

THE MOST SIGNIFICANT DISCOVERY OF THE AGE

IS WHAT?

Your mind will probably answer this question in many ways, and perhaps a thousand different opinions might be advanced. Some might say the discovery that man was millions of years old. Others might say that the "Black Ray" was the most significant discovery—but all would be wrong. For the greatest discovery of the modern age is that

Every man can call on the God-Law at will, and when once understood and used, man can get from it everything he may need—whether it be happiness—health or material abundance.

The Surging, Throbbing, Pulsating Power of the Mighty, Invincible God-Realm Can Be Yours!

Through it, you can accomplish what you will. Does this seem too good to be true? Then let us say to you that it is just as much your servant as was ever the fabled lamp of Aladdin. Also—its power is equally as potent. There is now no need for any to be poor or downtrodden. The irresistible dynamic power of the God-Realm calls us to abundance. Does fear permeate your very fibers of being? The flaming truths of the God-Law banish forever the last faint vestige of fear. These flaming truths once and forever put fear where it belongs—and that's not in the human race. Is there that in you which seems to hold you back and make achievement impossible? The same mighty power that wheels the very stars in their orbits, and spins the myriads of galaxies at will, can come into your life and make it a transcendently beautiful thing, bubbling over with power, and achievement. For this is a "God-Law." It transcends human thought, and no human alive can tell how it operates. But we do not need to know; all we do need to know is that by its seemingly magic power, everything we need in life can be ours. This is the new conception of God first given to the world by "PSYCHIANA." In one year it went into 67 different countries. The results are stupendous, as our files show. We offer you the opportunity to study with us. We would like you to take that opportunity just to see the joy and amazement which will overcome you when you get the first faint glimpse of the magnitude of what we are teaching. And remember—you money comes back to you if you are not completely and absolutely satisfied. (See money-back guarantee.)
