Subject: IDTWS annual meeting

Fellow Board Members,

I had a conference call with the Range Management folks last night. They decided they would prefer to wait and have a meeting with IDTWS when it can be a smaller group of just our two societies and we can focus on Idaho issues. They deliberated quite a bit about it and are supportive of our efforts, including wanting to be involved with the meeting next year perhaps by providing a sponsorship and we agreed to share notices about each others meetings as a way to foster cooperative efforts.

So that means we are having a meeting in early March with the NW Section and NW Scientific Society. The NW Sci folks are trying to find a program lead at this time. In the near term, we need to reserve a venue. I will work with Rita to do that asap after we talk to the other groups. Any ideas or thoughts you have on this topic, please let us know.
