Hi Jim & Holly,

Not much new here. No actions reference administrator of TWRC except that Bottger is apparently to handle budgetary work.

We did have a meeting with Physical Plant and the Controller's Office, so you'll be having visitors soon to develop a specific materials list for the Cabin Creek move and possible other projects.

Two things I'm to pass on:

(1) Apparently in the past there have been times when you claimed and received overtime. Bottger reminded me that since you are "exempt" personnel (like faculty, for example), you do not qualify for overtime.

(2) The Sheep Study funds are exhausted, so no more can be spent on that budget. Are you going to get a supplement to it? Seems like you were.

Thanks for your usual, excellent annual report. How is the continuous monitoring going? Is it working O.K., and have you developed a systematic way to record or summarize the data?

More as things develop.

Best regards,

J. R. Fazio
Department Head

js
P.S. Actually - this was a hand-scrawled letter and I've mistakenly typed it, I hate' good for your eyes.
