Memo to : Oz Garton, Acting Dir., Wilderness Research Center  
From : C. Michael Falter, Prof., Fish & Wildlife Dept. *C.M.F.*  
re : INEL contract for air quality monitoring at the Taylor Ranch

---

Enclosed you'll find the INEL-approved Task Order No. 17 for air monitoring at the Taylor Ranch. I prepared the proposal this Spring to help out Ed Krumpe while he was on Sick Leave. It is complete now ...this Task Order empowers the Wilderness Research Center to purchase the equipment, get it installed, train personnel in its operation (Holly and Jim), and initiate sampling. Dale Bruns of the INEL is the contact person (contract officer). Since you are now acting director, here is the Task Order and associated materials I worked with for your action.

Thank you.
