

Idaho National Engineering Laboratory

NOTEGRAM

TO: Mike Falter

FROM: Dale A. Bruns *DAB*

DATE: February 10, 1988

SUBJECT: COLLABORATIVE WILDERNESS RESEARCH

Enclosed are the items we discussed yesterday on the phone. This includes a copy of Wiersma (1985), Fox et al. (1987), and information on the Campbell meteorological instruments. I would keep your proposal short as as possible: one brief paragraph on the met stuff and another one on the multimedia monitoring of trace elements. Since we talked, it seems that you might add one more paragraph describing the unique opportunities for research at the Taylor Ranch site (e.g. largest acreage of wilderness in lower 48 states, regular access, on-site researchers, and permanent facilities).

I checked with our contract people and the RFP sent to you is still good and the deadline is just a formality at this time. If you can get your response back to the contract people in the next week or two, we should be in good shape.

It was good talking to you again and I look forward to working with you on the project. Feel free to call me if you have any questions.

UNIVERSITY OF IDAHO
DEPARTMENT OF WILDLAND RECREATION MANAGEMENT

Interoffice Memorandum

DATE: February 5, 1988
TO: John Hendee
FROM: Bill McLaughlin
SUBJECT: INEL Monitoring Project

The INEL monitoring project information has been transferred to Mike Falter. He, on behalf of the Wilderness Research Center, will finish negotiating the contract and will most likely be the P.I. on the project. Should any major problems occur, Mike or I will contact you.
