STATION ANNOUNCER: ~~We present - "Flashes of Truth!"~~

ANNOUNCER:

Ladies and gentleman - in just a moment you are going to hear, TRANSCRIBED
the voice of a man who will tell you some tremendously im-
portant facts - some AMAZING facts. The voice of the man
who has made a discovery that is revolutionizing human thought,
changing human lives - bringing happiness and success where
discontent and failure were before. A discovery which in the
short space of one year swept across the continent - encircled
the earth, invaded almost every country on the globe. The fol-
lowing fifteen minutes is far too short for him to explain his
discovery in detail. But he is going to give you flashes of
it - flashes of truth that ~~will~~ ^{may} startle you. You probably al-
ready know about this man - have heard his name mentioned
many times. ^{You have seen his picture in outstanding newspapers and Magazines} He is Dr. Frank Robinson - one of the most out-
standing figures in the world of modern science. (SLIGHT
PAUSE) But first, we introduce you to your guide, who will
take you to Dr. Robinson's home.

~~It will be my privilege to interview Dr. Robinson~~

(ORGAN - "LET THE REST OF THE WORLD GO BY" - ALONE FOR
INTERVAL: THEN B. G.)

GUIDE:

Away out in Northern Idaho, where the pines are nodding and
swaying to the whispering breezes of the wide open spaces,
nestles a little home. In that home is a beautiful pipe or-
gan; and seated at the console of that organ is a man who is
internationally known and who has given to the world the answer
to a question that has puzzled mankind since the beginning of
the human race. Before we meet him, let's listen a moment
while he plays.

1 ?

GUIDE: That's a tremendous claim, Dr. Robinson.

DR: Yes - because behind it lies a tremendous truth.

GUIDE: I'm going to be just a bit skeptical now -- HOW does it enable a person to turn failure into success?

DR: Let me answer that by asking YOU a question. Do you know anything about a radio set?

GUIDE: Well, I know how to twist a dial.

DR: But you've seen the various devices that go INTO a radio set, haven't you?

GUIDE: Yes.

DR: Now, if I give you all the things you need - tubes, and amplifiers and so on - could you put them together so that sitting here in my study in Moscow, Idaho, you could hear an orchestra playing in New York?

GUIDE: No, I'm afraid not.

DR: Why?

GUIDE: Well, because I - I don't know the principle upon which a radio set operates.

DR: That's the answer to your question. You - nor anyone else, can build a successful radio set unless you know the principles - the law - by which radio operates. And you - nor no one else - can build a successful life unless you know the principles - the law - by which LIFE operates.

If you had never heard of radio, and I gave you the various necessary equipment and told you that by using it properly you could hear an orchestra playing in New York, you'd say "Oh, that's impossible - it can't be done." And yet, it CAN be done.....if you know the underlying principle. Ever since men and women appeared on this earth, they've had the equipment to make a spiritual radio set - a radio set by which they can tune in, and use for their own benefit, a tremendous power. ONLY, until just recently, no one has known how to assemble this equipment and make it work - until just recently, no one has known the law by which it operates.

GUIDE: You mentioned a tremendous power - a power that a person can tune in on and use too, for his own good. What is this power? How do I know that it really exists? Prove it to me.

Dr: I don't have to prove it to you. You can prove it to your-

self. Go out some evening and look at the stars. So many you can't count them. And these are only a few. There are so many, many more that are not visible to the naked eye. Yet all of these stars move in their courses, with such exactness that scientists can calculate their movements far in advance. Doesn't that indicate there is an intelligent power governing this universe? Now let's go to the other extreme. Let's take the atom, so infinitely small that you or I have never seen one. Hydrogen atoms and oxygen atoms combine to form a microscopic molecule of water in the proportion of two to one -- two hydrogen atoms to one oxygen atom. Always combining in the proportion of two to one, never three to one, nor four to one but two to one. Whether you look at the ocean or a rain drop, what you see is molecules of water formed by hydrogen combining with oxygen in the proportion of two to one. Again the working of a law - a law that operates with mathematical certainty. Now doesn't plain common sense tell you that a law which governs everything in this universe from gigantic planets millions and millions of miles away down to microscopic things like atoms, or even smaller yet, electrons, can ALSO govern human life? And with the same degree of certainty.

GUIDE: Yes - I begin to see your point.

DR: Suppose a molecule of water were like a human being - suppose it moved of its own volition - its own will power. And suppose instead of forming itself of two parts of hydrogen and one part oxygen, in accordance with governing principle, it ignored the principle and used another proportion. That molecule would probably say, "Somehow or other, I'm not right. I'm not as healthy as normal molecules should be. I'm a failure. I guess I'm just unlucky." It's simply that the molecule is not acting in accordance with the underlying law. And it's the same way with men and women. Let me say something which I'd like to have you remember if you forget everything else. The DIFFERENCE between success and failure lies in the understanding of the law GOVERNING success and failure. You can argue anyway you want to: but you can't get away from that fact!

GUIDE: But, Doctor, you say this law has always existed. I thought your discovery was something new.

DR: The law isn't new. The power HAS always existed. I have been fortunate enough to discover how men and women can apply it to their own lives, can tune into this power.

GUIDE: And people are making this discovery, this philosophy of yours actually work?

DR: I think that question answers itself. If my philosophy WERE NOT helping people, it certainly would not have the wide-spread acceptance it has today. Doesn't it stand to reason that a philosophy which has thousands and thousands of followers in all parts of the world MUST work - MUST produce results? Not vague, abstract, intangible results which will happen sometime in the future, but practical benefits that happen RIGHT NOW! Benefits that any person if he is willing, can enjoy.

GUIDE: It sounds like a miracle, Doctor.

DR: No, it isn't a miracle. I'm not a miracle man, I haven't any magic potion. I have perfected my studies and proven them - just as inventors study out and perfect radio. One is no more marvelous nor impossible than the other. They both have come about through scientific research. Let me make a little confession. Forty years ago, there never lived a bigger failure than I was. For forty years I have struggled with the winds of adversity and was defeated at every turn. I blundered along, lacking all the things I wanted, getting nowhere. I was like a man in an automobile who doesn't know how to control nor steer that automobile. The mechanism was there - the power was there, but I didn't know how to use it. And just like such a man in an automobile, finally the crash came. Then I began to do some thinking.....some thinking that I should have done years before. It occurred to me that surely the great overwhelming power or law which created and governs the whole universe is powerful enough to give me the little things I needed for success, happiness, and financial independenceif I only knew how to tap that power and tune into it. I studied out a plan, put it to work. And it DID work. It worked for me; and since then it has worked for thousands of others whose names and unsolicited testimonials crowd my files. It's not a theory or an experiment: it's a proven fact. All I ask is that a person who is earnest in his desire for the better things of life, put himself under my guidance for a few months. Then just see what happens.

GUIDE: And just how do you tap this power, Dr. Robinson?

DR: I'm afraid it's going to take too long to answer that question in the time we have left. But I promise you this - I'll tell you more about it the next time you call on me.

GUIDE: All right, Dr. Robinson. Before I leave would you be kind enough to play for me?

DR: Certainly.
