

Hope, New Mexico
December 4, 1932

Dr. Frank B. Robinson
Moscow, Idaho

Dear Dr. Robinson:

I AM FREE. A strange statement with which to start a letter, but the only kind of statement that will explain the exultation that has taken possession of me.

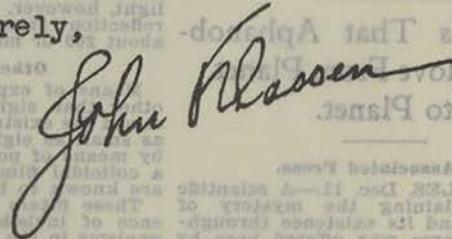

This morning as I was making last minute preparation preparatory to going into my pulpit, I realized how I was harrassed and bound by the traditions of man and by the dogmas of previous times. But the shackles are off. I was in my study when it happened. The thought came to me, with force unexplainable, that no longer would I be tied by things expected of a preacher. The results? I am willing to leave that to the Power which controls the Universe.

I do not know where my new course will lead me to, and still stranger, I do not care. I am sure that the living God will take care of that.

It so happens that the denominations with which I am related gives to its ministers remarkable freedom of thought. In my future preaching I will, of course, speak some of the truth as you have made me to see. Will this be fair to you? Will it be fair to the denomination that has engaged me?

Your lessons have given me the very things which were dark in my own mind. I can never tell you the real appreciation that I feel toward the teachings of "Psychiana."

Sincerely,

This minister, like many many others thought he was preaching the REAL truths of God. He was honest as most of them are. But there were doubts in his mind so, following the admonition of the greatest spiritual Teacher the world has ever known, he "sought" and "found" the truth. Now he is free. "PSYCHIANA" is setting men and women FREE all over the world because it is pointing them to the great Spirit of God. (Not the church god but the Living God) Have you found this mighty Power yet?

SPECIAL BULLETIN FROM DR. ROBINSON TO HIS STUDENTS AND FOLLOWERS.

One of the most remarkable scientific statements it has ever been my pleasure to see, appeared through the Associated Press and was released to every paper holding membership in that vast organization, on December 11th, 1932. The statement is remarkable in that it is the first statement ever released by an outstanding scientist dealing with the problem of "Eternal Life" or "invisible life" in a scientific manner, which statement shows the possibility of this great Spirit of Life being self-existent and within the reach of all of us here and now.

While claiming no superior knowledge of any sort, it is a fact nevertheless that scientists every day are corroborating the philosophy of life advanced by me when I first released "PSYCHIANA" nearly three years ago. The statement Dr. Sinitsin makes was made by me in this course of instruction three years ago. In fact this entire teaching is actually based upon the existence of the Spirit of Life, as here described by one of the world's most leading scientists. In my first advertisements I called attention to the fact that there does exist HERE and NOW, an invisible force, or power, so dynamic that all other powers or forces fade into insignificance beside it. I stated three years ago, and still state that the solution to the problem of "eternal life" was contained in life it-

self. I ridiculed, and still ridicule any system of religion which tells us to "wait till after you die" before the fundamental facts of LIFE may be known.

My course of instruction is fully founded on the existence of this great Life Spirit, as my students fully know. The Lessons on the "Cosmic Ray" very simply yet very explicitly explain the existence of this great Life Spirit, and did explain it three years ago, before any other scientist had even dared to advance such a theory. And it is a source of great satisfaction to me to know that religious leaders and scientists the world over, are now advocating the possibility of what I stated as a fact three years ago. I respectfully disagree with Dr. Sinitsin that physical SIGHT has anything to do with eternal life. The famed doctor states that because our physical sight is limited, we can never know the answer to the problem.

Physical sight has nothing whatsoever to do with spiritual life. Either this great Realm of God exists here and now, or it does not exist. But whether it does or not, it certainly cannot be a fact that physical sight has any bearing on it. In sleep, when the eyes are fully closed, and when the consciousness is fully dead, the great Life Spirit operates, and the great fundamental laws of this unseen Life Spirit

it are still there—whether we can see them or not. This mighty man of God, Dr. Sinitsin, has given to the world something to think about I promise you that. It is the first time such a statement has ever been released, with the exception of the release through "PSYCHIANA". And I don't claim to be a world-famous scientist. I claim nothing at all, except perhaps that through years of search and heartache and toil, I finally came to the place where I was willing to actually believe in the existence of the great God-Law here and now.

I could write at great length on this article, but won't do that here. I just want you all to know that the greatest scientists in existence are, one after the other, corroborating the findings I gave to the world three years ago. I write this with a feeling of perhaps pardonable pride. Greater than all though, I write it with the full consciousness that the day is close at hand in which the full knowledge and power of an all-sufficient God will be fully known. To my students I say—"don't be afraid to risk your all on this great Presence, for It is a Law, and so can never fail you". Follow my Lessons very closely, for every one of them is full of spiritual truth and power, and they will lead you to the great Spirit of God if you will let them. Here is Dr. Sinitsin's article:

LIMIT ON SIGHT HIDES LIFE'S KEY

Scientist Says Secret Will Always Be a Mystery.

LIGHT BARS WAY

Theory Is That Aphanobionts Move From Planet to Planet.

By Associated Press.

LOS ANGELES, Dec. 11.—A scientific analysis explaining the mystery of eternal life and its existence throughout the universe was offered here by Professor D. F. Sinitsin, Russian scientist.

In a conference with members of the Sigma Xi, science fraternity of the

University of California at Los Angeles, he presented an amazing definition of the basic, invisible processes of life. The explanation came as a simple conclusion to his discussion of ultramicroscopic living organisms.

Light Crimps Sight.

First, he pointed out that the limit of human sight is fixed by light. In this regard, he said, it appears that science has reached the observational limits of the microscope.

The measure of infinitesimally small things is the millimicron. There are 25,400,000 millimicrons to the inch, this measure being one-millionth of a millimeter.

Physicists, he said, point out that the shortest wave length of visible light is not less than 400 millimicrons. Nothing smaller than that can actually be seen by man with any type of instrument. By means of diffraction of light, however, it is possible to see the reflection from things as small as about 200 or maybe 150 millimicrons.

Other Means Aid.

Means of experimental investigation other than sight, he said, have determined the existence of living organisms as small as eight millimicrons. This is by means of porcelain filters on which a colloidal film is placed whose pores are known to be of definite size.

These filters have proved the existence of invisible ultramicroscopic organisms in the investigation of disease virus. There are a hundred such different invisible disease virus known, including virus of smallpox, measured as between 125 and 175 millimicrons; mo-

saic plant disease virus, measured at 30 millimicrons, and foot and mouth disease virus, measured at about 8 millimicrons.

The albumin molecule is known to be about 6 millimicrons and the hydrogen molecule figured about .16 of a millimicron.

Genes, the invisible life units of heredity in all forms of life, have been estimated by Thomas Hunt Morgan, noted biologist, to be something between 8 and 30 millimicrons in size.

"The chemical theory of the origin of life is that after the earth cooled chemical substances came together and formed living organisms," he said.

"We know that some disease virus resist heat and poisons that no known form of life can withstand. Some live without oxygen."

May Be Eternal Life.

"I conclude from these investigations that there are invisible living organisms, perhaps of eternal life, that are back of all life processes. If there are bad or disease organisms why not good or life-helping organisms?"

"I would call them aphanobionts, meaning invisible life."

"They are so small that they can escape all of our means of observation. They undoubtedly exist not only on the earth, but everywhere."

"Aphanobionts not only can be transported from planet to planet, but can exist in all space and conditions of the universe."

"That would explain the mystery of life and why it will always be a mystery to man, because it is beyond his power of sight."
