Mr. Jim Akenson
Manager
Taylor Ranch Field Station
Air Star Route
Cascade, ID 83611

Dear Jim:

Thank you for your letter of February 17, 1986.

The delineating of spectral classes from MSS tapes cannot be accomplished with the COMARC system, but we may be able to establish spectral class files at ERSAL and transfer them to your COMARC system for display and manipulation. I did this with the State of Oregon and their Data General MOSS GIS system. I am enclosing some literature on this project.

The ERSAL budget could be altered to minimize expenses. I think we could get it to approximately \$9,500 if we had you purchase the Landsat tape and the infrared photographs.

Please feel free to contact me if I can provide you with additional information.

Sincerely,

A handwritten signature in cursive script that reads "Bill Ripple".
