

Wildl

AGENCY: Idaho Department of Fish and Game (IDFG)

CLASSIFICATION: Species of Special Concern

DEFINITION: Native species which are either low in numbers, limited in distribution, or have suffered significant habitat losses. The list includes three categories of species: A) species which meet one or more of the criteria above and for which Idaho presently contains or formerly constituted a significant portion of their range (i.e., priority species), B) species which meet one or more of the criteria above but whose populations in Idaho are on the edge of a breeding range that falls largely outside the state (i.e., peripheral species), and C) species that may be rare in the state but for which there is little information on their population status, distribution, and/or habitat requirements (i.e., undetermined status species).

CLASSIFICATION: Threatened and Endangered Species, Candidates for Threatened and Endangered Species Status

DEFINITIONS: Listed Species (from 50 CFR 17.11 and 17.12):

LE = Listed Endangered Taxa in danger of extinction throughout all or a significant portion of their range.

LT = Listed Threatened Taxa likely to be classified as Endangered within the foreseeable future throughout all or a significant portion of their range.

Candidate Species (from Federal Register 56:58804-58836; November 21, 1991):

C1 = Category 1 Taxa for which the U.S. Fish and Wildlife Service currently has substantial information on hand to support the biological appropriateness of proposing to list as endangered or threatened. Proposed rules have not been issued, but development and publication of such rules are anticipated

C2 = Category 2 Taxa for which information now in possession of the U.S. Fish and Wildlife Service indicates that proposing to list as endangered or threatened is possibly appropriate, but for which conclusive data on biological vulnerability and threat are not currently available to support proposed rules. Further biological research and field study may be needed to ascertain the status of taxa in this category.

C2* = Possibly Extinct Category 2 Possibly extinct taxon; needs verification.

Category 3 Taxa that were once being considered for listing as endangered and threatened, but are no longer receiving such consideration. Subcategories are as follows:

3a - Taxon for which the Fish and Wildlife Service has persuasive evidence of extinction.

3b - Taxonomic status is in question.

3c - Taxon is more widespread or abundant than previously believed, or is not subject to identifiable threats.

CLASSIFICATION: Sensitive Species

DEFINITION: Sensitive species are those designated by the state director usually in cooperation with the state agencies responsible for managing the species as sensitive. They are those species that are 1) under status review by USFWS/NMFS; or 2) whose numbers are declining so rapidly that federal listing may become necessary; or 3) with typically small and widely dispersed populations; or 4) those inhabiting ecological refugia or other specialized or unique habitats.
