Dear Frank:

I am sending you the first draft of the habitat type paper. Look it over and comment where we may need to change it. I will hang on to the diskette until any changes are made. You will notice that the Appendix A is not included, nor are the maps. I still have to clean up the descriptions and finish one more overlay, Appendix D.

Sorry this is taking so long but I have been going through a lot of changes here. We are not moving to Portland, but we have moved to LaGrande (note new address). I am planning to go to school full time next quarter, and I have taken a job as the outside salesman for a local computer store. I will primarily be selling to agricultural concerns. I have just obtained my own computer (a Kaypro 4) and have switched all the document work over to this machine. As you could probably figure out I am incredibly busy.

I figured that you should probably look at the main paper while I fool around with the descriptions. This paper has first priority for after hours work, so I plan to get it done soon. Again, thanks for the patience and get ready for more.

By the way, is there one more paycheck coming? I haven't seen one since the big batch came, but I think there is one more in the wings. I could use it, so see what you can do.

Thanks,  
Bill Alexander
