

"TUK-TAB" O.S.S.P.
ROCKMONT—DENVER

After placing negatives in envelope, fold this "Tuk-Tab" in over them and then put in the prints. Prints and negatives are kept separate, prints easily accessible and negatives protected from unnecessary handling.

Night Pictures

No photographic history of your family and friends is complete without pictures of the interesting things that happen indoors after the sun goes down.

You will enjoy making night pictures, and thanks to the new highly sensitized speed films and to inexpensive photoflash and photoflood lamps, they are just as easy to make as outdoor snapshots in bright sunshine.
