Lisa J. Bate
2017 Mountain View
Moscow, ID 83843

Dear Lisa,

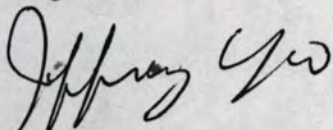

This letter serves to inform you officially that you have been accepted as a Taylor Ranch research intern for 1991.

The internship runs from 25 May to 2 August 1991. You will be involved in several projects including: raptor nesting surveys, ruffed grouse brood survival studies, bighorn sheep range carrying capacity studies, and establishment of photographic records of vegetation succession. A paper detailing the findings of one of these projects will be required by the end of fall semester, 1991. Also, you will be involved with the summer course, Field Research in Wilderness Ecology, as an instructor pertaining to one of the above projects. There also will be some additional chores associated with ranch maintenance but I hope to keep those to a minimum.

Salary is \$1400.00 for the seven week internship. You will be responsible for purchase of your groceries. You will need to obtain a work permit with the university (Personnel Office, Administration Building), which requires your social security number and an additional identification. You'll have to appear in person so you'll have to arrange this prior to 25 May. I'll arrange a flight from Cascade, Idaho through Arnold Aviation for the afternoon, 25 May. I can be reached at the ranch via radio phone (208) 382-4336 between 0800-0900 and 1700-1800 (RMT). Greg Gollberg is the other intern for this summer. He will be coming up from Texas and may contact you. Depending on your transportation, maybe the two of you could drive down together to Cascade.

Looking forward to seeing you in May. I'll be difficult to contact but hopefully this will all come together in some coherent manner.

Regards,

Dr. Jeffrey J. Yeo
Scientist/Manager
Taylor Ranch Wilderness Field Station

To Jeff Yeo:

The summer internship at Taylor Ranch is interesting to me for a number of reasons. The idea of doing wildlife research in a wilderness setting is especially appealing to me. I believe that the experience I would gain by initiating studies for different wildlife species, and participating in long term studies, would improve my research capabilities. Along with this, it would also enhance my ability to teach and inform the public about wildlife and ecological concepts. Also, I have always had a strong interest in animal behavior and believe that this position would allow me to observe wildlife in an environment where human influences are minimized. Additionally, I am working on expanding my collection of wildlife photographs, and it sounds like this position would provide ample opportunity to do this.

A resume and a list summarizing relevant coursework are included with this letter.

Sincerely,

Lisa J. Bate

Greg Gollberg
P.O. Box 2193
Texas City, TX 77592

Dear Greg,

Your application has been received. The committee was swayed by your eloquence, fervor, and obvious disregard for the English language. Difficulties arose when it was perceived that you were from Texas. I argued (persuasively) that you had little exposure to higher education in Texas and that you had always felt like a hostage while in Texas. So, it is my privilege and honor to inform you that you have been accepted as a Taylor Ranch research intern for 1991.

The internship runs from 25 May to 2 August 1991. You will be involved in several projects including: raptor nesting surveys, ruffed grouse brood survival studies, bighorn sheep range carrying capacity studies, and establishment of photographic records of vegetation succession. A paper detailing the findings of one of these projects will be required by the end of fall semester, 1991. Also, you will be involved with the summer course, Field Research in Wilderness Ecology, as an instructor pertaining to one of the above projects. There also will be some additional chores associated with ranch maintenance but I hope to keep those to a minimum.

Salary is \$1400.00 for the seven week internship. You will be responsible for purchase of your groceries. You will need to obtain a work permit with the university (Personnel Office, Administration Building), which requires your social security number and an additional identification. You'll have to appear in person so you'll have to come to Moscow prior to 25 May. I'll arrange a flight from Cascade, Idaho through Arnold Aviation for the afternoon, 25 May. I can be reached at the ranch via radio phone (208) 382-4336 between 0800-0900 and 1700-1800 (RMT). Lisa Bate is the other intern for this summer. She can be reached in Moscow at (208) 882-1757. Depending on your transportation, maybe the two of you could drive down together to Cascade.

Looking forward to seeing you. I'll be difficult to contact but you know where Taylor Ranch is so hopefully this will all come together in some coherent manner.
