November 10, 1977

Mr. Carl Nellis
Route 3, Box 231A
Jerome, ID 83338

Dear Carl:

Thanks for your proposed resolution of July 20, 1977. The Executive Board met on November 1 and, after a lot of discussion, voted not to adopt the resolution.

We felt that there may be some situations where the use of coal to generate electricity might be the best alternative. In other words, the resolution was too general. We would rather confine our comments to specific situations, and especially about the wildlife implications, since our expertise is in that field.

If you could draw up another resolution about a specific coal-powered generating proposal, and emphasize the damage it would cause to wildlife or their habitat, we would be happy to reconsider it.

Sincerely,

Thomas A. Leege
President
