

THE AMERICAN FIFTH COLUMN.

This Movement is predicated upon the existence, somewhere, of an invisible Power from which came all Life. The fact that Life exists on this earth proves that this Power, the author and sustainer of Life, also exists upon the earth. Millions of years ago, somehow, somewhere, the Life-Principle came to this earth. This fact is no less wonderful if its manifestation took millions of years than if it was an instantaneous creation. The fact remains the Life or God does exist on the earth.

It is a fact that the human race has existed on the earth for several hundreds of thousands of years. So far as this race goes, it has been a physical, mental, and moral evolution, to-wit: The Pekin Man - The Cro-Magnon Man, and the Neanderthal Man. Man has always had some sort of a concept of God.

There has always been that hidden desire to know the Creator. Man has always been conscious of the fact that there is a Creator. He has always longed to enter into a conscious union with his Creator. Makes no difference if this world and man came instantly from the hand of the Creator by one act of creation, or whether it was evolved from a fire-mist. The desire to know God has always been an inherent part of man, savage or civilized.

The savage saw God in the storm - in the lightning and thunder. The civilized man (if there is such a thing) sees God somewhere in the skies. Evolving religion has taken God out of the storm and the lightning, and placed Him where He is equally inaccessible - in Heaven. Civilized religions have advanced the theory that man was born "in sin", therefore, standing in need of some special act of saving grace on the part of God, before man can know God.

In any event, all civilized religions direct one to God through the path of the tomb. None of them promise fullness of the knowledge of God here and now. They tell us we cannot ever know God as that Great Spirit exists - invisible. They tell us that we must know God through a son God had, who, to pay the debt for man's inbred "sin", was himself killed on a cross.

That theory has been advanced a score of times by a score of systems of religion. Religious tradition records a score of "gods" sent from Heaven to save the world. But the world remains unsaved. It does not know God.

Now, it has been abundantly proven during the past fifteen years that not only can the Power of God be found right here on the earth, but that Power can be used by every normal man and woman, with or without church affiliation. Moreover, the sorrows of this old globe are directly due to the fact that God is an absolute unknown factor in human lives. No theory of God which separates God from the human race with promises if God "beyond the tomb" can do one thing to alleviate the misery of humanity today. An absent God is a useless God. It is blasphemy of the worst kind to accuse God of being able to stop this war, and refusing to do so because you and I will not, or cannot, or do not subscribe to some system of theology advocated by the civilized religions. These are all good. But they cannot reveal the Power of God to the human race. No one is to blame for this. Religion has been allowed to stand still and stagnate. That is to die. It has looked to the past for its inspiration instead of looking to the here and now or to the future.

The world stage is set for the manifestation of the Power of God being brought to this earth through this much-ridiculed prophet in Moscow, Idaho. The American Fifth Column is offering an approach to

God which is so fundamentally different from any approach offered before, that there is nothing in common between them. Instead of "praying", which predicates an absent God, the American Fifth Column recognizes the present existence of God on the earth with all the dynamic creative power that implies. It does not attempt to define God as other than the author of all Life, and the attributes which are Life, because Life came from God and must be God.

In other words, man is about to discover the staggering fact that because God did "breathe into his nostrils the breath of Life", just so long as life manifests in the human body, God also is capable of manifesting, in and through this thing called Life, in that same human body. To awaken to this fact is to solve the mystery of God. It is also to solve every other problem which has befuddled the human race since time began.

Now what is the method whereby the Power of God can be discovered and manifested on the earth in human lives? Well, strange as it may seem, a very simple rule obtains for throwing the Power of God into action. The old savage had the germ of the idea when he fell on his face in the storm and begged God not to destroy him by the lightning.

Civilized religions have the germ of the idea when they meet in their churches and say "Let us pray". What they are trying to do is to establish a definite and direct connection with God. They ask God to stop the war and bring peace. They have the idea but the method is wrong. They never expect God to do anything of the sort.

Now the simple rule governing the discovery and operation of the Power of God becomes instantly plain, when we agree on one thing. That one thing is to recognize the existence of God, and to admit that Almighty God has the Power to destroy such monsters as Hitler, Tojo, and old Mussolini.

Once we agree on the present existence of God, and the ability of the Creator to accomplish any good thing desired, the only thing needed is to discover the method whereby this vital, dynamic contact can be made, with the subsequent elimination of all wrong from the earth.

So what do we do? Well we change the negative, doubting practice of praying into a positive, confident attitude of absolute assurance, not only of the invisible presence of God in our midst, but in the ability of God to dethrone the powers of evil. And so, knowing these two things - what else is there left to do other than to affirm to be a fact what will be a fact when we do affirm it.

You can't shovel electricity out of a dark room, for darkness is not a thing; it is an effect. It is the absence of light. You remove it, not by treating it as an entity, but by throwing the electric light switch and when the electricity is turned on, there is no more darkness.

Now, in the realm of God, we all recognize the existence of God and we also admit that the Creator can manifest here on the earth to the immediate elimination of those who are bathing the earth in human blood. So - we speak the Power of God into existence against them. And lo and behold - the formula works! It has worked to my personal knowledge for fifteen years and in hundreds of thousands of cases of every conceivable kind of disturbance. Too many times for it to be coincidence. It is now a definitely proven fact.

If God breathed into man the breath of Life, then the spoken word of man is the spoken word of God. For it is only through the Life of God in man that we can speak at all. Most of the Bibles of the civilized religions talk much about the "Word of God". But when man became a living soul through the Breath of God in him, as long as that

Breath last, that man is in direct contact with the God who placed the Power of Life in him. He may never recognize that Power. He will probably go through life in complete ignorance of any such Power. But he has it just the same. And if he will follow the plain, simple rule of speaking the Power of God into existence against undesirable world conditions, he will put into operation against the Axis, the most dynamic Force this world can ever know.

So the American Fifth Column then is calling upon all Americans of all faiths, and those of no faith, in an endeavor to bring the Axis triumvirate to its knees by the invisible Power of the Spirit of God.

Many remarkable happenings are recorded of every religious prophet who has left his or her name on history's scroll. The Prophet of Palestine - he raised the dead - and how did he do it? By speaking in a loud voice - "Lazarus, come forth". He stilled the tempest. And how did He do that? - He spoke loudly "Peace - be still".

He had no other method of demonstrating the Power of God against undesirable circumstances. Neither have you, for this method is universal. You can do it just as easily as the Prophets did it, and you will do it when you actually believe that God exists, and cannot help but respond to the spoken, earnest word of man. Krishna of India, the great Buddha, Confucius, Mohammed, the Peasant of Palestine - all these and more grasped the secret of manifesting the Power of God in human lives through the spoken word.

For the Spirit of God is behind that spoken word. It is in it. Therefore, it cannot fail. If one million Americans will, three times daily, unitedly throw the Power of God against the Axis, this earth will witness the most remarkable demonstration of the Power of God since time began.

There are no fees, dues, or other payments to be made to the

American Fifth Column. Money does not enter into it. You may clip the card from the American Weekly or send direct to Dr. Frank B. Robinson, Moscow, Idaho for a card. When you receive it, tack it up in a prominent place. Every time you look at it, repeat the statement on the card intelligently, and loudly.

The Axis cannot stand against such a flood of invisible Power as will be directed against it by the Spirit of God.

The Axis is wrong. Their methods are wrong. Only ignorance of the Power of the Spirit of God justifies our using their methods against them.

Millions of honest conscientious Americans are wondering if God will not speak in this time of international suffering. They wonder why He has not spoken ages ago. They ask why God allows these bloody conditions to exist. Not a few are looking to the skies for some supernatural manifestation from God.

But that is useless. God never demonstrates His Power in any other way than through some man. God has already provided the answer to the supposed "mystery" surrounding God, and that answer has come through man. The fault has been man's - not God's.

And so, God having revealed the method by which His Power can be manifested on the earth for the elimination of the Axis, it remains only for men and women to immediately begin using the simple formula advanced. It is utterly fool-proof. It cannot fail because God lives.

Our methods of contacting God have been wrong - that's all. God has always been unchangeable spiritual Law. You can use the Law of God, not only to stop the Axis, but to eliminate poverty, illness, sorrow, etc., in your own life. Try it. If you mean business, so does God, and He never fails.
