Dear Maurice,

It was great talking to you on the phone and thank you for your letter dating Oct 18.

Gen would love to go to the Taylor Ranch - I wish it was me. I do have some corrective dates to ok. with you. You mentioned March 26 thru April 2nd - the latter should be April 7th. Is this ok with you all? As we have to allow for traveling time I will pinpoint this ^{dates and time} for you as we get airline reservations etc. I will also send money with Gen to pay the air taxi and food bills etc.

Thank you so much for giving Gen this opportunity and feel free to take your family into Running Creek at any time.

Sincerely
Eddie

Dear Eddie:

Thanks for your letter. No problem on the dates. Boise would be better arrival point than Spokane or Missoula. We would have reliable air taxi and someone there to meet Gen and go on to Taylor Ranch.

Best wishes for the holidays.

Sincerely,

Maurice G. Hornocker

Hello Gen:

I am Holly Akenson. My husband Jim and I are managers of Taylor Ranch. We manage the station and work on research in the wilderness. Maurice Hornocker asked me if I could show you the workings of Taylor Ranch Research Station and let you get involved in research going on while you are here. Gary Koehler will be working on a bobcat study. I will be working out the bugs on a bighorn sheep project for next year. I will also be doing some plant and animal collecting. Do you have any special things that you want to do while here? We can pack wood with the horses, stuff mice, or watch bighorn sheep all day.

We will probably spend most days hiking the trails, so bring hiking boots or shoes. We have a cabin for you to stay in, but you could bring a sleeping bag. You will probably camp out in one of Gary's "tent camps", so bring warm clothes! There are many scenic views, lots of wildlife, and Gary's pet bobcat for photographing. I will count on you eating with us. The cost for meals will be \$10.00 per day.

Maurice said you will be here March 26 through April 7. Do you want me to make arrangements with the local air taxi service to pick you up in Boise? Send me the date and time of your arrival. I can be reached by radio phone: (208) 382-4336. We will be looking forward to your visit at Taylor Ranch - especially after a long winter with few visitors!

Sincerely,

Holly Akenson

Dear Jeff;

The Helena crew has been out for the past 4 weeks. Today we are on standby in McCall, and it is raining, so I'm trying to catch up on past letters.

I always planned to reply to the little update letter you sent last winter. Actually I did not get a single Christmas card out. After hearing (while in Taylor ranch) that my ma was sick, she went down fast. She died in March. Its just now that I am starting to write to anyone.

I hope things are going well for you at the ranch this summer. I'm assuming you are there. I hope you were able to put on some courses, and finish some projects such as photovoltaic panels.

I really enjoyed my time at Taylor Ranch last year, though I wish I would have accomplished more. If you are looking for someone for this winter, I would be interested.

My future plans are a bit uncertain, so if you find someone that is a for sure thing, that would still be the way to go.

In any case, I hope to get to Taylor Ranch again someday (NOT in the F.S.). maybe I'll get there as a student.

Sincerely,

John May
