Thank you for sending the letters of invitation to persons invited to serve on the Wilderness Research Center Technical Advisory Committee. You raised the question about representation by the State Fish and Game, the National Government, or a politician. The reason for this apparent omission is the fact that all of these areas of interest were recommended as being represented on the Executive Committee advisory to the Wilderness Research Center. Further, you will recall that one member from the Executive Committee was to be voted by that committee to serve on the Technical Advisory Committee and visa versa. This does not mean to imply that I would object to representatives of either or all of these groups serving on the Technical Advisory Committee. However, in view of the committees large size already you may wish to reconsider the addition of these areas of influence.

As regards an affiliate appointment for Dr. Hendee, I believe that it will be necessary to gain the concurrence of both the College of Forestry and the Graduate School to implement an appointment. I will discuss this matter with Dean Ehrenreich at the first opportunity.

I note at the bottom of your memorandum that you have made a note that Regent's action will be required for implemental of the Advisory Committee. If this is the case, I wonder if it wouldn't be well to consider the Executive Committee at the time. This committee, as you will recall, was to be appointed by the President. It would seem that if Regent's approval is required on these committees that confusion would be avoided if the committees were proposed to the Regents at the same time.

SUBJECT: Wilderness Research Center - Technical Advisory Committee

Dr. Erickson, Director of our Wilderness Research Center has indicated that your expertise would be invaluable in a technical advisory capacity to the Center.

At his request it is my pleasure to ask you to serve on the Technical Advisory Committee of the Wilderness Research Center for a 2 year term.

In these early years of development of the Center, the full scope and breadth of Wilderness Research should be explored and our future course plotted. We hope you will assist Dr. Erickson in this endeavor. Please advise.

Dear Mr. Stark:

Reference is made to your letter of September 1, 1971.

I will be glad to serve on the Technical Advisory Committee of the Wilderness Research Center at Idaho. I am sure this will prove beneficial to our wilderness program in Alaska and of course hopefully my ideas and knowledge of wilderness research will benefit your institution.

Sincerely,

Will Troyer
Wilderness Coordinator

Dear Dr. Stark,

I am indeed interested in wilderness research and will tentatively accept an assignment to serve on your Technical Advisory Committee.

Final commitment will depend on learning what will be expected of Committee members.

Sincerely,

R. Daubenmire
Professor
