# ALASKA'S WILDERNESS RAILS

## From the Taiga to the Tundra

A pictorial review of the ALASKA RAILROAD

BY KEN BROVALD

The Alaska Railroad was completed in 1923, connecting tidewater at Seward to the bustling mining town of Fairbanks, 470 miles north in the interior of Alaska. It has been the life blood of the state ever since.

The author has compiled a large collection of photographs of the contemporary years of the railroad operation, covering the line from the now little used Kenai portion, to the port of Whittier, Anchorage, the wilderness of the interior, spectacular Denali National Park and Fairbanks.

This book will be of interest to railroad buffs, model builders and as an addition to an Alaskan book collection.

**\$8.95** RETAIL. *Add \$1.25 postage on single orders.*
