Dear Holly and Jim:

Hello, I am fine. How are you? So much for all that. I trust everything is in order in the back country for the winter season. I write for a purpose, however. I cannot find my copy of your range partitioning paper and Fred needs a copy. Can you provide him with one some way or another. I am enclosing a draft of his thesis for you to look at because it is an interesting compilation. It is not finished yet, but the work is going well.

I have been staring at maps making some sort of plan for next summer. I think I will have a bit of money. I do not know if it will be enough to finance any excavation, but--we will hope. I will be doing some survey for sure. On the basis of previous analysis I am going to do some predicting and see if the predictions work.

It is not even Christmas yet and I am planning for the summer. Egads.

Pat Golda.

*Frank*
