

My dear Mrs. K: I am very glad, indeed, that you came to me with your problem, because I feel absolutely certain that I can help you out, and do it very easily.

You state, Mrs. K., that your husband is a mechanic, and that makes my task all the easier because I know that certainly he will be interested in what I am going to say to you now.

Perhaps the greatest discovery of the past decade is the discovery of the cosmic ray. Professor Millikin of the California Institute of Technology has done more to throw light on these ~~little~~^{great} rays than any other one man. There is a lot we do not know about them yet, but there are some things we do know, and those things we do know are mighty important, ~~things~~.

Now it is a definitely established fact that these cosmic rays permeate the entire inter-stellar space; no one knows where they originate, nor does anyone know why they are there. We do know, however, that these rays are bombarding this earth every second of the day and night with an energy of more than 15 million volts. Now, Mrs. K, you ask your husband to study over that statement for a little while. It isn't theory; it is a definitely proven fact that these cosmic rays do--even at this moment as I am speaking to you-- bombard this earth with an energy of over 15 million volts. You saw in the newspapers recently where Prof. Pickard (?) went into the stratosphere, with his ~~stratosphere~~ balloon, solely to examine and discover more about this great cosmic ray. Personally, I have heard these rays clicking in an electric light globe, so there is no question whatsoever about their existence. ~~.....~~.

Now, think ~~over this thought~~^{THIS OVER}: these rays exist, they fill all space, even out yonder, billions of light years away, -- they are even /N

the very air we breathe! So - you are practically living in the middle of an ocean of "~~cosmic~~^{COSMIC} energy". that permeates all space!

No man alive can state that this is not the truth. Now let us suppose, for just one moment, that these electrical or ~~magnetic~~^{COSMIC} rays, whichever you choose to call them, might be thinking rays. Then, what? Would that not prove that we live in an atmosphere and in a universe which is filled and charged with ~~magnetic~~^{COSMIC} energy? Of course it does! Sir James Jeans, the famous English scientist, claims that these rays are emanations from a universe which is disintegrating while Professor Millikin of the California Institute of Technology, states that the rays are emanations from a universe which is building up.

~~Now~~, Personally, I lean to the latter theory. I believe very definitely that there is in the atmosphere all around us-- permeating all space -- a great cosmic intelligence which is there for our absolute use and disposal. Look at the building in which you reside. What was it originally? Where did it ~~originate~~ come from? It first originated in the mind of the architect. He first drew a mental picture of the finished structure; then he transferred that mental image to a piece of paper, and the blue print was made of it. ^{That} ~~The~~ piece of paper was handed to the builder, and the contractor, and they, in turn, laid brick upon brick, stone upon stone, exactly in accord with the mental image the architect had in the first place.

That isn't hard to see, is it? Now let us suppose that every created thing first had its origin in this unseen, cosmic realm. Do you not see what a stupendous power that puts into your hands, and mine?

Suppose it is possible for you and for me, to draw a cosmic, mental picture, we will say, of the very things we need, and leave it then, for the cosmic realm to bring into existence. Do you not see how correct my

theory of the realm of God really is? Of course you do, and you MUST see, you MUST know that this very moment you are existing, day by day in a realm of infinite power that is capable of bringing ~~anything~~

~~anything~~. INTO EXISTENCE, EVERY RIGHT
DESIRE OF YOUR LIFE

14 "Dr. Robinson" Last week I happened to read your
15 book "The Secret of Realization." Being myself a
16 literary man, sworn translator (English, German and
17 French, and an ex-secretary to the late William J.
18 Stead during the second Peace Conference at the Hague
19 in 1907, I can state that you have not only shown a
20 clear understanding of the Living God, and of the
21 Cosmic Ray, but you have made others catch it also.
22 As you, I also am a son of a minister, and though my
23 father was a modernist, I never felt satisfied and
24 have been a searcher for the Truth for many long years.
25 Your message is a wonderful revelation to me.
