

To: Members of The Idaho Chapter of The Wildlife Society

It's hot in Boise. It's hot in Lewiston. Its hot most every where but in Cool McCall. Plan to cool off at the Chapter Field Meeting at McCall on Saturday, August 1, 1964. Best yet--Bring your family for the weekend and let them swim in the lake, water ski, or just loaf.

Our meeting will begin at 9:45 A.M. Saturday starting at the University of Idaho Forestry Summer Camp. The inside meeting will last about an hour. The rest will be a field operation so wear your boots and bring your sack lunch.

Vern Sylvester is organizing a well-rounded program. A demonstration of tranquilizer techniques is planned--using a live bear (we hope).

Several trapping demonstrations are scheduled including setting and operation of a connon-net trap.

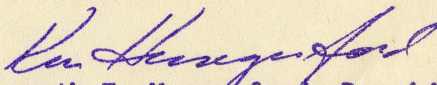

Techniques of Browse measurement will also be a major topic with field procedures demonstrated.

Our formal meeting should finish by supper time Saturday. We plan some discussion time in the evening on an informal basis.

Family camping facilities are^davailable at Ponderosa State Park, just north of the Forestry Summer Camp. There are Forest Service camp grounds not far from McCall.

There are numerous motels and resort cabins in McCall. Lakeview Village is just south of the Forestry Summer Camp. McCall is a popular place in the summer so claim your camp site early or phone for a reservation now!

See you in McCall.

Kenneth E. Hungerford, President

Robert H. Giles, Secretary-Treasurer
