# IS ETERNAL LIFE ON THIS EARTH POSSIBLE?

Read the following amazing A. P. statement:

## PERPETUAL YOUTH FORECAST FOR HUMANITY BY SCIENCE

NEW YORK, April 21 (AP)—A two-hour work day, complete defense for women and children in war, no more growing old but instead living a whole life at 22 or 35, and a start at giving Mars some water and Venus some oxygen in her atmosphere were forecast tonight by Thomas Midgley, vice-president of the Ethyl Gasoline corporation.

The forecasts for the next 100 years were released by the American Chemical society on the eve of the gathering here of 10,000 scientists to celebrate the centennary of chemistry in America.

### End of Ills Forecast

Dr. Midgley said the forecasts classify probabilities which do not overstep the boundaries of accepted natural laws. Some of them are certain, others may be delayed and it is not now possible to predict which. But it is quite certain, he thought, that there will be an end of colds, flu, tuberculosis, septicemia, possibly cancer and many other ills.

In the synthetic home in the next century, he said, you will throw off the bed clothes by snapping your fingers, warm the room instantly by pushing a button, then throw your pajamas into the waste basket, for then cellulose goods will be so inexpensive it will be cheaper to throw the pajamas away than to launder them.

"Indigestion will be unknown," he said, "for with discovery of certain hormones in the stomach of the boa-constrictor, and their subsequent synthesis, it will no longer be necessary to stay up after eating in order to digest one's dinner—just a boa pill and right to bed."

"Sleep will be undisturbed and bad dreams banished. There will be "dream tablets," chemicals inducing only pleasant dreams, or at choice other tablets stopping all dreams.

"Engineering," Dr. Midgley said, "is already waiting for chemistry to give a fuel which will be capable of releasing more energy per pound than it is required to lift that pound out of the earth's gravitational field. Given such a fuel

interplanetary travel will become a possibility.

"Gasoline, explosives or other materials which depend on combustion for their release of energy fall short of this requirement, so that a really new magnitude of storage energy must be looked for. This, perhaps, may be found in radioactivity.

### Better Brains Foreseen

"I should not care to give the impression that interplanetary transportation will become a commonplace immediately. Considerable preparation of environment will be necessary. Mars will need water, Venus a new atmosphere, all of which will mean work for future chemists and engineers."

The better health available, Dr. Midgley said, would make it possible to develop mentality also so that young men could enter scientific laboratories "and solve our most intricate problems overnight."

Chemistry and physics will develop defensive weapons in war to offset any sort of destructive progress.

"The control of the age cycle," he went on, "will become a fact, making it possible for an individual to order an indefinitely long life, except for accident, at any given age level, he or she may choose, such as 30 to 35, or 18 to 22. If you will let me extend this prediction to the year 3035 I shall include the statement that by that time Methuselah's record will have fallen."

### Big Pigs Coming

Agriculture will be speeded by controlling the amount of ozone in the atmosphere and in many other ways, particularly with synthetic hormones to promote growth.

"In this way there will be a much greater and more rapid meat production," Dr. Midgley explained. "A century hence chickens will be the size of pigs, pigs the size of cattle and cows and bulls as big as mastodons, yet the food consumed to accomplish this will be no greater than used at present."

Six years ago Dr. Robinson published the statement that he considered the proper place to enjoy eternal life is on this earth, here and now. He has always believed that when the laws of God as they actually exist, are fully understood, eternal life, or living forever on this earth will be the natural order of things. He thinks this is as it should be. He was laughed at when he made the above statement—but the "orthodox" have always laughed at the seers of the race. Study "PSYCHIANA" now—it might surprise you with its teachings.
