Dear Mr. Cooke and Mr. Brown,

I liked that field trip cause we didn't have to do any assignments. I also liked the thing about the iodine that was cleared up. It sort of stunk in a few places, I guess it was interesting in a few places, in all the places in fact.

Sincerely Me,

John Island

Dear Mr. Brown & Mr. Crooks

I enjoyed our fieldtrip to the Moscow Sewage Plant very much. The Troy sewage plant isn't anything like yours. Ours has only one tank, and we only got ours a few years ago. I liked that experiment with the starch and iodine.

Sincerely,

do that for us, although we didn't get  
to see the animal eaters.

Thanks

I thank-you for all the  
fun we had. The Best  
part was the digester and  
the fire on the end. and  
how it heats the hole

taken a long time to Build  
it
