Chris + Q hiked up to
Cabin Cr. after helping
to move the shed at
ranch,

Chris + Q hiked up
the West Fork of Cave
and over the ridge into
the East Fork of Crooked
Cr. using the old
Oswell trail. Chris
got a fix on C-6 in
the West Fork of Crooked
Cr. about 1 mile. Didn't
find any hills but
there is all signs in here

Parts of the drainage
are burnt but from
what I've seen so
far it isn't nearly as
burnt as Coney Cr.

We camped at the
forks in Crooked Cr.
Saw 2 does + 2 fawns
in the West Fork of Coney

We went up the West
Fork of Crooked to look
for C-6 hill. Spent
5 hours where Chris had
gotten signal the day
before but we never
found a hill. C-6
had moved out of the
area before we had
moved in. There have
been elk + deer hanging
out in the area but we
didn't see any elk and
only 3 deer. The area
around the forks was
burnt too bad but part

up the East Fork, also
some of the areas between
the forks and Snowshoe
Mine. The North facing
timbered areas burnt
the hottest. Found a
moose kill between the
forks + Crescent Meadows.
Go across from
Snowshoe Mine. We
walked up to Wilbur's
Cabin on Monumental Cr.
Not much sign in there.
Camped at Acorn Cr.
Found 3 old moose
antlers on Crooked Cr.

Hiked all the way up Little
Ramey then over the ridge
into Bismark Cr. Saw
wolf tracks in Little Ramey
(old) and found 1 ram
skull (old). Scent pretty
bad in most of the drain

not much game using it
except for a couple moose
in the bottom near creek.

Old moose tracks near
Benchmark Basin. Lots of
snow still there. Down

lower the drainage burnt
hot and is barren. No
fresh sign of game.

Found an elk, deer and
ram hill - all old.

Also saw a smaller
cougar track near
Crooked Cr. 1 cow elk
in Crooked Cr.
