1-11 MS, PA

Snowed 10" last night. Started out hiking to Corey Camp but only made it to the mouth of Cave Cr. Slow going. Took 1 hr 20 min. Wolves crossed Big Creek coming out of Conyer Cr + headed up Cave Cr., up to Vinegar Ridge + were near the top but on the Cabin Cr. side at 3:30 pm. Mike + I followed the tracks up Cave Cr + tried to get signals at old cabin, Couldn't. Turned around and went back up Cabin Cr. and got wolf signals near top of Vinegar Ridge above Travis Camp. Cabin Cr. is still in Cabin Cr. about half way between airstrip + forks on west side.

1-12 RB, PA

Renan + I rode up to Corey Camp from Cabin Cr with all

5 head of stock Packed 4 bags of cubes. Tried to get signals at mouth of Cave Cr. + Garden Cr. Couldn't get anything. Came across 3 tracks just before Corey Hole. Probably wolf but not certain - too much snow in them. If they were wolf they probably weren't part of radio collared Chamberlain Pack. Saw all 3 radio collared Chamberlain wolves at 3rd creek crossing in Corey Cr. I saw 3 + Renan saw those 3 plus 1 more that I missed. They ran up ridge on west side of Corey and started howling. Another group then started howling on east ridge of Corey. We continued to camp + confirmed radio signals. The wolves howled for about 1 hr. From 12:30 pm - 1:30 pm. At about 1:30 I was on the "thinking stool" when I saw 4 wolves run down the east ridge of Corey. Later we

Back tracked wolves up Coxeys trail + west ridge of Coxeys + then back down to forks. While on west ridge we found where wolves had bedded down near the rib cage of a deer that was quite old. We then went down to the 1st fork of Coxeys + found a leg bone, hoof and hair from a elk. Also old. From there it appeared the wolves had come down the east fork. One wolf had a blood drop in its right toe of its right foot. Not very often. Only found 4 drops in all the back tracking. Got wolf signals from west ridge of Coxeys above 3rd Crossing. No cougar signals. Wolves were ~40 yds from us when we saw them.

1-13 RB, PA, MS, HA

Reman + I checked for signals at Coxeys Camp. Didn't get any.

Wolves head upstream (Big Cr.) But could be anywhere. We then headed back to Cabin Cr. to meet up with Holly + Mike. They had found the kill from the Cabin Cr ♀, the day before. Mike + I then headed back down to Taylor R. with the stock. Saw 6 cow + 1 calf across from Lobaur Basin + 8 deer downstream from Lobaur at the south side of Big Cr. Also saw 1 bull (6 point) below Browns Basin ~ 75 yds above trail. Cut 1 cougar track at west most gate.

Got within 60 meters of cougar. Cabin Cr. ♀ was about 1/2 mi farther up Calf Cr. but on south side. Got wolf signals from Cabin Cr. airstrip. Coming from Canyon Cr. Not a very good signal.
