Hi Jim and Holly!

How are you two doing? I hope everything went well with your selection process this year! So far, I have three definites from IDFG biologists: Jennifer Soules, Joel Sauder and Beth Waterbury. I have one definite no from Bruce Haak, and no response from the others yet. I'm going to re-email those guys this week and see what they're thinking. Everybody is wondering about costs. What are you two thinking? Were you going to use some of the grant for the flight and then charge a nightly fee, or have the biologists pay for the flight and not charge a nightly fee, how do we want to work this so I can provide them with some answers? Also, Beth is out of Salmon, and it makes sense for her to fly in with Salmon River Air, right? So that is something else to throw into the mix. Joel Sauder said we could use his bat-trapping equipment from Clearwater, and I asked Rita about getting a permit and she said that she was OK with me doing that. So I emailed Chuck on Friday about that, but he hasn't gotten back to me yet. Talk to you soon! Russ and I are off to collect bugs down on the Clearwater and Snake for one of his classes and I'm going to try out my new binoculars!

 Flight + expenses

Workshop participant expenses

Their flights to TR

Lodging \$15/night @ 3 nights = \$45

Food \$.18/day @ 3 days = \$54

\$99

No workshop registration fee

2/18/2004

ISU-UI Trip

HATI-US  
JOBS

Wayne Mon 10 AM - Thurs 10 AM  
to Cabin Cr From TR

Katy & John - Monday 10 AM or 12 AM - Thurs 10 AM  
to Cabin Cr  
(4 1/2 hr drive + time change)

or SUN mid afternoon to TR - Thurs 10 AM  
(Ride to CC next morning)  
We ~~can pay for~~ <sup>will provide</sup> flight, food, mileage to Cascade,

Fly from Cascade - more reliable for weather?

We'll set up flight date/time for what works best for both of you  
- best time to drive down

Itinerary: Monday: Fly or <sup>mule</sup> Ride/hike TR  $\rightarrow$  Cabin Cr. <sup>tent</sup> set up camp for  
7 miles

1 overnight, explore area: carnivore-ungulate interactions  
aquatic sites

Tues: Hike/mule pack to TR, facility tour, collaboration, discussion  
- stream corridors fire

Wed: Hike around TR -  
Aquatic sites, rangeland, fire, monitoring, archaeology

Bring daypack, sleeping bag, warm clothes & boots, binocs.  
(we can supply sleeping pads, tent or BYO)

# Bats in Mines Emergence Observations

Mine name (if known): Cave Creek Cave

Location: Jct. Cave Creek & Big Creek - FCRNR Wilderness

Observers: Joel Sauder, Lauri Haunuska-Brown, Beth Waterbury, Sam Cisney

Date: 3 May 04 Time: \_\_\_\_\_ Temperature (outside at sunset): \_\_\_\_\_

Number of entrances observed, trapped, or netted: 1 More suspected:  Yes  No

Start time: 20:30 End time: \_\_\_\_\_

Wind:  None  Light  Moderate  Strong

Techniques: Kind of light used:  Ambient  Red light  Night-vision device  
Bat detector used:  Yes  No Frequency setting: \_\_\_\_\_

Number of bats: Visually counted: \_\_\_\_\_, passes heard on detector: \_\_\_\_\_  
or estimated from length and density of emergence \_\_\_\_\_

Total bats caught in: trap N/A or net N/A

Percent of mine entrance left open: N/A

Bat Identities/Reproductive Status (include number caught for each species):

Confirmed: \_\_\_\_\_

Suspected: \_\_\_\_\_

Comments: ~25 white-throated swifts flying/feeding over cave; GH owl observed flying out from cliff above cave @ 19:00 - flew to SW; Common Merganser observed landing in small alcove above cave!! Roosting? Nesting? First bat out of cave @ 21:15

All entrances sampled must be clearly identified; illustrate on reverse if necessary.

Exits

HR (18) - 1st shift

(i) 2nd shift

End time 11:44pm

Entrances

~~HR~~ (13) - 1st shift

(0) second shift
