

THE WILDERNESS RESEARCH CENTER  
AND  
TAYLOR RANCH FIELD STATION  
COLLEGE OF FORESTRY, WILDLIFE AND RANGE SCIENCES

INVITES APPLICATIONS FOR SUMMER STUDY  
UNDER A STUDENT WILDERNESS STUDY PROGRAM

Undergraduate independent study in the Idaho Primitive Area

\$700 honorarium plus expenses

Academic course credit (4 semester hours)

Undergraduates at the University of Idaho who are interested in spending a summer conducting independent research of their own choosing are invited to submit a research proposal to the Dean, College of Forestry, Wildlife and Range Sciences, for summer field studies at the Taylor Ranch Field Station in the Idaho Primitive Area. Proposals may cover any area of natural resource management/ecology. Awards will be made on a competitive basis to persons submitting the best proposals. Proposals will be judged on the basis of innovation, literature search, detail in methods used, potential for attainment of objectives, and educational value. The emphasis may be resource and/or sociologically oriented.

Students whose proposals are approved will receive academic course credit under FWR 499, Sec. 01, Wilderness Internship upon completion of the summer work and acceptance of a research report. Food, housing, air travel to and from the Taylor Ranch Field Station, and most equipment will be provided. An honorarium of \$700 will be awarded. Interested students are urged to discuss ideas with advisors and other faculty.

Submit proposals to Mrs. Kaufman, Office of the Dean, by March 27, 1981.
