September, 1992

This bibliography was printed with financial support provided by the Idaho Water Resources Research Institute. It is contribution number 643 to the Idaho Forest Wildlife and Range Experiment Station. For additional copies contact: Director, Idaho Riparian Cooperative, IWRRI, 106 Morrill Hall, University of Idaho, Moscow, Idaho 83843. A PC disk containing the bibliographic entries can be obtained from the author at an additional charge. Write to IRIS 853 East Pennsylvania Drive, Boise, Idaho 83706.

ABSTRACT

This bibliography identifies 3,252 riparian research and management articles. References include research on streams, rivers, and wetlands. Land use activities impacting riparian zones are emphasized. To facilitate literature searching, indexes exist for each of the 6,041 authors, 1,110 keywords, and 568 journals or symposia.

THE AUTHOR

John S. Van Deventer is executive director of International Research Information Services (IRIS), a data processing consulting firm specializing in computer applications in natural resource management. He is also a consulting statistician for the Faculty Computer Laboratory at Boise State University's Center for Data Processing. Previously he served as a computer scientist for the Riparian-Stream Ecology and Management Project of the Intermountain Research Station at the Forestry Sciences Laboratory in Boise, Idaho. He has worked as a senior computer systems analyst for the Boise Cascade Corporation and for the Corporate Information Systems Division of the Morrison-Knudsen Company, Inc.

He received a B.S. degree in fisheries biology and an M.S. degree in natural resource management (specializing in statistics and information systems) from Humboldt State University. He is completing a Ph.D. degree in wildlife at the University of Idaho, with an emphasis in computer science and applied statistics.

KEYWORDS

KEYWORDS: habitat, wetland, watershed, floodplain, river, stream, bottomland, lowland, range, bird, waterfowl, salmonid, trout, hydrology, flow, streambank, erosion, soil, mining, logging, alteration.

ACKNOWLEDGMENTS

The riparian bibliographic research was funded by International Research Information Services, Boise State University, the USDA Forest Service's Intermountain Research Station, the American Fishing Tackle Manufacturer's Association, and the National Wildlife Federation.

Mr. Craig Contor helped with database input and management, Dr. William S. Platts provided a rich assortment of literature, and Drs. Steve Bunting and J. Michael Scott of the University of Idaho produced helpful reviews of the manuscript.

INTRODUCTION

INTRODUCTION

In the last two decades riparian areas have been the focal point of research, management, and controversy. Riparian areas are to forest and rangeland what oases are to deserts. They are critical regions providing the essentials for animal life: water, forage, habitat, and shelter. People look to riparian areas as a source of livelihood: logging, livestock grazing, mining, housing developments, and impoundments for flood control, irrigation, and electricity. Man also looks to these areas for recreation: camping, fishing, hunting, photography, and hiking.

The concept of "multiple use" breaks down when riparian areas are the topic. They are too rare and too fragile to survive simultaneous and competing uses. Hence, a battle has begun over how to study, manage, and appropriate these streamside regions.

THE NEED FOR A COMPREHENSIVE RIPARIAN BIBLIOGRAPHY

Because the importance of riparian areas has only begun to be appreciated, the accessibility of riparian literature has been minimal. Much riparian literature exists in hard-to-find symposia proceedings and other unpublished papers. Riparian research seldom finds its way to refereed journals. Knopf (1987) found 88% of published research on riparian wildlife was in nonrefereed literature and had not been subjected to critical review. Similarly, 83% (499 of 601) of references in this bibliography containing the word "riparian" in their titles are nonrefereed. Only a handful of riparian bibliographies currently exist. Although most are

well done, they tend to be limited in scope.

The need for a comprehensive riparian bibliography warranted an exhaustive compilation of all literature relating to riparian areas, wetlands, and lowlands. This bibliography is designed to meet that need.

THE SCOPE OF THE BIBLIOGRAPHY

This bibliography has something for everyone interested in riparian areas. Managers and researchers should find this document particularly useful. The "leg work" has been completed and is presented in a manner that facilitates quick-access to a variety of topics falling under the subject of riparian areas.

Riparian literature from 1900 through the spring of 1990 is included. Riparian literature from any country was included as long as it was written in the English language. There are citations from Japan, South Africa, and the Soviet Union. Still, over 95% of the riparian literature comes from North America. The vast majority of citations in this document are from the United States in the 1970s and 1980s.

An effort was made to find references associated with impacts on riparian zones. Several symposia proceedings and authors have blamed livestock grazing as the number one cause of riparian habitat degradation. Consequently, the influence of grazing has been a primary emphasis in the search for literature relating to riparian zone impacts.

HOW THE BIBLIOGRAPHY IS ORGANIZED

KEYWORD INDEX

The citation numbers for each publication are listed under each of the 1,110 keywords. Keywords were selected from the title of each publication. No attempt was made to provide keywords beyond those found in the title. For this reason one may need to contemplate alternate keywords. For example, if one is interested in the effects of dams on riparian zones then other keywords to consider would include: impoundments, diversions, fluctuations, hydro power, hydroelectric, irrigation, mitigation, and so forth.

AUTHOR INDEX

There are 6,041 authors listed in this index. Associated with authors' names are four pieces of information: (a) the reference number, (b) the year of publication, (c) the number corresponding with authorship [i.e. a (3) indicates the author is the third author], and (d) the author's name. If the author is the sole author then the authorship number is blank. Please note that the same author's citations may not always be listed contiguously depending on how his or her name appeared in the article. Sometimes first names are listed and sometimes only initials are used. This index provides a way of finding all the articles an author has done relating to riparian areas.

JOURNAL INDEX

Each of the 568 journals referenced are listed alphabetically. Within each journal title are listed the individual citation numbers of each reference from that journal. In parentheses to the right of each citation number

are the last 2 digits of the year the article was published (articles in press have 2 dashes where the year would otherwise be). This index enables one to find literature in a particular journal. The search is narrowed if the year of publication is available.

REFERENCES

The bibliography contains 3,252 references listed alphabetically by author, year of publication, and by journal. A unique citation number is associated with each reference. Authors' names, year of publication, publication title, and journal are preceded by an (a), (b), (c), and (d), respectively.

HOW RIPARIAN REFERENCES WERE FOUND

Less than 10% of the references in this bibliography were found via computer literature searches. Five literature databases were searched with minimal success. Reasons for this were (1) riparian literature is seldom in refereed journals, (2) databases have difficulty tracking intermittent publications and other "gray" literature, (3) at this time literature databases cannot keep up with the volume of current literature, and (4) keyword matching by the computer databases is inadequate (i.e. an attempt I made to find literature with keywords of "riparian" and "wildlife" yielded an abundance of citations on water buffaloes!).

Most riparian literature was found the old-fashioned way: by combing through stacks of publications and back-tracking through the reference cited sections of each riparian publication.

KEYWORD INDEX

The keyword index sequentially lists reference numbers
by keywords found in the title.

AUTHOR INDEX

The author index is listed in four columns. Column one is the reference number. Column two is the year of publication (NoDt = no publication date, InPr = in press at the time literature search was conducted). If column three has a number in parentheses, that number refers to the author number in a paper with multiple authors. If column three is blank the author listed to the right (in column four) is the sole author. Column four lists the author's name.

JOURNAL INDEX

160

The journal index lists reference numbers under each journal or symposium name. The last two digits of the year the article was written are found in parentheses adjacent to each reference number. The codes (--), (*nd*), and (*un*) refer to articles in press, no date, and unknown date.

- 1689 a. Kuhnle, Roger A.; Southard, John B.
 b. 1988.
 c. Bed load transport fluctuations in a gravel bed laboratory channel.
 d. Water Resources Research. 24(2): 247-260.
- 1690 a. Kunkle, S. H.
 b. 1979.
 c. Using bacteria to monitor the influences of cattle wastes on water quality.
 d. USDA, Science and Education Administration, Agricultural Research Results ARR-NE. 8 p.
- 1691 a. Kunkle, Samuel H.; Meiman, James R.
 b. 1967.
 c. Water quality of mountain watersheds.
 d. Colorado State University. Hydrology Paper 21. Ft. Collins, CO. 27 p.

- 1692 a. Kunzman, Michael R.; Bennett, Peter S.; Johnson, R. Roy.
 b. 1989 (In press).
 c. Urban riparian lands in the West.
 d. In: Kusler, Jon A.; Daly, Sally; Brooks, Gail. Proceedings of the National Wetland Symposium: Urban Wetlands and Riparian Habitat. June 26-29, 1988. Oakland, CA. Association of Wetland Managers, Inc. (publisher).
- 1693 a. Kureger, H. O.; Ward, J. P.; Anderson, S. H.
 b. 1988.
 c. A resource manager's guide for using aquatic organisms to assess water quality for evaluation of contaminants.
 d. USDI, Fish and Wildlife Service, Biological Report 88(20): 1-43.
- 1694 a. Kus, Barbara E.; Mine, Karen L.
 b. In press.
 c. Use of non-riparian habitats by least bell's vireos (*Vireo bellii pusillus*).
 d. In: Abell, Dana L. (Technical Coordinator). California Riparian Systems Conference. Protection, Management, and Restoration in the 1990s. September 22-24, 1988. Davis, California.
- 1695 a. Kushlan, J. A.
 b. 1989 (In press).
 c. Avian use of fluctuating wetlands.
 d. In: Sharitz, R. R.; Gibbons, J. W. (Eds). Freshwater Wetlands and Wildlife: Perspectives on Natural, Managed, and Degraded Ecosystems (Symposium Proceedings). Savannah River Ecology Laboratory, Drawer E, Aiken, SC 29801.
- 1696 a. Kushlan, J. A.
 b. 1989 (In press).
 c. Wetlands and wildfire: the everglades perspective.
 d. In: Sharitz, R. R.; Gibbons, J. W. (Eds). Freshwater Wetlands and Wildlife: Perspectives on Natural, Managed, and Degraded Ecosystems (Symposium Proceedings). Savannah River Ecology Laboratory, Drawer E, Aiken, SC 29801.
- 1697 a. Kusler, J. A.
 b. 1985.
 c. A call for action: protection of riparian habitat in the arid and semi-arid west.
 d. USDA, Forest Service, General Technical Report RM-120. p. 6-8. In: Johnson, R. Roy et al. (Tech. Coords.). Riparian Ecosystems and their Management: Reconciling Conflicting Uses. First North Am. Riparian Conf. Tucson, AZ. April 16-18, 1985.
- 1698 a. Kusler, Jon A.
 b. 1989 (In press).
 c. Urban wetlands and urban riparian habitat: battleground or creative challenge for the 1990's?
 d. In: Kusler, Jon A.; Daly, Sally; Brooks, Gail. Proceedings of the National Wetland Symposium: Urban Wetlands and Riparian Habitat. June 26-29, 1988. Oakland, CA. Association of Wetland Managers, Inc. (publisher).
- 1699 a. Kusler, Jon A.
 b. 1989 (In press).
 c. Strategies for the future: local government urban wetland protection and management programs.
 d. In: Kusler, Jon A.; Daly, Sally; Brooks, Gail. Proceedings of the National Wetland Symposium: Urban Wetlands and Riparian Habitat. June 26-29, 1988. Oakland, CA. Association of Wetland Managers, Inc. (publisher).
- 1700 a. Kusler, Jon A.
 b. 1989 (In press).
 c. No net loss and the role of wetlands restoration/creation in a regulatory context.
 d. In: Kusler, Jon A.; Daly, Sally; Brooks, Gail. Proceedings of the National Wetland Symposium: Urban Wetlands and Riparian Habitat. June 26-29, 1988. Oakland, CA. Association of Wetland Managers, Inc. (publisher).

- 1701 a. La Roi, George H.; Strong, Wayne L.; Pluth, Donald J.
 b. 1988.
 c. Understory plant community classification as predictors of forest site quality for lodgepole pine and white spruce in west-central Alberta.
 d. Canadian Journal of Forest Research. 18: 875-887.
- 1702 a. LaBaugh, J. W.
 b. 1986.
 c. Wetland ecosystem studies from a hydrological perspective.
 d. Water Resources Bulletin. 22(1): 1-10.
- 1703 a. LaBounty, James F.
 b. 1986.
 c. Inventory and monitoring of wildlife habitat: lakes.
 d. USDI, Bureau of Land Management, Service Center, Denver, CO. In: Cooperrider, Allen Y.; Boyd, Raymond J.; Stuart, Hanson R. (Eds.). Inventory and Monitoring of Wildlife Habitat. p. 237-254.
- 1704 a. Lacey, John R.; Van Poolen, H. Walt.
 b. 1981.
 c. Comparison of herbage production on moderately grazed and ungrazed western ranges.
 d. Journal of Range Management. 34(3): 210-212.
