

## **Jim and Holly Akenson**

**University of Idaho, College of Natural Resources  
Taylor Wilderness Research Station, Managers/Scientists**

**Research focus:**

- Large carnivore-ungulate, predator-prey relationships in the Idaho wilderness over a 40-year period
- Interspecific relationships and competition among large carnivores (wolves, cougars, coyotes, bobcats) and among ungulates (elk, deer, bighorn sheep, moose) sharing home ranges on Big Creek

3 undergraduate researchers, 12 students/technicians.

1985 - present
