With each \$10.50 Hotpoint Electric Percolator a pound of Imperial Coffee will be given free.

ELECTRIC TOASTER

ELECTRIC REFLECTOR

ELECTRIC PERCOLATOR SET

ELECTRIC WAFFLE IRON

**Some Old Yuletide Belief**  
An old superstition says that it is luck to be born on Christmas Day. French peasants believe that in addition to being lucky Christmas Day babies have the gift of prophecy; while in Silesia there is a belief that a boy born on Christmas Day will become either a lawyer or a thief.  
Among Vosges peasants, children born on Christmas Eve are supposed to be endowed with what is vulgarly termed "a good gift of the gab," while those born on Christmas Day are supposed to have less tongue and better reasoning powers. A daughter born on Christmas Day will grow up to be wise, witty, and virtuous.  
A curious request for the benefit of Christmas Day babies was left by a man who died in 1914. By the terms of his will each child born in the testator's native town on December 24 receives five pounds as a birthday gift.

**THE FENCE RAIL PHILO-SOPHER**  
A forest fire was started on Bear ridge last week when a party of campers in the woods accidentally spilled a bottle of synthetic gin.  
When he read that a California girl went all the way to Virginia to see Harry Thaw, Uncle Billy Gamewater said "She must be awfully fond of traveling."  
The state building inspector has ordered that all Charlestoning be stopped in the town hall until the walls have been braced and the foundation strengthened.  
The election board had looking glasses put in the polling booths here and it took the women about twice as long as usual to vote.  
The new milliner at the Boston store says she is afraid that about the time she gets her knees reduced to a state of perfect polish they will begin to wear long skirts again.

**MICKIE SAYS—**  
A STUDY AD IN THIS NEWSPAPER WILL RESTORE A RUNNER'S STAMINA, RECURRENT DEPARTED CUSTOMER, AN CURE A CRIPPLED BANK ACCOUNT!

**Peacock Pie For Christmas**  
Chicken pie, beefsteak pie, and pumpkin pie, not forgetting apple pie and cheese, the great American institution—all of these have a familiar ring to our ears, but who of us have ever tasted the famous English dainty of dainties, peacock pie? Yet at one time, this was a favorite Christmas dish which was brought in with a great deal of ceremony by the lady most distinguished in all the company for beauty and high position. Many times this dish was garnished with the head and tail of the peacock in such a way as to appear that the bird was alive.  
Knights made vows over it to break spear in defense of beauty and distress. It was this ceremony which gave rise to the once popular oath "by cock and pie."  
Probably the use of the peacock as a Christmas dish arose from the old belief that the flesh of the peacock is incorruptible which of course would make it a symbol of immortality and new life.  
To the people of today the peacock is a symbol of vanity.  
A woman's declining years come before the age of 30. After that she is glad to accept.

**Inside Information**  
An electric waffle iron should never be greased.  
The average person over 12 years of age requires about 2700 calories in each day's food. A very active man or boy using a large amount of muscular energy may need as much as 4000. Women seem to need from 2700 to 3300 calories per day.  
Have liver frequently—any kind is good, and adds to the day's supply of minerals and vitamins.  
A built-in ironing board hinged to the wall and disappearing into a wall closet when not in use, is a great convenience.  
A paper dress form can be used for fitting garments under construction, or altering ready-made ones; for adjusting commercial patterns, adjusting straps on petticoats and brassieres, tacking wash collars in place, and designing new dresses. Those who go away from home should leave their "forms" behind to facilitate sewing for them.  
If you want to know how to make good light bread, muffins, or biscuits Farmers' Bulletin 1450, "Home Baking" will be helpful. It will also give you good recipes for layer cake, angel food, gingerbread, and numerous other good things.  
It is free for the asking while the supply lasts.  
Try cooking spinach 10 to 15 minutes in just the water that clings to the leaves after the last rinsing. Chop it very fine and season with butter or cream.  
A casserole dinner is one of the most satisfactory to serve when one is both cook and hostess. It can be cooked in the morning, and reheated at dinner for half an hour or so. In this way the housekeeper is free to finish the other details of her dinner and is spared that frustrated and tired feeling that results from having too many last-minute foods on the fire. Chicken, veal, beef, sweetbreads—a combination of meats and vegetables which go well together can be cooked in a casserole.  
To get rid of rats or mice, mix one part of powdered barium carbonate with 4 parts of different selected food, such as meat, vegetables or fruits, rolled oats, bread, or corn meal—whatever these pests have attached. Distribute several different baits in portions of about a teaspoonful in the places where the animals run. Keep the barium carbonate out of reach of children and domestic animals. Use fresh baits each night until the rats or mice disappear.

**HIS CHRISTMAS DREAM AND IT ALL CAME TRUE**  
He was such a beautiful little darling that his mother looked at him and forgot what she was going to say when she was about to give a lecture about pulling the cat's tail. And when he went with her to the hospital with flowers, and passed up and down the wards with a smile and a Christmas flower for every sufferer, they felt as though an angel had appeared again.  
It was in his cozy room at home that he had a dream house. There he daydreams, as well as night dreams. There he entertained "Mr. Bethlehem," and "Betty Bosbuckle," and her brother "David." On the chimney shelf was a lunch for Santa Claus, and near it was a letter that registered a few of his hopes. He preferred chocolate elephants rather than chocolate horses and they amounted to more. He conferred with his white rabbit mascot about the chipmunk skin that served as a rug for his garage, built for the coming automobile. There must have been a radiola in the room, it was so full of happy thought and sweet faint sounds. "Listen," he said to Mr. Bethlehem "I hear them singing." "Davy," he cried, "he's most here. Look Betty, look there's the star!"  
And it was so. That very night brought all that imagination had envisioned, and the darkness fled before the glorious light of Christmas morning.

**They Battle Bugs**  
The warblers are one of the most useful families of birds—they eat so many noxious insects and have scarcely any bad habits, says Nature Magazine. They nest in orchards, shade trees, willows, shrubbery and spruce forests. The yellow-throated warbler tenants orchards and shrubbery near standing or running water. A caterpillar is its favorite tidbit.  
**Needed Another Razor**  
"Pop I want Santa to bring me a razor for Christmas."  
"What in the world would you do with a razor?"  
"Well you call me a little shaver, don't you?"  
A pipe is really cheaper, and is to be preferred if you don't mind solitude.

**NARCOTIC RAID IN LEWISTON YIELDS MUCH DOPE**  
As a result of a raid conducted at a late hour Saturday and early Sunday morning, Ray Keller, a well-known character of Lewiston, who conducts a store at Thirteenth and Main streets, called the Blue Canteen, and James Milligan and Art Farron were lodged in the county jail on federal warrants charging Keller with a violation of the Harrison and Jones-Miller narcotic acts, the other two men being detained as material witnesses. Milligan and Farron were taken with in Keller's place of business.  
In the raid that was carried out by the three agents, Harry C. Logan of Portland, Charles F. Miller of Spokane and James Fitzgerald of Seattle, all working out of the Seattle office, approximately \$10,000 in opium, morphine, yen shee, hypodermic needles and other paraphernalia used by drug addicts and those engaged in trafficking were confiscated, as well as several valuable revolvers. The investigation carried out by the officers, all based on federal search warrants issued by the commissioner at Lewiston, included a visit to practically all of the houses in Lewiston's Chinatown, this taking place between midnight and 5 o'clock. In these raids a large quantity of opium and yen shee was confiscated and smoking outfits seized, which included one pipe said by the officers to be valued at not less than \$1,000, says the Lewiston Tribune.  
Agent Logan stated that when they visited the Keller place, which had been under suspicion for some time, they found Keller just completing a "vein shot" of dope, his outfit being found scattered on the bed in the room. Milligan and Farron were there at the time. The place was ransacked in all parts and everything removed that pertained to a violation of the law.  
Upon visiting the Chinese quarter the agents met with little resistance until entering a place on Sixth street near B street. Here on the top floor, Agent Logan stated, they demanded entrance to a room which was denied. The door was battered down and the occupant grabbed a pistol, leveled it at Logan and as the trigger clicked Agent Miller jumped forward and knocked it from the man's hand. In almost every place visited in this district the officers stated they found loaded revolvers either beneath the beds or under the pillows. In another house the officers broke open a desk and recovered a large tin box containing a quantity of yen shee and other items as well as three new Smith & Wesson revolvers, all of which were seized. No claimant to the box could be found.  
This is the third raid of importance conducted here within the last year and each time a large quantity of drugs was secured. The officers declare that after this visit they think things are pretty well cleared up. Several other places besides those visited have been under surveillance for some time but investigation proved that information secured would not warrant a raid. About a year ago the narcotic squad stayed here for a couple of weeks collecting evidence and in making raids, and at that time it was decided that this was the central point for distribution for a large territory, and that a ring was in operation in this region with Pasco and Seattle as the sources of supply.  
Keller has been a resident of this city and active for about 30 years. He was a federal prisoner several months ago in the county on a white slave charge. He is said to be a cook. Farron also was held here at one time on a narcotic charge but his case was transferred to Spokane. On Nov. 18, the officers state, he completed a sentence at Walla Walla.

**Winter Has "Come"**  
For the first time thus far this fall (or winter) Old Man Winter has arrived and has taken charge of the weather operations in this part of the country—and a right good job he is doing, too.  
After several weeks of rain and warm weather, a change came Saturday night and on Sunday morning the mercury registered 20 degrees above zero; Monday morning showed 13 above, and Tuesday morning showed it had reached a point one degree below the zero mark, which was the coldest point reached thus far.  
Snow fell at various times during the first of the week and is now several inches deep with the ground frozen to a depth that will bear a team up in good shape and present indications are that we will have some of good sleighing and a relief from knee-deep mud on the country roads and the cutting up of the highways.  
Everyone agrees that the present weather is a great relief from what we have been experiencing for the past several weeks, although it is much harder on the coal pile.

**Lettuce Fourth In Value**  
Lettuce shipments last season were ten times those reported in 1916, and the farm value was not much below \$25,000,000. Only three other vegetables—potatoes, sweet potatoes and tomatoes—exceeded lettuce in farm value. A real change in American diet, especially among city consumers, apparently is responsible for the growing importance of this leading salad crop, says the United States department of agriculture. Improved grading and packing of lettuce have done much to build up demand for the product.

**The Editor**  
Most any one can be an editor. All the editor has got to do is sit at a desk six days out of the week, four weeks of the month and twelve months of the year, and "edit" such stuff as this:  
"Mrs. Jones of Cactus Creek let her can opener slip last week and cut herself in the pantry." "A mischievous lad of Piletown threw a stone and struck Mr. Pike in the alley last Tuesday." "Joe Doe climbed on the roof of his house last week looking for a leak and fell, striking himself on the back porch." "While Harold Green was escorting Miss Violet Wise from the church social last Saturday night a savage dog attacked them and bit Mr. Green several times on the public square." "Isiah Trimmer of Running Creek was playing with a cat Friday when it scratched him on the veranda." "Mr. Ford while harnessing a broncho last Saturday was kicked just south of the corn crib." "The Rent-In-a-beautiful-home, front room for two young men with French doors." "For Sale—A grand piano by a young lady with square legs."

### PUBLIC SCHOOL NOTES OF MUCH INTEREST

The piano pupils of Mrs. W. M. Herman gave a recital in the high school assembly on Tuesday afternoon of this week. The pupils of Miss Ruth Wolff will appear in a recital during the first week of school after the Christmas vacation.

Christmas vacation will begin Thursday evening at 4 o'clock and extend through the following week. That will make the vacation extend through December 24 to January 2, inclusive.

The entire grade school will give a varied Christmas program at the opera house on Thursday afternoon, December 23. The general public is invited to attend this program.

The opera house has recently been equipped with showers which will enable those taking part in athletics to dress and bath there.

Many people have asked what the public schools have given for the money invested in them. This question is often asked by well meaning people who are in some way disconnected with schools and their activities. No school, unless it is a technical one, claims to prepare a child for positions of an exact nature. The best that any school can do is to prepare a child for scientific thinking. The old academy, from which the modern high school has developed, stressed such subjects as mathematics and Latin. It was claimed that the mind discipline that was developed in actual life. The high school of today and also the grade school, while not exactly conforming to this belief, states that a child must not only have mind discipline but also must have a knowledge of the economic conditions of the world to enable him to understand problems of everyday life.

Idaho gained twenty percent in number of consolidated schools during the past five years.

**Basketball**

Basketball practice for the high school has been progressing since a week ago Monday. The boys are dressing at the gym since the completion of the showers and dressing rooms.

The first game of the season for the local boys was played at Uniontown Wednesday night, the score being 20 to 15 in favor of Genesee. It was played at Uniontown. A return game was played on the local floor Thursday night.

The boys who are turning out for the team are: Doyle (capt.) Weber, Cameron, Flomer, Mullicy, Quiley, Putnam, Blumie, Kraut, Ebel, L. Hayden, Krier and Larkin. F. Bumpass, who broke his collarbone in the last football game, will be out in a few days.

**Primary Room**

We are putting the finishing touches on our Christmas decorations this week. Santa Claus stands here telling us to be good if we want something nice for Christmas.

Mrs. Virgil Sampson was a visitor Monday afternoon. Come again—visitors are always welcome.

Cicely Ann Herman and Betty Lou Burr played in Mrs. Herman's recital in the high school assembly Tuesday afternoon. Both did splendidly it is reported.

We are making a new Christmas sand table. The story of the birth of Christ and also one of another Christmas story we have had in the story hour.

First graders are quite enthusiastic over their stars for perfect spelling lessons.

The cold weather has made us have a few nippy noses and toes. The youngsters have liked the snow so much.

The second grade spelling class enjoyed their race to market. Harriet Hettinger was captain of the winning side.

We have had many absences due to illness, but very few tardinesses.

We will have our Christmas program Thursday afternoon, December 23, at the high school opera house. All the grade rooms are giving a program together. Everyone is cordially invited to attend.

We will have our Christmas tree decorated by Monday morning.

**Farmers Union Meeting**

There will be a meeting of the Farmers union in the American Legion hall on Wednesday, December 22, at 1:30 p. m. There will be initiation of members and election of officers. Please come.

Jesse Borgen, Secretary.

**Third and Fourth Grades**

In spite of the cold weather our room has been having very good attendance. So far there have been five absences this month.

Our spelling classes have been having some interesting contests. The third graders have divided themselves into the "Bliss" and "Red" groups. Last week the Bliss won. Those pupils having a perfect record for the entire week were Evelyn Rogers and Emma Louise Vannouck.

The boys of the fourth grade are contesting the girls. The girls won last week. Those in that grade having a perfect record are Annabelle Huffman, Anita Henderson, Susie Dresher, Marie Springer and Gay-

In fact, the largest display of beautiful gifts we have ever had, and at prices, too, that will fit every pocketbook. Just the gifts you've been looking for, for Everyone.

SMOLT'S. 25-

### No Trace of Kiewno

Regardless of the fact that steady and consistent search has been kept up every day for R. C. Kiewno, who was lost in the mountains in the northern part of this county two weeks ago last Tuesday morning, no trace has been found of the missing young man. Hundreds of men, from Genesee and other sections of the county have searched diligently with the faint hope that a trace of the missing young man might be found, but not even a trace has been discovered to date and now that winter has actually set in, there is little hope that any trace of him will be found this winter, if ever.

His disappearance is indeed mystifying and old woodmen are at a loss to understand it. Of course there are many places in the mountains where he might easily become lost, yet it would seem that some trace could be found as the territory has been gone over for many miles from the camp he left when he disappeared.

The young man's parents and brothers are hoping against hope that he may yet be found and they are being assisted to the last degree by sympathizing friends and neighbors, and even strangers who did not even know him or the family, have joined in the search.

### New Congregational Minister

Rev. O. S. Barnum and wife arrived in town Monday evening from Brewster, Washington. Mr. Barnum having recently been called to the pastorate of the Congregational church of Genesee. They have apartments in the Masonic building for the present.

Rev. Barnum was for three years pastor of the Brewster-Lake-side Congregational churches, in north-central Washington. On his departure each congregation voted him a splendid letter of commendation. The commercial club of Brewster also gave him a strong resolution of approval, commending his zeal and readiness as a civic worker.

His daughters, Miss Ruth Barnum, a student at Northwestern Business college, Spokane, and Miss Dorothy Barnum, a student at the Cheney normal, will be home for the Christmas holidays.

Rev. Barnum hopes to align his pastoral work at an early date. Both he and his wife have a strong personal interest in young people.

### Altar Society Meets

The altar society of St. Mary's church met at the home of Mrs. Otto Kretschmer Tuesday, December 14. The afternoon was spent in needlework, after which a pick-up lunch was served.

The next meeting will be at the home of Mrs. Mary Sweeney, December 28.

### Christmas Seals

Christmas seals may be purchased at any of the local business houses. If you haven't done your bit toward this worthy cause, do it now. By so doing you will be doing your part toward helping those who are fighting that dread disease—the great white plague.

### New Arrivals

Mr. and Mrs. Walter Kiewno are the proud parents of a daughter, born December 2. Mother and babe are doing nicely.

Mr. and Mrs. John Hanson are the parents of a baby girl, born Wednesday morning, December 15. Mother and child are reported as doing well.

**Large Display of Gifts**

Loads of gifts are here—you will be surprised at the wonderful showing. Come early while the display is at its best. In fact, the largest display of beautiful gifts we have ever had, and at prices, too, that will fit every pocketbook. Just the gifts you've been looking for, for Everyone.

SMOLT'S. 25-

### CHURCH NOTICES

**Congregational Church**

Sunday school at 10 a. m.  
 Rev. O. S. Barnum will preach at 11 o'clock a. m.  
 There will be special Christmas music.

The Christmas entertainment and treat for the children will be given in the church Friday evening, the 24th, at 7:30.

All friends of the church are cordially invited to attend.

**St. John's Lutheran Church**

A. F. Wolff, Pastor

Sunday school at 9:30 a. m.  
 English services will be held each Sunday morning at 10:30 o'clock, with the exception of the first Sunday of each month, when German services will be held at the usual hour.

### Genesee Valley Lutheran Church

Rehearsal at 10 o'clock a. m., Sunday, December 19.

Young People's Luther league meets at 7:30 Sunday evening at the parish hall. A special program, consisting of solos, duets, etc., will be given. The topic for the evening is "The Christmas Spirit in our Lives." Everybody welcome.

### Christian Church

N. E. Beach, Pastor

Bible school at 9:45 a. m.  
 The goal of 100 is nearly reached. The Christian Endeavor society was well attended Sunday evening and an interesting program was enjoyed. All young people are given a welcome. The hour is 6:30, followed by the evening service, conducted by the pastor. "How Christian People Should Dress," will be the topic at 7:30 p. m. "Christian Babies" will be the subject at 11 a. m.

All new members are urged to attend the communion service Sunday morning.

The social auxiliary will meet next Tuesday at the church basement.

### Card Club Will Meet

The next meeting of the Card club has been set for Tuesday afternoon, January 4, at the home of Mrs. Carl Erickson.

### Car Coal In Transit

The Standard Lumber company has a car of Hotchkiss lump coal in transit from the Sheridan, Wyoming, field, which will be sold off the car at \$9.50 per ton. Give your order to your drayman.

### Special Meetings to Close

It is the intent to close the special series of meetings being held at the Christian church, conducted by Rev. Ross J. Allen of Watsburg, Wash., and Mrs. Marion McQuary of Milton, Oregon, on Friday evening.

Only words of praise have been heard of their work. Many have expressed the opinion that it is the best series of sermons and songs to which they have ever listened. Fourteen, to date, have been added to the membership of the local church and a deepening of faith and consecration to higher ideals of life by all who have availed themselves of the opportunity of hearing these talented and consecrated workers.

Tonight (Thursday) there will be two special songs—a quartet, "Have Thine Own Way," with Mrs. McQuary leading in soprano. She will also sing a solo, "When They Ring the Golden Bells." Mr. Allen will use "The Individuality of Sin" as his sermon theme.

The last great service will be Friday evening, when the evangelist will discuss "Why Was Jesus Crucified?" The special songs, rendered by one of the sweetest and best trained voices in the Northwest, will be "Crucified." Mrs. McQuary will also sing a Christmas song entitled "In a Lowly Manger."

This service will be followed by a farewell service to the evangelists. You will feel a welcome to every service.

### Football Banquet

A football banquet was given at Smolt's on Thursday night of last week, when a few of the business men were invited to help the boys, who had made such a splendid record on the diamond, celebrate their victories and the close of the season.

A very pleasant time was reported.

### K. P. Card Party

The Knights of Pythias will give a card party in their hall, Tuesday evening, December 21. All Knights are invited to bring their wives, sweethearts and friends. Refreshments will be served.

### Another "Meanest Man"

One of exchanges remarked last week that the "meanest man" on earth had shown up a Craigmont, when he stole the preacher's mug from his barrel. It may be the same man—at least the low-down thievery was fully as bad.

One day last week while Wm. Jacobs had gone to the mountains to assist in the search for R. C. Kiewno who has ever since been missing, he took all his young chickens, a sack of sugar and several boxes of apples from his cellar. If you can find a man with a more shrewd conscience than this thief, we would like to get a look at him. Mrs. Jacobs was staying in town during Mr. Jacobs' absence and there was no one at home when the place was visited.

### THE PICTURE SHOWS

**"The Earth Woman"**

The feature picture for Saturday night, December 18, will be "The Earth Woman," with Mary Alden in the leading feminine role.

"The Earth Woman" has to do with the heroic struggles of a sturdy pioneering woman upon whose shoulders has fallen the terrific burden of winning a living for herself and family from stubborn western prairies and fighting to insure the future happiness of her children. She is the kind of woman who might have mothered men like Lincoln.

Mary Alden has the title role. Priscilla Borer is the winsome daughter of the family about which the juvenile love interest centers. Johnny Walker is the hero of the story and William Scott the deep-eyed villain. The picture is frankly that of good old-fashioned brand of melodrama which seems to maintain its supremacy in the affections of theatergoers in spite of all changing styles of entertainment.

### "Chip of the Flying U"

Nearly everyone has read "Chip of the Flying U," the book that made B. M. Bower famous. It is one of those wholesome books and pictures that everyone likes. Hot Gibson has the leading role. It will be shown at the Hotel Theater Sunday night.

Filled with screamingly funny comedy scenes and graced with lots of action and plenty of two-fisted fighting, "Chip of the Flying U" is easily one of Gibson's best productions.

We find Gibson, in the opening scene, as a bashful copperpuncher who is afraid of girls and covers his fear of them by a pretense of not liking the female of the species.

His dislike is rapidly overcome, however, when a beautiful sister of his employer comes to the ranch for a visit, and he is unwittingly thrown into contact with her.

### "The Brown Derby"

At the Hotel Theater for Wednesday night, December 22, the feature picture will be Johnny Hines in "The Brown Derby," another of those rollicking, laugh-provoking comedies that only Johnny Hines can portray. Johnny Hines proves the theory in "The Brown Derby" that speed and action applied to "gags" make marvelous comedy.

"The Brown Derby" is brimful of action and clicks along at the speed of a high geared racer.

Johnny's a plumber in this one. He is the sort of a pipe fixer who calls his wrench his pipe organ. But Johnny is afraid of his strength. He's got a rich uncle dies and leaves Johnny a brown derby. His last will and testament explains that the wearer of the tan lid has as much chance of staying inferior as a Zulu of getting sunburned.

Genesee is a good town.

### "Fighting With Buffalo Bill"

This fascinating new serial of the old wild, free west in all its glory will be shown every Wednesday at

**The Hotel Theater**  
 Beginning - December 15

### PERSONALS

Mrs. Paul Cunn of Moscow was a Genesee visitor Tuesday.

Mrs. J. C. Horner left Saturday for Montana, where she will join her husband.

Misses Sylvia and Agnes Johnson, who are teaching near Palouse, spent the week-end with home folks.

John Freeman left last week for Los Angeles after having spent a few weeks here visiting his mother.

Mr. and Mrs. Roy Evans left Wednesday for California, where they expect to spend about two months.

Mrs. Beryl Miller arrived Monday from Schneetady, N. Y. for a visit with her parents, Mr. and Mrs. R. C. Kiewno.

Mr. and Mrs. Marion Mayer and baby of Lewiston and Orland Mayer of Potlatch spent Sunday at the A. L. Mayer home.

Mr. and Mrs. Joe Knapp and Otto Baldus returned Sunday from Spokane, where they have been visiting for a few days.

Cliff Lundt and Dempsey Smith returned Sunday from California, where they have spent the past month taking in the sights.

Miss Bernadine Hasfurther came over from the U. of I. and spent the week-end with her parents, Mr. and Mrs. Joe N. Hasfurther.

Mrs. A. S. Hillman returned to her home at Palouse Saturday after having spent the past two weeks here visiting her parents, Mr. and Mrs. August Johnson and other relatives.

Mr. and Mrs. V. A. Beckman and Miss Ruth Martinson went to Spokane Sunday, where Mr. Beckman attended a meeting of the agents of the Washington Water Power company which convened there this week.

## SEMI-LOCAL NEWS CLIP- PED FROM EXCHANGES

**Are Taking Interest**  
 The interest shown in road matters here lately indicates that there are people who desire to pay highway taxes instead of throwing their good money away on dirt road taxes.—Kendrick Gazette.

**Not a Bad Idea**  
 We note in an exchange from Weiser that prisoners in the county jail are being set to work repairing the Snake river bridge. This seems a step forward and we wonder if there are not bridges in other parts of the state quite in need of repair. The boys then will feel they have not been slighted.—Free Press (Grangeville).

**Dog Poisoner Busy**  
 A number of valuable dogs were poisoned in Kendrick some time Tuesday night. As usual in such cases, they were some of the best bird dogs in town. The poison was placed in small cakes of raw hamburger and scattered in various parts of town. A good citizen had nothing but contempt for a moron who would do such a deed as that.—Kendrick Gazette.

**Catching Up With Styles**  
 When License Director C. R. Maybury ended the last barber's examination for the present year, Washington had one tonsorial artist for each of its inhabitants. Except as new practitioners are admitted on temporary permits the supply cannot be increased until next spring's examinations are held but Director Maybury maintains the number of barbers is keeping up fairly well with the changes in hair dressing styles.—Colton News-Letter.

**Asotin's Streets Decorated**  
 Now that the decoration of Main street and many of the fronts of the business houses, with evergreens, has been completed the town has taken on quite a fine Christmas appearance and demonstrates that our people are getting enthused with a real Christmas spirit. Score another point for Asotin's little commercial club; because had the club not gotten behind the movement this decorating would not have been taken on.—Asotin Sentinel.

**It Sure Would**  
 Since returning home Queen Marie has given out a syndicate letter setting forth some of her views on America and, among other things, charges us, as a nation, with having "no privacy." Well, if a lot of Marie's compatriots across the pond would stay at home and mind their own business instead of invading this country on one pretext or another, trying to secure a lot of cheap notoriety and perhaps a much-needed loan, our privacy would be a lot more private than it is under present conditions.—Cottonwood Chronicle.

**Enjoying Good Christmas Trade**  
 The merchants of Genesee report that they are enjoying a good Christmas trade thus far, indicating that they have what the people want and at prices they can afford to pay. Most of the local merchants have larger and better stocks than ever before, making it easy to make selections, but if you are going out of town to do any of your buying, look over the ads. appearing in the News. They will tell you where you can get just the thing you may want.

## WHAT HAPPENED HERE TWENTY YEARS AGO

The death of Charles D. Armstrong, one of the oldest and most highly respected citizens of the Leniville section, which took place Friday morning of last week, was not altogether unexpected as deceased had been in poor health for over a year, he having suffered two strokes of paralysis. The funeral services were held Sunday morning from the Congregational church, conducted by Rev. W. C. Fowler, and were largely attended. Burial was in the I. O. O. F. cemetery.

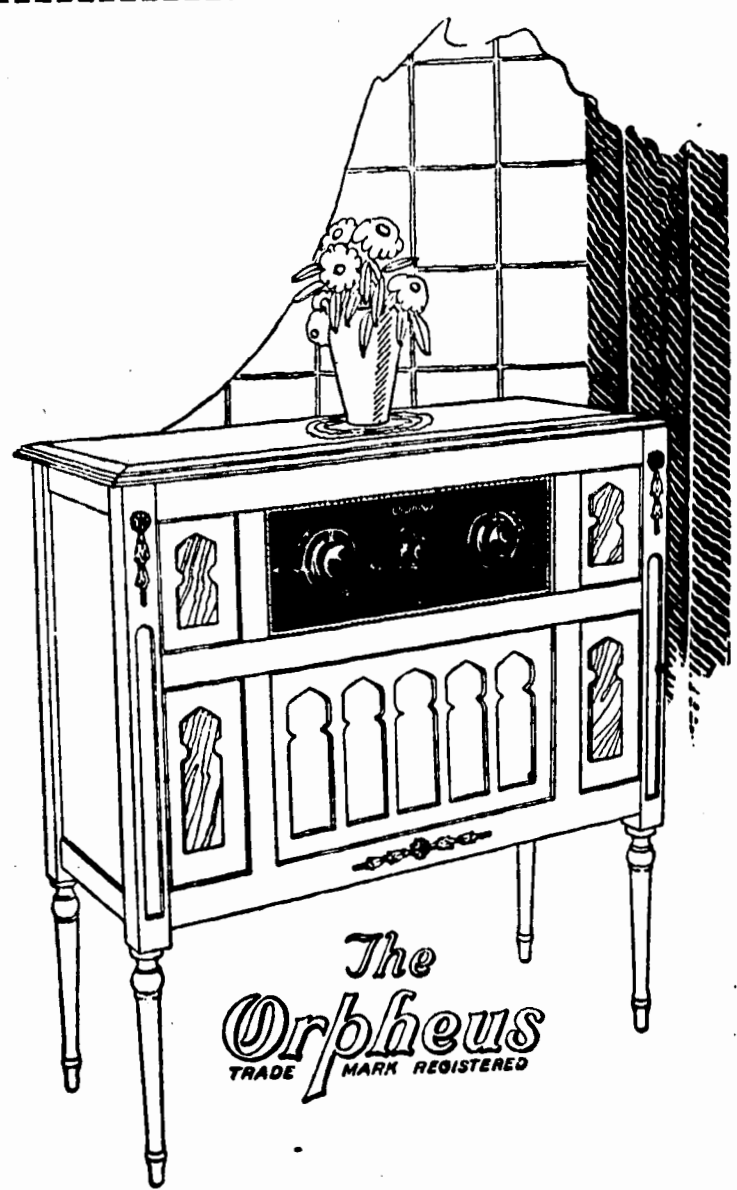

School notes: At the tryout Tuesday evening Clarence Christenson, Olive Larrabee and Charles Moche were chosen to represent the high school in the anticipated debate with the previous graduates. The question for discussion is "Resolved, That the railroads of the United States should be owned by the federal government." The high school team will represent the negative side of the question.

When you take a drink of city water now you can do so with the assurance that it is as pure and clean as water can be. During the past week City Marshal Steltz has removed all the battings from the reservoir covering, put heavy tar paper over the entire top and stopped up every small opening. It is now bug—also mouse proof, and an extra effort will be made to keep it so.

Messrs. C. E. Wood, W. H. Gage and Henry Herman have formed a company to engage quite extensively in farming. As a result of the forming of the company Mr. Herman will return to Genesee to reside permanently. The organization will be known as the Clearwater Ranch company and is capitalized at \$15,000, equally divided among the three members. W. H. Gage is president, H. J. Herman general manager and C. E. Wood secretary and treasurer.

Saturday afternoon of last week Mrs. A. A. Haymond entertained a number at her home in the northern part of town in honor of Mrs. M. Driscoll, who expects to leave soon for Kennewick, Wash. The afternoon was very pleasantly spent and a fine dinner was served. Those present were Mrs. Cunningham, Mrs. Bartroff, Mrs. John Keane, Mrs. Geiger, Mrs. Tim Keane, Miss Kate Kennedy, Mrs. D. C. Burr, Miss Cunningham, Mrs. Klapp, Mrs. LaRue Tice, Mrs. Beachler, Mrs. C. F. Burr and Miss Maggie Magee.

You have noticed, no doubt, that some men are slow in making promises. They are the ones to keep them.

## INDIVIDUAL GIFTS AT CHRISTMAS TIME

Mr. and Mrs. Ballew had been married long enough to forget wedding anniversaries, but were still trying to observe Christmas giving.  
 "Now, I must give Ray something splendid. Reverses must not stop the Christmas giving. He always gives me more than I do him. My thirty-five dollars will buy him the golf outfit, but then he would be away all the time and I so wanted a tea cart with my money, so little I can give Ray. He has his ties, socks, and shirt— and they've never been worn—the last I gave him last year. I've an idea I'll fix him up a box of them and re-present them. He will never know the difference and what we don't know doesn't hurt us," philosophized Mrs. Ballew.

In rushed Ray to dinner. "Hello, Vi! Christmas is almost here and I've worried not a little over what I'll give you, dear, but you deserve the best." As Christmas drew near Viola hurriedly shopped, but always wound up at the furniture store—looking at tea carts. "I know what I shall do; I'll get the cart for Ray. It will come in fine when he has his stag parties."  
 "Say, Ray, let's give our gifts this evening for we leave so early in the morning, and I want to see the sparkle of mine." Viola noticed Ray's eyes droop but continued: "Honey, I gave you a useful gift something different and one that you can enjoy with the men."  
 "By Jinks! thought Ray, "She got my golf outfit. Just what I wanted strange we always get what we want. I'm a little sorry about Vi's present, but she will be pleased. I paid a good price for it."  
 Viola rolled in the tea-cart and kept assuring Ray how much he would enjoy it, but was surprised at the happy look on his face.  
 "Now Ray, dear, show me mine."  
 Well Vi, I—er—see. Well honey I'll have to set your's up—but it's a peach."  
 "A baby grand piano!" exclaimed Viola; "just what I wanted, and here I've been selfish enough to give you a present."  
 "Honey, that's all right. I believe in practical gifts. I wanted to give you something, something you could entertain you club with. I could hardly afford it, dear, but a wife like you deserves the best—got you er—well, I got you a radio."

Luck has a perverse habit of favoring those who don't depend on it.

The Millionaire's Secret  
 To be a millionaire, a man must not only get rich; he must be able to stay rich. A certain well-known millionaire, when asked how he stayed rich, said: "I invest my money only in sound, established companies."  
 That man has learned a valuable secret. But a man's money, however much he has, is never worth so much to him as his mind, his intelligence.  
 Has it ever occurred to you that you should invest your intelligence just as carefully as you invest your money?  
 Why not invest your intelligence in a sound company by subscribing to the Youth's Companion? It is the oldest magazine for young people in the world—and nearly the oldest of all the American magazines. It is also one of the most interesting.

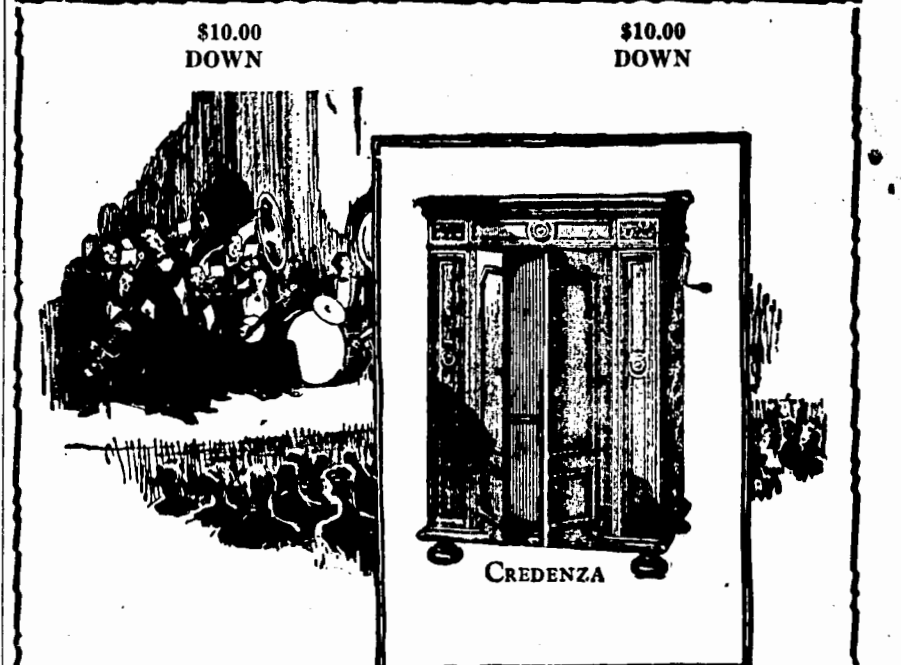

Practically every famous author of the past hundred years has written at one time or another for the Companion. Only this fall, for example, the Companion published a new story by Jack London. Do you like stories of adventure? Mystery? Romance? They are all in the Youth's Companion.  
 1. The Youth's Companion—52 issues in 1927, and  
 2. The remaining issues of 1926. All for \$2.00.  
 3. Or, include McCall's Magazine, the monthly authority on fashions. Both publications only \$2.50.

## Unique Submarine Telephone Cable Is to Be Laid in San Francisco Bay

Above—Cable employees of one of the cable inspection departments examining a reel of the new type of submarine cable to be laid in San Francisco Bay. Right—One of the big reels on a freight car ready for shipment.

One of the largest and most unique submarine telephone cables ever turned out is now in process of manufacture at the Western Electric Company's Hawthorne Works in Chicago.

This cable is designed to bridge the gap in the land route of the Sacramento-San Francisco toll line of the Pacific Bell Telephone Company where the bay separates San Francisco from Oakland. At that point the aerial cable that comprises most of this communication artery is broken by a water gap of about five miles. The distance is divided into two separate stretches, however, by Goat Island, a small island in the bay, lying about half way between the shores.

When plans for this line were being prepared by telephone engineers, the presence of this island suggested a convenient means of leading the armored cable which was to be used. Leading means the insertion of special inductance coils at proper intervals to improve the transmission efficiency of the cable and prevent distortion of its tele-

phone currents resulting in unadmittable transmitted speech.

A submarine cable usually requires leading by pots placed about 6,000 feet, or a little over a mile apart. In this case, however, it appeared possible to use a new type cable of 903 capacity, which was then in process of development, and to load it by placing the loading coils in the line where it crossed the bay.

Working on this idea, engineers of the telephone company, of the Bell Laboratories and the Hawthorne Works have perfected a cable that has a capacitance about 60 per cent lower than the normal for submarine cables, a characteristic that will allow the voice currents to carry across the 11,500-foot span of the cable without noticeable distortion. In obtaining this low capacity three layers of paper insulation were used around each wire. On completion of the experimental work the telephone company

at once ordered the cable, asking that it be made and delivered as soon as possible to take its place in the line with the aerial cable, which has been made and installed while experiments on the new type submarine cable were still under way.

The number of conductors in the toll lines is so great that it will be necessary to run several parallel armored cables across the bay to accommodate the necessary number of circuits. The special construction of these cables and the care that is taken to insure proper capacitance make their manufacture a slower process than usual.

Owing to the triple paper insulating, the cable core requires an extra long drying period in a special vertical oven to remove every bit of moisture possible before applying the sheath. The diameter of the cable after armoring is 3 1/2 inches, the largest size which the Western Electric Company manufactures. It weighs nearly 17 pounds a foot, the gross weight of each reel of 2,750 feet being approximately 27 tons.

## FROM PLANTATION TO TABLE

WHEN it's dinner time in these United States, it's generally lunch in your kitchen, and perhaps pour out the golden contents of a can of Hawaiian pineapple to give warmth and color to your winter dinner-table. Over in Hawaii, it's noon time out in the pineapple fields and hundreds of brown-skinned workers sit down in the sunshine to enjoy their lunch of fish and fruit. There is a warm languor in the tropical air, and now and then the slow strains of native song are heard. In every direction as far as the eye can see, the golden pineapples are being harvested, ripened under the liquid sunshine of Hawaii.

Just what happens to this Monarch of Fruits, from the moment it reigns on its throne of green spoked leaves, proudly wearing its crown, until it appears on your dinner table, still colored, however, with the magic touch of tropical sun, will be of interest in that it explains why our canned pineapple tastes as luscious as the fresh ripened fruits which the natives break on a rock and eat fresh from the field.

From the moment it reaches the cannery to the time it comes out in the labeled can, the pineapple is handled in royal manner. It is not touched by human hands during the whole process of canning.

There is especially prepared for it a big sunny white laboratory where everything is spotless. From the snowy white caps and aprons of the swarthy women workers to the gleaming white walls and tables of the cannery.

As the cylinder travels down the "line" via the endless belt route it passes before long rows of women workers wearing rubber gloves who remove any remaining "eyes" that the big machine has overlooked. The dark-skinned faces, as they review the pineapple parade, make an interesting study. Perhaps it is the eternal sunshine of the Hawaiian islands that has seeped into them, or perhaps it is the thought of the big lunch that they will have at noon—but at any rate the faces are happy ones, and their quick dark glances seem to denote eager interest in their work.

Now the pineapple is ready for the slicer. A machine receives the cylindrical fruit from another belt and slices it in symmetrical slices which do not vary a fraction of an inch. Another machine is busy at the same time digging out the luscious part of the fruit which remained inside the shell. This is the most delicious part of the pineapple as it has been nearest the heart. Later it will be labeled "crushed pineapple". Pineapple is syrupeed in a very sanitary manner, but at a whirlwind speed. Eighty cans a minute revolve around the syrupeing machine, to receive their quota of rich heavy syrup, made from refined pineapple juice and pure cane sugar. This syrup is a big factor in making Hawaiian pineapple so delicious.

The cans of pineapple are then ready to go into the cooler. After that they go into the lacer machine, which prevents rust, drier, and the cooler, which prevents further cooking.

This entire process has taken not more than 35 minutes. Every element of nutrition and every atom of delicious taste has been captured and preserved within that filled can of pineapple. Food inspectors who buy a sample can and have it chemically tested will find that it contains as much vitamin A as the vine fruit, and that it is rich source also of vitamins B and C.

Within thirty-six hours after the Pineapple Monarch reigned in the field, if you go down to the beach where little Hawaiian boys dig around incoming boats for crusty pennies, and where the breakers foam on the coral reef, you can see great ship loads of these same pineapples packed in thousands of cases, ready to leave the land of plummy palms, oleanders, and gay hibiscus, to bring royal riches to tables of many lands.

amount of nitro-glycerine as an explosive. The combination is an exceedingly fortunate one for Pyrotol combines as much safety as can be found in any explosive (all explosives are potentially dangerous) with a tremendous lifting power.

Since the ingredients for making Pyrotol are distributed without cost, the powder as delivered to farmers is the cheapest of many similar explosives ever used by the farmers. It costs for the state of Washington \$6.00 per hundred pounds f.o.b. The port, Washington, at which place Pyrotol is mixed and carted.

Pyrotol may be handled with safety in just the same way as any of the commercial dynamites. It may be hauled in wagons, trucks, or autos, in perfect safety, but farmers should see that their trucks are in good running order, that sparks from the exhaust do not set fire to the body of the machine, and should drive carefully.

Man-power is the most expensive of power. Getting the most out of man, releasing him for more productive effort, lessening the cost of production to a point where he may enjoy more of the fruits of his better directed efforts.

It is wire that has drawn the world together, and it is wire that now holds the world together. From the time that Benjamin Franklin took electricity captive over a piece of wire to the present day, wire has had an ever-increasing service to perform.

Man-power is the most expensive of power. Getting the most out of man, releasing him for more productive effort, lessening the cost of production to a point where he may enjoy more of the fruits of his better directed efforts.

It is wire that has drawn the world together, and it is wire that now holds the world together. From the time that Benjamin Franklin took electricity captive over a piece of wire to the present day, wire has had an ever-increasing service to perform.

## WIRE ROPE, ITS USES AND INSPECTION

By M. E. ARKILLS, Safety Engineer, Waterfront Employers of Seattle.

From a paper read before the Association of Safety Engineers of Washington

LEATHER and fibre rope has been made since history began. Metallic wire rope has been made for about thirty centuries. Cables of four wires have been found in the ruins of ancient Egypt. Wire was hammered out from bars of iron about 800 years B. C. Wire has been drawn through dies for about six centuries, being first drawn by Rudolf of Nuremberg, Germany. However, it remained for the American wire rope industry, 1840 to be exact, to again demonstrate in a practical way that there is strength in numbers, by making wire rope out of a number of wires twisted together. A piece of wire rope, probably hammered bronze, is in the British Museum, that was taken from the ruins of ancient Pompeii.

Wire in its many forms is indispensable to modern life. Consider for a moment what would happen if all wire in its many uses could be removed from use within the twinkling of an eye. First, you would get no response at the light switch. Then you would not be able to start your auto. You would walk over to a dead street car. Then if you were to get down to work the machinery would be standing or the elevator dead, and when you finally reached your office your telephone would be out of commission. Considerable adjustment would be necessary to fill the break made by the removal of wire in its myriad uses. Today we nearly live by wire.

It has been stated that wire rope was the first big step toward safety in material handling. It is from the safety aspect that we wish to consider wire rope. Space here will not permit treatment of the construction details. Suffice to say that extreme care must be exercised in the selection of proper metal from which to start the process. Then even greater skill must be exercised in the making not to introduce too much cold working, which will render the wire hard and brittle. Again, the requirements at work on the job must be met. Nearly all cable carries a hemp core as a cushion and oil container. The internal rubbing or frictional contact of cable is by comparison with any other piece of equipment exceedingly great. Every industry is to a great extent interested in the proper use of cable.

## WASHINGTON'S FARMERS CLEAR 12,000 ACRES

By R. N. MILLER, Extension Specialist in Land Clearing Methods, State College of Washington.

More than 2,200,000 pounds of Pyrotol were used last year in this state, with farmers clearing 12,000 acres. More farmers are using Pyrotol this year than ever before and all are reporting favorable results. Pyrotol must be used a little differently from regular dynamite but is filling a need for a cheap land clearing explosive. Washington's allotment for 1926 is 2,500,000 pounds.

When the world war was over the United States government had many tons of unused explosives on hand. Since such material cannot be kept in first class condition for an unlimited time and since there seemed to be no immediate need for such a large

amount of explosive material by the government, it was decided to distribute this material among the farmers of the United States at no cost for the original material. Chemists of the United States Department of Agriculture, through a series of experiments determined a formula for mixing the different ingredients to make them applicable for use on farms and public roads. The first explosive distributed was picric acid and as soon as this was entirely used up was followed with Sodolol and Sodolol has been followed with Pyrotol. Pyrotol is made of smokeless powder, sodium nitrate, and a small

amount of nitro-glycerine as an explosive. The combination is an exceedingly fortunate one for Pyrotol combines as much safety as can be found in any explosive (all explosives are potentially dangerous) with a tremendous lifting power.

Since the ingredients for making Pyrotol are distributed without cost, the powder as delivered to farmers is the cheapest of many similar explosives ever used by the farmers. It costs for the state of Washington \$6.00 per hundred pounds f.o.b. The port, Washington, at which place Pyrotol is mixed and carted.

Pyrotol may be handled with safety in just the same way as any of the commercial dynamites. It may be hauled in wagons, trucks, or autos, in perfect safety, but farmers should see that their trucks are in good running order, that sparks from the exhaust do not set fire to the body of the machine, and should drive carefully.

Man-power is the most expensive of power. Getting the most out of man, releasing him for more productive effort, lessening the cost of production to a point where he may enjoy more of the fruits of his better directed efforts.

It is wire that has drawn the world together, and it is wire that now holds the world together. From the time that Benjamin Franklin took electricity captive over a piece of wire to the present day, wire has had an ever-increasing service to perform.

Man-power is the most expensive of power. Getting the most out of man, releasing him for more productive effort, lessening the cost of production to a point where he may enjoy more of the fruits of his better directed efforts.

## The Most Appropriate Christmas Suggestion

THERE IS NOTHING THAT WILL GIVE YOU AS MUCH ENTERTAINMENT THESE LONG COLD EVENINGS AND NIGHTS AS A GOOD RADIO. YOU CANNOT MAKE A MISTAKE BY BUYING YOUR WIFE OR HUSBAND A RADIO FOR CHRISTMAS — PROVIDING — YOU GET A GOOD SET, AND

*The Best Set Is the Cheapest!*

AS MORE STATIONS "GO ON THE AIR" AND AS THEY BECOME MORE POWERFUL, CONDITIONS CALL FOR MORE "SELECTIVE" SETS THAT ARE CAPABLE OF BRINGING IN THE DISTANT STATIONS WHILE OUR LOCAL STATIONS ARE BROADCASTING.

*By appointment we will demonstrate in your own home and assure you the best of service.*

OUR YEARS' OF EXPERIENCE JUSTIFY US IN RECOMMENDING TO YOU THE FOLLOWING SETS AS BEING THE MOST RELIABLE AND WHICH HAVE FEATURES TO PLEASE THE MOST CRITICAL IN MUSICAL AND FURNITURE DESIGN.

### Radiola — Mohawk

\$15.00 to \$576.00

# MORSCHER BROS.

# Gifts for Him

When buying HIS GIFT go to a **Shop for Men** and be assured you have the correct article. We make it our business to have the newest things that a man wears.

We have purchased just for this Christmas many beautiful things in neckwear from \$1 to \$5.00, shirts \$2.00 to \$10.00, silk and wool socks 50 cents to \$1.25. Sweaters of all kinds, knit jackets, jewelry sets and numerous other nice things.

It would really pay you to come in and see just what we have.

## Cal and Dusty

# CAL SMITH, INC.

The Friendly Store

Moscow, Idaho

# Gifts from the Christmas Store

## STATIONERY

Last year I carried over \$100.00 worth of Eaton Crane & Pike stationery and I wish to clear the shelves. I am selling it at a big reduction. I was stung once, but never again.

This year I have stocked heavily on up to date staple stuff. If it is no more successful than the stationery last year my stock will be small in the future.

The assortment of stock carried is to your benefit as well as mine. It gives you a chance to select your gifts in your home town at less price and a saving of great expense on trips to other towns where you leave your money and where you have no chance to get favors and returns for the money spent.

# GRANT CLARK

## Jersey Cow at Walla Walla Wins Gold Medal

Hazel's Bessie, mature Jersey cow in the herd of W. F. Nelson of Walla Walla, Wash., has completed a gold medal record on her first official production test. In this test she produced, with calf, 700.68 lbs. of butterfat and 11,708 lbs. of milk. Her milk packing it has been found that Pyrotol will absorb some water and become more sensitive to fring. Therefore, store your Pyrotol in a dry place, in a small out-building some distance from the house and main buildings. Always keep the building locked. Store the caps in a building separate from the powder.

News was received in Seattle early in November of the death in San Francisco of Lawrence Hamilton Tyson, eldest son of James Tyson, president of the Nelson Steamship Company. Depest sympathy was expressed by the shipping fraternity up and down the Coast for Mr. Tyson in his bereavement. He died November 3 after an illness of six weeks. He was manager of the Sunset Lumber Company, a subsidiary of the Charles Nelson Company, parent corporation of the Nelson Steamship Company. It had been Mr. Tyson's wish that his son should succeed him as a director of the parent corporation's business.

Edward J. Wilson, nationally known trade expert, has been sent to Buenos Aires on board the steamer West Notus to study trade possibilities for that section for Pacific Coast manufacturers.

### FAVORABLE GRAIN REPORTS CAUSE WEAKENED DEMAND

More favorable reports from the southern hemisphere, together with continued light domestic and export demand weakened the wheat market during the week ending December 10, according to the weekly Grain Market Review of the United States department of agriculture. Prices of corn, oats, and other feed grains held generally firm as a result of light receipts. The demand, however, was not of large volume and the undertone of the market for some of these grains was somewhat weaker.

The first official estimate of the Argentine wheat production this year places the crop at 215,316,000 bushels compared with 191,139,000 bushels last year. An unofficial estimate of the Australian crop places the wheat crop of that country this year at about 140,000,000 bushels as compared with 113,000,000 bushels last year. The prospective increase in the southern hemisphere is causing European buyers to take only sufficient grain for their immediate needs. This has reduced the demand for wheat in the United States exports of wheat, including flour, to December 4, have amounted to about 134,500,000 bushels, or more than half of the probable exports from this year's crop.

While world wheat prices have tended upward during the past two months, this upward tendency is now apparently checked. Stocks of wheat in the United States and Canada are large and the southern hemisphere supply situation is more favorable. In addition to this, the recent high freight rates have been reduced nearly 50 per cent, particularly on cargoes for December and January shipment. The fact that the southern hemisphere crop, however, and its quality are not yet certain and the wheat market is likely to continue unsettled.

The demand for the moderate receipts of wheat in United States markets was fairly active and premiums held about unchanged. Offerings of desirable milling qualities or durum wheat were scarce and the highest premiums for this crop were paid for the best offerings. No. 1 amber was quoted at Duluth as high as 45c over the December price, which closed December 10 at that market at \$1.32 1/2.

Mills were active buyers at Kansas City and Wichita but elevators and shippers were the most active buyers of high protein wheat. Relatively large shipments of wheat from Omaha and other terminal markets, principally to Kansas City for delivery on December contracts, were reported. Soft winter wheat prices were held fairly steady by light receipts as demand from mills was only moderate during the week ending December 10, according to the weekly Hay Market Review of the United States department of agriculture, notwithstanding the active demand resulting from lower temperature and only moderate receipts. Prices of timothy and prairie showed gains in most markets while alfalfa prices tended downward.

Timothy held steady to somewhat higher, lighter receipts in the principal Eastern markets with active demand resulting in higher quotations. Freight rates have been reduced nearly 50 per cent, particularly on cargoes for December and January shipment. The fact that the southern hemisphere crop, however, and its quality are not yet certain and the wheat market is likely to continue unsettled.

# The Christmas Gift Store

## Our Stock of Holiday Goods Is Now On Display

We are proud of this selection this year and invite you to call and look it over. We have made special effort to secure suitable and useful gifts for all members of the family. Let us help you in making your Christmas selections.

SHOP EARLY AND AVOID DISAPPOINTMENT --- SHOP AT OUR STORE

### Gifts for Dad and Brother

Smoking sets, tie racks, playing cards, fancy handkerchiefs, neckties, neck scarfs, silk and wool hose, novelty suspenders, armbands, garters, belts, cuff links, tie clasps and collar buttons. Also a splendid line of gloves, warm socks, shirts, caps and hats—all of which make splendid, useful Christmas gifts.

### Gifts for Mother or Sweetheart

A large assortment of useful presents, such as bed spreads, table linens, napkins, fancy towels, pillow tops, art linens, dress patterns, beautiful handkerchiefs in boxes, easy, warm shoes; also stylish leather shoes. Beautiful camisoles and envelope garments, silk, lisle and woolen hose. Also woolen robes and blankets.

### Box Stationery

We have a fine line of box stationery—in fact, the nicest we have ever had—and you will undoubtedly be pleased with it. Ask us to show it to you.

Bring your Christmas shopping list to us and let us help you in your selections.

Hundreds of the latest new toys to please and make happy the girls and boys.

### Gifts for Girls

We have a beautiful line of toilet sets, manicure sets, comb and brush sets, mirrors, albums, music rolls, perfume sets, ivory novelties, beautiful ribbons, story books, leather and velvet purses, bead necklaces. Also a splendid assortment of handkerchiefs.

### WE HAVE SCORES OF

### Presents for Boys and Girls

Machine guns, trains, drums, watches, tops, pop guns, autos, kiddie cars, banks, balls, best story books, blocks, horns, wagons, rubber and floating toys, toddle and tinker toys, dolls, dishes, paint sets, stoves, washboards, etc.

## Delicious Eats for Christmas

Our grocery department is well filled with plenty of good things such as candies, in bulk, packages and boxes. Nuts, figs, dates, oranges, lemons, bananas, grapefruit and grapes. Also lettuce, celery, sweet potatoes. Besides our shelves are filled with a complete line of fresh staple groceries.

### OUR MEAT DEPARTMENT

Also has a complete line of meats ready for delivery.

### GRANNY GILMORE'S CHRISTMAS GIFTS

Granny Gilmore lived close to the little town of Tower. She was almost eighty, but was still able to get around pretty weyy. Many reverses had come to Granny in her day, but through all of them she managed to keep a cheerful smiling face, and back of that a cheerful heart, too. She owned a small farm near town and managed to get from it enough of the necessities of life, but few of its luxuries. But Granny Gilmore was not the type that set much store on luxuries.

Her granddaughter, Margaret, lived with her, the only one left to her now. Margaret was much like her grandmother in looks and manner. She had her romantic turn of mind, too, and loved to listen to the old woman as she told of her girlhood and how she was wooed and won by Grandfather Gilmore.

It was only when Christmas came that Granny Gilmore wished that she had more of the material things of life. She would like to give freely, generously, largely, as she had done in the long ago when things were different with her. Every Christmas however she did give something. Six lovely plump chickens that were raised on the little farm went to the neediest families in town. And she made it a point, no matter how cold the weather, to drive in and deliver them personally. And in each home, in addition to the gift she brought, she left some of the love and cheer that was in her heart.

Now, she and Margaret had delivered the packages, made the few purchases they needed and were making ready for the homeward journey. Then fate stepped in to change things a bit. Granny slipped as she was stepping into the old fashioned buggy. Margaret picked her up, frightened beyond measure. Granny insisted that she was not hurt, but Margaret would have it that they must see the doctor before leaving town. Still insisting that she was not hurt, Granny allowed herself to be led there.

Doctor Stuart was away, but his assistant Doctor Andrews, examined Granny very carefully. But he could find no injury—it was just as Granny had said—not a bit of harm done. However, the visit to Doctor Andrews turned out to be a rather long one. Doctor Andrews seemed to be more than interested in Granny. He

## Old Kris Left Lots o' Things

had been hearing about her during the two years he had spent at Tower. And so his heart went out to the sweet, gentle-faced old woman. But later events proved that it went out more completely to her pretty young granddaughter, for when the following Christmas came Gianni was preparing fowls for a big wedding feast.

There are but twenty-four hours of Christmas, but that is plenty long enough for the poor devil who pays the bills. Read the ads.—keep posted.

The young woman burst into tears and said: "We were just talking about that." The wife recovered!

## ATWATER-KENT

Twenty years before the first radio broadcasting station was opened, the Atwater-Kent name-plate on an electrical precision instrument was accepted as a mark of quality.

Today, on Radio, the Atwater-Kent name-plate is your assurance of complete satisfaction, for it is the mark of reputation earned by strict adherence to rigid standards of quality. It is the symbol of Atwater-Kent's pledge that these standards have not been lowered.

### PUBLIC SCHOOL NOTES OF MUCH INTEREST

The girls belonging to the Honorary club, or those girls who have received a grade of not less than 92 in any subject, gave a short Christmas program in the high school assembly on Thursday afternoon. The students exchanged names and presents were given out. No pupil was allowed to go over 25 cents in purchasing a present. This week concludes the fourth month of school. The semester closes the second week after Christmas vacation. The second week will be given over mostly to semester examinations. Those students who have made an average of B plus, or 82, in any subject will not be required to take the examination in that subject. There are arguments for and against this system of doing. Some people claim that if a student is able to make that grade an examination will not bother him in the least. The school has taken the stand that this honor system will encourage the pupil to put up his best efforts and will encourage him to make the most of his studies. It is not a reward, it is an educational incentive. The teacher's chief duty is to give the children an opportunity to grow, not to cram their minds with descriptions of growth that others have enjoyed. That is one of the chief criticisms of the eighth grade examinations. No matter how brilliant an eighth grade teacher may be she is always laboring under the shadow of the dread of those state examinations. If a school is large enough and important enough to state its own high school requirements, and can determine whether a child shall pass from the eighth to the ninth grade, why can it not determine the ability of the child to enter the ninth grade?

The one teacher school is a pioneer institution, intended for pioneer conditions, which only in exceptional instances finds itself able to satisfy educational demands of the modern type. Practically every locality in the state has developed from the pioneer type of doing things to the modern. The schools of today must keep up with the modern trend if we are to train citizens.

**Seventh and Eighth Grades**  
This is the third month that the seventh graders have had a 100% attendance record. No one in class has been either tardy or absent in that length of time.  
George Solbakken and Ida Foster, from the eighth grade, were absent on Tuesday.  
The eighth graders are making an outline of all the important events in United States and Idaho history. They are also reviewing important dates.  
The seventh graders are making booklets for language.  
In reading, the eighth graders have memorized "The Voyage."  
We studied the annual message of President Coolidge to congress this week for current events.

**Fifth and Sixth Grades**  
We have our Christmas tree in our room and lots of presents are arriving. These will be distributed Wednesday morning.  
We are all ready for our program, which will be given Thursday afternoon in the opera house.  
Our fifth grade language class is having fun learning to make outlines. More grief.  
Arwin Nordby and Hazel Foster are our "clean-ups" this week, Mary Reynolds and Melva Currin having just finished their week.

**Third and Fourth Grades**  
The boys and girls in our room have been spending an interesting week preparing and waiting for Christmas. Tuesday we decorated our tree. Thursday just before noon the gifts will be given out.

In Finland it is a custom to attend church services at five o'clock on Christmas morning.

(Continued on last page)

### Do You Realize?

IT'S ONLY THREE MILLION SEVEN HUNDRED, SIXTY-TWO THOUSAND AND THIRTY-FIVE SECONDS TO CHRISTMAS

**Word From Carbuhs**  
A short letter has been received by the News from Albert Carbuhs, dated at Glendale, California, December 14, excerpts from which follow:  
I just arrived here a few days ago. Had a very enjoyable trip through this state, but the three weeks spent in Oregon were extremely rainy and foggy. We came through the Sacramento and San Joaquin valleys. They are very pretty and the climate is just right this time of year. They raise good crops and the country seems to be prosperous.  
We visited a few days at and near Visalia with the P. G. Jacobs and Henry Heistman families, formerly of Uniontown. At the latter's place I helped finish their maize crop and could have gotten in their cotton picking also, but that didn't appeal to me. They raise an abundance of those crops there, together with grapes and oranges.  
As to this place, Los Angeles and its suburbs, the principal occupation, at least, is raising buildings, movie stars and relieving the tourists.  
Haven't met any of our northern friends yet, so the News will be very welcome at the following address: A. Carbuhs, care of John Ansbush, 1207 Reynolds Court, Glendale, California.  
The News is always glad to receive communications from people who are spending vacations in some other part of the country. We are also glad to receive communications from former residents who may be located at other points. They may not realize it, but their old-time friends are always glad to hear about them—it also makes mighty good reading.

**Kendrick Store Again Robbed**  
Unknown men early Sunday morning of last week looted the A. K. Carlson Hardware store at Kendrick of approximately \$1500 in radio and hardware merchandise in the second burglary of the store in the last two weeks. The robbery was seen by Mrs. William Watt, who late nursing ill members of her family, but she declared Sunday that she was too frightened to notify anyone. She placed the time of the robbery as about 4 a. m.  
Mrs. Watt reported that she could see men working in the store with flashlights and that they loaded the merchandise into two trucks and drove off. Articles taken were radios and the usual supplies, guns, ammunition, knives, razors and carpenter's supplies of all kinds.  
Entrance was gained into the store by jimmying a back window. The stolen goods were carried out the back door and loaded into cars. The first robbery two weeks ago resulted in the loss of only minor articles.

**Horse Falls, Foot Crushed**  
L. C. Rogers is suffering with a badly crushed right foot, caused by the horse he was riding falling on the frozen ground and on the foot. An X-ray showed there were no broken bones, but Mr. Rogers is using a crutch for the next several days.

**Start the Day Early**  
In Finland it is a custom to attend church services at five o'clock on Christmas morning.

**WHAT HAPPENED HERE TWENTY YEARS AGO**  
According to the Spokesman-Review of Tuesday, C. A. Miller of this place has opened a matrimonial bureau.  
Merely Pastime: Erwin Seigmund, who in a saloon row at Kendrick on November 22 shot Chas. Stattler, was convicted of simple assault in the district court at Moscow Tuesday. The maximum penalty for the offense is six months in the county jail or a fine of \$300!  
There has been a great variety of weather during the past week. On Saturday and Sunday night fully ten inches of snow fell, making it fair sleighing during the forepart of the week. Chink wind and rains have since melted nearly all of the snow and the promised Christmas sleighing has gone glimmering.  
The public schools close today for the holiday vacation of two weeks. The various teachers will spend their vacations at home, Miss Gearhart and Miss Kelly going to Pomeroy, Mrs. Randall to Palouse, Miss Dunbar to Moscow, Miss Asbury to her people north of town, Mr. Peterson to Moscow, Mr. Overman to Grangeville and Mr. Emmett will make a hasty trip to Missouri.  
On Tuesday evening Dr. and Mrs. J. L. Conant entertained the members of the "Me, Him and I" club at their home in this city in honor of Robert E. Emmett. At an early hour a supper—and which was praised to the limit by the guests—was served, the evening then being devoted to cards. Mr. Emmett leaves today (Friday, December 21, 1906) for Tina, Mo., where on Wednesday of next week he will be united in marriage to Miss Mabel Snyder of that city, expecting to return to Genesee shortly after the first of the year. They will reside in a portion of the Burdick residence, which has been placed in readiness by Mr. Emmett. Those present at the reception were Reed Clapp, Elmer Ball, Dr. J. E. Reilly, J. K. Bell, George McMahon, Thos. Keane, Will and Henry Herman, Fred Miller, Elmer Vanouck, J. J. Mulalley and Robert Emmett.

**Bee Flappers Taboo**  
Flappers in the bee kingdom are quickly killed by the inhabitants of the colony. The preparation of the species is the work of the queen. An excitable queen, one that skips egg cells, or that runs around and acts "flapperish" is killed instantly by the workers. They want their queen to be maternally and tend to her business. Professor Slocum declared that there is only one queen in a colony of bees and that she flies away only once during her lifetime.

**Christmas Day Brides**  
According to an old belief Christmas Day brides are inclined to be frivolous and fond of pleasure.

### KLEWENO FAMILY OFFER \$500 REWARD FOR BODY

Reward of \$500 was posted last Friday by members of the Kleweno family for the recovery of the body of R. C. Kleweno, 27-year-old Genesee man lost in the woods east of Harvard November 30 while on a hunting expedition with three companions.  
This offer was authorized by Walter Kleweno, brother of the missing man, and is made for his family, including Mr. and Mrs. J. P. Kleweno, the man's father and mother, and several brothers and sisters. The brother was in Moscow Friday morning to notify county officials and The Star-Mirror of the reward and to renew the effort to find the body of the missing man, says the Star-Mirror.  
Groups of men are still going over the territory in which it is believed that Kleweno still is. The search has been pushed for ten days since December 1, when the three hunting companions of the man, Joe and Jonas McGowan and Jay Rhon returned to Harvard and Palouse with the information that Kleweno had not been seen since 9 o'clock the previous day.  
For the first ten days hopes were held that he would be found alive. It was thought then that he had wandered about the woods and either become lost or injured. No trace or clue was found.  
Approximately a foot of snow now covers the Harvard country. Searchers are watching for animal tracks and are following them in an endeavor to find the body. All hopes that he may have come up on a cabin or isolated farm and have obtained food, have finally been abandoned, as every habitation for many miles around the spot where he was last seen has been visited by the searchers.  
The search is now being directed by forest service men, with the aid of pioneer woodsmen of the territory.

**Pinochle Party**  
Last Saturday evening the home of Mr. and Mrs. W. H. Roseau was the scene of a very pleasant pinochle party and that entertaining game was played at nine tables. Wilson Archibald succeeded in landing first prize for the gentlemen while William Luders was awarded the consolation. Charles Baumgartner, playing as a lady, won first honors and Mrs. E. M. Becker was given the consolation. A mid-night delicious refreshments were served and a splendid time was had by all present.  
Those present were: Mr. and Mrs. L. Vestol and children, Mr. and Mrs. E. M. Becker, Mr. and Mrs. Peter Dullas, Mr. and Mrs. Fred Shiro, Mr. and Mrs. L. D. Roskammer, Mr. and Mrs. Martin Liberg and daughter, Mr. and Mrs. Herman Theurkoff and children, Mr. and Mrs. D. Nebelick and Marjorie, Mr. and Mrs. Henry Morschek and son, Mr. and Mrs. O. V. Johnson, Mrs. Johanna Christenson, Mrs. Rose White, Joyce Brackett, Marie Roseau, Erma and Armina Dallesago, Mr. and Mrs. W. J. Baumgartner and children, Mr. Mckinzie and Russel McKenzie, Jake Burkhar, Wilson Archibald, Albert Conner, and Robert Roskammer, William Luders and Stanley Shiro.

**Big Business at Postoffice**  
Business at the local postoffice has been the heaviest so far during the holiday season on record. The heaviest day's stamp sales recorded in the past was \$33. The stamp sales for Monday of this week reached a total of \$46, and that of Wednesday reached an even \$50.  
Mail received has set a new high mark for this office.  
On Monday, December 20, there were six pouches of first-class mail and 44 sacks of other mail; on Tuesday there were six pouches and 35 sacks, and on Wednesday, six pouches and 35 sacks, making a grand total for the first three days of this week, of 18 sacks of first-class (letter) mail and 115 sacks of other mail, including parcel post, but not including the large amount of mail handled outside of the sacks.  
Mail forwarded during this same period amounted to 18 pouches of letter mail and 65 sacks of other mail, setting a new high-mark for mail forwarded as well as received.

**Game Birds Must Be Fed**  
Farmers of the Rimrock section state that hundreds of game birds are coming to their feed lots and barnyards in search of food since the snow has covered their feeding grounds and that it will be necessary to feed them if they are to survive the winter.  
It has also been stated that now is the proper time to destroy magpies. All that is necessary to kill literally hundreds of these destructive birds is to take a thin piece of fresh pork, cut it crosswise and fill it well with strychnine. Nail this up on a post near where the birds congregate and they can easily be destroyed by this poison.  
Law Jain says that if this is done, while the snow is on the ground and feed is scarce, there will be from four to six more game birds next year where there is one now, as the magpie lives almost exclusively on the eggs and young birds during the laying and hatching season.  
While what is being scattered for the game birds, several pieces of well-poisoned tough pork should be put out for the magpies.

**To Use Rotary Plow**  
The North and South highway will be kept open this winter no matter how much snow comes. A rotary snow plow was secured principally to keep the road open on top of the Whitebird hill, but it will be available for use across the prairie where snow drifts bother. The plow will be operated by a large tractor.

**Is Getting Along Nicely**  
Miss Fern Herman who was reported as not getting along very well last week, is getting along nicely at this time and expects to be brought home the latter part of the week.

**Shortest Day**  
Tuesday was the shortest day of the year—and she was a dandy in this section of the country.

**Business Houses Be Closed**  
All business houses in Genesee will be closed on Christmas day with the exception of the hotel, pool halls and restaurants.  
Don't miss page two this week.

**Dust and Lice**  
A dust bath can not be depended on to rid poultry of lice and mites. Some fowls seldom dust themselves, and those which dust freely never rid themselves of the pests completely. A dust bath does add to the comfort of the chickens, especially when they are closely confined. A box about 2 feet square, or larger, containing ordinary road dust or fine dirt, may be used for the bath. It should be kept under cover, preferably outside of the chicken house.

Methods which accomplish complete eradication are, however, much to be preferred. All species of lice attacking poultry may be killed by the application of sodium fluoride among the feathers next to the skin. Do not use the material too freely on young chickens. In applying the powder, put one pinch on the head, one on the tail, one on each thigh, and one scattered on the underside of each wing when spread.  
Sodium fluoride may also be used for this purpose in the form of a dip, three-fourths to one ounce of the chemical to the gallon of water. For treatment of large flocks this is the most economical and expeditious method, but should only be used on warm, sunny days.

**Spar to Heroism**  
Because he had crawled out on the thin ice and rescued a playmate who had broken through, little Willie was the center of an admiring group of men and women.  
"Tell us, my boy, how you were brave enough to risk your life to save your friend," said one of the ladies. "I had to," was the breathless response. "He had my skates on."

**Notice**  
Dr. N. M. Leavitt left Thursday morning for Yakima. He will return Tuesday morning, December 28. The office will be open for phone calls and appointments, however. 26-1

**Legends of "Sleepy Hollow"**  
Walter Ebel, C. T. C., is now stationed on the U. S. S. Arizona.  
Mrs. Chas. Ebel and children drove to Lewiston early Monday morning. Although the roads are a little rough nearly all the "Sleepers" are out sleighing, which helps to smooth off the bumps.  
Butchering has been the favorite pastime in Sleepy Hollow the last few weeks. The weather has been just right for this sport.  
The school children are busy practicing for the play which will be given Wednesday, and all are hoping that Santa will be as generous as he has been in the past.  
Hunting is very good now, we got six rabbits Sunday. Too bad the season is closed on pheasants as there are more now than early in the fall and they seem to be quite tame.

**Pine Grove News**  
The Al. Snowen family visited with Fred Millers Friday.  
Mrs. Wm. Freeburn visited with Mrs. Roy Sweet Thursday.  
Glen Brazier was out of school Tuesday on account of illness.  
Roy Sweet and family visited Oliver Clark's on the Ridge Sunday.  
There were 32 present at Sunday school and four birthday offerings.  
A little miss arrived at the Budig home last week for an extended stay. The sleighing is good here now but walking seems to be the most popular way of traveling.  
The Pine Grove school will have a Christmas tree and program, assisted by the Community club, on Christmas eve, Friday, December 24. Everyone is invited.

**Put Out Christmas Paper**  
The Troy News last week issued a 16 page five-column Christmas paper which was filled with advertising, showing that the merchants of the busy little town were ready to respond to the energy of the publisher by giving liberal ads. The publisher is to be congratulated upon his enterprise.  
**Will Give Card Party**  
The ladies of St. Mary's church will give another of their entertaining card parties in the K. C. Hall on Tuesday evening, December 28. You are especially invited. 26-1

**Christmas Program**  
The following program will be given on Friday evening, December 24, at 7:30 p. m.  
Hymn—"All Hail the Power of Jesus Name"—congregation.  
Prayer by Rev. N. E. Beach.  
Welcome by Neyva Erickson.  
Song—"The Little Stranger"—Primaries and Juniors.  
Recitation—"The Birthday of a King"—Donald Springer.  
Recitation—"The Best Old Story"—Bernice Stucker.  
Recitation—"If You Were Only Five"—Edna Hanson.

**The Ladies Aid**  
Ladies, be prepared for a delightful mid-holiday meeting on Wednesday, December 29, at the church basement. This will be the fun meeting of the year. Come with your basket lunch and be on hand at 1 o'clock. Remember your little present. It must not cost over 25 cents. All will be placed in one container and members will each draw one.  
Please note carefully the day and hour.  
**Rebekah's Party**  
The Rebekahs had their annual Christmas party at the home of Mrs. Vern Beckman.  
A pick up lunch was enjoyed by the members and the exchanging of gifts took place immediately afterward.  
A very enjoyable time is reported by those present.  
**You Should Attend**  
The card party to be given by the ladies of St. Mary's church, next Wednesday evening, December 28, in the K. C. Hall. You'll have a good time. 26-1

**CLASSIFIED ADLETS**  
For Sale

Money to Loan on Approved farm security, 5 1/2%, 5, 7, or 10 years. C. L. Thompson, Moscow, Idaho. 49  
A Satisfactory Heating Coal  
Owl Creek is one of the best heating coals to be found on the market. It holds fire over night, requiring only a slight shaking in the morning to secure a good fire.  
We also have other grades at a lower price.  
Slab and cord wood by the cord or carload. 22-1f  
Standard Lumber Co.

**CHURCH NOTICES**  
Congregational church  
Sunday school at 9:45 a. m.  
Preaching service at 11 o'clock.  
Subject, "The More Abundant Life."  
Choir under the direction of Mrs. W. M. Herman.  
The pastor hopes to present a message that will encourage all who hear it. Our motto: Helpfulness to our fellowmen; our charter, the Holy Scripture.  
A cordial welcome to all who attend.  
St. John's Lutheran Church  
A. F. Wolff, Pastor  
Sunday school at 9:30 a. m.  
English services will be held each Sunday morning at 10:30 o'clock, with the exception of the first Sunday of each month, when German services will be held at the usual hour.

**Genesee Valley Lutheran Church**  
At 11 o'clock A. M., Sunday, December 26, there will be Christmas services in the English language by Rev. P. J. Luvaas of Coeur d'Alene.  
At 7:30 p. m. the Christmas tree and children's program will be held.  
Everybody welcome to these services.  
On Wednesday, December 29, at 7:30 p. m., the Y. P. L. will have a gathering at the parish hall, when there will be exchanging of gifts, the price not to exceed 25 cents. Names will be exchanged, so bring your presents.  
Everybody welcome.

**Christian Church**  
N. E. Beach, Pastor  
Bible school at 9:45.  
Preaching at 11 a. m. Subject, "Jesus is King." A Christmas sermon. Christian Endeavor at 6:30. A New Year's topic. You will enjoy the season.  
Preaching at 7:30. "How the World Was Made Ready for Christ's Coming."  
We can better enjoy the year because we remembered the Near East children, our own orphanages and the Christian home for the aged at Walls Walla.  
Every member of the church is urged to reserve New Year's Eve for church night. Reports of the past year, plans for the new year, and a fellowship lunch is planned by the special committee. This will take the place of the first Sunday all-day meeting.

**Christmas Program**  
The following program will be given on Friday evening, December 24, at 7:30 p. m.

HIGH TOP'S WITCH
"Deed it is witch, Mr. King, sir; I done see'r with my own eyes. Last when we'e in the cabin playing cards something brushed past the window. Sam, he says, 'I bet that's High Top's witch.' Which? I ask, and he says, 'It's the witch on the mountain, and its bad luck for the mountain that sees or tries to catch her. Joe, he once give chase, when the witch come prowlin' around the messhouse, and she throws a laugh at him and gets quick behind a tree, and then she looks all about she wasn't there; an' next day Joe lost his job, diggin' on High Top.'"

Glen King laughed, but the golden-haired child on his knee wailed: "It is true what Jim says. I saw the witch one evening just as I was going off to sleep. She wasn't there, tucked me into bed and kissed me good-night. She threw a rose from the edge right through my window and into my bed—and first she kissed the rose—and I wasn't afraid at all. Maybe it's only bad men that she punishes. Mr. King—Joe says he gambled money and took all poor Tim Murphy had."

"Information bureau," the Glen King remarked, and pinched the little girl's cheek. "So you have seen the witch and are afraid of her, Angel—and Monna says that red roses mean love?" Glen King was quite untoured in the ways of John Kirkwood's daughter. And the chief engineer was Glen was torn with jealousy at times by the sight of her, and when she was the sweetest mountain trails at the side of Bob Whitely, Bob, a New Yorker like himself, had come with the engineering commission, as secretary to Mr. Kirkwood, and Glen could not get over his dislike and suspicion regarding the ingratiating stranger. Monna appeared not to share this dislike. Sighing now, he put the child down from his knee and left the cabin; Angel walked at his side.

"And if you don't believe in the witch, Mr. King," she continued, her favorite tones, "let's watch for her some evening on High Top."

Glen sat long in the moonlight at his cabin door that night; Jim, as usual was absent. As he sat across the moon-lit path fled a shadow. He got to his feet, interested—the witch, beyond a doubt. He saw a dark enveloping cape, a peaked hood rolled low.

The witch eluded him; but moonlight showed a touch of scarlet lining, where the person's arm had tightened for a moment the cape about her—

This is just a little greeting but it carries a big "Thank You" for your business during the past year

Morscheck Brothers

PUBLIC SCHOOL NOTES OF MUCH INTEREST

(Continued from first page)
The program to be given by all the grades will take place Thursday afternoon at the High School opera house.

Donald Rader was excused from school Tuesday afternoon because he was ill.

Those having a perfect record in spelling were Evelyn Rogers, Grant Lonsasty, Ray Solbakken, Susie Dresher, Annabelle Huffman, Gaynell Hanson, Marie Springer and Anita Henderson.

Primary Room
We are making a new sand table this week—two Christmas stories.

We will have our room Christmas tree Thursday morning, before the program Thursday afternoon.

This week completes another month and brings Old Santa Claus. All of the children are writing letters to Santa Claus. We all wrote him a letter last week.

We are practicing our Christmas program each day for opening exercises.

The second grade, for their spelling lesson Wednesday, played "Taking the Pig to Market." Harriet's side won.

Several of the mothers were up Monday afternoon to help with costumes. We surely appreciate the favor and thank you very much.

Barbara Huffman is absent on account of illness.

Our Christmas tree is all decorated and the children are enjoying it immensely.

We drew names last week. We are to buy an inexpensive present for the one whose name we drew. This way everyone receives a gift.

We made pretty red Christmas balls to hang in our windows at home.

The primary room wishes everyone a very Merry Christmas and a Happy New Year.

Too Much Christmas
(By Audrey Pleiman, English III)
"No," Mrs. Tompson's voice assured her neighbor crisply, "we aren't giving any Christmas gifts this year, it's just a lot of expense and no fun."

"But to think," Glen murmured brokenly, "that after all our association Mr. Kirkwood would disbelieve in me!"

"Dat Bob," Jim confirmed, is mighty smooth, Mr. King," Glen bowed his head toward him a slender figure came. The negro flew. "The witch" the disheartened man heard him cry.

Glen raised his head. Monna stood before him. A dark cape wrapped about her, its lining showed scarlet. She held out to him a wide black ribbon. "The peaked hood," she said and smiled.

"I have been High Top's witch, Glen." She came to sit beside him. "After Angel was put to bed for the night I roamed the Top; really it was fun, but I had an object. Bob Whitely had whispered things about you—had insinuated to father. I had to know. So I peaked in the cabin windows where games were played. How did I know where to go? I followed Mary Murphy's Tim one night, secretly. She had bewailed the fact of his nightly visits. And last night, Glen, I saw a cabin door, left open but for a moment to admit a man—that man dressed as you might be dressed—but it was not you. I have told my father who the man was. And here I saw you, solitary, on your own doorstep—until you went in to bar for the night your cabin door. I have told my father that, too. Tomorrow it will be Bob Whitely who will leave the High Top commission—and not you, my Glen, dear!"

Holiday Greetings
(By Inez Mayer, English III)
Yes, Patty Brian was worried, in fact, very worried. The worst part was when she tried to stop worrying by saying "I don't care, I don't want to go home for Christmas anyhow," she'd get lonesome. Then she would start crying. So, which was the worst?

As she sat that cold, bleak afternoon on December twentieth, everything looked black. Dean Brown had told her she was not to go home. Of

course she could tell her, it was Kitty Hall who had thrown the pillow that missed Julia Saunders and hit her. That wouldn't help much, though, because it was her pillow and it only would have gotten Kitty into trouble while she'd have been in as deep as ever.

She had already written home and told them she was going to spend the vacation at the hall. How it must have hurt the folks to think she had chosen the gloomy old hall in preference to home. To think she could, but of course she would rather they believed that than the truth.

Just then the door opened and Kitty came in. "Why weren't you to lunch, Patty?" And why the idea of having me smuggle you this sandwich?" was Kitty's greeting words.

"Do you think for a moment I could bear to go down there and listen to you all talking about going home? Especially that Julia, she seems too pleased with things this way," retorted Patty.

"By the way, Patty, they made an announcement," said Kitty, her face lighting up. "I don't care!" fairly shouted Patty. "I don't want to hear it," flung back Patty, and she fell to crying. After she was through she sat up and said, "Chicken pox" began Kitty.

"I don't want to hear it," flung back Patty, and she fell to crying. After she was through she sat up and said, "Chicken pox" began Kitty.

Julia Saunders took down with the 'chicken pox' and the whole hall is going to be fumigated, so everyone must go home," announced Kitty in a relieved way.

"And with that Patty turned over and began crying again.

Ship of Souls
On Sunday night, December 26, the feature picture will be "Ship of Souls" a pictureization of the last and greatest novel by Emerson Hough, author of "The Covered Wagon."

They had been talking over the back fence and as Mrs. Tompkins entered her back door she heard her husband say, "I am sure glad we aren't having a fuss at our house like the Jones and Carlson families; it's all a piece of foolishness."

Davy and Jane hadn't said much to the arrangement, only agreeing with their parents by nodding their heads.

Mr. and Mrs. Tompkins kept talking this way until Christmas eve and Davy and Jane had gone out and they sat silently before the big fireplace where long ago two tiny stockings had hung.

Fame is fifteen and Davy seventeen, there really isn't any use.

"Oh," was all the neighbor woman said, but the look in her eyes told how foolish she thought Mrs. Tompkins was.

They might have sat there dreaming of past Christmases, forever, if Mrs. Tompkins hadn't had the courage to speak what was in her mind. The result was that they bunched up and went to town through the snow and sleet to buy a Christmas tree and presents for each other and the children.

When they reached their own gate they heard laughter but thought it must come from the Jones house.

"When they opened the door to the living room, their eyes were dazzled by the brilliance. And what did they see? Miracles of miracles, there was a Christmas tree, all bedecked with tinsel and bells and a great silver star topping it. The room with its holly and tree, looked just like they had planned. It should. But surely there were suppressed giggles from somewhere. They looked around in a bewildered way and sure enough there were Jane's black curls peeping from behind a chair.

Then there was much explaining and at last it was decided to trim both trees, for as Mr. Tompkins said, "It is better to have too much Christmas than not enough."

A Merry Christmas And a Happy New Year And the assurance of a keen appreciation of your good will and patronage

THE PICTURE SHOWS
"The Big Show"
The feature film at the Hotel Theater for Saturday night will be "The Big Show" with John Lowell and Evangeline Russell in the leading parts.

carry the leading roles. False as she was beautiful—he fled from her—to track down her betrayer—for between them they had wrecked his life—his happiness—then in the far flung barriers of the snowy waste land he found—a greater love—the same rival—and a new temptation.

Where the dawn of tomorrow kisses memory lane begins—the story in picture that will be given at the Hotel Theater on Wednesday night, December 29.

Never a bride who didn't look back down memory lane to the first kiss, the first quarrel; to the day she told the other boy she liked him as a friend, but—where was he now? What was he doing?

Never a bride who, looking forward, didn't wonder if sometime, looking back, she would see memory lane through a wreath of smiles, or see it dimly through tears.

Ford THE UNIVERSAL CAR
Authorized Sales and Service
Cold Weather Suggestions
1-Heater at \$1.90
2-Drain crankcase every 350 miles in winter on account gasoline dilution.
3-Alcohol in radiator
4-Auto windshield swipe for snow or rain
5-Keep the battery fully charged
6-Always have chains in car
7-Keep brakes adjusted
8-Use good rubber--don't change tires this weather
9-Set of new spark plugs to insure complete combustion
10-Open garage doors before starting--there is danger of asphyxiation
11-Take no chances on these roads--drive carefully

SEARCH CONTINUES FOR R. C. KLEWENO IN HILLS
Walter Kleweno, brother of R. C. Kleweno, missing for the past several weeks in the mountains in the northern part of the county, accompanied by David Hickman, Dewey Wardrobe and Wm. Van Horn, left Wednesday morning for Grizzly camp, where they will establish a camp and remain for at least a week, searching for the body of the missing young man, keeping close watch of animal tracks that might lead to the body.

Genesee Has Small Blizzard
Friday of last week this section was visited by one of the worst miniature blizzards this has ever been experienced here and caused the cancellation of many dinner engagements for Christmas day and thus caused much disappointment among those whose plans had been upset by the weather man.

NEW REGULATIONS FOR BRANDING POTATOES
The following information is submitted by the Idaho Department of Agriculture in explanation of the new regulations governing the branding and marketing of certain grades of potatoes which become effective January 1, 1927.

Brands and Marks
U. S. Grade No. 1—New or clean sacks to be used as receptacles in which potatoes graded United States Number one (U. S. No. 1) are to be packed for sale, offered for sale, sold or shipped in interstate trade, must have stamped thereon in letters at least two inches in height, the following words: "Idaho U. S. No. 1 Selected Potatoes."

U. S. No. 2 Grade—New or clean sacks to be used for receptacles in which potatoes of grade United States No. Two (U. S. No. 2) are packed for sale, offered for sale or sold must have stamped thereon in letters at least two inches in height, the following words: "Gem State Seconds, U. S. No. 2 Potatoes—All cull potatoes packed for sale, offered for sale, or sold in the state of Idaho, shall be placed in new or clean, plain unbranded sacks and marked on the sack 'Cull Potatoes' in letters at least two inches in height."

Private Brands—Any other words, designs, or phrases, in addition to the above compulsory wording may be added, stamped or printed upon the container as a private brand. Copies or sample containers showing private brands may be obtained from the Department of Agriculture at Boise, Idaho, for approval and registration. Any private brand is acceptable when so approved and registered.

The words "Idaho" or "Selected" may not be used as a part of the brand name in any other state, such act would be mis-branding and a violation of the federal pure food and drug act. Potatoes grown in Idaho must be shipped in containers carrying brands of dealers from other states.

Net Weight—The net weight of potatoes packed must be indicated. The words "Net Weight" must be stamped upon the container or upon a card firmly attached to the container. This applies to all grades.

Even Weighted—All containers in any lot or shipment must be of the same weight when filled. Exceptions to Even Weight and Net Weight—For early potatoes or potatoes dug between June 1st and November 1st, the net weight and even weight requirements will not be compulsory.

Mugging—Containers must not be "mugged" or faced with potatoes of superior size or quality than the remainder of the sack. To avoid the deception, the potatoes in the face of the container must be representative of the contents of the package.

Sowing—All sacks must be sewed so that the edges of the sack are not more than two inches apart. Sacks—All sacks in which potatoes are packed for sale, offered for sale, or sold, reclaimed, unbleached, bright, unadorned, rice paddies, or which are reclaimed, unbleached, bright, undamaged No. 1 mills.

Tags—Upon which the weight is marked shall be of cloth or any other strong material, not less than three and a half (3½) inches by six (6) inches in size.

Suggested Colors for Brands—In order that uniformity of brands may be developed and that the brands may be automatically classified in the shipments, it is suggested that the words, "Idaho Selected U. S. No. 1 Potatoes" be stamped in blue color, and in this order, as this color always indicates "Quality" when used as a part of, or as a distinct brand.

With the "Number Two" grade print or stamp all letters in red. "Cull Potatoes" The wording for this grade should be stamped in black whenever used.

If this custom should be adopted by shippers the "Trade" would soon adopt and recognize the products by the color of the brands.

Meaning of "Pekoe"
The name "pekoe" of orange pekoe tea is derived from the Chinese word "Pah ho" which means "white hairs" and refers to the small white pieces of this tea which look like stems but are the finest part of the leaf.

Death of Mrs. Randall
The sad news was received in Genesee Friday morning of the death at Clarkston, Rev. F. L. Cook, pastor of the Methodist church of that city conducting the services. Interment was made in Normal Hill cemetery, Lewiston.

Plum Diseases
Susceptibility of different varieties of plums to the brown rot disease can now be determined mechanically by measurements of the toughness of the fruit and the firmness of the flesh of the skin.

Most coal mines are not near water.

Genesee Victorious
Genesee teams were victorious in the two basketball games played in the local gym Tuesday night with Moscow teams, the first game being a preliminary game between a boys' team from Moscow and the Genesee high school second team, which resulted in a victory for Genesee by a score of 15 to 13.

The next game was between the Moscow Athletic club, of the Moscow High school and the Genesee High school, which was fast and fought from start to finish by both sides, the final score being 27 to 17 in favor of Genesee.

Perhaps one of the hardest games to be played on the local floor will be with the North Central High school team (Spokane) Saturday night, when the city boys will come to Genesee to give the locals an evening of hard practice—and who knows what the result may be?

The Genesee team has played six games to date and have won five of them, which is not a bad record—but the heaviest games are yet to come and will make the locals look well to their laurels to keep their record out of the red.

MANY GENEESE PEOPLE ENTERTAIN ON CHRISTMAS
Mrs. Mary Herman entertained Mr. and Mrs. Wm. Jenkins and son, Arthur, Mr. and Mrs. O. V. Johnson and son, Mr. and Mrs. Chris. Scharnhorst and family and Louis Herman.

Mr. and Mrs. John Vandenberg had as dinner guests Mr. and Mrs. Jack Vandenberg of Moscow, Mr. and Mrs. W. L. McCreary and P. C. McCreary.

Mr. and Mrs. Herman Morscheck entertained Mr. and Mrs. Henry Morscheck and son, John H. and Mrs. Wm. Rosseau and family, W. H. Rosseau, H. Blume, Wm. Luders and George Morscheck.

Mr. and Mrs. O. Rader entertained Mr. and Mrs. E. Emmett and family and Mr. and Mrs. Wm. Rader and family.

Mr. and Mrs. Al Mayer and family spent Christmas at Troy at the Art. Mayer home.

Mr. and Mrs. Glenn Sampson entertained Mrs. Edith Smylie and family. Mr. and Mrs. Martin Liberg, Mrs. Morscheck and son, John H. and Mrs. Wm. Rosseau and family, W. H. Rosseau, H. Blume, Wm. Luders and George Morscheck.

Mr. and Mrs. F. E. Dicus entertained at Christmas dinner, Mr. and Mrs. V. A. Beckman, Rev. and Mrs. O. S. Barnum and daughters, Misses Dorothy and Ruth.

Mr. and Mrs. Joe Eberhardt had as guests Mr. and Mrs. Clifford Olson and son, Mr. and Mrs. Dale Lamphier and daughter, Miss Bernadine Hasfarther of Moscow, Miss McDonald and Jack Hasfarther from Spokane.

Mr. and Mrs. T. E. Herman entertained Miss Fay Hummel from Spokane, Mrs. Hattie Herman and Mr. and Mrs. W. M. Herman.

Mr. and Mrs. Danielson entertained Mr. and Mrs. John Eikum and son, and Leon Danielson of Spokane.

Mr. and Mrs. Ray Edwards had as their guests Mr. and Mrs. Nate Edwards, Mr. and Mrs. Cias. Gelts and Mrs. H. P. Grant of Seattle and Hartzel Edwards of Lewiston.

Mr. and Mrs. Art. Hove entertained as their guests, Mr. and Mrs. Archie Tegland and family, Mr. and Mrs. Arnold Olson and family, Mr. and Mrs. Nele Lande and family, Mr. and Mrs. Wm. Borgan and daughter and Mr. and Mrs. Henry Hanson and family.

Mr. and Mrs. Walter Jain entertained as their guests, Mr. and Mrs. Lew Jain, Mr. and Mrs. Ben Jain and family and Don and Grace Jain.

Mr. and Mrs. Arthur Springer entertained Mrs. Minnie Springer, Mr. and Mrs. D. Springer and daughter and Ed. Vanouck.

Mr. and Mrs. E. M. Becker had as their guests Mr. and Mrs. Fred Shirrod and son, Rose White, Mrs. Johanna Christenson, Mr. and Mrs. Peter Dallasego and daughters, Mr. and Mrs. E. H. Richardson and Margaret Becker of Moscow and Dwight of Manson, Washington.

Mr. and Mrs. M. E. Muhlitz spent Christmas at the J. E. McAllister home in Lewiston.

Mr. and Mrs. Harry Beach entertained Mr. and Mrs. N. E. Beach and Danny, Kenneth and Don Aherin.

We undoubtedly have missed many mention of, but it is next to impossible to get all of them. If you have been missed, we will consider it a favor if you would call us up and tell us who you entertained or where you were entertained.

Mr. and Mrs. Arthur Hampton and Mr. and Mrs. Roy Patchen were dinner guests of Mrs. G. A. Bumpass.

Mr. and Mrs. O. H. Norbury entertained Mrs. Lilly Larson and family and Peter Dahl of Moscow.

22 Deaths from Poison Booze
Twenty-two deaths were caused in New York city during Christmas celebrations by poison booze, it has been stated, although some of the deaths may have been caused by quantity as well as quality.

When the returns are all in from the larger cities it is probable that the number of deaths will reach into the hundreds—but it doesn't seem to make much difference now-a-days what the drink is made of, just so it makes the drunk come.

The Touch System
"Say Billie, what system do you use to get so much money out of your father?"
"Touch," replied the typist.
Probably Needs It
About the time man loses faith in Santa Claus, he falls in love. After that he believes in hair restorers.

W. W. P. News
After selling nearly \$3,000,000 of its preferred stock in nine months in 1926, the Washington Water Power company now announces its third and final allotment of 20,000 shares of stock to be sold entirely to customers and employees of the company in eastern Washington and northern Idaho.

This last block of 20,000 shares represents all that remains of the original 50,000 shares authorized by the stockholders early this year," states W. H. Ude, director of public relations of the company, in charge of the customer-ownership program.

The first two blocks of 15,000 shares each were immensely popular; the first block going in less than 30 days and the second block now being almost entirely subscribed. More than 2770 men and women who use our service have placed their savings and surplus funds in their home light and power company.

This last allotment of 20,000 shares will be sold under the same terms and provisions as the stock sold this fall, being restricted to employees and customers of record with us and limited to 10 shares to a family.

The Herdemann's Heard From
The following short letter has been received by the News from Mr. and Mrs. Wm. Herdemann, who are now in Germany, the letter being dated at Paris, France, December 13:

Since the last time we wrote you, we have crossed the ocean. We left New York on December 4 and were five days crossing. The ocean was very calm and the weather was ideal.

The whole trip seemed to be most fully appointed and the service excellent. It has a large swimming pool, large open decks and every day there were two concerts and dancing in the evening. Surely we had a good time and met some lovely people.

On the fifth day we saw the south coast of England and we then knew we would soon land. At Cherbourg a tender came out to meet us and carried us to shore. From the tender we could see the grandeur of the Olympic ship, the Olympic was beautifully appointed and the service excellent.

We send all the people our Christmas and New Year's greetings.

Many Potatoes in Storage
There are still several thousands of sacks of potatoes in storage in Genesee, besides those held by the farmers.

The Morscheck basement holds at the present time 4,500 sacks while there are stored in the Clark warehouse some 2,600 sacks. There have been some 3,000 sacks shipped from the Morscheck storage and sorting and shipping is still being carried on there as the market demands, about 50 sack per day being shipped.

The percent of culls is not high, but the principal cause is due to frost before digging and those not matted when the early freeze came. There appears to be no dry rot, such as has appeared in other years.

Genesee potatoes have long been known for their splendid quality and flavor and proper advertising of this crop might have considerable bearing on their market price.

A potato growers' association has been formed at Deary and such an organization might be a good idea for Genesee.

It seems that there are always a few difficulties in life that must be overcome at a given time, and the following, taken from the Yakima Daily Republic is self-explanatory:

Cupid has real cooperation from the Yakima county auditor's office when one of the staff received a call to go to the home of a youthful bride-to-be to issue a marriage license. Although these are busy days in the auditor's office, Frank E. Williams took time off to aid in the Christmas romance. Miss Wilma L. Casebolt, who is to wed Paul W. Sprague, a young minister, the day after Christmas, is confined to her home with an injured knee, so Mr. Williams went to the home and issued the license. At the bedside of the injured girl, the oaths were taken and the marriage license affidavits filled out.

Out of Date Now
Little Girl (finding a wire hairpin): What is this, Mama?
Mother: I don't know darling, ask your grandmother.

The Diamond Tragedy;

or, to Be Continued

The diamonds, which the woman had sought so desperately, lay in a little heap on the table. She gazed at them, covetously, as if hypnotized, then turned towards the man who had outwitted her. He laughed triumphantly.

"My lady must acknowledge defeat," he said. "A bitter pill, indeed, for one so seldom beaten."

A sigh of disappointment escaped her. "They would have meant so much to me," she murmured. "And I might have planned so carefully that failure seemed out of the question. I never thought—never dreamed—that you would take them from me."

"You're too trusting, my dear Lila," he answered. "I liked the look of those diamonds from the very beginning, and I soon discovered that you were after them, too. So I double-crossed you, that's all."

"You beast!" she put in. "Your scheming rather amused me," he went on, heedless of the interruption, "especially as I knew that you would go to jail."

"And so!" she cried hotly, "you watched and waited, and as soon as I touched the diamonds..."

"As soon as you touched the diamonds, my dear, I put the ace on your king, which made your queen and put you one down, doubled."—The Passing Show.

Old Ideas Revived by Experiments in Diet

Some remarkable cases of fasting have attracted attention lately, but one striking experiment in diet has met with less attention than it deserves.

This experiment was carried out by three scientists who lived for several months entirely on potatoes and vegetable margarine, with a slight addition of onion.

One of the results of this experiment is that science is now beginning to believe that there may be something in the old idea that potato water is a remedy for gout. The potato does appear to have considerable virtues where "this disease is concerned."

Another result is that it is now claimed that the diet of the peasantry in some parts of Europe, in which meat figures very rarely, is healthier, as well as cheaper than more elaborate fare.

Sir Rowland Hill, founder of the penny post, was a devotee of dieting experiments. He lived for many periods of three days each on not more than two articles, such as boiled green peas and salt, and damson pie and sugar.

Hops as Insomnia Cure

In Germany and France, where hops have been cultivated since the eighth century, and in other lands where they have been taken for cultivation, there is a widespread belief that insomnia may be overcome if one will use a pillow of hops as a head rest.

The essential principle in the lupulin, the yellowish powder on them, is used in household remedies as a sedative and mild hypnotic, and the fact is held up as proof that hops will help one find restful sleep.

Those who have that belief say fresh hops will help one sleep more quietly than the old hops, but so long as the hops are in good condition they are sleep producers, the old ones no less certainly than the fresh picked crop.

Original "Mausoleum"

The term "mausoleum," applied in modern times to a tomb of considerable architectural pretension, was derived from the tomb of Mausolus, a king of Caria, near the city of Halicarnassus.

When he died in 353 B. C., Artemisia, his widow, erected at Halicarnassus one of the most magnificent tombs the world has ever seen. Artemisia died before the tomb was completed, but the work was carried on by the most famous sculptors of ancient times, and became known as the masterpiece of the world.—Kansas City Star.

How Do They Celebrate?

I wonder what lawyers do to celebrate their fees. Do they buy new cars? Do wife and daughter get beautiful ropes of pearls? Do they buy annuities? Or do they just say "Thank you?"

It is absurd to think that they use them all for the upkeep of the home; or to pay for their children's educations. They could never spend their fees all on that.

How do I know? I paid my lawyer this morning.—Kansas City Times.

Disappointed

A Yankee from New England was lounging on a park bench in London when a great excitement broke out. People rushed toward the street, falling over each other in their haste to get there. "What's it all about?" asked the Yankee, starting to get up.

"Oh, mon," cried a little man, "the king is coming!" "Thunder!" said the Yankee, setting back on the bench. "I thought it was a fire."—Country Gentleman.

Self-Sufficient

She was three years old and very independent, objecting to be helped in any way. One morning she protested against having her hair brushed, saying, "I brush my own hair." And so it went on during the stages of dressing, until finally her mother exclaimed, "Edith, you don't behave! I'll spank you!"

Immediately came the report from Edna. "I 'spank myself!'"

Horse Stayed Beside Body of Dead Rider

The horse is one of the dumb animals, and many stories could be written of him. But one will suffice at the present time. This story rang through the world some years ago, for it was the tensesst time of the World war, and the incident was on a bitterly-contested battlefield.

During the fighting, at Loos, the men in the trenches observed, to their great astonishment, a riderless horse standing out in No Man's land, between the lines of the hill breezes—William stood there. At last some men crept out of their trench and crawled to the horse. The animal was unharmed, but it was standing guard over its master. The gallant lad who had ridden it and tended it lay stretched in death at its feet, and all around it were the mounds of earth, and shells had failed to shake the constancy and affection of this faithful steed.

"The horse who went out to see could not get it away from its charge, but returned to their trench and told the moving tale. Then other men, who understood the way of horses, crawled through the deadly area. They blindfolded the horse, and at last, when it could no longer see the form it had loved, the animal was content to be led away to food and safety."

No Mundane Thoughts for the Sabbath Day

The gloomy and depressing atmosphere of the Sabbath that remained long from the days of the Puritan has largely died out in America. People no longer believe that happiness is to be found in the seclusion of a cell, however, the sterner view still holds.

William MacCallum lived with his family on a farm near the village. On Sunday he was wont to stride with his long-legged son, James, over the four miles of road between the two parts of the farm, followed in the cart.

One Sunday—an unusually fine Sunday, when the air was filled with the strength of the hill breezes—William and James were swinging gravely along on their way to the kirk. For three miles their mouths were shut in solemn silence.

"The delight of living got the better of the son's decorum and he said soberly, sniffing the air, 'Tis a bit aobery.'"

The father turned on him in righteous offense: "'Tis thea a deo to be talkin' o' dees!'"—Kansas City Star.

Just Blokes Dancing

There is a lot of posing and make-believe about art, but it is rarely that the artist, and never the really great artist, who is guilty of it. He leaves that sort of thing to the half-educated and the great pretender.

"Just Blokes Dancing" is a picture of an ecstatic lady who was admiring the artist's presence one of his pictures which represented several classical figures frisking about in a green glade.

"Oh, Mr. Sargent," she giggled, "tell me, what does it mean?" "Just Blokes Dancing," replied Sargent gravely.—Youth's Companion.

The Artist's Alibi

The teacher had spent nearly an hour on the drawing lesson that morning. Explaining to the class why, line, she had painstakingly drawn a dog on the black board. Then, after talking with the children about dogs they had seen, they were told to draw one.

"The little folks not busy with their pencils at once, and the teacher began to walk around the room, criticizing the work. She stopped beside a little boy whose drawing resembled any celebrator but a dog, and she said: 'Albert, what is that? It looks like a boy. I asked you to draw a dog.'"

"Well," replied the boy, "that's the Boss. He's calling Saubs, but he hasn't come yet."

Famous Old Status

The "Victory of Samothrace" can be dated at about the end of the Fourth century. It was found in 1863, broken into a multitude of fragments which were put together by the artist.

"There are," says F. B. Tarbell, "no modern pieces except in the wings. The statue stood on a pedestal having which is simply fresh. The original pedestal."

"The Victory now stands on her original pedestal."

Mah-Jongg Old Game

One explanation of the name "Mah-Jongg" is that Mah was the name of a distinguished Chinese military commander who lived centuries ago. The Jongg merely means general. General Mah commanded troops guarding the frontiers of the empire.

"The game was given its title soldiers something to do to keep them out of mischief. Since his time it has been adapted and revised, and upon the Chinese legend of Nungpo, who added more pieces, making the present total of 136."

TEAM WORK HELPS TO WIN

Your stock of merchandise, Mr. Merchant, plus the valuable aid we can give you, through our ability to place your wares before more than 95 per cent of the people of the entire Genesee section each week, is team work that will result much to your benefit by increasing, materially, your sales during the coming winter months.

Let's Get Together

Farmers, townsmen and merchants and make this the biggest and best year this section has experienced for many years.

It Can Be Done! The News

THE YEAR 1926 IN AGRICULTURE

Extracts From Annual Report by Secretary of Agriculture, Wm. M. Jardine.

FURTHER moderate improvement in the agricultural situation as a whole has taken place during the last year. Certain regions have suffered reverses, notably the cotton states, whose principal crop, produced in exceptional abundance, is selling at very low prices.

Parts of the spring-wheat states have harvested a poor crop. Generally speaking, however, the position of agriculture is better now than it has been in any year since 1920. Livestock raisers, dairymen, and winter-wheat growers have earned good returns, and underlying conditions in the corn belt have improved.

The year, in short, has been similar to the last few years in that it has seen marked but not uniform improvement in agricultural conditions.

Since the depression period of 1920-21 every agricultural section of the country and every important branch of agriculture have made progress. Recovery has not been uninterrupted; nor, as I have indicated, have all groups of producers shared in it equally. Nevertheless, the gain has been substantial.

For the crop year 1925-26 the net income of the agricultural industry as a unit is estimated at about \$2,757,000,000, or 4 per cent more than for the crop year 1924-25. In the same period the net return on the value of the capital invested in agriculture was about 4.6 per cent, compared with 3.1 per cent in the crop year 1923-24 and only .6 per cent in the crop year 1920-21.

Unfortunately, the recent slump in cotton prices makes it doubtful whether the crop year 1925-26 will carry forward the story of improvement at the rate established in the last few years. An average price of about 18 cents a pound for the estimated cotton crop would be necessary to yield the cotton states an income equal to that of last year.

Recently wheat farmers produced 382,000,000 bushels, and for what they sold they received an average price of \$1.23 a bushel. In 1925, with a crop of only 669,000,000 bushels, the average price

was \$1.46 a bushel. This year high yields in many states will compensate most farmers for the drop in the price.

In the corn belt conditions are now somewhat more favorable than they have been for several years. There is a tendency toward a better balance between corn production and hog production, and therefore between corn prices and hog prices. Although there is no undue surplus of corn, which already holds that American industry is outgrowing tariff protection.

It would be in the highest degree unwise for farmers at this time to launch an attack on the tariff without carefully considering the possibility that in the near future they may need it more than any other economic group in the country. I have said that I can not venture a guess as to where the balance of advantage lies between agriculture and industry at this moment in regard to tariff advantages. That is a point that can only be settled by detailed expert analysis of tariff schedules and commodity prices. I firmly believe, moreover, that in every possible way the tariff should be made equitable as between agriculture and industry. Nevertheless, I am obliged to dissent against the doctrine that the tariff is of no benefit to the farmer at the present time; and I am still more strongly convinced that the relative advantage of tariff protection as between agriculture and industry. Nevertheless, I am obliged to dissent against the doctrine that the tariff is of no benefit to the farmer at the present time; and I am still more strongly convinced that the relative advantage of tariff protection as between agriculture and industry.

The sheep industry is enjoying its fifth consecutive prosperous year. It is apparently still expanding. Prices for wool and lambs at present are perhaps not high enough to encourage continued expansion of the sheep industry, except in areas especially suited to it. They are high enough, however, to justify the statement that the sheep industry as a whole is in a very satisfactory condition. It is a favorable augury that wool stocks of old wool were reduced to a low point at the end of last season.

On the whole the dairy industry has been in a relatively favorable position since 1921. Its products did not suffer as great a slump in prices during the depression as those of the grain and stock industries and did not remain depressed so long. Comparatively low prices caused some apprehension among dairymen in 1924. Last year, however, the markets for dairy products began to reflect a better balance in production, and this year dairymen in the East and North have had fairly good returns.

In the far West the present year has been one of continued improvement on the whole. The Pacific coast had an early and favorable crop season in contrast with the East and has done reasonably well with grain, stock, truck crops, and citrus fruits, but apples, peaches, and peaches have been low in price.

The Tariff and the Farmer. It will help us to estimate the significance of the tariff in relation to agriculture if we consider not only the surplus in export trade but also the price for the domestic supply as well. This, of course, is a truism. Frequently, however, its full application to agriculture is overlooked. It is commonly assumed that agriculture is the only American industry operating largely in foreign markets. Manufactures, on the other hand, are dependent on world conditions, is believed to be getting the last possible ounce of benefit from the tariff, unaffected by the difficulty of disposing of its surplus.

This may have been largely true in the past. Even today industry does a smaller proportion of its business abroad than does agriculture. In the near future, however, the position may be reversed. American agriculture is moving steadily toward a position in foreign markets. Manufactures will absorb more and more of its total production, whereas industry, on the other hand, is becoming increasingly dependent on export sales. In a comparatively short time agriculture is largely in foreign markets. Manufactures, on the other hand, are dependent on world conditions, is believed to be getting the last possible ounce of benefit from the tariff, unaffected by the difficulty of disposing of its surplus.

The first application of loud speaking devices to convey instructions to railroad switchtenders on the ground are those just installed at St. Paul, Minn., where a public address system is now in use for directing train movements into and out of the terminal.

The application of this new scientific device in railroad switching is said to have greatly increased efficiency of operation by expediting train movements and by reducing the time element required to move trains into and out of the terminal.

At these yards, generally termed "double bottle neck yard," fourteen switchtenders are employed during the number of movements the average 200 train movements, while a like number are used on the second shift when the number of movements is reduced to 100. Four men operate the switches during the third shift which is called upon to handle about 90 movements in and out.

In the past, signals had to be passed between the switchtenders and train drivers either by hand, voice or signal light. With the new method, however, directions are given through the voice amplification system.

Essentially, the equipment, as furnished by the Graybar Electric Com-

pany, comprises thirty-two loud speaking projectors mounted in groups at seven strategic switching centers. The demands of the users of automobiles varies in number from two to five depending on the range and area covered. In addition to the projectors in the yard, there is a desk transmitter in the yard director's office, an amplifier for increasing magnitude of the voice current, the current supply apparatus and suitable charging equipment.

Operation of the apparatus for train dispatching purposes is simple. When it is desired to make a call at a time when the yard is not extremely busy, the director throws a toggle switch to the "on" position; this cuts in the filaments and so places the system in operation. Following this he throws the transmitter key to the "on" position and makes the desired announcement. His voice amplified and the directions issue simultaneously from each of the thirty-two projectors situated at the switching centers.

During rush hours the system is left in operation at all times so that it is only necessary to throw the transmitter key to the "on" position when it is desired to make an announcement.

The application of these systems in railroad switching work is said to be creating considerable interest among railroad officials of the country.

Housework Worth \$900 a Year, but—

Nine hundred dollars a year is the value of the average housewife's services in the home, and statistics show that there are 20,700,000 women engaged in housework, according to Mrs. Leonora Z. Meder, prominent Chicago woman.

"The wife," said Mrs. Meder, "who was formerly a commissionaire of public welfare of Chicago, 'is an executive, purchasing agent, budget expert, and prover of all things. The successful housewife makes studies of food values. She arranges her budget so that the food she buys will have all the necessary body building qualities."

"The woman who would keep down her food bill will do better to spend her money on milk and green vegetables than on butter, though butter is one of the best sources of the essential food element, vitamin A. There are butter substitutes, but nothing can take the place of milk and vegetables."

"Milk,

**Curious Web of Water Spider**  
The water spider builds its home under the water. It collects air on the surface and conveys it underneath to its home. After many journeys there is sufficient air for the spider to remain below for a considerable time.

**CHURCH NOTICES**  
**Congregational Church**  
Sunday school at 9:45 a. m. Preaching service at 11 a. m. Pastor's subject, "Another Chance." This is a message especially suited to the beginning of the new year. The music is under the direction of Mrs. Herman.

**St. John's Lutheran Church**  
A. F. Wolf, Pastor  
Sunday school at 9:30 a. m. English services will be held each Sunday morning at 10:30 o'clock, with the exception of the first Sunday of each month, when German services will be held at the usual hour.

**Basketball Game**  
High School Gym.

Greetings

and may you prosper in the New Year

The Washington Water Power Company

We invite and welcome your presence. "Bring True to Our Covenant with Christ" is the Christian Endeavor theme for 7:30.

The entire membership is aiming to meet at the church Friday evening for "The King's Business," Christian fellowship and to "watch" the going and coming of the years.

**Many Hogs Shipped from Genesee**  
While hog raising has been merely a side line with most farmers in this section, yet there has been 4,310 head of the animals shipped from this station during the past calendar year, the value being \$99,160.17. This number was handled by the Genesee Union Warehouse company and these figures were obtained from Manager Frank Hoorman of that company.

**Lutheran Ladies Aid**  
The ladies aid of St. John's Lutheran church will meet in the church basement on Thursday, January 6, for their annual business meeting. All members are requested to be present.

**To My Students**  
I am far from you, but my heart is with you and you are in my thoughts. Let me wish you all a Merry Christmas and a Happy New Year. It is my desire that this blessed season be for you a most happy one. May good old Santa Claus remember you. Yours lovingly, Mrs. Hordemann. 27-1

Money to Loan on Approved farm security, 5 1/2%, 5, 7, or 10 years. C. L. Thompson, Moscow, Idaho. 49

A Satisfactory Heating Coal  
Owl Creek is one of the best heating coals to be found on the market. It holds fire over night, requiring only a slight shaking in the morning to secure a good fire.  
We also have other grades at a lower price.  
Slab and cord wood by the cord or carload.  
Standard Lumber Co. 22-14

**Legends of "Sleepy Hollow"**  
Tony Ebel is helping Joe Grieser haul straw this week.

Frank Klemm did chores for John Kluss Tuesday evening.

Sleepy Hollow wishes everyone a very Happy New Year.

Le Roy Harris stayed with George Ebel last Wednesday night.

Joe Grieser and family went to Colton for their Christmas vacation.

May Mossman is home from the U. of I. spending her vacation with the folks.

Agnes Klemm who is attending G. H. S. came home Wednesday to spend her vacation.

John Kluss and family motored to Clarkston Monday returning after a few days visit.

Now that there is plenty of snow and sleighing is good, Sleepy Hollow woke up again!

Mr. and Mrs. Matt Baumgartner and family had dinner with John Kluss and family.

Nels Wilson, teacher at the S. H. H. S., went to her home at Whitebird for her Christmas vacation.

Irene Ebel and Earl Kirnan spent Sunday at Elmwood Farm, returning to Lewiston Monday morning.

Sleepy Hollow had a cold snap. The thermometer went down to 5 degrees below. This is the coldest it has been all winter.

Word has been received from Walter Ebel, C. T. C., that he is now stationed on the U. S. S. Arizona and is now in San Pedro.

and to wish you a Happy and Prosperous NEW YEAR

**W. M. Herman**

**PERSONALS**  
Wood Gash came over from Potlatch and spent Christmas with his family. Dwight Becker of Manson, Wash., is home for the Christmas vacation days.

Mrs. H. S. Groat of Seattle arrived Friday to spend Christmas with relatives.

Miss Grace Jain and Eugene Tupper of the U. of I., are home for the holidays.

Miss Emma Schetzle left Friday for Julietta to be at home for Christmas vacation.

Miss Thelma Hanson left for Spokane where she will spend Christmas with her parents.

Miss Ethel Anderson went to Spokane where she will visit with relatives during the holidays.

Guy P. Wicks returned Monday evening after spending Christmas at his home in Moscow.

Miss Elsie Stinson of Troy is visiting at the home of her sister, Mrs. W. H. Merry, and family.

Misses Sylvia and Agnes Johnson, who are teaching near Palouse, Wash., are home for vacation days.

Dr. W. H. Ehlen left Sunday for Seattle where he will visit for a few days. He will return Saturday.

Montey Platt of Lewiston is spending his holiday vacation with his aunt, Mrs. W. R. Hickman and family.

Miss Mary Weaver left Friday for Lenore, Idaho, where she will spend Christmas vacation with her parents.

Miss McDonald and Jack Hasfurther from Spokane spent Saturday and Sunday at the Joe Hasfurther home.

Miss Jessie Keeler left Friday for Grangeville, where she will visit her parents during the Christmas holidays.

Misses Gladys and Dora McMillan of Pullman are visiting their sister, Mrs. M. Liberg, during Christmas vacation.

Fred Cann of the U. of I. is spending Christmas vacation with his sister, Mrs. Carl Omsundson, and family.

Mrs. Eliza Gray and son, Jesse, left Friday of last week for Boise for a visit with her son, Charles Gray and family.

Miss Gladys Johnson and Leon Danon, who are attending Spokane college, are spending the holidays with home folks.

Orland Mayer, who is teaching near Potlatch, is spending the Christmas vacation with his parents, Mr. and Mrs. Al. Mayer.

Hope Michelson, who is teaching at Craigmont, is home spending the holidays with her parents, Mr. and Mrs. Louis Michelson.

Miss Johanna Dwyer, who is teaching near Troy, is spending her Christmas vacation with her parents, Mr. and Mrs. Thos. Dwyer.

Miss Ruth Barnum returned to Spokane Tuesday morning after having spent Christmas with her parents, Rev. and Mrs. O. S. Barnum.

**WHAT HAPPENED HERE TWENTY YEARS AGO**  
A daughter was born to Mr. and Mrs. Ed. Taylor on Thursday of last week.

A daughter was born to Mr. and Mrs. Pat Mulalley on Thursday of last week.

John Platt is out from the Salmon river. At Spalding Monday he delivered 74 head of cattle to Frank Grier, a Moscow buyer, receiving an average price of \$29 per head for the same.

Inelement weather and muddy roads had much to do with making Christmas day a quiet one in Genesee. Throughout the day all business was suspended and the streets were deserted.

The fuel situation throughout this section is now greatly relieved. At this place there is actually coal in the bins of the dealers, not sold. Considerable wood is now in stock. The prices of coal and wood are still high.

Friday night of last week burglars entered the Edwards saloon and made away with a small quantity of liquor. In their haste they mistook a number of bottles of ketchup for spirits and no doubt their disappointment was keen when their mistake was discovered.

For some years there has been an unwritten law that those getting married in Genesee must be charivariated. Mr. and Mrs. D. C. Burr, who were married some weeks ago, had come to the belief that the custom had been abandoned, but there is where they were mistaken. On Tuesday evening the "band" called at their home in the northern part of town and favored them with a number of "selections." The members were received with a glad hand and given the best that was in the Burr home.

**Rogers-Priest Nuptials**  
A very pretty but quiet home wedding took place at the home of Mr. and Mrs. J. L. Rogers, living some six miles south of Genesee, when their daughter, Opal L. Rogers, became the bride of William F. Priest of Greenacres, Wash., at 7 o'clock Monday evening, December 27.

Only the immediate relatives of the bride were present to witness the ceremony, which was performed by Rev. N. E. Beach, pastor of the Genesee Christian church, the beautiful service of that church being used.

The bride and groom left immediately after the ceremony for Spokane and Greenacres to spend their honeymoon, the parents of Mr. Priest residing at the latter place.

The newlyweds will make their home at Pullman.

**Among the Sick**  
Mrs. Roy Patchen is sick with flu at the home of her parents, Mr. and Mrs. Arthur Hampton.

Maxine Lange, daughter of Mr. and Mrs. Sam Lange, has been quite ill with flu for the past several days.

Alfred Gehrke, son of Mr. and Mrs. Hugo Gehrke, has been quite ill with flu for several days.

The children of Mr. and Mrs. Gus Rosenau have also been ill with flu.

Miss Louise Herman is spending the winter with her cousin, Chris. Schlee, and family at Los Angeles.

When in need of high-grade perfumes I have them. Coty, Hudnot and others. The price is not high but the quality speaks for itself.

**GRANT CLARK**

**Uniontown Harness and Shoe Shop**  
COMPLETE LINE OF HARNESS, COLLARS, SADDLES, WHIPS, HORSE BLANKETS AND ROBES  
ALL KINDS OF REPAIRING DONE AT REASONABLE PRICES  
ALL WORK GUARANTEED  
"THE PLACE TO DO YOUR BUYING"  
Also a Complete Line of Work Shoes and Hand-Sewed Russel Gloves.  
We Do All Kinds of Shoe Repairing.  
**Geo. J. Fuchs, Prop.**  
Uniontown, Wash.

**Wishing You a Happy and Prosperous New Year**  
**The City Market**

**Y. P. L. Has Good Time**  
A real holiday time was had at the parish hall of the Genesee Valley Lutheran church on Wednesday night when a large crowd gathered for a good time. The evening's entertainment was under the auspices of the Young People's Luther League and a splendid program was rendered, games were played and gifts exchanged and on the whole it was a very pleasant evening well spent.

**Merchants Enjoy Good Trade**  
This Christmas season has perhaps been one of the best from a trade standpoint that local merchants have experienced for many years and most of them have expressed themselves as very well satisfied with their volume of business—and the nice part of it is that most of it was cash, showing that the good people of this section have fared well.

**Couldn't Be**  
"A good husband should give his wife all the money she wants."  
"There ain't that much money."

**The Cynic**  
A cynic is a man who pretends to be tired of the world, but in reality he is a man of whom the world is tired.

1927  
**Greetings**  
To Our Friends and Patrons

We desire to thank you for your liberal patronage during the past month; for the opportunity you have given us to render you service --- and we wish you, one and all, the fullest measure of health, wealth and prosperity for the NEW YEAR.

**Follett Mercantile Co.**  
We Deliver

# Some German Christmas Customs

BY FREDERICK W. MEINERT  
 MANY OF THE CHRISTMAS customs and superstitions are of pagan origin and center around the pagan god Woden, represented in German mythology as the one-eyed god of the heavenly realm. He was also the god of all earthly blessings, who allured from the soil its annual harvest. He blessed the fields, dispensed rain and dew for the growth of the crops, and was the god of the destiny of man. Hence every spring when the fields were cultivated and after every harvest in the fall sacrifices were offered to him. His helmet was Berchta or Holsa (Frau Holle) the goddess of the earth, who shared in all the activities and honor of her spouse.

The time after the fall harvest and the sowing of the winter grains, when the people had a great deal of leisure, was devoted to the god Woden. The climax of the harvest festivals came at the time of the winter solstice—around December 25—when the sun had reached its northernmost limit and began its southern course. At the time of the winter solstice in nature by the increasing rays of the sun preparatory to the spring planting. The name given to this winter solstice festival was the "Yule" and was celebrated in Scandinavia, the countries and Scotland for Christmas. The time of the twelve days was known as the Twelve Nights, was dedicated to Woden and regarded as especially sacred and holy. During this period Woden with his broad storm hat pressed over his face and clad in steel blue mantle rode throughout the land on his eight-legged white charger Sleipnir. He was accompanied by his helpers Berchta and the twelve lesser gods. He was also the god of the winds and whenever a storm raged, Woden was on his chase, so the peasants said.

At the Yule festival it was customary to bring into the house a large log of oak wood or log—usually a stump or root—and bury it in the open hearth leaving only the top exposed. This feature was kindled by the pure flame of the newly born sun, changing it slowly to coals and ashes, which were used to fertilize the soil or cast to the fields. The burning of the Yule log on Christmas Day in many countries at the present day is a relic of this old Germanic pagan festival.

The twelve nights was a time of the cessation of all strife and quarrels. No courts were in session. How admirably this custom befitted the words which Christ was named: "Peace on earth, good will toward men." During these sacred twelve days no work was undertaken, especially spinning, weaving, mending, or any other kind of work. Berchta, the goddess ruling over the hearth and

home. Those who spun during these sacred days would spur be afflicted with sickness during the year. On St. Dismas's Day, January 7, spinning could be resumed with impunity. Many of the customs and beliefs have been preserved in German peasant homes at the present time. The Yule children are shown the man in the moon everlastingly condemned to wander in the sky. The custom of placing up fir twigs on Christmas Eve as food for cattle. In Obersteiermark (Upper Styria) if the horse has not been thoroughly swept and cleaned on Christmas Eve, the goddess Berchta will cut open the lazy maid's stomach and fill it with rubbish. For this purpose she always carries a broom, needles and scissors. In Lower Styria the belief is current that if the house is not perfectly clean at Christmas time a child will die or disappear from the house. In the night of the Berchta steals into the kitchen and if everything is not in perfect order, she will overturn the household. No change must be made in the household furniture at this time. As often as a table is moved from its place, so often will it thunder in the night. The custom of eating the solemn quietude of these days, especially by the slamming of doors, will be struck by lightning the coming summer.

No doubt the old Germanic Yule feasts were attended by a certain amount of carousing and drinking, as is the custom in some countries at the present day where they have been preserved. This feature prompted certain irreverent philologists of the sixteenth century to derive the word "Weihnacht" from "Weinnacht" meaning "wine night." The principal feature of the Yule feast was the "hastily prepared boar's head, which was brought steaming hot upon the dinner table, a custom still common in England and in Upper Germany. It is still customary on Christmas Day to eat the head of a hog and lung sausage with green cabbage. In North German Christmas Eve the custom is to eat the "Yule head" meaning "full belly evening," on account of the sumptuous meal prepared for the family and servants. This was enjoyed by the children, and they were allowed at this meal to help themselves and eat all they desired. This explains the children's wish: "O wend' dich erst ab Abend kum, da der weihnachtliche Abend." The twelve nights was a time of the cessation of all strife and quarrels. No courts were in session. the modern Christmas tree in the customs of the early Greeks and Romans. Still others believe that it is a relic of the pagan customs of the old Germanic people.

The Bescherung  
 "THE Yule is long and numbers many days in which people can treat one another in a friendly way; but the Germans like having one special day prescribed for their pleasant custom. Therefore they excel other nations in the custom of making Christmas presents." Thus the author of "Die Bescherung" in 1855 described this beautiful custom, which at the present time is quite universal among all the Christian nations. The Germans seem to be the only people who have a special word for the language to designate this feature of the Christmas celebration; they call it "die Bescherung"; it means the more or less formal distribution of Christmas gifts, and usually takes place at six o'clock on Christmas Eve. All the rooms have been decorated with wreaths and evergreen. For several days previous the room containing the Christmas tree has been closed to all members of the family except "die Mutter," who is still busy with the final preparations of the tree. Relatives, friends, and guests in festive attire are assembled with the family, including the servants. Grandfather reads the story of Christ's birth from one of the Gospels. All join in singing: "O du Heiliche, o du selige!" and "Stille Nacht, heilige Nacht." Six o'clock is approaching; the rooms are darkened. Suddenly a bell is heard, the large swinging doors open and behold, the brilliantly lighted Christmas tree in all its splendor! The presents are all neatly arranged beneath the tree or on tables beside it. With one accord they all shout: "Froehliche Weihnachten!" Everybody congratulates and kisses everybody else and the Christmas festival, the happiest of all the year, has been inaugurated.

**HAWAIIAN PINEAPPLE PUDDINGS ARE DELICIOUS**

Crushed Hawaiian pineapple. Sprinkle top of pudding with crushed pineapple. Whether your holiday treat comes from the door of a country farm house, or the window of a city apartment, it is a symbol of welcome for the Christmas dinner.

You want your pudding, like your dinner, to be suggestive, perhaps of the Christmas dinner of long-ago, so that the old-fashioned spirit of a jolly, merry Christmas will be revived. Yet you want something a little different too, to make your dinner distinctive, and to keep the times modern.

Pineapple in the holiday pudding adds the piquant taste of something different, and yet combines deliciously with the pudding you have always liked best. Plum pudding, for instance, will have a detectable richness which makes old English plum puddings famous the world over, if pineapple is added to the other good ingredients that go into the makings of it. The new "plum" deliciousness is called Hawaiian plum pudding.

To make it, mix and sift one cup flour, teaspoon soda, eighth teaspoon nutmeg, eighth teaspoon allspice, half teaspoon cinnamon, California walnuts cut in pieces, and contents medium can crushed Hawaiian pineapple, drained, one cup grated raw potato, half teaspoon lemon rind and two tablespoons melted fat. Pour into greased mold, cover and steam about three hours. Serve hot.

Another favorite in new form is pineapple cottage pudding. Split a cottage pudding into two halves and spread between one half can of

**Corn Casserole Dishes**

There is no better ingredient for a savory, tempting-looking casserole dish than corn. A can of corn, alone with seasoning, or in combination with other foods, makes a delicious casserole.

**CURRIED CORN**— Chop 2 small onions, brown in a heating tablespoon of butter in a casserole. Stir in a heating tablespoon flour, half tablespoon cup powder, cup of gray or soup stock and simmer ten minutes. Stir in a can of corn and bake in covered casserole for half an hour.

**CASSEROLE OF CORN AND PEAS**— A can of corn and 2 cans of peas, one a half cup of bread crumbs, four tablespoons butter, doreen and a half oysters. Put the corn, peas and butter in layers in greased casserole, canned tomatoes or tomato puree, may form another layer. Top with buttered bread crumbs, bake twenty minutes.

**TUBBY**

OH, BOO-HOO! I WISH HADN'T GIVEN AWAY TO LUCY JONES SO SHE'D LIKE ME BETTER. SHE DOES THAT OLE Sissy SMITH— OOH, BOO-HOO, I DON'T KNOW WHAT TO DO WITH OUT HIM

I'M GONNA GO BACK TO HER HOUSE AN MAKE HER LOVE BACK TO ME. SHE BEES HE'S STILL TIED TO THE FLOT BOBBY KNOW WHERE I LEFT HIM FOR HER.

HUH?

I'LL NEVER GIVE YOU AWAY AGIN, HANK— SHE'S AIN'T WORTH IT, AN I DON' CARE NOW THAT I GOT YOU BACK, IF SHE NEVER LIVES ME

**A Nation of Telephones**  
A third transcontinental long distance telephone will be completed shortly after the first of the year. The first, or central line, was opened to San Francisco in 1915. The second or southern line, was built to Los Angeles about two years ago; now the third, or northern line, terminates in the Pacific Northwest.  
Transcontinental service will not be at the mercy of storms in any one section of the country. This is simply another link in the network of telephone wires which make a neighborhood of this nation. No other country has a service which can begin to compare with our unified system, which has made the telephone so common in the United States that nearly every family has one and any child can use it.  
Advertisers ask you to trade with them.

### THE PICTURE SHOWS

**"The Hidden Way"**  
The feature film at the Hotel theater for Saturday night, January 1, will be "The Hidden Way."  
Mary Carr, the much loved screen mother, carries the featured role in the screen version of "The Hidden Way," the part being that of a trusting woman whose faith brings three crooks out of the error of their ways.  
The three are discharged prisoners who plan to defraud the kindly woman who has taken them in and fed them. Her goodness overcomes the evilness of their natures and in the end, the bitterest of the three risks conviction to another jail sentence for her sake.

**"Across the Pacific"**  
The main picture at the Hotel theater for Sunday night, January 2, will be one of those always interesting and entertaining South Sea isle pictures that are sure to please, with Monte Blue in the leading role.  
Watch the boards in front of the theater for further information.

**"High Steppers"**  
The feature picture at the Hotel theater for Wednesday night, January 5, will be "High Steppers," with beautiful Mary Astor and Lloyd Hughes in the leading roles.  
The road that leads down into Chinatown rounds with the heels of high steppers—  
—he had stepped high and fast and now that he was losing her, the boy who had sung the anthem of riotous youth took up the battle cry of a man fighting for love. It's a long fight up the road because he had slipped so far down.

"Where Quality Counts"

**C. E. BOLLES, Prop. MOSCOW, IDAHO**

**Utility Regulation**  
The idea is being constantly stressed that the greatest function of state regulation of public utilities is to do away with unnecessary duplication of services. Eliminating waste has resulted from state regulation which reduces and prevents useless competition between water lines, electric, steam and motor services. Competition that eventuates in good public service is always desirable—destructive competition that eventuates in ruin to investments is never allowable.

Some of the leading railroad systems of the east are making use of electric, truck and bus lines for profitable operation of extensions and feeders for larger systems, and asking protection for traffic they have built up by years of service and investment and expenditure of vast sums of money.

To any fair minded American business man, there can be nothing wrong in state regulation with these objects in view, and existing transportation systems have a right to be protected against destructive and wasteful competition of any kind.

**Shot Coyote in Kendrick**  
Kendrick still has earmarks of the wild and woolly west. Last Saturday afternoon some hounds drove a coyote into the barn at the Kester Dammarell place just across the street from the Kendrick school house. Arlos Crocker saw the coyote and called Ernest Clem who killed it with a shot from his rifle. This is the second coyote he has killed within the town limits of Kendrick.—Kendrick Gazette.

MOSCOW, IDAHO

THE UNIVERSAL CAR

## Authorized Sales and Service

### Cold Weather Suggestions

- 1-Heater at \$1.90
- 2-Drain crankcase every 350 miles in winter on account gasoline dilution.
- 3-Alcohol in radiator
- 4-Auto windshield swipe for snow or rain
- 5-Keep the battery fully charged
- 6-Always have chains in car
- 7-Keep brakes adjusted
- 8-Use good rubber--don't change tires this weather
- 9-Set of new spark plugs to insure complete combustion
- 10-Open garage doors before starting--there is danger of asphyxiation
- 11-Take no chances on these roads--drive carefully
