LOWER AUTO LICENSE FEE TO BE CONSIDERED AT BOISE

NO. 29

Undoubtedly a bill will be presented to the present session of the Idaho als have been heard during the past While his salary stopped December month, and the idea seems to prevail

> There are arguments, both in favor fee would place more cars on the highways and thereby increase the revenue from gas sales; and further it would place the burden of highway construction and maintenance upon

> A lower vehicle license would also it rightfully belongs.

At the present time, with the higher motor vehicle license fee and no other taxes levied against motor vehicles, the numerous highway districts receive a large portion of such fees, which by law, is supposed to be used for sinking fund purposes only. If the highway districts were thus deprived of revenue upon which was anticipated the amount of bonds any district could sell, they would be unable in many instances to redeem outstanding obligations and would necessitate a part of the personal tax being returned to highway taxing units, or employ another alternative, and turn the matter of highways over to the state and permit the departand means of paying interest and creating sinking funds for the various districts. Today, the bureau of highways in the department of public works, has some supervision over

districts. Should the legislature pass a measure to lower license fees it certainly will not handicap the lesser highway

Water Power

THE HIGH COST OF "FREE" HOT WATER Don't fool yourself!....because you don't get a hot water bill every month don't think your hot water costs nothing! Putting water coils in your furnace is only robbing Peter to pay Paul and inviting trouble In a test conducted by B. H. Steele, while Professor of Physics at the State College of Washington, it was demonstrated that:

It actually costs you more, in increased fuel con-

sumption, figuring coal at only \$10 a ton, to heat

water in your furnace than to have hot water in

abundance from an automatic electric water

Your furnace was not intended to be a hot

water plant. Why impair its efficiency....go to

the cost of an extra hot water installation....

The lowest of electric water heating rates are

yours through the Washington WaterPower

and increase the cost of your hot water?

Ironing Day"

AT this new low price you can't afford to be without the Coleman Instant-Gas Iron. With it you can do your work better, do it easier and do it faster . . . cut ironing time one-third!

The Coleman lights instantly ... no waiting. Has Roto-Type Generator with cleaning needle which can be operated while burning. Makes and burns its own gas from regular motor fuel.

Use your Coleman anywhere . . . in the coolest room, or out on the porch. Pointed at both ends. . . forward and backward strokes give the same wrinkle-proof results. The point is always hot. Tapered sole - plate, which makes it easy to iron around buttons, under pleats and along seams. Beautifully finished in blue porcelain enamel and gleaming nickel

Hayden Right on Weather. Lester Hayden must be given credit for his prediction of weather for February, for he has come closer, in fact Entered at the Postoffice at Genesee he hit it exactly, in predicting weather for our shortest month. He has taken the lead over "X. Y. Z." of Lewiston, the latter offering the information during recent weeks that spring was soon to arrive. This leads one to believe that spring and prosperity are just around the corner, and this gives further rise to the conjec-

THE INSTANT-GAS IRON "Smooths the Way on Ironing Day". Saves time, work, and clothes. Lights instantly... no waiting. Has Roto-Type Generator with cleaning needle which can be operated while iron is burning. Double-pointed ... same perfect results on forward and backward strokes. Tapered ironing base makes it easy to iron under buttons. Use it anywhere ... no cords or wires.

INSTANT-GAS APPLIANCES

THE SPORT-LITE LANTERN - It's an instantlighting... single mantle type. Just the light for any camping trip or outdoor task. Small in size but big in brilliance. Weighs only 3 lbs., yet gives up to 150 candlepower of pure white light. Pyrex glass globe protects mantle. Has built-in pump and many features of larger lanterns. It's a Double-Duty lantern for use indoors or out. THE NO. 10 CAMP STOVE-

Just the stove for camp cooking and general utility purposes. It's a miniature gas range ... always ready to cook "good eats". Wind baffles protect cooking flame. Windproof, gray cast iron burner caps, won't burn out Hot-blast preheater quickly generates stove to full cooking heat. One quart fuel tank ... two hours' supply for both burners . . . easily removed for filling. Everything packed inside for carrying. Handsomely finished in maroon-brown baked-on enamel.

Henry Ford Dearborn, Nich.

May 9, 1933

A great thing has occurred amongst us. We have made a complete turn-around, and at last America's face is toward the future.

Three years --- 1929 to 1932 --- we Americans looked backward. All our old financial and political machinery was geared to pull us out of the depression by the same door through which we entered. We thought it simply a case of going back the way we came. It failed. We now realize that the way out is forward---through it.

Thanks for that belongs to President Roosevelt. Inauguration Day he turned the Ship of State around. Having observed the failure of sincere efforts to haul us back the way we came, he designed a new method --- new political and financial machinery --- to pull us out the way we are going --- forward. He is clearing international obstacles out of the way; he does not stand in awe of tariffs. The people begin to feel that he does not take advice from the "interests"; that he has courage and loyalty to work for one supreme interest only --- the welfare of the American people. That is a big achievement for two months in office.

And now we all look to what is coming; we grow less and less concerned with what is behind. We are looking for a hand-hold on the haul rope. Every man wants to do what he can, and all he can.

The best thing I can do for the Country is to create industry by building good motor cars. If I knew anything better to do, I would do it. Industry must be my contribution. Motor cars must face ahead to the future, like everything else. They are so much a part of the Nation's daily life that if they lag behind they hold the Country back.

Henry Good

put forth by the moon,' and states, temperance. 'The sun for light and heat, and the moon for signs, seasons and times? The Psalms of David, He hath appointed the moon for seasons.' EXPLAINED BY UNIVERSIT

(Continued from First Page) xtension of new credit and an elastic monetary system.

Operation Requires Time "First steps in the operation of the aw cannot be exactly stated with full ssurance, but a general idea of the rogressive movements which should soon take place may be given. State ouncils for commodity control and idjustments, acting as official arms of the federal service, will be set up it once. The agricultural extension system and state statisticians will be presented thereon. These commitween the headquarters at Washington and the individual farmers, and in a large degree the actual field supervision will be handled by farmers in thier own congressional districts. Simultaneuosly, commodity committees of the department at Washington will gather tentative data and lay preliminary plans on contracts and adjustments. These will be rapidly submitted to special commodity hearings where farmers and market authorities will be asked to state their views. During this interval the public will be kept well informed on the points of the law and its workings by means of all the modern methods of widespread communication. Secretary Wallace insists that the public must

oluntary cooperation may be se-"Decision regarding methods to be followed in applying the optional provisions of the production control secions of the law will be made by Secetary Wallace after the commodity hearings. Insurance Installment Plan

D UE TO Depressed Conditions we have arranged for a FIRE INSURANCE PREMIUM PLAN in order to enable the public to continue with their Fire Insurance Protection Now, More than Ever Before, this Protection is Necessary, since a fire loss would stop operations for a good many who do not have insurance.

Do not be without Insurance . . . Come in and we will be glad to discuss this plan with you.

May 15, 1933

Time and again I am told---by my own organization and by others --- that I penalize myself by quality.

Friendly critics protest our putting into the Ford V-8 what they call "twenty-year steel." They say such quality is not necessary; the public does not expect it; and that the public does not know the difference anyway.

But I know the difference.

I know that the car a man sees is not the car he drives-he drives the car which the engineer sees. The car which is seen, comprises beauty of design, color and attractive accessories, --- all desirable, of course. The best evidence that we think so is that they are all found on the Ford V-8.

But these are not the car. The car proper, which is the basis of all the rest, is the type of engine and its reliability; the structure of chassis and body, ruggedly durable; the long thought and experiment given to safety factors; the steady development of comfort, convenience and economy. These make the car.

A car can be built that will last two or three years. But we have never built one. We want the basic material of our car to be as dependable the day it is discarded as the day it is bought. Ford cars built 15 years ago are still on the road. It costs more to build a durable car--but two items we do not skimp are cost and conscience. A great many things could "get by"----the public would never know the difference. But we would know.

The new Ford V-8 is a car that I endorse without any hesitancy. I know what is in it. I trust our whole thirty years' reputation with it. It is even better than our previous V-8. It is larger,

more rugged and mechanically a better job all round. I readily say this in an advertisement because I know the car will

DAY OR NIGHT

LIGHT UP!

Your eyesight is worth it

Are you practising the false economy of going without adequate illumination in your home?

Some people are. They have acquired the habit of switching off lights on the slightest pretext, "must save money, you know".

So they squint at newspapers and magazines in the almost impenetrable gloom ...not realizing that they are sacrificing their PRICELESS eyesight in order to save a few pennies a day.

Lighing with electricity is CHEAP. Just that. The average home can be amply illuminated for 4 cents a day....and for ten cents a day for lighting....well you'd be surprised at the change in your home ... because adequate lighting saves eyesight, improves dispositions....LIGHT IS CHEERFUL.

Is it worth as much as a package of cigarettes a day?

Kenry Ford Dearborn, Mich.

May 22, 1933

I suppose that I may claim to be the first Ford Dealer. I not only made cars, but sold them and frequently delivered them myself. The "drive away" is not new; often I have driven cars from Detroit

to towns in Ohio or Indiana or Michigan to make delivery. There were no good roads in those days, and the people where I

drove had never seen a motor car before. My first really enthusiastic customers were Country Doctors. They were the first to realize the value of dependable transportation to a

widely scattered practice. Even today I occasionally hear from some of those first Ford users. We had to teach local mechanics how to care for the cars. That is how Ford Service began, which is now found everywhere in the world.

We believed from the beginning that a sale does not complete our transaction with our customer -- it creates upon us an obligation to see that our customer's car gives him service. Ford Dealers know their duty to the public in this respect.

I can say of Ford Dealers generally that they have been and are men of character and standing in their communities. Most of them have been with us many years, which indicates that we agree on basic business principles. The Company provides that the methods used to sell the Ford car are consistent with the self-respect of the Dealers

The present Ford V-8 is the peak of our 30 years experience. We have never made a better car. Its eight-cylinder engine is powerful and smooth running. The car is admittedly very good looking and has comfortable riding qualities. It is economical in operation because of advanced engine design and low car weight. It is the fastest, roomiest and most powerful car we have ever built.

Insurance Installment Plan

D UE TO Depressed Conditions we have arranged for a FIRE INSURANCE PREMIUM PLAN in order to enable the public to continue with their Fire Insurance Protection . . . Now, More than Ever Before, this Protection is Necessary, since a fire loss would stop operations for a good many who do not have insurance.

Do not be without Insurance . . . Come in and we will be glad to discuss this plan with you.

level. The chickens are to be known as "Vandenburgians" and the breeding stock was developed from the The News welcomes reports of all well-known Plymouth Rock strain, ball games in the local leagues, and while it is difficult to get them, we Storekeepers and housewives, alike, do not hesitate to ask that managers

will welcome the "side-hill" egg for make an effort to turn in the box it will not roll around when placed score at least. There is considerable on a counter or table, and according interest being manifested, and as the to Mr. Vandenburg, the newly develseason advances this interest will insell the commodity and those who make use of such in the kitchen.

Mr. Vandenburg, is also designing a special crate or carrier for his new idea in eggs. This is requiring some time and a lot of thinking, but ingenuity is to be rewarded, and shortly it is expected that the cartons will be in process of manufacture. Local stores have not contracted for this new product, as it is to be distributed first in the east where the depression is supposed to have started. The depression on the egg's surface, while very prominent, should meet with approval by the huge chain stores, as "side-hill" eggs contain less than the egg which we have been accustomed

Mr. Vandenburg relates that his "side-hill" was the result of much study, and further that he had not been spending his time in idleness, such as certain weather prognosticators, who live within a stone's throw or two or more from his home. He was unwilling to mention the names of those in question, but intimated reference to Messrs. Hayden and Sul-

First Building North of Fickens' Blacksmith Shop

Having served you for a number of years as employees of our own shop, and will extend ourselves to meet every requirement in the line of repairing and overhauling. We trust that our workmanship and prompt delivery of work will merit your patronage and good will.

All New Equipment and Tools

Remember that no job is too large or too small to receive our personal attention, whether it be a large overhaul job or a mere adjustment.

Service and Workmanship that will Please You

We believe our experience in our lines justifies the opening of this new repair shop, and that mutual benefits will result. It is well to remember also, that we will specialize in overhauling and repairing of combines and combine motors.

WOMEN'S CONTRIBUTION TO THE MOTOR CAR

There is some doubt that people care to hear very much about what goes on under the hoods of their cars.

The driver knows that "driving qualities" are not accidental; they are put there. How the manufacturer creates or evolves those results may not interest him. He judges entirely by the results he gets in

Well, it is not essential to talk "shop"; let us talk Results. Smoothness. Drive the Ford V-8 and you will find that the engine runs with surpassing smoothness, due to its design and the extra precise methods of its manufacture.

Power. There it is, 75 horsepower (we could say 80) at the driveshaft for the driver's use. With less weight to pull around, the mettle of this car---its life-like response---is rather remarkable.

Economy. Our V-8 develops more power on a gallon of gasoline than any car we have made. Mileage is partly a matter of individual driving, but under average conditions the Ford V-8 does 17 to 20 miles a gallon. Of course, car economy is not only a matter of fuel. Ford V-8 has that too, but it is also economical in the complete sense---initial cost,

operation, maintenance. Appearance. This is woman's contribution. The motor car must not only be useful, but also good-looking. View the Ford V-8 and you will not need our comment on its fine appearance.

Comfort. This also is woman's concern. In 30 years she changed the motor car from a wagon to a coach. Comfort is a quality made up of numerous ingredients. There is no comfort without a quiet, smoothrunning engine. We have all the other ingredients too, --- color, good taste, quality, ease, safety, roominess and convenience.

LOW PRICE CARS VS. CHEAP CARS

We do not build a low-price car: the cost to us of building our car

is pretty high.

But we do sell a high quality car at a low price. Almost every new Ford V-8 car we have built so far this year, has cost more to manufacture than its selling price was. As you buy them at only \$490 to \$610, we have to depend on increasing volume to make up the difference. The reason for this is simple: -- a manufacturer who gives good value

must expect to lose money on the first cars he sells because he cannot charge all his costs to the people who are first to buy.

But with the purchaser it is different — he cannot afford to lose anything on a car. It must give him full value from the first, and keep

Two things make possible our combination of low prices and high cost on giving him full value for years.

quality: 1. Volume Production

First, we set our price at what would be fair to the public on the basis of economies we enjoy in volume production. Then, in order to justify and

maintain our low price we must get volume sales. Thus it comes that a car which is really high-cost to make, is also

There is a difference between a cheap car and a low-priced high

Ford prices are always fixed at a point which makes it profitable for a

Good and lasting business must produce profit to the buyer as well as to the seller. And of the two, the buyer's profit must be, comparatively,

It pays us to sell the Ford V-8 because it pays you to buy it.

F. Tomlinson, Designer and Chief

We wish to stress the importance of a well-filled home medicine chest at this time of year, with farm work well under way, and the youngsters being out of school. We will be glad to assist you in the selection of necessary articles for first aid treatment and also for complete treatment of minor injuries. Having the supplies on hand often save a trip to your town when you are rushed for time. Our prescription department is not to be excelled anywhere.

June 19, 1933

A COMPANY THIRTY YEARS OLD

Last Friday the Ford Motor Company completed 30 years of automobile

It is also my fortieth year at the same job. I made my first engine in 1893, and it still runs. This is the engine that won the Selden Patent Suit---which took the motor car out of the exclusive class, and opened the automobile industry to hundreds of manufacturers who started during the last 30 years.

Some of the men who began with me that June day in 1903, are working here yet. All of the principles we laid down then, are still operative; we find that they have great survival value for the future. To date they have produced and sold over 21,000,000 Ford cars.

Although we created the automobile market we have never thought it was good for anyone to monopolize it. We have always believed that before business could be good for one, it must be good for all. Our discoveries and improvements have always been open to other manufacturers without

Of course, there is one thing we cannot share--everyone must get it for himself---and that is experience. Money could duplicate our buildings and machines, but it cannot duplicate 40 years of experience. And it is experience that makes a motor car.

But the past does not especially concern me; it has all been a preparation for the future. For myself, I feel that I have just been gathering the tools to do something worth while, and that my real task is still ahead.

Great changes are upon the world. False ideas of every kind are vanishing in the general upheaval. Those who built truly on principle will survive --- their service will carry over. Business integrity and commodity honor will be fully justified. And newer and better ways of living will

That is the outlook for this young thirty-year old Company of ours.

What Makes a Safe Tire?

ARE you willing to risk your life on advertising statements claiming blowout-proof and un-blowable tires? One manufacturer blowable tires? One manufacturer gives as the reason for claiming blowout-proof tires—the use of one ply of another color—another, a patented "no breaker" construction—a mail order house, high stretch "elastic" cords, etc., etc. Actually the fundamental cause of a tire blowout is the flexing of the tire which causes friction of the fibers in the cord, resulting in heat and causing the rubber to soften and the cords to deteriorate. THE MASTERPIECE

of TIRE CONSTRUCTION There is a reason why Firestone Tires have won the 500-mile Indianapolis race for 14 consecutive years, the most gruelling tire test.

The reason is the Firestone patented extra process of Gum-Dipping which saturates every fiber and insulates every cord with pure rubber—which gives strength to the cords and prevents friction and heat in the

Gum-Dipped Tires and not a single driver had any tire trouble. Race drivers know why Firestone Gum-Dipped Tires are safer and not subject to blowout and will not risk their lives on ordinary tires. Your life and the lives of your family are often in danger at the high road speeds of today and you should not take greater risks than the race drivers who make sure that they have the best and safest tires they can buy—Firestone. Come in today. We will give you a liberal trade-in allowance for your old tires on new Firestone High Speed Tires—the safest tires in the world

may acknowledge his waywardness, that does not also present some ex-Rev. A. H. Klickman, pastor of St. cuse for his sin. Indeed, the blame John's Lutheran church, last Sunday combined the words of Hammersten it has been said that the road to hell in the combined that the road to hell in th combined the words of Hammersten with his sermon topic from Lk. 14, 18-20—"And they all with one consent began to make excuse. The first said unto Him, I have bought a field, and I must needs go out and see it; I pray Thee have me excused. And another said, I have bought five yoke of oxen, and I go to prove them, I pray Thee have me excused. And another said, I have married a wife, and therefore I cannot come."

It has been said that the road to hell is paved with good intentions; we may add that the way to Heaven is barred by vain excuses. Most men are kept from God by being ensnared in the ordinary and permissible pursuits of life, such as buying and selling, the affections of the heart and household cares. Dear Friend, what excuse will you bring when you stand face to face before almighty God?

Are your great sins a valid excuse?

A How much will the living costs of the average city family be increased by this plan?

A. A specific answer cannot be made until commodity hearings are held. The adjustment benefit should ing, the affections of the heart and household cares. Dear Friend, what could have a proved with good intentions; we fix a paved with good intentions; we fix a paved with good intentions; we for the average city family be increased by this plan?

A. A specific answer cannot be made until commodity hearings are held. The adjustment benefit should ing, the affections of the heart and household cares. Dear Friend, what it. At most, it will add no more than a cent to the price of a loaf of bread, and that the void intentions; we have discovered by this plan?

A. A specific answer cannot be made until commodity hearings are held. The adjustment benefit should ing, the affections of the heart and household cares. Dear Friend, what it is paved with good intentions; we have discovered by the average city family be do by this plan?

A. A specific answer cannot end by the affections of the heaven and the provided by this plan?

A. A specific answer cannot end by the affections of the heaven and the provide "All who kept away from the supper excused themselves. Such excuses are as old as sin. Adam and Eve presented excuses when they fell into sin. It is perfectly natural for the lord. 'All things are ready.'

Are your great sins a valid excuse? Has not Jesus removed them by the sacrifice of the cross? Are your unbelief and inability to save yourself a sufficient excuse? The invitation of the Lord. 'All things are ready.' sin. It is perfectly natural for the of the Lord, 'All things are ready,' a section of the population that in the sinner to find some excuse for his disposes of that excuse. Are your best of times buys only one-fourth of sin. Even such men as Moses, Jeremiah and Jonah endeavored to excuse

earthly cares, your affections, your the industrial products of the councilling, valid excuses? Instead of betry? themselves when called by God to do
His bidding. Indeed, if their objections had not been overruled by the
grace of God, they would not have
proved to be such men as we find

The strategy and excuses: Instead of Belling, Valid them in sacred history. The rich, How trivial on that day your excuse hands of others, since farmers will young nobleman, who considered the will appear to you! I was compelled spend largely for equipment and masacrifice which the Lord demanded of to attend to this or that piece of busi- chinery that leads to expanding cirsidered the time inappropriate, very I cannot come! However, if excuses income and in farm prices leads also With the Lord there is forgiveness ary basis for industrial revival.

QUESTIONS AND ANSWERS

University of Idaho-Some of the questions asked since the passage of the emergency agricultural adjust- visors in fixing taxes? ment act are answered in a set of A. Responsible representatives of questions and answers received by the the groups engaged in the production, University of Idaho college of agri-processing and distribution of each culture from the federal department of agriculture.

modities, wheat, dairy products, and he butchers for his own family? hogs are among the basic commodities of the measure. Following are presented the answers given by the U. S. Dept. of Agriculture to some of the questions most commonly asked and bakers and storekeepers tack on concerning the working of the new the amount of the processing tax ev-

General

Q. Today we have want in the midst of plenty. What answer does the Farm Act make to that?

A. When the farmer has not the income to buy from the city, the city worker loses his job and cannot buy farm products. By creating conditions which will restore the ability of the farmer to buy from the city, one step will have been taken toward doing away with want in the cities.

Q. How do you reconcile this reduction of production with the fact that for years the U.S. Dept. of Agriculture has been urging the farmers to produce more, and showing them how

A. We have urged farmers to produce more to the acre, and have urged duce more to the acre, and have urged them as individuals to reduce their for each crop and in each area. If acres. The present bill faces the fact crops are removed this will be done as early in the growing season as posproposed by the Farm Act.

A. It is designed to give them great-

Q. How many farmers will be helped by the plan?

A. When action on wheat, cotton, and hogs becomes effective, perhaps two-thirds to three-fourths of all the farmers will profit from greater returns. Others may be benefited by trade agreements. And the prices of all farm products should react to a rise in prices of basic products.

Q. How much do you intend to cut down production of wheat, pork and cotton this year?

A. We can't tell until after public conferences and hearings are held. Calling these conferences will be the first step in operation under the law. Q. When will you issue the first or-

der to farmers to cut down their acre-A. We won't order farmers to cut down acreage. If we decide on that action on any crop, we will offer handle the land so as to prevent erothose farmers who do cut acreage a sion and maintain soil fertility, but

chance to share cash benefits. Q. When will the farmers get their money?

A. It may be worked out so that they will get part of it before harvest time—as soon as the reduction in acreage has been proven.

Q. Where will you get the money to pay farmers to cut down their production?

A. From taxes on the first processing of the commodities involved.

Effect on City Man

How much will the living costs

ness! How untruthful your objection: cles of employment. A rise in farm will not avail before God, yet His to a strengthening of the entire credit forgiveness will avail all the more and financial structure - the necess-

Q. Will this measure give the farmer a bigger share of the money that is spent to feed the unemployed? A. Products sold for distribution Tuesday Card club this week. High to unemployed are exempt from the

Processing Tax.

Q. Why do you call it a "processing

O. Because it is based on the bushels of wheat processed (manufactured) in flour, or bales of cotton spun,

What does "first processing" mean in connection with milk, peanuts, corn, oats, wheat, tobacco and pork?

A. That means milling wheat, spinning cotton, slaughtering hogs. Oats and peanuts are not in the Act. For milk and tobacco, it has to be determined for each product—butter, for example, would be, when churned. Q. How will you decide how much

ax to levy on each commodity? A. First, in public hearings or conferences find out how much of a

crop we want to grow; second, de-ABOUT NEW FARM BILL termine how much must be paid to achieve the necessary reduction; and adjust the taxes accordingly.

Q. Does a farmer have to pay the Idahoans are interested in the act processing tax on garden stuff he because three major Idaho farm com-raises for his own table? On the hog A. No.

Distribution Costs

product.

Won't the packers and millers ery time it passes through another pair of hands, and won't the tax be doubled and tripled before the consumer has to pay it?

A. The secretary of agriculture can use the licensing feature of the Act to prevent profiteering. The consumer must not be gouged.

Q. If competition among food dealers on a buyer's market hasn't kept down distributing costs, how will government "partnership" in trade agreements cut down those costs? A. By eliminating fasteful and costly competition.

Administrative Details.

Q. Will the farmer be expected to keep the acreage he retires from cultivation bare?

just his production intelligently unless sible, and the basic crop will, so far ie knows that his neighbors will do as possible be replaced by a non-comlikewise. Hence the collective action peting cover crop, such as grass. So to replace part of a sowing which Q. How will this plan help the long been recognized as ound farming practice.

Q. How many men will you hire to enforce the acreage cuts? A. Just as few as possible. No

great force should be needed. Most of the local administration will be thru committees of farmers.

Q. Who will actually sign agreements with farmers? A. The properly accredited local

committees or representative, acting for the secretary of agriculture. Q. Is there anything to prevent a farmer from leasing his whole farm

to the U. S. Dept. of Agriculture and getting paid for doing nothing? A. Probably only a given per cent of the land in any crop on each farm will be leased, during this year at

Q. Must a farmer let his land go absolutely idle, or can he grow garden stuff on it for his own family? A. He probably will be required to handle the land so as to prevent ero-

not for production of cash crops. Will the extension agents enforce the Act out in their counties? A. They may act as secretaries of the local committees or organizations of farmers, but the local committees will do the enforcing.

Q. How is this going to help our export business if we can't sell stuff

RECORD CROWD ATTENDS CELEBRATION ON JULY 4

Celebration attendance records of recent years were broken Tuesday when people gathered from all parts of the palouse country to enjoy the Fourth of July. Uniontown was here in full force; Moscow was well represented and Troy sent the largest delegation in years, surpassed in number even for the years when Troy sent its baseball club here for celebrations.

To estimate the number here July 4 would be next to impossible, although between 8 and 9 o'clock Tuesday evening 326 automobiles were counted on the streets. During the afternoon when the crowd was the largest there was so much activity that no count could be made. At the ball grounds during the game and rodeo the stands were overflowing and celebrants sought a glimpse of the affair from car tops, and many lined the fences and a warehouse adjoining Fred Meyer, manager of the club, took ings, the home of Mr. and Mrs. er in center. upon himself a gigantic task in the Qualey 31 years ago before they came face of conditions, but he came thru. to the Gem state, they also visited. All local members of the baseball club | Short stops were also made at Cosson, have given much time in recent weeks | Minn., and at Madison and Kendall. preparing for the two-day event, and Wisc., the latter town the birthplace their efforts have been rewarded. of Mrs. Qualey. Business houses contributed to prizes, if any, are unheard.

LOCAL RED CROSS CHAPTER ASKED TO RELIEVE DISTRESS

Assistance must be given people of the flooded areas of north Idaho. Genesee's quota is \$50.00, and it is imperative that immediate response be given. Seventyfive families have been affected in and about Bonners Ferry, with more than 9,000 acres flooded. Many homes have been completely destroyed with accompanying damage to crops and livestock. It is estimated that a total of \$10,-000 will be needed for relief. La-

tah county has during the past year received more than \$6,000 worth of Red Cross cotton and flour, and in view of the benefits we ourselves have received, it is only fair that we respond to this call for help. See Dr. N. M. Leavitt, chairman of the local chapter

RALPH BROEMELING FIRST IN MEN'S FREE-FOR-ALL

Ralph Broemeling showed his heels to other entrants in the young men's free-for-all 100 yard dash, with Russell Rinehart second, the program of races being run at the ball park the morning of July 4.

Bernice Isaksen took first in the girls' free-for-all, with Mae Ann Kries second. Prizes were: boys, \$1.25 cash for first, donated by Del DeMers; second, \$1.00 cash, Fred Meyer. Girls, \$1.50 in trade, first, donated by Rader's City Market; second \$1.00 in cash, 50e by Frank Willoughby and 50c by

Other results were as follows:

Boys, 6 years and under, 40 yard dash, Leon Eikum first, knife donated by Genesee Supply; second Dan Pederson, 50c, Genesee News.

Girls, 6 and under: Laura Marie Scharnhorst, first \$1.00 cash by E. E. Stout; second, Dorothy Anderson, 50c cash, Genesee News..

Boys, 8 years and under, 40 yard dash: Richard Broemeling, first, a flashlight, Herman's Hardware; second, Wayne Bershaw, knife by Genesee Supply Co.

Girls, 8 and under, 40 yard dash: Lorene Isaksen, first, choice any pair shoes, Follett Merc. Co.; second Jean Schooler, box candy, Worthy's. Boys 12 years and under, 50 yard

dash: Jerome Bershaw, first, \$1.25 in cash, R. E. Edwards; second Don Bershaw, 75e cash by Dr. T. A. Elliot. Girls, 12 and under, 50 yard dash: Mabel Isaksen, first \$2.00 pen and pencil set, Clark's Drug store; second, Ethel Dresher, \$1 pencil, Clark's.

Boys, 10 and under, 50 yard dash: Don Scharnhorst, first, \$1.00 cash, Genesee News; second Wayne Bershaw, 50c, Genesce News. Boys, 16 and under, 75 yard dash:

Bertie Wishard, first, \$1.25 cash, Dr. Elliot; second, Don Rader, 75c bottle Jeris hair oil, Baker's Barber shop.

Girls, 16 and under, 75 yard dash: Bernice Isaksen, first, \$1.25, baseball club: second Bueletta Nordby, \$1.00,

Edgar Evans jumped into the lead in the fat men's race and held it until he crossed the tape. John Roach was second and Cliff Lundt received honorable mention. The prizes for this race was turned back by the winner for a backward race in which Billy Edwards was first; Elbert Hollingsworth was second, the prizes being 50c and 25c, donated by Gus Miller.

In the consolation boys' and girls' partner race, Evelyn Broemeling and Bill Herman were first, and Ethel Dresher and Gerald Pederson, second, prizes being 50c and 25c, donated by the baseball club.

Lee Johann, Bertie Wishard and Leonard Flamoe won the relay race.

Little Damage to Grain.

The rain last week, while being of much benefit to growing crops, left many local ranchers somewhat depressed by the amount of grain which was apparently downed by the showers, but with a few warm days the grain came up and fields are again looking better. In some instances the 'flats", where the grain was heaviest, was expected to bring up the yield for the hills which still show effects of a hard winter and a late spring.

The Genesee harvest this year, will not compare with years past, but the prospects are better than for any time this spring and summer, much better than in most places, and so far above the average that one naturally finds some consolation in living in a territory not subject to crop failures

Peas are still looking good. There is plenty vine growth, and growers have reported little or no weevel infestation.

Home from Trip to Coast.

Mr. and Mrs. B. J. Pleiman returned Tuesday evening from a motor trip to Aberdeen, Puyallup and Seattle, Washington. At Aberdeen they visited with Mr. Pleiman's mother, Mrs. C. Pleiman, and at Puyallup with Mr. experienced woodsmen, the men said and Mrs. Jack Kimball. Former residents of Genesce seen at Puyallup were the Henry Jutte and Peter Steltz those who were not of foreign birth families. At Seattle Mr. and Mrs. were of the direct Italian extraction, Pleiman visited the A. C. Frohman from Scattle in one day.

Discus Family to Lewiston.

Mr. and Mrs. F. E. Dieus have daughter, Joan Edith, returned home moved to Lewiston from Moscow, according to the Lewiston Tribune. Genesee Supply Company

OU CAN'T expect a girl not to stamp her foot and say things when the hot water tap runs cold. The poor dear has to wash an acre of dishes every year.

A little strategy, Ethelbert: don't throw cold water on the marriage vows; put in an electric water heater. No, you don't have to have an electric range.... not under the new flat rate.

It costs no more than a couple bars of soap a day. And the hot water's there when you want it...on tap, instantly available, never-failing...for dish-washing, for bathing, for the laundry and shaving. Ask about this new service. And remember, hot words wont heat cold water.

Tune in on the Electric Home Quarter-Hour, Station KHQ, 12:45 p. m., (Daylight Saving) Daily except Saturday and Sunday.

"Large business institutions have countless advertising exhibits which are very instructing. These are all free, but in spite of all the free exhibits there are hundreds of places to see the sum of places to see the sum of one dollar an hour. It would be worth several dollars extra to see that Exposition."

college and university students will push you around the grounds for the sum of one dollar an hour. It would be worth several dollars extra to see that Exposition."

following the picnic dinner at noon. Mrs. Harry Thatcher and Mrs. Clarence Jain, former residents of Genesee were also at the park and visited with friends from here. instance, the reproduction (to the finest details) of Old Fort Dearborn, band invited a few friends and relations of the program. Mrs. Field favored ent site of Chicago, and the

village, which has exact duplicates of Lincoln's boyhood home and surroundings, are only open to people who pay a 25 cent fee. Many other such things, which are very interesting, are not free exhibits, even after one has paid the fifty cents general admission to the grounds.

"The Fair grounds stretch for three miles along the lake front and even the lake itself is used to hold such exhibits as a modern submarine and an old Mississippi showboat. "We visited many places of interest in Chicago, such as Soldiers Field, Field Museum, the Art Institute, and

the "Chicago" theatre, supposed to be Chicago's best. After several days in the big town we drove about a 1,000 miles visiting relatives and friends throughout Illinois. And the weather was hot! One hundred developed the several several days of the several several days. grees and more every day. Crops were burning up from heat and dry weather, and I guess they have had no relief yet. All through the Mississippi valley where we traveled crops

were very poor.

"While in St. Louis at a service station we were spoken to by a former Colton resident, I think. He was pleased to see a Washington car license and asked us where we were from. I told him I was from near Colton and he smiled broadly and began to talk. He gave us the name of Jim Borah and although I did not know him he seemed glad to see a person from this neighborhood. He asked about many Colton people and sent his best wishes to everyone.

We followed Line 40 back to Washington, which brought us through Missouri, Kansas, Colorado, Utah and Idaho. In the first two states the daho. In the first two states the eat was terrific—110 in one place n Kansas and a hot wind parching

IN ANSWER TO A LADY'S LETTER

A lady writes to say that she does not understand why an 8-cylinder car does not cost more to run than a car with fewer cylinders. She refers to my statement that our Ford V-8 develops more power on a gallon of gas than any car we have made.

The use of 8-cylinders does not mean the addition of two or four extra fuel consumers. It is not, for example, a 4-cylinder engine multiplied by two. Our 8-cylinder engine takes the fuel supply of an ordinary 4-cylinder engine and divides it eight ways. And why?

By reducing four larger explosions into eight smaller ones, we get engine smoothness and quietness. Eight-cylinders indicate the way the gas is used, not the amount. It is just the difference between going upstairs in four long jumps or in eight ordinary steps.

Two things use up gas-bad engine design and useless car weight. Besides having an engine that gets a high percentage of power out of the fuel, the Ford V-8 has a light, strong body and chassis so that no power is wasted in moving excess weight.

The only extravagance about the new Ford V-8 engine is in the building of it. The extravagance is ours—the economy is yours.

The whole question of car economy needs clearing up. An economical car gives economy all round. Price, operation, upkeep, all play their part. If what you save on gas you lose elsewhere, that is not economy.

As to upkeep, our dealers say that in recent years the improved quality of Ford cars has cut down their repair business 50 per cent. As to price with quality, -- judge for yourself.

As to economy, here is the record of a stock car three weeks out of shop in Oklahoma:

On a run of 10,054 miles at the rate of 1,000 miles a day—the Ford V-8 gave 18.8 miles per gallon of gas. Not a drop of water was added to the radiator. The oil was changed once in 1,000 miles. That should answer a lot of questions.

Now a young man's daily bath is as essential to his health and well-being as proper diet and sufficient sleep. You perhaps have noticed that his "appeal" is at its best right after bathing....when he is rosy cheeked and fresh and quite at peace with the world.

For this all important job of keeping clean, hot water is indispensable. And, personally, like my dad, I like snappy service with lots of hot water whenever I want it.

An arbitrary demand? Not at all when abundant hot water constantly on tap can be had so reasonably with an electric water heater and the new off-peak flat rate service. My suggestion is that you investigate this opportunity immediately.

UNTIL WE LEARNED BETTER

Until we learned better, we used to mix wood and steel in our car bodies and wheels. It was the best way to make bodies—then. But the state of the art

has advanced. Of course, it is more expensive to make an all-steel body than to make a wooden frame and nail steel panels on to it. The better way involves an initial expenditure of several millions of dollars for new dies, which renders a change very costly. Cars, especially large expensive cars which are produced in small volume, cannot afford this, because the dies cost as much for one car as for a million. That alone explains why all-

steel bodies are not used in all cars. But our basic policy from the beginning is to make a good car better,

regardless of cost. For example, when we discarded wood-steel body construction, it was not because we lacked wood. We still have some thousands of acres of the best hard wood in America. Economy would urge us to use up the wood first, and then adopt the better all-steel body. But we decided that quality was more important than expense. We weighed the reasons, for and against, before we made the change.

We could see only one reason for retaining a mixed wood-and-steel body --nailing the metal on, instead of welding an all-steel body into a strong one-piece whole. That reason was, it would be cheaper -- for us. Our reasons for adopting an all-steel body were these: A wood-steel body is not much stronger structurally than its wooden frame. In all American climates, wood construction weakens with age. Every used car lot gives evidence of this. Rain seeps in between joints and the wood decays. A car may have a metal surface, and yet not be of steel construction. Under extreme shock or stress the steel body remains intact-dented per-

haps, but not crushed. Steel does not need wood for strength or protection. Wood is fine for furniture, but not for the high speed vehicles of 1933. In the Ford body there are no joints to squeak, no seams to crack

or leak. The all-steel body is more expensive -- to us, but not to you. By all odds, then, steel bodies seem preferable.

durable body made. That is our only reason for making them.

Wheels also have become all-steel. No one argues that an electrically welded one-piece steel wheel, such as the Ford wheel, needs to be "strengthened" by adding wood to it. The one-piece all-steel body is the strongest, safest, quietest, most

VOL. XLV

"Plans are being made for the Con munity meeting Monday afternoon at the high school gymnasium for the organization of the Wheat Adjustment program," said L. V. Benjamin, county agent for Latah county, who was in Genesee Wednesday,

Every farmer, who is raising any wheat at all is urged to attend the meeting, nearest his home, both in Nez Perce and Latah counties, as this first meeting will be a joint one for Rimrock and Genesee precincts, and others who may wish to attend. "You will not be urged to sign anything, all we, of the Wheat Adjustment program ask, is an opportunity to ex- HON CHARLES HAFFKE TO plain the workings of this plan to

Time To Study Contracts
Farmers are being given ample time to study the specimen contracts before they are asked to sign up officially under the wheat plan. The contracts give the producers the exact information about the agreement of the formation and certificates of sale of his wheat. From this information, where many beautiful lights illuminated the water; Merchands and which contains the National Acquarium, Art Institute (valued at \$75,000,000); the Armour Packing plant; Herhune Tower, Jackson and Lincoln Parks; Buckingham C. Hayden of Genesee, were married at the Christian church in Genesee changes of any building in the world and which contains the N. B. C. Student Mrs. In Mrs. And Mrs. Lester C. ### School Starts Sept. 4 **Second-Hand** Book Exchange

Bring your old and second-hand books in again this year as soon as possible as they have to be listed, priced and arranged for display. Bring them in not later than September 2; that will give us an opportunity to have them ready for stu-dents by Monday morning, September 4.

All those who listed their second-hand books here last year and did not ask for settlement are requested to present their lists as soon as possible. There are some who still have books at our store which are unsold.

We are pleased to render this Second-Hand Book Exchange service, but urge that you bring in books early, as there are some who wish to purchase books before school opens

### Award of WARNING

Whether you have just set sail on the matrimonial seas or have weathered too many Junes to count, have heed of these WARN-

WARNING. John takes a hot bath before dinner...empties the tank (as he would).... leaves Jane with a stack of dishes and a cold "Hot" water tank. Storm brewing.

WARNING. Jane does the laundry.....John comes home looking forward to a nice, restful hot bath....tank empty and water cold. Storm brewing.

Heed these warnings on the high seas of matrimony. See that you have all the hot water you want when you want it. It is easy with the new off-peak flat rate water heating service. A dime a day....and now you can have it without owning an electric range. Ask about it.

### National Average Price

According to the above news item the national average price for domestic electric service was 5.55 cents per kilowatt hour — and the national average consumption for each customer was 600 kilowatt hours for the year ended July 31, 1933.

In the territory served by this company the average price for domestic electric service was 2.28 cents per kilowatt hour — and the average consumption for each customer was 1727 kilowatt hours for the year ended July 31, 1933.

One of the reasons our customers use nearly three times as much electricity as the national average is BECAUSE OUR ELECTRIC SER-VICE COSTS ARE SO VERY LOW!

GENESEE VALLEY NEWS.

Mrs. A. Danielson and Clarence visited Mr. and Mrs. C. Freng in Lew-Peter Lande arrived home Saturday from near Spokane where he has been working with the Tobin Construction

Mr. and Mrs. Ole Miller are staying at the O. V. Johnson home for the winter. Mr. Miller formerly lived

visited at August Johnson's Friday Sunday at T. Anderson's.

Sylvia Johnson came home Friday vening and stayed until Sunday. Mr. and Mrs. Odenborg of Albany,

borg home.

Mrs. Irvin Iverson and Mrs. Harry
Epland visited Mrs. Larson Friday.

Mr. and Mrs. Fred Hove entertained Mr. and Mrs. Art Tegland. Mr.

and Mrs. John Hove. Inger and Virg

of the interior is finally getting away
for his trip around the country in-

at home. Mr. and Mrs. Lande took to establish on the resevations. Secrehim to Moscow Sunday afternoon.

Mr. and Mrs. Albert Peterson and Vernon spent Sunday afternoon at Couer d'Alene and Fort Lapwai on August Johnson's.

Miss Alice McKeirnen visited her mother at Pomeroy Saturday and Mr and Mrs. J. P. Anderson and

n visited at Wm. Jenkins Sunday. Mr and Mrs. Art Hove and Mr. and Mrs. Art Tegland motored to Lewison last Thursday and spent the day.

ACHELOR DAD ROLE GOOD ONE FOR M. CHEVALIER Suppose a baby was left on your loorstep, Mr. Bachelor. What would

That's the situation Maurice Chevalier faces in Paramount's "A Bedand Sunday at the Audian, with Helen He's grand, the gay, naughty, pouting Maurice who'll make you so enious of his charm, his good humor, have you goggle-eyed. But best of all the gurgling year-old youngster, Baby Leroy, selected to play the role in a competition that included prac-tically every infant on the Pacific coast. And it's no wonder he won the art-for he does things you never thought any youngster his age was capable of doing—a perfect foil for

oremium on songs, laughs and looks— real "bedtime story" that will keep ou awake nights talking about it. IDAHO IN WASHINGTON.

It's real entertainment with a high

(By Ralph Olmstead) Washington, D. C., Oct. 6. Of vast import to Idaho is the recent decision by the board of public works to continue work on the Bonneville light and power project at Bonneville, Wash. It involves an expenditure of some \$31,000,000, and when completed will be one of the electrical centers of the west. Another project to be completed, the Grand Coulee, which will be above Wenatchee, Wash. is even larger, and will cost about \$63,000,000. One million dollars in cash is available at present for work on this project.

Ordinarily the Idahoan, thinking of some project under way in the State of Washington feels that will be of no particular benefit to him. These particular projects, however, are not a class of localized benefit. When completed, the cheap electrical power cannot fail to attract branches of every electrical industry in the United States. This, in turn, in the opinion of financial experts will increase population, increase consumption of produce, and furnish a closer, better and higher market for Idaho's foodstuffs. The anticipated increase in demand for agricultural commodities is one of the easons why western senators, led by Senator Pope, have urged the expenditure of a large portion of the public

GENESEE, LATAH COUNTY, IDAHO, FRIDAY, OCTOBER 20, 1933

#### STORES TO CLOSE.

COUNTY AGENT EXPLAINS

farmers regarding the setting out of their allotted acreage for the years 1934 and 1935, says County Agent plan to reduce his seeded acreage 15 per cent of what his average acreage has been during the base years—1929

In case a grower has been growing wheat only every other year, he will needed. The game will start be allowed to take his entire reduction as promptly as possible at 2:30. during the year in which he would ordinarily grow a crop. The follow-GRAIN MARKET SUMMARY ing example will explain how this situation is to be handled: (In case the year given signifies the year when the crop is harvested)

Example: 1929 No crop (or some summer fallow crop)

1930 100 acres of wheat 1931 No crop 1932 100 acres wheat

1934 100 acres wheat

he will have the following:

following reduction:

1934 100 acres wheat less 15% Or 85 acres may be sown, and in vation during the week, was the ap- a larger sum of money. 1935 he will not need to sow any proval by the secretary of agriculture wheat at all, having taken care of his of the marketing agreement, which

VOL. XLV

GENESEE, LATAH COUNTY, IDAHO, FRIDAY, OCTOBER 27, 1933

COUNTY WHEAT PRODUCTION AND ACREAGE PUBLISHE

In accordance with the regulations of the Agricultural Adjustment Administration, wheat production and acreage statements of members of the Wheat Production Control Association of Latah County, statements of production and seeded acreage is being made general in Latah county this week. Last week publication of Genesee precinct growers' statements was made. Inaccuracies which will appear in the rush of completing the work of the committee, enables each producer to check his statement as it appears in the paper, and by noti-fication, made to the local wheat committee or a member of the county committee, corrections will be made. For the three precincts, Genesee, Lenville and Thorncreek, corrections of the initial publication will be made without charge, and those who find errors should immediately notify the

Thorn Creek Complete
The sign-up in Thorncreek is 100 per cent. All applications have been have been approved before being sent to the county committee. Upon complaint, however, changes are possible, providing the person making the com-plaint appears before the board or is-sues his complaint in writing. The changes, if any, will appear in the second and final publication of adjust-

The local committee of Lenville precinct, composed of B. Brigham, sent in reports of 3,620 acres of wheat as the average for the four year, 1929 to 1932, inclusive. The average four year's production is 99,516 bushels.

CONGRESSMAN WHITE AND

"How are you standing the demo-cratic upheaval," said Mr. White as "Over

me to do," continued the representative."

Making Appointments

### Liquidation Sale!

Starting Wed., Nov. 1

The entire stock of

Hardware, Auto Accessories Farm Implements, Etc.

Will Go On Sale On This Date

For Cash Only

Now is your chance to make a real saving in much needed wants; thousands of articles to select from, and most of them will be sold for cost and less.

We have a large stock of Tires, Tubes and Batteries, and you will find some real bargains. Sale will close when entire stock is sold.

Staple line of merchandise will be carried in stock at all times, and we will be glad to order any articles you may need.

REMEMBER: This is a **Cash Sale Only** and no merchandise leaves the store until paid for. You may select merchandise and we will be glad to hold it for you for a few days.

**Everything Must be Sold** 

Genesee Supply Co.

Store opens 8 a. m.

Store closes 6 p. m.

### RED CROSS BATTLES DISTRESS

The Red Cross has given relief to those in need because of unemployment, dissoter and related causes, in every State, in practically every county, of the United States the past year.

With 85,000,000 bushels of government wheat it produced and distributed 19,500,000 barrels of r to nearly 6,000,000 families, more than 25,000,000 men, women and children.

From 844,000 bales of government cotton it produced 104,000,000 garments to help clothe more than 5,000,000 families.

2,627 Chapters expended \$2,420,000 in relief in various forms to the unemployed.

92 disasters in the U. S. and its possessions required Rad Cross relief. The National organization approprieted \$382,200 for relief work in these disasters in addition to contributions raised locally. In 12 weeks disaster service was given in 147 counties in 24 States to more than 30,000 tamilies.

275,000 war veterans and their families were nided by Red Cross Chapters.

700 Red Cross public health nurses made more than a million home visits.

65,000 First Aid certificates were issued. 75,000 individuals enrolled in Life Saving Classes. 35,000 students of Home Hygiene were awarded certificates. 6,700,000 school children enrolled in the Junior Red Cross, served in their communities.

Volunteer workers made 38,000,000 garments.

The pictures on this page illustrate but a few incidents in the year's nation-wide work of the national Red Cross and its 3,698 Chapters, 19,000 Branches. The Red Cross must "carry on." It must have YOUR generous support through membership. You are urged to JOIN in the annual Roll Call, November 11 to 30. Help your Red Cross to carry on. SECTION OF

# AUTOMATIC IRONER, I DO THAT SAME a week of hard labor/

Back-breaking hours over an ironing board ....eight hours a week of hard labor....52 days out of every year in sweat shop, shackled to an iron....was this the sentence pronounced on you while wedding bells rang?

Then here is your pardon, sentence suspended by the new Thor automatic ironer. It does your ironing in two short easy hours....instead of the eight it takes you to do it by hand. You actually sit down and rest while you feed the pieces through, everything from sheets to shirts!

In doing the average ironing by hand you lift over 12,000 pounds of dead NRA weight and your arm travels over 6½ miles. End this sentence at hard labor with a Thor pardon now. WE DO OUR MANY

POLICE SAY:

LIGHT IS A FOE OF CRIME

Prowlers have great fear of light.

A darkened home, however, is a working paradise for them. But with a sudden light they drop their tools of the night and scurry away.

Don't give them a chance to start their work in your home. Burn a light always! The cost is almost insignificant. To burn a 40-watt lamp for several hours costs less than a penny.

NEW FORD V-8 for 1934

THE UNIVERSAL CAR

The New Ford V-8 for 1934 is now on display at the showrooms of Ford dealers. Surpassing even the great Ford of 1933 in economy, beauty and comfort, it is truly the car of this modern age—the culmination of thirty years Ford progress. It combines the proved performance of the V-8 cylinder engine with two important new features—Dual Carburetion and perfected Clear-vision Ventilation. See this car today and drive it at the first opportunity.

OUTSTANDING IMPROVEMENTS IN THE NEW FORD V.8

BETTER PERFORMANCE. Greater power, new speed, quicker acceleration, smoother performance, more miles per gallon especially at higher speeds, and quicker starting in cold weather-all these result from the new dual carburetor and dual intake manifold. New waterline thermostats enable the engine to warm up more quickly and to maintain an efficient operating temperature. Added engine refinements reduce oil consumption, further improve operat-

NEW VENTILATION SYSTEM permits clear vision, prevents drafts and provides desired amount of fresh air in any weather. Individual control for front and rear side windows. When ventilation is desired the window glass is raised to the top. Then the handle is given an additional half-turn. This slides the glass back horizontally to form a narrow slot. Through

all bodies and fenders has greater wearing qual-

GREATER RIDING COMFORT results from increased spring flexibility. The spring leaves are newly designed for quieter and easier action. Shock absorbers are improved. Seat cushions are deeper, with new, softer springs. New type, individual bucket seats provide increased comfort for front-seat passengers in the Tudor Sedan. Adding to comfort is the new driving ease of the 15-to-1 steering gear ratio.

The Finest Ford Car Ever Built

for 1934

methods made the V-8 Type Engine available in a low cost car. The Ford is the only car under \$2,000 with a V-Type Engine. But Ford didn't stop there. For 1934 the engine has been materially improved. It is now the most economical car to operate ever built by the Ford Motor Company.

MORE MILES PER GALLON, quicker starting in cold weather, greater power, more speed and smoother performance are obtained with the new Dual Carburctor and Dual Manifold. A new built-in ventilation system gives desired fresh air without drafts and does not obstruct the vision.

LADY FOR A DAY" A SCREEN

"Lady for a Day," which will show t the Audian Saturday night, Sunday afternoon and Sunday night is destined for a prominent niche in creendom's hall of fame. Like "Sevnth Heaven," "Broken Blossoms," and "Humoresque" it possesses that ndefinable quality that distinguishes greatness. It has tremendous universal appeal—a charming, fairy story that will strum on the heart-strings of the entire world. Hard-boiled men and tender-hearted women, sweet young debs and sophisticated flappers, impatient youngsters and sleepy-eyed elders will laugh and cry and thrill alike to the touching, pathetic story. From the vivid pen of Damon Runyan comes the story which ran in he Cosmopolitan as "Madame La

The story opens in Times Square, New York, where Apple Annie vends her wares to support a daughter in Europe. Pretending to her daughter that she is a society matron, Annie gets into difficulties when her daugher writes that she will visit America with her fiance and his father, Spanish count, who intends to check up on the family pedigree.

Dave the dude (Warren William), a big-shot gambler who considers Annie his lucky charm, comes to the rescue. He installs her in a wealthy playboy friend's apartment, dresses her up in true dame style and provides a temporary husband in the portly Guy Kibbee, who portrays a glib pen-

ny ante pool shark. when the police hold Dave and his family and to greet friends. They pack of hoodlums for abducting were returning from Moscow where three society reporters on the eve of they visited Mrs. J. E. Moore, who an elaborate reception planned as a

WELCOMES THE FRIEND WARNS THE INTRUDER!

A brilliant porch light welcomes the friend and warns the intruder. To the friend it shows that the hostess is thoughtful. The guest feels his company really is desired.

To the intruder it is the sign of warning. It notifies him that the piercing eye of light is ready to expose him.

Because of the extremely low electric service rate, the cost is insignificant. To burn your porch light for several hours costs less

The ers world parity prices, the govern- next meeting will be on Jan. 9, with ment proposed to purchase and hold Mr. Henry Morscheck, when the annual meeting will be held.

Seeding of winter wheat in Europe is nearing completion but information as to acreage is still quite incomplete. The German government has announced its intention to suspend efforts to increase acreage. In France a tax equivalent in American money to \$12.86 per acre has been levied on increases in acreage.

How Are You Standing It? If you have not been observing the present week as it should be, you still have a few days. You are informed by an Associated Press dispatch from Boise, under date of December 9, that Governor C. Ben Ross has issued a proclamation setting aside the week f December 11 to 16 as "Cheese Week" and explains that leading dairy states of the nation are observing the period "in an effort to eliminate the large surplus of cheese and the dairy field based on the soundness of economic premises—the law of supply and demand." He urged cooperation of the citizens in reducing

New Ford V-8 for 1934

The Finest Ford Car Ever Built

FORD ENGINEERING and Manufacturing methods made the V-8 Type Engine available in a low cost car. The Ford is the only car under \$2,000 with a V-Type Engine. But Ford didn't stop there. For 1934 the engine has been materially improved. It is now the most recommission over the overage over built by the economical car to operate ever built by the Ford Motor Company.

MORE MILES PER GALLON, quicker starting in cold weather, greater power, more speed and smoother performance are obtained with the new Dual Carburctor and Dual Manifold. A new built-in ventilation system gives desired fresh air without drafts and does not

THE GENESEE NEWS

RESPONSE TO SILVER PLAN.

An immediate response was expect-

ed when President Roosevelt made the

announcement last week of his order

to government mints to coin silver on

50-50 basis with producers, but such

has not been the case, especially with

anxiously awaited passage of the

Wheeler silver measure. Dr. E. H.

Field, who was in Spokane when the

announcement came of the president's

plan, said there was a buoyant tone

n all markets, but the actual pro-

ducers asserted that the president's

plan was one merely intended to at-

tract attention from the Wheeler bill.

President Roosevelt's proclamation.

ormally ratifying the London silver

agreement, provided that half of the

Let the car speak for itself

HUNDREDS of thousands of people now own and drive Ford V-8 cars. Some neighbor or friend of yours has one. If we told you what we think of the car, you might say we are prejudiced, so we let the car and its owner tell you.

Economy of operation is one of the first points they will emphasize—the owner will boast of it and the car will prove it.

The 1934 car is even better than the 1933 and that was our best car up to its time. The new car is more beautiful—faster—more powerful -gives more miles to the gallon-better oil economy—is easier riding—cheaper to own and operate than any car we ever built.

You owe it to yourself and your pocketbook to ask our Ford Dealer to let you see this car, and let you drive it for yourself. At the wheel of the car you will be sure to reach a right decision. The Ford V-8 will tell you its own story.

NEW FORD V-8

for 1934
